	<p>still experience a number of leaks. Can all the services, be it water, waste, electricity etc cope with such an increased demand, and losing more land to help alleviate flooding, where will all the rainfall run off to now as it wont have the fields to help absorb it? A fact that scientists regularly predict will become a more common problem with our changing weather patterns. Whilst we appreciate affordable housing is in short supply, does this area really deserve to be disfigured by a development of this size and, at a time when open green space is being hailed as a 'healer' and everyone is being encouraged to go out and benefit from it, why do we still insist on destroying it, let alone the untold damage we are doing to our wildlife.</p> <p>Thank you for taking the time to read this.</p>	<p>junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to water supply, the developers are aware of the requirement for upgrades to the water supply network and water treatment works (which is identified in the Water Cycle Study).</p> <p>Should the development go ahead, it would be phased appropriately to ensure it does not outpace delivery of essential network and treatment upgrades (See IDP).</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an integrated water supply and drainage strategy which will consider existing related infrastructure on the site.</p>

Respondent (with lpr ref)	Response	Council Response
Iain & Kelly Russell (lpr2333)	<p>We raise the following objections based on our knowledge and experience of living in the area to ensure that the same planning mistakes made on Kennet Heath are not repeated.</p> <p>The proposed development will generate a significant amount of additional traffic at already busy junctions, of particular concern is the railway crossing. It is unusual to find the barriers up at the best of time and the waits are frequently in excess of 20 minutes and when the barriers do raise they are quickly back down again. The level in increase of traffic generated by the development will result in queues to cross the railway back to the A4 which will effectively block a major thoroughfare between Newbury and Reading and a commonly used diversion in the event of the M4 being closed. These already busy junctions on the A4 will struggle to accommodate the additional traffic even with a bridge across the railway. Such as a major development and infrastructure project in Thatcham must include a bridge across the railway, as per the requirement at Newbury Racecourse, and relocation of the businesses to accommodate it.</p> <p>The additional vehicles will mean an increase in traffic along The Ridge to reach the M4. Already a large proportion of vehicles speed along the 30MPH area, whilst a traffic survey has been conducted it was located close to the bend where traffic would be slowing down anyway so it is not a valid assessment of the speed. This survey needs to be repeated along a more sweeping/straight section of the road to accurately assess the real speed of the traffic. The road also has no footpaths which is already dangerous for children being walked to school and other pedestrian users. In addition to the pedestrians a significant number of cyclists and horse riders use The Ridge which has few places for a vehicle to safely pass, especially roads to the east which have a large number of blind bends meaning that the increase in traffic from the proposed development will increase the danger to all road users.</p> <p>Any such development needs to contain adequate parking arrangements, social engineering was tried on Kennet Heath to reduce the number of cars per household but has resulted in many cars having to park dangerously,</p>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>near to or on junctions and pavements and a significant amount of residential tension.</p> <p>Effectively building over the fields to the north of Thatcham will increase the flash flooding risk to estates south of the development, this risk is not one that appears on the environmental agencies modelling not part of the standard planning process and will need to be completed and accommodated within the design.</p> <p>There is a significant area of green space essentially the size of a village, why can the amount of housing not be distributed across the West Berkshire region preferably on brownfield sites. The area will also need to undergo independent environmental assessment to determine if there any endangered species.</p> <p>Inclusion of the shops on the estate other than a convenience store will be harmful to the businesses within the town centre as the centre becomes more and more disparate. Significant amounts of investment are required to improve Thatcham town centre to increase footfall and this should be included as part of the development plan.</p> <p>Has any consideration been made as to the impact of changes to working practices been made as there will be a significant amount of empty offices as a result of a wide shift to home working which will free up existing buildings for conversion to residential homes, thereby reducing the magnitude of the proposed development.</p> <p>It will completely surround the Crematorium at Thatcham which was, as I understand, placed there to be away from residential properties and has constraints placed on it.</p> <p>A defined pathway for the site to be handed over to the Council for road maintenance etc must be included in plans with penalties applicable to the developer for delays. There are many developments now (Kennet Heath</p>	<p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>In relation to the plan being prepared prior to the coronavirus pandemic, the full impact of the COVID 19 pandemic will not be fully apparent for some time. The LPR is a long term strategy to 2039, during which time a review will be conducted every 5 years. The impact of changes in response to macro and local economic factors will be assessed through subsequent reviews, once such implications are realised.</p>

Respondent (with lpr ref)	Response	Council Response
	Included) where hand over has been delayed for many years resulting in difficulties selling property.	
Debbie Reynolds (lpr1305)	<p>This response addresses two major documents which have been issued for consultation at the same time. It makes seven recommendations to address weaknesses in Chapters 3, 4 and 5 of the emerging Local Plan and opposes the housing allocation in SP13, especially SP17 North East Thatcham Strategic site. The SP17 proposal is disproportionately big, poorly sited and would have too great an impact on the surrounding population, infrastructure and environment.</p> <p><b>Chapter 3 Shaping West Berkshire Vision and Objectives</b></p> <p>The chapter on ‘Our Vision and Strategic Objectives’ need to be strong and future proofed.</p> <p>The vision statement in para 3.4 is welcome and that West Berkshire’s landscape in the North Wessex Downs will remain of outstanding value and its biodiversity more abundant in settlements and the surrounding countryside.</p> <p>However strategic objectives on Heritage, AONB and Green infrastructure do not spell out a compelling vision for nature. Written strategic objectives on nature are sadly lacking. This means the Council’s plan lacks ambition for the future and demonstrates no apparent priority is attached to the natural environment, biodiversity or nature conservation</p> <p>It is remarkable that the clear global concerns on biodiversity, species loss, habitat loss and climate emergency, well-rehearsed in section 5, are so condensed into inanimate, inherited and purely visual aspects of our area. The council should aim do far more to respond to peoples concern that this is not only under threat globally but also imperilled by weakness in their own plans.</p>	<p>Please note, Council responses to comments not relating to SP17 are included within the relevant policy comment response table.</p> <p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government’s standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p> <p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• <b>Recommendation 1 – Add in a new standalone strategic objective on Nature for Future Generations</b> <ul style="list-style-type: none"> <li>○ Gives a specific means to deliver the vision of abundant biodiversity across the entire area,</li> <li>○ Holds the council to account for concerns of local people on delivery of Section 5 currently called ‘our environment and surroundings’,</li> <li>○ To be measured by conservation of existing assets and the creation of new ones.</li> <li>○ Ensure the necessary means to deliver is recognised, delivered upon and funded in appraisals put forward by developers.</li> </ul> </li> </ul> <p><b>Chapter 4 Development strategy – our place based approach</b></p> <p>The spatial strategy SP1 and SP2 and supporting text are important. SP1 states: ‘Thatcham will be a focus for regeneration, for new housing and for improved provision of services and facilities. A new urban extension to the north east of the town will provide a new residential neighbourhood with supporting facilities and green infrastructure (Policy SP17). Opportunities will be taken to maintain and enhance the identity of Thatcham separate to that of Newbury and its surrounding rural settlements’.</p> <p>However the red-lined envelope depicted in the Thatcham growth study fails to address the necessary separation and is in direct contradiction to this strategy. The separation of Newbury and ‘surrounding rural settlements’ from places identified in the development strategy (e.g. Thatcham regeneration) needs to be strengthened in every aspect of Council thinking and policy.</p> <ul style="list-style-type: none"> <li>• <b>Recommendation 2– The LPR must step up and improve its policy, internal and external guidance on separation.</b> The requirement for a strategic gap, to include buffer zones, with recognition of village visions prepared by Parish Councils is</li> </ul>	<p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However,</p>

Respondent (with lpr ref)	Response	Council Response
	<p>essential. It must ensure that sufficient budget is allocated to meaningful strategic separation by developers in their appraisals. Pre-commencement conditions must be set to enforce this.</p> <p>SP2 states the proposed arrangement if an application is deemed to be major development with proximity to the AONB and aspects that further consideration will take account. However the consultation on the Local Plan Review and a simultaneous consultation of a detailed growth study, which is clearly a major development, is a seriously flawed procedure. This is confusing to local people who want to express their views, gives the clear message that the parameters in the plan are already fixed and therefore one or other consultation has a predetermined outcome. In addition the time table for two such large consultations is unfair.</p> <ul style="list-style-type: none"> <li> <b>Recommendation 3 – Complete consultation on the LPR to make the much needed improvements.</b> This should include removal of new allocations on larger sites until after consultation on specific growth studies to ensure the council, residents, developers and other stakeholders have the fairest possible consultation. This must apply to residents impacted by any new proposed SP. </li> </ul> <p>Spatial strategy SP3 and 4 reflect many aspect of national policy. However there is no evidence that the policy alteration associated with exclusions around AWE Burghfield or Aldermaston have been taken into account centrally, thereby updating the national allocations. Residents can rightly expect the Council to have challenged this at the highest level, including by Judicial Review, before producing a plan B such as the Thatcham development. All the materials in the review predate the dramatic alterations associated with online shopping and the COVID-19 pandemic. Therefore it is clear that the housing allocations are flawed in several respects.</p>	<p>a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• <b>Recommendation 4 – provide clear evidence of UpToDate national comparable figures for developable land.</b> This must demonstrate that reassessment centrally has been undertaken, demonstrate the impact of this and COVID-19 are all accounted for in the Local plan review. Set demanding targets for conversion of brown field commercial property to residential.</li> </ul> <p><b>Chapter 5 Our environment and surroundings – responding to climate change</b></p> <p>There are several important and strategic statements to emphasise here, in particular:</p> <p>‘To improve wildlife habitat and species conservation and connectivity to allow for movement in response to climate change in accordance with policy SP11</p> <p>Ecological distinctiveness – design proposals will create habitats and select species that are locally characteristic, taking opportunities to design wildlife habitats into the fabric of buildings and enhance wildlife connectivity in accordance with policy SP11</p> <p>A landscape does not have to have a designation to be valued locally. Outside the AONB, the River Kennet, from Newbury to Reading, lies within a distinctive broad corridor of an open lowland landscape characterised by a variety of wetland habitats including wet meadow, reed bed, and flooded gravel workings.</p> <p>Contribute to biodiversity net gain and seek opportunities to use green infrastructure to extend wildlife corridors, particularly in urban areas and where it contributes</p>	<p>With any application that would come forward on this site, the developers would be expected to submit a ‘masterplan’ / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to the concerns on the potential impact on Bucklebury Common, the development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population).</p>

Respondent (with lpr ref)	Response	Council Response
	<p>to nature recovery networks.</p> <p>However the absence of the strategic priority reduces their impact and will not ensure their delivery.</p> <ul style="list-style-type: none"> <li> <b>Recommendation 5 – In addition to the new proposed Strategic Objective the Council should deliver its ambition by adding a new Chapter - The Nature Delivery Plan - to the document.</b> This must demonstrate the design, commitment and resources it will allocate to Nature for the future generations. This is what residents of the existing and any new houses will expect. </li> </ul> <p><b>Chapter 6 Delivering housing</b></p> <p>SP 13 lists the sites for residential and mixed use in Newbury and Thatcham for sites 1 ha or more. Here it adds in NE Thatcham as SP17 for the first time. This draft local plan review and associated report therefore set out a huge increase in development area and house numbers.</p> <p>There is no justification for such an increase in allocation, and in SP17 the proposal of 2500 houses is completely disproportionate for Thatcham and surrounding areas. In the opinion of Bucklebury Parish Council the figures are flawed and therefore withdrawal for a fundamental review and meaningful justification is essential.</p> <p>The impact on the local setting and breach of the Floral Way boundary, objections raised by the North Wessex AONB, are not addressed. No case has been made for ribbon development and the ‘Colthrop village’ concept is a completely unacceptable joining up of Midgham and Bucklebury Parishes with Thatcham and should be removed from any future considerations.</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>Any housing allocation must demonstrate local benefits to the natural environment.</p> <p>The model for infrastructure provision is dependent on realising house sales, therefore is not 'baked-in' or inevitable. A transparent, enforceable commitment to ensure fair share of profit and investments in local assets is an essential pre-commencement commitment which should be policy for any development.</p> <p>The level of ambition for infrastructure provision and biodiversity gain is insufficient. No budget is allocated to achieving 10% biodiversity gain in the appraisal of viability, the design features do not demonstrate any input from conservation professionals, nationally or locally.</p> <p>Green and biodiverse are not equivalent. The concept, beneficiaries and impact of a new strategic country park are unclear. Any future consideration of the idea must make clear that is outside the area of allocation and protected in perpetuity.</p> <p>If land at 'Colthrop village' is no longer needed for farming it should be entirely devoted to biodiversity net gain and used to establish a fully functional wildlife corridor between the Kennet valley and Bucklebury heathland.</p> <p>Numerous aspects of the Bucklebury vision have been ignored. It is appears that the views of residents on the edge of the proposed area were either not sought or not taken into account.</p> <ul style="list-style-type: none"> <li>• <b>Recommendation 6 – SP13 is unacceptable and needs alteration, particularly removal of the proposed NE Thatcham line item.</b> All the reasons are set out above and in the Bucklebury Parish Council and Thatcham Town Council submissions.</li> </ul>	

Respondent (with lpr ref)	Response	Council Response
	<p><b>SP17 North East Thatcham Strategic site allocation</b></p> <p>SP17 sets out that ‘The Council will be supportive of proposals which have regard, and positively respond, to the master-planning work contained in the Thatcham Strategy Growth Study (2020)’. It then lists features the NE Thatcham Strategic allocation may be expected to deliver. However the residents of Bucklebury and Thatcham do not see it that way and their responses should give the Council grave cause for concern. The main objections are listed below:</p> <ul style="list-style-type: none"> <li>• Flawed housing demand analysis</li> </ul> <p>The analysis of housing demand predicating this draft proposal relies on out-of-date information. It fails to take account of the most major medical, social and economic catastrophe to impact our lives in the last 100 years. The Covid – 19 pandemic has transformed the way people work, travel and their housing needs yet this factor is ignored in the proposals. Furthermore, taking WBC’s own housing demand figures, these show a need for less than 1700 homes not the 2500 proposed.</p> <ul style="list-style-type: none"> <li>• Strategic Gap</li> </ul> <p>A tenet of past planning in West Berks has been the maintenance of strategic gaps to separate communities. Until this proposal was tabled, the land north of Floral Way has provided the gap between Thatcham and Bucklebury. The proposal all but eliminates the separation and will visually and socially break natural community boundaries. Breach of the strategic gap has been cited by WBC to refuse planning applications in the recent past. It is incomprehensible that its loss is now proposed.</p> <ul style="list-style-type: none"> <li>• Traffic</li> </ul> <p>A development of the scale proposed will generate considerable traffic but the analysis in the proposal underestimates the volume and impact on the</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>Parish. It is assumed that the bulk of the new traffic will use the A4, accessed via Floral Way. However, the A4 is already overloaded at peak times and new residents will look to find alternative routes. These inevitably will be through the Parish for those looking to access the A34 and the M4. The roads through these villages are ill suited to additional traffic; they are rural, single carriageway roads mostly lacking footpaths and featuring blind bends. Speeding is a well known problem in the Parish and more cars will make a dangerous situation worse. The village roads are used by pedestrians, horses and cycles. Additional traffic makes accidents more likely and will endanger children walking to school.</p> <ul style="list-style-type: none"> <li>• AONB and Bucklebury Common</li> </ul> <p>It is clear that the proposed development to the north-east of Thatcham involving 2500 houses would have a big influence on the local wildlife.</p> <p>The proposed development abuts Bucklebury Common and AONB. This development would have a lasting and negative impact on these special environs. The impacts fall into two categories; those that impact the AONB directly and those resulting from the inevitable increase in visitors. The Common is protected because of its flora, fauna and its situation. It contains remnants of ancient and fragile habitats that are home to rare and protected wildlife. Importantly the plants in and bounding the AONB will suffer and the Common will be put under pressure from additional visitors. The AONB is already witnessing habitat damage from walkers, cyclists and motorised vehicles. The visitor numbers, from the proposed development, would exacerbate damage to a struggling ecology.</p> <p>Bucklebury Common, one of the few remaining areas of lowland heath lies just a kilometre or so to the north-east. It is well known for some special birds in particular the nightjar, but also the woodlark, tree pipit, stonechat and woodcock. These nest on the ground are very susceptible to disturbance especially by dogs. The development would put much more</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>pressure on the heath and make successful breeding of these species much less likely.</p> <p>So the council's attention should focus on this impact of the proposed scheme not highlighted in the Biodiversity and Green infrastructure. Just visible at the north east edge of the plan on page 36 is the edge of Bucklebury Common, the eastern portion of which (east of the settlement of Upper Bucklebury) is an area of lowland heath, which has been restored by conservation management. This site is already subject to considerable recreational pressure. Heathland is a priority habitat identified in the Berkshire Local Nature Partnership Biodiversity Plan, and holds breeding populations of two of the priority species in the plan, Nightjar (<i>Caprimulgus europaeus</i>) and Woodlark (<i>Lullula arborea</i>). Another species on the UK's list of "Red Data" birds, Woodcock (<i>Scolopax rusticola</i>) also occurs, a species which has suffered a dramatic contraction in its UK breeding range (more than 50% in the 25 years to 2010) and numbers. These are ground nesting birds, vulnerable to disturbance. The wider area forms one the Berkshire's Biodiversity Opportunity Areas (BOA), known as Bucklebury Plateau (see - <a href="http://www.tverc.org/cms/sites/tverc/files/Buckleberry%20Plateau%20Description.pdf">http://www.tverc.org/cms/sites/tverc/files/Buckleberry%20Plateau%20Description.pdf</a>)</p> <p>As no doubt the council is aware, lowland heath is a threatened habitat important for a number of species of wildlife. Its global distribution is limited, with the UK having about 20% of the world's remaining area. About 80% of the UK's lowland heath has been lost since 1800. The Thames Basin Heaths of north Hampshire, west Surrey and south east Berkshire are an area of Special Protection (SPA) and now benefit from planning policies requiring the provision of suitable areas of natural greenspace (SANGS) as mitigation for any new residential development within 5 km of the heathland areas.</p> <p>In this case the site would introduce 2500 new households almost all within 2 km of Bucklebury Common, and we consider that mitigating the impact of the increased recreational pressure, and the opportunity to enhance biodiversity should have formed part of the scheme, consistent with current</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>Local Plan Policy CS17, emerging policy SP11 and NPPF paragraphs 170 and 175.</p> <p>The restored area of Bucklebury Common referred to above is currently a relatively small fragment of heathland maintained by voluntary effort. It does though form part of a larger area within the Bucklebury Plateau BOA extending to the west of Upper Bucklebury that has potential for habitat restoration as heathland.</p> <ul style="list-style-type: none"> <li>• <b>Recommendation 7 – remove SP17 from the Local plan review.</b></li> </ul> <p><b>Conclusion</b></p> <p>In summary, I have serious concerns about the emerging draft Local Plan which can be addressed through adoption of the seven listed recommendations. Otherwise the impact on West Berkshire, Thatcham and especially the village of Upper Bucklebury will be very damaging. With increased traffic, a steady flow of visitors the consequential damage to the local environment, the character of our area would change forever and not for the better.</p> <p>Recommendation 7 – remove SP17 from the Local plan review. Conclusion</p> <p>In summary, I have serious concerns about the emerging draft Local Plan which can be addressed through adoption of the seven listed recommendations. With increased traffic, a steady flow of visitors the consequential damage to the local environment, the character of our area would change forever and not for the better.</p> <p>The representation questions to adequacy of protection of "Nature for Future Generations" (to include a Nature Delivery Plan); the necessary separation</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>of Thatcham (and other Parishes) from Newbury; the flawed procedure relating to the Thatcham growth study and its simultaneous consultation with the LPR to the disadvantage of local community; the lack of challenge by the Council to "national allocations" in the light of the AWE exclusions and the impact of COVID and on-line shopping; the increase in overall housing numbers is not justified and the proposal for Thatcham is disproportionately large with a lack of consideration and provision for infrastructure, the natural environment and local community vision.</p>	
<p>Louise Norton (lpr1311)</p>	<p>Please may I voice my concerns about the proposed housing development in Thatcham Lawrence Lane/Floral way.</p> <p>We already have an overstretched health service and educational allowing this additional residents/households will undoubtedly cause the schools and the health centres to be overwhelmed.</p> <p>Local residents have to wait well over the average time for an appointment having these additional housing will impact directly on patient care.</p> <p>Another concern is the additional traffic to an already busy roads and the disruption of wildlife.</p>	<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The</p>

Respondent (with lpr ref)	Response	Council Response
		<p>package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p>
Glen Higgins (lpr1092)	<p>I am writing to express my objection to the proposal to build a further 2500 homes in Thatcham.</p> <p>I have lived in and around Thatcham for over 20 years and cannot support the plan for such a lot of extra housing on a greenfield site. I object on the grounds of the overdevelopment in a small town which is already stretched to breaking point in terms of infrastructure,- i.e. schools, gp services, traffic and other public facilities as well as the extreme pressure on the rail crossing at the station.</p> <p>I think this plan needs to be reconsidered in the light of these factors and either retracted or reduced to take account if the extreme pressure this will put on the local area.</p>	<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements</p>

Respondent (with lpr ref)	Response	Council Response
		<p>being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p>
<p>Martin Sparkes (lpr1096)</p>	<p>I would like to register my objection to the proposed development of 2500 houses on land between Upper Bucklebury, the A4 and Floral Way. This overdevelopment would lead to:-</p> <ul style="list-style-type: none"> <li>• loss of rural countryside</li> <li>• loss of Thatcham green belt,</li> <li>• increase the level of traffic and congestion and associated pollution</li> <li>• would put additional strain on the already stretched infrastructure in the area</li> </ul>	<p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>The site is not within the Green Belt (there is no Green Belt in this District).</p>

The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p>
Trevor Franklin (lpr1105)	<p>We have lived here for over 40 years now and have seen a massive change since moving here from near London. I think the proposal for 2500 houses is absolutely disgusting we have our Doctors Practice only giving 10 mins or less so they can cope with all the new people coming into the area. That would make around 7500 new patients and possibly that amount of cars on the road.</p> <p>The developers don't give a monkey about where they build as long as it brings in profit the owners live in massive houses with acres of fields around them, if this happened near them, they would kick up a fuss just like people here will do, I hope.</p> <p>We don't have enough schools for the kids now let alone if another 2500 come here or Doctors Surgery my doctor has 3000 patients alone so don't tell me that its going to improve things because it won't it will make the are worse than it is now.</p> <p>There will be 7500 more on the roads plus more cars parking on roads to will be an issue as developers like to cram in as many as they can in an area and stuff the consequences to people living there.</p> <p>I want it know I hope this development along with the one down Lower Way is shelved we don't want any more people till the services are bang up to date and by that I mean not just a school to cater for the building being done but enough so the existing ones can have a more up to date school</p> <p>Changes: I hope this development along with the one down Lower Way is shelved</p>	<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. Tim Williams (lpr 1106)	<p>The local plan review draft dated December 2020 proposes the development of 2500 houses to the North East of Thatcham. I attended a Bucklebury Parish Council consultation in January 2021. I was informed that this area is not the preferred option for the development of a residential district, but that West Berkshire Council had been forced by the widening of the Burghfield AWE DEPZ and the failure of the developments South of Newbury to progress. We have seen that the other constraints on planning policy in West Berkshire are forced in to a relatively small area due to the AONB and the flood plains of the Thames, Kennet and Lambourn Rivers. We note too that it is West Berkshire Council policy to run a carbon neutral system by 2030.</p> <p>We are writing to object to this proposed development on the grounds of inadequate infrastructure planning, a failure to provide adequate safeguards for the Green Gap to the North of Thatcham and lack of adequate planning for traffic flows.</p> <p><b>Risks</b></p> <p>The development identified falls partly within the Aldermaston OCZ on the proposal's Eastern boundary.</p> <p>Parts of the proposed development would impact on water flows in to the current settlement of Thatcham.</p> <p><b>Inadequate infrastructure</b></p> <p><b>a. Health</b></p> <p>The plans presented do not identify health infrastructure. I understand that this requires cooperation with the relevant NHS body, but there is no mention of this in any plans that I have seen. It would be sensible to require</p>	<p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>that the developers <b>provide a site for further doctors surgery/health centre</b> in Thatcham and a contribution to the development of the Newbury and District Community Hospital..</p> <p><b>b. Transport</b> The plans do not identify public transport networks that will be required to mitigate the numbers of new residents travelling to work from the area North East of Thatcham. The distance from Thatcham station is likely to inhibit individuals from travelling by train and the major bus routes do not reach this area except at the extreme Eastern End on the A4. As a result there will be increases in traffic flows on existing roads including Lawrences Lane, Harts Hill Road and Cox's Lane. Of these Lawrence's and Cox's Lanes are single track winding roads with few passing places. Harts Hill road is a winding two track road with steep gradients which leads traffic in to the AONB and the villages of Bucklebury, Chapel Row and Bradfield Southend. This road will become a favoured route for drivers during the rush hours because it is faster than the parallel A4 to Reading. Part of the development should therefore include <b>traffic calming</b> measures to discourage use of the road as a rat run. I understand that there are proposals to change the road layouts to ensure that through traffic does not use Floral Way in preference to the A4. It appears to us therefore that there will need to be some improvements to the <b>traffic flows</b> along the A4. This might include a requirement on developers to contribute to the cost of providing the overbridge for the railway in Thatcham. <b>Cycling</b> does not appear to have been considered as a major transport modality. Cycle paths should be developed along the A4 corridor that separate cyclists from both pedestrians and motorists.</p> <p><b>Risk to landscape</b> Although the plans of proposed buildings do not include the slopes of the hills leading to the boundary of the AONB, there is no provision for safeguarding the landscape amenity value of the slopes. As an example, one might cite the view from the end of Long Grove where it meets open farmland. We would like to see some form of <b>legal protection for the green</b></p>	<p>Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>The site alongside the larger site area, is well related to the existing town of Thatcham. It is in close proximity to a range of services and facilities, including the train station. Thatcham is an urban area with a wide range of services and opportunities for employment, community and education. Development of a strategic nature at this site would support the service provision and regeneration that Thatcham requires.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). 		text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.
Wynne Frankum (lpr1108)	<p>I am concerned about this development for many reasons. Below I have listed some that most concern me:</p> <p><b><u>Bucklebury Vision.</u></b> This plan is contrary to Bucklebury Vision which states: <b>Overall picture.</b> <i>To ensure the future viability of the community is maintained. To maximise rural conservation and protection from pollution.</i> <b>Community and population.</b> <i>The local residents highly value the rural nature and natural beauty of the area in which they live and are keen to protect this for future generations to enjoy.</i> <b>Landscape and Environment.</b> <i>3G2. the natural beauty of the landscape, visual quality and amenity of the area should be conserved and enhanced.</i> <b>Highways, Communications and Traffic</b> <i>6G1. any development which creates unacceptable levels of traffic would be resisted. 6G2. the reduction of vehicular traffic in order to reduce traffic on unclassified roads is supported.</i></p> <ul style="list-style-type: none"> <li>Upper Bucklebury is a vibrant village sharing a strong community spirit with the rest of the parish. Peaches Stores and the cottage Inn are both Community Assets reflecting the importance in which they are held by parishioners. Peaches Stores offers a vital service to locals but the shop also relies on the custom of passing traffic .It is proposed that there would be a new roundabout on the Harts Hill into which roads from the new estate would feed and where it is proposed to build shops.. If this were to go ahead it could jeopardise the viability of Peaches Stores. Many locals walk to the shop, significantly reducing the carbon footprint. These are strong reason for protecting this valuable village asset</li> </ul>	<p>The development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population). Highway works and active travel routes would assist in directing residents to using the A4/Floral Way rather than Harts Hill Road, and using an enhanced cycling and walking network to travel, including to Thatcham train station.</p> <p>Residents would make use of the newly provided education facilities on the site, which would not be expected to purposefully attract pupils from Bucklebury primary school.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). Respondent (with lpr ref)	Response	Council Response
	<p>The northern boundary of the proposed development is Blacklands copse and Long Grove Copse, close to the parish boundary. This application would have a detrimental impact on the land and villages to the north, particularly Upper Bucklebury and the surrounding parish.</p> <p>The transport assessment is not satisfactory. The A4 is already heavily congested and the facilities at the station inadequate .An substantial increase in use of the Harts Hill, Broad lane and surrounding rural narrow roads would be of grave concern to the parishioners of Bucklebury.</p> <p>I was a member of BPC for 25 years and Chair for 12 until 2019.During that time there were two main ongoing concerns in the whole parish; increased traffic volume and speed throughout the parish .The Harts Hill and Broad Lane are currently used as a rat run for traffic going both N. E. and W .If this development went ahead the problems this causes would be substantially increased.</p> <p>The second major concern was the recreational use of 4x4's and motorbikes on the common causing significant surface and environmental damage . Noise pollution on the common and the danger to pedestrians were also problems.</p> <p>The footpath from Colthrop to Long Grove runs through the proposed estate. Long Grove is an unadapted road maintained by the residents. It has seen increased footfall from people accessing Bucklebury and the surrounding country side during Lock down causing it to deteriorate. This use would increase substantially. The residents should not be expected to maintain a public right of way that could see heavily increased use of pedestrian and bikes.</p> <p>This right of way would bring substantial numbers of people seeking informal recreation, both cyclists and pedestrians, into all parts of the parish. Our parish contains rare habitats including lowland heath and ancient woodland .These are fragile and would be adversely affected if many more people used the area for recreation. In particular the rare nightjars, which are ground nesting birds, would be greatly disturbed in the nesting season particularly by dog walkers. Should this development go ahead, in order to protect and mitigate the increase in population on the surrounding countryside, adequate recreational facilities should be provided on the site. These should include playing fields, children's play areas and sports</p>	<p>increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to the Climate Change Emergency, The emerging draft LPR includes a policy that specifically covers climate change (policy SP5). This requires that all development should contribute to West Berkshire becoming and staying carbon neutral by 2030.</p> <p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs development to the most sustainable locations in the district.</li> <li>• Policy SP6 (Flood Risk) directs development to areas least at risk of flood risk.</li> <li>• Policy SP22 (Transport) requires that any development that generates a transport impact will be required, amongst other things, to have regard to West Berkshire's declared climate emergency and minimise the impact of all forms of travel on the environment.</li> <li>• Policy DC3 (Building Sustainable Homes and Businesses) looks at building sustainable homes and businesses,</li> </ul> <p>Any development site will have to comply with the aims and objectives of the plan.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>facilities. All these facilities should be included in the budget, as well as the country park which needs a far more detailed environmental plan.</p> <p>There is no commitment within the document to regenerate or provide investment in Thatcham town centre despite the rapid growth and lack of investment in the town over many years.</p> <p>The infrastructure plan was not published.</p> <p>There is no commitment to a zero carbon footprint, despite that being a commitment by WBC and Thatcham Town Council to be carbon neutral by 2030.</p> <p>I have read many of the concerns fellow parishioners have raised during this consultation and I share them all,</p>	
Alan and Brenda Dunkerton (lpr1109)	<p>As residents of the village of Upper Bucklebury for the last 29 years and enjoying its most delightful rural environment we would like to place on record our most strenuous objection to this quite unnecessary proposal which in our view is not required at this location, it will effect the rural enviroment of this peaceful locality to the detrement of the residents and wildlife of this green and pleasant land, if these houses are required there must be more suitable locations in West Berkshire that would cause much less damage to the rural environment.</p>	<p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p>
Robert Jolley (lpr699)	<p>The development is of totally unsuitable size, will overwhelm the area and destroy its character. The site is totally inappropriate, extending Thatcham beyonds its current natural curtilage and destroying valuable open space and greenfield sites. It is the worst sort of urban sprawl and runs entirely contradictory to WBC stated and correct preference for development to be on brownfield sites.</p> <p>Changes: I would like the plan to be dropped entirely and the land left as the farmland it currently is.</p>	<p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. 		<p>package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>The site is not within the Green Belt (there is no Green Belt in this District).</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p>
Belinda Matthewman (lpr1111)	I live in Beenham. I would like to object to the proposed Thatcham development . This is an enormous development which will result in huge traffic congestion and increased pollution . The loss of rural countryside will be devastating to the environment. It will destroy the Thatcham green belt	In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic

Respondent (with lpr ref)	Response	Council Response
	<p>which is essential to the environment and wellbeing of the present inhabitants. The developments along this area are already enormous and the traffic along the A4 unbearable.</p>	<p>by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p>
R Hadley (lpr1112)	<p>How much more of this country is going to be built on before someone sees sense and calls a halt. You have already filled in between Newbury and thatcham and now you want to build east towards Reading and no doubt Reading will be looking to build west so in a few years Reading Newbury and all points in between will be one big urban sprawl. ENOUGH is ENOUGH build only on brownfield sites and save the green spaces of the shire counties!!!!</p>	<p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver ‘a network of green infrastructure which will include a new community park linking Thatcham to the AONB.’</p>
<p>Anne Matthews (lpr1113)</p>	<p>I would like to submit my concerns about the effect the above proposed development would have on the surrounding area.</p> <p>The local roads would become more congested. The level crossing at Thatcham station would become even more of a bottleneck and cause people to find alternative routes through nearby villages on roads not suitable for heavy traffic.</p> <p>The footpath from Colthrop to Upper Bucklebury would provide easy access to Bucklebury Common. Extra footfall on the Common would disturb ground nesting birds, such as the Nightjar, which the Bucklebury Common Conservation Group have for many years strived, successfully, to encourage and protect.</p> <p>The Barn Owl Group, part of West Berkshire Countryside Society, have 9 active Barn Owl nest boxes within 2 Km of the proposed development. The loss of green fields, which provide feeding grounds for the owls, would have an adverse effect on their breeding.</p> <p>The current GP surgeries are already at full capacity so cannot provide care for more patients.</p> <p>More parking in Thatcham town centre and at the station would need to be provided.</p> <p>We are being encouraged to plant more trees to help towards alleviating global warming. If we need more housing, it would be more environmentally</p>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. 		<p>walking network to travel, including to Thatcham train station.</p> <p>Residents would make use of the newly provided education facilities on the site, which would not be expected to purposefully attract pupils from Bucklebury primary school.</p>
R Wright (lpr1120)	<p>I am writing to lodge my objection to the proposed development of houses in Thatcham.</p> <p>I consider it to be an over development of what is already a heavily developed area in terms of housing stock. The infrastructure is already at its maximum capacity (Covid excepting), so the additional proposed housing will only make this unbearable for existing residents and road users. The A4 is often clogged with traffic at peak times of the day or when works occur on the A4 in the area, which is often. Traffic grinds to a complete halt and there is an increase in air pollution as a result. This has a detrimental affect on existing residents and businesses on or near the A4 too, as the buildings already shake with the volume of traffic and joining/ leaving the A4 can take a ridiculous amount of time.</p> <p>The schools and class sizes are already large and at capacity, so surely there won't be room for additional pupils!! The local hospital, GP surgeries, fire service and the like will be pushed to the limit.</p> <p>The green spaces, which West Berkshire can boast, will be eroded so much, that it will no longer be a healthy place to live, and wildlife that comes to the area will steadily be pushed out. The existing housing developments have very small, if any garden space, so in terms of the negative environment impact and the impact on mental health, I believe out ways the need to expand the area on such a massive scale.</p> <p>I stress that it will be the WRONG thing to do.</p>	<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. 	<p>break up/disagree on how to satisfy WBC planning needs so a similar risk.</p> <ol style="list-style-type: none"> <li>4. Redevelopment of brownfield sites &amp; where businesses close is a priority, including in town centres where shops are closing, why not THA1.</li> <li>5. There is time to still put in place a plan with more options so not just really only THA20 and remove the 'threat' of developers going direct to government</li> <li>6. CA12 is considered disconnected.....not clear why this is unsuitable with infrastructure</li> <li>7. THA14 is not adjacent to the settlement boundary – it would only be via creation of this site</li> <li>8. Is this site trying to find house volumes allocated to other districts who haven't found sites</li> <li>9. Would expect to see more detailed assessments undertaken or a plan to do so for other sites offered. <ol style="list-style-type: none"> <li>1. It appears these have been dismissed without similar level of consideration</li> <li>2. A continued requirement in future will presumably lead to no choice but to develop on AONB &amp; flood plain so why not considered in this plan.</li> <li>3. Building houses on flood plains or on lakes/water ways is more advanced than in previous years, and it is quite possible according to architects to protect the areas developed together with not causing flood issues further along to other areas – it may not be as cost effective for developers to build in WBC due to the constraints but this needs to be accepted if we are to build here, and other areas of UK/countries seem to manage ok e.g. Norfolk, Netherlands.</li> </ol> </li> <li>10. Whilst 40% affordable housing may be the desired outcome, this is normally distributed across many developments in different locations giving residents wishing to live in such housing varied location options. However, 40% of 2500 houses risks putting a disproportionate volume of the county's overall number in real terms in one location</li> </ol>	<p>planning commitments (unallocated sites with planning permission), many of which are brownfield sites.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Though delivery on a particular site can never be guaranteed, the Council closely monitors the position, annually updating the Five Year Housing Land Supply. At present the Council is able to demonstrate a supply of 7.3 years for the period to 2026.</p> <p>The Council's strategy is for a mix of sites: strategic sites such as Sandford Park and North East Thatcham, which can delivering infrastructure, facilities and significant numbers of affordable homes and a larger number of medium and smaller sites, including brownfield sites within settlement boundaries. The strategy seeks to focus development in the more sustainable settlements of the District rather than distribute development more evenly. This approach continues that set out in the Core Strategy which went through all stages of consultation, examination and adoption by the Council.</p> <p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government's standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p>

Respondent (with lpr ref)	Response	Council Response
	<p>11. Is the current housing stock actually all lived in as opposed to sold/owned - seems a lot of apartments remain empty in Newbury and Reading (they may be owned by developers but not actually lived in).</p> <p>12. Would a different site attract Government Garden Town funding</p> <p>13. Why not build a self-contained new village (or several smaller ones) in an area of AONB with less impact and benefits to the community there (as not close to other settlements? Or self-contained village with access to Green Park / along M4 corridor rather than over urbanisation and pressure on Thatcham and existing settlements.</p> <p>1. would be terrible to build in THA20, only to find new owners of Bucklebury Farm Park also want to build thousands of houses (which could be hidden within trees)</p> <p>14. There is limited employment in this area (and despite stating it is adjacent to Colthrop Ind estate, which it isn't, there are no jobs for 2500 households there)</p> <p>1. Houses will only benefit businesses elsewhere though WFH or commuting.</p> <p>15. What evidence is there that building houses will lead to regeneration of the Town Centre, local economy and creation of a market town</p> <p>1. There are many examples of other towns where large estates have been built yet the town centre continues to degenerate, residents commute away for work, shop in larger towns (such as would occur here in Reading and Newbury and beyond) and now we see huge increase in online shopping so how will the local economy in reality be improved.</p> <p>16. The railway network at Thatcham is being stated as a positive to build here, whilst this infrastructure is not sufficient nor easily upgraded, trains are expensive and not frequent enough or lengthy in duration and limited going elsewhere as not a main line from Thatcham so not making routes as viable as those from Reading Green Park or Newbury (as a traveller I experience this)</p> <p>17. Whilst previously the settlement boundary of Thatcham and stated over - development were a restriction for development, now it is suddenly acceptable with very little change in the circumstances of</p>	<p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p> <p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p> <p>An economic advantage of new development is that new residents can help support local shops and businesses and help to boost the vibrancy and vitality of town and local centres.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Thattham/surrounding villages (except as bi-product of AWE review) so reasoning for the change is lacking.</p> <p>18. Why is it acceptable to build so close to Upper Bucklebury (“UB”) whilst avoiding building close to other villages near Thattham or between Newbury and Thattham where there seems to be further quite large areas of land and infrastructure maybe more easily upgraded.</p> <p>19. Is there not already the financial schemes in place for WBC to fund infrastructure including with contribution from developers without the need to compromise with having to agree to overly large sites (small sites also deliver funds for this as do other sources of funding)</p> <p>20. Is the proposal in line with all policies</p> <p>21. The developers appear to have proposed 1791 - 2316 houses whilst WBC are suggesting 2500 seemingly to give more profits to cover part funding the infrastructure – the economics before this looked extremely healthy for the developers so why are further houses/profits required to neutralise this part investment. The developers would have already built in a contingency in the house numbers and economics proposed to allow for negotiation so it is highly likely they would agree to much less houses than 200 and still include the funding contribution and more green space without WBC needing to agree to increased housing to be built on this site.</p> <p>22. Will Bucklebury Parish Council receive more funding to cover the increased maintenance due to consequences of this influx of people.</p> <p>23. How can limitations be guaranteed on further development within this site (losing green space), and in nearby areas to this site (eg. THA16 &amp; 17 &amp; BUCK2) once the gate is opened to changing these settlement boundaries.</p> <p>24. Is the plan with a site of this size for only a few large developers/land owners, favouring those over smaller developers who may not have access to the same level of resources to compete with them.</p> <p>25. Is there any conflict of interest where WBC has utilised research/data undertaken by these developers to make their assessments (they have campaigned significantly to overturn/change policies and influence the outcomes simply because this is where they have bought land – if it was somewhere else they would be campaigning for it there).</p>	<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a ‘living document’ and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council’s evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a ‘masterplan’ / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>26. Can leverage (without commitment outside of due process) be gained to reduce this site as the developers may also have other sites of interest which could be viable so win-win.</p> <p>Concerns to be considered/addressed in the plan for THA20:</p> <ul style="list-style-type: none"> <li>• Sheer scale of the housing development is disproportionate and does not conserve or enhance the landscape character of the area or conserve &amp; enhance AONB <ul style="list-style-type: none"> <li>○ Building on slopes is contrary to the rest of Thatcham, setting a precedent and leading to loss of greenfield space and feeling of countryside, risk to the views</li> <li>○ If other sites were also considered in the plan then reduced development along the main road in the valley could be a compromise</li> <li>○ THA14 could be committed as complete country park with the school by the crematorium and no building further up the slope than the crematorium rather than 800 /970 houses going right up to the woodland in areas or up the slope above Colthrop Manor as is proposed (the 100m max is still too high)</li> <li>○ Development is over an excessive period of time over (this is incomparable to other recent developments).</li> <li>○ 1250 houses by 2037, with a further 1250 beyond leading to 20+ years of building</li> <li>○ The photos in the stage 3 review are misleading as to the countryside sloping landscape as the view is cross ways from the bottom, rather than up/down the slopes</li> <li>○ The footpaths currently in the fields ought to remain in green space and not sandwiched between buildings as is proposed which completely destroys the character of a countryside walk and ability to walk dogs off the lead</li> <li>○ The country park requires as protected status &amp; not be potential amenity green space.</li> <li>○ Adverse impact to AONB and ancient woodland due to the proximity, suggested 25m buffer is insufficient</li> </ul> </li> </ul>	<p>parameters of the site, height parameters, green open space, etc.</p> <p>The development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population). Highway works and active travel routes would assist in directing residents to using the A4/Floral Way rather than Harts Hill Road, and using an enhanced cycling and walking network to travel, including to Thatcham train station.</p> <p>Residents would make use of the newly provided education facilities on the site, which would not be expected to purposefully attract pupils from Bucklebury primary school.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>○ Adverse impact on wildlife, native deer, red kite, small animals etc. which all call this area home and will be displaced</li> <li>○ Not in line with brownfield development objectives, including changing this from agriculture/green to residential use which is contrary to objectives.</li> <li>● Upper Bucklebury (“UB”) impacts contrary to WBC stated objectives <ul style="list-style-type: none"> <li>○ Development, even with a guaranteed country park, is very close to UB destroying the rural access to UB and the distinctive village identity and character</li> <li>○ Leading to coalesced with Thatcham</li> <li>○ Could detrimentally impact UB economy by use of shops in the new development or of UB amenities over usage due to influx of Thatcham residents</li> <li>○ Adverse impact on Long Grove which is a public right of way but it seems only the residents are funding the upkeep of the road. Increased volumes of footfall and cycles during the lockdowns has already been experienced leading to litter, dog poop, security concerns and damage to the road surface, which will only increase. Rather than this route being promoted in this plan as a route for thousands of people to use from the ‘new country park benefiting the whole town’ it ought to be gated for residents use only and the alternative public rights of ways already on this site be promoted. This will seriously impact existing Long Grove residents and their financial outlays.</li> <li>○ Safety impact to existing UB residents due to additional people included in THA14 within the AWE outer zone</li> <li>○ Adverse impact to mental and physical health (and happiness survey) of nearby residents in Thatcham and in UB due to the size and prolonged period of disruption <ul style="list-style-type: none"> <li>▪ Noise, air quality &amp; dust particulate pollution, vibration, light pollution and destruction of the reasons for living in a peaceful, clean air,</li> </ul> </li> </ul> </li> </ul>	<p>Council’s website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>Housing provision must support the needs of the whole community, including the provision of both market and affordable housing, and reflect the needs of specific groups such as, but not limited to, families with children, single person households, the elderly, those households with specific needs, those wishing to build or commission their own home, gypsies, travellers and travelling showpeople and those seeking houseboat moorings. Developers will therefore need to consider housing mix in their proposals, including any local evidence of housing needs or evidence in Parish or Neighbourhood Plans which may be important considerations even for small sites, particularly in rural areas.</p>

	<ul style="list-style-type: none"> <li>○ Increased pressure on infrastructure due to poor timing of upgrading/building new due to being sacrificed in lieu of economics for the developers, whilst in reality their business models expect a long period for ROI</li> <li>○ Traffic improvements to A4 would be required and consideration both west and eastbound – traffic into Newbury and up through Cold Ash is already extensive</li> <li>○ Insufficient provision for employment, incubation &amp; accelerator hubs etc. given the changing employment profile &amp; working from home trends.</li> <li>○ Appears to be a lack of healthcare provision if existing Thatcham practices are at capacity</li> <li>○ Limited community &amp; cultural provision despite the scale – church, pub, restaurants, cinema, theatre, library etc.</li> <li>○ Mix of housing and groups catered for aligned to the type of resident &amp; affluence of who will live here - including the elderly &amp; disabilities given the aging population – in NL there are ‘villages for the elderly / dementia with shops to maintain independence rather than be in a care home) and pricing levels are unknown</li> <li>○ Are equestrian needs met</li> <li>○ Lacking details on water run-off from development, net zero carbon etc.</li> <li>○ Parking allocation by house occupancy is generally underestimated in developments (especially as children grow up and stay living with parents longer) leading to cars parked everywhere on streets causing safety issues and unsightly streets so more space for this ought to be allocated without impacting green space volume.</li> <li>○ Use of Henwick sports fields would be advantageous but this volume of space (as well as gardens, street trees/verges, allotments and other non-open natural spaces open to all of the public and not limited to users of the school/ householders etc.) should not be misleadingly referred to as green space – the 50% being discussed is in</li> </ul>	

Respondent (with lpr ref)	Response	Council Response
	<p>people's minds the country park whilst in reality this is only proposed at 32%</p>	
<p>Tim Cooper (lpr1127)</p>	<p>Please consider the following objections in relation to the proposed development of 2500 houses on the north side of Thatcham:</p> <ul style="list-style-type: none"> <li>- Working patterns have seen a massive change by the impact of C-19 and many people successfully working from home. With new ways of working, employers (NHS &amp; private sector) are now hiring staff out of the area, with no future expectation for commuting to a traditional office.</li> <li>- The new working/home employment pattern will also significantly impact commercial office space. This will create new brown-field sites and the opportunity to redevelop for the 21st century.</li> <li>- Once green-belt land is lost, it will be a grave mistake, and it's likely it'll never be recovered.</li> </ul> <p>Based on these fundamental shifts, the proposed plan should be shelved, and the new opportunities above embraced.</p> <p>These changes will impact much wider than West Berkshire, as it should help balance the employment and housing bias away from southern counties. These changes should be strongly verbalised and recognised at a national level.</p> <p>Looking forward to a responsible outcome for this planning proposal.</p>	<p>In relation to the plan being prepared prior to the coronavirus pandemic, the full impact of the COVID 19 pandemic will not be fully apparent for some time. The LPR is a long term strategy to 2039, during which time a review will be conducted every 5 years. The impact of changes in response to macro and local economic factors will be assessed through subsequent reviews, once such implications are realised.</p> <p>The site is not within the Green Belt (there is no Green Belt in this District).</p>

Respondent (with lpr ref)	Response	Council Response
David Gatenby (lpr1129)	<p>I'm writing regarding the NE Thatcham Development of 2500 homes you are proposing as part of the Local Plan Review 2020 -2037 and wish to notify you of my objection to this proposal.</p> <p>Before I detail the reasons for my objection, I must express my surprise that residents have only until the 5th February to respond to this consultation. As this period is during a National Lockdown it obviously adversely impacts on the ability of residents to co ordinate themselves if they wish to object to this proposal. It has also resulted in many residents not even being aware of the proposal. One wonders if this is deliberate?</p> <p>The main reasons for my objection to the proposal are as follows -</p> <p>TRAFFIC</p> <p>The road infrastructure in this area already struggles to cope with existing levels of traffic. The proposed development of an additional 2500 houses would clearly over burden this system.</p> <p>In particular, I understand that the traffic forecasting already anticipates a proportion of the traffic generated by the development will pass up Harts Hill Road into Bucklebury Parish in order to access the A34 and M4. This would have a major impact on numerous surrounding villages including Upper Bucklebury and Cold Ash in the following ways.</p> <p>* Many of the roads along here have no footpaths or cycle ways, which are already hazardous for pedestrians and cyclists.</p> <p>* The significant increase in traffic would create a vastly increased safety concern for residents, particularly school children walking to and from school.</p>	<p>In relation to the consultation taking place during the coronavirus pandemic, the Government published guidance in May 2020 with regard to planning and COVID 19: <a href="https://www.gov.uk/guidance/coronavirus-covid-19-planning-update">https://www.gov.uk/guidance/coronavirus-covid-19-planning-update</a>. This stated that “We continue to want to see Local Plans progressing through the system as a vital means for supporting economic recovery in line with the government’s aspirations to have plans in place across the country by 2023.”</p> <p>A written ministerial statement (<a href="https://questions-statements.parliament.uk/written-statements/detail/2021-01-19/hcws720">https://questions-statements.parliament.uk/written-statements/detail/2021-01-19/hcws720</a>) published on 19 January 2021 set out the importance of work continuing to advance on Local Plans through to adoption by the end of 2023 to help ensure that the economy can rebound strongly from the pandemic.</p> <p>Changes were made to the Town and Country Planning (Local Planning) (England) Regulations 2012, under the Town and Country Planning (Local Planning) (England) (Coronavirus) (Amendment) Regulations 2020, to remove the need for local authorities to make hard copy documents available for public inspection for a temporary period from 16 July 2020 until 31 December 2021.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without</p>

Respondent (with lpr ref)	Response	Council Response
	<p>* Roads throughout Bucklebury Parish are inadequate and not designed to cope with increased volumes and speed of traffic that this proposal would create.</p> <p>* The increased volume of traffic will adversely impact the quality of life for residents of the villages through increased traffic disturbance.</p> <p>* Harts Hill Road is a steep hill with numerous blind bends, all of which are narrow and unlit. It is not suitable for large volumes of traffic.</p> <p>Whilst I have focussed on the impact on my local area, this does not take into account the impact on other areas that are already struggling to cope with existing traffic levels including the A4 and the Thatcham Station area. Clearly the huge increase in traffic generated by an additional 2500 homes would be too much for these areas to cope with.</p> <p>PROXIMITY TO AONB</p> <p>Bucklebury Common is already experiencing an increase in visitors, resulting in increased 4x4 and motorbike disturbance and damage, littering, dog fouling etc. This has obviously resulted in damage to the natural environment. The impact of this development of an additional 2500 houses adjacent to the Common would be severely detrimental to this area of outstanding natural beauty.</p> <p>Whilst I am aware that there is a need to provide additional housing in the future, I believe that the scale of development is too much for this area to cope with in a single location.</p> <p>Instead of concentrating all of these homes in one location, perhaps a more diversified approach could be taken with the 2500 homes being spread across additional sights in West Berkshire rather than over developing one area.</p>	<p>mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the</p>

	<p>PROXIMITY TO AONB</p> <p>Instead of concentrating all of these homes in one location, perhaps a more diversified approach could be taken with the 2500 homes being spread across additional sights in West Berkshire rather than over developing one area.</p>	<p>LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p>
Caroline Head (lpr1130)	<p>I wish to object to the planned development of 2500 houses between Bucklebury and the A4 and Floral way.</p> <p>As well as this being a huge over development as far as number of houses, resulting in a massive loss of green space for current Thatcham and Bucklebury residents, I am very concerned about the impact this development will have on traffic with lorries destroying the already pot holed country roads towards Bucklebury School &lt;personal information removed&gt;.</p>	<p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at</p>

	<ul style="list-style-type: none"> <li>○ Surely it would be more effective to increase town centre dwelling to revitalise Thatcham and Newbury by converting these buildings</li> </ul> <ol style="list-style-type: none"> <li>4. The proposed development appears to be outside the Local Plan and beyond Floral Way which I believe is the settlement boundary protecting villages such as Upper Bucklebury and Cold Ash, which will effectively be part of Thatcham removing the rural aspect of these villages</li> <li>5. It will impact on Bucklebury Common - parking, wildlife, maintenance of paths and a significant increase in footfall which has already risen during the Coronavirus Pandemic</li> <li>6. Increase traffic congestion (and pollution) on A4 in Thatcham which is currently considerable at certain times of the day</li> <li>7. Impact on traffic (and air pollution) going through local villages, such as Upper Bucklebury, Chapel Row and Bradfield, which is a rat run to Reading/M4 east as well as to the M4 west via Cold Ash/Hermitage, impeding the safety of pedestrians including many children embarking/disembarking from school buses and walking to/from school.</li> <li>8. Which in turn will affect the Quiet Lanes in the area, particularly in Upper Bucklebury where they are used to avoid congestion in Broad Lane during peak periods - cars driving along the Quiet Lanes far too fast without any respect for pedestrians walking to school or elsewhere</li> <li>9. In addition to the provision of new schools there will be a need for more healthcare, policing, leisure facilities, road improvements, shopping facilities such as supermarkets and so on.</li> <li>10. Will the new secondary school replace Kennet or complement it?</li> <li>11. Is the Thatcham surface water management plan going to protect new and existing residential and industrial areas from future flooding and how will the Sewage Works cope with waste from such a large development including the stench that emanates from the site in Lower Way?</li> </ol>	<p>infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>As part of the preparation of the LPR the council has undertaken a Settlement Boundary Review (SBR).The settlement boundary criteria make clear that boundaries will include sites allocated through the Local Plan process. North East Thatcham is proposed for allocation under policy SP17. Should the site, or any part of it, be removed from the LPR the boundary for Thatcham would be adjusted to exclude it. It is acknowledged that the settlement boundary is currently drawn around the whole of the proposed allocated site at North East Thatcham whilst Policy SP17 notes that development will be expected to deliver ‘a network of green infrastructure which will include a new community park linking Thatcham to the AONB.’ The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. At this stage it is therefore not possible to draw the settlement boundary any tighter. As the LPR progress and more detailed work is done on the sensitivity and capacity of different parts of the site to accommodate development the boundary will be amended accordingly.</p> <p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Whilst I understand there is a need for housing in West Berkshire, I believe this huge project is totally unacceptable.</p>	<p>government's standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p> <p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p>

Sue and Alan Whitmore (lpr1139)	<p>We write to object to the proposal to build 2,500 houses on farm land between Upper Bucklebury and the A4 and Floral way in Thatcham.</p> <p>The size of this proposed development is certainly an over development of the land in question. To add a further 25% of housing (which could well be an extra 10,000 people) to a small market town like Thatcham will completely change the way of life for its current residents, and not for the better. There is mention of new schools, sports facilities and shops being built but that alone will not provide all the facilities that these extra 10,000 people will require, such as doctor's surgeries, refuse collection, libraries, to mention but a few. Improved travel routes were also mentioned which would be very necessary. There are currently a number of traffic concerns in the area including the level crossing at Thatcham station. This already causes many traffic jams without being exacerbated by additional housing. All this extra traffic would also create a harmful increase in pollution.</p> <p>The proposed development would all but join Upper Bucklebury, which at the moment is a peaceful rural village, to Thatcham. Upper Bucklebury is within the North Wessex Downs Area of Outstanding Natural Beauty. The addition of another 10,000 people right on our doorstep would undoubtedly have a damaging effect on this beautiful countryside and will erode the Thatcham</p>	<p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. 		from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.
Peter Walker (lpr1143)	I have just been made aware of the intention to build 2,500 houses on the farmland between Upper Bucklebury, the A4 and Floral Way. Whilst I appreciate the need for new housing I am concerned that this proposal will result in the over development of what is a rural area with a detrimental impact on the local community. I would also wish to be reassured that, should this development go ahead, additional infrastructure will be paid for by the developers so that the resultant increase in population, of perhaps up to 10,000 people, has new medical and dental facilities, as well as provision of school places, to meet the additional demands that would result.	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Georgina Woods (lpr1144)	<p>I am writing to let you know my concerns about the proposed housing development in Thatcham.</p> <p>It seems to be a very large number of houses for the area and I am worried about the impact it will have on the traffic which is already very heavily congested at certain times, especially along the A4 and around the level crossing. I fear that the roads around Upper Bucklebury and Bucklebury will become rat runs to escape the A4. They are small roads with many bends and are used a lot by cyclists, horse riders and walkers and any increase in traffic would be very detrimental.</p> <p>The proposed development is also very close to an AONB which would be affected by the extra lighting at night and an increased footfall.</p> <p>Aside from these worries, I am also concerned about the lack of public transport, medical facilities and schools.</p> <p>I urge you not to go ahead with the proposed development.</p>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has</p>

Respondent (with lpr ref)	Response	Council Response
		<p>undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>

Respondent (with lpr ref)	Response	Council Response
Wendy and Robin Jury (lpr1152)	<p>I am writing to object to the application to build 2500 house on the farmland between Upper Bucklebury and the A4 and Floral Way.</p> <p>My reasons are:</p> <ol style="list-style-type: none"> <li>1) Our doctors, dentist and schools could not cope with the volume of people as they are struggling already.</li> <li>2) Pollution with all the extra traffic on the village roads and also the damage to the roads with all the heavy traffic.</li> <li>3) Over development and loss of rural countryside.</li> <li>4) What damage and effect would it do to the wildlife.</li> <li>5) Loss of Thatcham Green Belt</li> </ol>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. 		<p>Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>The site is not within the Green Belt (there is no Green Belt in this District).</p>
Sarah Beeson (lpr1158)	<p><u>– A personal view from a resident living in</u> &lt;personal information removed&gt;</p> <p>Upper Bucklebury is a small rural village with its own identity and a strong sense of community. We have some 250 dwellings in the village, together with a hall, pub, church, primary school, and shop, all connected by a central road. The number and speed of cars traveling along this central road is already an issue despite the current traffic calming scheme and this road is known as a local “rat run” between Thatcham and Theale.</p> <p>Over the years, Bucklebury Parish Council has put significant effort into the Bucklebury Vision planning document to help steer development within the Parish along carefully considered traditional lines and in keeping with the views of residents developed over many years. Even though we are close to Thatcham, up to now we have managed to maintain our rural outlook, our individuality, our common, open spaces, footpaths, bridleways, and byways, as well as to live in balance with local wildlife and livestock. We have had several smaller housing developments within the village over the years and on each occasion the housing has been in keeping with the local vision and the village has been pleased to welcome the new residents and integrate them into our community.</p> <p>With the current lockdown there has been a noticeable decrease in noise and traffic coming through the village, particularly during rush hour periods,</p>	<p>The development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population). Highway works and active travel routes would assist in directing residents to using the A4/Floral Way rather than Harts Hill Road, and using an enhanced cycling and walking network to travel, including to Thatcham train station.</p> <p>Residents would make use of the newly provided education facilities on the site, which would not be expected to purposefully attract pupils from Bucklebury primary school.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>and a substantial increase in walkers on our footpaths and byways. Walkers' vehicles left inconsiderately parked on the sides of roads, litter, dog fouling and incidents of dogs worrying livestock have all significantly increased.</p> <p>Any new housing development affecting the village needs to be both sustainable and responsible. A close by development ten times the size of the village completely at variance to the local vision for the parish would be neither. This town extension would alter the very essence of our community, exacerbate the negative changes noticed during the lockdown, and may well bring about radical unexpected consequences such as the closure of our village school. The traffic modelling undertaken by West Berkshire Council indicates that 12% to 22% of the traffic from such a new development will travel through the village. This equates to thousands of extra cars every day adding to the noise and pollution in the village as well as to the danger to children being encouraged to walk, cycle or scoot to the local school. In addition, many residents from the new development will doubtlessly drive up the hill to walk, use the village facilities, and generally enjoy the area, thereby increasing the number of cars trying to park, the litter, the irresponsible dog fouling, the fly tipping on the common, and the pressure on our footpaths. Our problems with 4 x 4's on the common will only increase, and I fear for our wildlife and biodiversity which, worryingly, do not seem to get the strategic planning considerations they deserve. Upper Bucklebury will be closer to the new development than the centre of Thatcham!</p> <p>There has always been an understanding that there would be a strategic gap between Thatcham and Upper Bucklebury and that Floral Way would mark the northern boundary to Thatcham. This proposed development sends a coach and horses through this principle and opens the door to further development north of Thatcham at later date.</p> <p>I understand that families want to come to live in this beautiful part of the country. We moved here for the same reason but is North Thatcham the best place for such a development and is a single development of such a size really the best solution? The world has changed since the current pandemic and Brexit. The small rows of shops and the general proposed</p>	<p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government's standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p> <p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against</p>

Respondent (with lpr ref)	Response	Council Response
	<p>layout of this development may be as outdated as the old corner shop by the time this is built. Where are people from this development going to go to do their weekly shop? This development is far from the centre of Thatcham and far from the train station, such that travel to either would doubtlessly be predominately by car. Surely a large new Thatcham development, if needed at all, should be maximising on Thatcham's rail connection, concentrating on the cycling, and walking links provided by the canal, and homing in on the existing safe cycle and walking corridors to the centre of Thatcham and to Thatcham's other jewels such as the Discovery Centre. Climate change and energy efficiency considerations should highlight the need to produce new housing that is not completely dependent on the car.</p> <p>This proposed development, being on a hill site, will overshadow existing Thatcham housing in the area, provide extensive problems relating to runoff and flooding, cause significant traffic problems, and bring no benefit to the wider town.</p> <p>Wouldn't be better to go back to the drawing board now, reconsider what is needed in this new world we find ourselves in, and re-plan for the housing and the associated infrastructure needed in places and of a nature to serve future generations with the smallest impact on our planet?</p> <p>For the sake of my village, our community, our children, our wildlife, and our biodiversity, I strongly object to this proposed development.</p> <p>Wouldn't be better to go back to the drawing board now, reconsider what is needed in this new world we find ourselves in, and re-plan for the housing and the associated infrastructure needed in places and of a nature to serve future generations with the smallest impact on our planet?</p>	<p>substantially higher numbers than the housing need based on the standard methodology.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p>
Michael Kefford (lpr1160)	I would like to object to the plan to build 2500 houses N East Thatcham just North of Floral Way and the A4.	The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual

Respondent (with lpr ref)	Response	Council Response
	<p>The reason for my objection is as follows:-</p> <ol style="list-style-type: none"> <li>1) It virtually joins Thatcham to the rural village of Upper Bucklebury.</li> <li>2) The plan is vast over development for a rural area.</li> <li>3) There will be a large loss of rural countryside which many people use for outdoor enjoyment and exercise.</li> <li>4) Thatcham will lose a lot of its green belt land.</li> <li>5) There will be a significant impact on traffic volumes in an area which already has busy roads. There will also be an impact on air pollution due to the extra volume of traffic.</li> </ol> <p>I would like you to take into account my objections along with any others you receive when you consider the plan.</p>	<p>and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>The site is not within the Green Belt (there is no Green Belt in this District).</p>
Angela Blake (1154)	<p>I am emailing you today to object to the proposed development of 2500 homes for Thatcham. With regard to this (over)-development of Thatcham, I would like to add my major concerns to the many I know that you have received already.</p> <p>Obviously if this development goes ahead then Thatcham would, not only need, but would have to have a brand new secondary school. Will this be part of the plan? Despite living within a 30 minute walk of Kennet School, both of my granddaughters had to travel into Newbury everyday to attend Trinity School because of catchment issues and over-subscription issues. This was a ridiculous situation and will be compounded for Thatcham children if a new secondary school is not built alongside this development. In addition, clearly, we would need nursery, infant and junior schools as well!</p> <p>Obviously, once again, if this development goes ahead then Thatcham would, not only need, but would have to have a new Doctors' Surgery. Will this be part of the plan? Appointments at local surgeries are difficult to get</p>	<p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p> <p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>and the two surgeries we have now would not be able to cope with thousands of new patients.</p> <p>This proposed major over-development of the area will not have the sufficient infrastructure to go with it - they never do and promises of such are never kept because of lack of funding. In addition, the tranquillity of the Crematorium will be destroyed. I had thought that I might like to be laid to rest there eventually - but not if you are going to surround it with thousands of houses! There will be a huge loss of countryside and loss of wildlife in this greenbelt area and an increase in pollution.</p>	<p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p>
Sarah Darling (lpr1161)	<p>Wish to register my strong objection to the proposed development plan. Bucklebury is a rural parish and this over development will obviously result in a significant loss of some outstanding countryside, increase traffic pollution thus causing a significant reduction in air quality.</p>	<p>Thattham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thattham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thattham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. <p>Adrienne and Paul Clarke (lpr1163)</p>	<p>We wish to provide feedback on the proposed development at NE Thatcham which has been detailed in the December 2020 Emerging Draft of the Local Plan Review 2020-2037.</p> <p>We live at a 400 year old farm workers cottage which, currently surrounded by the farmland it served, would be surrounded by "urban density" housing if this proposal goes ahead and we would like to make the following observations.</p> <p><b><u>Suitability of the land for building</u></b></p> <p>The land proposed for development above Dunstan Park holds a huge amount of rainwater within it as I suspect does all the land proposed for development. The ability of this land to hold rainwater stops severe flooding in Thatcham on a regular basis. For this reason, part of the land was, in the review in 2013, marked as "Not Developable" due to surface water flooding risk (see attached). The flood defence basin has since been built (on land provided to the Council by the developer, unsurprisingly), but that will not be</p>	<p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. Respondent (with lpr ref)	Response	Council Response
	<p>sufficient if the land above it is developed and therefore cannot retain the water it currently does retain-which we have observed over many years before and after the flood defence basin was built and that water holding capacity by the land has not changed. This is acknowledged in this new plan, and a further lake is proposed, but it must be questioned whether that is sufficient, and development itself must be questioned if the plan has to work so hard to attempt to manage surface water. The flood risk to Thatcham of this proposal must be taken seriously and not brushed over in response to pressure from developers. The floods in Thatcham affected so many lives so adversely that it must not be allowed to happen again. You only need to acknowledge the geography of these hills above and leading down into the town to realise that this is a serious issue.</p> <p><b><u>Provision of local amenities</u></b></p> <p>The plan recognises a need for schools to be built, but not a doctors surgery. There was, pre-pandemic, a 3-4 week wait to see a GP for a non-urgent matter. The current local GPs could not take on any more patients, let alone the numbers in this new development. In 2019, the average number of registered patients per GP was 2087, so the development would need a new practice of 4-5 GPs plus nurses and admin staff. Even if a practice building was included there is a national shortage of GPs and nursing staff to work in it.</p> <p><b><u>Provision of infrastructure</u></b></p> <p>The current road system would not support the increased traffic, and although there may be an increase in home workers post pandemic, which the developers have conveniently latched onto in their proposal for "home/local working hubs", people will, in reality, need to commute to work as there are few local jobs.</p> <p><b><u>Ecology and Green Space</u></b></p>	<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. North East Thatcham is proposed for allocation under</p>

Respondent (with lpr ref)	Response	Council Response
	<p>This is a proposal to develop a huge amount of untouched farmland currently designated for agricultural use which is OUTSIDE a residential curtilage. It is an important green divide between residential and industrial Thatcham and the North Wessex Downs AONB and the important habitats that are within and around it. The developers have the audacity to suggest that the development of this land would enhance the accessibility to green space for Thatcham residents. However, the proposed development land already has access via footpaths and byways, one can walk from Thatcham up to Bucklebury Common for recreation right now, enjoying the beautiful walks and views across this land that is in the proposal. Development offers NO enhancement to this facility, it simply removes it under development. Indeed if you added all the occupants of 2500 houses into the human footfall on Buckelbury Common, the rest of the AONB, and indeed the remaining green land proposed within the development, it would pose a severe threat to it's survival and sustainability of wildlife and flora.</p> <p>This proposal to transform pristine, beautiful, valued and enjoyed countryside, that is designated for agricultural use and has previously been at least partly defined as not developable to an urban environment is just wrong, and suitable alternatives for housing stock requirements need to be sought.</p> <p><b><u>Consideration of alternatives</u></b></p> <p>The need for extra housing stock is understood. However, this could be implemented with far less devastating detrimental impact on the environment and the quality of life of Thatcham and Bucklebury residents by dividing the density up into smaller, non co-located developments on land that is not pristine countryside. Consideration needs to be given seriously to re-purposing office and retail buildings that are left unneeded by the changes in the way we live modern life, as well as brown field and infill sites that are available</p>	<p>policy SP17. Should the site, or any part of it, be removed from the LPR the boundary for Thatcham would be adjusted to exclude it. It is acknowledged that the settlement boundary is currently drawn around the whole of the proposed allocated site at North East Thatcham whilst Policy SP17 notes that development will be expected to deliver ‘a network of green infrastructure which will include a new community park linking Thatcham to the AONB.’ The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. At this stage it is therefore not possible to draw the settlement boundary any tighter. As the LPR progress and more detailed work is done on the sensitivity and capacity of different parts of the site to accommodate development the boundary will be amended accordingly.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council’s website to support the proposed submission version of the LPR, as will the individual assessments.</p>

Respondent (with lpr ref)	Response	Council Response
		The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.
Zita Griffiths-Eyton (lpr1164)	<p>We moved to Upper Bucklebury from Newbury 3 years ago to live in a village and enjoy being part of a small community, in the centre of the countryside. Never would have thought that a development of this size could be built on our doorstep and could influence our life and our children's, possibly our grandchildren's. As you are proposing half of it to be built by 2037! I ask the question for how many generations are we to live next door to a development site and to put up with noise, traffic, industrial consequences of this development plan that seems to be born out of greed and stretched as far and as big as someone pointing a finger on the map could have stretched it without proper thought and the need behind it.</p> <p>I understand that some(!) houses need to be built and there is a demand but to build that many in that location is a recipe for disaster.</p> <p>The biggest problem is the sheer volume that scares everyone in the vicinity.</p> <p>The developers won't care about the people already living here, they won't care how much extra pressure they put on the existing schools, GP surgeries, dentists, pubs etc.</p> <p>Schools are mentioned in the development plan but would they be built before people actually move in, ready to take students? Where is the new surgery/ies to take all these families (3000-4000 people at least)?</p> <p>To come back to our village, Upper Bucklebury with a primary school and sadly already some speeding through the village, this development:</p>	<p>Thattham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thattham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thattham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• would create a massive extra traffic going through our village, increasing noise and pollution levels</li> <li>• traffic to Thatcham station is already chock a block</li> <li>• the boundaries of the new development are too close to Upper Bucklebury risking the village to sucked in by Thatcham</li> <li>• parking in Thatcham is already an issue</li> <li>• the volume and frequency of trains going through Thatcham station cannot cater for these proposed new residents</li> <li>• Who are these houses built for? Can the developers see 2500+ new job opportunities in the vicinity? The plan far outweighs the demand here</li> <li>• there is a proposed country park. We already have one in Bucklebury. What effect would this have on that one?</li> <li>• traffic: there are children at Bucklebury Primary School from Thatcham. Their school run would be hugely affected. Would they have to change school?</li> <li>• secondary school: Kennet School at Thatcham is already struggling with capacity. We are in the catchment area but so would these 2500 families have priority of getting a place over us as they will be built between us? Again when would the proposed secondary school be built and how it would affect current catchment areas?</li> </ul>	<p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p>

Respondent (with lpr ref)	Response	Council Response
Gill Auld (lpr1165)	<p>I must add my observations and objections to the above planned development.</p> <p>The whole development is far too large at this proximity to Upper Bucklebury.</p> <p>It is too close to the village, barely separating Thatcham town from the village of Upper Bucklebury.</p> <p>I recall a promise made a long time ago - 'that it would never be allowed' !</p> <p>The extra traffic will be added to what is already a significant burden for the villages of Upper Bucklebury, Chapel Row and Bradfield Southend.</p> <p>As well as the additional infrastructure required, the Thatcham Station could not cope with the extra cars needing to park.</p> <p>I have concluded that the whole Development is just far too much for this area, and hope there will be serious considerations given to the scheme.</p>	<p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. Respondent (with lpr ref)	Response	Council Response
	<p>Having lived in Upper Bucklebury for thirty-five years, the impact of such an enormous development will have a very negative effect to our community for the following reasons:</p> <ol style="list-style-type: none"> <li>1. <b>Traffic &amp; Transport:</b> The increase in population (2,500 homes) will cause considerable congestion on the A4 and Floral Way, leading to hazardous levels of traffic on Harts Hill and through Upper Bucklebury. Harts Hill is a dangerous, unlit, unpaved road and the increase in traffic will make it even more unsafe. As a community, we are deeply concerned that Upper Bucklebury will be used as a “rat run” to Reading and the M4.</li> <li>2. <b>Services &amp; Utilities:</b> We find it difficult to understand how the necessary and affordable services and utilities (gas, water, drainage, internet and mobile) can be successfully provided for these homes. Upper Bucklebury is already under pressure regarding these services and utilities.</li> <li>3. <b>Environmental &amp; Noise:</b> This development will also cause disturbing levels of environmental and noise pollution in the community and areas of natural beauty. The planned over development will see the Parish’s commitment to our rural conservation and protection of the environment impacted for residents now and for the future generations.</li> </ol> <p>We strongly object to these plans and urge West Berkshire Council to reconsider the need for such a large development of 2,500 homes in this location</p> <p>In summary, the consequence of this plan will have huge implications in all areas (traffic, services and environmental) for this community.</p>	<p>additional housing, in any review to accommodate more housing. Roger Frankum (lpr1188)	<p>While I have some sympathy with the West Berks Council in finding space for its allocation of new houses, I really think the problem needs looking at again.</p> <p>I would have thought that the first thing to do following the elimination of the Grazeley area for possible housing, was to contact the government and point out the situation and request a reduction in its allocation.</p>	<p>The proposal for a garden town in Grazeley was located in the administrative areas of Wokingham Borough Council and West Berkshire Council with the majority of the site located in the former administrative area. Due to the legislative change which has caused emergency planning requirements around the Atomic Weapons Establishment at Burghfield to be extended, the area around Grazeley is now within this area. As a result, the Defence Nuclear Organisation, part of the Ministry of Defence, objected to</p>

Respondent (with lpr ref)	Response	Council Response
	<p>It appears that the policy is based on data that is already three years out of date. Since the time of its collection we have had Brexit and now the Covid crisis. Both of these events are leading to change demographics, partly because fewer people are needing to work in London, or need to visit their work-place every day. This must alter the spread of housing needs across the country.</p> <p>The suggestion of 2500 house north-east of Thatcham is completely out of proportion. Thatcham has already grown a great deal in the past few decades without much in the way of new infrastructure and it is not at all clear how it could cope with a further very big increase in size. I am sure you will have heard about the problems of increased traffic, lack of parking at the station, no local surgery, minimal open space, the offers of perhaps half a secondary school being financed, and so on.</p> <p>I should like to point out that the proposed development is under 2 km from Bucklebury Common and that the Common is one of the few remaining areas of lowland heath. It is well known among other things for some special species of birds, in particular the nightjar, woodcock, and tree pipit. These nest on the ground and would not be able to cope with a large influx of people with their dogs. The development could not fail to have a strong adverse effect on the heath.</p> <p>While there is clearly a need for new housing, I hope you can see that the development in its present proposed form is just not a suitable option.</p>	<p>the Grazeley garden town proposal within the Wokingham Local Plan and requested its removal and due to the extension of the emergency planning requirements it was also not carried forward through the West Berkshire LPR.</p> <p>In relation to the plan being prepared prior to the coronavirus pandemic, the full impact of the COVID 19 pandemic will not be fully apparent for some time. The LPR is a long term strategy to 2039, during which time a review will be conducted every 5 years. The impact of changes in response to macro and local economic factors will be assessed through subsequent reviews, once such implications are realised.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In relation to the concerns on the potential impact on Bucklebury Common, the development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population).</p>
Ian Westbury (lpr1169)	<p>We strongly object to the building of 2,500 houses on the farmland between Upper Bucklebury and the A4 and Floral Way all but joining us to Thatcham.</p> <p>Our objections are:-</p> <ol style="list-style-type: none"> <li>1. Loss of rural countryside e.g. walking.</li> </ol>	<p>The site is not within the Green Belt (there is no Green Belt in this District).</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. 		taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.
Penny Allum (lpr1172)	<p>I am writing to voice my strong objection to the 2,500 housing development proposed for the rural area north of Thatcham. This proposal shows both weak leadership and lazy planning by West Berkshire Council. The argument given in favour of the proposal seems to be, "We have to build this number of houses and if we don't accept we may have something worse forced on us by central government, and there are no better alternative sites". West Berkshire Council should be challenging the annual building requirement, as other local authorities have done. Given the recently extended exclusion zone around AWE, together with the AONB and flood plains, you should be arguing forcibly for reduction in this building requirement. It is also extremely poor planning to build all the housing requirement in one site, especially given the rural nature of the area. This is not a case of NIMBY, it is a case of a completely inappropriate building proposal for the location. This development will in effect lead to Upper Bucklebury joining onto Thatcham, leading to the removal of its village feel and impacting onto the adjacent AONB.</p> <p>Many residents have previously come across some of the landowners and developers involved in this proposal in relation to other schemes. They have consistently shown themselves to care far more about profit than the local community that you are meant to represent. They have attempted to pacify objection by the inclusion of three schools and other limited facilities. Without timescales on these facilities I would question when they would be built by such developers. Kennet School is already heavily oversubscribed and cannot cope with the increase in numbers that even the first phase would bring. No thought has been given to facilities such as doctor surgeries, post office, supermarkets and library; all of which are already extremely busy.</p> <p>A major concern is the impact on traffic. The information I have seen is very basic and doesn't take into account the actual number of extra vehicles such</p>	<p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at</p>

Respondent (with lpr ref)	Response	Council Response
	<p>a development would bring. At peak times, during normal circumstances, Harts Hill is already extremely busy, and is a narrow, windy, dangerous road. Traffic lights at the bottom of the hill will cause large tailbacks on this hill, as I am sure priority will be given to Floral Way traffic. The development would also see an increased number of cars coming up Harts Hill and through Upper Bucklebury as alternative route to the M4 and A34.</p> <p>Approving this proposal would be letting down the community you represent and have a negative effect on all of our daily lives. I already know people in Bucklebury and Thatcham who are saying if this development goes ahead that they would be leaving the area.</p>	<p>junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p>
Elizabeth Fenston (lpr1175)	<p>Our key areas of objection to the proposed major development of such a sizeable nature so close to Upper Bucklebury and the Pang Valley are around the environmental impact of such a substantial development in the area; and the knock on result of 'joining up' all urbanised areas of West Berkshire.</p> <ul style="list-style-type: none"> <li>- The proposal is the size of an entirely new town.</li> <li>- It is impacting an area of outstanding natural beauty that already has the un-moveable border of M4, along which there is ribbon development from London.</li> </ul>	<p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>- We are already almost a suburb of London, increasingly encroached upon from Wokingham, Reading and Newbury.</li> <li>- West Berkshire is really becoming entirely urbanised or semi-urbanised</li> <li>- There will be a significant impact on rare species; animals, bats and birds including Barn Owls.</li> </ul>	<p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>Development in West Berkshire must consider numerous constraints, most notably the constraints posed by the North Wessex Downs AONB, AWE and the associated DEPZs and flooding.</p> <p>As part of the LPR, all sites promoted to the Council have been assessed in the HELAA and this has concluded that there are sufficient sites to accommodate the Council's housing requirement outside of these constraints.</p> <p>The principles which underpin the spatial distribution of new development stem from the overriding objective of enabling sustainable development, development that will meet the social and economic needs of the District while respecting the environmental assets of the District and meet the objective to mitigate and adapt to the effects of climate change and minimise demand for energy and other resources.</p> <p>The LPR aims to build on the principles of the Core Strategy with regard to the spatial distribution of development. The focus is on existing settlements, using the settlement hierarchy to steer development to the most sustainable areas, with an appropriate balance between urban and rural development, in order to meet local needs and maintain vibrant and balanced communities with their own sense of identity.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The proposed allocation of sites takes account of the evidence from the HELAA and Sustainability Appraisal (SA) and are made in accordance with the settlement hierarchy, with higher levels of development at the higher levels of the hierarchy. Thatcham lies in the top tier of the settlement hierarchy (it is an Urban Area). Urban Areas will be the prime focus for housing and economic development.</p> <p>The proposed strategic allocation of North East Thatcham is in accordance with the spatial strategy set out in the LPR.</p>
Derek Young (lpr1185)	<p><i>Representation includes objection to earlier planning application at Siege Cross, attached.</i></p> <p>I have become aware through the Media that another development is being proposed for the Siege Cross area, just off Floral Way. I very disappointed that I only found out about this proposal through the media and not through official channels.</p> <p>I put in an objection to the original proposal when it was for 500 dwellings, some years ago when Barton Willmore wanted to build, see the document attached.</p> <p>I cannot comment on the actual proposal because I have not seen what is proposed, I have searched the planning application section of the West Berkshire website but found nothing relevant, it would have been nice to have a more informed opinion.</p> <p>I am not surprised that this proposed development has been put before the council once again. What does surprise me is that it is now 5 times the size</p>	<p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p> <p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>of the original proposal and therefore the impact on the area is 5 times worse.</p> <p>So in the years since the last failed attempt what infrastructure changes have happened in the Thatcham area, that would be none. But what has happened in the area are flood defences which were needed given the flooding that occurred in 2007. But the new proposal will build straight over these and we would find ourselves back to where we were. I am so glad you are allocating council tax money so well.</p> <p>The roads are the same but will now be 5 times more traffic, the level crossing is still there and there are still only 2 real ways into and out of Thatcham, the A4. Should the development go ahead all roads through to Basingstoke and the A34 will become rat runs including Ashmore Green as some of the 10,000 new vehicles try to get out of the area. The schools in the area will not be able to cope with the number of new vehicles and it will be almost impossible to get an appointment at the doctors as the surgeries will over capacity.</p> <p>This proposed development is the same size as Hungerford, this area cannot cope with an influx of residents that size why not build another Hungerford.</p> <p>What attracted my wife and I to this area was the easy access to green spaces coming originally from London, and now you plan to take that away from me.</p> <p>I realise we, as a country need more houses but for a development of this size a new town could be created with all new facilities enclosed within the development and not something stuck on the side of an already reaching capacity town like Thatcham.</p> <p>This proposed development is <b>wrong</b>, the environment will suffer, there is no additional infrastructure the existing residents of Thatcham and the</p>	<p>development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government's standard method, which has been revised</p>

Respondent (with lpr ref)	Response	Council Response
	<p>surrounding small towns will suffer and should the development go ahead the new residents will suffer.</p>	<p>since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p> <p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p>

Respondent (with lpr ref)	Response	Council Response
Jim Hunt (lpr1181)	<p><b>Objection to Thatcham Development</b></p> <p>I wish to register my objection to the proposed development to the north of Thatcham for the following reasons.</p> <ol style="list-style-type: none"> <li>1. The developments size and elevated position will have a hugely detrimental impact on the views of and around Thatcham. It will be visible from miles around and will adversely impact the AONB that surrounds it.</li> <li>2. Traffic volumes: The development will generate traffic volumes that the roads and local villages will simply not be able to cope with. 2,500 homes equates to 5,000 cars. The A4 cannot cope with the volume of traffic currently: it will certainly not be able to cope with such a significant increase. This increase in traffic will not just impact the A4 - local villages such as Bucklebury, Hermitage, Cold Ash will also be subject to significant increases in traffic volumes as cars travel to J13 of the M4 for M4 and A34 access.</li> <li>2. It would join Thatcham with Upper Bucklebury. WBCs own plans state that Upper Bucklebury should retain its own rural identity yet this plan contradicts WBCs own plan. Speeding is a significant issue in Upper Bucklebury (especially Burdens Heath) where children have to walk on the road verge due to the lack of pavements. Drivers regularly speed excessively along this road. This is particularly a problem for Burdens Heath - this development will significantly increase this problem and the danger posed to pedestrians.</li> <li>3. A previous such application was rejected by the Secretary of State in 2017 (<a href="https://www.newburytoday.co.uk/news/news/22045/minister-rejects-two-housing-developments-for-thatcham.html">https://www.newburytoday.co.uk/news/news/22045/minister-rejects-two-housing-developments-for-thatcham.html</a>). Why has the council now spent considerable funds investing in a proposal that has previously been rejected ?</li> </ol>	<p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural</p>

	<p>5. Councillor Hilary Cole has stated that she is keen to work with the neighbouring villages “because it’s such a big proposal and development for Thatcham”. We have had very little, if any consultation or notice about this! It appears as though WBC are trying to present a fait accompli.</p> <p>6. There is no evidence that this will enhance Thatcham town centre (or indeed Newbury). It will simply increase pressures on the roads and services to the detriment of everyone.</p> <p>7. Such a large area of roofs, roads and drive ways will result in significant rainwater runoff down into Thatcham. There is a high probability that this will increase the chance of flooding in Thatcham.</p> <p>8. Impact on nature. This development will destroy much needed habitat for a number of protected species, including the great crested newt, common lizard, adder, grass snake, slow worm and bats. Increasing amounts of cars and people visiting the area of outstanding natural beauty will have a large negative impact. Wildlife like this need to be protected and not destroyed.</p> <p>I hope you withdraw these plans, especially as similar proposals have already been made and withdrawn.</p>	<p>routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision,</p>

Respondent (with lpr ref)	Response	Council Response
		<p>adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that ‘in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy’ (paragraph 67 of the Core Strategy Inspector’s Report). As additional housing is required, and given Thatcham’s status as an ‘Urban Area’ in the development plan is it considered appropriate to consider Thatcham for housing.</p> <p>An economic advantage of new development is that new residents can help support local shops and businesses and help to boost the vibrancy and vitality of town and local centres.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the</p>

Respondent (with lpr ref)	Response	Council Response
		<p>Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p>
<p>Pam McNish (lpr1182)</p>	<p>I am writing to ask for reconsideration of the size of this development. I understand, of course, the need for new and especially affordable homes but I wonder if, in view of the changing position in the UK, it would be prudent to reassess the need for such a large development. Others have stated many reasons for that already which I will not repeat but having lived in the Upper Bucklebury area for 40 years, my main concern is traffic on Hart's Hill Road.</p> <p>I, my family and friends have had several 'near misses' on the road and now that there are far more cyclists using it, I feel it would be negligent and irresponsible of me not to bring this to your attention.</p> <p>I am writing to ask for reconsideration of the size of this development.</p>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. 		and lifestyle choices will be important elements of the overall transport plan.
Ivan Lowe and Tara Saglio (lpr1186)	<p>We were both greatly distressed to hear earlier this week about the plans being considered for a massive housing development in Thatcham that would ruin our beautiful area and remove a much treasured space forever.</p> <p>Thatcham has seen a lot of development in recent years and little attention has been taken in trying to preserve the character and quality of the surrounding areas. It is important that the rural beauty of Upper Bucklebury be preserved so that generations of people can continue to enjoy it.</p> <p>This massive development will bring extra traffic and pollution to our communities with little benefit by way of investment in the local industries. The influx of people will be a spillover from London and Reading commuters with no vested interest in our heritage.</p> <p>We both strongly object to these proposals and request that planning be refused.</p>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. Respondent (with lpr ref)	Response	Council Response
Drew Noble (lpr1187)	<p>The overdevelopment of this area is impacting Thatcham Green Belt and leading to an increasing in destruction of countryside and wildlife.</p> <p>Fly tipping in our local woods has increased over the years which the local residents end up dealing with, this along with the traffic and pollution that 2500 homes will bring will be a risk to our countryside, with the majority of residents in West Berkshire owning 1-2 cars per household.</p> <p>Crime in the area is also increasing whilst we are building more and more houses. Bucklebury was subject to burglaries over the Christmas period which is now a common theme for the resident neighbourhood watch.</p> <p>I do not see the job market or business opportunities increasing at the same scale. Is there a plan to attract more business to the area to offset the unemployment or lead to an additional 2500 &gt; 5000+ new jobs for residents? West Berkshire are already handing out grants to local business that are failing due to the pandemic.</p> <p>People are travelling further for work – Thatcham and Newbury train station car parks are already over saturated (prior to lockdown). More overcrowding on commuter trains leads wider safety issues and increase in ticket prices.</p> <p>Having previously lived in Reading I moved back to the area due to the crime, drug and homeless problem I would hate to see this county follow in its footsteps.</p> <p>Preferably I would like this development stopped. This area is already densely populated.</p> <p>I support the development of Doctors surgeries and schools which are already under pressure rather than more houses.</p>	<p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p>
Marie Briscoe (lpr2000)	<p><i>Some personal details removed from representation</i></p> <p>I am writing with regard to the proposal to build 2,500 in the green belt at north Thatcham. I strongly feel that this would cause a massive problem with regard to the extra amount of traffic, particularly at already very busy times of day. The increased levels of pollution as well as the loss of so much natural habitation will be devastating for the local wildlife.</p> <p>There is simply not enough help available for children's mental health. With the extra pressure that COVID related problems are going to generate, to potentially add so many extra families to the wait lists, there is no way the local services are going to be able to cope. The same can be said about the SEN provision, it is drastically underfunded and it doesn't give the amount of support so critically required. The thought that the limited amount of resources there are available could be spread even thinner is a sobering one.</p> <p>I do hope that the wider reaching impact of such a huge development will be thoroughly considered.</p>	<p>The site is not within the Green Belt (there is no Green Belt in this District).</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. 		LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.
Margaret Wyatt (lpr1192)	2500 homes will effect all the villages along the ridge to Theale joining us up to Reading. Not only will there be a loss of rural countryside but we will not see the stars again. Please have vision and visit the poundbury near Dorchester. Quality not quantity is important.	<p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p>
Robert Gerdes (lpr1216)	<p>Objections to this development proposal are outlined below:</p> <p>a. Loss of rural countryside &amp; impact on flora and fauna - unique character of this area.</p> <p>1. This area of farmland and underdeveloped land provides a valuable habitat for a wide variety of wildlife including (but not limited to): Badgers, honeysuckle, ivy, primrose, bluebells, cowslips, Hares, Lapwings (and Lapwing chicks), foxes, deer, field mice, newts, bats, red kites &amp; owls, to name but a few items that are in this area. This bountiful nature enhances</p>	<p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>the local area and forms part of the rich land heritage of this area of West Berkshire.</p> <p>b. Impact of housing on flood defences</p> <p>1. Thatcham has for a long time, been at risk of flooding. This was highlighted in the incidents of flooding in the late 2000s (2007/8?). Whilst corrective action has occurred, even by 2021, work is still ongoing, some 10+ years later to improve this. This development would therefore put strain on existing defences and expose gaps. The proposal may highlight how this may be addressed, however there is a risk that this has been done using old and outdated assumptions. This will create unnecessary risks. With the clear impact of global warming (increasing incidence of a one in a hundred year storm or the projected seriousness of it) will create impacts on business and householders. The addition of paved land, on a notable slope will increase the runoff from this land. A critical point of attention is that this will be over an already at strain road infrastructure, such as Floral Way, the A4 and other roads in the area.</p> <p>c. Infrastructure</p> <p>1. Work on Harts Hill to improve the provision of water supply to Upper Bucklebury.</p> <p>1. For over 10 years, Thames water has tried to patch and provide a regular supply of drinking water to the village of Upper Bucklebury. Most recently (over the last 2 years) an additional investment was made as the rolling 'patching solution' clearly was not working; resolved the situation. During that time Harts Hill was beset with work traffic, lane closures and closed down completely over the 2 year period. Whilst Thames Water has at last looked to resolve this issue it has taken in excess of 10 years to do so. A development of houses will raise this risk once more.</p>	<p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic</p>

Respondent (with lpr ref)	Response	Council Response
	<p>2. The road infrastructure throughout this area is not equipped to deal with the substantial increase in traffic that will result from a development of this size. Floral way, an already busy A4 (pre COVID), roads through Thatcham and surrounding areas (including the various villages) mean that additional traffic of quantum that will result from ~2500 houses would be extremely serious and impactful. The use of cut throughs has not been acknowledged with this proposal. Villages in the surrounding area already have too many vehicles passing through them at high speed. This will only increase with an increase in housing of this quantum. This risk impacts the local communities and all living in the surrounding area.</p> <p>3. Existing Doctor and Dental surgeries, along with the Thatcham minor Injuries hospital in Thatcham and the surgeries in the surrounding area do not have the capacity to deal with this large increase in headcount. This will seriously negatively impact existing patients with accessing these key services, as well as impacting new residents.</p> <p>4. Sports Center at Kennet - The sports center by Kennet school is a well used (pre COVID) facility for families in the surrounding area. This would be insufficient in size for usage with the increase in families from a development of this size, both with packing to use the facilities as well the size of the facilities themselves.</p> <p>5. Facilities in local secondary schools in Thatcham. Kennet School manages amazing things with the extremely dated and limited resources it has at its disposal - however West Berkshire has not invested sufficiently in the school. Investment in this school needs to be taken to deal with the intake from the existing developments. To date, this has not been done at a sufficient rate. This results in a school that has old, energy inefficient buildings that leak and an infrastructure that is really at its limit and not sustainable. As an illustration of this, the school does not have a hall big enough to meet with all pupils in one go; it has temporary buildings that are very old to teach a range of pupils in (such as Maths) that although are temporary are now used as permanent buildings. The additional 2500 houses will undoubtedly put this valuable (but very stretched) resource at</p>	<p>by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5</p>

Respondent (with lpr ref)	Response	Council Response
	<p>significant strain. Building new schooling facilities in this development will not resolve this situation. This must be taken into serious account as part of any future housing proposal around Thatcham as to date it is not been. The other schools in the surrounding area of West Berks have far more modern facilities added to them to help cope with the building of new houses, but for some reason Thatcham (and its secondary school has not). This lack of investment (and impact from additional housing) will put at risk thousands of existing children's education (which the COVID situation has already put at risk) with additional children enrolling at the school (irrespective if a proposed school is built as Kennet school will be expected to pick up the strain whilst a new school is built). Please refer to point di) below to see the size of population increase in the past 10 years (2001 - 2011) equates to the size of this proposed development - yet the schooling infrastructure in Thatcham is very strained.</p> <p>6. School Bus Service from Upper Bucklebury to Kennet School. The Council removed the bus service for school children from Upper Bucklebury to Kennet School. The council feedback on how school children were to get to school was that they were expected to walk down Long Grove (unlit, muddy), over the field (that is now expected to be developed) across an already busy A4 to then gain access to the school. Point of note is that there is no pedestrian crossing for school children to use. In light of this decision there has been a large increase of traffic up and down Harts hill at school time of parents driving their children to and from school. This, during rush hour, leads to tailbacks on the A4 with children using the pedestrian lights to cross by the skateboard park (and where the old blue coats school was). With the increase in families wanting to access the school, existing children who walk down Long Grove to school, existing families that drive their children to school and those that cross by the Blue Coats school will exacerbate this situation further.</p> <p>7. Railway. Thatcham station has a line to Newbury, Reading and London. The fat train to London is well used (Pre COVID) by commuters as well as</p>	<p>FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p> <p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation</p>

Respondent (with lpr ref)	Response	Council Response
	<p>using the line to Reading. There is insufficient Parking (Pre-COVID) for users as well as catering with new users due to the development.</p> <p>8. Roads around the Station. The tailbacks of traffic due to the safety barriers being used (no objection to the safety barriers per se) highlights the amount of strain on existing roads. It is well documented the environmental impact and health impact of stationary cars with engines running has in the locality. A development, as outlined, will exacerbate this situation further impacting local residents in and around the Station (already developed with recent / new housing and the nearby Kennet School.</p> <p>d. Overdevelopment</p> <p>1. Thatcham and area has had a very rapid increase in housing stock (population in 2011 as referenced in the census is 25,267 an increase of 11% from 2001 or 2,443. Bucklebury saw an 18% increase between these dates- data pending for 2021 census). The housing estates around this area (such as Dunstan Park) were implemented without taking into consideration impacts on the locality which are only now being addressed (see point above on flood defences) - however the impact on roads have not been addressed.</p> <p>2. The proposed amount of houses is roughly a similar size to Hungerford yet in a far more concentrated space. Hungerford has its own set infrastructure to cater for their residents (schooling, health, shopping, parking, roads) - this development will put additional pressure on existing infrastructure that can barely meet today's requirements.</p> <p>e. Pollution</p> <p>1. The proposal makes minimal reference on how it will address the considerable increases in different forms of pollution (Air, Noise, Soil, Social and Light). The proposed area to date is beneficial in regards to these factors as none of these types of pollutants occur (ie it does not generate Air pollution, in fact as a green site it absorbs</p>	<p>18 consultation to strengthen the Council's policy on pollution.</p> <p>The site is not within the Green Belt (there is no Green Belt in this District).</p>

Respondent (with lpr ref)	Response	Council Response
	<p>CO2 and air pollutants, Noise - it is peaceful, Soil - it is farmed currently or left in a natural/ fallow state, Social - not a high density of people living there or light pollution - only the lights from existing dwellings which are minimal). The building of 2500 will generate pollution. The increase in traffic will generate noise &amp; air pollution; the housing and people living there will create all increased pollution in all five noted categories. As this area is welcomed and used by wildlife (as noted) and by the surrounding community there will be a very negative pollution impact on Thatcham and surrounding area.</p> <p>ii. Loss of Thatcham greenbelt / rural land</p> <p>1. Greenbelts provide the 'lungs' to the country. It ensures a better quality of living for those that live in built up areas (such as Thatcham and Newbury / Theale / Reading) to then utilise it (for recreational purposes). Once developed this area will be permanently damaged meaning that the beneficial outcomes we all have today from such land will be removed.</p> <p>f. "The West Berkshire Local Plan Review to 2036" which was consulted upon prior to this proposal and highlighted a number of strategic objectives (noted):</p> <p>1. Section 3.1.1 (Climate Change - To mitigate and adapt to the effects of climate change and minimise demand for energy and other resources.) - this proposed development does not align with this - as outlined in point b, d and e of this letter.</p> <p>2. Section 3.1.3 (Sustainable and Quality Development - To ensure provision of sustainable developments of high quality design, construction and efficiency (including land use) which contribute to an attractive, safe and accessible environment for all.) The land usage efficiency I would challenge</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>as building on rural / natural, undeveloped land is not an efficient usage of land. Building on existing developed sites logically is.</p> <p>3. Section 3.1.5 ( Town Centres - To enhance the vitality and viability of town, district and local centres in West Berkshire as places for shopping, leisure and community activities). As noted in point c) iii), c) iv), c) v), c) vi), c) vii), c) viii), d) i) and d) ii) above highlight the existing gaps that have not been filled to date with existing development. The quantum of this size of development in a single area will put a considerable strain on existing services.</p> <p>4. Section 3.1.7 ( Heritage - To conserve and enhance the local distinctive character and identity of the built, historic and natural environment in West Berkshire's towns, villages and countryside.) The size and scale of this development will negatively impact as opposed to build the local distinctive character as highlighted in the huge increase in traffic throughout the surrounding villages and countryside.</p> <p>5. Section 3.1.9 (Green Infrastructure and Healthy Living - To ensure that West Berkshire contains a strong network of multi-functional green infrastructure which provides health and environmental benefits and enhances the overall quality of life of sustainable communities). As noted in point i) and a), this area of land is enjoyed by many to walk, observe the biodiversity and use for recreational activities. Building of the size and scale noted in the proposal will deleteriously impact this valuable resource in conflict with this strategic objective.</p> <p>6. Section 3.1.10 (To make provision for transport networks that support sustainable growth in West Berkshire and to promote low emission transport choices.) The existing transport infrastructure cannot cope. Pre COVID (and as noted in a number of points in c) highlight that there is insufficient capacity existing for a development of this scale. This strategic objective is out of line with what is being proposed.</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>7. Section 3.1.11. Infrastructure (To ensure that infrastructure needs (physical and social) arising from the growth in West Berkshire are provided to support and keep pace with development in accordance with the detail set out in the Infrastructure Delivery Plan.). A development of this size and scale is at odd to this strategic objective, as observed in points made in b), c) &amp; d).</p> <p>ii. Policy CS 17 Biodiversity and Geodiversity Biodiversity and geodiversity assets across West Berkshire will be conserved and enhanced. As noted in point a) this area of land contains a diverse array of flora and fauna (examples of which were listed). The development at this location will negatively impact or remove this biodiverse area in misalignment with themes and points highlighted in CS 17.</p> <p>In summary to all of these points above, I am against such a development of this size and scale in such a valuable (both social and biodiverse) area of West Berkshire as well as the impact that it will create.</p>	
	<p>I object very strongly to the proposal of building 2,500 houses in North East Thatcham. This would create a massive influx of people, additional traffic and this site would obviously feed all the traffic on to the A4 therefore overloading the road.</p> <p>Thatcham has seen a quantity of large estate type building over the past 40 years.</p> <ul style="list-style-type: none"> <li>• The Moors south Thatcham,</li> <li>• The rivers estate off Bowling Green Road.</li> <li>• Seige Cross.</li> <li>• Floral Way crossing Hart's Hill.</li> <li>• The large estate off station road Tull Way in the last year.</li> <li>• The most recent development under construction next to Waitrose.</li> </ul>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Some of these estates are now well established but people forget how large in size they were when first constructed.</p> <p>Traffic</p> <p>An extra 2,500 houses and school/s would put at the minimum an extra 2,000 extra vehicles in the area. (this is not taking into account 2<sup>nd</sup> cars or families that have teenagers with their own vehicles) I am sure that any arguments planning put forward for public transport would not sway people to use it, even if it is more environmentally friendly as it is infrequent and expensive and generally not convenient. People these days will always opt for the ease of having their own transport. In addition any school/s built will also increase traffic flow at peak times. There is already one school on the A4 (Francis Bailey) and Kennet School is also off the A4 which also takes it toll on the A4. Hence the A4 would potentially be loaded with school traffic (Harts Hill/Floral Way could possibly be impacted with this traffic too). Planning today also seems to think people will not buy/use cars and therefore do not build homes for vehicles to be parked on properties owned by residents, hence overflow parking on pavements and roads.</p> <p>This additional traffic will also put pressure on the Thatcham railway crossing as people will use this route to access roads to Basingstoke and Newbury Retail Park.</p> <p>Countryside</p> <p>An extra 2,000 vehicles will also be pressure on the surrounding area ie extra journeys to and from Newbury and Reading and surrounding areas. This part of Thatcham borders an Area of Outstanding Natural Beauty, which has been chipped away at by building ie the estate on Floral Way and Seige Cross. Upper Bucklebury is used as a back route to Reading and surrounding areas and has turned into a rat run and what was once a quiet village now has almost constant traffic driving through the village at peak times even during this past year. Bucklebury Common is becoming a</p>	<p>being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water</p>

Respondent (with lpr ref)	Response	Council Response
	<p>playground for motorised vehicles (4x4s and motorbikes), which is most obvious during the winter months.</p> <p>West Berks Council put up metal fencing panels and traffic orders during the winter months to restrict use by mechanical vehicles, also, bollards have been erected, which in some cases have obviously been knocked down on purpose to gain access to the tracks through the common. I would suggest planners speak to their counterparts in the Countryside Department to see what complaints they receive about use of the common. This type of traffic use puts wildlife at a great disadvantage, death of deer is quite a common occurrence and I have quite often had to move dead animals from the road crossing the common. Vehicle journeys via Greenham Common will also put pressure on common grazing animals. By building on green sites we are once again pushing our wildlife and associated vegetation to smaller areas.</p> <p>Pollution</p> <p>Extra housing, vehicle movements and additional lighting will increase pollution in the area. Also the noise and commercial vehicle movements whilst the houses are being built.</p> <p>Commercial</p> <p>Additional housing will not increase employment, only in the short term as it won't necessarily bring in new employers.</p> <p>All in all I think that this proposal is greatly unwarranted and will spoil what is part of our green belt and I think that Thatcham has had its fair share of residential building in the past years having been a resident of Thatcham before moving to Upper Bucklebury.</p>	<p>Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>The site is not within the Green Belt (there is no Green Belt in this District).</p>
Gordian Troeller (lpr1193)	I wish to object most strongly to the proposed development of 2500 houses between the A4, Floral Way and Upper Bucklebury.	The site is not within the Green Belt (there is no Green Belt in this District).

Respondent (with lpr ref)	Response	Council Response
	<p>This development will destroy the 'green belt' around Thatcham, will increase traffic and pollution for all residents within and adjacent to it . There is also a loss of rural countryside which is important not only to the residents of the surrounding villages but also to the community of Thatcham</p> <p>Furthermore, a development of such size will put a severe strain on public services. It will also adversely impact the rural nature of the surrounding villages such as Upper Bucklebury. .</p> <p>I would urge you to refuse planning permission for this project and trust that you will understand and honour the objections of the whole community</p>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. 	c] <u>business</u>	<p>infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In regards to water supply, the developers are aware of the requirement for upgrades to the water supply network and water treatment works (which is identified in the Water Cycle Study).</p> <p>Should the development go ahead, it would be phased appropriately to ensure it does not outpace delivery of essential network and treatment upgrades (See IDP).</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an integrated water supply and drainage strategy which will consider existing related infrastructure on the site.</p>
Peter Spours (lpr1204)	<p>We are residents of &lt;personal information removed&gt; and OPPOSE the proposed development at North Thatcham.</p> <p>The analysis of housing demand relies on out-of-date information because it fails to take account of the most major medical, social and economic catastrophe to impact our lives in the last 100 years. The Covid – 19 pandemic has transformed the way people work, travel and their housing needs yet this is ignored in the proposals.</p> <p>Until this proposal was tabled, the land north of Floral Way has provided the strategic gap between Thatcham and Bucklebury. The proposal all but eliminates the separation and will visually and socially break natural community boundaries.</p>	<p>In relation to the plan being prepared prior to the coronavirus pandemic, the full impact of the COVID 19 pandemic will not be fully apparent for some time. The LPR is a long term strategy to 2039, during which time a review will be conducted every 5 years. The impact of changes in response to macro and local economic factors will be assessed through subsequent reviews, once such implications are realised.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>A development of the scale proposed will generate considerable traffic but the analysis in the proposal underestimates impact on Bucklebury and Chapel Row. It is assumed that the bulk of the new traffic will use the A4, accessed via Floral Way. However, the A4 is already overcrowded at peak times and the new residents will look for alternative routes to the A34 and M4. The roads through our village are ill suited to additional traffic; they are rural, single carriageway, mostly lacking footpaths and featuring blind bends. Speeding is a well-known problem in Chapel Row and more cars will make a dangerous situation worse.</p> <p>This development will have a lasting and negative impact on the AONB directly and from the inevitable increase in visitors. The Common is protected because of its flora, fauna and its situation but is already witnessing habitat damage from walkers, cyclists and motorised vehicles. Additional visitors will make a bad situation much worse. In addition, the development will generate extraneous light that will upset the life of birds and mammals; they cannot adapt and will be driven from their habitats.</p> <p>Finally, we are concerned that the volume of homes proposed will generate unacceptable pollution from carbon emissions. The clean air of the Common would be a thing of the past.</p> <p><u>We urge the proposal be rejected.</u></p>	<p>continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p>
Katie Powell (lpr1205)	<p>In reference to the NE Thatcham Development proposals made by West Berkshire Council as part of the Local Plan Review 2020 -2037 Emerging Draft December 2020 document, as a resident of Upper Bucklebury I would like to object to this development proposal for a number of reasons.</p> <p><b>Scale of Necessary Developments:</b></p>	<p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more</p>

Respondent (with lpr ref)	Response	Council Response
	<p>While I understand that a certain amount of development is always required in every area of the country to ensure that there is enough housing for the growing population, as West Berkshire only has 15% of its land area which can be developed on, I would question the fact that as many as between 530 and 570 houses would need to be built each year, when there are areas of the country when a far higher percentage of the land can be more easily developed. Surely this is something that WBC should be taking up strongly with Central Government.</p> <p><b>Lack of Consultation:</b></p> <p>WBC chose a time, just before Christmas at a time when people were more concerned about Covid-19, to present this development plan to the public in the Newbury Weekly News (December 21<sup>st</sup> 2020). For a development this size, surely they should have informed the public in every way possible, to ensure that all local views are considered. This could maybe have avoided this slightly 'cloak and dagger' situation, where there are still people in Thatcham and the local villages saying "What development?", 5 days before the deadline for objections. A longer period of consultation should maybe be offered to ensure everyone is fully informed.</p> <p><b>Traffic:</b></p> <p>The increase of traffic associated with 2,500 new houses is of great concern, in an area where the main road (A4) is already often very congested. Thatcham is already affected from East to West by the very heavily trafficked A4 and to the south by the level crossing with ever lengthening queues many times during the day. Furthermore, the traffic forecasting in the plan already anticipates that a proportion, about 10%, of new traffic generated by the development will pass up Harts Hill and into Bucklebury Parish, probably mostly through Upper Bucklebury and on to the villages of Cold Ash or Chapel Row and Southend Bradfield. Roads through Bucklebury Parish are</p>	<p>housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>wholly inadequate to support increased traffic volume and speeds. I have three particular concerns about this:</p> <ul style="list-style-type: none"> <li>• Harts Hill Road from Thatcham to Upper Bucklebury is characterised by a steep hill and multiple blind bends, all of which are relatively narrow and unlit in keeping with the proximity to AONB. This is already a hazardous route, with numerous traffic accidents on this road with the existing amount of traffic, this can only be worsened with any increase of traffic.</li> <li>• I question the fact that it is forecast that there will only be an increase of 10%. There are many times when the already overcrowded A4 is so congested, that people come up Harts Hill to avoid this route, using it as a ‘rat run’. This is made especially bad when at times there are roadworks or the M4 is closed. Equally other routes further along which would affect Woolhampton and Beenham will be chosen to avoid the congested A4. The increased traffic will be a safety concern for local residents, particularly children whilst walking to and from school.</li> <li>• The increase of pollution in a rural area emitted and damage to already bad roads by potentially 5,000 new vehicles is immeasurable.</li> </ul> <p><b>General Pollution:</b></p> <ul style="list-style-type: none"> <li>• A development of this size will enormously increase both noise and light pollution in the rural village of Upper Bucklebury</li> <li>• This development will increase pollution during the construction and from the increased population and traffic thereafter. West Berkshire declared a climate emergency on 2 July 2019, this development contradicts this declaration.</li> </ul> <p><b>Flooding:</b></p>	<p>IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council’s policy on pollution.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham’s flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The area for development is at present sodden, the roads from all the villages are streams, where will the excess water go when the land that is presently trying to soak it up has been concreted over? Are we to return to the floods of 2007 in Thatcham?</p> <p><b>Negative Impact on Surrounding Villages &amp; North Wessex Downs AONB:</b></p> <ul style="list-style-type: none"> <li>• Whilst the plan seeks to cap the development at 100m above sea level, in contrast to Upper Bucklebury sitting at 134m, in order to limit visual impact on the AONB, there will be an impact nonetheless. It is cited in the Bucklebury vision and Bucklebury Plan to maintain a strong greenbelt between Thatcham and Upper Bucklebury. This document is approved and agreed with WBC and should be considered as supplementary planning consideration.</li> <li>• Bucklebury Common, which is public access land sitting adjacent to the proposed development, is already experiencing elevated levels of visitors including illicit vehicular access all of which is causing damage to the environment through inconsiderate parking, dog fouling, littering, 4x4 and motorcycle disturbance &amp; damage all of which is detrimental to the valuable natural environment including rare Heathland habitat. It can be expected that the impact of this development can only be severely detrimental to Bucklebury Common.</li> <li>• WBC seeks to implement a "country park" belt between the 100m cap and the land above, further detail is required to ensure that this area is adequately protected to guarantee it is safe from future development. The country park area will require concrete plans for landscaping it so that it creates a buffer zone to attract the new residents and mitigate the anticipated growth in visitors to Bucklebury Common.</li> </ul> <p><b>Inadequate Supporting Infrastructure for Scale of Development</b></p>	<p>undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>Though delivery on a particular site can never be guaranteed, the Council closely monitors the position,</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• The proposal doesn't contain details of an increase in healthcare services to support +25% housing in the Thatcham area. Also, is West Berks hospital able to support his increase? As the congestion on the roads will make blue lighted transport to Reading and other hospitals more risky.</li> <li>• The proposal doesn't address the strain of increased demand on Thatcham Train Station. Taking into account the fact that parking facilities at Thatcham Train Station are already insufficient to cope with current demand, there would need to be a significant increase in the provision of parking at the station to cope with increased demand.</li> <li>• The road infrastructure in a number of common commuting directions from the development are not sufficient.</li> <li>• There are no timescales for the building of schools and other amenities. Do we know these would actually happen?</li> <li>• The new development would be comparable to the size in population of Hungerford, in a much smaller and less developable area. Hungerford has a cultural centre, library, many places of worship, town centre. Simply offering schools and some playing fields will not be enough to provide a decent quality of life for the residents, so the people will need to go to Thatcham, which WBC (see comments by Councillor Hillary Cole in NWN 21/12/20) has already admitted to having limited amenities for the number of residents there now, or to the tiny village of Upper Bucklebury, which is ill equipped to cope with a large influx of people.</li> </ul> <p><b>In the event of a development of some sort in West Berkshire, could I request that WBC think carefully of the following possibilities:</b></p> <ul style="list-style-type: none"> <li>• Reduce significantly the development from its current size of 2,500 houses, to limit the impact of residents in both Thatcham and the outlying villages, maybe concentrating on the lower parts of the site, near Colthrop, limiting traffic problems and other impacts as highlighted on the villages in this area.</li> </ul>	<p>annually updating the Five Year Housing Land Supply. At present the Council is able to demonstrate a supply of 7.3 years for the period to 2026.</p> <p>The Council's strategy is for a mix of sites: strategic sites such as Sandford Park and North East Thatcham, which can delivering infrastructure, facilities and significant numbers of affordable homes and a larger number of medium and smaller sites, including brownfield sites within settlement boundaries. The strategy seeks to focus development in the more sustainable settlements of the District rather than distribute development more evenly. This approach continues that set out in the Core Strategy which went through all stages of consultation, examination and adoption by the Council.</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• Look more closely at an improvement in the infrastructure in Thatcham, independently of a new development as large as a town in itself without much additional infrastructure.</li> <li>• Consider using various sites around West Berkshire.</li> <li>• Consider objecting to Central Government about the number of properties to be built each year in West Berkshire, if indeed only 15% of the land is developable.</li> <li>• Look again at the development at Grazeley as Reading and Wokingham Councils seem to still be looking at that.</li> <li>• Above all, improve communication with the residents in this whole area, to regain trust</li> </ul>	
Lisa Parker (lpr1206)	<p>I am sending this email with my objections for this planned “Thatcham Development”</p> <p>The vast majority of Upper Bucklebury are against this development and I am one of those residents.</p> <p>A few of my objections include:</p> <p>Upper Bucklebury is a beautiful, rural part of West Berkshire and we will lose this affecting our green belt which will dramatically reduce our local wildlife.</p> <p>Large amounts of empty houses in local areas – why build new when we already have existing buildings which can be developed ?</p> <p>Having a development as big as Hungerford, without the towns infrastructure will make the development crammed and on top of each other</p> <p>Increased pollution</p>	<p>The site is not within the Green Belt (there is no Green Belt in this District).</p> <p>In regards to the development of brownfield sites, when determining which new sites to allocate the Council are only able to consider land that is submitted to them through the HELAA. The HELAA includes brownfield sites that the Council are aware of.</p> <p>The supporting text to policy SP12 (Approach to Housing delivery) of the emerging draft LPR identifies that several sources will ensure a continuous supply of land across the plan period. These include amongst others, existing planning commitments (unallocated sites with planning permission), many of which are brownfield sites.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council’s housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Increased traffic – Harts Hill Road can be very dangerous at the best of times, more people will be looking for short cuts, affecting a high usage of this road (which I would also like to say is always full of pot holes, I'm not sure it would take much more traffic/usage)</p> <p>Increased water usage – Upper Bucklebury have just had a new pump installed which can just about handle our small village, how on earth will it be able to support the extra 875,000 litres of water (based on 350 litres per household)</p> <p>Light pollution – Upper Bucklebury currently only has 6 street lights, yet the new town will be fully lit</p> <p>How are you planning to fill the new schools with one planning to close already in Thatcham. Not every family will need a school, hence having schools half full for the majority of the time.</p> <p>Are there enough local jobs to support all these families – will we end up with a high unemployment area!!!!</p> <p>During lockdown so many people's mental health have been helped by daily walks and fresh air, without these what will people have !!!!</p> <p>So many memories have been made for myself and my family – sledging in these fields / wildlife walks / sunrises / picnics – how sad that other families will not be able to share these precious memories !!</p>	<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential</p>

Respondent (with lpr ref)	Response	Council Response
		<p>delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to water supply, the developers are aware of the requirement for upgrades to the water supply network and water treatment works (which is identified in the Water Cycle Study).</p> <p>Should the development go ahead, it would be phased appropriately to ensure it does not outpace delivery of essential network and treatment upgrades (See IDP).</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an integrated water supply and drainage strategy which will consider existing related infrastructure on the site.</p>
Lindsay Hallahan (lpr1207)	As a local resident of Bucklebury parish, I would like to strongly register my objection to the proposed full development of the above sites for the following reasons.	In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.

Respondent (with lpr ref)	Response	Council Response
	<ol style="list-style-type: none"> <li>1. The Vast majority of Upper Bucklebury residents are against this development, many have already registered their objections, however many are not aware of the application or consultation as no information has been sent out by WBC. WBC are in my opinion negligent in this process and the consultation period should be extended and all residents should be formally written to.</li> <li>2. It is cited in the Bucklebury vision and Bucklebury Plan to maintain a strong greenbelt between Thatcham and Upper Bucklebury. This document is approved and agreed with WBC and should be considered as supplementary planning consideration. It is not mentioned in the WBC documentation.</li> <li>3. It would effectively join Upper Bucklebury with Thatcham, which has all but happened at Cold Ash effectively removing the rural aspect of the area. This is actually stated in the WBC documentation (<a href="https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=0">https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=0</a>) page 22, stating <b>“particularly as development of both north east and north Thatcham would result in the loss of the separate identifies of Cold Ash and Bucklebury, and would harm the setting of the AONB settlement pattern”</b>. WBC are therefore suggesting that the Parish of Bucklebury should maintain its identity but the proximity of the development is in contradiction to WBC’s own intentions.</li> <li>4. A previous application was rejected by the secretary of state in 2017 <a href="https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html">https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html</a>. Why are WBC now considering this site in light of the previous objection, what has changed and knowing this has been refused once why have massive funds been spent thus far?</li> <li>5. It is a massive over development of the Countryside in one area which consists of rolling hills and farmland. The reason stated is that 85% of West berks is AONB. WBC have previously built on AONB and AONB status can be changed with government approval, and as it is allegedly the government driving this would they not be more open to changing some AONB status ?</li> </ol>	<p>There is no green belt within this area (or within the District) there will be open space maintained along the northern/north eastern part of the site.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>6. In the NWN the following statement is attributed to Hilary Cole. The council's executive member for housing, Hilary Cole (Con, Cold Ash and Chieveley), said: <b><i>“We are very keen to work with the local community because it’s such a big proposal and development for Thatcham. “We have taken a conscious decision to do this around Thatcham so it will deliver the infrastructure we need. “We feel that Thatcham is best placed to take a development of this size.”</i></b></p> <p>I have two specific issues to object to on these statements made. Firstly WBC have done very little if any to work with local residents – see above points and secondly Ms Cole’s statement infers that the decision is made, so why is so called consultation being held? Because of this she should resign.</p> <p>7. WBC and Thatcham councils have wasted a great deal of tax payers money in completing many surveys and writing an 800 page report, effectively making this a fait accompli, before going to consultation on the proposal.</p> <p>8. It will have a significant impact on traffic in the area and especially on the route into Thatcham and Newbury and towards the station which are already heavily congested at busy times and in the event of any minor traffic disruption.</p> <ol style="list-style-type: none"> <li>1. This will significantly impact the freight traffic using the industry site at Thatcham</li> <li>2. It will significantly increase the traffic on the back route (rat runs) which are not designed for large traffic volumes. This has a severe negative impact on wildlife, the environment and also human safety for walkers and children who live in these areas.</li> </ol> <p>9. Traffic and speeding in particular through Upper Bucklebury is of a major concern due to the primary school. With an increase in 10% this will only worsen the situation.</p> <p>10. It will completely surround the Crematorium at Thatcham which was, as I understand, placed there to be away from residential properties and has constraints placed on it.</p>	<p>The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that ‘in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy’ (paragraph 67 of the Core Strategy Inspector’s Report). As additional housing is required, and given Thatcham’s status as an ‘Urban Area’ in the development plan is it considered appropriate to consider Thatcham for housing.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council’s evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a ‘masterplan’</p>

Respondent (with lpr ref)	Response	Council Response
	<p>11. It is stated/assumed this will help the Upper Bucklebury Business – predominantly the Pub and Shop. The Pub is hardly likely to benefit as a) pub usage across the country is in decline b) the Pub at the bottom of Harts Hill cannot already sustain a business. One pub is hardly justification for a development this size. The shop is also likely to suffer as the plan indicate that shops will be included, so it is likely it would have a detrimental impact on the only shop in UB, creating more traffic.</p> <p>12. It is cited that there cannot be development on the Kennet flood plain, however there are multiple examples where this has already been done (most of Thatcham was originally a flood plain), this is extremely hilly land which is almost certainly as unsuitable to development as the flood plain.</p> <p>13. It will significantly increase the noise and light pollution to the Bucklebury Parishioners – there are no street lights in Upper Bucklebury.</p> <p>14. There is no evidence that this will enhance Thatcham town centre (or indeed Newbury). The development of the old Army Base by the Station didn't add any amenities and we have seen the slow decline of the town centre over the last 20 years despite the area growing.</p> <p>15. The HELAA was updated in December 2020 to take account of factual inaccuracies – who is to say that the same people who have made the assessment of this site don't have their facts right in this document or this time. What evidence can WBC produce to conclude everything stated is factually correct?</p> <p>16. Schooling – this will obviously have an impact on local schools (and traffic). Current indications are that KS1 children volumes are decreasing yet the plan includes a proposal for 3 new schools. When would this be built before or after the houses? Build it before and it will poach children from local schools, such as Upper Bucklebury which will make that unsustainable (as is happening in Newbury with the new school on the college site). Build it after and the local schools will be overwhelmed beforehand. If the development is spread across the region there is a much greater chance of the load being spread out?</p>	<p>/ visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in</p>

Respondent (with lpr ref)	Response	Council Response
	<p>17. What impact will Brexit have on new residents to the area in that we have a large proportion of EU citizens already here, but this is likely to continue in future hence is the demand for housing still appropriate. ONS statistics show that in 2019 29% of mothers of babies born were not from the UK. Does there need for such extensive development therefore required.</p> <p>18. West Berkshire declared a climate emergency on 2 July 2019. <a href="https://www.westberks.gov.uk/media/48362/Draft-Environment-Strategy-2020-2030-Summary-document-January-2020-/pdf/WBC_Environment_Strategy_Summary_A4_20.pdf?m=637141844400230000">https://www.westberks.gov.uk/media/48362/Draft-Environment-Strategy-2020-2030-Summary-document-January-2020-/pdf/WBC_Environment_Strategy_Summary_A4_20.pdf?m=637141844400230000</a> WBC - Environment Strategy - <b>with declaration of climate emergency</b>. This will not contribute with the increased pollution from the construction traffic, increased vehicle pollution due to the inevitable congestion and so on</p> <p>19. The plan suggests the provision of a “country park”. There is no budget available for this.</p> <p>I sincerely hope that my concerns above are reviewed and considered carefully before making any decisions which would destroy the beautiful area that my family call home.</p>	<p>to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham’s flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council’s policy on pollution.</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p> <p>In relation to the Climate Change Emergency, The emerging draft LPR includes a policy that specifically covers climate change (policy SP5). This requires that all development should contribute to West Berkshire becoming and staying carbon neutral by 2030.</p> <p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs</li> </ul>

	<p>organisms interact with each other and abiotic elements of the environment. The numerous organisms within these multiple ecosystems are dependent upon one another (ecosystem interdependence) and often very small changes to an ecosystem can have drastic consequences. The result of building 2500 homes near ancient woodland (and the impact of their being) would lead to a decline in wildlife and irrevocable loss of biodiversity and habitats. Furthermore the high levels of pollution as a result of the additional vehicles on the road will additionally add to this devastating issue. Leading me onto my next point.</p> <p>High levels of pollution.</p> <ul style="list-style-type: none"> <li>The stated proposal makes a restricted reference to how the pronounced increase of the variety of pollution (Soil, Social, Noise, Light and Air) will be addressed. Currently, the undeveloped land is beneficial in regards to these factors as none of these types of pollutants occur, for example the green site absorbs carbon dioxide emissions and gives out oxygen. The soil is currently farmed for natural needs; there is not a high population of people reducing the risk of spreading disease (an important factor at the moment) and generating light pollution as the existing light pollution is negligible. The building of 2500 homes will generate high levels of pollution which will damage the surrounding environment. Moreover, the average household of four has two cars, meaning an estimated extra five thousand cars on the road generating more fumes into our environment. According to the SMMT New Car Report of 2017, the average UK car emits 68.5 Metric tons of carbon dioxide per year. This will equivocate to 342,5000 (5000 multiplied by 68.5) additional Metric tons of carbon dioxide released into the surrounding area (not including additional carbon dioxide levels released by public transport vehicles) as a result of these 2500 homes. These extra cars will also further add to the issue of noise pollution as a result of this development.</li> </ul>	<p>policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Respondent (with lpr ref)	Response	Council Response
	<p>Increased Traffic.</p> <ul style="list-style-type: none"> <li>As previously stated, an estimated 5000 new cars will be on the surrounding roads of West Berkshire. Although this has been acknowledged in the proposed plan, the impact on traffic through the surrounding villages especially to the A34 has not been addressed. Currently there is already an issue with speeding throughout villages and this on-going problem will only be exacerbated with the additional vehicles. At the moment, many children and young adults dangerously walk to school across the highly busy roads. With the potential of more vehicles congesting the roadways, schoolchildren (in which numbers will increase due to the proposed 2 primary schools and 1 secondary school) and pedestrian lives will be put at risk. Furthermore, in 2016 West Berkshire council cancelled the school bus from Upper Bucklebury to Kennet School, in which the stated walkway was said to be down Long Grove, across the muddy fields and over the A4. This will mean that schoolchildren will be having to walk over a building site trying to reach their education. Meaning, their lives will yet again potentially be put at risk during the building of this development and subsequent to this due to the increased number of cars.</li> </ul> <p>Infrastructure</p> <ul style="list-style-type: none"> <li>As of the last West Berkshire Census in 2011 the average age population was stated to be around 35-64 years old, with roughly 20% aged 65 and over. This age category is often subject to health conditions and need the correct facilities to be cared for. The minor injuries unit does not hold the capacity for an extra 2500 households and nor do the 55 GP practices which provide for 550,000 patients already. This will seriously negatively impact existing patients with accessing these key services and also impacting the new residents. This will also be a similar problem for Dental Surgeries, the one</li> </ul>	<p>and lifestyle choices will be important elements of the overall transport plan.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p> <p>In relation to potential impact on surface water, all new development must include sustainable drainage measures, and development must be avoided on areas that are at risk of surface water flooding. Development on the site will be expected to deliver surface water management approaches that could deliver a net gain for Thatcham town. Drainage and flood attenuation works are included in the IDP.</p> <p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for</p>

	<p>Orthodontist practice in Newbury and any other health related services.</p> <ul style="list-style-type: none"> <li>• Sports Leisure Centre at Kennet School. This sports centre is used by many (pre COVID-19) in the surrounding area, and pupils of the school, for numerous physical well-being activities, by use of the gym, squash courts, swimming pool and dance studio etc. This facility would be incapable of supporting the influx of residents.</li> <li>• Leading on from this, the facilities at the current local secondary school in Thatcham are limited, despite the school managing very well, the out-dated buildings have not been supported by the council or invested sufficiently in. As a result of this, the school deals with energy inefficient buildings that leak and let heat escape and a limited infrastructure that is not sustainable or meets the needs of the school. Some examples regarding this include the following: <ul style="list-style-type: none"> <li>i) the school hall can only just fit two years in at its maximum capacity.</li> <li>ii) It has had temporary buildings in place for an prolonged amount of time, for example, the maths block. These temporary buildings are now used permanently and yet are unsuitable for coping with the number of students using them on a daily basis. The buildings are cold, under developed and unsuitable to be used for this amount of time. For example, during this coronavirus period, using these temporary blocks, which are used by each year group multiple times each week, have been incapable of keeping students warm after having to have efficient ventilation in the classrooms and due to the small corridors social distancing measures were a struggle despite teachers best efforts.</li> </ul> </li> </ul> <p>This must be prioritised first and taken into serious account as part of any future housing proposal around Thatcham. Other schools in the surrounding area of West Berkshire have far more developed and modern resources which would enable them to cope with this potential plan. However for some</p>	<p>additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>In regards to waste water capacity, the developers are aware of the requirement for upgrades to the water supply network and water treatment works (which is identified in the Water Cycle Study).</p> <p>Should the development go ahead, it would be phased appropriately to ensure it does not outpace delivery of essential network and treatment upgrades (See IDP).</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an integrated water supply and drainage strategy which will consider existing related infrastructure on the site.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>unstated reason Thatcham's secondary school does not. This lack of investment, and further impact of additional housing, will put strain on thousands of existing school children's education - who have already been subjected to a lack of advancement due to the pandemic. Even if a proposed secondary school and two primary schools are built, the small primary schools which too are at their maximum capacity already, and Kennet School will be expected to manage the strain of school children whilst the new schools are built.</p> <ul style="list-style-type: none"> <li>• To further compensate for the education lost due to the pandemic, benefit knowledge and understanding, and for entertainment purposes, libraries are a vital resource for the community. Thatcham's current library would not be able to serve more residents.</li> <li>• Thatcham Railway Service. Thatcham station has multiple connections, with main lines running to Newbury, Reading and London - which are all well used (pre COVID-19) by commuters in the local area. These train lines are also used as transport links for school children to get to school, whether it is going to school elsewhere in the area, or travelling to Thatcham and for workers. Therefore it is vital that the station is well maintained and equips the existing residents surrounding and the new residents. However, currently there is insufficient parking for current users. Moreover, this will have to be adapted as there is already a gradual increase in daily train arrivals from Reading to London (of 10.7% in 2017 sourced a published government document) in which Thatcham contributes to an average of 43 trains arriving in Reading a day.</li> <li>• The Level Crossing. Roads around the station often have tailbacks of traffic due to the safety barriers used (no objection to them here) however it already highlights the amount of congestion on the roads from the existing cars of the area. Whilst this is already bad for the environment, due to engines running whilst waiting, fumes from the additional number of cars (as stated before) would further increase this.</li> </ul>	

Respondent (with lpr ref)	Response	Council Response
	<p>Mental Health and physical well being. During the pandemic, it has been vital to exercise and break from looking at a computer screen for work. Getting outdoors has been proven to significantly positively impact mental health- which is an increasing problem throughout the UK and this should not be disregarded. Myself, and many others - both in Thatcham and Bucklebury - have used the surrounding fields for exercise both prior to and during the pandemic. The rural area has boosted mental health in focusing on the wildlife and scenery that surrounds it. The proposed plan indicates an approximation of 50% of the development kept as green space. However the plans do not state whether the private gardens of the new dwellings will be included in this. If so this would in no way compensate for the loss of green space. This would leave insufficient space for people of the surrounding area to utilize to support their physical and mental well being.</p> <p>Surface Water Run Off. In 2007 Thatcham experienced drastic floods with awful consequences that strained the surrounding economy, society and environment. Despite flood measures being put around Thatcham, these did not allow for 2500 extra homes, built on a slope, from which the water would run down the hill into Thatcham. Whilst surface water management schemes have been proposed, the landscape at the moment is permeable so therefore water is absorbed however once the land is developed it will become impermeable putting more water onto the A4, and as stated previously, putting Thatcham at a higher risk of flooding (which it is already subjected to due to its saturated ground.)</p> <p>Over-development</p> <ul style="list-style-type: none"> <li>The Thatcham area and its surrounding villages is already said to be growing faster than the rest of West Berkshire (according to the 2011 Census) and has continued growing since- by 11% between 2001 and 2011 censuses. With further development Thatcham runs the real risk of being over developed.</li> </ul>	

Respondent (with lpr ref)	Response	Council Response
	<p>Waste. With the population growth in Thatcham and this additional proposed increase in housing and residents, the proposal does not highlight how this not inconsiderable amount of household sewage will be dealt with. In 2019 there was a leak in the sewage works in Thatcham due to insufficient/decaying infrastructure, this problem will only multiply if more residents are proposed to live in the area. The effect of a sewage leak has drastic consequences for the environment yet again, so therefore I urge you to invest in the infrastructure in and around Thatcham to maintain its current population before considering such a large development.</p> <p>In conclusion of this, I am against this proposed development as my points above articulate.</p>	
Amelia Parker (lpr1208)	<p>I am writing to you today to inform you on why I and many other members of the community are against the building plans of 2500 new houses.</p> <p>I was devastated when I found out about the proposed plans to build this absurd amount of houses as I never thought that this farmland should be built on. As Thatcham already is densely packed with houses, it lacks beautiful nature that people can experience. However these farmlands allowed this as it almost felt like an escape from the noise and bustle of Thatcham. Especially due to recent events, the nationwide lockdown, more people have started to walk through these fields and see all different types of animals. I myself have seen different animals in these fields such as rabbits, badgers and deer's - and by building these houses it would destroy their habitat.</p> <p>Furthermore me, my family and my friends have very fond memories of times in these fields. Multiple snow days spent off school sledging down the hills and also late nights and early mornings watching the sunset and sunrise. I know that this may seem like a small reason against the building plans - but these small moments are precious and to build on this land it would strip future generations of experiencing the fun me and others have</p>	<p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p>

Respondent (with lpr ref)	Response	Council Response
	<p>experienced. When I asked my ten year old brother about his favourite memories in these fields he said that it was the multiple picnics we had there during summer, exhausting family walks and also the sky at night. Where we live in Upper Bucklebury at night the stars are extremely clear due to the lack of street lights. With this new 'mini town' being built it will affect light pollution and exterminate our view of the stars. When i used to live in Thatcham seeing the stars was an infrequent event, which i thought was normal, but now just by removing street lights i have realised it is not and i do not want other people to believe that stars only appear 2 or 3 days a week.</p> <p>Finally i would like to highlight the fact that these plans have been sprung on the local residents. A small amount of houses would require little input from local residents- however a new area (the size of Hungerford) being built would significantly change the dynamic of the town and impact us in different ways - these being traffic, unemployment and also a massive increase in population size.</p> <p>Thank you for taking some time to read my email and I hope you consider my reasons against the building plans.</p>	<p>In regards to light pollution, policy DM4: Environmental nuisance and pollution has been strengthened to ensure that all reasonable steps are taken through design, siting and technological solutions to ensure the abatement of obtrusive light to avoid sky glow, glare and light spillage, intrusion and any adverse impact to wildlife. Applicants should adhere to the guidance on lighting provided in the most up to date Institute of Lighting Professionals (ILP) guidance notes, alongside other relevant local documents including the North Wessex Downs AONB 'A Guide to Good External Lighting' (2021).</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR also requires the submission of a lighting strategy.</p> <p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p>
David Fittall (lpr1210)	<p>I strongly object to the WBC's Thatcham North East development plans contained in the WBC Local Plan Review 2020-2037: Emerging Draft:</p> <ul style="list-style-type: none"> <li>• The size of this development, a 25% increase in the size of Thatcham, is large increase in population in one small area and will have a significant impact.</li> <li>• As a resident of Upper Bucklebury we will be directly impacted and it is not an understatement to say that a development of this size on our doorstep will ruin the village: <ul style="list-style-type: none"> <li>○ <b>The loss of countryside</b> from the development itself leading to a loss of the buffer between Thatcham and surrounding villages.</li> </ul> </li> </ul>	<p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>○ <b>The increase in road traffic.</b> The road traffic model in the proposal appears optimistic to say the least in terms of the level of traffic increase that will be generated through Upper Bucklebury and onwards to the villages of Chapel Row and Bradfield. How can we set any store by a traffic model developed by those who are proponents of the scheme? The roads are simply not suitable for this increase in traffic. <ul style="list-style-type: none"> <li>▪ In Upper Bucklebury we already see an ongoing increase in traffic and an accompanying increase in the level of sustained and consistent speeding through the village which is not being addressed at all. This will be made significantly worse, to the point of being intolerable, by a development of this size on our doorstep.</li> <li>▪ This increase in traffic and the consequent increase in speeding traffic from this development will be a safety concern for residents, particularly children walking to Bucklebury School.</li> <li>▪ The increase in traffic from a development of this size will impact the quality of life and health of those living in Upper Bucklebury.</li> <li>▪ As I say this will ruin the village of Upper Bucklebury.</li> </ul> </li> <li>○ <b>Impact on local services:</b> the lack of provision for increased health services is a significant gap; both in terms of GP provision and the additional strain on the community hospital which in itself does not offer the range of services that are required by the existing population.</li> <li>○ Such population growth concentrated in one small area will have a detrimental impact on the surrounding countryside, wildlife and habitat – <b>this will impact the North Wessex AONB</b> and exacerbate the problems we already experience; such as the dumping of rubbish, illegal use of the common by 4x4 vehicles.</li> <li>○ This also smacks of <b>lazy planning by dumping so many houses in one place</b> and increasing the size of a town by 25%</li> </ul>	<p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development,</p>

Respondent (with lpr ref)	Response	Council Response
	<p>on one fell swoop with little consideration of the consequences for those people who already live in the area.</p> <ul style="list-style-type: none"> <li>o Much of West Berkshire is floodplain or AONB, and land has also been removed by the surprising scale of the extension of the safety zone around AWE. So why is it not the case that the number of houses the county must accept is proportional to quantity of developable land? <b>This is a flawed system.</b></li> </ul> <p>Given this is a plan being pushed by the Conservative controlled WBC, at the behest of policy put in place by a Conservative government this will certainly inform my future voting intentions at local and national level.</p>	<p>including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed</p>

Respondent (with lpr ref)	Response	Council Response
		<p>development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>The Council's strategy is for a mix of sites: strategic sites such as Sandleford Park and North East Thatcham, which can delivering infrastructure, facilities and significant numbers of affordable homes and a larger number of medium and smaller sites, including brownfield sites within settlement boundaries. The strategy seeks to focus</p>

Respondent (with lpr ref)	Response	Council Response
		development in the more sustainable settlements of the District rather than distribute development more evenly. This approach continues that set out in the Core Strategy which went through all stages of consultation, examination and adoption by the Council.
Louise Sturgess (lprlpr2291)	I am writing to express my extreme concern over the proposed Thatcham development. This housing estate will take away a vast amount of our countryside and destroy wildlife, which we desperately need to preserve at all costs. The proposal is also for this development to be built on greenbelt land which is disgraceful. In addition to destroying this beautiful countryside, the development will create more traffic, more pollution and put even more pressure on local services in the area, such as schools and GPs, which are already severely stretched. West Berkshire Council has failed to invest in these services and the area over the years which means that these services will also not be able to support an additional 2,500 homes and families. This development would be extremely detrimental for both Thatcham residents, the environment and our wildlife and I urge you to reconsider.	<p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>The site is not within the Green Belt (there is no Green Belt in this District).</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology</p>

		strategy which will set out how priority habitats and ecological features will be protected and enhanced.
Robyn Fittall (lpr1211)	<p><u>I object strongly to the Thatcham Development</u></p> <ul style="list-style-type: none"> <li>• The size of this development, a 25% increase in the size of Thatcham, is a large increase in population in one small area and will have a significant impact on our village.</li> <li>• As a resident of Upper Bucklebury, we will be directly impacted by a development of this size on our doorstep and it will ruin the village: <ul style="list-style-type: none"> <li>○ <b>The loss of countryside</b> from the development itself leading to a loss of the buffer between Thatcham and surrounding villages.</li> <li>○ <b>The increase in road traffic.</b> The road traffic model in the proposal appears optimistic to say the least in terms of the level of traffic increase that will be generated through Upper Bucklebury and onwards to the villages of Chapel Row and Bradfield. How can we set any store by a traffic model developed by those who are proponents of the scheme? <ul style="list-style-type: none"> <li>▪ In Upper Bucklebury we already see an ongoing increase in traffic and an accompanying increase in the level of sustained and consistent speeding through the village which is not being addressed at all. This will be made significantly worse, to the point of being intolerable, by a development of this size on our doorstep.</li> <li>▪ This increase in traffic and the consequent increase in speeding traffic from this development will be a safety concern for residents, particularly our children walking to Bucklebury School.</li> <li>▪ The increase in traffic and pollution from a development of this size will impact the quality of life and health of those living in Upper Bucklebury.</li> <li>▪ Upper Bucklebury will lose its identity as a Village.</li> </ul> </li> </ul> </li> </ul>	<p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements. Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>○ <b>Impact on local services:</b> the lack of provision for increased health services is a significant gap; in terms of lack of GP provision and the extra strain the small hospital we have is already not fully suitable for the needs of the people who currently reside in Newbury and Thatcham.</li> <li>○ Such population growth concentrated in one small area will have a detrimental impact on the surrounding countryside, wildlife and habitat – <b>this will impact the North Wessex AONB</b> and exacerbate the problems we already experience; such as the dumping of rubbish, illegal use of the common by 4x4 vehicles.</li> <li>○ Lazy planning by dumping so many houses in one place and increasing the size of a town by 25% is extremely inconsiderate for those people who already live in the area.</li> <li>○ Much of West Berkshire is floodplain or AONB, and land has also been removed by the surprising scale of the extension of the safety zone around AWE. So why is it not the case that the number of houses the county must accept is proportional to quantity of developable land?</li> </ul>	<p>and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver ‘a network of green infrastructure which will include a new community park linking Thatcham to the AONB.’</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. 		The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.
Barbara Grey (lpr1219)	<p>I understand that West Berkshire Council (WBC) have published a proposal to build 2,500 houses to the North and East of Thatcham.</p> <p>How can such a proposal even be considered? Particularly with such short notice and in the middle of a pandemic. How is it that council-tax payers whose properties abut the land you propose to build on have not been notified, let alone consulted?</p> <p>Thatcham has already been allowed to spread over a great deal of previously farmed land and has outgrown many of the services required - schools, doctors' surgeries, public transport, highways etc., not to mention provision of social services and amenities. The railway station could not possibly manage extra travellers, and the car parking facilities are already insufficient. This, in addition to the enormous delays and traffic jams caused by the level crossing. How are the extra 5,000+ adults going to get to work, if, indeed, employment opportunities exist - and where will their children go to school?</p> <p>The eastern boundary of your proposed development is the stream which forms the western boundary of our farm and which runs into the River Kennet. We have lived in Midgham since 1985 and have farmed and cared for 60 acres each side of Coxs Lane since 1994.</p> <p>Since 1994, we have:-</p> <ol style="list-style-type: none"> <li>1. stopped the use of all chemicals</li> <li>2. planted all of the new hedgerows</li> <li>3. converted over-used arable fields to wild flower meadows</li> <li>4. carefully managed areas of ancient woodland.</li> </ol>	<p>In relation to the consultation taking place during the coronavirus pandemic, the Government published guidance in May 2020 with regard to planning and COVID 19: <a href="https://www.gov.uk/guidance/coronavirus-covid-19-planning-update">https://www.gov.uk/guidance/coronavirus-covid-19-planning-update</a>. This stated that "We continue to want to see Local Plans progressing through the system as a vital means for supporting economic recovery in line with the government's aspirations to have plans in place across the country by 2023."</p> <p>A written ministerial statement (<a href="https://questions-statements.parliament.uk/written-statements/detail/2021-01-19/hcws720">https://questions-statements.parliament.uk/written-statements/detail/2021-01-19/hcws720</a>) published on 19 January 2021 set out the importance of work continuing to advance on Local Plans through to adoption by the end of 2023 to help ensure that the economy can rebound strongly from the pandemic.</p> <p>Changes were made to the Town and Country Planning (Local Planning) (England) Regulations 2012, under the Town and Country Planning (Local Planning) (England) (Coronavirus) (Amendment) Regulations 2020, to remove the need for local authorities to make hard copy documents available for public inspection for a temporary period from 16 July 2020 until 31 December 2021.</p> <p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>5. Maintained footpaths and fitted kissing gates and steps where necessary.</p> <p>Our efforts to look after the land in an environmentally sensitive way have led to the return of many bird species and animals to, what is now, a wildlife haven.</p> <p>There is no doubt that such close, high density development will have a negative impact on this area and our hard work over the past 27 years will have been wasted.</p> <p>How can your proposal possibly be in line with the government's green agenda? Farmland is an increasingly important resource. We are being encouraged to eat less meat and since Brexit, we must produce more of our food in the UK. Everyone is now aware of the importance of fresh air and green, open spaces to peoples' mental health. Since the start of the pandemic, we have seen a considerable increase in the numbers of people using the well established footpaths on our land - paths which lead on to, and through the land you propose to develop.</p> <p>I appreciate that more housing stock may be required, but there are many more suitable solutions than building on virgin farmland. As more people work from home, office blocks will become available which could be converted, and the continued demise of the high street will lead to large retail premises which could also be used for housing. And there are pieces of land within the current Newbury/Thatcham conurbation which could be utilised.</p> <p>Or it the council's intention to join Newbury, through Thatcham, Midgham, Woolhampton, Aldermaston and Theale, to Reading?</p> <p>Huge developments on greenfield sites are easy solutions for planning authorities. Landowners and builders are keen to make money and councils can cut deals to be seen to supply "affordable" housing. Developers are</p>	<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel</p>

Respondent (with lpr ref)	Response	Council Response
	<p>renowned for prioritising private housing over provision of affordable housing, infrastructure and community facilities, all of which should actually take first priority.</p> <p>It is poor, lazy council policy and the residents who pay their council taxes to West Berkshire Council deserve better.</p> <p>I appreciate that more housing stock may be required, but there are many more suitable solutions than building on virgin farmland. As more people work from home, office blocks will become available which could be converted, and the continued demise of the high street will lead to large retail premises which could also be used for housing. And there are pieces of land within the current Newbury/Thatcham conurbation which could be utilised.</p>	<p>and lifestyle choices will be important elements of the overall transport plan.</p>
Mr Kastelnik (lpr1221)	<p>I strongly object to the building of 2500 houses on farmland between Upper Bucklebury and the A4 and Floral Way, which will be an overdevelopment in the Thatcham area, this will have an impact on traffic and pollution, loss of rural countryside and green belt.</p>	<p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p>

Respondent (with lpr ref)	Response	Council Response
Patricia Barclay (lpr1223)	<p>I wish to register my objection to the possibility of housing development to the north east of Thatcham.</p> <ol style="list-style-type: none"> <li>1. This is an area of outstanding natural beauty.</li> <li>2. Floral Way is a definitive boundary between an Urban settlement and Countryside and should be retained as such. There is no such boundary between Thatcham and Newbury and therefore it is one huge sprawl which has nothing to commend it.</li> <li>3. if housing is allowed there would obviously be more hard standing and flooding could well be a possibility down hill to Thatcham after heavy rain.</li> <li>4. We must keep our farm land to feed our people, otherwise we will have to import from overseas.</li> <li>5. Harts Hill is a narrow country road and would be quite unsuitable for an increase in more traffic, which would further disturb the village of Upper Bucklebury.</li> </ol>	<p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site</p>

Respondent (with lpr ref)	Response	Council Response
		<p>will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements. All sites which have been submitted to the Council for allocation have been considered. A site must be available, achievable and suitable to be allocated.</p>
Helen Relf (lpr1237)	<p>I would like to strongly register my objection to the proposed full development of the above sites for the following reasons:-</p> <p>1           The vast majority of residents in Upper Bucklebury are against this development and many have already registered their objections but as no information has been sent out by WBC many are not aware of the application. I feel that the consultation period should be extended and that ALL residents should be formally written to.</p> <p>2           This development would, effectively, join Upper Bucklebury to Thatcham thus effectively removing the rural aspect of the area. As it is cited in the Bucklebury Vision and Plan to maintain a strong green belt, which was approved and agreed with WBC, it should be considered as supplementary planning consideration. On page 22 of WBC documentation</p>	<p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site</p>

Respondent (with lpr ref)	Response	Council Response
	<p>regarding planning “<i>particularly as development of both north east and north Thatcham would result in the loss of the separate identifies of Cold Ash and Bucklebury, and would harm the setting of the AONB settlement pattern.</i> So this new development is in contradiction to WBC’s own intentions.</p> <p>3 A previous application was rejected by the Secretary of State in 2017 (500 houses at Siege Cross) so why is WBC now considering this site in light of previous objection. What has changed and, knowing this has been refused once why have funds been spent so far? At least part of this site was deemed Not Developable in 2013 – what has changed?</p> <p>4 It is a massive over development of the countryside and will have a significant impact on traffic in the area, especially on the route into Thatcham and Newbury and towards the station, which are already heavily congested at peak times.</p> <p>5 Traffic, and speeding, through Upper Bucklebury is already of a major concern due to the Primary School and with an increase of 10% this will only worsen the situation. Hart’s Hill is not suitable for extra pedestrian or cycle use.</p> <p>6 It will completely surround the Crematorium in Thatcham, which was placed away from residential properties and has constraints placed on it.</p> <p>7 This development is the size of Hungerford yet there is no infrastructure in place, no town facilities, no doctor’s surgery (on the plans I have seen). Hungerford with almost the same number of houses has school, a high street, surgeries, a large carpark – there is nothing in this development. Thatcham surgeries are already over-subscribed and I doubt Chapel Row would be able to accommodate extra patients.</p>	<p>will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process. The site is not within the Green Belt (there is no Green Belt in this District).</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that ‘in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy’ (paragraph 67 of the Core Strategy Inspector’s Report). As additional housing is required, and given Thatcham’s status as an ‘Urban Area’ in the development plan is it considered appropriate to consider Thatcham for housing.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>8 Will there be a full archaeological survey on the area bearing in mind that there were skirmishes and camps in the area during the civil war in 1644.</p> <p>9 The damage to the local flora and fauna in the area would be immense not to mention the light, noise, and air pollution, plus the flooding. Would the developers implement flood alleviation measures?</p>	<p>Thattham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thattham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thattham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. 	<p>as we understand it is to prevent urban sprawl by keeping land permanently open.</p> <p>It is essential to allow the land in question, or as much of to as possible, to remain as green belt to (i) check the unrestricted sprawl of Thatcham up into the area of outstanding natural beauty and rural character that is Bucklebury Common and its surrounding area, (ii) stop Thatcham merging into Upper Bucklebury, (iii) assist in safeguarding the countryside from encroachment, (iv) preserve the setting and special character of the hamlets and small villages in the Bucklebury area, and (v) assist in urban regeneration, not just in Thatcham but also in Newbury, by encouraging the recycling of derelict and other urban land.</p> <p>Our decision to live in the woods near Midgham/Upper Bucklebury was heavily influenced by the rural character of the surroundings including the existing green space separating it from Thatcham (including the part that it is now proposed to build on). We enjoy it at least weekly, regularly walking our dogs on various footpaths in the vicinity. To change the area in the way proposed is entirely unacceptable. It would mean the loss of a much loved green space, visually damaging the existing landscape around the currently undeveloped side of Floral Way, it would mean the loss of a much loved rural landscape, disrespect the idea of a settlement boundary between Thatcham and Bucklebury, trigger the loss of trees, hedgerows and other vegetation that are essential for wildlife, and represent the over development of Thatcham.</p> <p>Our <u>concern for Thatcham</u>. We do not live right in Thatcham, but consider it our main town and in "normal" (ie not lockdown) times we are in and out of it multiple times a day. There seems to us to have been a failure over many years to invest in the Thatcham area and its most basic infrastructure - the town centre, roads, public transport, schools, GP surgeries, leisure facilities, maintained green spaces, youth facilities, care support and community centres are all under strain and all need work. These are all needed for our community to prosper and have all been neglected over a prolonged period of time. A new development will not fix any of this. Nobody who truly knows</p>	<p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>In regards to concerns raised in relation to the loss of a recreational resource, within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB. This will be accessible to all.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Thattham would believe that the town could support an expansion of 2,500 new houses.</p> <p>The transport links were at full capacity (pre-Covid/lockdown) with terrible peak time congestion on the A4. The last thing the town needs is thousands of extra cars compounding these problems - on top of competing with the HGV's from the industrial area and distribution centres which already attract the massive lorries and the pollution they bring.</p> <p>We note that WBC's strategy of 2012 identified that, after a period of rapid housing growth, the infrastructure in Thattham had failed to keep pace and there should be a period for regeneration and new facilities. Since then, there has been no such regeneration nor significant new facilities, all we are aware of is the spending on the flood defence work; so presumably the (what seemed to us logical and sensible) conclusions of 2012 still stand?</p> <p>The focus in and around Thattham should continue to be on building a strong community, and making Thattham a safe, healthy and great place to live, where everyone has access to the services they need. The idea of a country part-type development linking Thattham up into the surrounding AONB is a good one - although I'm not sure it is actually necessary as the walkers, cyclists and family of Thattham are already well evident up and around the green belt and extending all the way up into the quiet lanes of Bucklebury Common on fine weekend days during lockdown. It serves as a beautiful green/rural/woodland escape for many from the urban streetscapes of existing Thattham and accessibility does not actually seem to be much of a problem, judging by the increase in (foot) traffic. I would argue that it serves to benefit the physical and mental health of Thattham residents as it is. Perhaps some public transport options up Harts Hill Road would help make it more accessible - in other countries they might run a street tram up into such areas on weekend days, for example.</p> <p>There are so many ways to make Thattham a better place to live, without building over the very green spaces that its residents already use to escape into, or even just breathe a little more deeply as they enjoy the views from</p>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>The development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population). Highway works and active travel routes would assist in directing residents to using the A4/Floral Way rather than Harts Hill Road, and using an enhanced cycling and</p>

	their cars along the A4 and Floral Way. I sincerely hope that sanity prevails in this matter.	walking network to travel, including to Thatcham train station.
V E Coulson (lpr1247)	<p>I wish to object in the strongest terms to the proposed development of the above site for the following reasons.</p> <ol style="list-style-type: none"> <li>1. The proposed development is situated on the side of a valley, outside of any settlement boundary in an area of greenbelt land consisting of rolling hills and farmland. The development would be extremely visible from a number of viewpoints, most notably from the southern side of the valley and would change the overall vision of the area to an urban one as opposed to that of a small town contained within a wider countryside context.</li> <li>2. Bucklebury Vision and the Bucklebury Plan are documents approved and agreed with West Berks Council. Despite their being accepted as constituting 'supplementary planning consideration' they are not mentioned in the WBC documentation or appear to have been taken into consideration.</li> <li>3. If the proposed development were to proceed the gap between it and the village of Upper Bucklebury and the boundary of the AONB would be negligible and insufficient. Upper Bucklebury would effectively join Thatcham thereby losing its identity and seriously compromising the rural aspect of the area. At the time of the AONB boundary being set it had to meet several criteria set by Government. Several of these, including those relating to tranquillity and wildness would be completely compromised if the existing 'buffer zone' was eroded.</li> <li>4. 2500 extra properties would result in a large volume of extra traffic not just on all of the main roads but also the country lanes in and around the surrounding villages. WBC documentation does not address this. Country lanes are known to be the most dangerous roads to drive on and it is inevitable that any increase in traffic is going to make them even more hazardous for motorists and non-motorists alike. This is at odds with the WBC Local Transport Plan 2011 - 2026 'Active Travel Strategy' and more especially with the Bucklebury Quiet Lane Scheme which was initiated by WBC and supported by local residents.</li> </ol>	<p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>As part of the preparation of the LPR the council has undertaken a Settlement Boundary Review (SBR). The settlement boundary criteria make clear that boundaries will include sites allocated through the Local Plan process. North East Thatcham is proposed for allocation under policy SP17. Should the site, or any part of it, be removed from the LPR the boundary for Thatcham would be</p>

Respondent (with lpr ref)	Response	Council Response
	<p>5. I only became aware of this proposed development in the New Year. WBC should have actively engaged in a community consultation process before spending so much of tax payers money on such a lengthy document effectively presenting it as a fait accompli and giving such a limited amount of time for any community response.</p> <p>6. Bucklebury Common is home to many species of wildlife and flora and fauna, many of them increasingly rare. There is already a problem with off-roading, litter and fly tipping and any increase in motor vehicles on the roads, or use of the Common as a 'playground' rather than a place for quiet enjoyment and appreciation will be to the detriment of its fragile ecosystem.</p> <p>7. I have limited my comments to some of the impacts of the proposed development on Upper Bucklebury where I live but the implications for Thatcham are also huge and damaging for that community. The proposal is over development of Thatcham which currently struggles to serve its existing residents. There is insufficient parking for the town and schools and doctors surgeries are over stretched. The railway station and level crossing is a bottle neck with limited parking and almost full train services at peak times. Flooding is an on-going issue and building on the slope to the north of the town would massively increase the risk of heavy rain overwhelming the drainage system to an even greater degree than occurred in July 2007. Indeed, the 'Flooding in Thatcham' report written by Sue Everett, an independent consultant ecologist, said that it would be "utter madness to build on that slope". Sadly, climate change means that once 1 in 100 years events are happening far more frequently and it would be irresponsible to put property in an area of known risk.</p> <p>Please take the above comments into account when coming to a decision on the proposed development.</p>	<p>adjusted to exclude it. It is acknowledged that the settlement boundary is currently drawn around the whole of the proposed allocated site at North East Thatcham whilst Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.' The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. At this stage it is therefore not possible to draw the settlement boundary any tighter. As the LPR progress and more detailed work is done on the sensitivity and capacity of different parts of the site to accommodate development the boundary will be amended accordingly.</p> <p>The site is not within the Green Belt (there is no Green Belt in this District).</p>
Maria Kelly (lpr1242)	I wish to object to WBC Policy SP17, the proposed major development to the north-east of Thatcham that would put a huge number of new houses on the	In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic

Respondent (with lpr ref)	Response	Council Response
	<p>farmland / hillside stretching up from the A4 and the Floral Way. My reasons for objecting are these:</p> <ol style="list-style-type: none"> <li>1. Traffic – there is already an unsafe amount of vehicle traffic using the narrow and twisting lanes through the villages of Upper Bucklebury, Cold Ash etc. These lanes in most cases have no pavements and yet are used extensively by pedestrians, cyclists and horse-riders. The addition of a huge new housing complex at the foot of Harts Hill would obviously add significantly to the volume of traffic on these lanes and worsen an already dangerous situation. And as for the main routes, the A4 and Floral Way, they and the Thatcham level crossing are already unpleasantly busy and congested, even in lockdown. They would simply become even worse, then encouraging more motorists to look for alternative routes through the country lanes.</li> <li>2. Flood control – this area has suffered a lot in recent years from flooding, and climate change suggests we can expect increasing levels of rainfall. I cannot see how the addition of a further huge built-over area could possibly do anything other than make the situation worse.</li> <li>3. Suggestion that it would regenerate Thatcham town centre – it's very unlikely that people in the new houses would walk into Thatcham for their shopping, the distance alone being an issue but then with the uphill climb back home on top of that. They will get in their cars and drive to Newbury or Reading, or to one of the retail parks.</li> <li>4. The countryside and our AONB – I feel particularly concerned at the disregard that WBC's proposal seems to show for the well-being of the local countryside. Although the new development would not sit within the boundary of the AONB, it would be so close as to have some very significant and detrimental effects upon it. There would be a huge increase in the numbers of people walking and cycling on Bucklebury Common, to the detriment of the flora and fauna (we have already seen that effect with the increased footfall brought about by the coronavirus restrictions on doing</li> </ol>	<p>by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>An economic advantage of new development is that new residents can help support local shops and businesses and help to boost the vibrancy and vitality of town and local centres.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>pretty much anything else). There would be unavoidable increases in levels of noise and night-time lighting, both impacting on the wildlife and especially on nocturnal creatures. And inevitably an increase in pollution to the air.</p> <p>5. Wasteful use of land – the development would use up a large area of high-quality farmland, which seems a disgraceful waste of this valuable resource, especially when the argument for more houses is forecasts of an increasing population. That population needs to have food grown for it, in fields like the ones that WBC proposes building over. Furthermore, we are increasingly urged to reduce carbon footprints by buying UK-produced and, even better, locally-produced items, including foodstuffs. Reducing West Berkshire's amount of good-quality agricultural land seems to be a move in the opposite direction.</p> <p>6. Housing needs – finally, it has to be asked whether those forecasts of West Berkshire's future housing needs are still accurate and relevant in the aftermath of Brexit and the coronavirus episode. The long-term economic and social consequences of both those major events are uncertain, but pointers seem to be towards less growth, less inward migration, a lessening need for workers to concentrate in the south-east of the country etc. I believe it would be irresponsible of WBC to move forward with any major infrastructure changes at this time, but most especially with large-scale housing projects such as in its SP17 proposal.</p>	<p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>When determining which new sites to allocate the Council are only able to consider land that is submitted to them through the HELAA. The HELAA includes brownfield sites that the Council are aware of.</p> <p>The supporting text to policy SP12 (Approach to Housing delivery) of the emerging draft LPR identifies that several sources will ensure a continuous supply of land across the plan period. These include amongst others, existing planning commitments (unallocated sites with planning permission), many of which are brownfield sites.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the</p>

Respondent <i>(with lpr ref)</i>	Response	Council Response
		<p>government’s standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p> <p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>In relation to the plan being prepared prior to the coronavirus pandemic, the full impact of the COVID 19 pandemic will not be fully apparent for some time. The LPR is a long term strategy to 2039, during which time a review will be conducted every 5 years. The impact of changes in response to macro and local economic factors will be assessed through subsequent reviews, once such implications are realised.</p>
Joseph Essex (lpr1244)	<p>I am writing to you today to express my concern and distress at the proposed development of 2500 new homes (about 25% of the existing small town) being built on green spaces near to Thatcham. I live in the very nearby village of Hermitage and fear this new development is of a scale far too great for the location chosen.</p> <p>I understand the need to build new and affordable homes as the population increases, as everyone should have a place to call home. However, I as well as many others, strongly believe that this proposed development is not the right solution to the issue for many reasons. I explain 4 briefly below:</p> <ul style="list-style-type: none"> <li>• <b>Loss of green spaces and the Thatcham green belt.</b> The chosen location for these home is on green land which is used by many people for walks which improves their mental health and physical fitness. The vast majority have used green spaces as a refuge from our homes during lockdown over the past year – removing this will only be detrimental. Furthermore, thousands of animals and plants call these places their home, the thousands of species will either have to relocate or be destroyed in the process of building. There are many spaces which are not considered green-belt land and would be much more suitable to build upon.</li> <li>• <b>Overdevelopment.</b> Some would say that Newbury and Thatcham have already merged into one very large town and this would increase that further if the proposed development takes place. Changing more natural spaces</li> </ul>	<p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council’s housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver ‘a network of green infrastructure which will include a new community park linking Thatcham to the AONB.’</p> <p>The site is not within the Green Belt (there is no Green Belt in this District).</p> <p>Thatcham is an ‘Urban Area’ as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside</p>

Respondent (with lpr ref)	Response	Council Response
	<p>such as green fields and laying them with concrete and tarmac is not suitable for the location proposed and will be harmful in many ways.</p> <ul style="list-style-type: none"> <li>• <b>Further stretching Thatcham’s infrastructure.</b> Even though I don’t live in Thatcham, when travelling through at various times of the day, it is obvious to see that the shops, schools and especially road network, are at their limits. Increasing the number of residents in this village by over 2500 will increase this problem ten-fold.</li> <li>• <b>Increased pollution.</b> With increased numbers of people always comes the inevitability of increased pollution, though building entirely new roads and developing over green land will be worse than if we were to develop land that has already been used.</li> </ul> <p>In conclusion, I do understand the need to build homes to house our increasing population, yet I hope you consider the valid points I and many other have stated about why this is not the right way to go about it.</p>	<p>Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector’s report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements. Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a ‘living document’ and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation</p>

Respondent (with lpr ref)	Response	Council Response
		18 consultation to strengthen the Council's policy on pollution.
Jason Allum (lpr1246)	<p>Having looked through the reports issued for the proposed future expansion of Thatcham, I am very concerned that the report has not considered the environmental consequences of the development, and especially the size of the intended project. We appreciate that there is a requirement for some development, but this scope seems to be a knee jerk reaction to cancellation of developing the Greeley site and has been rushed through with little consideration to the district that West Berkshire Council are supposed to represent. It has been insinuated that this is the only suitable site due to: restrictions of developments on Flood plains; the limitations of the AONB; and the restrictions of building around nuclear production and storage facilities. This is clearly wrong. Some housing needs to be built in the vicinity but a development on this scale is unacceptable and will be an environmental disaster, the reasons for which I have laid out in the text below after studying the submitted draught.</p> <p>Firstly, there is National funding available for the building of the railway bridge at Thatcham. This should be considered a priority before any development is even considered and would allow reasonable expansion on the southern side of the town and open this important strategic link to the south of Newbury.</p> <p><b>1. Housing Numbers</b> The projected figure of housing required in West Berkshire is debatable. It is known fact that the number of places at Primary Schools are undersubscribed; this can only be due to a reduction in numbers of the younger generation. This is backed up from the graph on the West Berkshire Website, the actual population curve is flattening. This single fact seems to have been ignored. The demographic of the population is therefore, obviously changing and this needs to be taken into account in any calculation of the required housing.</p>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government's standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513</p>

Respondent (with lpr ref)	Response	Council Response
	<p>As the cost of housing in the South is expensive the older generation have and will continue to move west, downsize and live comfortably off the proceeds and their retirement plans which again reduces the requirement.</p> <p>Wilson homes development at the Racecourse is committed to provide 1,500 dwellings over a ten-year build. This figure of sustained development seems to be had been totally ignored. What is more, it would appear that they have been constructed on the Kennet flood plain. However, evidently this is not the case, as the authority has given full approval and consent as the location was situated on well-draining gravel beds. This precedence opens a lot more areas that could be used for housing, rather than the restricted options illustrated in the proposed plan which is both misleading and ambiguous. Building can take place within the valley floor and have the advantages of the current infrastructure. Importantly the visual impact is very much reduced than building on the northern slopes of Thatcham and the area adjacent to the AONB.</p> <p>Brexit has reduced the number of Europeans legally seeking work and citizenship, and indeed, there has been an exodus of casual labour in all regions. Covid 19 will alter the shape of our county and the nature of future employment. This will particularly impact the younger generation seeking employment and the lure of jobs not only in our area but nationwide.</p> <p>Importantly most of us, particularly those making these important decisions, will have gone to their maker and will not be around in 2036. We have seen that the younger generation will not tolerate environmentally damaging decisions. Greta Thunberg and her followers are just the tip of an iceberg of a younger generation with valid concerns on the environment and green issues. Our legacy is to look long-term and provide an environment suitable for future generations not a short-term reaction to ill-advised imposed quotas.</p> <p><b>2. Surface water</b> I have real concerns of the actual predicted runoff of surface water. There has been a lot of money spent on flood defences and</p>	<p>dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p> <p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p> <p>In relation to the plan being prepared prior to the coronavirus pandemic, the full impact of the COVID 19 pandemic will not be fully apparent for some time. The LPR</p>

Respondent (with lpr ref)	Response	Council Response
	<p>this will be completely wasted if houses are built on the surrounding land without any consideration of the amount of surface runoff, especially since the entire site proposed is on a considerable slope. There is no reservoir shown on the plans or anything like the attenuation that is required. Without the correct attenuation this will be an environmental disaster once again threatening the households in Thatcham. The severe storm of 2007 was a wakeup call for all and these lessons need to be learnt.</p> <p>The average dwelling has a roof area of around 270 m<sup>2</sup>. If you add on the garage, sheds, hard standings, car parking, pavements etc., this figure increases to approximately 420 m<sup>2</sup>. This does not allow for the roads or any infrastructure works, schools, playgrounds and warehousing development etc.</p> <p>Assuming the worst-case storm figure, of around 100 mm/hour (however it is generally agreed that this figure is now too low, as warmer air, due to global warming, is able to hold substantially more water), this results in a conservative figure of 42 m<sup>3</sup> per dwelling/storm. Recently we have seen consistent storms lasting in excess of 48 hours. Taking this into account, and working on only six hours, the amount of water generated off of 2,500 dwellings is over 630,000 litres (630 tonnes) of runoff! (This is hard to visualise but in round figures about 10 double decker bus loads every 6 hours). If this is allowed to drain down the hill to the Thatcham and the Kennet catchment it is obvious that this will cause extensive flooding. If this is mitigated locally the problem is just shifted further downstream which is just environmentally irresponsible.</p> <p>The hydraulic force of this water alone will literally burst drainage pipes if this matter is not carefully engineered and enforced. I have seen first-hand what occurred in South Milford and the devastating affect it had on the community.</p> <p>It must be remembered that this is additional surface water runoff and does not take into account the ephemeral water course, which is such a dominant</p>	<p>is a long term strategy to 2039, during which time a review will be conducted every 5 years. The impact of changes in response to macro and local economic factors will be assessed through subsequent reviews, once such implications are realised.</p> <p>In relation to potential impact on surface water, all new development must include sustainable drainage measures, and development must be avoided on areas that are at risk of surface water flooding. Development on the site will be expected to deliver surface water management approaches that could deliver a net gain for Thatcham town. Drainage and flood attenuation works are included in the IDP.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>geological feature of the proposed site. 2.51 actually states “<i>There is a risk of surface water flooding within the site along the natural drainage routes based on Environment Agency modelling</i>”. The document however fails to identify the underlying rock strata of Reading Beds clays which promotes rapid runoff as anybody who has carried out the standard percolation test on this material will substantiate. I will challenge anybody to prove otherwise.</p> <p>The report also highlights that this area is bisected by numerous gullies. It is not rocket science to realise that the increased runoff this will channel this water and make this unsuitable for development. This is particularly prevalent to the area at Colthrop Manor and in the area known as the “Big Gully”.</p> <p><b>3. Preservation strip</b> The proposal includes a “wooded gullies preservation strip at higher levels.” However, given the size of the development, this strip will have limited impact; it is not large enough and houses will still be built at a high level, and close enough, to impact onto Bucklebury Parish. This is mentioned in more detail in the section later in relation to the Impact on Bucklebury.</p> <p><b>4. Visual Impact</b> Reading through the report there is some confusion and ambiguity on which levels are consider acceptable. Much of the proposed development actually exceeds the 100 m contour especially around Harts Hill and towards Long Grove Copse. I have been informed by Bucklebury Parish Council that the development will all be below 100 m. This is false. Most of the development with be 20 -30 m above the existing building, in old money 60-100 feet. It will be imposing for the existing residents and be extremely visual, particularly from Greenham Common and the high ground to the south. Anyone who has actually looked at this vista will have noted the Henwick Driving range and this is noted at being at 90 m. The majority of proposed housing will be at this level and above – highly visible.</p> <p><b>5. Thatcham Services</b> Currently there is an oversubscription for the medical facilities in Thatcham and Bucklebury. The surgeries in both locations are</p>	<p>With any application that would come forward on this site, the developers would be expected to submit a ‘masterplan’ / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a ‘living document’ and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p> <p>An economic advantage of new development is that new residents can help support local shops and businesses and help to boost the vibrancy and vitality of town and local centres.</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered</p>

Respondent (with lpr ref)	Response	Council Response
	<p>struggling to cope currently with existing levels let alone a predicted figure of 6,000 population increase. The Dentist have the same problem.</p> <p>The plan shows no figure in the dwelling development that triggers the building of new secondary schools. The Kennet School is currently oversubscribed, is the plan thus to move the catchment areas and send all the Bucklebury, Cold Ash, Woolhampton and Chapel Row village children to Compton?</p> <p><b>6. Thatcham Centre</b> Thatcham centre is really not an economic hub. The post office is underfunded and we have lost three major banks, which too many of us was an essential requirement. Waitrose, the Cooperative supermarkets and the library are the only real draw from the immediate hinterland for many, and these are already working at full capacity. These services need to be improved with an economic proposal prior to any proposed development.</p> <p><b>7. Siege Cross</b> It seems inconceivable that the Siege Cross area was rejected under appeal and is now included in the overall plan. What is the point of a ruling if it is now totally overlooked when under pressure these options are revisited?</p> <p><b>8. Water Potable and Foul.</b> Bucklebury currently struggles with water pressure. This has been a constant problem for years and every time the water pressure is increased to maintain the service, we have numerous bursts. Perhaps Thames water can provide a work sheet of the necessary repairs that they have provided in the past year. Every time we have a burst the damage to pavement and road surface is extensive and is only temporarily repaired. Without the necessary improvement within the existing infrastructure this is going to be an ever-increasing problem.</p> <p>Water treatment will also need to be a major consideration, just to build on the slope will require considerable engineering to maintain the 1:50 fall to</p>	<p>that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that ‘in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy’ (paragraph 67 of the Core Strategy Inspector’s Report). As additional housing is required, and given Thatcham’s status as an ‘Urban Area’ in the development plan is it considered appropriate to consider Thatcham for housing.</p> <p>In regards to water supply, the developers are aware of the requirement for upgrades to the water supply network and water treatment works (which is identified in the Water Cycle Study).</p> <p>Should the development go ahead, it would be phased appropriately to ensure it does not outpace delivery of essential network and treatment upgrades (See IDP).</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an integrated water supply and drainage strategy which will consider existing related infrastructure on the site.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>prevent separation of solids. These plans need careful consideration and engineering and will be basically neglected due to commercial demand. Is the proposal to link this additional foul water to the existing treatment plant down Lower Way? This is already a persistent problem with odour and more input will undoubtable cause more concern to local residents and sensitive receptors.</p> <p><b>9. Traffic</b> The modelling shown on the flowchart is, quite frankly naïve and ill conceived. Currently (pre- COVID-19) the amount of traffic on the A4 traveling East is very high with pinch points at Pipers Lane roundabout especially during school term time. The traffic blocked by the railway crossing is an economic and environmental disaster. The queue extending south from the crossing up towards Greenham is extremely dangerous and it is only a matter of time before we see a huge accident as a result of queuing around blind bends.</p> <p>Although modern cars have reduced emissions more than 50% will have engines running and any background environment study would reveal the danger this poses to both pedestrians and residents. Any more traffic will backup Pipers Lane causing more congestion in this sensitive area. Section 2.72 does not even mention this point in the report!</p> <p>If we work on the figures as stated in item 6.3.1. the very conservative figure of 12% of the volume would go through Upper Bucklebury. Simple maths makes this this in excess of 900 vehicle movements per day. It is obvious that with congestion on the A4, drivers will be forced into finding alternative route and will naturally use Bucklebury as a rat-run to travel East. Cold Ash will have a similar problem with traffic heading North. This is just not acceptable and the development should be restricted by this factor alone.</p> <p>There is mention in the report that COVID-19 will change the way we live in the future. This is just conjecture. As soon as “normal” social activities can</p>	<p>Response to traffic matters have been set out above.</p> <p>In regards to waste water capacity, the developers are aware of the requirement for upgrades to the water supply network and water treatment works (which is identified in the Water Cycle Study).</p> <p>Should the development go ahead, it would be phased appropriately to ensure it does not outpace delivery of essential network and treatment upgrades (See IDP).</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an integrated water supply and drainage strategy which will consider existing related infrastructure on the site.</p> <p>In relation to the concerns on the potential impact on Bucklebury Common, the development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population).</p> <p>Highway works and active travel routes would assist in directing residents to using the A4/Floral Way rather than Harts Hill Road, and using an enhanced cycling and walking network to travel, including to Thatcham train station.</p> <p>The development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population).</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities</p>

Respondent (with lpr ref)	Response	Council Response
	<p>be resumed the volumes will soon creep up to the existing level but maybe not quite as high as Pre March 2020.</p> <p><b>10. Waste Collection</b> The Padworth Facility has already reached maximum capacity. There is no redundancy in the system for organic waste streams and tax payers have already had a levee imposed to try and reduce the amount of kerbside collected green waste. There is currently a danger of fire with organic waste streams with high calorific values and no spare capacity to comply with current working practises. The average UK household generates over a tonne of waste per annum (DEFRA March 2020), in simple terms 2,500 tonnes but have Veolia even been consulted on this serious matter? Have they got the resources to collect and handle this expected volume increase?</p> <p><b>11. Impact on Bucklebury</b> The Common is under increasing pressure and volunteer groups are already fully employed in rubbish collection and maintenance. What measures are to be implemented to protect this valuable enclave and what modelling has been provided to protect these areas? Currently as residents we are subject to illegal 4x4 traffic and motor bikes over which there is little or no control or enforcement. Fly tipping is a regular occurrence and will only increase.</p> <p>The increase in footfall which we have seen recently has had a devastating impact on footpaths only to be compounded by the wet weather. Additional residents will naturally want to use this attractive resource and will cause more attrition and generate more refuse.</p> <p>The traffic situation mentioned above would change the nature of the village entirely. The route up Harts Hill, through Upper Bucklebury would filter additional traffic along the common (The Camp Road) through Chapel Row, down through Southend Bradfield. This will lead to increased speeding as cars regularly fail to comply with the 30 mph speed limit as they approach/leave Chapel Row and this will be repeated at Bradfield and the subsequent return trip. There will also a bottleneck at Theale with the</p>	<p>and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>The consultation was run in accordance with the council's Statement of Community Involvement (SCI). A public consultation such as this would usually last 6 weeks but because it did go over Christmas, it ran in total for an 8 week period between 11 December 2020 and 5 February 2021.</p> <p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>junction of the Pangbourne Road. This is already causing a problem and an increase in the traffic volume will result in severe delays.</p> <p>The buffer strip as drawn on the planning documentation is just a token “stroke of the pen” to make the site look green. There has been insufficient time to carry out any biodiversification study. If the development is to proceed the parishioners and parish council of Bucklebury need to be involved to plan and secure this amenity. There are obvious concerns that these areas are just token screens and will be trashed through heavy footfall. A full planting schedule needs to be implemented at an early stage to establish this area and the intention and allow the trees to grow and safeguard the runoff (Mature oaks, Beech and other hardwoods are classed in planning rules/building regulations as “Class A” with an uptake of up to 80 gallons per day).</p> <p>Floral Way has always been seen as the natural boundary to North Thatcham, allowing a clear distinction between this at the surrounding villages such as Bucklebury. Its crossing marks a dangerous precedent for the removal of the rural character of West Berkshire which has prevailed in this region for centuries.</p> <p><b>12. Timeframe</b> The BBC did not announce that the site at Grazeley had been rejected for planning until the 15th December 2020. I think this was the first that many of us were aware of the problem with the extension of the AWE Burghfield safe Zone, the DEPZ. The decision to develop North Thatcham housing development and all that it entails does seem to have been sprung on us just before Christmas, leaving the resident’s little time to adjust and comprehend the full extent of the proposal report. We are indebted to Bucklebury Parish Council for airing the proposal and making a number of webinar meetings. As this was announced on the 21st December with the instruction that all comments have to be submitted by the 5th February, it is therefore understandable that there appears to be a lack of confidence in West Berkshire Council and huge mistrust and given rise to thoughts of many that this is a fait accompli. Even this morning there are residents in the Dunstan Park who were totally unaware of any new planning</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>proposal and this is seen to have been carried out stealthy. This resentment is understandable as there has been inadequate time for proper and considered consultation.</p> <p>These arguments make it clear that the proposal should be rejected on an environmental level alone. The area does not have the infrastructure to support such a large development and it is a further erosion of rural South England. The current proposal is too large and will lead to multiple environmental issues and no further expansion of Thatcham should be permitted until a bridging system at the railway crossing has been designed, engineered and implemented.</p>	
John de Lara (lpr1250)	<p><b>Response – STRONGLY OPPOSE</b></p> <p>I would like to register my personal objection to the WBC Local Development Plan particularly the massive over development of NE Thatcham</p> <p>1) Consultation Process is seriously flawed and not fit for the size and scale of a development of this size.</p> <p>The information available on the website – <a href="http://consult.westberks.gov.uk/kse/event/35924">http://consult.westberks.gov.uk/kse/event/35924</a> is indeed very comprehensive and shows a great deal of work conducted by WBC. However, I do question the consultation process that is being followed. This development is not insignificant, in fact it is proposing the creation of a NEW TOWN the size of Hungerford in an area a third the size.</p> <p>My objection to the consultation process is that the plans were released during a pandemic, while the UK is under lockdown and only a very short period for responses given. In a more normal situation, there would be an extended period of public consultation, with meetings and presentations by WBC enabling the executive to understand the view of the public. In this instance there has been no public presentation by WBC.</p>	<p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p> <p>In relation to the consultation taking place during the coronavirus pandemic, the Government published guidance in May 2020 with regard to planning and COVID 19: <a href="https://www.gov.uk/guidance/coronavirus-covid-19-planning-update">https://www.gov.uk/guidance/coronavirus-covid-19-planning-update</a>. This stated that "We continue to want to see Local Plans progressing through the system as a vital means for supporting economic recovery in line with the government's aspirations to have plans in place across the country by 2023."</p> <p>A written ministerial statement (<a href="https://questions-statements.parliament.uk/written-statements/detail/2021-01-19/hcws720">https://questions-statements.parliament.uk/written-statements/detail/2021-01-19/hcws720</a>) published on 19 January 2021 set out the importance of work continuing to advance on Local Plans through to adoption by the end of 2023 to help ensure that the economy can rebound strongly from the pandemic.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Consequently, I believe this development plan is being rushed through for political reasons.</p> <p>2) Impact on ANOB.</p> <p>To the North of this new town is the boundary of the ANOB and I believe that developing up to the boundary will have a negative impact on the ANOB with increased light pollution, increased noise, increased traffic through the ANOB and reduced bio diversity within the ANOB and surrounding area.</p> <p>The proposed “Country Park” may look like a good idea on paper, but having such an area of managed green space will reduce bio diversity due to the mono culture nature of managed green spaces.</p> <p>When Thatcham was developed in the late 1990’s Floral way was built as a boundary to ensure that there was a suitable wild space between Thatcham and the ANOB. This has been upheld by the Secretary of State, most notably in the rejection of the development at Siege Cross (15/00296/OUTMAJ)</p> <p>3) Impact on local area</p> <p>I refer to the Siege Cross ruling where the Secretary of State called out the loss of agricultural land as a reason to reject development, yet in this development even more agricultural land would be lost. How can WBC justify a high reduction in productive land, when this has already been established as a reason not to develop on land.</p> <p>In 2007 there was a massive flooding event and subsequently WBC were sent a report from environmental experts stating “it would be utter madness to build on the slope “. In fact recent rainfall has already shown that the slope will hold a lot of water and protect Thatcham. I don’t believe that WBC are taking the flooding risk seriously enough.</p>	<p>Changes were made to the Town and Country Planning (Local Planning) (England) Regulations 2012, under the Town and Country Planning (Local Planning) (England) (Coronavirus) (Amendment) Regulations 2020, to remove the need for local authorities to make hard copy documents available for public inspection for a temporary period from 16 July 2020 until 31 December 2021.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council’s evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a ‘masterplan’ / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>As part of the modelling for this new town, there have been traffic estimates created. These have been created during a national lockdown and hence I question the validity of this data. Also from the documents provided the traffic impact on the surrounding villages has not been considered or mitigated.</p> <p>The crematorium was sited at the far eastern end of Thatcham away from population centres to provide a peaceful space for people to say goodbye to relatives and to mitigate the possible environmental impact of the emissions. This has been successful and now WBC want to develop the land right up to the crematorium- what has changed?</p> <p>4) West Berkshire declared a climate emergency on 2 July 2019.</p> <p><a href="https://www.westberks.gov.uk/media/48362/Draft-Environment-Strategy-2020-2030-Summary-document-January-2020-/pdf/WBC_Environmental_Strategy_Summary_A4_20.pdf?m=63714184440230000">https://www.westberks.gov.uk/media/48362/Draft-Environment-Strategy-2020-2030-Summary-document-January-2020-/pdf/WBC_Environmental_Strategy_Summary_A4_20.pdf?m=63714184440230000</a> WBC - Environment Strategy - with declaration of climate emergency.</p> <p>WBC need to consider this development against this background of their own stated intentions. This development will result in increased pollution from the construction traffic, increased vehicle pollution due to the inevitable congestion and so on. Paving over countryside can only be detrimental to the environment and result in a loss of our nature and biodiversity. I am sure many of the objections WBC receive will relate this and I know for sure that all local environmental organisations such as BBOWT, CPRE and WBGE are all violently against this development going ahead.</p> <p>It is a fact that domestic heating is the single largest CO2 producing task, and by creating this new town there would be a significant increase in CO2. What are the plans to make this development carbon neutral?</p>	<p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that ‘in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy’ (paragraph 67 of the Core Strategy Inspector’s Report). As additional housing is required, and given Thatcham’s status as an ‘Urban Area’ in the development plan is it considered appropriate to consider Thatcham for housing.</p> <p>In relation to the Climate Change Emergency, The emerging draft LPR includes a policy that specifically covers climate change (policy SP5). This requires that all</p>

Respondent (with lpr ref)	Response	Council Response
	<p>5) Precedent: Siege Cross Development - Declined</p> <p>In 2017 the Secretary of State rejected a proposal for 495 homes at Siege Cross (15/00296/OUTMAJ), this is now included as 30% of this new town.</p> <p>Why are WBC now so supportive of the 4 proposed developers, and why, having already been rejected once, WBC are not questioning why they are wasting more money trying again?</p> <p>6) Do we need this New Town?</p> <p>I seriously question the need for this new town to be created at a time when WBC have substantial land earmarked for development suitable for the next 10 years or so. Whilst I appreciate they need to plan ahead they have used a very broad brush approach, looking on a map and putting a plan together.</p> <p>WBC have not indicated if they have considered brown field development as this would be on sites with infrastructure already in place.</p> <p>I also question the basis for the population forecasts as they were all completed pre Brexit and pre Pandemic.</p> <p>7) New Town</p> <p>This development needs to be considered a new town and, in my opinion, represents a massive over development of the site.</p> <p>Also, as a new town no provision has been made for employment or services. All that has been included is 3 schools. This means that WBC consider this to be dormitory town with everyone travelling to work. Hence, I do question all the impact assessments WBC have used as they seem to be seriously flawed at best.</p>	<p>development should contribute to West Berkshire becoming and staying carbon neutral by 2030.</p> <p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs development to the most sustainable locations in the district.</li> <li>• Policy SP6 (Flood Risk) directs development to areas least at risk of flood risk.</li> <li>• Policy SP22 (Transport) requires that any development that generates a transport impact will be required, amongst other things, to have regard to West Berkshire's declared climate emergency and minimise the impact of all forms of travel on the environment.</li> <li>• Policy DC3 (Building Sustainable Homes and Businesses) looks at building sustainable homes and businesses,</li> </ul> <p>Any development site will have to comply with the aims and objectives of the plan.</p> <p>A response to the Siege Cross development has been provided above.</p> <p>In regards to the development of brownfield sites, when determining which new sites to allocate the Council are only able to consider land that is submitted to them through the HELAA. The HELAA includes brownfield sites that the Council are aware of.</p> <p>The supporting text to policy SP12 (Approach to Housing delivery) of the emerging draft LPR identifies that several sources will ensure a continuous supply of land across the plan period. These include amongst others, existing</p>

Respondent (with lpr ref)	Response	Council Response
	<p>In conclusion this is a New Town development, that will have a seriously detrimental impact on the local environment and economy, that is being rushed through.</p>	<p>planning commitments (unallocated sites with planning permission), many of which are brownfield sites.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>In relation to the plan being prepared prior to the coronavirus pandemic, the full impact of the COVID 19 pandemic will not be fully apparent for some time. The LPR is a long term strategy to 2039, during which time a review will be conducted every 5 years. The impact of changes in response to macro and local economic factors will be assessed through subsequent reviews, once such implications are realised.</p> <p>Development in West Berkshire must consider numerous constraints, most notably the constraints posed by the North Wessex Downs AONB, AWE and the associated DEPZs and flooding.</p> <p>As part of the LPR, all sites promoted to the Council have been assessed in the HELAA and this has concluded that there are sufficient sites to accommodate the Council's housing requirement outside of these constraints.</p> <p>The principles which underpin the spatial distribution of new development stem from the overriding objective of enabling sustainable development, development that will meet the social and economic needs of the District while respecting the environmental assets of the District and meet the objective to mitigate and adapt to the effects of</p>

Respondent (with lpr ref)	Response	Council Response
		<p>climate change and minimise demand for energy and other resources.</p> <p>The LPR aims to build on the principles of the Core Strategy with regard to the spatial distribution of development. The focus is on existing settlements, using the settlement hierarchy to steer development to the most sustainable areas, with an appropriate balance between urban and rural development, in order to meet local needs and maintain vibrant and balanced communities with their own sense of identity.</p> <p>The proposed allocation of sites takes account of the evidence from the HELAA and Sustainability Appraisal (SA) and are made in accordance with the settlement hierarchy, with higher levels of development at the higher levels of the hierarchy. Thatcham lies in the top tier of the settlement hierarchy (it is an Urban Area). Urban Areas will be the prime focus for housing and economic development.</p> <p>The proposed strategic allocation of North East Thatcham is in accordance with the spatial strategy set out in the LPR.</p>
Catherine De Lara (lpr1255)	<p><b>Response – STRONGLY OPPOSE</b></p> <p>I would like to register my personal objection to the WBC Local Development Plan particularly the massive over development of NE Thatcham</p> <p>1) Consultation Process:</p> <p>The information available on the website – <a href="http://consult.westberks.gov.uk/kse/event/35924">http://consult.westberks.gov.uk/kse/event/35924</a> is indeed very comprehensive and shows a great deal of work conducted by WBC.</p>	<p>In relation to the consultation taking place during the coronavirus pandemic, the Government published guidance in May 2020 with regard to planning and COVID 19: <a href="https://www.gov.uk/guidance/coronavirus-covid-19-planning-update">https://www.gov.uk/guidance/coronavirus-covid-19-planning-update</a>. This stated that “We continue to want to see Local Plans progressing through the system as a vital means for supporting economic recovery in line with the government’s aspirations to have plans in place across the country by 2023.”</p>

Respondent (with lpr ref)	Response	Council Response
	<p>However, I do question the consultation process that is being followed. This development is not insignificant, in fact it is proposing the creation of a NEW TOWN the size of Hungerford in an area a third of the size.</p> <p>My objection to the consultation process is that the plans were released during a pandemic, while the UK is under lockdown and over the Christmas period, only a very short period for responses given. In a more normal situation, there would be an extended period of public consultation, with meetings and presentations by WBC enabling the executive to understand the view of the public. In this instance there has been no public presentation by WBC.</p> <p>Consequently, I believe this development plan is being rushed through for political reasons.</p> <p>2) Impact on ANOB.</p> <p>To the North of this new town is the boundary of the ANOB and I believe that developing up to the boundary will have a negative impact on the ANOB with increased light pollution, increased noise, increased traffic through the ANOB and reduced bio diversity within the ANOB and surrounding area. The AONB represents the closest area of wild green space to the development, this will see a large increase in walkers, cyclists 4X4 drivers and other users of the area. This will lead to even more damage to the footpaths and by-ways, more litter and increased fly-tipping which will further erode the value of the ANOB.</p> <p>The proposed “Country Park” may look like a good idea on paper, but having such an area of managed green space will reduce bio diversity due to the mono culture nature of managed green spaces.</p> <p>When Thatcham was developed in the late 1990’s Floral way was built as a boundary to ensure that there was a suitable wild space between Thatcham and the ANOB. This has been up held by the Secretary of State, most</p>	<p>A written ministerial statement (<a href="https://questions-statements.parliament.uk/written-statements/detail/2021-01-19/hcws720">https://questions-statements.parliament.uk/written-statements/detail/2021-01-19/hcws720</a>) published on 19 January 2021 set out the importance of work continuing to advance on Local Plans through to adoption by the end of 2023 to help ensure that the economy can rebound strongly from the pandemic.</p> <p>Changes were made to the Town and Country Planning (Local Planning) (England) Regulations 2012, under the Town and Country Planning (Local Planning) (England) (Coronavirus) (Amendment) Regulations 2020, to remove the need for local authorities to make hard copy documents available for public inspection for a temporary period from 16 July 2020 until 31 December 2021.</p> <p>The consultation was run in accordance with the council’s Statement of Community Involvement (SCI). A public consultation such as this is would usually last 6 weeks but because it did go over Christmas, it ran in total for an 8 week period between 11 December 2020 and 5 February 2021.</p> <p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council’s Statement of Community Involvement (SCI), on the Council’s website and in the local press and via notification emails to those registered on the Council’s consultation database.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed</p>

Respondent (with lpr ref)	Response	Council Response
	<p>notably in the rejection of the development at Siege Cross (15/00296/OUTMAJ)</p> <p>3) Impact on local area</p> <p>I refer to the Siege Cross ruling where the Secretary of State called out the loss of agricultural land as a reason to reject development, yet in this development even more agricultural land would be lost. How can WBC justify a high reduction in productive land, when this has already been established as a reason not to develop on land.</p> <p>In 2007 there was a massive flooding event and subsequently WBC were sent a report from environmental experts stating “it would be utter madness to build on the slope “. In fact recent rainfall has already shown that the slope will hold a lot of water and protect Thatcham. I don't believe that WBC are taking the flooding risk seriously enough.</p> <p>As part of the modelling for this new town, there have been traffic estimates created. These have been created during a national lockdown and hence I question the validity of this data. Also from the documents provided, the traffic impact on the surrounding villages has not been considered or mitigated. Many of the surrounding villages do not have pavements and already suffer from problems with speeding, an increase in traffic flow could only increase the danger to the inhabitants of those villages.</p> <p>The crematorium was sited at the far eastern end of Thatcham away from population centres to provide a peaceful space for people to say goodbye to relatives and to mitigate the possible environmental impact of the emissions. This has been successful and now WBC want to develop the land right up to the crematorium- what has changed?</p> <p>4) West Berkshire declared a climate emergency on 2 July 2019.</p>	<p>development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other</p>

	<p><a href="https://www.westberks.gov.uk/media/48362/Draft-Environment-Strategy-2020-2030-Summary-document-January-2020-pdf/WBC_Environmental_Strategy_Summary_A4_20.pdf?m=637141844400230000">https://www.westberks.gov.uk/media/48362/Draft-Environment-Strategy-2020-2030-Summary-document-January-2020-pdf/WBC_Environmental_Strategy_Summary_A4_20.pdf?m=637141844400230000</a> WBC - Environment Strategy - with declaration of climate emergency.</p> <p>WBC need to consider this development against this background of their own stated intentions. This development will result in increased pollution from the construction traffic, increased vehicle pollution due to the inevitable congestion of an extra ~5000 vehicles on the road. Paving over countryside can only be detrimental to the environment (Once the land is lost it will never be recovered) and result in a loss of our nature and biodiversity. I am sure many of the objections WBC receive will relate this and I know for sure that all local environmental organisations such as BBOWT, CPRE and WBGE are all against this development going ahead.</p> <p>It is a fact that domestic heating is the single largest CO2 producing task, and by creating this new town there would be a significant increase in CO2. What are the plans to make this development carbon neutral? Building solar farms on yet more green space is not a viable solution as yet more farmland will be lost.</p> <p>There are already issues in the summer months with water supplies leading to hosepipe bans, where are the additional 875,000 litres of water per day going to come from? (350l/day/household, quoted by the energy saving trust) This figure also does not include all the water locked up in appliances such as toilets.</p> <p>Waste management is also an issue with long queues to access the municipal tip, where is all the additional waste from this development going to go?</p>	<p>changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that ‘in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy’ (paragraph 67 of the Core Strategy Inspector’s Report). As additional housing is required, and given Thatcham’s status as an ‘Urban Area’ in the development plan is it considered appropriate to consider Thatcham for housing.</p> <p>In relation to the Climate Change Emergency, The emerging draft LPR includes a policy that specifically covers climate change (policy SP5). This requires that all development should contribute to West Berkshire becoming and staying carbon neutral by 2030.</p> <p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs development to the most sustainable locations in the district.</li> <li>• Policy SP6 (Flood Risk) directs development to areas least at risk of flood risk.</li> <li>• Policy SP22 (Transport) requires that any development that generates a transport impact will be required, amongst other things, to have regard to West</li> </ul>

Respondent (with lpr ref)	Response	Council Response
	<p>5) Precedent: Siege Cross Development - Declined</p> <p>In 2017 the Secretary of State rejected a proposal for 495 homes at Siege Cross (15/00296/OUTMAJ), this is now included as 30% of this new town.</p> <p>Why are WBC now so supportive of the 4 proposed developers, and why, having already been rejected once, WBC are not questioning why they are wasting more money trying again?</p> <p>6) Do we need this New Town?</p> <p>I seriously question the need for this new town to be created at a time when WBC have substantial land earmarked for development suitable for the next 10 years or so. Whilst I appreciate they need to plan ahead they have used a very broad brush approach, looking on a map and putting a plan together.</p> <p>WBC have not indicated if they have considered brown field development as this would be on sites with infrastructure already in place.</p> <p>I also question the basis for the population forecasts as they were all completed pre Brexit and pre Pandemic.</p> <p>7) New Town</p> <p>This development needs to be considered a new town and, in my opinion, represents a massive over development of the site.</p> <p>Also, as a new town no provision has been made for employment or services. All that has been included is 3 schools. Getting an appointment to see a local GP can be incredibly difficult, this development is only going to make this situation worse, even if a new practice was to be built it would not</p>	<p>Berkshire’s declared climate emergency and minimise the impact of all forms of travel on the environment.</p> <ul style="list-style-type: none"> <li>• Policy DC3 (Building Sustainable Homes and Businesses) looks at building sustainable homes and businesses,</li> </ul> <p>Any development site will have to comply with the aims and objectives of the plan.</p> <p>A response to the Siege Cross development has been provided above.</p> <p>In regards to the development of brownfield sites, when determining which new sites to allocate the Council are only able to consider land that is submitted to them through the HELAA. The HELAA includes brownfield sites that the Council are aware of.</p> <p>The supporting text to policy SP12 (Approach to Housing delivery) of the emerging draft LPR identifies that several sources will ensure a continuous supply of land across the plan period. These include amongst others, existing planning commitments (unallocated sites with planning permission), many of which are brownfield sites.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council’s housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>In relation to the plan being prepared prior to the coronavirus pandemic, the full impact of the COVID 19 pandemic will not be fully apparent for some time. 		<p>(SA) and are made in accordance with the settlement hierarchy, with higher levels of development at the higher levels of the hierarchy. Thatcham lies in the top tier of the settlement hierarchy (it is an Urban Area). Urban Areas will be the prime focus for housing and economic development.</p> <p>The proposed strategic allocation of North East Thatcham is in accordance with the spatial strategy set out in the LPR.</p>
Theo Powell (lpr1254)	<p>I am writing to object to the plans to build 2500 houses in the greenspace between my village Upper Bucklebury and Thatcham. It is very clear there are multiple reasons which show that what these plans are proposing will be extremely damaging to both the environment and the general quality of living in both Upper Bucklebury and Thatcham.</p> <p>To start with I would like to bring up the fact that building 2500 houses, a development the size of Hungerford, would essentially connect Upper Bucklebury to Thatcham resulting in Upper Bucklebury losing its rural aspect and completely changing the character of our village. On top of this, there is the so called “country park” which has been proposed as a border to Upper Bucklebury. From what we can see this “country park” will be a few hundred metres worth at most of what is already there, seeing as there seem to be no apparent plans or budget to maintain or develop this “country park” any further. There is also no guarantee that this “country park” won’t be used in the future for further building and development.</p> <p>Another point is the traffic. In Bucklebury Parish Council’s presentation to the community, it was said that there would be a projected 12% increase in traffic coming up Harts Hill and through Upper Bucklebury. I think it is clear that this 12% is completely inaccurate and that adding another 2500 cars minimum will cause a huge congestion problem both in Thatcham and in Upper Bucklebury. This in itself brings up plenty of problems and dangers to pedestrians (especially children) and to wildlife in and around our village and</p>	<p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA)</p>

Respondent (with lpr ref)	Response	Council Response
	<p>once again, completely disrupts and ruins the tranquillity of living in the village.</p> <p>To add to that, these plans bring many environmental problems, the biggest being the obvious increase in pollution which comes with increasing the size of a town by 25%. This will involve pollution from traffic congestion as well as light pollution that will detract from the clear night skies we currently enjoy and appreciate in Upper Bucklebury.</p> <p>Flooding is also a consideration, if the proposed site is concreted over, all the excess water that currently drains into the surrounding fields will flow down into Thatcham causing worse flooding than has already been experienced. I don't believe the current flood alleviation schemes will be sufficient to prevent this.</p> <p>As a young 18 year old who has grown up playing in the woods and the surrounding fields of this area, I feel this development is taking away that option for young people and future generations.</p> <p>I would therefore like to strongly object to this proposal in order to protect and preserve the identity of our village and its surroundings.</p>	<p>report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In regards to concerns raised in relation to the loss of a recreational resource, within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB. This will be accessible to all.</p>
Grainne McQuaid (lpr1256)	<p>I would like to strongly register my objection to the proposed 2500 houses development in Thatcham:</p> <p><b>Communication:</b> I only became aware of this proposed development about 3 weeks ago. It has not been widely publicised by WBC. A proposal of this size should, surely, warrant direct written communication from WBC to all affected residents/parishioners so that ample time is given to review and consider the proposal in depth.</p> <p><b>Greenbelt:</b> WBC previously approved a Bucklebury Plan that agreed to maintain a strong greenbelt between Thatcham and Upper Bucklebury. The development goes against this and would effectively merge Upper Bucklebury with Thatcham.</p> <p><b>AONB and the destruction of wildlife:</b> This would be a massive over-development of the countryside and would destroy the beauty of the area. There would be an increase in dog-walkers, quadbike/scrambler riders, dog</p>	<p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p> <p>The site is not within the Green Belt (there is no Green Belt in this District).</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and</p>

Respondent (with lpr ref)	Response	Council Response
	<p>fouling and litter. The increase in cars driving and parking on the Common for people to go walking etc. would have a huge detrimental effect on the area...not to mention the destruction of the wildlife.</p> <p><b>Traffic Increase:</b> This will have a significant impact on traffic in the area, especially on the routes in and around Thatcham and Newbury and over the level crossing. This will increase the traffic through all of the surrounding villages of Upper Bucklebury, Cold Ash, Chapel Row, Bradfield Southend etc... Speeding through Upper Bucklebury, both along Broad Lane and on Burdens Heath, is already a major problem and the increase in traffic would only add to this.</p> <p><b>Medical Practices:</b> This will put huge pressure on Chapel Row Surgery and Burdwood Surgery. Already, it can take a couple of weeks to get an appointment at Chapel Row. The extra demand that the new development would generate will negatively impact Bucklebury residents.</p> <p><b>Flooding:</b> A hill-side development of this size will cause huge flooding difficulties for the people of Thatcham.</p> <p><b>Businesses benefit:</b> I fail to see how the proposed development will benefit businesses in Upper Bucklebury – predominantly the Pub and the Shop. Pub usage is already in decline, and there is already a Pub at the bottom of Harts Hill. Our local shop is not likely to benefit either as the proposals indicate that shops will be included in the development.</p> <p><b>Pollution:</b> It will significantly increase the air, noise and light pollution to Bucklebury residents.</p> <p><b>Schooling:</b> this will obviously have an impact on local schools. The proposal is for 3 new schools. If these are built before the houses are complete, it will poach children from local schools, such as Upper Bucklebury which will</p>	<p>the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA)</p>

Respondent (with lpr ref)	Response	Council Response
	<p>make that unsustainable. If they are built after, then local schools will be overwhelmed beforehand.</p> <p>A development of this scale, one that is close in size to Hungerford, will impact Thatcham and all the surrounding villages in so many detrimental ways.</p>	<p>report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The site alongside the larger site area, is well related to the existing town of Thatcham. It is in close proximity to a range of services and facilities, including the train station. Thatcham is an urban area with a wide range of services and opportunities for employment, community and education. Development of a strategic nature at this site would support the service provision and regeneration that Thatcham requires.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>An economic advantage of new development is that new residents can help support local shops and businesses and help to boost the vibrancy and vitality of town and local centres.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p>

Respondent (with lpr ref)	Response	Council Response
		In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.
Julian Dobbins (lpr1257)	<p><b>[Comments on housing need also added to SP12]</b></p> <p>I am writing to voice my <b>objections</b> to the proposed NE Thatcham development (Policy SP17). I am a resident of Upper Bucklebury, and have lived in the village with my family for 15 years.</p> <p>My objections are based on review of the consultation document plus supporting material, including:</p> <ul style="list-style-type: none"> <li>• Thatcham Strategic Growth Study 2019 (David Lock Associates)</li> <li>• West Berkshire Land Character Assessment 2019 (LUC)</li> <li>• Flooding in Thatcham 2008 (Sue Everett)</li> <li>• West Berkshire Environment Strategy 2020-2030</li> <li>• West Berkshire Local Plan Review to 2036 Sustainability Appraisal / Strategic Environmental Assessment 2019</li> <li>• Kennet Catchment Management Plan 2018</li> </ul> <p>In addition, I have spoken with environmental consultant Sue Everett, former local resident, advisor to Thatcham Town Council and noted expert on development in relation to flooding, ecology, and overall environmental impact.</p> <p>As a result, I wish to <b>object</b> on the grounds of:</p> <p><b>Breaching of the Floral Way settlement boundary</b></p> <p>Extending Thatcham to the north-east will continue to destroy the rural areas so highly prized by West Berkshire in all its planning material. In the LCA,</p>	<p>As part of the preparation of the LPR the council has undertaken a Settlement Boundary Review (SBR).The settlement boundary criteria make clear that boundaries will include sites allocated through the Local Plan process. North East Thatcham is proposed for allocation under policy SP17. Should the site, or any part of it, be removed from the LPR the boundary for Thatcham would be adjusted to exclude it. It is acknowledged that the settlement boundary is currently drawn around the whole of the proposed allocated site at North East Thatcham whilst Policy SP17 notes that development will be expected to deliver ‘a network of green infrastructure which will include a new community park linking Thatcham to the AONB.’ The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. At this stage it is therefore not possible to draw the settlement boundary any tighter. As the LPR progress and more detailed work is done on the sensitivity and capacity of different parts of the site to accommodate development the boundary will be amended accordingly.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>the following detractors' (to the distinctly rural environment of the area) are described - each one of these will be made worse by this development:</p> <p><b>Decreasing separation/coalescence between settlements</b></p> <p>The expansion of Thatcham and Newbury since the mid-20th century, and also of villages within the character area, has reduced the physical and perceptual separation between settlements. This is particularly evident at the western end of the character area, where there is near coalescence along the main connecting roads between Newbury and Thatcham, Cold Ash, Ashmore Green, Curridge and Hermitage.</p> <p><b>Increased suburbanisation</b></p> <p>Modern housing along main routes and on adjacent cul-de-sacs, together with street lighting and pavements, has introduced suburban characteristics to some places, particularly where there is less tree cover to mask changes e.g. the southern end of Cold Ash and linear development along the B4009 Long Lane just north of Shaw. Incremental development of the countryside settlements is also an issue, including the enlargement of curtilages, security lighting, entry gates etc.</p> <p><b>Loss of gradation between settlement and countryside</b></p> <p>Farm buildings and small pasture fields adjacent to settlements have proved vulnerable to development (typically of small residential clusters), due in the former case to presence of existing structures and in the latter to the screening/containment provided by boundary features. However, farm buildings, even when development has left them adjacent to settlement edges, contribute to rural character when they retain a relationship with farmland; and small enclosures, even when used as paddocks, form a transition between settlement and countryside that can contribute positively</p>	<p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In regards to light pollution, policy DM4: Environmental nuisance and pollution has been strengthened to ensure that all reasonable steps are taken through design, siting and technological solutions to ensure the abatement of obtrusive light to avoid sky glow, glare and light spillage, intrusion and any adverse impact to wildlife. Applicants should adhere to the guidance on lighting provided in the most up to date Institute of Lighting Professionals (ILP) guidance notes, alongside other relevant local documents including the North Wessex Downs AONB 'A Guide to Good External Lighting' (2021).</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR also requires the submission of a lighting strategy.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>to landscape character, particularly when they retain a relationship with a historic settlement core.</p> <p><b>Increased traffic on the rural lane network the following detractors are already happen and will only get worse:</b></p> <p>The Siege Cross planning rejection from 2015 references so many reasons for it being declined (beyond just not being part of a development plan). All of those reasons in point 3 (Landscape and Visual Character) still apply with the current proposal, and more so; the fact that the proposal has been included in the development plan does not suddenly mean those previous reasons for objection have been remedied. The rejection of that section follows the individual points of rejection by stating:</p> <p>For the above reasons the development fails to have due regard to the sensitivity of the area to change. The development is inappropriate in terms of its location over the whole site, and its scale in the context of the existing settlement form, pattern and character of Thatcham. The development also fails to conserve the historic landscape setting and rural context of Siege Cross Farm.</p> <p>The settlement boundary is there for a reason, and West Berkshire highlighted many of those reasons very eloquently in rejection of the proposal.</p> <p><b>Increased risk of flooding and urban run-off</b></p> <p>As stated in the LPR, appendix 4b:</p> <p><i>There is a risk of surface water flooding with the site along the natural drainage routes based on EA modelling. The site is crossed by a number of ephemeral watercourses and these corridors would need to form part of a wider SuDs strategy to help manage the run-off from any new development.</i></p>	<p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>All WBC supporting material speaks of mitigation measures, and yet the flooding in 2007 (regarded as a 1-in-200 year event, despite the EA assessment of it being a 1-in-169 years) seems to fall outside the planning horizon for risk planning; what hope can we have that these measures will be effective, especially given that <i>'the risk of flooding continues to escalate; making the events that shattered so many communities [in 2007] an ever increasing threat.'</i> (Pitt Review (2008))</p> <p>As the Flooding in Thatcham (2008) report states, 'the principal source of floodwater [in the 2007 floods] was run-off from farmland to the north of Thatcham.' In my recent conversation, with Sue Everett, author of the report, she remarked that it would be "utter madness to build on that slope" (referencing the designated area to the NE of Thatcham).</p> <p>Regarding the further effects of run-off, Sue Everett spoke of the dangerously high levels of phosphates and nitrates already impacting the Kennet Valley, and that development in NE Thatcham would add considerable urban run-off as the LPR states:</p> <p><b><i>The Kennet and Avon Canal, south of the railway line, is a Site of Special Scientific Interest and development to the north would have to consider the water quality of any surface water discharged to the south.</i></b></p> <ol style="list-style-type: none"> <li>1. Impact on AONB through loss of separation from urban settlements and increase in traffic (pedestrian / cycle / automotive)</li> </ol> <p>As mentioned in (a), above, breaching the settlement boundary will have huge impacts on the AONB, both in terms of the rural character, and materially on the quality of life in those settlements adjoining THA20. Aside from the 'loss of greenfield land' (mentioned in the LPR, appendix 4), the LPR also states the 'site is of such a scale that it would provide new services and facilities that would be available to surrounding settlements like Cold Ash and Bucklebury', which clearly indicates the impact it will have, just from</p>	<p>The Core Strategy Inspector (in 2012) considered that 'in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy' (paragraph 67 of the Core Strategy Inspector's Report). As additional housing is required, and given Thatcham's status as an 'Urban Area' in the development plan is it considered appropriate to consider Thatcham for housing.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel</p>

Respondent (with lpr ref)	Response	Council Response
	<p>the point of view of facilities, potentially threatening the local shop, the local school etc., but also in terms of bringing Thatcham closer, adding traffic to local lanes (which have no pavements), and eroding still further the fragile commercial, cultural and environmental nature of the settlements within the AONB.</p> <p>As stated in DC1:</p> <p><i>Planning permission will not be granted where a proposal harms or undermines the existing relationship of a settlement within the open countryside, where it does not enhance the character and distinctiveness of the rural area, including the special qualities and natural beauty of the landscape of the AONB or where development would have an adverse cumulative impact on the environment or highway safety.</i></p> <ol style="list-style-type: none"> <li>1. Destruction of ancient forest land, fragile ecosystems (including AONB and SSSI, and land supporting protected species under European law), both through direct and adjacent loss of habitat, threatening biodiversity and general ecological well-being</li> </ol> <p>As the LPR states, the development site contains ancient woodland. According to the Government website:</p> <p><i>Ancient woodland takes hundreds of years to establish and is defined as an irreplaceable habitat. It's important for its:</i></p> <ul style="list-style-type: none"> <li>• <i>wildlife (which include rare and threatened species)</i></li> <li>• <i>soils</i></li> <li>• <i>recreational value</i></li> <li>• <i>cultural, historical and landscape value</i></li> </ul>	<p>and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to potential impact on surface water, all new development must include sustainable drainage measures, and development must be avoided on areas that are at risk of surface water flooding. Development on the site will be expected to deliver surface water management approaches that could deliver a net gain for Thatcham town. Drainage and flood attenuation works are included in the IDP.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The LPR also states that the most recent TVERC study revealed there to be protected and priority species within the development area.</p> <p>If both of these factors aren't enough, the loss of greenfield habitat will drive species into adjacent (largely wooded and heathland) habitats, resulting in fragile ecosystems coming under further pressure (reduced space, resources etc.), upsetting the delicate balance of these ecosystems. This <u>will</u> result in a loss of biodiversity. Extend that still further to Bucklebury Common and its adjoining woodlands, a profoundly fragile environment already under pressure from illegal motor vehicle use, for example, and WBC / Developer assurances of a net gain in biodiversity do not have any credibility whatsoever. Proposals speak of much of the area being a designated '<i>Biodiversity Opportunity Area, part of the Bucklebury Plateau BOA, and the site is within a local habitat network.</i>' It goes on to state that this '<i>indicates that a net gain in biodiversity should be delivered through development.</i>' Improving biodiversity in the upper slopes of THA20 is not going to make up for the loss of habitat that construction of 2500 homes and its supporting infrastructure have on the rest of the proposed development area.</p> <p>By way of additional context, the country's habitat is under extreme pressure, and focusing on biodiversity without paying attention to abundance is neglectful:</p> <p>A 2019 New Scientist article (<a href="#"><u>Thousands of UK wildlife and plant species are in decline</u></a>) includes the following:</p> <ul style="list-style-type: none"> <li>• <i>Of the species that we have more detailed data on, nearly 700 saw their numbers fall [since the 1970s] by 13 per cent. The declines have left 15 per cent of species facing extinction, including the turtle dove, numbers of which are down 98 per cent in half a century.</i></li> <li>• <i>"We have this pattern of ongoing loss, which is showing no slowing in the rate of decline. Overall, we are losing more species than we</i></li> </ul>	<p>landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to impact on water quality and environmental designations the policy for these matters are contained within DM5 Water Quality, DM6 Water Resources and Waste Water and SP11 Biodiversity and geodiversity. The LPR is read as a whole. All LPR policies should be viewed together and not in isolation in the preparation and consideration of planning applications. Development proposals will be judged against all relevant policies. All Development Plan policies will be taken into account in determining planning applications, along with other material considerations in a proportionate manner. The policies in the LPR do not list or cross-refer to all other policies that may be relevant.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p>

Respondent (with lpr ref)	Response	Council Response
	<p><i>are gaining,” says Daniel Hayhow of the Royal Society for the Protection of Birds.</i></p> <ul style="list-style-type: none"> <li>• <i>Hayhow calls [the decline in species numbers] a “canary in the coal mine signal” because changes in distribution usually happen much more slowly than changes in abundance.</i></li> </ul> <p>In a Dec 2019 paper, '<u>Ongoing, but slowing, habitat loss in a rural landscape over 85 years</u>,' Ridding at al. make the following relevant observations, including the point that government performance on environmental management not only has a poor record, but is also guided by insufficient data:</p> <ul style="list-style-type: none"> <li>• <i>The National Planning Policy Framework sets out government’s planning policies for England which requires that local authorities must ensure that any developments have minimal impact on biodiversity. Although the importance of protected areas for biological conservation is acknowledged, there is little empirical evidence of their effectiveness (Gaston et al. 2008; Greve et al. 2011).</i></li> <li>• <i>The findings [in this paper] illustrate a long history of habitat loss in the UK, and are important for planning landscape management and ameliorative actions, such as restoration. Our analysis also highlights the role of statutory protection in retaining semi-natural habitats, suggesting the need for continued protection of important habitats.</i></li> <li>• <i>many long-term [biodiversity] studies often focus on the last forty years at best.</i></li> </ul> <p>In other words, government and developer tendency to use biodiversity data from recent years masks the losses which have already occurred and gives us what can be referred to as "shifting baseline syndrome", through which there is an '<i>acceptance of the current low biodiversity state as being normal (Soga and Gaston 2018).</i>'</p>	<p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In regards to light pollution, policy DM4: Environmental nuisance and pollution has been strengthened to ensure that all reasonable steps are taken through design, siting and technological solutions to ensure the abatement of obtrusive light to avoid sky glow, glare and light spillage, intrusion and any adverse impact to wildlife. Applicants should adhere to the guidance on lighting provided in the most up to date Institute of Lighting Professionals (ILP) guidance notes, alongside other relevant local documents including the North Wessex Downs AONB 'A Guide to Good External Lighting' (2021).</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR also requires the submission of a lighting strategy.</p> <p>In relation to concerns regarding other types of pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council’s policy on pollution.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>On one recent walk along Cox's Lane, on the eastern edge of the proposed development area, numerous badger setts were noted, with entrances exposed to the lane itself. Aside from any lasting impact to such habitats once any residential or commercial development is established, the development work itself will dramatically alter the environment within which these animals, and their entire ecosystem, are living.</p> <p>The proposal's comment that '<i>Up to date ecological surveys will be required to determine detailed mitigation measures</i>' needs much more detail before it can be considered as having any merit.</p> <p>It is difficult for us to take WBC assurances of biodiversity seriously; there is so much documentation supporting these proposals and yet a recent TVERC analysis hasn't even been carried out, despite previous references to protected species. This does not inspire confidence in the priority of environmental protection, nor preservation of the overall rural context in which these species live.</p> <p>In addition to the points already made, the question of pollution (light, air, noise, water) needs to be addressed and barely seems to offer any acceptable outcomes - dark skies, a quiet environment (embodied by the network of quiet lanes in the Bucklebury parish), clean air (critical for our lichens and mosses, an important base layer in the ecosystem) and clean water are all impacted and will damage the AONB irreparably.</p> <p><b>1. Traffic congestion around NE Thatcham</b></p> <p>Thatcham's traffic issues are well-understood by any local resident, often leaving cars sitting in traffic queues along the A4 or at the level crossing for considerable lengths of time, hardly helping the council's carbon net-zero and healthy air ambitions. As the LPR states:</p>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to water supply, the developers are aware of the requirement for upgrades to the water supply network and water treatment works (which is identified in the Water Cycle Study).</p>

Respondent (with lpr ref)	Response	Council Response
	<p><i>'Development would have a very significant impact on the local highway network.'</i></p> <p>The document then adds:</p> <p><i>'Opportunities for modal shift should be maximised. A transport assessment would also be required.'</i></p> <p>Once again, we find the need for further analysis before this proposal can be considered as credible; it is hard to find any piece of data capable of assuring anyone in the local community that adding 2500 homes into this area will do anything but cause huge disruption.</p> <p><b>Impact on an already-struggling local water supply</b></p> <p>Water availability in the region is an issue, as the Kennet Management Plan (and my conversation with Sue Everett) makes clear. Additional development of this scale will only add to the depletion of resources.</p> <p><b>Failure to acknowledge housing needs based on household type, nor recognise the opportunities for commercial property re-use and town centre regeneration</b></p> <p>SP12 (Approach to Housing Delivery) states:</p> <p><i>Provision will be made for 8,840 to 9,775 net additional homes in West Berkshire for the period 1 April 2020 to 31 March 2037; 520– 575 dwellings per annum. The target figure of 575 dwellings per annum does not constitute a ceiling or cap to development.</i></p>	<p>Should the development go ahead, it would be phased appropriately to ensure it does not outpace delivery of essential network and treatment upgrades (See IDP).</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an integrated water supply and drainage strategy which will consider existing related infrastructure on the site.</p> <p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government's standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>In the most recent ONS household forecast data, which covers the period 2018 - 2028, the entirety of West Berkshire's housing growth is described as 2482, suggesting a 'necessary' annual figure (at least for the period covered) much lower than put forward in this proposal.</p> <p>Furthermore, regarding housing mix, the proposal (table 3 in SP12) shows that 60% - 70% of Market housing and 35% - 45% of Affordable housing will be 3 or 4 bedroom houses. ONS data shows that by far the highest growth in housing demand for West Berkshire will come from one-person households (10.7%, versus growth rates of -6%, -8.9% and -11.2% for families with 1, 2 or 3+ dependent children respectively).</p> <p>Given the housing mix suggested by the ONS forecast data, the proposal seems completely out of touch with the reality of local needs. In light of the changing nature of town centres, as retail moves on online, and an ageing population needing access to public transport, does it not make much more sense to repurpose unused commercial property for residential use, and in doing so change the declining nature of the high street, provide easier access to local facilities (especially for the ageing population) and reduce dependency on short car journeys clogging our streets and adding to the community's carbon footprint?</p> <p><b>Lack of meaningful and timely democratic engagement in the review process, and lack of thorough analysis of key elements of the proposal</b></p> <p>On my final point, I would say, very strongly, that there has been a significant lack of community engagement to date in the review process. Regardless of any efforts made by West Berkshire to make development proposals visible, they have been insufficient, particularly given the challenging macro-context in which we are all currently living. As a result, awareness is poor, general understanding of detail is worse and timescales have become unreasonably tight to make sense of all relevant material. If West Berkshire Council truly believes that <i>'everyone in West Berkshire has a role to play'</i> (Environment Strategy 2020-30) in helping West Berkshire</p>	<p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p> <p>Policy SP18 Housing Type and Mix is the policy which sets out that there is a wide choice and mix of housing to meet existing and future local needs, and to help secure mixed and balanced communities. Please see comment above in relation to how the LPR policies will be used.</p> <p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p> <p>The Council maintains an evidence base which informs the LPR to ensure the policies contained within the planned are justified.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>become the model for a better, more environmentally-aware and sustainable community, surely this begins by ensuring broad levels of engagement from the whole community. Many people we have spoken with on this topic were unaware of it until very recently. Even the LPR (appendix 4) notes that there have been no comments from Midgham PC, despite their parish being directly impacted by the proposal. Add to this a lack of completed analyses throughout, on key matters such as flood prevention, water availability, environmental impact and traffic, and it is clear, despite all the assurances made by WBC and its consultants, that there is much that is very wrong with this proposal.</p> <p>I look forward to discussing this matter more fully at the earliest opportunity once West Berkshire Council has considered all input and is ready to re-engage with the community it serves.</p>	
Holly Ellis (lpr1259)	<p>I object to 2500 houses being built on this farmland, due to:</p> <ul style="list-style-type: none"> <li>• Loss of green area</li> <li>• Over development of Thatcham</li> <li>• More pollution</li> <li>• More traffic</li> <li>• Kennet school already full capacity and over stretched</li> <li>• Overcrowding in all public areas and buildings</li> <li>• Overstretched/ over populated GP surgeries already</li> </ul> <p>Please take into consideration the views of all people living in Thatcham and Upper Bucklebury and surrounding areas.</p>	<p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure</p>

Respondent (with lpr ref)	Response	Council Response
		<p>which will include a new community park linking Thatcham to the AONB.'</p> <p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p>

		<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>
Name supplied (lpr1267)	<p>Having been a fortunate resident 40+ years, the volume of houses being built in recent years, e.g. Kennet Heath 900 homes, has not been sustainable. The infrastructure in local schools, healthcare and facilities has not kept up with demand, as detailed in the plan at 6.36 'However, in recent decades, the provision of social infrastructure has not kept pace with housing growth.'</p> <p>Whilst I fully acknowledge the requirement for additional homes in West Berkshire, (especially affordable) Thatcham is, as detailed in the plan, viewed as a large village and <b>does not have the infrastructure</b> in place for even the current population, far from it! Indeed, the plan details at 6.19' The TSGS (Thatcham Strategic Growth) shows that <b>Thatcham compares poorly to other similar centres</b> in terms of overall service provision, including public services and commercial services. The town's self-image is of a large village, rather than as a thriving market town.'</p> <p>Developments, including this one, promise of new additional schools never come to fruition – Dunstan Park as well as on Kennet Heath to name examples. The plan details proposal for an additional secondary school, with Kennet School already in the East of Thatcham that is not where the School will be needed as far too close proximity. Land near the Hospital, by the Garden Centre roundabout, would be more central to the need allowing</p>	<p>Concern regarding infrastructure provision is noted. 	<p>2. Can you advise on how the housing demand calculation takes into account the AONB, DEPZ zones and floodplain?</p> <p>3. Is there a conflation of issues for education and health into the planning document between this development and need for additional schools and health centres in West Berks? If this is being seen as a way of funding these needs then this needs to be stated.</p> <p>4. Have you spoken to councils with similar constraints – AONB, flood plains, MOD land (DEPZ equivalent) significant landowners eg. Purbeck Council?</p> <p>I do think that perhaps some coordinated thinking with other councils living having to work with Government requirements where they have extremely restricted space would ensure that a consistent workable solution can be presented to Government. Whether its building on floodplains – with the additional cost of flood defences or being structurally sound for flooding.</p> <p>However more than anything I think that our villages could add more housing within them and towns requirements for shops (Debenhams and John Lewis have already gone in Newbury) and offices falling vacant (home working meaning empty office blocks) will mean that there is a lot of property ripe for conversion.</p> <p>However more than anything I think that our villages could add more housing within them and towns requirements for shops (Debenhams and John Lewis have already gone in Newbury) and offices falling vacant (home working meaning empty office blocks) will mean that there is a lot of property ripe for conversion.</p>	<p>Council’s website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In relation to the plan being prepared prior to the coronavirus pandemic, the full impact of the COVID 19 pandemic will not be fully apparent for some time. The LPR is a long term strategy to 2039, during which time a review will be conducted every 5 years. The impact of changes in response to macro and local economic factors will be assessed through subsequent reviews, once such implications are realised.</p> <p>RAF Harwell is located outside of the administrative area of West Berkshire close to Chilton and RAF Welford is located within West Berkshire north of the M4 close to the village of Welford.</p> <p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government’s standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless</p>

Respondent (with lpr ref)	Response	Council Response
		<p>exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p> <p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p> <p>An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>The Council works alongside other local authorities as part of the duty of cooperate, a Duty to Cooperate Topic Paper will be produced to support the plan.</p>

Respondent (with lpr ref)	Response	Council Response
<p>Sarah Staig (lpr1266)</p>	<p>I am writing to object to the planning proposal for 2500 house to be built to the NE of Thatcham. Thatcham does not have the infrastructure to support this volume of new houses. Dr's surgeries, schools especially the secondary school do not have the capacity or infrastructure to support all the children that would live in these houses. Kennet School is already an extremely large school with 1800 pupils and is already in need of new buildings to replace temporary building that have become not so temporary. The A4 already gets congested with traffic entering Thatcham, these houses would only exacerbate the problem.</p>	<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The</p>

Respondent (with lpr ref)	Response	Council Response
		modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.
Claire Bowden (lpr1269)	<p>I would like to register my objection to the proposed development of farmland for 2,500 houses between the A4 Thatcham and Upper Bucklebury.</p> <p>I am a resident of Upper Bucklebury, and have been for most of my life. Whilst the housing in Thatcham continues to increase at a rapid pace, the development of the infrastructure remains static, and it is already inadequate. More and more the main road through Upper Bucklebury is used as a “rat run” between Thatcham and Reading, the congestion around the railway bridge is terrible and whilst I appreciate the demand for housing is high, surely a new development the size of Hungerford in this location is unsustainable and severely detrimental to local residents.</p>	<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. Edward Asprey (lpr1279)	<p>I am writing to express in the strongest terms my opposition to the proposed housing development to the North of Thatcham.</p> <p>The effects of this proposal would be devastating for the town of Thatcham and I imagine there will be plenty of objections from its residents; but there will also be a knock on effect in the surrounding area. Chapel Row and Bucklebury village are on the periphery of the affected area so I cannot be accused of being a NIMBY.</p> <p><b>Do we need it?</b></p> <p>I understand the need for development and accept that we must build more homes, but I question the need to build as many as 2500 in Thatcham, irrespective of current targets. It seems a totally disproportionate allocation in an area where so little of the land is developable due to AONB and flood plains. The plans would have been in place well before the Covid pandemic, so would it not be sensible to review the requirements given the changing nature of our demographics and working patterns since then? If the plan was to house commuters to London, who knows how many will still want to, or be required to, work in London (or in any office) post-Covid? If the work pattern continues to favour a work-from-home arrangement, then who will be coming to live in these houses? Also, with the birth rate dropping and local primary schools not filling all classes in some year groups, will we see half empty classrooms in the proposed new school(s)? It will be more likely that the school(s) will not get built at all.</p>	<p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government's standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>If, however, these new houses were purchased by keen commuters and assuming people returned to office work in London, I would be curious to see what plans are in place at the station to accommodate the hundreds of extra cars that would need to be parked there. Not everyone will be walking to the station and the facilities there would just not be adequate.</p> <p><b>Amenities</b></p> <p>New schools, together with shops and other leisure facilities, are part of the proposed plan. However, it is not clear at what stage these facilities will appear. Unless they are built first, there is the risk they will not be built at all since anyone already living in the new houses will necessarily have already found a school solution for their children. If the provision of infrastructure such as schools is dependent on house sales then we have a potential chicken and egg situation; schools will not be built until houses are sold, but houses will not be bought until there is a school built. If there is little perceived demand and with dwindling budgets at the end of the project, the schools may well not materialise.</p> <p><b>Impact on Upper Bucklebury, Bucklebury Village, Cold Ash, Chapel Row, Bradfield Southend and the surrounding villages and countryside.</b></p> <p>It is impossible to overestimate the negative impact this development will have on the whole area of the Parish of Bucklebury and Upper Bucklebury in particular.</p> <p>Whichever way you look at it, with the development creeping up the hill, Upper Bucklebury will all but merge with Thatcham, separated only by a small copse at the end of Long Grove. This cannot be a good thing for the identity of our village and for the peace, tranquillity and security of our community.</p>	<p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p> <p>In relation to the plan being prepared prior to the coronavirus pandemic, the full impact of the COVID 19 pandemic will not be fully apparent for some time. The LPR is a long term strategy to 2039, during which time a review will be conducted every 5 years. The impact of changes in response to macro and local economic factors will be assessed through subsequent reviews, once such implications are realised.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The new Thatcham development and Upper Bucklebury would be linked via the footpath that currently runs from Long Grove to Colthrop. This has already seen increased footfall since the pandemic and will only increase with the new development as residents choose to walk, exercise dogs, ride bikes to the countryside to the north via Upper Bucklebury. Are the residents of Long Grove expected to continue to repair and maintain their road for the benefit of non-parishioners?</p> <p>The inevitable increase of visitors to our village/parish and Bucklebury Common in particular can only have a detrimental effect on our local environment. The ancient woodlands, meadows and wildlife surely need to be protected. Bucklebury Parish Council say on their website: " Loss of habitats or habitat change as a result of inappropriate management are one of the most damaging threats facing rare species in Berkshire. These habitats should be safeguarded wherever possible and appropriate advice sought on managing them to conserve the natural diversity of life and to halt the extinction of species diversity not only in Berkshire but also in the UK. "</p> <p>If this development were to go ahead, these precious woodlands and rare habitats would almost certainly be under threat with a substantial increase in the visitor numbers – our woodlands would be a short hop for the residents of the new development compared to anywhere else in Thatcham and the surrounding area they could walk (or drive!) to.</p> <p>It was interesting to hear in the presentation of the estimated 12% increase in traffic heading up Harts Hill towards Upper Bucklebury. This is already significant on such a dangerous hill, but unfortunately is probably an overly conservative estimate. It will not take long before the increased congestion on the A4 and Floral Way (already congested at peak times) leads to more Rat Run traffic through our village. As well as environmental and noise concerns, many parents will be concerned for the safety of their children in the village especially as they walk to and from school.</p>	<p>and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>The development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population). Highway works and active travel routes would assist in directing residents to using the A4/Floral Way rather than Harts Hill Road, and using an enhanced cycling and walking network to travel, including to Thatcham train station.</p> <p>In relation to the concerns on the potential impact on Bucklebury Common, the development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population).</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>Biodiversity net gain was introduced through the NPPF and is referenced in paragraphs 174 d) and 179 b) and</p>

Respondent (with lpr ref)	Response	Council Response
	<p>This planned development and these two issues of increased traffic and damage to the local environment in particular go completely against the 'Bucklebury Vision' which very clearly emphasises a commitment to maximise rural conservation and protection from pollution, protect the environment for future generations to enjoy, conserve and enhance the natural beauty of the landscape, resist any development that would create unacceptable levels of traffic, and so on. Sadly, I cannot see how this new development fits in with the parish's agreed 'Vision'.</p> <p><b>Country Park</b></p> <p>I do not understand the need for the proposed Country Park. Why we need one at all. We are adjacent to vast Areas of Outstanding Natural Beauty with magnificent vistas and miles and miles of some of the most beautiful walks you could wish for. I can only think it is to make us feel better about the development by creating a natural gap between 'us' and 'them'. The reality is more likely that it is a steep bit of land that would be too difficult and expensive to build on, so it is turned into a 'country park'.</p> <p>It would be interesting to know what this park would look like. Steep slopes do not really lend themselves to informal recreation and I would also be curious to know if budget has been allocated to maintain it long term? All discussions around the county park and its protection seem very unclear and I think more detail and commitment are needed.</p> <p>I am also surprised that there seems to have very little mention of biodiversity, which is surprising with a development of this magnitude. It is my understanding that with any development of this nature, there should be a percentage of net biodiversity gain. There was no mention of this at the presentation of how this would be achieved and it's hard to understand how it could give the amount of farmland that will be given over to housing and other amenities.</p>	<p>the Natural Environment Planning Practice Guidance (PPG) provides further explanation on how this should be done. Mandatory biodiversity net gain is now set out in the Environment Act 2021 and applies in England only through the amendment of the Town &amp; Country Planning Act (TCPA) and is due to be enforced from November 2023. The mandatory requirement is to achieve at least a 10% biodiversity net gain increase from the pre-development biodiversity value. The requirement is framed as a pre-commencement condition, meaning that the biodiversity gain condition must be discharged before development can begin. Prior to the commencement of a development, a biodiversity gain plan must be submitted to the relevant planning authority for approval. The biodiversity gains and losses of a development will be measured in 'biodiversity units', using a metric which uses habitats as a proxy for biodiversity and calculates units by taking account of the type, extent and condition of habitats. Natural England has recently published biodiversity metric which, subject to further consultation and any further updates, is expected to be the metric specified for mandatory biodiversity net gain.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential</p>

	<p>Finally there has been no proper account taken on the effect on traffic and travel amenities. What proposals are there to cope with the extra pressure on Thatcham station and its parking facilities for example.</p>	<p>delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p>
Michelle Hunt (lpr1270)	<p><b>Objection to Thatcham Development</b></p> <p>I wish to register my objection to the proposed development to the north of Thatcham for the following reasons.</p> <ol style="list-style-type: none"> <li>1. The developments size and elevated position will have a hugely detrimental impact on the views of and around Thatcham. It will be visible from miles around and will adversely impact the AONB that surrounds it.</li> <li>2. Traffic volumes: The development will generate traffic volumes that the roads and local villages will simply not be able to cope with. 2,500 homes equates to 5,000 cars. The A4 cannot cope with the volume of traffic currently: it will certainly not be able to cope with such a significant increase. This increase in traffic will not just impact the A4 - local villages such as Bucklebury, Hermitage, Cold Ash will also be subject to significant increases in traffic volumes as cars travel to J13 of the M4 for M4 and A34 access.</li> </ol>	<p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>3. It would join Thatcham with Upper Bucklebury. WBCs own plans state that Upper Bucklebury should retain its own rural identity yet this plan contradicts WBCs own plan. Speeding is a significant issue in Upper Bucklebury (especially Burdens Heath) where children have to walk on the road verge due to the lack of pavements. Drivers regularly speed excessively along this road. This is particularly a problem for Burdens Heath - this development will significantly increase this problem and the danger posed to pedestrians.</p> <p>4. A previous such application was rejected by the Secretary of State in 2017 (<a href="https://www.newburytoday.co.uk/news/news/22045/minister-rejects-two-housing-developments-for-thatcham.html">https://www.newburytoday.co.uk/news/news/22045/minister-rejects-two-housing-developments-for-thatcham.html</a>). Why has the council now spent considerable funds investing in a proposal that has previously been rejected ?</p> <p>5. Councillor Hilary Cole has stated that she is keen to work with the neighbouring villages “because it’s such a big proposal and development for Thatcham”. We have had very little, if any consultation or notice about this! It appears as though WBC are trying to present a fait accompli.</p> <p>6. There is no evidence that this will enhance Thatcham town centre (or indeed Newbury). It will simply increase pressures on the roads and services to the detriment of everyone.</p> <p>7. Such a large area of roofs, roads and drive ways will result in significant rainwater runoff down into Thatcham. There is a high probability that this will increase the chance of flooding in Thatcham.</p> <p>8. Impact on nature. This development will destroy much needed habitat for a number of protected species, including the great crested newt, common lizard, adder, grass snake, slow worm and bats. Increasing amounts of cars and people visiting the area of outstanding natural</p>	<p>With any application that would come forward on this site, the developers would be expected to submit a ‘masterplan’ / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they</p>

Respondent (with lpr ref)	Response	Council Response
		<p>ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p>

Respondent (with lpr ref)	Response	Council Response
		The site is not within the Green Belt (there is no Green Belt in this District).
Julie and Roger Baker (lpr1283)	<p>We wish to strongly object to the building of 2,500 houses in North East Thatcham.</p> <p>This development would basically join Thatcham to Upper Bucklebury and just spoil a whole area of AONB, which is unnecessary, we need to keep spaces between communities because of wild life and general well being. Thatcham would disappear into an enormous housing estate.</p> <p>These plans were obviously made pre Covid pandemic, before the events that have happened over the last year and surely will no longer be appropriate to our future needs, as our lives have changed so much and we will have to reassess the way we plan for the future, with people working from home and not commuting for a start.</p> <p>Shops are already closing and many are unlikely to reopen, so there are plenty of vacant buildings that can be converted to low cost housing and areas of land no longer required that can be used.</p> <p>The impact on the villages of Upper Bucklebury, Midgham and Cold Ash will be devastating, with increased traffic, added pressure on schools and Doctors surgeries, general increase in Visitors and environmental damage. We therefore oppose this plan.</p>	<p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following</p>

Respondent (with lpr ref)	Response	Council Response
		<p>developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>In relation to the plan being prepared prior to the coronavirus pandemic, the full impact of the COVID 19 pandemic will not be fully apparent for some time. The LPR is a long term strategy to 2039, during which time a review will be conducted every 5 years. The impact of changes in response to macro and local economic factors will be assessed through subsequent reviews, once such implications are realised.</p> <p>An economic advantage of new development is that new residents can help support local shops and businesses and help to boost the vibrancy and vitality of town and local centres.</p> <p>The development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population). Highway works and active travel routes would assist in directing residents to using the A4/Floral Way rather than Harts Hill Road, and using an enhanced cycling and</p>

Respondent (with lpr ref)	Response	Council Response
		<p>walking network to travel, including to Thatcham train station.</p> <p>Residents would make use of the newly provided education facilities on the site, which would not be expected to purposefully attract pupils from Bucklebury primary school.</p>
Mathew Dorrich (lpr1285)	<p>I would like you to be aware of my objection to the proposed development of 2500 houses along the A4 and Floral Way at Thatcham. My reasons are as follows</p> <ol style="list-style-type: none"> <li>1. The majority of residents are wholly against the proposal but WBC have not sent out enough information regarding the subject. Everybody should be made aware before it goes any further</li> <li>2. It is written in the Bucklebury vision and Bucklebury plan that a green belt should be maintained between Upper Bucklebury and Thatcham, why has this suddenly been disregarded</li> <li>3. What has changed since the rejection of the application in 2017</li> <li>4. It is a ludicrous overdevelopment of beautiful countryside</li> <li>5. There will be a huge impact on traffic in the area. Many routes find it hard to cope with a slight difference in traffic flow, this includes not just the back roads but also the A4 between Thatcham and Newbury</li> <li>6. The development will surround the crematorium which should not be permitted due to the constraints in place</li> <li>7. It is stated that it will help a couple of businesses which certainly does not seem reason enough to go ahead</li> </ol>	<p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p> <p>There is no green belt within this area (or within the District) there will be open space maintained along the northern/north eastern part of the site.</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that ‘in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy’ (paragraph 67 of the Core Strategy Inspector’s Report). As additional housing is required, and given Thatcham’s status as an ‘Urban Area’ in the development plan is it considered appropriate to consider Thatcham for housing.</p> <p>Thatcham is an ‘Urban Area’ as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector’s report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA)</p>

Respondent (with lpr ref)	Response	Council Response
		<p>report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess</p>

Respondent (with lpr ref)	Response	Council Response
		<p>the capacity of individual components of the site in relation to individual planning proposals. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>An economic advantage of new development is that new residents can help support local shops and businesses and help to boost the vibrancy and vitality of town and local centres.</p>
Elaine Well (lpr1284)	<p>I wish to lodge an objection to the proposed development of 25000 houses between Upper Bucklebury, the A4 and Floral Way Thatcham.</p> <p>As a resident of Upper Bucklebury for over 30 years I have witnessed, due to the expansion of Thatcham, the gradual deterioration of a beautiful rural village and way of life. Apart from the obvious impact on schools, doctors surgeries, local hospitals, green space, infrastructure, waste recycling and air pollution, I detail below the detrimental effect the expansion of Thatcham has already been felt by Bucklebury residents:-</p>	<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>1. The traffic between Theale and Thatcham via Bradfield Southend, the Avenue of Oaks and Upper Bucklebury has increased 100 fold in recent years reaching 65mph plus regularly. The road surface deteriorates rapidly owing to the size of the lorries now using this avoidance of the A4. This route is also used by Thatcham residents as a short cut to Junction 12 of the M4.</p> <p>2. The traffic from the A4 using Upper Woolhampton and Carbinswood Lane and on through Upper Bucklebury as another rat run to Thatcham has also increased the flow of traffic and deterioration of road surfaces. One has to remember that this is a country lane and accordingly appropriate restrictions should be placed on it, not least of which is vehicle size and permitted speed.</p> <p>3. The volume of traffic noise and pollution already generated by nos 1. and 2. has already reached unacceptable levels at times. Any further increase and Bucklebury will no longer be termed 'rural'. We are already witnessing the decline in birds and wildlife.</p> <p>4. Despite the works carried out at Harts Hill Road Pumping Station, Bucklebury residents continue to experience supply problems from time to time, not to mention the not infrequent power cuts. I can only imagine the impact a further 2500 households will have.</p> <p>5. We are currently in the middle of a Pandemic. The UK is in an economic crisis, businesses are collapsing and there is mass unemployment. Perhaps now is not the time for WBC to be considering such a move when so much financial help will be required to help people restart their lives and businesses.</p> <p>Bucklebury is considered to be an Area of Outstanding Natural Beauty. A quiet country village (albeit not as quiet as it once was) please let it remain so. We have no wish to become part of suburbia and witness the further</p>	<p>highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). Respondent (with lpr ref)	Response	Council Response
		With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.
Stephanie Molloy (lpr1286)	<p>Objection to proposed development of 2500 houses along A4 and Floral Way at Thatcham.</p> <p>I strongly object to the proposal to build 2500 House along the A4 and Floral Way in Thatcham, for the following reasons:</p> <p>1: Reduction in the strategic gap between the settlements of Thatcham and Upper Bucklebury.</p> <p>2: This is allowing urban sprawl - is the plan to join Thatcham, Cold Ash, Upper Bucklebury, Midgham and Woolhampton into one conurbation? Adding 2,500 homes is like adding the town of Hungerford onto the side of Thatcham. What ever happened to not building on the green belt? Many years ago when I told my father I was moving to Thatcham, he said it was a lovely pretty village, surrounded by green fields. I asked him when he was last here. Oh after the war he said! When he came to our then property in Thatcham he could not believe the change and was concerned it was now just part of Newbury. This cannot happen to the rest of Thatcham and it's surrounding villages, especially Upper Bucklebury and Cold Ash.</p> <p>3: Infrastructure impact - Road Traffic - Thatcham is already full of traffic, not just at peak times, adding 2,500 homes, with at least one car (but more than likely two cars per household) will add a minimum of 2,500 cars to the roads. A major increase in traffic along Harts Hill, Coxs Lane, etc., and any other cut through people use as they try to get onto the A4, will be heavily</p>	<p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green</p>

Respondent (with lpr ref)	Response	Council Response
	<p>impacted to the detriment of the roads themselves; lifestyles of those living on those roads and congestion not just at peak times.</p> <p>4: Infrastructure Impact - Railway Crossing - This is already not fit for purpose, having been designed when there was light traffic in the area. No plan to increase any domestic dwellings in Thatcham should go ahead until the crossing situation is fixed.</p> <p>5: Infrastructure Impact - Schools - The suggestion is to build 3 new schools - how many are secondary schools, as Kennet School is already full, and The Downes has changed its catchment area so young people from Upper Bucklebury can go there instead just down the road. Traffic and impact on the neighbouring village schools needs to be seriously looked at too to stop them being overwhelmed and unable to offer places to children of their own village.</p> <p>6. Infrastructure Impact - Doctors - All the Doctors practices are over stretched - not just because of COVID-19 - even with the current triage and use of new technologies it is difficult to get to see a Doctor on the day you need them. This needs to be factored in, in any development plan for Thatcham.</p> <p>7. Infrastructure Impact - Water and Sewage - The local system is being managed on a daily basis by Thames Water. Woolhampton is already full with no plans to increase capacity - what is the situation in Thatcham? An additional 2,500 homes will require a lot of new pipework to get it to Lower Way safely, with months (if not years) of upheaval and disruption to local residents.</p> <p>8. Infrastructure Impact - Rubbish, Landfill and Recycling - We all know this will be impacted, you only have to look at the current situation. What are the plans for doing this correctly and recycling more. Fly tipping on Bucklebury Common is rife and all the good people who go common clearing or litter</p>	<p>infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>The site is not within the Green Belt (there is no Green Belt in this District).</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. 	<p>picking, are only able to scratch the surface as our beautiful village land is used as a rubbish dump.</p> <p>9. West Berkshire declared a climate emergency on 2 July 2019.</p> <p><a href="https://www.westberks.gov.uk/media/48362/Draft-Environment-Strategy-2020-2030-Summarydocument-January-2020-pdf/WBC_Environmental_Strategy_Summary_A4_20.pdf?m=637141844400230000">https://www.westberks.gov.uk/media/48362/Draft-Environment-Strategy - 2020-2030- Summarydocument- January-2020-pdf/WBC_ Environmental_Strategy_Summary_A4_20.pdf? m=637141844400230000</a> WBC - Environment Strategy - with declaration of climate emergency. How will this be mitigated by increased pollution from the construction traffic, increased vehicle pollution due to the inevitable congestion and urbanisation.</p> <p>10. WBC Refusal for Application 15/00296/OUTMAJ Siege Cross Farm Thatcham - The proposal to build 495 dwellings was refused by WBDC, not least for being contrary to the Development Plan, the impact it would have on Education, the Landscape and Visual impact it would have and Planning Obligations. If 495 were refused how can 2,500 be being considered? <a href="https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html">https://www.newburytoday.co.uk/news/news/22093/ very-strong message-to-developers-after-thatcham-appeals-turned-down.html</a></p> <p>11. It would effectively join Upper Bucklebury with Thatcham, which has all but happened at Cold Ash effectively removing the rural aspect of the area. This is actually stated in the WBC documentation (<a href="https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=0">https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=0</a>) page 22, stating “particularly as development of both north east and north Thatcham would result in the loss of the separate identifies of Cold Ash and Bucklebury, and would harm the setting of the AONB settlement pattern”.</p> <p>12. It is a massive over development of the Countryside in one area which consists of rolling hills and farmland. The reason stated is that 85% of West Berks is AONB. WBC have previously built on AONB and AONB status can</p>	<p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p> <p>Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a ‘living document’ and will be updated regularly updated in consultation with infrastructure providers.</p> <p>The site alongside the larger site area, is well related to the existing town of Thatcham. It is in close proximity to a range of services and facilities, including the train station. Thatcham is an urban area with a wide range of services and opportunities for employment, community and education. Development of a strategic nature at this site would support the service provision and regeneration that Thatcham requires.</p> <p>In regards to water supply, the developers are aware of the requirement for upgrades to the water supply network and water treatment works (which is identified in the Water Cycle Study).</p> <p>Should the development go ahead, it would be phased appropriately to ensure it does not outpace delivery of essential network and treatment upgrades (See IDP).</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an integrated</p>

Respondent (with lpr ref)	Response	Council Response
	<p>be changed with government approval, and as it allegedly the government driving this would they not be more open to changing some AONB status ?</p> <p>13. It will completely surround the Crematorium at Thatcham which was placed there to be away from residential properties and has constraints placed on it.</p> <p>14. Have WBC considered the reuse of brownfield sites to house these 2,500 homes? Better use of Thatcham town centre, a review of the use of property should undertaken in light of the changes that have taken place since the COVID-19 disruption.</p> <p>15. Flooding - Remember 20 July 2007? Most of Thatcham was impacted as it is built on a flood plain. If you were to build on the land proposed where does all the water go? If you remember the A4, Midgham and Woolhampton were badly impacted too by this flooding.</p> <p>The proposal is overdevelopment of Thatcham, which is already struggling to cope. It is out of character and will have a detrimental impact for the surrounding villages, the A4 and to the town itself. There is insufficient parking in the town, limited parking at the train station and already almost full train services at peak times into London. Doctors are stretched. Floral Way is used as a way to get round the town, as it is too painful to drive through it, with all the traffic lights. This will only get worse.</p> <p>The surrounding countryside is full of natural beauty, fauna and flora, which should not be disturbed. Walking on the land between Upper Bucklebury and Colthrop last summer, we saw orchids and other wild flowers with plenty of bees and butterflies to feed on them. Do not be responsible for destroying this beautiful habitat.</p>	<p>water supply and drainage strategy which will consider existing related infrastructure on the site.</p> <p>In regards to waste water capacity, the developers are aware of the requirement for upgrades to the water supply network and water treatment works (which is identified in the Water Cycle Study).</p> <p>Should the development go ahead, it would be phased appropriately to ensure it does not outpace delivery of essential network and treatment upgrades (See IDP).</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an integrated water supply and drainage strategy which will consider existing related infrastructure on the site.</p> <p>In relation to the Climate Change Emergency, The emerging draft LPR includes a policy that specifically covers climate change (policy SP5). This requires that all development should contribute to West Berkshire becoming and staying carbon neutral by 2030.</p> <p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs development to the most sustainable locations in the district.</li> <li>• Policy SP6 (Flood Risk) directs development to areas least at risk of flood risk.</li> <li>• Policy SP22 (Transport) requires that any development that generates a transport impact will be required, amongst other things, to have regard to West</li> </ul>

	<p>Reading the BBC News Website today, there is an article by Prof Sir Partha Dasgupta, of the University of Cambridge, who has written a review for the Government. He states:</p> <p>"Truly sustainable economic growth and development means recognising that our longterm prosperity relies on rebalancing our demand of nature's goods and services with its capacity to supply them,". "It also means accounting fully for the impact of our interactions with nature across all levels of society." <a href="https://www.bbc.co.uk/news/science-environment-55893696">https://www.bbc.co.uk/news/science-environment-55893696</a></p>	<p>Berkshire's declared climate emergency and minimise the impact of all forms of travel on the environment.</p> <ul style="list-style-type: none"> <li>• Policy DC3 (Building Sustainable Homes and Businesses) looks at building sustainable homes and businesses,</li> </ul> <p>Any development site will have to comply with the aims and objectives of the plan.</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that 'in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy' (paragraph 67 of the Core</p>

Respondent (with lpr ref)	Response	Council Response
		<p>Strategy Inspector's Report). As additional housing is required, and given Thatcham's status as an 'Urban Area' in the development plan is it considered appropriate to consider Thatcham for housing.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the</p>

		<p>LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p>

Respondent <i>(with lpr ref)</i>	Response	Council Response
		<p>In regards to the development of brownfield sites, when determining which new sites to allocate the Council are only able to consider land that is submitted to them through the HELAA. The HELAA includes brownfield sites that the Council are aware of.</p> <p>The supporting text to policy SP12 (Approach to Housing delivery) of the emerging draft LPR identifies that several sources will ensure a continuous supply of land across the plan period. These include amongst others, existing planning commitments (unallocated sites with planning permission), many of which are brownfield sites.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the</p>

		<p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p>
<p>Alan Evans (lpr1292)</p>	<p>I would like to vehemently object to the ridiculous idea of dumping 2500 houses between Thatcham and Upper Bucklebury.</p> <p>This is totally the wrong place to build what is virtually a new town, Both Thatcham and Upper Bucklebury have absorbed many new houses recently and apart from the odd one or two this should be the lot for this area.</p> <p>The increase in traffic, and pressure on services alone is enough, Our water supply alone has just had a lot of work done including a new pump at the bottom of Hearts Hill Road</p> <p>This took over a year to complete and the pressure is not that great even now.</p> <p>Also I am sure that any residence on that site would not appreciate the emissions from the local Crematorium.</p> <p>The only thing on this site should be agriculture or tree planting to absorb some of the carbon that exists even in this area.</p> <p>Think of the future and drop this stupid idea.</p>	<p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development,</p>

Respondent <i>(with lpr ref)</i>	Response	Council Response
		<p>including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>LPR policies SP5 Responding to Climate Change and DM4 Environmental nuisance and pollution control deal with emissions. The LPR is read as a whole. All LPR policies should be viewed together and not in isolation in the preparation and consideration of planning applications. Development proposals will be judged against all relevant policies. All Development Plan policies will be taken into account in determining planning applications, along with other material considerations in a proportionate manner. The policies in the LPR do not list or cross-refer to all other policies that may be relevant.</p>

Respondent (with lpr ref)	Response	Council Response
Andree Goodall (lpr1293)	<p>As a resident of Upper Bucklebury I would like to register my objections to the proposed 2500 houses along the north side of the A4 and Floral Way Thatcham.</p> <p>My Husband and I moved to Upper Bucklebury in 2006 and have thoroughly enjoyed living in this rural village and community.</p> <p>Whilst I accept the need to develop houses to accommodate the growing population, I feel there are many shortcomings with this proposal.</p> <p><b>My Reasons for Objection are :-</b></p> <ol style="list-style-type: none"> <li>1. This proposal will significantly diminish the rural identity that the residents in the village of Upper Bucklebury currently enjoy.</li> <li>2. The area proposed is an area of outstanding natural beauty that provides wonderful views for residents from the village and surrounding areas.</li> <li>3. There will be a significant loss of farm land in the area</li> <li>4. Wildlife would be significantly impacted by this proposal</li> <li>5. 2500 houses would mean a likely 2500 plus additional cars using the local road network every day, which is already poorly maintained and inadequate for this level of increased use.</li> <li>6. The A4 is currently the main artery connecting Thatcham to Newbury and is already very congested. The additional traffic generated from this proposed development will significantly increase this congestion causing drivers to find alternative routes flushing more traffic through local villages</li> </ol>	<p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. Respondent (with lpr ref)	Response	Council Response
	<p>surrounding villages such as Upper Bucklebury, Cold Ash, Chapel Row and Bradfield.</p> <p>2. These roads already suffer with a high percentage of speeding vehicles. As a resident of Burdens Heath we often see vehicles travelling in excess of 60mph in what is a 30mph zone. The increase in traffic will only worsen the situation and make walking along these roads, which do not have pavements, significantly more dangerous especially when walking our children to school.</p> <p>3. The proposal doesn't address the strains of increased demand on Thatcham train station and the level crossing. The parking facilities at the station are already insufficient to cope with current demand.</p> <p>4. The close proximity of the development to the North Wessex Downs AONB will put an increase strain of this area by having a detrimental impact on all the wildlife that lives in the area. Also, the increase in the number of cars and people visiting the area will have a negative impact on protected species such as the nightjar which live on the common.</p> <p>5. There is already the problem of littering, fly tipping and illegal 4x4 using the byways in Upper Bucklebury. A development of this size will only worsen the problem.</p> <p>6. There is not enough space between the proposed development and Upper Bucklebury and the boundary of the AONB. The village will be basically a part of Thatcham and completely lose its identity.</p> <p>7. The development will significantly increase the noise and light pollution to Bucklebury parishioners.</p> <p>8. There will be a risk of increased flooding with the development.</p>	<p>including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a</p>

		<p>separation and identity of individual settlements will be embedded into the design process.</p> <p>In regards to light pollution, policy DM4: Environmental nuisance and pollution has been strengthened to ensure that all reasonable steps are taken through design, siting and technological solutions to ensure the abatement of obtrusive light to avoid sky glow, glare and light spillage, intrusion and any adverse impact to wildlife. Applicants should adhere to the guidance on lighting provided in the most up to date Institute of Lighting Professionals (ILP) guidance notes, alongside other relevant local documents including the North Wessex Downs AONB 'A Guide to Good External Lighting' (2021).</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR also requires the submission of a lighting strategy.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p>
Rob Chadwick (lpr1296)	<p>I would like to strongly register my objection to the proposed development of the above sites for the following reasons:</p> <p>1. The location of the development on Harts Hill Road will lead to a significant increase in traffic. This increase in traffic will impact many surrounding villages such as Upper Bucklebury, Cold Ash, Chapel Row and Bradfield.</p>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without</p>

Respondent (with lpr ref)	Response	Council Response
	<p>2. These roads already suffer with a high percentage of speeding vehicles. As a resident of Burdens Heath we often see vehicles travelling in excess of 60mph in what is a 30mph zone. The increase in traffic will only worsen the situation and make walking along these roads, which do not have pavements, significantly more dangerous especially when walking our children to school.</p> <p>3. The proposal doesn't address the strains of increased demand on Thatcham train station and the level crossing. The parking facilities at the station are already insufficient to cope with current demand.</p> <p>4. The close proximity of the development to the North Wessex Downs AONB will put an increase strain of this area by having a detrimental impact on all the wildlife that lives in the area. Also, the increase in the number of cars and people visiting the area will have a negative impact on protected species such as the nightjar which live on the common.</p> <p>5. There is already the problem of littering, fly tipping and illegal 4x4 using the byways in Upper Bucklebury. A development of this size will only worsen the problem.</p> <p>6. 		LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.
Sue Dobbins (lpr1298)	<p>I'm writing to provide feedback for the NE Thatcham Development of 2500 homes you are proposing as part of the Local Plan Review (LPR) 2020 - 2037 Emerging Draft December 2020 document. As a resident of Upper Bucklebury, I would like to object to this development proposal for a number of reasons.</p> <p><b>Environmental Impact</b></p> <ol style="list-style-type: none"> <li>1. HELAA concluded that there are “high risk of adverse nature conservation impacts” with “areas of ancient woodland and Local Wildlife Sites adjacent to the site.”</li> <li>2. The proposed development will lead to a huge loss of open space which will have a profound impact on wildlife who will not only be forced into a smaller area, squeezed between Upper Bucklebury and the new development in what will largely be a different (i.e. woodland) habitat, but will also be driven into direct competition with other species - we have considerable biodiversity in Bucklebury, of both flora and fauna, and as the delicate balance continues to be eroded, species will be forced to compete, pushing out many of our less hardy species. This goes against the Defra’s biodiversity 2020 strategy which states: <b><i>The mission for this strategy, for the next decade, is: to halt overall biodiversity loss, support healthy well-functioning ecosystems and establish coherent ecological networks, with more and better places for nature for the benefit of wildlife and people.</i></b></li> <li>3. The development also goes against your Policy DC1 where you state: “<i>Planning permission will not be granted where a proposal harms or undermines the existing relationship of a settlement within the open countryside, where it does not enhance the character and distinctiveness of the rural area, including the special qualities and</i></li> </ol>	<p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council’s website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>Biodiversity net gain was introduced through the NPPF and is referenced in paragraphs 174 d) and 179 b) and the Natural Environment Planning Practice Guidance (PPG) provides further explanation on how this should be done. Mandatory biodiversity net gain is now set out in the Environment Act 2021 and applies in England only through the amendment of the Town &amp; Country Planning Act (TCPA) and is due to be enforced from November 2023. 	<p><i>natural beauty of the landscape of the AONB or where development would have an adverse cumulative impact on the environment or highway safety.”</i></p> <p>4. The Flooding in Thatcham report (2008) that was written following the 2007 floods which affected 1200 homes states: <i>It should also be borne in mind that it isn't just the rain that falls on the built up area of Thatcham that counts. Rain falling to the north, on land between The Ridge and north of the built up area of Thatcham has a major impact. Indeed it was water from this land, draining southward, that largely overwhelmed the drainage system on 20th July 2007.</i> Despite the flood alleviation measure already installed, the proposed development will increase run-off surface water and there are inadequate measures to address this significant risk of flooding.</p> <p><b>Negative Impact on Surrounding Villages &amp; North Wessex Downs AONB</b></p> <p>5. The Bucklebury vision and Bucklebury plan states that there should be a strong greenbelt between Thatcham and Upper Bucklebury. This document is approved and agreed with WBC and should therefore be considered as supplementary planning consideration. This is not mentioned in the LPR.</p> <p>6. In your rejection of the Siege Cross development proposal (Feb 2015) that was for just under 500 dwellings you said yourself: <i>‘The development is contrary to guidance in the relevant landscape character assessments, and therefore fails to protect and enhance the local identity and distinctiveness. The development would erode the identity of Thatcham as being separate to that of the surrounding rural settlements.’</i> Why would this be any different now especially with a proposal five times the size of Siege Cross?</p> <p>7. Despite only minor traffic modelling having been undertaken, it is clear that the new development would cause a huge increase in traffic up Harts Hill road and on the rural network in to the villages of Upper Bucklebury,</p>	<p>measured in ‘biodiversity units’, using a metric which uses habitats as a proxy for biodiversity and calculates units by taking account of the type, extent and condition of habitats. Natural England has recently published biodiversity metric which, subject to further consultation and any further updates, is expected to be the metric specified for mandatory biodiversity net gain.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council’s housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver ‘a network of green infrastructure which will include a new community park linking Thatcham to the AONB.’</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Chapel Row, South End Bradfield and Cold Ash. The impact of this will be more noise and air pollution.</p> <p>8. Upper Bucklebury currently has six street lights. This new development would lead to a huge increase in light pollution – we, like most residents here, chose to live in a village to escape from the significant pollutants that living in a town creates.</p> <p>9. The significant increase in traffic is a safety concern for local residents who already have concerns with speeding through the villages. There are several areas (Burdens Heath, The Ridge and Harts Hill) without pavements and an increase in traffic will make this even more dangerous for pedestrians.</p> <p>10. If there are ever traffic issues on the A4, there is always a noticeable increase in traffic through the village as drivers seek an alternative route to the traffic jams.</p> <p>11. The plans show local shops which could attract some villagers to use these facilities (a further increase in road use) which would have a negative impact on the village shop and if it were to close this would be hugely problematic for villagers who are less mobile and rely on this much needed village convenience.</p> <p>12. Given the proposal for two new primary schools, this could have a profound effect on pupil numbers, and therefore financial viability, of Bucklebury School, the closure of which would be a severe loss to the village.</p> <p>13. Increased use of the Bucklebury Common will cause an increase in litter on the Common and presumably an increase in 4x4 vehicles using the common illegally which is an existing problem here.</p>	<p>adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham’s flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>There is no green belt within this area (or within the District) there will be open space maintained along the northern/north eastern part of the site.</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>14. There is a proposal to build a primary school adjacent to the current crematorium – which is inconsiderate given that the crematorium was built purposefully at the far end of Thatcham to provide peace and tranquillity.</p> <p><b>Inadequate Supporting Infrastructure for Scale of Development</b></p> <p>15. The proposal does not contain any details of a medical centre which would be required for the addition of 2,500 houses – the current healthcare services in the Thatcham area are already oversubscribed. As I understand it, the houses would be built before a new medical centre would be considered meaning that the existing Chapel Row and Burdwood surgeries would be under even more pressure than they already are.</p> <p>16. There is no proposal to address the potential increase in demand for parking at Thatcham train station or additional rail services required to transport more people out of Thatcham each day.</p> <p>17. You state in the Local Plan Review that ‘<i>development would have a very significant impact on the local highway network.</i>’</p> <p>In conclusion, this development is completely unacceptable, lacking in rigour and, to quote a statement written by you in your rejection of Siege Cross – words that are just as relevant, if not more, to this beautiful area you are proposing to destroy: “<i>The proposed development would result in harm to the character and identity of Thatcham and erode the open landscape between Thatcham and Upper Bucklebury.</i>” <b>I strongly urge WPC to reject this proposal.</b></p>	<p>Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that ‘in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy’ (paragraph 67 of the Core Strategy Inspector’s Report). As additional housing is required, and given Thatcham’s status as an ‘Urban Area’ in the development plan is it considered appropriate to consider Thatcham for housing.</p> <p>In regards to light pollution, policy DM4: Environmental nuisance and pollution has been strengthened to ensure that all reasonable steps are taken through design, siting and technological solutions to ensure the abatement of obtrusive light to avoid sky glow, glare and light spillage, intrusion and any adverse impact to wildlife. Applicants</p>

Respondent (with lpr ref)	Response	Council Response
		<p>should adhere to the guidance on lighting provided in the most up to date Institute of Lighting Professionals (ILP) guidance notes, alongside other relevant local documents including the North Wessex Downs AONB 'A Guide to Good External Lighting' (2021).</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR also requires the submission of a lighting strategy. Residents would make use of the newly provided education facilities on the site, which would not be expected to purposefully attract pupils from Bucklebury primary school.</p> <p>In relation to the concerns on the potential impact on Bucklebury Common, the development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population).</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>The site alongside the larger site area, is well related to the existing town of Thatcham. It is in close proximity to a range of services and facilities, including the train station. Thatcham is an urban area with a wide range of services and opportunities for employment, community and education. Development of a strategic nature at this site would support the service provision and regeneration that Thatcham requires.</p> <p>Comments relating to traffic matters have been considered above in this consultation response.</p>

Respondent (with lpr ref)	Response	Council Response
Deborah Reynolds (lpr597)	<p>This response addresses two major documents which have been issued for consultation at the same time. It makes seven recommendations to address weaknesses in Chapters 3, 4 and 5 of the emerging Local Plan and opposes the housing allocation in SP13, especially SP17 North East Thatcham Strategic site. The SP17 proposal is disproportionately big, poorly sited and would have too great an impact on the surrounding population, infrastructure and environment.</p> <p><b>Chapter 3 Shaping West Berkshire Vision and Objectives</b></p> <p>The chapter on 'Our Vision and Strategic Objectives' need to be strong and future proofed.</p> <p>The vision statement in para 3.4 is welcome and that West Berkshire's landscape in the North Wessex Downs will remain of outstanding value and its biodiversity more abundant in settlements and the surrounding countryside.</p> <p>However strategic objectives on Heritage, AONB and Green infrastructure do not spell out a compelling vision for nature. Written strategic objectives on nature are sadly lacking. This means the Council's plan lacks ambition for the future and demonstrates no apparent priority is attached to the natural environment, biodiversity or nature conservation</p> <p>It is remarkable that the clear global concerns on biodiversity, species loss, habitat loss and climate emergency, well-rehearsed in section 5, are so condensed into inanimate, inherited and purely visual aspects of our area. The council should aim do far more to respond to peoples concern that this is not only under threat globally but also imperilled by weakness in their own plans.</p> <ul style="list-style-type: none"> <li>• <b>Recommendation 1 – Add in a new standalone strategic objective on Nature for Future Generations</b></li> </ul>	<p>Although listed in the response here for completeness, comments relating to the 'Vision and Objectives', SP1, SP2, SP11 and SP13 have been considered within the relevant council response policy table and the response has not been repeated in this policy table.</p> <p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government's standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p> <p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>○ Gives a specific means to deliver the vision of abundant biodiversity across the entire area,</li> <li>○ Holds the council to account for concerns of local people on delivery of Section 5 currently called ‘our environment and surroundings’,</li> <li>○ To be measured by conservation of existing assets and the creation of new ones.</li> <li>○ Ensure the necessary means to deliver is recognised, delivered upon and funded in appraisals put forward by developers.</li> </ul> <p><b>Chapter 4 Development strategy – our place based approach</b></p> <p>The spatial strategy SP1 and SP2 and supporting text are important. SP1 states: ‘Thatcham will be a focus for regeneration, for new housing and for improved provision of services and facilities. A new urban extension to the north east of the town will provide a new residential neighbourhood with supporting facilities and green infrastructure (Policy SP17). Opportunities will be taken to maintain and enhance the identity of Thatcham separate to that of Newbury and its surrounding rural settlements’.</p> <p>However the red-lined envelope depicted in the Thatcham growth study fails to address the necessary separation and is in direct contradiction to this strategy. The separation of Newbury and ‘surrounding rural settlements’ from places identified in the development strategy (e.g. Thatcham regeneration) needs to be strengthened in every aspect of Council thinking and policy.</p> <ul style="list-style-type: none"> <li>● <b>Recommendation 2– The LPR must step up and improve its policy, internal and external guidance on separation.</b> The requirement for a strategic gap, to include buffer zones, with recognition of village visions prepared by Parish Councils is essential. It must ensure that sufficient budget is allocated to meaningful strategic separation by developers in their</li> </ul>	<p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However,</p>

Respondent (with lpr ref)	Response	Council Response
	<p>appraisals. Pre-commencement conditions must be set to enforce this.</p> <p>SP2 states the proposed arrangement if an application is deemed to be major development with proximity to the AONB and aspects that further consideration will take account. However the consultation on the Local Plan Review and a simultaneous consultation of a detailed growth study, which is clearly a major development, is a seriously flawed procedure. This is confusing to local people who want to express their views, gives the clear message that the parameters in the plan are already fixed and therefore one or other consultation has a predetermined outcome. In addition the time table for two such large consultations is unfair.</p> <ul style="list-style-type: none"> <li> <b>Recommendation 3 – Complete consultation on the LPR to make the much needed improvements.</b> This should include removal of new allocations on larger sites until after consultation on specific growth studies to ensure the council, residents, developers and other stakeholders have the fairest possible consultation. This must apply to residents impacted by any new proposed SP.         </li> </ul> <p>Spatial strategy SP3 and 4 reflect many aspect of national policy. However there is no evidence that the policy alteration associated with exclusions around AWE Burghfield or Aldermaston have been taken into account centrally, thereby updating the national allocations. Residents can rightly expect the Council to have challenged this at the highest level, including by Judicial Review, before producing a plan B such as the Thatcham development. All the materials in the review predate the dramatic alterations associated with online shopping and the COVID-19 pandemic. Therefore it is clear that the housing allocations are flawed in several respects.</p> <ul style="list-style-type: none"> <li> <b>Recommendation 4 – provide clear evidence of UpToDate national comparable figures for developable land.</b> This must demonstrate that reassessment centrally has been undertaken,         </li> </ul>	<p>a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>demonstrate the impact of this and COVID-19 are all accounted for in the Local plan review. Set demanding targets for conversion of brown field commercial property to residential.</p> <p><b>Chapter 5 Our environment and surroundings – responding to climate change</b></p> <p>There are several important and strategic statements to emphasise here, in particular:</p> <p>'To improve wildlife habitat and species conservation and connectivity to allow for movement in response to climate change in accordance with policy SP11</p> <p>Ecological distinctiveness – design proposals will create habitats and select species that are locally characteristic, taking opportunities to design wildlife habitats into the fabric of buildings and enhance wildlife connectivity in accordance with policy SP11</p> <p>A landscape does not have to have a designation to be valued locally. Outside the AONB, the River Kennet, from Newbury to Reading, lies within a distinctive broad corridor of an open lowland landscape characterised by a variety of wetland habitats including wet meadow, reed bed, and flooded gravel workings.</p> <p>Contribute to biodiversity net gain and seek opportunities to use green infrastructure to extend wildlife corridors, particularly in urban areas and where it contributes to nature recovery networks.</p>	<p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to the concerns on the potential impact on Bucklebury Common, the development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population).</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>Biodiversity net gain was introduced through the NPPF and is referenced in paragraphs 174 d) and 179 b) and the Natural Environment Planning Practice Guidance (PPG) provides further explanation on how this should be done. Mandatory biodiversity net gain is now set out in the Environment Act 2021 and applies in England only through the amendment of the Town &amp; Country Planning Act (TCPA) and is due to be enforced from November</p>

Respondent (with lpr ref)	Response	Council Response
	<p>However the absence of the strategic priority reduces their impact and will not ensure their delivery.</p> <ul style="list-style-type: none"> <li>• <b>Recommendation 5 – In addition to the new proposed Strategic Objective the Council should deliver its ambition by adding a new Chapter - The Nature Delivery Plan - to the document.</b> This must demonstrate the design, commitment and resources it will allocate to Nature for the future generations. This is what residents of the existing and any new houses will expect.</li> </ul> <p><b>Chapter 6 Delivering housing</b></p> <p>SP 13 lists the sites for residential and mixed use in Newbury and Thatcham for sites 1 ha or more. Here it adds in NE Thatcham as SP17 for the first time. This draft local plan review and associated report therefore set out a huge increase in development area and house numbers.</p> <p>There is no justification for such an increase in allocation, and in SP17 the proposal of 2500 houses is completely disproportionate for Thatcham and surrounding areas. In the opinion of Bucklebury Parish Council the figures are flawed and therefore withdrawal for a fundamental review and meaningful justification is essential.</p> <p>The impact on the local setting and breach of the Floral Way boundary, objections raised by the North Wessex AONB, are not addressed. No case has been made for ribbon development and the ‘Colthrop village’ concept is a completely unacceptable joining up of Midgham and Bucklebury Parishes with Thatcham and should be removed from any future considerations.</p> <p>Any housing allocation must demonstrate local benefits to the natural environment.</p> <p>The model for infrastructure provision is dependent on realising house sales, therefore is not ‘baked-in’ or inevitable. A transparent, enforceable</p>	<p>2023. The mandatory requirement is to achieve at least a 10% biodiversity net gain increase from the pre-development biodiversity value. The requirement is framed as a pre-commencement condition, meaning that the biodiversity gain condition must be discharged before development can begin. Prior to the commencement of a development, a biodiversity gain plan must be submitted to the relevant planning authority for approval. The biodiversity gains and losses of a development will be measured in ‘biodiversity units’, using a metric which uses habitats as a proxy for biodiversity and calculates units by taking account of the type, extent and condition of habitats. Natural England has recently published biodiversity metric which, subject to further consultation and any further updates, is expected to be the metric specified for mandatory biodiversity net gain.</p> <p>The LPR is read as a whole. All LPR policies should be viewed together and not in isolation in the preparation and consideration of planning applications. Development proposals will be judged against all relevant policies. All Development Plan policies will be taken into account in determining planning applications, along with other material considerations in a proportionate manner. The policies in the LPR do not list or cross-refer to all other policies that may be relevant.</p> <p>The documents which sit behind the LPR are known as the evidence base and these are technical documents which the Council will use to justify the formation of policy and will form part of the Examination Library when the LPR goes through the LPR. The Thatcham Growth Study is a published document.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>commitment to ensure fair share of profit and investments in local assets is an essential pre-commencement commitment which should be policy for any development.</p> <p>The level of ambition for infrastructure provision and biodiversity gain is insufficient. No budget is allocated to achieving 10% biodiversity gain in the appraisal of viability, the design features do not demonstrate any input from conservation professionals, nationally or locally.</p> <p>Green and biodiverse are not equivalent. The concept, beneficiaries and impact of a new strategic country park are unclear. Any future consideration of the idea must make clear that is outside the area of allocation and protected in perpetuity.</p> <p>If land at 'Colthrop village' is no longer needed for farming it should be entirely devoted to biodiversity net gain and used to establish a fully functional wildlife corridor between the Kennet valley and Bucklebury heathland.</p> <p>Numerous aspects of the Bucklebury vision have been ignored. It is appears that the views of residents on the edge of the proposed area were either not sought or not taken into account.</p> <ul style="list-style-type: none"> <li>• <b>Recommendation 6 – SP13 is unacceptable and needs alteration, particularly removal of the proposed NE Thatcham line item.</b> All the reasons are set out above and in the Bucklebury Parish Council and Thatcham Town Council submissions.</li> </ul> <p><b>SP17 North East Thatcham Strategic site allocation</b></p> <p>SP17 sets out that 'The Council will be supportive of proposals which have regard, and positively respond, to the master-planning work contained in the Thatcham Strategy Growth Study (2020)'. It then lists features the NE Thatcham Strategic allocation may be expected to deliver. However the</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>residents of Bucklebury and Thatcham do not see it that way and their responses should give the Council grave cause for concern. The main objections are listed below:</p> <ul style="list-style-type: none"> <li>• Flawed housing demand analysis</li> </ul> <p>The analysis of housing demand predicating this draft proposal relies on out-of-date information. It fails to take account of the most major medical, social and economic catastrophe to impact our lives in the last 100 years. The Covid – 19 pandemic has transformed the way people work, travel and their housing needs yet this factor is ignored in the proposals. Furthermore, taking WBC’s own housing demand figures, these show a need for less than 1700 homes not the 2500 proposed.</p> <ul style="list-style-type: none"> <li>• Strategic Gap</li> </ul> <p>A tenet of past planning in West Berks has been the maintenance of strategic gaps to separate communities. Until this proposal was tabled, the land north of Floral Way has provided the gap between Thatcham and Bucklebury. The proposal all but eliminates the separation and will visually and socially break natural community boundaries. Breach of the strategic gap has been cited by WBC to refuse planning applications in the recent past. It is incomprehensible that its loss is now proposed.</p> <ul style="list-style-type: none"> <li>• Traffic</li> </ul> <p>A development of the scale proposed will generate considerable traffic but the analysis in the proposal underestimates the volume and impact on the Parish. It is assumed that the bulk of the new traffic will use the A4, accessed via Floral Way. However, the A4 is already overloaded at peak times and new residents will look to find alternative routes. These inevitably will be through the Parish for those looking to access the A34 and the M4. The roads through these villages are ill suited to additional traffic; they are rural, single carriageway roads mostly lacking footpaths and featuring blind</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>bends. Speeding is a well known problem in the Parish and more cars will make a dangerous situation worse. The village roads are used by pedestrians, horses and cycles. Additional traffic makes accidents more likely and will endanger children walking to school.</p> <ul style="list-style-type: none"> <li>• AONB and Bucklebury Common</li> </ul> <p>It is clear that the proposed development to the north-east of Thatcham involving 2500 houses would have a big influence on the local wildlife.</p> <p>The proposed development abuts Bucklebury Common and AONB. This development would have a lasting and negative impact on these special environs. The impacts fall into two categories; those that impact the AONB directly and those resulting from the inevitable increase in visitors. The Common is protected because of its flora, fauna and its situation. It contains remnants of ancient and fragile habitats that are home to rare and protected wildlife. Importantly the plants in and bounding the AONB will suffer and the Common will be put under pressure from additional visitors. The AONB is already witnessing habitat damage from walkers, cyclists and motorised vehicles. The visitor numbers, from the proposed development, would exacerbate damage to a struggling ecology.</p> <p>Bucklebury Common, one of the few remaining areas of lowland heath lies just a kilometre or so to the north-east. It is well known for some special birds in particular the nightjar, but also the woodlark, tree pipit, stonechat and woodcock. These nest on the ground are very susceptible to disturbance especially by dogs. The development would put much more pressure on the heath and make successful breeding of these species much less likely.</p> <p>So the council's attention should focus on this impact of the proposed scheme not highlighted in the Biodiversity and Green infrastructure. Just visible at the north east edge of the plan on page 36 is the edge of Bucklebury Common, the eastern portion of which (east of the settlement of</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>Upper Bucklebury) is an area of lowland heath, which has been restored by conservation management. This site is already subject to considerable recreational pressure. Heathland is a priority habitat identified in the Berkshire Local Nature Partnership Biodiversity Plan, and holds breeding populations of two of the priority species in the plan, Nightjar (<i>Caprimulgus europaeus</i>) and Woodlark (<i>Lullula arborea</i>). Another species on the UK's list of "Red Data" birds, Woodcock (<i>Scolopax rusticola</i>) also occurs, a species which has suffered a dramatic contraction in its UK breeding range (more than 50% in the 25 years to 2010) and numbers. These are ground nesting birds, vulnerable to disturbance. The wider area forms one the Berkshire's Biodiversity Opportunity Areas (BOA), known as Bucklebury Plateau (see - <a href="http://www.tverc.org/cms/sites/tverc/files/Buckleberry%20Plateau%20Description.pdf">http://www.tverc.org/cms/sites/tverc/files/Buckleberry%20Plateau%20Description.pdf</a>)</p> <p>As no doubt the council is aware, lowland heath is a threatened habitat important for a number of species of wildlife. Its global distribution is limited, with the UK having about 20% of the world's remaining area. About 80% of the UK's lowland heath has been lost since 1800. The Thames Basin Heaths of north Hampshire, west Surrey and south east Berkshire are an area of Special Protection (SPA) and now benefit from planning policies requiring the provision of suitable areas of natural greenspace (SANGS) as mitigation for any new residential development within 5 km of the heathland areas.</p> <p>In this case the site would introduce 2500 new households almost all within 2 km of Bucklebury Common, and we consider that mitigating the impact of the increased recreational pressure, and the opportunity to enhance biodiversity should have formed part of the scheme, consistent with current Local Plan Policy CS17, emerging policy SP11 and NPPF paragraphs 170 and 175.</p> <p>The restored area of Bucklebury Common referred to above is currently a relatively small fragment of heathland maintained by voluntary effort. It does though form part of a larger area within the Bucklebury Plateau BOA</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>extending to the west of Upper Bucklebury that has potential for habitat restoration as heathland.</p> <ul style="list-style-type: none"> <li>• <b>Recommendation 7 – remove SP17 from the Local plan review.</b></li> </ul> <p><b>Conclusion</b></p> <p>In summary, I have serious concerns about the emerging draft Local Plan which can be addressed through adoption of the seven listed recommendations. Otherwise the impact on West Berkshire, Thatcham and especially the village of Upper Bucklebury will be very damaging. With increased traffic, a steady flow of visitors the consequential damage to the local environment, the character of our area would change forever and not for the better.</p> <p><b>Response to consultation by West Berkshire Council on Emerging Draft West Berks LPR and Thatcham Growth Study Stage 3 report by David Lock Associates</b></p> <p>This response addresses two major documents which have been issued for consultation at the same time. It makes seven recommendations to address weaknesses in Chapters 3, 4 and 5 of the emerging Local Plan and opposes the housing allocation in SP13, especially SP17 North East Thatcham Strategic site. The SP17 proposal is disproportionately big, poorly sited and would have too great an impact on the surrounding population, infrastructure and environment.</p> <p><b>Chapter 3 Shaping West Berkshire Vision and Objectives</b></p> <p>The chapter on 'Our Vision and Strategic Objectives' need to be strong and future proofed.</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>The vision statement in para 3.4 is welcome and that West Berkshire's landscape in the North Wessex Downs will remain of outstanding value and its biodiversity more abundant in settlements and the surrounding countryside.</p> <p>However strategic objectives on Heritage, AONB and Green infrastructure do not spell out a compelling vision for nature. 	<p>WBC's own housing demand figures, these show a need for less than 1700 homes not the 2500 proposed.</p> <ul style="list-style-type: none"> <li>• Strategic Gap</li> </ul> <p>A tenet of past planning in West Berks has been the maintenance of strategic gaps to separate communities. Until this proposal was tabled, the land north of Floral Way has provided the gap between Thatcham and Bucklebury. The proposal all but eliminates the separation and will visually and socially break natural community boundaries. Breach of the strategic gap has been cited by WBC to refuse planning applications in the recent past. It is incomprehensible that its loss is now proposed.</p> <ul style="list-style-type: none"> <li>• Traffic</li> </ul> <p>A development of the scale proposed will generate considerable traffic but the analysis in the proposal underestimates the volume and impact on the Parish. It is assumed that the bulk of the new traffic will use the A4, accessed via Floral Way. However, the A4 is already overloaded at peak times and new residents will look to find alternative routes. These inevitably will be through the Parish for those looking to access the A34 and the M4. The roads through these villages are ill suited to additional traffic; they are rural, single carriageway roads mostly lacking footpaths and featuring blind bends. Speeding is a well known problem in the Parish and more cars will make a dangerous situation worse. The village roads are used by pedestrians, horses and cycles. Additional traffic makes accidents more likely and will endanger children walking to school.</p> <ul style="list-style-type: none"> <li>• AONB and Bucklebury Common</li> </ul> <p>It is clear that the proposed development to the north-east of Thatcham involving 2500 houses would have a big influence on the local wildlife.</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>The proposed development abuts Bucklebury Common and AONB. This development would have a lasting and negative impact on these special environs. The impacts fall into two categories; those that impact the AONB directly and those resulting from the inevitable increase in visitors. The Common is protected because of its flora, fauna and its situation. It contains remnants of ancient and fragile habitats that are home to rare and protected wildlife. Importantly the plants in and bounding the AONB will suffer and the Common will be put under pressure from additional visitors. The AONB is already witnessing habitat damage from walkers, cyclists and motorised vehicles. The visitor numbers, from the proposed development, would exacerbate damage to a struggling ecology.</p> <p>Bucklebury Common, one of the few remaining areas of lowland heath lies just a kilometre or so to the north-east. It is well known for some special birds in particular the nightjar, but also the woodlark, tree pipit, stonechat and woodcock. These nest on the ground are very susceptible to disturbance especially by dogs. The development would put much more pressure on the heath and make successful breeding of these species much less likely.</p> <p>So the council's attention should focus on this impact of the proposed scheme not highlighted in the Biodiversity and Green infrastructure. Just visible at the north east edge of the plan on page 36 is the edge of Bucklebury Common, the eastern portion of which (east of the settlement of Upper Bucklebury) is an area of lowland heath, which has been restored by conservation management. This site is already subject to considerable recreational pressure. Heathland is a priority habitat identified in the Berkshire Local Nature Partnership Biodiversity Plan, and holds breeding populations of two of the priority species in the plan, Nightjar (<i>Caprimulgus europaeus</i>) and Woodlark (<i>Lullula arborea</i>). Another species on the UK's list of "Red Data" birds, Woodcock (<i>Scolopax rusticola</i>) also occurs, a species which has suffered a dramatic contraction in its UK breeding range (more than 50% in the 25 years to 2010) and numbers. These are ground nesting birds, vulnerable to disturbance. The wider area forms one the Berkshire's Biodiversity Opportunity Areas (BOA), known as Bucklebury Plateau (see</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>- <a href="http://www.tverc.org/cms/sites/tverc/files/Buckleberry%20Plateau%20Description.pdf">http://www.tverc.org/cms/sites/tverc/files/Buckleberry%20Plateau%20Description.pdf</a></p> <p>As no doubt the council is aware, lowland heath is a threatened habitat important for a number of species of wildlife. Its global distribution is limited, with the UK having about 20% of the world's remaining area. About 80% of the UK's lowland heath has been lost since 1800. The Thames Basin Heaths of north Hampshire, west Surrey and south east Berkshire are an area of Special Protection (SPA) and now benefit from planning policies requiring the provision of suitable areas of natural greenspace (SANGS) as mitigation for any new residential development within 5 km of the heathland areas.</p> <p>In this case the site would introduce 2500 new households almost all within 2 km of Bucklebury Common, and we consider that mitigating the impact of the increased recreational pressure, and the opportunity to enhance biodiversity should have formed part of the scheme, consistent with current Local Plan Policy CS17, emerging policy SP11 and NPPF paragraphs 170 and 175.</p> <p>The restored area of Bucklebury Common referred to above is currently a relatively small fragment of heathland maintained by voluntary effort. It does though form part of a larger area within the Bucklebury Plateau BOA extending to the west of Upper Bucklebury that has potential for habitat restoration as heathland.</p> <ul style="list-style-type: none"> <li>• <b>Recommendation 7 – remove SP17 from the Local plan review.</b></li> </ul> <p><b>Conclusion</b></p> <p>In summary, I have serious concerns about the emerging draft Local Plan which can be addressed through adoption of the seven listed recommendations. Otherwise the impact on West Berkshire, Thatcham and especially the village of Upper Bucklebury will be very damaging. With</p>	

Respondent (with lpr ref)	Response	Council Response
	increased traffic, a steady flow of visitors the consequential damage to the local environment, the character of our area would change forever and not for the better.	
Name supplied (lpr1301)	<p>As family residents of Upper Woolhampton (address below), I wish to register my objection to the proposed full development of the above sites for the following reasons:</p> <ol style="list-style-type: none"> <li>1. We were made aware of this application/ consultation by neighbours in Bucklebury and have not received any information or correspondence from West Berks Council (WBC). WBC are in my opinion negligent in this process. To make it a fair process, the consultation period should be extended and ALL residents should be formally written to, included and invited by WBC to comment.</li> <li>2. It is cited in the Bucklebury vision and Bucklebury Plan to maintain a strong greenbelt between Thatcham and Upper Bucklebury. The vision and plan uphold Bucklebury as a rural village community, for the village to remain a predominantly rural AONB. That there is no wish amongst residents to allow growth to change the character and nature of our historic, rural community identity. This document is approved and agreed with WBC and should be included as supplementary planning consideration – yet it is not mentioned in the WBC documentation!?</li> <li>3.. In the NWN the following statement is attributed to Hilary Cole. The council's executive member for housing, Hilary Cole (Con, Cold Ash and Chieveley), has said: "We are very keen to work with the local community because it's such a big proposal and development for Thatcham." However, WBC have clearly not made good enough attempts to engage with local residents – see above points 1 and 2.</li> </ol>	<p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p> <p>There is no green belt within this area (or within the District) there will be open space maintained along the northern/north eastern part of the site.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary</p>

Respondent (with lpr ref)	Response	Council Response
	<p>4. Loss of village identity. There is simply not enough space between the proposed development and Upper Bucklebury and the boundary of the AONB. The village will practically be part of Thatcham (or the Newbury/Thatcham conurbation) and stands to lose its identity as a village. The proposal would effectively join Upper Bucklebury with Thatcham, which has all but happened at Cold Ash effectively removing the rural aspect of the area. This is actually stated in the WBC documentation (<a href="https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=0">https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=0</a>) page 22, stating “particularly as development of both north east and north Thatcham would result in the loss of the separate identifies of Cold Ash and Bucklebury, and would harm the setting of the AONB settlement pattern”.WBC are therefore suggesting that the Parish of Bucklebury should maintain its identity but the proximity of the development is in contradiction to WBC’s own intentions.</p> <p>5. Unacceptable impact on our AONB. According the gov.uk, an AONB has to a combination of several criteria, two of these are:</p> <ul style="list-style-type: none"> <li>• relative wildness, such as distance from housing or having few roads</li> <li>• relative tranquillity, where natural sounds, such as streams or birdsong are predominant</li> </ul> <p>Both of these points stand to be significantly impacted by such a massive nearby development and may no longer be able to be met.</p> <p>6. Increase in traffic pollution and hazards by Bucklebury Common. We moved next to Bucklebury Common to live in the countryside and be away from car, light and noise pollution. Over the 7 years or so we have lived in Upper Woolhampton, we have already noticed a significant increase in traffic on Carbinswood Lane by Bucklebury Common. The introduction of such a huge development to the area would necessarily increase traffic pollution, cause additional road hazards ( a number of neighbours have sadly lost dogs on the road hit by speeding cars and local wildlife, including snakes,</p>	<p>infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that ‘in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy’ (paragraph 67 of the Core Strategy Inspector’s Report). As additional housing is required, and given Thatcham’s status as an ‘Urban Area’ in the development plan is it considered appropriate to consider Thatcham for housing.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be</p>

Respondent (with lpr ref)	Response	Council Response
	<p>have been run over) and cause significantly more disturbance to the residents and nature, on what are rural country unmarked roads and lanes.</p> <p>7. Increase in traffic on the route into Thatcham and Newbury and towards the station, which are already heavily congested at busy times. When there are even minor traffic delays/congestion on the main roads, drivers resort to the rural routes which are simply not designed for these increased traffic volumes. An increase in houses in the area stands to significantly increase the traffic volume on our rural roads that are not designed for any increase in traffic volume (nor should they ever be!)</p> <p>8. Increase in traffic and increased potential of speeding through Upper Bucklebury, which is of a major concern due to the primary school and many family residents with children (and pet dogs/ cats). With an increase in traffic, which could be as much as 10%, this will only worsen the situation.</p> <p>9. Impact on Nature. We have seen a number of protected species including the great crested newt, adder, slow worm and bats in and around Bucklebury Common. There are also birds such as the nightjar, which are under conservation concern. We fear increased numbers of cars and people visiting the area of outstanding natural beauty will have a large negative impact. Wildlife like this needs to be protected and not put under more threat. The development to the south of Blacklands Copse and Harts Hill Copse will mean open space dramatically reduced and wildlife forced to retreat, adding more pressure on species in decline. Over the last 7 years we have seen a significant increase in the litter in and around the Common and fly tipping in the area. Bringing significantly more people to the area stands to cause more problems like this and more damage to what is already a fragile ecosystem.</p> <p>10. The proposal is an over development of the countryside of rolling hills and farmland and also stands to overdevelop Thatcham. This proposed over development is out of character for the area plans and will have a detrimental impact for the town itself as well as the surrounding villages.</p>	<p>published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Thattham is at capacity as it. Pre-covid, it was often hard to find a parking space in the town centre, doctors/dentists are apparently stretched, there's limited parking at the train station and already almost full train services at peak times into London. Not to mention the traffic delays around the crossing. There is no evidence that the development will enhance Thattham town centre (or indeed Newbury).</p> <p>11. A previous application was resoundingly rejected by the secretary of state in 2017 <a href="https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html">https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html</a>. Why, only a few years after this, are WBC now considering this site in light of the previous rejection, what has changed? Knowing a smaller planning application has been refused once and that there is clearly significant local objection again, why have massive funds been spent pursuing it?</p> <p>12. Why have WBC and Thattham council used a great deal of tax payers money in completing many surveys and writing an 800 page report, before going to consultation on the proposal?</p> <p>13. The proposed development will completely surround the Crematorium at Thattham which was, as I understand, placed there to be away from residential properties and has constraints placed on it.</p> <p>14. It is stated/assumed this will help the Upper Bucklebury Business – predominantly the Pub and Shop. One pub and shop is hardly justification for a development this size. One thing we love about living in Bucklebury is that there is only one shop and one pub where the community enjoy getting together.</p> <p>15. Bringing more houses and cars to the area will significantly increase the noise and light pollution to a predominantly rural, peaceful area where people live to escape from developments like the the one proposed.</p> <p>16. The HELAA was updated in December 2020 to take account of factual</p>	<p>package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thattham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land</p>

Respondent (with lpr ref)	Response	Council Response
	<p>inaccuracies. What evidence can WBC produce to prove everything stated in the consultation document is still factually correct?</p> <p>17. Schooling – this will obviously have an impact on local schools (and traffic). Many local families are very concerned that the proposal could overwhelm the brilliant local village schools that currently attract a good number of pupils and maintain a good balance of class sizes. Just because the plans include new schools, it does not mean that new families moving to the area will necessarily choose them. Many may well prefer to try for places at the existing, sought-after, traditional village schools, causing increased class sizes, over-stretching of school resources, increased cars, traffic, people and disruption to small rural villages.</p> <p>18. West Berkshire declared a climate emergency on 2 July 2019. <a href="https://www.westberks.gov.uk/media/48362/Draft-Environment-Strategy-2020-2030-Summary-document-January-2020-/pdf/WBC_Environmental_Strategy_Summary_A4_20.pdf?m=637141844400230000">https://www.westberks.gov.uk/media/48362/Draft-Environment-Strategy-2020-2030-Summary-document-January-2020-/pdf/WBC_Environmental_Strategy_Summary_A4_20.pdf?m=637141844400230000</a> WBC - Environment Strategy - with declaration of climate emergency. Building 2500 new houses will certainly increase the WBC carbon footprint and goes against the emergency/accelerated goal of carbon neutrality and "protecting and enhancing our natural environment" P5. Increased pollution will certainly be created by the entire construction process, increased light pollution from the development and more cars will bring increased vehicle pollution and noise pollution to our rural area. There are seemingly NO environmental advantages of building a massive development in rural area. A large development can only bring negative environmental impact and therefore goes against the intent, statement and purpose of the WBC environmental strategy.</p> <p>19. The plan suggests the provision of a "country park". There appears to be no budget available for this</p>	<p>to meet the impact of the development. Additional school provision is included in the IDP.</p> <p>In relation to the Climate Change Emergency, The emerging draft LPR includes a policy that specifically covers climate change (policy SP5). This requires that all development should contribute to West Berkshire becoming and staying carbon neutral by 2030.</p> <p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs development to the most sustainable locations in the district.</li> <li>• Policy SP6 (Flood Risk) directs development to areas least at risk of flood risk.</li> <li>• Policy SP22 (Transport) requires that any development that generates a transport impact will be required, amongst other things, to have regard to West Berkshire's declared climate emergency and minimise the impact of all forms of travel on the environment.</li> <li>• Policy DC3 (Building Sustainable Homes and Businesses) looks at building sustainable homes and businesses,</li> </ul> <p>Any development site will have to comply with the aims and objectives of the plan.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. The updated version of the proposed allocation policy in the next published version of the LPR</p>

Respondent (with lpr ref)	Response	Council Response
		<p>will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>The site alongside the larger site area, is well related to the existing town of Thatcham. It is in close proximity to a range of services and facilities, including the train station. Thatcham is an urban area with a wide range of services and opportunities for employment, community and education. Development of a strategic nature at this site would support the service provision and regeneration that Thatcham requires.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>
Liam Lyon (lpr1303)	<b><u>I would like to strongly register my objection to the proposed 2,500 houses in Thatcham:</u></b>	In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA

Respondent (with lpr ref)	Response	Council Response
	<p>1. <b>Traffic Increase.</b> Upper Bucklebury already suffers from speeding traffic as it is seen as an <b>alternative to the A4</b>. Putting <b>traffic lights</b> in will force cars onto the <b>minor roads</b>. Current minor roads are unable to take this <b>extra load</b>. It is already quicker to drive around Thatcham than through it on the A4.</p> <p>2. <b>Development Location.</b> Why build a huge development on the <b>wrong side of Thatcham</b> if most of the traffic needs to travel in the Newbury direction.</p> <p>3. <b>Destruction to AONB.</b> Building so many houses near the woodland will surely cause this area to be destroyed by over use. Already there is pressure on the woodland environment with the current usage by walkers/cyclist/quad-bikers/4*4 vehicles etc.</p> <p>3. <b>Greenbelt.</b> WBC previously approved a Bucklebury Plan that agreed to maintain a strong greenbelt between Thatcham and Upper Bucklebury. The development goes against this completely and would effectively merge Upper Bucklebury with Thatcham.</p> <p>4. <b>Communication.</b> WBC has failed to communicate this proposal to the residents of the local area and have used underhand tactics to try and get this through during lockdown when residents have fewer ways to organise themselves and protest about the changes.</p> <p>5. <b>Pollution.</b> Light pollution, noise pollution and air pollution will all increase.</p> <p>6. <b>Flooding.</b> Building on this site will no doubt present an increase flooding risks due to the hillside nature of this development.</p>	<p>report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>7. <b>Recreation area.</b> The recreation areas being proposed will only have limited use because it is a hillside development. EG. I can't see children being able to play football too easily on a sloped pitch.</p> <p>8. <b>Healthcare services.</b> There is no provision for the extra demand for GP surgeries.</p> <p>9. <b>Thatcham Station.</b> There is no provision for the extra traffic around Thatcham station (including parking at the station)</p> <p>10. <b>Thatcham Town centre.</b> The plan makes no provision for Thatcham Town centre which is in desperate need for a redevelopment plan.</p> <p>11. <b>Greenfield v Brownfield.</b> Why build on a green field site when other brownfield sites would be more suitable for redevelopment.</p> <p>12. <b>Housing Density/Size.</b> Why does this plan have to have such a huge housing density and size? The argument that 3 schools will be built is just not enough to justify this development in its current plan.</p> <p>13. <b>Harts Hill Road.</b> Harts Hill Road will be unable to cope with this development size. Putting traffic lights in is no solution to the problem. The problem is too many houses with a high density.</p> <p>14. <b>A4 Only Reduced development site considered.</b> The development should be at least scaled down and moved down to the A4 where the impact on the environment will be reduced and traffic problems managed better.</p> <p>15. <b>Pandemic Office Space Changes.</b> As a result of the global pandemic, office space will be in excess supply as people will now be working from home, even after the pandemic is over. This office space could well be converted into housing and needs to be factored in to the housing plan.</p>	<p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>The site is not within the Green Belt (there is no Green Belt in this District).</p> <p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation</p>

Development of a strategic nature at this site would support the service provision and regeneration that Thatcham requires.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>In regards to the development of brownfield sites, when determining which new sites to allocate the Council are only able to consider land that is submitted to them through the HELAA. The HELAA includes brownfield sites that the Council are aware of.</p> <p>The supporting text to policy SP12 (Approach to Housing delivery) of the emerging draft LPR identifies that several sources will ensure a continuous supply of land across the plan period. These include amongst others, existing planning commitments (unallocated sites with planning permission), many of which are brownfield sites.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>An economic advantage of new development is that new residents can help support local shops and businesses and help to boost the vibrancy and vitality of town and local centres.</p> <p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government's standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states:</p>

Respondent (with lpr ref)	Response	Council Response
		<p>To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p> <p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p> <p>In relation to the plan being prepared prior to the coronavirus pandemic, the full impact of the COVID 19 pandemic will not be fully apparent for some time. The LPR is a long term strategy to 2039, during which time a review will be conducted every 5 years. The impact of changes in response to macro and local economic factors will be</p>

		assessed through subsequent reviews, once such implications are realised.
Geoff and Ruth Mahoney (lpr1302)	<p>We wish to register our objections to the application for house building on the agricultural land between Upper Bucklebury and the A4/Floral Way, Thatcham.</p> <p>It is wrong to build on agricultural land, which once built on can never be used in the future for food production or as amenity. Our children and children's children will be the ones affected most and we should consider our legacy.</p> <p>Its impact on traffic levels, already under great strain, will be unacceptable.</p> <p>Thatcham is already over-developed with no proper infrastructure to support another large development.</p> <p>This area acts as a green belt to Thatcham and is desperately needed to counter air pollution.</p> <p>Please reconsider, and turn down this application.</p>	<p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential</p>

Respondent (with lpr ref)	Response	Council Response
		<p>delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The site is not within the Green Belt (there is no Green Belt in this District).</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p>
Jermei Shearn (lpr1304)	<p>I want to provide my feedback on the proposed 2500 development in Thattham.</p> <p>The development raises a number of concerns which I want to provide my feedback on:</p> <p>Healthcare - there seems to be no provision of any healthcare. The current facilities are fully stretched today without this huge influx of people.</p> <p>Travel - there will be a significant increase in traffic. The A4 can't deal with the current volume and often tails back whether going towards junction 12 or into Newbury.</p> <p>Level crossing - it can regularly take 20+ minutes to cross the level crossing and traffic backs up massively in all directions. The proposed traffic increase</p>	<p>Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>The site alongside the larger site area, is well related to the existing town of Thattham. It is in close proximity to a range of services and facilities, including the train station. Thattham is an urban area with a wide range of services and opportunities for employment, community and education. Development of a strategic nature at this site would support the service provision and regeneration that Thattham requires.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA)</p>

Respondent (with lpr ref)	Response	Council Response
	<p>of just 5% is simply not realistic as many extra people will be travelling to London.</p> <p>Parking - there is insufficient parking at the station today and this will become a huge problem going forward.</p> <p>Infrastructure services - the current infrastructure struggles to deal with demands e.g problems again this week with water provision to Upper Bucklebury. Broadband is always an issue.</p> <p>Traffic through rural villages - traffic volume will increase through rural villages. Current “calming” measures simply don’t work. What will be done to protect these communities and ensure people’s ongoing safety?</p> <p>Schools - what’s the plan around building additional schooling capacity? All existing schools are over stretched and there’s no clarity on when new schooling capacity will come into effect.</p> <p>Overall, this is a massive impact on a rural environment and I would urge WBC to reconsider the scale and impact of this development as it will have a massive impact on the environment for all.</p>	<p>report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. Elizabeth Collacott (lpr1315)	I am writing to voice my objection to the proposed development of green space from Lawrence's Lane along Floral Way in Thatcham. I am told the plan is to build 2500 new homes there. This is a terrible idea for our area as we keep losing so much green space. We need areas to take walks with our dog and our family which don't require getting in the car. These developments affect pollution, wildlife, school places, overcrowding of our roads and the lack of infrastructure in place locally to support such a development. Mainly, though, we don't want our environment so built up. We need to protect our green space. Therefore we ask that you listen to the people that live in this area. We don't want this development. You are ruining our home.	<p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Respondent (with lpr ref)	Response	Council Response
		<p>18 consultation to strengthen the Council’s policy on pollution.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council’s website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential</p>

Respondent (with lpr ref)	Response	Council Response
		<p>delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>
Andrea Varney (lpr1317)	<p>I would like to formally register my objection to the proposed development of 2500 houses at NE Thatcham for the following reasons:</p> <ol style="list-style-type: none"> <li>1. It will dramatically reduce the greenbelt between Thatcham and Upper Bucklebury.</li> <li>2. The rural nature of this area would be completely lost with Upper Bucklebury becoming part of Thatcham.</li> <li>3. It would be a massive over development of our beautiful countryside in an area which consists of rolling hills and farmland. If</li> </ol>	<p>The site is not within the Green Belt (there is no Green Belt in this District).</p> <p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for</p>

Respondent (with lpr ref)	Response	Council Response
	<p>developments of this scale are approved there will not be any open rural areas left for future generations to enjoy.</p> <ol style="list-style-type: none"> <li>4. The proposed land is not particularly suitable for development as it is very hilly land and has had issues as a flood plain area.</li> <li>5. The view that Thatcham is best placed to take a development of this size in this location is misplaced, un-proven and ill-conceived.</li> <li>6. This development will have a significant impact on traffic levels and the associated pollution throughout the area, especially increasing: <ol style="list-style-type: none"> <li>1. Traffic and speeding through Upper Bucklebury, which is already a significant and serious concern, especially as we have children who walk along this road to the Primary School.</li> <li>2. Traffic from Thatcham through Upper Bucklebury to Chapel Row on roads which are not designed for large traffic volumes.</li> <li>3. Traffic on the route into Thatcham and Newbury. These roads approaching the station are already heavily congested at busy times and in the event of any minor traffic disruption.</li> </ol> </li> <li>7. It will significantly increase the noise and light pollution to the Bucklebury residents. There are no street lights in Upper Bucklebury.</li> <li>8. There is no evidence that this development will enhance Thatcham town centre (or the area in general).</li> <li>9. It is not likely to attract new businesses to the area or create or significantly increase employment.</li> <li>10. The local shop and pub are unlikely to benefit. The local shop is under significant threat as the new development includes retail.</li> <li>11. This level additional of housing will inevitably have an adverse impact on local facilities, schooling, medical and welfare services</li> </ol>	<p>additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>The Local Plan Review Regulation 18 consultation is one of the consultation stages in the preparation of the Local Plan. Following the consultation all representations will be considered and responded to prior to another round of consultation. The document will then be submitted to the Secretary of State and will be considered by an Inspector known as an Examination in Public. If the Inspector finds that the document is sound, the Local Plan Review can be adopted by the Council.</p> <p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p> <p>The site is not within the Green Belt (there is no Green Belt in this District).</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be</p>

Respondent (with lpr ref)	Response	Council Response
		<p>appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that ‘in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy’ (paragraph 67 of the Core Strategy Inspector’s Report). As additional housing is required, and given Thatcham’s status as an ‘Urban Area’ in the development plan is it considered appropriate to consider Thatcham for housing.</p>
Dave Smith (lpr1316)	<p>I want to register my strong objection to the planning for north Thatcham on the grounds that there is insufficient infrastructure existing, or planned, to overcome it.</p> <p>Principally I see the main issue that the railway crossing situation has not been solved, and until such time as a pragmatic, and approved (!) solution is made for this I will strongly object to any further development. It should have been solved during the last 15yrs since Kennet Heath came into being.</p>	<p>Concern regarding infrastructure provision is noted. Stephen Paice (lpr1328)	<p>I would like to strongly register my objection to the proposed full development of the above sites for the following reasons. These reasons will be similar to other objections, but I agree with every one of them.</p> <ol style="list-style-type: none"> <li>1. The Vast majority of Upper Bucklebury residents are against this development, many have already registered their objections, however many are not aware of the application or consultation as no information has been sent out by WBC. WBC are in my opinion negligent in this process and the consultation period should be extended and all residents should be formally written to.</li> <li>2. It is cited in the Bucklebury vision and Bucklebury Plan to maintain a strong greenbelt between Thatcham and Upper Bucklebury. This document is approved and agreed with WBC and should be considered as supplementary planning consideration. It is not mentioned in the WBC documentation.</li> </ol>	<p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council’s Statement of Community Involvement (SCI), on the Council’s website and in the local press and via notification emails to those registered on the Council’s consultation database.</p> <p>There is no green belt within this area (or within the District) there will be open space maintained along the northern/north eastern part of the site.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>3. It would effectively join Upper Bucklebury with Thatcham, which has all but happened at Cold Ash effectively removing the rural aspect of the area. This is actually stated in the WBC documentation (<a href="https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=0">https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=0</a>) page 22, stating <b>“particularly as development of both north east and north Thatcham would result in the loss of the separate identifies of Cold Ash and Bucklebury, and would harm the setting of the AONB settlement pattern”</b>.</p> <p>WBC are therefore suggesting that the Parish of Bucklebury should maintain its identity but the proximity of the development is in contradiction to WBC’s own intentions.</p> <p>4. A previous application was rejected by the secretary of state in 2017 <a href="https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html">https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html</a>. Why are WBC now considering this site in light of the previous objection, what has changed and knowing this has been refused once why have massive funds been spent thus far ?</p> <p>5. It is a massive over development of the Countryside in one area which consists of rolling hills and farmland. The reason stated is that 85% of West berks is AONB. WBC have previously built on AONB and AONB status can be changed with government approval, and as it allegedly the government driving this would they not be more open to changing some AONB status ?</p> <p>6. In the NWN the following statement is attributed to Hilary Cole.</p> <p>The council’s executive member for housing, Hilary Cole (Con, Cold Ash and Chieveley), said: <i>“We are very keen to work with the local community because it’s such a big proposal and development for Thatcham. “We have taken a conscious decision to do this around Thatcham so it will deliver the infrastructure we need. “We feel that Thatcham is best placed to take a development of this size.”</i></p>	<p>continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that ‘in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy’ (paragraph 67 of the Core Strategy Inspector’s Report). As additional housing is required, and given Thatcham’s status as an ‘Urban Area’</p>

Respondent (with lpr ref)	Response	Council Response
	<p>I have two specific issues to object to on these statements made. Firstly WBC have done very little if any to work with local residents – see above points and secondly Ms Cole’s statement infers that the decision is made, so why is so called consultation being held ?. Because of this she should resign.</p> <ol style="list-style-type: none"> <li>7. WBC and Thatcham councils have wasted a great deal of tax payers money in completing many surveys and writing an 800 page report, effectively making this a fait accompli, before going to consultation on the proposal.</li> <li>8. It will have a significant impact on traffic in the area and especially on the route into Thatcham and Newbury and towards the station which are already heavily congested at busy times and in the event of any minor traffic disruption.</li> <li>9. This will significantly impact the freight traffic using the industry site at Thatcham</li> <li>10. It will significantly increase the traffic on the back route (rat runs) which are not designed for large traffic volumes.</li> <li>11. Traffic and speeding in particular through Upper Bucklebury is of a major concern due to the primary school. With an increase in 10% this will only worsen the situation.</li> <li>12. It will completely surround the Crematorium at Thatcham which was, as I understand, placed there to be away from residential properties and has constraints placed on it.</li> <li>13. It is stated/assumed this will help the Upper Bucklebury Business – predominantly the Pub and Shop. The Pub is hardly likely to benefit as a) pub usage across the country is in decline b) the Pub at the bottom of Harts Hill cannot already sustain a business. One pub is hardly justification for a development this size. The shop is also likely to suffer as the plan indicate that shops will be included, so it is likely it would have a detrimental impact on the only shop in UB, creating more traffic.</li> <li>14. It is cited that there cannot be development on the Kennet flood plain, however there are multiple examples where this has already been done (most of Thatcham was originally a flood plain), this is</li> </ol>	<p>in the development plan is it considered appropriate to consider Thatcham for housing.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a ‘masterplan’ / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA</p>

Respondent (with lpr ref)	Response	Council Response
	<p>extremely hilly land which is almost certainly as unsuitable to development as the flood plain.</p> <p>15. It will significantly increase the noise and light pollution to the Bucklebury Parishioners – there are no street lights in Upper Bucklebury.</p> <p>16. There is no evidence that this will enhance Thatcham town centre (or indeed Newbury). The development of the old Army Base by the Station didn't add any amenities and we have seen the slow decline of the town centre over the last 20 years despite the area growing.</p> <p>17. The HELAA was updated in December 2020 to take account of factual inaccuracies – who is to say that the same people who have made the assessment of this site don't have their facts right in this document or this time. What evidence can WBC produce to conclude everything stated is factually correct.</p> <p>18. Schooling – this will obviously have an impact on local schools (and traffic). Current indications are that KS1 children volumes are decreasing yet the plan includes a proposal for 3 new schools. When would this be built before or after the houses ? Build it before and it will poach children from local schools, such as Upper Bucklebury which will make that unsustainable (as is happening in Newbury with the new school on the college site). Build it after and the local schools will be overwhelmed beforehand. If the development is spread across the region there is a much greater chance of the load being spread out.</p> <p>Please refuse permission for this development. It would, in effect, add the equivalent of Hungerford onto the edge of Thatcham, but without any infrastructure to support it.</p>	<p>report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These</p>

Respondent (with lpr ref)	Response	Council Response
		<p>policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council’s policy on pollution.</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p> <p>In relation to the Climate Change Emergency, The emerging draft LPR includes a policy that specifically covers climate change (policy SP5). This requires that all development should contribute to West Berkshire becoming and staying carbon neutral by 2030.</p> <p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs development to the most sustainable locations in the district.</li> <li>• Policy SP6 (Flood Risk) directs development to areas least at risk of flood risk.</li> <li>• Policy SP22 (Transport) requires that any development that generates a transport impact will be required, amongst other things, to have regard to West Berkshire’s declared climate emergency and minimise the impact of all forms of travel on the environment.</li> </ul>

Respondent (with lpr ref)	Response	Council Response
		<ul style="list-style-type: none"> <li>• Policy DC3 (Building Sustainable Homes and Businesses) looks at building sustainable homes and businesses,</li> </ul> <p>Any development site will have to comply with the aims and objectives of the plan.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>The site alongside the larger site area, is well related to the existing town of Thatcham. It is in close proximity to a range of services and facilities, including the train station. Thatcham is an urban area with a wide range of services and opportunities for employment, community and education. Development of a strategic nature at this site would support the service provision and regeneration that Thatcham requires.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>
James McDonald (lpr1331)	<p>I write to set out my strong objection to the proposed development of up to 2,500 houses at North Thatcham. My objection, explained further below, is based upon:</p> <ul style="list-style-type: none"> <li>• The unacceptable damage to wildlife and fragile habitats in the surrounding area, and the plan demonstrates a lack of regard for responsible actions during the climate crisis</li> <li>• The unmitigated risk of damage and destruction to the Area of Outstanding Natural Beauty</li> <li>• The lack of adequate infrastructure to support development of this massive scale</li> <li>• The inevitable loss of community environments and identities should this development be tragically allowed to proceed</li> </ul> <p><b>Damage to wildlife and fragile habitats</b> The scale of development set out in the plan would cause catastrophic damage to local wildlife and fragile habitats. West Berkshire Council has a duty of care to support and enhance the local natural environment, and it would be negligent for the Council to consider pursuing this development on the basis of the damage it would cause to local ecosystems.</p> <p>The scale of the proposed development, up to 2,500 houses, would deliver a material increase in air pollution. Whilst the plan notes that environmentally friendly energy options will be favoured, it offers no commitments to implementing these measures, or any reliable analysis of the impact on air</p>	<p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>quality. The risk of a substantial degradation of air quality is inadequately evaluated and wholly unmitigated in the plan.</p> <p>In addition, this number of new homes would deliver a material increase in light pollution. The local area is known for its dark nights, and is home to a variety of nocturnal species including bats and owls. This scale of light pollution would cause distress, displacement and death to such creatures, at a time when their natural habitats are being destroyed across the country and many of them are becoming endangered as they battle with the effects of human pollution and destruction on a massive scale. Again, this risk is inadequately evaluated and wholly unmitigated in the plan.</p> <p>Further, the development would require the clearing of greenery, removal of hedgerows and deforestation of large open spaces. At a time when the climate crisis impact is clearly visible, with disrupted weather patterns and increased flooding as local evidence of this impact, for the Council to consider destroying valuable natural environments that can help to reduce carbon dioxide levels and offset part of our impact on the environment is unacceptable. The suggestion of a “country park” set out in the plan is completely inadequate and demonstrates a total lack of regard for the impact we have on our planet.</p> <p>The horrific consequences on local wildlife and habitats should be sufficient evidence alone for the Council to abandon this proposal.</p> <p><b>Damage and destruction to the Area of Outstanding Natural Beauty (AONB)</b></p> <p>In addition to the pollution and destruction of habitats noted above, an increase in the local population of this scale, and associated increase in visitors, will do further damage to the AONB.</p> <p>In Upper Bucklebury, and surrounding areas, the impact of visitors is clearly evident in the local environment. Walkers, cyclists and illegal off-roading vehicles put the local area under significant pressure, and a material increase in the local population would be to the further detriment of the</p>	<p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a ‘masterplan’ / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In regards to light pollution, policy DM4: Environmental nuisance and pollution has been strengthened to ensure that all reasonable steps are taken through design, siting and technological solutions to ensure the abatement of obtrusive light to avoid sky glow, glare and light spillage, intrusion and any adverse impact to wildlife. Applicants should adhere to the guidance on lighting provided in the most up to date Institute of Lighting Professionals (ILP) guidance notes, alongside other relevant local documents including the North Wessex Downs AONB ‘A Guide to Good External Lighting’ (2021).</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR also requires the submission of a lighting strategy.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>AONB. The Council has a responsibility to “conserve and enhance” the AONB. A development of this scale, on the edge of the AONB, when the area’s wildlife and environment is already under visibly evident pressure, would contribute to further damage and destruction of the AONB. Further consideration of this development would therefore be a failure of the Council to fulfil that responsibility.</p> <p><b>Lack of adequate infrastructure</b> Thatcham and its surrounding villages are reliant on limited infrastructure that has not kept pace with recent developments, and cannot bear the pressures of a significant population increase. The A4 is a small and limited-capacity route used by a significant number of vehicles, and this regularly results in significant delays. Alternative routes, such as Harts Hill Road into Upper Bucklebury, is a narrow road with no pavement for pedestrians, that would inevitable see significantly more traffic as a cut through to get to Reading and other centres of employment. This would cause destruction of the local environment as outlined above, and be dangerous to the inhabitants, particularly children, of these surrounding villages. The increased level of traffic through surrounding villages would be to the significant detriment of the residents of those villages, and this impact has not been adequately considered in the plan.</p> <p>Public transport in the area is limited. A significant proportion of the inhabitants of the proposed development would need to travel for employment in Newbury, Reading, London and other nearby employment centres. The lack of public transport would therefore generate further road traffic, and increase the pressure on existing public transport. The railway station is limited in scale and capacity, with little parking that is essential for residents of the surrounding villages who have no alternative method to get to the train station.</p> <p>The plan demonstrates a lack of vision or appreciation for the transport requirements to support such a development, and the impact of increased traffic on the surrounding villages is unacceptable.</p>	<p>LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a ‘living document’ and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>Thatcham is an ‘Urban Area’ as set out in the spatial strategy (for the existing Core Strategy and in the LPR),</p>

Respondent (with lpr ref)	Response	Council Response
	<p><b>Loss of community environments and identities</b> Each of the villages in the area, Upper Bucklebury included, has a strong community environment and distinct identity. West Berkshire Council have previously committed to maintaining these identities through planning policies to ensure distinct boundaries are retained. The scale of the proposed development between Thatcham and Upper Bucklebury does not maintain this boundary, and the proposed development disregards the firm commitments previously made by the Council.</p> <p>In order to retain the trust of local residents, the Council needs to honour the commitments it has made previously to safeguarding the identities of local villages. In order to do this, the Council needs to identify alternative development sites away from this area, and abandon the proposal for North Thatcham.</p> <p>I therefore urge West Berkshire Council to terminate any plans to develop the sites to the north of Thatcham, seek alternative sites away from this area and the AONB for any future developments, and make a public commitment to end any further development in this area.</p> <p>Terminate any plans to develop the sites to the north of Thatcham, seek alternative sites away from this area and the AONB for any future developments, and make a public commitment to end any further development in this area.</p>	<p>which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p>
Jonathan Alderman (lpr551)	<p>I only support SP17's policy inclusion of the following item: "On-site renewable energy to assist in the delivery of a carbon neutral development" IF the chosen technology is capable of demonstrating its Green credentials.</p> <p>I do not support CHP plants burning plastic or waste wood, i.e. high CO2 emission fuel, as their feedstock.</p> <p>These types of electricity generation plants also rely on their feedstock being delivered by HGV, which could be as many as 20 HGVs daily, every day of the year during the lifetime of the plant. These HGVs are also a source of</p>	<p>Considered and noted, the emerging draft LPR includes a policy that specifically covers climate change (policy SP5). This requires that all development should contribute to West Berkshire becoming and staying carbon neutral by 2030.</p> <p>In addition, all aspects of the local plan are targeting achieving zero carbon. As a strategic level study the LCA assessed the site as a single tract of landscape and so</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• It is to be located on land that in 2007 was the source &amp; route for catastrophic flooding of the old Sony site (by then SSE) which by repute totalled c £6M of damage. The green sward of these fields is essential to absorbing water and holding water to avoid similar deluges across the A4 to the south in future.</li> <li>• As a strategic plan it is a failure. Thought has only been given to civic services that ‘wash their face’ by the limited standards of a conventional plan – not the needs of a proposed Thatcham New Town. There is no strategic thought embedded in the document at all.</li> <li>• As above no consideration has been given even to a land swap to allow for a purpose designed, purpose built education campus with Kennet and Francis Baily Schools relocated to a limited part of the site; and land so freed up being traded for housing in the genuinely sustainable location where walk to Station and walk to Village centre are actually possible.</li> <li>• The size and extent of the proposed New Town will bring virtual coalescence of Thatcham with Bucklebury (and possibly Cold Ash).</li> <li>• Assertions that the working population of this New Town will walk or cycle to the Railway Station are an affront to common sense. There is no possible location for adequate parking on either or both sides of the railway line.</li> <li>• Statements that there is now and will not be traffic hold ups on the A4 / Northern Distributor Road are incorrect. Hold ups and pinch points already exist and 2,500 homes occupied will massively worsen traffic loadings and delays on all Thatcham-Newbury routes (Official and unofficial desire routes).</li> <li>• That Thatcham has not been targeted with additional civic and commercial amenities in the last 20 years or more is correct; the suggestion that these can be substantially improved is wholly illusory as McCarthy &amp; Stone were permitted to develop their new Retirement Home complex on every piece of available Town Centre land to the east of The Broadway. There is no central Thatcham site</li> </ul>	<p>whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. The LCA will be published as part of the council’s evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a ‘masterplan’ / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham’s flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities</p>

Respondent (with lpr ref)	Response	Council Response
	<p>left that could be developed for extra civic amenities nor additional commercial &amp; retail shops.</p> <p>The proposed strategic plan to 2036 for Thatcham cannot be delivered by its own terms: it can only be delivered if the needs of Thatcham are disregarded / ignored in order to permit a New Town to be built without adequate facilities, rail access, road infrastructure, education establishments of appropriate standard nor even safety from a future catastrophic flood such as that which we suffered in 2007.</p>	<p>and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel</p>

Respondent (with lpr ref)	Response	Council Response
		<p>and lifestyle choices will be important elements of the overall transport plan.</p> <p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>Development in West Berkshire must consider numerous constraints, most notably the constraints posed by the North Wessex Downs AONB, AWE and the associated DEPZs and flooding.</p> <p>As part of the LPR, all sites promoted to the Council have been assessed in the HELAA and this has concluded that there are sufficient sites to accommodate the Council's housing requirement outside of these constraints.</p> <p>The principles which underpin the spatial distribution of new development stem from the overriding objective of</p>

Respondent (with lpr ref)	Response	Council Response
		<p>enabling sustainable development, development that will meet the social and economic needs of the District while respecting the environmental assets of the District and meet the objective to mitigate and adapt to the effects of climate change and minimise demand for energy and other resources.</p> <p>The LPR aims to build on the principles of the Core Strategy with regard to the spatial distribution of development. The focus is on existing settlements, using the settlement hierarchy to steer development to the most sustainable areas, with an appropriate balance between urban and rural development, in order to meet local needs and maintain vibrant and balanced communities with their own sense of identity.</p> <p>The proposed allocation of sites takes account of the evidence from the HELAA and Sustainability Appraisal (SA) and are made in accordance with the settlement hierarchy, with higher levels of development at the higher levels of the hierarchy. Thatcham lies in the top tier of the settlement hierarchy (it is an Urban Area). Urban Areas will be the prime focus for housing and economic development.</p> <p>The proposed strategic allocation of North East Thatcham is in accordance with the spatial strategy set out in the LPR.</p>
<p>Katie Montague-Johnstone (lpr1337)</p>	<p>I would like to strongly register my objection to the proposed full development of the above sites for the following reasons.</p> <ol style="list-style-type: none"> <li>1. The vast majority of Upper Bucklebury residents are against this development, many have already registered their objections, however many are not aware of the application or consultation as no</li> </ol>	<p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>information has been sent out by WBC. WBC are in my opinion negligent in this process and the consultation period should be extended and all residents should be formally written to.</p> <ol style="list-style-type: none"> <li>2. It is cited in the Bucklebury vision and Bucklebury Plan to maintain a strong greenbelt between Thatcham and Upper Bucklebury. This document is approved and agreed with WBC and should be considered as supplementary planning consideration. It is not mentioned in the WBC documentation.</li> <li>3. It would effectively join Upper Bucklebury with Thatcham, which has all but happened at Cold Ash effectively removing the rural aspect of the area. This is actually stated in the WBC documentation (<a href="https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=0">https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=0</a>) page 22, stating “particularly as development of both north east and north Thatcham would result in the loss of the separate identifies of Cold Ash and Bucklebury, and would harm the setting of the AONB settlement pattern”. WBC are therefore suggesting that the Parish of Bucklebury should maintain its identity but the proximity of the development is in contradiction to WBC’s own intentions.</li> <li>4. A previous application was rejected by the secretary of state in 2017 <a href="https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html">https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html</a>. Why are WBC now considering this site in light of the previous objection, what has changed and knowing this has been refused once why have massive funds been spent thus far ?</li> <li>5. It is a massive over development of the Countryside in one area which consists of rolling hills and farmland.</li> <li>6. WBC and Thatcham councils have wasted a great deal of tax payers money in completing many surveys and writing an 800 page report, effectively making this a fait accompli, before going to consultation on the proposal. Have the opinions of the residents in Upper Bucklebury been considered sufficiently ?</li> <li>7. It will have a significant impact on traffic in the area and especially on the route into Thatcham and Newbury and towards the station which are already heavily congested at busy times and in the event</li> </ol>	<p>There is no green belt within this area (or within the District) there will be open space maintained along the northern/north eastern part of the site.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>of any minor traffic disruption.</p> <p>a. This will significantly impact the freight traffic using the industry site at Thatcham</p> <p>b. It will significantly increase the traffic on the back route (rat runs) which are not designed for large traffic volumes.</p> <p>Traffic and speeding in particular through Upper Bucklebury is of a major concern due to the primary school. With an increase in 10% this will only worsen the situation.</p> <p>8. It will completely surround the Crematorium at Thatcham which was, as I understand, placed there to be away from residential properties and has constraints placed on it.</p> <p>9. It is stated/assumed this will help the Upper Bucklebury Business – predominantly the Pub and Shop. The Pub is hardly likely to benefit as a) pub usage across the country is in decline b) the Pub at the bottom of Harts Hill cannot already sustain a business. One pub is hardly justification for a development this size. The shop is also likely to suffer as the plan indicate that shops will be included, so it is likely it would have a detrimental impact on the only shop in UB, creating more traffic.</p> <p>10. It is cited that there cannot be development on the Kennet flood plain, however there are multiple examples where this has already been done (most of Thatcham was originally a flood plain), this is extremely hilly land which is almost certainly as unsuitable to development as the flood plain.</p> <p>11. It will significantly increase the noise and light pollution to the Bucklebury Parishioners – there are no street lights in Upper Bucklebury.</p> <p>12. There is no evidence that this will enhance Thatcham town centre (or indeed Newbury). The development of the old Army Base by the Station didn't add any amenities and we have seen the slow decline of the town centre over the last 20 years despite the area and population growing.</p>	<p>The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that 'in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy' (paragraph 67 of the Core Strategy Inspector's Report). As additional housing is required, and given Thatcham's status as an 'Urban Area' in the development plan is it considered appropriate to consider Thatcham for housing.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan'</p>

Respondent (with lpr ref)	Response	Council Response
	<p>13. Schooling – this will obviously have an impact on local schools (and traffic). Current indications are that KS1 children volumes are decreasing yet the plan includes a proposal for 3 new schools. When would this be built before or after the houses ? Build it before and it will poach children from local schools, such as Upper Bucklebury which will make that unsustainable (as is happening in Newbury with the new school on the college site). Build it after and the local schools will be overwhelmed beforehand. If the development is spread across the region there is a much greater chance of the load being spread out.</p> <p>14. West Berkshire declared a climate emergency on 2 July 2019. <a href="https://www.westberks.gov.uk/media/48362/Draft-Environment-Strategy-2020-2030-Summary-document-January-2020-/pdf/WBC_Environmental_Strategy_Summary_A4_20.pdf?m=637141844400230000">https://www.westberks.gov.uk/media/48362/Draft-Environment-Strategy-2020-2030-Summary-document-January-2020-/pdf/WBC_Environmental_Strategy_Summary_A4_20.pdf?m=637141844400230000</a>WBC - Environment Strategy - with declaration of climate emergency. This will not be helped with the increased pollution from the construction traffic, increased vehicle pollution due to the inevitable congestion and so on, causing a decrease in air quality.</p> <p>15. The plan suggest the provision of a “country park”. There is no budget available for this.</p> <p> Additional Comments :</p> <p><b>Traffic</b> We fear with any increase in traffic the village will become unbearable and dangerous. It worries me that it won't be long until a dreadful accident happens. This development would result in a huge increase of traffic movements per day, not only on the A4 but also on narrow, rural lanes which already experience a relatively large number of vehicle usage. With more traffic on the A4, the speed of vehicles will decrease and the risk of delay increase. Many cars will use a diversion .. turning to driving through Upper Bucklebury, along the Common and through the villages of Chapel Row and Bradfield Southend thus making these rural roads a ‘rat-run’. Already cars</p>	<p>/ visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in</p>

Respondent (with lpr ref)	Response	Council Response
	<p>using this route do not stick to speed restrictions and drive at vastly excessive speeds along the Common. I believe this will cause an increase in accidents.</p> <p><b>Nature</b> There are a number of protected species including the great crested newt, common lizard, adder, grass snake, slow worm and bats. There are also birds such as owls, nightjars (we believe last summer was in the burdens heath plantation area as well as on the common) which are under conservation concern. We fear increased amounts cars and people visiting the area of outstanding natural beauty will have a large negative impact. Wildlife like this need to be protected and not put under a greater threat. The development to the south of Blacklands Copse and Harts Hill Copse will mean open space dramatically reduced and wildlife forced to retreat, pushing species into decline.</p> <p>There is already too much litter and fly tipping in the area, as well as car parks being used after dark for illegal drug use. This will only increase and damage the fragile ecosystem which is already at breaking point with the extreme overuse of the common by 4x4 vehicles, motorbikes, bicycles and the huge increase of walkers ... resulting in the extreme degradation of many of the byways and footpaths throughout the parish.</p> <p><b>Light pollution</b></p> <p>There are no street lights in the villages and the residents will find the encroachment of the light pollution from such a development will have a substantial detrimental effect on the darkness of the sky at night.</p> <p><b>Noise pollution</b></p> <p>The increase in traffic and road use will result in an increase in background noise, damaging the rural environment and the peace of the countryside.</p> <p><b>Identity</b></p>	<p>to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p> <p>In relation to the Climate Change Emergency, The emerging draft LPR includes a policy that specifically covers climate change (policy SP5). This requires that all development should contribute to West Berkshire becoming and staying carbon neutral by 2030.</p> <p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs</li> </ul>

Respondent (with lpr ref)	Response	Council Response
	<p>There is simply not enough space between the proposed development and Upper Bucklebury and the boundary of the AONB. The village will practically be part of Thatcham (or the Newbury/Thatcham conurbation), it will lose its identity as a village. /</p> <p>According the <a href="http://gov.uk">gov.uk</a>, an AONB has to a combination of several criteria, two of these are:</p> <ul style="list-style-type: none"> <li>· relative wildness, such as distance from housing or having few roads</li> <li>· relative tranquillity, where natural sounds, such as streams or birdsong are predominant</li> </ul> <p>Both of these will be impacted heavily by the development and could not be met. We would imagine the boundary of the AONB would have not been where it currently is should this development already have been in existence.</p> <p>The proposal is an overdevelopment of Thatcham, is out of character and will have a detrimental impact for the surrounding villages as well as the town itself. Thatcham struggles as it is. There is insufficient parking in the town, doctors stretched, limited parking at the train station and already almost full train services at peak times into London. Not to mention the traffic delays around the crossing. Flooding remains a risk and this will become more so if this goes ahead. There are not enough opportunities for entertainment for young people which could result in an increase of anti social behaviour.</p> <p>Thatcham has already had numerous and relatively large developments over the last twenty years and it has changed the town from a small, market town with a distinct identity to a bigger, widespread town with a less obvious identity. Any further enlargement will cause a detrimental effect not only on Thatcham itself but upon the neighbouring rural areas and villages. It is important to protect our countryside and maintain development to brown field sites and infill development. Please do not vote for this development - it is totally out of scale to the area that has been suggested and seriously encroaches on a precious AONB.</p>	<p>development to the most sustainable locations in the district.</p> <ul style="list-style-type: none"> <li>• Policy SP6 (Flood Risk) directs development to areas least at risk of flood risk.</li> <li>• Policy SP22 (Transport) requires that any development that generates a transport impact will be required, amongst other things, to have regard to West Berkshire’s declared climate emergency and minimise the impact of all forms of travel on the environment.</li> <li>• Policy DC3 (Building Sustainable Homes and Businesses) looks at building sustainable homes and businesses,</li> </ul> <p>Any development site will have to comply with the aims and objectives of the plan.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a ‘living document’ and will be updated regularly updated in consultation with infrastructure providers.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The site alongside the larger site area, is well related to the existing town of Thatcham. It is in close proximity to a range of services and facilities, including the train station. Thatcham is an urban area with a wide range of services and opportunities for employment, community and education. Development of a strategic nature at this site would support the service provision and regeneration that Thatcham requires.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>
Emma Day (lpr1339)	<p>We write to you to implore that you do not eradicate the beautiful countryside that lays between Lawrence Lane and Floral Way in Thatcham. This is a very valued area for local residents like ourselves who enjoy the pleasure of walking with our families and the beauty of nature and all that it encompasses. It has an abundance of wildlife that without this natural habitat will disappear. It has never been clearer than in present times with climate change as it stands, the importance of preserving green space areas like this with its ability to preserve safe haven for many species of animal and insects alike. During our lockdowns over the last year our family, like numerous other, have spent plentiful hours enjoying and appreciating the areas in our neighbourhood and this area in particular has now become an area of leisure for so many in Thatcham.</p> <p>The impact on us locally as residents highlights many other areas of concern. As residents of Northfield Road we already realise the vast volumes of traffic that already use this route as we use it daily ourselves for school runs. It is used by so many to avoid having to travel through Newbury on the main roads and also on occasion as a diversion from the A4 or traffic</p>	<p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure</p>

Respondent (with lpr ref)	Response	Council Response
	<p>diverted from the M4. It begs the question how it will cope with an increase of 2500 new home and the families it will house? The massive increase in air pollution, another area that is also contributing highly to global warming and the affect it can have on the health of the existing residents!</p> <p>As a Mother I worry for our children who we already have to fight for school placements. It is apparent that already local authority does not have provision for another influx of 2500 homes and their families. We are lacking in so many facilities, doctors already under huge pressure in this area, dentists, and of course currently the massive increase in unemployment. An ambulance service already under unimaginable pressure even before Covid-19. We have a hospital, but it doesn't even have a 24 hr A&amp;E or maternity unit let alone provision for cancer patients. A very underutilised crucial facility. We have one secondary school in Thatcham. I ask the question what provision will you be putting in place to facilitate access to these areas in Thatcham for an yet another increase in population?</p> <p>It is without any doubt in our minds that failure to preserve this area with all it has to offer would be more than devastating and have a huge impact on the health and welfare of all currently residing in Thatcham.</p> <p>Yours with great sadness and hope of preservation</p>	<p>which will include a new community park linking Thatcham to the AONB.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>
Lee Beeson (lpr1338)	<p>I would like to register my objection to the WBC Emerging Plan for the development of 2500 homes NE of Thatcham I would also like to be kept informed with further information on this emerging local plan.</p> <p><b>Scale and Location</b> The scale of this particular proposal is quite out of proportion for the area, being as it is, ten times the size of Upper Bucklebury and 25% the size of Thatcham. Indeed it is a town the size of Hungerford without the supporting shops, doctors or infrastructure.</p> <p>This proposal removes the long established settlement boundary of Thatcham to suit this proposal, a boundary that has always been sacrosanct. Protection of this Boundary is also stated as being essential in the draft plan highlighting the inconsistencies in the documentation.</p> <p>WBC have previously stated that the future of Thatcham should focus should be on enhancing the viability of Thatcham, not increasing its footprint. There is no evidence this would support any of the Thatcham town facilities. WB Landowners have put up land that would provide for 20,000 homes. There are alternatives stated in the document with some very weak arguments as to why they are not suitable.</p> <p>There is considerable likelihood that much more office space will be converted under permitted rights to living accommodation. This incremental</p>	<p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a</p>

Respondent (with lpr ref)	Response	Council Response
	<p>housing opportunity (including perhaps retail shops such as Debenhams) is not factored into the housing needs part of the document.</p> <p>West Berkshire declared a climate emergency on 2 July 2019. This plan is in direct contradiction to WBC own stated intentions. This development will result in increased pollution from the construction traffic, increased vehicle pollution due to the inevitable congestion and so on. Paving over countryside can only be detrimental to the environment and result in a loss of our nature and biodiversity.</p> <p>The plan makes no note of the CLH pipeline which is part of the national network carrying aviation fuel around the country and obviously runs exactly where the schools are shown on the plan – building a school over this is ludicrous. [SEE MAP IN ATTACHED LETTER]</p> <p>Bucklebury was one of the first villages in the Country to create a village plan which has been adopted by WBC and is regularly updated. There is no mention or consideration of this in the draft plan.</p> <p><b>Environment</b></p> <p>The site lies outside the settlement of Thatcham, as defined in the Local Plan, with the settlement boundary running around the southern and western edges of the land. The North Wessex Downs AONB is approximately 450m north of the site. This is not noted in the plan. With respect to agricultural land, 77.6% of the site is of the Best and Most Versatile (BMV).</p> <p>The site is a haven for wildlife including owls and other protected animals. The proposal includes the destruction of ancient Woodland, which WBC have a Policy and obligation to protect.</p> <p>Flooding is a major risk from excess water runoff and the area to the South of the proposed site is already subject to flooding. The document is inadequate in how this will be addressed.</p>	<p>'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government's standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p> <p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Due to the nature of the surrounding geology it has been suggested that it could lower the water table for the properties above and lead to subsidence.</p> <p><b>Infrastructure</b> Traffic is major concern not accurately considered in the plan. The traffic measurements shown the document inaccurate as they do not consider the substantial traffic flow that will go via Cod Ash, Ashmore Green and Hermitage to access the M4/A34 north etc.</p> <p>Cold Ash is already congested and plagued by speeding cars. Upper Bucklebury, Southend Bradfield and the other villages will all become larger rat runs than they already are. Many of the small interconnecting roads (Cox's Lane etc) are single track and unsuitable for a development this size. Then of course the issue of Thatcham railway crossing and delays there along with the lack of parking at the station especially for potentially hundreds more commuters.</p> <p>The A4 is already congested during rush hours, adding 5000 more cars many of which doing school runs will bring the traffic from the industrial estates and villages into and out of Thatcham/Newbury to a stand still. There is no mention of Doctors or Dentists or other healthcare facilities which are already under strain in the area.</p> <p>One of the reasons Siege Cross was rejected was the lack of services including Water (fire fighting), waste treatment and so on.</p> <p><b>Communications and objections</b> The publication of the emerging plan and how the community were made aware of the plan has been quite abysmal. The fact that it is published for locals to prepare a response over Christmas and new year is simply suspicious and unacceptable. WBC should learn from this and write to every resident within WBC.</p> <p>I should bring the Councils attention that many members of the public, and indeed those same people who vote for councillors, are up in arms about</p>	<p>The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p> <p>In relation to the Climate Change Emergency, The emerging draft LPR includes a policy that specifically covers climate change (policy SP5). This requires that all development should contribute to West Berkshire becoming and staying carbon neutral by 2030.</p> <p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs development to the most sustainable locations in the district.</li> <li>• Policy SP6 (Flood Risk) directs development to areas least at risk of flood risk.</li> <li>• Policy SP22 (Transport) requires that any development that generates a transport impact will be required, amongst other things, to have regard to West Berkshire's declared climate emergency and minimise the impact of all forms of travel on the environment.</li> <li>• Policy DC3 (Building Sustainable Homes and Businesses) looks at building sustainable homes and businesses,</li> </ul> <p>Any development site will have to comply with the aims and objectives of the plan.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has</p>

Respondent (with lpr ref)	Response	Council Response
	<p>this. There are nearly 2500 objections on the change.org petition <a href="http://chnng.it/HYTHv57fqs">http://chnng.it/HYTHv57fqs</a> which need to be given due consideration by WBC.</p> <p>There are numerous Facebook pages dedicated to the opposition of this including this one with over 200 members <a href="#">Bucklebury Parish against Thatcham Development   Facebook</a>.</p> <p>It is abundantly clear that this matter is being driven along party political lines, with the Conservative members clearly being told to “toe the line”. This is not, and should not, come down to party politics, the nature of WBC or the large percentage of AONB.</p> <p>Thatcham Town Council, Bucklebury Parish Council and I am sure many other organisations are all opposed to this development.</p> <p><b>Schooling and housing</b></p> <p>The proposal and need for additional schooling is driven by the incremental housing stock and will not support the remainder of Thatcham. Indeed, it is likely to be highly detrimental. If the schools are built after the new houses, then until that time the kids will have to go to local schools and moving them subsequently would be very disruptive. However, if you build and open the schools early and as we have seen at Newbury (Highwood Copse) they then try to poach pupils from surrounding schools to justify their existence and impact the viability of those pre-existing schools. The promise of new schools to benefit the community is therefore flawed.</p> <p>In the report a lot is made of social housing. Social housing a misnomer as the major beneficiaries are the housing associations and developers. Much was made of the social housing aspects of the Newbury College location where the average house price is close to £500k. Hardly affordable. Upper Bucklebury is “light free”, we have no streetlights and the light pollution from this cause a consideration amount of light pollution.</p> <p>We would be subjected to noise pollution from the massive building site every day for years.</p>	<p>undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council’s evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a ‘masterplan’ / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council’s website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology</p>

Respondent (with lpr ref)	Response	Council Response
	<p><b>Topics not addressed and further questions:</b></p> <ol style="list-style-type: none"> <li>1. Considering that WBC has housing stock for the next 7 years, a question arises as to what is the apparent urgency on completing this?</li> <li>2. I read in the press the driver for this is that WBC have pulled out of the Grazeley new “market town”, but Reading and Wokingham are still persisting with this. It is unclear why WBC are not persisting with this, recouping the investment already made and making use of the pro-offered Government funding</li> </ol>	<p>strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham’s flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys</p>

Respondent (with lpr ref)	Response	Council Response
		<p>from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>The consultation was run in accordance with the council’s Statement of Community Involvement (SCI). A public consultation such as this is would usually last 6 weeks but because it did go over Christmas, it ran in total for an 8 week period between 11 December 2020 and 5 February 2021.</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p> <p>Housing provision must support the needs of the whole community, including the provision of both market and affordable housing, and reflect the needs of specific groups such as, but not limited to, families with children, single person households, the elderly, those households with specific needs, those wishing to build or commission their own home, gypsies, travellers and travelling showpeople and those seeking houseboat moorings. Developers will therefore need to consider housing mix in their proposals, including any local evidence of housing needs or evidence in Parish or Neighbourhood Plans which may be important considerations even for small sites, particularly in rural areas.</p> <p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government’s standard method, which has been revised since the onset of the pandemic, but has not changed for</p>

Respondent (with lpr ref)	Response	Council Response
		<p>West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p> <p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The proposal for a garden town in Grazeley was located in the administrative areas of Wokingham Borough Council and West Berkshire Council with the majority of the site located in the former administrative area. Due to the legislative change which has caused emergency planning requirements around the Atomic Weapons Establishment at Burghfield to be extended, the area around Grazeley is now within this area. As a result, the Defence Nuclear Organisation, part of the Ministry of Defence, objected to the Grazeley garden town proposal within the Wokingham Local Plan and requested its removal and due to the extension of the emergency planning requirements it was also not carried forward through the West Berkshire LPR.</p>
Richard Woodhead (lpr1340)	<p>Just to register my objection to the size of this development.</p> <p>I am not a NIMBY, and whilst accepting that some local housing developments are going to be necessary it strikes me that the proposal to build 2500 houses is over the top, and represents a total over development. There is just not the local infrastructure to cope with such a massive development.</p> <p>One of the many attractions of this area are the pockets of open countryside and to be building on so much green belt and farm land is inevitably going to have a significant effect on the standard of living for those of us living in the area. Tarmacing over an attractive part of the district would be an immense shame and also have a detrimental effect on the general standards of the area as well as impacting on wildlife and general light and air pollution. A large scheme like this I suspect will see houses crowded in together and represent the thin of the wedge of yet more land grab in the future as well as having an immediate dumbing down of the general area. There is just not the local capacity for such a large increase in the housing stock.</p>	<p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>The site is not within the Green Belt (there is no Green Belt in this District).</p>

Respondent (with lpr ref)	Response	Council Response
		<p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p>
Chris Relf (lpr1342)	<p>I would like to strongly register my objection to the proposed full development of the above sites for the following reasons:-</p> <ol style="list-style-type: none"> <li data-bbox="481 1257 1335 1342">1. The vast majority of residents in Upper Bucklebury are against this development and many have already registered their objections but as no information has been sent out by WBC many are not aware of</li> </ol>	<p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>the application. I feel that the consultation period should be extended and that ALL residents should be formally written to.</p> <ol style="list-style-type: none"> <li>2. This development would, effectively, join Upper Bucklebury to Thatcham thus effectively removing the rural aspect of the area. As it is cited in the Bucklebury Vision and Plan to maintain a strong green belt, which was approved and agreed with WBC, it should be considered as supplementary planning consideration. On page 22 of WBC documentation regarding planning “<i>particularly as development of both north east and north Thatcham would result in the loss of the separate identifies of Cold Ash and Bucklebury, and would harm the setting of the AONB settlement pattern.</i> So this new development is in contradiction to WBC’s own intentions.</li> <li>3. A previous application was rejected by the Secretary of State in 2017 (500 houses at Seige Cross) so why is WBC now considering this site in light of previous objection. What has changed and, knowing this has been refused once why have funds been spent so far? At least part of this site was deemed Not Developable in 2013 – what has changed?</li> <li>4. It is a massive over development of the countryside and will have a significant impact on traffic in the area, especially on the route into Thatcham and Newbury and towards the station, which are already heavily congested at peak times.</li> <li>5. Traffic, and speeding, through Upper Bucklebury is already of a major concern due to the Primary School and with an increase of 10% this will only worsen the situation. Hart’s Hill is not suitable for extra pedestrian or cycle use.</li> <li>6. It will completely surround the Crematorium in Thatcham, which was placed away from residential properties and has constraints placed on it.</li> <li>7. This development is the size of Hungerford yet there is no infrastructure in place, no town facilities, no doctor’s surgery (on the plans I have seen). Hungerford with almost the same number of houses has school, a high street, surgeries, a large carpark – there is nothing in this development. Thatcham surgeries are already</li> </ol>	<p>There is no green belt within this area (or within the District) there will be open space maintained along the northern/north eastern part of the site.</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that ‘in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy’ (paragraph 67 of the Core Strategy Inspector’s Report). As additional housing is required, and given Thatcham’s status as an ‘Urban Area’ in the development plan is it considered appropriate to consider Thatcham for housing.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>over-subscribed and I doubt Chapel Row would be able to accommodate extra patients.</p> <p>8. Will there be a full archaeological survey on the area bearing in mind that there were skirmishes and camps in the area during the civil war in 1644.</p> <p>9. The damage to the local flora and fauna in the area would be immense not to mention the light, noise, and air pollution, plus the flooding. Would the developers implement flood alleviation measures?</p>	<p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. 		<p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council’s housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver ‘a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>In relation to the plan being prepared prior to the coronavirus pandemic, the full impact of the COVID 19 pandemic will not be fully apparent for some time. The LPR is a long term strategy to 2039, during which time a review will be conducted every 5 years. The impact of changes in response to macro and local economic factors will be assessed through subsequent reviews, once such implications are realised.</p>

Respondent (with lpr ref)	Response	Council Response
Christine Alder (lpr1344)	<p>I am writing to <b>OPPOSE</b> any further development in Thatcham. I have been a resident of the town for over 10 years and have raised my young family here. Since we have moved here there has been a new site along by the Garden Centre, which seemed to have appeared after the Flood Defence with implemented and strangely enough now the one that is next to where we live (&lt;personal information removed&gt;) you are now wanting to build on the back of this? There has been very little investment in any infrastructure – as admitted in your own report.</p> <p>Also back in 2013 Site Ref: THA030 was determined to be “NOT developable” there we other fields also. So why has this not been mentioned in the new plans? The flood defence work was designed taking in to account of the existing development of Thatcham, Surely if this development were to go ahead it would completely change the picture, as all the farmland would no longer be available to soak up the rainfall. The children’s play park at Kennet Health was dug up as part of the flood defence there and this is now wetter than it ever was before, so something isn’t working correctly as it should. Currently after all the rainfall, you only need to walk in these fields and you can see how water logged they are, worse than they have been in years and this is stopping it coming down and straight in to Dunstan park (the park of it that doesn’t have the flood defence in front of it)</p> <p>My objections are as follows:-</p> <p><b><u>PUBLIC AMENITIES</u></b></p> <p>Our existing public right of way (Many of them as we live in the middle of where they are looking to build) will be lost in the new development - we do not need ‘public green spaces for all to use’ - we have the countryside. We moved to our home as desperately wanted to be nearer the countryside and currently when we look out of our windows we see hills, sheep and many enjoying the countryside. I know for one, that having this on our doorstep</p>	<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a ‘living document’ and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham’s flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council’s housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver ‘a network of green infrastructure</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Thatcham has few high quality jobs, most residents are self-employed or commute. In recent years three major banks have pulled out of our High Street, and pubs are unsustainable. The Plough has closed, and The Mill House changes hands with alarming frequency and again is up to Let. Both main supermarkets are overpriced, (compared with, for example, Tesco) – the development requires 40% affordable housing – people in affordable housing do not shop in Waitrose!?!</p> <p>This development does nothing more than create a dormitory town which does nothing to integrate with the existing town.</p> <p>Could you please provide details on how you proposed to run affordable housing schemes? The housing association properties in the area are poorly constructed – I have friends constantly on the phone to their housing association to rectify faults with windows and doors that don't close properly etc. Panorama recently spoke out <a href="https://www.bbc.co.uk/programmes/m000pk2b">https://www.bbc.co.uk/programmes/m000pk2b</a></p> <p>I can't envisage any developer providing 40% affordable housing, without cutting corners – it simply isn't financially viable unless there is a sting in the tail, or they reduce the percentage required.</p> <p>Finally, and probably most importantly, I believe the Government algorithms for calculating the housing requirement are currently under scrutiny.</p> <p><a href="https://www.google.co.uk/amp/s/www.bbc.co.uk/news/amp/uk-politics-55322993">https://www.google.co.uk/amp/s/www.bbc.co.uk/news/amp/uk-politics-55322993</a></p> <p>Please advise if your current consultation is in line with this, takes the Pandemic into account and the loss of our town centres ?</p> <p>From my understanding Hungerford already has the full working infrastructure that could take the 2,500 homes? It has the High Street,</p>	<p>application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>An economic advantage of new development is that new residents can help support local shops and businesses and</p>

	<p>schools, a railway station with much larger parking, doctors surgeries and much more.</p> <p>I look forward to hearing from you in due course.</p>	<p>help to boost the vibrancy and vitality of town and local centres.</p> <p>The LPR is read as a whole. All LPR policies should be viewed together and not in isolation in the preparation and consideration of planning applications. Development proposals will be judged against all relevant policies. All Development Plan policies will be taken into account in determining planning applications, along with other material considerations in a proportionate manner. The policies in the LPR do not list or cross-refer to all other policies that may be relevant.</p> <p>Housing provision must support the needs of the whole community, including the provision of both market and affordable housing, and reflect the needs of specific groups such as, but not limited to, families with children, single person households, the elderly, those households with specific needs, those wishing to build or commission their own home, gypsies, travellers and travelling showpeople and those seeking houseboat moorings. Developers will therefore need to consider housing mix in their proposals, including any local evidence of housing needs or evidence in Parish or Neighbourhood Plans which may be important considerations even for small sites, particularly in rural areas.</p> <p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government's standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p>

Respondent (with lpr ref)	Response	Council Response
		<p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p>
Emma Ghulam (lpr1346)	<p>I am writing to OPPOSE any further development in Thatcham. I have been a resident of the town for over 10 years and have raised my young family here. Since we have moved here there has been a new site along by the Garden Centre, which seemed to have appeared after the Flood Defence was implemented and strangely enough now the one that is next to where we live (&lt;personal information removed&gt;) you are now wanting to build on the back of this? There has been very little investment in any infrastructure – as admitted in your own report.</p> <p>Also back in 2013 Site Ref: THA030 was determined to be “NOT developable” there we other fields also. So why has this not been mentioned in the new plans? The flood defence work was designed taking in to account of the existing development of Thatcham. Surely if this development were to go ahead it would completely change the picture, as all the farmland would no longer be available to soak up the rainfall. The children’s play park at Kennet Health was dug up as part of the flood defence there and this is now wetter than it ever was before, so something isn’t working correctly as it</p>	<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a ‘living document’ and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham’s flood alleviation strategy. 	<p>It is beggars-belief that Newbury is described as being the ‘central hub’ for shopping, and will continue to be so. Whoever, wrote this clearly has no knowledge of the area at all. If you live in North or East Thatcham is it almost as quick to travel to Calcot, Reading or indeed Basingstoke – and the retail offerings (and parking) are far greater. To make Newbury a central hub, the housing has to be in Newbury. Since we moved to Thatcham, we hardly ever go to Newbury, firstly it is a nightmare to park and secondly unless you want a coffee shop or to eat out there is absolutely nothing to go there for. We always go to Basingstoke or Reading now and will continue to do so.</p> <p>Thatcham has few high quality jobs, most residents are self-employed or commute. In recent years three major banks have pulled out of our High Street, and pubs are unsustainable. The Plough has closed, and The Mill House changes hands with alarming frequency and again is up to Let. Both main supermarkets are overpriced, (compared with, for example, Tesco) – the development requires 40% affordable housing – people in affordable housing do not shop in Waitrose !?!</p> <p>This development does nothing more than create a dormitory town which does nothing to integrate with the existing town.</p> <p>Could you please provide details on how you proposed to run affordable housing schemes ? The housing association properties in the area are poorly constructed – I have friends constantly on the phone to their housing association to rectify faults with windows and doors that don’t close properly etc. Panorama recently spoke out <a href="https://www.bbc.co.uk/programmes/m000pk2b">https://www.bbc.co.uk/programmes/m000pk2b</a></p> <p>I can’t envisage any developer providing 40% affordable housing, without cutting corners – it simply isn’t financially viable unless there is a sting in the tail, or they reduce the percentage required.</p>	<p>Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council’s website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>The evidence base for the LPR including matters relating to wildlife issues can be found here. The Sustainability Appraisal for the LPR will also be of interest.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham’s flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential</p>

	<p>Finally, and probably most importantly, I believe the Government algorithms for calculating the housing requirement are currently under scrutiny.</p> <p><a href="https://www.google.co.uk/amp/s/www.bbc.co.uk/news/amp/uk-politics-55322993">https://www.google.co.uk/amp/s/www.bbc.co.uk/news/amp/uk-politics-55322993</a></p> <p>Please advise if your current consultation is in line with this, takes the Pandemic into account and the loss of our town centres ?</p> <p>From my understanding Hungerford already has the full working infrastructure that could take the 2,500 homes? It has the High Street, schools, a railway station with much larger parking, doctors surgeries and much more.</p> <p>I look forward to hearing from you in due course.</p>	<p>delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>An economic advantage of new development is that new residents can help support local shops and businesses and help to boost the vibrancy and vitality of town and local centres.</p> <p>The LPR is read as a whole. All LPR policies should be viewed together and not in isolation in the preparation and consideration of planning applications. Development proposals will be judged against all relevant policies. All Development Plan policies will be taken into account in determining planning applications, along with other material considerations in a proportionate manner. The policies in the LPR do not list or cross-refer to all other policies that may be relevant.</p> <p>Housing provision must support the needs of the whole community, including the provision of both market and affordable housing, and reflect the needs of specific groups such as, but not limited to, families with children, single</p>

Respondent (with lpr ref)	Response	Council Response
		<p>person households, the elderly, those households with specific needs, those wishing to build or commission their own home, gypsies, travellers and travelling showpeople and those seeking houseboat moorings. Developers will therefore need to consider housing mix in their proposals, including any local evidence of housing needs or evidence in Parish or Neighbourhood Plans which may be important considerations even for small sites, particularly in rural areas.</p> <p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government's standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p>

Respondent (with lpr ref)	Response	Council Response
Susan Lloyd (lpr1347)	<p>I would like to lodge my strong objection to the proposed development around Siege Cross Farm and Colthrop Manor and along Floral way, for the following reasons:</p> <ol style="list-style-type: none"> <li>1. this constitutes a massive over-development of the area</li> <li>2. it is being built on greenfield sites, rolling hills and virgin farmland. (When more and more people are working from home, office buildings will be available to be converted into flats and houses)</li> <li>3. building on this land will surely result in the flooding of all properties and houses south of the A4 every year</li> <li>4. building close to, and around, the crematorium goes against previous planning rules</li> <li>5. it will result in the ruining of the ruralness of Upper Bucklebury</li> <li>6. traffic on the A4 is already stationary at many times of the day. The congestion when schools empty will be unbearable.</li> <li>4. the traffic using 'rat runs' thru the local villages will also be unbearable</li> <li>8. and the resulting pollution thereof</li> <li>9. following Brexit is there really a need for so many new houses, especially in the over-crowded South East</li> <li>10. this over-sized development was turned down by the Secretary of State in 2017, so</li> <li>11. it is wrong for the WBC to be now advocating this site for development, and is it not a huge waste of tax-payers' money to be allowing/promoting this.</li> <li>5. there seems to have been no contact with residents and everyone who would be affected. And no reference to the Bucklebury Vision and Bucklebury Plan which should protect our village from being joined with Thatcham.</li> </ol>	<p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the</p>

		<p>and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p>
Nicola Padbury (lpr1348)	<p>We would like to strongly object to the planning proposal to build a staggering 2500 houses on the farmland between Upper Bucklebury, the A4 and Floral Way.</p> <p>What a hideous project as Upper Bucklebury is one of the most sort after villages in Berkshire. It's quiet location would no longer be, giving way to a built up over developed area. There are insufficient school, doctor, shop and road facilities for such a massive increase through the village. The potential of an extra 5000 people, at least 2000 extra cars will have a huge impact on the local environment, together with the pollution issues, and impact on any remaining woodlands that would not be pulled down. Millions of wildlife would also be affected by the lack of woodland. Narrow country lanes would all be demolished to make way for faster busier roads, causing dangers to walkers, children, horses, animals and cyclists.</p>	<p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Property prices for us current village home owners would plummet, who would want to live in yet another over developed location. !</p> <p>We urge you to consider a smaller development in another location that may not be so affected by these issues, as the picturesque small village of Upper Bucklebury.</p> <p>It is a shame developers never have a conscience, only a hunger to make more money.</p> <p>I trust you will acknowledge receipt of my email, as this is of great importance to us.</p> <p>Many thanks for taking the time to read this.</p>	<p>infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). At present the Council is able to demonstrate a supply of 7.3 years for the period to 2026.</p> <p>The Council's strategy is for a mix of sites: strategic sites such as Sandleford Park and North East Thatcham, which can delivering infrastructure, facilities and significant numbers of affordable homes and a larger number of medium and smaller sites, including brownfield sites within settlement boundaries. The strategy seeks to focus</p>

Respondent (with lpr ref)	Response	Council Response
		development in the more sustainable settlements of the District rather than distribute development more evenly. This approach continues that set out in the Core Strategy which went through all stages of consultation, examination and adoption by the Council.
Andy Walton (lpr1349)	<p>I would like to strongly <b>OBJECT</b> to the <b>NE Thatcham Development of 2500 homes</b> you are proposing as part of the Local Plan Review 2020 -2037 Emerging Draft December 2020 document. My reasons are:</p> <p><b><u>Closing of gap between Thatcham and Upper Bucklebury</u></b> The proposed large scale housing development shows no considered planning or analysis of housing, infrastructure or community need. Rather than meeting this need and the identification and use of suitable brown field sites to do so, the focus appears to be the use of a large parcel of high grade agricultural land and greenfield site which is in an inappropriate and unsuitable location for a large scale housing development. Not least, the proposed site for the housing development breaks the strategic gap which exists between Thatcham and Upper Bucklebury and would inevitably lead to Thatcham and Upper Bucklebury becoming one.</p> <p><b><u>Increase in Traffic through Upper Bucklebury</u></b> There will be a significant increase in the numbers of commuters and other road traffic users who will use the back routes through the villages to avoid the congestion on the A4 and around Thatcham should the proposal go ahead. Upper Bucklebury will see far in excess of the percentage suggested of traffic going through the village towards Reading and along Burdens Heath towards the A34 and M4. The roads, and villages they run through, were not designed to support this level of increased traffic and where the health and safety of residents of all ages in the villages is compromised. The speed restrictions along Burdens Heath, which has no pavement, are often not observed and this road is already dangerous for pedestrians.</p> <p><b><u>Proximity to North Wessex Downs ANOB and Impact on wildlife</u></b></p>	<p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Bucklebury Common lies within the North Wessex Downs AONB and is a protected habitat for wildlife. A major reason it exists is to conserve and protect the diversity of flora and fauna. This is especially important where often native species are in decline. The close proximity and scale of the proposed development will have a significant detrimental impact on local nature and wildlife. A resulting increase in visitors to the Common will mean increased disturbance of nesting sites and habitats and will, over time, cause a detrimental effect on the species living within the Common. Damage caused by the number of 4x4 vehicles illegally driving through the common would be more likely to increase. Volunteers from Upper Bucklebury and the surrounding parish work hard to maintain the Common and reduce the rubbish, waste and damage it already suffers.</p> <p><b><u>Dark skies</u></b> The scale of the proposed development and resulting light pollution will have a significant environmental and public impact of further reducing dark skies. It will have a negative impact on wildlife and their habitats and will have a detrimental effect on the night sky for residents in Upper Bucklebury and the surrounding parish.</p> <p><b><u>Impact on Thatcham Station</u></b> An additional 2,500 homes and their households will have a hugely negative impact on the local road networks, particularly on the road to the Thatcham level crossing especially during peak times in the morning and evening. (On occasion, I have waited in traffic for over 30 minutes to cross the railway at Thatcham station in the evening rush hour.) The A4 will experience a significantly higher volume of traffic as will local roads. This is not a sustainable solution for now and even less so with the proposed NE Thatcham development. Thatcham station does not have adequate parking facilities at present. No consideration has been given to the significant increase in numbers of people travelling by train particularly to Reading and London if the development went ahead.</p> <p><b><u>Health care</u></b></p>	<p>package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Healthcare services are already stretched locally. Prior to Covid it could take up to 3 weeks to get a non-urgent appointment at the doctors, even urgent appointments weren't available on the same day. The current healthcare provision is inadequate without any further development. The NE Thatcham development proposal doesn't include any information to support the increase of 2,500 houses and households and the demand on stretched healthcare services locally and regionally.</p> <p><b><u>This level of development is inappropriate for West Berkshire</u></b> Given the flood-plain and AONB, West Berkshire is already at the limit of its development potential. The increase in size of the no-development zones around AWE Aldermaston and Burghfield have further reduced the area available for development. As such, either the no-development zone around the AWE bases needs to be challenged and reverted back to its previous size, or the total number of houses planned needs to be scaled back in line with the new restrictions. I hope you will consider my points of objection in your consultation process.</p>	<p>parameters of the site, height parameters, green open space, etc.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In regards to light pollution, policy DM4: Environmental nuisance and pollution has been strengthened to ensure that all reasonable steps are taken through design, siting and technological solutions to ensure the abatement of obtrusive light to avoid sky glow, glare and light spillage, intrusion and any adverse impact to wildlife. Applicants should adhere to the guidance on lighting provided in the most up to date Institute of Lighting Professionals (ILP) guidance notes, alongside other relevant local documents including the North Wessex Downs AONB 'A Guide to Good External Lighting' (2021).</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR also requires the submission of a lighting strategy.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely</p>

Respondent <i>(with lpr ref)</i>	Response	Council Response
		<p>infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government's standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p>
Claire Francis (lpr1350)	<p>I write to express my concern for the plan of the above.</p> <p>These plans will affect everyone, from loss of wildlife, pollution, traffic, over crowding, school places, doctors / dentists, unemployment.</p> <p>There doesn't seem to be any plans for amenities when most are already at capacity.</p> <p>During lockdown we have walked this area very much to enjoy the nature and countryside and it would be a great loss.</p> <p>It could affect the flooding in Thatcham, after all the money that has just been spent on this scheme.</p> <p>It would a great shame if this got the go ahead.</p>	<p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation</p>

Respondent (with lpr ref)	Response	Council Response
		<p>18 consultation to strengthen the Council’s policy on pollution.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>Concern regarding infrastructure provision is noted. 		<p>LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In regards to concerns raised in relation to the loss of a recreational resource, within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thattham to the AONB. This will be accessible to all.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thattham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p>
Peter Warne (lpr378)	<p>I first moved to Thattham 42 years ago and then, in 1994, to Upper Bucklebury. My objections relate specifically to Upper Bucklebury but also to Thattham.</p> <p>It is important to bear in mind that Upper Bucklebury is within the AONB and that its separation from the urban sprawl of Thattham is a vital part of its rural character and an important factor in the quality of life enjoyed by its residents. The ultimate result of this planned development would be the virtual absorption of this village into Thattham. At the very least, the considerable increase in vehicle traffic through the village will add to the existing traffic calming issues and the danger to pedestrians, cyclists and horse riders.</p> <p>The impact vastly increased traffic on our local roads is a massive concern. The A4 is already extremely busy in morning and evening rush hours (in normal times) and as the number of homes and thus vehicles expands more and more drivers will use our local rural roads as "rat runs" to avoid the jammed main road. Broad Lane and its continuation through Chapel Row,</p>	<p>Comments noted. In relation to the comment regarding the AONB, a landscape sensitivity assessment has been undertaken for the site and will be published with the draft version of the LPR to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the draft version of the LPR will set out that a landscape and visual impact assessment is undertaken for the site which will be informed by the landscape sensitivity assessment. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Southend Bradfield past Englefield Park to join the A4 or M4 are simply inadequate to carry substantially more traffic safely.</p> <p>Also of concern is the likely huge increase in new Thatcham residents, understandably, using Bucklebury Common, Blacklands Copse and other nearby countryside for leisure purposes. This has been a noticeable side effect of the recent Covid 19 lockdowns. Whilst most people behave responsibly a minority do not, evidenced by the increase in littering, fly tipping and hooligans churning up footpaths and tracks with 4x4s and motor cycles. Our local wildlife will, no doubt, also be threatened by the increase in human activity.</p> <p>The green belt indicated on the plan maps is only vaguely described but it will certainly fail to compensate for the destruction of the present vista over the Kennet Valley from the Southern edge of Blacklands Copse as the footpath continuation of Long Grove emerges from the copse.</p> <p>In the village itself both Peaches Store and the Cottage Inn may well benefit from an increase in trade although, in the case of the pub this may not be altogether beneficial to residents of Broad Lane and Long Grove. It is hard to foresee any benefit to Upper Bucklebury but easy to see many downsides. Moving on to Thatcham the addition, eventually, of 2,500 homes, increasing the population by some 25% with minimal addition to the infrastructure of the town will merely exacerbate the unbalanced nature of the place. The size of Thatcham will be approaching that of Newbury but with a fraction of the essential infrastructure that makes a town an attractive place to live. Whilst the plan notes the benefit to the community of additional infrastructure, this seems to consist of schools (mainly to accommodate the additional children resulting from the additional population on this development) and some unspecified local shops. A notable omission is a doctors' surgery/medical centre. None of this additional infrastructure will benefit existing residents of either Upper Bucklebury or Thatcham.</p> <p>Thatcham already suffers from urban sprawl and a town centre and leisure facilities more suited to a large village than a town of 26,000 people. A further potential 10,000 inhabitants will worsen a bad situation. The main A4 road will become increasingly jammed, side roads will become rat runs and the main exit route South over the level crossing will become almost impossible, assuming no bridge will be built.</p>	<p>In relation to comments on highway impact, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks. The impacts can be reduced with suitable mitigation and the Council is developing a package of highway mitigation measures alongside further modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicle journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to comments on the impact of existing open spaces, the development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population). The site is not within the Green Belt (no Green Belt in this District).</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Changes: I would prefer no further major development of Thatcham but would suggest if some is dictated it should be at the Western end of this proposed development, ideally a maximum of 500 new homes.</p>	<p>The concern regarding infrastructure provision is noted. The council will not permit development which does not provide the infrastructure to support it. An Infrastructure Delivery Plan has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers.</p> <p>The site alongside the larger site area, is well related to the existing town of Thatcham. It is in close proximity to a range of services and facilities, including the train station. Thatcham is an urban area with a wide range of services and opportunities for employment, community and education. Development of a strategic nature at this site would support the service provision and regeneration that Thatcham requires.</p>
Sarah Strong (lpr1351)	<p>We are writing as a family to voice our strong opposition to the proposed future development in Thatcham of 2500 homes.</p> <p>We live at &lt;personal information removed&gt;and have lived in Thatcham for 19 years. We moved to our current house in 2011 and what immediately drew us to want to live here was its proximity to the surrounding countryside and being on the edge of the town. We walk our dog in the fields behind our home everyday and love the fact that we can just walk out of our door to get there. We regularly walk from Thatcham up to Cold Ash and Bucklebury and enjoy the views from all the fields that you propose to build on. During lockdown, the ability to get outside and walk in beautiful countryside has greatly enhanced our ability to cope and improved our mental health during this challenging time. Your proposals would impact us hugely positioning our home right in the centre of this vast development so instead of seeing sheep out of our window we would see nothing but rooftops. Access to countryside would have to involve a drive in the car to get there if we didn't want to first weave our way through a gigantic housing estate.</p>	<p>In regards to concerns raised in relation to the loss of a recreational resource, within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB. This will be accessible to all.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>In the past two years we have experienced the huge disruption and noise from the construction of the flood defence scheme in the field adjacent to our home. The noise during this time was unbearable at times and the developer themselves admitted as much when they brought round bottles of wine to each household to apologise for the disturbance. Then the replacement of water pipes and the upgrading of the water pumping station on Harts Hill Road which shut the road for months meaning a detour of 15 minutes to transport our children to school in Bucklebury. The thought of being surrounded by a building site for potentially 10 years with the number of houses proposed is distressing.</p> <p><b>FACILITIES</b></p> <p>When looking at the area covered by this potential development it is staggering, and looks to add another 50% at least to the size that Thatcham already covers. The town centre just does not have anywhere near the services, or facilities to meet the demands of this number of additional homes. You propose to build new centres such as by the mill roundabout but I cannot see what would fit there as an additional resource without building on the park and it already has all the units filled with takeaways, hairdresser and the coop.</p> <p>Our current leisure amenities are desperately underfunded and inadequate for the number of people currently living in Thatcham. It is sometimes almost impossible to find a parking space at the leisure centre for prepaid for swimming lessons (Pre-COVID) and more often than not there is not one working shower to rinse off after these swimming sessions.</p> <p>At present our library, toilets and youth services are desperately underfunded and barely accessible. The library is often staffed by volunteers and the toilet block in the town only narrowly escaped closure recently following strong opposition from local residents.</p>	<p>context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver ‘a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a ‘living document’ and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham’s flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In regards to water supply, the developers are aware of the requirement for upgrades to the water supply network and water treatment works (which is identified in the Water Cycle Study).</p> <p>Should the development go ahead, it would be phased appropriately to ensure it does not outpace delivery of essential network and treatment upgrades (See IDP).</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an integrated</p>

Respondent (with lpr ref)	Response	Council Response
	<p>SEWAGE/WATER</p> <p>Thames Water are already struggling to cope with the current population in Thatcham, and have been served notice to clean up their act. There seems to be never ending works to patch up problems with frequent road closure to deal with leaks etc.</p> <p>Despite the recent flood alleviation works, the ground for the proposed development is currently saturated, the A4 outside the Crematorium is frequently flooded, as are other patches along this stretch of the road, all the way to Theale. The fields above the flood alleviation scheme where more homes are proposed are completely waterlogged as the water is held back by the bund. Imagine what would happen if this ground was concreted over not giving any field to absorb this water?</p> <p>The Mill house roundabout is more often than not flooded and running down Harts Hill Road (and this is now after the flood defence was put in).</p> <p>We on Harts Hill often end up with low water pressure and Bucklebury is at least without water every month or so, this is even after the year that Harts Hill road was shut (causing chaos) we were all told this was to put in new pipes and water pumping station to Bucklebury, all of which over a year later has still not been commissioned and the old pipes are still in the ground and causing issues for us all. How do you think this will cope with another 2,500 homes added?</p> <p>ESSENTIAL SERVICES</p> <p>We regularly experience anti-social behaviour nearby especially from The Mill House public house and cars speeding along Floral way and doing wheel spins constantly around the roundabout. There are no police patrols to deal with this as they simply do not have the manpower. 2500 additional homes will exacerbate this, will there be extra provisions for this?</p>	<p>water supply and drainage strategy which will consider existing related infrastructure on the site.</p> <p>In regards to waste water capacity, the developers are aware of the requirement for upgrades to the water supply network and water treatment works (which is identified in the Water Cycle Study).</p> <p>Should the development go ahead, it would be phased appropriately to ensure it does not outpace delivery of essential network and treatment upgrades (See IDP).</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an integrated water supply and drainage strategy which will consider existing related infrastructure on the site.</p> <p>The NPPF 2021 states that planning policies and decisions should aim to achieve healthy, inclusive and safe places which: ...are safe and accessible, so that crime and disorder, and the fear of crime, do not undermine the quality of life or community cohesion. The Police are consulted as part of the LPR process and planning application process to ensure that both functions are informed, positively planned, and co-ordinated with other measures such as financial contributions to make a significant contribution to tackling crime.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern</p>

Respondent (with lpr ref)	Response	Council Response
	<p>We have no A&amp;E department at our local hospital, no maternity unit and waiting times for routine doctors' appointments is in some cases are 12 weeks and that was pre Covid!</p> <p>ENVIRONMENT</p> <p>The effect on rural communities are such that are Bucklebury, Woolhampton and Cold Ash boundaries will be non-existent, merging everything in to the New Thatcham.</p> <p>Thatcham Vision found residents in favour of Brown Field development.</p> <p>We are concerned about the impact on the habitats of all the wildlife currently living in the fields and woods that would be destroyed to make way for this development. This includes potentially endangered species (including nightjars, adders, glowworms, slow worms, woodlarks, foxes, badgers, deer and bats) all of which will suffer a decline when disturbed. Can you please advise what commitments West Berkshire have signed to in terms of protecting the countryside and biodiversity? Providing 'public green spaces for all to use' does not compensate for the loss of these habitats.</p> <p>TRANSPORT</p> <p>Traffic is already congested at the Floral Way and Siege Cross Roundabouts– right down to the train station.</p> <p>HGV's travel in these areas all day, every day, due to the distribution centres in Pipers Way</p> <p>Roads are in an awful state, covered in potholes and not wide enough to handle and increase in traffic.</p>	<p>and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In regards to the development of brownfield sites, when determining which new sites to allocate the Council are only able to consider land that is submitted to them through the HELAA. The HELAA includes brownfield sites that the Council are aware of.</p> <p>The supporting text to policy SP12 (Approach to Housing delivery) of the emerging draft LPR identifies that several sources will ensure a continuous supply of land across the plan period. These include amongst others, existing planning commitments (unallocated sites with planning permission), many of which are brownfield sites.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>There is limited parking at the train station, and SSE staff have caused problems with residents as parking on housing estates. There is no provision for additional commuters?</p> <p>Bus services to Newbury and Reading are limited particularly from North Thatcham. I would have to walk 15 minutes into the town centre to get to a bus stop to take me into Newbury. The bus service is also so expensive compared to driving that I inevitably choose the latter.</p> <p>I am very concerned that further development will only add to put further strain on already struggling resources and crumbling infrastructure and strongly oppose it going ahead.</p> <p>I look forward to hearing your response.</p>	<p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p>

Respondent (with lpr ref)	Response	Council Response
John Peacock (lpr1352)	<p>I write in the strongest terms to voice my objection to the proposed development of 2500 houses between thatcham and Upper Bucklebury.</p> <p>My main concern is the impact of building what in effect is a small town at the very edge of this area of natural beauty and the devastating impact on the environment this would cause.</p> <p>At this moment in our history to undertake such an activity seems at best reckless and at worst, against every voice of reason and balance, citing urbanisation and breaking up the natural world as catastrophic for the future of our planet.</p> <p>I do not have the time to construct a detailed and more thorough technical argument but would summarise the main elements of my objection as:-</p> <p>Light and noise pollution</p> <p>Loss of green space</p> <p>Flooding risks</p> <p>Emissions and waste from increased homes</p> <p>Impact on the wildlife and flora in this special area</p> <p>Traffic impact and safety of increased vehicles along rural roads.</p> <p>Impact of 3 or 4 thousand more people on the walking areas of the common and surrounding woodlands, footpaths and bridleways.</p> <p>Others I know will provide substantive arguments against the process, identifying the flaws in the WBC approach, source data and information used in the decision making. For me I just wish to say, no to this proposal, look to</p>	<p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local</p>

		a new community park linking Thatcham to the AONB. This will be accessible to all.
David Copas (lpr1429)	<p>[Letter attached. Other comments added to other relevant consultation points]</p> <p>SP17 sets out that ‘The Council will be supportive of proposals which have regard, and positively respond, to the master-planning work contained in the Thatcham Strategy Growth Study (2020)’. It then lists features the NE Thatcham Strategic allocation may be expected to deliver. However the residents of Bucklebury and Thatcham do not see it that way and their responses should give the Council grave cause for concern. The main objections are listed below:</p> <ul style="list-style-type: none"> <li>• Flawed housing demand analysis</li> </ul> <p>The analysis of housing demand predicating this draft proposal relies on out-of-date information. It fails to take account of the most major medical, social and economic catastrophe to impact our lives in the last 100 years. The Covid – 19 pandemic has transformed the way people work, travel and their housing needs yet this factor is ignored in the proposals. Furthermore, taking WBC’s own housing demand figures, these show a need for less than 1700 homes not the 2500 proposed.</p> <ul style="list-style-type: none"> <li>• Strategic Gap</li> </ul> <p>A tenet of past planning in West Berks has been the maintenance of strategic gaps to separate communities. Until this proposal was tabled, the land north of Floral Way has provided the gap between Thatcham and Bucklebury. The proposal all but eliminates the separation and will visually and socially break natural community boundaries. Breach of the strategic gap has been cited by WBC to refuse planning applications in the recent past. It is incomprehensible that its loss is now proposed.</p>	<p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government’s standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p> <p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• Traffic</li> </ul> <p>A development of the scale proposed will generate considerable traffic but the analysis in the proposal underestimates the volume and impact on the Parish. It is assumed that the bulk of the new traffic will use the A4, accessed via Floral Way. However, the A4 is already overloaded at peak times and new residents will look to find alternative routes. These inevitably will be through the Parish for those looking to access the A34 and the M4. The roads through these villages are ill suited to additional traffic; they are rural, single carriageway roads mostly lacking footpaths and featuring blind bends. Speeding is a well known problem in the Parish and more cars will make a dangerous situation worse. The village roads are used by pedestrians, horses and cycles. Additional traffic makes accidents more likely and will endanger children walking to school.</p> <ul style="list-style-type: none"> <li>• AONB and Bucklebury Common</li> </ul> <p>It is clear that the proposed development to the north-east of Thatcham involving 2500 houses would have a big influence on the local wildlife.</p> <p>The proposed development abuts Bucklebury Common and AONB. This development would have a lasting and negative impact on these special environs. The impacts fall into two categories; those that impact the AONB directly and those resulting from the inevitable increase in visitors. The Common is protected because of its flora, fauna and its situation. It contains remnants of ancient and fragile habitats that are home to rare and protected wildlife. Importantly the plants in and bounding the AONB will suffer and the Common will be put under pressure from additional visitors. The AONB is already witnessing habitat damage from walkers, cyclists and motorised vehicles. The visitor numbers, from the proposed development, would exacerbate damage to a struggling ecology.</p> <p>Bucklebury Common, one of the few remaining areas of lowland heath lies just a kilometre or so to the north-east. It is well known for some special</p>	<p>The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>birds in particular the nightjar, but also the woodlark, tree pipit, stonechat and woodcock. These nest on the ground are very susceptible to disturbance especially by dogs. The development would put much more pressure on the heath and make successful breeding of these species much less likely.</p> <p>So the council's attention should focus on this impact of the proposed scheme not highlighted in the Biodiversity and Green infrastructure. Just visible at the north east edge of the plan on page 36 is the edge of Bucklebury Common, the eastern portion of which (east of the settlement of Upper Bucklebury) is an area of lowland heath, which has been restored by conservation management. This site is already subject to considerable recreational pressure. Heathland is a priority habitat identified in the Berkshire Local Nature Partnership Biodiversity Plan, and holds breeding populations of two of the priority species in the plan, Nightjar (<i>Caprimulgus europaeus</i>) and Woodlark (<i>Lullula arborea</i>). Another species on the UK's list of "Red Data" birds, Woodcock (<i>Scolopax rusticola</i>) also occurs, a species which has suffered a dramatic contraction in its UK breeding range (more than 50% in the 25 years to 2010) and numbers. These are ground nesting birds, vulnerable to disturbance. The wider area forms one the Berkshire's Biodiversity Opportunity Areas (BOA), known as Bucklebury Plateau (see - <a href="http://www.tverc.org/cms/sites/tverc/files/Buckleberry%20Plateau%20Description.pdf">http://www.tverc.org/cms/sites/tverc/files/Buckleberry%20Plateau%20Description.pdf</a>)</p> <p>As no doubt the council is aware, lowland heath is a threatened habitat important for a number of species of wildlife. Its global distribution is limited, with the UK having about 20% of the world's remaining area. About 80% of the UK's lowland heath has been lost since 1800. The Thames Basin Heaths of north Hampshire, west Surrey and south east Berkshire are an area of Special Protection (SPA) and now benefit from planning policies requiring the provision of suitable areas of natural greenspace (SANGS) as mitigation for any new residential development within 5 km of the heathland areas.</p>	<p>IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>In this case the site would introduce 2500 new households almost all within 2 km of Bucklebury Common, and we consider that mitigating the impact of the increased recreational pressure, and the opportunity to enhance biodiversity should have formed part of the scheme, consistent with current Local Plan Policy CS17, emerging policy SP11 and NPPF paragraphs 170 and 175.</p> <p>The restored area of Bucklebury Common referred to above is currently a relatively small fragment of heathland maintained by voluntary effort. It does though form part of a larger area within the Bucklebury Plateau BOA extending to the west of Upper Bucklebury that has potential for habitat restoration as heathland.</p> <ul style="list-style-type: none"> <li>• <b>Recommendation 7 – remove SP17 from the Local plan review.</b></li> </ul> <p><b>Conclusion</b></p> <p>In summary, I have serious concerns about the emerging draft Local Plan which can be addressed through adoption of the seven listed recommendations. Otherwise the impact on West Berkshire, Thatcham and especially the village of Upper Bucklebury will be very damaging. With increased traffic, a steady flow of visitors the consequential damage to the local environment, the character of our area would change forever and not for the better.</p> <p><b>Recommendation 7 – remove SP17 from the Local plan review.</b></p>	<p>parameters of the site, height parameters, green open space, etc.</p> <p>In relation to the concerns on the potential impact on Bucklebury Common, the development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population).</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p>
Peter Weedon (lpr1353)	<p>I wish to OBJECT to the scheme on the following grounds and quote from the Stage 3 Report "Thatcham Strategic Growth Study."</p> <p>1 The development is attempting to squeeze a quart into a pint pot due and is concentrating a disproportionately high area of West Berkshire Council's housing obligations into a small percentage of its total land holdings.</p>	<p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy</p>

Respondent (with lpr ref)	Response	Council Response
	<p>2 The entirety of the site is outside of the existing settlement boundary of Thatcham, currently closely drawn along Floral Way, the A4 and Pipers Way. (2.12)</p> <p>3 The West Berkshire Landscape Character Assessment outlines a landscape strategy for WH4 (Cold Ash Woodland and Heathland Mosaic) , which will inform development proposals at NE Thatcham. Key principles are:</p> <ul style="list-style-type: none"> <li>• Retain the distinction between and individual identity of settlements</li> <li>• Conserve elements that mark a transition between settlement and countryside (2.36)</li> </ul> <p>The development seriously undermines the “green gap” between Upper Bucklebury and Thatcham and will ultimately merge the two.</p> <p>4 North Wessex Downs AONB Board has stated its objection to development on all the sites that make up NE Thatcham, through the HELAA process, due to the impact on the setting of the AONB and the breaking of the Floral Way boundary. (2.47)</p> <p>5 There is a risk of surface water flooding within the site along the natural drainage routes based on Environment Agency modelling (2.51)</p> <p>6 Development at NE Thatcham breaks out of the valley bottom that has defined Thatcham’s extent (4.2)</p> <p>7 It is important to note that Thatcham has few examples of hillside development, and so extending the urban grain and pattern of the immediate surroundings is unlikely to achieve a positive result. (Design Principles 4.5)</p>	<p>notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just</p>

Respondent (with lpr ref)	Response	Council Response
	<p>8 The highways strategy is to direct traffic away from rat-running through Cold Ash and Bucklebury by routing vehicle traffic southwards towards the A4. (4.21).</p> <p>This is unlikely to be effective in practice as evidenced by the increase in traffic through Upper Bucklebury every time there is an accident/congestion on the A4.</p> <p>9 This study proposes that capital funding for the new secondary school within North East Thatcham would be 50% funded by the developers, delivered through a Section 106 agreement on developer contributions. (5.2)</p> <p>I seriously question West Berkshire Council's ability to fund the balance and ongoing costs of the school.</p> <p>10 As an Upper Bucklebury resident I am also concerned with the impact of:</p> <ul style="list-style-type: none"> <li>• Increased light pollution – no reference in the document</li> <li>• Substantial increase in noise pollution and detrimental impact on quality of life – decades of construction work</li> <li>• Increased air pollution – increase in traffic</li> </ul>	<p>changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the</p>

Respondent (with lpr ref)	Response	Council Response
		<p>LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is</p>

Respondent (with lpr ref)	Response	Council Response
		<p>undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p>

Respondent (with lpr ref)	Response	Council Response
Deborah Jarrett (lpr1354)	<p>I would like to strongly <b>OBJECT</b> to the <b>NE Thatcham Development of 2500 homes</b> you are proposing as part of the Local Plan Review 2020 -2037 Emerging Draft December 2020 document. My reasons are:</p> <p><b><u>Closing of gap between Thatcham and Upper Bucklebury</u></b></p> <p>The proposed large scale housing development shows no considered planning or analysis of housing, infrastructure or community need. Rather than meeting this need and the identification and use of suitable brown field sites to do so, the focus appears to be the use of a large parcel of high grade agricultural land and greenfield site which is in an inappropriate and unsuitable location for a large scale housing development. Not least, the proposed site for the housing development breaks the strategic gap which exists between Thatcham and Upper Bucklebury and would inevitably lead to Thatcham and Upper Bucklebury becoming one.</p> <p><b><u>Increase in Traffic through Upper Bucklebury</u></b></p> <p>There will be a significant increase in the numbers of commuters and other road traffic users who will use the back routes through the villages to avoid the congestion on the A4 and around Thatcham should the proposal go ahead. Upper Bucklebury will see far in excess of the percentage suggested of traffic going through the village towards Reading and along Burdens Heath towards the A34 and M4. The roads, and villages they run through, were not designed to support this level of increased traffic and where the health and safety of residents of all ages in the villages is compromised. The speed restrictions along Burdens Heath, which has no pavement, are often not observed and this road is already dangerous for pedestrians.</p> <p><b><u>Proximity to North Wessex Downs ANOB and Impact on wildlife</u></b></p> <p>Bucklebury Common lies within the North Wessex Downs AONB and is a protected habitat for wildlife. A major reason it exists is to conserve and</p>	<p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation</p>

Respondent (with lpr ref)	Response	Council Response
	<p>protect the diversity of flora and fauna. This is especially important where often native species are in decline. The close proximity and scale of the proposed development will have a significant detrimental impact on local nature and wildlife. A resulting increase in visitors to the Common will mean increased disturbance of nesting sites and habitats and will, over time, cause a detrimental effect on the species living within the Common. Damage caused by the number of 4x4 vehicles illegally driving through the common would be more likely to increase. Volunteers from Upper Bucklebury and the surrounding parish work hard to maintain the Common and reduce the rubbish, waste and damage it already suffers.</p> <p><b><u>Dark skies</u></b></p> <p>The scale of the proposed development and resulting light pollution will have a significant environmental and public impact of further reducing dark skies. It will have a negative impact on wildlife and their habitats and will have a detrimental effect on the night sky for residents in Upper Bucklebury and the surrounding parish.</p> <p><b><u>Impact on Thatcham Station</u></b></p> <p>An additional 2,500 homes and their households will have a hugely negative impact on the local road networks, particularly on the road to the Thatcham level crossing especially during peak times in the morning and evening. The A4 will experience a significantly higher volume of traffic as will local roads. This is not a sustainable solution for now and even less so with the proposed NE Thatcham development.</p> <p>Thatcham station does not have adequate parking facilities at present. No consideration has been given to the significant increase in numbers of people travelling by train particularly to Reading and London if the development went ahead.</p>	<p>packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the</p>

Respondent (with lpr ref)	Response	Council Response
	<p><b><u>Health care</u></b></p> <p>Healthcare services are already stretched locally. Prior to Covid it could take up to 3 weeks to get a non-urgent appointment at the doctors, even urgent appointments weren't available on the same day. The current healthcare provision is inadequate without any further development. The NE Thatcham development proposal doesn't include any information to support the increase of 2,500 houses and households and the demand on stretched healthcare services locally and regionally.</p> <p><b><u>This level of development is inappropriate for West Berkshire</u></b></p> <p>Given the flood-plain and AONB, West Berkshire is already at the limit of its development potential. The increase in size of the no-development zones around AWE Aldermaston and Burghfield have further reduced the area available for development. As such, either the no-development zone around the AWE bases needs to be challenged and reverted back to its previous size, or the total number of houses planned needs to be scaled back in line with the new restrictions.</p> <p>I hope you will consider my points of objection in your consultation process.</p>	<p>Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In regards to light pollution, policy DM4: Environmental nuisance and pollution has been strengthened to ensure that all reasonable steps are taken through design, siting and technological solutions to ensure the abatement of obtrusive light to avoid sky glow, glare and light spillage, intrusion and any adverse impact to wildlife. Applicants should adhere to the guidance on lighting provided in the most up to date Institute of Lighting Professionals (ILP) guidance notes, alongside other relevant local documents including the North Wessex Downs AONB 'A Guide to Good External Lighting' (2021).</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR also requires the submission of a lighting strategy.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>

Respondent <i>(with lpr ref)</i>	Response	Council Response
		<p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government’s standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p> <p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council</p>

Respondent (with lpr ref)	Response	Council Response
		is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.
Melanie Pocock (lpr1355)	<p>I wish to add my voice to the many objecting to the proposal to build 2,500 homes in North Thatcham.</p> <p>I object to the plans on every level and fail to find any positive from carrying out this development.</p> <p>My main concerns are the impact on the local environment, the increased levels of pollution from traffic, light, noise, personal waste, litter.....</p> <p>The loss of rural countryside, the loss of the quiet lanes, increased footfall and traffic in the green spaces of Upper Bucklebury and surrounding areas.</p> <p>This is green belt, it is not supposed to have a town in it! Villages are the quintessential backbone of rural counties such as ours, they are not supposed to be attached to a sprawling new housing development.</p> <p>At this time with the pandemic still in place, the impact of this huge global event will no doubt find the sad situation of many unoccupied buildings once the full financial impact is felt. Therefore is it not sensible to wait and re-use these potential sites.</p> <p>Emotions run high and I could go on, but for now, this life long resident says NO, NO, NO and will give her full support to any campaign that brings the council to its senses.</p>	<p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure</p>

Respondent (with lpr ref)	Response	Council Response
		<p>which will include a new community park linking Thatcham to the AONB.'</p> <p>The site is not within the Green Belt (there is no Green Belt in this District).</p> <p>In relation to the plan being prepared prior to the coronavirus pandemic, the full impact of the COVID 19 pandemic will not be fully apparent for some time. The LPR is a long term strategy to 2039, during which time a review will be conducted every 5 years. The impact of changes in response to macro and local economic factors will be assessed through subsequent reviews, once such implications are realised.</p>
Katie Beeson (lpr1356)	<p>I would like to strongly object to this proposed development.</p> <p>It would effectively join Upper Bucklebury with Thatcham, and alter our village beyond recognition.</p> <p>It is a massive over development of the Countryside.</p> <p>It will have a significant negative impact on traffic. The traffic in the village is bad enough already.</p> <p>It will significantly increase the noise and light pollution in Upper Bucklebury. At present we have no street lights and we can clearly see the stars on a clear night.</p> <p>It will put enormous pressure on Bucklebury common, other communal areas, and on the local wildlife. We need to protect and preserve our special local habitats and wildlife for future generations.</p>	<p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more</p>

Respondent (with lpr ref)	Response	Council Response
	<p>There will be significant issues concerning flooding if this large area of land is built on.</p> <p>This development would be sentencing those living nearby to 15 years of construction work with all the associated noise and inconvenience.</p> <p>This development is far too big, out of keeping with a post-covid world, and situated totally in the wrong place.</p>	<p>housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys</p>

Respondent (with lpr ref)	Response	Council Response
		<p>from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>In relation to the concerns on the potential impact on Bucklebury Common, the development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population).</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology</p>

Respondent (with lpr ref)	Response	Council Response
		<p>strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p>
Louise Harry (lpr1358)	<p>I am writing to voice my <b>objections</b> to the proposed NE Thatcham development (Policy SP17). I am a resident of Upper Bucklebury, and have lived in the village with my family for 10 years.</p> <p>My objections are based on review of the consultation document plus supporting material, including:</p> <ul style="list-style-type: none"> <li>• Thatcham Strategic Growth Study 2019 (David Lock Associates)</li> <li>• West Berkshire Land Character Assessment 2019 (LUC)</li> <li>• Flooding in Thatcham 2008 (Sue Everett)</li> <li>• West Berkshire Environment Strategy 2020-2030</li> <li>• West Berkshire Local Plan Review to 2036 Sustainability Appraisal / Strategic Environmental Assessment 2019</li> <li>• Kennet Catchment Management Plan 2018</li> </ul> <p>As a result, I wish to <b>object</b> on the grounds of:</p> <p><b>Breaching of the Floral Way settlement boundary</b> Extending Thatcham to the north-east will continue to destroy the rural areas so highly prized by West Berkshire in all its planning material. In the LCA, the following detractors' (to the distinctly rural environment of the area) are described - each one of these will be made worse by this development:</p> <p><b>Decreasing separation/coalescence between settlements</b> <i>The expansion of Thatcham and Newbury since the mid-20th century, and also of villages within the character area, has reduced the physical and perceptual separation between settlements. This is particularly evident at the</i></p>	<p>As part of the preparation of the LPR the council has undertaken a Settlement Boundary Review (SBR).The settlement boundary criteria make clear that boundaries will include sites allocated through the Local Plan process. North East Thatcham is proposed for allocation under policy SP17. Should the site, or any part of it, be removed from the LPR the boundary for Thatcham would be adjusted to exclude it. It is acknowledged that the settlement boundary is currently drawn around the whole of the proposed allocated site at North East Thatcham whilst Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.' The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. At this stage it is therefore not possible to draw the settlement</p>

Respondent (with lpr ref)	Response	Council Response
	<p><i>western end of the character area, where there is near coalescence along the main connecting roads between Newbury and Thatcham, Cold Ash, Ashmore Green, Curridge and Hermitage.</i></p> <p><b>Increased suburbanisation</b> <i>Modern housing along main routes and on adjacent cul-de-sacs, together with street lighting and pavements, has introduced suburban characteristics to some places, particularly where there is less tree cover to mask changes e.g. the southern end of Cold Ash and linear development along the B4009 Long Lane just north of Shaw. Incremental development of the countryside settlements is also an issue, including the enlargement of curtilages, security lighting, entry gates etc.</i></p> <p><b>Loss of gradation between settlement and countryside</b> <i>Farm buildings and small pasture fields adjacent to settlements have proved vulnerable to development (typically of small residential clusters), due in the former case to presence of existing structures and in the latter to the screening/containment provided by boundary features. However, farm buildings, even when development has left them adjacent to settlement edges, contribute to rural character when they retain a relationship with farmland; and small enclosures, even when used as paddocks, form a transition between settlement and countryside that can contribute positively to landscape character, particularly when they retain a relationship with a historic settlement core.</i></p> <p><b>Increased traffic on the rural lane network the following detractors are already happen and will only get worse:</b> The Siege Cross planning rejection from 2015 references so many reasons for it being declined (beyond just not being part of a development plan). All of those reasons in point 3 (Landscape and Visual Character) still apply with the current proposal, and more so; the fact that the proposal has been included in the development plan does not suddenly mean those previous reasons for objection have been remedied. The rejection of that section follows the individual points of rejection by stating:</p>	<p>boundary any tighter. As the LPR progress and more detailed work is done on the sensitivity and capacity of different parts of the site to accommodate development the boundary will be amended accordingly.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure</p>

Respondent (with lpr ref)	Response	Council Response
	<p><i>For the above reasons the development fails to have due regard to the sensitivity of the area to change. The development is inappropriate in terms of its location over the whole site, and its scale in the context of the existing settlement form, pattern and character of Thatcham. The development also fails to conserve the historic landscape setting and rural context of Siege Cross Farm.</i></p> <p>The settlement boundary is there for a reason, and West Berkshire highlighted many of those reasons very eloquently in rejection of the proposal.</p> <p><b>Increased risk of flooding and urban run-off</b> As stated in the LPR, appendix 4b: <i>There is a risk of surface water flooding with the site along the natural drainage routes based on EA modelling. The site is crossed by a number of ephemeral watercourses and these corridors would need to form part of a wider SuDs strategy to help manage the run-off from any new development.</i> All WBC supporting material speaks of mitigation measures, and yet the flooding in 2007 (regarded as a 1-in-200 year event, despite the EA assessment of it being a 1-in-169 years) seems to fall outside the planning horizon for risk planning; what hope can we have that these measures will be effective, especially given that <i>'the risk of flooding continues to escalate; making the events that shattered so many communities [in 2007] an ever increasing threat.'</i> (Pitt Review (2008))</p> <p>As the Flooding in Thatcham (2008) report states, 'the principal source of floodwater [in the 2007 floods] was run-off from farmland to the north of Thatcham.' In my recent conversation, with Sue Everett, author of the report, she remarked that it would be "utter madness to build on that slope" (referencing the designated area to the NE of Thatcham).</p> <p>Regarding the further effects of run-off, Sue Everett spoke of the dangerously high levels of phosphates and nitrates already impacting the Kennet Valley, and that development in NE Thatcham would add considerable urban run-off as the LPR states:</p>	<p>which will include a new community park linking Thatcham to the AONB.'</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the</p>

Respondent (with lpr ref)	Response	Council Response
	<p><i>The Kennet and Avon Canal, south of the railway line, is a Site of Special Scientific Interest and development to the north would have to consider the water quality of any surface water discharged to the south.</i></p> <p><b>Impact on AONB through loss of separation from urban settlements and increase in traffic (pedestrian / cycle / automotive)</b></p> <p>As mentioned in (a), above, breaching the settlement boundary will have huge impacts on the AONB, both in terms of the rural character, and materially on the quality of life in those settlements adjoining THA20. Aside from the 'loss of greenfield land' (mentioned in the LPR, appendix 4), the LPR also states the 'site is of such a scale that it would provide new services and facilities that would be available to surrounding settlements like Cold Ash and Bucklebury', which clearly indicates the impact it will have, just from the point of view of facilities, potentially threatening the local shop, the local school etc., but also in terms of bringing Thatcham closer, adding traffic to local lanes (which have no pavements), and eroding still further the fragile commercial, cultural and environmental nature of the settlements within the AONB.</p> <p>As stated in DC1: <i>Planning permission will not be granted where a proposal harms or undermines the existing relationship of a settlement within the open countryside, where it does not enhance the character and distinctiveness of the rural area, including the special qualities and natural beauty of the landscape of the AONB or where development would have an adverse cumulative impact on the environment or highway safety.</i></p> <p><b>Destruction of ancient forest land, fragile ecosystems (including AONB and SSSI, and land supporting protected species under European law), both through direct and adjacent loss of habitat, threatening biodiversity and general ecological well-being</b></p> <p>As the LPR states, the development site contains ancient woodland. According to the Government website:</p>	<p>corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to potential impact on surface water, all new development must include sustainable drainage measures, and development must be avoided on areas that are at risk of surface water flooding. Development on the site will be expected to deliver surface water management approaches that could deliver a net gain for Thatcham town. Drainage and flood attenuation works are included in the IDP.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan'</p>

Respondent (with lpr ref)	Response	Council Response
	<p><i>Ancient woodland takes hundreds of years to establish and is defined as an irreplaceable habitat. It's important for its:</i></p> <ul style="list-style-type: none"> <li>• <i>wildlife (which include rare and threatened species)</i></li> <li>• <i>soils</i></li> <li>• <i>recreational value</i></li> <li>• <i>cultural, historical and landscape value</i></li> </ul> <p>The LPR also states that the most recent TVERC study revealed there to be protected and priority species within the development area.</p> <p>If both of these factors aren't enough, the loss of greenfield habitat will drive species into adjacent (largely wooded and heathland) habitats, resulting in fragile ecosystems coming under further pressure (reduced space, resources etc.), upsetting the delicate balance of these ecosystems.</p> <p>This <u>will</u> result in a loss of biodiversity. Extend that still further to Bucklebury Common and its adjoining woodlands, a profoundly fragile environment already under pressure from illegal motor vehicle use, for example, and WBC / Developer assurances of a net gain in biodiversity do not have any credibility whatsoever. Proposals speak of much of the area being a designated '<i>Biodiversity Opportunity Area, part of the Bucklebury Plateau BOA, and the site is within a local habitat network.</i>' It goes on to state that this '<i>indicates that a net gain in biodiversity should be delivered through development.</i>' Improving biodiversity in the upper slopes of THA20 is not going to make up for the loss of habitat that construction of 2500 homes and its supporting infrastructure have on the rest of the proposed development area.</p> <p>By way of additional context, the country's habitat is under extreme pressure, and focusing on biodiversity without paying attention to abundance is neglectful:</p> <p>A 2019 New Scientist article (<a href="#">Thousands of UK wildlife and plant species are in decline</a>) includes the following:</p> <ul style="list-style-type: none"> <li>• <i>Of the species that we have more detailed data on, nearly 700 saw their numbers fall [since the 1970s] by 13 per cent. The declines</i></li> </ul>	<p>/ visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>Biodiversity net gain was introduced through the NPPF and is referenced in paragraphs 174 d) and 179 b) and the Natural Environment Planning Practice Guidance (PPG) provides further explanation on how this should be done. Mandatory biodiversity net gain is now set out in the Environment Act 2021 and applies in England only through the amendment of the Town &amp; Country Planning Act (TCPA) and is due to be enforced from November 2023. The mandatory requirement is to achieve at least a 10% biodiversity net gain increase from the pre-development biodiversity value. The requirement is framed as a pre-commencement condition, meaning that the biodiversity gain condition must be discharged before development can begin. Prior to the commencement of a development, a biodiversity gain plan must be submitted to the relevant planning authority for approval. The</p>

	<p>have left 15 per cent of species facing extinction, including the turtle dove, numbers of which are down 98 per cent in half a century.</p> <ul style="list-style-type: none"> <li>• “We have this pattern of ongoing loss, which is showing no slowing in the rate of decline. Overall, we are losing more species than we are gaining,” says Daniel Hayhow of the Royal Society for the Protection of Birds.</li> <li>• Hayhow calls [the decline in species numbers] a “canary in the coal mine signal” because changes in distribution usually happen much more slowly than changes in abundance.</li> </ul> <p>In a Dec 2019 paper, '<a href="#">Ongoing, but slowing, habitat loss in a rural landscape over 85 years</a>,' Ridding at al. make the following relevant observations, including the point that government performance on environmental management not only has a poor record, but is also guided by insufficient data:</p> <ul style="list-style-type: none"> <li>• <i>The National Planning Policy Framework sets out government's planning policies for England which requires that local authorities must ensure that any developments have minimal impact on biodiversity. Although the importance of protected areas for biological conservation is acknowledged, there is little empirical evidence of their effectiveness (Gaston et al. 2008; Greve et al. 2011).</i></li> <li>• <i>The findings [in this paper] illustrate a long history of habitat loss in the UK, and are important for planning landscape management and ameliorative actions, such as restoration. Our analysis also highlights the role of statutory protection in retaining semi-natural habitats, suggesting the need for continued protection of important habitats.</i></li> <li>• <i>many long-term [biodiversity] studies often focus on the last forty years at best.</i></li> </ul> <p>In other words, government and developer tendency to use biodiversity data from recent years masks the losses which have already occurred and gives us what can be referred to as "shifting baseline syndrome", through which there is an 'acceptance of the current low biodiversity state as being normal (Soga and Gaston 2018).'</p>	<p>biodiversity gains and losses of a development will be measured in 'biodiversity units', using a metric which uses habitats as a proxy for biodiversity and calculates units by taking account of the type, extent and condition of habitats. Natural England has recently published biodiversity metric which, subject to further consultation and any further updates, is expected to be the metric specified for mandatory biodiversity net gain.</p> <p>Highway works and active travel routes would assist in directing residents to using the A4/Floral Way rather than Harts Hill Road, and using an enhanced cycling and walking network to travel, including to Thatcham train station.</p> <p>In regards to water supply, the developers are aware of the requirement for upgrades to the water supply network and water treatment works (which is identified in the Water Cycle Study).</p> <p>Should the development go ahead, it would be phased appropriately to ensure it does not outpace delivery of essential network and treatment upgrades (See IDP).</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an integrated water supply and drainage strategy which will consider existing related infrastructure on the site.</p> <p>Housing provision must support the needs of the whole community, including the provision of both market and affordable housing, and reflect the needs of specific groups such as, but not limited to, families with children, single person households, the elderly, those households with specific needs, those wishing to build or commission their</p>

Respondent (with lpr ref)	Response	Council Response
	<p>On one recent walk along Cox's Lane, on the eastern edge of the proposed development area, numerous badger setts were noted, with entrances exposed to the lane itself. Aside from any lasting impact to such habitats once any residential or commercial development is established, the development work itself will dramatically alter the environment within which these animals, and their entire ecosystem, are living.</p> <p>The proposal's comment that '<i>Up to date ecological surveys will be required to determine detailed mitigation measures</i>' needs much more detail before it can be considered as having any merit.</p> <p>It is difficult for us to take WBC assurances of biodiversity seriously; there is so much documentation supporting these proposals and yet a recent TVERC analysis hasn't even been carried out, despite previous references to protected species. This does not inspire confidence in the priority of environmental protection, nor preservation of the overall rural context in which these species live.</p> <p>In addition to the points already made, the question of pollution (light, air, noise, water) needs to be addressed and barely seems to offer any acceptable outcomes - dark skies, a quiet environment (embodied by the network of quiet lanes in the Bucklebury parish), clean air (critical for our lichens and mosses, an important base layer in the ecosystem) and clean water are all impacted and will damage the AONB irreparably.</p> <p><b>Traffic congestion around NE Thatcham</b></p> <p>Thatcham's traffic issues are well-understood by any local resident, often leaving cars sitting in traffic queues along the A4 or at the level crossing for considerable lengths of time, hardly helping the council's carbon net-zero and healthy air ambitions. As the LPR states: <i>'Development would have a very significant impact on the local highway network.'</i></p> <p>The document then adds: <i>'Opportunities for modal shift should be maximised. A transport assessment would also be required.'</i></p> <p>Once again, we find the need for further analysis before this proposal can be considered as credible; it is hard to find any piece of data capable of</p>	<p>own home, gypsies, travellers and travelling showpeople and those seeking houseboat moorings. Developers will therefore need to consider housing mix in their proposals, including any local evidence of housing needs or evidence in Parish or Neighbourhood Plans which may be important considerations even for small sites, particularly in rural areas.</p> <p>In regards to the development of brownfield sites, when determining which new sites to allocate the Council are only able to consider land that is submitted to them through the HELAA. The HELAA includes brownfield sites that the Council are aware of.</p> <p>The supporting text to policy SP12 (Approach to Housing delivery) of the emerging draft LPR identifies that several sources will ensure a continuous supply of land across the plan period. These include amongst others, existing planning commitments (unallocated sites with planning permission), many of which are brownfield sites.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>In relation to the consultation taking place during the coronavirus pandemic, the Government published guidance in May 2020 with regard to planning and COVID 19: <a href="https://www.gov.uk/guidance/coronavirus-covid-19-planning-update">https://www.gov.uk/guidance/coronavirus-covid-19-planning-update</a>. This stated that "We continue to want to see Local Plans progressing through the system as a vital means for supporting economic recovery in line with the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>assuring anyone in the local community that adding 2500 homes into this area will do anything but cause huge disruption.</p> <p><b>Impact on an already-struggling local water supply</b> Water availability in the region is an issue, as the Kennet Management Plan (and my conversation with Sue Everett) makes clear. Additional development of this scale will only add to the depletion of resources.</p> <p><b>Failure to acknowledge housing needs based on household type, nor recognise the opportunities for commercial property re-use and town centre regeneration</b> SP12 (Approach to Housing Delivery) states: <i>Provision will be made for 8,840 to 9,775 net additional homes in West Berkshire for the period 1 April 2020 to 31 March 2037; 520– 575 dwellings per annum. The target figure of 575 dwellings per annum does not constitute a ceiling or cap to development.</i> In the most recent ONS household forecast data, which covers the period 2018 - 2028, the entirety of West Berkshire's housing growth is described as 2482, suggesting a 'necessary' annual figure (at least for the period covered) much lower than put forward in this proposal. Furthermore, regarding housing mix, the proposal (table 3 in SP12) shows that 60% - 70% of Market housing and 35% - 45% of Affordable housing will be 3 or 4 bedroom houses. ONS data shows that by far the highest growth in housing demand for West Berkshire will come from one-person households (10.7%, versus growth rates of -6%, -8.9% and -11.2% for families with 1, 2 or 3+ dependent children respectively). Given the housing mix suggested by the ONS forecast data, the proposal seems completely out of touch with the reality of local needs. In light of the changing nature of town centres, as retail moves on online, and an ageing population needing access to public transport, does it not make much more sense to repurpose unused commercial property for residential use, and in doing so change the declining nature of the high street, provide easier access to local facilities (especially for the ageing population) and reduce dependency on short car journeys clogging our streets and adding to the community's carbon footprint?</p>	<p>government's aspirations to have plans in place across the country by 2023.”</p> <p>A written ministerial statement (<a href="https://questions-statements.parliament.uk/written-statements/detail/2021-01-19/hcws720">https://questions-statements.parliament.uk/written-statements/detail/2021-01-19/hcws720</a>) published on 19 January 2021 set out the importance of work continuing to advance on Local Plans through to adoption by the end of 2023 to help ensure that the economy can rebound strongly from the pandemic.</p> <p>Changes were made to the Town and Country Planning (Local Planning) (England) Regulations 2012, under the Town and Country Planning (Local Planning) (England) (Coronavirus) (Amendment) Regulations 2020, to remove the need for local authorities to make hard copy documents available for public inspection for a temporary period from 16 July 2020 until 31 December 2021.</p>

Respondent (with lpr ref)	Response	Council Response
	<p><b>Lack of meaningful and timely democratic engagement in the review process, and lack of thorough analysis of key elements of the proposal</b></p> <p>On my final point, I would say, very strongly, that there has been a significant lack of community engagement to date in the review process. Regardless of any efforts made by West Berkshire to make development proposals visible, they have been insufficient, particularly given the challenging macro-context in which we are all currently living. As a result, awareness is poor, general understanding of detail is worse and timescales have become unreasonably tight to make sense of all relevant material. If West Berkshire Council truly believes that '<i>everyone in West Berkshire has a role to play</i>' (Environment Strategy 2020-30) in helping West Berkshire become the model for a better, more environmentally-aware and sustainable community, surely this begins by ensuring broad levels of engagement from the whole community. Many people we have spoken with on this topic were unaware of it until very recently. Even the LPR (appendix 4) notes that there have been no comments from Midgham PC, despite their parish being directly impacted by the proposal. Add to this a lack of completed analyses throughout, on key matters such as flood prevention, water availability, environmental impact and traffic, and it is clear, despite all the assurances made by WBC and its consultants, that there is much that is very wrong with this proposal.</p>	
Jonathan Sayers (lpr1359)	<p>I am making a response to the proposed Local Plan to 2037.</p> <p>As a Thatcham resident on the southern side of the A4 at &lt;personal information removed&gt;, I am aghast at the plans for a staggering 2,500 new homes on the northern side of eastern Thatcham.</p> <p>This area and the appalling consequences this would have on residents elsewhere in Thatcham and surrounding villages mean that this is a wholly unsuitable area for housing development.</p> <p>I have lived here since 2004 and for the first seven of those years, I lived off &lt;personal information removed&gt;; it was a real delight to enjoy walking very</p>	<p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity</p>

Respondent (with lpr ref)	Response	Council Response
	<p>regularly in the fields that are across the road. Nature is a precious gift we must cherish as a carbon sink and place of leisure and both physical and mental wellbeing.</p> <p>The countryside is beautiful here which is one the reasons I moved to West Berkshire; the air is cleaner than in most towns which MUST be a key priority; we must drive down air pollution and CO2 emissions if we are to defeat climate change and act as a responsible local authority in this goal.</p> <p>The lockdown has really taught people the value and joy of our countryside and this is not something that will be forgotten when the pandemic is over; it is a resource which rewards us with leisure and improved fitness as well as mental wellbeing. Well before lockdown, I still enjoyed walking in those very fields planned to be saturated with a colossal volume of new houses. It would be a tragic loss.</p> <p>A further and serious objection is an increased risk of flooding such a development would mean. I still vividly recall the terrible flood of July 2007 and the awful consequences southern Thatcham experienced. Whilst I know flood mitigation measures have now been made, this does NOT account for a colossal new concrete development on a hill which would gladly channel water back down across homes south of the A4. If the hills in the north of Thatcham did this last time when they were grassed fields, any further rains would have far more rapid and serious consequences when hitting homes and roads on a new development.</p> <p>I am also wholly unconvinced the supporting infrastructure for these homes is anything like adequate; it would mean a huge increase in local traffic on roads which can already be busy at rush hours and indeed through the day. I also know that there is no supporting plan for a railway road bridge so desperately needed in Thatcham even without any new homes; it is not unusual to spend at least 20 minutes at times waiting. This leads to huge traffic tailbacks and more polluted air as vehicles idle. New homes or not, WBC has sat on this issue for decades and continues to shelve it and or</p>	<p>and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver ‘a network of green infrastructure which will include a new community park linking Thatcham to the AONB.’</p> <p>The emerging draft LPR includes a policy that specifically covers climate change (policy SP5). This requires that all development should contribute to West Berkshire becoming and staying carbon neutral by 2030.</p> <p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs development to the most sustainable locations in the district.</li> <li>• Policy SP6 (Flood Risk) directs development to areas least at risk of flood risk.</li> <li>• Policy SP22 (Transport) requires that any development that generates a transport impact will be required, amongst other things, to have regard to West Berkshire’s declared climate emergency and minimise the impact of all forms of travel on the environment.</li> <li>• Policy DC3 (Building Sustainable Homes and Businesses) looks at building sustainable homes and businesses,</li> </ul> <p>Any development site will have to comply with the aims and objectives of the plan.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning</p>

Respondent (with lpr ref)	Response	Council Response
	<p>ignore it. Thatcham's roads are also already in a poor state even as they are.</p> <p>The station is also rather poor; it has no facilities whatsoever; car parking is also poor and it has had little upgrades of any consequence for the town that Thatcham has grown to be. It was built for a village in the 19th century and it shows.</p> <p>Finally, there is the carbon damage these new homes would cause; at least 50 tonnes of carbon on average is created per new home. That's 125,000 tonnes of CO2 before anyone would so much as move in, let alone drive from them and use utilities. This is an appalling increase at a time when we need to reverse emissions, both of carbon and vehicle sources.</p> <p>Whilst there may be a need for an increase in homes in West Berkshire, Thatcham cannot have this many or in this location. It would be a blight that would wreck our town and cause very grave environmental damage. It must be resisted by WBC at all costs.</p>	<p>application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p>

Respondent (with lpr ref)	Response	Council Response
Jonathan Harry	<p>I am writing to raise my objections to the proposed NE Thatcham development (Policy SP17). I am a resident of Upper Bucklebury, and have lived with my family in the village for more than 10 years.</p> <p>There are several areas that I feel particularly strongly about. These are –</p> <p><b>Increased risk of flooding and urban run-off</b></p> <p>As stated in the LPR, appendix 4b: <i>There is a risk of surface water flooding with the site along the natural drainage routes based on EA modelling. The site is crossed by a number of ephemeral watercourses and these corridors would need to form part of a wider SuDs strategy to help manage the run-off from any new development.</i></p> <p>All WBC supporting material speaks of mitigation measures, and yet the flooding in 2007 seems to fall outside the planning horizon for risk planning; what hope can we have that these measures will be effective, especially given that <i>'the risk of flooding continues to escalate; making the events that shattered so many communities [in 2007] an ever increasing threat.'</i> (Pitt Review (2008))</p> <p><b>Breaching of the Floral Way settlement boundary</b></p> <p>Extending Thatcham to the north-east will continue to destroy the rural areas so highly prized by West Berkshire in all its planning material</p> <p>The Siege Cross planning rejection from 2015 references so many reasons for it being declined (beyond just not being part of a development plan). All of those reasons in point 3 (Landscape and Visual Character) still apply with the current proposal, and more so; the fact that the proposal has been included in the development plan does not suddenly mean those previous reasons for objection have been remedied. The rejection of that section follows the individual points of rejection by stating:</p>	<p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to potential impact on surface water, all new development must include sustainable drainage measures, and development must be avoided on areas that are at risk of surface water flooding. Development on the site will be expected to deliver surface water management approaches that could deliver a net gain for Thatcham town. Drainage and flood attenuation works are included in the IDP.</p> <p>As part of the preparation of the LPR the council has undertaken a Settlement Boundary Review (SBR).The settlement boundary criteria make clear that boundaries will include sites allocated through the Local Plan process. North East Thatcham is proposed for allocation under policy SP17. Should the site, or any part of it, be removed from the LPR the boundary for Thatcham would be adjusted to exclude it. It is acknowledged that the settlement boundary is currently drawn around the whole of the proposed allocated site at North East Thatcham whilst Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.' The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level</p>

Respondent (with lpr ref)	Response	Council Response
	<p><i>For the above reasons the development fails to have due regard to the sensitivity of the area to change. The development is inappropriate in terms of its location over the whole site, and its scale in the context of the existing settlement form, pattern and character of Thatcham. The development also fails to conserve the historic landscape setting and rural context of Siege Cross Farm.</i></p> <p>The settlement boundary is there for a reason, and West Berkshire highlighted many of those reasons very eloquently in rejection of the proposal.</p> <p><b>Increased traffic congestion in and around NE Thatcham</b></p> <p>Thatcham already has a congestion issue, particularly around the level crossing and access to the A4. This will significantly increase traffic and pollution. It will also increase traffic coming through Upper Bucklebury. It is already used as a 'rat run' to avoid the A4 and speeds are very often far higher than the 30 mph limit through the village. This development already runs counter to the council's ambition to be net zero, with traffic being a constant addition to this problem.</p> <p>As the LPR states: <i>'Development would have a very significant impact on the local highway network.'</i></p> <p>The document then adds: <i>'Opportunities for modal shift should be maximised. A transport assessment would also be required.'</i></p> <p><b>The changing requirements for dwellings in a post-covid environment</b></p> <p>No one is clear on what will happen in a post-covid environment and these plans do not take this into account. There could be a significant reduction in the demand for housing in this area. Even if there is not, the reduction in town centre retail outlets give a huge opportunity to re-purpose the buildings and create residential properties. As an example, both John Lewis and</p>	<p>study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. At this stage it is therefore not possible to draw the settlement boundary any tighter. As the LPR progress and more detailed work is done on the sensitivity and capacity of different parts of the site to accommodate development the boundary will be amended accordingly.</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that 'in any overall review to accommodate more housing,</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Debenhams department stores are not re—opening, providing modern and ideal multi-level sites that can be used for housing. There are also several brown field sites available for redevelopment.</p> <p><b>Impact on AONB through loss of separation from urban settlements and increase in traffic (pedestrian / cycle / automotive)</b></p> <p>As mentioned in (a), above, breaching the settlement boundary will have huge impacts on the AONB, both in terms of the rural character, and materially on the quality of life in those settlements adjoining THA20. Aside from the 'loss of greenfield land' (mentioned in the LPR, appendix 4), the LPR also states the 'site is of such a scale that it would provide new services and facilities that would be available to surrounding settlements like Cold Ash and Bucklebury', which clearly indicates the impact it will have, just from the point of view of facilities, potentially threatening the local shop, the local school etc., but also in terms of bringing Thatcham closer, adding traffic to local lanes (which have no pavements), and eroding still further the fragile commercial, cultural and environmental nature of the settlements within the AONB.</p> <p>As stated in DC1:</p> <ol style="list-style-type: none"> <li><i>1. Planning permission will not be granted where a proposal harms or undermines the existing relationship of a settlement within the open countryside, where it does not enhance the character and distinctiveness of the rural area, including the special qualities and natural beauty of the landscape of the AONB or where development would have an adverse cumulative impact on the environment or highway safety</i></li> </ol> <p>I cannot express the level of frustration at the lack of transparency and engagement with the residents about this proposal and I wholeheartedly oppose this development.</p>	<p>Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy' (paragraph 67 of the Core Strategy Inspector's Report). As additional housing is required, and given Thatcham's status as an 'Urban Area' in the development plan is it considered appropriate to consider Thatcham for housing.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>In relation to the plan being prepared prior to the coronavirus pandemic, the full impact of the COVID 19 pandemic will not be fully apparent for some time. The LPR is a long term strategy to 2039, during which time a review will be conducted every 5 years. The impact of changes in response to macro and local economic factors will be assessed through subsequent reviews, once such implications are realised.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the</p>

		parameters of the site, height parameters, green open space, etc.
<b>Landowners, site promoters and developers</b>		
Lichfields for North East Thatcham Consortium (lpr2391)	<p>Regarding Policy SP17, we strongly endorse the Council's positive approach to meeting West Berkshire's future needs including development at North East Thatcham of a strategic scale. This will help regenerate Thatcham and contribute towards meeting its infrastructure requirements.</p> <p>We are also broadly in agreement with the wording of Policy SP17, but suggest the below amends/clarifications would be beneficial:</p> <ol style="list-style-type: none"> <li>1 Clarify that the delivery of 40% affordable housing is across the entire site and not on a phase by phase basis;</li> <li>2 Not apply a prescriptive housing mix but rather have regard to overall need for housing in West Berkshire, local market need and demand, the character of the site and its surroundings;</li> <li>3 Ensure the appropriate proportion of dwellings to be delivered via serviced custom/self build plots is based on evidence of local need;</li> <li>4 Clarify specifically what is meant by a carbon neutral development in order to give certainty as to how this ambition can be pursued; and</li> <li>5 Acknowledge that additional PROW through the new strategic country park could be delivered, but linking them to the plateau and the AONB is outside of the boundary of the allocation site.</li> </ol> <p>We are broadly supportive of SA/SEA assessment of NET at Appendix 4 but make the below observations.</p> <ul style="list-style-type: none"> <li>• SA Objective 1: The assessment states that “A site of this size would be expected to deliver at least 3% of dwellings as serviced custom/self build plots.”</li> </ul> <p>As per the earlier comments in these representations we support the inclusion of custom/self build and do not necessarily disagree with the 3% figure but it will need to be evidenced.</p>	<p>Comments noted, the policy stipulates that affordable housing requirement for the site is 40%, it does not define that this will be achieved for each phase.</p> <p>In addition to ensuring that an appropriate amount of housing is provided in suitable locations, it is also important to ensure that there is a wide choice and mix of housing to meet existing and future local needs, and to help secure mixed and balanced communities. Any proposal will be considered against SP18 Housing Type and Mix which refers applicants and decision makers to use the most up to date evidence base on local housing need.</p> <p>In regards to the 3% self-build target this will be tested through the viability work into the LPR to ensure that it is a viable target. In terms of the inclusion of an element of self-build on the site, legislation places a duty on LPAs to:</p> <ul style="list-style-type: none"> <li>• have regard to the register when carrying out its planning, housing, land disposal and regeneration functions; and</li> <li>• grant, within three years, 'suitable development permission' to enough serviced plots of land to meet the demand for self-build and custom housebuilding in the authority's area.</li> </ul> <p>The policy will be amended to include the requirement for the development of the site to be supported by a Sustainability Charter which will establish how policy</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• SA Objective 3: The assessment states that “<i>The developer would provide additional educational and training facilities and other facilities such as health facilities and local retail centres commensurate with development.</i>” Whilst this is the case and the NET scheme will provide for a range of infrastructure requirements, health facilities will need to be provided based on the CCG advising on there being a need.</li> <li>• SA Objective 6: The assessment highlights that on parts of the site (the area around Siege Cross Farm) with high risk of noise and vibration problems to future residents from road and commercial. Technical work to mitigate any noise or vibration issues for residents will be undertaken.</li> <li>• SA Objective 8: The assessment states that “<i>SP5 expects that all development should contribute to West Berkshire becoming and staying carbon neutral by 2030. The site is of a scale that it will be expected to help with achieving this SA objective.</i>” Our representations concerning Policy SP5 address the definition of a carbon neutral development.</li> <li>• SA Objective 10: The assessment states that “<i>industrial development is proposed for a small portion of the site. This will help attract businesses and inward investment to the district.</i>” This appears to be an error and relates to the additional parcel of land promoted by Ptarmigan Land to the east of Colthrop Industrial Estate, not THA20 but MID5. On this basis the assessment marginally benefits from positive scoring associated with employment provision that does not strictly come forward pursuant to that allocation.</li> </ul> <p><b>Thatcham Strategic Growth Study (background study)</b> DLA has produced three reports as part of the Thatcham Strategic Growth Study. Overall, we support the broad thrust and approach of the DLA work and its conclusions in identifying that only growth of a strategic scale could support the service provision and regeneration that Thatcham requires, and demonstrating the suitability and deliverability of the NET site as a driver for the regeneration of Thatcham.</p>	<p>requirements will be achieved including an Energy Strategy to demonstrate how a low carbon development will be achieved.</p> <p>The policy will be amended to require a Public Rights of Way Strategy to demonstrate how existing Public Rights of Way will be protected and enhanced and how new ones will be established, including bridleway links and safe crossing points.</p> <p>The CCG are actively involved in the preparation of the IDP and a consultee as part of the Local Plan Review process and will advise on the requirements for medical provision.</p> <p>The Noise and Vibration Technical Assessment is noted.</p> <p>The query in regards to the additional parcel of land promoted by Ptarmigan Land to the east of Colthrop Industrial Estate, being included within the SA Assessment will be explored further.</p> <p>Comments on the Concept Plan and Thatcham Strategic Growth Plan are noted.</p> <p>The recommended changes to SP17 have been considered and response contained above.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The concluding 'Concept Plan' for the site provides a useful starting point illustration of how one might conceive the development of the site, whilst recognising that it identifies the need for flexibilities and the need to arrive at more specific conclusions on aspects of the scheme which require more technical work. For example, the pupil requirements/school provision will require more detailed discussions with the council, education authority and other stakeholders (such as the Kennet Academies Trust) to ensure NET contributes to meeting the education needs of Thatcham as a whole. Similarly, a flood attenuation strategy will also be drawn up for the whole site which may mean planned flood attenuation basins for the site can be redesigned within the masterplan in a different way. Once these and other more technical aspects of the scheme have been bottomed out, the precise form of masterplan can be arrived at, which will in due course shape a planning application for the site. This is likely to mean the concluded development is an evolution of the Concept Plan in the DLA work. For this reason, we do not highlight any detailed issues where we might arrive at a different conclusion on specific masterplanning aspects undertaken by DLA, being content that – overall – it performs its role satisfactorily in demonstrating the suitability and deliverability of the site as a prospective allocation.</p> <p>On this basis, as per our commentary under Policy SP17, we support the wording of this policy which allows some progression of the work done by the DLA by requiring the development to '<i>have regard, and positively respond</i>' the work.</p> <p><b>Site Selection Background Paper for the Emerging Draft LPR</b> This background paper is a very useful document in pulling together the key conclusions arising from the local plan evidence base and determining which sites should be included as allocations in the emerging local plan.</p> <p>With regards to Thatcham, the conclusions of the DLA masterplanning work comes through clearly in concluding on development sites in the town. It is clear that only growth of a strategic scale could support the service provision</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>and regeneration that Thatcham requires. The other sites considered in Table 8.2 of the report range from 36 to 225 dwellings (albeit site CA12 and its adjoining sites CA16 and CA17 combined would total 325 dwellings) compared to NET's 2,500 dwellings. The recurring conclusion on other development sites considered in Thatcham is that <i>"it is the Council's preferred approach to allocate site THA20 as a strategic site. Due to the scale of development that could take place on THA20, it is considered that there should be no further allocations in Thatcham in the period to 2037"</i>.</p> <p>With regards to the Thatcham allocation the reports do set out some areas of further investigation for NET including ensuring utilities are made available in a timely manner, highways and access, ecology, landscape and surface water flooding attenuation measures.</p> <p>These are all areas we are working on and will prepare more detailed material on for the progression of the local plan. In due course, this will give the inspector examining the plan confidence these issues have been considered and resolved at the time of the examination hearings.</p> <p>Changes:</p> <p><b>Policy SP17 North East Thatcham Strategic Site Allocation (amended policy)</b></p> <p>The site, as identified on the map, is allocated for a residential-led development comprising approximately 2,500 dwellings.</p> <p>A Mineral Resource Assessment (MRA) will be required to be provided for the site.</p> <p>The site will be delivered to achieve a sustainable, comprehensive and landscape-led development and ensure the timely and co-ordinated provision of infrastructure.</p> <p>The Council will be supportive of proposals which have regard, and positively respond, to the masterplanning work contained in the Thatcham Strategy Growth Study (2020).</p> <p>Development of the site will be expected to deliver:</p> <ul style="list-style-type: none"> <li>• <del>At least</del> Delivery of 40% affordable housing across the entire site, albeit the quantum may vary on a phase by phase basis</li> </ul>	

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• A housing mix which <del>complies with the housing mix contained in Table 4 of policy SP18 Housing type and mix</del> has regard to the overall need for housing in West Berkshire but also considers local market need and demand, the character of the site and its surroundings</li> <li>• At least 3% of A proportion of dwellings [currently 3%] to be delivered via serviced custom/self-build plots to meet evidenced local demand</li> <li>• <del>On-site renewable energy to assist in the delivery of a carbon neutral development</del></li> <li>• 2 new primary schools (1 x 3FE, 1 x 2FE) and the sports infrastructure requirements of those schools</li> <li>• A new secondary school (8FE) and the sports infrastructure requirements of that school</li> <li>• Surface water management approaches that could deliver net gain for Thatcham town</li> <li>• Biodiversity net gain <del>through</del> including habitat restoration and linkages</li> <li>• A network of green infrastructure which will include a new strategic country park <del>linking</del> enabling links from Thatcham to the plateau and the AONB through established Public Rights of Way</li> <li>• Local centres providing local retail facilities and small-scale employment space including potential enhancements to the Dunston Park Local Centre</li> <li>• Active travel improvements on routes between the site, town centre and railway station</li> <li>• Appropriate vehicular accesses and a through route</li> <li>• Sustainable transport through routes</li> </ul>	
JSA Architecture for the Colthrop Village Consortium (lpr774)	<p>The Colthrop Village Consortium consider that the proposed urban extension to North East Thatcham is flawed for the reasons set out in the letter prepared on their behalf by JSA Architects dated 4 February 2021 along with the associated Technical Note prepared by Stuart Michael Associates on Transport. That letter sets out the reasons fully and we ask the Local Planning Authority to take those comments into account as part of Consortium's comments on this draft Local Plan.</p> <p>Proposed change:</p>	Comments noted, and considered in the Council response table to SP13.

Respondent (with lpr ref)	Response	Council Response
	Recognise the constraints and inappropriateness of such a large incursion into the countryside. Consider the merits of the Rainsford Farm/former Colthrop Paper Mill site as sequentially preferable.	
Prosper Infinity Ltd. (lpr180)	<p>1. Avoid using greenbelt or undeveloped land where possible. 2. Suggesting a redevelopment site in Thatcham that is brownfield i.e. developed upon and entirely hardstanding and demonstrates it is in a sustainable location.</p> <p>Change proposed: Having also reviewed the current West Berkshire local plan (which includes the core strategy development plan and Housing site allocations plan), and the National Planning Policy Framework, I agree with the purpose of the LPR in achieving sustainable development that meets the needs of the present and future generations. I would like to focus my comments on the sections of the proposed development strategy in the spatial areas of Newbury and Thatcham. I would respectfully like to draw your attention to a brownfield parcel of land known as 'Newbury Leisure Park' which should be considered for redevelopment to assist in meeting the housing needs over the coming years. I enclose with these representations 2 title plans identifying the site which is in our ownership and control. The reason I would like to draw your attention to this parcel of land is because the site has exhausted its usefulness as a leisure facility. The current operator of the tenpin bowling centre has been struggling to make it a successful business over the last 2 and a half years, and is taking advice on dissolution processes. Prior to that, the previous 2 owners, namely MFA Bowl Ltd and Newbury Leisure Ltd also went into administration. As the owner of the land, I can prove that a financially stable and experienced leisure operator has been impossible to identify at each liquidation juncture when the previous three operators have failed to make this a profitable site over the last 8 years. The land is brownfield land (as confirmed by the Council in the Officer's report for application ref 09/01988/COMIND) and is available, deliverable and developable. I strongly feel that the site meets the strategic objectives of the LPR and has capacity for approximately 100 units of housing. It is sustainable being previously developed land on the edge of the settlement and historic an active destination in its own right, and by replacing</p>	<p>Comments noted, there is no green belt land within the District. In regards to the development of brownfield sites, when determining which new sites to allocate the Council are only able to consider land that is submitted to them through the HELAA. The HELAA includes brownfield sites that the Council are aware of.</p> <p>The supporting text to policy SP12 (Approach to Housing delivery) of the emerging draft LPR identifies that several sources will ensure a continuous supply of land across the plan period. These include amongst others, existing planning commitments (unallocated sites with planning permission), many of which are brownfield sites.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>The site was not considered within the HELAA 2020 as it had not be submitted to the Local Authority. However, the site will be considered through the Review of the HELAA and is identified as THA21.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>the leisure use with residential it would fit with the LPR strategy of focusing leisure uses in the Town Centres of Newbury and Thatcham and reusing previously developed land (in accordance with the NPPF). Additionally, the existing use demonstrates that it is a sustainable location which already uses existing transport and infrastructure. Policy SP1, SP3 and Policy SP17 suggests Thatcham will be a focus for regeneration. The LPR Policy SP3 also states '...the urban areas will be the prime focus for housing and economic redevelopment of suitable previously developed sites for housing purposes...'. Policy SP12 also states the approach to housing delivery uses the opportunity to use developed land. I would like to suggest that the council considers redevelopment of the land on Lower Way called Newbury Leisure Park where 4 of the 4.25 acres sits on either Flood Zone 1 or 2, and therefore a managed development within WBC guidelines would not pose a flood risk for residential dwellings. Indeed, given the site is presently almost entirely hardstanding and buildings, the redevelopment provides the opportunity for betterment in terms of flood management, landscaping and biodiversity net gain. Policy SP13 and particularly Policy SP17 suggests a number of large sites that are either green belt or undeveloped land at present. The Newbury Leisure Park site should be considered ahead of greenfield development given it is previously developed land in a sustainable location on the edge of the settlement (the settlement boundary runs along Lower Road, the site's northern boundary). I will make time to discuss this opportunity with the planning team in further detail should they have any additional questions. I admire the fact that the whole strategy of the LPR talks about West Berks focusing on previously developed land (PDL), and this parcel of land on Lower Way fits this description exactly. I look forward to hearing from the Planning Policy team.</p>	
Neville Baker Estate (lpr1275)	<p>We consider that the North East Thatcham strategic site allocation is unsound for the following reasons:</p> <ol style="list-style-type: none"> <li>1. By virtue of its scale, proximity and high visibility from several approaches to the AONB and the wider landscape, the proposed extension will have a significant harmful effect upon the setting, sense of remoteness, tranquillity and dark night skies of the North Wessex Downs AONB, contrary to Paragraph 172 of the NPPF and in conflict with Policy SP2 of the West Berkshire Local Plan Review 2020-2037: Emerging Draft (WBLPR).</li> </ol>	<p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and</p>

Respondent (with lpr ref)	Response	Council Response
	<p>2. The proposed allocation is located on land forming part of the LCA WH4: Cold Ash Woodland and Heathland Mosaic landscape character area as defined in the West Berkshire Landscape Character Assessment (2019), which also includes land within the designated AONB. Accordingly, development of the type and scale proposed will result in an unacceptable loss of open countryside which is of high landscape value in its own right, contrary to Paragraph 170 of the NPPF and in conflict with Policy SP8 of the WBLPR.</p> <p>3. Paragraphs 1.26 and 2.24 of the Thatcham Growth Study (Stage 3) states that an objective of the Study is to avoid coalescence of settlements. However, the proposed development will significantly reduce the physical and perceived separation between Thatcham and Upper Bucklebury and an unacceptable loss of separate identity, contrary to the objectives of the Study and Paragraph 172 of the NPPF, and in conflict with Policies SP2 and SP8 of the WBLPR.</p> <p>4. The scale and proximity of proposed development, combined with the policy requirement for a network of green infrastructure linking Thatcham to the plateau and the AONB will result in an unacceptable increase in urban pressures on the environmental, economic and social fabric of the AONB, its communities and rural way of life, contrary to Section 87(2) of the Countryside and Rights of Way Act 2000, the North Wessex Downs Management Plan 2020 and Paragraphs 91 and 172 of the NPPF.</p> <p>5. The proposed development will have an unacceptable impact on the extensive areas of ancient woodland which adjoin the site, contrary to Paragraphs 170 and 175 of the NPPF and in conflict with WBLPR Policies SP11, DC4 and DC14.</p> <p>6. In combination, the proposed strategic allocations at Sandleford and North East Thatcham are expected to deliver approx. 2,250 dwellings by 2037. Therefore, the two strategic sites are a significant component of the urban focus of the Spatial Strategy and an even more significant component of the focus of development on the Newbury/Thatcham urban area. Accordingly, they are major contributors to the clear imbalance in the overall distribution of new housing development proposed between urban and rural areas, which is not justified by evidence and will have unacceptable consequences</p>	<p>the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a</p>

	<p>for the AONB, particularly in relation to meeting local housing needs and maintaining vibrant and balanced communities.</p> <p>7. The expectation that the two strategic allocations will deliver approx. 2,250 dwellings by 2037 means that, District-wide, they will account for nearly 50% of all new dwellings to be delivered on allocated sites (in the WBLPR and NPD's) over the plan period (4,670 dwellings) and over 70% of all dwellings to be delivered on allocated sites in the Newbury/Thatcham urban area (3,105 dwellings). It is considered that this amounts to an undue reliance upon the two sites to deliver, which has considerable potential to undermine the Council's ability to meet the housing needs of the area and maintain a 5 year housing land supply over the plan period.</p>	<p>landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>Green infrastructure is considered through policy SP10 Green Infrastructure.</p> <p>Ancient woodland is identified as an 'irreplaceable habitat' and is considered in policy SP11: Biodiversity and geodiversity and DC14 Trees, woodland and hedgerows.</p> <p>The Council's strategy is for a mix of sites: strategic sites such as Sandleford Park and North East Thatcham, which can delivering infrastructure, facilities and significant numbers of affordable homes and a larger number of</p>

Respondent (with lpr ref)	Response	Council Response
		<p>medium and smaller sites, including brownfield sites within settlement boundaries. The strategy seeks to focus development in the more sustainable settlements of the District rather than distribute development more evenly. This approach continues that set out in the Core Strategy which went through all stages of consultation, examination and adoption by the Council.</p> <p>Though delivery on a particular site can never be guaranteed, the Council closely monitors the position, annually updating the Five Year Housing Land Supply. At present the Council is able to demonstrate a supply of 7.3 years for the period to 2026.</p>

<b>Other stakeholders (continued)</b>		
Christopher Beeson (lpr1361)	<p>I would like to strongly object to this proposed development.</p> <p>It would effectively join Upper Bucklebury with Thatcham, and alter our village beyond recognition.</p> <p>It is a massive over development of the Countryside.</p> <p>It will have a significant negative impact on traffic. The traffic in the village is bad enough already.</p> <p>It will significantly increase the noise and light pollution in Upper Bucklebury. At present we have no street lights and we can clearly see the stars on a clear night.</p> <p>It will put enormous pressure on Bucklebury common, other communal areas, and on the local wildlife. We need to protect and preserve our special local habitats and wildlife for future generations.</p> <p>There will be significant issues concerning flooding if this large area of land is built on.</p> <p>This development would be sentencing those living nearby to 15 years of construction work with all the associated noise and inconvenience.</p> <p>This development is far too big, out of keeping with a post-covid world, and situated totally in the wrong place.</p>	<p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process. Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is</p>

Respondent (with lpr ref)	Response	Council Response
		<p>not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>In regards to light pollution, policy DM4: Environmental nuisance and pollution has been strengthened to ensure that all reasonable steps are taken through design, siting and technological solutions to ensure the abatement of obtrusive light to avoid sky glow, glare and light spillage, intrusion and any adverse impact to wildlife. Applicants should adhere to the guidance on lighting provided in the most up to date Institute of Lighting Professionals (ILP) guidance notes, alongside other relevant local documents including the North Wessex Downs AONB 'A Guide to Good External Lighting' (2021).</p> <p>In relation to the concerns on the potential impact on Bucklebury Common, the development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population). The updated version of the proposed allocation policy in the</p>

Respondent (with lpr ref)	Response	Council Response
		<p>next published version of the LPR also requires the submission of a lighting strategy.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to the plan being prepared prior to the coronavirus pandemic, the full impact of the COVID 19 pandemic will not be fully apparent for some time. The LPR is a long term strategy to 2039, during which time a review will be conducted every 5 years. The impact of changes in response to macro and local economic factors will be assessed through subsequent reviews, once such implications are realised.</p>
Katie Gold (lpr1362)	<p>All I can say is NO!</p> <p>What an absolute joke, have you actually sat down and thought about what you are proposing?!</p> <p>It is completely Unfeasible, as it is the surrounding area at the moment is not properly cared for, with rats &amp; flooding &amp; far too much traffic coming through the residential areas.</p> <p>Anyhow, I could go on with a lot of pros &amp; cons and figures &amp; reasons but I am 100% certain you will have received many many of these already.</p> <p>So I will just say I am against this build , taking away all our wonderful countryside from the future generation, who are now all locked in suffering mental health from no interaction or schooling but are finding</p>	<p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. Nigel Rossiter (lpr1363)	<p>I must admit to being in two minds to this whole thing. The proposal is actually extremely well written, but is all in the positive</p>	<p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>and does not outline any possible issues - which is a very major criticism.</p> <p>Your response is good and extremely detailed. I might caution however against an inflammatory tone, despite how obviously angry you/we may be. It comes across very much as “Not in my back yard”. Antagonising people from the outset will not help. I do agree with 95% of all you have detailed. Your response also however has a few omissions and mistakes:</p> <ul style="list-style-type: none"> <li>- you have detailed concerns about flooding, but have not detailed concerns about water supply to Bucklebury. Today has been yet another example in my almost 20 year battle with Thames Water and the Harts Hill pumping station. We are reliant upon this and as we all know even with the new station and pumps it is inadequate - for those of us at the end of the line we rarely get pressures above 0.4 bar (the figure below which Thames Water are required to act and compensate.....). The new development plan makes no mention of how water supply will be achieved for all by Thames water if this development does go ahead.</li> <li>- you have mentioned the concern re schooling, particularly secondary schooling. The proposal does outline well a proposal for one new secondary school and at least three new primary schools. I would caution you to phase a concern re schooling with care and in line with the proposal report</li> <li>- the proposal mentions healthcare provision just once saying that present healthcare facilities are saturated, but makes no mention of how this new population may be cared for. This is a very major deficiency. 2500 new homes = ~ 10,000 new population = minimum 1 new GP practice with minimum 5 new full time GP partners and minimum 1 new NHS Dental practice. I have been negotiating with our GP practices who are aware of the proposal but are having issues with the local management based in Reading West to see the problem that</li> </ul>	<p>development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham’s flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p> <p>Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a ‘living document’ and will be updated regularly updated in consultation with infrastructure providers.</p> <p>The site alongside the larger site area, is well related to the existing town of Thatcham. It is in close proximity to a range of services and facilities, including the train station. Thatcham is an urban area with a wide range of services and opportunities for employment, community and education. Development of a strategic nature at this site would support the service provision and regeneration that Thatcham requires.</p> <p>In relation to the plan being prepared prior to the coronavirus pandemic, the full impact of the COVID 19 pandemic will not be fully apparent for some time. The LPR is a long term strategy to 2039, during which time a review will be conducted every 5 years. The impact of changes in response to macro and local economic factors will be assessed through subsequent reviews, once such implications are realised.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>will arise and fund new practices (plus all the PAMs - Professions Allied to Medicine: Dentistry, Physiotherapy, Social Services, Occupational Therapy etc etc).</p> <p>- the proposal makes some interesting assumptions on where the workforce will disperse to, if they travel. It highlights that up to 30% will head south towards Basingstoke and beyond. It correctly highlights that the present railway line marks a watershed but makes no comment beyond that. Better public transport links direct from Thatcham / Newbury direct with Tadley &amp; Aldermaston / AWE / Basingstoke / Winchester / Southampton / Portsmouth need to occur.</p> <p>- your assumption re work force planning post COVID-19 may actually be the exact opposite to that you have stated. There is now evidence that it is very likely that there will be a population drift away from big towns and cities towards rural areas. This recent pandemic has shown the workforce and business that physically being in the office and travelling into towns &amp; big cities is not absolutely necessary and many things can be done just as well, and often better, from home - it is certainly more cost effective. The demand for housing in our area is highly likely to increase significantly.</p> <p>If I was to agree with some of plan for 2500 new homes around the Thatcham area I can see many of the arguments for the current proposal. I do however struggle to agree with the third development area around Colthrop Manor and fail to see why the area around Henwick was discounted - the proposal does not go into enough detail about this.</p> <p>The reason that I am in two minds is precisely my point re population. Most of us have families. Most of our children who wish to stay in the area struggle to get onto the housing ladder locally as it is expensive and there is relatively little available. The area desperately needs good affordable housing for young people. Thatcham also</p>	

Respondent (with lpr ref)	Response	Council Response
	desperately needs better public services and amenities and will not get these without some cohesive (housing) plan.	
Charlotte Bradford (lpr1365)	<p>Dear planning - I can see plans for several houses in Thatcham Berkshire along A4 on green / fields.</p> <p>I have lived in the area all my life and now more than ever we need to encourage wildlife and trees.</p> <p>My main concern is before lockdown had to drive to Reading along A4 / M4 for my work and on occasion use the train station for access into London. The delay I had due to traffic volumes along Floral Way was a nightmare I use to leave my house in Dunstan Park to station almost 30mins. The fact that the level crossing has no bridge added to the stress of my journey.</p> <p>We simply don't have the infrastructure in place to support such a large volume of new builds. The schools, the doctors, the park's, the shops we don't even have enough shops.</p> <p>Please re consider this planning we cannot let the schools, NHS and environment suffer anymore.</p> <p>I don't know anyone who feels this would benefit the local community given the current state of C19 impact.</p> <p>We have seen closure of many shops in Newbury and yet no further shops or retail outlets have been opened in Thatcham or surrounding areas.</p>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p>
Andrew Peddie (lpr1365)	I am writing in my personal capacity (although for convenience from my work email, which I use for most purposes) to object on the following grounds to the proposals outlined for a major development on land to the North East of Thatcham in the following WBC documents, the 'Local Plan Review 2020 - 2037: Emerging Draft' and 'Thatcham Strategic	Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.

Respondent (with lpr ref)	Response	Council Response
	<p>Growth Study Stage 3 Thatcham Future'. I understand at this stage that there is no planning application number for this proposal and so cannot quote one. I assume the above references are sufficient for identification purposes.</p> <p>As a resident near to Upper Bucklebury, I am alarmed at the erosion of peace and quiet enjoyment of a very special area of countryside that this development is likely to represent, if approved. It will have a major impact on the surrounding countryside including Bucklebury Common, given its proximity – we are already much troubled by off-road motor biking and 4x4 traffic and this is likely only to increase that sort of problem. The other impacts including increased traffic, burden on the existing services in Thatcham (which are already inadequate for its population) and general deterioration of a precious environment are also going to be significant. I cannot really believe that the continued spread of Thatcham is likely to be in the interests of anyone other than the developers in this scenario.</p>	<p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Respondent (with lpr ref)	Response	Council Response
		<p>the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>The development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population). Highway works and active travel routes would assist in directing residents to using the A4/Floral Way rather than Harts Hill Road, and using an enhanced cycling and walking network to travel, including to Thatcham train station. Residents would make use of the newly provided education facilities on the site, which would not be expected to purposefully attract pupils from Bucklebury primary school.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>
<p>Chris Austin (lpr1365)</p>	<p>Following our attendance at two meetings held by members of Bucklebury Parish Council and having studied the content of the various related planning documents, we write to outline our objection to the development of 2,500 homes within the North Thatcham area.</p> <p><b>Environment</b> The proposed development abuts Bucklebury Common and an AONB.</p>	<p>In relation to the concerns on the potential impact on Bucklebury Common, the development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population).</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Residents of the new developments will be drawn to the Common and will significantly increase the pressures already faced by the eco systems and wildlife that feature there.</p> <p>Parking on and around the Common is already exceeding capacity, with verges being used during peak periods. Whilst the development is relatively close, not all residents will walk to the Common, they're likely to drive.</p> <p><b>Traffic</b></p> <p>Thatcham is already a bottleneck for traffic flowing through the town on the A4 between Newbury and Reading. By introducing a new road network with traffic calming, traffic lights and roundabouts, the impact on the flow of traffic will be significantly impacted.</p> <p>Reference is made to the close proximity of the potential development site, to Thatcham Railway Station. Whilst this may be true, the ability to get to the station during peak times is already near impossible by car. Whilst we appreciate an emphasis is made on sustainable travel, there is no requirement for residents within the development to embrace this, as a result cycle paths and pedestrian routes may be built, but in poor weather and dark winter months, residents will turn to their cars and further impact on an already congested road network.</p> <p>With congested roads in Thatcham, residents will seek out short cuts, this will undoubtedly introduce additional traffic to local roads and quiet lanes in Bucklebury. These roads are designed with layouts and speed limits to support local traffic only.</p> <p><b>Flood risk</b></p> <p>Recent flood alleviation works to the north of Thatcham have been built to protect the houses, businesses and infrastructure in the areas most severely affected by the 2007 flooding event. Whilst SUDS are being proposed within the development to manage the outflow of surface water, they are not designed to support the heavy volume of water from such a large-scale scheme. In addition to this, SUDS will release water into the relatively new flood management system and increase the risk of flooding within Thatcham</p>	<p>being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development</p>

Respondent (with lpr ref)	Response	Council Response
	<p>once again. Wildlife The impact on local eco systems and wildlife will be significant. Whilst plans identify mitigation actions and reference sustainable developments, it is abundantly clear that the development of farmland will destroy the spaces used and occupied by wildlife. The additional footfall on the Common will also impact on the wildlife.</p> <p><b>Pollution</b> The development will generate significant levels of light (even with dark sky lighting) it will upset the life of birds and mammals; they cannot adapt and will be driven from their habitats. This light pollution will also affect the residents of Bucklebury, spoiling their night sky. The volume of homes proposed will generate pollution from carbon emissions and those associated with population density. The clean air of the Common would be a thing of the past.</p> <p><b>Rail</b> Whilst Thatcham railway station is within a reasonable distance of the proposed development, there is little or no capacity for additional cars in the car parks or on-road parking. There is no reference to the improvement of infrastructure that is linked to the station, without this the already creaking system will be overwhelmed.</p> <p><b>Medical</b> Medical services in Thatcham, Bucklebury, Cold Ask and Chapel Row are all already under pressure. Whilst new services are included in the proposed scheme, there is no obligation for services to be provided prior to the completion of housing. As such, in the intervening period, new residents from the development will expect to join surgeries already at capacity. Thatcham remains a small town that is desperate for investment. By granting planning permission for this development, the local authority is devolving its responsibilities, by placing the need to provide services and infrastructure onto developers.</p>	<p>proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. Respondent (with lpr ref)	Response	Council Response
	<p>Before West Berkshire Council considers further development in Thatcham, it must first demonstrate to existing residents its commitment to invest. Without this, WBC will continue to face strong opposition to applications that see the housing numbers increase significantly.</p>	
<p>Tim Hall (lpr652)</p>	<p>This is an unsustainable location.</p> <p>As this is unsustainable (it would, without any reasonable doubt, become an essentially car-dependent location) and especially with the declared Climate Emergency it could never be consistent with Council policy. Moreover it takes a beautiful and productive greenfield location and should not even be considered as an appropriate development location. Elsewhere I have suggested that fresh research and thinking is needed about retail and employment allocations and the potential elsewhere in built up and brownfield areas for housing.</p>	<p>In relation to the Climate Change Emergency, The emerging draft LPR includes a policy that specifically covers climate change (policy SP5). This requires that all development should contribute to West Berkshire becoming and staying carbon neutral by 2030.</p> <p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs development to the most sustainable locations in the district.</li> <li>• Policy SP6 (Flood Risk) directs development to areas least at risk of flood risk.</li> <li>• Policy SP22 (Transport) requires that any development that generates a transport impact will be required, amongst other things, to have regard to West Berkshire's declared climate emergency and minimise the impact of all forms of travel on the environment.</li> <li>• Policy DC3 (Building Sustainable Homes and Businesses) looks at building sustainable homes and businesses,</li> </ul> <p>Any development site will have to comply with the aims and objectives of the plan.</p>
<p>Mrs Harvey (lpr1367)</p>	<p>I am writing to object and voice my concerns about the NE Thatcham development.</p>	<p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a</p>

	<p>Living in Bucklebury, I am extremely concerned about the impact of building 2500 houses will have on the surrounding area. During and after completion.</p> <p>In my view this is excessive development in 'Rural Berkshire' and far too close to AONB.</p> <p>Not only will already oversubscribed local primary and secondary schools struggle. Hospitals and Dr surgeries will suffer.</p> <p>The traffic and pollution levels will increase. This will affect humans, domestic animals and wildlife.</p> <p>Over the years we have seen other developments appear in Thatcham Berkshire. There are certainly other sites available ones much more suitable to residential purposes. These would have a less negative impact to their area. Town and country.</p> <p>Thank you for acknowledgement of this objection</p>	<p>period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p> <p>Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>The site alongside the larger site area, is well related to the existing town of Thatcham. It is in close proximity to a range of services and facilities, including the train station. Thatcham is an urban area with a wide range of services and opportunities for employment, community and education. Development of a</p>

Respondent (with lpr ref)	Response	Council Response
		<p>strategic nature at this site would support the service provision and regeneration that Thatcham requires.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p>
Ash Barratt (lpr1368)	<p>I'm writing to you to object on the proposed planning to build 2500 houses on green land.</p> <p>Firstly I'd like to highlight the roads, as the A4 is already an incredibly busy road. As a tradesman in the local area, at peak times I have</p>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Respondent (with lpr ref)	Response	Council Response
	<p>waited over 10 minutes just to pull into the A4. All of the links leading into the town and onto Newbury are already chaos with too much traffic and the infrastructure isn't capable. Hambridge road has recently seen some maintenance and changes which has not worked in the slightest still cars backed up in every direction. Thatcham railway crossing is appalling, waiting times are too long with again cars backed up in every direction at all times of the day, it is absolute chaos.</p> <p>Now supposing these 2500 houses has 2 cars per house that will be potentially 5000 more cars on the road in an already overwhelmed area. This would hugely increase the pollution in the area as vehicles already spend most of their time not moving because of the poor traffic control around the town.</p> <p>Secondly the arable green land proposed to planning has been farmed for well over 100 years, my ancestors worked those fields some of which have already been taken by housing. The wildlife that lives in and around the area is incredibly vast, far too many to list. Taking those habits and areas from wild animals to roam would be crime against nature. Having houses that close to black lands would completely disrupt those animals and would be lost and never return. The homes alone will disrupt the wildlife not forgetting it would draw far too many extra people into black lands and would damage and disrupt the area of all the wildlife which would never return. The area is of outstanding natural beauty with breath-taking views across to the kingsclere downs, with 2500 houses those views would be lost. The area provides such a help for residents and walkers mental and physical well-being. I personally, when I'm having a tough time and my mental health falls I walk out there on the footpath to watch the wildlife and take in that familiar view to help myself recover, it's so important to people's wellbeing.</p> <p>Finally Thatcham has had too much development already. Any developments should only be on brown sites and unused land with existing boarders not extending boarders onto green fields, especially</p>	<p>A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>one that backs onto areas of outstanding natural beauty and common land full of wildlife. I understand the need for housing, I wouldn't have a problem with a small portion of the proposed land being developed for possibly 100/200 homes along the roadside but 2500 in a small area like proposed is appalling. The infrastructure cannot cope as it is. The doctors and hospitals won't be able to cope, the schools won't be able to take in more students. The supermarkets and town centre is inundated, parking is already a huge problem.</p> <p>Thatcham and the surrounding area cannot take 2500 more homes. Far too much rural countryside has already been lost in this country.</p>	<p>In regards to the development of brownfield sites, when determining which new sites to allocate the Council are only able to consider land that is submitted to them through the HELAA. The HELAA includes brownfield sites that the Council are aware of.</p> <p>The supporting text to policy SP12 (Approach to Housing delivery) of the emerging draft LPR identifies that several sources will ensure a continuous supply of land across the plan period. These include amongst others, existing planning commitments (unallocated sites with planning permission), many of which are brownfield sites.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p>
Sarah Belcher (lpr1369)	<p>As a Thatcham resident I would like to register my strong objection to the proposed full development of the above sites for the following reasons;</p> <ol style="list-style-type: none"> <li>1. There has not been adequate communication of the consultation itself or the ability to object. WBC have not notified residents of Thatcham or Upper Bucklebury with any formal written notification. This should be allowed before consultation finishes and as such it should be extended to allow appropriate time for the residents of the affected areas including those using services such as doctors that would become oversubscribed.</li> <li>2. It is cited in both the Bucklebury vision and Bucklebury Plan to maintain a strong greenbelt between Thatcham and Upper Bucklebury. This development would clearly contradict that.</li> </ol>	<p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p> <p>There is no green belt within this area (or within the District) there will be open space maintained along the northern/north eastern part of the site.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>This document is approved and agreed with WBC and should be considered as supplementary planning consideration. It is not mentioned in the WBC documentation.</p> <p>3. The development would effectively join Upper Bucklebury with Thatcham, which has all but happened at Cold Ash effectively removing the rural aspect of the area. This is actually stated in the WBC documentation (<a href="https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=0">https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=0</a>) page 22, stating “particularly as development of both north east and north Thatcham would result in the loss of the separate identifies of Cold Ash and Bucklebury, and would harm the setting of the AONB settlement pattern”.</p> <p>WBC are therefore suggesting that the Parish of Bucklebury should maintain its identity but the proximity of the development is in contradiction to WBC’s own intentions.</p> <p>4. A previous application was rejected by the secretary of state in 2017 <a href="https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html">https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html</a>. In light of the previous objection, what is the justification for WBC to now consider this, what has changed and knowing this has been refused once why have funds been spent already?</p> <p>5. It is an extreme over development of the Countryside in one area which consists of rolling hills and farmland. The reason stated is that 85% of West berks is AONB. WBC have previously built on AONB and AONB status can be changed with government approval, and as it is allegedly the government driving this would they not be more open to changing some AONB status ?</p> <p>6. In the NWN the following statement is attributed to Hilary Cole.</p> <p>The council’s executive member for housing, Hilary Cole (Con, Cold Ash and Chieveley), said: “We are very keen to work with the local</p>	<p>existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that ‘in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy’ (paragraph 67 of the Core Strategy Inspector’s Report). As additional housing is required, and given Thatcham’s status as an ‘Urban Area’ in the development plan is it considered appropriate to consider Thatcham for housing.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that</p>

Respondent (with lpr ref)	Response	Council Response
	<p><i>community because it's such a big proposal and development for Thatcham. "We have taken a conscious decision to do this around Thatcham so it will deliver the infrastructure we need. "We feel that Thatcham is best placed to take a development of this size."</i></p> <p>I have two specific issues to object to on these statements made. Firstly WBC have done very little if any to work with local residents – see above points and secondly Ms Cole's statement infers that the decision is made, so why is so called consultation being held? Because of this she should resign and a comprehensive and unbiased consultation should be held.</p> <ol style="list-style-type: none"> <li>7. WBC and Thatcham councils have wasted a great deal of tax payers money in completing many surveys and writing an 800 page report, effectively making this a fait accompli, before going to consultation on the proposal.</li> <li>8. It will have a significant impact on traffic in the area and especially on the route into Thatcham and Newbury and towards the station which are already heavily congested at busy times and in the event of any minor traffic disruption.</li> <li>9. This will significantly impact the freight traffic using the industry site at Thatcham</li> <li>10. It will significantly increase the traffic on the back route (rat runs) which are not designed for large traffic volumes.</li> <li>11. Traffic and speeding in particular through Upper Bucklebury is of a major concern due to the primary school. With an increase in 10% this will only worsen the situation.</li> <li>12. It will completely surround the Crematorium at Thatcham which was, as I understand, placed there to be away from residential properties and has constraints placed on it.</li> <li>13. It is stated/assumed this will help the Upper Bucklebury Business – predominantly the Pub and Shop. The Pub is hardly likely to benefit as a) pub usage across the country is in decline b) the Pub at the bottom of Harts Hill cannot already sustain a business. One pub is hardly justification for a development this</li> </ol>	<p>development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a</p>

Respondent (with lpr ref)	Response	Council Response
	<p>size. The shop is also likely to suffer as the plan indicate that shops will be included, so it is likely it would have a detrimental impact on the only shop in UB, creating more traffic.</p> <p>14. It is cited that there cannot be development on the Kennet flood plain, however there are multiple examples where this has already been done (most of Thatcham was originally a flood plain), the proposed development site is extremely hilly land which is almost certainly as unsuitable to development as the flood plain. As each development plan is put forward for this side of Thatcham concerns over flood plain impact are raised. Has a study been done on the overall impact of all off the current developments when combined? The works to add flood defence for Thatcham will be sure to be inadequate if more water is sent into the town due to more open land being built on.</p> <p>15. It will significantly increase the noise and light pollution to the Bucklebury Parishioners – there are no street lights in Upper Bucklebury. And in addition will impact the light pollution, dust and noise for the residents of Dunston Park in both the short and longer term.</p> <p>16. There is no evidence that this will enhance Thatcham town centre (or indeed Newbury). The development of the old Army Base by the Station didn't add any amenities and we have seen the slow decline of the town centre over the last 20 years despite the area growing.</p> <p>17. The Loss of the only safe way to walk into and out of Upper Bucklebury from Thatcham will essentially force an increase of traffic on the village road Harts Hill Road. It will also make it impossible for those villagers who are elderly and do not drive to make their way into Thatcham safely by foot as the lower part of the road is an unsafe option with blind bends.</p> <p>18. Schooling – this will obviously have an impact on local schools (and traffic). Current indications are that KS1 children volumes are decreasing yet the plan includes a proposal for 3 new schools. When would this be built before or after</p>	<p>development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet</p>

Respondent (with lpr ref)	Response	Council Response
	<p>the houses? Build it before and it will poach children from local schools, such as Upper Bucklebury which will make that unsustainable (as is happening in Newbury with the new school on the college site). Build it after and the local schools will be overwhelmed beforehand. If the development is spread across the region there is a much greater chance of the load being spread out.</p> <p>19. What impact will Brexit have on new residents to the area in that we have a large proportion of EU citizens already here, but this is likely to continue in future hence is the demand for housing still appropriate. ONS statistics show that in 2019 29% of mothers of babies born were not from the UK. Does there need for such extensive development?</p> <p>20. West Berkshire declared a climate emergency on 2 July 2019. <a href="https://www.westberks.gov.uk/media/48362/Draft-Environment-Strategy-2020-2030-Summary-document-January-2020-/pdf/WBC%20Environmental%20Strategy%20Summary%20A4%20.pdf?m=637141844400230000">https://www.westberks.gov.uk/media/48362/Draft-Environment-Strategy-2020-2030-Summary-document-January-2020-/pdf/WBC Environmental Strategy Summary A4 20.pdf?m=637141844400230000</a>WBC - Environment Strategy - <b>with declaration of climate emergency</b>. This development will contribute with the increased pollution from the construction traffic, increased vehicle pollution due to the inevitable congestion and further pollution from the residences once in use.</p> <p>21. The plan suggest the provision of a “country park”. There is no budget available for this.</p> <p>22. There would be a huge impact on the already oversubscribed doctor’s surgeries within Thatcham, and the proposed development would only mean more strain on those stretched resources.</p> <p>23. There would be a huge stretch on already over busy retail stores within both Thatcham and Newbury. The pandemic has highlighted issues which already existed. The car parks in Newbury town centre are inadequate during busy times for the current residents without adding the proposed number of</p>	<p>the impact of the development. Additional school provision is included in the IDP.</p> <p>In relation to the Climate Change Emergency, The emerging draft LPR includes a policy that specifically covers climate change (policy SP5). Will McAree (lpr1370)	Further to the public consultation on WBC Local Plan Review 2020-2037 Emerging Draft, specifically the proposal to develop 2500 houses in North East Thatcham. As a resident in Upper Bucklebury I wanted to	Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.

Respondent (with lpr ref)	Response	Council Response
	<p>share my concerns on the impact of the development on the local area and community.</p> <p>My family and I have chosen to live in a rural community of Upper Bucklebury and the proposed development will surely lead to a loss of the rural community 'feel' due to Upper Bucklebury being connected to the greater urban area of Thatcham.</p> <p>The proposed development would be lead to significant loss of the 'green' land and consequently loss of precious ecosystems. With the high number of dwellings proposed the consequential need for further additional buildings and amenities to support such a significant increase in the local population, further increasing the required volume of 'green' land to be developed.</p> <p>The proposed number of dwellings and consequential increase in the local population will increase traffic through the surrounding areas including Upper Bucklebury. Recognising the A4 is main road that will be used by a proportion of the community, as soon as the A4 becomes congested, as it regularly does drivers will use quieter, rural roads to make timely progress with their journeys (this is already clearly evident). Our concern with increased traffic through the village is the safety of other road/pavement users such as our children as they make their way to school or enjoy their village (in parts of Upper Bucklebury there are no pavements and we need to use roads to move about our village). Despite roads being identified as 'quiet lanes' there are regular instances of vehicles exceeding the speed limit.</p> <p>Understandably there will also be increased demand to explore the local common areas further increasing road users and demand for parking. It's likely a higher number of visitors would also impact the fragile ecosystems in the surrounding countryside with a long history that should be preserved for future generations to enjoy.</p>	<p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from</p>

Respondent (with lpr ref)	Response	Council Response
	<p>I assume the development would ensure appropriate upgrading of amenities, not only for the new development but not to the detriment of Upper Bucklebury (we already regularly experience issues with water supply).</p> <p>I do acknowledge the need for new housing but this proposal will significantly impact the rural community and surrounding country side of Upper Bucklebury and urge WBC to reconsider the proposal.</p>	<p>the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>
Elizabeth Weedon (lpr1375)	<p>As a resident of &lt;personal information removed&gt;in Upper Bucklebury I would like to strongly register my OBJECTION to the proposed full development of the above sites for the following reasons.</p> <ol style="list-style-type: none"> <li>1. It is cited in the Bucklebury vision and Bucklebury Plan to maintain a strong greenbelt between Thatcham and Upper Bucklebury. This document is approved and agreed with WBC and should be considered as supplementary planning consideration. It is not mentioned in the WBC documentation.</li> <li>2. It would effectively join Upper Bucklebury with Thatcham, which has all but happened at Cold Ash effectively removing the rural aspect of the area. This is actually stated in the WBC documentation (<a href="https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=0">https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=0</a>) page 22, stating "particularly as development of both north east and north Thatcham would result in the loss of the separate identities of Cold Ash and Bucklebury, and would harm the setting of the AONB settlement pattern".</li> <li>3. A previous application was rejected by the Secretary of State in 2017 <a href="https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-">https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-</a></li> </ol>	<p>There is no green belt within this area (or within the District) there will be open space maintained along the northern/north eastern part of the site.</p> <p>As part of the preparation of the LPR the council has undertaken a Settlement Boundary Review (SBR).The settlement boundary criteria make clear that boundaries will include sites allocated through the Local Plan process. North East Thatcham is proposed for allocation under policy SP17. Should the site, or any part of it, be removed from the LPR the boundary for Thatcham would be adjusted to exclude it. It is acknowledged that the settlement boundary is currently drawn around the whole of the proposed allocated site at North East Thatcham whilst Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.' The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site</p>

Respondent (with lpr ref)	Response	Council Response
	<p><a href="#">down.html</a>. Why are WBC now considering this site in light of the previous objection, what has changed and knowing this has been refused once why have massive funds been spent thus far?</p> <ol style="list-style-type: none"> <li>4. It is a massive over development of the countryside in one area which consists of rolling hills and farmland. The reason stated is that 85% of West Berkshire is AONB. WBC has previously built on AONB and AONB status can be changed with government approval, and as it allegedly the government driving this would they not be more open to changing some AONB status ?</li> <li>5. It will have a significant impact on traffic in the area and especially on the route into Thatcham and Newbury and towards the station which are already heavily congested at busy times and in the event of any minor traffic disruption. <ol style="list-style-type: none"> <li>1. This will significantly impact the freight traffic using the industry site at Thatcham</li> <li>2. It will significantly increase the traffic on the back route (rat runs) which are not designed for large traffic volumes.</li> </ol> </li> <li>6. Traffic and speeding in particular through Upper Bucklebury is of a major concern due to the primary school. With an increase in 10% this will only worsen the situation. Traffic in Upper Bucklebury increases considerably each time there is disruption on the A4 and the development will significantly increase traffic, especially during the morning rush hour as pupils from the village walk to school.</li> <li>7. It is cited that there cannot be development on the Kennet flood plain, however there are multiple examples where this has already been done (most of Thatcham was originally a flood plain), this is extremely hilly land which is almost certainly as unsuitable to development as the flood plain. Why build on an area where flood alleviation has already been installed to protect Thatcham residents?</li> <li>8. It will significantly increase the noise and light pollution to the Bucklebury Parishioners – there are no street lights in Upper</li> </ol>	<p>as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. At this stage it is therefore not possible to draw the settlement boundary any tighter. As the LPR progress and more detailed work is done on the sensitivity and capacity of different parts of the site to accommodate development the boundary will be amended accordingly.</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that ‘in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy’ (paragraph 67 of the Core Strategy Inspector’s</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Bucklebury. There will also be decades of disruption through the construction phase.</p> <p>9. There is no evidence that this will enhance Thatcham town centre (or indeed Newbury). The development of the old Army Base by the Station didn't add any amenities and we have seen the slow decline of the town centre over the last 20 years despite the area growing.</p> <p>10. Schooling – this will obviously have an impact on local schools (and traffic). Current indications are that KS1 children volumes are decreasing yet the plan includes a proposal for 3 new schools. Will these be built before or after the houses? Build it before and it will poach children from local schools, such as Upper Bucklebury which will make that unsustainable (as is happening in Newbury with the new school on the college site). Build it after and the local schools will be overwhelmed beforehand. If the development is spread across the region there is a much greater chance of the load being spread out.</p>	<p>Report). As additional housing is required, and given Thatcham's status as an 'Urban Area' in the development plan is it considered appropriate to consider Thatcham for housing.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and</p>

Respondent (with lpr ref)	Response	Council Response
		<p>lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p>
Barry Dickens (lpr1376)	<p>Dear Sir or Madam, I wish to object to the proposed development in NE Thatcham for 2500 houses for the following reasons:</p> <p>The housing supply need in the Emerging Draft of the Local Plan is based on outdated information</p>	<p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government's standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p>

Respondent (with lpr ref)	Response	Council Response
	<p>It will merge Thatcham into Upper Bucklebury and close the 'strategic gap' between the two. This scheme will breach the settlement boundary of Thatcham defined by Floral Way.</p> <p>Increased traffic predictions are way off the mark and traffic will adversely affect Bucklebury far more than predicted.</p> <p>The setting of the AONB will be harmed.</p> <p>The development will result in increased light, noise and air pollution.</p> <p>This plan needs urgent reconsideration</p>	<p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p> <p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead</p>

Burdwood Surgery (lpr1378)	<p>Whilst we understand the need to develop new homes in our area, we recognise it will have huge impacts and would like to be involved in shaping the plans with respect to the impact on health and well-being.</p> <p>You will no doubt be aware that we were originally a practice built to serve 8,000 patients and now accommodating 10,500 and that there is a workforce crisis in primary care for both nurses and doctors, both locally and nationally.</p> <p>We would like to understand the impact to us as a surgery and what that means to our patients. We endeavour to maintain high quality primary care services to our patients and work hard to maintain that. Any population growth tends to affect everyone regardless of where the house are actually being built.</p> <p>We would like it to be noted that we would like you to take into consideration and have an open dialogue with us and the other primary care providers in the locality at the earliest point in any development, so we can have a joined-up approach.</p>	<p>Comments noted, and the Council acknowledge and welcome joint working and collaboration with service providers such as the doctor's surgery.</p>

Respondent (with lpr ref)	Response	Council Response
Maureen Bowden (lpr1380)	<p>I would like to register my objection to the proposed development of farmland for 2,500 houses between the A4 Thatcham and Upper Bucklebury.</p> <p>I am a resident of Upper Bucklebury, and have been all my life. Whilst the housing in Thatcham continues to increase at a rapid pace, the development of the infrastructure remains static, and it is already inadequate. More and more the main road through Upper Bucklebury is used as a “rat run” between Thatcham and Reading, the congestion around the railway bridge is terrible and whilst I appreciate the demand for housing is high, surely a new development the size of Hungerford in this location is unsustainable and severely detrimental to local residents.</p> <p>Whilst these "glowing plans" for this area of development to become so enormous and perfectly sustained by amazing new facilities, the loss over the last 10 years of local children’s services, youth services and those for the elderly, difficulties obtaining GP appointments (even pre Covid) the neglected condition of our roads, how on earth can be considered. Surely until the pandemic is behind us and its effects are fully known, this is not the time for such a ridiculous number of houses to be planned alongside our already stretched resources.</p>	<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a ‘living document’ and will be updated regularly updated in consultation with infrastructure providers.</p> <p>The development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population). Highway works and active travel routes would assist in directing residents to using the A4/Floral Way rather than Harts Hill Road, and using an enhanced cycling and walking network to travel, including to Thatcham train station. Residents would make use of the newly provided education facilities on the site, which would not be expected to purposefully attract pupils from Bucklebury primary school.</p> <p>In relation to the plan being prepared prior to the coronavirus pandemic, the full impact of the COVID 19 pandemic will not be fully apparent for some time. The LPR is a long term strategy to 2039, during which time a review will be conducted every 5 years. The impact of changes in response to macro and local economic factors will be assessed through subsequent reviews, once such implications are realised.</p>
Laura Sparks (lpr1368)	<p>My objection to these new homes are as follows-</p> <p>It’s too many houses in one area.</p> <ol style="list-style-type: none"> <li>1. Not enough school places, already stretched.</li> <li>2. Doctors surgeries over stretched</li> </ol>	<p>Thatcham is an ‘Urban Area’ as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector’s report for the Core Strategy notes that Thatcham should be a location</p>

Respondent (with lpr ref)	Response	Council Response
	<ol style="list-style-type: none"> <li>3. Roads already too busy.</li> <li>4. Shopping centre in Thatcham not big enough.</li> </ol> <p>I understand new homes need to be built and that the area proposed isn't a footpath but consideration must be paid to infrastructure, schools in particular do not have enough spaces and this worries me greatly.</p>	<p>to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p>
Jessica Brown (lpr1369)	<ol style="list-style-type: none"> <li>1. Bucklebury has always been a small village with a close knit community and adding houses would take away the small caring manner of the village and make it feel like more of a town where nobody cares for one another. It would be a huge over development for such a small community. There is not enough space in local doctors surgeries, dentists etc to allocate for this many extra households. We have to already wait weeks on end to get appointments.</li> <li>2. Pollution levels will increase dramatically in the area. Light pollution will increase and that is not fair on all of the individuals in the area trying to preserve our resources.</li> <li>3. We would lose an excruciating amount of the country side. For years myself and my family have lived in Bucklebury and we often spend evenings in the summer having picnics and enjoying this countryside. My grandfather tells us many stories about the land and how himself and my great grandparents grew up there.</li> <li>4. We have been trying to preserve the wildlife as a community and the wildlife has really started to thrive! It would be an awful shame to destroy the hard work and all of the wildlife that has to the area.</li> <li>5. The amount of traffic this development will create will have a massive strain on the roads and journeys will take twice as long</li> </ol>	<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. <p>Thatcham Medical Practice (lpr1382)</p>	<p>I would like to reiterate what, the Practice Manager from The Burdwood Surgery has stated and our concerns for the very large development that is planned to happen on the east side of Thatcham.</p> <p>Medical services in Thatcham are presently over stretched and we are no different from The Burdwood practice. We are a larger practice of over 18,500 patients and recently our patient list has been growing again.</p> <p>I think it is extremely important that at an early stage the Planning Team are fully aware of local medical services and the present pressure they are under. They need to understand what a large development like this</p>	<p>Comments noted, and the Council acknowledge and welcome joint working and collaboration with service providers such as the doctor's surgery.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>will mean to the pressure of local medical practices and we would like this to be taken into consideration.</p> <p>I think it will be extremely important that the planning team will need to look at assisting with extra development resources which will allow the medical services in the local area to help manage any increase in population size.</p> <p>If consideration of medical services cannot be guaranteed, then I think strong objections to this development on the grounds of danger to health of the local population.</p>	
Caroline Clothier (lpr1439)	<p>My letter regarding this development is neither a full objection nor full approval.</p> <p>I live in Upper Bucklebury and have some concerns about the proposed development.</p> <p>Whilst I fully accept the need for the council to build new homes to meet the government quota for West Berkshire there are some issues I would like to raise.</p> <p>Firstly, and my major concern, is the increase in traffic using the road through Upper Bucklebury. Having looked at the information available for this development the traffic study appears to have little detail to back up broad based 'estimates' of how much extra traffic will indeed use Harts Hill Road and Broad Lane and the effect this will have in the village. In order to maintain the rural nature of the village I would not be in favour of any road widening schemes, if that were even possible, to alleviate traffic along Broad Lane.</p> <p>My second concern is an environmental one looking at the land that is proposed to be used. It is close to organic farmland and the AONB and</p>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Respondent (with lpr ref)	Response	Council Response
	<p>I would want to see a full, independent, environmental study on the impact on flora and fauna of the area.</p> <p>Thirdly, I am aware of the new flood defences that have been put in place both near Henwick and just north of Floral Way. There is little current housing built on the hillside and already we know there have been significant flooding events in the last 15 years which the defences are designed to avoid in the future. By effectively removing the draining effect of vast tracts of open land I am concerned this will, once again, increase the flood risk in Thatcham. ( where my son and his family live) I would like to see a full risk assessment done on this issue and for the plans to include full information for the new flood defences that would be required.</p> <p>My overall conclusions lead me to sum up my current thoughts as whilst I accept the need for more homes, especially affordable homes, this proposed development feels too large for both the town and the land available in order to seriously consider my main points above. Therefore I do object to the current proposal but am hoping for an opportunity to approve an amended smaller plan.</p> <p>I understand that the development needs to be a certain size to trigger the infrastructure being put in by the developer but I would like WBC to investigate reducing the number of homes sufficient to retain important infrastructure without losing the character of both Thatcham and the open countryside that forms the border between the town and the AONB.</p> <p>Thank you for the time and consideration you put into this and other planning decisions for West Berkshire.</p>	<p>lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>
Lorraine Jordens (lpr1438)	<p>I would like to formally register my objection to the proposed development of 2500 houses at NE Thatcham for the following reasons:</p> <ol style="list-style-type: none"> <li>1. It will dramatically reduce the greenbelt between Thatcham, Cold Ash and Upper Bucklebury.</li> <li>2. The rural nature of this area would be completely lost with Upper Bucklebury, Cold Ash becoming part of Thatcham.</li> <li>3. It would be a massive over development of our beautiful countryside in an area which consists of rolling hills and farmland. If developments of this scale are approved there will not be any open rural areas left for future generations to enjoy.</li> </ol>	<p>There is no green belt within this area (or within the District) there will be open space maintained along the northern/north eastern part of the site.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>4. The proposed land is not particularly suitable for development as it is very hilly land and has had issues as a flood plain area. I live next to the new flood defence. This morning I took photos of the lack of maintenance on this sight. There are leaves, old plastic containers and sand blocking many of the new barriers. When this flood defence was built WBS admitted partial liability for the damage to our houses during the construction. How much more damage and liability will be incurred with this proposed development?</p> <p>5. The view that Thatcham is best placed to take a development of this size in this location is misplaced, un-proven and ill-conceived.</p> <p>6. This development will have a significant impact on traffic levels and the associated pollution throughout the area, especially increasing:</p> <ol style="list-style-type: none"> <li>1. Traffic and speeding on Harts Hill Road is currently an area of great concern. We are sometimes unable to turn into Harts Hill Road in rush hour due to the amount of traffic.</li> <li>2. Traffic from Thatcham through Upper Bucklebury to Chapel Row on roads which are not designed for large traffic volumes.</li> <li>3. Traffic on the route into Thatcham and Newbury. These roads approaching the station are already heavily congested at busy times and in the event of any minor traffic disruption.</li> </ol> <p>7. It will significantly increase the noise and light pollution to the Dunstan Park and those in the surrounding areas. I live next to the new flood defence and from the cutting of the trees the noise levels have increased significantly.</p>	<p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver ‘a network of green infrastructure which will include a new community park linking Thatcham to the AONB.’</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham’s flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for</p>

Respondent (with lpr ref)	Response	Council Response
	<p>8. There is no evidence that this development will enhance Thatcham town centre (or the area in general).</p> <p>9. It is not likely to attract new businesses to the area or create or significantly increase employment. Please just look at the empty retail units and The Mill House Pub which is now just an eye sore.</p> <p>10. The amount of wildlife habit that was destroyed in the construction of the flood defence was appalling, what will be the impact on if this proposed development went ahead? I personally witnessed dead fox cubs and rabbits on Floral Way, Monkjack running around Bradley Moore Square in daylight. Then there was the destruction of hedgerows with the habit associated with them. WBS admitted there were doormice which is endangered and still none of the wildlife planting which was promised has gone ahead. I doubt whether building companies will look at this destruction as it appears wildlife and natural vegetation is not high on their agenda.</p> <p>11. This level additional of housing will inevitably have an adverse impact on local facilities, schooling, medical and welfare services which are already overstretched.</p> <p><b>To conclude this development is unnecessary, inappropriate and ill-conceived and should be rejected.</b></p> <p><b>Observations</b></p> <p>1. Awareness of this development/application/consultation was provided by the local community and not WBC. Furthermore, it is not clear at what stage this application has now reached.</p>	<p>both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely</p>

Respondent (with lpr ref)	Response	Council Response
	<ol style="list-style-type: none"> <li>2. Why is WBC not writing to all residents to make them aware of this development and encourage/seek comments on the proposal from as wider audience as possible?</li> <li>3. Taking into consideration the scale of this development there has been a distinct absence of communication which is extremely disappointing.</li> <li>4. As a local resident I find the comment by Councillor Hilary Cole reported in the Newbury Weekly News that <i>“We are very keen to work with the local community...”</i> a pleasant surprise and I would be interested to know when it is going to commence.</li> <li>5. Up to now I was under the impression that WBC was committed to keep a substantial greenbelt between Thatcham and surrounding villages. The consideration of this approval now certainly seems to totally contradict this stated commitment.</li> <li>6. Finally, why is WBC are now considering this development when a previous application was rejected by the secretary of state in 2017?</li> </ol>	<p>infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a ‘living document’ and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council’s Statement of Community Involvement (SCI), on the Council’s website and in the local press and via notification emails to those registered on the Council’s consultation database.</p> <p>The site is not within the Green Belt (there is no Green Belt in this District).</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The Core Strategy Inspector (in 2012) considered that ‘in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy’ (paragraph 67 of the Core Strategy Inspector’s Report). As additional housing is required, and given Thatcham’s status as an ‘Urban Area’ in the development plan is it considered appropriate to consider Thatcham for housing.</p>
Ian Clothier (lpr1437)	<p>&gt; I would like to raise my objection to this proposed development on the grounds that it is too large for the area.</p> <p>&gt; I live in Upper Bucklebury and have the following concerns about the proposed development.</p> <p>&gt; Whilst I fully accept the need for the council to build new homes to meet the government quota for West Berkshire there are some issues I would like to raise.</p> <p>&gt; Firstly, and my major concern, is the increase in traffic using the road through Upper Bucklebury. Having looked at the information available for this development the traffic study appears to have little detail to back up broad based ‘estimates’ of how much extra traffic will indeed use Harts Hill Road and Broad Lane and the effect this will have in the village. In order to maintain the rural nature of the village I would not be in favour of any road widening schemes, if that were even possible, to alleviate traffic along Broad Lane.</p> <p>&gt; My second concern is an environmental one looking at the land that is proposed to be used. It is close to organic farmland and the AONB and I would want to see a full, independent, environmental study on the impact on flora and fauna of the area.</p>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>&gt; Thirdly, I am aware of the new flood defences that have been put in place both near Henwick and just north of Floral Way. There is little current housing built on the hillside and already we know there have been significant flooding events in the last 15 years which the defences are designed to avoid in the future. By effectively removing the draining effect of vast tracts of open land I am concerned this will, once again, increase the flood risk in Thatcham. ( where my son and his family live) I would like to see a full risk assessment done on this issue and for the plans to include full information for the new flood defences that would be required.</p> <p>&gt; My overall conclusions lead me to sum up my current thoughts as whilst I accept the need for more homes, especially affordable homes, this proposed development feels too large for both the town and the land available in order to seriously consider my main points above.</p> <p>&gt; I do understand that the development needs to be a certain size to trigger the infrastructure being put in by the developer but I would like WBC to investigate reducing the number of homes sufficient to retain important infrastructure without losing the character of both Thatcham and the open countryside that forms the border between the town and the AONB.</p> <p>&gt; Thank you for the time and consideration you put into this and other planning decisions for West Berkshire.</p> <p>I would like WBC to investigate reducing the number of homes sufficient to retain important infrastructure without losing the character of both Thatcham and the open countryside that forms the border between the town and the AONB.</p>	<p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy</p>

Respondent (with lpr ref)	Response	Council Response
		<p>which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham’s flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government’s standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p>
Ann Mapham (lpr1436)	<p>The Bucklebury Parish Council has produced a 15 page Report which comments on the West Berkshire Council's NE Thatcham Development plan. The Report is thorough and responsible and I would like to support this excellent Report.</p> <p>Essentially, the BPC Report highlights many discrepancies between the WBC's mandate, (the guidelines and principles to be adhered to, when housing developments are planned in West Berkshire and in the UK generally) and the way in which the Plan fails to adhere to these principles.</p> <p>There is an urgent need to go back to the drawing board:</p> <ul style="list-style-type: none"> <li>• Most importantly in my view, is the crucial need to appreciate that proposing an area of high density housing which would link Thatcham with Bucklebury is in direct opposition to the expressed principle that values the "local distinctiveness of the area". As the BPC report says: <i>There is a "Strategic Gap: A tenet of past planning in West Berks has been the maintenance of strategic gaps to separate communities. Until this proposal was tabled, the land north of Floral Way has provided the gap</i></li> </ul>	<p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government's standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs</p>

Respondent (with lpr ref)	Response	Council Response
	<p><i>between Thatcham and Bucklebury. The proposal all but eliminates the separation and will visually and socially break natural community boundaries. Breach of the strategic gap has been cited by WBC to refuse planning applications in the recent past. It is incomprehensible that its loss is now proposed."</i></p> <ul style="list-style-type: none"> <li>• A recalculation of the number of houses needed in Thatcham is essential - the BPC report makes strong arguments pointing out that 2500 houses is <u>way in excess</u> of the number that will be required.</li> <li>• Explore other options for housing - for example repurposing empty buildings (John Lewis and Debenhams shopping space in Newbury). Consider two or three storey buildings which would lower the footprint of a housing settlement.</li> <li>• Explore other areas which don't involve the loss of or future damage to pristine countryside.</li> <li>• Reassess and fully appreciate the damage to Bucklebury Common which would inevitably result from the enormous increase in pressure of the proposed 10 000 more people in close proximity to the area. Bucklebury Common is an ancient and priceless national treasure. To deliberately propose housing in the region of 10 000 people close by, is gravely counter the WBC instruction which explicitly states - "<i>The degree of protection will be proportionate to the status of the site in terms of its international, national and/or local importance;</i>" See below</li> <li>• Study more thoroughly the traffic flow that would result from the proposed development and the enormous problems and everyday frustrations that would be experienced by the existing community.</li> <li>• Appreciate the air and light pollution problems that would be experienced by the residents of Bucklebury - accurately described in the BPC Report.</li> <li>• Provide clarification in regard to who the beneficiaries of this development are and weigh that up with the cost to the existing community in terms of quality of life - access to schools, health</li> </ul>	<p>assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p> <p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>care, daily experience of traffic and transport, population pressure, access to pristine nature.</p> <p>Thus the BPC Report highlights principles which guide the West Berkshire Council and it points out in detail how this development contravenes its mandate. I urge those concerned with the planning to consider <i>all the points</i> made in the BPC Report. I urge them to respect the powerful arguments it puts forward and go back to the drawing board.</p> <ul style="list-style-type: none"> <li>• A recalculation of the number of houses needed in Thatcham is essential - the BPC report makes strong arguments pointing out that 2500 houses is <u>way in excess</u> of the number that will be required.</li> <li>• Explore other options for housing - for example repurposing empty buildings (John Lewis and Debenhams shopping space in Newbury). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• Appreciate the air and light pollution problems that would be experienced by the residents of Bucklebury - accurately described in the BPC Report.</li> <li>• Provide clarification in regard to who the beneficiaries of this development are and weigh that up with the cost to the existing community in terms of quality of life - access to schools, health care, daily experience of traffic and transport, population pressure, access to pristine nature.</li> </ul>	<p>packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>The purpose of the planning system is to contribute to the achievement of sustainable development. At a very high level, the objective of sustainable development can be summarised as meeting the needs of the present without compromising the ability of future generations to meet their own needs. Through the Local Plan Review the Council will ensure that the allocations and policies will deliver sustainable development and will be tested through the Sustainability Appraisal and examination.</p>
Allison Butcher	<ol style="list-style-type: none"> <li>1. SP 13, in Chapter 6, introduces <b>NE Thatcham (SP 17), and the development of 2500 houses</b>. Such a disproportionately large development will have an unacceptable impact on a town the size of Thatcham and on the surrounding rural area and villages. I agree with the findings of the BPC that the housing demand analysis is flawed, and that the effects of the Covid-19 pandemic in relation to the proposed housing needs have not been taken into consideration.</li> </ol>	<p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to</p>

Respondent (with lpr ref)	Response	Council Response
	<p>2. <b>Upper Bucklebury and adjoining parishes will be subsumed into the ‘NE Thatcham’ area</b>; the development will go well beyond the clear town boundary of Floral Way, eliminating the ‘strategic gap’ between Thatcham and the villages; the development will reach up to the North Wessex Downs AONB and Bucklebury Common; there is no commitment to a boundary to prevent further spread or development of the site.</p> <p>3. <b>The negative impacts on the AONB and Bucklebury Common</b> will be considerable and of long duration for the many and detailed reasons noted in the BPC response. These impacts are unacceptable for future generations. I support the arguments and recommendations by the BPC and parishioners on the inclusion of specific objectives in the LPR on Nature.</p> <p>4. The number of houses proposed will inevitably increase <b>the weight of traffic</b> through Thatcham and the rural communities to the north of the development. The hill leading to Upper Bucklebury is notoriously dangerous. Many vehicles already use this route up to and through the villages in order to avoid traffic at peak times on the A4. Speeding, as WBC is already aware, is an issue of grave concern on these roads; the additional number of car journeys generated by the proposed development would exacerbate this problem to yet more dangerous levels for local residents. The quality of life for residents would also be severely affected by the increased levels of traffic and the associated pollution.</p> <p>5. Apart from the pollution caused by additional traffic, the housing development itself will also result in <b>increased levels of pollution</b>. The rural communities and the Common will be adversely affected by the increased carbon generation. Light pollution will affect the population of Bucklebury parish and, as noted by BPC, will upset the life of birds and mammals. Noise pollution, both during the extended proposed building period and beyond, will be considerable and disruptive.</p>	<p>accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>In relation to the plan being prepared prior to the coronavirus pandemic, the full impact of the COVID 19 pandemic will not be fully apparent for some time. The LPR is a long term strategy to 2039, during which time a review will be conducted every 5 years. The impact of changes in response to macro and local economic factors will be assessed through subsequent reviews, once such implications are realised.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council’s evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site</p>

Respondent (with lpr ref)	Response	Council Response
	<p>6. <b>The infrastructure for Thatcham</b>, in areas such as the development of the town centre, the additional health care needs, and the impact on the level crossing and parking at Thatcham Railway Station, <b>has not been addressed</b> in the light of this additional large housing development. All of these matters will have a negative effect, in their turn, on the surrounding rural areas.</p> <p>SP17 : to be removed from the West Berkshire Local Plan Review</p> <p>Consultation with all stakeholders on changes and improvements to the LPR, with a fair and realistic timeline for all</p>	<p>which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc. In relation to the concerns on the potential impact on Bucklebury Common, the development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population).</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from</p>

		<p>the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>
	<p>I am writing to raise my strong objection to the proposal of developing land for housing on the farmland between Upper Bucklebury and the A4 and Floral Way.</p> <p>West Berks Council has increasing opportunities to redevelop existing and emerging brownfield sites to accommodate the required extra housing before considering destroying yet more greenfield sites in the beautiful Thames Valley.</p>	<p>In regards to the development of brownfield sites, when determining which new sites to allocate the Council are only able to consider land that is submitted to them through the HELAA. The HELAA includes brownfield sites that the Council are aware of.</p> <p>The supporting text to policy SP12 (Approach to Housing delivery) of the emerging draft LPR identifies that several sources will ensure a continuous supply of land across the plan period. These include amongst others, existing planning</p>

	<p>Out of town business parks and retail parks built in the late 1990's early 2000's in the Newbury and Thatcham area, which includes the Vodafone HQ and Pinchington Lane Retail Park, has resulted in the slow demise of Newbury and Thatcham town centres due to losing traders, shoppers, businesses and office workers.</p> <p>More recently, advances in technology has enabled people to shop and work from home and as a result, towns are rapidly becoming ghost towns.</p> <p>Now with the occurrence of a global pandemic, and the requirement for home working and internet shopping, even more premises in towns and out of town business parks and retail parks in Newbury, Thatcham and Reading are increasingly becoming vacant spaces.</p> <p>These brownfield sites have a lot of infrastructure already in place and can be revived, improved, enhanced and developed for housing.</p> <p>As well as benefiting nature and its biodiversity, our green spaces are proving invaluable for more people than ever before as we search for peace and pleasant experiences to clear our minds and breathe fresh air.</p> <p>In my opinion, it is poor foresight to develop greenfield sites when brownfield sites are increasingly becoming underutilised.</p> <p>Planning departments are at the forefront of enabling change and making the right decisions for the future, and we do not yet know whether we will require to adapt further still as Covid and its mutations remain an unknown entity.</p> <p>Thank you for considering my objection.</p>	<p>commitments (unallocated sites with planning permission), many of which are brownfield sites.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>In relation to the plan being prepared prior to the coronavirus pandemic, the full impact of the COVID 19 pandemic will not be fully apparent for some time. The LPR is a long term strategy to 2039, during which time a review will be conducted every 5 years. The impact of changes in response to macro and local economic factors will be assessed through subsequent reviews, once such implications are realised.</p>

Respondent (with lpr ref)	Response	Council Response
Name Supplied (lpr1448)	<p>As family residents of Upper Woolhampton (address below), I wish to register my objection to the proposed full development of the above sites for the following reasons:</p> <ol style="list-style-type: none"> <li>1. We were made aware of this application/ consultation by neighbours in Bucklebury and have not received any information or correspondence from West Berks Council (WBC). WBC are in my opinion negligent in this process. To make it a fair process, the consultation period should be extended and ALL residents should be formally written to, included and invited by WBC to comment.</li> <li>2. It is cited in the Bucklebury vision and Bucklebury Plan to maintain a strong greenbelt between Thatcham and Upper Bucklebury. The vision and plan uphold Bucklebury as a rural village community, for the village to remain a predominantly rural AONB. That there is no wish amongst residents to allow growth to change the character and nature of our historic, rural community identity. This document is approved and agreed with WBC and should be included as supplementary planning consideration – yet it is not mentioned in the WBC documentation!?</li> <li>3. In the NWN the following statement is attributed to Hilary Cole. The council's executive member for housing, Hilary Cole (Con, Cold Ash and Chieveley), has said: "We are very keen to work with the local community because it's such a big proposal and development for Thatcham." However, WBC have clearly not made good enough attempts to engage with local residents – see above points 1 and 2.</li> <li>4. Loss of village identity. There is simply not enough space between the proposed development and Upper Bucklebury and the boundary of the AONB. The village will practically be part of Thatcham (or the Newbury/Thatcham conurbation) and stands to lose its identity as a village. The proposal would effectively join Upper Bucklebury with Thatcham, which has all but</li> </ol>	<p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p> <p>There is no green belt within this area (or within the District) there will be open space maintained along the northern/north eastern part of the site.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to</p>

Respondent (with lpr ref)	Response	Council Response
	<p>happened at Cold Ash effectively removing the rural aspect of the area. This is actually stated in the WBC documentation (<a href="https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=0">https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=0</a>) page 22, stating “particularly as development of both north east and north Thatcham would result in the loss of the separate identities of Cold Ash and Bucklebury, and would harm the setting of the AONB settlement pattern”. WBC are therefore suggesting that the Parish of Bucklebury should maintain its identity but the proximity of the development is in contradiction to WBC’s own intentions.</p> <p>5. Unacceptable impact on our AONB. According to <a href="http://gov.uk">gov.uk</a>, an AONB has to a combination of several criteria, two of these are:</p> <ul style="list-style-type: none"> <li>• relative wildness, such as distance from housing or having few roads</li> <li>• relative tranquillity, where natural sounds, such as streams or birdsong are predominant</li> </ul> <p>Both of these points stand to be significantly impacted by such a massive nearby development and may no longer be able to be met.</p> <p>6. Increase in traffic pollution and hazards by Bucklebury Common. We moved next to Bucklebury Common to live in the countryside and be away from car, light and noise pollution. Over the 7 years or so we have lived in Upper Woolhampton, we have already noticed a significant increase in traffic on Carbinswood Lane by Bucklebury Common. The introduction of such a huge development to the area would necessarily increase traffic pollution, cause additional road hazards ( neighbours have sadly lost dogs on the road, hit by speeding cars and local wildlife, including snakes, have been run over) and cause significantly more disturbance to the residents and nature, on what are rural country unmarked roads and lanes.</p>	<p>provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that ‘in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy’ (paragraph 67 of the Core Strategy Inspector’s Report). As additional housing is required, and given Thatcham’s status as an ‘Urban Area’ in the development plan is it considered appropriate to consider Thatcham for housing.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council’s evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a ‘masterplan’ / visual representation, with accompanying explanatory text, to provide</p>

Respondent (with lpr ref)	Response	Council Response
	<p>7. Increase in traffic on the route into Thatcham and Newbury and towards the station, which are already heavily congested at busy times. When there are even minor traffic delays/congestion on the main roads, drivers resort to the rural routes which are simply not designed for these increased traffic volumes. An increase in houses in the area stands to significantly increase the traffic volume on our rural roads that are not designed for any increase in traffic volume (nor should they ever be!)</p> <p>8. Increase in traffic and increased potential of speeding through Upper Bucklebury, which is of a major concern due to the primary school and many family residents with children (and pet dogs/ cats). With an increase in traffic, which could be as much as 10%, this will only worsen the situation.</p> <p>9. Impact on Nature. We have seen a number of protected species including the great crested newt, adder, slow worm and bats in and around Bucklebury Common. There are also birds such as the nightjar, which are under conservation concern. We fear increased numbers of cars and people visiting the area of outstanding natural beauty will have a large negative impact. Wildlife like this needs to be protected and not put under more threat. The development to the south of Blacklands Copse and Harts Hill Copse will mean open space dramatically reduced and wildlife forced to retreat, adding more pressure on species in decline. Over the last 7 years we have seen a significant increase in the litter in and around the Common and fly tipping in the area. Bringing significantly more people to the area stands to cause more problems like this and more damage to what is already a fragile ecosystem.</p> <p>10. The proposal is an over development of the countryside of rolling hills and farmland and also stands to overdevelop Thatcham. This proposed over development is out of character for the area plans and will have a detrimental impact for the town itself as well as the surrounding villages. Thatcham is at capacity as it. Pre-covid, it was often hard to find a parking</p>	<p>details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham’s flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>space in the town centre, doctors/dentists are apparently stretched, there's limited parking at the train station and already almost full train services at peak times into London. Not to mention the traffic delays around the crossing. There is no evidence that the development will enhance Thatcham town centre (or indeed Newbury).</p> <p>11. A previous application was resoundingly rejected by the secretary of state in 2017 <a href="https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html">https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html</a>. Why, only a few years after this, are WBC now considering this site in light of the previous rejection, what has changed? Knowing a smaller planning application has been refused once and that there is clearly significant local objection again, why have massive funds been spent pursuing it?</p> <p>12. Why have WBC and Thatcham council used a great deal of tax payers money in completing many surveys and writing an 800 page report, before going to consultation on the proposal?</p> <p>13. The proposed development will completely surround the Crematorium at Thatcham which was, as I understand, placed there to be away from residential properties and has constraints placed on it.</p> <p>14. It is stated/assumed this will help the Upper Bucklebury Business – predominantly the Pub and Shop. One pub and shop is hardly justification for a development this size. One thing we love about living in Bucklebury is that there is only one shop and one pub where the community enjoy getting together.</p> <p>15. Bringing more houses and cars to the area will significantly increase the noise and light pollution to a predominantly rural, peaceful area where people live to escape from developments like the one proposed.</p> <p>16. The HELAA was updated in December 2020 to take account of factual inaccuracies. What evidence can WBC produce to prove everything stated in the consultation document is still factually correct?</p>	<p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p> <p>In relation to the Climate Change Emergency, The emerging draft LPR includes a policy that specifically covers climate change (policy SP5). This requires that all development should contribute to West Berkshire becoming and staying carbon neutral by 2030.</p> <p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs development to the most sustainable locations in the district.</li> <li>• Policy SP6 (Flood Risk) directs development to areas least at risk of flood risk.</li> <li>• Policy SP22 (Transport) requires that any development that generates a transport impact will be required,</li> </ul>

Respondent (with lpr ref)	Response	Council Response
	<p>17. Schooling – this will obviously have an impact on local schools (and traffic). Many local families are very concerned that the proposal could overwhelm the brilliant local village schools that currently attract a good number of pupils and maintain a good balance of class sizes. Just because the plans include new schools, it does not mean that new families moving to the area will necessarily choose them. Many may well prefer to try for places at the existing, sought-after, traditional village schools, causing increased class sizes, over-stretching of school resources, increased cars, traffic, people and disruption to small rural villages.</p> <p>18. West Berkshire declared a climate emergency on 2 July 2019. <a href="https://www.westberks.gov.uk/media/48362/Draft-Environment-Strategy-2020-2030-Summary-document-January-2020-/pdf/WBC_Environmental_Strategy_Summary_A4_20.pdf?m=637141844400230000">https://www.westberks.gov.uk/media/48362/Draft-Environment-Strategy-2020-2030-Summary-document-January-2020-/pdf/WBC_Environmental_Strategy_Summary_A4_20.pdf?m=637141844400230000</a> WBC - Environment Strategy - with declaration of climate emergency. Building 2500 new houses will certainly increase the WBC carbon footprint and goes against the emergency/accelerated goal of carbon neutrality and "protecting and enhancing our natural environment" P5. Increased pollution will certainly be created by the entire construction process, increased light pollution from the development and more cars will bring increased vehicle pollution and noise pollution to our rural area. There are seemingly NO environmental advantages of building a massive development in rural area. A large development can only bring negative environmental impact and therefore goes against the intent, statement and purpose of the WBC environmental strategy.</p> <p>19. The plan suggests the provision of a "country park". There appears to be no budget available for this?</p> <p>If you can please confirm that you have received and will include our registered objection within the consultation period - thank you. Please</p>	<p>amongst other things, to have regard to West Berkshire's declared climate emergency and minimise the impact of all forms of travel on the environment.</p> <ul style="list-style-type: none"> <li>• Policy DC3 (Building Sustainable Homes and Businesses) looks at building sustainable homes and businesses,</li> </ul> <p>Any development site will have to comply with the aims and objectives of the plan.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>The site alongside the larger site area, is well related to the existing town of Thatcham. It is in close proximity to a range of services and facilities, including the train station. Thatcham is an urban area with a wide range of services and opportunities for employment, community and education. Development of a</p>

	<p>also keep us informed on further information and decisions on this matter.</p> <p>For your reference, we have included our names and address below (and our emails above), however, we do not wish for our personal details to be made public - or at least beyond what is simply necessary to register our objection and have our points taken into account during the official consultation process.</p>	<p>strategic nature at this site would support the service provision and regeneration that Thatcham requires.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>
Chris Willet (lpr1449)	<p>Whilst I recognise the need for increased housing and the Government's requirements on local authorities to meet certain targets, I object to the development proposals on the following grounds.</p> <p><b>Challenge the Need</b> [This issue also entered under SP12] The reduction in available land to develop has been reduced recently by the 30% increase in the areas of the DEPZ's around Aldermaston and Burghfield and I would urge WBC to challenge Central Government on the housing allocation.</p> <p><b>Impact on the AONB</b> The proposal will close the gap between Thatcham and the AONB. This is contrary to the statements within WBC's own document 'North Wessex Downs AONB Landscape Character Assessment (2002)', Policy SP8.</p> <p>Should this unacceptable proposal go ahead, against better judgement, then it should be made a <b>Pre-commencement</b> Condition that the infrastructure to create the 'country park' buffer zone (i.e. set boundaries, tree planting, hedgerows etc.) be established and protected prior to any house building commencing. No consideration should be given to a Section 73 application to vary the Conditions or overturning them at Appeal. In addition, all built development should be limited to being below 95M above OD which is again in accordance with the above-mentioned WBC document (the current proposal shows development up to 125 metres above OD, which would have a serious impact on the</p>	<p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government's standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>visual amenity in close proximity to the AONB. If this inappropriate over-development should be allowed to go ahead, a large proportion of the CIL monies should be spent on creating the country park / buffer zone. The pie chart which shows the amount of open space is misleading in that it indicates 50% open space but looking at the plans this is clearly not the case and must be also relying on the private garden areas and probably school playing fields as well. This is misleading. Clearly the 50% open space is not going to be available for public use.</p> <p><b>Traffic</b> The traffic study included within the document is woefully inadequate and clearly based on inaccurate data and is a very un-academic piece of work. Up to 5000 more cars (2 car spaces per household as required by WBC planning policy). This will lead to excessive pressure on existing narrow roads and rat runs through villages. There will be further congestion and waiting times at Thatcham level crossing and even more limited station parking, the wrong side of the level crossing. The junction with the A340, Theale to Tidmarsh Road, near Englefield Estate is already highly congested and dangerous and this will be made far worse by the increased number of cars. The proposed mini roundabout to serve the development on Harts Hill Road will become seriously congested at peak times, especially if the roundabout at the Mill Public House is fitted with the proposed traffic lights. This will cause tailbacks further up Harts Hill on the steep blind bend section which will inevitably lead to rear-end shunts.</p> <p><b>Non-Sustainable Location (Traffic)</b> The distance of the proposed development from Thatcham Station and the central amenities in Thatcham will necessitate residents using their cars. Parking in central Thatcham is already inadequate (as recognised by Thatcham Town Council).</p> <p><b>Pressure on Existing Facilities</b> The development will place excessive pressure on existing doctor and dentist surgeries, primary and secondary schools which are already working at capacity as the new facilities proposed will not be constructed in advance of the housing.</p>	<p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p> <p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p>

Respondent (with lpr ref)	Response	Council Response
	<p><b>Use of Brownfield Sites and Existing Buildings</b> Prior to considering developing greenfield sites, full consideration should be given to developing brownfield sites and converting existing commercial buildings such as offices and retail premises (Overbridge Square, Newbury is a good example). The amount of space becoming available is currently increasing due to changes in working practices and online shopping (Covid/internet). There is also a huge amount of vacant residential space above the high street retail premises and there should be incentives to encourage their development.</p> <p><b>Ecology</b> The Pang Valley is a unique, precious and special environment and one of only 200 chalk-fed rivers in the world. There is a huge loss of green field and open space which will lead to an increasing urbanisation of the area. This will also put additional pressure on the AONB in terms of increased traffic and light pollution, pedestrian footfall, littering, illegal use of off road vehicles on the Common and along the River Pang, all with the inevitable detrimental effect on local wildlife and their habitats and the special character of the AONB.</p> <p><b>Surface Water Run-off and Flooding</b> There is no question that the proposed development will have a massive impact on the flood risk to Thatcham.</p> <p><b>Utilities Infra-Structure</b> The existing water, gas and electrical supplies and foul and surface water drainage systems are already stretched to capacity and this development would create unacceptable pressure leading to system failures. I would strongly urge WBC to reconsider this potential development in light of these important considerations and the massive groundswell of public opinion against these proposals. I would strongly urge WBC to reconsider this potential development in light of these important considerations and the massive groundswell of public opinion against these proposals.</p>	<p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery</p>

Respondent <i>(with lpr ref)</i>	Response	Council Response
		<p>Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In regards to the development of brownfield sites, when determining which new sites to allocate the Council are only able to consider land that is submitted to them through the HELAA. The HELAA includes brownfield sites that the Council are aware of.</p> <p>The supporting text to policy SP12 (Approach to Housing delivery) of the emerging draft LPR identifies that several sources will ensure a continuous supply of land across the plan period. These include amongst others, existing planning commitments (unallocated sites with planning permission), many of which are brownfield sites.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In relation to potential impact on surface water, all new development must include sustainable drainage measures, and development must be avoided on areas that are at risk of surface water flooding. Development on the site will be expected to deliver surface water management approaches that could deliver a net gain for Thattham town. Drainage and flood attenuation works are included in the IDP.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thattham’s flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p>
Michael Morrison (lpr1451)	<p>I would like to register my strong objection to the NE Thattham development (Policy SP17) which would effectively place a small town with a population the size of Hungerford to the North East of Thattham, with only two schools, a few shops and the later arrival of a surgery. This will result in extra pressure on the already overloaded surgeries of Chapel Row and Burdwood. Hungerford has numerous shops, a library, schools, doctors’ surgeries, pubs and a large supermarket to serve the population there.</p> <p><b>Lack of publicity.</b> I understand that a large number of the residents of Upper Bucklebury are against the development but it appears that WBC has not mailed anyone or made any attempt to contact ratepayers individually. This surely must seriously affect the validity of the consultation, as most of the local residents are still unaware of what is</p>	<p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council’s Statement of Community Involvement (SCI), on the Council’s website and in the local press and via notification emails to those registered on the Council’s consultation database.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thattham’s flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that</p>

Respondent (with lpr ref)	Response	Council Response
	<p>being proposed. I was made aware by a post on the local community Facebook page only a few weeks ago. I am sure there are many many residents who have not commented, because they do not know about the plans.</p> <p><b>Flooding</b> is a major concern, and Sue Everett, an environmental consultant who prepared that last report on flooding for the Thatcham council, said to a local resident recently (and she approved the use of this phrase in an email she sent) “It would be utter <b>madness</b> to build on that slope” Meaning the whole of the site which is on “the slope’ that runs down to Colthrop and Thatcham. Run off would be a serious problem and would certainly flood Thatcham and Colthrop with heavy rain, even with mitigation measures.</p> <p><b>Overdevelopment near the AONB</b> despite national measures to preserve the countryside and its amenities</p> <p><b>The proposal makes no mention COVID</b> and the substantial changes to housing and development requirements because of the pandemic. It rather looks like the proposal is outdated. With city centre shops closing, surely a possible solution might be to convert Newbury town centre empty retail buildings to residential? All would be within walking distance of the station, should travel be need to Reading and London.</p> <p><b>Carbon neutral.</b> There is no stipulation that the building will comply with the latest construction and environmental standards. Namely Carbon neutral, or at least net zero emissions, and also be in line with the upcoming legislation [ due out in 2023 ] on Biodiversity Net Gain [ BNG ] Both are hugely important and I believe that WBC have committed to carbon net zero emissions by 2030. This development will not work towards that objective at all.</p>	<p>development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council’s evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a ‘masterplan’ / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to the plan being prepared prior to the coronavirus pandemic, the full impact of the COVID 19 pandemic will not be fully apparent for some time. The LPR is a long term strategy to 2039, during which time a review will be conducted every 5 years. The impact of changes in response to macro and local economic factors will be assessed through subsequent reviews, once such implications are realised.</p> <p>The emerging draft LPR includes a policy that specifically covers climate change (policy SP5). This requires that all development should contribute to West Berkshire becoming and staying carbon neutral by 2030.</p>

Respondent (with lpr ref)	Response	Council Response
	<p><b>Wildlife will be seriously affected</b> by such a massive intrusion into the countryside. Bats, badgers, hedgehogs, and other protected species would all be in danger.</p> <p><b>Local water supplies</b> show very varied water pressure, even after the installation of the new Harts Hill pumping station, we have had very low pressure today here in upper Bucklebury. Surely the supply will be completely inadequate for a development of this size.</p> <p>The local character of the area has changed enormously over the 40 odd years I have lived in Bucklebury, This plan will further degrade the countryside and will overload water, sewage, road and rail systems. I firmly believe that it should not be approved in much the same way as the smaller development was turned down in 2017. From the Newbury Weekly News in august 2017: "The Government's decision to turn down two appeals – which would have resulted in more than 700 homes being built in Thatcham – is a strong warning to developers. That was the message from West Berkshire Council's executive member for housing, Hilary Cole (Con, Chieveley), after the crucial ruling.</p> <p>As reported in the <i>Newbury Weekly News</i>, the secretary of state for communities and local government, Sajid Javid, stepped in to overturn the Planning Inspectorate's decision to approve the 495 and 225 home schemes at Siege Cross and Henwick Park.</p> <p>This development surely need the same decision: Rejection.</p>	<p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs development to the most sustainable locations in the district.</li> <li>• Policy SP6 (Flood Risk) directs development to areas least at risk of flood risk.</li> <li>• Policy SP22 (Transport) requires that any development that generates a transport impact will be required, amongst other things, to have regard to West Berkshire's declared climate emergency and minimise the impact of all forms of travel on the environment.</li> <li>• Policy DC3 (Building Sustainable Homes and Businesses) looks at building sustainable homes and businesses,</li> </ul> <p>Any development site will have to comply with the aims and objectives of the plan.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>In regards to water supply, The developers are aware of the requirement for upgrades to the water supply network and water treatment works (which is identified in the Water Cycle Study).</p> <p>Should the development go ahead, it would be phased appropriately to ensure it does not outpace delivery of essential network and treatment upgrades (See IDP).</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an integrated water supply and drainage strategy which will consider existing related infrastructure on the site.</p>
Jack Utley (lpr1452)	<p>As a long-time resident of Bucklebury Parish and a father of three school age children, I wish to register my strong objection to this proposal which I don't believe has gone through a proper consultation with local residents. Everyone I have spoken to is strongly against it and those that are not aware are amazed that such a large development has not received further consultation within the community. I struggled to find any evidence that West Berkshire Council has done any work with the local communities on whom this will have such a big impact.</p> <p>My objections are as follows with bolding on the key areas I care about:</p> <ol style="list-style-type: none"> <li>1. <b>Lack of proper consultation</b> with the local community</li> <li>2. <b>Compromise the AONB</b>. It endangers the AONB settlement pattern and the surrounding environment/habitat of the Upper Bucklebury village and all but joins Upper Bucklebury and Midgham villages in one conjoined urban development with Thatcham along the A4 and Harts Hill Road which as has already happened with Coldash, Thatcham and Newbury</li> </ol>	<p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site</p>

Respondent (with lpr ref)	Response	Council Response
	<p>destroying their unique identity and heritage and removing any rural aspect of the area.</p> <p>3. <b>Destruction of the environment and bio diversity.</b> It will destroy the local environment and the green fields of rolling countryside that currently exist around Upper Bucklebury village north of the A4, some of which contain ancient woodlands and habitats, all of which are essential to the biodiversity of our wild bird and animal species. These are an essential buffer zones to the AONB habitats of the woodlands and common land in and around Upper Bucklebury which will be destroyed by this development putting at risk the relative wildness, tranquillity and natural surrounds</p> <p>4. It will ultimately increase <b>pollution and traffic</b> on already congested traffic routes along the A4 corridor between Newbury, Thatcham and Midgham.</p> <p>5. It will increase passenger numbers on local transport services which are already oversubscribed. Train services between Newbury and Reading are already standing room only during peak commuting hours. Where and how will all these people get to work?</p> <p>6. This development is <b>contrary to the local development plan</b> of Bucklebury which cites the maintenance and preservation of a strong greenbelt between Thatcham and Upper Bucklebury</p> <p>7. It will <b>increase traffic on the rural road network</b>, especially through Upper Bucklebury towards Chapel Row through the AONB as an alternate route to the A4, increasing speeding and <b>risks to child safety</b> who attend primary schools along this route. For leisure users such as myself, who regularly bicycle in and around the country lanes of Upper Bucklebury with my children, there safety is a big concern.</p> <p>8. This is a <b>massive over development of the countryside in one area</b>. Perhaps the council should consider smaller extensions of existing developments which will have less impact on the surrounding countryside. E.g. the flood plains</p>	<p>which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>along the River Kennet and railway line where housing developments have already successfully been built. Thatcham itself is already built in the flood plain.</p> <p>9. This development will result in <b>a big increase in noise and light pollution</b> affecting Upper Bucklebury and surrounding rural areas. There are no street lights in Upper Bucklebury but there will be in the proposed development all spilling upwards into Upper Bucklebury.</p> <p>10. <b>Litter and fly tipping</b> is already on the increase and I can only see this getting worse with the impact being felt the most in and around the common and Upper Bucklebury quiet lanes.</p> <p>Thank you for considering these objections and I trust you will recognise this development is not in the interests of our community.</p>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>There is no green belt within this area (or within the District) there will be open space maintained along the northern/north eastern part of the site.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p>
Theodora Dorich (lpr1454)	<p>I am writing to object to the potential development of 2,500 houses to the North East of Thatcham.</p> <p>The area is already poorly under resourced in terms of amenities and decent infrastructure i.e. schools and the pressure of 2,500 houses on this will prove catastrophic.</p> <p>The area provides an important buffer between Thatcham and Upper Bucklebury that with the development will see the two locations merge.</p>	<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>This will put an unimaginable amount of pressure on the common and other countryside benefits nearby.</p> <p>I hope that you listen to the voices of those that currently live in the community. I imagine there are numerous more suitable locations a development of this magnitude would be more appropriate.</p>	<p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p>
Richard Neville (lpr1457)	<p>I would like to object to your proposal to build 2,500 houses on land north of Thatcham on the following grounds:</p> <ol style="list-style-type: none"> <li>1. TRAFFIC</li> </ol> <p>A development of this size will inevitably bring a huge influx of cars to the roads around the proposed development. Many of these roads are narrow, winding country lanes which have no pavements. Harts Hill is a particularly dangerous road already as it is barely wide enough for two large vehicles to pass and has several sharp bends. Upper Bucklebury and Cold Ash will become rat runs for drivers looking for a quick route to Reading, the A34 and the M4. The roads out of Thatcham are already congested, particularly over the level crossing but also both ways along the A4 at peak times. The additional traffic on all these roads will make accidents much more likely.</p> <ol style="list-style-type: none"> <li>2. LOSS OF GAP BETWEEN THATCHAM AND UPPER BUCKLEBURY</li> </ol> <p>West Berks Council have long advocated the maintenance of this gap which is an important separation between the two communities. It creates a rural feel to both communities which is very important to the well-being of the residents many of whom walk the footpaths through</p>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. Respondent (with lpr ref)	Response	Council Response
	<p>the fields. The loss of this gap will not only destroy the "boundary" but it will also destroy an important green space which borders an Area of Outstanding Natural Beauty (see point 3).</p> <p>3. THREAT TO BUCKLEBURY COMMON AND THE AONB</p> <p>These areas are already under threat because of the numbers of visitors and the way the common is used. There are many rare species of birds and animals living in this area and their habitat will inevitably be disturbed, if not destroyed, by any increase in people using the common for recreation. We are fighting a constant battle against people who ride motorbikes and drive large 4x4 vehicles both during the day and at night. Even walkers can cause a lot of damage especially if they allow their dogs to run free where birds are nesting on the ground from April to August. The volume of buildings proposed will affect the habitat too; there will be light and noise pollution which will drive away some of the birds and animals from the AONB.</p> <p>4. LACK OF VALIDITY OF THE NEED FOR THESE HOUSES</p> <p>WBC do not appear to need another 2500 houses and it would be interesting to know how this figure has been calculated. In addition, the analysis of housing demand is out of date given that the world has changed so much in the last year. This plan should at least be put on hold until the government has had time to reassess the situation following the Covid-19 pandemic.</p> <p>5. LACK OF ADEQUATE DRAINAGE</p> <p>This land is on a slope and any development will need extensive (and expensive) drains in order to avoid flooding the houses below in Thatcham.</p>	<p>lifestyle choices will be important elements of the overall transport plan.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In relation to the concerns on the potential impact on Bucklebury Common, the development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population).</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site</p>

Respondent (with lpr ref)	Response	Council Response
		<p>which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government's standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p> <p>In regards to concerns raised in relation to the drainage, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to potential impact on surface water, all new development must include sustainable drainage measures, and development must be avoided on areas that are at risk of surface water flooding. Development on the site will be expected to deliver surface water management approaches that could deliver a net gain for Thatcham town. Drainage and flood attenuation works are included in the IDP.</p>
Michael Morrison (lpr688)	[I] would like to register my strong objection to the NE Thatcham development (Policy SP17) which would effectively place a small town with a population the size of Hungerford to the North East of Thatcham, with only two schools, a few shops and the later arrival of a surgery. 	<p><b>5. Carbon neutral.</b> There is no stipulation that the building will comply with the latest construction and environmental standards. Namely Carbon neutral, or at least net zero emissions, and also be in line with the upcoming legislation [ due out in 2023 ] on Biodiversity Net Gain [ BNG ] Both are hugely important and I believe that WBC have committed to carbon net zero emissions by 2030. This development will not work towards that objective at all.</p> <p><b>6. Wildlife will be seriously affected</b> by such a massive intrusion into the countryside. Bats, badgers, hedgehogs, and other protected species would all be in danger.</p> <p><b>7. Local water supplies</b> show very varied water pressure, even after the installation of the new Harts Hill pumping station, we have had very low pressure today here in upper Bucklebury. Surely the supply will be completely inadequate for a development of this size.</p> <p>The local character of the area has changed enormously over the 40 odd years I have lived in Bucklebury, This plan will further degrade the countryside and will overload water, sewage, road and rail systems. I firmly believe that it should not be approved in much the same way as the smaller development was turned down in 2017. From the Newbury Weekly News in august 2017: "The Government's decision to turn down two appeals – which would have resulted in more than 700 homes being built in Thatcham – is a strong warning to developers. That was the message from West Berkshire Council's executive member for housing, Hilary Cole (Con, Chieveley), after the crucial ruling.</p> <p>As reported in the <i>Newbury Weekly News</i>, the secretary of state for communities and local government, Sajid Javid, stepped in to overturn the Planning Inspectorate's decision to approve the 495 and 225 home schemes at Siege Cross and Henwick Park.</p> <p>This development surely need the same decision: Rejection.</p>	<p>economic factors will be assessed through subsequent reviews, once such implications are realised.</p> <p>The emerging draft LPR includes a policy that specifically covers climate change (policy SP5). This requires that all development should contribute to West Berkshire becoming and staying carbon neutral by 2030.</p> <p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs development to the most sustainable locations in the district.</li> <li>• Policy SP6 (Flood Risk) directs development to areas least at risk of flood risk.</li> <li>• Policy SP22 (Transport) requires that any development that generates a transport impact will be required, amongst other things, to have regard to West Berkshire's declared climate emergency and minimise the impact of all forms of travel on the environment.</li> <li>• Policy DC3 (Building Sustainable Homes and Businesses) looks at building sustainable homes and businesses,</li> </ul> <p>Any development site will have to comply with the aims and objectives of the plan.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Please see my submission above. The plan needs to be reconsidered in light of all the objections and the effect COVID has a will have on the local area and its housing and transport needs.</p>	<p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In regards to water supply, The developers are aware of the requirement for upgrades to the water supply network and water treatment works (which is identified in the Water Cycle Study).</p> <p>Should the development go ahead, it would be phased appropriately to ensure it does not outpace delivery of essential network and treatment upgrades (See IDP).</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an integrated water supply and drainage strategy which will consider existing related infrastructure on the site.</p>
Nicola Wilson (lpr1455)	<p>I am writing to stress my opposition to the above 'Thatcham New Town' proposals in the strongest terms.</p> <p>The proposals would destroy valuable green space around Thatcham without offering any benefit to the residents of Thatcham and the surrounding villages. That land has previously been considered for housing but rejected with good reason.</p> <p><b>Flooding risk:</b> Thatcham is already at risk of flooding, even with the current beefed up flood measures in place. Those fields are currently waterlogged. Building on them would result in a huge run-off of water on to what is de facto the Kennet flood plains.</p> <p><b>Risk to nature:</b> the fields lie alongside areas of Bucklebury that support</p>	<p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>rare indigenous species that require quiet and dark skies - such as nightjars and slowworms. The disturbance from the works alone would be enough to displace them.</p> <p><b>Traffic:</b> the plans do not take into account the current traffic issues (even in a pandemic); they would commuting routes through the surrounding villages. There would be an additional 5,000 cars on roads that can barely cope during a national lockdown. There would be a knock-on effect for people with respiratory illness. The Thames Valley has very high levels of asthma, which for many is exacerbated by traffic fumes, with deaths already being attributed to build-up of toxic smog.</p> <p><b>Harm to mental health:</b> the plans risk creating an enlarged town with little to no green space and/or views. For residents of Thatcham, this would be highly detrimental to mental health.</p> <p><b>Harm to physical health:</b> these fields are dotted with rights of way and are regularly walked by local families. These people would lose a valuable resource.</p> <p><b>Lack of green planning:</b> nothing in the plans supports an environmentally friendly approach. Any new buildings should be using recycled and/or carbon neutral materials.</p> <p><b>No infrastructure:</b> there is nothing in these plans that would create an enhanced infrastructure for either Thatcham or the surrounding villages. There are no facilities that would improve quality of life for people either moving in or already living here. There is insufficient parking already at Thatcham and the line east is one of the busiest in the country. The existing services - under normal circumstances - would not be sufficient to take hundreds of additional commuters. There is no other public transport to speak of.</p> <p><b>Lack of future planning:</b> nothing in these plans reflects the fact that</p>	<p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In regards to light pollution, policy DM4: Environmental nuisance and pollution has been strengthened to ensure that all reasonable steps are taken through design, siting and technological solutions to ensure the abatement of obtrusive light to avoid sky glow, glare and light spillage, intrusion and any adverse impact to wildlife. Applicants should adhere to the guidance on lighting provided in the most up to date Institute of Lighting Professionals (ILP) guidance notes, alongside other relevant local documents including the North Wessex Downs AONB 'A Guide to Good External Lighting' (2021).</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR also requires the submission of a lighting strategy.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead</p>

Respondent (with lpr ref)	Response	Council Response
	<p>we are living in the 21st century. These developments would look ugly and dated in 1990, let alone 2037. There is no suggestion of civic planning - town squares, amenities etc - it is a pure play housing estate dumped on the side of an existing town. In short - who would want to buy a house there?</p> <p>Any redevelopment of Thatcham and Newbury should be looking to build high density, mixed housing on brownfield sites, to create communal spaces - squares, parks, pedestrianised streets, high speed internet access - with cables below ground - to create sympathetic spaces where a variety of people can co-exist and to create genuinely affordable housing, constructed in partnership with housing associations.</p> <p>Endless three-bedroom semi-detached estate homes are deeply damaging for nature, ugly, dated and undesirable. Nothing in this consultation suggests that any younger people were canvassed for their views as to where they might wish to live in 15 years' time. There has been no input from the nature trusts, the civic bodies or the transport lobby groups.</p> <p>Any project of this size should have been undertaken with wide consultation, not a lazy dumping of houses on an unloved town snuck out just before Christmas.</p>	<p>without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to concerns raised in relation to the loss of a recreational resource, within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>In relation to the Climate Change Emergency, The emerging draft LPR includes a policy that specifically covers climate change (policy SP5). This requires that all development should contribute to West Berkshire becoming and staying carbon neutral by 2030.</p> <p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs development to the most sustainable locations in the district.</li> <li>• Policy SP6 (Flood Risk) directs development to areas least at risk of flood risk.</li> <li>• Policy SP22 (Transport) requires that any development that generates a transport impact will be required, amongst other things, to have regard to West</li> </ul>

Respondent (with lpr ref)	Response	Council Response
		<p>Berkshire’s declared climate emergency and minimise the impact of all forms of travel on the environment.</p> <ul style="list-style-type: none"> <li>• Policy DC3 (Building Sustainable Homes and Businesses) looks at building sustainable homes and businesses,</li> </ul> <p>Any development site will have to comply with the aims and objectives of the plan. Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a ‘living document’ and will be updated regularly updated in consultation with infrastructure providers.</p> <p>The site will be delivered to achieve a sustainable, comprehensive and landscape-led development. The draft policy outlines that this will be a mixed use scheme and not solely comprise of housing to ensure that it is a sustainable development.</p>
Robert and Sharon McKellar (lpr1456)	<p>I wish to object to the proposal to build 2500 homes in North East Thatcham/Midgham.</p> <p>This is far too big a development for one area to absorb. The increased traffic will put far too much strain on the A4 and local roads. Joining the A4 is our main route out of Midgham and is already difficult at peak times and impossible if turning right to Thatcham. We have already had one fatality there.</p> <p>The Government has banned the burning of house coal and wet wood in order to improve air quality and hence health but this proposal with</p>	<p>Thatcham is an ‘Urban Area’ as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector’s report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>significantly increased traffic will cause a serious deterioration of air quality, especially when we already have a polluting crematorium in Midgham.</p> <p>It would be impossible to maintain the character of Midgham which is defined as an area of valuable open countryside and forms part of the North Wessex Downs AONB, and also of Thatcham which is a large village and as such is unable to take this level of development.</p> <p>As for building new shops, since current trends show they are in decline and will not be used in the future.</p>	<p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p>
Pam Norman (lpr1459)	<p>I am writing to object to the 2500 houses which are planned for NE Thatcham, between Thatcham and U Bucklebury. Please, please, please do not approve this planning application and think instead of the effect it would have on the local environment for the next generation's future.</p> <p>If we do actually need more housing, which I personally don't think we do, then please consider using all the empty buildings- shops and offices etc - in Newbury and approve plans to develop these.</p> <p>Thatcham in the past 40 years has already been over developed and cannot realistically sustain any more. Secondary and primary schools are full, medical surgeries are full and the roads and parking are already inadequate.</p>	<p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government's standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>I strongly object to this planning application and hope that you listen and take notice of all the local residents' views.</p>	<p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p> <p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet</p>

Respondent (with lpr ref)	Response	Council Response
		the impact of the development. Additional school provision is included in the IDP.
John Wright (lpr1653)	<p>I am writing to lodge my objection to the above proposal given the size of the development and its impact on the village of Upper Bucklebury and the surrounding area.</p> <p>Of particular concern is the impact this proposed development will have on the environment. The northern boundary will be in close proximity to an AONB which includes areas of ancient woodland and common land that would be adversely affected by the increase in traffic, visitors and light pollution. During the current pandemic, the village has seen significant evidence of trespassing and problems with irresponsible dog walkers and I fear that this would increase if this development goes ahead. The spectacular views across The Kennet Valley to North Hampshire will be lost forever by this development.</p> <p>A second, but equally important, problem will be that of the increase in traffic. The road through Upper Bucklebury and those through neighbouring villages are already subjected to motorists using them as a means of avoiding the A4 and accessing the A34. This will only get worse if this development is approved. The impact of noise and air quality from this additional traffic will be significant.</p> <p>When Floral Way was constructed it was meant to constitute an important boundary between Thatcham and Upper Bucklebury. This proposal would break that strategic gap and result in the loss of the village's identity as a rural community. Bucklebury Vision set out a policy whereby the natural beauty of the landscape and the visual quality of the area should be maintained. This proposed development seriously undermines those objectives.</p> <p>What will future generations think of us if we desecrate this greenfield site with all the ramifications that it will have on the environment? The planning system is meant to protect rural environments and the</p>	<p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance,</p>

Respondent (with lpr ref)	Response	Council Response
	<p>increasing awareness of the importance of such areas in the face of climate change makes it even more important that these valuable sites are not destroyed. Once under bricks and concrete they will be lost forever.</p>	<p>without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed</p>

Respondent (with lpr ref)	Response	Council Response
		<p>submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p>
Newbury Racecourse (lpr1687)	<p><i>Full representations on behalf of Newbury Racecourse attached</i></p> <p>The Consultation Document identifies several sources of housing supply across the plan period. These include: retained allocations; existing commitments on unallocated sites; windfall sites; and through new allocations in the Local Plan Review and Neighbourhood Plans.</p> <p>Table 2: Housing Supply at March 2020 of the Consultation Document confirms that 4,653 dwellings have planning permission, 1,482 dwellings are allocated without permission (with a 1,000 dwellings from Sandleford Park and 482 dwellings carried forward from the HSA DPD); and a windfall allowance of 1,979 dwellings. This amounts to 8,114 dwellings – and therefore to meet the proposed requirement of 575 dpa there is a need to find a further 1,661 dwellings during the plan period.</p> <p>The Consultation Document includes the delivery of two strategic urban extensions: Sandleford Park (1,500 dwellings) and North-East Thatcham (2,500 dwellings). The Council assumes that 1,250 dwellings are deliverable at NE Thatcham within the plan period.</p> <p>It is proposed that a further 315 dwellings will be allocated via Neighbourhood Plans and 490 dwellings on newly allocated sites.</p> <p><b>Critique</b></p>	<p>Though delivery on a particular site can never be guaranteed, the Council closely monitors the position, annually updating the Five Year Housing Land Supply. At present the Council is able to demonstrate a supply of 7.3 years for the period to 2026.</p> <p>The Council's strategy is for a mix of sites: strategic sites such as Sandleford Park and North East Thatcham, which can delivering infrastructure, facilities and significant numbers of affordable homes and a larger number of medium and smaller sites, including brownfield sites within settlement boundaries. The strategy seeks to focus development in the more sustainable settlements of the District rather than distribute development more evenly. This approach continues that set out in the Core Strategy which went through all stages of consultation, examination and adoption by the Council.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential</p>

Respondent (with lpr ref)	Response	Council Response
	<p><u>Large Strategic Sites</u></p> <p>It is anticipated that Sandleford Park and North East Thatcham will provide 1,000 and 1,250 dwellings up to 2037, respectively. The Council therefore rely greatly on the delivery of these two large strategic sites to deliver the housing need over the plan period.</p> <p><u>North East Thatcham</u></p> <p>NE Thatcham, on the face of it, provides an easy solution for the Council to increase housing numbers to meet the overall requirement, but further information is required to demonstrate the deliverability and viability of the site for 2,500 dwellings. In particular, there are concerns that:</p> <ul style="list-style-type: none"> <li>• there is a need for further detailed technical evidence (transport, drainage, landscape, heritage, ecology etc.) to demonstrate the deliverability and capacity of the site;</li> <li>• the location of the site close to the North Wessex AONB may significantly reduce density of the site (particularly towards the edge) and, therefore, the delivery of 2,500 dwellings requires further assessment as more detailed evidence is prepared;</li> <li>• construction mineral deposits need to be investigated thoroughly to ensure development does not sterilise a workable resource. Indeed, prior extraction should occur where practicable;</li> <li>• there appears to be no assessment of the impact of much of the site being located within the Outer Consultation Zone (OCZ) for AWE Aldermaston; and</li> <li>• the proposals must be strongly grounded in viability to ensure that key infrastructure can be delivered alongside housing to deliver the objectives of the scheme and wider benefits to Thatcham.</li> </ul>	<p>delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual</p>

Respondent (with lpr ref)	Response	Council Response
	<p>With regards to the build out rate the Thatcham Strategic Growth Study Stage 3 Report: Thatcham Future (September 2020), at Appendix B, assumes a total period of 17 years from first completions. For most of the build-out period, an average of 160 dwellings per year has been applied (apart from the first year of 50 dwellings).</p> <p>The market evidence demonstrates that for schemes of 2,000+ dwellings, the lead-in time from validation of an application through to first completions is approximately 8.4 years (Source: Lichfield's Start to Finish (2nd Edition), February 2020). As such, given the timescales for the adoption of the Plan (i.e. late 2022 in the LDS) and taking the view that the planning application for the site is submitted by the end of 2023/2024, first completions cannot be projected before 2032/2033. Further, this timescale may be optimistic if prior mineral extraction is required and there are delays to the adoption of the Plan.</p> <p>With the above in mind, it is considered that the Council should take a cautious approach with the site identified as potentially delivering housing supply towards the latter end of the plan period. As such, the scale of development proposed in the plan period should be significantly reduced. Delivering completions in the last five years of the Plan would equate to around 690 dwellings (significantly less than 1,250 dwellings suggested) based on the build out rates in the Growth Study which are supported by market evidence.</p> <p>It is considered that the Council should take a cautious approach with the site identified as potentially delivering housing supply towards the latter end of the plan period. 	on the build out rates in the Growth Study which are supported by market evidence.	
Hilary Cairns (lpr1460)	<p>I am writing to object to the North East Thatcham development of 2500 houses.</p> <ol style="list-style-type: none"> <li>1. West Berkshire Council's plans breach the strategic gap of the natural community boundary between Thatcham and Upper Bucklebury. The huge number of houses proposed will increase the number of vehicles using the surrounding village lanes, which are already over used and suffer from increasing speeding issues, that are rarely addressed, and the breakdown of road surfaces.</li> <li>2. Additionally the loss of habitat and already endangered species from the proposed building development to the surrounding common and AONB land will leave all of us and our children poorer. Once the loss of wild animals and habitat has occurred it will not return.</li> <li>3. Can we urbanise our landscape, whilst paying lip service to protecting green field sites? Where is the 'enhance the natural beauty of the area' (LPR para.4.23)? SP2: 'conservation and enhancement of the natural beauty of the landscape will be the primary consideration in the assessment of development proposals', I fail to see how 2500 houses can possibly 'mesh' with the above (hollow?) words.</li> <li>4. Your Policy DC6: 'development which would overload available facilities and create or exacerbate problems of flooding or pollution will not be permitted' speaks for itself.</li> <li>5. Most people appreciate that central government instruct councils to build, and endeavour to build a vibrant economy for their areas. This strategy was tried after the 2008 crash - it still took 10 years to recover, so that strategy did not work. There is going to be even greater pressure 'to build us out of the current</li> </ol>	<p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>crisis'. We must find a balance between saving our countryside of protected AONB, greenfield sites and common land. Building zero carbon dwellings with the latest heat retention technologies for them, ensuring that traffic impact is minimal, using green energy are fine ideas, unfortunately this will not be achieved as developers are resistant to costly new technology use and we end up with a 'same old, same old' housing estate like all the others that have been built in Thatcham over the years. SP5 'the principles of climate change mitigation and adaptation will be embedded into new development', a must.</p> <p>6. The threat of no infrastructure if 2500 houses are not built rather defeats the argument as your 'Stage 1 study: the growth of Thatcham from 1971 to present' clearly shows that needed facilities have not kept up with developments and to imply that previous developments have been too small to build the infrastructure required is bizarre: 1971 population 10,500 = 1 secondary school; 2018 population 26,000 = 1 secondary school.</p> <p>7. The strategic gap between Upper Bucklebury and Thatcham will be lost, the edge of the AONB and Bucklebury Common will be compromised, and the Thatcham settlement boundary will be irretrievably broken.</p> <p>For all the above reasons I object to the proposed development of 2,500 houses in North East Thatcham up to year 2037.</p>	<p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>In relation to the Climate Change Emergency, The emerging draft LPR includes a policy that specifically covers climate change (policy SP5). This requires that all development should contribute to West Berkshire becoming and staying carbon neutral by 2030.</p> <p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs development to the most sustainable locations in the district.</li> <li>• Policy SP6 (Flood Risk) directs development to areas least at risk of flood risk.</li> <li>• Policy SP22 (Transport) requires that any development that generates a transport impact will be required, amongst other things, to have regard to West Berkshire's declared climate emergency and minimise the impact of all forms of travel on the environment.</li> <li>• Policy DC3 (Building Sustainable Homes and Businesses) looks at building sustainable homes and businesses,</li> </ul>

Respondent (with lpr ref)	Response	Council Response
		<p>Any development site will have to comply with the aims and objectives of the plan.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p>

Respondent (with lpr ref)	Response	Council Response
Bernard Coulson (lpr1461)	<p>I wish to object in the strongest terms to the proposed development of the above site for the following reasons.</p> <ol style="list-style-type: none"> <li>1. For a policy that purports to be planning for the future it lacks pro activity and misses opportunities. Society is becoming increasingly concerned with climate change, natural resources, including soil, food production, water control and usage, conservation and human health. There is a significant positive correlation between these considerations and the condition and availability of soil. The proposal does nothing to give effect to this correlation, instead it destroys a huge area of earth that for a variety of reasons is strategically and usefully situated. The soil needs “re wilding” not made defunct or removed. The science and cost benefit of so doing are compelling.</li> <li>2. This is an unacceptable proposal given the existing brownfield sites available and the changing nature of central business districts within settlements where some commercial properties could be repurposed and redeveloped as dwellings. The proposed development is devoid of a sense of assimilation, resembling more of a blot on the landscape.</li> <li>3. West Berkshire Council are on record saying “development north east and east of Thatcham would result in the loss of separate identification of Cold Ash and Bucklebury and would harm the setting of the AONB settlement pattern”. This requirement is still relevant. The proposal virtually joins Thatcham to Upper Bucklebury and is in complete contradiction. It certainly fails to maintain any sense of a loose scatter of buildings. At the time of the AONB boundary being set it had to meet several criteria established by Government, which, given societies increasing appreciation of the environment is more, rather than less appropriate today.</li> </ol>	<p>In relation to the Climate Change Emergency, The emerging draft LPR includes a policy that specifically covers climate change (policy SP5). This requires that all development should contribute to West Berkshire becoming and staying carbon neutral by 2030.</p> <p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs development to the most sustainable locations in the district.</li> <li>• Policy SP6 (Flood Risk) directs development to areas least at risk of flood risk.</li> <li>• Policy SP22 (Transport) requires that any development that generates a transport impact will be required, amongst other things, to have regard to West Berkshire’s declared climate emergency and minimise the impact of all forms of travel on the environment.</li> <li>• Policy DC3 (Building Sustainable Homes and Businesses) looks at building sustainable homes and businesses,</li> </ul> <p>Any development site will have to comply with the aims and objectives of the plan.</p> <p>In regards to the development of brownfield sites, when determining which new sites to allocate the Council are only able to consider land that is submitted to them through the HELAA. The HELAA includes brownfield sites that the Council are aware of.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Government criteria relating to tranquillity and wildness would be completely compromised if the buffer zone was eroded.</p> <ol style="list-style-type: none"> <li>4. Much of the proposed site occupies rising ground making the intended blocky urban spread starkly visible particularly when viewed from the south. Cover of darkness would give no respite either because of the light pollution.</li> <li>5. 2500 extra properties would result in a large volume of traffic not just on main roads but also on the country lanes. In and around the surrounding villages. Strangely WBC documentation does not address this given that lanes are more dangerous to drive on. This is at odds with the WBC Local Transport Plan 2011 to 2026 Active Travel Strategy and more especially with the Bucklebury Quiet Lane Scheme initiated by WBC and supported by local residents.</li> <li>6. Bucklebury Vision and the Bucklebury Plan are documents approved and agreed with WBC. Despite their being accepted as constituting supplementary planning considerations they are not mentioned in the WBC documentation or appear to have been taken into account.</li> <li>7. Similarly the process of consultation with the community seems to have been limited and low profile. The resulting lengthy, and expensive document therefore gives a strong perception of being presented as a fait accompli.</li> <li>8. I have limited my comments but I am concerned for the residents of Thatcham regarding parking, schooling, doctor's surgeries, level crossing bottle neck and flooding potentially greater than that greater than July 2007. The latter raises a significant duty of care for the authorities towards householders and commercial entities both present and future.</li> </ol>	<p>The supporting text to policy SP12 (Approach to Housing delivery) of the emerging draft LPR identifies that several sources will ensure a continuous supply of land across the plan period. These include amongst others, existing planning commitments (unallocated sites with planning permission), many of which are brownfield sites.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In regards to light pollution, policy DM4: Environmental nuisance and pollution has been strengthened to ensure that all reasonable steps are taken through design, siting and technological solutions to ensure the abatement of obtrusive light to avoid sky glow, glare and light spillage, intrusion and any adverse impact to wildlife. Applicants should adhere to the guidance on lighting provided in the most up to date Institute of Lighting Professionals (ILP) guidance notes, alongside other relevant local documents including the North Wessex Downs AONB 'A Guide to Good External Lighting' (2021).</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The updated version of the proposed allocation policy in the next published version of the LPR also requires the submission of a lighting strategy.</p> <p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>
<p>Simon Tonkyn (lpr692)</p>	<p>1/ You state (Ref 6.36) that Thatcham has grown 5 times its size since 1951 and reflecting that the social infrastructure has not grown in synchronisation with this. I struggle to understand the logic therefore of how adding more than 2500 houses would improve the situation. Would it not make sense to resolve this for the existing housing stock before adding thousands more houses into the mix?</p> <p>2/ How exactly would on-site renewable energy assist in the delivery of a carbon neutral development. Where is the supporting evidence and surely no development by definition would deliver this outcome. Also how many additional vehicles (many not electric) would be added to the local road network further increasing emissions and pollution with potential detrimental health impacts.</p>	<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>The next draft of the document will be informed by a Study being undertaken by the Council to enable carbon neutral development. In addition, the emerging draft LPR includes a policy that specifically covers climate change (policy SP5). This requires that all development should contribute to West Berkshire becoming and staying carbon neutral by 2030.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>3/ You talk about appropriate vehicular accesses and sustainable transport through routes and yet even before any of this is considered traffic heading in and out of Thatcham via Thatcham station is routinely stationary for up to 40 minutes causing traffic at times to be backed up all the way to the A4. It is reasonable to assume that a significant proportion of working people living in this development would be working in locations that would make this the most likely route they would take to their place of work. This would further exacerbate the delays and pollution caused by cars and lorries leaving their engines running. There are already proven cases of deaths resulting from vehicular pollution and this proposed development would be a direct contributor to increasing rather than reducing pollution and how would this contribute to the target of carbon net zero by 2030 announced by West Berkshire Council?</p> <p>4/ The A4 between Thatcham and Theale is a well-known accident hotspot, so much so that the council have placed signs warning drivers of the dangers of the road. With more warehousing being built responding to the move away from normal retail outlets this can only get worse as more and more lorries use this road causing more congestion, more pollution and in turn more risks of accidents and risk to life. The proposed development will be at the two pinch points where all this HGV traffic enters the industrial estates and this can only increase the accident risk further and increase the dangers for pedestrians who use the existing pavements on the A4 in the area for exercise.</p> <p>5/ You state that there will be a biodiversity net gain. How can that possibly be the case with so much habitat destruction and the loss of existing paths and green space. Destroying an area of this size cannot possible result in a biodiversity net gain.</p> <p>6/ Once the Covid-19 pandemic restrictions are lifted traffic in the area will return to pre-pandemic levels and all the resultant traffic congestion that was there is all directions beforehand. The location of this proposed development, without large scale infrastructure improvements</p>	<p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs development to the most sustainable locations in the district.</li> <li>• Policy SP6 (Flood Risk) directs development to areas least at risk of flood risk.</li> <li>• Policy SP22 (Transport) requires that any development that generates a transport impact will be required, amongst other things, to have regard to West Berkshire's declared climate emergency and minimise the impact of all forms of travel on the environment.</li> <li>• Policy DC3 (Building Sustainable Homes and Businesses) looks at building sustainable homes and businesses,</li> </ul> <p>Any development site will have to comply with the aims and objectives of the plan.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to</p>

Respondent (with lpr ref)	Response	Council Response
	<p>including a bridge over Thatcham railway crossing, will just exacerbate this. In addition the increase of traffic using Crookham Hill (which is a very narrow road) can only but increase the risk of accidents and injury.</p> <p>7/ There is no evidence I am aware of that the trend away from retail outlets in town centres is going to change. In fact the opposite is happening. Isn't it much more likely that to satisfy the demands of 2,500 more homes that instead of retail outlets and some character in Thatcham town centre it will just become larger and large supermarkets and even more soulless.</p> <p>In conclusion I would say that Thatcham having grown 5 times since the 50's has contributed enough to the demands for increased housing and this development further erodes the very character this seeks to enhance and should not proceed.</p> <p>West Berks Council have been quoted as saying that certain road improvements would not actually improve congestion rather just increase the volume of traffic thereby negating any benefit. This huge development may well be sold quickly and add several thousand more families into an area already over developed and though I admit to having no expert knowledge and of the opinion (just like the road improvements) have no net benefit and this need could be satisfied in other locations causing less impact to people's lives and the environment.</p>	<p>local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>Biodiversity net gain was introduced through the NPPF and is referenced in paragraphs 174 d) and 179 b) and the Natural Environment Planning Practice Guidance (PPG) provides further explanation on how this should be done. Mandatory biodiversity net gain is now set out in the Environment Act 2021 and applies in England only through the amendment of the Town &amp; Country Planning Act (TCPA) and is due to enforced from November 2023. The mandatory requirement is to achieve at least a 10% biodiversity net gain increase from the pre-development biodiversity value. The requirement is framed as a pre-commencement condition, meaning that the biodiversity gain condition must be discharged before development can begin. Prior to the commencement of a development, a biodiversity gain plan must be submitted to the relevant planning authority for approval. The biodiversity gains and losses of a development will be measured in 'biodiversity units', using a metric which uses habitats as a proxy for biodiversity and calculates units by taking account of the type, extent and condition of habitats. Natural England has recently published biodiversity metric which, subject to further consultation and any further updates, is expected to be the metric specified for mandatory biodiversity net gain.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>
Emily Boulstridge (lpr1462)	<p>As a long-time resident of Bucklebury Parish and a father of three school age children, I wish to register my strong objection to this proposal which I don't believe has gone through a proper consultation with local residents. Everyone I have spoken to is strongly against it and those that are not aware are amazed that such a large development has not received further consultation within the community. I struggled to find any evidence that West Berkshire Council has done any work with the local communities on whom this will have such a big impact.</p> <p>My objections are as follows with bolding on the key areas I care about:</p> <ol style="list-style-type: none"> <li>1. <b>Lack of proper consultation</b> with the local community</li> <li>2. <b>Compromise the AONB.</b> It endangers the AONB settlement pattern and the surrounding environment/habitat of the Upper Bucklebury village and all but joins Upper Bucklebury and Midgham villages in one conjoined urban development with Thatcham along the A4 and Harts Hill Road which as has already happened with Coldash, Thatcham and Newbury destroying their unique identity and heritage and removing any rural aspect of the area.</li> <li>3. <b>Destruction of the environment and bio diversity.</b> It will destroy the local environment and the green fields of rolling countryside</li> </ol>	<p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>that currently exist around Upper Bucklebury village north of the A4, some of which contain ancient woodlands and habitats, all of which are essential to the biodiversity of our wild bird and animal species. These are an essential buffer zones to the AONB habitats of the woodlands and common land in and around Upper Bucklebury which will be destroyed by this development putting at risk the relative wildness, tranquillity and natural surrounds</p> <p>4. It will ultimately increase <b>pollution and traffic</b> on already congested traffic routes along the A4 corridor between Newbury, Thatcham and Midgham.</p> <p>5. It will Increase passenger numbers on local transport services which are already oversubscribed. Train services between Newbury and Reading are already standing room only during peak commuting hours. Where and how will all these people get to work?</p> <p>6. This development is <b>contrary to the local development plan</b> of Bucklebury which cites the maintenance and preservation of a strong greenbelt between Thatcham and Upper Bucklebury</p> <p>7. It will <b>increase traffic on the rural road network</b>, especially through Upper Bucklebury towards Chapel Row through the AONB as an alternate route to the A4, increasing speeding and <b>risks to child safety</b> who attend primary schools along this route. For leisure users such as myself, who regularly bicycle in and around the country lanes of Upper Bucklebury with my children, there safety is a big concern.</p> <p>8. This is a <b>massive over development of the countryside in one area</b>. Perhaps the council should consider smaller extensions of existing developments which will have less impact on the surrounding countryside. E.g. The flood plains along the River Kennet and railway</p>	<p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. 	<p>line where housing developments have already successfully been built. Thatcham itself is already built in the flood plain.</p> <p>9. This development will result in <b>a big increase in noise and light pollution</b> affecting Upper Bucklebury and surrounding rural areas. There are no street lights in Upper Bucklebury but there will be in the proposed development all spilling upwards into Upper Bucklebury.</p> <p>10. <b>Litter and fly tipping</b> is already on the increase and I can only see this getting worse with the impact being felt the most in and around the common and Upper Bucklebury quiet lanes.</p> <p>Thank you for considering these objections and I trust you will recognise this development is not in the interests of our community.</p>	<p>being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>In regards to light pollution, policy DM4: Environmental nuisance and pollution has been strengthened to ensure that all</p>

Respondent (with lpr ref)	Response	Council Response
		<p>reasonable steps are taken through design, siting and technological solutions to ensure the abatement of obtrusive light to avoid sky glow, glare and light spillage, intrusion and any adverse impact to wildlife. Applicants should adhere to the guidance on lighting provided in the most up to date Institute of Lighting Professionals (ILP) guidance notes, alongside other relevant local documents including the North Wessex Downs AONB 'A Guide to Good External Lighting' (2021).</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR also requires the submission of a lighting strategy.</p>
Michelle Paice (lpr2060)	<p>I would like to strongly register my objection to the proposed full development of the above sites for the following reasons. These reasons will be similar to other objections, but I agree with every one of them.</p> <ol style="list-style-type: none"> <li>1. The Vast majority of Upper Bucklebury residents are against this development, many have already registered their objections, however many are not aware of the application or consultation as no information has been sent out by WBC. WBC are in my opinion negligent in this process and the consultation period should be extended and all residents should be formally written to.</li> <li>2. It is cited in the Bucklebury vision and Bucklebury Plan to maintain a strong greenbelt between Thatcham and Upper Bucklebury. This document is approved and agreed with WBC and should be considered as supplementary planning consideration. It is not mentioned in the WBC documentation.</li> <li>3. It would effectively join Upper Bucklebury with Thatcham, which has all but happened at Cold Ash effectively removing the rural aspect of the area. This is actually stated in the WBC documentation</li> </ol>	<p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p> <p>There is no green belt within this area (or within the District) there will be open space maintained along the northern/north eastern part of the site.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>(<a href="https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=0">https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=0</a>) page 22, stating <b>“particularly as development of both north east and north Thatcham would result in the loss of the separate identifies of Cold Ash and Bucklebury, and would harm the setting of the AONB settlement pattern”</b>.</p> <p>WBC are therefore suggesting that the Parish of Bucklebury should maintain its identity but the proximity of the development is in contradiction to WBC’s own intentions.</p> <ol style="list-style-type: none"> <li>4. A previous application was rejected by the secretary of state in 2017 <a href="https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html">https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html</a>. Why are WBC now considering this site in light of the previous objection, what has changed and knowing this has been refused once why have massive funds been spent thus far?</li> <li>5. It is a massive over development of the Countryside in one area which consists of rolling hills and farmland. The reason stated is that 85% of West berks is AONB. WBC have previously built on AONB and AONB status can be changed with government approval, and as it allegedly the government driving this would they not be more open to changing some AONB status ?</li> <li>6. In the NWN the following statement is attributed to Hilary Cole.</li> </ol> <p>The council’s executive member for housing, Hilary Cole (Con, Cold Ash and Chieveley), said: <b>“We are very keen to work with the local community because it’s such a big proposal and development for Thatcham. “We have taken a conscious decision to do this around Thatcham so it will deliver the infrastructure we need. “We feel that Thatcham is best placed to take a development of this size.”</b></p> <p>I have two specific issues to object to on these statements made. Firstly WBC have done very little if any to work with local residents – see</p>	<p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that ‘in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy’ (paragraph 67 of the Core Strategy Inspector’s Report). As additional housing is required, and given Thatcham’s status as an ‘Urban Area’ in the development plan is it considered appropriate to consider Thatcham for housing.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council’s housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>above points and secondly Ms Cole's statement infers that the decision is made, so why is so called consultation being held? Because of this she should resign.</p> <ol style="list-style-type: none"> <li>7. WBC and Thatcham councils have wasted a great deal of tax payers money in completing many surveys and writing an 800 page report, effectively making this a fait accompli, before going to consultation on the proposal.</li> <li>8. It will have a significant impact on traffic in the area and especially on the route into Thatcham and Newbury and towards the station which are already heavily congested at busy times and in the event of any minor traffic disruption.</li> <li>9. This will significantly impact the freight traffic using the industry site at Thatcham</li> <li>10. It will significantly increase the traffic on the back route (rat runs) which are not designed for large traffic volumes.</li> <li>11. Traffic and speeding in particular through Upper Bucklebury is of a major concern due to the primary school. With an increase in 10% this will only worsen the situation.</li> <li>12. It will completely surround the Crematorium at Thatcham which was, as I understand, placed there to be away from residential properties and has constraints placed on it.</li> <li>13. It is stated/assumed this will help the Upper Bucklebury Business – predominantly the Pub and Shop. The Pub is hardly likely to benefit as a) pub usage across the country is in decline b) the Pub at the bottom of Harts Hill cannot already sustain a business. One pub is hardly justification for a development this size. The shop is also likely to suffer as the plan indicate that shops will be included, so it is likely it would have a detrimental impact on the only shop in UB, creating more traffic.</li> <li>14. It is cited that there cannot be development on the Kennet flood plain, however there are multiple examples where this has already been done (most of Thatcham was originally a flood plain), this is extremely hilly land which is almost certainly as unsuitable to development as the flood plain.</li> </ol>	<p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>15. It will significantly increase the noise and light pollution to the Bucklebury Parishioners – there are no street lights in Upper Bucklebury.</p> <p>16. There is no evidence that this will enhance Thatcham town centre (or indeed Newbury). The development of the old Army Base by the Station didn't add any amenities and we have seen the slow decline of the town centre over the last 20 years despite the area growing.</p> <p>17. The HELAA was updated in December 2020 to take account of factual inaccuracies – who is to say that the same people who have made the assessment of this site don't have their facts right in this document or this time. What evidence can WBC produce to conclude everything stated is factually correct.</p> <p>18. Schooling – this will obviously have an impact on local schools (and traffic). Current indications are that KS1 children volumes are decreasing yet the plan includes a proposal for 3 new schools. When would this be built before or after the houses? Build it before and it will poach children from local schools, such as Upper Bucklebury which will make that unsustainable (as is happening in Newbury with the new school on the college site). Build it after and the local schools will be overwhelmed beforehand. If the development is spread across the region there is a much greater chance of the load being spread out.</p> <p>Please refuse permission for this development. It would, in effect, add the equivalent of Hungerford onto the edge of Thatcham, but without any infrastructure to support it.</p>	
Gary Clarke (lpr698)	This development changes the character of Thatcham and destroys green fields in contradiction to all current thinking on new developments. A country park is NOT countryside and is not an acceptable substitute.	Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.

Respondent (with lpr ref)	Response	Council Response
	<p>Traffic is already at a standstill on Floral Way and the A4 in normal rush hour times and heavy lorries using the distribution centres on Colthrop Industrial estate add to transport issues in the area. The queues and pollution at the rail crossing at Thatcham will be made worse by the new development and the ensuing increase in commuter car journeys. The residents of the new houses are not at all likely to work locally and any plan that relies on hoping that they will is unacceptable.</p> <p>Brownfield sites should be used first and the Council should not be adopting a developer led proposal which is in the developers favour to the detriment of Thatcham residents.</p>	<p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver ‘a network of green infrastructure which will include a new community park linking Thatcham to the AONB.’</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential</p>

Respondent (with lpr ref)	Response	Council Response
		<p>delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to the development of brownfield sites, when determining which new sites to allocate the Council are only able to consider land that is submitted to them through the HELAA. The HELAA includes brownfield sites that the Council are aware of.</p> <p>The supporting text to policy SP12 (Approach to Housing delivery) of the emerging draft LPR identifies that several sources will ensure a continuous supply of land across the plan period. These include amongst others, existing planning commitments (unallocated sites with planning permission), many of which are brownfield sites.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p>

Respondent (with lpr ref)	Response	Council Response
Mr and Mrs Pittard (lpr1964)	<p><i>Representation promotes the allocation of Land at Lower Way Farm, Thatcham. Full representation is attached as a response to Policy SP13 Sites allocated for residential and mixed-use development in Newbury and Thatcham.</i></p> <p>Policy SP17 of the draft Local Plan confirms that land to the north east of Thatcham is allocated for a residential-led development comprising approximately 2,500 homes. Supporting text (paragraph 6.45) confirms that “<i>Delivery of at least 1,250 dwellings is anticipated within the plan period.</i>”</p> <p>As outlined above, we agree with the Council’s proposed strategy for growth, which follows the District-wide settlement hierarchy set out in policy SP3, focusing new development in the most sustainable parts of the District. Thatcham, along with Newbury and the Eastern Urban Area, is at the top of the settlement hierarchy and is therefore a sustainable location in the District that is suitable for significant growth.</p> <p>However, we query the Council’s expectation that at least 1,250 dwellings will be delivered to the north east of Thatcham within the Plan-period. Again, in the absence of a housing trajectory, Lichfield’s publication (18) is helpful in providing an indication of the timescales involved in delivering the site.</p> <p>For sites of 2,000+ dwellings, a realistic built-out rate is noted as being around 160 dpa<sup>19</sup>. This accords with the build-out assumptions set out in Appendix B of the Thatcham Strategic Growth Study (Stage 3 Report: Thatcham Future) (September 2020) (20).</p> <p>The Growth Study assumes a total delivery programme (for the total 2,500 homes) of 17 years from first completion but does not set out when first completions are anticipated.</p>	<p>Though delivery on a particular site can never be guaranteed, the Council closely monitors the position, annually updating the Five Year Housing Land Supply. At present the Council is able to demonstrate a supply of 7.3 years for the period to 2026.</p> <p>The Council’s strategy is for a mix of sites: strategic sites such as Sandleford Park and North East Thatcham, which can delivering infrastructure, facilities and significant numbers of affordable homes and a larger number of medium and smaller sites, including brownfield sites within settlement boundaries. The strategy seeks to focus development in the more sustainable settlements of the District rather than distribute development more evenly. This approach continues that set out in the Core Strategy which went through all stages of consultation, examination and adoption by the Council.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>If North East Thatcham were to be delivered at 160 dpa, first completions would need to take place around 2029/30 to achieve 1,250 dwellings within the Plan-period. However, as Lichfield's have found that for similar scale sites it can take around 8.4 years to progress from the validation of a planning application to completion of the first dwelling (21), this seems unrealistic.</p> <p>Assuming an application for 1,250 dwellings is submitted in 2022/23, first completions are unlikely to be achieved until around 2030/31. This is one year beyond the period needed to achieve 1,250 dwellings within the Plan-period, <b>assuming all technical issues are addressed, and this quantum of housing is deliverable, given potential site constraints and viability.</b> However, as the Thatcham Strategic Growth Study confirms that in year 1 only 50 dwellings would be completed, the number of dwellings to be completed within the Plan-period reduces further.</p> <p>In light of the above, we recommend that the amount of housing that it is anticipated will come forward at North East Thatcham within the Plan-period is, at the very least, reduced significantly. Furthermore, we recommend that additional sites should be allocated for housing, focused on small / medium sized sites that can come forward quickly, particularly in the early part of the Plan-period. These should be distributed in line with the settlement hierarchy outlined in policy SP3.</p> <p>(18) <a href="https://lichfields.uk/media/5779/start-to-finish_what-factors-affect-the-build-out-rates-of-large-scalehousing-sites.pdf">https://lichfields.uk/media/5779/start-to-finish_what-factors-affect-the-build-out-rates-of-large-scalehousing-sites.pdf</a></p> <p>(19) Figure 7</p> <p>(20) With the exception of year 1 (50 dpa) and year 16/17 (130 dpa)</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>We recommend that the amount of housing that it is anticipated will come forward at North East Thatcham within the Plan-period is, at the very least, reduced significantly. Furthermore, we recommend that additional sites should be allocated for housing, focused on small / medium sized sites that can come forward quickly, particularly in the early part of the Plan-period. These should be distributed in line with the settlement hierarchy outlined in policy SP3</p>	
<p>Claire Dallimore (lpr1475)</p>	<p>Reasons for my objection:</p> <ul style="list-style-type: none"> <li>• <b>The land is green space</b>, home to a number of British wildlife species, flora and fauna. For example; Red kites, Roe Deer, Muntjack, Adders, Bluebells, Badgers, Red Spotted Woodpeckers and in close proximity to the area of the site on Burdens Heath is an annual home to Nightjars which have an Amber rating on the protected by The Wildlife Countryside Act 1981.</li> <li>• <b>Increase of Traffic and Pollution</b>, this will affect the whole community hugely; the village of Upper Bucklebury is already used as a rat run. The road that we live (Harts Hill Road, leading to Burdens Heath and Cold Ash) doesn't have a footpath, our children and the neighbour's children currently walk to school jumping into hedgerow avoiding the current volume of traffic, with this huge housing development adding to the volume of cars this will be catastrophically dangerous for any pedestrians and cyclists.</li> </ul> <p>The picture above was taken on the 1<sup>st</sup> Feb, normally the road has a number of parked cars in front of the white car as per picture, due to lockdown the panel beaters is currently closed and therefore are less parked cars.</p>	<p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• The Level crossing at Thatcham Station, as all local people agree this is an ongoing frustrating situation that there is no bridge over the railway track, already causing unnecessary pollution and congestion. The increased number of homes will only add to this or create more traffic through the village of Brimpton.</li> <li>• <b>Flooding</b>; in 2007 1000 homes were flooded in Thatcham, Aldermaston and Woolhampton, at this point the Kennet Heath was in the early stages of development and the homes that had been built were all flooded since then a number of homes have been built on the site and further homes built along the canal. I know the Environment Agency has made vast improvements to help avoid further flooding, however they are not miracle workers, adding approx. 2 Sq miles of concrete/housing estate onto hillsides leading to a valley that has history of flooding is madness. The current river levels are high and more rain is due. The increased level of water will also affect the villages of Woolhampton and Aldermaston, not to mention the areas of high risk, such as Wargrave as the Kennet joins the Thames.</li> </ul> <p>As stated this week by the Environment Agency. See below.</p> <p><b>River Kennet from Thatcham down to Reading</b></p> <p>Flooding is possible - be prepared</p> <p>Property flooding is not currently expected. River levels remain high, but are beginning to fall on the River Kennet as a result of previous heavy rainfall. Flooding of low lying roads, paths and land is expected to continue, especially in the Theale area. The forecast is for showers overnight and into tomorrow (2/2/21). We expect river levels to remain high over the coming days. We are closely monitoring the situation. Our incident response staff are in the area clearing trash screens. Please remain safe and aware of your local surroundings, avoid using low lying</p>	<p>without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>The NPPF states that planning policies and decisions should aim to achieve healthy, inclusive and safe places. It highlights this should be achieved by making places which are safe and accessible, so that crime and disorder, and the fear of crime, do</p>

Respondent (with lpr ref)	Response	Council Response
	<p>footpaths near local watercourses, and refer to the 'River and Sea levels in England' webpage for current river levels. This message will be updated tomorrow, 2/2/21, or as the situation changes.</p> <p>This information was last updated at 8:23pm Monday 1 February 2021</p> <p><a href="https://flood-warning-information.service.gov.uk/target-area/061WAF22LowerKen">https://flood-warning-information.service.gov.uk/target-area/061WAF22LowerKen</a></p> <ul style="list-style-type: none"> <li>• <b>Crime rate;</b> Extending Thatcham to Upper Bucklebury will mean Upper Bucklebury is no longer a rural community, as the study shows (see link below) the increase in crime is by far higher in urban communities.</li> </ul> <p><a href="https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/912406/Crime_August_2020.pdf">https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/912406/Crime_August_2020.pdf</a></p> <ul style="list-style-type: none"> <li>• <b>The disadvantages of large housing estates;</b> a number of gangs are created amongst the youth stemming from living on the same housing estate. Often fighting with gangs on neighbouring estates, there is already a known gang in Thatcham calling themselves the Thatcham Posse, by adding a large new estate to a town means that young families move on to the estate at the same time. Meaning the young children grow to teenagers and young adults at the same time, which has a high probability of gangs forming. Look at the recent gang and knife crime in Tilehurst, which was once a rural village.</li> <li>• <b>The Level Crossing Thatcham;</b> this level crossing already causes congestion, inconvenience and unnecessary pollution to the residents of West Berkshire, adding such a large development to the area will further this.</li> <li>• <b>Local resources;</b> the plan states that an additional school and surgery will be included in the development, however at what stage will this be added to start the development will require the</li> </ul>	<p>not undermine the quality of life or community cohesion – for example through the use of attractive, well-designed, clear and legible pedestrian and cycle routes, and high quality public space, which encourage the active and continual use of public areas. The suite of policies within the Local Plan are designed to ensure sustainable communities are created.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>The longer term impacts of the Brexit legacy are currently unknown. The West Berkshire Local Plan Review will be produced in accordance with the UK's government's latest policy and legislative position.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>first stage of residents requiring immediate schooling and surgeries and therefore oversubscribing the existing resources, or building new ones starts both resources as undersubscribed and failing.</p> <ul style="list-style-type: none"> <li>• <b>Current climate;</b> when the plan was originally proposed the current pandemic and the implements of leaving the EU were not current, therefore the proposal is out of date. As our borders have been tightened we will not see the same influx of foreign nationals residing in the UK and a number of foreign nationals have returned due to the pandemic and the change in border control.</li> </ul>	
Edward Holloway (lpr1476)	<p>I am concerned about the Local Plan Review 2020 -2037 and in particular the plan to build 2,500 houses on land between north Thatcham and Upper Bucklebury (the Policy SP 17 "North East Thatcham Strategic Site Allocation").</p> <p>I cannot support your plan.</p> <p>It will join Thatcham to Bucklebury, damage the character of Bucklebury, result in increased traffic on the small rural roads that cross and surround Bucklebury Common and put considerable pressure on the AONB thereby affecting both wildlife, the environment and the cultural integrity of the area.</p> <p>I understand the need to provide additional housing and support that requirement. It would surely be more sensible however, to build on brownfield sites such as those in Theale and on the Greenham Common airbase site.</p>	<p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In regards to the development of brownfield sites, when determining which new sites to allocate the Council are only able to consider land that is submitted to them through the HELAA. The HELAA includes brownfield sites that the Council are aware of.</p> <p>The supporting text to policy SP12 (Approach to Housing delivery) of the emerging draft LPR identifies that several sources will ensure a continuous supply of land across the plan period. These include amongst others, existing planning commitments (unallocated sites with planning permission), many of which are brownfield sites.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p>
Gary Clarke (lpr697)	Specially Thatcham SP17	Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply,

Respondent (with lpr ref)	Response	Council Response
	<p>A development on this sight was rejected as recently as 2017.</p> <p>The development is outside the centre of Thatcham and there is a serious mismatch between housing and economic strategies. A mismatch that will result in undue strain on infrastructure given the increased commuting that will be needed. This development is therefore unsustainable and inappropriate in direct conflict with the environmental goals outlined in section 3.5.</p> <p>A Council led plan to rejuvenate Thatcham Town Centre rather than a developer led plan to build on greenfields. Once a strong plan is in place for Thatcham then and only then can new housing in the area be considered.</p>	<p>adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that ‘in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy’ (paragraph 67 of the Core Strategy Inspector’s Report). As additional housing is required, and given Thatcham’s status as an ‘Urban Area’ in the development plan is it considered appropriate to consider Thatcham for housing.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a ‘living document’ and will be updated regularly updated in consultation with infrastructure providers.</p>

Respondent (with lpr ref)	Response	Council Response
Sarah Jones (lpr1478)	<p>I would like to add my objections to the proposed building of 2500 homes to the north of Thatcham.</p> <p>I do not believe that this is a good idea. There will be an increased demand on the roads, schools and doctor's surgeries. Those services already are stretched beyond capacity.</p> <p>Whilst I understand there is a need for additional homes within the West Berkshire area, I do not believe that this is the correct plan.</p>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p> <p>Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part</p>

Respondent (with lpr ref)	Response	Council Response
		<p>of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>The site alongside the larger site area, is well related to the existing town of Thatcham. It is in close proximity to a range of services and facilities, including the train station. Thatcham is an urban area with a wide range of services and opportunities for employment, community and education. Development of a strategic nature at this site would support the service provision and regeneration that Thatcham requires.</p>
Name Supplied (lpr1501)	<p>As a resident of Upper Woolhampton (address below), I wish to register my objection to the proposed development of the above sites for the following reasons:</p> <ol style="list-style-type: none"> <li>1. I was made aware of this application/ consultation by neighbours in Bucklebury and have not received any information or correspondence from West Berks Council (WBC). WBC are in my opinion negligent in this process. To make it a fair process, the consultation period should be extended and ALL residents should be formally written to, included and invited by WBC to comment.</li> <li>2. It is cited in the Bucklebury vision and Bucklebury Plan to maintain a strong greenbelt between Thatcham and Upper Bucklebury. The vision and plan uphold Bucklebury as a rural village community, for the village to remain a predominantly rural AONB. That there is no wish amongst residents to allow growth to change the character and nature of our historic, rural community identity. This document is approved and agreed with WBC and should be included as supplementary planning consideration – yet it is not mentioned in the WBC documentation!?</li> <li>3. In the NWN the following statement is attributed to Hilary Cole. The council's executive member for housing, Hilary Cole (Con, Cold Ash</li> </ol>	<p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p> <p>There is no green belt within this area (or within the District) there will be open space maintained along the northern/north eastern part of the site.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that</p>

Respondent (with lpr ref)	Response	Council Response
	<p>and Chieveley), has said: “We are very keen to work with the local community because it’s such a big proposal and development for Thatcham.” However, WBC have clearly not made good enough attempts to engage with local residents – see above points 1 and 2.</p> <p>4. Loss of village identity. There is simply not enough space between the proposed development and Upper Bucklebury and the boundary of the AONB. The village will practically be part of Thatcham (or the Newbury/Thatcham conurbation) and stands to lose its identity as a village. The proposal would effectively join Upper Bucklebury with Thatcham, which has all but happened at Cold Ash effectively removing the rural aspect of the area. This is actually stated in the WBC documentation (<a href="https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=0">https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=0</a>) page 22, stating “particularly as development of both north east and north Thatcham would result in the loss of the separate identifies of Cold Ash and Bucklebury, and would harm the setting of the AONB settlement pattern”. WBC are therefore suggesting that the Parish of Bucklebury should maintain its identity but the proximity of the development is in contradiction to WBC’s own intentions.</p> <p>5. Unacceptable impact on our AONB. According the gov.uk, an AONB has to a combination of several criteria, two of these are:</p> <ul style="list-style-type: none"> <li>· relative wildness, such as distance from housing or having few roads</li> <li>· relative tranquillity, where natural sounds, such as streams or birdsong are predominant.</li> </ul> <p>Both of these points stand to be significantly impacted by such a massive nearby development and may no longer be able to be met.</p> <p>6. Increase in traffic pollution and hazards by Bucklebury Common. I moved next to Bucklebury Common to live in the countryside and be away from car, light and noise pollution. Over the 7 years or so I have</p>	<p>development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council’s evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a ‘masterplan’ / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council’s policy on pollution.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>lived in Upper Woolhampton, we have already noticed a significant increase in traffic on Carbinswood Lane by Bucklebury Common. The introduction of such a huge development to the area would necessarily increase traffic pollution, cause additional road hazards ( neighbours have sadly lost dogs on the road, hit by cars and local wildlife, including snakes, have been run over) and cause significantly more disturbance to the residents and nature, on what are rural country unmarked roads and lanes. The pothole situation on the back roads is already bad and would only be made worse with more traffic.</p> <p>7. Increase in traffic on the route into Thatcham and Newbury and towards the station, which are already heavily congested at busy times. When there are even minor traffic delays/congestion on the main roads, drivers resort to the rural routes which are simply not designed for these increased traffic volumes. An increase in houses in the area stands to significantly increase the traffic volume on our rural roads that are not designed for any increase in traffic volume (nor should they ever be!)</p> <p>8. Increase in traffic and increased potential of speeding through Upper Bucklebury, which is of a major concern due to the primary school and many family residents with children (and pet dogs/ cats). With an increase in traffic, which could be as much as 10%, this will only worsen the situation.</p> <p>9. Impact on Nature. We have seen a number of protected species including the great crested newt, adder, slow worm and bats in and around Bucklebury Common. There are also birds such as the nightjar, which are under conservation concern. We fear increased numbers of cars and people visiting the area of outstanding natural beauty will have a large negative impact. Wildlife like this needs to be protected and not put under more threat. The development to the south of Blacklands Copse and Harts Hill Copse will mean open space dramatically reduced and wildlife forced to retreat, adding more pressure on species in decline. Over the last 7 years we have seen a significant increase in the litter in and around the Common and fly tipping in the area. Bringing</p>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>significantly more people to the area stands to cause more problems like this and more damage to what is already a fragile ecosystem.</p> <p>10. The proposal is an over development of the countryside of rolling hills and farmland and also stands to overdevelop Thatcham. This proposed over development is out of character for the area plans and will have a detrimental impact for the town itself as well as the surrounding villages. Thatcham is at capacity as it. Pre-covid, it was often hard to find a parking space in the town centre, doctors/dentists are apparently stretched, there's limited parking at the train station and already almost full train services at peak times into London. Not to mention the traffic delays around the crossing. There is no evidence that the development will enhance Thatcham town centre (or indeed Newbury).</p> <p>11. A previous application was resoundingly rejected by the secretary of state in 2017  <a href="https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html">https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html</a>.  Why, only a few years after this, are WBC now considering this site in light of the previous rejection, what has changed? Knowing a smaller planning application has been refused once and that there is clearly significant local objection again, why have massive funds been spent pursuing it?</p> <p>12. Why have WBC and Thatcham council used a great deal of tax payers money in completing many surveys and writing an 800 page report, before going to consultation on the proposal?</p> <p>13. The proposed development will completely surround the Crematorium at Thatcham which was, as I understand, placed there to be away from residential properties and has constraints placed on it.</p> <p>14. It is stated/assumed this will help the Upper Bucklebury Business –</p>	<p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>predominantly the Pub and Shop. One pub and shop is hardly justification for a development this size. One thing we love about living in Bucklebury is that there is only one shop and one pub where the community enjoy getting together.</p> <p>15. Bringing more houses and cars to the area will significantly increase the noise and light pollution to a predominantly rural, peaceful area where people live to escape from developments like the one proposed.</p> <p>16. The HELAA was updated in December 2020 to take account of factual inaccuracies. What evidence can WBC produce to prove everything stated in the consultation document is still factually correct?</p> <p>17. Schooling – this will obviously have an impact on local schools (and traffic). Many local families are very concerned that the proposal could overwhelm the brilliant local village schools that currently attract a good number of pupils and maintain a good balance of class sizes. Just because the plans include new schools, it does not mean that new families moving to the area will necessarily choose them. Many may well prefer to try for places at the existing, sought-after, traditional village schools, causing increased class sizes, over-stretching of school resources, increased cars, traffic, people and disruption to small rural villages.</p> <p>18. West Berkshire declared a climate emergency on 2 July 2019. <a href="https://www.westberks.gov.uk/media/48362/Draft-Environment-Strategy-2020-2030-Summary-document-January-2020-/pdf/WBC_Environmental_Strategy_Summary_A4_20.pdf?m=637141844400230000">https://www.westberks.gov.uk/media/48362/Draft-Environment-Strategy-2020-2030-Summary-document-January-2020-/pdf/WBC_Environmental_Strategy_Summary_A4_20.pdf?m=637141844400230000</a> WBC - Environment Strategy - with declaration of climate emergency. Building 2500 new houses will certainly increase the WBC carbon footprint and goes against the emergency/accelerated goal of carbon neutrality and "protecting and enhancing our natural environment" P5. Increased pollution will certainly be created by the entire</p>	<p>improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that 'in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy' (paragraph 67 of the Core Strategy Inspector's Report). As additional housing is required, and given Thatcham's status as an 'Urban Area' in the development plan is it considered appropriate to consider Thatcham for housing.</p> <p>The LPR needs to be justified and based on a robust evidence.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as</p>

Respondent (with lpr ref)	Response	Council Response
	<p>construction process, increased light pollution from the development and more cars will bring increased vehicle pollution and noise pollution to our rural area. There are seemingly NO environmental advantages of building a massive development in rural area. A large development can only bring negative environmental impact and therefore goes against the intent, statement and purpose of the WBC environmental strategy.</p> <p>19. The plan suggests the provision of a “country park”. There appears to be no budget available for this?</p>	<p>air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council’s policy on pollution.</p> <p>The LPR will be revised and updated in response to consultation and the evidence base will be maintained.</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p> <p>In relation to the Climate Change Emergency, The emerging draft LPR includes a policy that specifically covers climate change (policy SP5). This requires that all development should contribute to West Berkshire becoming and staying carbon neutral by 2030.</p> <p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs development to the most sustainable locations in the district.</li> <li>• Policy SP6 (Flood Risk) directs development to areas least at risk of flood risk.</li> <li>• Policy SP22 (Transport) requires that any development that generates a transport impact will be required, amongst other things, to have regard to West Berkshire’s declared climate emergency and minimise the impact of all forms of travel on the environment.</li> <li>• Policy DC3 (Building Sustainable Homes and Businesses) looks at building sustainable homes and businesses,</li> </ul>

Respondent (with lpr ref)	Response	Council Response
		Any development site will have to comply with the aims and objectives of the plan.
Corrine Bertrand (lpr1502)	<p>I would like to register my reasons for objecting to the proposal to build an enormous housing estate to the northeast of Thatcham (Policy SP 17)</p> <ol style="list-style-type: none"> <li>1. In the last 40 years we have seen Thatcham grow from a small village into a sprawling dormitory town with less diversity of shops than it had and a serious lack of amenities despite the doubling of its population (from 15,000 to 28,000 people).</li> <li>2. The proposed site is adjacent to an AONB. The designation of such an area by Natural England requires that it have relative wilderness, such as distance from housing or having few roads and relative quietness where natural sounds such as streams or birdsong are predominant. Obviously housing on such a scale would ensure that neither of these criteria still pertains.</li> <li>3. Harts Hill copse and Bucklebury common are havens for wildlife and oases for the people who live in or visit them. The increase in population would put an enormous strain on these invaluable and all too rare areas.</li> <li>4. Ironically as I sat down to write my objections, I received a flood alert warning from West Berks Council. Thatcham is in a flood plain. Global warming is making flooding a regular occurrence throughout the country and this area is no exception. Building several hundred houses on a slope right above dense housing is condemning those occupants to regular flooding and untold misery.</li> <li>5. At a time when the governments of the world are finally admitting that the destruction of countryside imperils all of us, it is a foolhardy plan to build on this green field site.</li> </ol>	<p>Thatcham is an ‘Urban Area’ as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector’s report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council’s evidence base to inform the proposed allocation.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>It's time to reinvigorate town centres by repurposing commercial property not destroy what few green spaces we have left.</p> <p>In conclusion, I beg you to reject this housing plan immediately. Should it go ahead the enormous damage to our area would be irreversible.</p>	<p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to the concerns on the potential impact on Bucklebury Common, the development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population).</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver ‘a network of green infrastructure which will include a new community park linking Thatcham to the AONB.’</p>
Chris Weedon (lpr1503)	<p>As a resident of Burdens Heath in Upper Bucklebury I would like to strongly register my OBJECTION to the proposed full development of the above sites for the following reasons.</p> <ol style="list-style-type: none"> <li>1. It is cited in the Bucklebury vision and Bucklebury Plan to maintain a strong greenbelt between Thatcham and Upper Bucklebury. This document is approved and agreed with WBC and should be considered as supplementary planning consideration. It is not mentioned in the WBC documentation.</li> <li>2. It would effectively join Upper Bucklebury with Thatcham, which has all but happened at Cold Ash effectively removing the rural aspect of the area. This is actually stated in the WBC documentation (<a href="https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=0">https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=0</a>) page 22, stating “particularly as development of both north east and north Thatcham would result in the loss of the separate identifies of Cold Ash and Bucklebury, and would harm the setting of the AONB settlement pattern”.</li> <li>3. A previous application was rejected by the Secretary of State in 2017 <a href="https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html">https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html</a>. Why are WBC now considering this site in light of the previous objection, what has changed and knowing this has been refused once why have massive funds been spent thus far?</li> <li>4. It is a massive over development of the countryside in one area which consists of rolling hills and farmland. The reason stated is that</li> </ol>	<p>There is no green belt within this area (or within the District) there will be open space maintained along the northern/north eastern part of the site.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>85% of West Berkshire is AONB. WBC has previously built on AONB and AONB status can be changed with government approval, and as it allegedly the government driving this would they not be more open to changing some AONB status ?</p> <p>5. It will have a significant impact on traffic in the area and especially on the route into Thattham and Newbury and towards the station which are already heavily congested at busy times and in the event of any minor traffic disruption.</p> <p>a. This will significantly impact the freight traffic using the industry site at Thattham</p> <p>b. It will significantly increase the traffic on the back route (rat runs) which are not designed for large traffic volumes.</p> <p>6. Traffic and speeding in particular through Upper Bucklebury is of a major concern due to the primary school. With an increase in 10% this will only worsen the situation. Traffic in Upper Bucklebury increases considerably each time there is disruption on the A4 and the development will significantly increase traffic, especially during the morning rush hour as pupils from the village walk to school.</p> <p>7. It is cited that there cannot be development on the Kennet flood plain, however there are multiple examples where this has already been done (most of Thattham was originally a flood plain), this is extremely hilly land which is almost certainly as unsuitable to development as the flood plain. Why build on an area where flood alleviation has already been installed to protect Thattham residents?</p> <p>8. It will significantly increase the noise and light pollution to the Bucklebury Parishioners – there are no street lights in Upper Bucklebury. There will also be decades of disruption through the construction phase.</p> <p>9. There is no evidence that this will enhance Thattham town centre (or indeed Newbury). The development of the old Army Base by the Station didn't add any amenities and we have seen the slow decline of the town centre over the last 20 years despite the area growing.</p> <p>10. Schooling – this will obviously have an impact on local schools (and traffic). Current indications are that KS1 children volumes are decreasing yet the plan includes a proposal for 3 new schools. Will</p>	<p>improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that 'in any overall review to accommodate more housing, Thattham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy' (paragraph 67 of the Core Strategy Inspector's Report). As additional housing is required, and given Thattham's status as an 'Urban Area' in the development plan is it considered appropriate to consider Thattham for housing.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thattham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thattham to the AONB.'</p>

Respondent (with lpr ref)	Response	Council Response
	<p>these be built before or after the houses? Build it before and it will poach children from local schools, such as Upper Bucklebury which will make that unsustainable (as is happening in Newbury with the new school on the college site). Build it after and the local schools will be overwhelmed beforehand. If the development is spread across the region there is a much greater chance of the load being spread out.</p>	<p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential</p>

Respondent (with lpr ref)	Response	Council Response
		<p>delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham’s flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council’s policy on pollution.</p>

Respondent (with lpr ref)	Response	Council Response
		In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.
Claude Hargreave (lpr1504)	<p>I object to the proposal to zone the land fronting the A4 and along Floral Way, Thatcham for residential development. The proposal is to create 2,500 new houses is not sustainable given the size of Thatcham. While Government policy is to encourage house building I believe that zoning the proposed land for such a substantial residential development is contrary to planning policy; Policy DC 1 – There is a presumption against new development outside of adopted settlement boundaries.</p> <p>Highways</p> <p>There will be significant increase in traffic movements on the existing road network which will inevitably force a percentage of the existing and increased traffic onto the surrounding minor country roads. This will create additional pollution, congestion and increase the chances of accidents on the smaller roads. While the land proposed for zoning is easy accessible to the public transport network it will lead to additional traffic movements during peak hours. The local roads are already congested during peak hours and more traffic will make it worse.</p> <p>Landscaping</p> <p>The land identified for zoning is currently open county side and any development will impact the AONB settlement pattern. The Bucklebury Plan states that a green belt is to be maintained between Thatcham and upper Bucklebury. Today there is a significant buffer zone between upper Bucklebury and Thatcham. However, this will be significantly eroded notwithstanding the proposed nature park if the land use plan</p>	<p>As part of the preparation of the LPR the council has undertaken a Settlement Boundary Review (SBR). The settlement boundary criteria make clear that boundaries will include sites allocated through the Local Plan process. North East Thatcham is proposed for allocation under policy SP17. Should the site, or any part of it, be removed from the LPR the boundary for Thatcham would be adjusted to exclude it. It is acknowledged that the settlement boundary is currently drawn around the whole of the proposed allocated site at North East Thatcham whilst Policy SP17 notes that development will be expected to deliver ‘a network of green infrastructure which will include a new community park linking Thatcham to the AONB.’ The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. At this stage it is therefore not possible to draw the settlement boundary any tighter. As the LPR progress and more detailed work is done on the sensitivity and capacity of different parts of the site to accommodate development the boundary will be amended accordingly.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there</p>

Respondent (with lpr ref)	Response	Council Response
	<p>change goes ahead. Even if the proposed nature park is 10% of the total development area it is contrary to the concept of greenbelt.</p> <p>Flooding</p> <p>Any development will impact the water runoff from the hillside increasing the chance of flooding.</p> <p>Ecology</p> <p>The land in question is open county side and must be protected from over development.</p> <p>Consultation</p> <p>The consultation period should be extended to allow for engagement with the local residents. The emerging local plan consultation has not been widely published which does not follow policy as no effort has been made to directly contact local residents for feedback.</p>	<p>were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. 		<p>proposals. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p>
Dave Parsons (lpr1508)	I would like to strongly object to the proposed North East Thatcham Strategic Site allocation (Policy SP 17) as per your Local Plan Review 2020-2037 Emerging Draft December 2020.	The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual

Respondent (with lpr ref)	Response	Council Response
	<p>I outline my main objections as follows:</p> <ol style="list-style-type: none"> <li>1. Loss of identity of Upper Bucklebury.</li> </ol> <p>As a resident of Upper Bucklebury this concerns me greatly. The proposed development would end up incredibly close to Upper Bucklebury and would reduce if not remove the rural aspect of this village. The Bucklebury Vision and Plan detail that a strong greenbelt should be maintained between Upper Bucklebury and Thatcham. These documents were approved by WBC.</p> <p>Additionally, the Siege Cross proposal was refused by WBC because of similar concerns. The reason WBC gave for refusal included: (taken from the WBC Decision notice to refuse outline planning):</p> <p><i>3 (c) The proposed development would result in harm to the character and identity of Thatcham and erode the open landscape between Thatcham and Upper Bucklebury.</i></p> <p><i>3 (d) The development would have an adverse impact on the distinctive local landscape character and appearance of the landscape north of Thatcham, which contributes to the setting of the AONB the boundary of which runs some 575 metres to the north of the site.</i></p> <p>It is extremely concerning that WBC now considers this loss of identity acceptable. I.e.: recommendation from Site Assessment on CA16:</p> <p><i>Due to the scale of development that could take place on THA20, it is considered that there should be no further allocations in Thatcham in the period to 2037 particularly as development of both north east and north Thatcham would result in the loss of the separate identifies of Cold Ash and Bucklebury, and would harm the setting of the AONB settlement pattern.</i></p>	<p>breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that 'in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy' (paragraph 67 of the Core Strategy Inspector's Report). As additional housing is required, and given Thatcham's status as an 'Urban Area' in the development plan is it considered appropriate to consider Thatcham for housing.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>In haste to find a single convenient solution it seems that it is acceptable that villages should lose their separate identity and all merge together. Where does this stop? Why not merge all villages and towns together and be done with it? Such a narrow-minded attitude is short-sighted and abhorrent.</p> <p>2. Increase In Traffic</p> <p>The area around Upper Bucklebury comprises a number of single-track lanes. With an influx into the area of potentially 5000 cars the traffic using both the main road through Upper Bucklebury and the single-track lanes would significantly increase. This would have an ensuing knock-on safety effect of excessive speed through the village, increased danger to children walking to the primary school in Upper Bucklebury, and increased risk of car accidents as there is greater use of single track lanes. There is also the increased pollution from the increased number of vehicles using these country roads.</p> <p>The plan states that one reason for this location is its proximity to the Thatcham train station. It is most likely that the increase in this use will be by people driving to the train station. There is already insufficient parking at the Train Station for the existing number of commuters. Even with a modest 10% of people from 2500 new homes would represent a significant increase in the local parking pressure around the station leading to further illegal parking, irate local residents and increased danger to pedestrians. Further, I see no provision in the plan for a bridge over the rail tracks at Thatcham Station. This is already a severe bottleneck and the increase in a large number of vehicles using this route will result in even further chaos and inconvenience, not to mention the increase in pollution through the larger number of cars idling waiting to cross the train tracks.</p> <p>3. Overloaded Doctor's Surgeries</p>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The surgery at Chapel Row is already heavily subscribed. It can take a number of weeks to get an appointment. I understand that this is one of the 2 surgeries that would fall within the catchment for the proposed development. The overloading of this and presumably the other surgery in Thatcham would have a large-scale negative effect on the people who need the surgery most as they further struggle to gain and maintain contact with their local GP.</p> <p>4. Loss of Nature and Further Threat to Pollinators</p> <p>This proposal means to remove a large amount of rolling hillside with its encompassing hedgerows and nature's highways. This will have a direct negative effect on the amount of native flora and fauna. Rather than concreting over large swathes of countryside we should be working with farmers and land owners to promote the National Pollinator Strategy. Pollinators are an important part of our environment yet are in decline. Over 97% of all flower-rich grasslands have been lost in England since the 1930s, reducing pollen and nectar sources and leading to a serious decline in the wildlife depending on wildflower-rich habitat. Pollination by honey bees, wild bees and bumblebees is incredibly valuable for farmers. It is estimated that it would cost UK farmers £1.8 billion a year to pollinate their crops manually if wild bees disappeared. We should be promoting nature not destroying it.</p>	<p>The site alongside the larger site area, is well related to the existing town of Thatcham. It is in close proximity to a range of services and facilities, including the train station. Thatcham is an urban area with a wide range of services and opportunities for employment, community and education. Development of a strategic nature at this site would support the service provision and regeneration that Thatcham requires.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p>
Peter West (lpr720)	<p>I think Thatcham is already over-developed. Many people prefer to live in Thatcham over Newbury because it is smaller, quieter, has less bustle and less traffic away from the A4. Adding an extra 2500 dwellings would fundamentally change Thatcham for the worse. I want Thatcham to retain its 'large village' atmosphere.</p> <p>I also disagree with the findings of the 2020 Thatcham masterplanning study - this is the first I've heard of it.</p>	<p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>I have also commented on the Review of Settlement Boundaries at Appendix Three. These comments form part of the reasons why I am objecting to the proposed policy.</p> <p>I consider north east Thatcham – the area shown on the plan - is not a suitable location for strategic large scale development. It is too far away from the centre of Thatcham and will lead to large numbers of extra car journeys on Floral way, Harts Hill Road and on the A4 through Thatcham.</p> <p>Large areas of existing housing – particularly streets off Floral Way (e.g. Foxglove Way, Trefoil Drove, Simmons Field, Archangel Way) and streets off Falmouth Way (e.g. Bolingbroke Way, Ashman Rd) would be subjected to 15 years of noise and disruption from building work and roadworks.</p> <p>If any area of Thatcham needs to be examined for further development, it should be in the south east quadrant, south of the railway line. Because some of this land is in a flood plan, areas slightly higher up Crookham Hill - land around Highfield and Waterside copses - should also be considered. A development in these areas would be closer to Thatcham rail station and a similar distance to the existing town centre as the north east sector proposed housing. There would be less intrusion - building noise, roadworks etc - to existing housing. Any development plan for the south east quadrant could also deliver the one piece of infrastructure urgently needed in Thatcham - a road bridge over the railway at Thatcham Station.</p>	<p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>As part of the preparation of the LPR the council has undertaken a Settlement Boundary Review (SBR).The settlement boundary criteria make clear that boundaries will include sites allocated through the Local Plan process. North East Thatcham is proposed for allocation under policy SP17. Should the site, or any part of it, be removed from the LPR the boundary for Thatcham would be adjusted to exclude it. 	<p>"2.4 At a strategic level, the site extends Thatcham linearly along the Kennet Valley, continuing the broad pattern of development that the town already exhibits due to the topography, connectivity and water."</p> <p>This is blatantly untrue. The site in question <u>broadens</u> the pattern of development of Thatcham up and out of the Kennet Valley and ever closer to other settlements.</p> <p>7. Page 15 Ref: "1.27 By addressing these issues positively and transparently, any proposed strategic development in the town has the potential to deliver net benefits for the town as a whole."</p> <p>Any benefits to Thatcham here would be at the expense of all life, including human life, in Upper Bucklebury.</p> <p>And, when existing infrastructure in Thatcham is already stretched its nonsense to suggest that adding demand will improve it. We've waited for too long for the present shortage of infrastructure to be addressed and have been severely disappointed. The infrastructure I refer to is provision for traffic on A4, Floral Way, through the parish of Bucklebury, over the railway crossing by the station, station parking, doctor's surgery, schools and public transport to name just a few.</p> <p>Stage 3. Page 58 under Extending Linear Town Structure mentions opening a North Eastern Approach to Thatcham through the development of THA20. So here is open confirmation of the intention to send yet more traffic through the country lanes of Bucklebury, which already have to accommodate rat-running traffic avoiding the A4/Floral Way bound for M4/Reading in the East and Newbury/Chieveley/M4 in the West.</p>	<p>landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. At this stage it is therefore not possible to draw the settlement boundary any tighter. As the LPR progress and more detailed work is done on the sensitivity and capacity of different parts of the site to accommodate development the boundary will be amended accordingly.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual</p>

Respondent (with lpr ref)	Response	Council Response
	<p>It also mentions "extending facilities to a wider catchment." Clear indication here of an attempt to join Bucklebury to Thatcham.</p> <p>8. "2.47 It should be noted that the North Wessex Downs AONB Board has stated its objection to development on all the sites that make up NE Thatcham, through the HELAA process, due to the impact on the setting of the AONB and the breaking of the Floral Way boundary. The location of the North Wessex Downs AONB is shown on Figure 30. <u>Although the site is proximate, due to the topography and woodland cover, there is little intervisibility between the two unless an appropriate buffer is included in any proposals.</u>"</p> <p>Bucklebury Common already has too much pedestrian and vehicular traffic (4x4s) for the healthy survival of the existing flora and fauna. The proposed development would considerably to this damage in terms of foot and wheeled traffic, noise and light pollution and air pollution. This at a time of unprecedented environmental damage throughout the world causing climate change.</p> <p>9. On page 62 you write: "NE Thatcham has the potential to accommodate:... • Biodiversity net gain through habitat restoration and linkages".</p> <p>This comment is disingenuous. Any tarmac, concrete, bricks and mortar can only harm biodiversity.</p> <p>10. This proposal is ill thought out and considerably out of date with current thinking and statistics.</p> <p>Please preserve and conserve the special qualities of N Wessex Downs AONB and Bucklebury Common/Parish by keeping the existing buffer above Floral way entirely free of development.</p>	<p>representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will</p>

Respondent (with lpr ref)	Response	Council Response
		<p>be updated regularly updated in consultation with infrastructure providers.</p> <p>In relation to the concerns on the potential impact on Bucklebury Common, the development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population).</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p>

Respondent (with lpr ref)	Response	Council Response
<p>Joshua Parsons (lpr1507)</p>	<p>I would like to register my objection.</p> <p>I want to keep Bucklebury rural. I have lived in Upper Bucklebury all my life and love the fact it is rural and there is lots of wildlife in the surrounding area. I'm worried that the development would harm the environment. The increased population would lead to an increase in litter being accumulated in the surrounding forests which would harm the environment and animals which live there.</p> <p>I currently attend Kennet school and the road going to Thatcham would not be able to take the amount of traffic that the increased population would present. The traffic would also increase harmful emissions.</p> <p>Living in a village is quiet and I know most of the people. People help each other and there are community events. The increase in houses may change this forever.</p> <p>I have memories of walking across the fields into Thatcham. The views are nice and there is lots of nature. E.G Deer, flowers, bees etc. These would all be threatened with the new development.</p>	<p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p>
Cheryl Gadsby (lpr1511)	I am particularly concerned about the increase in traffic through Upper Bucklebury if such a large development is built either side of Harts Hill. The plan specifies in SP22 7.17 that “particular focus should be	In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period.

Respondent (with lpr ref)	Response	Council Response
	<p>given to safety of pedestrians, cyclists, equestrians and other vulnerable road users”.</p> <p>I live on &lt;personal information removed&gt;, which is already used as a through-route for cars from Thatcham coming up Harts Hill and driving through Burdens Heath to access the A34 and M4 through Cold Ash and Courage beyond. Burdens Heath does not have a pavement, only a ditch running along the side of the housing. There is no street lighting. Cars will regularly exceed the 30mph speed limit. There are many families that live along this road and it is used as a walking route to access the village primary school and the buses to take secondary school age children to Kennet school and The Downes School. This means that, particularly in the winter months, there can be children walking along the road in the half-light at the beginning and end of the day. We already have issues with cars not taking enough care or consideration of pedestrians and the increase in traffic will only make this situation worse.</p> <p>I note that in SP22 7.18 there is a plan to encourage more travel choice with car sharing and use of links to the train station. However, many new residents may see the town as a good base for Northern or Western routes given the close proximity of the M4 and A34. These residents will be likely to use their cars and will use Upper Bucklebury and the surrounding villages as a short cut to these major roads. This will only increase the issue of traffic in villages not designed for this purpose.</p> <p>The scale of the proposed development in one location will lead to traffic issues in the surrounding areas and will impact the local villages. My preferred approach would be for planned developments to be spread out across West Berkshire, rather than proposing to build 2500 dwellings in one location.</p>	<p>Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). 		A Viability Assessment will accompany the LPR as part of its evidence base.
Chris Harris (lpr1513)	<p>This email sets out my <b>objection</b> to the proposal to North East Thatcham Development - Local Plan Review 2020 – 2037: Emerging Draft, on the following grounds:</p> <p><b>Traffic</b></p> <p>We live in &lt;personal information removed&gt; and walking to the school with our 2 small daughters is, at the moment dangerous. The cars travelling down Burdens Heath are constant and well above the 30mph limit. Almost every day we witness a near miss as cars fail to slow for walkers, cyclists and horse riders.</p> <p>This is the same for Broad Lane with the traffic calming failing to do much. Every morning on the way to school it is concerning. We fear with any increase in traffic the village will become unbearable and dangerous. It will not be long until a dreadful accident happens.</p> <p>The proposed development will increase considerably the traffic in Upper Bucklebury and the surrounding villages.</p> <p><b>Nature</b></p> <p>Bucklebury Common and the surrounding area is rich in flora and fauna and we witness it daily in the Burdens Heath Planation area as well as on the common. We have seen a number of protected species including the great crested newt, common lizard, adder, grass snake, slow worm and bats. There are also birds such as the nightjar (we believe last summer was in the burdens heath plantation area as well as on the common) which are under conservation concern. We fear increased amounts cars and people visiting the area of outstanding natural beauty will have a large negative impact. Wildlife like this need</p>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed</p>

Respondent (with lpr ref)	Response	Council Response
	<p>to be protected and not under more threat. The development to the south of Blacklands Copse and Harts Hill Copse will mean open space dramatically reduced and wildlife forced to retreat, pushing species into decline.</p> <p>There is already too much litter and fly tipping in the area, as well as car parks being used after dark for illegal drug use. This will only increase and damage the fragile ecosystem</p> <p><b>Identity</b></p> <p>There is simply not enough space between the proposed development and Upper Bucklebury. There should be clear space between settlements which would be lost with this development and Upper Bucklebury will become part of the Newbury/Thatcham conurbation. Residents have chosen to live here for many reasons, and being part of a rural village community is one at the very top of the list.</p> <p><b>AONB</b></p> <p>According the gov.uk, an AONB has to a combination of several criteria, two of these are:</p> <ul style="list-style-type: none"> <li>• relative wildness, such as distance from housing or having few roads</li> <li>• relative tranquillity, where natural sounds, such as streams or birdsong are predominant</li> </ul> <p>Both of these will be impacted heavily by the development and could not be met. We would imagine the boundary of the AONB would have not been where it currently is should this development already have been in existence. The development is threatening the protection of the</p>	<p>submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site</p>

Respondent (with lpr ref)	Response	Council Response
	<p>AONB, which is against WBC’s own strategic objective to “...conserve and enhance the North Wessex Downs AONB.”</p> <p><b>Night Skies</b></p> <p>The area already suffers from considerable light pollution from Newbury and Thatcham. This development would make it so much worse and upset wildlife habitats. It would damage the night skies we enjoy as residents of the village.</p> <p><b>Pollution</b></p> <p>The A4 is relatively close to Upper Bucklebury, and the noise and air pollution is already felt in the village, the new development would further increase noise and air pollution making the village not such a nice place to live.</p> <p><b>Landscape</b></p> <p>The development would be out of character for the landscape. Currently the beautiful fields, hills, ancient woodlands and historic sites enrich the environment, both for residents of Thatcham, Upper Bucklebury, Cold Ash and their visitors. The proposed development would have a detrimental impact on the landscape which is against Bucklebury’s and WBC vision and objectives.</p> <p><b>Overdevelopment</b></p> <p>The proposal is overdevelopment of Thatcham, is out of character for a small town and will have a detrimental impact for the surrounding villages as well as the town itself. Thatcham struggles as it is. There is insufficient parking in the town, doctors stretched, limited parking at the</p>	<p>which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a ‘masterplan’ / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In regards to light pollution, policy DM4: Environmental nuisance and pollution has been strengthened to ensure that all reasonable steps are taken through design, siting and technological solutions to ensure the abatement of obtrusive light to avoid sky glow, glare and light spillage, intrusion and any adverse impact to wildlife. Applicants should adhere to the guidance on lighting provided in the most up to date Institute of Lighting Professionals (ILP) guidance notes, alongside other relevant local documents including the North Wessex Downs AONB ‘A Guide to Good External Lighting’ (2021).</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR also requires the submission of a lighting strategy.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council’s policy on pollution.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>train station and already almost full train services at peak times into London. Not to mention the traffic delays around the crossing</p> <p><b>Flooding</b></p> <p>Thatcham has suffered from serious flooding, a member of our family's house being flooded in 2007 alone with so many others. Having read the Strategic Flood Assessment (SFRA) Level 2 report by Jacobs in 2008 it is of grave concern that this area will be developed and increase the flood risk to Thatcham and Newbury. I appreciate that the developers will be required to put mitigation in place, but in reality, we expect this to be insufficient.</p> <p>I strongly urge you to reconsider the plans, reducing the development or finding alternative site that are more suitable and in line with WBC's own policies.</p>	<p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the</p>

Respondent (with lpr ref)	Response	Council Response
		<p>Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements</p>
Sarah Harris (lpr1516)	<p>This email sets out my <b>objection</b> to the proposal to North East Thatcham Development - Local Plan Review 2020 – 2037: Emerging Draft, on the following grounds:</p> <p><b>Traffic</b></p> <p>We live in &lt;personal information removed&gt; and walking to the school with our 2 small daughters is, at the moment dangerous. Almost every day we witness a near miss as cars fail to slow for walkers, cyclists and horse riders.</p> <p>This is the same for Broad Lane with the traffic calming failing to do much. Every morning on the way to school it is concerning. We fear with any increase in traffic the village will become unbearable and dangerous. It will not be long until a dreadful accident happens.</p>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The proposed development will increase considerably the traffic in Upper Bucklebury and the surrounding villages.</p> <p><b>Nature</b></p> <p>Bucklebury Common and the surrounding area is rich in flora and fauna and we witness it daily in the Burdens Heath Planation area as well as on the common. We have seen a number of protected species including the great crested newt, common lizard, adder, grass snake, slow worm and bats. There are also birds such as the nightjar (we believe last summer was in the burdens heath plantation area as well as on the common) which are under conservation concern. We fear increased amounts cars and people visiting the area of outstanding natural beauty will have a large negative impact. Wildlife like this need to be protected and not under more threat. The development to the south of Blacklands Copse and Harts Hill Copse will mean open space dramatically reduced and wildlife forced to retreat, pushing species into decline.</p> <p>There is already too much litter and fly tipping in the area, as well as car parks being used after dark for illegal drug use. This will only increase and damage the fragile ecosystem</p> <p><b>Identity</b></p> <p>There is simply not enough space between the proposed development and Upper Bucklebury. There should be clear space between settlements which would be lost with this development and Upper Bucklebury will become part of the Newbury/Thatcham conurbation.</p>	<p>not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Residents have chosen to live here for many reasons, and being part of a rural village community is one at the very top of the list.</p> <p><b>AONB</b></p> <p>According the gov.uk, an AONB has to a combination of several criteria, two of these are:</p> <ul style="list-style-type: none"> <li>• relative wildness, such as distance from housing or having few roads</li> <li>• relative tranquillity, where natural sounds, such as streams or birdsong are predominant</li> </ul> <p>Both of these will be impacted heavily by the development and could not be met. We would imagine the boundary of the AONB would have not been where it currently is should this development already have been in existence. The development is threatening the protection of the AONB, which is against WBC's own strategic objective to "...conserve and enhance the North Wessex Downs AONB."</p> <p><b>Night Skies</b></p> <p>The area already suffers from considerable light pollution from Newbury and Thatcham. This development would make it so much worse and upset wildlife habitats. It would damage the night skies we enjoy as residents of the village.</p>	<p>(LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In regards to light pollution, policy DM4: Environmental nuisance and pollution has been strengthened to ensure that all reasonable steps are taken through design, siting and technological solutions to ensure the abatement of obtrusive light to avoid sky glow, glare and light spillage, intrusion and any adverse impact to wildlife. Applicants should adhere to the guidance on lighting provided in the most up to date Institute of Lighting Professionals (ILP) guidance notes, alongside other relevant local documents including the North Wessex Downs AONB 'A Guide to Good External Lighting' (2021).</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR also requires the submission of a lighting strategy.</p>

Respondent (with lpr ref)	Response	Council Response
	<p><b>Pollution</b></p> <p>The A4 is relatively close to Upper Bucklebury, and the noise and air pollution is already felt in the village, the new development would further increase noise and air pollution making the village not such a nice place to live.</p> <p><b>Landscape</b></p> <p>The development would be out of character for the landscape. Currently the beautiful fields, hills, ancient woodlands and historic sites enrich the environment, both for residents of Thatcham, Upper Bucklebury, Cold Ash and their visitors. The proposed development would have a detrimental impact on the landscape which is against Bucklebury's and WBC vision and objectives.</p> <p><b>Overdevelopment</b></p> <p>The proposal is overdevelopment of Thatcham, is out of character for a small town and will have a detrimental impact for the surrounding villages as well as the town itself. Thatcham struggles as it is. There is insufficient parking in the town, doctors stretched, limited parking at the train station and already almost full train services at peak times into London. Not to mention the traffic delays around the crossing</p> <p><b>Flooding</b></p> <p>Thatcham has suffered from serious flooding, a member of our family's house being flooded in 2007 alone with so many others. Having read</p>	<p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>the Strategic Flood Assessment (SFRA) Level 2 report by Jacobs in 2008 it is of grave concern that this area will be developed and increase the flood risk to Thatcham and Newbury. I appreciate that the developers will be required to put mitigation in place, but in reality, we expect this to be insufficient.</p> <p>I strongly urge you to reconsider the plans, reduce the development or find alternative sites that are more suitable and in line with WBC's own policies.</p>	<p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements</p>
Nikki Hart (lpr1518)	<p>I am writing to voice my strong objection to proposed development to build 2500 houses on the farmland between Upper Bucklebury and the A4 and Floral Way.</p> <p>My family and I have become residents of Upper Bucklebury in the last 12 months, moving from near-by Cold Ash where we resided for the previous 13 years. We chose to remain in this location due to our love of the countryside and numerous scenic walks and open spaces on our</p>	<p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. To that end, any development on the site will be landscape-led and retaining</p>

Respondent (with lpr ref)	Response	Council Response
	<p>doorstep. A huge housing development in such proximity will erode the gap between Thatcham and Bucklebury Parish, stripping our community of the rural feel that has played a huge part in attracting many of the residents to this village.</p> <p>A further detrimental consequence of such a development will undoubtedly be an increase in traffic in Bucklebury and the surrounding area. Air and noise pollution go hand-in-hand with an increased amount of vehicles, which will again have a negative impact on local residents in terms of health and living conditions. The road network is not designed to accommodate the flow of traffic that will be unavoidable with such a number of additional residents living a short distance down the hill. Any changes to this existing road system will further cut into green belt areas that are already under huge threat.</p> <p>Any project of such vast proportions is going to have a damaging impact on flora and fauna in the locality. At a time when every effort should be made to protect our local wildlife and preserve areas of countryside for all to enjoy, this development does quite the opposite. It threatens the designated AONB and Bucklebury Common, due to increased footfall and litter and is sadly open to other abuse from unauthorised vehicles.</p> <p>The proposal itself, based on projected housing needs, is unrealistic and overinflated and fails to take into account other housing developments in the Newbury area. There is no need for a project of such size and proportions to be located on the current site. Indeed, it will lead to further on-going issues of flooding due to the amount of run-off water from so many buildings crammed together.</p> <p>I am in complete agreement with many other residents of Bucklebury and the surrounding villages that this development should and must be reconsidered.</p>	<p>and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. 		<p>Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>In relation to the concerns on the potential impact on Bucklebury Common, the development would involve a</p>

Respondent (with lpr ref)	Response	Council Response
		significant amount of open space which would be expected to serve the new population (and benefit the existing population).
Jodie Stone (lpr1520)	<p>I am writing to object to the proposed development of 2500 new homes in Thatcham. Thatcham is already struggling with its infrastructure with primary &amp; secondary schools. Francis Baily the closest primary school to this proposed development &amp; it is already the biggest primary school in West Berkshire with 600 kids. That's big enough for a primary school.</p> <p>The railway crossing is an absolute nightmare! Total joke, sometimes you could be stuck waiting in queues for 30 minutes. Thatcham cannot take any more traffic from a new development.</p> <p>This proposed development is to be built on more green space, there is hardly any green space as it is, &amp; this has really proved its point during the covid lockdowns, 2020-2021 there is nowhere to walk or exercise as a family away from lots of people because it's already so densely built up, there is really no space.</p> <p>I also think that we need to protect all the wildlife that habitats where you want to build this unbelievably huge development. Surely as Newbury high street is ruined through covid &amp; online shopping these derelict buildings which already exists could be turned into much needed housing as the high street will never recover from this devastating pandemic.</p> <p>I hope you make the right decision as the people of Thatcham (the resident's) do not want any more developments.</p>	<p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. 	<p>to be built but with the birth rate falling in the South significantly why are these needed? Surely we are not drawing in people from other parts of the country?</p> <p>I assume this is because of relationship breakdown and families and other couples splitting up and needing separate homes. Perhaps we should be investing more in relationship education and counselling instead?</p>	<p>contribute to West Berkshire becoming and staying carbon neutral by 2030.</p> <p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs development to the most sustainable locations in the district.</li> <li>• Policy SP6 (Flood Risk) directs development to areas least at risk of flood risk.</li> <li>• Policy SP22 (Transport) requires that any development that generates a transport impact will be required, amongst other things, to have regard to West Berkshire's declared climate emergency and minimise the impact of all forms of travel on the environment.</li> <li>• Policy DC3 (Building Sustainable Homes and Businesses) looks at building sustainable homes and businesses,</li> </ul> <p>Any development site will have to comply with the aims and objectives of the plan.</p> <p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government's standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in</p>

Respondent (with lpr ref)	Response	Council Response
		<p>national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p> <p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p>

Respondent (with lpr ref)	Response	Council Response
Victoria Pratt (lpr1523)	<p>I would like to object to the proposed development of 2,500 houses along A4 and Floral Way between Thatcham and Upper Bucklebury for the following reasons:</p> <ol style="list-style-type: none"> <li>1. Infrastructure – There are no plans to improve the infrastructure of the surrounding area. An increase of 2,500 houses will place local infrastructure under significant pressure. <ol style="list-style-type: none"> <li>a. Residents have been asking for a road bridge to replace the level crossing at Thatcham for years, an extra 5,000 cars are only going to make queues worse.</li> <li>b. Thatcham station does not have a big enough car park to support the proposed development.</li> <li>c. Low water pressure is already an issue faced by Upper Bucklebury and Chapel Row. An extra 2,500 homes is only going to place more stress on an already.</li> <li>d. Waste and energy consumption will increase massively – how does this follow West Berkshire Council's declaration of a climate emergency?</li> </ol> </li> <li>2. Amenities – The proposal does not include plans to increase or develop existing amenities in the surrounding areas.</li> <li>3. Flooding – in 2007 Thatcham suffered widespread surface water flooding which affected over 1,000 homes. This led to the implementation of flood defence schemes which have only recently been completed. Already these defences are not being maintained increasing the current risk of flooding. Surface runoff is already prevalent on the agricultural land surrounding Harts Hill. An increase in impermeable surfaces and drainage systems has the potential to increase the risk of flooding in Thatcham and further downstream.</li> <li>4. Traffic – the proposed development will have significant impact on traffic along the A4, through Upper Bucklebury, Southend Bradfield and</li> </ol>	<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Cold Ash. Many of these roads already have issues with speeding and are not designed to handle such an influx of traffic.</p> <p>5. Environment – There is so much nature around Upper Bucklebury and this proposal will hugely affect this. Locally protected species such as the great crested newt, common lizard, adder, grass snake, slow worm, badgers and bats have been seen. There are also birds such as the nightjar which are of conservation concern. I worry that the increased amount of traffic and number of people visiting this area of outstanding natural beauty will have a huge negative impact. Wildlife needs to be protected and not put under threat.</p> <p>6. Corridor between Thatcham &amp; Upper Bucklebury – There is simply not enough space between the proposed development, Upper Bucklebury and the boundary with the AONB. The development will essentially make Upper Bucklebury a part of Thatcham (or Newbury/Thatcham) meaning it will lose its identity as a village. I have spent all my life living in Upper Bucklebury and strongly believe the rural aspect of the village is imperative to protect. According the gov.uk, an AONB has to a combination of several criteria, two of these are:</p> <ul style="list-style-type: none"> <li>• Relative wildness, such as distance from housing or having few roads</li> <li>• Relative tranquillity, where natural sounds, such as streams or birdsong are predominant</li> </ul> <p>Both of these will be impacted heavily by the development and could not be met. I would imagine the boundary of the AONB would not be where it currently is should this development already have been in existence.</p> <p>7. Loss of unspoilt countryside – The entire proposed development is on green field sites and will lead to the loss of the beautiful unspoilt</p>	<p>In regards to water supply, The developers are aware of the requirement for upgrades to the water supply network and water treatment works (which is identified in the Water Cycle Study).</p> <p>Should the development go ahead, it would be phased appropriately to ensure it does not outpace delivery of essential network and treatment upgrades (See IDP).</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an integrated water supply and drainage strategy which will consider existing related infrastructure on the site.</p> <p>In relation to the Climate Change Emergency, The emerging draft LPR includes a policy that specifically covers climate change (policy SP5). This requires that all development should contribute to West Berkshire becoming and staying carbon neutral by 2030.</p> <p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs development to the most sustainable locations in the district.</li> <li>• Policy SP6 (Flood Risk) directs development to areas least at risk of flood risk.</li> <li>• Policy SP22 (Transport) requires that any development that generates a transport impact will be required, amongst other things, to have regard to West Berkshire's declared climate emergency and minimise the impact of all forms of travel on the environment.</li> </ul>

Respondent (with lpr ref)	Response	Council Response
	<p>countryside between Colthrop Manor, Ouzel Gully and Kent's Down Gully.</p> <p>8. Light Pollution – Upper Bucklebury only has 6 street lights which produce minimal light pollution. The proposed development would drastically increase light pollution locally.</p> <p>9. Health care – Doctors surgeries are already under pressure. And are unlikely to have the capacity to cover some 7,000 extra patients.</p> <p>10. Death Care - The proposal does not address care after death. An increase in population of 7,000+ people will place strain on the crematorium and local cemeteries which are not big enough to cope.</p> <p>11. Rights of Way – There are currently several footpaths and bridle ways over the land proposed to be built on, some of these are ancient pathways. These are vital for local people in Thatcham and Bucklebury to experience the countryside on foot and on horse. 2,500 houses will change these rights of way beyond recognition.</p> <p>12. Schooling – the proposed development will have a huge impact on local schools. Whilst the proposal includes plans to build three schools, when would they be built, before or after the houses? Build them before and it will poach children from local schools leaving them unsustainable but build them after and local schools will be overwhelmed. If the development is spread across West Berkshire there is a much greater chance of the load being spread out.</p> <p>13. Over development - The proposal is overdevelopment of Thatcham, is out of character and will have a detrimental impact for the surrounding villages as well as the town itself.</p>	<ul style="list-style-type: none"> <li>• Policy DC3 (Building Sustainable Homes and Businesses) looks at building sustainable homes and businesses,</li> </ul> <p>Any development site will have to comply with the aims and objectives of the plan.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end,</p>

Respondent (with lpr ref)	Response	Council Response
	<p>14. Climate Change – West Berkshire declared a climate emergency in 2019. The proposed development will increase pollution through increased traffic, waste, energy consumption to name a few.</p> <p>15. Archeology - Long Grove was originally the principal road through what is now Upper Bucklebury, between Crookham Manor, Colthrop Manor and Bucklebury village and may contain archaeological artefacts requiring a suitable survey. Additionally, there may be a Bronze Age settlement were Harts Hill Copse meets Harts Hill Road.</p> <p>I would like to suggest that multiple smaller developments are built across West Berkshire which would spread the impact on nearby infrastructure. Whilst building 2,500 houses in one development may allow for additional infrastructure, three schools is not sufficient to counter the detrimental impact to the surrounding communities. If this is not possible, I would like to suggest Greenham Common as a more suitable site for development. It has better transport links including main roads and Newbury Station. It is also closer to amenities such as supermarkets, shops and leisure facilities.</p> <p>Finally, it is not a greenfield site so would not result in the loss of uniquely quiet unspoilt countryside.</p>	<p>any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council’s housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver ‘a network of green infrastructure which will include a new community park linking Thatcham to the AONB.’</p> <p>In regards to light pollution, policy DM4: Environmental nuisance and pollution has been strengthened to ensure that all reasonable steps are taken through design, siting and technological solutions to ensure the abatement of obtrusive light to avoid sky glow, glare and light spillage, intrusion and any adverse impact to wildlife. Applicants should adhere to the guidance on lighting provided in the most up to date Institute of Lighting Professionals (ILP) guidance notes, alongside other relevant local documents including the North Wessex Downs AONB ‘A Guide to Good External Lighting’ (2021).</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The updated version of the proposed allocation policy in the next published version of the LPR also requires the submission of a lighting strategy.</p> <p>Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>The site alongside the larger site area, is well related to the existing town of Thatcham. It is in close proximity to a range of services and facilities, including the train station. Thatcham is an urban area with a wide range of services and opportunities for employment, community and education. Development of a strategic nature at this site would support the service provision and regeneration that Thatcham requires.</p> <p>In regards to concerns raised in relation to the loss of a recreational resource, within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB. This will be accessible to all.</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p> <p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the</p>

Respondent (with lpr ref)	Response	Council Response
		<p>Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>Where a site on which development is proposed includes, or has the potential to include, heritage assets with archaeological interest, the Council will require developers to submit an appropriate desk-based assessment and, where necessary, a field evaluation.</p>
Jasmine Foster (lpr1522)	<p>I am writing regarding the plan to build 2500 houses in NE Thatcham. I am very against this plan, as it would destroy a lot of natural areas and disturb the wildlife that lives Thatcham has some beautiful foot paths and putting houses on these places would destroy and the people who live in Thatcham uses theses foot paths to exercise and there and taking them away how would those people exercise? Adding more house will make an already busy Thatcham a lot busier, double the number of cars on the road, will make park even more impossible as they are full even now! So, adding more will make it more impossible for anyone to park. The economic growth should not be a priority at the moment. As Climate change is a problem adding more houses and cars will increase the emission.</p>	<p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to</p>

Respondent (with lpr ref)	Response	Council Response
	<p>I had great problem trying to access the information about the plans to build 2500 houses and the council states it wishes to get responses from the public but it is quite different to find those details in the plan. To find how to response is very confusing and is not clear on how to response, that should clear on the home page so people who are not techy will understand, as I think a lot of people would be against it but they do not know how to access where they would need to reply.</p> <p>I am in my 20s and it is exceedingly difficult for me to rent a flat as the prices are high, more houses will make Thatcham more expensive place to live in and people like me would find it even harder to find somewhere else to live as we cannot live with our parents forever and some of us do not want to more away from Thatcham as work, family and leisure is here.</p> <p>Before COVID-19 the doctors where a terribly busy, never able to get the appointment when you wanted it, had to wait weeks for an appointment. Adding more houses will increase the number of people who need to go to the doctor which will make it impossible to even get an appointment. Flooding is a problem in Thatcham we should be putting money in to help existing houses to stop them getting flooded and improving the banks and clearing out where it needs to be cleared out to stop floods recurring as we are getting a lot of rain due to climate change.</p> <p>I am very against the plan to build 2500 houses! Use the money for things we need! We do not need 2500 more houses. We need afforded houses for young people, foot paths for people to walk to from their home to exercise, less cars on the road more people walking and cycling.</p>	<p>conform. Policy SP17 notes that development will be expected to deliver ‘a network of green infrastructure which will include a new community park linking Thatcham to the AONB.’</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. 		<p>the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that 'in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy' (paragraph 67 of the Core Strategy Inspector's Report). As additional housing is required, and given</p>

Respondent (with lpr ref)	Response	Council Response
		Thatcham's status as an 'Urban Area' in the development plan is it considered appropriate to consider Thatcham for housing.
Ben Tichband (lpr791)	<p>I am objecting to a building project which will fundamentally change Thatcham. Thatcham has already had significant housing develops in recent years but this is of a totally different scale.</p> <p>Part of the character of Thatcham is that is a very historic town with a semi-rural feel you are never far from the countryside. The town doesn't need to become a scrawling mess all the way along the A4 to Woolhampton.</p> <p>The town has inadequate transport links it already often takes 30 minutes to leave via the south and the A4 is unlikely to handle much more traffic. There is not adequate parking near the station for further commuters - the local residential roads are already full.</p> <p>With future changes to way people shop and work it is likely that the town centres will the plan period the town centres will become empty with new housing being built on greenfields because of cost. This will leave the area with "doughnut" towns.</p> <p>It is vital that green space is protected to support local wildlife. It is also vital that the corridors between towns are maintained to enable wildlife to move between areas. The council has already destroyed the gap between Newbury and Thatcham with development.</p> <p>Leave the site as greenfields, redevelop the excess level of commercial and retail property within the town centres to create the housing needed.</p>	<p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>An economic advantage of new development is that new residents can help support local shops and businesses and help to boost the vibrancy and vitality of town and local centres.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p>
Nataliya Topliss (lpr807)	The development of this scale will destroy Thatcham. Thatcham has been neglected for many years and this development will make lives of the existing residents of Thatcham much worse. The town simply will not be able to support an expansion of 2,500 new homes. The transport	Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a

Respondent (with lpr ref)	Response	Council Response
	<p>links are of full capacity with congestion on the A4. There is no plan for a rail bridge. Town has already had extensive developments without any investment into infrastructure. The proposed development is too big for a small town like Thatcham and will put excessive strain on town's poor infrastructure and services.</p> <p>West Berks Council's strategy of 2012 identified, that after a period of rapid housing growth, infrastructure in Thatcham had failed to keep pace and there should be a period for regeneration and new facilities. Since then, there has been no such regeneration so the Council's conclusions of 2012 must still stand.</p>	<p>period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is</p>

Blaire Palmer (lpr1463)	<p>I am writing to object strongly to the proposed development along Floral Way and beyond.</p> <p>Thatcham is a small town with very few amenities. Newbury is close for general shopping and leisure but Thatcham is now and should remain a small town, not a sprawling extension of Newbury. There is already very little distinction between leaving Newbury and entering Thatcham. New housing developments are all along the roads linking the two. The addition of 2,500 new homes would either overwhelm the amenities in Thatcham or require massive growth of our town, destroying its nature. Measuring the impact on traffic right now is pointless as most people are at home all the time. But imagine the traffic, the fumes while people wait, the noise once we add 2,500 new commuters to the area. You can build a bridge over the railway but that doesn't help. Every mini-roundabout will be a traffic jam trailing back for miles every morning and evening.</p> <p>In addition this is green farm land. I have no objection to developments on brownfield sites, of which there are many. But to build on farm land which provides a home for a wide range of wildlife, provides a beautiful landscape (why is this no longer a powerful consideration? It used to</p>	<p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there</p>

	<p>be. We used to ban building on green land to protect the nature of our British countryside. Suddenly that doesn't seem to matter) and which protects the surrounding areas from flooding makes absolutely no sense when we are facing a climate crisis. Have you watched the news? Have you seen the statistics? What makes the developers think that these don't apply to them? Every choice we make now has a direct impact on our sustainable future. It isn't enough to plant a few trees or try to offset the carbon footprint of a development. There needs to be a fundamental rethink about how we provide homes for people while protecting our planet.</p> <p>I see nothing in this proposal that demonstrates the urgency of the climate issue. The houses are not in any way eco-friendly. Construction of roads and destroying the delicate balance of natures by digging up farm land is exactly the sort of thing we need to stop doing. I actually find it unbelievable that such a bog-standard approach is being taken at this time. When people like me are separating our cardboard and bottles and paper and turning our heating down and walking instead of taking the car to try to make a dent in the problem and then developers come along and stick 2,500 homes on the land that is keeping us alive I feel furious. Do you not recognise that this is exactly the behaviour that has to change? Why is the problem always someone else's to solve? Each of us, developers included, have to think radically differently if we are going to have a future as a human race.</p> <p>I understand there are 2000 empty homes in Newbury already. Can we not find a more intelligent and responsible way to house people than build brand new homes?</p> <p>In addition, the world of work is changing. We have seen that many people can work from home and want to continue. This means that plenty of office space will not be required. This can also be turned in to housing. There is about to be a massive shift in the housing and commercial property market but this development is stuck in old thinking which says –“We are allowed to build, so let's build. We are</p>	<p>were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. The HELAA includes brownfield sites that the Council are aware of.</p> <p>The supporting text to policy SP12 (Approach to Housing delivery) of the emerging draft LPR identifies that several sources will ensure a continuous supply of land across the plan period. These include amongst others, existing planning</p>

Respondent (with lpr ref)	Response	Council Response
	<p>allowed to carve up this land so let's do it. We need more homes so let's just build new houses rather than looking at the stock we have, the brownfield land, the future needs of working people and try something new which doesn't condemn us to live on a dying planet".</p> <p>There have been proposals to build on this land before. They were rejected. Please reject this one. It flies in the face of any commitment to the environment or the quality of life of the people living here, and once you say yes there is no going back. You will have to watch the news and see how our planet is dying and know you took no responsibility and that you made things that bit worse.</p>	<p>commitments (unallocated sites with planning permission), many of which are brownfield sites.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>In relation to the Climate Change Emergency, The emerging draft LPR includes a policy that specifically covers climate change (policy SP5). This requires that all development should contribute to West Berkshire becoming and staying carbon neutral by 2030.</p> <p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs development to the most sustainable locations in the district.</li> <li>• Policy SP6 (Flood Risk) directs development to areas least at risk of flood risk.</li> <li>• Policy SP22 (Transport) requires that any development that generates a transport impact will be required, amongst other things, to have regard to West Berkshire's declared climate emergency and minimise the impact of all forms of travel on the environment.</li> <li>• Policy DC3 (Building Sustainable Homes and Businesses) looks at building sustainable homes and businesses,</li> </ul> <p>Any development site will have to comply with the aims and objectives of the plan.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that ‘in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy’ (paragraph 67 of the Core Strategy Inspector’s Report). As additional housing is required, and given Thatcham’s status as an ‘Urban Area’ in the development plan is it considered appropriate to consider Thatcham for housing.</p>
West Build Homes (lpr2140)	<p>West build broadly support the Council’s approach to the delivery of housing set out within Policy SP12, but have some reservations about specific matters which are set out below.</p> <p>Significant concern exists, however, about the Council’s over-reliance on two large strategic sites. The Council’s own experience, and that on</p>	<p>Though delivery on a particular site can never be guaranteed, the Council closely monitors the position, annually updating the Five Year Housing Land Supply. At present the Council is able to demonstrate a supply of 7.3 years for the period to 2026.</p> <p>The Council’s strategy is for a mix of sites: strategic sites such as Sandford Park and North East Thatcham, which can</p>

Respondent (with lpr ref)	Response	Council Response
	<p>a national level, is that strategic sites have lengthy lead-in times, and are inherently slow in delivery, and this should be reflected within the emerging plan review through the inclusion of criteria for sites not proposed for allocation to be considered, increasing the flexibility afforded to the Council and reducing the reliance upon strategic sites.</p> <p>Paragraph 6.10 of the draft emerging plan refers to paragraph 68 the National Planning Policy Framework (The Framework) and the weight that should be attributed to the benefits of using suitable sites within existing settlements for homes. What it fails to have any regard to, however, is the sub section <b>Paragraph 68(d)</b> which states that local planning authorities should:</p> <p><i>“work with developers to encourage the sub-division of large sites where this could help to speed up the delivery of homes.”</i></p> <p>West build contends that without reference to the part of the Framework, and the inclusion of such provisions within the proposed policies, the plan is flawed in its approach and does not fully meet the tests of soundness.</p> <p>Policies SP16 and SP17 should include be amended to include an expectation of the sub-division of large sites to allow small and medium enterprise developers to assist in delivering homes and infrastructure in a timely fashion.</p>	<p>delivering infrastructure, facilities and significant numbers of affordable homes and a larger number of medium and smaller sites, including brownfield sites within settlement boundaries. The strategy seeks to focus development in the more sustainable settlements of the District rather than distribute development more evenly. This approach continues that set out in the Core Strategy which went through all stages of consultation, examination and adoption by the Council.</p>
Fiona McPhearson Crowther (lpr2144)	<p>In relation to the proposed extensive expansion of North East Thatcham SP17, I would also like to raise an objection. Again this site is in part in the ANOB the road and public transport infrastructure of the whole area is not being suitably addressed. The likelihood is that significant additional traffic will use the villages of Upper Bucklebury, Chapel Row and Bradfield Southend to cut through to avoid the A4. Traffic speed through the villages is already a significant concern, only to be compounded by the inevitable increase in traffic. In addition, the level</p>	<p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>crossing at Thatcham is already incredibly busy and would not sustain that level of increased traffic.</p>	<p>AONB. The LCA will be published as part of the council’s evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a ‘masterplan’ / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is</p>

Respondent (with lpr ref)	Response	Council Response
		not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.
Louise Clarke (lpr819)	<p>The proposed development is predicated on a speculative increase in employment within the immediate area. This is unlikely and most residents will probably commute, increasing traffic on local roads. Increased traffic adds to pollution. The level crossing is a bottleneck and leads to increased air pollution as vehicles are idling and it is also damaging to local businesses.</p> <p>The proposed sites are all greenfield sites and these should not be developed because a) they provide habitat for native wildlife, b) access to countryside is important for the well-being of local residents, c) the separation between Thatcham, Midgham and Bucklebury Common will be eroded by development in these areas, d) increased runoff from the proposed development will add to the flooding risks for the rest of Thatcham and Midgham.</p> <p>The proposed 'country park' is no replacement for actual countryside. I have personally seen hares in the easternmost proposed site.</p> <p>These proposals seem to be developer led and don't address the needs of the current and future needs of residents. Being on the outskirts of Thatcham, they do nothing to address the need to revitalise the centre of Thatcham.</p> <p>Revitalisation of the centre of Thatcham should be preferred to any development on the outskirts.</p>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. Respondent (with lpr ref)	Response	Council Response
	<p>Every effort should be made to not build on greenfield sites but instead use brown field sites &amp; to explore the re generation of town centres which will continue to decay as shopping habits change.</p>	<p>(LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In regards to the development of brownfield sites, when determining which new sites to allocate the Council are only able to consider land that is submitted to them through the</p>

Respondent (with lpr ref)	Response	Council Response
		<p>HELAA. The HELAA includes brownfield sites that the Council are aware of.</p> <p>The supporting text to policy SP12 (Approach to Housing delivery) of the emerging draft LPR identifies that several sources will ensure a continuous supply of land across the plan period. These include amongst others, existing planning commitments (unallocated sites with planning permission), many of which are brownfield sites.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p>
Anoup Puri (lpr2146)	<p>I would like to strongly register my objection to the proposed full development of the above sites for the following reasons.</p> <ol style="list-style-type: none"> <li>1. It would effectively join Upper Bucklebury with Thatcham, which has all but happened at Cold Ash effectively removing the rural aspect of the area</li> <li>2. A previous application was rejected by the secretary of state in 2017 <a href="https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html">https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html</a>.</li> <li>3. 	<p>increase the traffic on the back route (rat runs) which are not designed for large traffic volumes.</p> <ol style="list-style-type: none"> <li>5. It will significantly increase the noise and light pollution to the Bucklebury Parishioners – there are no street lights in Upper Bucklebury.</li> <li>6. Schooling – this will obviously have an impact on local schools (and traffic).</li> <li>7. There will be an increase to the pollution in the area from the output of the 2500 houses as well as from all the extra cars.</li> <li>8. There will be an increase in the usage of The Common with a detrimental impact on the wildlife fauna and flora. There will be further increase in the people driving up to the common, parking the cars anywhere as seen recently during the pandemic.</li> <li>9. There will be a further increase in the dog walkers driving to the common parking anywhere and leaving behind the dog mess as well as bags containing dog mess. We have seen a high increase in the volume of this dog mess in the last year</li> <li>10. There is inadequate parking at the train station. The train barrier is already causing long delays in the traffic and an increase in the traffic generator will cause further disruption.</li> <li>11. Upper Bucklebury we'll no longer be seen to be a village but apart off the new development and Thatcham town</li> <li>12. There will be years off horrendous noise pollution generated by the new build work including the levelling off the slopes and the removal of the Earth before any build can start. There will be further noise pollution from all the trucks bringing the supplies for the building work, cement mixers is that an industrial scale et cetera.</li> </ol>	<p>that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that 'in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy' (paragraph 67 of the Core Strategy Inspector's Report). As additional housing is required, and given Thatcham's status as an 'Urban Area' in the development plan is it considered appropriate to consider Thatcham for housing.</p> <p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development,</p>

Respondent (with lpr ref)	Response	Council Response
		<p>including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development</p>

Respondent (with lpr ref)	Response	Council Response
		<p>proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In relation to the concerns on the potential impact on Bucklebury Common, the development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population).</p>

Patrick Grincell (lpr2035)	<p><b>Summary</b></p> <p>The LPR and the proposed Policy SP17 directly contradict with many of the key requirements set out in the NPPF. In particular, the LPR and Policy SP17 fail to meet the provisions set out in NPPF paragraphs 2, 8, 9, 15, 16, 25, 31, 32, 67, 73, 79, 97, 118, 119, 127, 170, 171, 172, 173, 176 and 179.</p> <p>The LPR itself is contradictory, with the provisions of Policy SP17 failing to meet many of the requirements of other draft policies. In particular Policy SP17 is at odds with the strategic aims and objectives of the LPR, together with Policies SP1, SP2, SP4, SP5, SP6, SP7, SP8, SP10 and SP11. As for SP12, we consider this needs to be revisited and a further assessment made of housing need and the sites available to meet this need over the plan period, focussing more on previously used land. Significantly, we do not consider there is a need to allocated</p>	<p>The West Berkshire Local Plan Review is an important part of the development plan. It identifies the development that is required to meet local needs until 2039. It sets out the strategy for distributing development within the district and the policies for protecting, conserving and enhancing the natural and built environment. It is important that the LPR is read as a whole. All LPR policies should be viewed together and not in isolation in the preparation and consideration of planning applications. Development proposals will be judged against all relevant policies. All Development Plan policies will be taken into account in determining planning applications, along with other material considerations in a proportionate manner.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide</p>

Respondent (with lpr ref)	Response	Council Response
	<p>greenfield land for the addition of 2500 new homes to the north east of Thatcham.</p> <p>In addition, the proposed Policy SP17 has fundamental failings that have not been considered at all by WBC and are ignored in the LPR. These include:</p> <ul style="list-style-type: none"> <li>• significant and adverse impact on the AONB and Bucklebury Common;</li> <li>• the loss of the existing landscape gap and the coalescence of Thatcham and Upper Bucklebury;</li> <li>• the unacceptable loss of the distinct community within the village of Upper Bucklebury;</li> <li>• the loss of important greenfield land that not only forms a buffer between settlements but a key agricultural and ecological resource that cannot be replaced once built on;</li> <li>• significant and adverse impact on biodiversity and the very sensitive local environment, ecology, protected species of flora and fauna, which has not been assessed;</li> <li>• concern about impact on flood capacity and risk;</li> <li>• traffic impact, with significant disruption and increased congestion on an inappropriate highway network; and</li> <li>• increased pollution from sources including traffic, lighting, noise, construction and the general increase that will come from such a significant development.</li> </ul> <p>We urge WBC to go back to the drawing board and rethink the approach for the LPR, deleting the poorly conceived proposals for the extension of Thatcham. It needs to engage with and listen to its community not simply throw out proposals that will have a devastating effect on the lives of local people. We are not anti-development and the reverse is true, but any development must be necessary, of a very high quality, be appropriate, proportionate and respect and enhance the quality of the existing environment and community. All of these are key</p>	<p>the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>requirements of the NPPF but what we have seen proposed in the LPR through SP17 significantly fails to meet these expectations.</p>	<p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver ‘a network of green infrastructure which will include a new community park linking Thatcham to the AONB.’</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham’s flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to</p>

		<p>local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p>
Karen Harris (lpr2017)	<p>I would like to strongly register my objection to the proposed full development of the above sites for the following reasons.</p> <ol style="list-style-type: none"> <li>1. The Vast majority of Upper Bucklebury residents are against this development, many have already registered their objections, however many are not aware of the application or consultation as no information has been sent out by WBC. WBC are in my opinion negligent in this process and the consultation period should be extended and all residents should be formally written to.</li> </ol>	<p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p> <p>There is no green belt within this area (or within the District) there will be open space maintained along the northern/north eastern part of the site.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is</p>

Respondent (with lpr ref)	Response	Council Response
	<p>2. It is cited in the Bucklebury vision and Bucklebury Plan to maintain a strong greenbelt between Thatcham and Upper Bucklebury. This document is approved and agreed with WBC and should be considered as supplementary planning consideration. It is not mentioned in the WBC documentation.</p> <p>3. It would effectively join Upper Bucklebury with Thatcham, which has all but happened at Cold Ash effectively removing the rural aspect of the area. This is actually stated in the WBC documentation (<a href="https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=0">https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=0</a>) page 22, stating <b>“particularly as development of both north east and north Thatcham would result in the loss of the separate identifies of Cold Ash and Bucklebury, and would harm the setting of the AONB settlement pattern”</b>.</p> <p>WBC are therefore suggesting that the Parish of Bucklebury should maintain its identity but the proximity of the development is in contradiction to WBC's own intentions.</p> <p>4. A previous application was rejected by the secretary of state in 2017 <a href="https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html">https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html</a>. Why are WBC now considering this site in light of the previous objection, what has changed and knowing this has been refused once why have massive funds been spent thus far?</p> <p>5. It is a massive over development of the Countryside in one area which consists of rolling hills and farmland. The reason stated is that 85% of West berks is AONB. WBC have previously built on AONB and AONB status can be changed with government approval, and as it allegedly the government driving this would they not be more open to changing some AONB status ?</p> <p>6. It will have a significant impact on traffic in the area and especially on the route into Thatcham and Newbury and</p>	<p>acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that ‘in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy’ (paragraph 67 of the Core Strategy Inspector’s Report). As additional housing is required, and given</p>

Respondent (with lpr ref)	Response	Council Response
	<p>towards the station which are already heavily congested at busy times and in the event of any minor traffic disruption.</p> <ol style="list-style-type: none"> <li>7. This will significantly impact the freight traffic using the industry site at Thatcham</li> <li>8. It will significantly increase the traffic on the back route (rat runs) which are not designed for large traffic volumes.</li> <li>9. Traffic and speeding in particular through Upper Bucklebury is of a major concern due to the primary school. With an increase in 10% this will only worsen the situation.</li> <li>10. It will completely surround the Crematorium at Thatcham which was, as I understand, placed there to be away from residential properties and has constraints placed on it.</li> <li>11. It is stated/assumed this will help the Upper Bucklebury Business – predominantly the Pub and Shop. The Pub is hardly likely to benefit as a) pub usage across the country is in decline b) the Pub at the bottom of Harts Hill cannot already sustain a business. One pub is hardly justification for a development this size. The shop is also likely to suffer as the plan indicate that shops will be included, so it is likely it would have a detrimental impact on the only shop in UB, creating more traffic.</li> <li>12. It is cited that there cannot be development on the Kennet flood plain, however there are multiple examples where this has already been done (most of Thatcham was originally a flood plain), this is extremely hilly land which is almost certainly as unsuitable to development as the flood plain.</li> <li>13. It will significantly increase the noise and light pollution to the Bucklebury Parishioners – there are no street lights in Upper Bucklebury.</li> <li>14. There is no evidence that this will enhance Thatcham town centre (or indeed Newbury). The development of the old Army Base by the Station didn't add any amenities and we have seen the slow decline of the town centre over the last 20 years despite the area growing.</li> </ol>	<p>Thatcham's status as an 'Urban Area' in the development plan is it considered appropriate to consider Thatcham for housing.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape</p>

Respondent (with lpr ref)	Response	Council Response
		<p>and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p>
Sharon Papierowski (lpr2149)	<p>I am writing to <b>OPPOSE</b> any further development in Thatcham. I have been a resident of the town for over 40 years, been schooled here and raised my family. As you can imagine I have seen a massive increase in new build homes over this time, but very little investment in any infrastructure – as admitted in your own report. My objections are as follows:-</p> <p><b><u>SEWAGE/WATER</u></b></p> <p>Thames Water are already struggling to cope with the current population in Thatcham, and have been served notice to clean up their act.</p> <p>Despite the recent flood alleviation works, the ground for the proposed development is currently saturated, the A4 outside the Crematorium is frequently flooded, as are other patches along this stretch of the road, all the way to Theale. The new houses currently being built in Woolhampton are testimony to this, as water ran through the buildings during construction and the road was covered in sludge.</p> <p>The construction of the flood alleviation works ran over time and budget, and were shoddily 'completely' to the point where the very residents who were to benefit from the works were fed-up, and formed a</p>	<p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In regards to concerns raised in relation to the loss of a recreational resource, within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB. This will be accessible to all.</p> <p>Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part</p>

Respondent (with lpr ref)	Response	Council Response
	<p>residents group. There is little appetite for further construction works in any form across the town.</p> <p><b><u>PUBLIC AMENITIES</u></b></p> <p>Our current leisure amenities are desperately underfunded, and building further ‘amenities’, in the new development offers nothing to existing residents.</p> <p>Our existing public right of way will be lost in the new development - we do not need ‘public green spaces for all to use’ - we have the countryside.</p> <p>At present our library, toilets, youth services and leisure centre are desperately underfunded and barely accessible. Community halls struggle for bookings.</p> <p><b><u>ESSENTIAL SERVICES</u></b></p> <p>I have on several occasions, called the police to report anti-social behaviour, and am told ‘there are no patrols in Thatcham tonight’. 2500 additional homes will exacerbate this.</p> <p>We have no A&amp;E department at our local hospital, no maternity unit and waiting times for routine doctors’ appointments is in some cases are 12 weeks, pre Covid.</p> <p>The report states a need for two primary schools, but there is no mention of a secondary school, yet 20-25% of Thatcham’s children currently travel to Newbury as there aren’t enough spaces. Schools struggle to recruit teachers, and we are about to close a primary school in Thatcham as no demand.</p>	<p>of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a ‘living document’ and will be updated regularly updated in consultation with infrastructure providers.</p> <p>The site alongside the larger site area, is well related to the existing town of Thatcham. It is in close proximity to a range of services and facilities, including the train station. Thatcham is an urban area with a wide range of services and opportunities for employment, community and education. Development of a strategic nature at this site would support the service provision and regeneration that Thatcham requires.</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p> <p>In regards to light pollution, policy DM4: Environmental nuisance and pollution has been strengthened to ensure that all reasonable steps are taken through design, siting and technological solutions to ensure the abatement of obtrusive light to avoid sky glow, glare and light spillage, intrusion and any adverse impact to wildlife. Applicants should adhere to the guidance on lighting provided in the most up to date Institute of Lighting Professionals (ILP) guidance notes, alongside other relevant local documents including the North Wessex Downs AONB ‘A Guide to Good External Lighting’ (2021).</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR also requires the submission of a lighting strategy.</p>

Respondent (with lpr ref)	Response	Council Response
	<p><b><u>ENVIRONMENT</u></b></p> <p>Thatcham already suffers with light pollution, the dawn chorus can be heard at 1am.</p> <p>The effect on rural communities are such that are Bucklebury, Woolhampton and Cold Ash boundaries will be non-existent.</p> <p>Thatcham Vision found residents in favour of Brown Field development.</p> <p>There is no commitment to net-zero carbon mentioned in the report.</p> <p>Please advise where can the environmental impact study be viewed?</p> <p><b><u>TRANSPORT</u></b></p> <p>Traffic is already congested at the Floral Way and Siege Cross Roundabouts– right down to the train station. The area is further congested with Francis Baily school run traffic and the new ‘Orcas’ which are an accident waiting to happen. HGV’s travel in these areas all day, every day, due to the distribution centres in Pipers Way – the addition of more housing will make this worse.</p> <p>Northfield Road, Park Lane and particularly Harts Hill Road will become rat-runs to avoid these roundabout.</p> <p>There is limited parking at the train station, and SSE staff have caused problems with residents as parking on housing estates. There is no provision for additional commuters.</p> <p><b><u>ECONOMY</u></b></p>	<p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In regards to the development of brownfield sites, when determining which new sites to allocate the Council are only able to consider land that is submitted to them through the HELAA. The HELAA includes brownfield sites that the Council are aware of.</p> <p>The supporting text to policy SP12 (Approach to Housing delivery) of the emerging draft LPR identifies that several sources will ensure a continuous supply of land across the plan period. These include amongst others, existing planning commitments (unallocated sites with planning permission), many of which are brownfield sites.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council’s housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>In relation to the Climate Change Emergency, The emerging draft LPR includes a policy that specifically covers climate change (policy SP5). This requires that all development should contribute to West Berkshire becoming and staying carbon neutral by 2030.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>It is beggars-belief that Newbury is described as being the ‘central hub’ for shopping, and will continue to be so. Whoever, wrote this clearly has no knowledge of the area at all. If you live in North or East Thatcham is it almost as quick to travel to Calcot, Reading or indeed Basingstoke – and the retail offerings (and parking) are far greater. To make Newbury a central hub, the housing has to be in Newbury.</p> <p>Thatcham has few high quality jobs, most residents are self-employed or commute. In recent years three major banks have pulled out of our High Street, and pubs are unsustainable. The Plough has closed, and The Mill House changes hands with alarming frequency. Both main supermarkets are overpriced, (compared with, for example, Tesco) – the development requires 40% affordable housing – people in affordable housing do not shop in Waitrose!</p> <p>This development does nothing more than create a dormitory town which does nothing to integrate with the existing town.</p> <p>Could you please provide details on how you proposed to run affordable housing schemes? The housing association properties in the area are poorly constructed – I have friends constantly on the phone to their housing association to rectify faults with windows and doors that don’t close properly etc. Panorama recently spoke out <a href="https://www.bbc.co.uk/programmes/m000pk2b">https://www.bbc.co.uk/programmes/m000pk2b</a></p> <p>I can’t envisage any developer providing 40% affordable housing, without cutting corners – it simply isn’t financially viable unless there is a sting in the tail, or they reduce the percentage required.</p> <p>Finally, and probably most importantly, I believe the Government algorithms for calculating the housing requirement are currently under scrutiny.</p>	<p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs development to the most sustainable locations in the district.</li> <li>• Policy SP6 (Flood Risk) directs development to areas least at risk of flood risk.</li> <li>• Policy SP22 (Transport) requires that any development that generates a transport impact will be required, amongst other things, to have regard to West Berkshire’s declared climate emergency and minimise the impact of all forms of travel on the environment.</li> <li>• Policy DC3 (Building Sustainable Homes and Businesses) looks at building sustainable homes and businesses,</li> </ul> <p>Any development site will have to comply with the aims and objectives of the plan.</p> <p>All Local Plan Review Evidence Base documents can be viewed <a href="#">here</a>.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential</p>

	<p><a href="https://www.google.co.uk/amp/s/www.bbc.co.uk/news/amp/uk-politics-55322993">https://www.google.co.uk/amp/s/www.bbc.co.uk/news/amp/uk-politics-55322993</a></p> <p>Please advise if your current consultation is in line with this, takes the Pandemic into account and the loss of our town centres?</p>	<p>delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>An economic advantage of new development is that new residents can help support local shops and businesses and help to boost the vibrancy and vitality of town and local centres.</p> <p>In relation to affordable housing, the relevant policies are set out in the Local Plan Review.</p>
Lesley Staves (lpr853)	<p>As a member of Newbury District Ornithological Club and a local bird and nature enthusiast, I wish to comment on the prospect of 2,500 new houses being built on land to the north-east of Thatcham.</p> <p>I feel that this huge development would have a devastating impact on the fragile ecosystems of the local area, particularly to the north towards Upper Bucklebury's woods and the heathland of the Common. These areas host ground-nesting birds such as Nightjar, Woodcock, Woodlark and Stonechat, and there are several occupied Barn Owl boxes placed around the site, the birds requiring extensive ground to hunt over. Heathland wildlife such as adders and slow-worms as well as rare plants are also found there. The northern boundary of the development site is far too close to the escarpment and the woods and</p>	<p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to</p>

Respondent (with lpr ref)	Response	Council Response
	<p>heathland will inevitably be affected by an increase in visitors and dogs which are a particular threat to ground-nesting birds. It is naïve to think that a proposed 'country park' in the development would keep dog-walking close to home.</p> <p>I also ask the question – why so many houses in one huge estate? Indeed, as a result of the Covid-19 pandemic, many companies are planning to continue with home-working for many of their staff, therefore leaving vacant office space that is bound to be converted into homes.</p> <p>The whole plan needs rethinking, giving existing local communities a better opportunity to consult and advise and more attention should be given to ecology and biodiversity throughout the development site, especially incorporating stipulations that wildlife corridors such as established hedges and mature trees must be maintained when developers start building. 2,500 houses in one area is totally excessive.</p>	<p>conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In relation to the plan being prepared prior to the coronavirus pandemic, the full impact of the COVID 19 pandemic will not be fully apparent for some time. The LPR is a long term strategy to 2039, during which time a review will be conducted every 5 years. The impact of changes in response to macro and local economic factors will be assessed through subsequent reviews, once such implications are realised.</p>
C and A Cramer and Inwood (lpr1640)	<p>To whom it may concern with regard to the development of Thatcham NE. The land beside the A4, up to cox's lane and woodland at Bucklebury. We strongly OBJECT TO THIS PLANNING</p> <p>Here are our objections to this atrocious plan</p> <ol style="list-style-type: none"> <li>1. Total over development of countryside, loss of green space</li> </ol>	<p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p>

Respondent (with lpr ref)	Response	Council Response
	<ol style="list-style-type: none"> <li>2. Mass building should not be able to cross from Thatcham to the countryside. It is an area of absolute peace, beauty &amp; tranquillity</li> <li>3. The development will be on the skyline</li> <li>4. The loss of wildlife &amp; habitat will be tragic. We have seen slow worm, badger, deer, hare, ground nesting birds, buzzard, owls, bullfinches, butterflies, wild flowers, kite and buzzard all in these very fields that are under threat of development..</li> <li>5. The impact of the village with increased footfall, litter, dog mess, noise and light pollution will be high &amp; totally unacceptable. It has already been bad enough due to increase footfall due to Covid. Long Grove has seen an increase in litter, abandoned bags of dog mess, noise &amp; stuff thrown in gardens. This would be the main route from the new development to the village, that's without the occupants of 2500 houses. Total unacceptable.</li> <li>6. The increased traffic on the A4, access and the never ending problem with the lack of bridge over the rail line in Thatcham will be a nightmare. The increase in traffic through the village with increased pollution, noise &amp; physical will be at a massive level, putting pedestrians at risk with speeding cars.</li> <li>7. This is prime agricultural land, it should not be turned into housing</li> <li>8. Flood risk. If you build all the houses, where is all the water going to go? Into the flood defences that may not be maintained.</li> </ol> <p>We therefore absolutely OBJECT to this.</p>	<p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site. With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the</p>

Linda Godfrey (lpr2153)	I strongly object to the proposal to build 2500 houses on farmland between Thatcham and Upper Bucklebury. I agree with the objection	The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is

Respondent (with lpr ref)	Response	Council Response
	<p>response from Bucklebury Parish Council. In summary I believe the plans will cause the following issues:</p> <ul style="list-style-type: none"> <li>• a merging' of Thatcham and rural Upper Bucklebury with very little gap between Thatcham and Upper Bucklebury.</li> <li>• Bucklebury is an Area of Outstanding Natural Beauty</li> <li>• detrimental to flora and fauna,</li> <li>• damage to ancient woodlands</li> <li>• will cause light pollution</li> <li>• loss of green space</li> <li>• huge impact on surrounding local villages</li> <li>• country lanes not built for existing levels of vehicles</li> <li>• traffic problems already an issue in Thatcham especially around level crossing, at school times and rush hours</li> <li>• already overstretched local services, lack of GPs, dentists, schools etc.</li> <li>• increased flooding potential</li> <li>• Infrastructure issues to surrounding villages, e.g. water supplies and water pressure</li> </ul>	<p>acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research</p>

Respondent (with lpr ref)	Response	Council Response
		<p>Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council’s website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In regards to ancient woodland, Policy DM14 makes clear development should buffer any ancient woodland it affects by providing sufficient space to afford surrounding protection and allow for future growth where possible. Development near ancient woodland will be treated in accordance with the latest ‘standing advice’ from Natural England and the Forestry Commission. This states that there should be a buffer of at least 15m from the boundary of ancient woodland to avoid root damage. The precise buffer would need to be determined by further assessment and detailed design at the planning application stage.</p> <p>In regards to light pollution, policy DM4: Environmental nuisance and pollution has been strengthened to ensure that all reasonable steps are taken through design, siting and technological solutions to ensure the abatement of obtrusive light to avoid sky glow, glare and light spillage, intrusion and any adverse impact to wildlife. Applicants should adhere to the guidance on lighting provided in the most up to date Institute of Lighting Professionals (ILP) guidance notes, alongside other relevant local documents including the North Wessex Downs AONB ‘A Guide to Good External Lighting’ (2021).</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The updated version of the proposed allocation policy in the next published version of the LPR also requires the submission of a lighting strategy.</p> <p>In regards to concerns raised in relation to the loss of a recreational resource, within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB. This will be accessible to all.</p> <p>The development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population). Highway works and active travel routes would assist in directing residents to using the A4/Floral Way rather than Harts Hill Road, and using an enhanced cycling and walking network to travel, including to Thatcham train station. Residents would make use of the newly provided education facilities on the site, which would not be expected to purposefully attract pupils from Bucklebury primary school.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead</p>

Respondent (with lpr ref)	Response	Council Response
		<p>without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>
David Howard (lpr2004)	Whilst developments have to happen, 2500 new homes on Thatcham is unreasonable given the huge developments in the area over the past 30 years with the infrastructure still trying to catch up. In the West Berks area, the Sandleford development should be finalised and approved before any other major development is even considered.	Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location

Respondent (with lpr ref)	Response	Council Response
		<p>to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p>
Ian Pratt (lpr1642)	<p>I wish to strongly object to the proposed NE Thatcham development for the following reasons:</p> <ol style="list-style-type: none"> <li>1. It destroys the strategic gap between Thatcham and Upper Bucklebury, which has always been a key part of WBC planning policy.</li> <li>2. It will have a major impact on the environment, particularly on Bucklebury Common and the adjacent AONB.</li> <li>3. There will be significant light pollution on Bucklebury Common.</li> <li>4. It is destroying high quality agricultural land, when there are brownfield sites within WBC that could be utilised.</li> <li>5. There is nothing in the plan that is going to address the increased traffic from the additional cars (potentially 5000 additional vehicles) from the development. The Thatcham NDR and A4 is very congested during the rush hour, and traffic that wants to go to the M4 or North on the A34 is not going to go along the A4 to Newbury, it will go up Harts Hill, along Burdens Heath to Cold Ash and then down to Hermitage to join at Chieveley. Equally, traffic that wants to go south to Basingstoke will get stuck trying to cross the railway line either at the Thatcham level crossing, or on the traffic light controlled bridge over the railway on Brimpton Road.</li> <li>6. Whilst the plan talks about new infrastructure for Thatcham, in reality it is 2 primary and 1 secondary school being built, which will be primarily used by residents of the new development. Even the proposed sports facility is not central to Thatcham and so is less likely to be used by</li> </ol>	<p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy</p>

Respondent (with lpr ref)	Response	Council Response
	<p>existing Thatcham residents.</p> <p>7. There is nothing to address the redevelopment of Thatcham town centre, particularly for food shopping. Not everyone is going to want to have their food delivered on-line, and so it will result in additional car journeys to Newbury town centre and the retail park.</p> <p>8. There is nothing to address the congestion at the level crossing, or the total lack of parking at Thatcham Station. The new development is too far from the station for people to walk there.</p> <p>9. No mention of any additional health services – the existing facilities at Chapel Row will be severely impacted, and no new health service facilities will be built until after the houses have been built.</p> <p>10. There will be a significantly increased risk of flooding in Thatcham and along the A4.</p>	<p>which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In regards to light pollution, policy DM4: Environmental nuisance and pollution has been strengthened to ensure that all reasonable steps are taken through design, siting and technological solutions to ensure the abatement of obtrusive light to avoid sky glow, glare and light spillage, intrusion and any adverse impact to wildlife. Applicants should adhere to the guidance on lighting provided in the most up to date Institute of Lighting Professionals (ILP) guidance notes, alongside other relevant local documents including the North Wessex Downs AONB 'A Guide to Good External Lighting' (2021).</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR also requires the submission of a lighting strategy.</p> <p>The development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population).</p> <p>Highway works and active travel routes would assist in directing residents to using the A4/Floral Way rather than Harts Hill Road, and using an enhanced cycling and walking network to travel, including to Thatcham train station</p> <p>Residents would make use of the newly provided education facilities on the site, which would not be expected to purposefully attract pupils from Bucklebury primary school.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as</p>

		infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.
Toby and Gail Woodhouse (lpr2018)	<p>Dear Sir/Madam</p> <p>We have attended two meetings held by members of the Bucklebury Parish Council and having reviewed the content of related planning documents we write in line with the public consultation to outline our objection to the development of 2,500 homes within the North Thatcham area.</p> <p>We outline our objections below.</p> <p>Environment (AONB SP1 &amp;SP 2) – the proposed development abuts Bucklebury Common and the North Wessex Downs AONB. Residents of the proposed new developments will be drawn to the Common and will significantly increase the pressures already evident on the delicate eco systems and existing wildlife.</p> <p>Parking on and around the Common is already exceeding capacity, with verges being used during peak periods. Whilst the development is relatively close, not all residents will walk/cycle to the Common they are more likely to drive. The open spaces on the proposed developments will not be big enough or as appealing as the Common land within the AONB.</p> <p>Wildlife (SP11) - the impact on local eco systems and wildlife will be significant. Whilst plans identify mitigating actions (open space) and reference sustainable development it is quite clear that this development of farmland and natural open habitat will destroy areas currently used and occupied by wildlife. The open spaces proposed in the development areas will not be enough either for the wildlife or the residents and the additional</p>	<p>In relation to the concerns on the potential impact on Bucklebury Common, the development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population). The development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population).</p> <p>Highway works and active travel routes would assist in directing residents to using the A4/Floral Way rather than Harts Hill Road, and using an enhanced cycling and walking network to travel, including to Thatcham train station.</p> <p>Residents would make use of the newly provided education facilities on the site, which would not be expected to purposefully attract pupils from Bucklebury primary school.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site</p>

Respondent (with lpr ref)	Response	Council Response
	<p>footfall, which is inevitable, will also impact wildlife on Bucklebury Common and the AONB.</p> <p>Traffic (SP17, SP22)            Thatcham is already a bottleneck for traffic flowing through the town on the A4 between Newbury and Reading. By introducing a new road network with the proposed traffic calming, traffic lights and roundabouts, the impact of on the flow of traffic will be significant.            All of the above will have a knock on detrimental effect on the local roads and quiet lanes in Bucklebury as the additional cars and residents try to avoid the traffic chaos in and around Thatcham and the associated A4 area. The local lanes and roads which are designed with layouts, size and speed limits to support only local traffic will be used as short cuts through to Reading, Newbury and the M4 to avoid the A4 congestion.            We note reference is made to the close proximity of the proposed developments to Thatcham Railway Station. The ability to get to the station at peak times is already near impossible by car. While we appreciate the plan places an emphasis on sustainable travel there is no requirement for residents to comply with this. Cycle ways and pedestrian routes may be included and built by the developers but in poor weather, the dark winter months and for convenience residents will turn to their cars and further impact on the already congested road network.</p> <p>Flood Risk (SP6)            Recent flood alleviation works to the North of Thatcham have been put in place to protect houses businesses and infrastructure in the areas most severely affected by the 2007 flooding event. The events will only increase. Whilst there are proposals included to manage the flow of surface water down into the valley (SUDS) they are not designed to support the heavy volume of water from such a large scale development scheme. In extreme weather events which it is recognised will only increase in frequency and intensity, SUDS will simply release</p>	<p>which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In regards to light pollution, policy DM4: Environmental nuisance and pollution has been strengthened to ensure that all reasonable steps are taken through design, siting and technological solutions to ensure the abatement of obtrusive light to avoid sky glow, glare and light spillage, intrusion and</p>

Respondent (with lpr ref)	Response	Council Response
	<p>their water into the existing flood management scheme adding pressure on it and increasing the risk of Thatcham flooding again.</p> <p><b>Pollution</b> Light – the development will generate significant levels of light pollution again impacting on wildlife and the eco systems adjacent which will drive these natural pleasures away from the area. Notwithstanding the effect for local residents on their night sky. Pollution- the volume of homes and associated transport requirements will generate increased pollution from carbon emissions as well as those associated with population density. The clean air experienced on the Common and the AONB currently will be a thing of the past.</p> <p><b>Rail</b> While Thatcham railway station is within a reasonable distance of the proposed sites there is no capacity for additional cars, railway or on-road parking. There is no reference to any consideration around improving the infrastructure networks around the railway station and without this the already creaking system will be overwhelmed and fail. The trains currently stopping at Thatcham are governed by the length of the platform. Larger capacity trains will require a further platform extension and will require the level crossing to be closed for longer periods.</p> <p><b>Medical</b> Medical services in Thatcham Bucklebury Cold Ash Chapel Row and Bradfield Southend are already under pressure, with some at capacity. New services are included in the proposed scheme (GP surgery) however there is no obligation for these services to be provided prior to completion of the housing. Indeed we believe these will wait until the demand reaches a specified level. In the intervening period new residents will expect to join existing surgeries and services already at capacity. We wonder how and when the NHS will be engaged on these</p>	<p>any adverse impact to wildlife. Applicants should adhere to the guidance on lighting provided in the most up to date Institute of Lighting Professionals (ILP) guidance notes, alongside other relevant local documents including the North Wessex Downs AONB ‘A Guide to Good External Lighting’ (2021).</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR also requires the submission of a lighting strategy.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council’s policy on pollution.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential</p>

		<p>contribute to West Berkshire becoming and staying carbon neutral by 2030.</p> <p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs development to the most sustainable locations in the district.</li> <li>• Policy SP6 (Flood Risk) directs development to areas least at risk of flood risk.</li> <li>• Policy SP22 (Transport) requires that any development that generates a transport impact will be required, amongst other things, to have regard to West Berkshire's declared climate emergency and minimise the impact of all forms of travel on the environment.</li> <li>• Policy DC3 (Building Sustainable Homes and Businesses) looks at building sustainable homes and businesses,</li> </ul> <p>Any development site will have to comply with the aims and objectives of the plan.</p>
Camilla Kingham (lpr2154)	<p>I am writing with regard to the above Local Plan Review 2020 -2037, with particular reference to the plan to build 2500 new houses on land between Upper Bucklebury and north Thatcham from Colthrop on the A4 to the east and through to the west north of Floral Way on Dunston Park - The Policy SP17 "North Thatcham Strategic Site Allocation".</p> <p>This plan appears ill thought out, and I cannot support these plans, for the following reasons:-</p>	<p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required,</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Thattham has grown substantially in size in the last 50 years, with little forethought to the infrastructure to support the number of households, and this proposed development will virtually join Thattham to Bucklebury.</p> <p>This would be of enormous detriment to the Parish of Bucklebury in particular the increased volume of traffic on predominantly single track rural roads, that already appear unable be maintained to a decent standard due to increased volume of traffic. Such a plan would make them increasingly more dangerous for pedestrians, cyclists and horse riders as many have no verges in places.</p> <p>It appears no thought has been given on the transportation flow chart to how vehicles wishing to access the A34 north would proceed, but it is clear to me that they would use Harts Hill Road, the Ridge and lower Pang roads as an access and return route. This is why I strongly believe this Local Plan Review 2020 -2037 is highly flawed and transportation issues need to be clearly reassessed.</p> <p>There would be an escalation in litter to the Parish countryside and the Pang Valley, including the River Pang from the increased vehicle and foot fall locally, together with the increase in dog poo bags left behind in rural spaces.</p> <p>It seems that this suggested plan does not sit well with WBC vision and strategy to protect the AONB, with such a development on its boundary. It will certainly downgrade the AONB!</p> <p>Light pollution will be another issue for the Parish of Bucklebury, which currently enjoys unpolluted skies at night.</p> <p>There is only one minor reference in your Local Plan Review 2020 - 2037 to Upper Bucklebury and none to the ancient settlement of Bucklebury village, therefore giving rise for concern that you have not</p>	<p>and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>Highway works and active travel routes would assist in directing residents to using the A4/Floral Way rather than Harts Hill Road, and using an enhanced cycling and walking network to travel, including to Thattham train station. Residents would make use of the newly provided education facilities on the site, which would not be expected to purposefully attract pupils from Bucklebury primary school.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better</p>

Respondent (with lpr ref)	Response	Council Response
	<p>considered the enormous impact this potential increase in houses and householders would have on Bucklebury Parish (and other neighbouring parishes).</p> <p>Currently there is an enormous amount of retail space becoming available in local towns; surely this space should be used wisely now for housing (in the light of the public tending to shop more on line). The impact of Covid 19 has made many councils up and down the country reconsider their town spaces for such purposes, and Newbury certainly has been impacted. Surely it makes sense to give change of use to Parkway sites that are now vacant. Not only would this benefit existing retail, communications and transportation, but the housing would be suitable for first time buyers, with the Kennet River and Victoria Park at close hand. It does seem a no brainer to use existing buildings in the first instance!</p> <p>Some specific points in your document:</p> <p><b>The number of houses required in the overall plan</b></p> <p>In the supporting text to Policy SP12, you explain the calculation basis from the NPPF that was defined and published in February 2019 (<a href="https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/810197/NPPF_Feb_2019_revised.pdf">https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/810197/NPPF_Feb_2019_revised.pdf</a>). However that calculation was established before the AWE REPPPIR and the new DEPZ was set on 22 May 2019 (<a href="https://info.westberks.gov.uk/awe">https://info.westberks.gov.uk/awe</a>). Thus the 'housing demand number' set by the Government formula was determined before the area available for new housing in West Berkshire was shrunk by the enlarged safety zones around Aldermaston and Burghfield.</p> <p>The area of West Berkshire outside of the AONB is approx. 182 km2. The areas of the two DEPZs within West Berkshire are approx. 21 km2 (for Aldermaston) and 33 km2 (for Burghfield) = 54 km2 in total (using</p>	<p>accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site</p>

Respondent (with lpr ref)	Response	Council Response
	<p>the smaller 'jagged edge DEPZ' rather than the larger OCZ 8km buffers).</p> <p>Thus, the enlargement of the DEPZs has reduced the available West Berkshire non-AONB area by <math>54/182\% = 30\%</math>.</p> <p>West Berkshire Council should make representations to Government to argue for a reduced number of houses as a result of the DEPZ regulations coming in after the original demand calculations were made. The new provision should be for 6188-6842 (a reduction of 2652-2932 houses). In Policy SP4, West Berkshire is following the ONR's recommendation against development of 200 dwellings or greater from the larger Outer zone. If the reduction in available area due to that larger zone was to be considered, the number of houses in WBC's new provision should be even smaller.</p> <p><b>The DEPZs</b></p> <p>Within the section "What has happened so far?" you refer to the previous consultations conducted in 2018 and February 2020. However, those were conducted before the Aldermaston and Burghfield DEPZ areas were extended, and thus the validity of those consultations is now questionable.</p> <p><b>Protection of the AONB</b></p> <p>Within your vision and strategy, you seek to protect the AONB (which I admire):</p> <p>"Our vision: West Berkshire's landscape in the North Wessex Downs will remain of outstanding value and its biodiversity more abundant in settlements and the surrounding countryside."</p>	<p>which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to the plan being prepared prior to the coronavirus pandemic, the full impact of the COVID 19 pandemic will not be fully apparent for some time. The LPR is a long term strategy to 2039, during which time a review will be conducted every 5 years. The impact of changes in response to macro and local economic factors will be assessed through subsequent reviews, once such implications are realised.</p> <p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government's standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>"Strategic Objectives: Together with partners, to continue to conserve and enhance the North Wessex Downs AONB, with appropriate landscape-led development delivering wider environmental, economic and social benefits."</p> <p>However, by planning for a new development of 2500 homes, up to the very boundary of the AONB, you introduce the high risk of doing the opposite of your vision and strategic objectives. The population of the extended Thatcham will overspill into the Bucklebury area of the AONB. It will increase the damaging 4x4 traffic on Bucklebury Common, put more cars into the narrow single track lanes that wind down from the Cold Ash - Upper Bucklebury ridge into the Pang Valley, send more people down to the recreation ground and playground in Bucklebury Village, add to the numbers of people who 'play' around Bucklebury Ford and who litter the River Pang.</p> <p>Within your section on development INSIDE the AONB (Policy SP2), you write:</p> <p>"If the proposal is considered to be major development, then the second part of the policy will apply and the following factors, as set out in the policy, will be taken into account:</p> <ul style="list-style-type: none"> <li>• Detrimental effects on the environment, including wildlife and cultural heritage..."</li> </ul> <p>Your Policy SP2 applies to development within the AONB. It should equally apply to development adjacent to the AONB, where the development's residents will overspill into the AONB. Whilst the houses can't move, the people will.</p> <p>Your plan for 2500 homes adjacent to the AONB will not protect the AONB.</p>	<p>available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p> <p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p> <p>As part of LPR, WBC Emergency Planning Team, the Office for Nuclear Regulation (ONR), and AWE have all been consulted. As part of any future planning application for NE Thatcham, the above consultees will be consulted because the site falls within the OCZ.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning</p>

Respondent (with lpr ref)	Response	Council Response
	<p><b>Previous Land Character Assessment (2002)</b></p> <p>In Policy SP8, you say that "Proposals for development should be accompanied by an appropriate landscape assessment". In the supporting text, you reference the "North Wessex Downs AONB Landscape Character Assessment (2002)". That assessment (<a href="https://info.westberks.gov.uk/CHttpHandler.ashx?id=40260&amp;p=0">https://info.westberks.gov.uk/CHttpHandler.ashx?id=40260&amp;p=0</a>) considered a development on the northern edge of Thatcham. That assessment concluded:</p> <p>"Conclusion and cumulative effect of all THA sites (THA011, THA014 and THA027) and the potential cumulative impact on Thatcham and Cold Ash. It is recommended that the above three sites should only be considered further as a whole, limiting development to the slopes below 95m AOD. If any one of the sites were to be developed in isolation this would result in an unacceptable level of expansion of Thatcham north of the well-defined settlement boundary along Bowling Green Road and Heath Lane. In the light of modern housing along the lower slopes of Cold Ash Hill, the low visibility of those parts of the sites close to the settlement and the more suburban character of these particular areas, the recommended reduced developable areas shown in THA0011.2, THA014.2 and THA027.2 could be justified in landscape and visual terms. However, it is particularly important to limit the northern expansion of this area in order to retain the separate identities of Cold Ash and Thatcham, to retain the open rural character of the open countryside between the two settlements and to prevent further intervisibility between the built forms of each settlement."</p> <p>Yet in your proposal to join north Thatcham to Upper Bucklebury, you made no such equivalent consideration. Your proposal has development up to 125m AOD. You make no equivalent comment that "However it is particularly important to limit the northern expansion of this area in order to retain the separate identities of Bucklebury and</p>	<p>proposals. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Thatcham, to retain the open rural character of the open countryside between the two settlements".</p> <p>I trust that West Berkshire Council will take the following steps:</p> <ol style="list-style-type: none"> <li>1. Seek a reduction from Government on the target number of homes to be built as a result of the enlargement of the DEPZs.</li> <li>2. Changes its plans so that there will be no new large development adjacent or almost adjacent to the AONB.</li> </ol>	
Andrew Kirke (lpr2007)	<p>Regarding the 2,500 houses being proposed to be built, I am mailing to make it clear to myself who is already living here as well as my wife and neighbours that the plan is not very well thought out.</p> <p>Clearly housing needs to be built, however where this proposal is will have a detrimental effect certainly on my part of Thatcham if not all the town.</p> <p>The current infrastructure as it is (schools, doctors, car parking etc) is not up to the task of taking this many homes and the associated occupants, and though there has been work going on since before we moved in to alleviate flooding issues that have hit Thatcham in the past it certainly not cured them as all the water currently sits at ground level and is not draining away.</p> <p>Do you think adding 2,500 properties in the proposed area will help this?</p> <p>There are already long queue's morning and evening at rush hour trying to cross the train station that certainly will not improve with more traffic.</p> <p>Loss of green space generally considered public space (for example Piggy Woods off of Flory Way) are to be demolished to make way for</p>	<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto</p>

Respondent (with lpr ref)	Response	Council Response
	<p>the plan. Surely we have learnt about the local environment and wildlife to know we are destroying it?</p> <p>Would a housing plan make more sense in Newbury than into this area.</p>	<p>wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p>

Respondent (with lpr ref)	Response	Council Response
Rachel Tott (lpr1643)	<p>I am writing to object to the plans that have been submitted to develop the greenfield area adjacent to Thatcham. I am a resident of Dunstan Park, Thatcham and I think the plans as they are set out are ridiculous.</p> <p>The proposal suggests that 2500 homes can be built and that this will somehow benefit the local community.</p> <p>* The homes are not (for most people) walking distance from Thatcham town centre (TTC) so for the businesses in TTC to benefit the people in this new development are going to have to drive.</p> <p>* There is no proposal to change the infrastructure that supports Thatcham. The A4 at peak times is severely congested. Prior to covid I spent every evening in a queue on the A4 that stretched back to Midgham on my return to work. It can be expected that 2500 new houses will result in 5000 new cars and as already highlighted the houses are not close to any amenities, so all of these cars will be heading out on the roads through and around Thatcham, which will cause mass congestion and significantly increase pollution.</p> <p>* West Berkshire wants to achieve a carbon neutral society. How can this be achieved with this proposal, which doesn't lend itself to being able to live without a vehicle. It is too far from the station and town centre for people to reasonably live without a vehicle.</p> <p>* It is also being built on multiple fields removing the green spaces that my family and I, and others in Thatcham currently enjoy.</p> <p>* This will also have an impact on nesting birds and many other species that live in the area.</p> <p>* I also see no consideration of school availability, no community centres for the area, no doctor's surgeries. The schools are doctors surgeries are already full, especially The Kennet school as many</p>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period.
