	<p>Thatcham residents already have to send their secondary age children to schools in Newbury as the Kennet is full.</p> <p>For all of the reasons mentioned above I am against this proposal.</p>	<p>In relation to the Climate Change Emergency, The emerging draft LPR includes a policy that specifically covers climate change (policy SP5). This requires that all development should contribute to West Berkshire becoming and staying carbon neutral by 2030.</p> <p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs development to the most sustainable locations in the district.</li> <li>• Policy SP6 (Flood Risk) directs development to areas least at risk of flood risk.</li> <li>• Policy SP22 (Transport) requires that any development that generates a transport impact will be required, amongst other things, to have regard to West Berkshire's declared climate emergency and minimise the impact of all forms of travel on the environment.</li> <li>• Policy DC3 (Building Sustainable Homes and Businesses) looks at building sustainable homes and businesses,</li> </ul> <p>Any development site will have to comply with the aims and objectives of the plan.</p> <p>In regards to concerns raised in relation to the loss of a recreational resource, within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB. This will be accessible to all.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and</p>

Respondent (with lpr ref)	Response	Council Response
		<p>Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p>
Melanie and Stewart Rickerby (lpr2008)	<p>The proposed new development is situated across the road from our property where the new flood defence has been complete.</p> <p>We are objecting-</p> <ol style="list-style-type: none"> <li>1. The flood defence was built to alleviate the problems experienced in the past. Any further development will increase the surface water which will have to be directed into streams and channels south of the flood basin. Any increase in the water flow will accelerate the erosion. We also understand that the flood defence and beyond is part of the water table.</li> <li>2. Floral Way to A4 and A4 to Pipers Way cannot cope with normal, pre covid traffic volumes at peak times. We have experienced on many occasions where the traffic is queued along Floral Way, past Foxglove Way from Harts Hill Road. Then repeated at the junction with the A4.</li> </ol>	<p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>This has a knock on effect and causes queuing in Foxglove Way.</p> <p>The roads on the boundary of the proposed development will not cope with increase in traffic that 2500 houses would bring.</p> <p>3. West Berkshire are not required to provide 2500 houses extra. There are empty properties and other small developments with in West Berkshire. Also there are empty commercial properties in the area which have been so for years.</p> <p>4. The infrastructure in Thatcham has been neglected and although there are promises in all new developments these never seem to happen. These include, schools, doctor's surgeries, and upgrade of water treatment.</p>	<p>2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government's standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p> <p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>
John Brims (lpr864)	<p>We strongly object to the proposal to build 2500 homes in NE Thatcham (THA20).</p> <p>It is clear that the inclusion of this site has only been made due to the removal of the Garden Town site at Grazeley. West Berkshire Council (WBC) has not provided satisfactory evidence for this removal.</p> <p>We believe the housing requirement for this plan period has now been confirmed at approximately 8.721 houses of which WBC has identified</p>	<p>The proposal for a garden town in Grazeley was located in the administrative areas of Wokingham Borough Council and West Berkshire Council with the majority of the site located in the former administrative area. Due to the legislative change which has caused emergency planning requirements around the Atomic Weapons Establishment at Burghfield to be extended, the area around Grazeley is now within this area. As a result, the Defence Nuclear Organisation, part of the Ministry of Defence, objected to the Grazeley garden town proposal within the Wokingham Local Plan and requested its removal and due</p>

Respondent (with lpr ref)	Response	Council Response
	<p>8,114 before the inclusion of THA20. It is very clear that the requirement can either be satisfied by other means or a much smaller development in Thatcham.</p> <p>The last local plan period to 2026 was meant to allow Thatcham to regenerate. We can see no evidence of this being achieved. Thatcham requires a comprehensive town plan to bring together the past developments and the future plans into one. This piecemeal approach only leads to a totally unsatisfactory conclusion that is to no-ones benefit.</p> <p>We have lived in West Berkshire for over 40 years and the road infrastructure to the East of Newbury has hardly changed in all that time and the volume of traffic has increased many fold.</p> <p>In July 2007 we saw the damage caused by the flooding to Thatcham. Many experts are saying that there is not enough detail within the plan to consider the effects of such a development in this area will have on the rest of Thatcham.</p> <p>We are Bucklebury parishioners and further object to the proposal due to the impact it will have on:</p> <p>1. The Strategic gap between Thatcham and Upper Bucklebury will be all but removed. Floral Way was meant to be the northern boundary for development in Thatcham and this should be maintained. The land in north Thatcham rises gently towards the ridge along Burdens Heath and Cold Ash towards the boundary of the AONB. This gradual change from the urban area of North Thatcham to the AONB must be maintained.</p>	<p>to the extension of the emergency planning requirements it was also not carried forward through the West Berkshire LPR.</p> <p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government's standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p> <p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes</p>

Respondent (with lpr ref)	Response	Council Response
	<p>2. The northern edge of this proposed development is within 600m of the AONB. This development will have a major adverse impact on the AONB and its setting.</p> <p>3. Traffic is already a major issue in Bucklebury Parish. The additional traffic from this development will have a significantly detrimental effect on the parish particularly along Burdens Heath, through Upper Bucklebury and Chapel Row. More widely it will have a damaging effect on Cold Ash and Bradfield. It will possibly bring more traffic onto narrow rural roads as road users will try to find alternative routes to avoid the blockages. More and more road users will take alternative routes to avoid the A4 at peak times as the traffic using it is well beyond its capacity.</p> <p>4. The impact this development would have on Bucklebury Common and its wildlife. We have seen very clearly over the last 12 months that people need to get out for their wellbeing. Bucklebury and its environs is a perfect location for people to be able to do this but it also needs protection. There is nothing in this local plan that addresses this issue, we know only too well that in the future we must protect the environment. This must be part of the plan.</p> <p>We believe this plan needs reappraisal in the light of new information, the current economic situation and how the pandemic may change the way we live in the future. These issues cannot be ignored, the last 12 months has been a game changer.</p> <p>We hope that WBC reconsiders its proposal with the considerable weight of public opposition to this proposal. We will continue to object to this proposal and fight for a more sensible approach to the protection of the strategic gap, the AONB and for a much more sensible approach to the future development of Thatcham.</p>	<p>The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to the concerns on the potential impact on Bucklebury Common, the development would involve a</p>

Respondent (with lpr ref)	Response	Council Response
		<p>significant amount of open space which would be expected to serve the new population (and benefit the existing population).</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p>
Adrian and Marilyn Elsey (lpr2009)	<p>I wish to register my objection to the proposed development of the above sites for the following reasons:</p> <ol style="list-style-type: none"> <li>1. We were made aware of this application/ consultation by my daughter in Bucklebury and have not received any information or correspondence from West Berks Council (WBC). We believe that the consultation period should be extended and ALL West Berks residents living in close to proximity to the A4 between Theale and Newbury should be formally written to, included and invited by WBC to comment.</li> <li>2. As elderly residents, we regularly use the West Berks Community Hospital which we access via the A4 and which we find is an extremely valuable asset to the local community. We feel that this development will put a huge increase in use of this facility resulting in longer waiting times and congestion in the car park.</li> </ol>	<p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>Highway works and active travel routes would assist in directing residents to using the A4/Floral Way rather than Harts Hill</p>

Respondent (with lpr ref)	Response	Council Response
	<p>3. We also regularly use the country lanes between Maidenhatch and Upper Bucklebury and fear that these will become even more of a 'rat run' than they are already</p>	<p>Road, and using an enhanced cycling and walking network to travel, including to Thatcham train station.</p>
<p>Mr and Mrs Brown (lpr1644)</p>	<p>This is a heartfelt rejection of the plan being discussed, I live at &lt;personal information removed&gt; and have been here since this site was built over 25 years + and if you have lived here since the beginning you would understand that this idea is NOT ludicrous, even trying to get off this close in the mornings is challenging, my garden backs on to Floral way and it is not pleasant sitting in the garden spring / summer because of the traffic noise abs speed of traffic travelling this road as lots of people use this road to escape the main road!</p> <p>I have lived in Thatcham for 35 years and when Dunstan park was built there was talk of a GP surgery, school etc nothing materialised.</p> <p>Currently 2/3 weeks for a Doctor or GP appointment, Thatcham Broadway a ghost town, Thatcham station no bridge! (sometimes waiting there for 20-30 mins )!</p> <p>There are things that need to be put in place before building NEW affordable homes!!!</p> <p>Losing the lovely fields to walk or to view would be a travesty and my family for one will not be staying if this build proceeds.</p>	<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>An economic advantage of new development is that new residents can help support local shops and businesses and help to boost the vibrancy and vitality of town and local centres.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected</p>

Respondent (with lpr ref)	Response	Council Response
		to deliver ‘a network of green infrastructure which will include a new community park linking Thatcham to the AONB.’
David Hughes (lpr2010)	<p>Thatcham cannot absorb that many houses, for people coming out of Siege Cross it will make it almost impossible to join the A4.</p> <p>If anywhere needs some more Houses it's Newbury, Thatcham has been completely over developed.</p> <p>There are nowhere near the facilities to support that amount of housing.</p> <p>The traffic and carbon footprint it will create will be massive.</p> <p>NO</p>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>Thatcham is an ‘Urban Area’ as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector’s report</p>

Respondent (with lpr ref)	Response	Council Response
		<p>for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p>
Sam Weedon (lpr2180)	<p>I would like to strongly register my OBJECTION to the proposed full development of the above sites for the following reasons.</p> <p>It is cited in the Bucklebury vision and Bucklebury Plan to maintain a strong greenbelt between Thatcham and Upper Bucklebury. This document is approved and agreed with WBC and should be considered as supplementary planning consideration. It is not mentioned in the WBC documentation.</p> <p>It would effectively join Upper Bucklebury with Thatcham, which has all but happened at Cold Ash effectively removing the rural aspect of the area. This is actually stated in the WBC documentation (<a href="https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=0">https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=0</a>) page 22, stating <b>“particularly as development of both north east and north Thatcham would result in the loss of the separate identifies of Cold Ash and Bucklebury, and would harm the setting of the AONB settlement pattern”</b>.</p> <p>A previous application was rejected by the Secretary of State in 2017 <a href="https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html">https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html</a>. Why</p>	<p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p> <p>There is no green belt within this area (or within the District) there will be open space maintained along the northern/north eastern part of the site.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>are WBC now considering this site in light of the previous objection, what has changed and knowing this has been refused once why have massive funds been spent thus far?</p> <p>It is a massive over development of the countryside in one area which consists of rolling hills and farmland. The reason stated is that 85% of West Berkshire is AONB. WBC has previously built on AONB and AONB status can be changed with government approval, and as it allegedly the government driving this would they not be more open to changing some AONB status ?</p> <p>It will have a significant impact on traffic in the area and especially on the route into Thatcham and Newbury and towards the station which are already heavily congested at busy times and in the event of any minor traffic disruption.</p> <p>This will significantly impact the freight traffic using the industry site at Thatcham</p> <p>It will significantly increase the traffic on the back route (rat runs) which are not designed for large traffic volumes.</p> <p>Traffic and speeding in particular through Upper Bucklebury is of a major concern due to the primary school. With an increase in 10% this will only worsen the situation. Traffic in Upper Bucklebury increases considerably each time there is disruption on the A4 and the development will significantly increase traffic, especially during the morning rush hour as pupils from the village walk to school.</p> <p>It is cited that there cannot be development on the Kennet flood plain, however there are multiple examples where this has already been done (most of Thatcham was originally a flood plain), this is extremely hilly land which is almost certainly as unsuitable to development as the flood</p>	<p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that 'in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy' (paragraph 67 of the Core Strategy Inspector's Report). As additional housing is required, and given Thatcham's status as an 'Urban Area' in the development plan is it considered appropriate to consider Thatcham for housing.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>plain. Why build on an area where flood alleviation has already been installed to protect Thatcham residents?</p> <p>It will significantly increase the noise and light pollution to the Bucklebury Parishioners – there are no street lights in Upper Bucklebury. There will also be decades of disruption through the construction phase.</p> <p>There is no evidence that this will enhance Thatcham town centre (or indeed Newbury). The development of the old Army Base by the Station didn't add any amenities and we have seen the slow decline of the town centre over the last 20 years despite the area growing.</p> <p>Schooling – this will obviously have an impact on local schools (and traffic). Current indications are that KS1 children volumes are decreasing yet the plan includes a proposal for 3 new schools. Will these be built before or after the houses? Build it before and it will poach children from local schools, such as Upper Bucklebury which will make that unsustainable (as is happening in Newbury with the new school on the college site). Build it after and the local schools will be overwhelmed beforehand. If the development is spread across the region there is a much greater chance of the load being spread out.</p>	<p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p>

Respondent (with lpr ref)	Response	Council Response
Mrs C Coles (lpr1645)	<p>I would like to submit my objections to the building of 2500 new homes in Thatcham North East development proposal.</p> <p>Although I appreciate more housing is required I feel this development goes against the Government Green Policies. We are requested to plant more trees, to use less fuel and minimise our carbon footprint. Surely there are some brown sites that can be utilised instead or taking green fields, potential food growing areas.</p> <p>This proposed development will generate at least two more cars per property on our already overcrowded roads. To access the railway station most likely cars will be used to get there and parking already is at a premium. The queues at the crossing gates are already heavy.</p> <p>There is obviously current pressures on the Thatcham doctor's surgeries as many Bucklebury residents who were registered at Thatcham were transferred to Bucklebury Chapel Row practice, now making it much more difficult to get appointments there. Hospital services at Newbury however good are minimal and Reading is a good distance away.</p> <p>Until comparatively recently Bucklebury suffered from cuts to water and electric supply. Are Thames Water and SSE able to supply sufficiently to keep proposed new development and Bucklebury adequately maintained bearing in mind gas is to be phased out?</p> <p>It has been proven in this pandemic that the countryside is vital to mental health. Why then deprive existing residents of Thatcham and Bucklebury this 'green lung' on their doorstep? Living in &lt;personal information removed&gt; I am aware how recently many more people</p>	<p>In regards to the development of brownfield sites, when determining which new sites to allocate the Council are only able to consider land that is submitted to them through the HELAA. The HELAA includes brownfield sites that the Council are aware of.</p> <p>The supporting text to policy SP12 (Approach to Housing delivery) of the emerging draft LPR identifies that several sources will ensure a continuous supply of land across the plan period. These include amongst others, existing planning commitments (unallocated sites with planning permission), many of which are brownfield sites.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to</p>

Respondent (with lpr ref)	Response	Council Response
	<p>access the land as a walk or cycle ride and proposed housing would cease to make it a therapeutic walk in the countryside.</p> <p>It is with these observations made that I object to the proposal to build.</p>	<p>local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In regards to concerns raised in relation to the loss of a recreational resource, within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB. This will be accessible to all.</p>
Toby Quirk (lpr2182)	<p>I would like to formally complain about the planning proposal in North-East Thatcham. The building of this site will have a large impact on pollution, traffic and flooding. In addition to this, the natural beauty of the surrounding areas will be lost. This will therefore have a negative effect on the overall functionality of Thatcham as a town as there will be an overload of people which the town cannot cater for. I strongly believe that this idea should be reconsidered and placed on a brownfield site where it has fewer environmental effects. The greenfield sites should</p>	<p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised</p>

Respondent (with lpr ref)	Response	Council Response
	<p>not have even been considered. I hope you take this into consideration, I believe I speak for the majority of the community.</p>	<p>following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>In regards to the development of brownfield sites, when determining which new sites to allocate the Council are only able to consider land that is submitted to them through the HELAA. The HELAA includes brownfield sites that the Council are aware of.</p> <p>The supporting text to policy SP12 (Approach to Housing delivery) of the emerging draft LPR identifies that several sources will ensure a continuous supply of land across the plan period. These include amongst others, existing planning commitments (unallocated sites with planning permission), many of which are brownfield sites.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>
Robert Lyle (lpr2183)	Our concerns on the proposed development on this scale concern volume of traffic and its impact on the environment, biodiversity, and local population. For example, these houses will generate considerable traffic with detrimental impact on the volume in the Parish. The A4 is already overloaded at peak times and new residents will look to find alternative routes, inevitably through the Parish, looking to access the	In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the

Respondent (with lpr ref)	Response	Council Response
	<p>A34 and the M4. The roads through these villages are poorly maintained, single carriageway and narrow, without pavements, unlit, and unsuited to additional traffic, many with blind bends and footpath entrances. Speeding is already a problem in the Parish and more cars will make a dangerous situation worse. The village roads are used by pedestrians, horses and cycles. Additional traffic makes accidents more likely and will endanger children walking to school. More traffic will be using the already problematic level crossing in Thatcham.</p> <p>Bucklebury Common, one of the few remaining areas of lowland heath lies just a kilometre or so to the north-east. It is well known for some special birds in particular the nightjar, but also the woodlark, tree pipit, stonechat and woodcock. These nest on the ground are very susceptible to disturbance especially by dogs, e.g. the disappearance of lapwing and little ringed plover at Greenham Common as nesting birds. The development would put much more pressure on the heath and make successful breeding of these species much less likely. This site is already subject to considerable recreational pressure. Heathland is a priority habitat identified in the Berkshire Local Nature Partnership Biodiversity Plan, and holds breeding populations of two of the priority species in the plan. In order to have a healthy environment, nature needs space to rest, feed and breed, all of which are threatened if no corridors of sanctuary are available.,</p> <p>As no doubt the council is aware, lowland heath is a threatened habitat important for a number of species of wildlife. Its global distribution is limited, with the UK having about 20% of the world's remaining area. About 80% of the UK's lowland heath has been lost since 1800.</p> <p>The Covid19 pandemic has transformed the way people work, travel and their housing needs which would have significant impact on these proposals but there is no mention of this in the proposals. Furthermore, taking WBC's own housing demand figures, these show a need for less than 1700 homes not the 2500 proposed. There are numerous brown</p>	<p>A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to the concerns on the potential impact on Bucklebury Common, the development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population).</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>field sites in and around Newbury which could be developed without the problems associated with the current proposal, including many empty office sites, which may be suitable for conversion. Has this idea been explored fully?</p> <p>Demand for doctor surgery services locally is high, and more houses will increase the strain on already oversubscribed provision.</p> <p>Since leaving the EU, home food production will need to be increased and priority given to agricultural development, as there is a finite supply of suitable land. In this area, certainly there are other sites suitable for housing, but not agriculture.</p> <p>In summary, I have serious concerns about this housing proposal, which seems to minimise the impact on West Berkshire, Thatcham and especially the village of Upper Bucklebury, which will suffer increased traffic, a steady flow of visitors, inevitable damage to the local environment, wildlife and nature, which currently benefit the whole community and wildlife in general and increase strain on local services. Written strategic objectives on nature are absent, and no obvious priority is attached to the natural environment, biodiversity or nature conservation, all of which will be lost to the local population</p> <p>In conclusion, the SP17 proposal is disproportionately big, poorly sited and would have detrimental impact on the surrounding population, infrastructure and environment. There are alternatives and these should be considered.</p>	<p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In relation to the plan being prepared prior to the coronavirus pandemic, the full impact of the COVID 19 pandemic will not be fully apparent for some time. The LPR is a long term strategy to 2039, during which time a review will be conducted every 5 years. The impact of changes in response to macro and local economic factors will be assessed through subsequent reviews, once such implications are realised.</p> <p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government's standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p> <p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>
Caroline and Steve Miller (lpr2293)	Having heard about the proposed development I wanted to express our deep concerns for these 2,500 houses. As residents of Midgham, we enjoy our peaceful, rural part of West Berkshire and these are among the reasons we moved here 8 years ago. We are astonished to hear of these proposals and can't quite believe anyone would want to ruin this beautiful countryside. We are regular walkers around the area proposed for development and therefore this will completely change our way of life - please do not allow this to go ahead!	<p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p>

Respondent (with lpr ref)	Response	Council Response
		The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'
Richard Spreadbury (lpr1646)	<p>I would like to object to the proposed development of 2500 new homes in Thatcham on the GREEN SPACE on the edge of Thatcham on Floral way Dunston Park area. Thatcham is already bursting at the seams regarding the schools, doctors and dentist. The railway crossing in particular couldn't take another massive development, there is too much traffic already for it to cope with. There is always queues with large tail backs which spread over huge distances, from the railway station to the roundabout on the main A4 road and on the other side of the railway to the Burys Bank road junction and further. There can be 3 or 4 trains to wait for &amp; then you faced with angry, impatient drivers skipping the queues where they can, taking chances so they are not waiting any longer than they already have, which will cause an accident.</p> <p>This proposed development is to be built on lovely green space, which there is hardly any left in Thatcham! We want the green space to escape, explore, exercise with are families and for our wellbeing and already its well-used to do this with the over populated residents of Thatcham. This is very noticeable during the lockdowns at the moment, having nowhere to go to avoid lots of people to do the simple pleasures of walking. This proposed planning site area must be homes to so much wildlife, which is so important to protect &amp; look after it. People have come much closer to nature and have enjoyed all the wildlife there is on offer around our areas in lockdowns, and we need to protect their habitats.</p>	<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Lesley Quirk (lpr1909)	<p>As a resident of &lt;personal information removed&gt; in Thatcham I would like to share my <b>objections</b> to the Thatcham North East Development proposal. Whilst I recognise the need for increased housing in West Berkshire and government targets, the chosen site for such a large project appears misguided. <b>I am strongly against the proposals</b> and believe that they should be reconsidered immediately.</p> <p>Thatcham already has a high flood risk, with alleviation systems being created. This risk would predictably increase due to the underground water systems in the proposed site area and the movement of ground, alongside the residential streets. The natural landscape, including the designated ANOB around the proposed site, would definitely be negatively affected by the project. Reduction of green space should always be resisted to maintain wellbeing, physical opportunities and natural ecosystems.</p> <p>Noise, light and air pollution would increase. Traffic congestion through Thatcham on the A4 and on the route to the train station is already high, particularly at peak times, and especially when there are difficulties on the M4. It is difficult to see how this could be catered for. Thatcham does not need this increased volume of traffic, more roundabouts, widened carriageways and daily disruption. There would be a negative impact on the quality of life of present Thatcham residents.</p> <p>It has previously been agreed that the land between Floral Way and Bucklebury provides a natural gap, creating a community feel for both communities. The elevation of the land suggests the possibility of three</p>	<p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. To that end,</p>

Respondent (with lpr ref)	Response	Council Response
	<p>I agree with the following words from another local resident:</p> <p><i>“I object on several Grounds as follows:-</i></p> <p><i>Environment</i></p> <ul style="list-style-type: none"> <li>• <i>The development would harm the environment surrounding Bucklebury</i></li> <li>• <i>The development would cause a dramatic reduction in the visual and physical separation of North Thatcham and Bucklebury Village, with the reduction and even the loss of a rural gateway to Bucklebury.</i></li> <li>• <i>The rural views from floral way, A 4 and other areas of North Thatcham which are , much valued by the resident, will be removed</i></li> <li>• <i>The development will be highly visually intrusive from many vantage points looking south</i></li> <li>• <i>The development will destroy area of tranquillity and agricultural land between North Thatcham and Bucklebury.</i></li> <li>• <i>I fear that the Bucklebury primary school will become surplus to requirements if they build a new primary school on this development and the Bucklebury primary school will close and be developed.</i></li> </ul> <p><i>Traffic</i></p>	<p>any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. The LCA will be published as part of the council's evidence base to inform the proposed allocation. The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site. With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• <i>There will be a huge increase in the traffic flow through our village especially at peak times</i></li> <li>• <i>There will be increased traffic flow on to Floral way, and will affect the access onto the A4</i></li> <li>• <i>There will be strain on the local infrastructure</i></li> <li>• <i>There will be an increase in traffic into the village and to Bucklebury primary school as many north Thatcham residents send their children to the school</i></li> </ul> <p><i>Flooding</i></p> <ul style="list-style-type: none"> <li>• <i>There is a proven flood risk to residents south of the application site despite the flood alleviation measure already installed.</i></li> </ul> <p><i>Sustainability</i></p> <ul style="list-style-type: none"> <li>• <i>Car dependency is likely to be very high at this location, and therefore this site fails on the sustainability criteria.</i></li> <li>• <i>There are very few employers close to the site leading to the obvious increase in car usage.</i></li> <li>• <i>Secondary Schools are not within walking distance.</i></li> <li>• <i>Walking distance to significant services too great.</i></li> <li>• <i>Public transport remains non-viable option due to limited timetable and frequency</i></li> </ul>	<p>were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham’s flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>Though delivery on a particular site can never be guaranteed, the Council closely monitors the position, annually updating the Five Year Housing Land Supply. At present the Council is able to demonstrate a supply of 7.3 years for the period to 2026.</p>

Respondent (with lpr ref)	Response	Council Response
	<p><i>Alternative sites within West Berkshire</i></p> <ul style="list-style-type: none"> <li>• <i>Over Development in one area is lazy planning policy and such places all the burden and the need for resources in one place and also they will become over stretched.</i></li> <li>• <i>I believe that there are other more suitable sites that are already available within West Berkshire, and this is just to name a few</i></li> </ul> <ul style="list-style-type: none"> <li>◦ <i>Land at the junction of Turnpike Road and Benham Hill next to the community hospital</i></li> <li>◦ <i>Land around Henwick Farm off Turnpike Road</i></li> <li>◦ <i>Land in Theale off the high street Hoad way and M4,</i></li> <li>◦ <i>Theale - Lakeside, The Green</i></li> <li>◦ <i>Tilehurst - Land off Pincents Lane formally the golf course</i></li> <li>◦ <i>Hambridge Road - form Gas Holdr site.”</i></li> </ul>	<p>The Council's strategy is for a mix of sites: strategic sites such as Sandford Park and North East Thatcham, which can delivering infrastructure, facilities and significant numbers of affordable homes and a larger number of medium and smaller sites, including brownfield sites within settlement boundaries. The strategy seeks to focus development in the more sustainable settlements of the District rather than distribute development more evenly. This approach continues that set out in the Core Strategy which went through all stages of consultation, examination and adoption by the Council.</p>
David Marsh (West Berkshire Green Party) (lpr1840)	<p>We believe the proposed large-scale development is contrary to SP5, SP8, SP10 and SP11. Thatcham lacks the infrastructure for the existing number of properties, never mind additional ones. We reiterate our view that the Colthrop industrial estate should become a mixed housing/employment district similar to the proposals for the LRIE in Newbury but with a higher weighting for affordable and social housing. If significant development is earmarked for Thatcham, it presents a once-in-lifetime opportunity to fund a much needed bridge to replace the rail crossing. It would be remarkably short-sighted if the council did not explore this avenue.</p>	<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>The Council's strategy is for a mix of sites: strategic sites such as Sandford Park and North East Thatcham, which can</p>

		<p>delivering infrastructure, facilities and significant numbers of affordable homes and a larger number of medium and smaller sites, including brownfield sites within settlement boundaries. The strategy seeks to focus development in the more sustainable settlements of the District rather than distribute development more evenly. This approach continues that set out in the Core Strategy which went through all stages of consultation, examination and adoption by the Council.</p>
Stephen Harris (lpr2026)	<p>I wish to strongly register my objection to the proposed development of 2500 houses along the A4 and Floral Way in Thatcham. My reasons for objecting are:</p> <ol style="list-style-type: none"> <li>1. The communication and consultation around the development is severely lacking, and no information has been sent to affected residents by West Berkshire Council. Some Upper Bucklebury residents have become aware through various means and the vast majority are against this development and many have already registered their objections. However there remains a significant number who are not aware and consequently should be furnished with full details of the proposal. WBC are in my opinion negligent in this process and the consultation period should be extended and all residents should be formally written to.</li> <li>2. It is cited in the Bucklebury vision and Bucklebury Plan to maintain a strong greenbelt between Thatcham and Upper Bucklebury. This document is approved and agreed with WBC and should be considered as supplementary planning consideration. It is not mentioned in the WBC documentation.</li> <li>3. The proposed development would effectively join Upper Bucklebury with Thatcham, which has all but happened at Cold Ash effectively removing the rural aspect of the area. This is actually stated in the WBC documentation (<a href="https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=">https://info.westberks.gov.uk/CHttpHandler.ashx?id=49836&amp;p=</a></li> </ol>	<p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p> <p>There is no green belt within this area (or within the District) there will be open space maintained along the northern/north eastern part of the site.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Q) page 22, stating “particularly as development of both north east and north Thatcham would result in the loss of the separate identifies of Cold Ash and Bucklebury, and would harm the setting of the AONB settlement pattern”. WBC are therefore suggesting that the Parish of Bucklebury should maintain its identity but the proximity of the development is in contradiction to WBC’s own intentions.</p> <p>4. A previous recent application was rejected by the secretary of state in 2017 <a href="https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html">https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html</a>. Why are WBC now considering this site in light of the previous objection, what has materially changed in this short period of time and knowing this has been refused once why have massive funds been spent thus far ?</p> <p>5. In the Newbury Weekly News the following statement is attributed to Hilary Cole. However, the statement flies in the face of what has actually happened, is factually incorrect and despite the indication of wishing to work with the community the statement infers that the decision has already been made.</p> <ul style="list-style-type: none"> <li>o The council’s executive member for housing, Hilary Cole (Con, Cold Ash and Chieveley), said: “We are very keen to work with the local community because it’s such a big proposal and development for Thatcham. “We have taken a conscious decision to do this around Thatcham so it will deliver the infrastructure we need. “We feel that Thatcham is best placed to take a development of this size.”</li> </ul> <p>6. The proposed development will have a significant impact on traffic in the area and especially on the routes into Thatcham, Newbury and towards the station which are already heavily congested at busy times and in the event of any minor traffic disruption. This will significantly impact the freight traffic using the industry site at Thatcham and inevitably significantly increase the traffic on alternate 'rat run' routes which are largely</p>	<p>enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that ‘in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy’ (paragraph 67 of the Core Strategy Inspector’s Report). As additional housing is required, and given Thatcham’s status as an ‘Urban Area’ in the development plan is it considered appropriate to consider Thatcham for housing.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council’s housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and</p>

Respondent (with lpr ref)	Response	Council Response
	<p>small rural roads and lanes and not designed for large traffic volumes. Traffic and speeding in particular through Upper Bucklebury is of a major concern due to the primary school. With an increase in 10% this will only worsen the situation.</p> <p>7. It is cited that there cannot be development on the Kennet flood plain, however there are multiple examples where this has already been done (most of Thatcham was originally a flood plain), this is extremely hilly land which is almost certainly as unsuitable to development as the flood plain.</p> <p>8. It will significantly increase the noise and light pollution to the Bucklebury Parishioners – there are no street lights in Upper Bucklebury.</p> <p>9. There is no evidence that this will enhance Thatcham town centre (or indeed Newbury). The development of the old Army Base by the Station didn't add any amenities and we have seen the slow decline of the town centre over the last 20 years despite the area growing.</p> <p>10. The suggested rationale for such a large development has become out-of-date due to changes in working and social habits and activities due to the COVID 19 pandemic. Many organisations are reviewing their long-term plans for remote workers, making it highly likely that travel patterns and housing requirements will be quite different in the future. Committing to such a large scale development now is highly risky and could prove extremely expensive for all concerned. At the very least it would make far more sense to revisit the plan once the long-term effects of the pandemic are known and understood, to ensure that any development meets actual requirements at that time</p>	<p>Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p>
Paula Saunderson (lpr965)	<p>Strongly object on Environmental issues</p> <p>Increasing Flood Risk to other nearby areas</p>	<p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and</p>

Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>Policy SP1 Spatial Strategy sets out the density requirements for particular areas.</p>
David Southgate (lpr2027)	<p>We have been a resident of Upper Bucklebury, and have lived in the village with our family for 32 years. We are writing to voice our objections to the proposed NE Thatcham development (Policy SP17). We wish to strongly object on the grounds of:</p> <p>a. Breaching of the Floral Way settlement boundary Extending Thatcham to the north-east will continue to destroy the rural areas so highly prized by West Berkshire in all its planning material. Detractors' (to the distinctly rural environment of the area) are described - each one of these will be made worse by this development. It is written</p>	<p>As part of the preparation of the LPR the council has undertaken a Settlement Boundary Review (SBR).The settlement boundary criteria make clear that boundaries will include sites allocated through the Local Plan process. North East Thatcham is proposed for allocation under policy SP17. Should the site, or any part of it, be removed from the LPR the boundary for Thatcham would be adjusted to exclude it. It is acknowledged that the settlement boundary is currently drawn around the whole of the proposed allocated site at North East</p>

Respondent (with lpr ref)	Response	Council Response
	<p>in the Bucklebury Vision that a green belt should be maintained between Upper Bucklebury and Thatcham.</p> <p>b. Traffic congestion around NE Thatcham Thatcham’s traffic issues are well-understood by any local resident, often leaving cars sitting in traffic queues along the A4 or at the level crossing for considerable lengths of time, hardly helping the council’s carbon net-zero and healthy air ambitions. The rail crossing is already a disaster and the lack of a bridge in the proposal will further congest the town’s roads. Rail parking and volume provision is inadequate.</p> <p>c. Impact on AONB through loss of separation from urban settlements</p> <p>As mentioned in (a), above, breaching the settlement boundary will have huge impacts on the AONB, both in terms of the rural character, and materially on the quality of life in those settlements adjoining THA20. Aside from the ‘loss of greenfield land’ the plan states the ‘site is of such a scale that it would provide new services and facilities that would be available to surrounding settlements like Cold Ash and Bucklebury’, which clearly indicates the impact it will have, just from the point of view of facilities, potentially threatening the local shop, the local school etc., but also in terms of bringing Thatcham closer.</p> <p>d. Increase in traffic (pedestrian / cycle / automotive) The change will potentially add 60% more traffic to local lanes (which have no pavements), and eroding still further the fragile commercial, cultural and environmental nature of the settlements within the AONB. The proposal is designed around car use as so will as a result significantly add to traffic. Increased construction and through traffic has made the roads extremely dangerous to walkers, cyclists and horse riders with no regard by drivers for these other road users. Any more houses would worsen the problem.</p> <p>e. Phasing We are deeply concerned on the impact of the phasing of the development on schools, medical provision, work, leisure and retail facilities in Thatcham. Existing capabilities are full or inadequate and any development is likely to break current capacity before provision of</p>	<p>Thatcham whilst Policy SP17 notes that development will be expected to deliver ‘a network of green infrastructure which will include a new community park linking Thatcham to the AONB.’ The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. At this stage it is therefore not possible to draw the settlement boundary any tighter. As the LPR progress and more detailed work is done on the sensitivity and capacity of different parts of the site to accommodate development the boundary will be amended accordingly.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). Respondent (with lpr ref)	Response	Council Response
	<p>new facilities is made.</p> <p>f. Failure to acknowledge housing needs based on household type. Given the housing mix suggested by the forecast data, the proposal seems completely out of touch with the reality of local needs. In light of the changing nature of town centres, as retail moves on online, and an ageing population needing access to public transport, does it not make much more sense to repurpose unused commercial property for residential use, and in doing so change the declining nature of the high street, provide easier access to local facilities (especially for the ageing population) and reduce dependency on short car journeys clogging our streets and adding to the community’s carbon footprint? It also does not reflect the growing need for single occupant dwellings.</p> <p>g. Destruction of ancient forest land, fragile ecosystems both through direct and adjacent loss of habitat, threatening biodiversity and general ecological well-being</p> <p>h. Lack of meaningful and timely democratic engagement in the review process, and lack of thorough analysis of key elements of the proposal. Our final point is that there has been a significant lack of community engagement to date in the review process.</p> <p>To re-emphasise we strongly object to the proposed development and urge WBC to reconsider their proposals.</p>	<p>by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. Respondent (with lpr ref)	Response	Council Response
		<p>Concern regarding infrastructure provision and phasing are noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In relation to the plan being prepared prior to the coronavirus pandemic, the full impact of the COVID 19 pandemic will not be fully apparent for some time. The LPR is a long term strategy to 2039, during which time a review will be conducted every 5 years. The impact of changes in response to macro and local economic factors will be assessed through subsequent reviews, once such implications are realised.</p> <p>In regards to ancient woodland, Policy DM14 makes clear development should buffer any ancient woodland it affects by providing sufficient space to afford surrounding protection and allow for future growth where possible. Development near ancient woodland will be treated in accordance with the latest 'standing advice' from Natural England and the Forestry Commission. This states that there should be a buffer of at least 15m from the boundary of ancient woodland to avoid root damage. The precise buffer would need to be determined by further assessment and detailed design at the planning application stage.</p> <p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p>

Respondent (with lpr ref)	Response	Council Response
Amanda Pope (lpr1960)	<p>I wish to register our objections and concerns to the proposed development. Building or developing land right up to the wooded areas bordering Upper Bucklebury is extremely detrimental for the vast array of natural habitats and wildlife species that co-exist in the last stronghold of green belt bordering Bucklebury Parish.</p> <p>Thatcham has in recent years soaked up a huge amount of additional mass housing, and there must be other sites in West Berkshire that are currently brown field sites where this could be an alternative.</p>	<p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>The site is not within the Green Belt (there is no Green Belt in this District).</p> <p>In regards to the development of brownfield sites, when determining which new sites to allocate the Council are only able to consider land that is submitted to them through the HELAA. The HELAA includes brownfield sites that the Council are aware of.</p> <p>The supporting text to policy SP12 (Approach to Housing delivery) of the emerging draft LPR identifies that several sources will ensure a continuous supply of land across the plan period. These include amongst others, existing planning commitments (unallocated sites with planning permission), many of which are brownfield sites.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p>

Respondent (with lpr ref)	Response	Council Response
<p>Susan Scotland (lpr1911)</p>	<p>I first moved to Thatcham 35 years ago. I have seen this town grow and grow with no extra doctor's schools or general hospital. Traffic levels increase what about pollution. Thatcham doesn't need or can cope with more housing. Refurbish old properties to create homes. Save our green spaces</p>	<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p>
<p>Pete Murray (lpr1912)</p>	<p>I wish to register my objection to the planning 2500 house development in Thatcham known as THA20</p> <p>The main reason is that the project is ill thought through, has had little consultation with the local public to cover the impacts to traffic, safety, public infrastructure, health and wellbeing as well as little consultation with the surrounding parishes. The impact will be far reaching, not just to create a sprawling town in Thatcham but will also impact separation with Bucklebury, impact heavily Cold Ash traffic flows and resources as well as countless other important factors. I could go on and will happily present a detailed case and reply if needed.</p> <p>Please accept this as a formal objection.</p>	<p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham’s flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In regards to water supply, the developers are aware of the requirement for upgrades to the water supply network and water treatment works (which is identified in the Water Cycle Study).</p> <p>Should the development go ahead, it would be phased appropriately to ensure it does not outpace delivery of essential network and treatment upgrades (See IDP).</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an integrated water supply and drainage strategy which will consider existing related infrastructure on the site.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has</p>

Respondent (with lpr ref)	Response	Council Response
		<p>undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p>
Simon Quirk (lpr1913)	<p>As a resident of &lt;personal information removed&gt; in Thatcham I would like to share my <b>objections</b> to the Thatcham North East Development proposal. <b>I am strongly against the proposals</b> and believe that they should be reconsidered immediately. Despite the potential need for more housing, the chosen site for such a large project appears misguided.</p> <p>It has previously been agreed that the land between Floral Way and Bucklebury provides a natural gap, creating a community feel for both communities. The elevation of the land suggests the possibility of three residential areas that would loom over the rest of Thatcham, becoming an eye sore rather than part of a connected town. The sheer size of the proposal would undermine the present town. Thatcham already has a</p>	<p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. Respondent (with lpr ref)	Response	Council Response
	<p>high percentage of residential use and needs a different focus to improve its infrastructure, such as developing the high street and sports facilities. Surely there must be other possible sites in West Berkshire that would not create the same negative impact.</p> <p>With alleviation systems being created, Thatcham still has a high flood risk. This risk would predictably increase due to the underground water systems in the proposed site area and the movement of ground, alongside the residential streets. The natural landscape, including the designated ANOB around the proposed site, would definitely be negatively affected by the project. Reduction of green space should always be resisted to maintain wellbeing, physical opportunities and natural ecosystems.</p> <p>Noise, light and air pollution would increase. Traffic congestion through Thatcham on the A4 and on the route to the train station is already high, particularly at peak times, and especially when there are difficulties on the M4. It is difficult to see how this could be catered for. Thatcham does not need this increased volume of traffic, more roundabouts, widened carriageways and daily disruption. There would be a negative impact on the quality of life of present Thatcham residents.</p> <p>As a result of this, I am <b>opposed</b> to the proposals and I urge you to rethink.</p>	<p>February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p>
Patrick Bowing (lpr989)	<p>Dear Sirs,</p> <p>I am all for much needed housing development, but this one is just too large and ill-thought out. There is simply not the infrastructure to support it, whether schools, doctors, hospitals, roads, town centre and station parking, pubs and sport and leisure facilities. This development will increase the present 28,000 population of Thatcham by 25-30% (8-10,000 people), whilst bringing approximately 5,000 more cars on to the A4, Thatcham's congested roads and country roads, particularly at peak</p>	<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>times, causing yet more traffic. Significantly, the A4 cycle lanes (cycling mentioned profusely in the draft) already looks to be a dismal failure.</p> <p>WBC should provide as a minimum the basic infrastructure first and only then put forward such a development proposal - not the cart before the horse! I have read the Q&amp;A section and was not re-assured by the answers given, particularly with regard to the Thatcham level crossing. If WBC does not prioritising the building of a bridge then the development should not go ahead. As it exists now, long queues encourage traffic delays and in consequence rat runs through narrow country lanes and villages, which cannot cope with more traffic.</p> <p>Then there is the West Berkshire Crematorium. The crematorium was built in 2006 to provide 'a quiet and rural setting' in the countryside, not 15 years later to be engulfed in the middle of a housing development. People's entrusted ashes have been interred/scattered within this peaceful 'rural' crematorium grounds and many living might consider it as a major betrayal or even sacrilege to build in any close proximity. The full planning permission on which the crematorium was granted might provide some insight?</p> <p>Besides this, no mention of the health risk of the crematorium is made. According to some statistics one cremation can emit as much carbon into the air (besides other serious toxins) as 3,500 passing cars! Does West Berkshire Crematorium use deNOx technology and what are its carbon emissions? Would any informed family buy a home and bring up their children in close proximity or down wind of a crematorium? I think not. No information is given in the draft.</p> <p>Nevertheless, I would support some smaller development subject to acceptable existing infrastructure in the Dunston Park area and down to siege Cross Farm, but no further along the A4 corridor.</p>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual</p>

Respondent (with lpr ref)	Response	Council Response
	<p>If such a development went ahead it would also totally destroy the present spectacular rural views from Greenham Common across the Kennet Valley.</p>	<p>components of the site in relation to individual planning proposals. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. Samantha Allen (lpr2012)	<p>I would like to formally register my objection to the proposed development of 2500 houses at NE Thatcham for the following reasons:</p> <ol style="list-style-type: none"> <li>1. It will dramatically reduce the greenbelt between Thatcham and Upper Bucklebury.</li> <li>2. The rural nature of this area would be completely lost with Upper Bucklebury becoming part of Thatcham.</li> <li>3. It would be a massive over development of our beautiful countryside in an area which consists of rolling hills and farmland. If developments of this scale are approved there will not be any open rural areas left for future generations to enjoy.</li> <li>4. The proposed land is not particularly suitable for development as it is very hilly land and has had issues as a flood plain area.</li> <li>5. The view that Thatcham is best placed to take a development of this size in this location is misplaced, un-proven and ill-conceived.</li> <li>6. This development will have a significant impact on traffic levels and the associated pollution throughout the area, especially increasing:</li> <li>7.</li> </ol>	<p>The site is not within the Green Belt (there is no Green Belt in this District).</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location</p>

Respondent (with lpr ref)	Response	Council Response
	<ol style="list-style-type: none"> <li>1. Traffic and speeding through Upper Bucklebury, which is already a significant and serious concern, especially as we have children who walk along this road to the Primary School.</li> <li>2. Traffic from Thatcham through Upper Bucklebury to Chapel Row on roads which are not designed for large traffic volumes.</li> <li>3. Traffic on the route into Thatcham and Newbury. These roads approaching the station are already heavily congested at busy times and in the event of any minor traffic disruption.</li> </ol> <ol style="list-style-type: none"> <li>1. It will significantly increase the noise and light pollution to the Bucklebury residents. There are no street lights in Upper Bucklebury.</li> <li>2. There is no evidence that this development will enhance Thatcham town centre (or the area in general).</li> <li>3. It is not likely to attract new businesses to the area or create or significantly increase employment.</li> <li>4. The local shop and pub are unlikely to benefit. The local shop is under significant threat as the new development includes retail.</li> <li>5. This level additional of housing will inevitably have an adverse impact on local facilities, schooling, medical and welfare services which are already overstretched.</li> <li>6. It will be another area of the environment that is destroyed with an immediate detrimental impact on protected wildlife and the destruction of natural vegetation.</li> </ol> <p>To conclude this development is unnecessary, inappropriate and ill-conceived and should be rejected.</p> <p><b>Observations</b></p>	<p>to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. 	<ol style="list-style-type: none"> <li>1. Awareness of this development/application/consultation was provided by the local community and not WBC. Furthermore, it is not clear at what stage this application has now reached.</li> <li>2. Why is WBC not writing to all residents to make them aware of this development and encourage/seek comments on the proposal from as wider audience as possible?</li> <li>3. Taking into consideration the scale of this development there has been a distinct absence of communication which is extremely disappointing.</li> <li>4. As a local resident I find the comment by Councillor Hilary Cole reported in the Newbury Weekly News that <i>“We are very keen to work with the local community...”</i> a pleasant surprise and I would be interested to know when it is going to commence.</li> <li>5. Up to now I was under the impression that WBC was committed to keep a substantial greenbelt between Thatcham and Upper Bucklebury. The consideration of this approval now certainly seems to totally contradict this stated commitment.</li> <li>6. Finally, why is WBC are now considering this development when a previous application was rejected by the secretary of state in 2017?</li> </ol>	<p>by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council’s policy on pollution.</p> <p>An economic advantage of new development is that new residents can help support local shops and businesses and help to boost the vibrancy and vitality of town and local centres.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a ‘living document’ and will be updated regularly updated in consultation with infrastructure providers.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In relation to consultation publicity, the consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open</p>

Respondent (with lpr ref)	Response	Council Response
		<p>space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that ‘in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy’ (paragraph 67 of the Core Strategy Inspector’s Report). As additional housing is required, and given Thatcham’s status as an ‘Urban Area’ in the development plan is it considered appropriate to consider Thatcham for housing.</p>
Kennet Secondary School (Mrs G Piper) (lpr2132)	<p>The Kennet School Academies Trust (KSAT) is the largest provider of educational services to the community of Thatcham and its surrounding villages. The Trust is exclusively focused on its key strategic objective of ensuring all young people in the area have access to the best possible education, throughout their school years, in order to have the greatest chance of achieving their full potential.</p> <p>The Trust is neutral on whether the proposed development should proceed. However, in reviewing the consultation document it is clear that significant attention needs to be paid to the local infrastructure required to support such a development, including the provision of educational services. The potential scale of the project clearly requires a holistic strategic view on how to deliver these services; not only in providing the long-term physical capacity required to support the growth in school-age population, but also in planning to meet the incremental demand as the earlier phases of any such development take place. It will also be important to recognise and protect the key role that schools play as hubs within the community, providing central locations for activities outside the school day. Above all else, any plans in this area must ensure that the delivery of education to the existing community is not disrupted.</p>	<p>In regards to comments raised in relation to the impact on schools, the site provides an opportunity to provide a 2.5 FE new primary school and for secondary provision, land to meet the impact of the development. Additional school provision is included in the IDP.</p>

Respondent (with lpr ref)	Response	Council Response
Rev. Julian Gadsby (lpr1000)	<p>Although I am very conscious of the need for more housing in the West Berkshire area, I do not believe that this current scheme is appropriate for the following reasons.</p> <p>1. Infrastructure. The plan to build 2,500 new homes on the edge of Thatcham will put enormous strain on local roads and surrounding villages. The proposal assumes that road users from the new development will largely use the A4 to get to the M4 and other surrounding larger roads. However, our experience has been that the A4 is already tremendously busy at peak times, and many commuters find alternative routes through the villages - in particular Upper Bucklebury. For example, the road from Upper Bucklebury to Cold Ash is not paved, and this will increase the danger for children and parents walking to school.</p> <p>The roads in the area are not well-maintained, as they are not main roads, and will be further damaged. However, plans to maintain and improve the infrastructure around these villages does not appear to be included in these proposals.</p> <p>The assumption, too, is that road users will use the route through the Thatcham Station crossing. However, long delays are not uncommon now, and will only get worse with increased usage. The proposal does not include a plan to build a road bridge over the railway line, which is a significant omission.</p> <p>2. As a local minister, I am surprised that little thought appears to have been put into the potential impact on the Crematorium and the need for grave spaces. May I ask whether this will in fact be considered? There is a need for communities such as this, if it were to go ahead, to have access to local churches and I would hope that this would feature in the space offered for needed facilities in the community.</p>	<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>3. What is being proposed is, effectively, a new town. However it will largely depend on the existing facilities (bar the schools) and amenities, which will be severely stretched. The plan must, I believe, include an improved Thatcham</p> <p>I would prefer to see the development spread more evenly across West Berkshire rather than concentrated in one area.</p> <p>If the proposal is passed I would like to see how the significant impact on local roads, and the potential danger to life, is addressed.</p> <p>I would also like to see that the proposal includes provision for improved amenities and facilities in the local area, in particular space given over, potentially, for the church to be able to minister to the new community.</p>	<p>Development in West Berkshire must consider numerous constraints, most notably the constraints posed by the North Wessex Downs AONB, AWE and the associated DEPZs and flooding.</p> <p>As part of the LPR, all sites promoted to the Council have been assessed in the HELAA and this has concluded that there are sufficient sites to accommodate the Council's housing requirement outside of these constraints.</p> <p>The principles which underpin the spatial distribution of new development stem from the overriding objective of enabling sustainable development, development that will meet the social and economic needs of the District while respecting the environmental assets of the District and meet the objective to mitigate and adapt to the effects of climate change and minimise demand for energy and other resources.</p> <p>The LPR aims to build on the principles of the Core Strategy with regard to the spatial distribution of development. The focus is on existing settlements, using the settlement hierarchy to steer development to the most sustainable areas, with an appropriate balance between urban and rural development, in order to meet local needs and maintain vibrant and balanced communities with their own sense of identity.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>

Duncan Dorroch (lpr1988)	<p><b>Overall:</b> What is very obvious from the various tables and maps is the extremely limited space that isn't declared as an 'AONB'. What is also spectacularly apparent is the inequitable distribution of new houses. Why are all available areas not being considered for additional housing? There are many towns and villages south of the M4 that have had no new houses allocated. I fully accept that additional houses are required but these must be allocated fairly across the region. In light of the current pandemic and Brexit, I would also question the validity of the housing demand figures. It was recently reported that 1.3 million people had left the UK. I would also ask why is the answer always Newbury and Thatcham?</p> <p><b>Traffic:</b> -The route West towards Newbury on the A4 is significantly urbanised and congested at all but the quietest times with slow journeys owing to traffic lights, junctions and weight of traffic and little hope of improvement. -The route South over the railway is severely restricted by the level crossing. Even without such a significant increase in Thatcham's population this route suffers severe congestion and improvement of this needs to be considered as part of the overall plan. -The route East down the A4 is expected to take the bulk of the traffic but is already congested at busy times.</p> <p><b>Thatcham Infrastructure:</b> Whilst the plans show there will be new primary and secondary education and medical facilities, when are these scheduled to be built? There has been no substantive development to Thatcham infrastructure in over 10 years with both secondary education and medical facilities overloaded. The station / train services are not adequate to cope with the significant increase in demand</p> <p><b>Flooding</b> Whilst there has been investment in flood defences elsewhere around Thatcham, there has been nothing around the Northeast of Thatcham. You are proposing to tarmac over large percentages of greenbelt so the</p>	<p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government's standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p> <p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially</p>

	<p>run-off water will have nowhere to go apart from over the A4 and into the residential area. I would be happy to discuss if you require any further information.</p>	<p>higher numbers than the housing need based on the standard methodology.</p> <p>The location of development has been based on the following spatial strategy as set out in SP1: 'The overall spatial strategy for West Berkshire will deliver the spatial vision and strategic objectives for the District over the Plan period and inform the preparation of Neighbourhood Plans (NDPs). The strategy: directs development to areas of lower environmental value; optimises the use of previously developed land: optimises the density of development to make the best use of land whilst conserving; and enhancing the distinctive character and identity of the built, historic and natural environment.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation</p>

Respondent (with lpr ref)	Response	Council Response
		<p>packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p>
Helen Pratt (lpr1857)	<p>Bradfield Parish Council concurs entirely with the analysis and report produced by Bucklebury Parish Council in opposition to THA20. Expansion on such a vast scale without any highway infrastructure improvements, is totally unacceptable. The A4 / Bath Road struggled with pre Covid-19 traffic volumes. Any traffic flow analysis undertaken in 2020 will be flawed because of Lockdown restrictions. Bradfield Parish traffic flows have altered dramatically during 2020 as can be seen by the data collected during SID usage along South End Road through Bradfield Southend. Traffic from THA20 will use the rural roads in the surrounding parishes to try to escape the congestion from the main highways particularly when attempting an east / west destination. Bradfield Parish will be seriously impacted by additional traffic without investment into roads infrastructure. Many miles of 'commuter rat runs' are on narrow,</p>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead</p>

Respondent (with lpr ref)	Response	Council Response
	<p>winding lanes, and with no footway for pedestrians walking between hamlets and villages. Union Road, for example, has high earth banks in narrow sections on bends. Less than half the roads length is wide enough to have carriageway segregation. There is flagrant disregard for speed limits be that along open roads or restricted speeds through villages.</p> <p>Traffic management will require major investment in the wider rural parishes to combat congestion, safety to road users, protection of pedestrians and reduction in the speed of vehicular traffic. Commuter traffic travelling east from the THA20 will swamp Upper Bucklebury and grid lock the village with the chicane arrangements for those travelling west through Upper Bucklebury to work in Newbury. Chapel Row and Bradfield Southend will be mere hindrances for commuter traffic as few slow down, even now, anyway! Englefield Parish will end up with a bottleneck at the junction of Common Hill Road and the A340. This notorious junction, the site of numerous accidents and many fatalities must be upgraded. Pre Covid-19, queuing back to Parkers Corner, particularly on wet mornings, was not unusual. As an escape from waiting, the use of Bostock Lane, a single track lane with 90 degree bends across Englefield Estate is many commuters preferred option, and all to join the snail pace procession on the A4 Bath Road.</p> <p>There is serious conflict with West Berkshire Councils AONB credentials. Promoting the encroachment of development right up to the edge of the AONB fails to show protection towards a precious resource. The imposition of light pollution from residential development at the edge of a 'dark skies' area is unacceptable.</p>	<p>without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>In regards to light pollution, policy DM4: Environmental nuisance and pollution has been strengthened to ensure that all reasonable steps are taken through design, siting and technological solutions to ensure the abatement of obtrusive light to avoid sky glow, glare and light spillage, intrusion and any adverse impact to wildlife. Applicants should adhere to the guidance on lighting provided in the most up to date Institute of Lighting Professionals (ILP) guidance notes, alongside other relevant local documents including the North Wessex Downs AONB 'A Guide to Good External Lighting' (2021).</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR also requires the submission of a lighting strategy.</p>
David Smith (lpr2151)	<p>I have huge concern over the planned expansion of Thatcham. I object on the following grounds,</p> <ul style="list-style-type: none"> <li>• Loss of greenbelt land and historic countryside</li> <li>• Loss of habitat and conservation land</li> <li>• Loss of ecology</li> <li>• Over expansion of Thatcham</li> <li>• Inappropriate site for development</li> <li>• Lack of proposed infrastructure to facilitate this development</li> <li>• Increase in traffic and pollution on already busy roads</li> <li>• Concern over flood and land drainage risk to existing properties in Thatcham</li> <li>• There are better sites available within West Berkshire to facilitate housing development, that will have far less impact on local people</li> </ul> <p>If I wanted to live in Thatcham then I would have brought a house in Thatcham. I want to live in a village, but this development will join Upper</p>	<p>The site is not within the Green Belt (there is no Green Belt in this District).</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime</p>

	<p>Public transport remains non-viable option due to the limited timetable and frequency.</p> <p>5) Upper Bucklebury</p> <p>The inevitable increase of visitors to our village/ parish / Bucklebury Common can only have a detrimental effect on our local environment, nature and wildlife, it already suffers from significant waste issues.</p> <p>It is cited in the Bucklebury vision and Bucklebury Plan to maintain a strong green belt between Thatcham and Upper Bucklebury, this document is approved and agreed with WBC and should be considered as supplementary planning consideration.</p> <p>North Wessex Downs AONB Board has objected to development on all sites that makeup Thatcham North East due to the impact on the setting of AONB and breaking the Floral Way Boundary</p> <p>I understand the need for development and the need to build more homes but I question the scale of this development in a single location, Thatcham struggles as it is and these plans will have a huge detrimental impact. I hereby would like to register my objection to these plans.</p>	<p>infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>The development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population). Highway works and active travel routes would assist in directing residents to using the A4/Floral Way rather than Harts Hill Road, and using an enhanced cycling and walking network to travel, including to Thatcham train station. Residents would make use of the newly provided education facilities on the site.</p> <p>In relation to the concerns on the potential impact on Bucklebury Common, the development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population).</p> <p>There is no green belt within this area (or within the District) there will be open space maintained along the northern/north eastern part of the site.</p>
Anne Hillerton (lpr2152)	<p>I strongly object to the proposed North East Thatcham Strategic Site Allocation and the proposed development of up to 2,500 houses in NE Thatcham. As a councillor on Bucklebury Parish Council (BPC) I endorse the document submitted on their behalf in response to the consultation on the emerging draft of West Berkshire Local Plan Review to 2037, and ask that this letter is read in addition to it.</p> <p>I shall not repeat BPC's objections but shall expand on some strands.</p>	<p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government's standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states:</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• Flawed housing demand analysis</li> </ul> <p>The current situation caused by Covid-19 was unforeseen, and I ask that it gives West Berkshire Council a reason to re-consider and to go back to government for an updated housing demand figure.</p> <p>Life has changed completely and will not return to the normal of 2019. Many businesses have learnt that having employees working mainly from home actually works better for both employer and employee from a saving on heating and rents for employer and the time and money saved by not commuting for the employee. How this plays out with Londoners wishing to relocate and M4 corridor dwellers wishing to move further out cannot as yet be determined, so I urge you to wait.</p> <p>Another effect of Covid -19 has exacerbated the trend to shop online. We have lost Debenhams and John Lewis from Newbury town centre leaving potential for more town centre flats. People will, I'm sure, continue to buy basics online so town centres will evolve. Coffee shops, restaurants and niche small shops will be what is required and the larger shops and those selling more basic goods will become available for housing development, removing the need to expand housing into farmland and encroach upon the AONB.</p> <ul style="list-style-type: none"> <li>• Strategic gap</li> </ul> <p><i>(some personal information removed)</i> [In Upper Bucklebury] there is a completely different way of life (from Thatcham). The proposed development will make Upper Bucklebury an extension of Thatcham by breaching the Floral Way northern boundary for housing that I believed and trusted. The development will erode this country life / town life difference, reducing choice and taking away the way of life in Bucklebury, one of rural West Berkshire's parishes.</p>	<p>To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p> <p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p> <p>In relation to the plan being prepared prior to the coronavirus pandemic, the full impact of the COVID 19 pandemic will not be fully apparent for some time. The LPR is a long term strategy to 2039, during which time a review will be conducted every 5 years. The impact of changes in response to macro and local economic factors will be assessed through subsequent reviews, once such implications are realised.</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• AONB and Bucklebury Common</li> </ul> <p>The rural way of life would be ruined further by the effect of a housing development of this scale so close to Bucklebury. The damage to the ecosystems and biodiversity by extra footfall, pollution, noise and light would be devastating. The damage is expanded upon in BPC's submission which I endorse fully.</p> <ul style="list-style-type: none"> <li>• Flood Risk</li> </ul> <p>Climate change has altered our seasonal patterns of weather. As I write this, much of Bucklebury Common is under water, at a level above where the new housing is planned. The extra flood risk is so grave that I cannot understand a council which produced West Berkshire SFRA proposing the housing plan THA20.</p> <ul style="list-style-type: none"> <li>• Traffic</li> </ul> <p>Upper Bucklebury suffers from excess traffic because current Thatcham residents use the narrow, winding Harts Hill and Burdens Heath as a route to the A34 / M4 west and Harts Hill and the straight road along the common, at speed, to Reading and M4 east. Speeding in the parish is a serious concern to residents now and would become even more dangerous should THA20 be allowed.</p> <ul style="list-style-type: none"> <li>• Infrastructure</li> </ul> <p>Chapel Row Surgery, situated in Bucklebury Parish, would not be able to cope with the extra number of patients. Even if a new surgery were to be built, the early residents of the proposed development would need to use existing surgeries (Chapel Row and Burdwood in Thatcham) before</p>	<p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. Keith Watts (lpr1017)	<p>The proposed development in open countryside and adjacent to an Area of Outstanding Natural Beauty is contrary to a previous commitment that Floral Way would form the northern boundary of Thatcham. Bucklebury Parish Council has produced a well-argued document explaining the disastrous impact of the proposed development and I will not repeat it here.</p> <p>If the Council and councillors wish to maintain the trust of the people of West Berkshire then it is important that previous promises are honoured.</p> <p>The Council has already gone back on commitments it gave when the Vodafone site was developed on the Old Showground in Love Lane, Newbury that the remaining part of the old showground would never be developed. Newbury is now creeping northward towards the M4. To go back on the commitment not to build north of Floral Way will completely destroy the trust of many residents in the Council.</p> <p>In short I oppose the proposed development.</p>	<p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide</p>

		details in relation to matters such as the parameters of the site, height parameters, green open space, etc.
Peter Thompson (lpr2203)	<p>I am writing to object to the proposed development of up to 2500 houses at NE Thatcham (SP 17). My main reasons are as follows:</p> <p><b><u>Removal of community boundary between Thatcham and Bucklebury</u></b></p> <p>The land north of Floral Way currently provides a strategic gap between Thatcham and Bucklebury. This proposal undermines the planning principle of maintaining a strategic gap to separate communities by virtually eliminating it and would visually and socially break the natural community boundaries.</p> <p><b><u>Traffic</u></b></p> <p>A development of the scale proposed would lead to a significant increase in traffic, which has not been adequately considered in the proposals. There is an assumption that the bulk of traffic would use the A4, accessed via Floral Way; the A4 is already commonly overloaded at peak times, causing significant congestion which is harmful on the environment, and new residents would look to other routes. These routes would likely be through the Parish villages, particularly for access to the A34 and M4, on rural single-carriageway roads with blind corners and many without footpaths, therefore ill-suited to coping with the additional volume of traffic:</p> <ul style="list-style-type: none"> <li>• The increased traffic will negatively impact many surrounding villages including Upper Bucklebury, Cold Ash, Burdens Heath, Chapel Row and Bradfield</li> <li>• The current roads will not be sufficient to support this increased level of traffic</li> </ul>	<p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• These roads already suffer with concerning levels of speeding (recent Parish Council SIPS deployment has confirmed this and the police have the figures) and the proposal would exacerbate this issue further</li> <li>• The increased traffic will be a safety concern for local residents, particularly children whilst walking to and from school</li> <li>• The houses located on Harts Hill Road and Burdens Heath in Upper Bucklebury, and The Ridge in Cold Ash, do not have a footpath outside. Increased traffic along these roads will make it significantly more dangerous for pedestrians in these areas in particular</li> <li>• The increased volume of traffic will impact the quality of life for the residents of the villages mentioned through increase traffic noise and disturbance</li> </ul> <p><b><u>Inadequate Supporting Infrastructure for Scale of Development</u></b></p> <p>A development of the scale proposed would have significant knock-on impacts to local infrastructure, a number of which have not been adequately considered.</p> <ul style="list-style-type: none"> <li>• The proposal does not consider the increase in healthcare services required to support +25% housing increase in the Thatcham area</li> <li>• The proposal does not consider the strain of a likely increased demand on Thatcham Train Station. Parking facilities at Thatcham Train Station are already insufficient to cope with current demand and there would need to be a significant increase in the provision of parking at the station to cope with increased demand</li> <li>• The road infrastructure in a number of common commuting directions from the development are not sufficient, in particular</li> </ul>	<p>packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide</p>

Respondent (with lpr ref)	Response	Council Response
	<p>the significant bottlenecks already experienced at the rail level crossing when travelling south</p> <p><b><u>ANOB</u></b></p> <p>The proposed development is adjoining the Bucklebury Common and ANOB and it would have a long-lasting negative impact on this special environment. There would also be a significant detriment in the loss of the open aspect of the local neighbourhood and loss of the existing countryside/rural views. The close proximity of the development to the Bucklebury Common and ANOB will have an impact directly and indirectly through the likely increase in visitors:</p> <ul style="list-style-type: none"> <li>• The Common is protected because of its flora, fauna and situation and its special habitats are home to rare and protected wildlife. There is no doubt that such a close, high-density development, will have a negative impact on this area and wildlife</li> <li>• The plants in and bounding the ANOB would suffer and the Common would be put under pressure from additional visitors</li> <li>• The ANOB is already suffering habitat damage from walkers, cyclists and motorised vehicles and the additional visitor numbers would exacerbate damage to this struggling environment</li> <li>• The area already suffers from significant waste issues, that needs the support of local village volunteers to regularly undertake rubbish clearing days to keep under control</li> </ul> <p><b><u>Pollution</u></b></p> <p>The proposed development would generate pollution in the form of extraneous light which would drive local wildlife out of their existing habitats. It would also affect local Bucklebury residents by spoiling their night sky. Furthermore, the scale of the proposed development would</p>	<p>details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p>

Respondent (with lpr ref)	Response	Council Response
	lead to increased pollution from carbon emissions and those associated with increased population density.	
CPRE Berkshire (lpr1701)	<p>A main feature is allocating a large strategic development area NE of Thatcham, for which an extensive masterplan study was commissioned by WBC.</p> <p>A part of this area at Siege Cross has been considered before but dismissed on appeal but now some 700 acres in two main parts is proposed, for 1250 dwellings to 2037 but to 2500 longer term. We are concerned that the area stretches too far up the hillsides northwards and is unacceptable in landscape terms and in relation to the surrounding AONB. We note, p31 2.47 of the study acknowledges the objection by the NWD AONB office to the proposal in general. The masterplan introduction mentions the valley floor as most suitable for development and it should be limited to this. If not there will be major problems, apart from that just mentioned. The steeply rising land and gully's will give rise to major flooding below, which Thatcham is well experienced of: SuDS drainage schemes would need to be extensive and would considerably alter the landscape. Housing will be very visible from hills to the south. The traffic problems around Thatcham have been well described by others, whom we support.</p> <p>Overall, we recommend that the western area around Harts Hill of high ground should be removed from this proposal. To the east, the landscape surroundings of the Crematorium should be retained.</p> <p>A country park is mentioned, but our strong recommendation is that a wide woodland belt be established across the higher ground, consisting of deciduous and pine trees, Hazel coppices and native bushes, with glades and rides planted that will gradually establish a fine biodiverse habitat.</p>	<p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that 'in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy' (paragraph 67 of the Core Strategy Inspector's Report). As additional housing is required, and given Thatcham's status as an 'Urban Area' in the development plan is it considered appropriate to consider Thatcham for housing.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and</p>

Respondent (with lpr ref)	Response	Council Response
		Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.
RGW Harris (lpr2204)	<p>I am writing to strongly object to the proposed development above and wholeheartedly endorse the objections by Bucklebury Parish Council and those by Thatcham Town Council.</p> <p>This development is primarily outside the existing planning boundaries and will dramatically encroach upon the separation of Thatcham and Bucklebury as well as reducing the present open lands (“green lungs”) which contain bounteous flora and fauna. In a recently published paper by Cambridge Professor Sir Partha Dasgupta (see “a”) clearly recommends that we should take into consideration the environment and its interaction with modern development and commerce. I can see no account of any real effort to allay any possible destruction of habitat and green space. Green space provides us with clean oxygen and a visual break from buildings and helps to reduce stress.</p> <p>It is also seen that pollution dramatically affects birdsong see (“b”) as well as removal of their habitat. We have lost a lot of smaller garden birds in Thatcham due to the massive influx of seagulls and red kites, beautiful as they are, they are not native to a country town, more pollution and encouragement from more people will exacerbate the problem.</p> <p>These houses are not needed in Thatcham there is no evidence that we need such a large amount and all the evidence provided so far is based on pre pandemic times which were dramatically different from today and</p>	As part of the preparation of the LPR the council has undertaken a Settlement Boundary Review (SBR).The settlement boundary criteria make clear that boundaries will include sites allocated through the Local Plan process. North East Thatcham is proposed for allocation under policy SP17. Should the site, or any part of it, be removed from the LPR the boundary for Thatcham would be adjusted to exclude it. It is acknowledged that the settlement boundary is currently drawn around the whole of the proposed allocated site at North East Thatcham whilst Policy SP17 notes that development will be expected to deliver ‘a network of green infrastructure which will include a new community park linking Thatcham to the AONB.’ The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. At this stage it is therefore not possible to draw the settlement boundary any tighter. As the LPR progress and more detailed work is done on the sensitivity and capacity of different

Respondent (with lpr ref)	Response	Council Response
	<p>most likely in the future. We do not know what will be needed then so we should wait and see what transpires before leaping off into the unknown and building such large numbers.</p> <p>I have no objection to smaller developments taking place in vacant areas providing the infrastructure is adaptable, but that is unlikely in much of Thatcham. (Maybe up to 70-100 houses)</p> <p>One of my biggest concerns is the issue of flood waters. We were flooded out in 2007 just weeks after we moved in and are not living in a flood risk area, but the waters came down from The escarpment of the North Wessex Downs, this development will impede the natural flow and all the effort that has gone into the existing flood defence works to provide (so far) protection could be reduced. I know that provision is being made but where will it go to? It could well flow around either side and we get flooded again when not on a flood plain. The effects of the flood then were devastating to wildlife as well.</p> <p>The Discovery centre was underfoot yet the Lower Way development is apparently still on the cards; another “green lung” being removed. I travelled on that day (20/07/2007) up to Southend Bradfield and the roads along the Avenue were underwater, and that is at the top of the hill, so I know how devastating this volume of water can be sand any impediment to it may create potential devastating flooding again.</p> <p>I cannot comprehend why so many developments are taking place near main roads, which produce pollution and the traffic from these developments will only increase that dramatically. This is simply because Thatcham has an extremely poor road system, there is no effective bypass, north to south is impossible because of the rail crossing (lack thereof) and I have not seen any evidence of the developers building new by passes and bridges over the Kennet and Avon and rail line. As the roads get more congested there will be more pollution. It can take 15 minutes and more to use the A4 through</p>	<p>parts of the site to accommodate development the boundary will be amended accordingly.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council’s website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government’s standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Thatcham because of volume and poor traffic light sequencing today, goodness knows what effect this development will have. I have not seen mentioned but it is impossible to read everything in the severely limited time we have, that all these households will be receiving more home deliveries and deliveries in general so that could be thousands of extra traffic movements in addition to the incumbents of the development.</p> <p>The lack of access to the station by car and public transport almost renders the use of railway impossible therefore more cars will be used. “15-minute walk to the Railway Station” has been quoted, that is quite a fast walk and when it is inclement weather, we must be realistic, cars will be used, there is no evidence of many more cycles being used in spite of the massive expenditure on “cycle lanes”, people will take the line of least resistance and get in a car.</p> <p>If they go towards Newbury the A4 and Floral Way will become saturated, with more pollution which is madness. If travelling eastwards the villages of Woolhampton will be adversely affected and Bucklebury, Chapel Row Southend Bradfield will become so called “Rat Runs”. The Harts Hill road is already a dangerous road and does not need any more traffic. All the village roads are narrow carriageways with pedestrians. Having lived up in Chapel Row before speeding traffic is a real menace to all.</p> <p>One of the main “bones of Contention” in Thatcham for decades has been the wholly inadequate water treatment works we are constantly bombarded by malodorous and unhealthy odours. This can only seriously affect that. No mention of that as far as can be seen, but not having had any real chance to read the hundreds of pages, no formal notification to Thatcham and Bucklebury residents is quite shameful.</p> <p>The size of this development overall of 2500 dwellings is equivalent to a new village in its own right and similar to Bucklebury and Cold Ash,</p>	<p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p> <p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and</p>

Respondent (with lpr ref)	Response	Council Response
	<p>villages each now. In a location that overlooks a main road (in one part) were there is already pollution and also a large industrial estate. It will despoil existing views of the countryside which will adversely affect local mental health. At a time when it looks like we will need to create more space the intention of these proposals is to reduce what we already have, which will be to the eternal detriment to our children, flora and fauna.</p> <p>On this basis I very strongly object to these proposals and to the fact that public money is being used in the fight for and against.</p> <p>a/Independent report Interim Report – <u>The Dasgupta Review</u>: Independent Review on the Economics of Biodiversity Interim Report of the independent Review on the Economics of Biodiversity led by Professor Sir Partha Dasgupta</p> <p>b <u>Noise and Light Pollution Impact Songbird Reproduction</u></p> <p>It is also seen that pollution dramatically affects birdsong as well as removal of their habitat. We have lost a lot of smaller garden birds in Thatcham due to the massive influx of seagulls and red kites, beautiful as they are they are not native to a country town.</p>	<p>Bath Road, as part of Thatcham’s flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In regards to water supply, the developers are aware of the requirement for upgrades to the water supply network and water treatment works (which is identified in the Water Cycle Study).</p> <p>Should the development go ahead, it would be phased appropriately to ensure it does not outpace delivery of essential network and treatment upgrades (See IDP).</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an integrated water supply and drainage strategy which will consider existing related infrastructure on the site.</p>
Chad Williams (lpr936)	<p>I <b>oppose</b> the proposed development of up to 2,500 houses at North East Thatcham based on the following grounds:</p> <ul style="list-style-type: none"> <li>- proximity to and impact on North Wessex Downs AONB</li> <li>- increased traffic around Thatcham (Floral Way / A4) and the resultant increased traffic on ill-suited rural routes (e.g. through Parish of Bucklebury)</li> <li>- increased strain on public infrastructure - medical, dental, education, transport, sports facilities</li> </ul>	<p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council’s evidence base to inform the proposed allocation.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. 		<p>lifestyle choices will be important elements of the overall transport plan.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>
Leo Hartley Russell (lpr2202)	<p>I am writing to you to strongly object to this ridiculous development plan.</p> <p>My primary reason is for the environmental impact it will have and believe houses should not be built so condensely in such a short amount of time, especially in an area which could not manage the large increase in footfall and traffic.</p>	<p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p>
William Slatford (lpr2214)	<p>I am a resident of Upper Bucklebury, and I wish to raise my objections to the proposed development at north east Thatcham.</p>	<p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Please consider the following questions and points regarding the proposal:</p> <p><b><u>North Wessex Downs AONB</u></b></p> <p>The proposed development will have a significant detrimental effect on both the countryside and the North Wessex AONB. The natural beauty of the area will be irretrievably lost if the development goes ahead. There will be also significant light pollution into the AONB.</p> <p>Policy DC1 of the draft local review states: “Planning permission will not be granted ... where it does not enhance the character and distinctiveness of the rural area, including the special qualities and natural beauty of the landscape of the AONB ...” Policy SP1 makes clear the conservation and enhancement of the North Wessex Downs AONB and its setting is a key consideration.</p> <p><b><u>Strategic Gap between Thatcham and Bucklebury</u></b></p> <p>The land north of Floral Way has provided the gap between Thatcham and Bucklebury, and breach of the strategic gap has been cited by WBC to refuse planning applications in the recent past.</p> <p>WBC policies require the maintenance of settlements as separate entities. The proposal would remove much of the strategic gap between Bucklebury and Thatcham - urbanising the village and the edge of the AONB. WBC already acknowledges this loss of separate identities in the Site Selection Background Paper.</p> <p><b><u>Highways</u></b></p> <p>The effect on local roads would be catastrophic. Roads around Thatcham are often log jammed, and the introduction of 2500 houses worth of cars will cause the area to grind to a halt. The strategic road</p>	<p>(LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council’s evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a ‘masterplan’ / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>network would be unable to cope, and traffic would spill over onto rural roads. Rat running through Bucklebury is already prevalent; it would become overwhelming. Rural roads often have no footpaths, are unlit and have sharp bends - completely unsuitable for the inevitable volume of traffic.</p> <p>The station and town centre are too far from the development, so people will continue to use their cars, further clogging Thatcham roads, increasing parking requirements, and doing little to help WBC achieve its Carbon Neutrality targets.</p> <p>WBC will need to ensure" that development proposals will not result in an unacceptable impact for any user of both the local and strategic road networks."</p> <p><b><u>Surface Water Flood Risk</u></b></p> <p>Thatcham is already at risk from flooding due to surface water runoff. Why build 2500 houses in an area that would exacerbate the problem, when other choices are available? The NPPF directs development away from areas that are prone to flooding.</p> <p><b><u>Conservation</u></b></p> <p>The proposal would do significant and irreparable damage to the biodiversity and fragile ecosystems of Bucklebury Common and surrounding areas, including a number of protected species. The proposal fails to meet a WBC core objective of protecting and enhancing existing landscape features and biodiversity habitats.</p> <p><b><u>Climate Change</u></b></p> <p>It is difficult to see how the proposal at THA20 would deliver on WBC's requirement for a minimum provision of 20% energy from onsite</p>	<p>Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to potential impact on surface water, all new development must include sustainable drainage measures, and development must be avoided on areas that are at risk of surface water flooding. Development on the site will be expected to deliver surface water management approaches that could deliver a net gain for Thatcham town. Drainage and flood attenuation works are included in the IDP.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will</p>

	<p>renewable sources. Renewable sources would have to cause no harm to residents and to the wider area, especially so close to the AONB.</p> <p><b><u>Siege Cross</u></b></p> <p>WBC has already rejected a planning application for one of the proposed sites. It makes little sense that a site that was unsuitable because of its adverse effect on the local area, is now considered to be suitable, despite being five times larger.</p> <p>I would like to reiterate my objections to the proposal at Thatcham North East as part of the review of WBC's Local Plan.</p>	<p>be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In relation to the Climate Change Emergency, The emerging draft LPR includes a policy that specifically covers climate change (policy SP5). This requires that all development should contribute to West Berkshire becoming and staying carbon neutral by 2030.</p> <p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs development to the most sustainable locations in the district.</li> <li>• Policy SP6 (Flood Risk) directs development to areas least at risk of flood risk.</li> <li>• Policy SP22 (Transport) requires that any development that generates a transport impact will be required, amongst other things, to have regard to West Berkshire's declared climate emergency and minimise the impact of all forms of travel on the environment.</li> <li>• Policy DC3 (Building Sustainable Homes and Businesses) looks at building sustainable homes and businesses,</li> </ul> <p>Any development site will have to comply with the aims and objectives of the plan.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that ‘in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy’ (paragraph 67 of the Core Strategy Inspector’s Report). As additional housing is required, and given Thatcham’s status as an ‘Urban Area’ in the development plan is it considered appropriate to consider Thatcham for housing.</p>
Tim Slatford (lpr2138)	<i>(personal information removed)</i> I wish to raise my objections to the proposed development at north east Thatcham, which is contained within Policy SP17 of the Local Plan Review (LPR). I would contend that Policy SP17 is fatally flawed from conception; that it should be	In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government’s standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).

Respondent (with lpr ref)	Response	Council Response
	<p>removed from the proposed LPR, and the associated housing allocation in SP13 reconsidered.</p> <p>There are obviously significant limitations on development within West Berkshire; do WBC contend the requirement to use the standard approach under NPPF paragraph 60 for assessing local housing need in attempt to reduce that burden?</p> <p>WBC’s plans were obviously thrown into disarray with the non-availability of the proposed Grazeley site; the resulting process appears to the layman that THA20 is the quick answer to the housing requirement, now make the evidence fit.</p> <p>Please consider the following questions and points regarding the proposal:</p> <p style="padding-left: 40px;">1. <b><u>Site Selection Background Paper (SSBP)</u></b></p> <p>Within the site selection process, it is noteworthy that the diametric change in attitude towards Thatcham that has occurred in the current Plan period. Within the Site Selection Background Paper (SSBP) Table 2 THA 9 “The Core Strategy was clear that Thatcham was to receive a lower allocation than other Urban Areas given the rapid expansion that had taken place in the town over recent years. This was to allow a period of consolidation, ensuring the infrastructure and town centre facilities could be upgraded to meet the demands of the existing population.” Was this assessment completely wrong, because suddenly there is a requirement for 2500 houses in Thatcham? Masterplanning only the Thatcham area then meant the selection of THA20 almost inevitable as the only available site of a size suitable to deal with the Grazeley shortfall.</p> <p>Again to the layman, there appears to be different criteria applied to make THA20 evidence fit. There are numerous examples within the</p>	<p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p> <p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p> <p>The aim of the site selection paper is to pull together into a single document, key conclusions arising from the following strands of evidence and appraisals: Housing and Economic Land Availability Assessment; Settlement Hierarchy Review Background Paper; Settlement boundaries; Designated</p>

Respondent (with lpr ref)	Response	Council Response
	<p>SSBP where sites are “not recommended for allocation” because of traffic, AONB, environmental, and flooding reasons:</p> <p>CA12 “... ensure that development is planned in a way that ensures the protection and enhancement of the local distinctive character and identity of the built, historic and natural environment across the District.”</p> <p>8.5. CA15 “...to be acceptable in highways terms, a through route from the B4000 to the A339 is needed.”</p> <p>SCD4 “Issues which would need to be resolved relate particularly to highways and access and further information would be required on ecology, heritage and landscape...Development would require access from the B4009 to the A339.”</p> <p>8.22. “...adjacent, or within the AONB. Run off ... can have an impact on surface water flooding in Thatcham and any development would need to take account of this risk.</p> <p>8.54. “...important environmental assets within Woolhampton... areas of ancient woodland to the north and west ...”</p> <p>8.94. “...although close to the A34 and M4, local roads are rural in nature and not suitable for heavy traffic.”</p> <p>Table 8.9 “Traffic related concerns are perhaps the biggest single issue for the local community ... A more intensive development in this location would be out of character with the existing settlement form.”</p> <p>As each of these points relate to smaller developments, it is not unreasonable to assume that give the proposed size of THA20, the size of the response and consideration within them would be proportionately larger. Instead the report on THA20 simply states: “In contrast there are very few negative impacts that developing the site would have.” It does acknowledge that some further investigation is required, but the</p>	<p>Neighbourhood Areas; Employment Land Review; Level 1 Strategic Flood Risk Assessment; Sustainability Appraisal / Strategic Environmental Assessment; and Detailed site assessments. It balances the key findings to determine which sites should be included as allocations in the emerging draft LPR. The assessments are undertaken in a consistent manner and is a policy off assessment. The LPR sets the policy context for allocation of sites through the settlement hierarchy set out in SP1.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council’s evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a ‘masterplan’ / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>apparent difference in the level of consideration between THA20 and other sites is astounding.</p> <p>THA20 would have disproportionately larger adverse effects than the sites discounted above, but these appear to have just been glossed over. SSBP Table 8.2. Site THA9. “There are concerns that development may reduce the open countryside between Thatcham and Newbury / Greenham, and introduce built form to south of Lower Way. The site is a buffer to development and forms part of the open character along this side of Lower Way. There is further concern that development would not be appropriate in the context of the existing settlement form, pattern and character of the landscape.”</p> <p>It is strange that similar comments were not written relating to THA20 in the context of Thatcham/ Upper Bucklebury, built form to the north of Floral Way, the site being a buffer to development, and development being inappropriate to settlement form and landscape character. These comment areas were considered noteworthy for a 36 house development, but were not mentioned for a 2500 house one.</p> <p>Table 8.2 CA12 states: “It is the Council’s preferred approach to allocate site THA20...” but gives no firm evidence as to why. Evidence for multiple other sites down plays their suitability, in comparison to THA20, where damning evidence is instead down played. I am sure WBC are cognisant of SSBP 2.2. “... One of the tests of soundness for Local Plans as set out in paragraph 35 of the NPPF ...the assessment of sites and how they compare against one another will be important to demonstrate reasonable alternatives have been considered.”</p> <p><b>2. <u>North Wessex Downs AONB</u></b></p> <p>The National Planning Policy Framework is clear that great weight should be given to conserving landscape and scenic beauty in AONBs, and WBC has a stated strategic objective to conserve and enhance the</p>	<p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and</p>

Respondent (with lpr ref)	Response	Council Response
	<p>AONB, to reflect that. There are numerous references to the AONB within the LPR and SSBP, and sites being unsuitable because of their proximity to the AONB. However, all requirements appear to have been forgotten when referring to THA20.</p> <p>SP2 states “Development will respond positively to the local context, conserving and enhancing local distinctiveness, sense of place and setting of the AONB. The strong sense of remoteness, tranquillity and dark night skies. Should be preserved. The conservation and enhancement of the natural beauty of the landscape will be the primary consideration in the assessment of all development proposals.” Whilst the development is not within the AONB, the sentiment is still valid “Planning permission will be refused for major development ...by reason of its scale, character or nature ... potential to have a significant adverse impact on the landscape and scenic beauty of the AONB...the impact of cumulative development.”</p> <p>The requirement to protect the AONB is carried through many other policies, and the requirement to protect the AONB setting. Policy DC1 states: “Planning permission will not be granted ... where it does not enhance the character and distinctiveness of the rural area, including the special qualities and natural beauty of the landscape of the AONB ...” Policy SP1 makes clear the conservation and enhancement of the North Wessex Downs AONB and its setting is clearly a key consideration.</p> <p>WBC’s own Landscape Sensitivity Study on Thatcham states that “LLCA13D: Hart’s Hill Plateau Woodlands has strong landscape links with the wider AONB landscape to the north...” and LLCA14F: Colthrop Manor Plateau Edge ...The area is highly visible from the Kennet Valley and the Greenham escarpment ...provides a strong contrast to the urban form of Thatcham town ...It forms an important setting to</p>	<p>lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to potential impact on surface water, all new development must include sustainable drainage measures, and development must be avoided on areas that are at risk of surface water flooding. Development on the site will be expected to deliver surface water management approaches that could deliver a net gain for Thatcham town. Drainage and flood attenuation works are included in the IDP.</p> <p>In relation to the concerns on the potential impact on Bucklebury Common, the development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population).</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council’s website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In relation to the Climate Change Emergency, The emerging draft LPR includes a policy that specifically covers climate change (policy SP5). This requires that all development should contribute to West Berkshire becoming and staying carbon neutral by 2030.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Thatcham and rural transition zone between the urban area and the AONB.”</p> <p>It should be obvious that 2500 houses literally on the doorstep of the AONB will have a huge detrimental effect on the landscape, light pollution, and fragile ecosystems that WBC are charged to protect. The Thatcham Strategic Growth Study (TSGS) offers little assessment of the damage THA20 would cause, and the SSBP section on THA20 makes no mention of the AONB.</p> <p>WBC is well aware of the negative impact on the AONB and the local countryside. SSBP Table 8.2. Site CA12 (pg21) (and later CA sites) states “...development of both north east and north Thatcham would result in the loss of the separate identifies of Cold Ash and Bucklebury, and would harm the setting of the AONB settlement pattern.”</p> <p>This clearly states that by developing THA20 WBC is accepting that the separate identity of Bucklebury would be lost and there would be definite harm to the AONB setting.</p> <p><b>3. <u>Strategic Gap between Thatcham and Bucklebury</u></b></p> <p>Until this proposal was tabled, the land north of Floral Way has provided the gap between Thatcham and Bucklebury, and breach of the strategic gap has been cited by WBC to refuse planning applications in the recent past.</p> <p>Policy DC1 states “...Planning permission will not be granted where a proposal harms or undermines the existing relationship of a settlement within the open countryside, where it does not enhance the character and distinctiveness of the rural area, including the special qualities and natural beauty of the landscape of the AONB”</p>	<p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs development to the most sustainable locations in the district.</li> <li>• Policy SP6 (Flood Risk) directs development to areas least at risk of flood risk.</li> <li>• Policy SP22 (Transport) requires that any development that generates a transport impact will be required, amongst other things, to have regard to West Berkshire’s declared climate emergency and minimise the impact of all forms of travel on the environment.</li> <li>• Policy DC3 (Building Sustainable Homes and Businesses) looks at building sustainable homes and businesses,</li> </ul> <p>Any development site will have to comply with the aims and objectives of the plan.</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The strategic gap between Bucklebury and Thatcham is an important one. Bucklebury is a rural parish within the AONB, whilst Thatcham is an urban town, with Floral Way the boundary between them. WBC policies require the maintenance of these as separate entities, though THA20 would destroy this feeling of separateness. The mitigations included in the TSGS are ultimately meaningless and ineffective in maintaining the gap between the settlements. As Upper Bucklebury merges into Thatcham, so too is the edge of the AONB. WBC has already acknowledged that loss in the SSBP 8.2 Site CA12 (and later CA sites.) "... development of both north east and north Thatcham would result in the loss of the separate identifies of Cold Ash and Bucklebury..."</p> <p>4. <b><u>Highways</u></b></p> <p>The impact of THA20 on the road network would be nothing short of devastating. Thatcham is already subject to lengthy delays; Floral Way and roads to the east and west are already overloaded at peak times, and the situation at the railway crossing beggar's belief. Introduce cars from 2500 houses into this equation, together with traffic for the 3 proposed schools, and the outcome is not positive. Rat running through Bucklebury parish is already common - with THA20 it would become endemic, both for traffic to the east and for the north and the A34. Highways noted these concerns in the HELAA, but they appear to have been relegated in importance in the SSBP entry for THA20!</p> <p>The traffic assessment in the TSGS is woefully inadequate. Car dependency will be high, as the train station and town centre are too far from THA20, which will bring other issues such as station parking into play. Traffic onto local roads, which are not capable of accepting increased loads, will increase dramatically.</p> <p>WBC have policies in place to prevent a development based upon adverse traffic projections based upon the required full Transport</p>	<p>improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that 'in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy' (paragraph 67 of the Core Strategy Inspector's Report). As additional housing is required, and given Thatcham's status as an 'Urban Area' in the development plan is it considered appropriate to consider Thatcham for housing.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Assessment (SP22) Equally, the LPR 12.20 requires that "...the Council would be concerned as to the effects of the proposed development on rural tracks, footpaths and bridleways. Relevant considerations would include past and existing levels of traffic generated from the site; the level, type and frequency of traffic likely to be generated by the proposed development..." All rural enterprise is expected (under DC32 viii) to "... not generate traffic of a type or amount inappropriate for the rural roads affected by the proposal" One assumes such stringency will be applied to a proposal of 2500 houses.</p> <p>LPR 12.47 "The Council as both local planning and local highway authority will need to ensure that development proposals will not result in an unacceptable impact for any user of both the local and strategic road networks."</p> <p><b>5. <u>Surface Water Flood Risk</u></b></p> <p>The proposal fails to meet with WBC specifications regarding Flood Risk.</p> <p>Policy SP6 states that "Development within areas of flood risk from any source of flooding, including Critical Drainage Areas and areas with a history of fluvial, groundwater or surface water flooding will only be accepted if it is demonstrated that it is appropriate at that location, <b>and</b> there are no suitable and available sites at a lower flood risk.</p> <p>5.9 "This policy aims to achieve a planning solution to flood risk management wherever possible, steering vulnerable development away from areas affected by flooding."</p> <p>5.13 "The NPPF directs development away from areas that are liable to flood"</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>Policy DC6 states “Development which would overload available facilities and create or exacerbate problems of flooding or pollution will not be permitted.”</p> <p>Flooding is obviously a significant risk to Thatcham. WBC’s own policies dictate that development should take place elsewhere, as there are available sites at lower flood risk. By WBCs own requirements, THA20 is an inappropriate site, as there can be little doubt that the introduction of 2,500 houses and associated infrastructure will exacerbate problems. TSGS even acknowledges these difficulties, though it is not apparent that any studies assessing THA20 in accordance with the Strategic Flood Risk Assessment (SFRA) have been completed. Any increase in flood risk to an area that is already identified as a nationally significant flood risk area is unacceptable.</p> <p>6. <b><u>Nature conservation</u></b> The proposal would do significant and irreparable damage to the biodiversity and fragile ecosystems of Bucklebury Common and surrounding areas. A number of protected species exist in the area that will either be directly or indirectly affected, either by increased footfall, light pollution, or the destruction of habitat. Quite simply, the proposal fails to meet a WBC core objective of protecting and enhancing existing landscape features and biodiversity habitats. Vast tracts of green field containing mature trees and established hedgerows would be replaced by houses, roads and some green space. Building lines would abut ancient woodland. TSGS 2.60 does state that there would be a net gain in biodiversity, which is difficult to visualise. 2.63 acknowledges the presence of protected species, priority species and priority habitat near the site, though nothing is added as to how these would be protected</p> <p>6. <b><u>Climate Change</u></b></p>	

Respondent (with lpr ref)	Response	Council Response
	<p>WBC have included Climate change as a major objective in the LPR (SP5) It is difficult to see how the proposal at THA20 would deliver on this. SP17 requires that the proposed site would deliver on-site renewal energy, and Policy DC3 3A requires a minimum provision of 20% energy from renewable sources. In accordance with Policy DC3, 3B WBC would support renewable energy applications if they are suitable for the area, are accompanied by a landscape assessment, and cause no harm to residential amenity. Whilst the concept is to be applauded, it is difficult to envisage on site power generation of the required scale that would not have an adverse effect on local amenity.</p> <p><b>8. <u>Siege Cross</u></b></p> <p>When considering the suitability of THA20, WBC should only look back to its own arguments regarding the Siege Cross development of 2015/16 (15/00296/OUTMAJ). WBC were, rightly, relentless in their arguments that development at Siege Cross would have an adverse effect on the local area. It is somewhat strange that, as Thatcham was to be left alone and now gains 2500 houses, so Siege Cross would be badly affected by 500 houses, but 2500 in the same vicinity would be beneficial.</p> <p>There are a multitude of arguments made that amplify WBC's position that Siege Cross would have an adverse effect. For example:</p> <p>WBC Statement of Case:</p> <p>1.2. 3) Landscape and Visual Impact "...The development would result in significant and demonstrable harm in terms of landscape character; settlement form; scale; identity and distinctiveness; and the historic environment. In particular:</p> <p>(c) ...result in harm to the character and identity of Thatcham and erode the open landscape between Thatcham and Upper Bucklebury.</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>(d) ... adverse impact on the distinctive local landscape character and appearance of the landscape north of Thatcham, which contributes to the setting of the AONB ...</p> <p>(e)... urbanise the key areas of sensitivity within the Local Landscape Character Area 14F (Colthrop Manor Plateau Edge), including: the lower slopes of an important ridge line; Big Gully, a local landmark; good views across the area and long views across the Kennet Valley; the lack of development with scattered farmsteads and minor roads; and the rural setting of the historic settlement at Siege Cross Farm.</p> <p>(f) The development would detract from the enjoyment of the character and appearance of the AONB in views from the escarpment south of the River Kennet.</p> <p>“...the development fails to have due regard to the sensitivity of the area to change. The development is inappropriate in terms of its location over the whole site, and its scale in the context of the existing settlement form, pattern and character of Thatcham. The development also fails to conserve the historic landscape setting and rural context of Siege Cross Farm.”</p> <p>“...the application is contrary to the National Planning Policy Framework, the Planning Practice Guidance, Policies ADPP3, ADPP5, CS14 and CS19 of the West Berkshire Core Strategy (2006-2026), the relevant landscape character assessments, the North Wessex Downs AONB Management Plan (2014- 2019), and the North Wessex Downs AONB Position Statement on Setting (2012).”</p> <p>WBC Landscape Assessment Summary goes on: S.5 I set out the North Wessex Downs AONBs objections to the proposed development, which I support.</p> <p>S.7 the attributes of the site ...should be conserved and enhanced in order to maintain the local character and distinctiveness of the</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>landscape and the rural setting to Thatcham and the North Wessex Downs AONB.</p> <p>S.10 The site makes an important contribution to the setting of the AONB and to the setting of both ecological and heritage designations (Long Grove Copse, Big Gully and Siege Cross Farm).</p> <p>S.11 it is a valued landscape within the meaning of NPPF 109 which should be protected and enhanced</p> <p>S.12 The proposed development on the appeal site would therefore be an extensive arm into this open elevated and prominent landscape. It is clearly not a logical extension to Thatcham as it will intrude into an overwhelmingly rural landscape, which forms an intrinsic part of the wider landscape between the AONB and Thatcham, well beyond a clearly defined and established landscape boundary to the settlement.</p> <p>S.14 The value of the landscape is enhanced by the presence of historic assets in this case two Grade II listed buildings, the historic settlement of Siege Cross Farm</p> <p>S.17 adverse effect of the development on the physical and visual setting and character of the site environment cannot overcome the impact of the location,</p> <p>On this basis I conclude that the proposed development on the appeal site would result in significant and demonstrable harm to a valued landscape and to the intrinsic beauty and character of that landscape by: Harming the setting of the North Wessex Downs Area of Outstanding Natural Beauty...”</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>It would be interesting to understand why WBC thought that 500 houses would cause damage to the AONB and the local area, but it now proposes that 2500 houses in the same location would not?</p> <p>I would like to reiterate my objections to SP17, and the allocation of housing sites within SP13. The NPPF requires that “great weight must be given to conserving and enhancing landscape and scenic beauty in Areas of Outstanding Natural Beauty” and “local wildlife-rich habitats should be protected.” THA20 would cause irretrievable damage to the local area, its wildlife, and the AONB. I would hope that WBC will listen to the concerns raised and review its proposed housing allocation sites.</p>	
Gillian Ward	<p>I am very much against the proposed plan for another 2,500 new properties in Thatcham.</p> <p>The main reasons are:</p> <ul style="list-style-type: none"> <li>• Thatcham is spreading into Upper Bucklebury (<i>personal information removed</i>) and ruining the separate identity of the villages. This is against the Bucklebury vision plan.</li> <li>• Many new homes have been already created on new estates in Thatcham over recent years (many large developments) and it has changed the nature of Thatcham to just be a huge residential sprawl which now covers a large area and requires a car to cross</li> <li>• Thatcham only has a very small town centre with a few facilities, all other residential estates just have a strip of local amenities (small shop, takeaways etc) so it already has no core or cohesive feel or identity and a large number of new properties on satellite estates would make this worse</li> <li>• There are very few jobs in Thatcham (compared to the population) so many residents have to travel to Newbury or Reading. This causes considerable congestion along the A4 and accessing the train station and causes the small countryside roads to be used as dangerous rat-runs (for</li> </ul>	<p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential</p>

Respondent (with lpr ref)	Response	Council Response
	<p>example, there have been many accidents on Harts Hill Road over recent years). This would get worse and the public transportation is not good (expensive and infrequent).</p> <ul style="list-style-type: none"> <li>• The youths and school kids do not have many suitable places to go and meet up. Although there is a skate park and some smaller parks, there is a large youth population and not much to do so they frequently just hang out around the strips of local shops. This would get worse, as there would be more youths and still little variety of things for them.</li> <li>• Thatcham has already become rather a 'dormitory town' with no soul, where people just drive back to at the end of the day to eat and sleep.</li> <li>• Where would the school boundary line be changes to?</li> </ul>	<p>delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>An economic advantage of new development is that new residents can help support local shops and businesses and help to boost the vibrancy and vitality of town and local centres.</p>
Lisa Slatford (lpr2201)	<p>I wish to raise my objections to the proposed development at north east Thatcham. Please consider the following questions and points regarding the proposal:</p> <p><b><u>North Wessex Downs AONB</u></b></p> <p>The proposed development will have a significant detrimental effect on both the countryside and the North Wessex AONB. The natural beauty of the area will be irretrievably lost if the development goes ahead. There will be also significant light pollution into the AONB.</p> <p>Policy DC1 of the draft local review states: "Planning permission will not be granted ... where it does not enhance the character and distinctiveness of the rural area, including the special qualities and</p>	<p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site</p>

Respondent (with lpr ref)	Response	Council Response
	<p>natural beauty of the landscape of the AONB ...” Policy SP1 makes clear the conservation and enhancement of the North Wessex Downs AONB and its setting is a key consideration.</p> <p><b><u>Strategic Gap between Thatcham and Bucklebury</u></b></p> <p>The land north of Floral Way has provided the gap between Thatcham and Bucklebury, and breach of the strategic gap has been cited by WBC to refuse planning applications in the recent past.</p> <p>WBC policies require the maintenance of settlements as separate entities. The proposal would remove much of the strategic gap between Bucklebury and Thatcham - urbanising the village and the edge of the AONB. WBC already acknowledges this loss of separate identities in the Site Selection Background Paper.</p> <p><b><u>Highways</u></b></p> <p>The effect on local roads would be catastrophic. Roads around Thatcham are often log jammed, and the introduction of 2500 houses worth of cars will cause the area to grind to a halt. The strategic road network would be unable to cope, and traffic would spill over onto rural roads. Rat running through Bucklebury is already prevalent; it would become overwhelming. Rural roads often have no footpaths, are unlit and have sharp bends - completely unsuitable for the inevitable volume of traffic.</p> <p>The station and town centre are too far from the development, so people will continue to use their cars, further clogging Thatcham roads, increasing parking requirements, and doing little to help WBC achieve its Carbon Neutrality targets.</p>	<p>which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a ‘masterplan’ / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). Respondent (with lpr ref)	Response	Council Response
	<p>WBC will need to ensure" that development proposals will not result in an unacceptable impact for any user of both the local and strategic road networks."</p> <p><b><u>Surface Water Flood Risk</u></b></p> <p>Thatcham is already at risk from flooding due to surface water runoff. Why build 2500 houses in an area that would exacerbate the problem, when other choices are available? The NPPF directs development away from areas that are prone to flooding.</p> <p><b><u>Conservation</u></b></p> <p>The proposal would do significant and irreparable damage to the biodiversity and fragile ecosystems of Bucklebury Common and surrounding areas, including a number of protected species. The proposal fails to meet a WBC core objective of protecting and enhancing existing landscape features and biodiversity habitats.</p> <p><b><u>Climate Change</u></b></p> <p>It is difficult to see how the proposal at THA20 would deliver on WBC's requirement for a minimum provision of 20% energy from onsite renewable sources. Renewable sources would have to cause no harm to residents and to the wider area, especially so close to the AONB.</p> <p><b><u>Siege Cross</u></b></p> <p>WBC has already rejected a planning application for one of the proposed sites. It makes little sense that a site that was unsuitable because of its adverse effect on the local area, is now considered to be suitable, despite being five times larger.</p> <p>I would like to reiterate my objections to the proposal at Thatcham North East as part of the review of WBC's Local Plan.</p>	<p>local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to potential impact on surface water, all new development must include sustainable drainage measures, and development must be avoided on areas that are at risk of surface water flooding. Development on the site will be expected to deliver surface water management approaches that could deliver a net gain for Thatcham town. Drainage and flood attenuation works are included in the IDP.</p> <p>In relation to the concerns on the potential impact on Bucklebury Common, the development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population).</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy</p>

Respondent (with lpr ref)	Response	Council Response
		<p>which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In relation to the Climate Change Emergency, The emerging draft LPR includes a policy that specifically covers climate change (policy SP5). This requires that all development should contribute to West Berkshire becoming and staying carbon neutral by 2030.</p> <p>In addition, all aspects of the local plan are targeting achieving zero carbon. For example: -</p> <ul style="list-style-type: none"> <li>• Policy SP1 (Spatial Strategy) which is the approach to where development should be located, directs development to the most sustainable locations in the district.</li> <li>• Policy SP6 (Flood Risk) directs development to areas least at risk of flood risk.</li> <li>• Policy SP22 (Transport) requires that any development that generates a transport impact will be required, amongst other things, to have regard to West Berkshire’s declared climate emergency and minimise the impact of all forms of travel on the environment.</li> <li>• Policy DC3 (Building Sustainable Homes and Businesses) looks at building sustainable homes and businesses,</li> </ul> <p>Any development site will have to comply with the aims and objectives of the plan.</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and</p>

Respondent (with lpr ref)	Response	Council Response
		<p>visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that ‘in any overall review to accommodate more housing, Thattham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy’ (paragraph 67 of the Core Strategy Inspector’s Report). As additional housing is required, and given Thattham’s status as an ‘Urban Area’ in the development plan is it considered appropriate to consider Thattham for housing.</p>
Mr Simon Pike (lpr2349)	<p>While I would not use these words, the statement in paragraph 6.39 that:</p> <p>“The town’s self-image is of a large village, rather than as a thriving market town.”</p> <p>Conveys why this policy is fundamentally unsound. The development of up to 2500 houses to the north east will just make it an even more over-</p>	<p>Housing and Economic Land Availability Assessment (HELAA) submissions made in response to the Council’s initial LPR Call for Sites highlighted a number of sites being promoted in Thattham. The Council reviewed those sites and published the results; and identified that those of a strategic nature may warrant more detailed testing to better understand their suitability, capacity and viability. At Thattham, the Council identified that this could be achieved through a three-stage process through the Thattham Growth Study, with an emphasis on planning for the future of the settlement as a whole: 1. Thattham Past: Understanding historic growth and associated</p>

Respondent (with lpr ref)	Response	Council Response
	<p>sized village, and will not provide the facilities that create a thriving town.</p> <p>Paragraph 6.22 of the document states that there are ‘uncertainties’ regarding Grazeley, and therefore rules it out as a potential strategic site. There are also uncertainties regarding North East Thatcham.</p> <p>Paragraph 6.36 states:</p> <p>“...in recent decades, the provision of social infrastructure has not kept pace with housing growth”.</p> <p>And paragraph 6.37 states:</p> <p>“The vision for Thatcham contained in the Core Strategy DPD (2012) was that Thatcham town centre would be a focus for regeneration, enabling the town to fulfil its role within the District’s Hierarchy of Centres by improving the retail offer and enhancing the streetscape. The provision of leisure and community facilities for all ages would be improved and encouraged within the town centre.”</p> <p>However, this regeneration has not happened, and additional housing will compound the deficit in facilities and infrastructure that already exists. There is nothing in policy SP 17 to explain how the infrastructure needed for Thatcham as a whole will be delivered, and the Thatcham Strategic Growth Study also does not address this.</p> <p>The status of the Thatcham Strategic Growth Study within the plan is very unclear. It presumably does not form part of the formal Local Plan unless explicitly referenced. The statement in policy SP 17 that:</p>	<p>infrastructure/service provision to identify any under or over provision by current day standards; 2. Thatcham Present: To consider the potential to deliver strategic scale growth, from the point of view of the known physical and environmental constraints of the town and the land being promoted, having regard to the need to deliver measures to mitigate the impact of growth or capitalise on its opportunities; and 3. Thatcham Future: To test in more detail those areas with the potential to accommodate in the order of 3,500 dwellings and associated needs, to confirm their suitability, capacity and viability, so as to include the Growth Study in the Local Plan Review Evidence Base. This figure is notional and was provided by the Council for the purposes of testing, and does not pre-judge what is or should be delivered in Thatcham.</p> <p>The status of the Thatcham Strategic Growth Study is that it forms part of the evidence behind the LPR and does not form part of policy. The policy for the allocation is SP17 contained within the LPR.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>“The Council will be supportive of proposals which have regard, and positively respond, to the masterplanning work contained in the Thatcham Strategy Growth Study (2020).”</p> <p>Is extremely vague. Which elements contained in the Growth Study does the Council believe are important or essential? How would the Council ‘respond’ to proposals that do not have sufficient regard to the Growth Study? This wording seems give licence to developers to ignore any elements of the Growth Study and masterplan that they find inconvenient.</p>	
Alison Messon (lpr2199)	<p>I would like to lodge my strenuous objections to this proposal on a number of grounds</p> <p>The sheer scale of the proposed development is out of keeping with the local area and will take away much of what we value. West Berkshire is known for its green spaces and assortment of characterful villages and towns. This development will decimate the environment, add enormous burden to the local infra structure and will become yet another soulless mass of houses. I have observed similar developments in Chippenham and Trowbridge; they have not enhanced the local area in any way - they have introduced a massive drain on local facilities and remain separate from the local towns. Kennet Heath has just 800 homes and yet already feels separate from Thatcham - the proposed development is 4 times the size.</p> <p>The local traffic challenges with the railway crossing at Thatcham are already considerable, with delays often of 20 mins sometimes 40 mins. The additional traffic this development will cause will compound the situation further. The location means that new residents will be forced to get in their cars to access basic amenities.</p>	<p>Thatcham is an ‘Urban Area’ as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector’s report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there</p>

Respondent (with lpr ref)	Response	Council Response
	<p>I would urge that this proposal is rejected and alternatives with much smaller scale housing developments are considered.</p> <p>I would be happy to write in more detail - but I only discovered these plans in the last couple of days and am horrified by the lack of time to respond appropriately</p>	<p>would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p>
Christine Harris (lpr2211)	<p>I am writing to strongly object to the proposed development above and wholeheartedly endorse the objections by Bucklebury Parish Council and those by Thatcham Town Council.</p> <p>This development is primarily outside the existing planning boundaries and will dramatically encroach upon the separation of Thatcham and Bucklebury as well as reducing the present open lands (“green lungs”) which contain bounteous flora and fauna. In a recently published paper by Cambridge Professor Sir Partha Dasgupta (see “a”) clearly recommends that we should take into consideration the environment and its interaction with modern development and commerce. I can see no account of any real effort to allay any possible destruction of habitat</p>	<p>As part of the preparation of the LPR the council has undertaken a Settlement Boundary Review (SBR). The settlement boundary criteria make clear that boundaries will include sites allocated through the Local Plan process. North East Thatcham is proposed for allocation under policy SP17. Should the site, or any part of it, be removed from the LPR the boundary for Thatcham would be adjusted to exclude it. It is acknowledged that the settlement boundary is currently drawn around the whole of the proposed allocated site at North East Thatcham whilst Policy SP17 notes that development will be expected to deliver ‘a network of green infrastructure which will include a new community park linking Thatcham to the AONB.’ The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and</p>

Respondent (with lpr ref)	Response	Council Response
	<p>and green space. Green space provides us with clean oxygen and a visual break from buildings and helps to reduce stress.</p> <p>It is also seen that pollution dramatically affects birdsong see (“b”) as well as removal of their habitat. We have lost a lot of smaller garden birds in Thatcham due to the massive influx of seagulls and red kites, beautiful as they are, they are not native to a country town, more pollution and encouragement from more people will exacerbate the problem.</p> <p>These houses are not needed in Thatcham there is no evidence that we need such a large amount and all the evidence provided so far is based on pre pandemic times which were dramatically different from today and most likely in the future. We do not know what will be needed then so we should wait and see what transpires before leaping off into the unknown and building such large numbers.</p> <p>I have no objection to smaller developments taking place in vacant areas providing the infrastructure is adaptable, but that is unlikely in much of Thatcham. (Maybe up to 70-100 houses)</p> <p>One of my biggest concerns is the issue of flood waters. We were flooded out in 2007 just weeks after we moved in and are not living in a flood risk area, but the waters came down from The escarpment of the North Wessex Downs, this development will impede the natural flow and all the effort that has gone into the existing flood defence works to provide (so far) protection could be reduced. I know that provision is being made but where will it go to? It could well flow around either side and we get flooded again when not on a flood plain. The effects of the flood then were devastating to wildlife as well.</p> <p>The Discovery centre was underfoot yet the Lower Way development is apparently still on the cards; another “green lung” being removed. I travelled on that day (20/07/2007) up to Southend Bradfield and the</p>	<p>Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. At this stage it is therefore not possible to draw the settlement boundary any tighter. As the LPR progress and more detailed work is done on the sensitivity and capacity of different parts of the site to accommodate development the boundary will be amended accordingly.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council’s website to support the proposed submission version of the LPR, as will the individual assessments.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>roads along the Avenue were underwater, and that is at the top of the hill, so I know how devastating this volume of water can be sand any impediment to it may create potential devastating flooding again.</p> <p>I cannot comprehend why so many developments are taking place near main roads, which produce pollution and the traffic from these developments will only increase that dramatically. This is simply because Thatcham has an extremely poor road system, there is no effective bypass, north to south is impossible because of the rail crossing (lack thereof) and I have not seen any evidence of the developers building new by passes and bridges over the Kennet and Avon and rail line. As the roads get more congested there will be more pollution. It can take 15 minutes and more to use the A4 through Thatcham because of volume and poor traffic light sequencing today, goodness knows what effect this development will have. I have not seen mentioned but it is impossible to read everything in the severely limited time we have, that all these households will be receiving more home deliveries and deliveries in general so that could be thousands of extra traffic movements in addition to the incumbents of the development.</p> <p>The lack of access to the station by car and public transport almost renders the use of railway impossible therefore more cars will be used. "15-minute walk to the Railway Station" has been quoted, that is quite a fast walk and when it is inclement weather, we must be realistic, cars will be used, there is no evidence of many more cycles being used in spite of the massive expenditure on "cycle lanes", people will take the line of least resistance and get in a car.</p> <p>If they go towards Newbury the A4 and Floral Way will become saturated, with more pollution which is madness. If travelling eastwards the villages of Woolhampton will be adversely affected and Bucklebury, Chapel Row Southend Bradfield will become so called "Rat Runs". The Harts Hill road is already a dangerous road and does not need any more traffic. All the village roads are narrow carriageways with</p>	<p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to waste water capacity, the developers are aware of the requirement for upgrades to the water supply network and water treatment works (which is identified in the Water Cycle Study).</p>

Respondent (with lpr ref)	Response	Council Response
	<p>pedestrians. Having lived up in Chapel Row before speeding traffic is a real menace to all.</p> <p>One of the main “bones of Contention” in Thatcham for decades has been the wholly inadequate water treatment works we are constantly bombarded by malodorous and unhealthy odours. This can only seriously affect that. No mention of that as far as can be seen, but not having had any real chance to read the hundreds of pages, no formal notification to Thatcham and Bucklebury residents is quite shameful.</p> <p>The size of this development overall of 2500 dwellings is equivalent to a new village in its own right and similar to Bucklebury and Cold Ash, villages each now. In a location that overlooks a main road (in one part) were there is already pollution and also a large industrial estate. It will despoil existing views of the countryside which will adversely affect local mental health. At a time when it looks like we will need to create more space the intention of these proposals is to reduce what we already have, which will be to the eternal detriment to our children, flora and fauna.</p> <p>On this basis I very strongly object to these proposals and to the fact that public money is being used in the fight for and against.</p> <p>Note:</p> <p>a/Independent report Interim Report – <u>The Dasgupta Review</u>: Independent Review on the Economics of Biodiversity Interim Report of the independent Review on the Economics of Biodiversity led by Professor Sir Partha Dasgupta</p> <p>b/Noise and Light Pollution Impact Songbird Reproduction</p>	<p>Should the development go ahead, it would be phased appropriately to ensure it does not outpace delivery of essential network and treatment upgrades (See IDP).</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an integrated water supply and drainage strategy which will consider existing related infrastructure on the site.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it does not assess the capacity of individual components of the site in relation to individual planning proposals. The LCA will be published as part of the council’s evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site. With any application that would come forward on this site, the developers would be expected to submit a ‘masterplan’ / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p>

Respondent (with lpr ref)	Response	Council Response
	<p><a href="https://news.ncsu.edu/2020/11/noise-and-light-pollution-impact-songbird-reproduction/">https://news.ncsu.edu/2020/11/noise-and-light-pollution-impact-songbird-reproduction/</a></p> <p>It is also seen that pollution dramatically affects birdsong as well as removal of their habitat. We have lost a lot of smaller garden birds in Thatcham due to the massive influx of seagulls and red kites, beautiful as they are they are not native to a country town.</p>	
Alison Smith (lpr2206)	<p>As an Upper Bucklebury resident, I have huge concern over the planned expansion of Thatcham. After all the floods and chaos caused I can't believe this is even being discussed in an area of outstanding infrastructure with no decent access other than a very very already busy a road. I object on the following grounds,</p> <ul style="list-style-type: none"> <li>• Loss of greenbelt land and historic countryside</li> <li>• Loss of habitat and conservation land</li> <li>• Loss of ecology</li> <li>• Over expansion of Thatcham</li> <li>• Inappropriate site for development</li> <li>• Lack of proposed infrastructure to facilitate this development</li> <li>• Increase in traffic and pollution on already busy roads</li> <li>• Concern over flood and land drainage risk to existing properties in Thatcham</li> <li>• There are better sites available within West Berkshire to facilitate housing development, that will have far less impact on local people</li> </ul> <p>I genuinely hope you reconsider before you even get to planning as it is sickening really. You have a huge sandleford opportunity to get on with and would very much appreciate if you left our beautiful green spaces alone.</p>	<p>The site is not within the Green Belt (there is no Green Belt in this District).</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to</p>

Respondent (with lpr ref)	Response	Council Response
		<p>accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to</p>

Respondent (with lpr ref)	Response	Council Response
		<p>local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p>
Eric Lloyd (lpr2197)	As a resident of Upper Bucklebury, I find it incomprehensible that a proposal such as above can be seriously considered so as to dump such a large provision of housing on this in-appropriate green-belt location with the consequential and obvious adverse effect that it will	The site is not within the Green Belt (there is no Green Belt in this District).

Respondent (with lpr ref)	Response	Council Response
	<p>have not only on the residents of Thatcham itself but also on neighbouring villages in the wider surrounding rural area - an Area of Outstanding Natural Beauty.</p> <p>Over the years, Thatcham has suffered an ongoing and exponential expansion in housing development such that it is rapidly becoming an indistinct suburb of Greater Reading with individual villages vanishing in a stream of continuous ribbon development. When the Dunston Park and Thatcham Relief Road (Floral Way) developments were granted planning consent, it was understood at the time that this road would become the boundary for any future Green Belt development northwards but this understanding (or legal planning requirement?) seems to have 'bit the dust'.</p> <p>Apart from this, Thatcham and its surrounding areas are unable to take any further such sized development in the context of its existing infrastructure and amenities.</p> <p>Traffic build up and lack of parking facilities within the town centre are a major problem as existing, without the addition of some likely 3,500 additional vehicles from the proposed development.</p> <p>Waitrose carpark is currently, in normal times, virtually full all day.</p> <p>The Station carpark for Commuters is usually full in normal times and would be unable to cope with any additional demand.</p> <p>The build-up of traffic at the Level Crossing (Bridge proposal seemingly now abandoned), which gets worse and worse, is currently unacceptable. With further trains and further traffic build up, it will make it virtually impossible to cross from the north to the south side of the railway lines on what is a crucial route (despite what Town Planner David Lock says) in normal times. All this is in addition to the adverse</p>	<p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. Mr and Mrs Evans (lpr2092)	<p>We write to add our objection to the building of 2500 new houses along Floral Way, Thatcham.</p> <p>We have read that a new railway bridge at Thatcham is not being considered as it would encourage this route to become a rat run. However, we strongly believe that instead the hundreds of extra cars will use Hart's Hill Road, Broad Lane through to Cold Ash and along down Red Shute Hill towards Hermitage to join the M4 or A34 as an alternative 'rat run'. These roads are totally unsuitable for any increased traffic, they are already in a poor, unmaintained state of repair and in addition pedestrians (including school children) and cyclists use these roads, without footpaths. To increase traffic would endanger lives. Something that WBDC would be culpable for if even one life was lost due to this development.</p> <p>As it stands neither Thatcham not Bucklebury has the infrastructure, nor amenities to be able to support such a development. Normally on sites of this size any schools or other facilities offered are the last to be added, if at all.</p>	<p>Highway works and active travel routes would assist in directing residents to using the A4/Floral Way rather than Harts Hill Road, and using an enhanced cycling and walking network to travel, including to Thatcham train station.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>
The Bucklebury Practice (lpr2313)	<p>We refer to the West Berkshire Local Plan 2037, which we acknowledge includes the building of new homes in the West Berkshire area, we are concerned about the significant impact extra homes will have on the health and wellbeing provision locally.</p> <p>Our GP Practice currently serves over 8,300 patients, which is almost 2,000 more patients than the practice was originally designed to accommodate and an additional 2,500 houses in our local area, could add a further 5,000 + patients to our practice.</p> <p>Maintaining a high quality healthcare service to our patients is a top priority for our practice and therefore we would request that our Doctors and our local colleague Doctors are involved with the council's Local</p>	<p>Comments noted, and the Council acknowledge and welcome joint working and collaboration with service providers such as the doctor's surgery.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Plan 2037 and the effects this will have on our local facilities and services and in particular healthcare services.</p> <p>We would like our concerns and request to be involved, noted by West Berkshire Council and we would request an open dialogue with the local GP Practices, including Chapel Row Surgery who will be particularly affected by the additional housing being considered, at the earliest point in the progress, and throughout the development, of the Local Plan 2037, to ensure all aspects of the development are carefully considered and adequate planning is undertaken regarding the local impact of the plan.</p>	
James Bessant (lpr2315)	<p><i>(Personal information removed)</i> we have only recently become aware of the extensive proposed housing development on the land between Thatcham and where we live.</p> <p>Whilst the need to improve infrastructure in the local area is clearly a priority, expanding the size of Thatcham by such an enormous size will lead to far larger issues in the surrounding areas. Greater investment should be allocated for the existing local infrastructure rather than stressing the area further with such a huge increase in population.</p> <p><i>(Personal information removed)</i> we have noted the excessive amount of traffic which uses the village as a cut through. This is during a period of national lockdown so our expectations are for this to be significantly greater once conditions are relaxed again. If you were to add an extra 2,500 houses (approximately 5,000 cars), this will only exacerbate the issue further. Many of these vehicles significantly exceed the 30mph speed limit creating a real danger to the many people who walk in and around the village.</p> <p>Greater levels of traffic will also cause other issues in the town. The Thatcham railway station is already a significant pinch point with wait times often exceeding 10 minutes (leading to large backlogs of traffic). If this development goes ahead as planned, the existing road network</p>	<p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. However, a development of this nature would not be expected to go ahead</p>

Respondent (with lpr ref)	Response	Council Response
	<p>to cross the railway line is simply not able to cope (by the time you reach the railway gate, it will be coming down again leading to waits of over 30 minutes to get past the barrier). This is not acceptable in a small market town.</p> <p>The wider environmental impact in and around an area of natural beauty is simply not acceptable. This is a rural area and by pushing through such a significant housing estate, there will only be a small area of woodland between Thatcham and Upper Bucklebury. These are two distinct locations and you will effectively be making us into a suburb of Thatcham. The fragile ecosystem in the woodland between the two areas will also be greatly affected by the increase in noise, pollution and people.</p> <p>Common sense needs to be used with neither residents of Thatcham or Upper Bucklebury wishing to see this eyesore development go ahead. Budgets should be prioritised to improve the existing town for the people who already live here rather than spending more to accommodate newcomers who will only further widen the issues that exist within the local community.</p>	<p>without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p>

Respondent (with lpr ref)	Response	Council Response
<p>Natalie Munir (lpr2298)</p>	<p>I would like to formally register my objection to the proposed development of 2500 houses at NE Thatcham for the following reasons:</p> <p>It will dramatically reduce the greenbelt between Thatcham and Upper Bucklebury.</p> <p>The rural nature of this area would be completely lost with Upper Bucklebury becoming part of Thatcham.</p> <p>It would be a massive over development of our beautiful countryside in an area which consists of rolling hills and farmland. If developments of this scale are approved there will not be any open rural areas left for future generations to enjoy.</p> <p>The proposed land is not particularly suitable for development as it is very hilly land and has had issues as a flood plain area.</p> <p>The view that Thatcham is best placed to take a development of this size in this location is misplaced, un-proven and ill-conceived.</p> <p>This development will have a significant impact on traffic levels and the associated pollution throughout the area, especially increasing:</p> <p>Traffic and speeding through Upper Bucklebury, which is already a significant and serious concern, especially as we have children who walk along this road to the Primary School.</p> <p>Traffic from Thatcham through Upper Bucklebury to Chapel Row on roads which are not designed for large traffic volumes.</p>	<p>The site is not within the Green Belt (there is no Green Belt in this District).</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council’s housing requirement development on Greenfield sites on the edge of settlements is necessary. Respondent (with lpr ref)	Response	Council Response
		<p>In relation to the concerns on the potential impact on Bucklebury Common, the development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population).</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>
Mr Kastelnik (lpr2294)	I strongly object to houses being built in this area, this will be an overdevelopment in the Thatcham area, it will impact on the traffic congestion and generate extra pollution, loss of rural countryside and green belt.	<p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p> <p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there</p>

Respondent (with lpr ref)	Response	Council Response
		<p>were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Within the site it is proposed to include a network of green infrastructure which will include a new community park linking Thatcham to the AONB.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham to the AONB.'</p> <p>The site is not within the Green Belt (there is no Green Belt in this District).</p>
Clinton Clay (lpr1265)	<p>After reviewing the proposal I want to formally object to the plan for the following reasons;</p> <p>The number of houses will put enormous strain on the infrastructure which already is unable to cope with normal everyday traffic, causing excessive delays and air pollution. The roads around Thatcham and the local villages will not be safe for pedestrians and cyclists, anyone currently living in these areas are well aware of the dangers. Hart's Hill is particularly dangerous, there is no safe way to walk or cycle along it.</p> <p>This proposal will without doubt inflict more traffic on the narrow lanes around Bucklebury causing extensive damage to hedgerows, banks</p>	<p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead</p>

Respondent (with lpr ref)	Response	Council Response
	<p>and watercourses, impacting wildlife and biodiversity. The current levels of traffic does enough structural damage already.</p> <p>The A4 between Thatcham and Newbury is a bottleneck during peak periods and this can only get worse. The Thatcham railway crossing already causes huge delays.</p> <p>If the development goes ahead then the developers must be forced to include a bridge over the railway at their cost as part of the infrastructure planning. To not do this would be an unforgivable oversight by WBC.</p> <p>Schools, Hospitals and GP surgeries will also come under pressure. In addition Thatcham has insufficient activities for young people and it must be said that the town centre is hardly appealing as a place for entertainment and social activities.</p> <p>The encroachment towards areas of outstanding natural beauty is of concern as once the boundaries become merged the beauty is lost for ever. A small insufficient green boundary of a few meters is not at all adequate.</p> <p>I sincerely hope that comments and objections raised during the review are given serious consideration and that they may affect the size, scope and design of the development.</p> <p>My concern/scepticism is borne by recent major expenditures around the area now destined for housing, all of which seemed out of proportion based on the needs at the time.</p> <ol style="list-style-type: none"> <li>1. The flood alleviation scheme at the bottom of Harts Hill</li> <li>2. The flood alleviation scheme along Tull Way</li> </ol>	<p>without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>3. The massive fresh water pumping station and distribution system part way up Harts Hill.</p> <p>These seemed at the time expensive and unnecessary projects but clearly essential to support a large housing development. I suspect this was the plan all along. Hence my scepticism about this review.</p> <p>Please prove me wrong.</p>	<p>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the AONB and which will provide the context within which any proposed development would need to conform. The LCA notes that whilst there is no strong inter-visibility between the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation.</p> <p>The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' / visual representation, with accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.</p>
Dave Norman (lpr1458)	<p>I am writing to express my alarm and some concerns over the proposed North East Thatcham Development proposal.</p> <p>In my view the proposal is one of gross overdevelopment which encroaches on an AONB, destroys acres of countryside and obliterates the Thatcham green belt. It would leave Thatcham virtually joined to Upper Bucklebury.</p> <p>The need for 2500 houses is also in question.</p>	<p>Thatcham is an 'Urban Area' as set out in the spatial strategy (for the existing Core Strategy and in the LPR), which is a prime focus for housing development, alongside Newbury and the Eastern Urban Area. The Core Strategy allowed Thatcham a period of consolidation following developments within the town, notably the former MOD site. However, the Inspector's report for the Core Strategy notes that Thatcham should be a location to consider for additional housing, in any review to accommodate more housing. More housing is now required, and the Council, mindful of the strategic allocation at Newbury, are exploring further housing development in an Urban Area.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The effect of 2500 properties in the designated area would have a major effect on Upper Bucklebury in terms of traffic. Even without problems on the A4 the road through Upper Bucklebury is extremely busy at certain times of the day. Cars from even half of 2500 houses would add to the dangers and the pollution in the village let alone the hazards on Harts Hill. At night there is also a concern regarding light pollution. There are very few street lights in Upper Bucklebury, just a few on Burdens Heath. Light from the new development would certainly impact on the night sky which at the moment we in the village enjoy. The development would also have a massive detrimental effect on the wildlife which at the moment thrives in the area. The development comes much too close to Blacklands Copse and other natural habitats which would suffer badly.</p> <p>Whilst I am not against developments and house building where necessary, I do feel this proposal has not been thought through properly, raises many environmental concerns as well as potentially destroying precious countryside. Please consider alternative brown field sites which I am sure are available.</p>	<p>The scale of the development is considered to bring about the infrastructure needed to support the development without harming the town. Benefits arise from the development, including formal and informal green infrastructure, active travel routes, education and community facilities, and highway improvements.</p> <p>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government's standard method, which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase to 513 dwellings per annum due to slightly changed housing affordability ratios published in March 2022).</p> <p>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.</p> <p>The Council does not consider there are exceptional circumstances to justify an alternative approach and the available evidence does not support any reduction of the local housing need figure.</p> <p>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The housing requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met.</p> <p>The upper end of the range has been proposed to allow for approximately 5% additional homes The use of a range helps the Council meet the objective of boosting housing supply but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers than the housing need based on the standard methodology.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The HELAA includes brownfield sites that the Council are aware of.</p> <p>The supporting text to policy SP12 (Approach to Housing delivery) of the emerging draft LPR identifies that several sources will ensure a continuous supply of land across the plan period. These include amongst others, existing planning commitments (unallocated sites with planning permission), many of which are brownfield sites.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is</p>

Respondent (with lpr ref)	Response	Council Response
	<p><b>7. The Newbury Weekly News gave the following statement by Hilary Cole</b></p> <p><b>"We are very keen to work with the local community because it is such a big proposal and development for Thattham. We have taken a conscious decision to do this around Thattham so it will deliver the infrastructure we need. We felt that Thattham is best placed to take a development of this size"</b></p> <p><b>What work has been done to work with the local community - I have not seen any attempt to inform the community at large of the proposed development.</b></p> <ol style="list-style-type: none"> <li><b>1. The proposed development will have a significant impact on the level of traffic in the area. The road up Hearts Hill into Upper Bucklebury and then on to Cold Ash or Chapel Row is not sufficient to take the resulting increased traffic.</b></li> <li>2. Upper Bucklebury currently has a problem with traffic speeding through the village - this can only increase with traffic expected to increase by 12%. How has this percentage been calculated? What studies were carried out? Even a 12% increase would have a huge impact in a village where children have to cross the road to reach the primary school and where in some areas there are no footpaths and people often walk along the roads.</li> <li>3. 12% seems to be rather optimistic. With the proposed number of houses it is not difficult to predict that Harts Hill then either travelling through Cold Ash or Chapel Row will in a very short time be used as an alternative route putting residents at risk from excess traffic and the added pollution.</li> <li>4. There is no mention of the development of Thattham Town centre which has been in decline over the past years.</li> <li>5. What budget has been allocated to the "country park" and exactly what is the "country park" going to be?</li> <li>6. Flood risk and surface water drainage does not appear to have been considered – this is of concern in an area where there</li> </ol>	<p>necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>There is no green belt within this area (or within the District) there will be open space maintained along the northern/north eastern part of the site.</p> <p>The separate and distinctive identities of Thattham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways</p>

Respondent (with lpr ref)	Response	Council Response
	<p>was extensive surface water flooding in Thatcham in 2007. Although flood alleviation scheme has been implemented this will not be sufficient if the proposed development goes ahead. Relying of developers for implementing flood alleviation measures, who have a poor record in this area is a huge concern.</p> <p>7. The proposal to increase the size of Thatcham by 25% is a clear example of overdevelopment. The impact on the Town can only be negative. There is already insufficient parking in the town and train station and long traffic delays around the crossing. This does not appear to have been considered. The distance from the development to the train station mean that many will not consider walking a viable option.</p> <p>8. The train crossing currently causes long delays this can only increase with increased traffic.</p> <p>9. The two doctor's surgeries which will be affected initially before a new surgery is built within the development include the Chapel Row surgery where I am registered. Currently this practice is extremely busy and it takes often days if not weeks to arrange for an appointment. Additional patient added to an already oversubscribed practice is likely to put lives at risk.</p> <p>10. The additional visitors to the parish, the common and "Country Park" can only have a detrimental effect on wildlife. Habitats need to be protected and specialist advice should be sought in order to conserve the natural diversity of in the area. A development of this size would threaten the woodlands and rare habitats.</p> <p>11. You cannot overestimate the negative impact of this development on the village of Upper Bucklebury. With the development creeping up the hill, Upper Bucklebury will all but merge with Thatcham, separated by a small area at the end of Long Grove. This cannot be a good thing for the village. The current footpath along Long Grove to Colthrop has in the past year seen increased footfall. This would increase substantially which would inevitably lead to increased repairs and</p>	<p>and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that 'in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy' (paragraph 67 of the Core Strategy Inspector's Report). As additional housing is required, and given Thatcham's status as an 'Urban Area' in the development plan is it considered appropriate to consider Thatcham for housing.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and</p>

Respondent (with lpr ref)	Response	Council Response
	<p>maintenance requirements. Does the council expect the residents of Long Grove to continue to repair and maintain their road for the benefit on non-parishioners?</p> <p>12. What exactly is the Country Park intended to be? It appears to be a narrow strip on the steeper slopes of the area earmarked for development to appear to separate the new Thatcham development from Upper Bucklebury - This has fooled no one. How is the area to be maintained?</p> <p>In conclusion I would like to register my objection to these plans. The impact on Upper Bucklebury will be extremely detrimental to what is currently a peaceful village whose inhabitants value the beauty of and tranquillity of the surrounding countryside. I find it difficult to understand how anyone could believe increasing Thatcham by 25 % could possibly not change the nature of the town, surrounding villages and the area earmarked forever.</p>	<p>lifestyle choices will be important elements of the overall transport plan.</p> <p>An economic advantage of new development is that new residents can help support local shops and businesses and help to boost the vibrancy and vitality of town and local centres.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to potential impact on surface water, all new development must include sustainable drainage measures, and development must be avoided on areas that are at risk of surface water flooding. Development on the site will be expected to deliver surface water management approaches that could deliver a net gain for Thatcham town. Drainage and flood attenuation works are included in the IDP.</p> <p>Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery</p>

Respondent (with lpr ref)	Response	Council Response
		<p>Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>The site alongside the larger site area, is well related to the existing town of Thatcham. It is in close proximity to a range of services and facilities, including the train station. Thatcham is an urban area with a wide range of services and opportunities for employment, community and education. Development of a strategic nature at this site would support the service provision and regeneration that Thatcham requires.</p> <p>The development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population). Highway works and active travel routes would assist in directing residents to using the A4/Floral Way rather than Harts Hill Road, and using an enhanced cycling and walking network to travel, including to Thatcham train station. Residents would make use of the newly provided education facilities on the site, which would not be expected to purposefully attract pupils from Bucklebury primary school.</p>
	<p>I would like to voice my concern and objection to the proposed development of 2,500 houses along the A4 and Floral Way.</p> <p>1. <b>Of the residents of Upper Bucklebury who are aware of the proposal the majority are against the development but there are many residents who are not aware of the application or consultation. 	<p>taken in to account. It is not mentioned in the WBC documentation.</p> <ol style="list-style-type: none"> <li>5. <b>The development links Upper Bucklebury with Thatcham removing the rural aspect of Upper Bucklebury. This is specifically mentioned in the WBC documentation and appears to contradict WBC's intentions?</b></li> <li>6. <b>A previous application was rejected by the secretary of state in 2017. Why are WBC now considering this in light of previous objections? Please can the reasons for this change be circulated to those that will be affected?</b></li> <li>7. <b>The Newbury Weekly News gave the following statement by Hilary Cole</b></li> </ol> <p><b>"We are very keen to work with the local community because it is such a big proposal and development for Thatcham. We have taken a conscious decision to do this around Thatcham so it will deliver the infrastructure we need. We felt that Thatcham is best placed to take a development of this size"</b></p> <p><b>What work has been done to work with the local community - I have not seen any attempt to inform the community at large of the proposed development.</b></p> <ol style="list-style-type: none"> <li>1. <b>The proposed development will have a significant impact on the level of traffic in the area. The road up Hearts Hill into Upper Bucklebury and then on to Cold Ash or Chapel Row is not sufficient to take the resulting increased traffic.</b></li> <li>2. Upper Bucklebury currently has a problem with traffic speeding through the village - this can only increase with traffic expected to increase by 12%. How has this percentage been calculated? What studies were carried out? Even a 12% increase would have a huge impact in a village where children have to cross the road to reach the primary school and where in some areas there are no footpaths and people often walk along the roads.</li> </ol>	<p>sources will ensure a continuous supply of land across the plan period. These include amongst others, existing planning commitments (unallocated sites with planning permission), many of which are brownfield sites.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>There is no green belt within this area (or within the District) there will be open space maintained along the northern/north eastern part of the site.</p> <p>The separate and distinctive identities of Thatcham, Cold Ash and Upper Bucklebury help define those communities and it is acknowledged that should the site be developed there will be a reduction in the physical separation between them. The council is clear that the retention of these actual and perceived visual breaks remain important for the continued retention of the existing settlement form, pattern and character. To that end, any development on the site will be landscape-led and retaining and protecting the separation and identity of individual settlements will be embedded into the design process.</p> <p>Siege Cross was refused on a number of technical issues, including being outside of the settlement boundary, the Council being able to demonstrate an up-to-date 5 year housing supply, adverse impact on education provision, adverse landscape and visual impact, and failure to provide a planning obligation to enable necessary infrastructure and mitigation. As part of the appeal, both the Planning Inspector and the (then) Department for Communities and Local Government (DCLG) considered that, subject to mitigation, the development would be</p>

Respondent (with lpr ref)	Response	Council Response
	<ol style="list-style-type: none"> <li>3. 12% seems to be rather optimistic. With the proposed number of houses it is not difficult to predict that Harts Hill then either travelling through Cold Ash or Chapel Row will in a very short time be used as an alternative route putting residents at risk from excess traffic and the added pollution.</li> <li>4. There is no mention of the development of Thatcham Town centre which has been in decline over the past years.</li> <li>5. What budget has been allocated to the "country park" and exactly what is the "country park" going to be?</li> <li>6. Flood risk and surface water drainage does not appear to have been considered – this is of concern in an area where there was extensive surface water flooding in Thatcham in 2007. Although flood alleviation scheme has been implemented this will not be sufficient if the proposed development goes ahead. Relying of developers for implementing flood alleviation measures, who have a poor record in this area is a huge concern.</li> <li>7. The proposal to increase the size of Thatcham by 25% is a clear example of overdevelopment. The impact on the Town can only be negative. There is already insufficient parking in the town and train station and long traffic delays around the crossing. This does not appear to have been considered. The distance from the development to the train station mean that many will not consider walking a viable option.</li> <li>8. The train crossing currently causes long delays this can only increase with increased traffic.</li> <li>9. The two doctor's surgeries which will be affected initially before a new surgery is built within the development include the Chapel Row surgery where I am registered. Currently this practice is extremely busy and it takes often days if not weeks to arrange for an appointment. Additional patient added to an already oversubscribed practice is likely to put lives at risk.</li> <li>10. The additional visitors to the parish, the common and "Country Park" can only have a detrimental effect on wildlife. Habitats need to be protected and specialist advice should be sought in</li> </ol>	<p>appropriate and contribute to delivering housing in a suitable location. The Inspector noted that the Core Strategy Inspector highlighted that new development might contribute to the improved infrastructure and other changes desired by the Council. The Siege Cross scheme would have the potential to provide financial support, to the benefit of educational, open space and community facilities, and investment in highways and flood control. The benefits of the scheme would not be significantly or demonstrably outweighed by adverse impacts.</p> <p>The Core Strategy Inspector (in 2012) considered that 'in any overall review to accommodate more housing, Thatcham would be a location to be considered again for additional housing, consistent with its position in the top tier of the settlement hierarchy' (paragraph 67 of the Core Strategy Inspector's Report). As additional housing is required, and given Thatcham's status as an 'Urban Area' in the development plan is it considered appropriate to consider Thatcham for housing.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed</p>

Respondent (with lpr ref)	Response	Council Response
	<p>order to conserve the natural diversity of in the area. A development of this size would threaten the woodlands and rare habitats.</p> <p>11. You cannot overestimate the negative impact of this development on the village of Upper Bucklebury. With the development creeping up the hill, Upper Bucklebury will all but merge with Thatcham, separated by a small area at the end of Long Grove. This cannot be a good thing for the village. The current footpath along Long Grove to Colthrop has in the past year seen increased footfall. This would increase substantially which would inevitably lead to increased repairs and maintenance requirements. Does the council expect the residents of Long Grove to continue to repair and maintain their road for the benefit on non-parishioners?</p> <p>12. What exactly is the Country Park intended to be? It appears to be a narrow strip on the steeper slopes of the area earmarked for development to appear to separate the new Thatcham development from Upper Bucklebury - This has fooled no one. How is the area to be maintained?</p> <p>In conclusion I would like to register my objection to these plans. The impact on Upper Bucklebury will be extremely detrimental to what is currently a peaceful village whose inhabitants value the beauty of and tranquillity of the surrounding countryside. I find it difficult to understand how anyone could believe increasing Thatcham by 25 % could possibly not change the nature of the town, surrounding villages and the area earmarked forever.</p>	<p>by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be important elements of the overall transport plan.</p> <p>An economic advantage of new development is that new residents can help support local shops and businesses and help to boost the vibrancy and vitality of town and local centres.</p> <p>The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p> <p>In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures would be built in to the development. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP.</p> <p>In relation to potential impact on surface water, all new development must include sustainable drainage measures, and development must be avoided on areas that are at risk of</p>

Respondent (with lpr ref)	Response	Council Response
		<p>surface water flooding. Development on the site will be expected to deliver surface water management approaches that could deliver a net gain for Thatcham town. Drainage and flood attenuation works are included in the IDP.</p> <p>Development which does not provide adequate and timely infrastructure will not be supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the masterplanning work liaison has taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with infrastructure providers.</p> <p>The site alongside the larger site area, is well related to the existing town of Thatcham. It is in close proximity to a range of services and facilities, including the train station. Thatcham is an urban area with a wide range of services and opportunities for employment, community and education. Development of a strategic nature at this site would support the service provision and regeneration that Thatcham requires.</p> <p>The development would involve a significant amount of open space which would be expected to serve the new population (and benefit the existing population). Highway works and active travel routes would assist in directing residents to using the A4/Floral Way rather than Harts Hill Road, and using an enhanced cycling and walking network to travel, including to Thatcham train station. Residents would make use of the newly provided education facilities on the site, which would not be expected to purposefully attract pupils from Bucklebury primary school.</p>
Catherine Allison (lpr1473)	I Strongly object to the building of 2500 houses on the farmland between upper Bucklebury and the A4 and floral way. This will be detrimental to our wildlife. Animal's bird's butterfly's insects will all be	In relation to wildlife impact, a baseline assessment of the site was undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and

Respondent (with lpr ref)	Response	Council Response
	<p>severely affected and species will die. There's also the question of overdevelopment in this area with. Increased traffic and probably more deaths on the road. Yet more pollution will further affect our neighbourhood and wildlife. We have responsibilities towards the animal kingdom and you will be responsible for many deaths if this development goes ahead. It is a grave mistake to undergo such a devastatingly damaging project.</p>	<p>Economic Land Availability Assessment (HELAA), one of the LPR evidence documents. The covering report from TVERC will be published on the Council's website to support the proposed submission version of the LPR, as will the individual assessments.</p> <p>The updated version of the proposed allocation policy will require that any application is supported by an ecology strategy which will set out how priority habitats and ecological features will be protected and enhanced.</p> <p>In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified that there were not large swathes of the highway network identified as being potentially problematic by the end of the plan period. Having said that, the TA report also acknowledges that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the THA20 development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the transport models used do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared to the 2036 Core Forecast (without development). However, a development of this nature would not be expected to go ahead without mitigation measures and improvements being made to local transport networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the expected increase in traffic as a result of the development. The modelling outputs focus on the impacts for both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation packages. Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and</p>

Respondent (with lpr ref)	Response	Council Response
		<p>lifestyle choices will be important elements of the overall transport plan.</p> <p>In relation to concerns regarding pollution, the LPR includes a range of policies including DM4: Environmental nuisance and pollution, DM5 Water Quality, DM6: Water Resources and Waste Water and DM7: Air Quality. These policies address concerns relating to pollution as they ensure development proposals are considered against their potential impact on contamination, air, light, water and/or noise pollution whilst aiming to help improve local environmental conditions such as air and water quality. These policies have been revised following the regulation 18 consultation to strengthen the Council's policy on pollution.</p>

## Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

### Emerging Draft LPR Policy: SP18 Housing Type and Mix

#### (Proposed Submission LPR Policy: SP18 Housing Type and Mix)

Number of responses received: 13

Respondent (with lpr ref)	Response	Council Response
<b>Statutory consultees</b>		
Greenham Parish Council (lpr903)	Support policy. Greenham Parish Council wishes to strengthen support for community needs housing: including self-build, co-housing, etc. The housing market lacks innovation and fails to meet a wide range of needs. Greenham Parish Council believes that housing designed mainly by and built for those who intend to live in it themselves is generally of a better quality than what the major volume home builders produce.	Comments noted. The final paragraph of the Policy gives Council support for the development of housing schemes that are initiated by local communities involving affordable housing, co-housing, community self-build, or housing for people with specific needs such as older people or those with disabilities.
Hungerford Town Council (lpr141)	Support policy	Support noted
Newbury Town Council (lpr2257)	We broadly support this policy. <b>Reason:</b> We wish to strengthen support for community needs housing: self-build, co-housing, etc. The housing market lacks innovation and fails to meet a wide range of needs. We believe that housing designed mainly by and built for those who intend to live in it themselves is generally of a better quality than what the major volume home builders produce, because their main duty is maximising shareholder profit, and they have to an unhealthy extent dominated the land market.	Comments noted. The Council's starting position should be to look favourably upon schemes initiated by the local community. Amend final paragraph of Policy as follows: 'In order to support local communities to meet their housing needs the Council <del>may</del> <u>will normally</u> support the development...'

Respondent (with lpr ref)	Response	Council Response
	<p><b>Change Proposed:</b> In last paragraph, change “may” to “will normally” in first line.</p> <p>Amend 6.53 in supporting text by adding sentence at end: “The definition of ‘local community group’ includes any such group including members having a connection to West Berkshire.”</p>	<p>Also amend supporting last paragraph by adding the following at the end:  <u>‘Local communities includes any group with members that have a connection to West Berkshire, for example residents or people who work in the District.’</u></p>
Shaw-cum-Donnington Parish Council (lp212)	Support policy	Support noted
Stratfield Mortimer Parish Council (lpr403)	<p>Support the policy in general BUT it does not allow for NDPs to set more demanding requirements e.g. number of bungalows for downsizers.</p> <p>Suggest that wording be included to enable NDPs to set more demanding requirements if justified by way of an assessment of need conducted by a qualified independent body.</p>	<p>Comments noted.</p> <p>Neighbourhood plans can set requirements that differ to those set out in Local Plan policies if supported by appropriate evidence of local need, such as a local housing needs survey. The requirement would also need to be in general conformity with the strategic policies of the Local Plan (including strategic Policy SP18). A Housing Needs Assessment would need to be produced by the neighbourhood planning group in order to demonstrate whether there is evidence to justify a departure from the LPR policy.</p> <p>Given the expected increase in the number of older people during the plan period and the specific needs of those with long-term health conditions and disabilities, there is a requirement for homes which are adaptable and accessible. The provision of low level accommodation can assist in this, although it is recognized that bungalows are relatively land intensive and have viability issues. The Policy has been amended by the addition of criteria to require all new dwellings to meet the higher accessibility standards under Part M4 (2) of the Building Regulations.</p>
Thatcham Town Council (lpr1402))	Support policy.	Comments noted

Respondent (with lpr ref)	Response	Council Response
	We agree that a mix of housing will be required that needs to be reviewed regularly to reflect demand.	
<b>General consultation bodies</b>		
<b>Other stakeholders</b>		
Julian Dobbins (lpr2457)	<p><i>[Comments also in SP17 lpr1257]</i></p> <p><b>Failure to acknowledge housing needs based on household type, nor recognise the opportunities for commercial property re-use and town centre regeneration</b></p> <p>SP12 (Approach to Housing Delivery) states:  <i>Provision will be made for 8,840 to 9,775 net additional homes in West Berkshire for the period 1 April 2020 to 31 March 2037; 520– 575 dwellings per annum. The target figure of 575 dwellings per annum does not constitute a ceiling or cap to development.</i></p> <p>In the most recent ONS household forecast data, which covers the period 2018 - 2028, the entirety of West Berkshire's housing growth is described as 2482, suggesting a 'necessary' annual figure (at least for the period covered) much lower than put forward in this proposal.</p> <p>Furthermore, regarding housing mix, the proposal (table 3 in SP12) shows that 60% - 70% of Market housing and 35% - 45% of Affordable housing will be 3 or 4 bedroom houses. ONS data shows that by far the highest growth in housing demand for West Berkshire will come from one-person households (10.7%, versus growth rates of -6%, -8.9% and -11.2% for families with 1, 2 or 3+ dependent children respectively).</p> <p>Given the housing mix suggested by the ONS forecast data, the proposal seems completely out of touch with the reality of local needs. In light of the changing nature of town centres, as retail moves on online, and an ageing population needing access to public transport, does it not make much more sense to repurpose unused commercial property for residential use, and in doing so change the declining nature of the high street, provide easier access to local facilities (especially for the ageing population) and reduce</p>	Comments noted. As they relate to Policy SP17 they will be considered as part of the Council's response to comments made under that policy.

Respondent (with lpr ref)	Response	Council Response
	dependency on short car journeys clogging our streets and adding to the community's carbon footprint?	
Richard Foster (lpr2453)	<p>Object to policy.</p> <p><b>Affordable Housing</b></p> <ol style="list-style-type: none"> <li>1. Policy SP 18 says that the Council <b>may support</b> schemes that <b>may involve</b> affordable housing etc. Too many “<b>mays</b>”! This is real cop-out stuff. It should say that the Council <b>will require the implementation of</b> schemes that <b>provide</b> affordable housing etc.</li> <li>2. The council must ensure that affordable housing is built to the same standards as the remainder of the development and that the consequent reduction in developers' profits caused by reduced pricing must not be allowed to reduce or compromise their provision of infrastructure and services as mentioned in the section above</li> </ol>	<p>Comments noted .</p> <p>The Council agrees that the starting position should be to look favourably upon schemes initiated by local communities.</p> <p>Amend final paragraph of Policy as follows: ‘... the Council <del>may</del> <u>will normally</u> support the development...’</p> <p>The Council agrees that affordable housing must be high quality and will be expected to meet the same standards and policy requirements as open market housing. The Council considers that no change is required to this policy because these expectations are well established elsewhere in the Plan, including in Affordable Housing Policy SP19.</p>
Paula Saunderson (lpr967)	<p>Whilst answering this I cannot see Table 4 but if it does not include a breakdown of existing stock by type and mix than this LPR should be put on hold until that work is completed</p> <p>Likewise Population growth figures will need reviewing given a static or falling birth rate, a rising death rate, and a decrease in life expectancy - all existing trends and not just due to the pandemic.</p>	<p>Comments noted.</p> <p>Typographical error which will be corrected. Policy should refer to the requirements of Table 3 in the supporting text and not Table 4.</p> <p>The Local Plan housing requirement is informed by a number of factors including existing stock and population projections.</p> <p>An important starting point is to understand the current balance of housing in the area. Table 6.3 of the updated Local Housing Need evidence undertaken by Icen, July 2022 provides a breakdown in the sizes of homes in different tenure groups across areas. See also SHMA, 2016 and previous LHN assessment, 2020. The data shows a market stock (owner-occupied) that is dominated by 3+-bedroom homes making up 79% of the total in this</p>

Respondent (with lpr ref)	Response	Council Response
		<p>tenure group, a slightly higher proportion than seen in other locations.</p> <p>Table 3 sets out an updated the future required mixed and type of housing to be provided.</p>
<p>Sovereign Housing Association Ltd. (lpr2162)</p>	<p>We would ask that table 3 “Housing size by number of bedrooms” be used as a start point, and that flexibility be built in where HA’s would support a variation to the mix - responding to prevailing conditions that suggest a different mix would be appropriate.</p> <p>As a key stakeholder SHA would welcome the opportunity to be involved earlier in the engagement process where the location and mix of tenure of new homes delivered through s.106 planning arrangements are agreed (even if SHA might not ultimately, be successful in purchasing the homes from the developer). This could be an opportunity to influence policy cross-over, and tenure mix - to create balanced communities. For example we have seen limited demand for 1 bedroom accommodation in less accessible locations where they would be more suited to a town centre environment for a large allocation.</p> <p>One clear impact of Covid-19 is that housing intelligence shows a drop in demand for apartments, and a growing desire for outside space, study spaces, and preference for maisonettes rather than flats for multi occupant households.</p> <p>On suburban schemes we have seen a preference by developers to build flats where 1 and 2 bed accommodation is mentioned, we would prefer to see maisonettes and housing where appropriate with outside space - ideally garden space, but with balconies as a secondary option.</p> <p>SHA is developing a Live Well Age Well approach to how we can provide housing options, support and services to help our communities to Live Well. This ties in well with the aims of the Housing Strategy and we would want to work closely with the Council to develop some local approaches to Ageing Well in West Berkshire.</p> <p>Local population growth is largely amongst older age groups. What do we know about their housing needs? Meeting the needs of older people appears to be seen in terms of bricks and mortar. How do we enable this group across the borough?</p>	<p>Comments noted.</p> <p>The housing mix expected in the policy is based on the Strategic Housing Market Assessment, Housing Needs Evidence, and affordable housing viability report.</p> <p>The policy for a mix of homes does not prescribe the size and type of homes. It is the starting point for individual sites which developers will be expected to have regard.</p> <p>The Council's view is that the policy already provides sufficient flexibility to allow for deviation from the expected housing mix, including evidence related to site viability or changes to other evidence, and no changes to the policy are therefore needed. Clearly site locations and characteristics as well as viability would play a part in the exact final determination of the exact type and mix. The Council is committed to working with and consulting all stakeholders and interested parties as part of the planning application process.</p> <p>Updated evidence on the housing needs of the elderly population has been established in the Local Housing need Assessment, 2022 and taken into account in revised Policy DM 19: Specialist Housing Provision in the publication version of the plan.</p>

Respondent (with lpr ref)	Response	Council Response
Councillor Tony Vickers (lpr553)	<p>Support policy. We broadly support this policy, especially the emphasis on a mix of unit sizes and tenures. We wish to strengthen support for community led housing of all kinds. Changes sought; In last paragraph, change “may” to “will normally” in first line. Amend 6.53 in supporting text by adding sentence at end: “The definition of ‘local community group’ includes any such group including members having a connection to West Berkshire.”</p>	<p>Comments noted</p> <p>The Council agrees and will look favourably upon schemes initiated by local communities. Amend final paragraph of Policy as follows: ‘... the Council may <u>will normally</u> support the development...’</p> <p>Also amend supporting last paragraph by adding the following at the end: <u>‘Local communities includes any group with members that have a connection to West Berkshire, for example residents or people who work in the District.’</u></p>
<b>Landowners, site promoters and developers</b>		
Royal & Sun Alliance PLC (lpr2111)	<p><i>Part of full representation on behalf of Royal &amp; Sun Alliance Insurance promoting residential development at Greenham Road Retail Park</i></p> <p>Policy SP18 relates to housing mix for all forms of residential development. It outlines that developments should provide a mix of dwelling sizes that reflects the requirements of the local housing need evidence. Policy SP18 provides the target unit mix: The proportions of family sized accommodation (3 bedrooms or more) for market and affordable tenures that is being sought in policy is wholly unrealistic for many urban, town centre developments. In light of the Council’s substantial housing targets, we would recommend that the Borough’s housing mix policy allows for greater flexibility and is not indiscriminately applied to all developments. Policy SP18 does acknowledge that site size and location could mean a deviation from the preferred mix would be acceptable, but in our view, greater emphasis should be placed on this as a consideration. As written, said policy could have the unintended consequences of making development unviable and undeliverable and so does not meet the requirements of NPPF Paragraph 16. Changes sought:</p>	<p>Comments noted.</p> <p>The housing mix expected in the policy is based on the Strategic Housing Market Assessment, 2016, Housing Needs Evidence, 2020 and affordable housing viability report.</p> <p>There has also been an update to the LHN evidence by Iceni projects in July 2022 which is taken into account in the review of the housing type and mix required.</p> <p>The Council’s view is that the policy already provides sufficient flexibility to allow for deviation from the expected housing mix, including evidence related to site viability or changes to other evidence. No change to the policy is therefore considered necessary.</p> <p>The policy for a mix of homes does not prescribe the size and type of homes. It is the starting point for individual sites which developers will be expected to have regard.</p>

Respondent (with lpr ref)	Response	Council Response
	We would recommend that the Borough's housing mix policy allows for greater flexibility and is not indiscriminately applied to all developments.	
Lichfields for North East Thatcham consortium (lpr2401)	<p>In the context of overall housing needs the NPPF paragraph 61 states that: <i>"...the size, type and tenure of housing needed for different groups in the community should be assessed and reflected in planning policies (including, but not limited to, those who require affordable housing, families with children, older people, students, people with disabilities, service families, travellers, people who rent their homes and people wishing to commission or build their own homes)"</i>.</p> <p>The PPG contains specific guidance on how the needs of different groups can be assessed (ID: 67-001 to ID: 67-010 and ID: 63-001 to ID: 63-019).</p> <p><b>Review of Policy SP18</b></p> <p>Policy SP18 requires that residential development should provide 'an appropriate' mix of dwelling tenures, types and sizes to meet current and future needs. The policy directs developments to the mix set out in Table 3 of the draft plan which is the mix identified within the Berkshire SHMA (and subsequent update) or to any more recent evidence published by the Council. Where there is deviation from this mix, it states the Council will have regard to the most up-to-date evidence, appropriate mix based on site size and location, physical factors (for conversions or redevelopment) and viability.</p> <p>With regards to the mix set out in the Berkshire SHMA, the Council should be aware that it represents the overall mix of housing across the district that would be appropriate across the plan period. This could be used by the Council for, for example, monitoring purposes. The Berkshire SHMA itself states:</p> <p><i>"The mix identified ... should inform strategic Local Authority District-wide policies. The mix on any individual site should have regard to the overall need for housing but also consider the character of the site and its surroundings, the characteristics of the housing within the locality, and the accessibility of the location to services and facilities."</i> (Berkshire SHMA p.297).</p> <p>It is not necessary to apply the SHMA's mix to every site individually in order</p>	<p>Comments noted.</p> <p>The housing mix expected in the policy is based on the Strategic Housing Market Assessment, 2016; Housing Needs Evidence, and affordable housing viability report. The Council's view is that the policy already provides sufficient flexibility to allow for deviation from the expected housing mix, including evidence related to site viability or changes to other evidence.</p> <p>The policy for a mix of homes does not prescribe the size and type of homes. It is the starting point for individual sites which developers will be expected to have regard.</p> <p>No change to the policy is needed in this regard.</p> <p>It is a requirement for local plans to be reviewed every five years from adoption at which time the type of housing required will be reviewed using more up to date information available and amended where necessary.</p> <p>Iceni Projects Limited has also produced a further update to the 2020 Local Housing Need evidence document in July 2022. The evidence and findings from which have been taken into account in reviewing and revising of the Policy and the mix of housing by size and tenure.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>to achieve the overall mix identified for the plan period; in fact, it is unlikely that this would be feasible or appropriate. The mix on any site will need to reflect local market demand at the time of delivery and the nature of the surrounding area, in addition to factors such as viability, design and physical constraints. The Council should also be aware of the risks of setting a housing mix policy for a 16-year period on the basis of an evidence document which pre-dates the base year significantly, particularly given that the pandemic could results in changes the ways in which people occupy housing and, as a result, the demand for different types of housing.</p> <p>Changes sought:</p> <p>We would advise against pursuing a policy which seeks to apply a mix from an evidence document which will be produced in the future since, by definition, that evidence has not been tested through the local plan examination process. We would suggest that the reference in SP18 to “<i>or any more recent evidence published by the Council</i>” be removed.</p> <p>On this basis, we would suggest removing reference to the specific mix set out in the Berkshire SHMA from Policy SP18, or, at the very least, state that the Berkshire SHMA will be used as a <i>starting point</i> for mix but that the final mix on any scheme will reflect local, up-to-date evidence, viability, constraints and other relevant factors.</p>	

## Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

### Emerging Draft LPR Policy: SP19 Affordable Housing

#### (Proposed Submission LPR Policy: SP19 Affordable Housing)

Number of responses received: 30

Respondent (with lpr ref)	Response	Council Response
<b>Statutory consultees</b>		
Greenham Parish Council (lpr904)	GPC strongly supports this policy The reference to the need for all affordable housing to be “built to net zero carbon standards” is welcomed. This is provided similar policies are adopted nationally by LPAs, economies of scale for developers should ensure that the cost of making homes both affordable and sustainable in climate terms should not be excessive.	Comments noted
Hungerford Town Council (lpr142)	We strongly support this policy and welcome the net zero carbon standard for affordable homes in order to support addressing the climate emergency and reduce fuel poverty in these homes.	Comments noted
Newbury Town Council (lpr2256)	We strongly support this policy. <b>Reason:</b> The reference to the need for all affordable housing to be “built to net zero carbon standards” is welcomed. For those who cannot afford market rents or mortgages, the cost of heating and powering their homes is especially important. Provided similar policies are adopted nationally by LPAs, economies of scale for developers should ensure that the cost of making homes both affordable and sustainable in climate terms should not be excessive.	Comments noted

Respondent (with lpr ref)	Response	Council Response
Shaw-cum-Donnington Parish Council (lpr213)	<p>We support the numbers.</p> <p>We are concerned with viability where developers have appealed against affordable requirements with viability assessments. Developers have often purchased land at a high price and then expect to maintain their profit by omitting the affordable housing. In our view that is a problem for the developer. The affordability requirements should only be relaxed in exceptional circumstances, for example with contaminated land.</p> <p>How do you ensure that “affordable houses will be built to net zero carbon standards...”. Although a desirable requirement, this would seem to be a matter for building regulations. Although we do not understand how it could be achieved we support the aim.</p>	<p>Comments noted</p> <p>National planning policy and statutory guidance on viability in planning was revised in 2018 and these changes have been considered in the drafting of this policy.</p> <p>Requirements for new development to meet expected standards will be implemented via development management S.106 agreements and conditions.</p>
Stratfield Mortimer Parish Council (lpr404)	Support Policy	Support noted
Thatcham Town Council (lpr1403)	<p><i>Full representation relating to north east Thatcham strategic site allocation attached to representation on SP17.</i></p> <p>We broadly agree with the ambition for affordable housing but draw attention to the resident survey (Annex) in which responses indicate a much stronger demand for protection of green space than the availability of affordable homes.</p> <p>We agree with the statement "Affordable homes will be built to net zero carbon standards". This should reduce energy poverty and ensure high quality living standards</p>	Comments noted
Reading Borough Council (lpr1490)	<p>RBC and WBDC both continue to recognise the importance of provision of affordable housing in the area. The Western Berkshire Housing Market Area continues to have significant problems of affordability and a substantial need for affordable homes. Delivering as much affordable housing as possible within West Berkshire will help to avoid placing greater pressure on adjoining authorities, including Reading where there are significant existing affordable housing needs.</p> <p>RBC therefore supports WBDC's strong commitment to delivering affordable housing, particularly on sites of fewer than ten dwellings and</p>	<p>Comments noted</p> <p>The evidence of affordable housing needs in the West Berkshire Viability Assessment testing support affordable housing contribution on sites of 5 or more dwellings.</p>

Respondent (with lpr ref)	Response	Council Response
	would further support a requirement for contributions from sites of fewer than five dwellings. RBC's own experience has demonstrated that sites of fewer than five dwellings can indeed make an important contribution to affordable housing. In fact, as illustrated in our Annual Monitoring Report, these sites are most able to regularly meet our requirements for off-site contributions.	
<b>General consultation bodies</b>		
Defence Infrastructure Organisation (lpr2075)	<p>Single Living Accommodation (SLA) &amp; Service Families Accommodation (SFA):</p> <p>In summary, single living accommodation (SLA) is provided to meet operational needs on MOD establishments and is ancillary to its use. Service Families Accommodation (SFA) is provided to meet a specific need, has no commercial value and is subject to national guidance on its location, use and provision of supporting facilities. The close link between military bases and SFA allows for an appropriate support network to be provided to its residents, especially for dependents during times such as overseas deployments.</p> <p>The method for assessing SFA rents is set at a national level and service families pay a subsidised rental charge as set by the Armed Forces Pay Review Board. The Board sets the rates to be charged to service personnel for their accommodation as well as their pay. The SFA rates are set out in Tables 4.1 and 4.2 of the Armed Forces' Pay Review Body Forty-Third Report March 2014. This document is available on the <a href="https://www.gov.uk">www.gov.uk</a> website (see <a href="https://www.gov.uk/government/publications/armed-forces-pay-review-body-43rd-report-2014">https://www.gov.uk/government/publications/armed-forces-pay-review-body-43rd-report-2014</a>). The SFA rental rates are significantly lower than general market housing rental levels in recognition of the special circumstances that apply including the tied nature of the properties and lack of choice. The value of future income streams will not be sufficient to cover the basic build costs and infrastructure procurement and running costs (the latter of which will be significant).</p> <p>It is therefore recognised that SFA directly provided by the MOD should be considered in the same way as affordable housing provided by a Registered Provider. In both instances, there is an element of subsidy, which sets it apart from housing that is either sold or rented, without restriction, through</p>	Comments noted. However, eligibility for mandatory social housing relief from the Community Infrastructure Levy is set nationally by the Government through the Community Infrastructure Levy Regulations 2010 (as amended). Single Living Accommodation and Service Families Accommodation are not currently eligible for mandatory social housing relief from Community Infrastructure Levy under these regulations.

Respondent (with lpr ref)	Response	Council Response
	<p>the open market. Both parties recognise that the SFA to be developed by the MOD will not be a commercial proposition and can only be delivered with substantial amounts of public funding. As such, there is no commercial viability in its provision. It is therefore logical given the considerations discussed within this statement that SFA should have a zero charge for CIL, following the practice that is applied to affordable housing. Such an approach accords with the definitions in the NPPF of affordable housing and essential local workers.</p> <p>Unlike general market housing, the design and specification of SFA developments are subject to national guidance set out in Joint Service Publications (JSPs) (see <a href="https://www.gov.uk/government/publications/jsp-464-tri-service-accommodation-regulations-tsars">https://www.gov.uk/government/publications/jsp-464-tri-service-accommodation-regulations-tsars</a>). This means higher build costs than might normally be expected would be incurred and community infrastructure costs to be met as part of the development for all SFA residents. In accordance with the relevant Scale 25 within JSP 3151 the MOD will provide the following facilities alongside their SFA development:</p> <ul style="list-style-type: none"> <li>(i) Community Centres</li> <li>(ii) Childcare Facilities</li> <li>(iii) Youth Centres</li> <li>(iv) Publicly Funded Welfare Facilities</li> </ul> <p>SFA will not be released onto the open market or use for any other purpose than for SFA without the approval of the planning authority. This will ensure that the SFA 'housing' is developed and managed for its intended purpose, rather than open market housing. Such an obligation would also ensure that if the SFA becomes surplus to MOD requirements and is released in the open market the need to provide for affordable housing would be triggered.</p>	
Newbury Society (lpr1148)	<p>The target is mainly housing for sale, sometimes categorised as “executive homes.” We feel that there is a need for more affordable housing locally, and that council guidelines have not always been followed in major developments. We would draw attention to the “urban village” development in Newbury, where in spite of what is effectively a multi-million-pound subsidy from West Berkshire Council, only 13 of the 232 dwellings (less than six per cent) are categorised as “affordable.” Housing development on the</p>	<p>Comments noted. However, the proposed amended policy sets out an indicative tenure mix for the provision of affordable housing of 70% social rent, 25% First Homes (discounted homes for sale), and 5% shared ownership. Therefore, the target is not mainly homes for sale.</p>

Respondent (with lpr ref)	Response	Council Response
	London Road Industrial Estate (where the land is owned by the council) should include a high proportion of social and affordable housing.	
Reading West Berkshire Labour Party Branch (lpr1178)	<p>With regard to affordable housing we believe it is unlikely that WBC will reach its targets and the needs of the community. We therefore propose that the local plan should include a commitment to initiate house building by the council (WBC) so that future affordable housing, including social housing, needs can be achieved.</p> <p>Changes sought: That the local plan is amended to include a commitment that West Berkshire Council should build affordable houses in order to meet affordable housing targets and community needs.</p>	<p>Comments noted. Delivery of housing in the District to meet local needs is a priority for the Council. The Council has an investment strategy that includes increasing affordable housing delivery. The Council supports the Affordable Housing Programme working with Registered Providers to deliver more than 100 units per year. In addition, the Council has several delivery vehicles including the Joint Venture with Sovereign Housing Association. The Council is also developing a Housing Company to acquire affordable market rent properties.</p>
Home Builders Federation (lpr1951)	<p><i>Contributions on sites not considered to be major development.</i></p> <p>Our first concern is that in amending this policy from that set out in the 2012 Core Strategy the Council has not amended the requirement for developments of between 5 and 9 units to make a contribution to affordable housing provision. The NPPF is very clear at paragraph 63 that “<i>Provision of affordable housing should not be sought for residential developments that are not major developments, other than in designated rural areas</i>” and as such the Council must remove this requirement.</p> <p>In considering its position it is important that the Council recognise why Government introduced this particular policy. The Ministerial Statement that first set out the policy now adopted in the NPPF was clear that the reason for introducing this policy was to “<i>ease the disproportionate burden of developer contributions on small scale developers</i>”. This is distinct from whether or not such development is viable in general but whether they are a disproportionate burden on a specific sector that faces differential costs that are not reflected in general viability assessments.</p> <p>These costs have led to a reduction in the number of small and medium (SME) sized house builders. Analysis by the HBF (3) shows that over the last 30 years changes to the planning system and other regulatory requirements, coupled with the lack of attractive terms for project finance, have led to a long-term reduction of total SME house builder numbers by</p>	<p>Comments noted.</p> <p>Under paragraph 64 of the NPPF, 2021 the provision of affordable housing should not be sought for residential developments that are not major developments, other than in designated rural areas (where policies may set out a lower threshold of 5 units or fewer).</p> <p>Annex 2 of the NPPF defines <b>Designated rural areas</b> as National Parks, Areas of Outstanding Natural Beauty and areas designated as ‘rural’ under Section 157 of the Housing Act 1985.</p> <p>74% of West Berkshire is AONB with a large part of the remaining area designated as rural under Section 157 of the Housing Act 1985. The Council is therefore justified in seeking the provision of affordable housing on sites of 5 or more dwellings. This accords with the NPPF.</p> <p>Most of the parishes outside the AONB in West Berkshire are Designated Rural Areas. These are set out in Schedule 1 of Statutory Instrument 1997 No. 625 - The</p>

Respondent (with lpr ref)	Response	Council Response
	<p>about 70% since 1988. The Government is very anxious to reverse this trend and increase the number of small businesses starting up and sustaining this activity. Improving business conditions for SME home builders is also, as outlined above the key to long-term supply responsiveness.</p> <p>We recognise the importance of addressing the poor affordability within West Berkshire. However, in addressing the issue of affordability and affordable housing provision we would suggest that the Council are unlikely to address these concerns through affordable housing delivery on smaller sites of between 5 and 9 units. The policy is more likely to reduce the attractiveness of such sites and limit opportunities to SME house builders - the primary objective of this policy.</p> <p><i>Level of contribution</i></p> <p>The viability evidence presented by the Council indicates that viability in some scenarios across the Borough is mixed and sensitive to an increase in the cumulative costs being placed on it through this local plan. In particular we note that scenarios involving previously developed land (PDL) in lower value areas would struggle to meet the policy costs being placed on it by the Council. In some cases, even greenfield scenarios in lower value areas would appear to be unviable or marginally viable at the proposed levels of affordable housing contribution.</p> <p>As such the Council should consider whether greater variation could be included within the policy than is currently being proposed. The Government's approach to planning contributions is to ensure that negotiations on regarding these are significantly reduced. This will, in some cases, require policies to set out a greater variety of contributions that reflect the nature of viability in different locations and on different types of site. For example, the Council differentiate between PDL sites and greenfield sites on the basis that the former is less viable than the later. However, on PDL sites the Council's evidence indicate that such development in lower value areas would be either unviable or on the margins of viability with a 30% affordable housing contribution. We recognise that not all scenarios can be reflected, and as such welcome the ability to negotiate in some circumstances, but in order to reduce the potential for negotiation we would suggest further variation is provided in the policy.</p>	<p>Housing (Right to Acquire or Enfranchise) (Designated Rural Areas in the South East) Order 1997.</p> <p>Furthermore whole plan viability assessment concluded that the requirement for the provision of 20% of affordable housing on small sites of 5-9 dwellings would be viable.</p> <p>National planning guidance on viability states that affordable housing policy requirements should be informed by evidence of affordable housing need and a proportionate assessment of viability; and that affordable housing policy requirements should allow for the planned types of sites and development to be deliverable, without the need for further viability assessment at the decision-making stage.</p> <p>The proposed policy has been drafted with regard for national planning policy and guidance, and the Affordable Housing Viability study and Whole Plan Viability assessment. Based on this evidence, the requirement set out in the proposed policy is considered to be both appropriate and deliverable. The Council considers that the evidence does not support a variation in the requirement.</p> <p>National guidance also provides scope for applicants to demonstrate whether circumstances justify the need for a viability assessment at the application stage. The proposed policy allows for applicants to justify exceptional circumstances through clear evidence in a viability assessment. This aligns with national guidance and provides sufficient flexibility if needed at the decision making (planning application stage).</p>

Respondent (with lpr ref)	Response	Council Response
	<p>(3) <a href="http://www.hbf.co.uk/?eID=dam_frontend_push&amp;docID=25453&amp;filename=HBF_SME_Report_2017_Web.pdf">ttp://www.hbf.co.uk/?eID=dam_frontend_push&amp;docID=25453&amp;filename=HBF_SME_Report_2017_Web.pdf</a>            Changes sought: Council must remove the requirement for developments of between 5 and 9 units to make a contribution to affordable housing provision.            With regard to level of contribution we would suggest further variation is provided in the policy.</p>	<p>The whole plan viability assessment concludes that the provision of affordable housing on small sites would be viable. In addition, the requirement for small sites in West Berkshire to provide affordable housing contributions is justified because of the specific local circumstances including constraints such as the AONB.</p>
West Berkshire Green Party (lpr1841)	<p>The existing formula for affordable housing has not delivered appropriate levels of low-cost housing, particularly homes for social rent which have been well under 10% of housing completions in recent years. This is probably largely a result of developers reducing the proportion of affordable homes (citing viability). As a result West Berkshire lags behind other local authorities in the provision of social housing. This would be rectified by:</p> <ol style="list-style-type: none"> <li>1) Removing the ability of developers to use “viability” as an argument to reduce affordable homes requirements (viability would be achieved by reducing the price paid for development land).</li> <li>2) Allowing developers to provide comparable alternative sites to achieve the mix required (within reason).</li> <li>3) Using the Sovereign JV and proposed WBC Housing Company to proactively develop affordable homes and homes for social rent to “top up” volume from private developments.</li> <li>4) Setting an annual target of 200 homes for social rent to be achieved by the above methods until the proportion of homes owned and managed by HA and other registered providers reaches the national average of 17.1% (currently 13.4% – draft housing strategy).</li> </ol>	<p>Comments noted</p> <p>The proposed policy has been drafted in accordance with national policy and guidance on viability which was updated in 2018 to address these concerns.</p> <p>The proposed policy as drafted already allows developers to provide affordable housing on an alternative site within the District, in exceptional circumstances.</p> <p>Delivery of housing in the District to meet local needs is a priority for the Council. The Council has an investment strategy that includes increasing affordable housing delivery. The Council supports the Affordable Housing Programme working with Registered Providers to deliver more than 100 units per year. In addition, the Council has a number of delivery vehicles including the Joint Venture with Sovereign Housing Association. The Council is also developing a Housing Company to acquire affordable market rent properties.</p> <p>The proposed policy requires 70% of the total affordable housing provided to be social rent homes. Based on the proposed housing delivery requirement of 8,721 – 9,146 over the plan period and the proposed 30% affordable housing requirement, this could deliver approximately 1,831 – 1921 social rent homes over the plan period.</p>

Respondent (with lpr ref)	Response	Council Response
North Wessex Downs AONB (lpr1628)	<p>The AONB is in need of affordable housing which is not reflected within this policy. Local people are unable to stay local when wishing to buy a property as they are priced out of the market merely because of the designated landscape status. Services centres and villages need affordable homes for younger generations to afford to buy and stay local which ultimately supports local services such as primary schools and local employment areas.</p> <p>Changes sought: The NPPF gives support to the provision of affordable housing in designated rural areas on sites of 5 units or fewer. We would request that this is included, either as on site or off-site provision.</p>	<p>Comments noted. However the viability evidence underpinning the plan suggests that requiring affordable housing on sites of 5 units or fewer would not be deliverable. The rural exception sites policy (DM17) allows for the provision of 100% affordable housing schemes on sites adjacent to rural settlements in the AONB to meet local need.</p>
<b>Other stakeholders</b>		
Martin Vile (lpr16)	<p>The provision of affordable housing within a development (or financial contribution by the developer towards affordable housing elsewhere) should be strengthened. The reliance on financial viability reports to start negotiations with the council for this contribution is flawed and has on at least one occasion meant a tiny fraction of the expected contribution presented at the planning stage. When the planning was refused by the planning committee and the developer appealed this offer was withdrawn on winning the appeal citing the additional costs to the developer in the appeals process.</p> <p>The developers should factor in the expected affordable housing allowance contribution at the initial stages of their development costings and decide if it is a viable development before they apply for planning permission and try and get a reduction in their contribution just to be able to turn a profit at the expense of the affordable housing provision for the county.</p> <p>Poor business decisions should not be bailed out by negotiating and reducing this commitment.</p> <p>The commitment for developers to provide affordable housing within a scheme or offset the relevant amount by financial contribution should be strengthened and not be reduced or negated by negotiation. Just because their own viability reports state that there is insufficient profit in the development, this shouldn't cover poor business decisions when planning a development.</p>	<p>Comments noted. However, the proposed policy has been drafted in accordance with national policy and guidance on viability which was updated in 2018 to address these concerns.</p> <p>Where up-to-date policies have set out the contributions expected from development they should be complied with. It is up to the applicant to demonstrate whether circumstances justify the need for a viability assessment at the application stage which could affect the contribution to be made.</p>

Respondent (with lpr ref)	Response	Council Response
Colin Duff (lpr454)	<p>A greater proportion of affordable housing to buy will encourage low income earners to become property owners.</p> <p>Our daughter is a primary school teacher working for West Berks Council and she cannot afford to buy a property in West Berks on her West Berks salary because demand for affordable housing vastly exceeds supply keeping prices unaffordable.</p>	<p>Comments noted. National policy has recently changed to require a proportion of the affordable housing to be discounted homes for sale 'First Homes'. The tenure mix set out in the proposed policy has been amended accordingly. The Council has also approved a policy position on the sale and purchase of discounted First Homes provided giving priority to applicants with a local connection.</p>
<p>Susan Millington (lpr466)</p> <p>Graham Storey (lpr580)</p>	<p>The existing formula for affordable housing has not delivered appropriate levels of low-cost housing, particularly homes for social rent which have been well under 10% of housing completions in recent years. This is probably largely a result of developers reducing the proportion of affordable homes (citing viability). As a result West Berkshire lags behind other local authorities in the provision of social housing.</p> <p>This would be rectified by:</p> <ol style="list-style-type: none"> <li>1) Removing the ability of developers to use "viability" as an argument to reduce affordable homes requirements (viability would be achieved by reducing the price paid for development land).</li> <li>2) Allowing developers to provide comparable alternative sites to achieve the mix required (within reason).</li> <li>3) Using the Sovereign JV and proposed WBC Housing Company to proactively develop affordable homes and homes for social rent to "top up" volume from private developments.</li> <li>4) Setting an annual target of 200 homes for social rent to be achieved by the above methods until the proportion of homes owned and managed by HA and other registered providers reaches the national average of 17.1% (currently 13.4% – draft housing strategy).</li> </ol>	<p>Comments noted</p> <p>The proposed policy has been drafted in accordance with national policy and guidance on viability which was updated in 2018 to address these concerns.</p> <p>The proposed policy as drafted already allows developers to provide affordable housing on an alternative site within the District, in exceptional circumstances.</p> <p>Delivery of housing in the District to meet local needs is a priority for the Council. Respondent (with lpr ref)	Response	Council Response
		1,831 – 1921 social rent homes over the plan period.
Councillor Tony Vickers (lpr554)	<p>We strongly support this policy. However we are deeply concerned about the efforts of many developers to escape it. We also want to define what “remain affordable” means in the last paragraph.</p> <p>Lack of transparency in the land market and the behaviour of some major national financial and property players is having a hugely dysfunctional effect on the housing market. At the same time, many of those same ‘players’ are benefiting from large increases in profits and asset value while claiming they cannot afford to comply with this policy. The Council must continue to contest this vigorously.</p> <p>We believe “remain affordable” should not just mean that rents continue to be subsidised but that homes for those families of limited financial means must remain affordable to heat and power. This means that “built to net zero carbon standards” must include the lifetime costs of heating and of carbon emissions contributed by the occupation of the home. All new, extended and refurbished homes - especially 'affordable' ones - should be delivered fitted with heating systems that either do not use carbon fuel or can be converted to renewable energy sources.</p> <p>Changes sought: Three:</p> <ol style="list-style-type: none"> <li>1. Insert the words “publicly accessible” before “viability assessment” at the end of the first sentence.</li> <li>2. Insert the words “to live in” after “remain affordable” in the last paragraph.</li> <li>3. Add a new paragraph to the supporting text that captures the point above about remaining affordable.</li> </ol>	<p>Comments noted. The policy will be amended to clarify that affordable housing must remain at an affordable price for future generations of eligible households for as long as it is needed. First Homes must remain affordable in perpetuity.</p> <p>The proposed policy has been drafted in accordance with national policy and guidance on viability which was updated in 2018 to address these concerns.</p> <p>All residential development will be expected to comply with policy SP5 (Responding to Climate Change), and with the minimum standards set out in policy DM4 (Building Sustainable Homes and Businesses). This policy, SP19, is clear that affordable homes must also be built to net zero carbon standards.</p> <p>This is a key part of the approach to viability in planning set out in national policy and guidance and the Council agrees this would be a helpful addition. The proposed policy has been amended by the insertion of the words “publicly available” viability assessment.</p> <p>The definition of affordable housing relates to the cost of purchasing or renting the dwelling, and not the cost of living within it.</p> <p>Reference to affordable housing remaining at an affordable price for future generations of eligible households has been included in the final paragraph of the Policy and explained in more detail in the supporting text.</p>
Paula Saunderson (lpr968)	Not clear enough and needs more facts and figures. How are you going to make up for the existing shortfall in Social Rented housing and ensure you	Comments noted.

Respondent (with lpr ref)	Response	Council Response
	provide decent ground level 2 bed accommodation for the elderly and their carer?	<p>The proposed policy requires 70% of the total affordable housing provided to be social rent homes. Based on the proposed housing delivery requirement of 8,721 – 9,146 over the plan period and the proposed 30% affordable housing requirement, this could deliver approximately 1,831 – 1921 social rent homes over the plan period.</p> <p>Policy DM19 of the Publication Plan now sets out how specialist housing, including for elderly people, will be delivered.</p>
<b>Landowners, site promoters and developers</b>		
Solve Planning Ltd for Emily West (lpr1428)	We support a policy that provides a mix of housing on sites to provide for a mix of housing needs.	Comments noted
Donnington New Homes (lpr1947)	<p><i>Representation in support of continued allocation of Sandleford Park</i></p> <p>The inclusion of Use Class C2 within the definition of Affordable Housing is <u>supported</u>. It should, however, be acknowledged that some C2 uses, such as Extra Care provision, are provided in flatted blocks meaning a larger proportion of this type of affordable units could be provided in a particular phase of a development so that provision of a balanced mix of affordable unit sizes and tenures may not be provided at linear rate across a site. On a site-by-site basis, the delivery of Affordable Housing can be secured through a Section 106 Agreement. As such, it is only necessary for the Policy to acknowledge that this imbalance may occur where Class C2 units form part of the affordable provision.</p>	<p>Comments noted.</p> <p>Policy DM19 (Specialised Housing) deals with Class C2 Specialist Housing. The policy says that affordable units will be appropriately integrated within the development. The supporting text says that affordable housing should be provided as built units on-site as part of well-designed mixed tenure schemes, helping to create mixed inclusive communities. The Council considers that this provides sufficient flexibility to accommodate different development types.</p> <p>Paragraph 9 of the revised Policy SP19 in the Publication Version of the Plan now recognises that provision of affordable extra care or specialist housing may be particularly difficult to achieve. In such circumstances, the policy will be implemented on a case-by-case basis, and the individual viability assessment will be used to</p>

Respondent (with lpr ref)	Response	Council Response
		demonstrate an appropriate affordable housing contribution.
TOWN for Pincents lane (lpr2131)	<p>Full representation promoting land to East of Pincents Lane, Tilehurst attached. The Updated Housing Needs Evidence (Iceni May 2020) states (p.43) a need for affordable rented housing of 163 net additional homes per year. To this, under the expanded definition of affordable housing in the NPPF can be added 156 affordable home ownership units per annum - a total of 319 dpa. By contrast, delivery of affordable homes in the District in the past five years is set out in Table 5 (of full representation). It can be seen from the figures in Table 5 that the delivery of affordable homes in West Berkshire falls below need in each of the last five years, sometimes markedly so. Control of the supply of affordable homes is not of course target driven, instead it rests on viability assessment. Policy SP19 relies on the Dixon Searle Partnership's Affordable Housing Viability Assessment, July 2020. The proposed policy thresholds and levels seem appropriate for the local housing market. We continue to promote the land east of Pincents Lane at a level of 40% affordable housing. The provision of 106 units (40% of the current application's maximum proposed 265 units) would form a significant contribution to the District-wide annual target. A key mechanism to increase the supply of affordable housing, therefore, is to ensure that sufficient supply of larger sites above the thresholds are allocated and come forward for development. <b>Summary: Support Policy SP19</b>, whilst noting that increased supply of affordable homes is reliant on the allocation of a range of sizes of sites in excess of the threshold for affordable housing provision.</p>	Comments noted
Lichfilelds for North East Thatcham Consortium (lpr2402)	<p>We support the delivery of 40% affordable housing on the NET site as a greenfield development. As indicated in our response to the NET policy, this may vary on a phase by phase basis, particularly in the early construction phases where infrastructure will also need to be provided. On this basis we welcome the inclusion in the policy of lower levels of affordable housing being sought in exceptional circumstances through clear viability evidence, this could be of benefit to certain phases of development, particularly in the early stages of NET delivery or if previously unexpected costs arise. The</p>	Comments noted

Respondent (with lpr ref)	Response	Council Response
	<p>promoters of NET have appointed Turner Morum to undertake an initial review of the local plan viability evidence. Their work concludes that further viability work for the local plan needs to ensure that - as the local plan is finalised and the Infrastructure Delivery Plan (IDP) worked up - there is appropriate consistency of assumptions and testing to cover all potential policy requirements, including for affordable housing.</p> <p><b>Affordable Housing Viability Assessment (background report)</b></p> <p>Turner Morum has undertaken an initial review of the Dixon Searle Partnership's Area Wide Viability Assessment, as well as the David Lock Associates viability modelling in the Thatcham Strategic Growth Study Stage 3 Report: Thatcham Future. From this review we have identified that there will be a need to ensure that - as the local plan is finalised and the IDP worked up - that there is consistency of assumptions and testing across the evidence base.</p> <p>We would welcome the opportunity to work with the council in this exercise by ensuring that the objectives of the local plan policies, including affordable housing delivery, delivery of carbon neutral development (to a specific definition), strategic infrastructure delivery etc. are all aligned to deliver a viable scheme at NET and other schemes across West Berkshire based on the circumstances and requirements of specific sites.</p>	
Tetlow King Planning Ltd for Aster Group (lpr2355)	<p>Tetlow King Planning represents Aster Group, a leading Housing Association in England. Our clients' principal concern is to optimise the provision of affordable housing through the preparation of consistent policies that help deliver the wider economic and social outcomes needed across the South East region.</p> <p>Aster is a key partner in the delivery and management of new affordable homes in West Berkshire with 60 properties currently under its management in the authority area. Notable recent developments include The Chase at Newbury and Penny Farthing Close, Hungerford, which have both helped to address local housing needs. As significant developers and investors in local people, Aster is well placed to contribute to local plan objectives and act as long-term partners in the community. We therefore welcome the production of the emerging draft of the Local Plan Review 2020 – 2037 and the opportunity to provide comments.</p>	<p>Comments noted</p> <p>The tenure split in the proposed policy has been amended to reflect the requirement to deliver First Homes. The Housing Needs Assessment update, July 2022 confirms that the core need in West Berkshire is for social rented housing and therefore the policy specifies 70% social rent rather than social or affordable rent. As set out in the supporting text, this tenure split is the starting point and the Council may, subject to site specific circumstances, consider an alternative negotiated mix of tenure.</p> <p>The Whole Viability Assessment of the proposed Plan finds that the requirement to build homes to net zero carbon</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Aster supports the objectives of the Council’s emerging affordable housing policy (SP 19) which maintains the same principles of the Core Strategy policy CS6. It is noted that the thresholds are proposed to be adjusted from 15 to 10 dwellings but there is still an expectation that any development of five to nine units should provide at least 20% affordable housing.</p> <p><u>Tenure split</u></p> <p>Policy SP 19 shows that the Council is seeking an affordable housing tenure split of 70% social rented and 30% affordable home ownership on qualifying sites. Observing the findings of the Updated Housing Needs Evidence report (May 2020), paragraphs 9.3 and 9.4 show an annual need for 163 social/affordable rented properties, and a further need for 156 affordable home ownership properties per annum between 2018 and 2036. As policy SP 19 only specifies 70% for social rent instead of the 70% social/affordable rent mentioned in the Updated Housing Needs Evidence report, we query if the wording of policy SP 19 should be amended to reflect the needs of the evidence report. We respect and understand that the Council requires affordable housing that is genuinely affordable to its residents; this perspective is wholly shared by Aster in its role in providing affordable housing for those in need. We therefore accept that the Council may have a preference for social rent where clearly evidenced, although we remind the Council that in order for the Plan to be compliant with the NPPF, the Plan should embrace <i>all</i> types of affordable housing products, including housing for affordable rent. Understanding this, we are pleased to see that the wording of emerging policies SP 19 and indeed SP 18 (Housing type and mix) allow for some flexibility in terms of tenure, with the Council willing to take into account the identified local need for affordable housing and site specifics (including funding and the economics of provision). We welcome this approach of negotiating the tenure mix of affordable housing where needed on individual sites as this will enable the Council to respond flexibly to schemes that come forward to meet local needs which do not comply with the indicative split. This ensures that deliverable development may still come forward to meet locally-specific needs.</p> <p><u>Zero carbon standards</u></p>	<p>standards will not prevent the delivery of affordable housing or render it unviable.</p> <p>Affordable housing should be, and should remain, genuinely affordable. It is therefore important that affordable housing remains as such, for as long as required. This principle has been retained in the policy.</p> <p>Giving communities a greater say and control of their local area is supported by Government policy.</p> <p>The District Council would generally be supportive of community-led affordable housing development. Any scheme should, however, accord with all other policies of the Local Plan in terms of siting, scale design and external appearance. No significant harm should be caused to the character or setting of the settlement and the surrounding countryside. Paragraph 7.73 of the Plan: Housing Type and Mix refers to Council support for the development of housing schemes that are initiated by local Communities. Additional text added at end of supporting text of Policy SP19 to also show specific support for affordable community led housing schemes.</p> <p>The policy does take into account the latest updated Local Housing Need Assessment, July 2022 in relation to tenure split and need for affordable rent.</p> <p>In accordance with national guidance First Homes should remain available in perpetuity and affordable social rent for as long as required.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Policy SP 19 requires all new affordable homes to be built to net zero carbon standards. While we are pleased to see that West Berkshire has a strong agenda in promoting zero carbon development in line with section 14 of the NPPF, there are concerns regarding the costs for housing associations to implement this policy across their upcoming sites. We appreciate that cheaper and more efficient technologies have become available in recent years, nonetheless robust viability testing should be carried out to ensure that applicants can continue to be able to deliver affordable housing schemes with such demands. Such a policy should ensure that while schemes are future proofed, this should not prejudice the delivery of affordable housing which remains one of the most critical priorities for the Council.</p> <p><u>Retaining affordable housing in perpetuity</u> At the bottom of Policy SP 19, the emerging local plan states that the Council will expect affordable units to remain affordable so as to meet the needs of both current and future occupiers. The sole reference to retaining affordable housing in perpetuity is in Annex 2 of the NPPF where this is sought for affordable housing delivered on rural exception sites. This principle is appropriate and supported by our Members as this helps to secure land for delivery of affordable housing in rural areas where housing delivery would otherwise not be supported. Securing affordable housing in perpetuity more widely is not supported for a number of reasons, foremost of which is that it restricts lenders appetite to fund development, as mortgage provision becomes more difficult with greater restrictions on individual properties. Private companies will not typically invest in developments if there is no prospect of realising the original investment and any returns. We therefore ask that the Council remove any references to retaining affordable housing in perpetuity in the local plan unless explicitly referring to rural exception sites.</p> <p><b>Community Land Trusts</b> Although Aster does not currently have any Community Land Trust (CLT) partners in the area, it may look to in future and a general indication of support from the local authority in the Local Plan would be helpful. CLTs have a proven track record of success in delivering affordable housing for</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>local people, particularly in rural areas. By January 2021 Aster will have delivered 14 CLT partnership schemes totalling 150 affordable homes. Therefore, it would be particularly useful if the Local Plan included a commitment to support CLTs in their choice of site. A commitment to good practice in respect of allowing CLTs flexibility on affordability criteria and local allocations would also be helpful.</p> <p>Changes sought: Query if the wording of policy SP 19 should be amended to reflect the needs of the evidence report with regard to tenure split. The Plan should embrace <i>all</i> types of affordable housing products, including housing for affordable rent. We ask that the Council remove any references to retaining affordable housing in perpetuity in the local plan unless explicitly referring to rural exception sites.</p>	
Sovereign Housing Association (lpr2163)	<p>SHA broadly support the wording of the policy SP19. We are still working through the detail of the new Shared Ownership model. Once we know more about a new lease from April 2021, we'll need to work with you to deliver this new protocol. A proportion of SHA's shared ownership home buyers are downsizers. More reference could be given to seeking opportunities to create more shared ownership opportunities for older people – to help free-up under-occupied local homes. Especially where new schemes might be affordable to older people seen as being asset rich but income poor. Where the Council expects units to remain affordable - is this suggesting the implementation of a DPA and threshold on the equity that can be purchased? If so, we would want to discuss this in greater detail as this is likely to have an impact on demand and the viability of a site.</p> <p>It's very welcome that the draft strategy recognises the need to make new homes future-proof. Might that extend to promoting lifetime homes, or incentivising low carbon homes? For planning purposes a timescale would need to be considered regarding the implementation of net zero carbon standards, and what infrastructure the Local Authority would be supporting</p>	<p>Comments noted</p> <p>In relation to extra care housing the policy will be implemented on a case-by-case basis, and the individual viability assessment will be used to demonstrate an appropriate affordable housing contribution. This should provide more opportunities for affordable housing options for older people.</p> <p>Proposed policy DM19 (Specialised Housing) sets out in more detail how specialised housing for older people will be delivered</p> <p>The Council understands that buyers who purchase shared ownership housing have the option to 'staircase out'. In other words, to purchase additional equity until they own the property outright. This is an affordable route to home ownership. The Council's expectation is that the rent and price paid for these properties is affordable. Furthermore,</p>

Respondent (with lpr ref)	Response	Council Response
	<p>to achieve this. For example - does the local electricity structure support numerous car charging points? What is West Berks vision for electric car charging points - is there a % that you would want to see on new build sites?</p>	<p>the expectation is that over the lifetime of the plan, additional shared ownership properties will come forward as part of the housing delivery pipeline to replace those that have been 'staircased'. This will ensure that there continues to be an affordable home ownership product available for those who need it within the District.</p> <p>The draft Plan requires housing to meet net zero carbon standards. All residential development will be expected to comply with Policy SP5 (Climate Change) and with the minimum standards set out in Policy DM4 (Building Sustainable Homes &amp; Businesses). This policy, SP19, is clear that affordable homes must be built to net zero carbon standards.</p>
Lochailort Newbury Ltd (lpr2040)	<p>The draft policy as worded contains a number of barriers to delivery which could individually or cumulatively render an otherwise deliverable scheme unviable. Consequently, the draft policy should be amended as follows:</p> <p>1. Build to Rent Build to rent is a distinct asset class within the private rented sector and has been defined in the National Planning Policy Framework glossary, in order to simplify its treatment within the planning system. Affordable housing must be considered completely differently in Build to Rent schemes compared with other tenures, and it is the Government's very clear policy that affordable housing in the manner defined in draft Policy SP19 is neither appropriate nor required in Build to Rent developments (Planning Practice Guidance Paragraph: 002 Reference ID: 60-002-20180913)</p> <p>2. Use Class C2 developments and extra-care housing Whilst it is the case that Local Plans have the legal ability to set out different policy requirements for different types of development, these policy requirements must be informed by evidence of infrastructure and affordable housing need, and a proportionate assessment of viability that takes into account all relevant policies and local and national standards, including the</p>	<p>Comments noted.</p> <p>There is no blanket national exemption for build to rent schemes from the requirement to provide affordable housing. However, the Council does recognise that national planning guidance is clear that for build to rent schemes, the provision of affordable housing should be in the form of affordable private rent which is discounted relative to local market rents. The policy has been amended to reflect this approach.</p> <p>Noted - In relation to extra care housing, it is recognised that provision of affordable housing may be particularly difficult to achieve. In such circumstances, the policy will be implemented on a case-by-case basis, and individual viability assessment will be used to demonstrate an appropriate affordable housing contribution. The Policy has been amended to reflect this.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>cost implications of Community Infrastructure Levy and section 106. There is insufficient evidence to demonstrate that requiring affordable housing within C2 developments in West Berkshire will not affect their viability.</p> <p>Changes sought: Draft Policy SP19 should be amended to specifically confirm in terms that it does not apply to Build to Rent schemes. Lochailort would welcome a meeting with the Local Planning Authority to discuss appropriate policy wording of an additional and specific Build to Rent policy, mindful that particularly within mixed-use schemes the wider public benefits of a development must be considered in the planning balance and are likely to include matters which outweigh the provision of affordable housing on a specific site.</p> <p>The following text should therefore be deleted from draft Policy SP19: “This policy is not restricted to development which falls within Use Class C3 but applies to all forms of self-contained residential development including C2 uses such as extra care housing.”</p>	<p>Text deleted to reflect the different circumstances which may apply to the provision of affordable housing on proposed extra care housing schemes.</p>
Audley Court Ltd. (lpr2208)	<p>Audley is an experienced and well-respected developer, owner and operator of private residential care communities around the UK. Audley developed its first village in 1998 and has since built a portfolio of 18 residential care communities (15 operational and three under construction) representing over 2,000 units of accommodation, with a GDV of almost £1 billion. Each Audley scheme falls within Use Class C2 by virtue of the high level of care that is made available and delivered, together with specially designed accommodation and communal facilities. It is within this context that Audley has an interest in the current consultation.</p> <p>The number of older people in the UK is set to grow dramatically over the coming years as people are living longer. It is estimated that 11.8 million people aged over 65 currently live in the UK; the number of people aged over 75 is projected to double in the next 30 years; and the number of people over 85 (those likely to be needing the highest level of care) is projected to grow faster than any other age group - by 2037 there are projected to be 1.42 million more such households in England. ‘The top of the ladder’, report prepared by Demos (2013), the leading cross-party think tank, examined the issue of freeing up under-occupied family sized homes in</p>	<p>Comments noted.</p> <p>Policy has been amended to acknowledge the different circumstances relating to affordable housing provision on proposed C2 residential care developments and their specific operational characteristics. The policy will be implemented on a case-by-case basis, and individual viability assessment will be used to determine an appropriate affordable housing contribution.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>significant detail. The key issues and findings raised as part of this research states:</p> <p><i>“Retirement properties make up just 2 per cent of the UK housing stock, or 533,000 homes, with just over 100,000 to buy. One in four (25 per cent) over 60s would be interested in buying a retirement property – equating to 3.5 million people nationally.”</i></p> <p>In addressing this issue, MHCLG issued updated Planning Policy Guidance in June 2019 to support Councils in preparing planning policies on housing for older and disabled people. The Guidance states simply that <i>“The need to provide housing for older people is critical...Offering older people a better choice of accommodation to suit their changing needs can help them live independently for longer, feel more connected to their communities and help reduce costs to the social care and health systems.”</i></p> <p>As people age, there is a tendency to under-occupy larger family homes (due to bereavement and as children leave). The development of specialist accommodation for older people allows people of retirement age to downsize from larger under-occupied family homes, which are then freed up to the housing market. In turn, the release of larger family homes cascades through the housing ladder freeing up smaller homes for first time buyers and improving affordability.</p> <p>As such, the development of Class C2 residential care communities benefits the local housing market through the delivery of specialist housing to meet for older people and through the release of family housing, and then smaller homes. Such developments deliver a wide range of other social and economic benefits, including: creation of direct and indirect jobs, reducing healthcare costs and the demands placed on local NHS services, and integrating care and support facilities into the local community. These benefits should be addressed in the planning balance when considering any requirement for affordable housing.</p> <p>Specialist accommodation for older people, falling within Use Class C2, operates in a fundamentally different manner to conventional market housing developments falling with Use Class C3 provided by traditional housebuilders. Audley’s residential care communities provide extensive care and communal facilities that are specifically targeted to meet the needs of</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>their residents. The cost of providing these care and communal facilities reduces the GDV of such developments (when compared with traditional forms of housing), which in turn has an impact of the viability of delivering affordable housing (whether on site or through contributions). Accordingly, it is essential that any policies relating to the delivery of affordable housing consider the unique operational model and viability of Class C2 residential care communities.</p> <p>Draft Policy DC18 relates to the provision of specialised housing and makes clear that there is a presumption in favour of new housing designed to meet the needs of those with identified support of care needs, where certain criteria are met. Although this approach is welcomed in principle, the mechanics for the delivery of specialist accommodation will rely very much upon policies geared towards the delivery of conventional C3 housing developments, and which fail to take into account the unique operating models and viability implications associated with specialist accommodation for older people. This is particularly the case with draft Policy SP19 which relates to the delivery of affordable housing and which states specifically that the Policy will apply to all forms of self-contained residential development including C2 uses such as extra care housing.</p> <p>This is a significant change in approach for West Berkshire where previously Audley has been advised that C2 developments would not attract contributions for affordable housing. This new approach is very concerning not least because it seems the change has been made without the benefit of evidence or viability testing – the Affordable Housing Viability Study (Dixon Searle Partnership, October 2019) appears to make no reference to C2 uses or specialist accommodation for the elderly.</p> <p>Audley is concerned that application of affordable housing policies, assessed for viability purposes against conventional Use Class C3 developments, to Class C2 uses will severely prejudice the delivery of specialist accommodation for older people, and place operators such as Audley at a significant disadvantage when compared with traditional housebuilders in terms of their ability to acquire new sites and deliver much needed accommodation and care for older people. There is significant</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>tension between this approach and the supposed ‘presumption in favour’ referred to in Draft Policy DC18.</p> <p>Changes sought:</p> <p>The need for additional specialist accommodation for older people is critical and the viability, and therefore delivery, of this form of development would be seriously prejudiced by an automatic requirement to deliver affordable housing on a level that is the same as a traditional C3 residential development – whether on site or through a commuted sum.</p> <p>Accordingly, we would request that the Council undertakes viability work to provide evidence to support its proposed policy stance, and that draft Policy SP19 be amended to acknowledge the unique operational models associated with C2 residential care community developments and to ensure that such uses be assessed on their own merits, having regard to their specific operational characteristics.</p> <p>We would welcome the opportunity to discuss the issues raised in these representations in more detail with the Council. In this context, we would be happy to provide more detail to explain how Class C2 residential care communities differ from traditional Class C3 housing (for example in terms of GDV and the operational model and costs) and to demonstrate the social and economic benefits that can be secured.</p>	
Rectory Homes (lpr1850)	<p>The Policy does not accord with paragraph 63 of the NPPF which directs that affordable housing should not be sought on schemes of less than 10 dwellings if located outside of the designated rural areas. As such, Policy SP19 needs to be amended to accord with national planning policy.</p> <p>Instead, to deliver affordable housing in smaller settlements such as service villages, as per our representations above, any reference to ‘minor development’ should be removed from strategic housing policies. This will enable affordable housing to be secured in smaller settlements in line with the NPPF but will also not deter much smaller schemes of less than 10 units from being delivered which otherwise would have to deliver a proportion of affordable housing</p>	<p>Comments noted.</p> <p>Under paragraph 64 of the NPPF, 2021 the provision of affordable housing should not be sought for residential developments that are not major developments, other than in designated rural areas (where policies may set out a lower threshold of 5 units or fewer).</p> <p>Annex 2 of the NPPF defines <b>Designated rural areas as</b> National Parks, Areas of Outstanding Natural Beauty and areas designated as ‘rural’ under Section 157 of the Housing Act 1985.</p> <p>74% of West Berkshire is AONB with a large part of the remaining area designated as rural under Section 157 of</p>

Respondent (with lpr ref)	Response	Council Response
		<p>the Housing Act 1985. The Council is therefore justified in seeking the provision of affordable housing on sites of 5 or more dwellings. This accords with the NPPF.</p> <p>Most of the parishes outside the AONB in West Berkshire are Designated Rural Areas. These are set out in Schedule 1 of Statutory Instrument 1997 No. 625 - The Housing (Right to Acquire or Enfranchise) (Designated Rural Areas in the South East) Order 1997.</p> <p>Also, the whole plan viability assessment concludes that the provision of affordable housing on small sites of between 5 and 9 dwellings would be viable.</p>
Feltham Properties (lpr2282)	<p>Emerging Policy SP19 and supporting text needs to be clear in whether affordable housing is required for development involving Use Class C2 (i.e. care/nursing homes). It is our view, shared with the development industry, that C2 uses should not attract the need to provide affordable housing as they are significantly different uses. This would provide clarity and confidence moving forward to support their delivery to meet the significant need in accordance with our comments above.</p>	<p>Comments noted. Policy has been amended to acknowledge the different circumstances relating to affordable housing provision on proposed C2 residential care developments and their specific operational characteristics. The policy will be implemented on a case-by-case basis, and individual viability assessment will be used to determine an appropriate affordable housing contribution.</p>
Bluestone Planning for Darcliffe Homes (lpr2430)	<p>There are several concerns with this policy as drafted, all of which would tend to punitively affect small site developers disproportionately when compared to larger site developers:</p> <ol style="list-style-type: none"> <li>1. The most punitive rate of provision (minimum 40%) has been applied to greenfield sites of 10 or more dwellings or 0.5 hectares and over. This is a change from the previously adopted 15 dwellings or more.</li> <li>2. Furthermore, the emerging draft policy requires on development sites of between five and nine dwellings, 20% provision of affordable housing. There is no clarification as to whether this applies to sites within the AONB or the District as a whole.</li> </ol>	<p>Comments noted. However, the whole plan viability assessment concludes that the provision 40% affordable housing on sites of 10 or more dwellings would be viable. This also accords with national policy.</p> <p>Considering the high affordability ratio in the District the requirement for small sites (5-9 dwellings) in West Berkshire to provide affordable housing contributions is justified because of the specific local circumstances including:</p> <ul style="list-style-type: none"> <li>• constraints such as the AONB;</li> <li>• the existence of designated rural areas; and</li> </ul>

Respondent (with lpr ref)	Response	Council Response
	<p>The NPPF paragraph 63 clearly states: <i>“Provision of affordable housing should not be sought for residential developments that are not major developments, other than in designated rural areas (where policies may set out a lower threshold of 5 units or fewer).”</i></p> <p>The District of West Berkshire outside of the AONB is not a designated rural area (National Parks, Areas of Outstanding Natural Beauty and areas designated as ‘rural’ under Section 157 of the Housing Act 1985) and there is no other justification provided in the Updated Housing Need Evidence report (May 2020) therefore this is considered to be contrary to the requirements of the NPPF.</p> <p>Minor developments and smaller developments of between 10-20 dwellings can provide a valuable source of small sites which can be delivered quickly and which will help to keep the local housing market buoyant. This approach will disincentivise smaller developers from bringing these kinds of sites forward which is clearly contrary to the spirit of the NPPF, and in particular paragraphs 67, 68 and 78.</p> <p>Changes sought: The more logical and sensible approach (especially given the need not to make small sites unviable – a problem that is well-known where lower affordable housing thresholds are introduced) would be to raise the affordable requirement slightly on the larger sites where viability is more robust and provide a sliding scale of percentage requirements as site sizes and numbers reduce.</p>	<ul style="list-style-type: none"> <li>the stable historic completion figures for small windfall sites.</li> </ul> <p>The requirement applies to all proposed housing sites within the District.</p> <p>The areas set out under section 157 of the Housing Act 1985 are National Parks, Areas of Outstanding Natural Beauty and areas designated as rural for the purposes of Right to Buy by the Secretary of State.</p> <p>The criteria for rural designation are that the population density is 2 persons or fewer per hectare; and that there are no more than 3,000 inhabitants. Areas are designated at the request of individual local authorities; and can be made at any time.</p> <p>Most of the parishes outside the AONB in West Berkshire are Designated Rural Areas. These are set out in Schedule 1 of Statutory Instrument 1997 No. 625 - The Housing (Right to Acquire or Enfranchise) (Designated Rural Areas in the South East) Order 1997.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>creating new DEAs; and redevelopment (for office floorspace) in Newbury town centre and other town and district centres within the hierarchy.</p> <p>It is noted that the plan period covers an additional year (to 2037) compared to the economic evidence. It is therefore unclear how or whether this additional year's need is taken into account in this strategic approach.</p> <p>The Plan contains site specific policies for each proposed allocation which provide further quantitative detail for how the strategic employment needs stated in SP 20 will be met. Policies EMP1-5 propose extensions to existing DEAs to provide a total of 75,700sqm of industrial storage and distribution floorspace. Therefore, even accounting for an additional year's worth of need, the Plan appears to overprovide against this aspect of need.</p> <p>As regards specific policies for office floorspace development, EMP6 provides for 20,000sqm 'employment floorspace' at Arlington Business Park and Policy SP 20 further supports new office development with a primary focus on Newbury Town Centre. However, there is no specific evidence provided that sites in Newbury are deliverable or any indication given of the quantity of floorspace that could be accommodated. Therefore, it is unclear at this stage exactly how identified needs for office space will be met.</p> <p>It is recommended that WBC requests clarification on how the additional years' worth of employment need is to be addressed. As regards office floorspace, WBC would welcome additional clarity on how this need will be met as the plan making process progresses.</p>	<p>will inform the LPR and will be published alongside the Regulation 19 consultation.</p> <p>Text within, and supporting, the Emerging Draft LPR policy will be amended to make clear how the LPR will seek to address the requirements for employment land over the plan period. The LPR will make provision for industrial land through site allocations, to assist in accommodating the forecasted industrial requirements to 2039. However, given the current weakened office market and a lack of suitable available sites there remains a shortfall in supply of both office and industrial space. The Council has positively sought opportunities to meet the identified need and will commit to reviewing the matter again at the first 5 year review.</p>
Tilehurst Parish Council (lpr1986)	<p><i>Full representation from Tilehurst Parish Council and Tilehurst Neighbourhood Development Plan Steering Group is attached.</i></p> <p>It is vital that the Local Plan foster economic growth and support local communities, particularly as we emerge from the Covid-19 pandemic, so it is good to see policies aimed at addressing these needs. We are looking at the possibility of enhancing these policies locally with our NDP.</p>	<p>Comments noted. No changes to the policy are required in light of this representation.</p>

Respondent (with lpr ref)	Response	Council Response
Newbury Town Council (lpr2255)	<p>Policy not supported.</p> <p>There is no reference to the impact of Covid-19. All evidence pre-dates the pandemic. Whilst the implications for strategic spatial planning are not yet clear, evidence is mounting that casts doubt on the need for new office floor space and indicates that much employment will be largely home-based. In particular, the concept of the “15-minute neighbourhood” is gaining support within the planning profession.</p> <p>Changes to be made/preferred approach: To be discussed. None at this time.</p>	<p>Comments noted. No changes to the policy are required in light of this representation.</p> <p>Given the preparation of the ELR 2020 was undertaken prior to the COVID 19 pandemic, the Council has taken the opportunity to update this work using the most recent economic forecasts which take account of the major macro-economic changes which have taken place, including COVID and Brexit. The update to the ELR will inform the LPR and will be published alongside the Regulation 19 consultation.</p>
Thatcham Town Council (lpr1404)	<p>It is unclear to us how the small-scale employment as defined in SP 17 for the strategic site of Thatcham NE fits into the hierarchy.</p> <p>It is also unclear as to where the priority location is for warehouse facilities and logistics. In the economic development assessment, it was identified that agents would seek locations close to the A34/M4 junctions and in the labour assessment it was acknowledged that this is a growth area accounting for 40% of labour demand.</p>	<p>Comments noted. No changes to the policy are required in light of this representation.</p> <p>The ELR outlines that the industrial market across the whole of West Berkshire is performing well, with low vacancy and a tight supply for smaller units (up to 5,000sqm) which sees the most take up activity. Whilst there is demand for larger B8 distribution and logistics this tends to be at the motorway junctions, particularly at Theale. Occupiers across all building sizes range from local to national businesses and covering a wide variety of business activity with no specific sector driving demand. The Covid19 pandemic has strengthened the industrial market further, with strong demand resulting in an increasingly constrained market.</p>
Lambourn Neighbourhood Development Steering Group (lpr1706)	<p>SP20 refers to the shortage of industrial, storage and distribution floorspace, for Classes B2 and B8. New DEAs are proposed to provide that floorspace. SP21 says Class E use will be permitted in new DEAs. This would include E(g) uses, formerly covered by the now-revoked B1 class. DC31 mentions “business uses” without specifying Class of use, unlike Policy CS9 in the previous Local Plan, which specified B Class uses for the (then) PEAs.</p>	<p>Comments noted.</p> <p>Text within Emerging Draft LPR Policy SP20 and Emerging Draft LPR Policy DM31 will be amended to provide clarity on permissible uses.</p>

Respondent (with lpr ref)	Response	Council Response
	We are concerned that this lack of clarity will lead to any policy concerning the DEA in the emerging Lambourn NDP being judged to not conform to the Local Plan 2020-2037.	
<b>General consultation bodies</b>		
West Berkshire Heritage Forum (lpr81)	<p>Policy is supported.</p> <p>Changes to be made/preferred approach: Given the current situation, it can be argued that a major increase in office space may not be the best use of the area, given the move towards home working we have seen created by the pandemic. We don't think this is going to reverse any time in the near future.</p> <p>We imagine that you intend to expand this policy with further detail. Where are the DEA's to be located in Newbury? Given that office space is being lost through PDR's and home working, an audit should be given of space expected to be lost and new office space required. Will the new DEA's complicate achievement of the planned targets for new housing?</p> <p>It may be implied, but is not stated, that DEA's will afford protection against conversion of premises to housing under PDR's. Is that correct? If so, it will be a great relief.</p> <p>7.3/7.4 See SP20.</p> <p>7.8 Community uses should include meeting venues for voluntary bodies, such as was provided by Greenham Arts before it was redeveloped. There is a currently a lack of these, which are largely limited to church halls, and will be needed again after Covid problems are overcome.</p>	<p>Comments noted.</p> <p>Given the preparation of the ELR 2020 was undertaken prior to the COVID 19 pandemic, the Council has taken the opportunity to update this evidence using the most recent economic forecasts which take account of the major macro-economic changes which have taken place, including COVID and Brexit. The update to the ELR will inform the LPR and will be published alongside the Regulation 19 consultation.</p> <p>The LPR is a long term strategy to 2039 and the conclusions from the updated employment land evidence (ELR 2022) indicate that although the office market has slowed there remains a forecasted demand for office space over the plan period.</p> <p>In accordance with national legislation, the General Permitted Development Order (GDPO as amended) allows for the conversion of offices to residential under permitted development rights, subject to the prior approval process. Supporting text will be added to highlight that where necessary and appropriate planning conditions may be imposed to restrict changes of use on new development in order to maintain the supply of space/land.</p> <p>Emerging Draft LPR Policy DM39 addresses the provision and retention of local community facilities.</p>

Respondent (with lpr ref)	Response	Council Response
Theatres Trust (lpr1002)	<p>Policy is supported.</p> <p>The Trust welcomes this policy's support for cultural uses within town centres. These facilities help enhance the vitality of town centres and support and encourage other businesses, which is becoming increasingly important as the retail market comes under increasing change and challenge.</p> <p>We also welcome the Council's support for retention of facilities expressed through supporting paragraph 7.9 which reflects paragraph 92 of the NPPF.</p>	<p>Comments noted.</p> <p>Emerging Draft LPR Policy SP20 will be split to separate the town centre elements of this policy into a standalone policy relating to town centres.</p> <p>Proposed Submission Draft LPR Policy DM39 addresses the provision and retention of local community facilities.</p>
Sovereign House Association Ltd (lpr2164)	<p>SHA welcome the reference within SP20 to supporting other uses within DEAs and the Town Centre where the vitality and viability of the existing centre is maintained and where possible enhanced. As mentioned in response to the Council's Visions and Objectives, the global pandemic will have a lasting impact on our towns and cities and will require innovation and flexibility to ensure they remain viable and pleasant places. This may provide opportunities to provide a more varied mix of uses where people do not only shop but live, socialise and experience culture. As a key stakeholder SHA are aware the Council are preparing a Newbury Town Centre masterplan and would welcome engagement through its evolution.</p>	<p>Comments noted.</p> <p>Emerging Draft LPR Policy SP20 will be split to separate the town centre elements of this policy into a standalone policy relating to town centres.</p>
West Berkshire Green Party (lpr1842)	<p>The requirement for office space appears too high and should be reduced as office demand is falling as businesses adapt post-Covid. It is also contradictory to say part of the demand increase is due to permitted developments, as the re-purposing of offices would indicate reduced demand (otherwise why convert them?).</p>	<p>Comments noted.</p> <p>Given the preparation of the ELR 2020 was undertaken prior to the COVID 19 pandemic, the Council has taken the opportunity to update this evidence using the most recent economic forecasts which take account of the major macro-economic changes which have taken place, including COVID and Brexit. The update to the ELR will inform the LPR and will be published alongside the Regulation 19 consultation.</p> <p>The LPR is a long term strategy to 2039 and the conclusions from the updated employment land evidence (ELR 2022) indicate that although the office</p>

Respondent (with lpr ref)	Response	Council Response
	<p>All evidence pre-dates the pandemic. The Covid-19 pandemic and resulting increase in home-working means that demand for new office space is likely to be significantly reduced over the Plan Period.</p> <p>There is already a significant amount of unlet office space in the Eastern Area. Reading International Business Park, only 2km from the district boundary, is 48% unlet. Office developments in Theale should be limited to the existing employment sites and business park.</p> <p>The specific proposal to allocate a site for 20,000 sqm of office space in Theale (ref EMP6) is unacceptable because:</p> <p>It would adversely affect the setting of Theale as viewed from the A4, M4 J12 and M4 motorway.</p> <p>The office built form and car parking would significantly reduce, if not eliminate, the gap between the settlements of Theale and Calcot, contrary to policy.</p> <p>The site would be largely covered in built form and car parking, leaving little or no space for soft landscaping or SUDS drainage.</p> <p>The site is in flood zone 2 and regularly suffers from surface water and groundwater flooding. This means that infiltration SUDS measures would not be possible.</p> <p>Would generate an additional approx 800 vehicle movements* in peak periods. This would contend with traffic to or from Theale High Street at its junction with Hoad Way. It would also contend with traffic arriving or departing the Arlington Business Park and employment areas to the south of Theale at the A4/Hoad Way/Waterside Drive roundabout in the peak periods. This would cause a significant problem for traffic leaving Waterside in the evening peak that is already subject to a two minute delay (historical traffic data for 1-4 April 2019). It would also add to existing congestion at M4 J12.</p>	<p>ELR will inform the LPR and will be published alongside the Regulation 19 consultation.</p> <p>The LPR is a long term strategy to 2039 and the conclusions from the updated employment land evidence (ELR 2022) indicate that although the office market has slowed there remains a forecasted demand for office space over the plan period.</p> <p>With regards to the proposed allocation for office space at Theale (EMP6) this site will be removed from the LPR. Following the Regulation 18 consultation further landscape evidence has been undertaken on a number of sites to inform the LPR. The Landscape Sensitivity and Capacity Assessment for this site outlines that the site contributes to an important part of the remaining open countryside and the subsequent separation of Theale from Calcot. The site is visible from within Theale (and the Conservation Area), where the open character of the site contributes to Theale’s historic character and setting. The site is part of the open countryside which continues further to the north and across the M4 into the North Wessex Downs AONB. The site is separated from the Protected Employment Area (PEA – to be renamed through the LPR to Designated Employment Areas (DEA) by the A4 Bath Road and due to the lack of intervisibility with the site and the PEA the landscape character of the site retains a more rural character, contributing to the setting and separate identity of the historic village of Theale.</p> <p>It notes that the introduction of offices and/or other large-scale buildings would be out of scale and keeping with the historic village character of Theale, and development across the whole site would create the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>* Calculated using Bracknell Forest Council's parking standard for offices of one space per 25 sq. m. of office space.</p> <p>The proposal to allocate 20,000 sq m of new office space (EMP6) should be removed from the plan.</p> <p>Whilst the implications for strategic spatial planning are not yet clear, evidence is mounting that casts doubt on the need for new office floor space and indicates that much more employment will be largely home-based. In particular, the concept of the “<a href="#">15-minute neighbourhood</a>” is gaining support within the planning profession. Where employment of ‘office workers’ becomes more home- or local-hub-based, we wish to see this concept adopted: all routine facilities should be planned to be within a 15-minute journey time from home, where possible on foot or by bike.</p> <p>We accept that PD conversions have meant a significant notional loss of employment land in and near town centres – especially Newbury – but the fact that take-up by housing developers and occupation of those former offices has often not taken place after several years means that this land may return to office or other town centre uses and not be lost for the whole Plan Period. We do not wish to see valuable potential housing land mothballed for offices that may not be needed. We accept that new modern office space is needed but not that means there needs to be more land provided for it.</p> <p>In the post-Covid environment, it must be recognised that there will be a need for small business hubs within what are primarily residential areas, so that home-workers’ social, networking and other business support face-to-face and practical needs can be met. Such facilities may be covered by Class F but if not they should be exempt the sequential test.</p>	<p>perception of coalescence with Calcot and loss of separate identity of Theale from Calcot. Development would also be visible from areas with the North Wessex Downs AONB.</p> <p>The landscape assessment concludes that if the site were developed, either in whole or in part, it would compromise the setting of Theale and its separate identity and character from Calcot. It therefore recommends that the site is not developed for employment uses, and as such it is no longer proposed to allocate the site within the LPR.</p> <p>In accordance with national legislation, the General Permitted Development Order (GDPO as amended) allows for the conversion of offices to residential under permitted development rights, subject to the prior approval process. Supporting text will be added to highlight that were necessary and appropriate planning conditions may be imposed to restrict changes of use on new development in order to maintain the supply of space/land.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Changes to be made/preferred approach: While the words in the policy might remain unchanged, we do not accept a figure as high as 62,000 sqm of office floorspace.</p> <p>In the supporting text, we feel the wording of 7.10 is too restrictive of possible Class E/F business related facilities. This could discourage 'climate friendly' proposals to incorporate such facilities within multi-purpose community / local centres.</p>	
Jane Halliday (lpr626)	<p>Policy not supported.</p> <p>The requirement for office space appears too high and should be reduced as office demand is falling as businesses adapt post-Covid. There is also a clear contradiction in saying that part of the demand increase is due to permitted developments since the re-purposing of offices would indicate the opposite i.e. reduced demand (which is why they are being converted in the first place).</p> <p>Changes to be made/preferred approach: Review the need to build new offices when it appears that there is decreasing or insufficient demand for the existing offices in the region.</p>	<p>Comments noted.</p> <p>Given the preparation of the ELR 2020 was undertaken prior to the COVID 19 pandemic, the Council has taken the opportunity to update this evidence using the most recent economic forecasts which take account of the major macro-economic changes which have taken place, including COVID and Brexit. The Council's evidence confirms that the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>August 2020. Its conclusions, summarised in the table below, are unequivocal; the Local Plan Review should, as a minimum, make provision for 65,000 sqm of new office (now Class E) floorspace in the plan period. (see <i>table in attached</i>)</p> <p>The Council were advised that “some of this provision could come forward through office provision at Theale. <b>However, this would neither be quantitatively nor qualitatively sufficient to meet the needs of Newbury</b>” (our emphasis).</p> <p>The Assessment also concluded:</p> <ul style="list-style-type: none"> <li>• Generally vacancy in Newbury is low and the properties that are currently being marketed are older and are not attractive to modern occupier requirements.</li> <li>• Evidence shows that the bulk of take up comes from SMEs with a focus on locations such as Theale and Newbury – these are the areas which are consistently seeing the most demand. Demand is usually for units up to 20,000 sq ft. These locations also attract the occasional larger requirement from corporate occupiers as they have suitable quality stock.</li> <li>• Office occupiers prefer to be closer to the town centre or a motorway junction. But due to the lack of available space and land, they are now prepared to take space in locations such as Greenham Business Park, which is remote from the range of services and facilities available in Newbury town centre and much less accessible by public transport, but it is where good quality stock is available.</li> <li>• Due to the lack of alternative sites and marginally viability to build new, additional loss of space would negatively impact the market i.e. existing employment sites should be protected. <b>The Council should seek to allocate additional land around Newbury to satisfy future demand</b> (our emphasis).</li> </ul> <p>Newbury has suffered a substantial reduction in its existing office stock because of Class O conversions to residential use. The loss of major companies such as Quantel and Bayer is also symptomatic of Newbury’s decline as an important sub regional commercial centre. It is incumbent upon the Council to respond to these market signals by ensuring that there is deliverable supply of high-quality</p>	<p>market signals are generally not sufficient to trigger new build office development on a speculative basis.</p> <p>Given the shortfall in supply of office space the Council reassessed all the HELAA sites submitted for employment, including this site at Speen. Unfortunately, none of the sites promoted were considered suitable to allocate for various reasons. For this particular site promoted in Speen, the updated HELAA maintains the conclusion that the site is detached from the existing settlement at Newbury and does not relate well to the existing settlement form and pattern.</p> <p>Sites identified through the HELAA, the call for sites, and Regulation 18 consultation have been assessed for their potential to be allocated for employment use. All site assessments can be found in the HELAA and the site selection process is documented within the SA/SEA published alongside the Regulation 19 consultation.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>sites available for office development in locations that will be attractive to the potential occupiers and investors.</p> <p><u>National Planning Policy</u></p> <p>The Framework is very clear about the importance of economic development. In particular we note:</p> <p>Paragraph 11. Plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that: a) plans <b>should positively seek opportunities to meet the development needs of their area</b>, and be sufficiently flexible to adapt to rapid change; b) strategic policies should, as a minimum, provide for <b>objectively assessed needs for housing and other uses</b> (our emphasis).</p> <p>Paragraph 20. Strategic policies should set out an overall strategy for the pattern, scale and quality of development, and make sufficient provision (In line with the presumption in favour of sustainable development) for: a) housing (including affordable housing), employment, retail, leisure and other commercial development.</p> <p>Paragraph 80. Planning policies and decisions should help create the conditions in which businesses can invest, expand, and adapt. Significant weight should be placed on the need to support economic growth and productivity, taking into account both local business needs and wider opportunities for development.</p> <p><u>The draft Local Plan Review (dLPR)</u></p> <p>The dLPR's response to the Government's objectives and policies and the assessed quantitative and qualitative need for office space is wholly inadequate. It makes only the one new allocation at Theale (20,000 sqm), relying on the potential combination of new office provision on the London Road Industrial Estate, redevelopment schemes in Newbury town centre, and/or</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>mixed-use allocations on larger housing sites to meet the remainder of the District (and all of Newbury's) demand for additional office space.</p> <p>There is little evidence of any viable redevelopment scheme coming forward on the LRIE or within the town centre in the foreseeable future. The consented Faraday Plaza scheme includes an element of office use but has stalled for many years. The proposed mixed-use scheme to redevelop the Newspaper House site included new offices but would only have been viable in conjunction with the residential development proposed, which the Council refused (and which was subsequently rejected on appeal because of flood risk and the sequential test). None of the strategic housing allocations include specific proposals for new offices, and in any event are not in locations that would be attractive to major office users (and are unlikely to be available for many years).</p> <p>The reliance on unidentified windfall sites to meet 85% of the demand for new office floor is not good enough. It is self-evidently a strategy that fails, as a minimum, to meet the area's objectively assessed needs. The dLPR is therefore neither "positively prepared" nor "consistent with national policy". As currently drafted it would be found unsound (Paragraph 35 of the Framework).</p> <p>Given that the dLPR's Spatial Strategy (Policy SP1) confirms that the Town is to remain the main focus for office development, it is essential that a new site allocation for high quality office development is made for Newbury.</p> <p><u>HELAA</u></p> <p>The HELAA assessed the suitability of the Site (<i>promoted</i>) to accommodate 13,200 sqm (using a plot ratio of 60%). It concluded that the Site was unsuitable for the single reason that "is detached from the existing settlement at Newbury and does not relate well to the existing settlement form and pattern". The Assessment concluded that in all other respects the Site was suitable for development (although in some cases further technical work would be needed and mitigation required). In summary the Assessment found:</p>	

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• Site is detached from the AONB and development would not result in harm</li> <li>• Access can only be obtained via the A4, which appears achievable. Highways England would not allow an access onto the A34 slip road. Footways exist opposite the site. Transport Assessment required due to its close proximity to the A34</li> <li>• Site within Flood Zone 1. Low probability of flooding.</li> <li>• A small area of high risk pooling occurs at the western edge of the site. Flood risk covers ≈1% of the site</li> <li>• The site is classified as Grade 3b agricultural land.</li> <li>• Low risk of noise and vibration problems to future occupant</li> <li>• Impact on nature conservation interest and biodiversity - Capable of mitigation - Up to date ecological surveys will therefore be needed to establish current site conditions and the presence of any protected species at the site. <ul style="list-style-type: none"> <li>○ Priority habitats within site and within 500m radius surround.</li> <li>○ Ancient woodlands within 500m.</li> <li>○ European protected species within 500m.</li> <li>○ Priority species within 500m.</li> <li>○ No statutory sites within 500m.</li> <li>○ Site of Special Scientific Interest Impact Risk Zone within 500m.</li> <li>○ Local Wildlife Site within 500</li> </ul> </li> <li>• No loss of Green Infrastructure</li> <li>• Heritage - Heritage Impact and Desk-based Archaeological Assessments required which should have regard to: <ul style="list-style-type: none"> <li>○ Located to the north of Speen House which contains a number of listed buildings:</li> <li>○ Views from Donnington Castle need to be carefully considered.</li> <li>○ Potential impact on setting of Speen CA</li> <li>○ Likely to have been a significant location at the Second Battle of Newbury – but not designated.</li> </ul> </li> </ul>	

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>○ Site within proposed Mineral Safeguarding Area. Consideration of mineral sterilisation issues is required.</li> </ul> <p><u>The Site's Development Potential</u></p> <p>As the extract from the Council's online mapping below shows, the site is not constrained by any planning designation, other than its "countryside" location outside the Settlement Boundary. The HELAA's assessment found no physical, infrastructure, visual, heritage or environmental constraints to development that are not capable of being mitigated.</p> <p>The Site is on the edge of the built-up area, physically and visually contained by urban infrastructure. It is completely severed from the open countryside to the west. It is very difficult to accept the HELAA's conclusion that the Site "does not relate well to the existing settlement form and pattern". That could only be true if one ignores the housing site to the east, which is allocated in the Housing Site Allocation DPD and now has the benefit of planning permission (and is currently being marketed). Given the adjoining housing site, the Site is demonstrably well related to the built up area and represents an entirely logical "rounding off" opportunity.</p> <p><i>(See map in attached)</i></p> <p>The Site is exceptionally well located to meet the requirements of modern office users. It has the potential to accommodate the highest quality landmark (or Gateway) office scheme. The Site should be allocated in the dLPR for the development of approximately 13,000sqm of office development.</p> <p><u>Summary</u></p> <p>There is an objectively assessed need for additional office accommodation at Newbury which the dLPR fails to adequately meet.</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>The only reason the HELAA found the Site to be unsuitable for development was because it was regarded as not being “well related to the existing settlement form and pattern”. That conclusion does not stand up to scrutiny.</p> <p>The Site should be allocated in the dLPR to help meet the objectively assessed need and so demonstrate that the dLPR has been positively prepared and is consistent with national policy.</p> <p>We trust the above comments clearly set out our client’s position at this stage but if you require any further information on our representations please do contact us. We look forward to engaging with the Council through the continued preparation of the Local Plan Review.</p>	
Savills on behalf of Englefield Estate Office (lpr1532)	<p>Draft LPR Policy SP20 makes provision for 62,000sqm of office floorspace and 65,000sqm of industrial, storage and distribution floorspace in the District over the plan period. However, the Employment Land Review (2020) and the supporting text to Policy SP20 (paragraph 7.3) are clear that these figures represent the ‘<i>minimum</i>’ need and therefore it is important that this is reflected in the policy itself.</p> <p>Draft LPR Policy SP20 adds that these identified needs will be met at new and existing Designated Employment Areas and town centre sites, but makes no reference to the contribution from development at existing employment sites or at suitable rural sites. It is important that this is recognised in draft Policy SP20 given that this is the overarching economic policy for the district and given the importance of these sites to the local rural economy. Indeed, in the case of rural employment opportunities, this omission in the LPR as drafted is contrary to paragraph 83 of the NPPF which clearly supports rural employment opportunities, stating that planning policies should ‘<i>enable the sustainable growth and expansion of all types of business in rural areas</i>’.</p> <p>Instead Policy SP20 states that the development of Class E and Class F uses in rural areas will be required to demonstrate that there are no other sequentially preferable sites and that town centres will not be adversely affected. The NPPF is clear however that small-scale proposals (under</p>	<p>Comments noted.</p> <p>Emerging Draft LPR Policy SP20 and Emerging Draft LPR Policy DM32 will be amended to make sure the aims of both policies is clear.</p> <p>Emerging Draft LPR Policies SP20 and SP21 set out the Council’s strategic approach to business development, which seeks to encourage such development to locate within settlement boundaries and Designated Employment Areas (DEAs), as well as existing employment locations and allocated sites.</p> <p>Proposed Submission LPR Policy DM35 – Sustaining a Prosperous Rural Economy recognises that many rural areas host a large number of small and medium sized enterprises which are vital to providing local job opportunities and a diverse economy. The policy therefore seeks to support appropriate new or expanding businesses in the countryside, supporting sustainable economic growth within the rural areas without detriment to the environment.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>2,500sqm) should not be subject to the sequential test. This is noted at supporting paragraph 7.10 but must be stated within Policy SP20 itself to ensure that suitable small-scale proposals can come forward to support the rural economy without unnecessary additional justification.</p> <p>The policy is also at odds somewhat with draft Policy DC32 which supports development in rural areas. It is crucial that there are clear links between Policies SP20 and DC32 to ensure that appropriate employment growth can come forward in rural areas.</p> <p>Whilst the policy relates specifically to employment development, as explained at paragraph 7.1; given the recent changes to the Use Classes Order (combining office, commercial and service uses together within Class E) it is important that the Council allow for changes of use across these commercial uses where appropriate.</p>	
Deloitte on behalf of Green Park Reading No.1 LLP (lpr2033)	<p><i>Full representation attached, in relation to Green Park, Reading</i></p> <p><u>Policy SP20 Strategic approach to economic development and hierarchy of centres</u></p> <p>Policy SP20 identifies that the LPR makes provision for 62,000 sqm of office (Class E) floorspace over the plan period. The Policy states that development of office uses outside of existing town and district centres will be required to demonstrate:</p> <p>“- There are no other sequentially preferable sites within or on the edge of centres and Designated Employment Areas (not in an edge or out of centre location); and</p> <p>- The vitality and viability of the existing town and district centres will not be adversely affected.”</p>	<p>Comments noted.</p> <p>Green Park lies outside of West Berkshire District and therefore it is not possible for the LPR to apply a designation to this site as it is land that is located outside of the area covered by the LPR.</p> <p>Emerging Draft LPR Policies SP20 and SP21 set out the Council’s strategic approach to business development, which seeks to encourage such development to locate within settlement boundaries and Designated Employment Areas (DEAs), as well as existing employment locations and allocated sites. Business development in the countryside is addressed under Proposed Submission LPR Policy DM35 – Sustaining a Prosperous Rural Economy – which considers economic development, including office, industry, storage and distribution, in the countryside.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>In the first instance, GPR requests that Green Park is classified as a Designated Employment Area. However, if this approach is not taken it is important, as outlined in the response to Policy SP1, that the LPR does not restrict business development coming forward in suitable locations outside of Designated Employment Areas. It is clear from Green Park’s current success to date that business development in this area would be entirely appropriate and should be encouraged. GPR requests that Policy SP20 is updated to include a third bullet point as follows: “or it is in a suitable location adjacent to existing and established office or business locations.”</p> <p>It is also important that the LPR recognises the benefits of providing business development with supporting ancillary uses such as small-scale retail or hotel. These uses can support the continued economic function of existing and future employment areas, support the efficient use of land, and travel which is less reliant on unsustainable transport modes. GPR therefore requests that a supporting note is added to Policy SP20 to confirm it is appropriate for new office development to include supporting ancillary uses such as smallscale retail or hotel use.</p> <p>GPR also requests that Policy SP20 is updated to include reference to data centres being appropriate business development. Data centres are increasingly vital to support the digital needs of companies working at the forefront of digital innovation and can be especially suitable for some otherwise constrained locations. Green Park is within close proximity to Reading and the wider Thames Valley and would be a suitable location for data centres to support the area’s existing and future businesses.</p>	<p>Whilst the Emerging Draft LPR Policy SP20 will be amended to remove the requirement for office developments within a DEA to satisfy the sequential test, proposals for office development not within a DEA or town or district centre will be required to satisfy the sequential test.</p>
Barton Willmore on behalf of Copas Farms (lpr1972)	<p>Draft policy SP20 indicates that the development of office, other commercial and services uses (Class E) and community uses outside existing town and district centres need to be justified via a sequential test. However, by reference to Class E, this policy implies that light industrial and R&amp;D (formally B1(b) and B1(c) uses) is a town centre use, and therefore such development requires a sequential test if located outside of existing town and district centres. However, the NPPF is clear that office use (formally B1a) is considered a main town</p>	<p>Comments noted.</p> <p>Emerging Draft LPR Policy SP20 will be amended to reflect the NPPF in this regard.</p>

Respondent (with lpr ref)	Response	Council Response
	centre use but not light industrial and R&D. The text within draft policy SP20 should be revised to make this explicit.	
Savills UK Ltd on behalf of Newbury & District Agricultural Society (lpr2045)	<p><i>See attached for full representation</i></p> <p>In setting out the overarching approach to new economic development, draft Policy SP20 establishes that sufficient land will be allocated to deliver at least 65,000 square metres of industrial, storage and distribution (Classes B2 and B8) floorspace over the plan period. The supporting text states that the purpose of this policy is to plan for the growth needed to meet the District's economic needs over the plan period.</p> <p>In accordance with our comments on the Council's Evidence Base, this policy should be sufficiently flexible to allow for more significant delivery of major employment sites where the need arises from regional or national requirements.</p> <p>The West Berkshire ELR should demonstrate a broader assessment of market demand for new logistics floorspace across regional and national markets, in accordance with national planning guidance (<i>see full response for details</i>).</p> <p>The PPG specifically identifies that the logistics industry plays a 'critical' role in enabling an efficient, sustainable and effective supply of goods for consumers and businesses. It also adds that this sector has distinct locational requirements that 'need' to be considered in formulating planning policies separately from those relating to general employment land.</p> <p>In accordance with the PPG, the Council should consider incorporating a new policy which specifically relates to the regional and national demands of the logistics and distribution industry, allocating sites where (and at a scale) those businesses wish to locate.</p>	<p>Comments noted.</p> <p>Given the preparation of the ELR 2020 was undertaken prior to the COVID 19 pandemic, the Council has taken the opportunity to update this evidence using the most recent economic forecasts which take account of the major macro-economic changes which have taken place, including COVID and Brexit. The update to the ELR will inform the LPR and will be published alongside the Regulation 19 consultation.</p> <p>The ELR does not analyse strategic (sub-regional) logistics/distribution as it was considered that this is best approached on a site availability perspective.</p>
Pro Vision on behalf of The Wasing Estate (lpr2067)	<p><i>In relation to Larkwhistle Farm, Brimpton (full representation attached)</i></p> <p>This representation relates to our client's land at Larkwhistle Farm, Brimpton Road ("the site").</p>	<p>Comments noted.</p> <p>Text within, and supporting, the Emerging Draft LPR policy will be amended to make clear how the LPR will</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The site is identified in the Council's Housing and Economic Land Availability Assessment (HELAA) as BRIM3, as shown in the Council's map below - <i>attached</i>.</p> <p>The site is outside of any settlement boundary and is outside of the Area of Outstanding Natural Beauty (AONB). It is within the inner emergency planning zone of AWE Aldermaston.</p> <p><b>Employment and economic development</b> The draft LPR explains that West Berkshire's vision is to <i>"retain and attract sustainable business growth with training and employment opportunities. A variety of different sectors together with a combination of larger businesses and small and medium-sized enterprises will ensure a resilient and sustainable economy. 1" Its economic strategic objective is to "facilitate and support a strong, diverse and sustainable economic base across the District, including the provision of employment land which provides for a range of local job opportunities"</i>.</p> <p>The evidence base that informed the preparation of the draft LPR includes an Employment Land Review, Functional Economic Market Area (FEMA) and Economic Development Needs Assessment (EDNA).</p> <p>The Employment Land Review states:</p> <ul style="list-style-type: none"> <li>• A minimum of 65,000 sqm of new office floorspace should be provided in the Plan. Some could come forward through office provision at Theale (THE8). However, this would neither be quantitatively nor qualitatively sufficient to meet the needs of Newbury;</li> <li>• The Council should scope the next generation of policies so that if market demand for offices strengthens, it is clear that the 65,000sqm requirement is a minimum and policy is flexible and supportive for all forms of office development;</li> <li>• For industrial, demand is more pressing given the current market shortage and there is a need to frontload the Plan with 62,000sqm of deliverable sites;</li> </ul>	<p>seek to address the requirements for employment land over the plan period. The LPR will make provision for industrial land through site allocations, to assist in accommodating the forecasted industrial requirements to 2039. However, given the current weakened office market and a lack of suitable available sites there remains a shortfall in supply of both office and industrial space. The Council has positively sought opportunities to meet the identified need and will commit to reviewing the matter again at the first 5 year review.</p> <p>With regards to offices, very few sites were promoted to the Council for office development and this is not surprising given the limited viability in the market at present. The Council's evidence confirms that the market signals are generally not sufficient to trigger new build office development on a speculative basis.</p> <p>Sites identified through the HELAA, the call for sites, and Regulation 18 consultation have been assessed for their potential to be allocated for employment use. All site assessments can be found in the HELAA and the site selection process is documented within the SA/SEA published alongside the Regulation 19 consultation.</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• The HELAA identified only one possible office site in the East of the District and saw nothing at all promoted in Newbury town. The likelihood is that sites are instead being promoted for housing – especially given the weak office market in the past; and</li> <li>• For both markets the Council needs to consider if additional land can be identified.</li> </ul> <p>Draft Policy SP20 sets out the strategic approach to economic development and hierarchy of centres. Within this, it states provision has been made for 62,000sqm of office floorspace and 65,000sqm of industrial, storage and distribution. Both of which are below the identified requirements as set out in the Employment Land Review. This should be reviewed and additional sites identified to <u>at least</u> provide for the District’s minimum requirements, noting the recommendations in the Employment Land Review.</p> <p>The Policy explains that such provision will be achieved by, inter alia, the development of office, other commercial and service uses (class E) and community uses (Class F) outside existing town and district centres provided it can be demonstrated that there are no other sequentially preferable sites within or on the edge of centres and Designated Employment Areas and that the vitality and viability of existing town and district centres will not be adversely affected.</p> <p>Supporting text for draft Policy SP20 states that <i>“The Council’s preferred approach is that if an edge of centre or out of centre site must be utilised for office development, then the site should be located within an existing Designated Employment Area. If this is shown not to be possible, then an impact assessment is required to clearly show that the vitality and viability of the District’s town and district centres is not adversely affected.”</i></p> <p>Although perhaps overly restrictive, we support this general allowance for office development beyond just the town and district centres and Designated Employment Areas. This would appear to reflect NPPF, stating that <i>“planning policies and decision should enable the sustainable growth and expansion of all</i></p>	

Respondent (with lpr ref)	Response	Council Response
	<p><i>types of business in rural areas, both through conversion of existing buildings and well-designed new buildings”.</i></p> <p><i>Site promotion details attached.</i></p> <p><b>Summary and conclusion</b></p> <p>The LPR does not identify sufficient deliverable sites to meet the identified employment needs of the District. This is inadequate and the LPR should go further in identifying additional sites.</p> <p>It has been made clear in the Employment Land Review that the identified requirements is a minimum and that the Council should be flexible and supportive of all forms of employment development.</p> <p>There should be less reliance upon existing and Designated Employment Sites – the Council should be open to considering if additional land can be identified, as noted in the Employment Land Review.</p> <p>Larkwhistle Farm is a suitable, available and achievable site for employment development. It is appropriately located nearby to Calleva Park Designated Employment Area and would be compatible with surrounding uses. It would also accord with West Berkshire’s strategic objective to “facilitate and support a strong, diverse and sustainable economic base across the District, including the provision of employment land which provides for a range of local job opportunities”.</p> <p>The allocation of this site would assist the Council in meeting its identified employment needs over the Plan period.</p> <p>We trust that this site will be given due consideration and we look forward to engaging with the Council through the continued preparation of the LPR.</p>	

Respondent (with lpr ref)	Response	Council Response
Montagu Evans on behalf of Royal & Sun Alliance Insurance PLC (lpr2112)	<p><i>Full representation on behalf of Royal &amp; Sun Alliance Insurance promoting residential development at Greenham Road Retail Park is attached.</i></p> <p>Policy SP20 outlines the Council's approach to supporting economic growth and retail development. Chief to this strategy is the focus on supporting retail and town centre uses in designated centres, whereby development will be directed to Newbury as the District's only Major Town Centre.</p> <p>Associated with this, we would advise that the Council provides explicit policy support for the redevelopment of underutilised, non-designated retail assets in urban locations, to alternate uses including residential. This would allow the Council to safeguard its strategic retail assets whilst balancing this against the need to achieve wider planning objectives, particularly delivering housing. This would ensure that suitable development sites which provide limited value as retail assets are not stymied from redevelopment because of an overly protective policy approach.</p>	<p>Comments noted.</p> <p>Emerging Draft LPR Policy SP20 will be split to separate the town centre elements of this policy into a standalone policy relating to town centres. The new town centre policy (Proposed Submission LPR Policy SP22) will seek to maintain and enhance the vitality and viability of town and district centres. This policy will support redevelopment and regeneration of sites in town and district centres.</p>
Bell Cornwell LLP on behalf of Kerridge Properties (lpr2128)	<p>Policy is not supported.</p> <p>(In relation to land at Charnham Park, Hungerford - <i>see attached for full representation</i>)</p> <p>These representations are submitted on behalf of our client Kerridge Properties Ltd in response to the current consultation on the Regulation 18 version of the emerging West Berkshire Local Plan.</p> <p>On their behalf, we are promoting an area of land at Charnham Park in Hungerford as suitable for removal from the proposed boundary of the Designated Employment Area (DEA) in this location.</p> <p>The site is currently included within the Protected Employment Area (PEA) of Charnham Park. This is a long-standing planning designation which seeks (in summary) to protect land within the employment area for uses within the historic B use classes (business, general industrial and storage/distribution). The land</p>	<p>Comments noted.</p> <p>As part of the evidence base which informs the Local Plan Review the Council has undertaken a review of the District's Protected Employment Areas, to be renamed Designated Employment Areas (DEAs) through the LPR process. As part of this work, Charnham Park and the parcel of land submitted within this representation has been considered.</p> <p>The Council has reviewed the designated areas, taking the Employment Land Review (ELR) as the starting point in considering how each area performs including any key issues or opportunities, and any changes in circumstances, in particular where there has been a loss of office space to residential through permitted development rights, or new development adjacent to existing areas. This work also takes in account</p>

Respondent (with lpr ref)	Response	Council Response
	<p>has not come forward for an employment use despite being included within an employment area for over 20 years.</p> <p>We therefore seek the removal of the land from this restrictive use to give additional flexibility for the site to be developed for an alternative use. Our clients would seek a use which was compatible with the area and, in any case, the relationship of any proposal with the surrounding uses would be fully assessed as part of the development management process.</p> <p>We consider that the information that we will set out within these representations provides a robust support of our client's position and that making this change to the boundary would be a justified strategy which would increase the effectiveness of the Local Plan.</p> <p>The proposed amendment would also be consistent with national policy. We will refer to the National Planning Policy Framework (NPPF) and the supporting Planning Practice Guidance (PPG) on the issue of the effective use of land and evidence regarding whether land should be reallocated for a more deliverable use.</p> <p>We show below, for ease of reference, the area of land which we are promoting as suitable for removal from the proposed Designated Employment Area (DEA) at Charnham Park. We also include a full sized version of this plan as Appendix A. <i>See attached</i></p> <p>The red hatched area is the undeveloped area of land that we are seeking to be excluded from the DEA. This is shown on the plan in two parcels – Parcel A is to the north of the pipeline and measures 2264 sqm. Parcel B measures 5970 sqm. The blue area is other land within our client's ownership at Charnham Park.</p> <p>It can be seen that the land is split by a fuel pipeline which runs directly to Heathrow. This cannot be moved and has to be protected in perpetuity. The undeveloped land runs to the south of the pipeline. The area also extends to the</p>	<p>allocations set out within the LPR and the designation of new DEA as identified in Proposed Submission LPR Policy SP21.</p> <p>The conclusions of the DEA review work will be published alongside the Regulation 19 consultation.</p> <p>The Council's evidence (ELR 2020 and 2022) highlights high occupancy rates for industrial uses and high to moderate occupancy for office space and given the balance between supply and demand, the ELR recommends safeguarding all DEAs for business uses/development. It is important to safeguard the District's DEAs for the role they play in providing a supply of employment land to meet the existing and future needs of businesses. Maintaining a supply of employment land is essential to ensure the economic competitiveness of the District and to deliver sustainable economic growth.</p> <p>The Charnham Park site assessment within the ELR, states that it is the newest and main business park in Hungerford. A purpose built cluster of modern office, industrial and logistic and distribution space, with the leisure centre also on site. It goes on to state that Charnham Park is Hungerford's premier industrial and office location, mainly due to the access advantages. With regards to releasing the particular site in question, the ELR confirms that this is a suitable location for employment activity and recommends safeguarding.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>north of the pipeline. This area is also generally unmade and currently used as overflow parking by CDK.</p> <p>Whilst we seek the removal of all of the hatched area, if the Council does not consider that this would be a justified amendment to the DEA then we would be willing to accept the release of Area B in isolation.</p> <p>Site History</p> <p>The site lies on part of an extant permission for B1 uses as permitted under application reference 01/01227/ful. Part of this has been implemented and comprises the office block to the north of the application site.</p> <p>01/01227/ful. Erection of Headquarters B1 development (6158m<sup>2</sup>) comprising research and development facilities, management training centre plus ASP centre plus 217 car parking spaces Erection of 2 storey Amenity and Recreation Building (2035m<sup>2</sup>) plus parking. This was granted consent in 2003 but only partially implemented through the construction of an office block to the north of the site.</p> <p>10/00845/COMIND. This was an application for a 65-bed hotel development including ancillary facilities and a restaurant, together with 42 car parking spaces for the hotel plus a further 23 spaces to be shared with the adjoining offices to the rear.</p> <p>The proposal was on part of the land covered by the extant B1 consent from 2001. The application was refused by the Council but won on appeal. The appeal decision concluded that <i>the hotel proposal would provide for employment generating development which would make a positive contribution to the local tourism industry and the economy of the area, and meet the objectives of up to date Government policy</i></p> <p>The appeal Inspector also concluded that the site was in a sustainable location and that the hotel proposal would not be harmful to the AONB or to the character or appearance of the Kennet and Avon canal.</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>Whilst the consent has been implemented in planning terms, it has not, however, been delivered for a hotel use.</p> <p>It is also relevant that our client successfully appealed a refusal by the Council (and won partial costs) for the change of use of a former children's creche (use class D1) at the adjacent Herongate Leisure Centre to 4 serviced apartments (use class C1). This was application reference 19/00429/FUL from 2019. The Inspector stated that: <i>it is apparent that uses falling outside the B Classes of the UCO have been found acceptable within the area that is the subject of the employment designation.</i></p> <p>The Council has demonstrated inflexibility on an ongoing basis with regard to the interpretation of its employment policy, which has led to suitable proposals outside of business uses being refused by the Council but won at appeal. This gives a considerable additional degree of uncertainty and potential high costs when considering the future use of the site. This is off-putting for future operators when considering the potential of the site.</p> <p>No development in the historic B use classes has come forward on the site outside the original B1 office consent which was granted 20 years ago. By continuing to restrict development on the site on an ongoing basis by applying an out of date policy position, the Council is rendering the land unusable. This is not a proactive response, nor is it responsive to the changing working environment or the wider needs of Hungerford Town.</p> <p>Emerging Policy and Evidence</p> <p>Within the extant development plan, the site currently lies within a Protected Employment Area (PEA) and the policy approach to development within the PEAs is set out in policy CS9 of the adopted Core Strategy (Location and Type of Business Development). This policy, in turn, replaced policy ECON 1 of the 'old' West Berkshire Local Plan, but did not update the boundaries of the employment areas.</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>The supporting text to policy CS9 confirms that ‘a comprehensive assessment of existing Protected Employment Areas and their boundaries will take place as part of the Site Allocations and Delivery DPD.....evidence such as business surveys, Annual Monitoring Reports and the composition of each Protected Employment Area including the age, quality, location and capacity of sites and premises must be taken into account, together with the surrounding uses’.</p> <p>The Protected Employment Areas are now becoming Designated Employment Areas (DEAs) in the emerging Local Plan. Whilst some areas are proposed as new DEAs, the Council does not appear to have reviewed the boundaries of the existing PEAs in detail to see if any areas should be removed from them. This did not take place through the Site Allocations and Delivery DPD either. Policy CS9 of the Core Strategy was found sound on the basis that the policy set out a clear framework for the detailed review of the employment areas within a short period of time. This has not happened.</p> <p>The Council’s evidence base to support the employment policy is the Employment Land Review, which was prepared by Stantec and published in August 2020, but this work does not seem particularly detailed or granular with regard to boundary reviews, or consider why parts of existing employment sites have not come forward for development.</p> <p>We disagree with the Council’s approach to largely ‘carrying over’ the geographical extent of the employment site boundaries. These are now very old and were defined either through the ‘old’ Local Plan which was adopted in 2002 – or at same date prior to that. They are therefore considerably out of date and should be proactively reviewed in detail against a transparent and consistent set of criteria as part of the emerging Local Plan process to ensure that they are fit for purpose.</p> <p>With regard to Charnham Park, the Employment Land Review states that there is one undeveloped parcel which has consent for a hotel. It does not explain that this consent was granted on appeal in 2011 and has not yet come forward, or raise any suggestions about why this land has remained undeveloped. This is not helpful, nor positive. The ELR also states that the adjacent Charnham</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>Lane employment area should be included within the DEA. However, this recommendation does not appear to have been accepted by the Council.</p> <p>The emerging policy to manage development in the DEAs is policy DC11. This has the same principles as extant policy CS9, however the national policy has evolved since that policy was adopted in 2012. We do not consider that the Council's approach is fully in conformity with national policy as we set out below.</p> <p>The NPPF (2019) chapter 11 seeks an effective use of land. Paragraph 120 is particularly relevant. This states that:</p> <p><i>Planning policies and decisions need to reflect changes in the demand for land. They should be informed by regular reviews of both the land allocated for development in plans and of land availability. Where the local planning authority considers there is no reasonable prospect of an application coming forward for the use allocated in a plan:</i></p> <p><i>a) They should, as part of plan updates, reallocate the land for a more deliverable use that can help to address identified needs (or, if appropriate, deallocate a site which is undeveloped); and</i></p> <p><i>b) In the interim, prior to updating the plan, applications for alternative uses on the land should be supported, where the proposed use would contribute to meeting an unmet need for development in the area.</i></p> <p>We note that the Council has been reluctant to permit applications for alternative uses on the land, despite the evidence which demonstrates that the site is unlikely to come forward or the fact that alternative uses can provide significant wider benefits to the employment area (as has been accepted elsewhere).</p> <p>Given that the site has not been developed since it was designated (at least 20 years ago) our assessment is that there is no realistic prospect that it will now come forward for the business uses envisaged by the Council.</p> <p>The Planning Practice Guidance (Paragraph: 001 Reference ID: 66-001-20190722) that provides additional information about how to deliver the NPPF</p>	

Respondent <i>(with lpr ref)</i>	Response	Council Response
	<p>confirms what needs to be taken into account when considering whether or not an allocated site is likely to come forward for its intended use. These matters include the following:</p> <ul style="list-style-type: none"> <li>• the length of time since the site was allocated in the development plan;</li> <li>• the planning history of the site including any planning applications or pre-application enquiries;</li> <li>• whether there is evidence that the site has been actively marketed for its intended use for a reasonable period, and at a realistic price; and</li> <li>• whether there are any changes of circumstance that mean that take-up of the site for its intended use is now unlikely.</li> </ul> <p>In response to these matters, we have explained how the site was allocated over 20 years ago and has not been developed for either employment use or employment generating use to date. Whilst there have been a couple of planning applications, one (for business use) was only partially implemented due to a change of ownership and the hotel consent (won at appeal) has not been taken up and is now ten years old. This is despite active marketing by Kerridge Properties Ltd on both a sale and lease basis. Given changing working practices in recent times, it is even less likely that the site will be taken up for a business use.</p> <p>Our assessment is that continuing to include the site within the Designated Employment Area boundary would not be consistent with national policy. Given the information set out above, the Council should revise the boundary of the DEA to remove the site, either in full, or part, to allow it to come forward for an alternative use.</p> <p>Conclusion</p> <p>We seek the removal of an area of land at Charnham Park (either in full or part) from the Charnham Park Designated Employment Area to give flexibility to bring the site forward for alternative uses.</p> <p>We have explained in these representations that despite being included within the boundary of the Charnham Park employment area for at least twenty years,</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>the site has not been developed to date for either employment or hotel uses, although it has been marketed on an ongoing basis. There have not been any planning applications on the site for a number of years.</p> <p>The site is in an important road frontage location, and should be seen as part of the gateway to Hungerford. It now needs to be considered positively, rather than artificially restricted by a historic policy approach, to allow an appropriate development can come forward.</p> <p>Given the history and the active encouragement within national policy and guidance to ensure effective use of land, the Council should not continue apply a designation to this land which simply is not proving to be attractive to the market.</p> <p>A more detailed approach to reviewing the boundaries of the employment sites in the District to ensure that they are fit for purpose would be a justified and effective way forward for the Local Plan Review. It is very clear that the policy approach to an unused site, with a road frontage in a prime location, must be reconsidered.</p> <p>We would be happy to discuss these representations with the Council as the work on the Local Plan progresses.</p>	
Gerald Eve LLP on behalf of Fairhurst Estate (lpr2365)	<p>Policy is not supported.</p> <p>Our clients own and control land situated immediately to the south east of the motorway junction. A site location plan of this land is included at Annex 1 (<i>attached</i>).</p> <p>It is considered that the land provides an opportunity for meeting some of the economic objectives of the new Plan in an appropriate and deliverable form with excellent access to the strategic highway network, and the potential for enhanced linkages into Newbury itself.</p>	<p>Comments noted.</p> <p>Following the Regulation 18 consultation the Council reassessed all the HELAA sites submitted for employment. As part of this reassessment further landscape evidence has been undertaken on a number of sites to inform the LPR. The LPR takes a landscape led approach to development given 74% of the District is AONB. The Landscape Sensitivity and Capacity Assessment for this site (Land south east of M4 Junction 13, Chieveley CHI24) outlines that the site has strong relationship with the wider landscape to the south and east across the valley and contributes to the landscape</p>

Respondent (with lpr ref)	Response	Council Response
	<p>We consider that the location should be carefully considered for employment generating uses as part of the Local Plan Review, and was put forward in or response to the Housing and Economic Land Availability Assessment (HELAA).</p> <p>The location was assessed within the HELAA (and given the site reference CHI24). We disagree with the conclusions of the site assessment, and also with the overarching approach of the draft policy approach. The policy approach fails to deliver appropriate opportunities for employment development and economic activity alike. We note that there is not one reference to logistics provision within the entire Emerging Draft West Berkshire Plan which would be most appropriately located adjacent to a key motorway and trunk road junction (M4/A34 Junction 13).</p> <p>Policy SP20 should identify the land under site reference CHI24 for strategic employment development as a Designated Employment Area to allow for the provision of new quality employment space. This could comprise a mixture of employment generating uses that would most appropriately be located adjacent to the interchange, service area and showground.</p> <p>Notwithstanding the comments within the HELAA Stage 2(B) “Assessing Suitability”, the site is capable of providing access to the highway network without passing through or impacting the service area. Liasion would be required with Highways England and other stakeholders in order to achieve an appropriate solution.</p> <p>In respect of other considerations within the HELAA, Sustainable Drainage Systems could be incorporated, and as noted, there would be low risk from 24 hour per day operations which would suit many employment generating enterprises seeking to locate here. As a result of ownership, the site could deliver a net gain in biodiversity, and also any Green Infrastructure requirements.</p>	<p>pattern of open farmland within the valleys contrasting with the upper wooded valley sides. Development on the site would impact on the AONB through the loss of open setting of adjacent woodlands, including ancient woodlands, loss of open land within the AONB, adverse impact on the rural character of Marsh Lane and Chalky Lane, increase noise and traffic levels on local area and increased external lighting resulting in further light pollution.</p> <p>The landscape assessment concludes that the site is not considered for development.</p> <p>Sites identified through the HELAA, the call for sites, and Regulation 18 consultation have been assessed for their potential to be allocated for employment use. All site assessments can be found in the HELAA and the site selection process is documented within the SA/SEA published alongside the Regulation 19 consultation.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>In respect of the landscape setting, layout principles and frameworks could frame the form of development.</p> <p>We strongly disagree with the conclusions in respect of suitability within Stage 2(b), and consider that:</p> <ul style="list-style-type: none"> <li>• Development would be capable of being appropriate subject to establishing principles of design;</li> <li>• The location adjacent to a key interchange on the motorway and trunk road network means that it is ideally suited for several forms of employment generating development; and</li> <li>• Any concerns around highways impacts would be capable of being overcome and mitigated as appropriate.</li> </ul> <p>Changes to be made/preferred approach: Further consideration of the site assessed as CHI24 within the HELAA should be undertaken. We consider that the site as shown within the area of CHI24 and as identified on the enclosed plan merits further investigation and consideration for a range of employment generating uses.</p>	
Ptarmigan Group (lpr2344)	<p>Policy is supported.</p> <p>Draft Policy SP20 makes provision for 65,000sqm of industrial, storage and distribution floorspace in the District over the plan period. We support the Council's approach to allocate industrial land in the LPR to help address the current market shortage as outlined in the ELR (2020) at paragraph 12:</p> <p><i>“ .. Demand is also more pressing given the current market shortage, and there is a need to frontload the plan with 16 ha of easily deliverable sites. Four or possibly five potentially suitable sites are identified through the HELAA that are capable of meeting the need for industrial floorspace. All of these sites are extensions to existing employment areas, and these are in the main area of market demand in the east of the District.”</i></p>	<p>Comments noted.</p> <p>For clarity, the Council's Employment Land Review (ELR) 2020 and Updated ELR (2022) supersedes the 2016 Berkshire Economic Development Needs Assessment (EDNA).</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The ELR (2020) and the supporting text to draft Policy SP20 (paragraph 7.3) are clear that these figures represent the ‘minimum’ needed and therefore it is important that this is reflected in the Policy itself.</p> <p>The findings of the ELR (2020) in relation to industrial, storage and distribution floorspace also correlate with the Berkshire Functional Economic Market Area Assessment (FEMA) and Western Berkshire Economic Development Needs Assessment (EDNA) produced in 2016. The purpose of the EDNA was to provide an understanding of the future business needs and requirements for employment land and floorspace within the defined FEMA to 2036. A clear conclusion from the Western Berkshire EDNA, as stated in the executive summary on page 6, was that:</p> <p><i>“Demand for industrial space remains strong and very low levels of vacancy reflect a limited supply of industrial accommodation (particularly modern, good quality space). Development of new industrial space in the FEMA has been limited in recent years, with much of the existing stock relatively dated and in need of refurbishment. Local commercial property agents report that demand for industrial premises is currently outstripping supply, and an upward trend in industrial rental values in recent years has led to new speculative industrial development being just about viable within the FEMA. <b>The key issue going forward is a lack of new land and/or space to accommodate new development.</b>”</i> [our emphasis]</p> <p>The provision of additional industrial, storage and distribution floorspace in the LPR would clearly help to address the above imbalance between demand and supply. Paragraph 5.18 of the EDNA also stated that:</p> <p><i>“Whilst this EDNA study provides an objective assessment of economic development needs within the Western Berkshire FEMA over the period 2013- 2036, the ability of the local authority to meet these needs over this period is ultimately an issue that will need to be determined through the next stage of the Local Plan making process.”</i></p>	

Respondent (with lpr ref)	Response	Council Response
	<p>Draft Policy SP20 identifies how the identified needs will be met which includes through the creation of new DEAs and extensions to existing DEAs (criterion a). This approach is supported and is also in accordance with paragraph 82 of the National Planning Policy Framework (NPPF) which states that planning policies should recognise the specific locational requirements of different sectors including for storage and distribution operations at a variety of scales and in suitably accessible locations.</p>	
<p>Pro Vision on behalf of Feltham Properties (lpr2281)</p>	<p>Policy SP20 confirms that retail development (i.e. Class E) development outside existing town and district centres will be required to demonstrate that there are no other sequentially preferable sites within or on the edge of centres; and the vitality and viability of the existing town and district centres will not be adversely affected.</p> <p>The draft Policy does not, however, clarify when retail impact assessments will be required for out-of-centre proposals.</p> <p>In the absence of a locally set threshold, supporting by evidence, the policy should confirm that the Council will rely on the default threshold set out in the National Planning Policy Framework, 2019 (NPPF) (paragraph 89), which is for proposals greater than 2,500 sq. m of gross floorspace.</p> <p>However, it is considered that the Council should acknowledge within the Plan that convenience food retailers (e.g. small supermarkets) may be acceptable on an out-of-town site away from the town centre, providing it does not adversely affect the vitality and viability of the existing town centre.</p> <p>The requirements of food retailers are evolving due to internet shopping with consumers increasingly demanding home deliveries and 'click and collect' services, together with a physical store. As such, these operations will generally require the need for an out-of-centre location given they necessitate larger sites - due to on-site car parking, 'click and collect' kiosks/lanes and additional loading bays for home delivery vans etc. - to offer these services.</p> <p>With the above in mind, it is considered that Policy SP20 should include</p>	<p>Comments noted.</p> <p>Emerging Draft LPR Policy SP20 will be split to separate the town centre elements of this policy into a standalone policy relating to town centres. The new town centre policy (Proposed Submission LPR Policy SP22) will seek to maintain and enhance the vitality and viability of town and district centres.</p> <p>Proposed Submission LPR Policy SP22 will continue to require proposals for main town centre uses to satisfy the sequential test, with the exception of offices proposals within a Designated Employment Area (DEA).</p> <p>Proposed Submission LPR Policy DM39 addresses the provision and retention of local community facilities, while Proposed Submission LPR Policy DM35 seeks to sustain a prosperous rural economy.</p> <p>The LPR will also have a policy safeguarding identified Retail Parks (Proposed Submission LPR Policy DM34).</p>

Respondent (with lpr ref)	Response	Council Response
	qualified support for out-of-centre retail proposals that can demonstrate that the type of goods sold, or the form and operation of the commercial unit proposed could not be conveniently accommodated within the existing centres.

This is in addition to the community benefits of providing accessible, and affordable weekly and top-up food shopping destinations, providing high-quality low priced goods.</p> <p>Introducing an Aldi store to an area reduces the need to travel further afield. Keeping the spending local not only has benefits to the environment through reduced travel, but also retains expenditure in an area, and increases the likelihood of spending taking place in other facilities rather than outside the area.</p> <p>Furthermore, as set out above, a new Aldi store provides approximately 40 new local job opportunities, paying its 'shop floor' staff market leading wages, and has two of the most successful apprentice schemes and graduate programmes in the UK.</p> <p>Apprentices are trained to work in <b>all</b> parts of the business including at store, distribution, logistics and management level, as well as progression through to the Store Management Team. Aldi's on-going graduate scheme secures an</p>	<p>Comments noted.</p> <p>Emerging Draft LPR Policy SP20 will be split to separate the town centre elements of this policy into a standalone policy relating to town centres. The new town centre policy (Proposed Submission LPR Policy SP22) will seek to maintain and enhance the vitality and viability of town and district centres.</p> <p>Proposed Submission LPR Policy SP22 will continue to require proposals for main town centre uses to satisfy the sequential test, with the exception of offices proposals within a Designated Employment Area (DEA).</p>

Respondent (with lpr ref)	Response	Council Response
	<p>annual intake for the Area Management Programme. Trainee Area Managers spend a year shadowing an Area Manager before they take on three to four stores of their own to manage. The training covers the entire spectrum of running a retail operation and is a UK- wide programme.</p> <p>Aldi also offers a large number of other positions within the sites, which include full and part time jobs, and Aldi devise contracts that fit around people's other existing commitments.</p> <p>In addition, the development of new Aldi stores provide a significant contribution to the construction industry, which again benefits the local economy. A number of contractors and skills are required during the build of a new Aldi store, many of which are sourced from the local area.</p> <p>In light of this, we consider the Local Plan policies in respect of economic development should be amended to better reflect the benefits an Aldi store has to the economy, the high quality nature of retail jobs , and the other investment benefits a new store or improvements to an existing store bring to an area.</p> <p>The settlement hierarchy set out in Policy SP 3 highlights the urban areas of Newbury, Thatcham, Eastern Urban Area should be the prime focus for housing and economic development, but we are concerned this may not be reflected by Policy SP 20 'Strategic approach to economic development and hierarchy of centres', which is discussed below.</p> <p>Policy SP 20 'Strategic approach to economic development and hierarchy of centres' states that <i>"New office and retail development will be directed to Newbury Town Centre, and then other town and district centres (as defined by the Policies Map) in line with the following hierarchy:</i></p> <p><i>Major town centre - Newbury</i></p>	

Respondent (with lpr ref)	Response	Council Response
	<p><i>Town centre - Thatcham and Hungerford</i></p> <p><i>District Centres - Pangbourne, Lambourn and Theale"</i></p> <p>We consider that by seeking to direct new retail development to Newbury Town Centre as an initial priority, could be to the detriment of other centres throughout West Berkshire. Development that meets the relevant policy requirements and addresses technical considerations, and support local communities should be welcomed throughout West Berkshire.</p> <p>Aldi complement, rather than compete with, existing local traders, independent retailers, and other supermarkets and service providers. Aldi customers therefore use other facilities to fulfil their grocery and local service needs. This generates a propensity for linked trips and associated spin-off trade, which brings qualitative benefits and should be supported by planning policy.</p>	
Turley on behalf of Richborough Estates Ltd (lpr2387)	<p><i>Full Representation promoting allocation of land north of Silchester Road, Tadley is attached at Policy SP14.</i></p> <p>Policy SP20 refers to the hierarchy of centres and lists Newbury (Major Town Centre), Thatcham and Hungerford (Town Centre), Pangbourne, Lambourn and Theale (District Centres) as the key centres for new office and retail development.</p> <p>As above, it is acknowledged that the whole of Tadley is not within the West Berkshire administrative boundary, however, it is considered that Tadley still acts as a key service centre which contributes towards West Berkshire. To reflect the contribution and notable size of Tadley, it is considered that Tadley should also be included in the hierarchy of centres as a 'Town Centre'. This is important in order to recognise and support development opportunities at the northern edge of Tadley, within West Berkshire. This change would reflect the points made above regarding the role the town plays for some West Berkshire residents and its sustainability credentials.</p>	<p>Comments noted.</p> <p>Tadley lies outside of West Berkshire District and therefore it is not possible for the LPR to apply a designation to this site as it is land that is located outside of the area covered by the Plan.</p> <p>It is recognised that Tadley, which is located within Basingstoke and Deane is identified within its adopted Local Plan as a District Centre.</p>

Respondent (with lpr ref)	Response	Council Response
	Changes to be made/preferred approach: Considered that Tadley should also be included in the hierarchy of centres as a 'Town Centre'.	
West Berkshire Council as landowner of London Road Industrial Estate (LRIE) (LATE SUBMISSION)	<p><b>Strategic approach to economic development and hierarchy of centres</b>  <i>This Local Plan makes provision for 62,000 sqm of office (Class E) floorspace and 65,000 sqm of industrial, storage and distribution (Classes B2 and B8) floorspace over the plan period.</i></p> <p><b>Add 7,000 sqm of employment floorspace to Policy SP20</b> as a result of the Council's aspirations as landowner for LRIE – see below. The evidence for this is contained within the Addendum to the Avison Young Development Brief published in September 2022 available at <a href="https://info.westberks.gov.uk/lrie">https://info.westberks.gov.uk/lrie</a> FINAL DRAFT ATTACHED</p> <p><b>Propose the renaming of the LRIE DEA.</b> There is the potential for confusion between the existing London Road Industrial Estate DEA which includes the adjoining Riverpark Industrial Estate, and the area within the Council's freehold ownership for which the Council as landowner has aspirations – also known as the London Road Industrial Estate (expected to be renamed in early 2023). This should be addressed either by renaming the DEA or by providing clarification within the supporting text.</p> <p>For this reason, propose deleting 3<sup>rd</sup> and 4<sup>th</sup> sentences in para 7.6 of the supporting text as follows, in line with the refreshed approach set out in Executive Report EX4219 approved on 9 June 2022 and supporting documents, available at <a href="https://info.westberks.gov.uk/lrie">https://info.westberks.gov.uk/lrie</a> :</p> <p><b>7.6</b> <i>The Council's preferred approach is that that if an edge of centre or out of centre site must be utilised for office development, then the site should be located within an existing DEA. If this is shown not to be possible, then an impact assessment is required to clearly show that the</i></p>	<p>(LATE SUBMISSION)  Comments noted.</p> <p>The supporting text of Emerging Draft LPR Policy SP20 will be amended to ensure the Proposed Submission Draft LPR clearly sets out the Council's approach to the London Road Industrial Estate as Local Planning Authority.</p> <p>There is a subtle difference between the names as the DEA is titled 'London Road Industrial Estates', which includes the majority of the Council owned LRIE and the adjoining Riverpark Industrial Estate. Given the Council expect the name of the Council owned land to change in early 2023, it is not proposed to amend the name of the DEA in the LPR. Proposed Submission LPR Policy SP20 will address this matter within the supporting text, along with the current status of the LRIE.</p>

Respondent (with lpr ref)	Response	Council Response
	<p><i>vitality and viability of the District's town and district centres is not adversely affected. <del>The London Road Industrial Estate is an edge of centre DEA which has scope for comprehensive regeneration within the plan period to maximise the potential of the site. Office development may be appropriate in that context.</del></i></p>	

## Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

### Emerging Draft LPR Policy: SP21 Sites allocated for economic development

#### (Proposed Submission LPR Policy: SP21 Employment site allocations)

Number of responses received: 92

Respondent (with lpr ref)	Response	Council Response
<b>Internal</b>		
NA		
<b>Statutory consultees</b>		
Natural England (lpr1599)	<p>In relation to EMP5, land west of Ramsbury Road, Membury Industrial Estate: This is an extremely large existing industrial site within the AONB. This allocation is a logical extension merging the two existing employment sites. However, the scale of industrial development in this open landscape would have a visual impact within the locality. This site must be subject to additional landscape sensitivity work to shape the height, landscaping, materials and lighting of the site. In addition, the site should be restricted to the western side of the tree belt and the former runway to contain further expansion.</p> <p>In relation to EMP6 - Land north of Arlington Business Park, Theale East Business Centre: This allocation is within the setting of the AONB. It is developable in parts, with the pylons forming a good natural point to end development out of Theale, whilst still providing buffer to the M4 and disconnect from Reading.</p>	<p>Comments noted.</p> <p><b>EMP5, Membury</b> - It is proposed to create separate policies for each of the employment sites. Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessments (LCA) for a number of sites in the LPR. Membury Protected Employment Area (renamed Designated Employment Areas (DEA) through this LPR) is made up of a central area and a number of fragmented smaller outlying areas. The site loosely connects these areas. The eastern part of the site has an established visual and landscape connection with the open arable landscape area further to the east of Ramsbury Road. The western part of the site (runway area) connects to the adjacent area of open</p>

Respondent (with lpr ref)	Response	Council Response
		<p>grassland which leads across to the Iron Age hillfort and the wider countryside</p> <p>The LCA identifies a loss of open land, loss of open views within the AONB, and loss of quiet rural character and rural character of Ramsbury Road as potential impacts of development. In terms of the impact on the existing PEA the fragmented character allows the undeveloped areas in-between to retain characteristic landscape features of the AONB, therefore mitigating and reducing the overall effect of the PEA on the AONB. The proposed site connects four of these together, which would result in one large area and the potential loss of these mitigating landscape features.</p> <p>Opportunities to propose substantial areas of tree and woodland planting as part of mitigation measures would not be out of character. Woodland would help, in time, to integrate and screen any proposed development as well as enhancing the area.</p> <p>The LCA recommends that development is limited to a focused area, to the eastern part of the submitted site. This reflects the development area outlined in the planning application (19/02979/OUTMAJ). It is considered such recommendations need be followed, and the policy will list criteria, as suggested in the LCA for the reserved matters application, or any other scheme, to be implemented.</p> <p><b>EMP6, Theale</b> – Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessments (LCA) for a number of sites in the LPR. The LCA outlines that the site contributes to an important part of the remaining open countryside and the subsequent separation of Theale from Calcot. The site is</p>

Respondent (with lpr ref)	Response	Council Response
		<p>visible from within Theale (and the Conservation Area), where the open character of the site contributes to Theale's historic character and setting. The site is part of the open countryside which continues further to the north and across the M4 into the North Wessex Downs AONB. The site is separated from the Protected Employment Area (PEA) by the A4 Bath Road and due to the lack of intervisibility with the site and the PEA the landscape character of the site retains a more rural character, contributing to the setting and separate identity of the historic village of Theale.</p> <p>It notes that the introduction of offices and/or other large-scale buildings would be out of scale and keeping with the historic village character of Theale, and development across the whole site would create the perception of coalescence with Calcot and loss of separate identity of Theale from Calcot. Development would also be visible from areas with the North Wessex Downs AONB.</p> <p>The LCA concludes that if the site were developed, either in whole or in part, it would compromise the setting of Theale and its separate identity and character from Calcot. It therefore recommends that the site is not developed for employment uses. Therefore, as part of the Local Plan Review going forward it is no longer proposed to allocate the site.</p>
North Wessex Downs AONB (lpr1629)	EMP5 (land west of Ramsbury Road, Membury Industrial Estate) - The largest industrial site within the AONB occupied by large warehouses. It is a logical extension merging the two existing employment sites, however the scale of industrial development in this open landscape would have a visual impact within this local landscape as previously raised in applications for industrial development within this gap. The gap is an important visual break as historically it formed part of the runway and until a decade or less ago still formed part of the wider runway area. A belt of trees has now interrupted this	<p>Comments noted.</p> <p>It is proposed to create separate policies for each of the employment sites. The site at Membury will be subject to criteria, which planning applications will need to follow.</p> <p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessment (LCA) for</p>

Respondent (with lpr ref)	Response	Council Response
	<p>and impacted upon the open character of the local landscape. Should demonstrate that there is no other alternative. The nearby Lambourn woodlands site appears to be underutilised and provides the LPA with an opportunity to regenerate. The existing lane which provides access to the industrial site is not suitable for heavy industrial use, any alteration or widening would alter the character of this rural lane to the detriment of the AONB.</p> <p>Seek deletion of the expansion. But if the LPA wishes to continue with this allocation, we would strongly advise that additional landscape sensitivity assessments are carried out. It would also be prudent for the council to produce a masterplan plan for the area, which provides long term aspirations and sets out objectives/vision for the site whilst outlining height parameters, landscaping, materials and lighting.</p>	<p>a number of sites in the LPR. Membury Protected Employment Area (renamed Designated Employment Area (DEA) through the LPR) is made up of a central area and a number of fragmented smaller outlying areas. The site loosely connects these areas. The eastern part of the site has an established visual and landscape connection with the open arable landscape area further to the east of Ramsbury Road. The western part of the site (runway area) connects to the adjacent area of open grassland which leads across to the Iron Age hillfort and the wider countryside</p> <p>The LCA identifies a loss of open land, loss of open views within the AONB, and loss of quiet rural character and rural character of Ramsbury Road as potential impacts of development. In terms of the impact on the existing PEA the fragmented character allows the undeveloped areas in-between to retain characteristic landscape features of the AONB, therefore mitigating and reducing the overall effect of the PEA on the AONB. The proposed site connects four of these together, which would result in one large area and the potential loss of these mitigating landscape features.</p> <p>Opportunities to propose substantial areas of tree and woodland planting as part of mitigation measures would not be out of character. Woodland would help, in time, to integrate and screen any proposed development as well as enhancing the area.</p> <p>The LCA recommends that development is limited to a focused area, to the eastern part of the submitted site. This reflects the development area outlined in the planning application (19/02979/OUTMAJ). It is considered such recommendations must be followed, and the policy will list</p>

Respondent (with lpr ref)	Response	Council Response
		criteria, as suggested in the LCA for the reserved matters application, or any other scheme, to be implemented.
Basingstoke and Deane Borough Council (lpr1483)	<p>It is also noted that additional employment allocations are proposed close to the borough boundary at Easter Park near Aldermaston and on Paices Hill (Policy SP21). Given these sites' proximity to BDBC, it would be important to ensure these would not result in any highways impacts upon Tadley or other roads in north Hampshire.</p> <p>BDBC is keen to continue to engage in suitable discussions under the Duty to Cooperate, in relation to the issues set out above and those discussed at our meeting in late 2020.</p>	<p>Comments noted.</p> <p>WBDC have engaged with BDBC in a Duty to Cooperate meeting in late 2020 and continue to keep dialogue open.</p> <p>It is no longer proposed to allocate the sites at Easter Park and north and south of Youngs Industrial Estate due to their location within the DEPZ.</p>
Thatcham Town Council (lpr1405)	<p><i>Full representation relating to north east Thatcham strategic site allocation attached to representation on SP17.</i></p> <p>We note that Colthrop Estate has an allocation of land for industrial, storage and distribution. We are unclear if the purpose of this allocation is for logistics - in which case the employment may be relatively low - or for other purposes.</p> <p>We recognise the new employment area of Theale and acknowledge the good rail connectivity from Thatcham. Nevertheless, the restricted access and parking at Thatcham Station is also likely to lead to many new residents commuting by private vehicle. As we note elsewhere, active travel (from the new development to the station) will not be suitable for everybody. Therefore, it will be important that the Traffic Assessment fully considers the new employment areas in future predictions.</p>	<p>Comments noted.</p> <p>The allocation at Colthrop seeks B2 and/or B8 use (General Industrial, and Storage and Distribution), and not purely focused on logistics.</p> <p>It is not proposed to allocate the employment site at Theale going forward in the Regulation 19 version of the LPR, owing to recommendations from the landscape assessment.</p>
Lambourn Parish Council (lpr1445)	<p><b>Context:</b> The Membury Protected Employment Area (renamed Designated Employment Area in the new Local Plan) is made up of 8 parcels of land in Lambourn Woodlands (see attached map). In WB, DEA land is designated for particular B-class business uses. (It is not clear how the recent reclassification to E Class use of some B uses will impact the DEAs) Two of the largest DEA sites lie adjacent to (but do not include) the Membury</p>	<p>Comments noted.</p> <p>In response to Emerging Draft site EMP5 (Land west of Ramsbury Road, Membury Industrial Estate): Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken, as part of a</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Service areas. Whilst they straddle the motorway, it is a 7 km journey to Junction 14 of the M4. The route is along country roads (mainly Ramsbury Road) and the B4000 (Ermin Street), none of which have pavements, and which are on the West Berkshire Freight Route Plan (2009) as local access routes. The nearest District access route to key destinations and a strategic lorry route for through HGV traffic is at Junction 14 of the M4.</p> <p>Membury DEA has evolved over the past 60 years since the closure of the WW2 airfield. Lying within the North Wessex Downs AONB, its patchwork of sites fits with the characteristics of the varied landscape pattern, described in West Berkshire's Landscape Character Assessment (2019) as <i>Mixed farmland, divided into large-scale fields bound by mature hedgerows and broken up by blocks of woodland. The character area (LCA WD1. Shefford Wooded Downland) has a mosaic of arable and pasture farmland, as well as large blocks of woodland.</i></p> <p>The businesses established in the existing DEA are a mixture of sizes, from small to large, and include offices, workshops, small, light industrial premises, open storage, chemical manufacture, warehouses and distribution centres. Several have been there for many years. They have been, in general, good neighbours to the community at large and to local residents, keeping their sites tidy and obeying the terms of their planning consents, especially those referring to operation times. Residents within and adjacent to the DEAs accept that their community includes the businesses and they understand that during working hours, there will be traffic movements and other factors associated with commercial operations, but in the early mornings and evenings, and for most of the weekends, the lanes around the sites will be quiet enough for them to walk dogs, run, ride horses or cycle, enjoying the tranquillity of the AONB.</p> <p>Over the last 10 years, especially in the last 5 years, changes have occurred. Businesses have expanded and practices have changed. Increasingly, HGVs, rather than vans, and many more of them, are the vehicles using the roads. Occupants of the sites have changed, sometimes very rapidly. Businesses require lights for later operating and security. New tenants of the DEA operate noisy refrigerated trucks, 24-hour breakdown businesses, or build hard standings for open storage or parking. Units appear to have been sub-let. Planning condition restrictions on traffic</p>	<p>Landscape Sensitivity and Capacity Assessment (LCA) for a number of sites in the LPR. Membury Protected Employment Area (renamed Designated Employment Area (DEA) through the LPR) is made up of a central area and a number of fragmented smaller outlying areas. The site loosely connects these areas. The eastern part of the site has an established visual and landscape connection with the open arable landscape area further to the east of Ramsbury Road. The western part of the site (runway area) connects to the adjacent area of open grassland which leads across to the Iron Age hillfort and the wider countryside</p> <p>The LCA identifies a loss of open land, loss of open views within the AONB, and loss of quiet rural character and rural character of Ramsbury Road as potential impacts of development. In terms of the impact on the existing PEA the fragmented character allows the undeveloped areas in-between to retain characteristic landscape features of the AONB, therefore mitigating and reducing the overall effect of the PEA on the AONB. The proposed site connects four of these together, which would result in one large area and the potential loss of these mitigating landscape features.</p> <p>Opportunities to propose substantial areas of tree and woodland planting as part of mitigation measures would not be out of character. Woodland would help, in time, to integrate and screen any proposed development as well as enhancing the area.</p> <p>The LCA recommends that development is limited to a focused area, to the eastern part of the submitted site. This reflects the development area outlined in the planning application (19/02979/OUTMAJ). The policy will list criteria, as recommended in the LCA.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>movements are ignored by some firms and their clients, and weekends can be as busy as weekdays. Trucks enter and leave sites in the early hours of the morning or park up on the narrow roads. Local residents come across dumped human waste. All non-motorised road users often have to dodge HGVs and, without pavements, there are few places to take refuge. WB Highways have been unable to deploy traffic monitoring equipment at relevant points on Ramsbury Road because it is too dangerous; in several places the roads are too narrow for two HGVs to pass; access to the sites along Ramsbury Road is dangerous for pedestrians and cyclists and at least one company uses a firm to bus in employees (who come from Reading and Swindon). Residents of the Woodland settlements have to drive to the local social club in Woodlands St. Mary because, with no pavements and more HGVs, it is too dangerous to walk. Public transport is limited. The nearest bus stop is on Ermin Street and the bus, to Newbury, runs once a day. Planning conditions do not appear to be enforced, despite residents' repeatedly expressed concerns over several years, both to the relevant businesses and West Berkshire Council. WBC does not have enough enforcement officers to ensure the terms are adhered to and, it appears, no knowledge of exactly who operates within the DEA.</p> <p>Residents' resistance to further expansion of the DEA is understandable. In December 2019, the Parish Council objected to planning application 19/02979/OUTMAJ, for the erection of a new logistics warehouse building, on the grounds that it was unacceptable in the AONB (too big; visual impact), additional vehicle movements, and the PEAs should not be joined up with the loss of open spaces.</p> <p><b>The proposed extension to Membury (EMP5):</b> The land designated as LAM6 in the HELAA, EMP5 in the Local Plan Review, is within the North Wessex Downs AONB. AONBs have statutory protection under the Countryside and Rights of Way Act 2000, and the National Planning Policy Framework 2019 states (paragraph 172): <i>Great weight should be given to conserving and enhancing landscape and scenic beauty in National Parks, the Broads and Areas of Outstanding Natural Beauty, which have the highest status of protection in relation to these issues.....The scale and extent of development within these designated areas should be limited".</i> This does not preclude development, but it does require that the need for</p>	<p>The ELR examines sites which were promoted as part of the call for sites, and were assessed through the HELAA from a property market point of view. The ELR (2020) recommended that to support the creation of local job opportunities in the more western rural areas, PEA boundaries could be extended at the Membury Estate.</p> <p>As part of the planning application the Highways Authority did not object on highway capacity grounds, though were concerned regarding the location of the site and its sustainability.</p> <p>The Employment Land Review (ELR) uses up to date information about occupancy and vacancy, using market information from Co-Star. The authors of the ELR also engaged with key business representatives in the District to understand the market position.</p> <p>The market will decide on the types of units proposed on the site. The extension of the Protected (Designated) Employment Area would not necessarily be able to require that proposals are small-scale, but is something that could be encouraged, and is evidenced in the ELR.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>development should be assessed - for its impact on the local economy, the scope for development outside the AONB and <i>any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be modified.</i></p> <p>The authors (Stantec) of the Economic Land Review acknowledge the impact on the AONB is a major policy constraint on the extension to Membury and note: <i>Immediately to the rear (west) of the main estate is land used for testing by TRL and also areas of open storage. This area would make a logical extension of the main Membury Industrial Estate</i> This land is already within the DEA and could be used to help fill the gap in WBC's economic land allocation by more efficient use of existing employment land. This would allow some expansion without enlarging the DEA still further.</p> <p>The impact of development on the AONB is addressed in the <i>North Wessex Downs AONB Management Plan 2019 – 2024</i>. The NWD AONB will <i>oppose forms of development that fail to conserve and enhance the character and quality of the AONB and its setting {DE01}</i> Further concerns include noise generation {DE07}, light pollution {DE08}. The AONB will <i>resist developments that would substantially increase traffic volumes in sensitive areas</i>. The AONB will <i>support local businesses which employ local people; provide services to improve the local quality of life; spend money locally; promote community cohesion; have a smaller environmental footprint (by reducing the transportation of goods from across communities)</i>.</p> <p>Expanding the Membury DEA for warehousing and distribution does not accord with the final point, especially as the ELR assessment of the site is that the demand is low and that such businesses prefer to be nearer the M4/A34 junction. Furthermore, regarding the Membury DEA, <i>there is evidence of more local demand for industrial space coming from small businesses servicing the local market</i>. Some of that local demand might be accommodated in the empty and soon-to-be-redeveloped units on the Lambourn Business Park (Lowesden Works), or even on the Hadley Farm site. This is not in the DEA, but has planning permission for 1,678 sqm for commercial use. Stantec do not seem to have noted either planning application.</p> <p>Due to the proximity of EMP5 to the existing DEA, it is tempting to assume its development would merge into the existing landscape. This is not the</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>case. The site is an integral part of the patchwork of agricultural land and woodland described in West Berkshire's Landscape Character Assessment (2019) as <i>Mixed farmland, divided into large-scale fields bound by mature hedgerows and broken up by blocks of woodland. The character area (LCA WD1. Shefford Wooded Downland) has a mosaic of arable and pasture farmland, as well as large blocks of woodland.</i></p> <p>The nearby industrial sites are largely shielded by mature planting. As one emerges from the trees along the Ramsbury Road, the fields open up on either side of the road, blending into the open countryside to the east. The impression is of space and reflects the openness of the former military airfield as well as the wider downland. Building into this space would link four existing DEA sites, making a continuous line of industrialisation, running from north of the motorway to the Walker Logistics buildings, impacting not only the landscape character, but also on the setting of the group of houses from the Grade II Lyckweed Farm to Lye Farm Cottages. The special, rural character of this area, with its scattered buildings interspersed with wider countryside, woodland and farmland, would be lost. The West Berkshire Landscape Character Assessment (2019) warns that <i>Pressure for further development (in LCA WD1) may lead to development which is out of character with the existing sparsely settled character of the small hamlets and suburbanising features being introduced which may detract from the rural qualities of the area.</i> It suggests a Landscape Strategy which ensures <i>that changes in the landscape including land use change and development are sensitively sited and designed so as not to detract from the special qualities of the landscape.</i></p> <p>The Landscape Character Appraisal, undertaken to inform the emerging Lambourn Neighbourhood Development Plan, has suggested a local landscape character area, within the Shefford Wooded Downland LCA, based on Membury Airfield (LCA3). It recommends that to help plan, manage and protect the distinctiveness of LCA3, <i>The scale and planning of development at this location needs much careful consideration of any further growth to help avoid further change in character.</i></p> <p>Incorporating EMP5 into the Membury DEA would have a major impact on the landscape character of the AONB and additionally seems to contradict WBC's proposed Spatial Policy 2:</p>	

Respondent (with lpr ref)	Response	Council Response
	<p><i>Development will respond positively to the local context, conserving and enhancing local distinctiveness, sense of place and setting of the AONB. The strong sense of remoteness, tranquillity and dark night skies, particularly on the open downland, should be preserved.</i></p> <p>LAM6 was promoted for B8 storage and distribution in the HELAA, but was ruled out from further assessment due to the site being considered unsuitable. The reason for this, apart from the site being outside the DEA, was concern over highway impacts.</p> <p>The comments regarding highways and access state: <i>There is increasing concern regarding traffic levels especially HGVs impacting on Membury and the B4000 Ermin Street. Highways will object to this proposal on these grounds, and more importantly the site is within a location that is unsustainable that can only be reached by motorised vehicle.</i></p> <p>Further to this, a comment from Highways Development Control was made in August 2020 in a response to planning application 19/02979/OUTMAJ. (The application was made in November 2019 by the promoters of LAM6 and refers to part of LAM6. It is still pending a decision.): <i>It has been policy of the Highways Development Control for some time to try and resist expansion of the Membury Industrial Estate due to how unsustainable the location is. I consider that if the Climate Emergency is to be taken seriously then this proposal should be resisted.</i> (Paul Goddard, Highways Development Control Team Leader)</p> <p>Detailed, long-term travel plans for any development might reduce sustainability issues, but they will not address the increase in traffic to distribution centres. Furthermore, given the problems WBC have with enforcing planning conditions, or maintaining accurate information about site occupants, we are not persuaded that such mitigation will actually work.</p> <p>Findings from the Residents' Survey conducted for the emerging Lambourn Neighbourhood Plan suggest that most respondents would welcome smaller business units to encourage growth within the local economy and do not wish to see large developments.</p> <p>The evidence presented in the Local Plan Review does not convincingly support the economic need for a B8 development on this site. It is more likely to bring employees in from outside the district than to offer employment locally.</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>The impact of such a development would adversely affect the NWD AONB, which is protected both by statute and WBC's own policies. The development is not sustainable and could actually lead to an increase in carbon emissions.</p> <p>Seek the removal of the proposal to include EMP5 as a DEA extension and a more efficient use of existing land within the Membury DEA. The inclusion of accurate information about available land would increase the number of small business units and reduce the need for extra employment land.</p>	
Stratfield Mortimer Parish Council (lpr406)	Support the policy.	Comments noted.
Theale Parish Council (lpr1102)	<p>Do not support the policy.</p> <p><b>Theale's character</b> Theale is a historic village with its own rural identity. Its location entails strong rail and road links, making it an excellent location for businesses. However, this presents a risk to the village's character and makes it vital to keep the two areas separate. The allocated and proposed sites for development listed below bely this.</p> <p><b>Allocated employment area off Hoad Way (EMP6)</b> The draft Local Plan lists this site as 'an additional site north of Arlington Business Park' (p. 19). This designation is misleading. The A4 delineates a clear boundary between Arlington Business Park and the main village. Allowing the business area to encroach on the north side of the A4 would significantly alter the character of the village. The allocated area also sits at the end of Theale's historic High Street and borders residential properties.</p> <p>Any development on this site would have inadequate access. Lorries would access the site via Hoad Way and the main roundabout on the A4. Entering this roundabout from Hoad Way is dangerous at present; forcing large vehicles to do the same will make the situation more perilous. It would also increase congestion on the High Street. Given the lack of pedestrian</p>	<p>Comments noted.</p> <p>Further landscaping work has been commissioned (Landscape Sensitivity and Capacity Assessments - LCA). It notes that the introduction of offices and/or other large-scale buildings would be out of scale and keeping with the historic village character of Theale, and development across the whole site would create the perception of coalescence with Calcot and loss of separate identity of Theale from Calcot. The site is separated from the existing Protected Employment Area by the A4. Development would also be visible from areas with the North Wessex Downs AONB.</p> <p>The LCA concludes that if the site were developed, either in whole or in part, it would compromise the setting of Theale and its separate identity and character from Calcot. It therefore recommends that the site is not developed for employment uses. Therefore, as part of the LPR going forward it is no longer proposed to allocate the site.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>crossing at the eastern end of the High Street, this would increase the risk of an accident.</p> <p>Lastly, the allocated site would have an adverse effect on ecology. The present site is rich in wildlife, including an array of birds, deer and hedgehogs. It is also a flood plain. Any development on the land would need to address the need for adequate drainage to alleviate flooding.</p>	
Aldermaston Parish Council (lpr1058)	<p>APC strongly opposes extensions to existing DEAs at the former Youngs Garden Centre, Easter Park and Youngs Industrial Area primarily on the grounds that it will result in an increase in traffic, including particularly damaging HGVs, passing through the Conservation Area of Aldermaston Village and over the single-lane lifting bridge in Aldermaston Wharf. The area has very little public transport so all employees and clients of any new businesses would rely on private transport in and out of an area that already is already served by a significant quantity of commercial/industrial space and associated employment. Many dwellings in the Aldermaston Conservation Area are Listed and have insufficient foundations. The A340 is carrying far more traffic than it used to, and this is leading to structural damage to the properties. A relief road taking the HGVs away from Aldermaston Village is urgently required, and APC has recently adopted a policy of opposing all developments that would lead to additional HGVs passing through the Conservation Area until this issue is resolved. We believe the new APC policy is consistent with the proposed WBC Policies DC7 Air Quality and DC8 Conservation Areas as well as the more general SP9 Historic Environment.</p>	<p>Comments noted.</p> <p>It is no longer proposed to allocate the three sites in Aldermaston, following advice from Emergency Planning due to their location within the DEPZ.</p>
Hungerford Town Council (lpr143)	<p>Agree with the proposed policy.</p>	<p>Comments noted.</p>
Shaw-cum-Donnington Parish Council (lpr215)	<p>Agree with the proposed policy. We not the inclusion of the Vodafone Campus as a Designated Employment Area. We would resist any change of this site to residential use.</p>	<p>Comments noted.</p>

Respondent (with lpr ref)	Response	Council Response
Chilton Foliat Parish Council (lpr1385)	<p>Does not agree with the proposed policy. Chilton Foliat Parish Council wish to place on record our deep opposition to the extension of the Designated Employment Area at Membury.</p> <p>The village of Chilton Foliat lies just over the county boundary in Wiltshire, on the B4192 from Hungerford to Swindon and, at the centre of the village, has a junction with the B4001 which commences in the village and heads north to its junction with the B4000.</p> <p>Over the last few years there has been a big increase in the amount of HGV traffic using the B4001, much of it connected with the existing industrial areas at Membury. This road is clearly unsuitable for such traffic, being in parts effectively a single width road. In addition, and most concerning to the residents of Chilton Foliat, the exit onto the B4192 is narrow, without footpaths, with limited visibility and flanked by two private houses, both listed buildings. On many occasions HGVs have had great difficulty making the turn successfully and several times these manoeuvres have resulted in damage to the buildings and, in addition, to the footpath on the B4192 opposite the junction. See photographs attached to this submission.</p> <p>Chilton Foliat Parish Council have lodged an objection to a development of one logistics company on the existing site (19/02979/OUTMAJ) and we await the result of the planning application. We believe that our concerns should be taken into consideration and that the application should be rejected.</p> <p>We are in the process of having the B4001 signed as unsuitable for HGVs although, of course, this designation has no legal force and, whilst we are hopeful that this will make a difference to our village, that is by no means certain.</p> <p>Our opposition to the extension of the DEA at Membury is simply that this will inevitably result in an increase of large vehicles along the B4001, thus compounding the already serious issues the residents of the village are facing.</p>	<p>Comments noted.</p> <p>The Highways Authority comment that there is capacity on the local highway network to accommodate the additional floorspace.</p> <p>A Transport Assessment would be required as part of a planning application, which would examine highway capacity and identify any mitigation.</p> <p>At 6.5.11 of the Council's Local Transport Plan it states that 'Opportunities will be sought to reduce the impact of transport on the environment and tranquillity of the AONB. This will include managing freight to ensure that, where possible, through freight movements remain on the strategic road network, and that local freight deliveries use appropriate routes outlined on the Freight Route Network. The Council will work with the Highways Agency, Network Rail, and the train operating companies to minimise the impact of strategic transport networks on the AONB.' As the site is on the Freight Route this should be followed through and communicated with visitors to the site, particularly HGV users, through a travel plan and by communication between the site operator and the haulage operator/any other visitors. Such a travel plan will form part of the policy requirement.</p> <p>It is noted that a weight restriction exists on the B4001 heading south towards Chilton Foliat.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>We therefore request that this expansion not be approved or, if regrettably it is approved, that legal means such as a length restriction be introduced to prevent HGVs from using the B4001 as a short cut to Hungerford and beyond.</p>	
<p>Lambourn Neighbourhood Development Plan Steering Group (lpr1707)</p>	<p>EMP5 - The LNDP welcomes the opportunity to comment on West Berkshire's Local Plan Review. We have based our comments on our findings from the Residents' Survey undertaken by the LNDP as well as recognizing and embracing the need to further develop employment opportunities locally. The Landscape Character Appraisal for the emerging Lambourn Neighbourhood Development Plan includes a local Landscape Character Area, within the Shefford Wooded Downland LCA, based on Membury Airfield (LCA3). It recommends that to help plan, manage and protect the distinctiveness of LCA3, <i>The scale and planning of development at this location needs much careful consideration of any further growth to help avoid further change in character.</i> Although recognised as an area of low demand, with constraints of being in an AONB. with a few Heritage Sites and Conservation Areas we would actively encourage the development of small local enterprise as we want the Parish to be a place where people want to live and work, as well as continuing to strengthen and the develop the Racing Industry within the Valley and the cluster industries that surround it. In the plan there is an intention to extend the DEA at Membury, this is one area where we believe there is little evidence to support the expansion, that would not have a detrimental impact on the rural character of the area and the AONB. We have seen much development of the existing compact Membury site and have witnessed a marked increase of HGV'S and other large transporters to the area, any further development in this area would be unsustainable. Other areas within the Parish are Lowesdon work, the Membury Business Park, Hurst Farm, Hadley Farm, and the Membury Business Park. These sites are spread out along Ermin Street and Ramsbury Road and sit amongst the open green spaces within the AONB - the importance of maintaining the</p>	<p>Comments noted.</p> <p>The Employment Land Review (ELR, 2020) notes at paragraph 4.86 that across Membury (not only around LAM6) there are a range of different sizes and styles of industrial units, and that some of the units are reasonably large when compared to other locations in the Authority area. Demand is weaker (paragraph 4.98) than other areas in the District, but this is due to the small size of the industrial area. There are cases of existing occupiers seeking to expand (e.g. Walker Logistics). Industrial demand is mainly from local/regional occupiers. Table 4.21 (at paragraph 4.109) highlights that no units are available (total stock of 46 units), reflecting the small size of the industrial market in this location.</p> <p>At paragraph 4.113 the ELR (2020) highlights that there are no obvious development opportunities, with redevelopment at existing sites being the main sources of development.</p> <p>At paragraph 4.164, the ELR (2020) recommends that to support the creation of local job opportunities in the more western rural areas, PEA boundaries could possibly be extended at Membury.</p> <p>There is little development in the pipeline in the Western half of the District (paragraph 6.17).</p>

Respondent (with lpr ref)	Response	Council Response
	<p>balance between the spread-out Hamlets and Industry is key as we do not want to lose the vistas and open spaces.</p> <p>Four of the above-mentioned sites offer opportunities for small local enterprise in keeping with the North Wessex Downs AONB Policy, two are yet to be redeveloped, but have acquired planning consent (Hadley Farm and Lowesdon Works) whilst Membury Business Park has several units unoccupied, as does Ariel Business Park.</p> <ul style="list-style-type: none"> <li>• Economic forecasts show industrial job growth is predominantly in the East of west Berkshire-not in the West where this sloe is located.</li> <li>• There is poor road access to the M4. The distance from Membury to Junction 14 is 7kms, mainly along unclassified rural lanes and the B4000 (Ermin Street), none of which have pavements.</li> <li>• The proposed site is located within the Area of Outstanding Natural Beauty and previously additional development in this area has been deemed unsustainable by both West Berkshire Council's own Highways and Environmental Planning experts. This year the annual AONB Conference (29/01/21) again stressed the importance of protecting and conserving these areas. Plans to encroach on these areas need to have a major economic benefit and must have considered alternative sites. Within the WBC Employment Land Review (ELR), alternative sites are identified, in areas where demand for this type of expansion is required, therefore the extension of EMP5 cannot be justified.</li> <li>• Over a third of all proposed industrial expansion in West Berkshire is at EMP5 in the Western area. The ELR however identifies that all major housing developments are in Newbury and the East. This leads to an imbalance between new homes and new work opportunities. In effect, people would need to commute to work which would again impact on the local road networks around Membury - which would increase the unsustainability of this site.</li> <li>• Carbon Dioxide levels show West Berkshire as the worst performing region in the whole of Berkshire, and well above South East England by 38%. EMP5 will generate significantly longer travel journeys than other sites, increasing the carbon emissions for the area, when WBC wish to reduce these in West Berkshire.</li> </ul>	<p>Membury is an example of employment spaces offered at lower price points that are attractive to the market. As a general comment, in paragraph 6.37, more land will need to be identified to ensure future economic growth is not constrained. Any future land requirement will need to be considered in terms of location as well as quantum to ensure land is delivered where the need could best be met.</p> <p>At paragraph 6.65 recognises there is continued demand for industrial space, as illustrated by the Walker Logistics planning application. To support the rural economy part of this site (6.9ha) could be considered for allocation. The site has potential to provide the smaller units (circa 500 sq m) that the market assessment identifies are in particular short supply.</p> <p>The ELR (2020) notes that the site seeks to address rural demand/local demand, and is better placed than other promoted sites in the AONB.</p> <p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessment (LCA) for a number of sites in the LPR. Membury Protected Employment Area (renamed Designated Employment Area (DEA) through the LPR) is made up of a central area and a number of fragmented smaller outlying areas. The site loosely connects these areas. The eastern part of the site has an established visual and landscape connection with the open arable landscape area further to the east of Ramsbury Road. The western part of the site (runway area) connects to the adjacent area of open grassland which leads across to the Iron Age hillfort and the wider countryside</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>The Membury PEA (now DEA) is made up of 8 parcels of land in Lambourn Woodlands. Two of the largest DEA sites lie adjacent to the proposed extension area, (this does not include the Motorway Services). Ramsbury Road and Ermin Street (B4000) are the access routes in the main to Membury, although traffic is also travelling along the A4 and reaching the site via Chilton Foliat. The B4000 is on the WBC Freight Route Plan, but this has not been updated since 2009, and there has been a significant increase in traffic to Membury since then by HGVs as the businesses have developed on site. The EMP5 site is the industrial site furthest from an A road.</li> </ul>	<p>The LCA identifies a loss of open land, loss of open views within the AONB, and loss of quiet rural character and rural character of Ramsbury Road as potential impacts of development. In terms of the impact on the existing PEA the fragmented character allows the undeveloped areas in-between to retain characteristic landscape features of the AONB, therefore mitigating and reducing the overall effect of the PEA on the AONB. The proposed site connects four of these together, which would result in one large area and the potential loss of these mitigating landscape features.</p> <p>Opportunities to propose substantial areas of tree and woodland planting as part of mitigation measures would not be out of character. Woodland would help, in time, to integrate and screen any proposed development as well as enhancing the area.</p> <p>The LCA recommends that development is limited to a focused area, to the eastern part of the submitted site. This reflects the development area outlined in the planning application (19/02079/OUTMAJ). It is considered such recommendations must be followed, and the policy will list criteria, as suggested in the LCA for the reserved matters application, or any other scheme, to be implemented.</p> <p>It is not considered that there is an imbalance between the proposed expansion of employment floorspace and the proposed major housing developments. The majority of existing DEAs are located in Newbury and to the east of the District, much of which are in existing settlements. The Employment Land Review notes that the site could support the rural economy, and is better placed than other promoted sites in the AONB. The proposed expansion in Membury, where the planning application illustrates that</p>

Respondent (with lpr ref)	Response	Council Response
		<p>there is demand for such use, with jobs created which local residents can make use of.</p> <p>Membury is accessible to the M4 and to the A338. The West Berkshire Freight Strategy (2009) recognises Membury as a key industrial site, and has the B4000 as part of the District Freight Route. The Highways Authority consider that there is capacity in the local transport network to accommodate development. The Highways Authority are concerned that the site is not in a sustainable location. In rural areas the NPPF recognises that land for employment may not be in accessible locations. Furthermore, it is more beneficial to locate development near/adjacent to existing development.</p> <p>Sustainable construction and renewable energy generation can help in achieving emissions reduction. Development will be expected to comply with Proposed Submission LPR Policy SP5 and DM4 relating to climate change and sustainable building.</p>
Newbury Town Council (lpr2254)	<p>We wish to add Newbury Showground adjacent to J13 as an additional storage and distribution area.</p> <p><b>Reason:</b> This would reduce the number of HGVs travelling into and through Newbury along the A4 from west and north in particular and enable other employment sites within Newbury to be redeveloped for commercial and industrial purposes. Junction 13 is the obvious hub for distribution networks and the Showground seems likely to undergo viability issues, as well as causing severe traffic congestion on local roads at certain times. Some light industrial and other commercial uses could also be relocated to the Showground from LRIE (possibly temporarily) while that site is redeveloped.</p>	<p>Comments noted.</p> <p>The land at Newbury Showground is to be assessed through the Housing and Employment Land Availability Assessment (HELAA). Even if found suitable, this would not replace existing employment areas (i.e. Colthrop and LRIE), and planning policy would not be able to force the relocation of uses from one site to another. There is no proposal by Colthrop Industrial Estate to redevelop the area for a mixed use development, and therefore the availability and deliverability are unknown. The A4 is part of the District's freight route and HGVs are directed to use this road.</p>
<b>General consultation bodies</b>		

Respondent (with lpr ref)	Response	Council Response
Mid & West Berkshire Local Access Forum (lpr1864)	<p>EMP3 - There is a public footpath across the county boundary in Hampshire adjacent to Site EMP3 (Land off Benyon Road, Easter Park, Aldermaston). This is a continuation of West Berkshire public footpath ALDE/5/4.</p> <p>MWBLAF recommends that a new paragraph is added to the supporting text for this policy:  <b><u>7.15 The character of the public footpath in Hampshire that is adjacent to site EMP3 should be preserved.</u></b></p>	<p>Comments noted.</p> <p>It is no longer proposed to allocate the site in the Regulation 19 version of the LPR following advice from Emerging Planning due to its location within the DEPZ.</p>
<b>Other stakeholders</b>		
West Berkshire Green Party (lpr1843)	<p>We propose adding areas adjacent to Junction 13 of the M4, and in particular the Newbury Showground as a new designated employment area. This is identified as a key infrastructure junction and policy should be to relocate the distribution centres in east Thatcham to this location which is more appropriate for HGV movement. This would allow the redevelopment of the Colthrop area into a mixed development (similar to the LRIE). It has the advantage of being within walking distance of Thatcham station giving excellent public transport links to Newbury and Reading/London. Removing HGVs from the local infrastructure would also help regenerate Thatcham as proposed in the plan.</p>	<p>Comments noted.</p> <p>The land at Newbury Showground is to be assessed through the Housing and Employment Land Availability Assessment (HELAA). If found suitable though, this would not replace existing employment areas (i.e. Colthrop), and planning policy would not be able to force the relocation of uses from one site to another. There is no proposal by Colthrop Industrial Estate to redevelop the area for a mixed use development, and therefore the availability and deliverability are unknown.</p> <p>The Local Plan would not seek to remove/relocate employment uses at Colthrop, which is recognised as being in an important strategic location for B2, B8 and E(g) uses, as highlighted in the ELR.</p> <p>Furthermore, the A4 is part of the District's freight route and HGVs are directed to use this road.</p>
Councillor Tony Vickers (lpr556)	Does not agree with the proposed policy.	Comments noted.

Respondent (with lpr ref)	Response	Council Response
	<p>We feel that Membury is not an appropriate site for further employment, because it requires too much travel for employees and goods to/from outside the area.</p> <p>We think that the Newbury Showground / M4 J13 area would be a better site for more extensive distribution, storage and certain types of light industrial employment uses. It is closer to where most employees would likely live and to the national road network. It could also provide land for a future Newbury Park &amp; Ride.</p> <p>Remove EMP5 from the table on page 74 &amp; add Newbury Showground to the list on page 75.</p>	<p>The land at Newbury Showground is to be assessed through the Housing and Employment Land Availability Assessment (HELAA).</p> <p>Membury presents a logical extension to the DEAs already in place. Travel planning will be important, though this would apply to the proposed site rather than Membury as a whole. A travel plan will be required for the proposed allocation at Membury, as set out in the site allocation policy.</p> <p>A Park and Ride scheme is not a use promoted to the Council, and so has not been assessed.</p>
Councillor Alan Macro (lpr759)	<p>Does not agree with the proposed policy.</p> <p>The Covid-19 pandemic and resulting increase in home-working means that demand for new office space is likely to be significantly reduced over the plan period.</p> <p>There is a large amount of unlet office space in Theale, including in the nearby Arlington Business Park, dating from before the pandemic. Reports in the local and property press say that Reading International Business Park, less than 9km from the site and 2km from the district boundary, is 48% vacant. There is therefore unlikely to be a demand for new office space in Theale during the plan period.</p> <p>The proposal to allocate a site for 20,000 sq m of office space in Theale (ref EMP6) is unacceptable because:</p> <ul style="list-style-type: none"> <li>• It would adversely affect the setting of Theale as viewed from the A4, M4 J12 and M4 motorway.</li> <li>• The built form of office and car parking would significantly reduce, if not eliminate, the gap between the settlements of Theale and Calcot, contrary to the requirement in policy SP1 that "the individual identities of the separate settlements within this [Eastern Spatial] area will be maintained".</li> <li>• It would adversely affect the Theale High Street conservation area.</li> </ul>	<p>Comments noted.</p> <p>Given the preparation of the ELR 2020 was undertaken prior to the COVID 19 pandemic, the Council has taken the opportunity to update this work using the most recent economic forecasts which take account of the major macro-economic changes which have taken place, including COVID and Brexit. The update to the ELR will inform the LPR and will be published alongside the Regulation 19 consultation.</p> <p>The ELR 2022 concludes that whilst the office sector in West Berkshire has been steadily shrinking over the past decade, the economic forecast predicts positive job growth over the plan period and recommends a need for a net increase in office space of approximately 51,000sqm to 2039.</p> <p>Further landscaping work has been commissioned (Landscape Sensitivity and Capacity Assessments - LCA). It notes that the introduction of offices and/or other large-scale buildings would be out of scale and keeping with the</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• Offices would overlook numerous homes in Hoad Way and in the High Street east of Hoad Way.</li> <li>• The site would be largely covered in built form and car parking, leaving little or no space for soft landscaping or SUDS drainage.</li> <li>• The site is in flood zone 2 and regularly suffers from surface water and groundwater flooding. This means that infiltration SUDS measures would not be possible.</li> <li>• It would generate an additional approximately 800 vehicle movements* in peak periods. This would contend with traffic to or from Theale High Street at its junction with Hoad Way. It would also contend with traffic arriving or departing the Arlington Business Park and employment areas to the south of Theale at the A4/Hoad Way/Waterside Drive roundabout in the peak periods. This would cause a significant problem for traffic leaving Waterside Drive in the evening peak that is already subject to a 164-second delay (historical traffic data for 1-4 April 2019). It would also add to existing congestion at M4 J12.</li> </ul> <p>The use identified for the site in the HELAA was “mixed use residential and employment (14,000sq,m B1 floorspace)”. Allocation for 20,000 sq.m. office space is therefore contrary to policy SP1 of this plan which states that “Allocations will be related to the role and function of settlements and <b>the development opportunities identified through the HELAA</b>”.</p> <p>* Calculated using Bracknell Forest Council's parking standard for offices of one parking space per 25 sq. m. of office space.</p> <p>The proposal to allocate 20,000 sq m. of new office space (EMP6) should be removed from the plan.</p>	<p>historic village character of Theale, and development across the whole site would create the perception of coalescence with Calcot and loss of separate identity of Theale from Calcot. The site is separated from the existing Protected Employment Area by the A4. Development would also be visible from areas with the North Wessex Downs AONB.</p> <p>The LCA concludes that if the site were developed, either in whole or in part, it would compromise the setting of Theale and its separate identity and character from Calcot. It therefore recommends that the site is not developed for employment uses. Therefore, as part of the LPR going forward it is no longer proposed to allocate the site.</p>
Councillor Howard Woollaston (lpr1345)	<p>Does not agree with the proposed policy. I strongly object to the proposed LAM 6 extension at Membury . It is ill thought out and in completely the wrong location . The Membury Industrial Estate is an historical anomaly and only there because it was a WWII disused airfield – an application now would never even be considered . Specific objections are as follows :-</p>	<p>Comments noted.</p> <p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessment (LCA) for a number of sites in the LPR. Membury Protected</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• It is in the AONB and I understand that Wessex Downs AONB have already objected strongly.</li> <li>• With the change in planning designation the consent will be for distribution units. That demand is in the East of West Berkshire not as far west as you can get and generates little local employment benefit.</li> <li>• Access from the M4 J14 involves a 14Km round trip along a brief stretch of the A339 then onto the B4000 past a nursery school then onto an unclassified road and finally onto what is effectively a country lane .</li> <li>• The growth in HGV movements along this route has been huge over recent years and any extension can only exacerbate this, with accompanying environmental impact. CO2 levels are already extremely high owing to the proximity of the M4.</li> <li>• There are fundamental errors in the Stantec report not least that there are 8 bus stops within 400 metres when there is only 1 and that has a single bus service a day. The Walker application has not been approved and is heavily opposed by a vocal opposition.</li> <li>• The location is environmentally completely unviable. Not only is there no public transport apart from one bus a day but the narrowness of the lane prevents even a cycling or walking alternative. Many of the current workers are “bussed in” from Swindon or Reading so there is little or no benefit to the local economy.</li> <li>• Some HGV traffic goes South along more country lanes across the border into Wiltshire and the small village of Chilton Foliat before joining the A4.</li> <li>• The problems caused by the existing Membury Industrial Estate are already vast with a great number of HGV movements daily and water run off issues caused by hard standing and open storage. It is already an eyesore in a rural area in the AONB and to agree to a significant increased density is in my opinion madness.</li> </ul> <p>I would strongly urge that this site is deleted from the local plan for further employment use and other more appropriate sites nearer to more major housing areas with an appropriate public transport infrastructure be revisited.</p>	<p>Employment Area (renamed Designated Employment Areas (DEA) through the LPR) is made up of a central area and a number of fragmented smaller outlying areas. The site loosely connects these areas. The eastern part of the site has an established visual and landscape connection with the open arable landscape area further to the east of Ramsbury Road. The western part of the site (runway area) connects to the adjacent area of open grassland which leads across to the Iron Age hillfort and the wider countryside</p> <p>The LCA identifies a loss of open land, loss of open views within the AONB, and loss of quiet rural character and rural character of Ramsbury Road as potential impacts of development. In terms of the impact on the existing PEA the fragmented character allows the undeveloped areas in-between to retain characteristic landscape features of the AONB, therefore mitigating and reducing the overall effect of the PEA on the AONB. The proposed site connects four of these together, which would result in one large area and the potential loss of these mitigating landscape features.</p> <p>Opportunities to propose substantial areas of tree and woodland planting as part of mitigation measures would not be out of character. Woodland would help, in time, to integrate and screen any proposed development as well as enhancing the area.</p> <p>The LCA recommends that development is limited to a focused area, to the eastern part of the submitted site. This reflects the development area outlined in the planning application (19/02979/OUTMAJ). It is considered such recommendations must be followed, and the policy will list criteria, as suggested in the LCA for the reserved matters application, or any other scheme, to be implemented.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>I would strongly urge that this site is deleted from the local plan for further employment use and other more appropriate sites nearer to more major housing areas with an appropriate public transport infrastructure be revisited.</p>	<p>Use Classes B2 (general industrial) and B8 (storage and distribution) are still the use classes (offices have changed to Class E), and the site will not solely be for distribution units. There is no evidence to suggest the use will not be for local employment, even if that employment extends across into Wiltshire. It is understood, through the planning application 19/02979/OUTMAJ that some residents in Lambourn have applied for work at the existing Walkers Logistics. The Council's Economic Development team supported the application and were concerned at the prospect of the loss of Walker Logistics should the application have been refused.</p> <p>The Highways Authority has outlined that there is capacity on the local highway network, with the B4000 being part of the District's Freight Route.</p> <p>It is recognised that there are not 8 bus stops in the vicinity of the site, and has a very limited bus service. The NPPF, at paragraph 85, outlines that planning policies should recognise that employment sites in rural areas may have to be found beyond existing settlements, and in locations that are not well served by public transport. The Transport Assessment and Travel Plan, which the policy will require of the development, will seek to ensure that development is appropriate to local roads and encourage sustainable travel modes (e.g. car sharing, busing in staff, cycling and provision of showers and suitable storage at place of work).</p> <p>Even if employees are bused in, there can be smaller secondary businesses which visit employment areas, such as sandwich rounds or other mobile practitioners. Site operators could look into minibus services at lunchtimes, to</p>

Respondent (with lpr ref)	Response	Council Response
		<p>enable staff to visit services in Lambourn (part of a travel plan for the site).</p> <p>Given the comments received, the landscape advice, and the approval of the planning application, the area for development is to be concentrated to the area identified as suitable for development within the Council's landscape evidence (LCA), rather than the site submitted as part of the call for sites/HELAA.</p>
Heritage Forum (lpr82)	<p>Agrees with the proposed policy. Changes – see comments on SP20.</p>	<p>Comments noted.</p> <p>See response under Emerging Draft LPR Policy SP20 (lpr81)</p>
Yvonne Thorngate (lpr35)	<p>Why on earth would the Council grant permission to build even more offices in Theale. When Arlington Business Park is more than half empty. Surely this pandemic has changed the whole concept of working from home and many businesses will cut there cost by no longer requiring huge office buildings. Arlington Business Park has buildings that have been empty for 5 years. I know these facts to be correct as I was employed there until 2017 In fact the building I was in 1230 is still empty today 3 years after we vacated it.</p>	<p>Comments noted.</p> <p>Owing to the recommendations made in the landscape assessment the site is no longer promoted as an employment site in the Regulation 19 version of the Local Plan.</p>
Mr Martin Vile (lpr17)	<p>Does not agree with the policy. EMP6 allowing the development of the land to the north of Arlington Business Park is totally inappropriate. Even the title is misleading as Arlington Business Park is the opposite side of the A4 and this piece of land is the village side of the A4. It would be more accurate to title this: <b>Land to the east of Theale Village.</b> The site is totally unsuitable and commercial development plans have previously been refused/withdrawn on the grounds of flooding, conflict with Theale Conservation area, Overhead power lines, conservation issues. It would break the existing separation between the village and the commercial side of Theale (defined by the Theale Bypass) It would merge Theale with Calcot with no separation.</p>	<p>Comments noted.</p> <p>Further landscaping work has been commissioned (Landscape Sensitivity and Capacity Assessments - LCA). It notes that the introduction of offices and/or other large-scale buildings would be out of scale and keeping with the historic village character of Theale, and development across the whole site would create the perception of coalescence with Calcot and loss of separate identity of Theale from Calcot. The site is separated from the existing Protected Employment Area by the A4. Development</p>

Respondent <i>(with lpr ref)</i>	Response	Council Response
	<p>The impact on local housing and residents would be unacceptable and the increased traffic generated would add to the already concerning congestion getting out of Theale village onto the Bypass.</p> <p>This takes no account of the obvious change of working practices that the Covid 19 pandemic has made where office space will not be needed as much.</p> <p>There appears to be plenty of land to the south and west of Arlington that could be used for additional buildings, all on the correct "commercial" side of the bypass.</p> <p>Remove EMP6 from this plan or any other commercial development plans on the Village side of the bypass.</p>	<p>would also be visible from areas with the North Wessex Downs AONB.</p> <p>The LCA concludes that if the site were developed, either in whole or in part, it would compromise the setting of Theale and its separate identity and character from Calcot. It therefore recommends that the site is not developed for employment uses. Therefore, as part of the LPR going forward it is no longer proposed to allocate the site.</p>
Steve Taylor (lpr39)	<p>I object to the Membury industrial land extension. The traffic levels on the B4000 are intolerable at present, let alone with further traffic. This is a B road. The pollution levels are extreme at present without any further addition. The proposed site sits in an area of outstanding natural beauty. The infrastructure is in no way geared for such an application to be acted upon. Any development would be an act of environmental vandalism.</p> <p>Find another location with suitable access and infrastructure which Membury most certainly does not have.</p>	<p>Comments noted.</p> <p>The Highways Authority has outlined that there is capacity on the local highway network, with the B4000 being part of the District's Freight Route.</p> <p>Since the publication of the Local Plan Review (LPR) further landscaping work has been undertaken. The work recognises the site's sensitive location in the AONB and location adjacent to existing industrial areas. It is proposed to limit development to a focused area, with landscape buffers.</p> <p>West Berkshire is predominately a rural district, and given the need identified in the ELR and in recognition that the site is in close proximity to the M4 Junction 14 with existing employment uses, it is considered that the site is appropriate as an allocation. Membury is listed as a key industry origin and destination, and the connecting roads are outlined as 'local access routes' in the Freight Strategy. Other sites have also been allocated, in rural locations, adjacent to existing employment areas.</p>

Respondent (with lpr ref)	Response	Council Response
		Examining the impacts of likely development of an industrial nature on air pollution has been considered by Environmental Health. It is possible that there will be an impact on air quality during construction and once operations are running. Proposed Submission LPR Policy DM5 will need to be considered.
Piers and Rachel Yeld (lpr42)	<p>We don't envy West Berks Council putting together such a long 250 page document, but it is also a mammoth task for residents to read cover to cover, with all the other lengthy supporting evidence documents. But having done this, we recognise WBC's need to forecast the County's future housing, office and industrial space requirements and a long term plan to meet those needs. However, we do not agree with its conclusions proposing an industrial land extension at Membury which WBC asserts as inevitable. We do not believe this is the case and object most strongly. Given the LRP Emerging Draft references consultants, Stantec, with their August 2020 Report conclusions on Membury, we will refer to that document also given this is the supporting evidence which WBC has used to underlie its thinking.</p> <p>First, we were astonished to see Stantec state the proposed LAM-6 site extension at Membury Estate is a foregone conclusion. It is not. Yet on Page 69 #4.113, they say planning has already been granted for this site (Walker Logistics), although development not yet started. This is untrue as Walkers' application is still to be heard in a Planning Committee hearing. Why would Stantec conclude this has been given go-ahead, even if later references in their document correct this site's status? This can only have come after WBC discussions with Stantec when Planning clearly shared their pre-determination conclusions this application would be approved.</p> <p>This is highly improper. Post a Committee Hearing, were planning to be granted, it is open to legal challenge. Given the seriousness of this assumption, we have brought this to the attention of Councillor Howard Woollaston for appropriate follow-up with WBC.</p> <p>Second, Stantec identify that AONB is the critical constraint in developing the proposed 6.9 Ha site for industrial use at Membury given local</p>	<p>Comments noted.</p> <p>The Employment Land Review (ELR) is an evidence based document, which aids in guiding business development across the District, identifying need and examining sites that were put forward through the Council's call for sites. There are other factors which also need to be taken into account by the Council, such as the AONB designation.</p> <p>It is recognised that planning permission was not granted at the time of drafting the ELR (2020), and there was no direction given as to whether planning permission would be granted or not. The ELR is an evidence based document, and is a document to be taken into account in decision making.</p> <ol style="list-style-type: none"> <li>1. Carbon reduction. It is considered logical and appropriate to extend existing Protected Employment Areas (renamed Designated Employment Areas (DEA) through the LPR) to focus development into particular areas. This is particularly relevant in the AONB to prevent the urbanisation of land. Sustainable construction and renewable energy generation can help in achieving emissions reduction. Development will be expected to comply with Proposed Submission LPR Policy SP5 and Policy DM4 relating to climate change and sustainable building.</li> </ol>

Respondent (with lpr ref)	Response	Council Response
	<p>woodlands and rural surrounding. That is correct, but there are other ramifications in extending the DEA boundary (old PEA) at Membury.</p> <ol style="list-style-type: none"> <li>1. Continued industrialisation and the inevitable increase in pollution makes a mockery of WBC's core strategy of carbon reduction, not least in such a poor performing region as West Berkshire that is significantly worse than Reading, the South East and indeed England itself.</li> <li>2. Extending the Membury DEA also contradicts the spirit of WBC's own policy statements to protect this rural community: Environment (DC4); Air Quality (DC7); Conservation (DC8); etc.</li> <li>3. Ramsbury road is not just impractical for HGV's, it is also dangerous for local residents. Stantec admit this road is narrow, only just allowing two narrow vehicles to pass in opposite directions. Yet HGV and Lorry/Van volume continues to rise here as well as on Ermin Street to provide commercial traffic access to the M4 at Jct. 14. More expansion will generate more industrial traffic on these minor roads. This is not only noisy, disruptive and detrimental to the environment, it adds fear to the local community further increasing risks to all road users. The fact Highways refused to do a local traffic monitoring survey for safety reasons proves our point.</li> <li>4. Under Supporting the Rural Economy Policy (DC32), WBC insists that developers demonstrate no resultant inappropriate traffic happening (#viii and #ix). Yet there has been no transport assessment done to determine the true traffic impact of this site extension. Planning already refused to use national TRICS data for the Walkers application. If this Membury site expansion is considered strategic by WBC, why has no proper assessment been made?</li> <li>5. The Membury site location is dreadful and impractical. Unlike Transport Infrastructure Policy (DC35) recommendations, this area has no access by train, bus, cycle or foot because of the inherent traffic risks which WBC Highways have already identified. Motor vehicles are the only way in and out of this site making it completely unsustainable. Stantec state there are "8" bus stops within a 400 m radius in their appendices (page 119 #23, and page 125 #29) which</li> </ol>	<ol style="list-style-type: none"> <li>2. Road network. As part of the assessment of the site, through the HELAA, the Highways Authority considered that there is capacity on the road network to accommodate the development. Membury Industrial Estate is listed as a key industry origin and destination, and the connecting roads are outlined as 'local access routes' in the Freight Strategy.</li> <li>3. Transport assessment – any planning application will be required to submit a Transport Assessment. As outlined above, there has been a high level assessment undertaken by the Council's Highway Authority.</li> <li>4. Unsustainable location - The NPPF, at paragraph 85, outlines that planning policies should recognise that employment sites in rural areas may have to be found beyond existing settlements, and in locations that are not well served by public transport. The Transport Assessment and Travel Plan, which the site specific policy will require of the development, will seek to ensure that development is appropriate to local roads and encourage sustainable travel modes (e.g. car sharing, busing in staff, cycling and provision of showers and suitable storage at place of work).</li> <li>5. Health Impact Assessments (HIAs) will be required under Proposed Submission LPR Policy DM3 of the LPR, as part of a submission of a planning application. Public Health were consulted as part of the Regulation 18 consultation, and were invited to comment on sites as part of the assessment for the HELAA. No comments were received in respect of the site.</li> <li>6. At paragraph 4.164 of the Employment Land Review (ELR, 2020) it is recommended that to</li> </ol>

Respondent (with lpr ref)	Response	Council Response
	<p>is also completely inaccurate. The nearest bus stop is well over a mile away, once a day service only, and unusable because of the risks of walking this unlit, HGV dominant, narrow country road.</p> <p>6. Given guidance 33 from Public Health England, why has no HIA assessment been carried out to understand the impact of industrial expansion on the local rural community? Given these surroundings are also home to the equine industry, the health and safety of valuable racehorses and associated workers who live and drive in the area, are also impacted and put at risk.</p> <p>7. Stantec's report recommends on page 115 #7.10 top-up land at Membury would meet target and help address local rural demand, yet they provide no evidence for this. On page 118 #17 they also talk of local demand for industrial space from small businesses to service local markets. Again, with no evidence, why would these conclusions be accepted as valid?</p> <p>In conclusion, we urge WBC to think their plans through again as we believe they are ill-judged and would be intolerable to residents and the local community if carried out.</p> <p>Withdraw the LAM-6 site from further discussions given this is a wholly inappropriate location.</p> <p>Rather explore Stantec's recommendation on page 119 #26: "immediately to the rear (west) of the main estate is land used for testing by TRL and also areas of open storage". While no land area number is given, they claim this would be a "logical extension of the main Membury Estate". Given that smaller parcel of land exists within the current PEA, those couple of hectares makes the case for that development a little more persuasive as it reuses existing industrial land.</p> <p>To reach WBC's target of 16 hectares of additional Industrial Land by 2037, 12.7 hectares are already identified at Aldermaston and Tadley. Topping that up using Membury's existing site closes that gap to meet target. Given the target is anyway a long-term guesstimate, this small % shortfall would be well within a reasonable margin of error over the 16 year timeframe.</p>	<p>support the creation of local job opportunities in the more western rural areas, PEA boundaries could possibly be extended at Membury. The site would aid in meeting rural market demand, which has been demonstrated through the submission of a planning application for the expansion of Walker Logistics.</p> <p>As a result on further landscape assessment the developable area would be on a focused part of the site with landscape buffers.</p>

Respondent (with lpr ref)	Response	Council Response
Alexander Anderson (lpr48)	<p>I wish to object to the industrial development in the Membury area. As a local resident I am convinced that the local road provision is inadequate to allow for further development at this site.</p> <p>I cannot express my objection any more eloquently than the transcript below: <i>[repeats representation lpr42]</i></p> <p><u>Do you agree with the proposed policy/site allocation or approach?</u> YES NO: X</p> <p><u>What are your reasons for supporting or objecting?</u></p> <p>We don't envy West Berks Council putting together such a long 250 page document, but it is also a mammoth task for residents to read cover to cover, with all the other lengthy supporting evidence documents.</p> <p>But having done this, we recognise WBC's need to forecast the County's future housing, office and industrial space requirements and a long term plan to meet those needs. However, we do not agree with its conclusions proposing an industrial land extension at Membury which WBC asserts as inevitable. We do not believe this is the case and object most strongly.</p> <p>Given the LRP Emerging Draft references consultants, Stantec, with their August 2020 Report conclusions on Membury, we will refer to that document also given this is the supporting evidence which WBC has used to underlie its thinking.</p> <p>First, we were astonished to see Stantec state the proposed LAM-6 site extension at Membury Estate is a foregone conclusion. It is not. Yet on Page 69 #4.113, they say planning has already been granted for this site (Walker Logistics), although development not yet started.</p> <p>This is untrue as Walkers' application is still to be heard in a Planning Committee hearing. Why would Stantec conclude this has been given go-ahead, even if later references in their document correct this site's status? This can only have come after WBC discussions with Stantec when Planning clearly shared their pre-determination conclusions this application would be approved.</p> <p>This is highly improper. Post a Committee Hearing, were planning to be granted, it is open to legal challenge. Given the seriousness of this assumption, we have brought this to the attention of Councillor Howard Woollaston for appropriate follow-up with WBC.</p>	<p>Comments noted.</p> <p>The Employment Land Review (ELR) is an evidence based document, which aids in guiding business development across the District, identifying need and examining sites that were put forward through the Council's call for sites. There are other factors which also need to be taken into account by the Council, such as the AONB designation.</p> <p>It is recognised that planning permission was not granted at the time of drafting the ELR, and there was no direction given as to whether planning permission would be granted or not.</p> <ol style="list-style-type: none"> <li>1. Carbon reduction. It is considered logical and appropriate to extend existing Protected Employment Areas (renamed Designated Employment Areas (DEA) through the LPR) to focus development into particular areas. This is particularly relevant in the AONB to prevent the urbanisation of land. Sustainable construction and renewable energy generation can help in achieving emissions reduction. Development will be expected to comply with Proposed Submission LPR Policy SP5 and Policy DM4 relating to climate change and sustainable building.</li> <li>2. Road network. As part of the assessment of the site, through the HELAA, the Highways Authority considered that there is capacity on the road network to accommodate the development. Membury Industrial Estate is listed as a key industry origin and destination, and the connecting roads are outlined as 'local access routes' in the Freight Strategy.</li> <li>3. Transport assessment – any planning application will be required to submit a Transport Assessment.</li> </ol>

Respondent (with lpr ref)	Response	Council Response
	<p>Second, Stantec identify that AONB is the critical constraint in developing the proposed 6.9 Ha site for industrial use at Membury given local woodlands and rural surrounding. That is correct, but there are other ramifications in extending the DEA boundary (old PEA) at Membury.</p> <ol style="list-style-type: none"> <li>1. Continued industrialisation and the inevitable increase in pollution makes a mockery of WBC's core strategy of carbon reduction, not least in such a poor performing region as West Berkshire that is significantly worse than Reading, the South East and indeed England itself.</li> <li>2. Extending the Membury DEA also contradicts the spirit of WBC's own policy statements to protect this rural community: Environment (DC4); Air Quality (DC7); Conservation (DC8); etc.</li> <li>3. Ramsbury road is not just impractical for HGV's, it is also dangerous for local residents. Stantec admit this road is narrow, only just allowing two narrow vehicles to pass in opposite directions. Yet HGV and Lorry/Van volume continues to rise here as well as on Ermin Street to provide commercial traffic access to the M4 at Jct. 14. More expansion will generate more industrial traffic on these minor roads. This is not only noisy, disruptive and detrimental to the environment, it adds fear to the local community further increasing risks to all road users. The fact Highways refused to do a local traffic monitoring survey for safety reasons proves our point.</li> <li>4. Under Supporting the Rural Economy Policy (DC32), WBC insists that developers demonstrate no resultant inappropriate traffic happening (#viii and #ix). Yet there has been no transport assessment done to determine the true traffic impact of this site extension. Planning already refused to use national TRICS data for the Walkers application. If this Membury site expansion is considered strategic by WBC, why has no proper assessment been made?</li> <li>5. The Membury site location is dreadful and impractical. Unlike Transport Infrastructure Policy (DC35) recommendations, this area has no access by train, bus, cycle or foot because of the inherent traffic risks which WBC Highways have already identified. Motor vehicles are the only way in and out of this site making it completely</li> </ol>	<p>As outlined above, there has been a high level assessment undertaken by the Council's Highway Authority.</p> <ol style="list-style-type: none"> <li>4. Unsustainable location - The NPPF, at paragraph 85, outlines that planning policies should recognise that employment sites in rural areas may have to be found beyond existing settlements, and in locations that are not well served by public transport. The Transport Assessment and Travel Plan, which the site specific policy will require of the development, will seek to ensure that development is appropriate to local roads and encourage sustainable travel modes (e.g. car sharing, busing in staff, cycling and provision of showers and suitable storage at place of work).</li> <li>5. Health Impact Assessments (HIAs) will be required under Proposed Submission LPR Policy DM3 of the LPR, as part of a submission of a planning application. Public Health were consulted as part of the Regulation 18 consultation, and were invited to comment on sites as part of the assessment for the HELAA. No comments were received in respect of the site.</li> <li>6. At paragraph 4.164 of the Employment Land Review (ELR, 2020) it is recommended that to support the creation of local job opportunities in the more western rural areas, PEA boundaries could possibly be extended at Membury. The site would aid in meeting rural market demand, which has been demonstrated through the submission of a planning application for the expansion of Walker Logistics.</li> </ol>

Respondent (with lpr ref)	Response	Council Response
	<p>unsustainable. Stantec state there are “8” bus stops within a 400 m radius in their appendices (page 119 #23, and page 125 #29) which is also completely inaccurate. The nearest bus stop is well over a mile away, once a day service only, and unusable because of the risks of walking this unlit, HGV dominant, narrow country road.</p> <p>6. Given guidance 33 from Public Health England, why has no HIA assessment been carried out to understand the impact of industrial expansion on the local rural community? Given these surroundings are also home to the equine industry, the health and safety of valuable racehorses and associated workers who live and drive in the area, are also impacted and put at risk.</p> <p>7. Stantec's report recommends on page 115 #7.10 top-up land at Membury would meet target and help address local rural demand, yet they provide no evidence for this. On page 118 #17 they also talk of local demand for industrial space from small businesses to service local markets. Again, with no evidence, why would these conclusions be accepted as valid?</p> <p>In conclusion, we urge WBC to think their plans through again as we believe they are ill-judged and would be intolerable to residents and the local community if carried out.</p> <p><b><u>What changes are you seeking/what would be your preferred approach?</u></b></p> <p>Withdraw the LAM-6 site from further discussions given this is a wholly inappropriate location.</p> <p>Rather explore Stantec's recommendation on page 119 #26: "immediately to the rear (west) of the main estate is land used for testing by TRL and also areas of open storage". While no land area number is given, they claim this would be a “logical extension of the main Membury Estate”. Given that smaller parcel of land exists within the current PEA, those couple of hectares makes the case for that development a little more persuasive as it reuses existing industrial land.</p> <p>To reach WBC's target of 16 additional Industrial Land hectares by 2037, 12.7 hectares are already identified at Aldermaston and Tadley. Topping that up using Membury's existing site closes that gap to meet target. Given</p>	<p>As a result on further landscape assessment the developable area would be on a focused part of the site with landscape buffers.</p>

Respondent (with lpr ref)	Response	Council Response
	the target is anyway a long-term guesstimate, a small % shortfall would be well within a reasonable margin of error over the 16 year timeframe.	
Mrs Helen Marek (lpr58)	<p>Does not agree with the proposed policy. Theale is no longer a village. There have been so many planning applications granted over the past few years that should not have been granted.</p> <p>The planning applications to build on land between the north end of Theale High Street and the M4 are totally unacceptable. The application for 170 houses would stretch limited resources, e.g. for The Medical Centre, beyond capability. The application to build offices on land which is highly susceptible to flooding is preposterous and consequently puts houses in that area in greater risk of being flooded. This is a housing area, not an industrial estate.</p> <p>The above applications should NOT be granted. Offices should be put on the other side of the A4 in the Industrial estate, not in the housing area.</p>	<p>Comments noted.</p> <p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken. The work recognises the contribution the site makes to the separation of Theale and Calcot, and to the setting of the Theale and the Conservation Area. The introduction of offices and/or other large-scale buildings would be out of scale and keeping with the historic village character of Theale. It would also be visible from the North Wessex Downs AONB. Therefore, the landscape evidence recommends that the site is not developed for employment purposes. As part of the LPR going forward it is no longer proposed to allocate the site.</p>
Ms Zoe Freedman (lpr62)	<p>Does not agree with the proposed policy. I am objecting to the potential 20,000sq metres of office space to be built in Theale (EMP6). I think this needs to be seriously reconsidered given the fundamental changes to working patterns that have come about with the pandemic.</p> <p>There are also other reasons to object about this site in particular:</p> <ol style="list-style-type: none"> <li>1. It would reduce the gap between Theale and Calcot</li> <li>2. Risk from fluvial, surface water and ground water flooding</li> <li>3. Separated from the Arlington Business Park by the busy A4 Theale bypass.</li> <li>4. Overhead high voltage power lines and an electricity pylon.</li> <li>5. Impact on the Theale High Street Conservation Area.</li> <li>6. Impact on surrounding housing</li> </ol> <p>I think we do not need more office space at this time. That is not the future of work since the pandemic hit.</p>	<p>Comments noted.</p> <p>Further landscaping work has been commissioned (Landscape Sensitivity and Capacity Assessments - LCA). It notes that the introduction of offices and/or other large-scale buildings would be out of scale and keeping with the historic village character of Theale, and development across the whole site would create the perception of coalescence with Calcot and loss of separate identity of Theale from Calcot. The site is separated from the existing Protected Employment Area by the A4. Development would also be visible from areas with the North Wessex Downs AONB.</p> <p>The LCA concludes that if the site were developed, either in whole or in part, it would compromise the setting of Theale and its separate identity and character from Calcot.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>It therefore recommends that the site is not developed for employment uses. Therefore, as part of the LPR going forward it is no longer proposed to allocate the site.</p>
<p>Dame Theresa Sackler (lpr138)</p>	<p>I have many concerns about the draft Local Plan but most of all with regard to the proposal to increase the industrial area at Membury by a sizeable 6 hectares. This will not be without significant impact to the immediate and wider area of the county. There are a myriad of reasons why this expansion should not be allowed including issues of access, road safety and increased levels of traffic and pollution. I do not support this plan and would ask that either an alternative location is sought or permission is simply not granted. I hope that the Planning Committee (with advice from Stantec) will be ultra-diligent in their review of the burgeoning number of planning permission proposals. It is imperative that we all work together to properly protect the environment/neighbourhood, and agree on a Local Plan for the that is sensitive to the current and future needs of our countryside and its communities.</p>	<p>Comments noted.</p> <p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessment (LCA) for a number of sites in the LPR. Membury Protected Employment Area (renamed Designated Employment Areas (DEA) through the LPR) is made up of a central area and a number of fragmented smaller outlying areas. The site loosely connects these areas. The eastern part of the site has an established visual and landscape connection with the open arable landscape area further to the east of Ramsbury Road. The western part of the site (runway area) connects to the adjacent area of open grassland which leads across to the Iron Age hillfort and the wider countryside.</p> <p>The LCA identifies a loss of open land, loss of open views within the AONB, and loss of quiet rural character and rural character of Ramsbury Road as potential impacts of development. In terms of the impact on the existing PEA the fragmented character allows the undeveloped areas in-between to retain characteristic landscape features of the AONB, therefore mitigating and reducing the overall effect of the PEA on the AONB. The proposed site connects four of these together, which would result in one large area and the potential loss of these mitigating landscape features.</p> <p>Opportunities to propose substantial areas of tree and woodland planting as part of mitigation measures would not be out of character. Woodland would help, in time, to</p>

Respondent (with lpr ref)	Response	Council Response
		<p>integrate and screen any proposed development as well as enhancing the area.</p> <p>The LCA recommends that development is limited to a focused area, to the eastern part of the submitted site. This reflects the development area outlined in the planning application (19/02729/OUTMAJ). It is considered such recommendations must be followed, and the policy will list criteria, as suggested in the LCA for the reserved matters application, or any other scheme, to be implemented.</p> <p>Alternative locations have been explored by the Employment Land Review (ELR) and as part of the Housing and Economic Land Availability Assessment (HELAA) and it is considered that the site would be a logical extension to the existing Membury Industrial Estate and would serve a rural market.</p> <p>The Highways Authority consider the local road network has capacity for the floorspace, and access can be designed to meet highway standards.</p> <p>Sustainable construction and renewable energy generation can help in achieving emissions reduction. Development will be expected to comply with Proposed Submission LPR Policy SP5 and Policy DM4 relating to climate change and sustainable building.</p>
Mr Gary Miles (lpr243)	Does not agree with the proposed policy. I object to the EMP6 Land north of Arlington Business Park, Theale East Business Centre 20,000 sq foot warehouse development. Why? The meadows adjacent to Hoad Way are full of wildlife from Dear, to herons, to kites, bunnies etc. A warehouse here would be completely out of character to the rest of the village. The area sits within a conservation area. A warehouse here will inadvertently create additional traffic down Theale high street, even if the traffic should be there such as HGV's and delivery lorries - once in to the high street they will be	<p>Comments noted.</p> <p>Further landscaping work has been commissioned (Landscape Sensitivity and Capacity Assessments - LCA). It notes that the introduction of offices and/or other large-scale buildings would be out of scale and keeping with the historic village character of Theale, and development across the whole site would create the perception of</p>

Respondent (with lpr ref)	Response	Council Response
	<p>committed to carry on. Likewise if the A4 bypass is busy it is likely that these same vehicles will use the high street to access the warehousing. I object because as we speak there are multiple office buildings empty within Arlington Business Park - some offices were being refurbished but have since been left and forgotten! There is the large DVLA building in Station Road which is still empty for the past 6 years with no takers, a large warehouse in Brunel Rd which is empty and has been for ages, two brand new warehouses near Station Rd built 18 months ago and still empty. Why build more warehousing if so many warehouses and commercial property is currently empty?</p> <p>I'd prefer it if the industrial buildings such as warehousing were kept to the southern side of the A4 with all the other warehousing. Don't bring warehousing in to the village - it is a conservation area which I feel is forgotten over and over again by WBC - having just fought of a 20,000 sq foot warehouse unit for the exact same location of Hoad Way.</p>	<p>coalescence with Calcot and loss of separate identity of Theale from Calcot. The site is separated from the existing Protected Employment Area by the A4. Development would also be visible from areas with the North Wessex Downs AONB.</p> <p>The LCA concludes that if the site were developed, either in whole or in part, it would compromise the setting of Theale and its separate identity and character from Calcot. It therefore recommends that the site is not developed for employment uses. Therefore, as part of the LPR going forward it is no longer proposed to allocate the site.</p>
Mrs Sam Coppinger (lpr59)	<p>We do not agree with the proposal for industrial land extension at Membury and object strongly.</p> <p>The LRP (Emerging Draft) references consultants Stantec with their August 2020 report conclusions regarding Membury. We refer to that document as it is supporting evidence WBC uses to inspire its thinking.</p> <p><u>Irregularity regarding the state of a Planning Application</u></p> <p>We would like to draw attention to the fact that Stantec state that the LAM-6 site extension at Membury Estate is already approved. It is not. On p69 - 4.113, they say planning has been granted for this site (Walkers Logistics) although development has not yet started. This is not true as Walker's application is yet to be heard at the Planning Committee meeting. This calls in to question due process and would indicate that Planning has shared predetermined conclusions that this application would be approved. If this application were to be approved, post hearing, its status should be open to a legal challenge. Our community team has brought this to the attention of Howard Woollaston for appropriate follow-up with WBC.</p> <p><u>AONB protected status should be barrier to development</u></p> <p>Stantec identify AONB as a critical constraint in developing the 6.9 ha site for industrial use at Membury - a very rural environment surrounded by</p>	<p>Comments noted.</p> <p>The Employment Land Review (ELR) is an evidence based document, which aids in guiding business development across the District, identifying need and examining sites that were put forward through the Council's call for sites. There are other factors which also need to be taken into account by the Council, such as the AONB designation.</p> <p>It is recognised that planning permission was not granted at the time of drafting the ELR, and there was no direction given as to whether planning permission would be granted or not.</p> <ol style="list-style-type: none"> <li>1. Carbon reduction. It is considered logical and appropriate to extend existing Protected Employment Areas (renamed Designated Employment Areas (DEA) through the LPR) to focus development into particular areas. This is particularly relevant in the AONB to prevent the</li> </ol>

Respondent (with lpr ref)	Response	Council Response
	<p>woodland. This is true, of course, however there are many other undesirable consequences in extending the DEA (old PEA) at Membury.</p> <p><u>Pollution &amp; carbon reduction</u> Continued industrialisation and increase in pollution calls into question WBC's core strategy of carbon reduction (carbon neutral by 2030) and to 'minimise demand for energy and other resources'– especially in such a poor performing region (compared to the rest of Berkshire and South East).</p> <p><u>WBC commitment to rural community environment</u> Extending DEA at Membury contradicts essence of WBC's own policy statements to protect this rural community environment (DC4), air quality (DC7), conservation (DC8), etc.</p> <p><u>Infrastructure Unsuitability</u> Ramsbury Road is not suited to HGV traffic and is also a dangerous road for residents. The road is narrow – only just allowing two vehicles to pass in opposite directions (Stantec). HGV/lorry/van volumes continue to increase including on Ermin Street to provide commercial traffic access to J14, M4. More expansion will generate yet more traffic on these minor roads. All of this is noisy, disruptive and detrimental to the environment. These are unlit roads without footpaths - used by pedestrians; horseriders and cyclists alike – more traffic is frankly dangerous and increases the risk to life. Highways refused to undertake a local traffic monitoring survey on grounds of safety, which further underlines the point.</p> <p><u>Traffic Impact Assessment (TIA)</u> Under Supporting the Rural Economy Policy (DC32), WBC insists that developers demonstrate no resultant inappropriate traffic happening (viii &amp; ix). However, no TIA has been carried out to determine the true impact of traffic on this site extension. Planning has refused to use national TRICS data for the Walker's application. If this site extension is considered to be a strategic development by WBC – why has no proper assessment been made?</p> <p><u>No sustainable access to site</u> The Membury site location is entirely unsuitable and impractical. Unlike Transport Infrastructure Policy (DC35) recommendations, there is no access either by train or bus and no safe cycle or pedestrian routes because of the inherent traffic risks of which WBC Highways are all too aware. Motor</p>	<p>urbanisation of land. Sustainable construction and renewable energy generation can help in achieving emissions reduction. Development will be expected to comply with Proposed Submission LPR Policy SP5 and Policy DM4 relating to climate change and sustainable building.</p> <ol style="list-style-type: none"> <li>2. Road network. As part of the assessment of the site, through the HELAA, the Highways Authority considered that there is capacity on the road network to accommodate the development. Membury Industrial Estate is listed as a key industry origin and destination, and the connecting roads are outlined as 'local access routes' in the Freight Strategy.</li> <li>3. Transport assessment – any planning application will be required to submit a Transport Assessment. As outlined above, there has been a high level assessment undertaken by the Council's Highway Authority.</li> <li>4. Unsustainable location - The NPPF, at paragraph 85, outlines that planning policies should recognise that employment sites in rural areas may have to be found beyond existing settlements, and in locations that are not well served by public transport. The Transport Assessment and Travel Plan, which the site specific policy will require of the development, will seek to ensure that development is appropriate to local roads and encourage sustainable travel modes (e.g. car sharing, busing in staff, cycling and provision of showers and suitable storage at place of work).</li> <li>5. Health Impact Assessments (HIAs) will be required under Proposed Submission LPR Policy DM3 of the LPR, as part of a submission of a planning application. Public Health were consulted as part</li> </ol>

Respondent (with lpr ref)	Response	Council Response
	<p>vehicles are the only way in and out of this site making it completely unsustainable. Stantec incorrectly states that there are eight (8) bus stops within a 400m radius in their appendices (p119 - 23 &amp; p125 – 29). The nearest bus stop is, in fact, well over a mile away, a once a day service only and unusable because of the risks of walking an unlit, narrow country lane that is already overused by HGVs.</p> <p><u>Public Health England – Health Impact Assessment (HIA)</u> Why hasn't an HIA been carried out to ascertain the impact of industrial expansion on the local community in and around Membury? Not only home to local residents, these surroundings are home to the equine industry. Lambourn is recognised as being a centre of excellence for the racing industry and is of huge local importance, contributing significantly to the environment and economy. Over industrialisation risks the health and safety of all involved in this industry.</p> <p><u>No evidence of rural demand</u> Stantec's report recommends p115 – 7.10 that top up land at Membury would meet the required target and help address local / rural demand, yet they provide no evidence for this. On p118 – 17, they mention local demand for industrial space from small businesses to service local markets. However, again – there is no evidence of this. These conclusions should not be deemed true.</p> <p>In summary, we would like WBC to rethink the draft plan. The impact would be intolerable to residents and the local community if carried out.</p> <p>We propose the withdrawal of the LAM-6 site from further discussions as it is not appropriate for further development.</p> <p>Stantec suggest that there is a parcel of land 'immediately to the rear (west) of the main estate... land used for testing by TRL and also areas of open storage'. This might be worth considering as it is adjacent to the existing Membury Estate and already sits within the existing PEA. More compelling, is that this is existing industrial land.</p> <p>If this parcel of land were to be added to those already being considered at Aldermaston and Tadley, it would go a long way to meeting the suggested target for industrial development.</p>	<p>of the Regulation 18 consultation, and were invited to comment on sites as part of the assessment for the HELAA. No comments were received in respect of the site.</p> <p>6. At paragraph 4.164 of the Employment Land Review (ELR, 2020) it is recommended that to support the creation of local job opportunities in the more western rural areas, PEA boundaries could possibly be extended at Membury. The site would aid in meeting rural market demand, which has been demonstrated through the submission of a planning application for the expansion of Walker Logistics.</p> <p>As a result on further landscape assessment the developable area would be a more focused area, with landscape buffers.</p>

Respondent (with lpr ref)	Response	Council Response
L Bahrani (lpr2472)	<p>Object to policy.</p> <p>I wish to formally register my comments and objections in respect to the West Berkshire Local Plan Review referenced above.</p> <p>The plan, specifically the sites proposed for residential and commercial development, raises many serious concerns with respect to its impact on the village of Theale, the residents of the village, and the wider area.</p> <p>A non-exhaustive list of comments and objections is presented as follows:</p> <p><b>Conservation Area</b></p> <p>Sites identified for inclusion in the LPR (Local Plan Review) encompass those designated as a <b>Conservation Area</b> and setting, and is thus subject to protection as an area of special architectural or historic interest, the character or appearance of which it is desirable to preserve or enhance as per Section 69 of The 1990 Planning (Listed Buildings and Conservation Areas) Act and as designated under Article 50 of the Planning (NI) Order 1991.</p> <p>Conservation Areas are also notable for their biodiversity value. Protected species and habitats need to be addressed when reviewing buildings, sites and planning works. See further point on <b>Destruction of wildlife habitat and protected species.</b></p> <p>In addition, trees in a Conservation Area are automatically protected as if a Tree Preservation Order (TPO) was in place.</p> <p><b>Invasion of privacy of Theale residents (esp. 60-89 High Street)</b></p> <p>The overlook that will result from the sites identified for inclusion in the LPR will pose serious privacy issues especially for the surrounding properties i.e.</p>	<p>Comments noted.</p> <p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken. The work recognises the contribution the site makes to the separation of Theale and Calcot, and to the setting of the Theale and the Conservation Area. The introduction of offices and/or other large-scale buildings would be out of scale and keeping with the historic village character of Theale. It would also be visible from the North Wessex Downs AONB. Therefore, the landscaping work recommends that the site is not developed for employment purposes. As part of the LPR going forward it is no longer proposed to allocate the site.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>60-89 High Street, Theale. As per Article 8 of the Human Rights Act states a person has the substantive right to respect for their private and family life. In the case of Britton vs SOS the courts reappraised the purpose of the law and concluded that the protection of the countryside falls within the interests of Article 8. Private and family life therefore encompasses not only the home but also the surroundings.</p> <p><b>Agricultural Land Classification (ALC)</b></p> <p>Natural England records that sites identified and proposed for inclusion in the LPR are graded ALC and thus the land should protected from development under the government policies and legislation to preserve the best and most versatile (BMV) agricultural land and soils in England from significant, inappropriate or unsustainable development proposals.</p> <p><b>Flood Risk, Ground Stability and Drainage</b></p> <p>The Environment Agency designates sites identified for inclusion in the LPR as at <b>HIGH RISK</b> from surface water flooding. The eradication of natural ground absorption inherent to this proposal will heighten this risk status for Theale village and adversely affect the foundational integrity of nearby properties and subsequently elevate Home &amp; Buildings insurance premium rates for the surrounding area.</p> <p><b>Destruction of wildlife habitat and protected species</b></p> <p>The destruction of habitation required for the sites identified and proposed for inclusion in the LPR development would lead to a further decline in wildlife species such as deer, rabbit, birds, bats and hedgehogs.</p> <p>Hedgehogs are listed as a <b>Species of Principle Importance in England</b> under the Natural Environment and Rural Communities (NERC)</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>Act 2006 Section 41 making hedgehogs a material consideration for Local Planning Authorities (LPAs) during the planning process.</p> <p><b>Highway safety, inadequate parking and access</b></p> <p>Theale village is already vastly strained with traffic and parking issues; development on the sites identified and proposed for inclusion in the LPR proposal will only serve to escalate these issues and stands in direct contradiction with both government and local council policies on congestion and pollution alleviation. Parking facilities in Theale are already oversubscribed and the proposed development would lead to an increase in traffic and parking issues correlating inversely with a decrease in highway safety.</p> <p><b>Noise/Air/Light/Visual Pollution</b></p> <p>Additional development of both commercial and residential nature will increase noise, air, light and visual pollution in Theale village both during and post-construction, with particular impact on residents of 60-89 High Street and Woodfield Way as the parallel properties to two of the sites included.</p> <p><b>Loss of natural light</b></p> <p>Sites identified and proposed for inclusion in the LPR are in extremely close proximity to numerous residential properties that have benefited from natural space and light for over 20 years. The proposed development would contravene the fair and reasonable 'right to light' claim by residents resulting from the obscuration of a South-East solar trajectory.</p> <p><b>Negative alteration to the character and nature of Theale village</b></p>	

Respondent (with lpr ref)	Response	Council Response
	<p>The encroachment on green space and increased commercial development will erode the character of the village as a predominantly residential settlement.</p> <p><b>Requirement for Post-Pandemic Reconsideration</b></p> <p>The LPR is based on studies and requirement predictions based on a pre-pandemic environment and as such are now invalidated due to the rapidly shifting socioeconomic conditions. It is increasingly apparent that more people are now working from home thus reducing the demand for commercial office related premises which is of particular pertinence to the proposal for 20,000 sqM of office space in Theale.</p> <p><b>Excessive/Exaggerated Targeting</b></p> <p>The LPR proposes an excess of proposed residential developments beyond the targeted 520 - 575 homes per year and instead contains proposals for a pro-rata development of 599 homes per year which represents an excessive and unrealistic overreach.</p> <p>Further, the LPR allocation fails to account for the up to 500 flats West Berkshire Council intends to build in Newbury at the London Road Industrial Estate.</p> <p>In addition, the 170 homes proposed for Theale would be above the 440 homes on the western side of Theale that have been given planning permission but not yet built.</p> <p><b>Deficient Development Control Policies</b></p>	

Respondent (with lpr ref)	Response	Council Response
	<p>The development control policies relating to some sites identified for inclusion in the LPR, which include all those affecting Theale, are incomplete.</p> <p><b>Deficient Sustainability Appraisal</b></p> <p>There is current no completed sustainability appraisal of the plan which would doubtless reveal the detrimental impact to the environment due to the proposals and details contained in the LPR for the environment.</p> <p>In conclusion this LPR should be roundly rejected as it stands in direct contradiction to myriad land/heritage conservation policies and would also be to the detriment of the quality, character, safety and amenity value of the area, as outlined in the points above.</p>	
Diana Spence (lpr1024)	<p>Object to policy.</p> <p>Theale is slowly losing its village character as more homes/offices are being built. Such projects normally do not involve any provision for extra health care or sanitation. Theale has a very small GP that can barely cope with demand as it is. Traffic is increasing. Totally oppose any extra housing or offices in our village.</p> <p>Such plans should be cancelled.</p>	<p>Comments noted.</p> <p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken. The work recognises the contribution the site makes to the separation of Theale and Calcot, and to the setting of the Theale and the Conservation Area. The introduction of offices and/or other large-scale buildings would be out of scale and keeping with the historic village character of Theale. It would also be visible from the North Wessex Downs AONB. Therefore, the landscaping work recommends that the site is not developed for employment purposes. As part of the LPR going forward it is no longer proposed to allocate the site.</p>
Helen Windridge (lpr1040)	<p>We do <b>NOT</b> agree with the proposed policy/site allocation (EMP5)</p> <p><b>Reasons:</b> The proposed site is in an area of Outstanding Natural Beauty; increased traffic will have further impact on the rural quality of Ramsbury road and tranquility levels within the wider area. Increasing carbon dioxide levels in</p>	<p>Comments noted.</p> <p>It is considered logical and appropriate to extend existing Protected Employment Areas (renamed Designated Employment Areas (DEA) through the LPR) to focus</p>

Respondent (with lpr ref)	Response	Council Response
	<p>West Berkshire which is the worst performing region in the whole of Berkshire, and well above South East England by 38%; LAM6 will generate significantly longer travel journeys and increase in HGV's, more than other sites thereby causing an increase.</p> <p>LAM6 is the most remote in West Berkshire and also the most inaccessible for HGV's, there is no easy access to the site and it is not close to JCT14 of the M4, so HGV's would often need to travel on minor roads and this would have an impact on on many rural communities who live on the route.</p> <p>There are many inaccuracies in the document;</p> <p>Development opportunities P74 4.113 states that planning has already been granted to Walker Logistics, which is not the case as it is still to be heard by committee amidst submissions and many objections.</p> <p>Their are also inaccuracies around the number of bus stops available in LAM6, there is only one not eight, and this has to be accessed via narrow roads, dominated by HGV's!</p> <p>It is stated that Ramsbury Rd has reasonable access with little HGV constraint, this is not so as presently many HGV's already use small lanes via Chilton Foliat to get to Membury, which is totally unsuitable.</p> <p><b>CHANGES</b></p> <p>We would like WBC to rethink LPR plans regarding industrial land extension and to find more relevant locations in the Eastern part of West Berkshire where it appears the demand for facilities lie.</p> <p><b>4.141</b></p> <p>We would like to point out that Hurst Farm (8a) is a private residence.. we live here! and that Membury Business Park is adjacent and completely separate.</p>	<p>development into particular areas. This is particularly relevant in the AONB to prevent the urbanisation of land. Sustainable construction and renewable energy generation can help in achieving emissions reduction. Development will be expected to comply with Proposed Submission LPR Policy SP5 and Policy DM4 relating to climate change and sustainable building.</p> <p>Road network. As part of the assessment of the site, through the HELAA, the Highways Authority considered that there is capacity on the road network to accommodate the development. Membury Industrial Estate is listed as a key industry origin and destination, and the connecting roads are outlined as 'local access routes' in the Freight Strategy. Any planning application will be required to submit a Transport Assessment. As outlined above, there has been a high level assessment undertaken by the Council's Highway Authority.</p> <p>The NPPF, at paragraph 85, outlines that planning policies should recognise that employment sites in rural areas may have to be found beyond existing settlements, and in locations that are not well served by public transport. The Transport Assessment and Travel Plan, which the policy will require of the development, will seek to ensure that development is appropriate to local roads and encourage sustainable travel modes (e.g. car sharing, busing in staff, cycling and provision of showers and suitable storage at place of work).</p> <p>It is recognised that planning permission was not granted at the time of drafting the ELR, and there was no direction given as to whether planning permission would be granted or not.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>It is also recognised that Hurst Farm is a residential property. The adjacent employment area is called Hurst Farm Protected Employment Area/Designated Employment Area.</p> <p>As a result on further landscape assessment the developable area would be on a focused part of the site with landscape buffers.</p>
Robert Orr-Ewing (lpr1059)	<p>Does not agree with the proposed policy. We do not believe that WBC, through their consultants' Stantec, have taken sufficient account of the Area of Outstanding Natural Beauty or any account of the other considerations of the area, such as the inadequacy of the access road, the effect of the increased traffic, the lack of public transport, the likely increase in carbon emissions, and the effect on the local community, including the equine industry.</p> <p>We were also greatly concerned that Stantec appear to have believed that a LAM-6 planning application had been approved by the Council, when in fact the application has not been heard and faces substantial local opposition. This leads us to suspect that Stantec had been told by council officials that the outcome was a foregone conclusion. We hope that this is not the case.</p> <p>Expanding on the reasons for objecting:</p> <p><b>1. Have AONB been consulted?</b> This is a very attractive part of the County. Any increased industrialisation would be detrimental to the look and feel of the area.</p> <p><b>2. The access road</b> The B4000 is narrow, with many accesses to private dwellings off it. It is dangerous for cars emerging onto this road as it is. Support people, such as the postman, already take risks stopping and turning into the road. These risks would only increase.</p> <p><b>3. Lack of public transport</b> The area is not served at all by trains. There is only one bus stop over a mile away (contrary to Stantec's statement). It is not practical to have staff arriving on foot; it would be too dangerous along the B4000.</p> <p><b>4. Increased pollution</b></p>	<p>Comments noted.</p> <p>The Council is duty bound to take account of the effect of development on designated landscapes, such as the Area of Outstanding Natural Beauty. Further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessment (LCA) for a number of sites in the Local Plan Review.</p> <p>The LCA identifies a loss of open land, loss of open views within the AONB, and loss of quiet rural character and rural character of Ramsbury Road as potential impacts of development. In terms of the impact on the existing PEA the fragmented character allows the undeveloped areas in-between to retain characteristic landscape features of the AONB, therefore mitigating and reducing the overall effect of the PEA on the AONB. The proposed site connects four of these together, which would result in one large area and the potential loss of these mitigating landscape features.</p> <p>Opportunities to propose substantial areas of tree and woodland planting as part of mitigation measures would not be out of character. Woodland would help, in time, to integrate and screen any proposed development as well as enhancing the area.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Increased traffic inevitably leads to increased fumes and pollution, contrary to WBC’s policy to reduce carbon emissions.</p> <p><b>5. Effect on local community</b></p> <p>Although the road is busy, it is used by cyclists and horses and by horse boxes taking horses to and from Lambourn to race meetings. Large HGVs make these activities more dangerous and risky.</p> <p>For all these reasons, the proposal should be rejected.</p> <p>We would prefer that the existing area within the industrial area as referred to on page 119 of Stantec’s report.</p> <p>We would also recommend using the areas at Aldermaston and Tadley referred to in the report, and feel that they are adequate for WBC’s purposes.</p>	<p>The LCA recommends that development is limited to a focused area, to the eastern part of the submitted site. This reflects the development area outlined in the planning application (19/02079/OUTMAJ). It is considered such recommendations must be followed, and the policy will list criteria, as suggested in the LCA for the reserved matters application, or any other scheme, to be implemented.</p> <p>It is recognised that planning permission was not granted at the time of drafting the ELR, and there was no direction given as to whether planning permission would be granted or not.</p> <ol style="list-style-type: none"> <li>1. The AONB Board has been consulted. The response to the Regulation 18 consultation is included within this document.</li> <li>2. As part of the assessment of the site, through the HELAA, the Highways Authority considered that there is capacity on the road network to accommodate the development. Membury Industrial Estate is listed as a key industry origin and destination, and the connecting roads are outlined as ‘local access routes’ in the Freight Strategy.</li> <li>3. It is acknowledged that there are few alternatives to the private vehicle. A travel plan could encourage car sharing, cycle use, possible bussing in on employees.</li> <li>4. Sustainable construction and renewable energy generation can help in achieving emissions reduction. Development will be expected to comply with Proposed Submission LPR Policy SP5 and Policy DM4 relating to climate change and sustainable building.</li> <li>5. As per 2 and 3.</li> </ol>

Respondent (with lpr ref)	Response	Council Response
		Sites are proposed in the Eastern part of the District.
Linda Culley (lpr1064)	<p>Does not agree with the proposed policy. Membury (LAM6)</p> <ul style="list-style-type: none"> <li>• Economic forecasts show industrial job growth coming from the East of West Berkshire and not in the extreme West where this site is located with minor poor road access to the M4</li> <li>• The proposed site is located in a protected AONB area, and is deemed unsustainable by both the County's own Highways and Environmental Planning experts</li> <li>• Over a third of all proposed industrial expansion is at LAM6 in the <u>Western area</u>. Yet all major housing developments are in <u>Newbury and Eastern area</u>. This leads to an imbalance between new homes and new jobs, requiring more vehicle based journeys which all leads to unsustainability.</li> <li>• Carbon Dioxide levels show West Berkshire as the worst performing region in the whole of Berkshire, and well above South East England by 38%. LAM6 will generate significantly longer travel journeys than other sites, just increasing more carbon emissions unnecessarily in West Berkshire.</li> <li>• Market attraction is <u>high in the East</u> of the county, yet LAM6 site is <u>low in the far West</u>.</li> <li>• Industrial demand in West Berkshire is shown to be in the <u>East</u> of the region, but only 3 sites here meet 65% of land needs. That shortfall is illogically made up by siting it at LAM6 in the <u>West</u>.</li> <li>• Membury is described as "various industrial areas located around the M4". In fact LAM6 is not "close" and has no easy access to Jct 14 of M4. The 14 km round trip for HGV's impacts many rural communities living along these minor roads.</li> <li>• WBC's Freight Route Plan while dated (2009) still shows <u>LAM6 as the industrial site furthest from an A road</u>. As LAM6 is the most remote in West Berkshire, it is also the area least suitable for HGV's.</li> <li>• 1997-2017 data shows the local economy grew 34%, primarily in jobs unlikely to be attracted to LAM6. In the 2036 forecast it follows</li> </ul>	<p>Comments noted</p> <p>The Employment Land Review (ELR) is an evidence based document, which aids in guiding business development across the District, identifying need and examining sites that were put forward through the Council's call for sites. There are other factors which also need to be taken into account by the Council, such as the AONB designation.</p> <p>The Employment Land Review (ELR, 2020) notes at paragraph 4.86 that across Membury (not only around LAM6) there are a range of different sizes and styles of industrial units, and that some of the units are reasonably large when compared to other locations in the Authority area. Demand is weaker (paragraph 4.98) than other areas in the District, but this is due to the small size of the industrial area. There are cases of existing occupiers seeking to expand (e.g. Walker Logistics). Industrial demand is mainly from local/regional occupiers.</p> <p>Table 4.21 (at paragraph 4.109, ELR 2020) highlights that no units are available (total stock of 46 units), reflecting the small size of the industrial market in this location.</p> <p>Paragraph 6.65 (ELR 2020) recognises there is continued demand for industrial space, as illustrated by the Walker Logistics planning application. To support the rural economy part of this site (6.9ha) could be considered for allocation.</p> <p>The ELR notes that the site seeks to address rural demand/local demand, and is better placed than other promoted sites in the AONB.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>that these jobs, increasingly in demand, will still not be provided by the LAM6 site.</p> <ul style="list-style-type: none"> <li>• Currently a proportion of Membury’s workers are bussed in from Temp Agencies in Reading and Swindon. This would only continue. Data shows Membury workers are below County wage levels and those out of County workers’ spend will not benefit the local economy will not benefit.</li> <li>• Consultants, Stantec provide no convincing arguments to support the LAM6 site and give <u>incorrect</u> facts and assertions within their site comparison tables, Appendix A. <u>Many inaccuracies</u> include: <ul style="list-style-type: none"> <li>○ Planning permission <u>has not been granted</u> to Walker Logistics to develop the LAM6 site. Its application is still to be heard by Committee a year since submission and many objections</li> <li>○ Stantec <u>ignore recent industrial sites</u> at Hadley Pig Farm and Lowesdon (min. 10 new units)</li> <li>○ “LAM6 has <u>8 bus stops</u> within 400 metres”. There is <u>one</u> bus stop, once a day service, dangerous to walk to given the access roads are narrow, unlit and dominated by HGV’s.</li> <li>○ They conclude Ramsbury Rd “has reasonable access” with little HGV constraint. Not true and upsettingly, HGV’s already use short cuts to Membury on tiny lanes via Chilton Foliat.</li> <li>○ LAM6 is defined as previously developed land. This is untrue. It is a field.</li> </ul> </li> <li>• WBC Policy guidance gives presumption in favour of Sustainability, yet LAM6 has no alternative access unless by motorised vehicles. This is simply unsustainable as stated by WBC Highways</li> <li>• The Council’s own Environment expert, Liz Allen, in her July 2020 paper states: <ul style="list-style-type: none"> <li>○ “Increased traffic will have a further adverse impact on the rural quality of Ramsbury Road and tranquility levels within the wider area”</li> <li>○ Development “proposals do not comply with Policy ADPP5 and CS19” WBC’s Core Strategy.</li> </ul> </li> </ul>	<p>It is considered logical and appropriate to extend existing Protected Employment Areas to focus development into particular areas. This is particularly relevant in the AONB to prevent the urbanisation of land. Sustainable construction and renewable energy generation can help in achieving emissions reduction. Development will be expected to comply with Proposed Submission LPR Policy SP5 and Policy DM4 relating to climate change and sustainable building.</p> <p>Job creation is a benefit to promoting employment opportunities in this end of the District. Skilled workers, attracting varying degrees of pay, are required in jobs such as logistics (engineers, managers, HGV drivers).</p> <p>It is not considered that there is an imbalance between the proposed expansion of employment floorspace and the proposed major housing developments. The majority of existing DEAs are located in Newbury and to the east of the District. The Employment Land Review notes that the site could support the rural economy, and is better placed than other promoted sites in the AONB. The proposed expansion in Membury, where the planning application illustrates that there is demand for such use, with jobs created which local residents can make use of.</p> <p>It is recognised that planning permission was not granted at the time of drafting the ELR, and there was no direction given as to whether planning permission would be granted or not.</p> <p>The ELR takes account of all commitments when assessing the supply of employment uses. Sarah Wallis (lpr1134)	<p>Does not agree with the proposed policy. My reasons for objecting to the proposed development of site LAM6 are: The area is one of ONB with a high number of residential homes together with farming and equine businesses spread throughout. The site is not close to junction 14 of the M4 and the route to it is along a narrow minor road before joining the already busy Ermin Street. Both roads are dangerous to walk along and equally so for riding a horse or bicycle.</p>	<p>Comments noted.</p> <p>Membury Industrial Estate is accessible to the M4 and to the A338. The West Berkshire Freight Strategy (2009) recognises Membury Industrial Estate as a key industrial site, and has the B4000 as part of the District Freight Route. The Highways Authority consider that there is</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The only access to the site LAM6 would be by vehicle and the WBC Highways Authority has deemed this unsustainable. In addition it would add heavily to the already high carbon footprint.</p> <p>There is no evidence that the workforce on the developed site will be drawn from the locality.</p> <p>The Stantec report contains several errors, namely: They state that the Walker Logistics planning application has been granted. However it is still to be heard in Planning Committee.</p> <p>The report anticipates that workers will reach the site by public transport and states there are 8 bus stops within a 400 metre radius. This is incorrect as the nearest bus stop is over a mile away for a once a day service.</p> <p>In the light of the current pandemic and the forecasted economic downturn it would be prudent to rethink all current rural planning proposals. Sadly there will be a number of small businesses which will be affected especially in towns, such as Newbury and buildings will become empty and prime for development. It is also the urban areas who will have the highest number of people out of work.</p>	<p>capacity in the local transport network to accommodate development. The Highways Authority are concerned that the site is not in a sustainable location. In rural areas the NPPF recognises that land for employment may not be in accessible locations. Furthermore, it is more beneficial to locate development near/adjacent to existing development.</p> <p>Sustainable construction and renewable energy generation can help in achieving emissions reduction. Development will be expected to comply with Proposed Submission LPR Policy SP5 and Policy DM4 relating to climate change and sustainable building.</p> <p>Job creation is a benefit to promoting employment opportunities in this end of the District. Skilled workers, attracting varying degrees of pay, are required in jobs such as logistics (engineers, managers, HGV drivers).</p> <p>It is recognised that planning permission was not granted at the time of drafting the ELR, and there was no direction given as to whether planning permission would be granted or not.</p> <p>It is recognised there is a limited bus service serving the locality. The Transport Assessment and Travel Plan, which the policy will require of the development, will seek to ensure that development is appropriate to local roads and encourage sustainable travel modes (e.g. car sharing, busing in staff, cycling and provision of showers and suitable storage at place of work).</p> <p>Given the preparation of the ELR 2020 was undertaken prior to the COVID 19 pandemic, the Council has taken the opportunity to update this work using the most recent economic forecasts which take account of the major</p>

Respondent (with lpr ref)	Response	Council Response
		<p>macro-economic changes which have taken place, including COVID and Brexit. The update to the ELR will inform the LPR and will be published alongside the Regulation 19 consultation. The provision of industrial space has been consistently strong over recent years, and both trend-based projections and economic forecasts indicate growth in industrial space. The ELR 2022 therefore recommends a minimum industrial requirement of 90,730sqm or 23 ha of land to 2039 to meet identified needs.</p> <p>To assist in meeting demand in the rural west of the District it is considered appropriate to allocate the site, and with a limited development area, following further landscape advice.</p>

This reflects the development area outlined in the planning application (19/02079/OUTMAJ). It is considered such recommendations must be followed, and the policy will list criteria, as suggested in the LCA for the reserved matters application, or any other scheme, to be implemented.</p> <p>Sites in the eastern part of the District are proposed.</p>
Andy and Jenny Hill (lpr1174)	Does not agree with the proposed policy.	Comments noted.

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>The proposed development of this area has a significant impact on our home. With the main access to the M4 at J14 being along the B4000, directly past our house, our health and wellbeing and the value of the property itself will be further threatened. Our cottage is within 3 metres of Ermin St. Whilst the garden is protected by a tall brick and flint wall, the house itself has only a metre-high wall that shields it from the heavy traffic that already uses this B-road. HGV traffic starts early morning and continues throughout the day and well into the evening and through the weekend. As a consequence of the significant vibration that this produces, cracks are constantly appearing internally at the front of the house. Every day, we have to clear small debris from our front windowsills that is loosened from around the beams above.</li> <li>In addition, we are increasingly concerned about the air pollution that this constant traffic flow produces. Using a pollution monitoring device (the Plume Labs Flow device that measures NO2, particulate matter (PM2.5, PM10) and volatile organic compounds), we have recorded air quality index between 06:00 and 22:00 and have been somewhat shocked by weekday peak-hour readings that are frequently in the “high” to “very high” range based on WHO guidelines and throughout the day during the week routinely at the ‘moderate’ level. CO2 levels, generally, show West Berkshire as the worst performing area in the whole of the county. The proposed LAM6 development can only make things significantly worse.</li> <li>We live in a protected AONB – the proposed industrial land expansion at Membury flies in the face of the spirit of this legislation.</li> <li>The LAM6 area is in a remote part of the extreme West of Berkshire, a long way from the nearest A road, and yet most housing development is in Newbury and the Eastern area. This means even more vehicle-based journeys will have to be made by those working on the new site, putting yet more pressure on this fragile road in front of our house. This cannot be sustainable.</li> </ul>	<p>Sustainable construction and renewable energy generation can help in achieving emissions reduction. Development will be expected to comply with Proposed Submission LPR Policy SP5 and Policy DM4 relating to climate change and sustainable building.</p> <p>Further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessment (LCA) for a number of sites in the Local Plan Review.</p> <p>The LCA for this site identifies a loss of open land, loss of open views within the AONB, and loss of quiet rural character and rural character of Ramsbury Road as potential impacts of development. 		The LPR also identifies site allocations in the Eastern part of the District.
Susan Millington (lpr468)	Does not agree with the proposed policy. Add areas adjacent to J13, particular the Newbury Showground as a new designated employment area. This is identified as a key infrastructure junction (section 2) and policy should be to relocate the distribution centres in east Thatcham to this location which is more appropriate for HGV movement. This would allow the redevelopment of the Colthrop area into a mixed development (similar to the LRIE). It has the advantage of being within walking distance of Thatcham station giving excellent public transport links to Newbury and Reading/London. Removing HGVs from the local infrastructure will also help regenerate Thatcham as proposed in the plan.	The land at Newbury Showground is to be assessed through the Housing and Employment Land Availability Assessment (HELAA). If found suitable though, this would not replace existing employment areas (i.e. Colthrop), and planning policy would not be able to force the relocation of uses from one site to another. There is no proposal by Colthrop Industrial Estate to redevelop the area for a mixed use development, and therefore the availability and deliverability are unknown.  The LPR would not seek to remove/relocate employment uses at Colthrop, which is recognised as being in an important strategic location for B2, B8 and E(g) uses.  Furthermore, the A4 is part of the District's freight route and HGVs are directed to use this road.
Andy Joel (lpr1171)	<ul style="list-style-type: none"> <li>• Economic forecasts show industrial job growth coming from the East of West Berkshire and not in the extreme West where this site is located with minor poor road access to the M4</li> <li>• The proposed site is located in a protected AONB area, and is deemed unsustainable by both the County's own Highways and Environmental Planning experts</li> <li>• Over a third of all proposed industrial expansion is at LAM6 in the <u>Western area</u>. 		The LPR also identifies site allocations in the Eastern part of the District.
Tony and Rosemary King (lpr1239)	<p>Does not agree with the proposed policy.</p> <p><b>1) Objections to the WBCC Local Plan 2020 to 2036-Emerging Draft and support documents.</b></p> <p>I am writing to express my concerns on the approach and methodology of the current exercise to develop this plan and the errors and omissions in the detailed outcomes.</p> <p>Firstly, the Stantec Report, which underpins the employment forecasts, is flawed as it does not take account of the current COVID19 pandemic and its fundamental impact on the UK economy both in growth profile, the shift in business models for many of the major UK sectors and the change in employment patterns. Stantec themselves say that these need to be considered. Without this the plan has little value. For example, the change of model to staff working remotely will alter the office requirement significantly. This could change the balance of office and industrial requirements. If this leads to a reduction in office space, this could be replaced by allocating more sites for high quality industrial units alongside new office developments. This will reduce the overall requirement for industrial units in DEA's and hence the need to expand them.</p> <p>I also believe that the council has not been bold enough in the consideration of the best location of different types of industry. For example one clear winner in the post pandemic world will be Logistics and Distribution with exciting new opportunities but all that the plan does is allocate these to existing DEA's when it is clearly stated in the reports that these should be located close to Motorway/ Trunk road junctions. The council must research the available sites and allocate specific land for these new industries much as is planned on the M3 at Basingstoke. One of the consequences of this lack of vision is that the extension to Walkers Logistics is proposed to be at the LAM6 site, probably the least accessible site in the area. This is planning by default!</p> <p><b>2) Objections to the proposal that the LAM6 site should be extended to provide over 35% of the district's industrial site demand:</b></p> <p>A) There are numerous inaccuracies and misinterpretations in the Stantec</p>	<p>Comments noted.</p> <ol style="list-style-type: none"> <li>Given the preparation of the ELR 2020 was undertaken prior to the COVID 19 pandemic, the Council has taken the opportunity to update this work using the most recent economic forecasts which take account of the major macro-economic changes which have taken place, including COVID and Brexit. The update to the ELR will inform the LPR and will be published alongside the Regulation 19 consultation.</li> <li>A)b)c) There is little development in the pipeline in the Western half of the District (paragraph 6.17 of the ELR, 2020). Paragraph 6.65 (ELR 2020) recognises there is continued demand for industrial space, as illustrated by the Walker Logistics planning application. To support the rural economy part of this site (6.9ha) could be considered for allocation. The site has potential to provide the smaller units (circa 500 sq m) that the market assessment identifies are in particular short supply. The ELR (2020) notes at paragraph 4.86 that across Membury (not only around LAM6) there are a range of different sizes and styles of industrial units, and that some of the units are reasonably large when compared to other locations in the Authority area. Demand is weaker (paragraph 4.98) than other areas in the District, but this is due to the small size of the industrial area. There are cases of existing occupiers seeking to expand (e.g. Walker Logistics). Industrial demand is mainly from local/regional occupiers.</li> </ol>

Respondent (with lpr ref)	Response	Council Response
	<p>report which lead towards a decision in favour of LAM6 to provide 35% of all of West Berkshires industrial land for expansion when in fact it is the location which is the least accessible and sustainable in West Berks(WB).</p> <p>B) Most of the demand is in the East of WB but many of the available sites identified there have been rejected in favour of LAM6, in the extreme West of the district.</p> <p>C) The employment forecast shows that demand for jobs and businesses is in sectors for which LAM6 is not a suitable site for development.</p> <p>D) Many of the current workers in LAM6 are from outside the area and from Wiltshire and Hampshire bringing no economic benefit to West Berkshire but bringing more Carbon Emissions which is the last thing we need.</p> <p>E) The current Freight Route Plan for WB shows that LAM6 is also remote from the areas of major economic activity, except for horse racing and farming, is remote from Motorways and A Class Roads with poor site access using unclassified country roads.</p> <p>F) There are a number of national policies that are stated in the Stantec Report but LAM6 fails to satisfy the needs of most of them.</p> <p>G) LAM6 is in an area of Outstanding Natural Beauty with many constraints to development and it is likely that any future planning applications will fail on this point.</p> <p>WB own experts have reinforced this.</p> <p>H) LAM6 location is unsustainable and there is no way to mitigate this. How can WB even consider this site for expansion when it breaks all their own strategic environmental and sustainability objectives and even their own officers disagree with plans to increase activity there.</p> <p>In summary, the original decision to develop the Membury Airfield site as a PEA was misguided, as it has always been inaccessible and the creeping expansion over many years has resulted in a 'planning mess', impossible sustainability issues and threats to the AONB, which in the emerging situation has placed severe constraints on its future.</p>	<p>d) Enabling a greater choice of employment opportunities in the western side of the District also means the local job market could consider employment in these uses.</p> <p>e) Membury Industrial Estate is accessible to the M4 and to the A338. The West Berkshire Freight Strategy (2009) recognises Membury Industrial Estate as a key industrial site, and has the B4000 as part of the District Freight Route. The Highways Authority consider that there is capacity in the local transport network to accommodate development. The Highways Authority are concerned that the site is not in a sustainable location. In rural areas the NPPF recognises that land for employment may not be in accessible locations.</p> <p>f) Often, there is a balancing act to be taken in choosing sites to allocate, and whether to grant planning permission. Taking into account the existing protected employment area, landscape value, access and highway capacity, and sustainability, mean that the site is considered to be in compliance with the NPPF to boost the economy.</p> <p>g) The Council is duty bound to take account of the effect of development on designated landscapes, such as the Area of Outstanding Natural Beauty. Further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessment (LCA) for a number of sites in the Local Plan Review.</p>

Respondent <i>(with lpr ref)</i>	Response	Council Response
		<p>The LCA for this site identifies a loss of open land, loss of open views within the AONB, and loss of quiet rural character and rural character of Ramsbury Road as potential impacts of development. The proposed site connects four of these together, which would result in one large area and the potential loss of these mitigating landscape features.</p> <p>Opportunities to propose substantial areas of tree and woodland planting as part of mitigation measures would not be out of character. Woodland would help, in time, to integrate and screen any proposed development as well as enhancing the area.</p> <p>The LCA recommends that development is limited to a focused area, to the eastern part of the submitted site. This reflects the development area outlined in the planning application (19/02079/OUTMAJ). It is considered such recommendations must be followed, and the policy will list criteria, as suggested in the LCA for the reserved matters application, or any other scheme, to be implemented.</p> <p>h) It is recognised there is a limited bus service serving the locality, and limited options for active travel. The NPPF, at paragraph 85, outlines that</p>

Respondent (with lpr ref)	Response	Council Response
		<p>planning policies should recognise that employment sites in rural areas may have to be found beyond existing settlements, and in locations that are not well served by public transport. The Transport Assessment and Travel Plan, which the policy will require of the development, will seek to ensure that development is appropriate to local roads and encourage sustainable travel modes (e.g. car sharing, busing in staff, cycling and provision of showers and suitable storage at place of work). The Council considers that rural areas, especially where there are existing protected employment areas with capacity for some expansion, should be further considered for economic related development. This is part of assessing the sustainability of a scheme, not only locational factors.</p>
Lisa Cox (lpr1251)	<p>Does not agree with the proposed policy. <b>EMP6</b> Firstly I feel referring to the this land as North of Arlington Business Park is deliberately misleading to residents. It should be noted this land is adjacent to the A4, at the end of the historic high street and is very much within a residential area of the village. There is a residential home directly opposite and a housing estate adjacent. To build an office/offices would not be in keeping with the immediate surrounding area. It is likely to cause traffic issues.</p> <p>The land attracts local wildlife, such as deer and to lose it to any sort of build leaves little green space the wildlife could relocate to. Should also be noted there is a large electricity pylon in the middle of this land and therefore any build there should be questionable</p> <p><b>EMP 6 - No change, leave as it</b></p>	<p>Comments noted.</p> <p>The site can be renamed, as a stand-alone site. It was envisaged that the site would complement Arlington Business Park, which is why the site is titled the way it is.</p> <p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessment (LCA) for a number of sites in the LPR. The LCA for this site outlines that the site contributes to an important part of the remaining open countryside and the subsequent separation of Theale from Calcot. The site is visible from within Theale (and the Conservation Area), where the open character of the site contributes to Theale's historic character and setting. The site is part of the open countryside which continues further to the north and across</p>

Respondent (with lpr ref)	Response	Council Response
		<p>the M4 into the North Wessex Downs AONB. The site is separated from the Protected Employment Area (PEA) by the A4 Bath Road and due to the lack of intervisibility with the site and the PEA the landscape character of the site retains a more rural character, contributing to the setting and separate identity of the historic village of Theale.</p> <p>It notes that the introduction of offices and/or other large-scale buildings would be out of scale and keeping with the historic village character of Theale, and development across the whole site would create the perception of coalescence with Calcot and loss of separate identity of Theale from Calcot. Development would also be visible from areas with the North Wessex Downs AONB.</p> <p>The LCA recommends that the site is not developed for employment uses. Therefore, as part of the LPR going forward it is no longer proposed to allocate the site.</p>
Ami Painter (lpr1262)	<p>Does not agree with the proposed policy. I would like to submit my objections to the Local Plan Review 2020 -2037 Emerging Draft December 2020 in relation to the sites Whitehart Meadow (RSA16), the Old Sewage Works (RSA17) and the <b>open land situated near Junction 12 EMP6.</b></p> <p>I object to the draft for the following reasons (across all sites):</p> <ul style="list-style-type: none"> <li>• Flood risk</li> <li>• High voltage overhead power lines cross the site</li> <li>• Noise and pollution from the motorway</li> <li>• Possible land contamination</li> <li>• Need to preserve the gap between Theale and Calcot/Tilehurst</li> <li>• Impact on the Area of Outstanding Natural Beauty</li> <li>• Risk from fluvial, surface water and ground water flooding</li> </ul>	<p>Comments noted.</p> <p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessment (LCA) for a number of sites in the LPR. The LCA for this site outlines that the site contributes to an important part of the remaining open countryside and the subsequent separation of Theale from Calcot. The site is visible from within Theale (and the Conservation Area), where the open character of the site contributes to Theale's historic character and setting. The site is part of the open countryside which continues further to the north and across the M4 into the North Wessex Downs AONB. Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• Separated from the Arlington Business Park by the busy A4 Theale bypass</li> <li>• Impact on the Theale High Street Conservation Area</li> <li>• Impact on surrounding housing</li> <li>• Unsuitable access via single-track Blossom Lane and Crown Lane</li> </ul> <p>Any construction, large scale or otherwise, will have a detrimental impact on the existing residents of Theale, the available facilities/amenities and the local highways.</p> <p>As a current resident of Woodfield Way, Theale already struggles with the number of residents compared to the facilities available. Theale Medical Centre consistently struggles to manage all of its patients across both Theale and Calcot, and the addition of 170 new houses, with potentially double or more residents, would cause an already strained service to buckle.</p> <p>Aside from the medical centre, a new primary school has already taken up green land in Theale to accommodate larger pupil numbers, taking away a sports field where local footballs team used to play.</p> <p>The local highways would also not be able to cope with an influx on residents at this end of Theale. When there are any issues with the A4/M4, the High Street instantly becomes a rat-run for those stuck on the bypass, which causes the High Street to become a car park, and as such means it blocks the single access point for residents in and off of Woodfield Way. This area of Theale is already over populated, with too many vehicles parking along Woodfield Way meaning emergency vehicles would struggle to get through. Adding 100+ properties in this area would create an ever increasingly dangerous situation if there were to be an emergency. As there is only one point of access for this estate, adding additional homes and generating additional traffic would have a detrimental impact to all residents. This would also cause an increase in pollution which would have a harmful impact on both residents and the local environment.</p>	<p>retains a more rural character, contributing to the setting and separate identity of the historic village of Theale.</p> <p>It notes that the introduction of offices and/or other large-scale buildings would be out of scale and keeping with the historic village character of Theale, and development across the whole site would create the perception of coalescence with Calcot and loss of separate identity of Theale from Calcot. Development would also be visible from areas with the North Wessex Downs AONB.</p> <p>The LCA concludes that if the site were developed, either in whole or in part, it would compromise the setting of Theale and its separate identity and character from Calcot. It therefore recommends that the site is not developed for employment uses. Therefore, as part of the LPR going forward it is no longer proposed to allocate the site.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The land that is proposed for development, especially sites RSA16 and <b>EMP6</b>, has a wealth of nature and the impact of building on these sites would displace those animals who inhabit the areas. There is most notably a large deer population that are often present in both sites throughout the year. The areas are also liable for flooding and with the pylons and close vicinity to the motorway would be impactful to the health of those who would potentially reside there.</p> <p>The area of Theale on the opposite side of the A4 to Arlington should be kept to the existing residential areas and not be expanded for the above reasons. In addition to this, there are already office and commercial sites in both Arlington and the Station Road areas where buildings are sat empty with no companies taking up the leases. With the increase in home working and out of town warehouse sites, it would not be appropriate to impact the local environment and put stresses on the local highways by adding unnecessary commercial properties, where there are already redeveloped sites across Theale that are not in use and have been sat empty for some time.</p> <p>The proposal is beyond reasonable for the size of Theale, does not take into consideration the overpopulation of the village that already exists, along with the strained resources that are difficult for its current residents to use.</p> <p>The green spaces of Theale should be left as such before the village becomes an overdeveloped struggling area of West Berks that merges into Reading Borough Council, with facilities and resources that are not fit for purpose and drives existing residents away for the sake of building on land for financial gain and not considering the people, environmental and highway impacts it would have.</p> <p>The area of Theale on the opposite side of the A4 to Arlington should be kept to the existing residential areas and not be expanded for the above reasons. Steve Bridle (lpr1268)	<p>Does not agree with the proposed policy.</p> <p>As a local resident living on the corner of Membury Crossroads. I would like to robustly object to the proposed expansion of LAM6 site at Membury for expansion under the LPR2037 plans. The primary reason is the unacceptable increase in traffic for an area that doesn't have good roads or pavements. Frankly, to encourage more HGV traffic on the substandard roads of Membury by the development of further industrial development would be reckless and will end with fatal crashes.</p> <p>Many of the local businesses struggle to recruit to due to the remote location and lack of public transport.</p> <p>I would also challenge the impartiality or depth of research by the Consultants, Stantec who provide no convincing arguments to support the LAM6 site and give <u>incorrect</u> facts and assertions within their site comparison tables, Appendix A. <u>Many inaccuracies</u> include:</p> <ul style="list-style-type: none"> <li>• Planning permission <u>has not been granted</u> to Walker Logistics to develop the LAM6 site. Its application is still to be heard by Committee a year since submission.</li> <li>• Stantec <u>ignore recent industrial sites</u> at Hadley Pig Farm and Lowesdon (min. 10 new units)</li> </ul>	<p>Comments noted.</p> <p>The ELR (2020) notes at paragraph 4.86 that across Membury (not only around LAM6) there are a range of different sizes and styles of industrial units, and that some of the units are reasonably large when compared to other locations in the Authority area. Demand is weaker (paragraph 4.98) than other areas in the District, but this is due to the small size of the industrial area. There are cases of existing occupiers seeking to expand (e.g. Walker Logistics). Industrial demand is mainly from local/regional occupiers.</p> <p>It is considered logical and appropriate to extend existing Protected Employment Areas to focus development into particular areas. This is particularly relevant in the AONB to prevent the urbanisation of land.</p> <p>It is not considered that there is an imbalance between the proposed expansion of employment floorspace and the proposed major housing developments. The majority of existing DEAs are located in Newbury and to the east of the District. The ELR notes that the site could support the</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• “LAM6 has 8 bus stops within 400 metres”. There is <u>one</u> bus stop, once a day service, dangerous to walk to given the access roads are narrow, unlit and dominated by HGV’s.</li> <li>• They conclude Ramsbury Rd “has reasonable access” with little HGV constraint. HGV’s already use short cuts to Membury on tiny lanes via Chilton Foliat</li> <li>• LAM6 is defined as previously developed land. This is untrue. It is a field.</li> </ul> <p>WBC Policy guidance gives presumption in favor of Sustainability, yet LAM6 has no alternative access unless by motor vehicles. This is simply unsustainable as stated by WBC Highways.</p> <p>The Council’s own Environment expert, Liz Allen, in her July 2020 paper states:</p> <ul style="list-style-type: none"> <li>• “Increased traffic will have a further adverse impact on the rural quality of Ramsbury Road and tranquility levels within the wider area”</li> <li>• Development “proposals do not comply with Policy ADPP5 and CS19” WBC’s Core Strategy.</li> <li>• The proposed development would “merge two PEAs...intensifies the impact of commercial development within AONB, including increased traffic on the rural road network, contrary to conserving and enhancing adjacent areas of the AONB”</li> </ul> <p>Most housing is being built in the Newbury / Thatcham area and towards the east of the county – which makes the choice of LAM6 a strange one considering public transport to this remote part of the county is virtually non-existent so new local jobs where needed will not be provided by further development of LAM6.</p> <p>In conclusion this site is within a AONB, 7km from the motorway junction with substandard roads and a lack of public transport. Swindon has an abundance of workers and industrial facilities with excellent road access</p>	<p>rural economy, and is better placed than other promoted sites in the AONB. The proposed expansion in Membury, where the planning application illustrates that there is demand for such use, with jobs created which local residents can make use of.</p> <p>Sustainable construction and renewable energy generation can help in achieving emissions reduction. Development will be expected to comply with Proposed Submission LPR Policy SP5 and Policy DM4 relating to climate change and sustainable building.</p> <p>Membury Industrial Estate is accessible to the M4 and to the A338. The West Berkshire Freight Strategy (2009) recognises Membury Industrial Estate as a key industrial site, and has the B4000 as part of the District Freight Route. The Highways Authority consider that there is capacity in the local transport network to accommodate development. The Highways Authority are concerned that the site is not in a sustainable location. In rural areas the NPPF recognises that land for employment may not be in accessible locations.</p> <p>Job creation is a benefit to promoting employment opportunities in this end of the District. Skilled workers, attracting varying degrees of pay, are required in jobs such as logistics (engineers, managers, HGV drivers).</p> <p>It is recognised that planning permission was not granted at the time of drafting the ELR, and there was no direction given as to whether planning permission would be granted or not. The site is not previously developed land.</p> <p>The ELR takes account of all commitments when assessing the supply of employment uses. Should sites</p>

Respondent (with lpr ref)	Response	Council Response
	<p>which further highlights the unsustainability of LAM6 and indeed the need for it</p> <p>Lastly, please bear a thought for local residents living on the Ermin Street, Ramsbury road and Chilton Foliat whose lives will be increasingly blighted by evermore HGV's travelling to the un-sustainable LAM6 if this policy is adopted.</p> <p>Rethink the LPR plans regarding industrial land extension and find more relevant locations in the eastern part of West Berkshire where the demand for facilities lie.</p>	<p>have not been promoted to the Council and therefore not assessed in the HELAA the ELR would not make specific reference to them.</p> <p>It is recognised there is a limited bus service serving the locality. The NPPF, at paragraph 85, outlines that planning policies should recognise that employment sites in rural areas may have to be found beyond existing settlements, and in locations that are not well served by public transport. The Transport Assessment and Travel Plan, which the site specific policy will require of the development, will seek to ensure that development is appropriate to local roads and encourage sustainable travel modes (e.g. car sharing, busing in staff, cycling and provision of showers and suitable storage at place of work).</p> <p>The Council is duty bound to take account of the effect of development on designated landscapes, such as the Area of Outstanding Natural Beauty. Further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessment (LCA) for a number of sites in the Local Plan Review.</p> <p>The LCA for this site identifies a loss of open land, loss of open views within the AONB, and loss of quiet rural character and rural character of Ramsbury Road as potential impacts of development. In terms of the impact on the existing PEA the fragmented character allows the undeveloped areas in-between to retain characteristic landscape features of the AONB, therefore mitigating and reducing the overall effect of the PEA on the AONB. The proposed site connects four of these together, which would result in one large area and the potential loss of these mitigating landscape features.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>Opportunities to propose substantial areas of tree and woodland planting as part of mitigation measures would not be out of character. Woodland would help, in time, to integrate and screen any proposed development as well as enhancing the area.</p> <p>The LCA recommends that development is limited to a focused area, to the eastern part of the submitted site. This reflects the development area outlined in the planning application (19/02079/OUTMAJ). It is considered such recommendations must be followed, and the policy will list criteria, as suggested in the LCA for the reserved matters application, or any other scheme, to be implemented.</p> <p>The LPR also identifies site allocations in the Eastern part of the District.</p>
Beth Pert (lpr1289)	<p>Does not agree with the proposed policy. I would like to submit my objections to the Local Plan Review 2020 -2037 Emerging Draft December 2020 in relation to the sites Whitehart Meadow (RSA16), the Old Sewage Works (RSA17) and the open land situated near Junction 12 EMP6. The plan includes the following:</p> <p>100 homes on Whitehart Meadow (the area of land between the Woodfield Way estate and the M4)</p> <p>70 homes on the site of the old Theale sewage works (the far end of Blossom Lane).</p> <p>20,000 square metres of new office space on the field next to M4 Junction 12.</p> <p>I object to the draft for the following reasons (across all sites):</p>	<p>Comments noted (in relation to EMP6 – Land north of Arlington Business Park). Comments for RSA16 and RSA17 considered under the Council responses to those policies).</p> <p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessment (LCA) for a number of sites in the LPR. The LCA for this site outlines that the site contributes to an important part of the remaining open countryside and the subsequent separation of Theale from Calcot. The site is visible from within Theale (and the Conservation Area), where the open character of the site contributes to Theale’s historic character and setting. The site is part of the open countryside which continues further to the north and across the M4 into the North Wessex Downs AONB. The site is separated from the Protected Employment Area (PEA) by</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• Flood risk</li> <li>• High voltage overhead power lines cross the site</li> <li>• Noise and pollution from the motorway</li> <li>• Possible land contamination</li> <li>• Need to preserve the gap between Theale and Calcot/Tilehurst</li> <li>• Impact on the Area of Outstanding Natural Beauty</li> <li>• Risk from fluvial, surface water and ground water flooding</li> <li>• Separated from the Arlington Business Park by the busy A4 Theale bypass</li> <li>• Impact on the Theale High Street Conservation Area</li> <li>• Impact on surrounding housing</li> <li>• Unsuitable access via single-track Blossom Lane and Crown Lane</li> <li>• The requirement for office space was based on a council commissioned study that was carried out before the covid 19 outbreak.</li> </ul> <p>As a resident of Theale, my objections are based on my experience of living in the village on and off for nearly 20 years. The basic infrastructure of the village cannot cope with a further 170 homes. The GP surgery is already stretched to breaking point and not able to provide a high standard of patient care for local residents. An extra 170 homes would see upwards of 350 patients. This would overwhelm the surgery completely. This is even more of an issue given that the residents of the homes currently under construction on Beansheaf side of the M4 will</p>	<p>the A4 Bath Road and due to the lack of intervisibility with the site and the PEA the landscape character of the site retains a more rural character, contributing to the setting and separate identity of the historic village of Theale.</p> <p>It notes that the introduction of offices and/or other large-scale buildings would be out of scale and keeping with the historic village character of Theale, and development across the whole site would create the perception of coalescence with Calcot and loss of separate identity of Theale from Calcot. Development would also be visible from areas with the North Wessex Downs AONB.</p> <p>The LCA concludes that if the site were developed, either in whole or in part, it would compromise the setting of Theale and its separate identity and character from Calcot. It therefore recommends that the site is not developed for employment uses. Therefore, as part of the LPR going forward it is no longer proposed to allocate the site.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>also be registering at Theale Medical centre when the properties are completed.</p> <p>The local primary school, which was built on land used for sports and recreation, is also near to capacity. Building more homes and bringing more families in to Theale will mean the school is no longer fit for purpose and will require further extension, taking up yet more valuable green land.</p> <p>Having lived in a flat with no useable outside space during the covid pandemic, it has become even more evident how important local green space is. Building on Whithart Meadow will take away precious green space that is local to residents. The impact on our local wildlife would be irreversible too.</p> <p>The access to both sites is problematic. Woodfield Way is already very busy and with parked cars on both sides of the road, the road is already noisy and at times can be dangerous. As new homes are regularly built without sufficient parking, more cars would be using local access roads as a car park, thus increasing the noise, traffic and antisocial problems associated with on street parking. Blossom Lane has similar issues with the added problem of being very narrow. Construction traffic would cause a great deal of disruption to local residents too.</p> <p>With regards to office space, I cannot see any need for further offices to be built at this time. Having walked around Arlington business park, it's clear that the majority of offices are empty. As most businesses have adapted to working from home over the last year, the demand for further office space has decreased even further. Furthermore, the majority of office space, industrial units and depots are on the east side of the village, keeping the residential areas free of yet more traffic, noise and pollution.</p> <p>Building on sites which have a risk of flooding seems incredibly short sighted, especially at a time where a change in our climate indicates an increased amount of annual rainfall. By building on these sites, there may be an increased risk to existing homes as well as any new homes.</p> <p>While I understand the need to more homes to ease the housing crisis, I feel better options are available. Commissioning further studies in to the regeneration of empty, dilapidated and part derelict office blocks and</p>	

Respondent (with lpr ref)	Response	Council Response
	warehouses in to energy efficient homes would be more beneficial to the local community and saving our precious green space.	
Fiona Newport (lpr1334)	<p>Does not agree with the proposed policy.</p> <p><b><u>Arguments against LAM6 site at Membury under LPR 2037 plans</u></b></p> <p>The proposed site is located in a protected AONB area, and is deemed unsustainable by both the County's own Highways and Environmental Planning experts.</p> <p>Economic forecasts show industrial job growth coming from the East of West Berkshire and not in the extreme West, where this site is located, with minor poor road access to the M4.</p> <p>Industrial demand in West Berkshire is shown to be in the <u>East</u> of the region, but only 3 sites here meet 65% of land needs. That shortfall is illogically made up by siting it at LAM6 in the <u>West</u>.</p> <p>Over a third of all proposed industrial expansion is at LAM6 in the <u>Western area</u>. Yet all major housing developments are in <u>Newbury and Eastern area</u>. This leads to an imbalance between new homes and new jobs, requiring more vehicle based journeys which all leads to unsustainability.</p> <p>Carbon Dioxide levels show West Berkshire as the worst performing region in the whole of Berkshire, and well above South East England by 38%. LAM6 will generate significantly longer travel journeys than other sites, just increasing more carbon emissions unnecessarily in West Berkshire.</p> <p>Membury is described as "various industrial areas located around the M4". In fact LAM6 is not "close" and has no easy access to Jct 14 of M4. The 14 km round trip for HGV's impacts many rural communities living along these minor roads.</p> <p>WBC's Freight Route Plan while dated (2009) still shows <u>LAM6 as the industrial site furthest from an A road</u>. As LAM6 is the most remote in West Berkshire, it is also the area least suitable for HGV's.</p> <p>1997-2017 data shows the local economy grew 34%, primarily in jobs unlikely to be attracted to LAM6. In the 2036 forecast it follows that these jobs, increasingly in demand, will still not be provided by the LAM6 site.</p>	<p>Comments noted.</p> <ol style="list-style-type: none"> <li>1. The ELR (2020) notes at paragraph 4.86 that across Membury (not only around LAM6) there are a range of different sizes and styles of industrial units, and that some of the units are reasonably large when compared to other locations in the Authority area. Demand is weaker (paragraph 4.98) than other areas in the District, but this is due to the small size of the industrial area. There are cases of existing occupiers seeking to expand (e.g. Walker Logistics). Industrial demand is mainly from local/regional occupiers.</li> <li>2. Respondent (with lpr ref)	Response	Council Response
	Rethink the LPR plans regarding industrial land extension and find more relevant locations in the eastern part of West Berkshire, where the demand for facilities lie.	<p>It is recognised there is a limited bus service serving the locality. The NPPF, at paragraph 85, outlines that planning policies should recognise that employment sites in rural areas may have to be found beyond existing settlements, and in locations that are not well served by public transport. The Transport Assessment and Travel Plan, which the policy will require of the development, will seek to ensure that development is appropriate to local roads and encourage sustainable travel modes (e.g. car sharing, busing in staff, cycling and provision of showers and suitable storage at place of work).</p> <p>8. The Council is duty bound to take account of the effect of development on designated landscapes, such as the Area of Outstanding Natural Beauty. Further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessment (LCA) for a number of sites in the Local Plan Review.</p> <p>The LCA for this site identifies a loss of open land, loss of open views within the AONB, and loss of quiet rural character and rural character of Ramsbury Road as potential impacts of development. In terms of the impact on the existing PEA the fragmented character allows the undeveloped areas in-between to retain characteristic landscape features of the AONB, therefore mitigating and reducing the overall effect of the PEA on the AONB. The proposed site connects four of these together, which would result in one large area and the potential loss of these mitigating landscape features.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>Opportunities to propose substantial areas of tree and woodland planting as part of mitigation measures would not be out of character. Woodland would help, in time, to integrate and screen any proposed development as well as enhancing the area.</p> <p>The LCA recommends that development is limited to a focused area, to the eastern part of the submitted site. This reflects the development area outlined in the planning application (19/02079/OUTMAJ). It is considered such recommendations must be followed, and the policy will list criteria, as suggested in the LCA for the reserved matters application, or any other scheme, to be implemented.</p> <p>The LPR also identifies site allocations in the Eastern part of the District.</p>
Graham Storey (lpr584)	<p>Does not agree with the proposed policy. There is an opportunity to develop to the east of Thatcham Railways station for a mixed residential and employment whilst relocation the distribution hubs closer to the motorway junction.</p> <p>Add areas adjacent to J13 , particular the Newbury Showground as a new designated employment area. This is identified as a key infrastructure junction (section 2) and policy should be to relocate the distribution centres in east Thatcham to this location which is more appropriate for HGV movement. This would allow the redevelopment of the Colthrop area into a mixed development (similar to the LRIE). It has the advantage of being within walking distance of Thatcham station giving excellent public transport links to Newbury and Reading/London. Removing HGVs from the local infrastructure will also help regenerate Thatcham as proposed in the plan.</p>	<p>Comments noted.</p> <p>The land at Newbury Showground is to be assessed through the Housing and Employment Land Availability Assessment (HELAA). If found suitable this would not replace existing employment areas (i.e. Colthrop), and planning policy would not be able to force the relocation of uses from one site to another. There is no proposal by Colthrop Industrial Estate to redevelop the area for a mixed use development, and therefore the availability and deliverability is unknown.</p> <p>The LPR would not seek to remove/relocate employment uses at Colthrop, which is recognised as being in an important strategic location for B2, B8 and E(g) uses.</p>

Respondent (with lpr ref)	Response	Council Response
		Furthermore, the A4 is part of the District's freight route and HGVs are directed to use this road.
Diane James (lpr623)	<p>Does not agree with the proposed policy. EMP6 North of Arlington Business Park In past Theale Village plans, the area between the M4 and the village was to be kept clear and open to make a separation line between the village of Theale and the outskirts of Reading. The A4 approach road to Theale from the M4 gives a view of the village and the far countryside. The proposed area of construction will mar the whole aspect. When Arlington Park was built, Theale residents were told commercial building would be kept south of the A4 Bypass to preserve village life. This planning application will completely destroy the view and feel of our much loved village.</p> <p>EMP6 Land north of Arlington Business Park. Keep the area clear as open land.</p>	<p>Comments noted.</p> <p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessment (LCA) for a number of sites in the LPR. The LCA for this site outlines that the site contributes to an important part of the remaining open countryside and the subsequent separation of Theale from Calcot. The site is visible from within Theale (and the Conservation Area), where the open character of the site contributes to Theale's historic character and setting. The site is part of the open countryside which continues further to the north and across the M4 into the North Wessex Downs AONB. The site is separated from the Protected Employment Area (PEA) by the A4 Bath Road and due to the lack of intervisibility with the site and the PEA the landscape character of the site retains a more rural character, contributing to the setting and separate identity of the historic village of Theale.</p> <p>It notes that the introduction of offices and/or other large-scale buildings would be out of scale and keeping with the historic village character of Theale, and development across the whole site would create the perception of coalescence with Calcot and loss of separate identity of Theale from Calcot. Development would also be visible from areas with the North Wessex Downs AONB.</p> <p>The LCA concludes that if the site were developed, either in whole or in part, it would compromise the setting of Theale and its separate identity and character from Calcot. It therefore recommends that the site is not developed for</p>

Respondent (with lpr ref)	Response	Council Response
		employment uses. Therefore, as part of the LPR going forward it is no longer proposed to allocate the site.
Ian Halliday (lpr628)	<p>Does not agree with the proposed policy.</p> <p><b>SP21 Sites for Economic development.</b> There are better alternatives and additional opportunities for economic development sites that are in keeping with the Council policies, whereas some of the proposed sites are in conflict with Council Policies as outlined in other comments.</p> <p>Add areas adjacent to J13, in particular, the Newbury Showground as a new designated employment area. This is identified as a key infrastructure junction (section 2) and policy should be to relocate the distribution centres in east Thatcham to this location which is more appropriate for HGV movement.</p> <p>Include the redevelopment of the Colthrop area into a mixed development (similar to the LRIE). 		<p>Woodland would help, in time, to integrate and screen any proposed development as well as enhancing the area.</p> <p>The LCA recommends that development is limited to a focused area, to the eastern part of the submitted site. This reflects the development area outlined in the planning application (19/02079/OUTMAJ). It is considered such recommendations must be followed, and the policy will list criteria, as suggested in the LCA for the reserved matters application, or any other scheme, to be implemented.</p> <p>The LPR also identifies site allocations in the Eastern part of the District.</p>
<p>Gary Clarke (lpr704)</p>	<p>Does not agree with the proposed policy. Expanding as suggested in EMP1 will add to the current traffic issues around Thatcham and on the A4 from the Theale junction. The additional distribution jobs created are not great and often seasonal and the wages generally not high enough to pay for a house in the area resulting in many more commuter miles.</p> <p>Re plan to make better use of existing space on Colthrop industrial estate and limit any new development if required to manufacturing rather than warehouse/distribution sites.</p>	<p>Comments noted.</p> <p>The A4 is part of the District's freight route and HGVs are directed to use this road.</p> <p>The LPR will continue to permit development in existing protected/designated employment areas, subject to the satisfaction of criteria.</p> <p>The ELR (2020) notes that Thatcham's main industrial area is Colthrop Estate, comprising a mix of larger distribution units and smaller workshops, and is described in the ELR as 'the District's premier logistics and distribution park'. There is some vacancy in the office stock, and a very high occupancy in the industrial and warehousing stock. The allocated site to the east of the Colthrop Estate is a logical extension and would aid in meeting the identified need in the Urban Area of Thatcham.</p>

Respondent (with lpr ref)	Response	Council Response
		There is no evidence to suggest that employment in distribution is seasonal and low paid.
Susan Cocker (lpr735)	<p>Does not agree with the proposed policy. Reasons for objection I am objecting to the expansion of the Membury DEA to include EMP5 (LAM6 in HELAA) for the following reasons:</p> <ol style="list-style-type: none"> <li>1. Development of this site would have a hugely detrimental impact on the North Wessex Downs Area of Outstanding Natural Beauty. The Employment Land Review recognises that being in the AONB is a “critical constraint” on this site. The visual impact, especially if B8 use is encouraged, will change the character of the area, described in the Landscape Character Appraisal as a “mosaic” of fields and woodland. The existing DEA areas are screened by mature trees, adding to the “patchwork” effect. Light and noise pollution would increase, as would traffic volumes.</li> <li>2. The need for an extension of the DEA on this site for B2 and B8 uses is not proven. It is convenient for West Berkshire Council, as the land has been promoted and there is a planning application for B8 use before the planning authority, but the arguments in the ELR for incorporating it are less than convincing – it “could be suitable for industrial use”, but the demand for this type of use in the west of the area is “weak”. The “evidence of local demand” appears to consist of the promoter of the site wishing expand his logistics business.</li> <li>3. The site is not sustainable. It is only accessible safely by motorised vehicles. There is no pavement, the access road is an unlit country lane, which at various points is too narrow for HGVs to pass, and the nearest bus stop is over a kilometre from the site. (NB There are not 8 bus stops within a 400m radius, as stated in the ELR) The bus service runs once a day, to Newbury.</li> <li>4. Impact on the climate. By encouraging B8 use on the DEA, this proposal will automatically increase the number of HGVs. The distance to the motorway junction is 7km, along inadequate and increasingly busy access roads. Mention that the site is 750m from the Membury Service Station is irrelevant – vehicles are not supposed to access the motorway system via this service road. To develop this site will increase its carbon footprint to</li> </ol>	<p>Comments noted.</p> <ol style="list-style-type: none"> <li>1. Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessment (LCA) for a number of sites in the LPR. Membury Protected Employment Area (renamed Designated Employment Areas (DEA) through the LPR) is made up of a central area and a number of fragmented smaller outlying areas. The site loosely connects these areas. The eastern part of the site has an established visual and landscape connection with the open arable landscape area further to the east of Ramsbury Road. The western part of the site (runway area) connects to the adjacent area of open grassland which leads across to the Iron Age hillfort and the wider countryside</li> </ol> <p>The LCA for this site identifies a loss of open land, loss of open views within the AONB, and loss of quiet rural character and rural character of Ramsbury Road as potential impacts of development. In terms of the impact on the existing PEA the fragmented character allows the undeveloped areas in-between to retain characteristic landscape features of the AONB, therefore mitigating and reducing the overall effect of the PEA on the AONB. Respondent (with lpr ref)	Response	Council Response
	<p>unacceptable levels, at a time when WBC is aiming to achieve carbon neutrality.</p> <p>Rather than expand the Membury DEA further, look at alternatives. There are other sites elsewhere in the WBC area, closer to the M4/A34 junction, which would have a smaller carbon footprint.</p> <p>More directly, the ELR suggests that there is “land used for testing by TRL and also areas of open storage. This area would make a logical extension of the main Membury site”. A more efficient use of the land already in use for industrial purposes would provide more employment opportunities without building large distribution facilities, the employment value of which is uncertain – they could employ many people, but could also employ a mere handful.</p> <p>What local need there exists is for smaller, rather than large units. Lowesden Works (already in the DEA) is being redeveloped and permission has been granted for similar units at Hadley Farm.</p>	<p>integrate and screen any proposed development as well as enhancing the area.</p> <p>The LCA recommends that development is limited to a focused area, to the eastern part of the submitted site. This reflects the development area outlined in the planning application (19/02079/OUTMAJ). It is considered such recommendations must be followed, and the policy will list criteria, as suggested in the LCA for the reserved matters application, or any other scheme, to be implemented.</p> <p>2. At paragraph 4.164 of the Employment Land Review (ELR, 2020) it is recommended that to support the creation of local job opportunities in the more western rural areas, PEA boundaries could possibly be extended at Membury. The site would aid in meeting rural market demand, which has been demonstrated through the submission of a planning application for the expansion of Walker Logistics.</p> <p>3. The NPPF, at paragraph 85, outlines that planning policies should recognise that employment sites in rural areas may have to be found beyond existing settlements, and in locations that are not well served by public transport. The Transport Assessment and Travel Plan, which the site specific policy will require of the development, will seek to ensure that development is appropriate to local roads and encourage sustainable travel modes (e.g. car sharing, busing in staff, cycling and provision of showers and suitable storage at place of work).</p> <p>3. It is considered logical and appropriate to extend existing Protected Employment Areas (renamed Designated Employment Areas (DEA) through the LPR) to focus development into particular areas.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>This is particularly relevant in the AONB to prevent the urbanisation of land.</p> <p>Sustainable construction and renewable energy generation can help in achieving emissions reduction. Development will be expected to comply with Proposed Submission LPR Policy SP5 and Policy DM4 relating to climate change and sustainable building.</p> <p>The LPR seeks to facilitate the growth and demand across the District, through site allocations where possible. Sites which already benefit from planning permission have been counted in the existing supply calculation.</p>
<p>Matthew Mackmin (lpr818)</p>	<p>Does not agree with the proposed policy. In relation to the proposed development of 20,000 square metres of new office space on the field next to M4 junction 12 (EMP6):</p> <p><b>1: Reduction of gap between Theale and Calcot</b> This development will reduce the open space between Theale and Calcot leaving only the M4 motorway as a barrier.</p> <p><b>2: Risk from fluvial, surface water and ground water flooding</b> 90% of this site is in Flood Zone 2. Previous applications for development of this land for housing have been rejected due to Environment Agency objection.</p> <p><b>3: Separation of the site from Arlington Business Park by the A4</b> This site is separated from neighbouring office and industrial/logistical development at Arlington Business park by the extremely busy A4.</p> <p><b>4: Overhead high voltage power lines and presence of an electricity pylon</b> The land is crossed by high voltage power lines and features an electricity pylon. National Grid has previously expressed concern/objection to development under these lines.</p> <p><b>5: Impact on Theale High Street Conservation area</b> The site is adjacent to the Theale High Street Conservation area – this area is not suitable for development of this kind and any such development would have a negative impact on the conservation area.</p>	<p>Comments noted.</p> <p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken. The work recognises the contribution the site makes to the separation of Theale and Calcot, and to the setting of the Theale and the Conservation Area. The introduction of offices and/or other large-scale buildings would be out of scale and keeping with the historic village character of Theale. It would also be visible from the North Wessex Downs AONB. Therefore, the landscaping work recommends that the site is not developed for employment purposes. As part of the LPR going forward it is no longer proposed to allocate the site.</p>

Respondent (with lpr ref)	Response	Council Response
	<p><b>6: Impact on surrounding housing</b> The area is adjacent to existing housing. These dwellings will be negatively affected by this development and the attendant increase in vehicular traffic including light and heavy goods vehicles using any logistics development.</p> <p><b>7: Access to the site</b> This site could not be accessed directly from the A4 approach to Junction 12, therefore access would have to be via High Street or Hoad Way – these are not suitable for an increase in traffic flow that would accompany such development nor suited to light or heavy goods vehicles accessing any logistics development at this site.</p> <p><b>8: Surplus of available office and industrial / logistics capacity on existing Arlington Business Park</b> There is an abundance of high-quality office and light industrial / logistical capacity currently available on the existing Arlington Business Park (and has been for some time, predating the events of March 2020). There is no immediate requirement for additional capacity of this type in this area.</p>	
Kevin Aylett (lpr788)	<p>Does not agree with the proposed policy. Objection to EMP6 “North of Arlington”, Theale Need to have a green gap between Theale and Calcot Flood risk as shown on 2<sup>nd</sup> Feb flood alert map</p>	<p>Comments noted.</p> <p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken. The work recognises the contribution the site makes to the separation of Theale and Calcot, and to the setting of the Theale and the Conservation Area. The introduction of offices and/or other large-scale buildings would be out of scale and keeping with the historic village character of Theale. It would also be visible from the North Wessex Downs AONB. Therefore, the landscaping work recommends that the site is not developed for employment purposes. As part of the LPR going forward it is no longer proposed to allocate the site.</p>
Mr and Mrs Malcolm Fletcher (lpr958)	<p>Does not agree with the proposed policy. <u>EMP6</u></p>	<p>Comments noted.</p>

Respondent (with lpr ref)	Response	Council Response
	<ol style="list-style-type: none"> <li>1. Flood risk.</li> <li>2. Impact on surrounding housing.</li> <li>3. Increased pollution and carbon footprint for the area.</li> <li>4. Following the pandemic the design, use and need for offices will change. This planned construction is not designed for the future changes that will be required.</li> <li>5. Given the amount of existing office space in Theale that is not being utilised currently there is not a requirement for more offices.</li> </ol>	<p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken. The work recognises the contribution the site makes to the separation of Theale and Calcot, and to the setting of the Theale and the Conservation Area. The introduction of offices and/or other large-scale buildings would be out of scale and keeping with the historic village character of Theale. Lorna Kristensen (lpr1961)	<p>Does not agree with the proposed policy.</p> <ol style="list-style-type: none"> <li>1. Economic forecasts show industrial job growth coming from the East of West Berkshire and not in the extreme West where this site is located with minor poor road access to the M4</li> <li>2. The proposed site is located in a protected AONB area, and is deemed unsustainable by both the County's own Highways and Environmental Planning experts</li> <li>3. Over a third of all proposed industrial expansion is at LAM6 in the Western area. Yet all major housing developments are in the Eastern area. This leads to an imbalance between new homes and new jobs, requiring more vehicle based journeys which all leads to unsustainability.</li> <li>4. Carbon Dioxide levels show West Berkshire as the worst performing region in the whole of Berkshire, and well above South East England by 38%. LAM6 will generate significantly longer travel journeys than other sites, just increasing more carbon emissions unnecessarily in West Berkshire.</li> <li>5. Industrial demand in West Berkshire is shown to be in the <u>East</u> of the region, but only 3 sites here meet 65% of land needs. That shortfall is illogically made up by siting it at LAM6 in the <u>West</u>.</li> <li>6. Membury is described as "various industrial areas located around the M4". In fact LAM6 is not "close" and has no easy access to Jct</li> </ol>	<p>Comments noted.</p> <ol style="list-style-type: none"> <li>1. The ELR (2020) notes at paragraph 4.86 that across Membury (not only around LAM6) there are a range of different sizes and styles of industrial units, and that some of the units are reasonably large when compared to other locations in the Authority area. Demand is weaker (paragraph 4.98) than other areas in the District, but this is due to the small size of the industrial area. There are cases of existing occupiers seeking to expand (e.g. Walker Logistics). Industrial demand is mainly from local/regional occupiers.</li> <li>2. It is considered logical and appropriate to extend existing Protected Employment Areas (renamed Designated Employment Areas (DEA) through the LPR) to focus development into particular areas. This is particularly relevant in the AONB to prevent the urbanisation of land.</li> <li>3. It is not considered that there is an imbalance between the proposed expansion of employment floorspace and the proposed major housing developments. The majority of existing DEAs are</li> </ol>

Respondent (with lpr ref)	Response	Council Response
	<p>14 of M4. The 14 km round trip for HGV's impacts many rural communities living along these minor roads.</p> <ol style="list-style-type: none"> <li>7. WBC's Freight Route Plan while dated (2009) still shows <u>LAM6 as the industrial site furthest from an A road</u>. As LAM6 is the most remote in West Berkshire, it is also the area least suitable for HGV's.</li> <li>8. WBC Policy guidance gives presumption in favour of Sustainability, yet LAM6 has no alternative access unless by motorised vehicles. This is simply unsustainable as stated by WBC Highways.</li> <li>9. Consultants, Stantec provide no convincing arguments to support the LAM6 site and give <u>incorrect</u> facts and assertions within their site comparison tables, Appendix A. <u>Many inaccuracies</u> include: <ul style="list-style-type: none"> <li>• Planning permission <u>has not been granted</u> to Walker Logistics to develop the LAM6 site. Its application is still to be heard by Committee a year since submission and many objections</li> <li>• Stantec <u>ignore recent industrial sites</u> at Hadley Pig Farm and Lowesdon (minimum 10 new units)</li> <li>• "LAM6 has <u>8 bus stops</u> within 400 metres". There is <u>one</u> bus stop, once a day service, dangerous to walk to given the access roads are narrow, unlit and dominated by HGV's.</li> <li>• They conclude Ramsbury Rd "has reasonable access" with little HGV constraint. Not true and upsettingly, HGV's already use short cuts to Membury on tiny lanes via Chilton Foliat.</li> <li>• LAM6 is defined as previously developed land. This is untrue and has always been a field.</li> </ul> </li> </ol> <p>Rethink the LPR plans regarding industrial land extension and find more relevant locations in the eastern part of West Berkshire where the demand for facilities lie.</p>	<p>located in Newbury and to the east of the District. The Employment Land Review notes that the site could support the rural economy, and is better. The proposed expansion in Membury, where the planning application illustrates that there is demand for such use, with jobs created which local residents can make use of.</p> <ol style="list-style-type: none"> <li>4. Sustainable construction and renewable energy generation can help in achieving emissions reduction. Development will be expected to comply with Proposed Submission LPR Policy SP5 and Policy DM4 relating to climate change and sustainable building.</li> <li>5. Membury Industrial Estate is accessible to the M4 and to the A338. The West Berkshire Freight Strategy (2009) recognises Membury Industrial Estate as a key industrial site, and has the B4000 as part of the District Freight Route. The Highways Authority consider that there is capacity in the local transport network to accommodate development. The Highways Authority are concerned that the site is not in a sustainable location. In rural areas the NPPF recognises that land for employment may not be in accessible locations.</li> <li>6. Job creation is a benefit to promoting employment opportunities in this end of the District. Skilled workers, attracting varying degrees of pay, are required in jobs such as logistics (engineers, managers, HGV drivers).</li> <li>7. It is recognised that planning permission was not granted at the time of drafting the ELR, and there was no direction given as to whether planning permission would be granted or not. The site is not previously developed land.</li> </ol>

Respondent <i>(with lpr ref)</i>	Response	Council Response
		<p>The ELR takes account of all commitments when assessing the supply of employment uses. Should sites have not been promoted to the Council and therefore not assessed in the HELAA the ELR would not make specific reference to them.</p> <p>It is recognised there is a limited bus service serving the locality. The NPPF, at paragraph 85, outlines that planning policies should recognise that employment sites in rural areas may have to be found beyond existing settlements, and in locations that are not well served by public transport. The Transport Assessment and Travel Plan, which the site specific policy will require of the development, will seek to ensure that development is appropriate to local roads and encourage sustainable travel modes (e.g. car sharing, busing in staff, cycling and provision of showers and suitable storage at place of work).</p> <p>8. The Council is duty bound to take account of the effect of development on designated landscapes, such as the Area of Outstanding Natural Beauty. Further landscape assessment has been undertaken, as part of a Landscape Sensitivity and Capacity Assessment (LCA) for a number of sites in the Local Plan Review.</p> <p>The LCA for this site identifies a loss of open land, loss of open views within the AONB, and loss of quiet rural character and rural character of Ramsbury Road as potential impacts of development. In terms of the impact on the existing PEA the fragmented character allows the</p>

Respondent (with lpr ref)	Response	Council Response
		<p>undeveloped areas in-between to retain characteristic landscape features of the AONB, therefore mitigating and reducing the overall effect of the PEA on the AONB. The proposed site connects four of these together, which would result in one large area and the potential loss of these mitigating landscape features.</p> <p>Opportunities to propose substantial areas of tree and woodland planting as part of mitigation measures would not be out of character. Woodland would help, in time, to integrate and screen any proposed development as well as enhancing the area.</p> <p>The LCA recommends that development is limited to a focused area, to the eastern part of the submitted site. This reflects the development area outlined in the planning application (19/02079/OUTMAJ). It is considered such recommendations must be followed, and the policy will list criteria, as suggested in the LCA for the reserved matters application, or any other scheme, to be implemented.</p> <p>The LPR also identifies site allocations in the Eastern part of the District.</p>
Bridget Jones (lpr 2001)	<p><i>Full representation is attached and summarised below.</i></p> <p>Object to proposed industrial land extension at Membury which West Berkshire state is inevitable.</p> <p>We have major concerns with Stantec 2020 document, some of the conclusions and evidence base are based on old documents that have agreed review dates. Were these ever reviewed? eg the Freight Routes drawn up in 2009, reviewed in 2014, but no evidence of review.</p>	<p>Comments noted</p> <p>Many of these comments relate to the planning application, which generally has a much more detailed assessment than that of a planning policy allocation, including the Transport Assessment. The planning application would consider such information.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>There has been much development of the industry at Membury resulting in huge increase in traffic - many of businesses are large haulage companies, aggregate lorries, recycling HGV's and 24-hour Rescue and Recovery Services.</p> <p>Stantec state LAM6 extension is foregone conclusion. It is not and the planning application made late 2019 has yet to go to committee. The statement that the application has been given go-ahead raises concerns about the integrity of the planning process.</p> <p>Stantec state that the AONB is the only real barrier against expanding the DEA. There are other issues.</p> <p><b>Carbon Footprint and the Environment:</b> Inevitable increase in pollution makes mockery of Council's core strategy of carbon reduction.</p> <p>Extending the Membury DEA for large warehousing and distribution enterprises contradicts WBC's own policy statements: Environment (DC4); Air Quality (DC7); Air Quality (DC7); Conservation (DC8), Health and W/B etc. Stantec clearly state demand is in the East, so why develop in the West.</p> <p><b>AONB:</b> <b>The AONB Management Plan 2019 - 2024</b> is the statutory Management Plan for the AONB. the Core Strategy for the North Wessex Downs states that small local business enterprises (not large distribution and warehousing centres) should be encouraged and the local community are keen to encourage small local businesses. Concern that more large industrial enterprises would destroy the rural character.</p> <p>Further development would increase existing light pollution.</p> <p>Representation references the Walker's Logistics application and comments made in relation to this application.</p> <p>The effect of extension of the DEA on Landscape Character will not be negligible. Buildings, car parks, access roads will mean a loss of grassland which contributes to the mosaic of woodland mixed with arable pasture and farmland.</p> <p><b>Localized flooding:</b> Inadequate drainage and run-offs have not been insisted upon on the Membury sites and have created problems locally.</p>	<p><u>Employment Land Review and need</u> The ELR (2020) notes at paragraph 4.86 that across Membury (not only around LAM6) there are a range of different sizes and styles of industrial units, and that some of the units are reasonably large when compared to other locations in the Authority area. Demand is weaker (paragraph 4.98) than other areas in the District, but this is due to the small size of the industrial area. There are cases of existing occupiers seeking to expand (e.g. Walker Logistics). Industrial demand is mainly from local/regional occupiers.</p> <p>Table 4.21 (at paragraph 4.109, ELR 2020) highlights that no units are available (total stock of 46 units), reflecting the small size of the industrial market in this location.</p> <p>At paragraph 4.113 the ELR highlights that there are no obvious development opportunities, with redevelopment at existing sites being the main sources of development.</p> <p>At paragraph 4.164 recommends that to support the creation of local job opportunities in the more western rural areas, PEA boundaries could possibly be extended at Membury. The expansion of the Protected Employment Area allows for greater choice in for employment, benefiting local residents, as well as those who live further afield.</p> <p>Table 6.7 identifies the site as a potential industrial site, with further consideration needed, in recognition of its position within the AONB. Further work has been undertaken, as explained below.</p> <p>The HELAA concluded that the site was potentially developable.</p>

Respondent (with lpr ref)	Response	Council Response
	<p><b>Accessibility and Sustainability:</b>            Poor access, no bus routes direct to site, one bus stop approximately 1 mile away, no local train service, no pathways or cycle routes - all traffic must use unclassified or C road networks - inherent traffic risks. Stantec claim there are 8 bus stops nearby - where did this information come from?            Most people accessing businesses do so in their own cars, although Walkers Logistics bus people in from out of the area.</p> <p><b>Road infrastructure:</b>            Little confidence that WBC will be able to manage freight movements within the area and mitigate risk.            There are no alternative routes so there is no mitigation for the poor quality of road networks, access, environmental issues, weight restrictions, or for noise, vibration, safety and air pollution.            Any vehicle going to Membury has longest journey within West Berkshire from the major road networks to site, passing through quiet hamlets, changing rural character of area. Local road networks are already suffering and increased risk to residents, walkers, cyclists and horse riders - there is poor signage, no safe crossing points, no pedestrian signage.            Ramsbury Road is impractical for HGVs and dangerous for residents. Highways have undertaken local traffic surveys in the past, but never where required. Why has there been no freight/transport assessment undertaken and no use of the National TRICS DAta to determine true traffic impact of this site extension.            Residents had their own Transport Assessment undertaken - has West Berkshire considered this document?            Why when Membury scores lowest for demand for space and lowest for access is it being recommended? What is the rationale?            We need the green spaces between the industrial developments to ensure that the AONB is not compromised.</p> <p><b>HELAA Ref: LAM6</b>            Land was considered not suitable by the HELAA due to Highways concerns. Representations cover HELAA comments and ask what has changed?</p> <p><b>The North Wessex Downs AONB Management Plan</b>            References to Management Plan and West Berkshire Landscape Character Assessment 2019. The valued features for the Shefford Wooded Downland</p>	<p><u>Carbon footprint</u>            It is considered logical and appropriate to extend existing Protected Employment Areas (renamed Designated Employment Areas (DEA) through the LPR) to focus development into particular areas. This is particularly relevant in the AONB to prevent the urbanisation of land. Sustainable construction and renewable energy generation can help in achieving emissions reduction. Development will be expected to comply with Proposed Submission LPR Policy SP5 and Policy DM4 relating to climate change and sustainable building.</p> <p><u>Landscape</u>            Since the publication of the LPR further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessment (LCA) for a number of sites in the LPR. Membury Protected Employment Area is made up of a central area and a number of fragmented smaller outlying areas. The site loosely connects these areas. The eastern part of the site has an established visual and landscape connection with the open arable landscape area further to the east of Ramsbury Road. The western part of the site (runway area) connects to the adjacent area of open grassland which leads across to the Iron Age hillfort and the wider countryside</p> <p>The LCA for the site identifies a loss of open land, loss of open views within the AONB, and loss of quiet rural character and rural character of Ramsbury Road as potential impacts of development. In terms of the impact on the existing PEA the fragmented character allows the undeveloped areas in-between to retain characteristic landscape features of the AONB, therefore mitigating and reducing the overall effect of the PEA on the AONB. The</p>

Respondent (with lpr ref)	Response	Council Response
	<p>LCA include the strong rural character due to the sparse settlement and limited modern influences. Detractors include the ongoing pressure for further development which it is felt may lead to development which is out of character and can introduce suburbanizing features which may detract from the rural qualities of the area. Landscape strategy for this LCA is to conserve and enhance the valued features.</p> <p><b>Health Impact Assessments</b> See little evidence of health impact assessments being undertaken.</p> <p><b>Stantec's Report: Re Industry</b> Stantec state there is demand for larger B8 distribution near the M4 junctions, particularly close to Reading. Poor access from motorway to Membury.</p> <p>Section 12 of Executive Summary states there are possibly 4 or 5 sites that had been identified through the HELAA. Membury was not one of them in Feb 2020 and was deemed unsuitable, due to Highways concerns and impact on the AONB. Rep asks who is driving agenda and why the focus on Membury?</p> <p>Site only meets one of the six criteria in Policy SPS22.</p> <p>National policy and Guidance is to ensure sufficient land of the right type is available in the right place. Membury is not the right place.</p> <p>Core Strategy 2.39 talks of appropriate location for sites and one of criteria is capacity and impact on road networks and access by sustainable modes of transport. Membury is not on bus routes, there are no cycle paths, no pavements, the road is narrow, there are dog walkers, horse riders and members of the local community that use roads and risks increase daily. Has the issue of weight restrictions been addressed?</p> <p>Staff are bussed in, many of businesses are not local and there are little benefits to the local economy.</p> <p>Within the North Wessex AONB Strategy, small local enterprise is to be encouraged. Some businesses have outgrown the area and should be seeking to relocate, giving up space for more small local businesses.</p> <p>There are more than the 46 units at Membury stated in the Stantec Report as plots/ units are sub-let, which generates more traffic locally.</p>	<p>proposed site connects four of these together, which would result in one large area and the potential loss of these mitigating landscape features.</p> <p>Opportunities to propose substantial areas of tree and woodland planting as part of mitigation measures would not be out of character. Woodland would help, in time, to integrate and screen any proposed development as well as enhancing the area.</p> <p>The LCA recommends that development is limited to a focused area, to the eastern part of the submitted site. This reflects the development area outlined in the planning application (19/02729/OUTMAJ). It is considered such recommendations must be followed, and the policy will list criteria, as suggested in the LCA for the reserved matters application, or any other scheme, to be implemented.</p> <p><u>Flooding</u> A flood risk assessment would be required for the site at LAM6. Sustainable urban drainage systems would be designed as part of the development as required by planning policies. However, this would not apply to existing sites.</p> <p><u>Highways and accessibility:</u> Membury Industrial Estate is accessible to the M4 and to the A338. As part of the assessment of the site, through the HELAA, the Highways Authority considered that there is capacity on the road network to accommodate the development. The West Berkshire Freight Strategy (2009) recognises Membury Industrial Estate as a key industrial site, and has the B4000 as part of the District Freight Route. The Highways Authority consider that there is capacity in the local transport network to accommodate</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Development Opportunities: 4 113. States that planning granted around existing Walkers Logistics site but Walkers application still to go to Committee and strongly opposed.</p> <p>Conclusion: The Industrial Market 4.118. Some demand for larger B8 distribution but only for those locations near M4 junctions.</p> <p>Lowesdon Works were not fully occupied at time of Stantec report and since then applications have been submitted to redevelop buildings there. Smaller units could be accommodated at Lowesdown. Stantec report state that fully occupied but I believe 10 units were unoccupied. The impact of COVID-19 is yet unknown</p> <p>They talk of local jobs, however many people employed in the area are from Swindon or Reading or further afield. When was planning granted for Wiltshire Recycling Roll-on Roll-off lorries using Membury site granted? Table 6.7. What is justification for including site in table, as deemed unsuitable in HELAA of Feb 2020?</p> <p>Page 115 7.10. Refers to land being required to address local rural demand yet provides no evidence.</p> <p>Detrimental impact of extending the DEA would be</p> <ul style="list-style-type: none"> <li>• marked impact on quality of life for residents</li> <li>• depreciation of neighboring residential amenities</li> <li>• potential harmful impact on ancient woodland</li> <li>• potential harmful impact on Heritage site (Grad II listed building)</li> <li>• significant transport increase on the rural lane/road networks</li> <li>• Additional loss of wildlife and loss of green vistas. Additional loss of tranquility.</li> <li>• increase in light and noise pollution and negative impacts on carbon footprint.</li> </ul> <p>Withdraw LAM6 from further discussions, spread out the industrial sites within West Berkshire. This could be done if Tadley and Aldermaston are considered as alternatives.</p> <p>Not recognized by Stantec is the Hadley Farm Industrial Site given permission for several small business units in Nov 2019</p>	<p>development. The Highways Authority are concerned that the site is not in a sustainable location. In rural areas the NPPF recognises that land for employment may not be in accessible locations. Furthermore, it is more beneficial to locate development near/adjacent to existing development.</p> <p>The Transport Assessment and Travel Plan, which the site specific policy will require of the development, will seek to ensure that development is appropriate to local roads and encourage sustainable travel modes (e.g. car sharing, busing in staff, cycling and provision of showers and suitable storage at place of work).</p> <p><u>Health Impact Assessments</u> Health Impact Assessments (HIAs) will be required under Proposed Submission LPR Policy DM3 of the LPR, as part of a submission of a planning application. HIAs will be conducted as part of the submission version of the Local Plan. Public Health were consulted as part of the Regulation 18 consultation, and were invited to comment on sites as part of the assessment for the HELAA. No comments were received in respect of the site.</p> <p>It is proposed to allocate sites for industrial uses in the east of the District as well, some of which are within the AONB.</p> <p>The ELR takes account of all commitments when assessing the supply of employment uses. Should sites have not been promoted to the Council and therefore not assessed in the HELAA the ELR would not make specific reference to them.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>(19/02188/COMIND). This has yet to be developed - with this and rebuilding at Lowesdon Works the need for additional small local enterprise spaces would be met.</p> <p>There is no justification for extending the DEA at Membury.</p>	
Maria Bird (lpr2006)	<p>(From wider comment to SP17) I've noted a plan to extend the industrial space from Colthrop toward the east. Colthrop still has units that have been up to let since I moved here in 2001. This must NOT happen, spilling over into the beautiful countryside. Keep Berkshire spaces sacred.</p>	Comments noted.
Mrs J Painter (lpr2016)	<p>I am objecting to the Local Plan Review 2020 -2037 Emerging Draft December 2020 in relation to the sites Whitehart Meadow (RSA16), the Old Sewage Works (RSA17) and land situated near Junction 12 EMP6. I am a resident of Theale of over 20 years and have seen the impact that several developments over this time has had on the infrastructure of the village. Theale Medical Centre struggles to provide adequate facilities for the 10,000+ patients it has over the Theale and Calcot areas. With the proposed 170 properties to be built in the Surgery's geography, the impact on the current patient levels and care provided will be detrimental. This would be in addition to the already growing numbers of patients given the development site that is currently being built opposite the Sainsbury's retail site near Junction 12 in Calcot, who will also be served by Theale Medical Centre.</p> <p>Theale Primary School also had to be redeveloped onto a new site on North Street playing fields, which meant local footballs teams and the community lost open space to play on and use for recreational purposes. The impact of 170 new homes would mean more residents would not have enough space for recreational use, as well as new families moving into the village putting pressure onto the primary school, which is becoming quickly overwhelmed with the number of pupils it already has.</p>	<p>Comments noted.</p> <p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessment (LCA) for a number of sites in the LPR. The LCA for this site outlines that the site contributes to an important part of the remaining open countryside and the subsequent separation of Theale from Calcot. The site is visible from within Theale (and the Conservation Area), where the open character of the site contributes to Theale's historic character and setting. The site is part of the open countryside which continues further to the north and across the M4 into the North Wessex Downs AONB. The site is separated from the Protected Employment Area (PEA) by the A4 Bath Road and due to the lack of intervisibility with the site and the PEA the landscape character of the site retains a more rural character, contributing to the setting and separate identity of the historic village of Theale.</p> <p>It notes that the introduction of offices and/or other large-scale buildings would be out of scale and keeping with the historic village character of Theale, and development</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The local highways in Theale would also not be able to cope with the increase in traffic across all sites. As a resident of Woodfield Way, there have been numerous times where the access to this part of Theale has been blocked due to traffic issues along the A4 and M4. The High Street is often used as a cut through when the bypass is at a standstill and this means local residents are either trapped in the village unable to leave, or unable to access their homes due to the volume of traffic. As there is only 1 access point for the Woodfield Way area of Theale, increasing pressure on this site with the addition of 100 home and 20,000 sqft of commercial property will cause not only disruption to those who live in these areas, but will also increase the impact on the environment with more vehicles and the pollution it will cause.</p> <p>The increase in numbers of vehicles will also cause issues given the current problems experienced with restrictions in access around the Woodfield Way/High Street area. Commercial units at the top of Woodfield Way park their vehicles outside of their units, and residents who have multiple vehicles use the roads to park their cars/vans which narrows the road access. There is constantly a risk that emergency services would not be able to get to the properties furthest down Woodfield Way due to the current number of vehicles that use the roads as a car park. Adding 100 homes, with the same number if not more cars/vans etc. would be more than the local highways would be able to cope with.</p> <p>The proposed introduction of commercial units on site EMP6 is also ill considered. Aside from the above mentioned impact this would have on the local highways, there is also a number of commercial units already in Theale that are currently empty. Arlington Business Park has numerous offices currently empty, with no signs of companies taking up leases due to the current pandemic and the move to work from home. The need for physical commercial space is less now than last year, and to add an additional 20,000 sqft unit would be unnecessarily building on a conservation area for the sake of it. In the Station Road commercial area of Theale there are currently units of 18,000+, 20,000 and 24,000+ sqft which are available for lease and are standing empty, with again no prospective companies taking up the opportunity to lease them.</p>	<p>across the whole site would create the perception of coalescence with Calcot and loss of separate identity of Theale from Calcot. Development would also be visible from areas with the North Wessex Downs AONB.</p> <p>The LCA concludes that if the site were developed, either in whole or in part, it would compromise the setting of Theale and its separate identity and character from Calcot. It therefore recommends that the site is not developed for employment uses. Therefore, as part of the LPR going forward it is no longer proposed to allocate the site.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The Arlington Business Park side of the A4 should be kept commercial, with residential only dwellings on the Theale High Street side of the A4 due to the eases of access for larger vehicles and current commercial sites that already exist. To merge commercial and residential will mean residents lose the open green land of Theale (which is ever decreasing) impacting on residents' ability to walk around the village in a comfortable environment free of vehicle, commercial and noise pollution.</p> <p>Now more than ever the open green land of Theale should be left as such, as it allows the community the ability to take exercise without travelling which is key given the current pandemic. To lose this land would also impact on the natural habitats of the wildlife living there, which will displace many animals. Trees have already been cut in the Whitehart Meadow site, and this has caused an increase in light and noise pollution from Junction 12, IKEA and its car park along with the overnight roadwork noises from the smart motorway works. Placing 100 properties on this land would be detrimental to those who live next to and opposite the site due to the disruption the development would cause on both the residents and highways, along with it being built on a site of flood risk and uncomfortably close to the overhead power lines/pylons situated in the land.</p> <p>Lastly, with building on the proposed sites, the gap between Theale and Calcot/Tilehurst will significantly decrease. Theale is already situated in a difficult location where emergency services are pulled from opposite towns to the furthest reach of their geography to attend to us. Both Reading and Newbury Police and Ambulance crews find it difficult to attend as we are approx. 10 - 15 miles from each local station for crews to be sent. By adding more residential and commercial sites to Theale this will add increasing pressure to services such as blue lights which is already stretched given our location and the current pandemic situation.</p> <p>For the above reasons, in addition to a site already marked for development along The Green near the Tidmarsh/A4 end of Theale, I object to the local plan review 2020 - 2037 covering sites Whitehart Meadow, The Old Sewage Works and the open land besides the A4 and M4 opposite Whitehart Meadow.</p>	

Respondent (with lpr ref)	Response	Council Response
	I hope this objection will be well considered along with the areas of Theale that are already over developed and struggling to cope with the current population of the village.	
Max Agar (lpr2059)	<p>Ref LAM6 (site at Membury)</p> <ul style="list-style-type: none"> <li>• Economic forecasts show industrial job growth coming from the East of West Berkshire and not in the extreme West where this site is located with minor poor road access to the M4.</li> <li>• The proposed site is located in a protected AONB area, and is deemed unsuitable by both the County's own Highways and Environmental Planning experts.</li> <li>• Over a third of all proposed industrial expansion is at LAM6 in the <u>Western area</u>. Yet all major housing developments are in <u>Newbury and Eastern area</u>. This leads to an imbalance between new homes and new jobs, requiring more vehicle based journeys which all leads to unsustainability.</li> <li>• Carbon Dioxide levels show West Berkshire as the worst performing region in the whole of Berkshire, and well above South East England by 38%. LAM6 will generate significantly longer travel journeys than other sites, just increasing more carbon emissions unnecessarily in West Berkshire.</li> <li>• Market attraction is <u>high in the East</u> of the county, yet LAM6 site is <u>low in the far West</u>.</li> <li>• Industrial demand in West Berkshire is shown to be in the <u>East</u> if the region, but only 3 sites here meet 65% if land needs. That shortfall is illogically made up by siting it at LAM6 in the <u>West</u>.</li> <li>• Membury is described as "various industrial areas located around the M4". In fact LAM6 is not "close" and has no easy access to Jct 14 of M4. The 14km round trip for HGV's impacts many rural communities living along these minor roads.</li> <li>• WBC's Freight Route Plan while dated (2009) still shows <u>LAM6 as the industrial site furthest from an A road</u>. As LAM6 is the most remote in West Berkshire, it is also the area least suitable for HGV's.</li> </ul>	<p>Comments noted.</p> <ol style="list-style-type: none"> <li>1. The ELR (2020) notes at paragraph 4.86 that across Membury (not only around LAM6) there are a range of different sizes and styles of industrial units, and that some of the units are reasonably large when compared to other locations in the Authority area. Demand is weaker (paragraph 4.98) than other areas in the District, but this is due to the small size of the industrial area. There are cases of existing occupiers seeking to expand (e.g. Walker Logistics). Industrial demand is mainly from local/regional occupiers.</li> <li>2. It is considered logical and appropriate to extend existing Protected Employment Areas (renamed Designated Employment Areas (DEA) through the LPR) to focus development into particular areas. This is particularly relevant in the AONB to prevent the urbanisation of land.</li> <li>3. It is not considered that there is an imbalance between the proposed expansion of employment floorspace and the proposed major housing developments. The majority of existing DEAs are located in Newbury and to the east of the District. The ELR notes that the site could support the rural economy, and is better placed than other promoted sites in the AONB. The proposed expansion in Membury, where the planning application illustrates that there is demand for such use, with jobs created which local residents can make use of.</li> </ol>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• 1997-2017 data shows the local economy 34%, primarily in jobs unlikely to be attracted to LAM6. In the 2036 forecast it follows that these jobs, increasingly in demand, will still not be provided by the LAM6 site.</li> <li>• Currently a proportion of Membury's workers are bussed in from Temp Agencies in Reading and Swindon. This would only continue. Data shows Membury workers are below County wage levels and those out of County workers' spend will not benefit the local economy will not benefit.</li> <li>• Consultants, Stantec provide no convincing arguments to support the LAM6 site and give <u>incorrect</u> facts and assertions within their site comparison tables, Appendix A. <u>Many inaccuracies</u> include: <ul style="list-style-type: none"> <li>○ Planning permission <u>has not been granted</u> to Walker Logistics to develop the LAM6 site. Its application is still to be heard by Committee a year since submission and many objections.</li> <li>○ Stantec <u>ignore recent industrial sites</u> at Hadley Pig Farm and Lowesdon (min. 10 new units).</li> <li>○ "LAM6 has <u>8 bus stops</u> within 400 metres". There is <u>one</u> bus stop, once a day service, dangerous to walk to given the access roads are narrow, unlit and dominated by HGV's.</li> <li>○ They conclude Ramsbury Rd "has reasonable access" with little HGV constraint. Not true and upsettingly, HGV's already use short cuts to Membury on tiny lanes via Chilton Foliat.</li> </ul> </li> <li>• WBC Policy guidance gives presumption in favour of Sustainability, yet LAM6 has no alternative access unless by motorised vehicles. This is simply unsustainable as stated by WBCHighways.</li> <li>• The Council's own Environment expert, in her July 2020 paper states: <ul style="list-style-type: none"> <li>○ "Increased traffic will have a further adverse impact on the rural quality of Ramsbury Road and tranquility levels within the wider area".</li> </ul> </li> </ul>	<ol style="list-style-type: none"> <li>4. Sustainable construction and renewable energy generation can help in achieving emissions reduction. Development will be expected to comply with Proposed Submission LPR Policy SP5 and Policy DM4 relating to climate change and sustainable building.</li> <li>5. Membury Industrial Estate is accessible to the M4 and to the A338. The West Berkshire Freight Strategy (2009) recognises Membury Industrial Estate as a key industrial site, and has the B4000 as part of the District Freight Route. The Highways Authority consider that there is capacity in the local transport network to accommodate development. The Highways Authority are concerned that the site is not in a sustainable location. In rural areas the NPPF recognises that land for employment may not be in accessible locations.</li> <li>6. Job creation is a benefit to promoting employment opportunities in this end of the District. Skilled workers, attracting varying degrees of pay, are required in jobs such as logistics (engineers, managers, HGV drivers).</li> <li>7. It is recognised that planning permission was not granted at the time of drafting the ELR, and there was no direction given as to whether planning permission would be granted or not. The site is not previously developed land.</li> </ol> <p>The ELR takes account of all commitments when assessing the supply of employment uses. Should sites have not been promoted to the Council and therefore not assessed in the HELAA the ELR would not make specific reference to them.</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>○ Development "proposals do not comply with Policy ADPP5 and CS19" WBC's Core Strategy.</li> <li>○ The proposed development would "merge two PEAs...intensifies the impact of commercial development within AONB, including increased traffic on the rural road network, contrary to conserving and enhancing adjacent areas of the AONB".</li> </ul> <p>Rethink the LPR plans regarding industrial land extension and find more relevant locations in the eastern part of West Berkshire where the demand for facilities lie.</p>	<p>It is recognised there is a limited bus service serving the locality. The NPPF, at paragraph 85, outlines that planning policies should recognise that employment sites in rural areas may have to be found beyond existing settlements, and in locations that are not well served by public transport. The Transport Assessment and Travel Plan, which the site specific policy will require of the development, will seek to ensure that development is appropriate to local roads and encourage sustainable travel modes (e.g. car sharing, busing in staff, cycling and provision of showers and suitable storage at place of work).</p> <p>8. The Council is duty bound to take account of the effect of development on designated landscapes, such as the Area of Outstanding Natural Beauty. Further landscape assessment has been undertaken, as part of a Landscape Sensitivity and Capacity Assessment (LCA) for a number of sites in the Local Plan Review.</p> <p>The LCA for this site identifies a loss of open land, loss of open views within the AONB, and loss of quiet rural character and rural character of Ramsbury Road as potential impacts of development. In terms of the impact on the existing PEA the fragmented character allows the undeveloped areas in-between to retain characteristic landscape features of the AONB, therefore mitigating and reducing the overall effect of the PEA on the AONB. The proposed site connects four of these together, which would result in one large area and the potential loss of these mitigating landscape features.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>Opportunities to propose substantial areas of tree and woodland planting as part of mitigation measures would not be out of character. Woodland would help, in time, to integrate and screen any proposed development as well as enhancing the area.</p> <p>The LCA recommends that development is limited to a focused area, to the eastern part of the submitted site. This reflects the development area outlined in the planning application (19/02079/OUTMAJ). It is considered such recommendations must be followed, and the policy will list criteria, as suggested in the LCA for the reserved matters application, or any other scheme, to be implemented.</p> <p>The LPR also identifies site allocations in the Eastern part of the District.</p>
Jayne Dowe (lpr2095)	<p>I would like to comment that I do not support the areas proposed for development (<i>in Theale</i>) for the following reasons:</p> <ul style="list-style-type: none"> <li>• The impact of additional traffic on the village. The proposed access route for Whitemeadow and the adjacent field is a major route used by pedestrians to access the footbridge over the motorway. Additional traffic will raise risks to pedestrians, particularly school children. The high street is narrow and already ill-equipped to deal traffic. The junction is already busy due to its proximity to the motorway, business parks and the A4.</li> <li>• Blossom Lane is a narrow quiet residential road, increased traffic would cause further risks and inconvenience.</li> <li>• The impact on the estates that will be adjacent to the development – Woodfield Way, Alderfield Close etc, leading to overcrowding,</li> </ul>	<p>All comments noted.</p> <p>It is recognised that the comments are made to the housing sites in Theale, and therefore not all directly relevant to the proposed employment site.</p> <p>The ELR recognises Theale as one of the locations in the District providing office stock (out of town). Theale is more in demand from occupiers than in other areas of the District, due to its proximity to Reading (paragraph 4.42). At 4.52 the ELR (2020) recognises there are vacancies, which are particularly highest in the larger unit size (10-20,000 square foot), though does not consider this a cause for concern. Recent demand has been from corporate occupiers/SMEs, with a higher demand than in other areas</p>

Respondent (with lpr ref)	Response	Council Response
	<p>impact on view, traffic through the local area. This will impact on the living standards of existing residents.</p> <ul style="list-style-type: none"> <li>• The development will reduce the protective barrier between existing homes and the motorway.</li> <li>• The negative impact on living standards in regards to the new developments being in extremely close proximity to the overhead power lines and the motorway, leading to poor air quality, noise pollution and poor living environment for potential 'new' residents.</li> <li>• The impact on services within Theale, which are already under strain, particularly at this time health services.</li> <li>• Reduction in the boundaries between Theale and Calcot.</li> <li>• All three locations are abundant with wildlife, whose habitat would be destroyed.</li> <li>• Much of the office space within Arlington business park is currently not in use, therefore it is unclear why further office space would be required. The visual impact of the structures will affect the outlook of the village on approach.</li> <li>• The continued development in these areas will continue to spoil the aesthetic of the village as a whole. There are already approved areas of significant housing development within Theale, if these additional areas are also approved the village will lose its character and become overcrowded, overrun by traffic and will have a significant negative impact on existing residents.</li> </ul>	<p>of the District. At 4.66 the ELR (2020) comments that office occupiers prefer to be closer to the town centre or a motorway junction, though due to lack of available space and land they are prepared to take space in outer locations, such as Greenham Business Park.</p> <p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken. The work recognises the contribution the site makes to the separation of Theale and Calcot, and to the setting of the Theale and the Conservation Area. The introduction of offices and/or other large-scale buildings would be out of scale and keeping with the historic village character of Theale. It would also be visible from the North Wessex Downs AONB. Therefore, the landscaping work recommends that the site is not developed for employment purposes. As part of the LPR going forward it is no longer proposed to allocate the site.</p>
Woodlanders Action Group (lpr2103)	<p>Petition – 105 signatures As local residents, we object to the LAM6 extension at Membury to meet over a third of West Berkshire's 2036 demands for forecast industrial land needs because...</p> <ul style="list-style-type: none"> <li>• Economic forecasts show industrial job growth coming from the East of West Berkshire and not in the extreme West where this site is located with minor poor road access to the M4</li> <li>• Consultants, Stantec provide no convincing arguments to support the LAM6 site and given incorrect facts and assertions: Planning permission <u>has not been granted</u>; within their site comparison</li> </ul>	<p>All comments noted.</p> <p>The ELR (2020) explains that the site is not in the main area of market demand, but has acknowledged local demand (para 6.80).</p> <p>The ELR demonstrates that there are high occupancy rates at Membury.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>tables, Appendix A there are numerous inaccuracies and out of context statements</p> <ul style="list-style-type: none"> <li>The proposed site is located in a protected AONB area, and is deemed unsustainable by both WBC's own Highways and Environmental Planning experts</li> </ul> <p><b>Specifically... LPR Plans December 2020</b></p> <ol style="list-style-type: none"> <li>Over a third of all proposed industrial expansion is at LAM6 in the <u>Western area</u>. Yet all major housing developments are in <u>Newbury and Eastern area</u>. This leads to an imbalance between new homes and new jobs, requiring more vehicle based journeys which all leads to unsustainability.</li> <li>Transport Policy SP22 outlines <u>six</u> criteria for mitigating transport impact. Only <u>one</u> is met by LAM6.</li> <li>Table 4 show Carbon Dioxide levels in West Berkshire as the worst performing region in the whole of Berkshire, and well above South East England by 38%. LAM6 will generate significantly longer travel journeys than other sites, just increasing more carbon emissions unnecessarily in West Berkshire.</li> </ol> <p><b>Stantec Consultants August 2020</b></p> <ol style="list-style-type: none"> <li>Industrial demand in West Berkshire is shown is in the <u>East</u> of the District. Yet only 3 eastern sites are identified, with the industrial land needs shortfall of 35% coming from the <u>West</u> at LAM6.</li> <li>Market attraction is <u>high</u> in the <u>East</u> of our region, yet LAM6 site is <u>low</u> and located in the far <u>West</u>.</li> <li>Of six <u>Eastern</u> sites rejected, five were done so for AONB reasons. Yet in the <u>West</u>, with all its AONB and access issues, LAM6 is selected despite its illogical location to meet demand. Even if West Berks decides AONB should not be a barrier to developing industrial land, four sites identified at Beenham with <u>medium market attractiveness</u> offer up 32 hectares in the East. Yet with <u>low demand attractiveness</u> and a fifth smaller in size, LAM6 is proposed</li> </ol>	<p>Demand for space is weaker than in other areas, though this is due to the small size of the industrial area (ELR, 2020 para 4.98).</p> <p>Sustainable construction and renewable energy generation can help in achieving emissions reduction. Development will be expected to comply with Proposed Submission LPR Policy SP5 and Policy DM4 relating to climate change and sustainable building.</p> <p>Sites have been identified in the east of the District. The policy seeks to expand Designated Employment Areas, which are spread across the District. It is logical to seek to expand existing sites, rather than allocate new sites away from such areas and outside of urban areas (Designated Employment Sites are not within the settlement boundary of existing settlements).</p> <p>The site is in reasonable distance of J14 of the M4, on a Freight Route. HGV traffic is directed to this road network. The Highways Authority have commented, through the HELAA and the planning application, that the local road network has capacity for vehicular movements associated with the site.</p> <p>Creating employment opportunities, where this can be cross-boundary, is important. The planning application demonstrated that there was local interest in jobs to be created.</p> <p>Stantec were tasked with examining sites (from a property market perspective) which had been brought to the Council's attention through the call for sites. These sites were assessed through the Housing and Economic Land Availability Assessment to filter out unsuitable and</p>

Respondent (with lpr ref)	Response	Council Response
	<p>in the West. One has to conclude, Stantec's thinking and rationale for this location recommendation is muddled and highly subjective.</p> <p>7. Membury is described as "various industrial areas located around the M4 "as if this motorway has any beneficial access to LAM6. Described as being "close to junction 14 of M4" <u>it is in fact a 14 km round trip for HGV's</u> to and from this site. Using B, D and unclassified roads, these industrial site journeys impact the many rural communities living along these minor roads.</p> <p>8. In West Berks' dated Freight Route Plan 2009, <u>LAM6 is the industrial site furthest from an A road</u>. As the most remote in this region, it is also the least suitable for HGV's. Yet, LAM6 is "talked up" as Stantec makes desperate efforts to secure its inclusion so as to reach the Industrial land area target.</p> <p>9. Economic data from 1997 to 2017 shows the local economy grew 34%, primarily in jobs unlikely to be attracted to LAM6. The 2020 to 2030 forecast trend is extrapolated to 2036. It follows that the jobs increasingly in demand, will still not be provided by the LAM6 site. Today a proportion of Membury's workers are currently bussed in from Temp Agencies in Reading and out of District. This would only continue, and data shows Membury workers are below County average wage levels.</p> <p>10. Stantec inaccurately state on Page 69 #4.113 that although not yet developed, Walker Logistics has permission to expand its operations on the LAM6 site. But the merit of this application is still to be heard by WB Planning Committee a year after its original submission and many re-submitted documents, opposed strongly by AONB, residents and WBC's Highways and Environmental experts.</p> <p>11. Other mistakes appear in Appendix A on Stantec's site comparison tables, including:</p> <ul style="list-style-type: none"> <li>o Stantec ignored availability of 10+ new industrial units at Hadley Pig Farm and Lowesdon.</li> <li>o Inaccurately, they claim "LAM6 has <u>8</u> bus stops within 400 metres" (p. 119 #23/p. 125 #29). Well over a mile away, there is just <u>one</u> bus stop. This a once a day service is too</li> </ul>	<p>undeliverable sites. The Council needs to ensure that sites which are identified for development are available, achievable and deliverable. The Council then need to decide on sites going forward, looking at constraints.</p> <p>It is acknowledged (at the time of the receipt of the representation) that the Walker Logistics site had not been granted planning permission.</p> <p>It is recognised that there are not 8 bus stops in the vicinity of the site, and has a very limited bus service. The NPPF, at paragraph 85, outlines that planning policies should recognise that employment sites in rural areas may have to be found beyond existing settlements, and in locations that are not well served by public transport.</p> <p>The Transport Assessment and Travel Plan which the site specific policy will require of the site will seek to ensure that development is appropriate to local roads and encourage sustainable travel modes (e.g. car sharing, busing in staff, cycling and provision of showers and suitable storage at place of work). The Travel Plan may also extend to directing the traffic movement to the main roads.</p> <p>A weight restriction exists on the B4001 heading south towards Chilton Foliat.</p> <p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessment (LCA) for a number of sites in the LPR. Membury Protected Employment Area is made up of a central area and a number of fragmented smaller outlying areas. The site loosely connects these areas. The eastern part of the site</p>

Respondent (with lpr ref)	Response	Council Response
	<p>risky to walk from LAM6 given access is via rural roads that are narrow, unlit and HGV dominant.</p> <ul style="list-style-type: none"> <li>○ Stantec admit Hurst Farm on Ermin Street (B4000) “has weak vehicular access in an area of weak demand”. Yet HGV’s need to pass this location before reaching the even narrower Ramsbury Rd which they bizarrely state “has reasonable access” with little HGV constraint. Upsettingly, HGV’s already use short cuts via tiny lanes from Chilton Foliat to Membury.</li> <li>○ Page 124 #6, they state LAM6 was previously developed land. This is untrue. It is a field.</li> </ul> <p>12. This site doesn’t meet NPPF guidance:</p> <ul style="list-style-type: none"> <li>○ LAM6 neither conforms to the NPPF 2019 nor WBC’s own policies in the LPR.</li> <li>○ Presumption is in favour of sustainability, yet LAM6 site has no alternative access unless it is motorised vehicles. Respondent (with lpr ref)	Response	Council Response
	<p>16. <u>The proposals do not comply with Policy ADPP5 and CS19 of the West Berkshire Core Strategy.</u> As stated within Policy CS 14: <i>New development must demonstrate high quality and sustainable design that respects and enhances the character and appearance of the area.</i></p> <p>17. The proposed development would “merge two PEAs (re-designated as DEAs) ... and <u>intensifies the impact of commercial development within AONB</u>, including increased traffic on the rural road network, contrary to conserving and enhancing adjacent areas of the AONB”</p> <p>18. (By) “allowing a gap to be included within the woodland belt (this could also open up the western area of this site to development pressure”</p>	
Ivor Regan (lpr2181)	<p>Economic forecasts show industrial job growth coming from the East of West Berkshire and not in the extreme West where this site is located with minor poor road access to the M4</p> <p>The proposed site is located in a protected AONB area, and is deemed unsustainable by both the County’s own Highways and Environmental Planning experts</p> <p>Over a third of all proposed industrial expansion is at LAM6 in the Western area. Yet all major housing developments are in Newbury and Eastern area. This leads to an imbalance between new homes and new jobs, requiring more vehicle based journeys which all leads to unsustainability.</p> <p>Carbon Dioxide levels show West Berkshire as the worst performing region in the whole of Berkshire, and well above South East England by 38%.</p> <p>LAM6 will generate significantly longer travel journeys than other sites, just increasing more carbon emissions unnecessarily in West Berkshire.</p> <p>Market attraction is high in the East of the county, yet LAM6 site is low in the far West.</p> <p>Industrial demand in West Berkshire is shown to be in the East of the region, but only 3 sites here meet 65% of land needs. That shortfall is illogically made up by siting it at LAM6 in the West. Membury is described as “various industrial areas located around the M4”. In fact LAM6 is not “close” and has no easy access to Jct 14 of M4. The 14 km round trip for HGV’s impacts many rural communities living along these minor roads.</p>	<p>Comments noted.</p> <ol style="list-style-type: none"> <li>1. The ELR (2020) notes at paragraph 4.86 that across Membury (not only around LAM6) there are a range of different sizes and styles of industrial units, and that some of the units are reasonably large when compared to other locations in the Authority area. Demand is weaker (paragraph 4.98) than other areas in the District, but this is due to the small size of the industrial area. There are cases of existing occupiers seeking to expand (e.g. Walker Logistics). Industrial demand is mainly from local/regional occupiers.</li> <li>2. It is considered logical and appropriate to extend existing Protected Employment Areas (renamed Designated Employment Areas (DEA) through the LPR) to focus development into particular areas. This is particularly relevant in the AONB to prevent the urbanisation of land.</li> <li>3. It is not considered that there is an imbalance between the proposed expansion of employment floorspace and the proposed major housing</li> </ol>

Respondent (with lpr ref)	Response	Council Response
	<p>WBC's Freight Route Plan while dated (2009) still shows LAM6 as the industrial site furthest from an A road. As LAM6 is the most remote in West Berkshire, it is also the area least suitable for HGV's. • 1997-2017 data shows the local economy grew 34%, primarily in jobs unlikely to be attracted to LAM6. In the 2036 forecast it follows that these jobs, increasingly in demand, will still not be provided by the LAM6 site.</p> <p>Currently a proportion of Membury's workers are bussed in from Temp Agencies in Reading and Swindon. This would only continue. Data shows Membury workers are below County wage levels and those out of County workers' spend will not benefit the local economy will not benefit.</p> <p>Consultants, Stantec provide no convincing arguments to support the LAM6 site and give incorrect facts and assertions within their site comparison tables, Appendix A. Many inaccuracies include: o Planning permission has not been granted to Walker Logistics to develop the LAM6 site. Its application is still to be heard by Committee a year since submission and many objections</p> <p>Stantec ignore recent industrial sites at Hadley Pig Farm and Lowesdon (min. 10 new units)</p> <p>"LAM6 has 8 bus stops within 400 metres". There is one bus stop, once a day service, dangerous to walk to given the access roads are narrow, unlit and dominated by HGV's. They conclude Ramsbury Rd "has reasonable access" with little HGV constraint. Not true and upsettingly, HGV's already use short cuts to Membury on tiny lanes via Chilton Foliat. LAM6 is defined as previously developed land. This is untrue. It is a field.</p> <p>WBC Policy guidance gives presumption in favour of Sustainability, yet LAM6 has no alternative access unless by motorised vehicles. This is simply unsustainable as stated by WBC Highways</p> <p>The Council's own Environment expert, Liz Allen, in her July 2020 paper states: "Increased traffic will have a further adverse impact on the rural quality of Ramsbury Road and tranquillity levels within the wider area" Development "proposals do not comply with Policy ADPP5 and CS19" WBC's Core Strategy.</p>	<p>developments. The majority of existing DEAs are located in Newbury and to the east of the District. The ELR notes that the site could support the rural economy, and is better placed than other promoted sites in the AONB. The proposed expansion in Membury, where the planning application illustrates that there is demand for such use, with jobs created which local residents can make use of.</p> <ol style="list-style-type: none"> <li>4. Sustainable construction and renewable energy generation can help in achieving emissions reduction. Development will be expected to comply with Proposed Submission LPR Policy SP5 and Policy DM4 relating to climate change and sustainable building.</li> <li>5. Membury Industrial Estate is accessible to the M4 and to the A338. The West Berkshire Freight Strategy (2009) recognises Membury Industrial Estate as a key industrial site, and has the B4000 as part of the District Freight Route. The Highways Authority consider that there is capacity in the local transport network to accommodate development. The Highways Authority are concerned that the site is not in a sustainable location. In rural areas the NPPF recognises that land for employment may not be in accessible locations.</li> <li>6. Job creation is a benefit to promoting employment opportunities in this end of the District. Skilled workers, attracting varying degrees of pay, are required in jobs such as logistics (engineers, managers, HGV drivers).</li> <li>7. It is recognised that planning permission was not granted at the time of drafting the ELR, and there was no direction given as to whether planning</li> </ol>

Respondent (with lpr ref)	Response	Council Response
	<p>Rethink the LPR plans regarding industrial land extension and find more relevant locations in the eastern part of West Berkshire where the demand for facilities lie.</p>	<p>permission would be granted or not. The site is not previously developed land.</p> <p>The ELR takes account of all commitments when assessing the supply of employment uses. Should sites have not been promoted to the Council and therefore not assessed in the HELAA the ELR would not make specific reference to them.</p> <p>It is recognised there is a limited bus service serving the locality. The NPPF, at paragraph 85, outlines that planning policies should recognise that employment sites in rural areas may have to be found beyond existing settlements, and in locations that are not well served by public transport. The Transport Assessment and Travel Plan, which the site specific policy will require of the development, will seek to ensure that development is appropriate to local roads and encourage sustainable travel modes (e.g. car sharing, busing in staff, cycling and provision of showers and suitable storage at place of work).</p> <p>8. The Council is duty bound to take account of the effect of development on designated landscapes, such as the Area of Outstanding Natural Beauty. Further landscape assessment has been undertaken, as part of a Landscape Sensitivity and Capacity Assessment (LCA) for a number of sites in the Local Plan Review.</p> <p>The LCA for this site identifies a loss of open land, loss of open views within the AONB, and loss of quiet rural character and rural character of Ramsbury Road as potential impacts of</p>

Respondent (with lpr ref)	Response	Council Response
		<p>development. In terms of the impact on the existing PEA the fragmented character allows the undeveloped areas in-between to retain characteristic landscape features of the AONB, therefore mitigating and reducing the overall effect of the PEA on the AONB. The proposed site connects four of these together, which would result in one large area and the potential loss of these mitigating landscape features.</p> <p>Opportunities to propose substantial areas of tree and woodland planting as part of mitigation measures would not be out of character. Woodland would help, in time, to integrate and screen any proposed development as well as enhancing the area.</p> <p>The LCA recommends that development is limited to a focused area, to the eastern part of the submitted site. This reflects the development area outlined in the planning application (19/02079/OUTMAJ). It is considered such recommendations must be followed, and the policy will list criteria, as suggested in the LCA for the reserved matters application, or any other scheme, to be implemented.</p> <p>The LPR also identifies site allocations in the Eastern part of the District.</p>
Meg Randall (lpr1442)	I am writing to oppose the recent plans made for housing and offices in whitehart meadow, Theale sewage works and the field next to the m4 junction 12. I believe it is of great importance to keep these few areas of wildlife we still maintain in Theale and for a village so quaint and with such character these unlikely areas contribute greatly to the feel of the village. In times like these we have learned how important nature is to a community	<p>Comments noted, in relation to offices (residential considered under responses to Emerging Draft LPR Policy RSA16 and Policy RSA17).</p> <p>No public rights of way are present across the site proposed in the Regulation 18 version of the LPR. It is</p>

Respondent (with lpr ref)	Response	Council Response
	<p>such as the one in Theale. These areas are the only accessible walks within the village out of the way of houses and the only thing I believe can improve Theale would be more wildlife and walks! This has benefitted my mental health greatly as well as other people's and I strongly believe we need to maintain these natural and fascinating locations rather than expanding a village that has always thrived off of its old and quaint character.</p> <p>Thank you for taking the time to read my email and I really hope you take this into consideration</p>	<p>recognised that public footpaths are present on adjacent land, planned for housing). THE8 is a privately owned site, and was not promoted for Green Infrastructure.</p>
<b>Landowners, site promoters and developers</b>		
<p>Rooksnest Estate Office (Mr Robert Price) (lpr1240)</p>	<p>Does not agree with the proposed policy.</p> <p><b><u>Arguments against LAM6 site at Membury under LPR 2037 plans</u></b></p> <ul style="list-style-type: none"> <li>• Economic forecasts show industrial job growth coming from the East of West Berkshire and not in the extreme West where this site is located with minor poor road access to the M4</li> <li>• The proposed site is located in a protected AONB area, and is deemed unsustainable by both the County's own Highways and Environmental Planning experts</li> <li>• Over a third of all proposed industrial expansion is at LAM6 in the <u>Western area</u>. Pro Vision (Luke Vallins) for Mr and Mrs Mathew Pittard (lpr1965)	<p><i>Representation promotes the allocation of Land at Lower Way Farm, Thatcham. Full representation is attached as a response to Policy SP13 Sites allocated for residential and mixed-use development in Newbury and Thatcham.</i></p> <p>Policy SP21 sets out the sites within the District that are allocated for “economic development”.</p> <p>The supporting text (paragraph 7.12) confirms that “National policy sets out the definition of economic development which goes beyond employment to include main town centre uses, as well as community and public uses.”</p> <p>However, it notes that “This policy deals with business development in order to ensure the health of the District’s Designated Employment Areas are maintained.”</p>	<p>Comments noted.</p> <p>It is recognised that the site currently contains small scale commercial units and retail outlets. It is not considered that the site is suitable for larger scale development, and the existing space functions well, given the constraints on site.</p> <p>DM policies would guide any new development or redevelopment of the site, including Proposed Submission LPR Policy DM35 (Sustaining a Prosperous Rural Economy).</p>

Respondent (with lpr ref)	Response	Council Response
	<p>In addition to the land at Lower Farm Way that our client is promoting for residential development, our client owns the commercial premises to the south and west of the site known as “Lower Way Farm Riverside Studios”. The premises comprise the former farm buildings of Lower Way Farm. The former farm buildings have now been converted to form a number of small-scale commercial enterprise units and is a thriving example of diversification. The commercial area includes a café together with studios and retail outlets. Strategic Objective 4 of the draft Local Plan seeks “<i>To facilitate and support a strong, diverse and sustainable economic base across the District, including the provision of employment land which provides for a range of local job opportunities.</i>”</p> <p>Given the success of Riverside Studios as an established local employment premises, its allocation for economic development would fully comply with this Strategic Objective, safeguarding the modest level of employment opportunities that it provides.</p> <p>We therefore recommend that the site is allocated in the Local Plan Review for this use and the settlement policy boundary is re-drawn accordingly to include the site.</p> <p>We therefore recommend that the site known as “Lower Way Farm Riverside Studios” is allocated in the Local Plan Review for commercial use and the settlement policy boundary is re-drawn accordingly to include the site.</p>	
Caroline McDade (Deloitte) for Green Park Reading No. 1 LLP (lpr2029)	<p><i>Full representation attached in relation to Green Park, Reading</i> <u>Policy SP21 Sites allocated for economic development</u></p> <p>Policy SP21 identifies several extensions to Designated Employment Areas and one new Designated Employment Area. It also identifies five sites that are well established employment areas and sets out that their importance to the local economy will be recognised by classifying them as Designated Employment Areas.</p> <p>It is recognised that the majority of Green Park falls within the administrative boundary of Reading Borough Council and is designated as a Core Employment Area in the adopted Reading Borough Council Local Plan. It would therefore be appropriate for the area of Green Park located in West Berkshire to be classified as a Designated Employment Area to reflect its</p>	<p>Comments noted.</p> <p>Green Park itself lies outside of West Berkshire District, and it is therefore not possible for the Local Plan to apply a designation to this site through the LPR.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>existing uses. GPR requests that Policy SP21 be amended to include Green Park and for the Site to be allocated as a Designated Employment Area. GPR is also seeking an allocation for the part of the Site that lies within Wokingham Borough Council's jurisdiction.</p> <p>Paragraph 24 of the National Planning Policy Framework identifies that Local Planning Authorities have a duty to co-operate with each other on strategic matters that cross administrative boundaries. GPR considers classifying the area of Green Park that falls within West Berkshire as a Designated Employment Area would provide continuity to the existing Core Employment Area in Reading.</p> <p>The Employment Land Review (ELR) which supports the LPR identifies that a minimum of 65,000 sqm of office floor space will be required over the plan period. Classifying Green Park and the Site as a Designated Employment Area will allow suitable office and business uses to come forward easily in the areas of Green Park within West Berkshire and to provide a natural future pipeline of employment land to meet longer term demand. This will allow for the sustainable growth of office and business space at an existing and well established employment location.</p>	
<p>Mr Geraint Jones (Savills) for Newbury and District Agricultural Society (lpr2046)</p>	<p><i>Full representations attached</i></p> <p>Savills' research evidence suggests that prior to the Covid-19 pandemic, the warehousing market along the 'M4 corridor' was already chronically undersupplied with just 0.56 years of supply in 2019.</p> <p>Furthermore, the share of all online retail sales is expected to normalise at around 24% in the UK, well-above the pre-Covid trend, and then will continue to grow. This demonstrates that the logistics and distribution sector is experiencing rapid growth, and the market along the M4 corridor is mirroring existing trends.</p> <p>In order to respond to this demand, and maximise economic growth and enhance opportunities for local job creation, the LPR should take account of the regional and national market trends relating to the logistics sector and allocate land adjacent to the strategic road network. NADAS proposes the Land at Newbury Showground as the most appropriate location to meet this strategic need given the access to both the M4 and A34.</p>	<p>Comments noted.</p> <p>Sites identified through the HELAA, the call for sites, and Regulation 18 consultation have been assessed for their potential to be allocated for employment use. All site assessments can be found in the HELAA and the site selection process is documented within the SA/SEA published alongside the Regulation 19 consultation.</p> <p>A Landscape Sensitivity and Character Assessment (LCA) has been undertaken for the site. The LCA recommends that the whole site is not considered appropriate for employment, though part of the site could be developed subject to a number of requirements. The site is within the AONB, not related to an existing employment area, and largely open in character. The intrusion of more modern</p>

Respondent (with lpr ref)	Response	Council Response
	<p>A summary of the potential of the Land at Newbury Showground to accommodate a new logistics hub is set out within the next section of this document.</p> <p>These representations are accompanied by a Vision Statement which sets out the background to our client's interests on the Land at Newbury Showground, evidencing how the site can be delivered as a logistics hub to help meet the employment needs of the local area and responding to wider regional and national trends.</p> <p>The Vision Statement also identifies the key opportunities and constraints to development and presents a strategic design layout on the distribution of development across the site.</p> <p>The Land at Newbury Showground extends to approximately 52ha, and is located immediately to the north east of M4 Junction 13. Following the Society's decision to restructure its operations, a new use will need to be found for the Showground site. Given the site's ability to respond to the existing and growing demand in the logistics market through its excellent highway connections, an allocation for a strategic logistics hub is proposed. It is our client's view that the economic evidence underpinning the LPR fails to sufficiently account for regional and national economic needs, notably in relation to the chronic shortfall of B8 logistics and distribution uses along the M4 corridor and the significant anticipated growth that needs to be accounted for.</p> <p>In the context of finding new sites for logistics uses, the online PPG itself emphasises that such facilities are likely to require good access to strategic transport networks and access to appropriately skilled labour. It is our view that the scale and nature of a site to meet regional/national logistics needs is not appropriate to locate adjacent to the existing urban areas, and is best met directly adjacent to the motorway network.</p> <p>Our client owns the Land at Newbury Showground, which is adjacent to Junction 13 of the M4. The land is available for redevelopment as the Society is repositioning itself in terms of its response to its core aims and reducing its exposure to the costs associated with maintaining and operating such a large site.</p> <p>The site benefits from excellent highways connections, providing good road access across the south of England.</p>	<p>incursions, including large scale buildings, noise and lighting would erode the traditional and rural landscape character of the area.</p> <p>Therefore, there are focused design parameters to guide development on the area identified as suitable for development within the LCA. This includes retaining existing fields, including a landscape buffer, limiting the height of buildings, consideration of the roof profile, scale and colour of buildings, access, and light pollution.</p> <p>National Highways do not object to the impact of the proposal on the Strategic Road Network, however the Highways Authority do have concerns regarding impact on the local road and the sustainability of the site.</p> <p>The site promoters have confirmed that the site is no longer available, and therefore will not be progressed.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The site is generally flat, has a low risk of flooding and is free of any notable historic and ecological designations.</p> <p>The extent to which the AONB designation covers West Berkshire means that meeting the need identified for strategic logistics allocations is likely to require development within the AONB. Whilst the attributes of the AONB are recognised, this must be balanced against the fact that the Showground and the surrounding area contains a series of urban influences (which mainly relate to the strategic highway network, but also existing industrial/commercial development) which partly degrades this part of the AONB.</p> <p>The physical and locational advantages of this site, coupled with an identified and urgent need for new strategic logistics (B8) sites along the M4 corridor, are considered to justify the allocation of the site for a new logistics hub within the emerging plan.</p>	
Barton Willmore for Copas Farms (lpr2061)	<p>Our client owns land directly adjacent to the Beenham Industrial Area. The Beenham Industrial Area, which is also within our client's ownership, is an Existing Designated Employment Area (Appendix 6 of the Reg 18 document). This Designated Employment Area was originally designated (previously known as a 'Protected Employment Area') through the West Berkshire District Local Plan 1991 - 2006, and Beenham Industrial Estate is a collection of mixed B uses. At the time of writing the Beenham Industrial Estate is fully occupied and has remained at or very close to full occupancy during my client's ownership of the site.</p> <p>Our clients are promoting land, which they own adjacent to the Beenham Industrial Estate for a 15,000 sqm site extension of a mix of employment uses (Class E, B2 and B8) to provide smaller incubator/starter units, which would form a logical extension to the existing Beenham Industrial Designated Employment Area as explained in further detail below.</p> <p>The clients are aware that this land does lie within the AONB. However due to the surrounding employment context which is also well contained by existing vegetation located on the boundaries of the site, the flat topography of the site, and limited views from both into or out of the site; it is considered that this site does not have any landscape and scenic beauty and as such does not contribute to the AONB or warrant the need for any elevated landscape protection. The established boundary vegetation could</p>	<p>Comments noted.</p> <p>Sites identified through the HELAA, the call for sites, and Regulation 18 consultation have been assessed for their potential to be allocated for employment use. All site assessments can be found in the HELAA and the site selection process is documented within the SA/SEA published alongside the Regulation 19 consultation (BEEN11).</p> <p>The ELR comments that there are no industrial units available at Beenham. The zero-vacancy rate reflects the small nature of the industrial market in this location.</p> <p>A Landscape Sensitivity and Character Assessment (LCA) has been undertaken for the site. The LCA does not recommend the site as suitable for development. Although the site is located in proximity to the PEA it also lies adjacent to open countryside to the SW and SE. The two PRoW which both align the site provides good access to the countryside which retains a well intact rural character.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>also be retained as part of any development proposal. It should also be emphasised that this site lies on the edge of the AONB which is not only seen in the context of the surrounding/adjoining large scale existing employment uses (such as the adjoining Marley brick works), but the site also lies within proximity (to the south of the site) of the built-up area of Aldermaston Wharf. Furthermore, in consideration of paragraph 172 of the NPPF, we would argue that employment uses at this site would not be considered 'major development' when taking into account its nature, scale and setting.</p> <p>Furthermore, it is considered that this is a sustainable location for employment uses. As indicated by the attached 'Local Facilities Plan', this site is accessed off the A4 which provides a direct route to the large conurbations of Reading and Newbury, in addition to the M4 (Junction 12 of the M4 is only approximately 7.5km from the site). The site is also less than a kilometre from Aldermaston Station whereby trains run hourly providing access to Reading and Newbury. Bus stops are also located within a kilometre of the site, located along the A4, whereby buses run two an hour (the 'Jetblack 1' route), again providing access to the conurbations of Reading and Newbury, and other local settlements including Thatcham and Theale.</p> <p>Our client therefore considers that 'land adjacent to Beenham Industrial Area' will support the existing employment uses at the Beenham Industrial Area, as an extension to this DEA, which will further assist the District in meeting its economic objectives, in particular, to provide space for smaller incubator/starter units. This approach is in line with paragraph 82 of the NPPF, by locating such uses adjacent to an existing DEA, that will assist in developing clusters or networks of knowledge and will also support the provision of storage and distribution operations in a suitably accessible location off the A4 and close to the M4. Paragraph 82 of the NPPF is also mindful of providing operations of a "variety of scales" and as set out above, my clients wish to support the vital role that smaller companies and businesses play in the District by providing new smaller units. The spatial approach here also meets the objective of draft policy SP20 which, as indicated above, states that employment development to meet the existing</p>	<p>In terms of impacts, including on the AONB, there would be a loss of open rural character and a grass field, typical of the AONB within this area; introduction of more modern inclusions including large scale industrial buildings, noise and external lighting adjacent to the two PRowS, and resulting adverse effect on their rural character and amenity value; and loss of open setting of mature trees. The site would join up two fragmented PEAs. Although there is potential to enhance the woodland character of the area this would also block the views into the AONB and across the area to the Kennet Valley side. Mew mitigation measures would therefore be visually damaging to this area.</p> <p>This site, Land at Beenham Industrial Estate is not proposed for allocation in the Regulation 19 version of the LPR, following landscape advice.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>and future economic demands for business use will be directed to Designated Employment Areas.</p> <p>Draft Policy SP21 (Sites allocated for economic development) includes a list of extensions to DEAs for industrial, storage and distribution uses. On the basis of the above, our client considers that 'land adjacent to Beenham Industrial Area' should be included within the list of DEA's to be extended to support the District in meeting its employment needs, in particular the opportunity for creating space for smaller incubator/starter units. Our client considers that this land will be able to provide 15,000 sqm of floorspace all of which could be delivered within the plan period.</p>	
Pro Vision for The Wasing Estate (lpr2068)	<p>In relation to Larkwhistle Farm, Brimpton (full representation attached)</p> <p>Draft Policy SP21 sets out the sites allocated for economic development. It has identified just one site (Theale East Business Centre) for the delivery of new employment floorspace of 20,000sqm. This is well below the identified need of 65,000sqm. Identifying such a small proportion of the overall requirement is highly inadequate. The LPR should go further and identify sufficient deliverable sites to meet the employment needs of the District.</p> <p>Pro Vision</p> <p>We consider the site to be suitable as an employment site and should be considered as an identified employment site in the LPR.</p> <p>Larkwhistle Farm is within close proximity (approximately 600m) to Calleva Park, a Designated Employment Area and could be seen as an extension to this Area. Employment uses at the site would be compatible with the uses in the surrounding area, as described above and therefore would not result in conflict with these neighbouring occupiers.</p> <p>The site is of a sufficient distance away from existing residential development as well as there being intervening fields, meaning there would be no harm to residential amenity.</p>	<p>Comments noted.</p> <p>Emerging Draft LPR Policies SP20 and SP21 set out the Council's strategic approach to business development, which seeks to encourage such development to locate within settlement boundaries and Designated Employment Areas (DEAs), as well as existing employment locations and allocated sites. The policies also set out allocations to provide additional employment land to assist in meeting the District's needs over the plan period.</p> <p>Sites identified through the HELAA, the call for sites, and Regulation 18 consultation have been assessed for their potential to be allocated for employment use. All site assessments can be found in the HELAA and the site selection process is documented within the SA/SEA published alongside the Regulation 19 consultation.</p> <p>The lies within the DEPZ for the AWE and following advice from the Emergency Planning Department, no site allocations are taken forward within the DEPZ.</p>

Respondent (with lpr ref)	Response	Council Response
Pegasus Planning Group Ltd for Greystoke Land (lpr2090)	<p>The Employment Land Review of August 2020 acknowledges that there is a demand for larger B8 distribution sites in close proximity to the M4 motorway junctions (paragraph 6). It is also identified that there is a current market shortage of industrial sites to meet needs (paragraph 12). In this context, the Employment Land Review estimates a need to allocate at least 16ha of industrial land (paragraph 6.65). The Employment Land Review is however clear that where a site is attractive to logistics it should be considered favourably even if it is in excess of this identified minimum need (paragraph 2.34) owing to the fact that logistics occupiers play a sub-regional or regional role and that as such they are likely to seek the most suitable and well-connected locations regardless of the very local demand (paragraph 2.33). The Employment Land Review highlights that Newbury has a stronger demand for industrial land than other locations in the Authority area (paragraph 4.94). It states that this is due to the fact that the demand in Newbury arises from regional and national occupiers attracted to the area due to its direct links to the motorway and access to the M3 and A339 which are factors that would also be desirable to the logistics sector. The Employment Land Review highlights that notwithstanding this strong demand at Newbury none of the promoted industrial sites are at Newbury. As a result the non-allocation of sites at Newbury to meet some of the identified minimum need for industrial land or the additional needs for logistics would result in an imbalance between the demand for and supply of industrial including logistics floorspace (paragraph 13). Therefore, the Employment Land Review is clear that opportunities for the delivery of industrial land should be allocated at Newbury to provide a balanced portfolio across the District and that opportunities to cater to the logistics market should be supported.</p> <p>The latter of these conclusions was reached even without taking account of the implications of the current pandemic (paragraph 1). The pandemic has had significant implications on the way in which people shop as is evident from the fact that online sales accounted for 27.9% of all retail sales in 2020 as compared to only 19.2% in 2019 according to the ONS. It is critical to acknowledge is that the issue can be observed both at the local and national</p>	<p>Comments noted.</p> <p>Sites identified through the HELAA, the call for sites, and Regulation 18 consultation have been assessed for their potential to be allocated for employment use. All site assessments can be found in the HELAA and the site selection process is documented within the SA/SEA published alongside the Regulation 19 consultation.</p> <p>The ELR comments that the industrial market across West Berkshire is performing well, with low vacancy and a tight supply for smaller units (up to 5,000sqm) which sees the most take up activity. Whilst there is demand for larger B8 distribution this tends to be at the motorway junctions, particularly at Theale. Occupiers across all building sizes range from local to national businesses and covering a wide variety of business activity with no specific sector driving demand. The Covid19 pandemic has strengthened the industrial market further, with strong demand resulting in an increasingly constrained market.</p> <p>A Landscape Sensitivity and Character Assessment (LCA) has been undertaken for the site. The LCA does not recommend the site for development. The site is within the AONB, not related to an existing employment area. There would be a loss of open character and grass fields, which forms part of the mosaic of fields within this area; erosion of the rural character of Priors Court Road, the PRoW, Ashfield's Farm Industrial Estate and Cottages, by the introduction of modern buildings eroding the rural character of the area. This in turn adversely impacts on the AONB. An increased level of development, external lighting and noise levels would erode the rural qualities and the open character of the area.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>scale. Accordingly, the need to allocate land suitable for logistics will have increased significantly to cater to this growing demand.</p> <p>According to Reuters<sup>1</sup>, the warehousing sector had witnessed a sustained growth nationally and worldwide before the pandemic. The British Retail Consortium identified that the pandemic has only accelerated the transformation of an already changing industry and highlighted the underlying reasons for this change including the availability of technology and its impact on how people shop as well as growing costs for the retail sector. This sustained growth and the recent spike due to COVID-19 has resulted in an additional demand and premium on a warehouse space. This is highlighted in the RICS Commercial Property Market Survey from Q2 of 2020<sup>2</sup> which indicated that the prime industrial rents have marked a 2% growth and outperformed the sector at the national level and within each region/country of the UK. The figures from first half of 2020 brought a record 14.6m sq ft of warehouse floorspace transacted across the country, which is already 14% above the average in the first half of any previous year notwithstanding that the results do not yet reflect a full half-year. It is anticipated that the long-term structural trends, including the growth in online shopping, urbanisation and the need for data centres to support the digital economy will continue into the future and may even be strengthened by the pandemic.</p> <p>.</p> <p>The Reuters report also identifies that the constrained supply of warehouse and industrial land presents a real challenge especially over the next five years.</p> <p>The demand for such uses could be strengthened by the UK's departure from the EU. The UK's recent departure has significant implications for the way in which businesses operate particularly so for those businesses that import or export to and from the EU. As a result, businesses are likely to require a greater amount of warehousing floorspace including to secure the necessary supply to support their continued operation. Accordingly, not only as a result of underlying structural trends but also as a direct result of both the pandemic and the UK's departure from the EU the demand for industrial and logistics floorspace is likely to be greater than identified in the</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>Employment Land Review which has not taken these latter factors into account.</p> <p>Notwithstanding the fact that the Employment Land Review has not reflected these changing circumstances, it nevertheless recommends firstly that sites attractive to the logistics sector should be considered favourably even where these are in excess of the identified minimum need (paragraph 2.34) and secondly that there is a particular demand for industrial floorspace in Newbury (paragraph 4.94).</p> <p>These recommendations of the Employment Land Review are however not reflected in the Site Selection Background Paper which simply responds to the need to allocate 16ha of industrial land without taking account of the need for sites at Newbury and the need to support additional opportunities for logistics development. This has informed Policy SP21 which does not reflect the evidence of the Employment Land Review and as a result is unsound. In particular, it does not:</p> <ul style="list-style-type: none"> <li>• Allocate industrial sites at Newbury which are necessary to provide for the balanced portfolio alluded to in the Employment Land Review.</li> <li>• Allow for the favourable consideration of sites attractive to logistics as recommended by the Employment Land Review. Instead, it does not provide any framework for the consideration of planning applications for such uses. Policy SP21 is therefore not positively prepared, justified by reference to the Employment Land Review or effective in meeting the demand for logistics. Whilst the Employment Land Review was prepared in the absence of any sites being promoted at Newbury, Greystoke Land now wish to promote the site at Land North of Newbury Showground which responds precisely to the needs identified in the Employment Land Review as it is located close to Newbury, adjacent to a junction of the M4, and offers an attractive location for logistics. The only constraint which affects this site is that it is located within the AONB.</li> </ul> <p>As set out above, the Council's evidence demonstrates a need for industrial development at Newbury in close proximity to the M4 junction and a particular need to support the delivery of sites attractive to the logistics</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>market. It is also evident that the demand in Newbury arises from regional and national occupiers attracted to the area due to its strategic location. The Council's evidence also indicates that there is no scope for meeting this need elsewhere and insofar as any environmental harms would arise from the development of the Land North of Newbury Showground these would be outweighed by the benefits of meeting the need. As a result, the allocation of this site would accord with paragraph 172 of the NPPF.</p> <p>The Employment Land Review (paragraph 6.65) and Policy SP21 suggest that there are exceptional circumstances to justify the allocation of Land West of Ramsbury Road, Membury notwithstanding that this part of the District has low market attractiveness. The same conclusion must be reached with respect of Land North of Newbury Showground which responds precisely to the needs identified in the Employment Land Review both in terms of location and use unlike the proposed allocation at Land West of Ramsbury Road.</p> <p>In order to make Policy SP21 sound, two amendments are necessary as follows:</p> <ul style="list-style-type: none"> <li>• A site or sites will need to be allocated at Newbury to provide a balanced portfolio of sites, including the Land North of Newbury Showground. A location plan for this site is appended to these representations.</li> <li>• An additional paragraph should be added to the Policy to identify that applications for sites which are attractive to logistics will be considered favourably as set out in the Employment Land Review.</li> </ul>	
<p>Savills for Lambourn Business Park (lpr2105)</p>	<p>We write on behalf of Lambourn Business Park. The Park provides office, storage and industrial space, south of Lambourn itself in Lambourn Woodlands (close to Membury). The Business Park focuses on providing flexible, cost effective accommodation for local businesses. It enjoys a strong location between Swindon and Newbury and close to Junction 14 of the M4. Full details can be seen at <a href="http://lambournbusinesspark.co.uk">lambournbusinesspark.co.uk</a>.</p>	<p>Comments noted.</p> <p>Sites identified through the HELAA, the call for sites, and Regulation 18 consultation have been assessed for their potential to be allocated for employment use. All site assessments can be found in the HELAA and the site</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The estate was formerly known as Lowesdon Works but has since been rebranded. Accordingly the site is identified as a Designated Employment Area (Appendix 6) as Lowesdon Works and we would request that the Local Plan is updated to identify the site as Lambourn Business Park. We support the identification of the site as a Designated Employment Area. However, we request that the Local Plan Review reflects the contribution that the Lambourn Business Park could make to the West Berks economy. We note that the Local Plan Review suggests extensions to various Designated Employment Areas at Thatcham, Aldermaston and the Membury Industrial Estate at Lambourn Woodlands. There appears to be no justification as to why these Designated Employment Areas are considered to be appropriate for expansion whilst the Lambourn Business Park is not considered appropriate. We consider that the Lambourn Business Park is entirely suitable for expansion and indeed enjoys an extant planning permission for new building. The Local Plan Review should be updated to reflect this.</p> <p>There are two potential areas for expansion at the Lambourn Business Park. The first area (shown in blue) would expand the site up to the built form and tree boundary at the western edge of the site. Most of this land benefits from an extant planning permission for development (planning reference APP/W0340/A/12/2177100 (LPA ref 11/01822/OUTMAJ) for erection of buildings to accommodate "increased storage and warehousing facilities and ancillary training and office facilities, associated car parking, landscaping, surface water drainage storage, and associated works"). At the very least, the Local Plan Review should be updated to reflect the extant planning permission.</p> <p>Additionally there is the potential to expand the Lambourn Business Park southwards as far as the existing southernmost part of development (shown in green).</p> <p>The expansion of the Lambourn Business Park would contribute to the identified need for c60,000 sq m of industrial floorspace over the plan period. It would build on the success of an existing Designated Employment Area in a location that has proven to be successful. Additional floorspace at the</p>	<p>selection process is documented within the SA/SEA published alongside the Regulation 19 consultation.</p> <p>The ELR commented that the existing employment space is fully occupied, and a mix of mostly light industrial and some office. To support the creation of job opportunities in the more western rural areas the ELR recommended that PEA boundaries could potentially be extended at the Membury Estate. The context of the AONB needs to be considered.</p> <p>Landscape Character Appraisal to inform the Lambourn Neighbourhood Development Plan (2020): the appraisal provides a more detailed assessment of Lambourn Parish. The site is located within the Wooded Downlands (LCA2), described as an area comprising of arable fields and multiple stands of woodland that very likely formed a much bigger area of continuous woodland. Recommendations to plan, manage and protect distinctiveness of LA2 include ensuring that the Sites of Special Scientific Interest (SSSI) remain in 'favourable' condition, and that grassland habitats are conserved and enhanced; conserving and enhancing biodiversity value through protection of the SSSI, Local Wildlife Sites and priority habitats and seek opportunities for maintaining/enhancing connectivity between these sites/ habitats; protect the rural setting and secluded nature of settlements and farmsteads; the settlement patterns throughout the area is dispersed and very low density; its character is enclosed and in harmony with the landscape.</p> <p>The site is located outside of any settlement, however the eastern part of the site lies within an existing Protected Employment Area (renamed Designated Employment Areas (DEA) through the LPR) (Lowesdon Works Industrial</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Lambourn Business Park would give the employment area greater critical mass and increase its attractiveness to local businesses. Other employment areas within West Berkshire have been identified for expansion and there is no reason why the Lambourn Business Park should not also be considered.</p> <p>The NPPF requires planning policies to help create the conditions in which businesses can invest, expand and adapt. Significant weight should be placed on the need to support economic growth and productivity (paragraph 80). Paragraph 84 states that planning policies and decisions should recognise that sites to meet local business needs in rural areas may have to be found adjacent to or beyond existing settlements. The identification of a small expansion of Lambourn Business Park would accord with those policy objectives.</p>	<p>Estate/Lambourn Business Park) and comprises of various industrial uses. The site was previously a World War II camp, and the western part of the site retains some of the redundant World War II buildings.</p> <p>Given the location of the site within the AONB a Landscape Sensitivity and Capacity Assessment has been prepared to establish if development on the site would result in significant harm to the natural beauty and special qualities of the AONB could be overcome. The assessment concludes that development across the western area of the site and redevelopment within the existing PEA would be acceptable certain to the following mitigation measures: The Local Plan will be updated to reflect the change in the name to Lambourn Business Park.</p> <p>The ELR acknowledges that the site was promoted through the HELAA for residential. The retention of the employment floor space is considered, and provides a valuable employment resource in the rural west (Appendix A – Site Assessments, Existing Sites). It was recommended to safeguard the site. The existing Designated Employment Area will be retained. However, although the planning permission to extend the site to the west has been implemented by way of constructing the access, no other works have been undertaken.</p> <p>The extant planning permission has been considered, and a Landscape Character Assessment (LCA) commissioned. The visual and landscape sensitivity is low to medium, and as the site is within the AONB the landscape value is medium to high. The landscape capacity is therefore low to medium.</p>

Respondent <i>(with lpr ref)</i>	Response	Council Response
		<p>The site is located in the AONB, and the LCA noted that the site sits in a poor quality landscape, with poor quality buildings. The site is in an elevated position and visible from public rights of way. The site is set back from the B4000 and well enclosed within woodland.</p> <p>The site (at the time of the LCA) has a semi derelict character with no landscape features of value, and potentially development could enhance this area of the AONB, with mitigation measures to include tree planting. Tall, large scale buildings would be out of character with the landscape resulting in an adverse impact. Increased site traffic could impact on noise levels. External lighting could impact on dark skies and further light pollution in the AONB. Development across the western part of the site and redevelopment within the existing PEA could be considered subject to mitigation regarding landscaping and tree planting, limitation of building heights, and restriction of external lighting.</p> <p>It is acknowledged that recent planning permissions on the site have resulted in the demolition of buildings – the Council will monitor this site going forward.</p> <p>As part of the evidence base which informs the Local Plan Review the Council has undertaken a review of the District's Protected Employment Areas, to be renamed Designated Employment Areas (DEAs). As part of this work, the Lambourn Business Park site including the parcels of land identified within this representation has been considered and subject to a landscape sensitivity and capacity assessment. The conclusions of the DEA review work and Landscape Sensitivity and Capacity Assessment will be published alongside the Regulation 19 consultation.</p>

Respondent (with lpr ref)	Response	Council Response
DHA Planning Ltd for Lee Chapman (lpr2109)	<p>In reference to EMP4 (full rep attached). We refer to the Draft allocation and the main objective of this submission is to support the allocation. However, we do ask that the whole of the former raceway site is included in the allocation.</p> <p>Our request to extend the economic development area to include the southern part of the site is supported by a strong evidence base. An evidence base which has been tested and validated by Ecological and Arboricultural consultants.</p> <p>We therefore formally request that the Policy allocation is extended to encompass the “developable area” as shown on the attached plan, with the potential floorspace figures adjusted to the table as set out on the plan.</p>	<p>Comments noted.</p> <p>It is recognised that outline planning permission has been granted. A reserved matters application has yet to be submitted. As the site is within close proximity to the Aldermaston Atomic Weapons Establishment there is an objection to the allocation of the site as an inclusion in the designated employment area. Whilst there is outline planning permission for employment development there is no reserved matters application in or determined. Whilst this may happen at this point in time the site cannot be factored in to the offsite emergency plan and therefore, at a plan making level, attracts an objection from emergency planning and the ONR.</p> <p>The lies within the DEPZ for the AWE and following advice from the Emergency Planning Department, no site allocations are taken forward within the DEPZ.</p>
Pegasus Planning Group for Walker Logistic Ltd (lpr2295)	<p><i>(In relation to EMP5, Land West of Ramsbury Road, Membury Industrial Estate)</i></p> <p>Walker Logistics (Holdings) Ltd. are pleased to see that the recommendation to allocate 'Land West of Ramsbury Road' for industrial, storage and distribution uses has been carried through to the Emerging LPR and that WBC have been proactive in allocating sufficient floorspace, as identified in the ELR, to adequately support economic growth in WBC.</p> <p>The designation of EMP5 will make an important contribution to the identified need for employment floorspace within West Berkshire.</p> <p>To confirm that the site is owned by Walker Logistics (Holdings) Ltd., it is in a suitable and sustainable location for development and is therefore a viable and deliverable option.</p> <p>Walker Logistics is primarily an e-fulfilment and value added services supply chain business. They manage the storage and fulfilment requirements of circa 45 businesses operating in fast moving commercial goods industries and have been operating from the Membury Industrial Area since 1999. Their operations which commenced on site in the 1990's are currently at</p>	<p>Comments noted.</p> <p>Information on deliverability and viability is noted.</p> <p>The Local Plan is landscape led, and the AONB covers 74% of the District. The primary purpose of the AONB designation is to ‘conserve and enhance the natural beauty of the area’, as set out in the Countryside and Rights of Way Act 2000. The Council has a duty to have regard to the primary purpose of designation. The AONB is a constraint to development, and as advocated in the NPPF, major development should only be permitted in exceptional circumstances. Given the objections received, as outlined above, further assessment on the effects of the landscape has been undertaken. The recommendations are to limit the development to a focused area, reflecting that set out within the Landscape Sensitivity and Capacity Assessment</p>

Respondent (with lpr ref)	Response	Council Response
	<p>capacity at Membury and, to continue to grow the business, require additional warehouse floorspace. Hence a planning application (Ref. 19/02979/OUTMAJ) was submitted in November 2018 for an additional unit.</p> <p>The Covid-19 pandemic has intensified the need for additional floorspace, The head count of employees at Walker Logistics has increased by over 50% since April 2020 and currently stands at a FTE of 160 operatives. The draft site allocation would help support Walker Logistics, to remain at Membury, continue to employ a significant quantum of local employees and to contribute to maintaining a strong rural economy through their continuous corporate agenda of utilising local suppliers where possible. The draft site allocation is a further endorsement, led by WBC, of the site's suitability based on matters relating to its location, contribution to the AONB and accessibility. However, these should be considered separately from and in isolation of the current application (Ref. 19/02979/OUTMAJ). The outcome of the application will be known in advance of confirmation of the Local Plan allocation through the Local Plan process. The sites proposed for allocation for employment uses under Draft Policy SP21 predominantly comprise extensions to existing DEAs. This is the correct approach. It is logical to review the boundaries of existing development areas where they are adjacent to DEAs; such sustainable extensions would ensure efficiencies are maximised and that development is best or properly integrated with functioning employment areas. The draft allocation (EMP5) would:</p> <ul style="list-style-type: none"> <li>a) Form a natural, high quality extension to the existing DEAs immediately to the north and south;</li> <li>b) Enhance efficiency of existing business operation and reduce unnecessary congestion on the highway network;</li> <li>c) Result in significant economic and social benefits, including new inward investment (construction and supply jobs) and generating new local, long-term jobs.</li> </ul> <p>On the basis it would not be possible to amend the AONB boundary to exclude the site, it is wholly appropriate to allow sustainable businesses to locate/grow in AONB in instances where the economic benefits outweigh any adverse impact on the AONB. It is crucial that the AONB landscape</p>	<p>and subject to design parameters. These would be factored in to the proposals map and the updated policy. The likely floorspace would be decreased from what is set out in the draft policy. At this stage is it not considered that the development of the whole site, or a floorspace of 40,000 square metres would be appropriate.</p> <p>The former runway forms part of the established history, character and landscape of the Membury airfield. Development on this part of the site would not be appropriate.</p> <p>The developable area, as recommended in the LCA, could deliver some 17,600 square metres of employment space, taking into account the standard plot ratios as set out in the HELAA. This still provides some flexibility over and above what planning permission has been granted for.</p> <p>However, it is recognised there are restrictions as per the planning application, and given these and the landscape buffer recommended in the landscape assessment, the allocated floorspace would be 10,381sqm.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>designation does not constrain development which would otherwise result in significant economic and social benefits for rural communities. And in this respect it comes down to the specific circumstances of the site and the contribution that it makes to the character and appearance of the AONB. In terms of EMP5, the site is well-contained by existing buildings and any development would 'infill' an existing gap between developed (PEA) sites to the north and south. In addition, part of the site includes a former runway, which comprises concrete/hardstanding, the visual amenity of which is not of benefit to the AONB.</p> <p>Development on the site (EMP5) would be master planned to ensure that there would be no harm to the role of the wider AONB. An appropriate landscape strategy could also be secured at application stage, to ensure substantial screening is provided.</p> <p>Walker Logistics (Holdings) Ltd. do not seek any changes to the draft site allocation (EMP5) in terms of the proposals map. We are aware of the reference to 27,600sqm floorspace set out in draft Policy SP21. The current application (Ref. 19/02979/OUTMAJ) cannot be used as a guide to influence the scale and form of development that can come forward particularly as it is in outline nature and siting is not a detailed matter. The entire allocated site can be developed more efficiently in terms of siting of buildings across the entire draft allocated site. Having regard to need for sufficient car parking and servicing yard space for deliveries as well as landscaping early feasibility studies have indicated the scope for up to 40,000sqm of mixed light industrial, industrial and storage/logistics warehouse accommodation could be delivered on the site.</p>	
AWE (lpr2299)	<p><i>See attachments for full response.</i></p> <p>AWE's comments build on existing policy support for development at AWE's sites at Aldermaston (AWE A) and Burghfield (AWE B) around Policy SP21. Reference is also made to Policy SP4 to ensure internal consistency between the policies in the Local Plan and to facilitate comprehensive, rather than piecemeal, plan-making for the proper sustainable planning of the area.</p>	<p>Comments noted.</p> <p>The Regulation 19 version of the LPR will contain a specific policy for AWE Aldermaston and Burghfield (Proposed Submission LPR Policy DM33). It is agreed that the sites should not be Designated Employment</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Disagree in part. The draft policies do not go far enough. Express policy support is required for development at AWE A and AWE B, taking forward the proposals for a bespoke policy designation for these sites in current Core Strategy Policy CS9 (b).</p> <p><b><u>Executive Summary</u></b>  The Local Plan should provide direct policy support for development at AWE A and AWE B. This is required to allow AWE efficiently to develop, modernise, rationalise and consolidate its estate footprints in accordance with the Government's investment programme, which responds to the Government's policy commitment to a nuclear deterrent for the UK. The additional Local Plan policy put forward by AWE in this representation would ensure that the Local Plan contains a planning policy, in accordance with National Planning Policy Framework (NPPF) paragraphs 95(b) and 182, to sustain, protect and promote the established strategic uses at the two sites and their important national security and local employment functions. Without such a policy, the Local Plan is unsound, does not reflect the requirements of Local Plan CS Policy CS9(b) and/or the NPPF.</p> <p>In addition to having a bespoke policy to support appropriate development at AWE A and AWE B, there is a clear need to protect AWE A and AWE B from inappropriate development in the DEPZ and/or the OPZ, particularly given the agent of change principle set out in the NPPF.</p> <p><b><u>Current position in the emerging Local Plan</u></b>  Currently, there is no direct policy support for sustaining, protecting and promoting the integrity and purpose of the existing strategic, locally and nationally significant sites and development at AWE A or AWE B.</p> <p><b><u>Function of Policy SP4 (AWE Aldermaston and Burghfield)</u></b></p> <p>AWE is supportive of the public safety-focussed nuclear installation safeguarding Policy SP4, which is proposed to supersede the existing safeguarding Policy CS8. The Detailed Emergency Planning Zone (DEPZ) (where no development is likely to be acceptable) and Outline Planning Zone (OPZ) [<i>Footnote 1: The draft Plan refers to an Outer Consultation Zone (OCZ) which is the term used in ONR's guidance; see <a href="http://www.onr.org.uk/land-use-planning.htm">http://www.onr.org.uk/land-use-planning.htm</a>. However, the Radiation (Emergency Preparedness and Public Information) Regulations 2019 has</i></p>	<p>Areas, as the nature of operations at the AWEs are specific to the AWEs themselves.</p>

Respondent (with lpr ref)	Response	Council Response
	<p><i>introduced the "Outline Planning Zone (OPZ)". We would therefore recommend that this term is used in the Local Plan in lieu of OCZ. We expect the ONR will be updating their guidance so the outer consultation zone is linked to or replaced by the OPZ. As the OPZ is a defined area this gives all stakeholders more certainty what the zone is.]</i> (where consultation with the Office of Nuclear Regulation (ONR) is required to ascertain acceptability) "safeguarding zones" for AWE A (Figure 3) and AWE B (Figure 4) follow latest advice from the ONR and are supported on this basis. Policy SP4 recognises the land use implications of the two licenced nuclear installations at AWE A and AWE B, for future development in the area. Policy SP4 also recognises the need to consult ONR, as a body with sufficient technical experience, to advise on future land use compatibility issues and risks. However, it does not recognise or support AWE's known land use and development needs at AWE A or AWE B.</p> <p><b>Function of Policy SP21 (Sites allocated for economic development)</b> There is some (albeit limited) support for development at AWE A and AWE B in the supporting text to the draft Local Plan, in particular, around Policy SP21.</p> <p>Policy SP21 designates certain additional areas as Designated Employment Areas (DEAs), renaming and expanding upon the existing designated areas in the Local Plan, currently known as Protected Employment Areas (PEAs). Policy SP21 should be interpreted and applied alongside Policy DC 31 (DEAs), which explains how planning permissions should be determined in DEAs.</p> <p>Supporting paragraph 4.12 (which provides support for the local planning authority's overall spatial strategy) recognises that AWE A and AWE B, which fall within the "Eastern Area" of the draft Local Plan, are important providers of local jobs in this area and the plan area as a whole. In recognition of the job creation potential of the sites and their strategic importance to the District's economy, supporting paragraph 7.14 (which supports Policy SP21) provides that:</p> <p><i>7.14 Development will also continue to be supported on existing, non-DEA,</i></p>	

Respondent (with lpr ref)	Response	Council Response
	<p><i>employment sites, particularly on those sites seen as strategically important for the District's economy, such as the Atomic Weapons Establishment (AWE) at Aldermaston and Burghfield.</i></p> <p><b>Whilst this supporting paragraph provides oblique policy support for development at AWE A and AWE B, it does not sufficiently sustain, protect or promote AWE's locally and nationally significant operations, or the future regeneration needs of the sites in line with the Government's investment programme.</b></p> <p><b><u>Current position in the adopted Local Plan</u></b></p> <p>AWE notes that current Local Plan Policy CS 9 (b) envisaged that AWE A and AWE B would either be allocated as PEAs during the plan period, or be subject to an alternative "bespoke" designation consistent with their importance to the local economy, as follows:</p> <p><i>Business development will be supported on existing employment sites, particularly on those sites seen as strategically important for the District's economy – New Greenham Park, Vodafone HQ, and the Atomic Weapons Establishment (AWE). The Site Allocations and Delivery DPD will assess the role and function of these three sites to determine whether they should be designated as Protected Employment Areas or an alternative bespoke designation consistent with their importance to the local economy.</i></p> <p><b><u>Need for bespoke designation</u></b></p> <p>AWE A and AWE B have not been designated as PEAs (or now, DEAs), nor - in AWE's view - should be. However, the Local Plan Review process should put forward an "alternative bespoke designation", in recognition of the sites' importance to the local economy and to national security, and to make the Local Plan consistent with Policy CS9(b) and, in any event, NPPF paragraphs 95 (b) (supporting development required for operational defence and security purposes) and 182 (reducing restrictions on existing businesses and facilities / agent of change).</p> <p><b><u>Not a DEA</u></b></p> <p>As above, AWE does not consider that AWE A and AWE B should be designated as general employment areas. Policies SP21 and DC31 are focused principally on proposals for new employment land in a "civilian" capability context and are relatively rigid in their operation.</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>By contrast, there is a need and compelling case for a stand-alone bespoke policy designation for these sites to support Government research, training and defence related activities and associated and ancillary development at AWE A and AWE B, which will (in line with supporting paragraph 7.14) help preserve the strategic significance of these sites to the District's economy. This kind of policy, in addition to being required under Policy CS9(b) and the NPPF, is broadly consistent with the approach taken, for example, to the Theale Rail-Road site, which is expressly safeguarded under Policy DC 31, for industries requiring a rail-road transfer facility.</p> <p>AWE's land use requirements and aspirations for AWE A and AWE B are much more dynamic, reflecting the mix of buildings and uses on the sites and the Government's investment programme which is focussed, inter alia, on enhancing the sites' science, research and development capabilities together with related production facilities. On this basis, AWE is putting forward a bespoke policy suitable for development at Government research and defence establishments such as AWE A and AWE B.</p> <p><b><u>Proposed Bespoke Policy for AWE A and AWE B</u></b></p> <p><i>“Development in the following categories will be supported:</i></p> <ol style="list-style-type: none"> <li><i>1) New development comprising the construction of new buildings [Footnote 2: Buildings include: all built development, structures, plant and equipment] extensions or other refurbishments to existing buildings</i></li> <li><i>2) Redevelopment, conversion or change of use of redundant buildings</i></li> <li><i>3) Enabling works in connection with 1) and 2) above</i></li> </ol> <p><i>Uses in the following categories will be supported:</i></p> <ol style="list-style-type: none"> <li><i>4) Offices</i></li> <li><i>5) Uses in connection with science, research and development</i></li> <li><i>6) Manufacturing, waste management and storage</i></li> <li><i>7) Energy and infrastructure to support, maintain and service the sites</i></li> <li><i>8) Uses associated and ancillary to 4) to 7) above</i></li> <li><i>9) Temporary land uses with construction, environmental and amenity functions required in connection with site optimisation and phased delivery of development</i></li> </ol>	

Respondent (with lpr ref)	Response	Council Response
	<p><i>Development outside of AWE A and AWE B will be assessed against Policy SP4. Development in the DEPZ is likely to be refused planning permission, especially where the ONR has advised against that development [Footnote 3: AWE notes that Policy SP4 states that the residential development in the DEPZ "is likely to be refused planning permission"; AWE prefers this formulation to draw out the presumption in favour of refusal albeit it recognises that some development may be deemed acceptable.]. In the OPZ, development proposals will be considered in consultation with the ONR, in accordance with the criteria set out in Policy SP4."</i></p> <p><b><u>Supporting Text</u></b></p> <p><i>"AWE A covers an approximate area of 750 acres. The site occupies a former World War II airfield and now houses advanced research, design and manufacturing facilities and associated services and development.</i></p> <p><i>AWE B covers an approximate area of 225 acres. The site occupies the former Royal Ordnance Factory dating from 1940. The site includes numerous buildings and structures used for a variety of industrial processes including warhead assembly and decommissioning and associated services and development.</i></p> <p><i>As identified in paragraph 7.14 of this Plan, AWE A and AWE B play a strategic role in the District's economy and they also serve an important national security function.</i></p> <p><i>AWE A and AWE B are owned by the Secretary of State for Defence and deliver the warhead contribution to the nationally and internationally significant UK nuclear deterrent. AWE has been at the forefront of the UK nuclear deterrence programme for more than 60 years by supporting the UK's Continuous at Sea Deterrence programme.</i></p> <p><i>The Government's policy of continuing to maintain a UK nuclear deterrent was most recently confirmed, on 25 February 2020, in the Secretary of State's announcement of a programme to replace the UK's nuclear warhead. It was also confirmed in the Strategic Defence and Security Review 2015 (SDSR). AWE A and AWE B are therefore required to fulfil their unique functions for the foreseeable future – until at least 2040. (In the event that</i></p>	

Respondent (with lpr ref)	Response	Council Response
	<p><i>this role were to cease, the sites would require several decades of nuclear decommissioning, necessitating development activities consistent with this policy).</i></p> <p><i>Reflecting this policy, the Government is committed to an investment programme for the replacement and refurbishment of the ageing facilities at AWE A and AWE B. This investment programme is centred around a vision for two high quality campuses of excellence, investing, in particular (but without limitation), in the production, science and research and development capabilities at the two sites. The Government's commitment to investment in AWE A and AWE B has been consistently demonstrated since 2005 and is reiterated in the SDSR.</i></p> <p><i>This policy recognises the strategic significance of the AWE A and AWE B sites to the local economy, as well as to national security. It also recognises the need to renew the existing facilities at AWE A and AWE B to optimise the sites' operational capabilities, particularly (but without limitation), their production, science, research and development capabilities - in order to attract and retain the world's best researchers, scientists and engineers. This policy therefore seeks to facilitate the efficient and sustainable development, modernisation, rationalisation and consolidation of uses and operations at AWE A and AWE B, to help sustain or enhance their operational capability and in particular to nurture science, research and innovation at the sites in line with the Government's investment programme. The strategic purpose of the policy is to attract positive socio-economic multiplier effects in the local economy, in terms of jobs, skills and inward investment.</i></p> <p><b><u>Local Development Order</u></b></p> <p><i>Consistent with this policy the Council will be supportive of proposals for a local development order (LDO) for each of the AWE A and AWE B sites (or a single LDO with bespoke plans and development constraints for each of the sites), to further speed up decision-making for more routine operational development and changes of use within defined design, size, scale, land-use and other environmental parameters. The Council recognises LDOs as a positive and proactive planning tool which help simplify the planning</i></p>	

Respondent (with lpr ref)	Response	Council Response
	<p><i>process, create a more certain planning environment and thereby make investment more sustainable, responsive and attractive.”</i></p> <p><b><u>Illustrative Framework Plans for AWE A and AWE B</u></b></p> <p>This representation is accompanied by two site development context "Illustrative Framework Plans" for AWE A and AWE B together with the supporting Site Analysis and Vision report. The Illustrative Framework Plans have been subject to stakeholder involvement and were presented to the AWE Local Liaison Committee on 4 July 2018 and 13 March 2019. The plans and the report illustrate how the Government's investment programme will be accommodated within the two estates and give an indication of potential land uses up to and beyond 2030.</p> <p>The Illustrative Framework Plans are intended to help the local planning authority visualise the Government's aspirations for two high quality campuses of excellence at AWE A and AWE B, designed to attract and retain world leaders in the fields of science of engineering. The Site Analysis and Vision report exemplifies how sustainability and amenity are at the core of the Government's vision.</p> <p>The Illustrative Framework Plans are intended to inform future planning applications submitted to support the sites' operational capabilities. They also, together with the Site Analysis and Vision report demonstrate how design [<i>Footnote 4: Including a design guide or code, in line with new paragraph 128 in the Government's January 2021 consultation on the NPPF, which provides that design guides and codes "can be prepared on a site-specific scale" and recognises that "applicants may also elect to prepare codes for a site which they propose to develop".</i>] and other environmental parameters could easily be worked up in support of a LDO or LDOs for AWE A and AWE B permitting more routine redevelopment proposals at the two sites.</p> <p><b><u>Cross referencing to other emerging Policies</u></b></p> <p>At a minimum, the above policy should be cross referenced at:</p> <ul style="list-style-type: none"> <li>• Paragraph 4.13, which explains the opportunities and constrains presented by AWE A and AWE B in the Eastern Area.</li> <li>• Paragraph 7.14, which provides indirect support for development on non-DEA employment sites such as AWE A and AWE B.</li> </ul>	

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>Policy SP4, as the new policy helps reinforce the importance of the DEPZs and OPZs in Policy SP4. AWE suggest incorporation a new supporting paragraph 4.37: “4.37 New development and uses at the AWE A and AWE B will be assessed in accordance with Policy [Bespoke Policy for AWE A and AWE B]”</li> </ul> <p><b>Other comments</b></p> <ul style="list-style-type: none"> <li>Note comments made in relation to the term "OPZ vs OCZ and explanation in footnote no. 1</li> <li>Note definition of "buildings" in footnote no. 2</li> <li>Note also the preferred formulation of Policy SP4 as explained in footnote no.3</li> </ul>	
Dijksman Planning LLP for Northway Porsche (lpr2300)	<p>The Absence of Northway Porsche and Associated Land from Beenham DEA</p> <p>Extension to Beenham Designated Employment Area - I am objecting to policy SP 21 on the grounds that it does not include a 2.68 ha enlargement of the Beenham Designated Employment Area (as defined under the previous policy SC9).</p> <p>Land Surrounded on three sides – The current protected employment area encloses a parcel of land containing Northway Porsche, the designated site wraps around it on three sides.</p> <p>Existing employment site - Of the subject 2.68 ha, Northway Porsche's existing premises cover 0.75 ha. The balance of the land - 1.93 ha - is currently used for equestrian purposes and includes an outdoor arena.</p> <p>Visually and Physically Enclosed - This parcel of land is visually and physically entirely enclosed and visually and physically closely related to the surrounding employment land.</p> <p>Specialist Classic Car Services - Northway Porsche is in a unique position to be a catalyst for this proposal. As an important and long-established specialist car restorer and classic car engineering company, it provides high value classic car services and is a significant regional operator within this industry. The expansion of the employment area (on the land associated with Northway Porsche) would enable the creation of a specialist</p>	<p>Comments noted.</p> <p>Sites identified through the HELAA, the call for sites, and Regulation 18 consultation have been assessed for their potential to be allocated for employment use. All site assessments can be found in the HELAA and the site selection process is documented within the SA/SEA published alongside the Regulation 19 consultation.</p> <p>The ELR 2020 commented that Beenham has a small cluster of mostly general industrial uses, and has no industrial units available. The area has a medium market attraction in the East of the District.</p> <p>The provision of industrial space has been consistently strong over recent years, and both trend-based projections and economic forecasts indicate growth in industrial space. The ELR 2022 therefore recommends a minimum industrial requirement of 90,730sqm or 23 ha of land to 2039 to meet identified needs. Given this need and as sites originally proposed for employment uses around</p>

Respondent (with lpr ref)	Response	Council Response
	<p>concentration, and employment hub, for Classic Car Based Restoration and Associated Automotive Services.</p> <p>Valuable Sector UK Economy – With an annual turnover of £18 Billion, and an annual Gross Value Added contribution to the UK economy of £9 Billion Classic Cars make a very significant contribution to our economy. As a specialist engineering and employment sector Classic Cars and associated parts provision, restoration, and servicing, all benefit from being in close proximity to one another.</p> <p>Automotive Restoration and Engineering Hub - The creation of a concentration of automotive restoration businesses will be hugely beneficial in economic development terms, the employment generated is highly skilled. In sustainability terms it is beneficial if the classic vehicles can be restored and repaired in one location.</p> <p>Sustainability Benefits and Reduced Travel - Specialist services such as break engineering, engine tuning and repairs, manufacture of parts, upholstery restoration and leather repairs and servicing, wheels and bodywork restoration are all services scattered across this district and beyond, and all may all be required in the restoration of a particular individual classic car. The transportation of such cars to numerous locations to deal with various elements of restoration, and/or the travelling of specialists and relevant parts to one location, all generate traffic movements and takes time, which would be more efficiently and sustainably arranged if these specialist services are located in one place.</p> <p>Existing Establish Boundary and Security Fencing - The land involved is capable of being subdivided into the necessary parcels for different businesses without having any material impact upon the landscape due to the existing industrial development on three sides and the existing substantial boundary screening and security fencing.</p> <p>Recent Permissions - Planning permissions (19/03096/FUL &amp; 19/03097/FUL) have recently been granted for a new car restoration building at Northway Porsche and the change of use of the former house into associated office space.</p> <p>Permitted Access Improvements - These permissions have required the upgrading of the access to this land from Grange Lane. The approved scheme of access improvements has been specifically designed to</p>	<p>Aldermaston are not suitable further work has been undertaken to seek sites to meet the need.</p> <p>As the site is within the AONB further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessment (LCA). The LCA for the site recognises that the site lies adjacent to open countryside, and two PRoWs which align the site provides good access to the countryside which retains a well intact rural character. There would be a loss of open rural character and area of grass fields, and introduce more modern inclusions, affecting the rural character and amenity value, in turn affecting the AONB. There is potential to enhance the woodland character of the area, which would aid in integrating the site into the landscape. The LCA recommends that development across the site could be considered with mitigation measures, including a landscape buffer, retention of open setting, suitable boundary treatments, suitable design of buildings, external lighting, and noise levels.</p> <p>In consideration of the landscape advice, and no adverse comments from service providers, to aid in meeting the industrial needs it is proposed to allocate the site for 6,400sqm of B2 and Egiij uses.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>accommodate car transporters. There are therefore no technical highways grounds to prevent or limit the use of this land as a concentrated location for a specialist employment hub of classic car related businesses and services.</p> <p>No Physical or Visual Intrusion - The incorporation of this land into the Designated Employment Area would form a natural completion of the existing pattern of employment development. Please see the attached extracts from the previous local plan showing how readily this additional land can be accommodated within the employment area without any visual or physical intrusion beyond its existing boundary lines</p> <p>Less than a 10% Increase - The current CS 9 Protected Employment Area is approx. 21.7 Ha, the proposed additional 2.68 Ha of employment land (including 0.75 Ha of Northway Porches' existing site) would comprise less than a 10% increase, within established natural boundaries on land already visually and physically contained and enclosed by the employment zone.</p> <p>Changes to policy SP 21 – to include the land on the attached Location Plan within the newly described Beenham Designated Employment Area.</p>	
Dijksman Planning LLP for Mr Charles Titchener (lpr2314)	<p>Correction needed to boundary of Beenham Designated Employment Area - I am objecting to policy SP 21 on the grounds that it does not include a 0.2 ha sliver of land within the Beenham Designated Employment Area (as defined under the previous policy SC9).</p> <p>Land Currently Used as Parking and Access– The current protected employment area utilises a small parcel of land containing parking and access, but it falls outside the designation. Correcting this requires no more than straightening the boundary line to reflect what is on the ground.</p> <p>Visually and Physically Enclosed - This parcel of land is visually and physically part of and used in association with, the industrial area. It contains parking and agricultural buildings, there will be no material effect on the landscape, the visual context is of the industrial area.</p> <p>Future Landscape Enhancement - The formal inclusion of this land offers future potential for boundary landscaping, of additional tree and hedge planting and screening, and therefore an overall improvement in landscape terms.</p> <p>Existing Establish Boundaries - The addition of the land would comprise no more than a recognition of its existing uses to an existing boundary line.</p>	<p>Comments noted.</p> <p>Sites identified through the HELAA, the call for sites, and Regulation 18 consultation have been assessed for their potential to be allocated for employment use. All site assessments can be found in the HELAA and the site selection process is documented within the SA/SEA published alongside the Regulation 19 consultation.</p> <p>There is no planning permission for the hardstanding and change of use. Therefore, there has been no regularisation of the use, and no previous assessment undertaken by the Local Planning Authority as to the effect on the landscape. By placing the site into the Designated Employment Area this would not only allow the car parking, but employment related development, including buildings.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Less than a 1% Increase - The current CS 9 Protected Employment Area is approx. 21.7 Ha, the proposed additional 0.2 Ha of employment land would comprise less than a 1% increase, within established natural boundaries on land already mainly used for parking for the employment zone.</p> <p>To adjust the boundary of the Beenham Designated Employment Area to include the small area of land on the attached Google Map.</p>	<p>A Landscape Character Assessment (LCA) has been undertaken for the site. The LCA concludes that the site is unsuitable for development. The visual and landscape sensitivity is low to medium, and as the site is within the AONB the landscape value is medium to high. The landscape capacity is therefore low to medium. An extension to the DEA would result in a loss of open rural character and grass fields, typical of the AONB within this area. Introduction of more modern inclusions, such as large scale industrial buildings, noise and external lighting which would have an adverse effect on the AONB. Enclosing this stretch of the public right of way with industrial/business activities; and an adverse effect on the rural character of Clay Lane. Whilst there is potential to improve the NW edge of the existing PEA through a wide woodland landscape buffer this would likely take up much of the site, and not leave enough width for future development.</p> <p>It is not proposed to allocate this land or to extend the DEA boundary around the land.</p>
Peter Dowling (lpr2345)	<p><i>EMP1 Land east of Colthrop Industrial Estate, Thatcham</i></p> <p>We agree with and support the proposed allocation of the land as an extension to the Colthrop Industrial Estate. The long established Colthrop Industrial Estate provides a key focus for much of the District's industrial floorspace. The Council's ELR (2020) at paragraph 4.133 notes that Colthrop Industrial Estate is:</p> <p><i>"...the District's premier logistics and distribution park, home to some very large modern warehousing for Gist (M&amp;S), Harrods and Kuehne &amp; Nagel amongst others. The Estate also provides a range of smaller warehousing and light industrial units (eg Pipers Court) and the Thatcham Business park that provides office space. Some vacancy in the office stock, but very high occupancy in the industrial and warehousing stock. Land to the south of Gables Way, is the only undeveloped parcel, and this has planning permission for flexible B uses. Farmland to the east has been promoted</i></p>	<p>Comments are noted.</p> <p>The proposals map will reflect the site submitted and assessed as part of the HELAA (and planning application reference 21/02130/OUTMAJ).</p> <p>Each of the employment allocations will be the subject of individual site allocations policies, with Colthrop as Proposed Submission LPR Policy ESA1.</p> <p>Proposed Submission LPR Policy DM32 (Designated Employment Areas) outlines the approach to safeguarding and encouraging employment generating uses within</p>

Respondent (with lpr ref)	Response	Council Response
	<p><i>through the Call for Sites (MID5 a 5 ha site) as having potential to expand the estate.”</i></p> <p>The proposed extension to the industrial estate is clearly compatible with the surrounding development, bounded as it is by the extensive existing Colthrop Industrial Estate to both the west and south. Indeed, viewing the site from the east the development of the site would be seen within the context of the existing industrial estate.</p> <p>Immediately to the north is the Mercure Newbury West Grange Hotel – this is set back from the A4 Bath Road and the proposed extension would not be incompatible with this hotel use. The site is therefore ideally placed to form an extension to the existing industrial estate.</p> <p>The proposed extension directly reflects the ELR (2020) which recommends an extension to Colthrop Industrial Estate and specifically concludes (at paragraph 14, 6.64 and table 6.7) that the site (HELAA site MID5) is suitable land for allocation to form an extension to the industrial estate. Table 6.7 of the ELR (2020) also confirms that the site has “<i>No known constraints</i>”.</p> <p>It is also noted that the Thatcham Strategic Growth Study Stage 3 Report: Thatcham Future September 2020 at paragraph 1.34 also notes that the land “<i>...forms an opportunity for a logical and necessary extension of the Colthrop Industrial Estate.</i>”</p> <p>In summary, the site is suitable, immediately available for development, achievable and can be delivered within 5 years. The land is also in a single ownership. The site is capable of early delivery to meet demand and could accommodate flexible commercial (B2/B8 use) development on the site broadly consistent with the indicative scale of floorspace (20,400 sq m) proposed in Policy SP 21.</p> <p>The development of the site would comply with the proposed criterion within Policy SP21 and also Policy DC31 (Designated Employment Areas). The development would be compatible with surrounding uses without adverse impact on the highway network.</p> <p>It is noted in paragraph 1.22 of the Emerging Strategy consultation document that “<i>... There are still aspects of the LPR which need further work. For example, an updated Policies Map has yet to be produced...</i>”. In updating the Policies Map, the boundary for the Colthrop Industrial Estate DEA must include the proposed EMP1 extension – this extension should</p>	<p>Designated Employment Areas, and would not seek a sequential test for offices within such Areas.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>fully reflect the land associated with HELAA site MID5. Whilst the policy relates specifically to employment development, as explained at paragraph 7.1, given the recent changes to the Use Classes Order (combining office, commercial and service uses together within Class E) it is important that the Council allow for changes of use across these commercial uses where appropriate. The wording in Policy SP21 should therefore be reflective of this.</p>	
<p>Pro Vision for Greenham Trust Ltd (lpr2366)</p>	<p>This representation on the Local Plan Review (LPR) is made on behalf of Greenham Trust (the Trust), specifically in regard to its interests at Greenham Business Park (GBP) as the major land owner and manager of the park.</p> <p>As such, the Trust is a stakeholder in the local plan process and is keen to engage proactively with the Council and other stakeholders to assist with preparing a positive and deliverable local plan to meet development needs in sustainable way over the plan period.</p> <p>In summary, these representations state that:</p> <ul style="list-style-type: none"> <li>• The Trust supports the proposal to continue to recognise the importance of GBP to the economy by identifying it as a Designated Employment Area;</li> <li>• The LPR should expressly recognise that there is an adopted Local Development Order at GBP;</li> <li>• That GBP can continue to play an important role in meeting the identified need for office and industrial space over the plan period;</li> <li>• The employment evidence and LPR policies will need to be updated to factor in the emerging impacts of the COVID-19 pandemic;</li> <li>• It is important that the standards for development imposed through policy take, to tackle the causes of climate change for example, take into account feasibility and viability at the plan-making stage.</li> </ul> <p><b>The Proposed economic development strategy</b></p>	<p>Comments noted.</p> <p>It is recognised that there is a Local Development Order (LDO) at Greenham Business Park. Text will be added to the supporting text of the policy to recognise the current Local Development Order for Greenham Business Park. However, the LDO sets out a series of permitted development and development parameters which any planning applicant would need to consider. The policy would therefore not necessarily apply if development falls under the LDO.</p> <p>Given the preparation of the ELR 2020 was undertaken prior to the COVID 19 pandemic, the Council has taken the opportunity to update this work using the most recent economic forecasts which take account of the major macro-economic changes which have taken place, including COVID and Brexit. The update to the ELR will inform the LPR and will be published alongside the Regulation 19 consultation.</p> <p>It is important that development proposals take into account climate change from the outset, including in costings. Technologies are likely to become more available and cheaper in the coming years. Tackling climate change through site and building design is one of the most important ways in reducing carbon output and</p>

Respondent (with lpr ref)	Response	Council Response
	<p>A key part of the evidence base for the LPR is the Employment Land Review (ELR)<sup>1</sup>.</p> <p>This confirms that there is demand for more office space and industrial space over the plan period.</p> <p>It is noted that the proposed strategic approach to economic development (draft Policy SP20) plans to meet the need identified in the ELR for offices and industrial uses.</p> <p>The ELR, however, makes it clear that these amounts are minimums, for office floorspace at least, which is not currently reflected in the draft policy. The ELR states that “The Council should scope the next generation of policies so that, if market demand for offices strengthens, it is clear that the 65,000 sq. m requirement is a minimum and policy is flexible and supportive for all forms of office development”.</p> <p>GBP is already a well-established part of the local economy and contributing to the supply of employment land.</p> <p>The ELR note that demand for space in GBP has increased as quality land or vacant space has been lost closer to Newbury. It also notes that GBP is fulfilling an important role in providing “good quality” office space<sup>4</sup>.</p> <p>The ELR therefore proposes designated GBP as a ‘Protected Employment Area’.</p> <p>This has translated in to the LPR in draft Policy SP 21 (Sites allocated for economic development), albeit with a differing terminology – Designated Employment Areas (DEAs).</p> <p>The Trust welcomes this continued recognition of the significance of GBP in the development plan through draft Policy SP 21.</p> <p>It is noted that specific development management matters for the DEAs are proposed in draft Policy DC 31. We would welcome clarification in draft Policy SP 21 that draft Policy DC 31 applies to the existing DEAs.</p>	<p>genuinely enabling each development to contribute to combating the effects of climate change.</p> <p>The LPR has been subject to whole plan viability in accordance with the NPPF. The whole plan viability assessment concluded that the delivery of economic development and employment floorspace would be viable taking into account other policy requirements within the plan, including climate change. The Whole Plan Viability Assessment can be found as part of the evidence base.</p> <p>Proposed Submission LPR Policy DM32 will apply to all DEA’s, existing and new.</p> <p>Proposed Submission LPR Policy DM35 (Sustaining a Prosperous Rural Economy) will apply to those sites outside of settlement and/or DEAs in the countryside, specifically to assist the rural economy.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Greenham Business Park Local Development Order</p> <p>While the Trust generally supports the proposed economic development strategy, it is disappointed that the LPR makes no reference to the adopted Local Development Order (LDO).</p> <p>Adopted in December 2018, the LDO is a positive planning tool that was prepared at significant effort by the Council, supported by the Trust and other stakeholders.</p> <p>It would be appropriate to recognise this simplified planning control regime in the LPR, which seeks to optimise the potential of the previously developed site and is therefore an important element of the economic strategy.</p> <p>Need for an update to the economic baseline</p> <p>It is acknowledged that the Employment Land Review<sup>5</sup> “was prepared prior to the outbreak of Covid-19, and so it has not been possible to capture the impact of the pandemic in this report”<sup>6</sup> and therefore reflects “a baseline prior to the economic consequences of the pandemic”<sup>7</sup>.</p> <p>It notes that the pandemic “will inevitably lead to change in Government planning policy to support economic recovery, and may well require an update of this work”<sup>8</sup>.</p> <p>The report does factor in “hard data on the impact of the 2016 Brexit vote” but not the impacts of the pandemic, which are “likely to be more significant”<sup>9</sup>.</p> <p>Further comments through the report make it clear that a further assessment will be necessary to inform the spatial strategy of the ELR.</p> <p>Summary and conclusion</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>Greenham Trust is the major owner and manager of Greenham Business Park, one of the primary employment areas in the district.</p> <p>It is welcomed that the significance of the business park will continue to be recognised in the local plan by designation as a Designated Employment Area, and that the plan will continue to direct new employment development to these areas.</p> <p>The employment evidence base will need to be reviewed to factor-in the emerging impacts of the COVID-19 pandemic. Policies of the LPR, including draft Policy DC 31, should be reviewed in light of updated evidence.</p> <p>The LPR should recognise the adopted Local Development Order as an important part of the economic strategy, a positive planning tool to boost the local economy and optimising the potential of the business park.</p> <p>The LPR should be reviewed in respect of viability and other relevant evidence to underpin policy requirements so that development needs are delivered over the plan period while also addressing key issues including tackling the causes and impacts of climate change.</p>	
Pro Vision for Greenham Trust Ltd (lpr2378)	<p><i>*See attached for full representation*</i></p> <p>This representation on the Local Plan Review (LPR) is made on behalf of Greenham Trust (the Trust), specifically in regard to its land interests at Chieveley, adjacent to Junction 13 of the M4.</p> <p>Land in the Trust's ownership comprises two adjoining blocks of land immediately west of the A34, and a smaller block of land immediately east of the road, south of the motorway services area.</p> <p>In total, this equates to approximately 35 hectares.</p> <p>The land has been promoted through the 'Call for Sites' mixed-use employment, including logistics/distribution uses, and is identified in the draft HELAA as Site CH13.</p> <p>Greenham Trust also has interests at Greenham Business Park, and a separate representation is submitted in that regard.</p>	<p>Comments noted.</p> <p>Sites identified through the HELAA, the call for sites, and Regulation 18 consultation have been assessed for their potential to be allocated for employment use. All site assessments can be found in the HELAA and the site selection process is documented within the SA/SEA published alongside the Regulation 19 consultation.</p> <p>The provision of industrial space within West Berkshire has been consistently strong over recent years, and both trend-based projections and economic forecasts indicate growth in industrial space. The ELR 2022 therefore recommends a minimum industrial requirement of 90,730sqm or 23 ha of</p>

Respondent (with lpr ref)	Response	Council Response
	<p>As such, the Trust is a stakeholder in the local plan process and is keen to engage proactively with the Council and other stakeholders to assist with preparing a positive and deliverable local plan to meet development needs in a sustainable way over the plan period.</p> <p>Representations about the available land were made in December 2018. The Trust continues to invite a meeting to explore the various potential of this strategically located land.</p> <p>In summary, these representations state that:</p> <ul style="list-style-type: none"> <li>• The updated evidence base identifies a need for more industrial land, including storage and distribution uses, to meet demand over the plan period;</li> <li>• There is demand for land in the M4 corridor in particular;</li> <li>• The evidence base acknowledges that it is a “pre-COVID-19” baseline, and the impacts of the pandemic will need to be factored in;</li> <li>• The proposed economic development strategy of the LPR is supported by an assessment of available sites, however, site CH13 has not been assessed;</li> </ul> <ul style="list-style-type: none"> <li>• The site is entirely within the AONB, therefore, exceptional circumstances would be required to support major development, but this possibility has not even been contemplated;</li> <li>• There are other constraints, including proximity to adjacent ancient woodland, but these could be managed through design so should not be seen as insurmountable at this stage;</li> <li>• Given the strategic location, on the interchange of the Strategic Road Network between east-west and north-south, the site should be considered through the evidence base as a potentially viable option for the economic development strategy, including in the changing demand context following the pandemic.</li> </ul> <p><b>Economic Evidence Base:</b> A key part of the evidence base for the LPR is the Employment Land Review (ELR)<sup>1</sup>. It recognises that Government guidance is to positively plan for growth<sup>2</sup>. The report identifies need for offices, estimating a need for at least 65,000 sq m of new floorspace over the plan period<sup>3</sup>.</p>	<p>land to 2039 to meet identified needs. To accommodate this need the Plan identifies a number of site allocations, as set out in Proposed Submission LPR Policy SP21, each of which has a site specific policy setting out development parameters.</p> <p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessment (LCA) for a number of sites in the LPR, including CHI3. The LCA for this site does not recommend the site as being suitable for development. Development on the site would have an adverse impact on the surrounding landscape and AONB.</p> <p>The site currently has a strong relationship with the wider landscape to the south and east across the valley; forms part of the open agricultural valley landscape; forms part of and contributes to the open setting of the adjacent ancient woodland; and forms part of the adjacent Local Wildlife Site.</p> <p>Development on the site would result in loss to the open character; loss of ancient woodland including its open setting; erosion of the rural character of Green Lane and a number of PRoW in the area; and introduction of more modern inclusions including large scale buildings, noise and lighting eroding the traditional and rural landscape character of the area. Development on the site would be highly visible from the surrounding area.</p> <p>In turn this adversely affects the AONB, with loss of open land; loss of open setting of adjacent woodlands including ancient woodland; loss of amenity value of a number of PRoW; adverse impact on the rural character of Green Lane; eroding the rural quality by an increased level of</p>

Respondent (with lpr ref)	Response	Council Response
	<p>It goes on to report that “For industrial, demand for land is higher than for offices” and that there is a need to “frontload the plan with 16 hectares of easily deliverable sites”.</p> <p>Noting that the industrial market in West Berkshire is “performing well and vacancy is generally low”, the ELR goes on to report that “There is some demand for larger B8 distribution, but only for those locations in close proximity to the M4 motorway junctions”. (Our emphasis).</p> <p>“Generally”, it comments, “distribution occupiers would be most attracted to locations close to Reading” i.e. not exclusively, and there may be other suitable locations.</p> <p>The ELR proceeds to assess potential land to meet the (pre-COVID-19) outstanding demand for industrial floorspace.</p> <p>It is reported that a number of sites were promoted through the HELAA “that could potentially accommodate industrial uses” but that the Council has sieved out these sites to a shortlist of eleven for review<sup>4</sup>. All of these sites are noted to be either immediately adjoining existing industrial sites or very close to existing sites.</p> <p>The report also notes that “it is not for the ELR to determine whether AONB land will be needed. It will be for the Local Plan Review process to further consider and assess the suitability of such sites within constraints and supply of land in the District”<sup>5</sup>.</p> <p>Therefore, it is clear that the ELR has been strongly influenced by the Council’s initial sieving of sites, rather than, for example, considering all land available and promoted for commercial uses in terms of their potential to boost the economy, and then apply other policy considerations.</p> <p>An issue with that approach is that other policy constraints are dictating the proposed spatial strategy before appreciating where the best locations are for economic growth.</p> <p>Therefore some sites, including the land promoted by the Trust at Chieveley have not even been assessed for their potential to support and deliver economic objectives. The evidence base therefore, by design, has not tested the possibility of options that could significantly boost the economy and outweigh the conflict with other policy considerations.</p> <p>While it is acknowledged that economic benefits are in many cases unlikely to outweigh the disbenefits of development, it shuts the door to the</p>	<p>development, increased lighting and increased noise levels and traffic levels.</p> <p>It is not proposed to allocate the site, following the Council’s landscape evidence.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>possibility that some sites may have such benefits, perhaps of regional and/or national importance, that outweigh the harm.</p> <p>The Council’s approach is therefore potentially at odds with the Government guidance to proactively encourage sustainable economic growth, creating the conditions “in which businesses can invest, expand and adapt”<sup>6</sup>.</p> <p>National policy states that “significant weight” should be placed on supporting economic growth and productivity (NPPF 80) and that strategic sites can and should be identified for local and inward investment (NPPF 81).</p> <p>The NPPF also requires that local planning authorities plan for the locational requirements of different sectors of the economy, including for storage and distribution operations in suitably accessible locations (NPPF 82) (Our emphasis).</p> <p>National policy gives “great weight to conserving and enhancing landscape” in these designated areas (NPPF 172). Major development is not ruled out, however, if there are “exceptional circumstances” and the development is in the public interest.</p> <p>By sieving out some available sites, including CH13, before assessment against economic supply and demand (in the ELR), the Council is not even contemplating the possibility of, for example, exceptional circumstances.</p> <p>As shown in the draft HELAA, the headline constraint for CH13 is that it is entirely within the North Wessex Down AONB. This is a very key consideration and the Council has a duty to protect the designated landscape. However, it is not an absolute constraint, as the HELAA appears to presume.</p> <p>There are other issues, such as proximity of ancient woodland, and the possibility of some drainage issues on part of the (35 hectare) site. These are potential issues that can be resolved at design stage.</p> <p>The site is only excluded at stage 2b. There are no insurmountable, physical or other constraints otherwise it would have been automatically ruled out at stage 1 of the HELAA.</p> <p>In addition to the AONB constraint, the “settlement pattern” is cited as a reason to conclude that the site is “unsuitable” (presumably, therefore, the HELAA is saying for any economic or housing related development, no matter what the detail of the proposal).</p>	

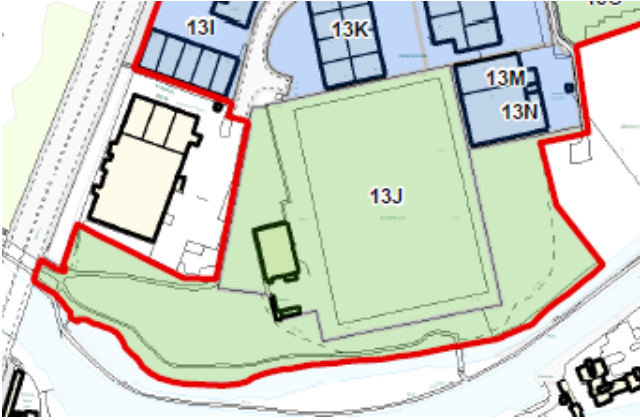

Respondent (with lpr ref)	Response	Council Response
	<p>We assume that this assessment is why the site has not been included in the ELR. Therefore, we note that there is a potential conflict with the NPPF, which allows the consideration of major development in designated landscapes (NPPF 172) and that local business needs may sometimes have to be accommodated beyond existing settlements (NPPF 84). In such cases, development need to have careful regard to the context and mitigating impacts, but national policy does not rule them out simply because they are remote from established settlements.</p> <p>In the case of CH13, the land is quite clearly remote from the nearest settlement (Chieveley, north of the motorway). That should also be seen in some respects as an advantage, as major industrial uses, such as distribution uses, are not appropriate adjacent to residential communities, or other sensitive neighbours.</p> <p>Furthermore, the locational advantage of the site is its proximity to the M4/A34 interchange, with service area, and reducing the need for commercial traffic to access through residential and other sensitive areas. There is interest in the land from national and international operators. It is the particular strategic locational benefits of the land in relation to the Strategic Road Network that is attracting the interest.</p> <p>Another part of the relevant evidence base is the Site Selection Background Paper (SSBP)7.</p> <p>In regard to economic development sites, this appears to summarise key conclusions from the ELR, including that “Demand is evident for larger B8 distribution in close proximity to the M4 motorway junctions particularly close to Reading8.”</p> <p>It also reports the need for 11 hectares of office land and 16 hectares for industrial floorspace, and therefore, “certain sites identified in the Housing and Economic Land Availability Assessment should be allocated/designated for employment uses”9.</p> <p>As noted above however, the assessment of available sites has omitted land at CH13 without even contemplating the potential for economic benefits (afforded significant weight in national policy) against impacts of development.</p> <p>The ELR should be updated to consider all available land for economic development that has not been automatically excluded through the HELAA</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>(stage 1). As noted in the ELR, the LPR should then consider the balance of issues, including for example, impact to the AONB against the economic (and other) benefits.</p> <p>It is noted that the proposed strategic approach to economic development (draft Policy SP20) plans to meet the need identified in the ELR for offices and industrial uses.</p> <p>The ELR, however, makes it clear that these amounts are minimums, for office floorspace at least, which is not currently reflected in the draft policy. The ELR states that “The Council should scope the next generation of policies so that, if market demand for offices strengthens, it is clear that the 65,000 sq m requirement is a minimum and policy is flexible and supportive for all forms of office development”<sup>10</sup>.</p> <p>Noting that the ELR identifies that “demand is also more pressing given the market shortage” for industrial land, and there is a need for front loading<sup>11</sup>, there is also a strong case for providing more choice in land to meet that demand. That would also help future proofing for needs beyond the plan period.</p> <p>Proposed sites are identified in draft Policy SP21.</p> <p>The merits of these sites should at least be tested against all available sites that are being promoted for these uses (other than those automatically excluded through the HELAA), to ensure the plan is delivering what the market needs in the locations it needs it for positive economic growth.</p> <p>A notable advantage of the CH13 is the proximity to not one, but two, of the regions strategic roads. It also has an advantage of scale, and therefore, possibility of future proofing. Yet the economic advantages of this location have not even been considered in the current evidence base.</p> <p><b>Need for an update to the economic baseline</b></p> <p>The ELR is already six months old since issue (and more since the assessment was undertaken), a period that has seen on-going impacts to the national, regional and local economy through the COVID-19 pandemic. It is acknowledged that the evidence “was prepared prior to the outbreak of Covid-19, and so it has not been possible to capture the impact of the pandemic in this report”<sup>12</sup> and therefore reflects “a baseline prior to the economic consequences of the pandemic”<sup>13</sup>.</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>It notes that the pandemic “will inevitably lead to change in Government planning policy to support economic recovery, and may well require an update of this work”<sup>14</sup>.</p> <p>The report does factor in “hard data on the impact of the 2016 Brexit vote” but not the impacts of the pandemic, which are “likely to be more significant”<sup>15</sup>.</p> <p>Further comments through the report make it clear that a further assessment will be necessary to inform the spatial strategy of the ELR.</p> <p>We agree with this conclusion. The impact on work patterns and retail, with significant shift to online sales, is likely to have a very significant impact on future demand for land. Strategic locations near to the strategic road network, and other transport connections, are very likely to be in even greater demand.</p> <p>Hence, the strategic development opportunity promoted by the Trust should be properly contemplated and assessed in this context.</p> <p><b>Summary and conclusion</b></p> <p>The Trust is promoting land in its ownership adjacent to Junction 13 of the M4 for economic development.</p> <p>This location has particular strategic advantages, being at the interchange of the two main strategic roads in the region, the M4 and A34, providing access in all directions without relying on local roads.</p> <p>Demand for employment land has been updated for the LPR. There is demand for more office floorspace. There is greater demand for more industrial space over the plan period, especially close to the motorway junctions, particularly towards Reading but not necessarily exclusively. However, that assessment has not considered all available sites being promoted, including CH13.</p> <p>Therefore, the evidence base has failed to assess whether the benefits of development in this location, to be given significant weight, could balance or outweigh the impact of development, notably on the AONB.</p> <p>While the HELAA has concluded that the site is “unsuitable” for development, it has not identified insurmountable constraints.</p> <p>There is market interest from national operators, given the significant strategic locational advantages of the land adjacent to Junction 13.</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>The land is being promoted for uses that are not appropriate in residential areas.</p> <p>The economic baseline needs to be updated to factor in the emerging impacts of the COVID- 19 pandemic.</p> <p>As drafted, the Trust does not support the LPR as sound given these gaps in the evidence base which are being used to underpin the proposed economic development strategy.</p>	
Turley Associates for Panattoni (lpr2379)	<p><i>Full representations by Turley on behalf of Panattoni are attached with extracts below.</i></p> <p>Panattoni support Policy SP21 as it seeks to allocate land to the north of the A4, Theale for employment development.</p> <p>However, and as noted in section 2 (<i>of full representation</i>), Panattoni wish to ensure that adequate flexibility is built in to the policy wording to allow the delivery of the site to accommodate future market changes and prospective tenant requirements.</p> <p>The existing evidence base is premised on the delivery of office development on the site. It is essential that the allocation and the associated evidence base allows sufficient flexibility to accommodate changes in market and consumer demand over the life time of the Development Plan to ensure that this objective is met.</p> <p>We would ask that this position is reflected in the next iteration of the Plan and its policies.</p> <p>Panattoni would welcome the opportunity to engage in constructive discussions with the planning authority to ensure the emerging policy reflects the aspirations and market requirements for the site, thereby ensuring its speedy delivery.</p> <p>We would ask that this position (<i>that the allocation and the associated evidence base allows sufficient flexibility to accommodate changes in market and consumer demand over the life time of the Development Plan</i>) is reflected in the next iteration of the Plan and its policies.</p>	<p>Comments noted.</p> <p>The ELR (2020) recognises Theale as one of the locations in the District providing office stock (out of town). Theale is more in demand from occupiers than in other areas of the District, due to its proximity to Reading (paragraph 4.42). Recent demand has been from corporate occupiers/SMEs, with a higher demand than in other areas of the District. At 4.66 the ELR comments that office occupiers prefer to be closer to the town centre or a motorway junction, though due to lack of available space and land they are prepared to take space in outer locations, such as Greenham Business Park.</p> <p>The ELR also recognises the attractiveness of locations, such as Theale for industrial development. This is due to the proximity to the Reading market.</p> <p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken. The work recognises the contribution the site makes to the separation of Theale and Calcot, and to the setting of the Theale and the Conservation Area. The introduction of offices and/or other large-scale buildings would be out of scale and keeping with the historic village character of Theale. It would also be visible from the North Wessex Downs AONB. Therefore, the landscaping work (LCA)</p>

Respondent (with lpr ref)	Response	Council Response
		<p>recommends that the site is not developed for employment purposes. As part of the LPR going forward it is no longer proposed to allocate the site.</p>
<p>West Berkshire Council as landowner of London Road Industrial Estate (LRIE) (LATE SUBMISSION)</p>	<p><b>Propose the renaming of the LRIE DEA.</b> There is the potential for confusion between the existing London Road Industrial Estate DEA which includes the adjoining Riverpark Industrial Estate, and the area within the Council's freehold ownership for which the Council as landowner has aspirations – also known as the London Road Industrial Estate (expected to be renamed in early 2023). This should be addressed either by renaming the DEA or by providing clarification within the supporting text.</p> <p><b>Propose</b> extension of London Road Industrial Estate Designated Employment Area to cover land to the south currently comprising a playing field, a car park and open space (see area shaded in green below and in attached plan).</p> <p>This is in line with the Council as landowner's aspirations for the LRIE site as set out in Executive Report EX4219 approved on 9 June 2022 and supporting documents, available at <a href="https://info.westberks.gov.uk/lrie">https://info.westberks.gov.uk/lrie</a></p> 	<p>(LATE SUBMISSION) Comments noted.</p> <p>There is a subtle difference between the names as the DEA is titled 'London Road Industrial Estates', which includes the majority of the Council owned LRIE and the adjoining Riverpark Industrial Estate. Given the Council expect the name of the Council owned land to change in early 2023, it is not proposed to amend the name of the DEA in the LPR. Proposed Submission LPR Policy SP20 will address this matter within the supporting text, along with the current status of the LRIE.</p> <p>As part of the evidence base which informs the Local Plan Review the Council has undertaken a review of the District's Protected Employment Areas, to be renamed Designated Employment Areas (DEAs) through the LPR process. As part of this work, the Faraday Road football ground and surrounding land, submitted within this representation, has been considered.</p> <p>The Council has reviewed the designated areas, taking the Employment Land Review (ELR) as the starting point in considering how each area performs including any key issues or opportunities, and any changes in circumstances, in particular where there has been a loss of office space to residential through permitted development rights, or new development adjacent to existing areas. This work also takes in account allocations set out within the LPR and the designation of new DEA as identified in Proposed Submission LPR Policy SP21.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Propose additional paragraphs in the supporting text to align with the Council as landowner's aspirations for the LRIE site as set out in Executive Report EX4219 approved on 9 June 2022 and supporting documents, available at <a href="https://info.westberks.gov.uk/lrie">https://info.westberks.gov.uk/lrie</a>:</p> <p><i>7.15 The London Road Industrial Estate has scope for <del>comprehensive regeneration</del> intensification of employment use within the plan period to maximise the potential of the site. Some mixed use development may be appropriate in the context, such that no net loss of employment floorspace results from that development.</i></p> <p><i>7.16 The Council-owned London Road Industrial Estate (LRIE) currently has an estimated 23,000 sqm of employment space (Avison Young Development Brief 2020) occupied by 36 businesses that employ about 300 people. <u>Following a review taking into account evolving economic drivers, market demand and the district's ambition to be carbon neutral by 2030, a revised Delivery Strategy for LRIE approved by Executive on 9/6/22 aims to increase employment floorspace on the site by at least 30%, safeguard 300 jobs and create at least 200 new jobs by 2030.</u></i></p> <p><i>7.17 The Council as freeholder will work with leaseholders to deliver environmental enhancements on the site including on carbon net zero, nutrient neutrality, sustainable drainage and biodiversity net gain. Further details to be set out in an LRIE Place-making Strategy which will be submitted as a Supplementary Planning Document in due course and progressed through the statutory planning process in parallel with the Local Plan Review.</i></p> <p><i>7.18 The Council as landowner is promoting alternative provision outside the LRIE to mitigate the loss of the playing field. This approach is supported by Sport England and aligns with the Council's Playing Pitch Strategy. The exact location of the alternative provision will be determined at the point at which a planning application for redevelopment of the playing field is</i></p>	<p>It is not proposed to include this area of land within the DEA. The conclusions of the DEA review work will be published alongside the Regulation 19 consultation.</p> <p>The supporting text of Emerging Draft LPR Policy SP20 will be amended to ensure the Proposed Submission Draft LPR clearly sets out the Council's approach to the London Road Industrial Estate as Local Planning Authority.</p>

<b>Respondent</b> <i>(with lpr ref)</i>	<b>Response</b>	<b>Council Response</b>
	<u>submitted, accepting that it is for the statutory planning process to determine whether or not redevelopment of the former football ground should be permitted.</u>

Hungerford Town Council (lpr144)	Supports the policy	Comment noted
Newbury Town Council (lpr2253)	We support this policy.	Comment noted
Shaw-cum-Donnington Parish Council (lpr2016)	<p>In bullet 2 what is “active travel”? Is it cycling and/or walking?</p> <p>In bullet 3 how do you define “sustainable travel”? Is it self financing travel or is it a service with a guaranteed frequency and cost?</p> <p>We would like to have seen plans for new strategic roads to alleviate the congestion within Newbury and in particular the Robin Hood roundabout. For example a road joining the junction of the A34 and A339 to Thatcham to reduce traffic on the Robin Hood roundabout and A4. A road from the Swan Roundabout to the Andover Road to take traffic to and from Basingstoke to the A34 rather than going through the town. A road from the A4/A34 junction</p>	<p>Comments noted.</p> <p>Yes, active travel typically relates to travel that requires physical effort, walking, cycling or wheeling (e.g. use of scooters or wheelchairs). It can also include horse riding which is a mode of travel relevant to particular areas of West Berkshire.</p> <p>In this instance, this relates to sustainable travel that minimises the negative social, environmental and climate impacts of travel.</p>

Respondent (with lpr ref)	Response	Council Response
	to the Embourne Road again to reduce traffic on the Robin Hood roundabout.	There are no supporting studies to enable the types of new key routes mentioned to be identified as planned infrastructure in the Local Plan. Any such routes would need to link with significant levels of development for delivery and these are not proposed. The proposed growth outlined in the draft Local Plan will seek to manage demand for travel through making best use of the existing highway network, with capacity enhancements largely confined within the existing network, combined with measures to develop and encourage sustainable and active travel choices. Where (if) the need for more major and strategic links is identified, appropriate studies and business cases would need to be prepared.
Stratfield Mortimer Parish Council (lpr407)	This section should be completely re-written in a much more logical form with clear guidance that applies to different types and sizes of development and which does not allow mitigation when the clear aim is to have no adverse effect.	Comments noted.  The more detailed approach that is being sought from these comments might be answered through the Development Management policies relating to transport. This policy is the strategic policy and does therefore not get into the details but sets the overall principles.
Thatcham Town Council (lpr1406)	<p><i>Full representation relating to north east Thatcham strategic site allocation attached to representation on SP17.</i></p> <p>We welcome the reference to the Climate Emergency and minimising the impact on the environment. To this end we encourage improved access to the station that improves take-up of rail service. However, this must not be approached from an active-travel solution only because active-travel is not a solution that is suitable for many people, or always possible during inclement weather. Therefore, a more strategic approach to encouraging update of rail and access to the station must be considered that includes car access and increased parking, bus stations/shelters, and disabled access.</p>	Comments noted.  Improving access to and improving facilities at Thatcham railway station is likely to be a key project. It is recognised that as well as improving active travel to the station, access by bus and improvements car parking are also considered. Any package of enhancements would also need to make the station more accessible for all who wish to travel. The Council has a good record of working with the rail industry (especially GWR) and local communities to develop and deliver such projects, such as those currently being delivered at Newbury and Theale stations.

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• "For residential development, a full Transport Assessment will be required where 60 or more dwellings are proposed."</li> <li>• "follow the advice set out in the Council's 'Highway Design Guidance for Residential Developments.'"</li> </ul> <p>The period of the Local Plan covers 17 years. It is impossible to predict what the traffic profile will look like in 2037 as this will be speculative, but there is more certainty in traffic profiles in shorter time periods as they will be similar to known patterns.</p> <p>The reference to Highway Design Guidance should mean it forms part of the evidence base and be available for public scrutiny. It is not included and therefore we are unclear to what guidance is being referred, when this document was produced, and whether it is relevant for predicting traffic assessments to 2037. With the absence of supporting information, we make the following points about traffic planning:</p> <p>Road Traffic Forecasts by the Department of Transport (RTF18) forecast traffic growth from 2018 in all scenarios ranging from 17% to 51% in the period to 2050, and approximately 10% to 31% in the period to 2037 (RTF18, figure 25). The upper bounds (51% and 31%) are related to scenarios that assume a faster take up of zero emission vehicles and there is no suggestion that technology will reduce demand.</p> <p>The additional demand from traffic generated by 2,500 properties in the period to 2037 must be taken in the context of a background of increasing growth nationally. This is an essential starting point aligned with national guidance.</p> <p>It is essential that traffic assessment start from known, evidence based, traffic densities based on measurements. Traffic assessments must consider the impact over a series of time periods such as [0,5,10,17] years in which [0] represents the base line from existing known traffic flows (using a baseline of 2019 before Covid created extraordinary reduction in traffic use). The Annex contains substantial material from residents regarding existing traffic congestion at locations relevant to SP 17 that should form part of that evidence base and base line.</p>	<p>The "Highway Design Guidance for Residential Developments" referred to will form part of the evidence base. It is currently in draft form and will be shared as part of the evidence base as soon as possible. It will be up to date and is a document that can be reviewed and updated as necessary (with consultation) to reflect any significant changes during the plan period.</p> <p>Background traffic growth has been included in the 2037 forecast transport modelling scenarios used for the Council's Transport Assessment.</p> <p>Both the West Berkshire Strategic Transport Model and the local Thatcham VISSIM model used in the Transport Assessment process were developed prior to Covid. Both included a comprehensive data collection exercise (2017 &amp; 2018 respectively) and were subject to calibration and validation in accordance with DfT WebTag requirements.</p> <p>The proposed quantum of proposed Local Plan growth (including the NET site) is considered, as well as overall background traffic growth, in our future years transport modelling scenarios.</p> <p>The proposed highways and other transport/travel mitigation packages for the NET site will be identified as part of the LPR Transport Assessment to be submitted for the Local Plan examination.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Traffic assessments that predict greater periods into the future, e.g. 2037, must consider a range of scenarios as forecasting a period of 16 years into the future is uncertain. The default scenario is the 'national vision' or 'scenario 1 reference' from the Department of Transport (2018). The impact of extra demand from 2,500 properties must then be considered in addition to the underlying growth rate.</p> <p>It is essential that the Highways Design Guidance are published as part of the evidence base, and that any assumptions made on Traffic Assessment regards future growth are clearly stated. If there are deviations from national guidance and default scenarios this must be explained with justification in the Traffic Assessment. Any assumptions within the Traffic Assessment must be elevated to policy (SP 17) if it is a necessary and legal condition of development.</p> <ul style="list-style-type: none"> <li>• "Mitigate any impact on local transport networks and the strategic road network".</li> </ul> <p>We recognise the statement that "development (at Thatcham NE) would have a very significant impact on the local highway network" and the mitigation measures need to be explained.</p> <p>Mitigation policies must not lead to adverse and harmful impacts on health and well-being, including air quality degradation or noise pollution, which would conflict with policy DC 4. We note from responses from residents (Annex) that properties have been built close to the roads of Floral Way and Bowling Green Road and there is no set-back, or shielding, for noise prevention. A mitigation approach that directs an increase of traffic onto these roads which lead to noise pollution would be contrary to DC 4.</p> <p>It is essential that mitigation methods are defined in the Traffic Assessment, elevated to policy SP 17 and maintain consistency with DC 4.</p>	
Reading Borough Council (lpr1492)	The emerging draft plan lacks any reference to the transport schemes that will be supported or required in accommodating the level of growth proposed. The Infrastructure Delivery Schedule is to be added later, and the strategic transport policies are more general in nature and do not reference specific proposals. Reading's draft Local Transport Strategy and adopted Local Plan both refer to two park and ride corridors, linked to fast track public	Comments noted.  No PnR sites on the A4 and A329 corridors have been identified in West Berkshire. The Council in partnership with GWR, is currently in the process of delivering a series of upgrades at Theale station, which will allow it to become

Respondent (with lpr ref)	Response	Council Response
	transport, to the west of Reading extending into West Berkshire, including a fast track public transport link between the two sites, as well as orbital fast track public transport links to the existing Mere oak Park and Ride within Wokingham Borough. We would expect to see these measures reflected and supported within the next version of the Local Plan, and would welcome further discussion on potential sites and routes.	a Park & Rail service on the western side of Reading (which Reading BC have previously supported). We would welcome dialogue with Reading BC regarding its proposals for P&R sites and Fast Track public transport routes and how these can be accommodated in the West Berkshire area. We are also about to embark on a review of our Local Transport Plan. This will consider cross-boundary movements and we will ensure that both Wokingham and Reading are consulted on the development of our new long-term LTP transport strategy.
South Oxfordshire District Council (lpr1783)	We support the inclusion in Policy SP22 (Transport) of a requirement for development proposals of 60+ dwellings to be accompanied by a full Transport Assessment. We also support the need to mitigate the impact of planned growth on local transport networks and the strategic road network, particularly any impacts on the capacity and traffic flow of the A34.	Comments noted.  We share the concern regarding growth along the A34 corridor, in particular to section north of the M4, both in WBC and Oxfordshire. There is a need to work with National Highways to seek improvements to this section as it has a poor safety record.
Vale of White Horse and South Oxfordshire District Councils (lpr1778)	Given the overall scale of residential development proposed across West Berkshire, we support the inclusion in Policy SP22 (Transport) of a requirement for development proposals of 60+ dwellings to be accompanied by a full Transport Assessment. We also support the need to mitigate the impact of planned growth on local transport networks and the strategic road network, particularly any adverse impacts on the capacity and traffic flow of the A34.	Comments noted.  We share the concern regarding growth along the A34 corridor, in particular to section north of the M4, both in WBC and Oxfordshire. There is a need to work with National Highways to seek improvements to this section as it has a poor safety record.
Highways England (lpr1333)	Highways England has been appointed by the Secretary of State for Transport as strategic highway company under the provisions of the Infrastructure Act 2015 and is the highway authority, traffic authority and street authority for the strategic road network (SRN). The SRN is a critical national asset and as such Highways England works to ensure that it operates and is managed in the public interest, both in respect of current activities and needs as well as in providing effective stewardship of its long-term operation and integrity. We will therefore be concerned with proposals	Comments noted.  Engagement has commenced with National Highways, with further meetings expected to be held as we move through the process. The impact of the Local Plan proposals on the Strategic Highway Network, particularly in relation to the M4 junctions at 12 & 13 and on the A34 in

Respondent (with lpr ref)	Response	Council Response
	<p>that have the potential to impact the safe and efficient operation of the SRN, in this case the A34 and M4.</p> <p>We would be concerned if any material increase in traffic were to occur on the SRN as a result of planned growth in West Berkshire without careful consideration of mitigation measures. When considering proposals for growth, any impacts on the SRN will need to be identified and mitigated as far as reasonably possible. Highways England in general, will support a local authority proposal that considers sustainable measures which manage down demand and reduces the need to travel. Infrastructure improvements on the SRN should only be considered as a last resort.</p> <p>We have reviewed the information provided.</p> <p>We note that the focus for significant growth in the Local Plan will be in Newbury and Thatcham alongside proposals close to the M4 and A34 in the Eastern Area. As the Local Plan is developed, we would expect to see an assessment of the potential impacts from these sites on the SRN. Although smaller sites individually may not have a significant impact on the SRN, collectively there could be a significant impact without a targeted package of mitigation measures. This will likely be informed as further work is done to develop the Local Plan's (and specific site policies) supporting evidence base.</p> <p>It is vital that as West Berkshire's Local Plan is developed, the deliverability of any required infrastructure that proposed growth is reliant upon is fully assessed. Prior to submission of the Local Plan, it would need to be demonstrated that there was a reasonable prospect of delivery of the required infrastructure to enable planned growth, to ensure the document is sound. Growth proposals such as those at Newbury and Thatcham should be considered within the context of the cumulative impact of development.</p> <p><u>Local Plan Review Transport Assessment Report</u></p> <p>Highways England strongly supports West Berkshire's commitment to work with partners to address infrastructure constraints to ensure new development can be accommodated. We look forward to continuing the ongoing work with all parties which include West Berkshire Council, Wokingham Borough Council, Reading Borough Council and Hampshire County Council to identify and produce a robust transport strategy which</p>	<p>the Newbury area will be fully assessed and provided to National Highways.</p> <p>We will continue to engage with Highways England over the course of the Local Plan Review process as the Transport Assessment evolves.</p> <p>The overall Local Plan Growth is included in the future year scenarios, which comprises both the main strategic sites and the cumulative growth of the proposed smaller sites. Masterplanning work for the main strategic sites will include identifying the appropriate highway and sustainable / active travel mitigation packages that will be required to accommodate the planned growth.</p> <p>We have a good working relationship with our neighbouring transport authorities. In particular, we have been involved in many cross-boundary projects with Wokingham BC, Reading BC and Hampshire CC. We are also active members of the Berkshire Strategic Transport Forum (which includes Wokingham, Reading and Highways England). We are also about to embark on a review of our Local Transport Plan, which will include a need to work with our adjoining partner authorities.</p> <p>The impact of Local Plan growth on the SRN will continue to be taken into account during the remainder of the Local Plan Review process.</p> <p>The additional capacity arising from the Smart Motorway scheme has been included in the future year scenarios for the transport modelling.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>would inform the size and scale of development deliverable within the West Berkshire area. This will form a key piece of evidence to demonstrate the Local Plan is sound, therefore it is important that any identified mitigation has a reasonable prospect of delivery within the timescales of when the growth is planned.</p> <p>We have not previously reviewed the current Transport Assessment supporting the emerging Local Plan, but we note that many of the M4 and A34 junctions within West Berkshire are predicted to be over capacity with predicted growth. We look forward to working with West Berkshire to undertake further transport modelling to support the Regulation 19 Local Plan submission. This will be essential to identify an appropriate package of mitigation measures to support the delivery of growth whilst maintaining a continued safe and efficient SRN. The results of an agreed Transport Assessment Report will be used to inform updates to the forthcoming Infrastructure Delivery Plan (IDP) to support a sound Local Plan. To support a sound Local Plan, the IDP will need to set out what infrastructure is critical for development to be deliverable in transport terms, this will include the proposed funding mechanisms together with who is funding and when it is required.</p> <p>We're currently improving the M4 between junction 3 at Hayes and junction 12 at Theale by upgrading it to a smart motorway. This means there will be an additional lane for traffic which will increase capacity and reduce congestion, more technology on the road to smooth traffic flows and manage incidents and more reliable journey times. Further information and updates can be found here: <a href="https://highwaysengland.co.uk/our-work/south-east/m4-junctions-3-12-smart-motorway/">https://highwaysengland.co.uk/our-work/south-east/m4-junctions-3-12-smart-motorway/</a></p> <p>For background, you may be interested to read "The Strategic Road Network Planning for the Future" which is a guide to working with Highways England on planning matters. Please see: <a href="https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/461023/N150227_-_Highways_England_Planning_Document_FINAL-lo.pdf">https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/461023/N150227_-_Highways_England_Planning_Document_FINAL-lo.pdf</a></p>	

Respondent (with lpr ref)	Response	Council Response
	<p>We look forward to continuing engagement with the council and other stakeholders to identify how planned growth in West Berkshire can be delivered through the spatial planning process.</p> <p>As the Local Plan is developed, we would expect to see an assessment of the potential impacts from these sites (close to the M4 at Newbury and Thatcham and the A34 in the Eastern Area) on the SRN. Although smaller sites individually may not have a significant impact on the SRN, collectively there could be a significant impact without a targeted package of mitigation measures. More evidence of impact is needed.</p>	
<b>General consultation bodies</b>		
AWE (lpr520)	<p>In the fifth bullet point, the word 'any' should be deleted and replaced with the word 'adverse'. This is because development should not be required to mitigate any impact as the existing transport network may well have capacity to accommodate the impact or be able to accommodate the impact in a safe manner. However, it is correct that adverse impact should be mitigated.</p> <p>Note 3 of the policy advises that indicative thresholds are set out in the Council's guidance note on Transport Assessment. It is understood that no such guidance note currently exists and so it is not possible to advise if they are considered correct. However, providing AWE are consulted on the guidance note when it is produced then this is considered acceptable.</p>	<p>Comments noted.</p> <p>Amend 5<sup>th</sup> bullet point of the policy as follows – 'Mitigate any <u>adverse</u> impact on local transport networks and the strategic road network'</p> <p>Further clarification regarding guidance on Transport Assessment will be provided in the Regulation 19 submission.</p>
British Horse Society	<p>We believe that the Active Travel Plan is a separate document to the Local Transport Plan. We feel emphasis of its existence is beneficial.</p> <p><a href="http://decisionmaking.westberks.gov.uk/documents/s31482/Appendix%20A%20Active%20Travel%20Strategy.pdf">http://decisionmaking.westberks.gov.uk/documents/s31482/Appendix%20A%20Active%20Travel%20Strategy.pdf</a></p> <p>The Society applauds &amp; welcomes the recognition of equestrians in this paragraph. This is consistent with the current West Berkshire Local Transport Plan and the Active Travel Plan and other sections of the LPR.</p>	<p>Comments noted.</p> <p>Yes, the Active Travel Strategy is a supporting document of the current Local Transport Plan. We are about to embark on a review of our Local Transport Plan and its supporting strategies (including the Active Travel Strategy).</p>

Respondent (with lpr ref)	Response	Council Response
Heritage Forum (lpr83)	<p>In bullet 2, what is “active travel”? Is it cycling and/or walking?</p> <p>In bullet 3, how do you define “sustainable travel”? Is it self-financing travel, or is it a service with a guaranteed frequency and cost?</p> <p>We would like to see plans for new strategic roads to alleviate the congestion within Newbury, and in particular the Robin Hood roundabout. Examples might be a road joining the junction of the A34 and A339 to Thatcham to reduce traffic on the Robin Hood roundabout and A4, a road from the Swan Roundabout to the Andover Road to take traffic to and from Basingstoke to the A34 rather than going through the town, and a road from the A4/A34 junction to the Emborne Road again to reduce traffic on the Robin Hood roundabout.</p> <p>The limited transport options available to anyone living west of Newbury along the A4 corridor, and for the rural villages north of the A4, should be particularly addressed.</p> <p>7.18 The present limited bus service along Andover Road – every two hours within limited times on weekdays – suggests that much still needs to be done to create a bus service which is a viable alternative.</p>	<p>Comments noted.</p> <p>Yes, active travel typically relates to travel that requires physical effort, walking, cycling or wheeling (e.g. use of scooters or wheelchairs). It can also include horse riding which is a mode of travel relevant to particular areas of West Berkshire.</p> <p>In this instance, this relates to sustainable travel that minimises the negative social, environmental and climate impacts of travel.</p> <p>It is highly unlikely that the Local Plan will identify the need for new strategic roads, which if built would be tied into significant development. The proposed growth outlined in the draft Local Plan will seek to manage demand for travel through making best use of the existing highway network, with capacity enhancements within the existing network, combined with measures to develop and encourage sustainable and active travel choices.</p> <p>We are about to embark on a review of our Local Transport Plan (and supporting documents). In this instance, rail stations at Hungerford and Kintbury provide direct competition for the A4 corridor, making it difficult for financially sustainable bus services. However, it is recognised that many rural parts of the district have no, or a very minimal bus service. The Council has recently published a Bus Service Improvement Plan, which outlines that Demand Responsive Transport options are being investigated for rural areas where there are no bus services (e.g. between Hungerford and Lambourn).</p>

Respondent (with lpr ref)	Response	Council Response
		As part of the proposed Sandford development, there will be improved bus services between the development area and Newbury town centre.
Mid and West Berkshire Local Access Forum (lpr1865)	<p>MWBLAF welcomes the recognition in this policy of the ever-increasing importance of active travel.</p> <p>It appears that the Active Travel Strategy is a separate document to the Local Transport Plan, and not an integral part of it:  <a href="http://decisionmaking.westberks.gov.uk/documents/s31482/Appendix%20A%20Active%20Travel%20Strategy.pdf">http://decisionmaking.westberks.gov.uk/documents/s31482/Appendix%20A%20Active%20Travel%20Strategy.pdf</a></p> <p>It should therefore be referenced separately in the supporting text, with an explanatory paragraph.</p> <p>The Forum recommends adding a reference to paragraph 7.17 of the supporting text: 'Improving and promoting opportunities for active travel should be considered for all development and be carried out in a way that recognises safety as a key consideration. Particular focus should be given to the safety of pedestrians, cyclists, equestrians, and other vulnerable road users. These active travel modes benefit people's health and are promoted through the Local Transport Plan, the Active Travel Strategy and the Environment Strategy.'</p> <p>We recommend adding the following paragraph: Housing and industrial development inevitably brings increased motor traffic to local roads including those minor roads favoured by non-motorised users. As traffic levels increase, use of roads by non-motorised users decreases. Provision for all non-motorised users needs to be made to encourage healthy lifestyles:</p>	<p>Comments noted.</p> <p>The Active Travel Strategy is a supporting document of the current Local Transport Plan (LTP). The main role of the strategy is to outline in more detail how the Active Travel related policies of the LTP will be delivered.</p> <p>We are about to embark on a review of our Local Transport Plan, which will be followed by a review of the LTP's supporting documents, including the Active Travel Strategy.</p> <p>Amend the supporting text as follows –          '...These active travel modes benefit people's health and are promoted through the Local Transport Plan <u>and supporting Active Travel Strategy</u>, and the Environment Strategy.'</p> <p>This is covered in more detail by Emerging Draft LPR Policy DC35 – Transport Infrastructure</p>
West Berkshire Green Exchange (lpr1557)	We have grave concerns over the impact on transport of building 2,500 homes in Thatcham which is not well-connected by road. We would want to see an analysis of people's expected lifestyles including where they can be expected to work and what their travel requirements will be. The links to the motorway system from this site are poor. The access to Thatcham Station, over one mile away, by car is also poor.	<p>Comments noted.</p> <p>The NE Thatcham site will be informed by a detailed transport assessment that will outline the potential travel patterns, including destinations and mode of travel. The assessment will include a detailed highway assessment undertaken in accordance with Department for Transport</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The two routes north are unclassified roads through villages such as Cold Ash, Hermitage and Bucklebury, the only southern routes are also unclassified and go via the level crossing or Brimpton village, and the route west is via the A4 into Newbury. Even with the current Thatcham population, these routes involve queuing at peak times. Such a development will cause pressure for further road building which would be an environmental disaster. We urge WBC to conduct and publish a full traffic modelling analysis to inform the development of this plan.</p> <p>When considering the building of new properties the requirement for off-road charging needs to be considered more rigorously. It should be assumed that every adult in a house may require a car and that each car will need off-road charging. Therefore sufficient parking should be provided as a matter of course. We see all too often housing developments plagued with poor roadside parking as the needs of the occupants is not considered by the developers. Equally the power infrastructure in properties needs to be better catered for and three phase supplies that can meet the needs of 3-4 cars charging off-peak should be considered. Electric vehicles will soon be able to supply power to the grid/house as well as take it, and this should also be considered. Other power demands are also likely such as batteries and air source heat pumps.</p> <p>Consideration should also be given to the development of rapid charging hubs like the one currently installed by Grid Serve at Braintree. Suitable locations for these should also be identified to cater for those travelling through the area and for those with limited off street parking. Such locations should be in all the towns and in the larger villages.</p> <p>Hydrogen may become a future fuel for commercial vehicles and locations should also be identified for these developments.</p> <p>Dundee City and Milton Keynes are spearheading the adoption of EVs and some of the solutions they have developed should be considered eg free and dedicated parking for EVs.</p>	<p>WebTag guidance, which will identify the impact of the NE Thatcham site on the local highway network, including routes through Cold Ash. The transport assessment process will identify an appropriate highway mitigation package to minimise the impact of the site on the local highway network in Thatcham and surrounding areas. The assessment will similarly identify a package of non-highway mitigation measures to manage the demand for car travel by providing greater choices and opportunities for active and public transport measures. This will include high levels of pedestrian and cycle connectivity, good / frequent bus services serving the site and improvements of access to and passenger facilities at Thatcham railway station. The Transport Assessment work carried out to inform the Local Plan Review will be included as part of the evidence base for the Regulation 19 submission for the Local Plan examination.</p> <p>The provision of electric vehicle charging points and infrastructure is currently actively sought in the development management process and will remain the case into the new Local Plan. The Council is also currently developing its own guidance to outline the requirements that developers will be expected to provide. The UK Government has recently announced that new homes and buildings, including those undergoing renovations, are now required to install electric vehicle charging points as part of English Building Regulations. Policy DC35 looks for opportunities to develop a comprehensive public charging network in West Berkshire.</p> <p>Alternative fuels, such as Hydrogen, may well develop during the course of the plan. The imminent review of the Council's Local Transport Plan will cover the role of alternative fuel systems.</p>

Respondent (with lpr ref)	Response	Council Response
West Berkshire Green Party (lpr1844)	We propose the following amendment: replace sentence beginning “Have regard to West Berkshire’s declared Climate Emergency ...” with: “Minimise the impact of all forms of travel on the environment, in accordance with West Berkshire’s declared Climate Emergency and Environment Strategy.”	Comments noted.  Amend the 1 <sup>st</sup> bullet point of the policy as follows – <u>‘Minimise the impact of all forms of travel on the environment, in accordance with West Berkshire’s declared Climate Emergency and Environment Strategy. minimise the impact of all forms of travel on the environment.’</u>
<b>Other stakeholders</b>		
Sam Coppinger (lpr301)	In respect to Ermin Street and Ramsbury Road, traffic along these roads is already extremely heavy and impacting all surrounding villages. Further development here would further damage the quality of life for local residents - these roads are extremely dangerous.	Comments noted.  Other than the consented logistics site adjacent to the designated employment area at Membury Industrial Estate, there are no major development proposals in this part of the district. In addition, should any development applications come forward, these would be considered on a case by case basis through the Development Management process.
Colin Duff (lpr453)	Any major proposed development such as Sandford and NE Thatcham must form part of a greater strategic transport plan for the district and their transport plans must not be permitted to dwell on immediate interfaces with existing transport. Public transport must reflect the expanding population. Provisions toward active travel must be holistic and provide all requirements.  Changes: Transport to and from Thatcham is predominantly on an east-west axis and to travel north and south, except going down narrow country roads and through villages, involves the already heavily trafficked A4 to Newbury for access to the A34 , A339 and M4 and to Theale for the M4. The proposed Thatcham NE development will vastly add to traffic and therefore Thatcham will need independent access to the M4 and thus A34 (especially for HGVs) ,	Comments noted.  A Supplementary Planning Document for Sandford has been produced to guide development of the site, including transport infrastructure and services. It is anticipated that a similar document will be prepared for NE Thatcham, in the context of current environment and transport policies.  The Council has published its Local Cycling & Walking Investment Plan to guide future active travel related investment. The LTP Active Travel strategy will also be reviewed as part of a refresh of our Local Transport Plan. The detailed transport modelling being undertaken as part of the Transport Assessment will outline the impact of the proposed Local Plan growth on the local highway network.

Respondent (with lpr ref)	Response	Council Response
	<p>and south, avoiding the level crossing, to the A339/A34 (suggest restricted to 7.5 tonnes as now).</p> <p>Public transport in West Berks is rural in nature and to accommodate a vastly expanding population far more frequent - carbon neutral - bus services operating 7 days a week for much longer hours, will be needed as provided in big towns like Reading.</p> <p>To encourage cycle travel throughout West Berks it needs to be recognised and accommodate that. West Berks is hilly, thus use of electronic bicycles to be encouraged. Cycling is to all but die-hard enthusiasts a "fair weather" activity - hot and sweaty in the summer, cold, and wet in the winter - and to promote widespread travel throughout the year supporting facilities will be required for those not cycling to a place of work. Thus mere hoops for parking cycles are wholly inadequate. Bicycles and especially electronic bicycles, are very expensive. Secure and covered bicycle parking facilities such as lockers, with charging points, will be required at destinations. As will changing and showering facilities.</p>	<p>It is expected that A4 will remain as a District freight route, serving a number of freight sites along the A4 corridor (e.g. Colthrop Ind. Est. and mineral &amp; waste sites in the Beenham area. At present, there are no plans to change this or weight restrictions in the area.</p> <p>The Council has recently published a Bus Services Improvement Plan to outline how it intends to develop bus services in West Berkshire, including rural areas.</p> <p>New micro-mobility technologies, such as electric bicycles, will be encouraged as they emerge. How these will be incorporated into the local transport network will be considered further in the forthcoming review of the Local Transport Plan.</p> <p>Cycling is both a utilitarian and a leisure activity. The Council actively seeks secure and covered cycle parking, plus showers, changing areas and lockers as part of workplace travel plans. The Council, with GWR has provided secure, covered cycle hubs at Newbury and Theale stations, and will explore opportunities to provide similar hubs at other stations or locations.</p>
Keith Hoddinott (lpr1992)	<p><i>Part of wider representation</i></p> <p>ALL developments are being routed onto the already overstretched only river/rail crossing, the A339.</p> <p>It would appear than there is no long-term planning/vision as to where all this extra traffic will go. The recent proposals are only "tinkering at the edges"; &amp; will certainly not be effective in 16 years' time by 2037.</p> <p>All the time, small developments are potentially blocking a possible eastern bypass.</p>	<p>Comments noted</p> <p>It is highly unlikely that the Local Plan will identify the need for new strategic roads, such as a ring road around the north, east and south of the Newbury / Thatcham area. If such a proposition were to be pursued, it is highly likely that the delivery would be tied into significant development. The proposed growth outlined in the draft Local Plan will seek to manage demand for travel through making best use of the existing highway network, with capacity enhancements within the existing network, combined with</p>

Respondent (with lpr ref)	Response	Council Response
	Changes: To formulate & implement a long-term strategy for a ring road around the north, east & south of the Newbury / Thatcham conurbation from the A339 (Vodafone complex), east & north of existing developments; via Pipers Way, onto A339 at Greenham Business Park, & link at "Swan" rdbt., Newtown; & onto Washwater A34 / A343.	measures to develop and encourage sustainable and active travel choices.
Susan Millington (lpr469)	<p>"Have regard to West Berkshire's declared Climate Emergency" is very weak.</p> <p>Proposed amendment: "In line with West Berkshire's declared Climate Emergency, to minimise the impact of all forms of travel on the environment."</p>	<p>Comments noted.</p> <p>Amend the 1<sup>st</sup> bullet point of the policy as follows – <u>'Minimise the impact of all forms of travel on the environment, in accordance with Have regard to the West Berkshire's declared Climate Emergency<sub>2</sub> and Environment Strategy. minimise the impact of all forms of travel on the environment.'</u></p>
Ian Parsons (lpr831)	<p>Changes:</p> <p>Basildon has become a major route for cyclists - which is thoroughly welcomed. It would be good if more signposting of cycle routes were to be done. Also, with the added increase of walkers, thought should be given to making rural roads safer for those not in cars. White lined pavements would be helpful.</p>	<p>Comments noted.</p> <p>The Council actively supports the increase in cycling in all parts of West Berkshire, for both leisure and everyday activities. The development of leisure routes will be further considered as part of the review of the Council's Active Travel Strategy, but we would be willing to work with local communities to develop such initiatives.</p>
Graham Storey (lpr588)	<p>"Have regard to West Berkshire's declared Climate Emergency" is not strong enough</p> <p>Changes:</p> <p>"Have regard to West Berkshire's declared Climate Emergency" to "In line with West Berkshire's declared Climate Emergency, to minimise the impact of all forms of travel on the environment."</p>	<p>Comments noted.</p> <p>Amend the 1<sup>st</sup> bullet point of the policy as follows – <u>'Minimise the impact of all forms of travel on the environment, in accordance with Have regard to the West Berkshire's declared Climate Emergency<sub>2</sub> and Environment Strategy. minimise the impact of all forms of travel on the environment.'</u></p>
Nataliya Topliss (lpr810)	The local roads are congested and cannot cope with existing needs. The transport links are of full capacity with congestion on the A4. As a solicitor, I traveled to work to Reading every day. It took me 1 hour 30 min on average	Comments noted.

Respondent (with lpr ref)	Response	Council Response
	<p>to get from Thatcham to Reading daily. This route should normally take 25 min. I spent the last 10 years travelling to Reading and it is a complete hell to travel on the A4 due to excessive daily congestion. All trains are also overcrowded daily.</p> <p>West Berks Council's strategy of 2012 indentified, that after a period of rapid housing growth, infrastructure in Thatcham had failed to keep pace and there should be a period for regeneration and new facilities. Since then, there has been no such regeneration so the Council's conclusions of 2012 must still stand.</p>	<p>Electrification of the railway line between Newbury and Reading has included the provision of new trains offering a higher level of seating capacity. The Council, along with GWR, are improving passenger facilities and car parking at Theale station with the aim of making it a Park &amp; Rail site to serve areas to the west of Reading.</p>
Councillor Tony Vickers (lpr557)	<p>We strongly support this policy.</p> <p>More than any other policy in the draft Plan, the policy and its supporting text is drafted in the spirit of the Climate Emergency and references the Environment Strategy very appropriately. It expresses a vision of the very different and more sustainable future we must seek to attain.</p> <p>We would like to see the words "Active Travel Strategy" in supporting text para.7.17.</p>	<p>Comments noted.</p> <p>Amend the supporting text as follows –</p> <p>'...These active travel modes benefit people's health and are promoted through the Local Transport Plan <u>and supporting Active Travel Strategy</u>, and the Environment Strategy.'</p>
Toby and Gail Woodhouse	<p><i>(Extracted from main representation to SP17 Thatcham)</i></p> <p>Thatcham is already a bottleneck for traffic flowing through the town on the A4 between Newbury and Reading. By introducing a new road network with the proposed traffic calming, traffic lights and roundabouts, the impact of on the flow of traffic will be significant.</p> <p>All of the above will have a knock on detrimental effect on the local roads and quiet lanes in Bucklebury as the additional cars and residents try to avoid the traffic chaos in and around Thatcham and the associated A4 area. The local lanes and roads which are designed with layouts, size and speed limits to support only local traffic will be used as short cuts through to Reading, Newbury and the M4 to avoid the A4 congestion.</p> <p>We note reference is made to the close proximity of the proposed developments to Thatcham Railway Station. The ability to get to the station</p>	<p>Comments noted.</p> <p>The impact of the proposed NE Thatcham development on the local highway network is a key consideration of the LPR Transport Assessment. A highway mitigation package to off-set the predicted traffic impact of the NET site is being developed that will improve performance of the junctions near the site and provide additional capacity on the A4.</p> <p>The Transport Assessment covers the whole of West Berkshire, including the local routes through the Upper Bucklebury. The outline draft highway mitigation package</p>

Respondent (with lpr ref)	Response	Council Response
	<p>at peak times is already near impossible by car. While we appreciate the plan places an emphasis on sustainable travel there is no requirement for residents to comply with this. Cycle ways and pedestrian routes may be included and built by the developers but in poor weather, the dark winter months and for convenience residents will turn to their cars and further impact on the already congested road network.</p>	<p>being developed for the NET site will minimise displacement of traffic from the A4 onto other routes.</p> <p>Improving access to and improving passenger facilities at Thatcham railway station is likely to be a key project for the NET site. It is recognised that as well as improving active travel access to the station, improvements to access by bus and car parking would also be necessary. This also includes a need to make the station more accessible for all who wish to travel. West Berkshire has a good record of working with the rail industry and local communities in the development and delivery of such projects.</p>
<b>Landowners, site promoters and developers</b>		
<p>Lichfield for North East Thatcham Partnership (lpr2403)</p>	<p>We welcome the inclusion of this policy in promoting opportunities for active and sustainable travel. NET is well located to access existing employment, retail and leisure opportunities currently provided within Thatcham through walking and cycling, while the public transport network offers regular services to local towns such as Newbury and Reading, and beyond. The provision of primary schools within the development will remove the need for pupils to travel from the site, while the secondary school will reduce the need for secondary school pupils to travel from Thatcham to Newbury and elsewhere. The additional local facilities and services within the development, which will be within walking distance for local residents, will also internalise many trips which would otherwise require traveling further afield.</p> <p>The proposed development will be supported by a Transport Assessment which will identify suitable mitigation measures to offset the likely impact of the development along key sections of the local highway network.</p>	<p>Comments noted.</p> <p>The NET site is located near to the strategic cycling corridor along the A4 identified in the Council's Local Walking and Cycling Infrastructure Plan between the Gables Way roundabout and Newbury town centre.</p> <p>It is expected that a School Travel Plan will be developed for each new school on the NET site to assist in encouraging sustainable journeys for pupils, parents and staff. It is important that the masterplanning process for the NET site includes permeable neighbourhoods to encourage active travel journeys to be easily made within the site.</p>
<p>Ptarmigan Group (lpr2346)</p>	<p>Draft Policy SP22 sets out the requirements for 'development that generates a transport impact'. Footnote 1 to the policy states that development proposals may not need to fulfil each of the policy criteria and states that clarification is provided in the supporting text. However, the supporting text does not provide sufficient clarification regarding the specific types and</p>	<p>Comments noted.</p> <p>Policies relating to specific types and locations of development are covered elsewhere in the Local Plan. Transport issues would be a material consideration along</p>

Respondent (with lpr ref)	Response	Council Response
	locations of development that are required to meet the criteria of Policy SP22.	other policy areas when applications are determined through the Development Management process. The criteria listed in SP22 relate purely to transport issues that need to be considered.
Savills for Englefield Estate (lpr1533)	Draft LPR Policy SP22 sets out the requirements for ‘development that generates a transport impact’. Footnote 1 to the policy states that development proposals may not need to fulfil each of the policy criteria and states that clarification is provided in the supporting text. However, the supporting text does not provide sufficient clarification regarding the specific types and locations of development that are required to meet the criteria of Policy SP22. In particular, specific recognition should be given to development in rural areas where sustainable transport opportunities may be more limited. Indeed paragraph 84 of the NPPF emphasises that, ‘Planning policies and decisions should recognise that sites to meet local business and community needs in rural areas may have to be found adjacent to or beyond existing settlements, and in locations that are not well served by public transport.’ In these instances a balanced approach should be taken to meeting the policy criteria, in order to facilitate appropriate development to support rural communities.	<p>Comments noted.</p> <p>The Local Plan Review contains a number of policies (such as DC1 – Development in the Countryside) to guide and manage development in rural areas, which reflects the rural nature of West Berkshire. DC1 states that “planning permission will not be granted where development would have adverse cumulative effect on the environment or highway safety”.</p> <p>Transport issues, such as accessibility and impact on local highway network, will be one of a number of considerations that will be taken into account as part of the development management process</p>

## Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

### Emerging Draft LPR Policy: SP23 Infrastructure requirements and delivery

### (Proposed Submission LPR Policy: SP24 Infrastructure requirements and delivery)

Number of responses received: 12

Respondent (with lpr ref)	Response	Council Response
<b>Internal</b>		
N/A		
<b>Statutory consultees</b>		
Wokingham Borough Council (lpr1480)	<p>Policy SP 23 relates to Infrastructure requirements and delivery. It states:</p> <p>“The key infrastructure schemes required to facilitate new development and secure the delivery of development within this plan include, but are not limited to, those schemes set out within the Infrastructure Delivery Plan. A schedule of the infrastructure which has been assessed as critical to the delivery of the Local Plan Review will be included within an appendix.”</p> <p>WBDC’s background evidence webpages note that an updated Infrastructure Delivery Plan (IDP) has been produced and will be published shortly. Similarly, Appendix 5 – Critical Infrastructure Schedule of the Infrastructure Delivery Plan is left blank to be updated at a later stage in the plan making process and there is no Key Diagram within the plan. At the time of writing, it has not been possible to consider the infrastructure interventions deemed necessary to deliver and support the growth proposed in the Plan.</p>	<p>Comments noted.</p> <p>Policy SP23 will be amended to delete the reference to ‘critical’ infrastructure as follows -  ‘The <u>key strategic and local infrastructure schemes</u> required to facilitate new development and secure the delivery of development within this plan <del>include, but are not limited to, those schemes set out within the Infrastructure Delivery Plan.</del> <u>will be linked to the phasing of new development. Phasing and specific infrastructure requirements are set out within the Infrastructure Delivery Plan (IDP).</u> <del>A schedule of the infrastructure which has been assessed as critical to the delivery of the Local Plan Review will be included within an appendix.</del>’</p> <p>The Draft IDP was published on the Council’s website in October 2021.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Notwithstanding, a Transport Assessment Report has been produced. All existing commitments and the development proposed within the Plan has been modelled to 2037. An initial list of junctions that would be impacted by development has been identified. Transport modelling is an iterative process so further model runs will be necessary as the strategy evolves. Future work will include identifying and scoping the necessary mitigation that will be required to address areas of concern highlighted by the transport modelling outputs.</p> <p>It is recommended that WBC requests to be fully engaged in the production of the IDP, future transport modelling, and any other infrastructure evidence in order to understand at the earliest opportunity what the potential impacts of development would be and what infrastructure is proposed to mitigate this. This will be a key Duty to Cooperate issue moving forwards.</p>	<p>This document includes a schedule of infrastructure requirements. The Draft IDP is currently being updating and will be published alongside the Regulation 19 Local Plan Review. The request to be fully engaged in the production of the IDP is noted and the Planning Policy Team will ensure that Wokingham Borough Council is re-consulted.</p> <p>At the time of writing no further representations were made by Wokingham Borough Council on the Draft IDP (October 2021). As a result, no further amendments need to be made in light of this representation.</p>
Hungerford Town Council (lpr145)	The scope here needs to include health and education services being able to absorb the effects of development with detracting from existing service levels.	<p>Comment noted.</p> <p>The Draft IDP was published on the Council's website in October 2021.</p> <p>This document includes a schedule of infrastructure requirements, including those for health and education. The Draft IDP is currently being updating and will be published alongside the Regulation 19 Local Plan Review. At the time of writing no further representations were made by Hungerford Town Council on the Draft IDP (October 2021). As a result, no further amendments need to be made in light of this representation.</p>
Shaw-cum-Donnington Parish Council (lpr217)	<p>Response from Shaw-cum-Donnington Parish Council on Local Plan Consultation</p> <p>SP23 Infrastructure requirements and delivery.</p> <p>We support the policy but note with the North Newbury development the developers have avoided any social infrastructure. For example a</p>	<p>Support noted.</p> <p>As a result, no further amendments need to be made in light of this representation.</p> <p>Development North of Newbury comprises land to the east and land to the west of the A339 (Vodafone roundabout).</p>

Respondent (with lpr ref)	Response	Council Response
	reasonable number of allotments and their reluctance to provide the promised community centre.	<p>Planning permission for land to the east was granted in 2020 (19/00442/OUTMAJ and associated reserved matters) for phase 1-4 (DWH) and planning permission to the west for phase 7 (Taylor Wimpey). The permission was subject to developer contributions by way of s106 agreement (including social housing, land and contributions towards a primary school, land for open space (including public open space, allotments, woodlands and landscaping corridors). The Community Infrastructure Levy also applies and over £3M is due to be collected by January 2023. The levy can help other social infrastructure if identified as a requirements by the Council and contributions given over to the parish council can also contribute towards any other social infrastructure in the area, including the allotments and/or a community centre. Thus the development has contributed to social infrastructure projects.</p> <p>As a result, no further amendments need to be made in light of this representation.</p>
Newbury Town Council (lpr2252)	We cannot be expected to comment on this policy until the Infrastructure Delivery Plan is published.	<p>Comment noted.</p> <p>The Draft IDP was published on the Council's website in October 2021.</p> <p>This document includes a schedule of infrastructure requirements. The Draft IDP is currently being updating and will be published alongside the Regulation 19 Local Plan Review.</p> <p>At the time of writing no further representations were made by Newbury Town Council on the Draft IDP (October 2021). As a result, no further amendments need to be made in light of this representation.</p>

Respondent (with lpr ref)	Response	Council Response
Stratfield Mortimer Parish Council (lpr408)	The policy/text should include the requirement for all developments “local knowledge on infrastructure issues related to the potential development be sought either via a Parish Council or included in an NDP”.	Commented noted. However it is not considered necessary to include additional text to require all developments to take into account local knowledge. This happens through the planning application process through the planning application consultation process. Either an infrastructure stakeholder will indicate certain infrastructure requirements or the parish council can do so within the context of the NP. The development plan is read ‘as a whole’, therefore the NDP will link to the Local Plan Review, once it is adopted and then form part of the development plan. No further amendments need to be made in light of this representation.
Greenham Parish Council (lpr906)	GPC cannot be expected to comment on this policy until the infrastructure delivery plan is published.	<p>Comment noted.</p> <p>The Draft IDP was published on the Council’s website in October 2021.</p> <p>This document includes a schedule of infrastructure requirements. The Draft IDP is currently being updating and will be published alongside the Regulation 19 Local Plan Review.</p> <p>At the time of writing no further representations were made by Greenham Parish Council on the Draft IDP (October 2021). As a result, no further amendments need to be made in light of this representation.</p>
<b>General consultation bodies</b>		
Canal and River Trust (lpr883)	<p>SP 23 support but suggest amendments</p> <p>This policy should be amended to include mention that existing infrastructure, both on and off site may need to be improved or extended, rather than just deal with the provision of new infrastructure. However, we are pleased to note that the supporting text mentions blue infrastructure.</p>	<p>Support noted.</p> <p>The Draft IDP was published on the Council’s website in October 2021.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>This document includes a schedule of infrastructure requirements, including blue infrastructure (canals and Rivers). The document states that “The Canal and River Trust will be contacted and comments sought on the infrastructure requirements arising from the Local Plan Review”. The Draft IDP will then be updated to include any comments and will be published alongside the Regulation 19 Local Plan Review.</p> <p>At the time of writing no further representations were made by the Canal and River Trust on the Draft IDP (October 2021).</p> <p>In relation to the suggested wording – whilst it is recognised that existing infrastructure on and off site may need to be improved, the policy reflects government guidance in that a development cannot be expected to address deficiencies in existing infrastructure.</p> <p>As a result, no further amendments need to be made in light of this representation.</p>
<b>Other stakeholders</b>		
Sam Coppinger (lpr302)	'Improvements' have previously been made to the Ramsbury Road / Ermin Street junction but this has in fact rendered the junction even more dangerous. Sometimes, it is clear that further development is just not appropriate.	<p>Comment noted.</p> <p>No further amendments need to be made in light of this representation given that this is a specific highway matter.</p>
Keith Hoddinott (lpr1990)	<p>Full representation relating to drainage and highways infrastructure is attached</p> <p>Summary</p> <p>I press the Council, through the MP (Mrs. Farris) &amp; the LGA (&amp; any other bodies they see fit – eg. professional &amp; consumer bodies), to ensure that Sections 3 &amp; 42 of the 2010 Flood &amp; Water Management Act be</p>	<p>Comment noted.</p> <p>The Draft IDP was published on the Council’s website in October 2021.</p> <p>This document includes a schedule of infrastructure requirements. This includes drainage schemes. The Draft</p>

Respondent (with lpr ref)	Response	Council Response
	implemented & be made mandatory for such infrastructures to be adopted alongside the outline planning approval & subsequent detailed approvals, as a matter of urgency; or implement suitable planning conditions.	IDP is currently being updating and will be published alongside the Regulation 19 Local Plan Review.  At the time of writing no further representations were made by Keith Hoddinott on the Draft IDP (October 2021). As a result, no further amendments need to be made in light of this representation.
Councillor Tony Vickers (lpr558)	We support this policy but cannot comment at this stage because there is no detail: the Delivery Plan doesn't yet exist.  Changes: We need to see at least a draft Appendix 5 to give some idea of what kind of infrastructure, as well as its amount and location, before we can suggest change. The "change" is therefore to fill in the blank!	Support noted.  The Draft IDP was published on the Council's website in October 2021.  This document includes a schedule of infrastructure requirements. The Draft IDP is currently being updating and will be published alongside the Regulation 19 Local Plan Review.  At the time of writing no further representations were made by the respondent on the Draft IDP (October 2021). As a result, no further amendments need to be made in light of this representation.
<b>Landowners, site promoters and developers</b>		
Lichfields for North East Thattham Partnership (lpr2404)	More detail on the potential key infrastructure schemes required to facilitate new development and secure the delivery of NET are set out in TPA's note at Appendix 3. This will need revisiting on publication of the new IDP which will include a schedule of the infrastructure which has been assessed as necessary to enable the development to proceed.	Comment noted.  The Draft IDP was published on the Council's website in October 2021.  This document includes a schedule of infrastructure requirements. The Draft IDP is currently being updating and will be published alongside the Regulation 19 Local Plan Review.

Respondent (with lpr ref)	Response	Council Response
		At the time of writing no further representations were made by North East Thatcham Partnership on the Draft IDP (October 2021). As a result, no further amendments need to be made in light of this representation.
Bloor Homes & Sandford Farm (lpr2174)	This policy refers to a schedule of the infrastructure which has been assessed as critical to the delivery of the Local Plan Review to be included within an appendix. This is not appended to the consultation document. We reserve the right to make further representations in relation to this in due course.	<p>Comment noted.</p> <p>The Draft IDP was published on the Council's website in October 2021. This document includes a schedule of infrastructure requirements. The Draft IDP is currently being updating and will be published alongside the Regulation 19 Local Plan Review.</p> <p>At the time of writing no further representations were made by Bloor Homes and Sandford Farm on the Draft IDP (October 2021). As a result, no further amendments need to be made in light of this representation.</p>

### Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

#### Emerging Draft LPR ref: Chapter 8 Non-strategic site allocations

#### (Proposed Submission LPR ref: Chapter 8 Non-strategic site allocations)

Number of responses received: 9

Respondent (with lpr ref)	Response	Council Response
<b>Internal</b>		
None		
<b>Statutory consultees</b>		
Hungerford Town Council (lpr146)	No comments	Response noted.
Newbury Town Council (lpr2251)	We only comment in detail on those that are within or adjacent to Newbury Settlement Area. However, in general we believe that a few more small sites need to be identified outside of major urban areas in Rural Service Centres and Service Villages, for reasons given above (SP nn). We would prefer these to come forward through community led neighbourhood planning.	Comments noted.  The Council's strategy is for a mix of sites: strategic sites such as Sandford Park and North East Thatcham, which can delivering infrastructure, facilities and significant numbers of affordable homes and a larger number of medium and smaller sites, including brownfield sites within settlement boundaries. The strategy seeks to focus development in the more sustainable settlements of the District rather than distribute development more evenly. This approach continues that set out in the Core Strategy which went through all stages of consultation, examination and adoption by the Council.

Respondent (with lpr ref)	Response	Council Response
		<p>Neighbourhood plans can include allocations, and the adopted Stratfield Mortimer NDP includes an allocation. The Hungerford and Lambourn NDPs are currently in preparation and these will also include allocations.</p> <p>The Parish of Newbury was designated as a Neighbourhood Area in August 2021, and this is the first formal stage in the preparation of a neighbourhood plan. The neighbourhood plan for Newbury could include allocations for residential development.</p>
BBOWT (lpr975)	<p>We welcome the measures to protect biodiversity within the policy wording but suggest this is strengthened to ensure national policy and legislation is enforced. Throughout the non-strategic site allocations, the following wording is used in the policy wording for sites:</p> <p><i>An extended phase 1 habitat survey will be required together with further detailed surveys arising from that as necessary. Appropriate avoidance and mitigation measures will need to be implemented, to ensure any protected species are not adversely affected.</i></p> <p>There is not enough emphasis on the requirement to mitigate for effects on habitats and we suggest the wording should not be limited to protected species as it does not cover obligations to protect designated sites or consider habitats and species of principal importance (as listed under Sections 40 and 41 of the Natural Environment and Rural Communities Act (NERC) 2006). We suggest the wording is amended to read:</p> <ul style="list-style-type: none"> <li>An extended phase 1 habitat survey will be required together with further detailed surveys arising from that as necessary. Appropriate avoidance and mitigation measures will need to be implemented, to ensure any <b>designated sites and protected and/or notable habitats and/or</b> species are not adversely affected.</li> </ul> <p>The policies for non-strategic site allocations also frequently refer to protection measures for ancient woodland. This includes “<i>Appropriate buffers of at least 15 metres between the development and the areas of ancient woodland</i>” and “<i>Provide a 15m buffer to ancient woodland</i>”.</p> <p>Natural England and Forestry Commission (2018) standing advice (which is a material planning consideration) does state that a buffer zone of at least 15 metres is required</p>	<p>Comments noted.</p> <p>The non-strategic site allocation policies will be amended to include the suggested wording in order to increase emphasis on the requirement to mitigate for effects on habitats. The amended text will read as follows: ‘An <u>Ecological Impact Assessment (EclA)</u> will be required. Appropriate avoidance and mitigation measures will need to be implemented, to ensure any <u>designated sites and/or protected habitats and/or</u> species are not adversely affected.’</p> <p>Since the Regulation 18 consultation, Natural England’s standing advice on ancient woodland was revised in January 2022 (<a href="https://www.gov.uk/guidance/ancient-woodland-ancient-trees-and-veteran-trees-advice-for-making-planning-decisions">https://www.gov.uk/guidance/ancient-woodland-ancient-trees-and-veteran-trees-advice-for-making-planning-decisions</a>) to state that the following: <i>Proposal should have a buffer zone of at least 15 metres from the boundary of the woodland to avoid root damage (known as the root protection area). Where assessment shows other impacts are likely to extend beyond this distance, the proposal is likely to need a larger buffer zone. For example, the effect of air pollution from development that results in a significant increase in traffic. For ancient or veteran trees (including those on the woodland boundary),</i></p>

Respondent (with lpr ref)	Response	Council Response
	<p>for ancient woodland but also states that “<i>The size and type of buffer zone should vary depending on the scale, type and impact of the development.</i>” Therefore, the buffer zone should not be determined at the allocation stage unless it had been informed by a detailed, site-specific assessment. We recommend that the policy wording for any site allocations within close proximity to ancient woodland is revised to:</p> <ul style="list-style-type: none"> <li>• Appropriate buffers between the development and the areas of ancient woodland will be provided that are of a sufficient size and type to negate any impact on the ancient woodland and supported by evidence from a detailed site-based assessment.</li> </ul>	<p><i>the buffer zone should be at least 15 times larger than the diameter of the tree. The buffer zone should be 5 metres from the edge of the tree’s canopy if that area is larger than 15 times the tree’s diameter. This will create a minimum root protection area.</i></p> <p>Allocations which are adjacent to ancient woodland will include in the site specific policy the following requirement: <u>‘Provide an appropriate buffer of at least 15 metres between the development and ancient woodland. The precise buffer will be determined through detailed assessment and design when proposals are submitted for development.’</u></p>
Savills (UK) Ltd for Thames Water (lpr1742)	<p>The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure.</p> <p>Thames Water’s site specific comments from desktop assessments on water, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed development sites [are set out under each site policy], but more detailed modelling may be required to refine the requirements.</p> <p>There’s a number of sites which fall within our source protection zones which we’ve provided comment on/. It is important to recognise these zones may be at particular risk from polluting activities on or below the land surface. To prevent pollution, the Environment Agency and Thames Water will use a tiered, risk-based approach to regulate activities that may impact groundwater resources. The applicant is encouraged to read the Environment Agency’s approach to groundwater protection (available at <a href="https://www.gov.uk/government/publications/groundwater-protection-position-statements">https://www.gov.uk/government/publications/groundwater-protection-position-statements</a>) and may wish to discuss the implication for their development with a suitably qualified environmental consultant.</p> <p><b>Process</b></p> <p>We use the information in local plans to estimate when upgrades will be required. It is therefore important that the local authority keep us informed of any changes to local plan numbers and how well they are delivering homes against those objectives. Where this doesn’t happen it could lead to delays in the delivery of vital infrastructure</p>	<p>Comments noted. Proposed Submission LPR Policy DM6 has regard to water quality, and the policy is clear that waterbodies in the District will be protected and enhanced. If development is likely to have an adverse impact on water quality, then the policy requires that a detailed water quality assessment will be required. The policy goes on to state that appropriate measures will be required to be undertaken by the developer to ensure that a proposed development does not contaminate surface or groundwater resources.</p> <p><b>Process:</b> Comments noted.</p> <p><b>Network:</b> It is proposed to include a requirement in all of the site allocation policies for an integrated water management study that would be submitted at the planning application stage. The requirement will be worded as follows:</p> <p><u>‘An integrated water supply and drainage strategy will be provided in advance of development to ensure the</u></p>

Respondent (with lpr ref)	Response	Council Response
	<p><b>Network</b> Where offsite upgrades are required to serve development they will be delivered and funded by Thames Water using infrastructure charges more info here: <a href="https://www.thameswater.co.uk/developers/charges">https://www.thameswater.co.uk/developers/charges</a> The time to deliver upgrades shouldn't be underestimated it can take 18months – 3 years from the time of certainty and in some cases it may be appropriate for a suitably worded planning condition to be attached to ensure development doesn't outpace the upgrades. Developers are encouraged to engage at the earliest opportunity to discuss their development needs via Thames waters pre planning service: <a href="https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity">https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity</a> We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed. Please also refer to detailed comments above in relation to the infrastructure section. Where developers do not engage with Thames Water prior to submitting their application, this will more likely lead to the recommendation that a Grampian condition is attached to any planning permission to resolve any infrastructure issues.</p>	<p><u>provision of adequate and appropriate water infrastructure for water supply and waste water, both on and off site. Development will be occupied in line with this strategy.</u><sup>1</sup></p>
Environment Agency (lpr1678)	<p><i>See attachment on the Local Plan Review Consultation Portal (<a href="https://consult.westberks.gov.uk/kse/event/35924/peoplesubmissions/section/">https://consult.westberks.gov.uk/kse/event/35924/peoplesubmissions/section/</a>) for full response to the Local Plan Review.</i></p> <p><u>Water Cycle Study Phase 1 – Scoping</u> As mentioned [under relevant individual site allocation policies] there are some sites that would require further investigation and analysis in a Phase 2 Water Cycle Study (WCS). This would need to involve more in depth modelling to ensure any development did not contribute to deterioration of a waterbody, or prevent a waterbody getting to good status under the Water Framework Directive. The WCS Phase 1 scoping has also highlighted many WWTWs that may require upgrades, and we would expect to see further analysis of these sites in Phase 2 WCS.</p> <p><u>Level 2 Strategic Flood Risk Assessment</u> We have reviewed the Local Plan alongside the Level 2 Strategic Flood Risk Assessment (SFRA) as part of our cost recovery framework agreement with West</p>	<p>Comments noted.</p> <p><u>Water Cycle Study Phase 1 – Scoping:</u> A Phase 2 Water Cycle Study has been produced and it was published in September 2021. It can be viewed at: <a href="https://info.westberks.gov.uk/evidencebase">https://info.westberks.gov.uk/evidencebase</a>.</p> <p><u>Level 2 Strategic Flood Risk Assessment (SFRA):</u> The Level 2 SFRA has been updated to include the assessments of the following sites:</p> <ul style="list-style-type: none"> <li>• Land at Poplar Farm Cold Ash;</li> <li>• Land West of Spring Meadows, Great Shefford</li> <li>• Sandford Strategic site allocation</li> <li>• Land adjoining Lynch Lane, Lambourn;</li> </ul>

Respondent (with lpr ref)	Response	Council Response
	<p>Berkshire. We provided our comprehensive comments separately on this document in October 2020. We appreciate you allowing us to provide detailed comments, we hope our review of this document at an early stage will inform you going forwards, and will continue to work with you on developing this document.</p> <p>There were a number of sites put forward in the Local Plan which do not appear to be discussed in the SFRA, despite some significant flooding issues relating to these sites. For example, The 'North East Thatcham' strategic site contains an area which is an existing flood risk management structure, recently completed by West Berkshire Council (Floral Way Flood Storage Area). In addition, further surface water management schemes are being planned by West Berkshire Council within this area, including 'East Thatcham'. This site does not appear to be included in the SFRA, however given the presence of flood defences guidance will be required (in the SFRA level 2 and the local plan) as to where development would, and would not be appropriate. It is crucial that both existing flood defences, and land proposed as future flood storage areas are safeguarded against future development. This is to ensure that flood risk is not increased elsewhere, and that development is appropriately flood resistant and resilient in accordance with Paragraph 163 of the NPPF.</p> <p>Furthermore any site specific Flood Risk Assessment would need to carefully consider the impact of the development on the surface water management scheme(s).</p> <p>There are a number of other sites need to be included in the level 2 SFRA (and are not currently included):</p> <ul style="list-style-type: none"> <li>• Land at Poplar Farm Cold Ash (Site Ref: HSA 6) - The local plan highlights the need for a surface water detention basin to accommodate development drainage</li> <li>• Land adjacent to Junction 12 of M4, Bath Road, Calcot (Site Ref HSA 12) – Contains an area of Flood Zone 2</li> <li>• Land off Stretton Close, Bradfield Southend (Site Ref: HSA 22) - The Local plan states that the site flooded during January/February 2014</li> <li>• Land West of Spring Meadows, Great Shefford (Site Ref: GS1)- While only a small area of site is at risk from surface water, it should be highlighted that the village has a significant history of groundwater/surface water flooding and this will need to be assessed in more detail in relation to the site with a site-specific</li> </ul>	<ul style="list-style-type: none"> <li>• Pirbright Institute Site, High Street, Compton; and</li> <li>• Long Copse Farm, Enborne.</li> </ul> <p>The following sites have planning permission, therefore the Level 2 SFRA has been updated to include a planning history overview and the flood risk and drainage considerations that were made as part of the planning application:</p> <ul style="list-style-type: none"> <li>• Land off Stretton Close, Bradfield Southend;</li> <li>• Land off Charlotte Close, Hermitage; and</li> <li>• Land to the south east of the Old Farmhouse, Hermitage.</li> </ul> <p>The Level 2 SFRA can be viewed at: <a href="https://info.westberks.gov.uk/sfra">https://info.westberks.gov.uk/sfra</a>.</p> <p>The site Land adjacent to Junction 12 of M4, Bath Road, Calcot was not subject to a Level 2 SFRA as the allocation will be removed from the proposed submission version of the Local Plan Review. This is because the site is close to completion.</p> <p>North East Thatcham was considered within the Level 2 SFRA produced for the Core Strategy, one of the development plan documents that forms part of the current Local Plan. This will be included on the Council's website alongside the other evidence for the Local Plan Review at: <a href="https://info.westberks.gov.uk/sfra">https://info.westberks.gov.uk/sfra</a>.</p> <p>In addition, extensive additional work on the location and safeguarding of flood defences is being done with the promoters of the North East Thatcham site.</p>

Heritage Forum (lpr84)	<p>RSA20. The correct name of the road is New Road Hill. The development of 14 houses on land on this road and north of the A4 has recently been turned down because of the dangerous access.</p> <p>RSA1. We agree that the design and scale of the Kennet Centre development should complement existing buildings and the Newbury Conservation Area.</p>	<p>Comments noted.</p> <p><u>RSA20:</u> See Council response to representations made in respect of RSA20 Land North of A4 Bath Road, Woolhampton.</p> <p><u>RSA1:</u> See Council response to representations made in respect of RSA1 Kennet Centre, Newbury.</p>
<b>Other stakeholders</b>		
Councillor Tony Vickers (lpr561)	<p>We accept that the list of non strategic sites in the Plan will change before the Reg 19 draft is prepared and probably again before the new Plan is adopted. We know of several more HSA DPD sites listed in this draft that have progressed towards completion.</p>	<p>Comments noted.</p> <p><u>Allocation of further HELAA sites:</u></p>

Respondent (with lpr ref)	Response	Council Response
	<p>We also wish to propose some HELAA sites for the Plan that we believe are deliverable in the Plan period but have so far not been included in the draft Plan and we believe some sites from HELAA that have been included in this draft should be capable of taking a higher number of dwellings.</p> <p>In total, having studied the HELAA in some detail, we have identified sites - some of which have been partially taken up in the draft Plan - which could take an additional 450 new dwellings. Most of these are in the AONB but in Rural Service Centres of Service Villages. Some of these may come forward in Neighbourhood Plans but some are not in villages that have yet proposed to undertake a NP.</p> <p>In addition, we have identified about 500 dwellings that could be accommodated within DEAs without compromising their ability to provide increased and more appropriate employment. Add in the several other sites (of over 10 dwellings capacity) which will undoubtedly come forward as 'windfall' and we do not think that our alternative non-strategic site allocations will compromise the overall spatial strategy.</p> <p>We will detail our changes in the next draft but in some cases, for DSA sites listed in this draft, we have given our suggestions for increased allocations.</p>	<p>It should be noted that the HELAA is one of the evidence documents for the Local Plan Review (LPR) and it makes a preliminary assessment of the suitability and potential of sites. It does not recommend which sites should be allocated.</p> <p>Those sites which were not assessed as 'not developable within the next 15 years' in the HELAA were subject to further assessment as part of the site selection work to determine which sites should be proposed for allocation.</p> <p>The site selection work considered various strands of evidence that included:</p> <ul style="list-style-type: none"> <li>• Settlement hierarchy – sites in settlements / areas outside of the settlement</li> <li>• Settlement boundaries</li> <li>• Strategic Flood Risk Assessment</li> <li>• Sustainability Appraisal</li> <li>• Detailed site assessment.</li> </ul> <p>The development potential of sites has been informed by the West Berkshire Density Pattern Book Study.</p> <p>Need and demand for employment land in West Berkshire remains strong. Designated Employment Areas (DEAs) are considered to represent coherent areas of employment land containing established concentrations of office, industrial and warehousing development. These areas allow business uses to locate together, complement and support one another, with relatively little disturbance to surrounding residential areas. It is therefore important to ensure the role and function of each DEA is maintained and strengthened to enhance economic growth so as to prevent their economic function being diluted and</p>

Respondent (with lpr ref)	Response	Council Response
		potentially compromised through amenity concerns or a lack of competitiveness.
<b>Landowners, site promoters and developers</b>		
Carter Planning for Mr. R.L.A. Jones (lpr1903)	<p>See attachment on the Local Plan Review Consultation Portal (<a href="https://consult.westberks.gov.uk/kse/event/35924/peoplesubmissions/section/">https://consult.westberks.gov.uk/kse/event/35924/peoplesubmissions/section/</a>) for full response to the Local Plan Review. This includes the maps referred to in the representation below.</p> <p><b>Objection.</b> Include “Land between Folly Road, Rockfel Road and Stork House Drive” (SHLAA site reference LAM007) in the Draft Plan. In the West Berkshire Housing Site Allocations Development Plan Document - Inspector’s Report March 2017 by David Hogger BA MSc MRTPI MCIHT he stated:- “88. Another site in the settlement between Folly Road and Stork House Drive (LAM007 in the SHLAA) displays similar characteristics to the allocated site at Lynch Lane. However, the proposed allocation is sound and there is no justification at this time for allocating further development within the AONB because the limit of 2,000 dwellings, as set out in the CS, would be significantly breached. <u>I note, however, that there is a commitment from the Council to reconsider this site as part of the WBLP preparation</u>”.</p> <p><u>This has not been done and the site has not been included in the Draft Plan.</u> To ensure Section 8 Policy RSA is justified, sound and effective, Site LAM007 should be restored to the Plan (in place of site RSA23) as previously suggested in the July 2014 Preferred Options Draft in the text of the Plan and in the settlement boundary review as follows:- Policy RSA ?? - Land between Folly Road, Rockfel Road and Stork House Drive (SHLAA site reference LAM007) Just over one hectare of this site is considered to be developable for approximately 24 dwellings. The developable area excludes the middle section of the site, reflecting the outcome of the Landscape Assessment which indicates that development on part of the site would be acceptable as long as the required mitigation measures are adhered to.</p>	<p>Comments noted.</p> <p>The Regulation 18 version of the Local Plan Review (LPR) did not include any allocations in Lambourn Parish as a Neighbourhood Plan is being prepared and this will allocate sites for development.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The site is well related to the existing settlement and close to local services, facilities and open countryside. It is proposed that the site is allocated for low to medium density development, with a mix of dwelling sizes and types including affordable housing. Access can be obtained either from Folly Road or from Rockfel Road, with a potential additional pedestrian access onto Holly Road.</p> <p>Full ecological and archaeological surveys will be required to inform any development proposal.</p> <p>Map [see attachment]</p> <p><u>Background</u></p> <p>Our Client, Mr R L Jones has been involved in the equestrian industry in Lambourn for many years.</p> <p>The representations by Carter Planning Limited on his behalf (and on behalf of his family and Company interests) seek to demonstrate that the Draft Plan is fundamentally unsound because it underestimates the required housing provision generally. as a result it produces too few housing sites to meet needs or be flexible. More specifically our Client takes exception to the failure by the Council to consider site LAM007 despite the Council making a commitment to do this at the last Examination and despite its late omission from the current Plan which has previously been through consultation and examined in detail and found to be acceptable (and its replacement by Site RSA 23, formerly LAM015 which had not).</p> <p>This failure undermines the Council's stated criteria for the selection of sites and settlement boundaries in the rest of the Draft Plan.</p> <p>Our Clients representations therefore seek to increase housing which in turn means and increase in housing sites. As a result either the addition of SHLAA site LAM007 as having previously been acceptable in all regards to meet this need, or, if the Inspector reduces the housing need then the replacement of site RSA 23 by site LAM007 (and a re-examination of the allocation and capacity of Site RSA 22).</p> <p>Site LAM007 is located in an area where recent development has occurred over time. It is well located in relation to the heart of the village and is contained by development on three sides. It is a site which can be flexible in the amount of development which it supplies.</p> <p>In respect of site LAM007 the Council's Draft Plan is neither positive nor justified, in that LAM007 is totally and promptly deliverable and consistent with national policy, which may not be the case with other sites.</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>Facts and experience show that, contrary to assertions made by the Council and others previously, mixed housing can be provided on site, LAM007, in a manner that is <u>beneficial</u> to the community and horse racing industry, in contradiction to those claims. It is still not clear why Site LAM007 was suddenly excluded from the last Plan and site LAM015 included and LAM005 enlarged. It seems likely that this is only due to incorrect evidence regarding our Clients' adjoining stables. see below.</p> <p>LAM007 was previously <u>included</u> as a preferred site in the 2014 Consultation Issues and Options Draft when the Council concluded:-</p> <p><i>The principle -</i>  <i>The Core Strategy sets out the Spatial Strategy for the District and provides an overall framework to guide development over the plan period. The Core Strategy also outlines a housing requirement for the District to 2026, along with a spatial distribution to identify where this housing will be provided.</i></p> <p><i>The Core Strategy identifies Lambourn as a rural service centre within a Settlement Hierarchy. This means that Lambourn, along with the other rural service centres, has a range of services and reasonable public transport provision, with opportunities to strengthen its role in meeting the requirements of surrounding communities. As such, it is expected that Lambourn will accommodate some additional housing growth to 2026.</i></p> <p><i>Policy ADPP5 sets out how the spatial strategy will be delivered in the AONB. The Housing Site Allocations DPD sits underneath the Core Strategy and within this clear framework. The Housing Site Allocations DPD will allocate non-strategic housing sites for development adjacent to the existing settlement boundaries of those settlements identified within the settlement hierarchy. As such a review of settlement boundaries will take place as part this DPD.</i></p> <p><i>The Core Strategy is clear that the conservation and enhancement of the natural beauty of the landscape will be the paramount consideration in assessing sites for development within the AONB. In order to ensure that the diversity and local distinctiveness of the landscape character is conserved and enhanced, the natural, cultural and functional components of the landscape character will be considered as a whole in accordance with Core Strategy policy CS19.</i></p> <p><i>One of the consultation responses set out above outlines that '2 suitable sites have been discounted for no apparent reason'. Both these sites (LAM004 and LAM006) have been ruled out for landscape reasons. The Council's landscape consultant (Kirkham Landscape Planning Ltd/Terra Firma) carried out a Landscape Sensitivity</i></p>	

Respondent (with lpr ref)	Response	Council Response
	<p><i>Assessment (LSA) on sites submitted within the AONB. This work concluded that both sites LAM004 (Land off Bockhampton Road) and LAM006 (Land at Wantage Road and Northfields) should not be pursued for development due to the landscape impact.</i></p> <p><i>With regard to the housing type and mix, policy CS4 of the Core Strategy outlines the Council's approach and states that residential development will be expected to contribute to the delivery of an appropriate mix of types and sizes to meet the housing needs of all sectors of the community, having regard to the local context and relevant evidence sources.</i></p> <p><i>The Council's Archaeology Team has been consulted on the site and has concluded that a variety of archaeological features are in close proximity and on the site resulting in a high archaeological potential. Further investigation and evaluation will be required through the production of Heritage Impact Assessment. This will need to be carried out as part of any planning application to inform the development of the site. Should the site be taken forward as an allocation within the plan this will be set out within an allocation policy.</i></p> <p><i>The Council's Ecologist has been consulted and has concluded that the site is possibly Chalk Grassland. An extended phase 1 habitat survey would be required together with further detailed surveys arising from that as necessary. Appropriate avoidance and mitigation measures would need to be implemented, to ensure any protected species were not adversely affected. Should the site be taken forward as an allocation within the plan this will be set out within an allocation policy. The site is located over 600m (as the crow flies) from the River Lambourn, a SSSI/SAC, and it is essential that any development on the site will not adversely affect the SAC/SSSI.</i></p> <p><i>The site is not within a Flood Zone and does not sit within an area of surface water flood risk. The site is located adjacent to a groundwater emergence zone but the risk of flooding on this site is considered low. Given the site is over 1 hectare in size a Flood Risk Assessment (FRA) would be required to support any planning application on the site in accordance with policy CS16 of the Core Strategy.</i></p> <p><i>This site can accommodate up to 24 houses that will generate circa 144 daily vehicle movements including circa 14 during the 08.00 to 09.00 AM peak. It is considered that given the size of the development, the traffic impact from the proposal would be limited. Access can be obtained from Folly Road, but it probably wouldn't be appropriate considering the rural nature of the road. An alternative place for access would be via Rockfel Road. This would also connect the site to footways in the vicinity. There are currently no footways along Folly Road. A pedestrian access onto Folly</i></p>	

Respondent (with lpr ref)	Response	Council Response
	<p>Road would also be welcomed. There are footways and bus stops within the vicinity where bi-hourly services pass to Hungerford and Newbury. The site is also within walking and cycling distance of Lambourn centre.</p> <p>Existing pressure on some local services and facilities is recognised. The Infrastructure Delivery Plan (IDP) prepared alongside the Core Strategy considered all the infrastructure (including schools and doctors) that would be required to support the development of 10,500 new homes (including the scale of development allocated to each of the spatial areas). The IDP will be updated in partnership with service providers to support the Housing Site Allocations DPD once the site allocations have been confirmed and any necessary infrastructure improvements will be taken forward. Service providers are aware of the potential sites for future development and discussions are taking place as to the provision of additional services/facilities to serve the new population. All new development will be subject to the Community Infrastructure Levy (CIL) which was implemented by the Council on 1 April 2015. CIL is a levy charged on most new development and the money is used to pay for new infrastructure required as a result of the new development. Financial contributions towards mitigating the impact of an increased population on infrastructure (such as the NHS and Education provided by West Berkshire Council) could be sought through CIL. Whilst CIL replaces most of the previous system of developer contributions collected under Section 106, it will still be necessary to have S106 agreements under certain circumstances, for example to provide affordable housing, or provide infrastructure on site, or pay for infrastructure improvements required off site but specifically as a result of a development.</p> <p>In particular, consultation has taken place with Thames Water and they have not raised any concerns regarding water supply or waste water capability in relation to this site. It should be noted that infiltration of groundwater into the network has been identified as a strategic issue within Lambourn, therefore should development come forward on this site an integrated water supply and drainage strategy would be required.</p> <p>The Core Strategy is clear that the conservation and enhancement of the natural beauty of the landscape will be the paramount consideration in assessing sites for development within the AONB.</p> <p>The Council's landscape consultant (Kirkham Landscape Planning Ltd/Terra Firma Consultancy) has carried out a Landscape Sensitivity Assessment (LSA) on the site and recommended that only the land adjacent to Folly Road and below the 150m AOD</p>	

Respondent (with lpr ref)	Response	Council Response
	<p><i>contour in the south of the site be developed. Development on these parts of the site would be subject to a number of conditions, along with the protection and enhancement of key landscape features (set out within the LSA). The LSA also recommended that the larger sites within Lambourn, LAM005 and LAM007, are either only developed in part concurrently, or either one or the other selected, to continue the pattern of sequential small developments in the village.</i></p> <p><i>A Landscape and Visual Impact Assessment (LVIA) would be required as part of any planning application for development on this site to ensure any proposed development conserved and enhanced the surrounding landscape of the AONB. The requirement to provide this work as part of a planning application will be outlined within an allocation policy for the site should it be taken forward as an allocation within the plan.</i></p> <p><i>The Council's Environmental Health Department has been consulted on the Housing Site Allocation DPD Preferred Options and will have further opportunity to comment throughout the process. No concern has been raised regarding this site. The site is at risk of groundwater contamination given the local aquifer and the level of risk and any necessary mitigation measures will be explored further through a Flood Risk Assessment to be provided as part of any planning application.</i></p> <p><i>The racehorse industry plays a vital role within the local rural economy of Lambourn and surrounding areas. It is evident from the consultation responses that the site is currently used as turnout paddocks for an adjacent yard. As such the loss of the site for housing development would be contrary to policy CS12 of the Core Strategy. Policy CS12 aims to prevent pressure for redevelopment of existing facilities to other uses and the fragmentation of existing sites. Such pressures could lead to the decline of the industry locally, threaten the character and form of the settlement and increase pressure for replacement facilities in environmentally sensitive areas. Protecting yards from development for alternative uses is particularly important to the Council. (Note this is incorrect for reasons given below).</i></p> <p><i>As part of the Housing Site Allocations DPD the Council will be reviewing the settlement boundaries of those settlements within the settlement hierarchy of the Core Strategy. Criteria for this review were consulted upon as part of the Preferred Options consultation in 2014.</i></p> <p><i>Completed developments are already taken into account in terms of the housing requirement/numbers. Such areas of land adjacent to the settlement boundary will be considered further as part of the settlement boundary review</i></p>	

Respondent (with lpr ref)	Response	Council Response
	<p>The site LAM007 was also comprehensively tested by Kirkham Landscapes in 2011 who concluded:-</p> <p><u>Relationship with adjacent settlement</u>  <i>The site is surrounded on 3 sides by housing, with 20th century medium density and more recent development to the north east and south east boundaries, and older, low density housing across the road to the north west</i>  <i>The lower density housing occurs up to the 170m AOD contour, with higher density on the lower slopes, below 150m. The site itself extends up to 170m AOD with the majority below 165m AOD</i>  <i>The site contains horse paddocks and stable buildings</i></p> <p><u>Relationship with adjacent wider countryside</u>  <i>The site has some relationship with the countryside to the south west, which is a continuation of the east facing valley side, but hedgerows around and within the site, including a tall, conifer hedge disconnect the site visually from the countryside beyond</i>  <i>The site lies on slopes dropping into the valley and the settlement away from the extended wider landscape</i>  <i>Impact on key landscape characteristics</i>  <i>No woodlands are affected</i>  <i>Potential for replacing the incongruous conifer hedgerow with more appropriate planting</i>  <i>Other boundary hedges made up of native species are important features</i>  <i>Site currently in use as paddocks</i></p> <p><u>Impact on key visual characteristics</u>  <i>Not typical of the wider LCA – less exposed and smaller in scale</i>  <i>Development of the whole site would be prominent in views from the surrounding Downs and from within the settlement</i></p> <p><u>Impact on key settlement characteristics</u>  <i>Some appropriate development would not be out of keeping with existing settlement pattern</i></p> <p><u>Summary of compliance with PPS7 paragraph 21</u></p>	

Respondent (with lpr ref)	Response	Council Response
	<p><i>Development on part of this site, subject to the recommendations below, would result in little harm to the natural beauty of the AONB. It is recommended that only the land adjacent to Folly Road and below the 150m AOD contour in the south of the site be included</i></p> <p><u>Recommendations</u>  <i>Development on this site should be subject to the following conditions and the protection and enhancement of the following features:  Low density, linear housing (similar to that north of Folly Lane would be the most appropriate form of development at the higher elevation, and  Higher density, similar to the housing to the east, on the lower ground in the eastern part of site.  Views from the surrounding countryside would need to be carefully considered  New planting would be important in integrating the buildings into the landscape, including the replacement of the conifer hedges.  An area between the two portions of the site for development would need to be left as open field or open space to reduce the overall impact of the development</i></p> <p><u>Our Client.</u>  Our Client and his wife have lived in Lambourn for over 40 years, as a successful jockey and trainer, in the employ of others, and for the majority of that period, self-employed in the industry. During that period they have consistently used capital gained from housing development in Lambourn to heavily invest in the horse racing industry, including a new stables, upgrading another, provision of lads' accommodation units, lunging rings, a horse walker, an innovative paper bedding business, and other facilities. They currently have a planned programme of further development in the horse racing facilities within their ownership, including a potential new yard, upgrading of boxes, a lads' hostel and a manager's unit, which is being discussed with others, but this programme will not proceed without investment within their capabilities.  In previous submissions our Clients have consistently stated that the subject land is not part of any racing establishment, is in different ownership, and that the stables will continue. The land is agricultural.</p> <p><u>Background.</u>  After long periods of previous DPD consultations, including landscape, archaeological,</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>highways, local community open day and parish council etc. assessments, and in the knowledge of horse racing issues during the consultation process the Council concluded in 2013 and again in 2014 that the site be considered a preferred site for housing development in Lambourn, subject to safeguards. This consideration was under LAM007. Our Client was notified in June 2015, that the preferred site status was proceeding to Council for confirmation in the progress to the EIP stage.</p> <p>Suddenly, in July, 2015, the process was “pulled” and late in October 2015 our Client was notified that LAM007 was rejected in the recommendations for the DPD to be put before the Council on 5 November, 2015. The reason given was conflict with the Council’s Policy (CS12) of protection for the horse racing industry in Lambourn, as the retention of the site in such use is considered important to that industry.</p> <p>On further investigation, our Client discovered that the tenant of Highview had submitted objections in or about September to the allocation, on the need of the site for “turn out”, and that with other objections about horses being on the land, caused the change. Our Client was unaware of these comments, and on 30 October his solicitor wrote to the Council requesting that the Council’s decision be deferred pending an opportunity to consider and reply to what had been said – “the right to reply”. It is also significant that the Council substituted the LAM007 site with a smaller linear development site at LAM015 (now RSA 23), which only entered the process very late in the day and had not gone through the same rigours of assessment that all other Lambourn sites have experienced.</p> <p>The objection was spurious as “turn-out” land though useful, is not essential, and is not necessary in any case to “adjoin” stables. The tenant at Felstead (who is very successful) does not have it, it is not usual in Lambourn, and our Client has expert testimonials to this effect. Furthermore, the land excluded from the submission can still be used for grazing etc.</p> <p><u>The Issues.</u></p> <p>From the consultation documents and the papers before the Council on 5, November, 2015, it is evident that at every appropriate stage, including to the “stalled” recommendation stage in mid 2015, that LAM007 was a preferred site.</p> <p>All the consideration parameters were, subject to safeguards considered positive and the conclusion of the SHLAA was “the site is proposed for a mix of dwellings and densities to suit the needs of the area”. It is significant that horse racing industry and highways concerns had been considered and dismissed in reaching the conclusion.</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>48% of respondents to Parish Council questionnaire favoured the site for residential development as their first or second choice.</p> <p>Clearly something happened in the period from mid 2015 to the Council's report in November, 2015, and those events were touched on by the last Inspector but in the absence of any explanation by the Council as to why an acceptable site had been dropped in favour of less favourable one(s) they appeared to us be:</p> <ul style="list-style-type: none"> <li>• 1) Objections from a tenant and others relating to the horse racing industry issue;</li> <li>• 2) The appearance in the document of a brand new site LAM015 in Newbury Road;</li> <li>• 3) Highway comments;</li> <li>• 4) A contention relating to the delivery of the site.</li> </ul> <p>We address each issue in turn.</p> <p><u>1. The Racehorse Industry.</u></p> <p>This issue significantly rests upon the assertions of the tenant and others and ignores the history of the site's previous submissions. Comments had been received by the Council on this subject before June 2015, and the Council had given LAM007 "preferred status".</p> <p>The planning basis for current omission of LAM007 is stated in the papers as Core Strategy Policy CS12. This policy is based on three core objectives :-</p> <ul style="list-style-type: none"> <li>• Retention of suitable establishments/facilities;</li> <li>• Resistance to permanent fragmentation;</li> <li>• Redevelopment away from essential uses to the industry will be subject to suitability and necessity tests.</li> </ul> <p>Fundamental to application of the policy is an understanding of the particular site characteristics and industry practice.</p> <p>Our Client and his wife, through their interests have two yards, one at Felstead Court and the other at Highview in Lambourn. It should be noted that the subject land is not part of any racing establishment and in separate ownership from the adjacent stables of Felstead Court and Highview, which are in Company ownerships, and now let, having previously been operated by the Clients wife (as trainer) and himself until their retirement due to health and age issues.</p> <p>Felstead Court, which is also subject to a tenancy, is larger and has no adjacent land within its agreement (more follows). The tenant of Felstead is very successful – hence</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>the need for further investment in new and improved stables.</p> <p>To the south of site LAM007 is a housing development (Rockfel Road), formerly part of the proposal land, on which our Client obtained residential permission via an appeal in the 1980's. This land was subsequently built out by Westbury in the 90's.</p> <p>To the east of the site, at Stork House stables in 2002 our Client obtained residential permission, and separately, a new stables (i.e. the Highview) permission. Although the permissions are subject to S.106 Agreements, these agreements (relating to open space and jockeys accommodation at Highview) do not bind or enjoin site LAM007 in any way. The residential site was, subsequently, built by Bovis.</p> <p>In addition, to the new Highview Stables, through our Clients' companies, they have invested at the Felstead and Highview sites in a stable lads accommodation unit, a horse walker, and ancillary developments. They are currently planning further stables investments at Felstead, additional lads accommodation units and a new stables. So rather than destroying the race horse industry by seeking residential development, through their Companies, our Clients are one of the few in Lambourn to be heavily investing in it and have been able to do so because of the capital gained from gradual residential development.</p> <p>The subject land LAM007 is not part of the Felstead Court or Highview stables ownership, is not necessary for the stables and is agricultural in use. In short our Client can plough it, or keep any animals for sustenance on it or grow crops on it.</p> <p>Our Client is desirous of exploring the potential for either an alternative combined scheme (residential, stables, and lads units) or an alternative proposal including say, residential frontage development on the Folly Road frontage, with lads accommodation in the south eastern corner accessed off Rockfel Road, new stables at Felstead Court and a totally new stables in the north western corner.</p> <p>The LAM007 land is <u>agricultural</u>, in accordance with the definition in the Town &amp; Country Planning Act 1990. When our Client acquired the land from the Goulandis family trust it had been historically used for the grazing of pedigree cattle for sustenance and until three years ago it was intermittently used from Goulandis times by 3 local farmers for the grazing of sheep. All these animals grazed for sustenance from the land. Racehorses do not graze for sustenance as is explained later. To use land for the keeping of racehorses for commercial purposes is a separate user, which requires planning permission. There has never been a planning permission for such a use on the site, and to benefit from any lawfulness the horse related use would require 10 years of uninterrupted activity – 3 years is insufficient. Legally, there is no</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>application of Policy CS12 to the land.</p> <p>The main facilities required for the training of a racehorse consist of a well ventilated stable, good food, clean hay, bedding and water together with the ability of the trainer to exercise a horse safely on a sound surface as provided by the excellent public training grounds in Lambourn. Other facilities can also include horse exercisers such as walkers and turn out pens like those manufactured by Claydon. The Claydon Turnout Pens, as an example, are designed for restricted and controlled turnout in order to avoid horses galloping when they are shod with metal shoes on all four feet. The crucial factor is horses are at high risk of injury to themselves and to other horses if turned out on large areas, which owners, insurers and the like would not want. Racehorses in licensed training yards are there for the purpose of being trained for the racetrack. They are shod with metal shoes in front and behind in order that they remain sound during their training routine and that they have additional grip and stability in training and racing conditions. Most trainers will have two or three turnout pens up to the recommended 30' in diameter or a small restricted, well rail fenced area, of similar dimensions, if a shod horse needs turning out. It would be negligent to turn such horses out, other than in restricted areas.</p> <p>Horses in training for the racetrack are fed on a high protein specialised diet - they DO NOT get their sustenance from turn out.</p> <p>Our Clients two yards, which adjoin the LAM007 site are training yards and both have turn out pens, separate from the site proposed for housing. There also is an area of land which has been deliberately excluded, and will be kept open and free from any development.</p> <p>In summary on the facts the land is agricultural, does not do away with or fragment any facilities and does not involve any facilities essential to the racehorse industry.</p> <p><u>2) The appearance in the document of a new site LAM015 now RSA 23 in Newbury Road;</u> This is dealt with under our comments on site RSA 23, formerly LAM015 or HSA21.</p> <p><u>3) Highway comments;</u> In all previous considerations of site LAM007 there has not been any highways objection to the development of the site in whole or in part. Our Clients commissioned Highways Consultants to re-examine the situation. Development Transport Planning Ltd concluded, that, "in summary, they do not</p>	

Respondent (with lpr ref)	Response	Council Response
	<p><i>consider there are any substantive highway reasons for Site LAM007 to be excluded from consideration as a site to be allocated for housing in Lambourn".</i></p> <p><u>4) A contention relating to the delivery of the site.</u> The site is readily available and can be delivered.</p> <p><u>Other matters.</u> Other matters that have been raised by third parties include the following:-</p> <p><u>Amenity</u> There are several opportunities for access from the LAM007 site onto Rockfel Road or on to Folly Road none of which need impact on adjoining houses. The local impact on views due to topography is strictly limited as the Council's Landscape Assessment demonstrates. Any scheme for development can be designed in such a way as to provide a good standard of amenity for proposed properties and to protect the amenities of existing properties.</p> <p><u>Foul Sewers</u> Work has recently been carried out by Thames Water. Increased sewage from this new development can be accommodated.</p> <p><u>Drainage</u> A combination of surface water drainage and SUDs can ensure the site is adequately drained without off site impacts.</p> <p><u>Infrastructure</u> The development will make CIL contributions towards any infrastructure improvements that are required. <u>Lastly in the West Berkshire Housing Site Allocations Development Plan Document - Inspector's Report March 2017 by David Hogger BA MSc MRTPI MCIHT he stated:-</u> <u>"88. Another site in the settlement between Folly Road and Stork House Drive (LAM007 in the SHLAA) displays similar characteristics to the allocated site at Lynch Lane. However, the proposed allocation is sound and there is no justification at this time for allocating further development within the AONB because the limit of 2,000</u></p>	

Respondent (with lpr ref)	Response	Council Response
	<p><u> dwellings, as set out in the CS, would be significantly breached. I note, however, that there is a commitment from the Council to reconsider this site as part of the WBLP preparation”.</u></p> <p>This has not been done and the site has not been included in the Draft Plan.</p> <p><u>Conclusion</u></p> <p>All these matters were raised before Inspector David Hogger in the last Examination and the Council made a commitment to reconsider the site in front of the Inspector. This has not been done.</p> <p>We consider that site LAM007 should be allocated for housing and the settlement boundary altered to include this site. It has previously considered to be a suitable site It is the more logical site of the two considered (RSA 22 and RSA 23) and has been assessed as being sustainable.</p> <p>Unlike the other two it can come forward straight away to be developed. The fundamental principle of the NPPF is the presumption in favour of sustainable development.</p> <p>Elsewhere we have submitted that the housing requirement as a minimum and further sites are required. Therefore in the alternative we consider there is no clear planning reason why additional sites should not allocated for development especially as Lambourn has the services available in the town, which is recognised as a Rural Service Centre in the existing and proposed Development Plan with development potential. This positive preparation would make the Draft Plan sound.</p> <p>Allocation of Site LAM007 would be a positive approach to plan preparation and meeting the objectively assessed needs of the housing market. Allocation of the site would comply with the existing and proposed Development Plan spatial strategy because Lambourn is a Rural Service Centre where additional housing will be provided.</p> <p>The site itself is deliverable and there are no insurmountable items which preclude its development. Its development would subsidise and support the equestrian industry. There are no highways reasons why the site cannot be developed.</p> <p>The site complies with the adopted spatial strategy. It has been found to be a</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>sustainable location for development. The NPPF has at its core a presumption in favour of sustainable development.</p> <p>The inclusion of LAM007 would be consistent with the NPPF and would make the Plan sound and effective.</p> <p>Site LAM007 Land between Folly Road, Rockfel Road and Stork House Drive should be included in/restored to the Plan in Section 8 as a specific RSA Policy.</p>	
Carter Jonas for Mr & Mrs Steljes (lpr2058)	<p><i>See attachment on the Local Plan Review Consultation Portal (<a href="https://consult.westberks.gov.uk/kse/event/35924/peoplesubmissions/section/">https://consult.westberks.gov.uk/kse/event/35924/peoplesubmissions/section/</a>) for full response to the Local Plan Review. This includes the maps referred to in the representation below.</i></p> <p>We object to the Section 8 of the Local Plan as it does not allocate the land at the south of Bradfield Southend for residential development.</p> <p>The land to the south of Bradfield Southend has been promoted previously for a large allocation of 13.7ha and a number of concerns were raised about the scale of the site amongst other matters.</p> <p>In March 2020 a smaller site of 4.2ha was promoted but this was not listed in the December 2020 version of the HELAA. I am advised by the Planning Policy team that this was an oversight. As result of this oversight the smaller site has not assessed for development in the preparation of the Reg 18 Local Plan.</p> <p>The HELAA identifies the larger site at BRAD7 and comments received in respect of highways were that the “site was too large for the Bradfield area and a smaller site could be supported.” The 2014 Landscape Capacity Assessment advised that “the development of the site would result in harm. Development of the site would extend the settlement down the slope into the Bourne Valley” and that “the flood risk was low with the watercourse at the southern end of the site.”</p> <p>When the smaller, more contained site is considered the same problems do not exist. As can be seen from the attached plan the proposed smaller site is only the north east section of BRAD7. The entire site is at no risk of flooding being entirely in flood risk zone 1 (the southern part of the larger site is in flood risk zones 2 and 3).</p> <p>In terms of impact on the landscape, the HELAA suggests that the larger site would have an unacceptable impact on the landscape as it extends south down the Bourne Valley. The reduced site would not extend as far into the Bourne Valley and thus would not have the same impact.</p>	<p>Comments noted.</p> <p>A larger area was assessed in error in the HELAA. The smaller site has been assessed in the updated version of the HELAA, and the assessment of the site concludes that the site is ‘not developable within the next 15 years. This is because development would also extend the settlement down the slope towards the Bourne Valley, and would also fail to respect the traditional linear pattern of development in much of the village</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The scale of development that could be accommodated on the smaller site is in the region of 60-70 dwellings compared to the 128 dwellings which was suggested was the potential for BRAD7. As such the scale would be more in keeping with the scale of Bradfield Southend and thus the impact on the village would be much less, but would nevertheless help sustain local services and facilities and help deliver housing numbers.</p> <p>The site is contiguous with the southern boundary of the settlement and extends no further south into the countryside than the development to the east.</p> <p>The settlement is identified in the Draft Local Plan as a Service Village and it offers a good range of services and facilities including a primary school, pre-school, village shop and post office, pub, village hall, grange, cricket club, and playground. The Local Plan identifies that it is a suitable location for non-strategic allocations for housing and economic development, as demonstrated by the other two allocations in the village.</p> <p>The land is available, and the development of the site can be delivered within the next 5 years. A plan showing the proposed allocation edged in red is attached to this submission.</p> <p>The 4.2ha site on land south of Bradfield Southend to be allocated for residential development of no more than 70 dwellings.</p>	

## Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

**Emerging Draft LPR ref: Chapter 8 - Sites allocated for residential development: Newbury and Thatcham area**

Sir Christopher Gent (lpr2083)	<p>The Council will be aware of previous representations made to the Council in respect of land known as Land to the West of Wantage Road (“Site”). We originally wrote on behalf of our clients in May 2017 and subsequently on 19 February 2020 in response to the Council’s published HELAA which included that Site (Reference SCD2).</p> <p><b>Site Reference SCD2</b></p> <p>Our Clients are pleased to see that the Council has not allocated SCD2 for residential development within the Local Plan. We understand that the reason for the exclusion of the Site is its location outside of the settlement hierarchy, rather than the site “not being developable within the next 15 years”. Our Client’s position remains that the site is not developable not only due to its</p>	<p>Comments noted. The Council does not propose to allocate the site within the proposed submission (Regulation 19) version of the Local Plan Review for the reasons set out at Regulation 18, ie. the site lies within a settlement that falls outside of the settlement hierarchy.</p> <p>The site selection work considers various strands of evidence to determine which sites should progress to the more detailed assessment stage. This takes into consideration the settlement hierarchy, which guides the broad location of new and sustainable development, and takes account of the function and sustainability</p>

Respondent (with lpr ref)	Response	Council Response
	location outside of the settlement area but also its proximity to Donnington Castle and further the existence of various restrictive covenants which our Clients would seek to enforce	of settlements. Sites that fall within settlements / areas outside of the settlement hierarchy have not been subject to any further assessment.
Morwenna McKay (lpr2443)	<p>Croudace Homes ('Croudace') is promoting land at Henwick Park, Thatcham (also known as land west of Heath Lane and north of Bowling Green Road) for inclusion in the Local Plan Review, which could accommodate approximately 225 new homes along with an extensive area of public open space (circa 18 hectares).</p> <p>An appeal for up to 225 homes at Henwick Park was recommended for approval by the Inspector in 2017 but ultimately dismissed by the Secretary of State on the grounds that, although there were no technical reasons for refusal, the Council had a 5-year housing land supply at the time, and it was felt that this site ought to be considered as part of the Council's Local Plan process, not as a standalone planning application.</p> <p>Since that decision, we have been promoting Henwick Park within the framework of the Council's Local Plan Review, and were obviously disappointed that the Emerging Draft, published last month, does not include the site as one of the proposed development sites for Thatcham. You will be aware that the Emerging Draft proposes the overwhelmingly majority of Thatcham's housing needs (approximately 2,500 homes) be delivered on a single, strategic site at North East Thatcham; the only other site proposed at Thatcham - just 85 homes on land at Lower Way - has been allocated already in the Council's 2017 Housing Site Allocations DPD.</p> <p>Whether or not the council ultimately decides to proceed with development at North East Thatcham, we feel there are compelling reasons why Henwick Park should be allocated in the Local Plan Review as an integral part of any growth strategy for Thatcham.</p> <ul style="list-style-type: none"> <li>• <b>Henwick Park would deliver the Thatcham Surface Water Management Plan</b></li> <li>• <b>Henwick Park has already been judged a sustainable location for development</b></li> <li>• <b>Henwick Park is a 'shovel-ready' scheme capable of completion within four years</b></li> </ul>	<p>Comments noted. The Council does not propose to include the site as an allocation.</p> <p><u>Flood alleviation works:</u></p> <p>New flood alleviation measures would be built in to the North East Thatcham allocation. There is a current planning application (as of 11 April 2022) for a basin on the corner of Floral Way and Bath Road, as part of Thatcham's flood alleviation strategy.</p> <p><u>Over reliance on one site / non-allocation of Henwick Park</u></p> <p>Strategic sites in Newbury and Thatcham are expected to deliver housing in the last 10 years of the plan period and beyond while the smaller allocations and existing permissions will deliver throughout the plan period. A trajectory will be prepared to accompany the Reg.19 consultation and will be reviewed annually and reported in the AMR.</p> <p>Development in West Berkshire must consider numerous constraints, most notably the constraints posed by the North Wessex Downs AONB, AWE and the associated DEPZs and flooding.</p> <p>As part of the LPR, all sites promoted to the Council have been assessed in the HELAA and this has concluded that there are sufficient sites to accommodate the Council's housing requirement outside of these constraints.</p> <p>The principles which underpin the spatial distribution of new development stem from the overriding objective of enabling sustainable development, development that will meet the social</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• <b>Henwick Park would not be a major extension of Thattham into open countryside</b></li> <li>• <b>Thattham needs a number of sites to ensure housing delivery, not just one large site</b></li> </ul> <p><b>Henwick Park would deliver the Thattham Surface Water Management Plan</b></p> <p>The Henwick Park Site is designated within Flood Zone 1 (lowest risk). However, we are very aware that Thattham has suffered from flooding in the past, particularly in 2007, and a Surface Water Management Plan for Thattham has been prepared, designed to avoid a repeat of this flooding. To implement the Thattham Surface Water Management Plan, West Berkshire Council has formulated a drainage scheme that requires the creation of attenuation basins on part of the Henwick Park site, to reduce peak rate downstream water flow into Thattham and reduce the risk of flooding for current residents.</p> <p>At present, delivery of this drainage scheme would depend on the Council securing the necessary funding to purchase this part of the site and build the scheme itself. However, if Henwick Park were allocated for residential development, Croudace would fully fund and build the drainage scheme to the Council's specifications, saving the Council approximately £250,000.</p> <p><b>Henwick Park has already been judged a sustainable location for development</b></p> <p>Having been the subject of a planning application, an appeal and a call-in by the Secretary of State. Henwick Park has already been judged a sustainable location for development of 225 homes. The following quotes are taken from the Secretary of State's letter published in July 2017:</p> <ul style="list-style-type: none"> <li>• <i>"The Secretary of State considers that there is <u>no clear reason to conclude that local services and infrastructure would not be able to accommodate the additional housing.</u></i></li> <li>• <i>"The Secretary of State considers that [Henwick Park] <u>would not be out of keeping with the present character of the area.</u>"</i></li> <li>• <i>"The Secretary of State considers that there is <u>no indication that the development would have a harmful impact on the setting of the Area of Outstanding Natural Beauty.</u>"</i></li> </ul>	<p>and economic needs of the District while respecting the environmental assets of the District and meet the objective to mitigate and adapt to the effects of climate change and minimise demand for energy and other resources.</p> <p>The LPR aims to build on the principles of the Core Strategy with regard to the spatial distribution of development. The focus is on existing settlements, using the settlement hierarchy to steer development to the most sustainable areas, with an appropriate balance between urban and rural development, in order to meet local needs and maintain vibrant and balanced communities with their own sense of identity.</p> <p>The proposed allocation of sites takes account of the evidence from the HELAA and Sustainability Appraisal (SA) and are made in accordance with the settlement hierarchy, with higher levels of development at the higher levels of the hierarchy. Thattham lies in the top tier of the settlement hierarchy (it is an Urban Area). Urban Areas will be the prime focus for housing and economic development.</p> <p>The proposed strategic allocation of North East Thattham is in accordance with the spatial strategy set out in the LPR.</p> <p>It is the Council's preferred approach to allocate site THA20 as a strategic site. Due to the scale of development that could take place on THA20, it is considered that there should be no further allocations in Thattham in the period to 2037 particularly as development of both north east and north Thattham would result in the loss of the separate identifies of Cold Ash and Bucklebury, and would harm the setting of the AONB settlement pattern.</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• <i>"The Secretary of State considers that <u>the addition of up to 225 homes in an accessible location would contribute to the Council's housing supply.</u>"</i></li> </ul> <p><b>Henwick Park would not be a major extension of Thatcham into open countryside</b></p> <p>As the enclosed [see attachment on Objective] Design Vision Plan shows, Henwick Park would not extend Thatcham to the north any further than existing development on the opposite side of Cold Ash Hill. A 250-metre buffer would be maintained between Henwick Park and Cold Ash, with any future development to the north prohibited to actively prevent coalescence. We would turn the northern and western part of the site into a 14-hectare country park, providing significant areas of open space for a wide variety of community uses including allotments, orchards, play space and sports facilities. The park would be maintained in perpetuity in order to retain a permanent gap between Thatcham and Cold Ash.</p> <p>Thatcham needs a number of sites to ensure housing delivery, not just one large site</p> <p>Large strategic sites are by their nature complex to deliver, and delays in delivery could result in speculative planning applications on unallocated sites. Before proceeding with a large strategic site such as North East Thatcham, Thatcham needs a broader housing strategy - incorporating several sites, of various sizes - to guarantee sufficient delivery.</p> <p><b>Henwick Park is a 'shovel-ready' scheme, capable of completion within four years</b></p> <p>Henwick Park has the advantage of easy access onto Bowling Green Road, and requires limited new infrastructure. We anticipate that the development could be completed within four years of securing an outline planning consent, making a quick and significant contribution to the Council's housing supply. Croudace is a family-owned housebuilder with over 70 years' experience, and we hold the prestigious Home Builders Federation Customer Satisfaction Survey five-star award, one of only 20 housebuilders nationally to achieve this accolade. If Henwick Park is allocated for development in the Local Plan Review, we fully intend to build out the site ourselves, and can commit to providing:</p>	

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• <b>The drainage scheme needed to deliver the Thatcham Surface Water Management Plan</b></li> <li>• <b>A 14-hectare country park taking up the northern and western parts of the site</b></li> <li>• <b>90 affordable homes (40%), allocated in accordance with council policy</b></li> <li>• <b>Funding for a bus service through the development</b></li> </ul>	
Washwater Properties Ltd	<p><b>The Chase, Wash Water</b>  In response to the Local Plan Review, covering the period up to 2037, Washwater Properties Ltd would like to submit an application for inclusion in the allocation for development outlined in the Review.  Please find enclosed details of our proposal including a Planning Appraisal, Positional Map, Arial Photos and an Indicative Potential Layout of the site. I trust all of the details contained in these documents will be considered together, as being able to deliver a really good variety of housing. This will provide many new homes suited to modern lifestyles, with them being sympathetically developed within the natural landscape. We believe our proposals can deliver on many of the metrics of interest to the Council. More detailed proposals and explanations can be provided to elaborate our Planning Appraisal. The Indicative Potential Layout is intended as an initial step in the allocation process and, if successful will be developed further in conjunction with your planning department and local councillors.  My family has lived in Wash Common for over 50 years and were previously owners of this land. Such local connections will contribute to a worthy and sympathetic development. we would welcome the opportunity to explain and answer any queries that arise in connection with this matter.</p>	<p>The Council does not proposed to allocate the site. The site is located outside, but adjacent to the settlement boundaries of Newbury and Wash Water. Development of the site would result in the coalescence of the two settlements</p>

Landowners, site promoters and developers		

Respondent (with lpr ref)	Response	Council Response
Woolf Bond Planning for JPP Land and Spitfire Bespoke Properties (lpr2338)	<p>Our client's interests relate to land located at Brook House Farm, Sulhamstead Road, Burghfield (HELAA ref BUR1).</p> <p>The site has a significant planning history, including two previous applications for the erection of 40 dwellings (24 market houses and 16 affordable units) (LPA Ref. 16/03638/OUTMAJ and 18/03014/OUTMAJ). Some of the information associated with these applications are included in support of these representations.</p> <p>The site extends to a total 2.9ha and is suitable for housing development comprising up to 40 no. dwellings in a sustainable location either as an extension to the settlement of Burghfield Common or alternatively as an extension to the settlement of Burghfield village. This twin approach has been proposed as there is uncertainty as to whether the existing residential development to the south of the site (development off Roman Way) is to be regarded as an integral part of Burghfield Common or forms part of the area between the settlements of Burghfield Common and Burghfield Village.</p> <p>The site is an available, suitable and deliverable site, with no constraints to bringing the land forward for development at an early stage during the emerging plan period.</p> <p>The following plans are submitted in support of these representations [see attachments], alongside the requisite form:</p> <ul style="list-style-type: none"> <li>• Indicative Site Layout for 40 dwellings (Ref. 2330.10); &amp;</li> <li>• Landscape &amp; Visual Impact Assessment (CSA Environmental).</li> </ul> <p><u>National Planning Policy Framework (NPPF) and the Tests of Soundness</u></p> <p>The NPPF (February 2019) sets out the principal components to be included in local plans. Paragraph 35 requires that in order to be "sound" a Development Plan Document ('DPD') should be positively prepared, justified, effective and consistent with national policy.</p> <p>In order to be justified the DPD must be founded upon a proportionate evidence base and represent an appropriate strategy when considered against the reasonable alternatives.</p> <p>Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the Statement of Common Ground.</p>	<p>Comments noted. The site is not proposed for allocation.</p> <p>The site was promoted as part of the 'call for sites' for the Council's Housing and Economic Land Availability Assessment (HELAA). The HELAA is one of the evidence documents for the Local Plan Review (LPR) and it makes a preliminary assessment of the suitability and potential of sites.</p> <p>Within the HELAA the site was assessed as 'not developable within the next 15 years', and as such it was not considered as part of the more detailed site assessment work to determine which sites should be proposed for allocation within the LPR.</p> <p>The site was assessed as such within the HELAA because development would be inappropriate in the context of the existing form, pattern, and character of the landscape. The site is located to the south of Burghfield village. Burghfield comprises of linear development, and on Sulhampstead Road which the site is located, development is situated along the northern side of Sulhampstead Road only. There is some residential to the south of the site off Clayhill Road, and this extends very close to Burghfield Common. Development of the site would therefore result in the coalescence of Burghfield and Burghfield Common. In addition, there are open fields to the east of the site which give the area a rural character and development would have an urbanising effect.</p> <p>Since the HELAA was first published, the Detailed Emergency Planning Zone (DEPZ) around the Atomic Weapons Establishment (AWE) Burghfield was reviewed and amended. The site lies fully within the DEPZ.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The positive preparation test requires plans to as a minimum, seeks to meet the area's objectively assessed needs and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical.</p> <p>For the reasons set out in these submissions there are a number of potential matters that need to be addressed in future iterations of the emerging Plan. These are outlined following the relevant questions and supporting information within the consultation document.</p> <p><u>The Vision Statement</u> See Council response to 'Our Vision' (representation ref: lpr2316). <u>Assessment of Local Housing Need.</u> See Council response to policy SP12 Approach to Housing Delivery (representation ref: lpr2317). <u>Review of settlement hierarchy</u> See Council response to policy SP3 Settlement Hierarchy (representation ref: lpr2318). <u>Reviewing settlement boundaries</u> See Council response to Appendix 3 Settlement Boundary Review (representation ref: lpr2320).</p> <p><b>What changes are you seeking / what would be your preferred approach?</b></p> <p><u>Further matters - Suitability of land at Brook House Farm, Burghfield Common</u> Through including the established residential area off Roman Way and Saxon Gate within Burghfield Common's settlement boundary results in our clients' land at Brook House Farm being a logical addition to the settlement. Our client's scheme for 40 dwellings is consistent with the scale of schemes which the Council has allocated to the villages through their Housing Site Allocations Local Plan. For the above reasons we are of the strong view that an extension to Burghfield Common should occur and accordingly the subject 2.9ha site, forming land at Brook House Farm should be identified in the emerging plan</p>	<p>The Office for Nuclear Regulation (ONR) has indicated that on the basis of its current model for testing the acceptability of residential developments around the AWE sites, it would advise against nearly all new residential development within the DEPZs.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>as a housing allocation. The site could be delivered inside a 5 year period and therefore soon after the adoption of the plan. Alternatively, it can readily be identified as an extension to Burghfield Village (which as outlined above) could justifiably be re-classified as a Service Village due to the accessibility to services and employment opportunities. It would also be included as an allocation in the Plan. The alternative approaches are consequently outlined below.</p> <p><u>Extension to Burghfield Common</u> As noted above, we propose an amendment to the settlement boundary of Burghfield Common to include our client's site at Brook House Farm together with the adjoining established residential area off Roman Way and Saxon Gate. This forms an accessible and sustainable location for a medium sized residential development opportunity which as outlined above, is consistent with the current strategy. The site is defined and contained by further permitted development on its western side at Brookhouse Farmhouse (12/00484/FULD, 13/01541/FUL and 14/00604/FUL all submitted by Kingfisher First Ltd). Photographs of Saxon Gate as seen from within Saxon Gate our client's site and Saxon Gate - see attachment 'W Berks Local Plan reps February 2021 Burghfield Common REDACTED'. Our client's site is located adjacent to established residential properties to the north of Burghfield Common. It is a naturally well contained parcel surrounded by development of varying forms on all sides. The site itself represents an open pasture of little visual quality. This is confirmed with the submitted Landscape and Visual Impact Assessment. Aerial photograph - see attachment 'W Berks Local Plan reps February 2021 Burghfield Common REDACTED'. As illustrated in the aerial photograph above, our client's site is contained in the wider landscape by not only additional frontage residential development to the north, comprising parts of Burghfield village, but also prominent tree belts associated with a parkland landscape further to the west, mature tree belts to the south west, west and north west. The site is not only well contained by existing forms of development (housing and roads) but is also characterised by its strong visual as well as physical</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>affinity with existing built forms of residential development. These have open aspects onto the site, reinforcing the visual connection between these developments and the site. As a result the site forms a logical well contained parcel of land well related to the existing form and pattern of development that will give little rise to harm to the wider landscape characteristics and appearance of this part of the District. In this context, reference should be made to Section 4 of the Landscape and Visual Impact Assessment (paragraphs 4.1-4.19).</p> <p>It is noted that in the HELAA, the land north of the current Pondhouse Farm allocation/commitment has been promoted for residential development (ref BUR10) together with the land west of the Roman Way development (ref BUR8).</p> <p>Map of HELAA sites in Burghfield - see attachment 'W Berks Local Plan reps February 2021 Burghfield Common REDACTED'.</p> <p>Within the HELAA's assessment, it acknowledges that BUR10 lies adjacent to the existing settlement boundary whereas it suggests this does not apply for our clients land (BUR1) and the land west of Roman Way (BUR8).</p> <p>This assessment however discounts the settlement boundary defined in the existing Development Plan for Burghfield Village which our clients site at Brook House Farm adjoins. Furthermore, as previous noted, the Council's own Core Strategy (Policy CS1) committed the authority to undertaking a review of all settlement boundaries within its Housing Site Allocations Local Plan. Although this occurred with respect of the larger settlements, no review took place for Burghfield Village and other places within the "smaller villages" classification. A review of the settlement boundaries of Burghfield Village and other smaller villages is consequently long overdue. It is therefore essential that this review takes place.</p> <p>Furthermore, the failure of the Council's HELAA to recognise that our clients land at Brook House Farm adjoins a defined settlement boundary (for Burghfield Village) indicates that the overall assessment of the site is unjustified and that the evidence does not support the discounting of the site. As noted, the Roman Way development adjoins the Burghfield Common settlement boundary which was amended following the allocation of Pondhouse Farm in the Site Allocations Local Plan. Having regard to the Council's methodology, this would logically be included within the settlement</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>boundary of Burghfield Common, especially as it is the largest area of residential development not currently within a defined settlement.</p> <p>In reviewing the HELAA assessment of our clients land alongside the others around the Roman Way development, it is clear that they all had recognised development potential (notwithstanding the flawed assessed that our clients land (BUR1) was detached from a settlement boundary).</p> <p>With respect of the Stage 2b “Suitability” assessment, our clients land (BUR1) is unjustifiably rejected due to its contended impact upon the character of the area and the risk of coalescence of settlements. However, as illustrated in the applications for 40 dwellings on the site previously submitted, residential development can readily be accommodated on the site without harm to the wider character. The HELAA does not identify other harms for development of the site.</p> <p>Whilst it is acknowledged that following the Council’s refusal of the two applications, the subsequent appeal [Footnote 2: Appeal ref APP/W0340/W/19/3234882 dismissed on 5th February 2020] was also dismissed but this was within the context of the Development Plan at that time.</p> <p>It is however imperative that the authority review all settlement boundaries and as illustrated in the current Draft Plan, that significant sites outside of settlements like land to the north-east of Thatcham are being advocated for development, the authority should reconsider this.</p> <p>The discounting of the appeal decision on our clients land would also reflect the approach of the authority in recognising the preparation of a new Local Plan means earlier conclusions on a site have been overtaken by events. Although the current Draft Local Plan includes an allocation for 2,500 homes north east of Thatcham (Draft Policy SP17), the suitability of this area was rejected by the Secretary of State on 27th July 2017 in an appeal for up to 495 dwellings on part of the site (PINS ref APP/W0340/W/15/3141449). The Council’s proposed allocation of an area rejected by the Secretary of State on appeal for residential development indicates why the earlier rejection (including on appeal) of the Brookhouse Farm site also needs to be thoroughly reassessed.</p> <p>The NPPF (paragraph 78) is clear of the need to support growth in villages especially where it is sustainable [Footnote 3: The sustainability of the site is</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>acknowledged in paragraph 52 of the appeal decision.]. Development of our clients site would contribute towards this and would also avoid the valued landscpaes within the district [Footnote 4: Site is accepted to not be a valued landscape – paragraph 26 of the appeal decision] (74% within an AONB). There is a clear need to identify further land to ensure that the forthcoming Local Plan both plans for the full 15 years post adoption together with contributing towards the unmeet needs of adjoining authorities, particualrly Reading.</p> <p>Alternatively, the site can be delivered as an extension to Burghfield Village which colud replicate the existing linear form of development along Sulhamstead Road (within the settlement boundary). Whislt such a scheme was not envisaged in the previous applications, there is the opportunity for this within the landholdings available, notwithstanding the views of the Inspector in the earlier appeal (paragraph 18).</p> <p>The assessment of the other sites (BUR8 and BU10) whilst acknowledging the residential development at Roman Way, did not consider the logic of its inclusion within the settlement of Burghfield Common and consequently for there to be settlement extensions to this area. It is therefore not considered that the Council's assessment of our clients land is justified.</p> <p>As our client's land was unjustifiably discounted as Suitable, the HELAA did not assess its availability, achievability or deliverability, notwithstanding the clear evidence of this as outlined in the earlier submissions for the planning application.</p> <p><u>Development considerations</u></p> <p>As discussed above, there is a clear imperative in the revised NPPF to provide housing development in rural locations where a site offers the ability to deliver a sustainable form of development.</p> <p>The Council will recall that an outline application was submitted in 2016 (16/03638/OUTMAJ) with a further application submitted in 2018 (18/03014/OUTMAJ). An appeal was submitted against the Council's refusal of the later decision.</p> <p>The principle elements of these applications as illustrated on the enclosed Site Plan comprise:</p> <ul style="list-style-type: none"> <li>• 40 dwellings.</li> </ul>	

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• A policy compliant proportion of affordable homes.</li> <li>• An inclusive mix of dwellings.</li> <li>• A character led 2 storey housing scheme of mainly detached and semi-detached houses.</li> <li>• A highway compliant means of access from Clayhill Road.</li> <li>• Retention of mature trees and hedgerows along all site boundaries.</li> <li>• New public open space.</li> <li>• An on-site surface water drainage mitigation that enhances surface water drainage capacities for the wider area.</li> <li>• New, enhanced landscape buffer planting along southern boundary with Saxon Gate and Mundy Close development.</li> <li>• The land take for landscaping/open space is 39%.</li> <li>• Traffic calming scheme along Clayhill Road, enhancing road and pedestrian safety and improvements to the pedestrian route at the junction of Sulhamstead Road, with Clayhill Road.</li> <li>• Development set back from Clayhill Road respecting the building line and the rural setting of the road.</li> <li>• Lower density on north western corner of the site respecting the more rural character of Sulhamstead Road.</li> <li>• A means of access (off Clayhill Road) that avoids access, additional traffic and residential amenity issues in Saxon Gate, an issue with the previous planning application.</li> <li>• Creation of new public open space, opposite existing frontage dwellings on the opposite side of Sulhamstead Road. Avoiding development here preserves existing frontage outlooks and resolves previous amenity issues associated with the earlier planning applications, although this was not a concern raised on the application by Kingfisher First Ltd on the farm house (12/00484/FULD, 13/01541/FUL and 14/00604/FUL).</li> </ul> <p>The information submitted alongside the previous and current planning applications demonstrates why our client's land at Brook House Farm is a deliverable site that will deliver significant benefits for both existing and future residents in the area.</p> <p>Accordingly, the Council should allocate it for a residential led development.</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>We note that the site's size comprises 2.9ha and enables a scheme to be brought forward that provides for approximately 40 no. dwellings.</p> <p><u>Master Planning &amp; Landscape Considerations</u></p> <p>A Landscape and Visual Impact Assessment ('LVIA') has been carried out to assess the likely impacts of the proposed development in landscape terms. The LVIA describes the existing landscape character and quality of the site and its visual characteristics. The report then goes on to discuss the development proposals and any potential landscape or visual impacts on the wider area.</p> <p>The site is not subject to any statutory or non-statutory designations for landscape quality, scientific or nature conservation interest and there are no known heritage assets which will be affected by the proposals. The LVIA goes onto conclude (paragraphs 6.2 to 6.5):</p> <p>"Neither the Site nor the immediate landscape is covered by any statutory or non-statutory designations for landscape quality. The Site contains a number of mature landscape features on its boundaries which contribute to the wider landscape character and the adjoining settlement, and the vast majority of them are capable of retention within the development proposals. The Site is assessed as being of medium to low landscape quality, and low landscape sensitivity to the type of residential development being proposed given the proximity of similar development in the immediate vicinity of the Site. The Site is judged as being of medium landscape value due to its lack of designation, public access or heritage assets.</p> <p>The visual assessment found that the Site is well contained by virtue of the well wooded character of the area, the adjoining settlement, and by the undulating topography of the area. There are some partial as well as oblique, near distance views from the properties in the immediate vicinity of the Site, however, views from the adjoining roads of the interior of the Site are, for the most part, screened by the dense boundary hedgerows.</p> <p>The Landscape Strategy Plan shows how an appropriate development can be accommodated at the Site which respects the Site's existing landscape features, and respects the immediate and wider landscape character. The retention of the existing mature landscape framework, and the enhancement of the Site's green infrastructure including tree and thicket planting, as well</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>as the provision of public open space, with community orchard at the north eastern corner, will minimise public views of the new homes and help integrate the development into the wider landscape.</p> <p>For the reasons set out in this assessment, development in accordance with the Landscape Strategy Plan and the principles set out in Section 5, it is considered that the Site can be developed in the manner proposed without giving rise to significant landscape / townscape or visual effects.”</p> <p>The Site Plan has been informed by a thorough landscape appraisal. As a result, the proposed layout provides for a considerable reduction in built form and a significant amount of green infrastructure which helps to assimilate the development into the wider landscape character comprising dwellings interspersed with trees/landscaping.</p> <p>Overall, the LVIA concludes that the scheme provides a comprehensive approach to redevelopment of the site as a logical, modest extension to the village. The localized nature of any visual impacts was acknowledged in the appeal decision (paragraph 53).</p> <p><u>Highway Considerations</u>  Vehicular access to the site is proposed from Clayhill Road with appropriate visibility splays provided. The acceptability of a vehicular access is acknowledged in the Council’s assessment of the site within the HELAA.</p> <p><u>Drainage Considerations</u>  The site is located entirely within flood zone 1 and there will be no adverse impact on floodplain flows or conveyance as a result of the development.</p> <p><u>Ecological Considerations</u>  A suite of ecology surveys have previously been undertaken and confirm that the site is not of high biodiversity value. Subject to appropriate mitigation measures, the proposed scheme is appropriate in ecological respects. This was acknowledged in the appeal decision (paragraph 35).</p> <p><u>Summary</u>  These are substantial benefits of the site which have been identified and accepted by officers of the Council. The detailed analysis and commentary above demonstrate the suitability of the site for allocation within the new Local Plan. Further it is under the control of a local housing developer, who</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>is in a position to bring forward the site for an approximate 40 no. dwellings, parking, open space and landscaping. In addition, the site is deliverable in the immediate five year period and can provide a material number of housing units in a location where the short term need is pressing. Reflecting this assessment of the site and the need for additional housing within the district (to meet its own needs and/or those of adjoining authorities), there are consequently two options for revisions to settlement boundaries that we therefore advocate. These are illustrated on the images below.</p> <p><u>Option 1 -allocation as an extension to Burghfield Common</u></p> <p>For the reasons set out above the site should be allocated within the emerging plan as a housing site allocation for approximately 40 no. dwellings and associated open space. The settlement boundary should therefore be revised as illustrated on the below plan (area bound in red) in future iterations of the Local Plan.</p> <p>Map of the site as an allocation to Burghfield Common - see attachment 'W Berks Local Plan reps February 2021 Burghfield Common REDACTED'. This revision would be consistent with the response detailed above regarding the incorporation of the existing residential development off Roman Way within Burghfield Common, as a direct consequence of the allocation of Pond House Farm through the Council's Site Allocation's Local Plan. We are aware that this site has an extant planning permission for the erection of 100 dwellings and once implemented, this would result in integration of the Roman Way development with the other parts of Burghfield Common.</p> <p><u>Option 2 – Extensions to Burghfield Common and Burghfield Village</u></p> <p>Alternatively, the site could be allocated as sympathetic extension to Burghfield Village with a linear form of residential development (the northern area bound in red). Housing on both sides of the road is already a characteristic feature within the defined settlement of Burghfield and consequently the allocation of Brook House Farm as illustrated below would replicate this. The previous appeal Inspector highlighted a slight dome in the centre of the site. Retaining this topographical feature with a sensitive cluster of residential development well related to Roman Way would create an attractive looking development on this well-contained site (as part of the</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>southern area bound in red).</p> <p>Map of the site as an allocation to Burghfield Common - see attachment 'W Berks Local Plan reps February 2021 Burghfield Common REDACTED'.</p> <p><u>Conclusion</u></p> <p>For the reasons set out above, the Local Plan could risk failing the NPPF tests of soundness for the following reasons:</p> <ul style="list-style-type: none"> <li>• Negatively Prepared – If it does not plan for appropriate housing delivery having regard to minimum needs within West Berkshire District or the wider needs occurring in neighbouring authorities. Further if it fails to allocate a sufficient amount of housing land to meet pressing needs early on in the plan period.</li> <li>• Unjustified – If the proposed housing distribution strategy fails to acknowledge the continued suitability of Burghfield Common or Burghfield Village as an appropriate location for housing growth and identifies inappropriate potential housing sites when considered against the reasonable alternative of a housing allocation at Brook House Farm.</li> <li>• Ineffective – If the plan fails to propose an appropriate housing distribution strategy or introduce sufficient flexibility into the developable supply over the plan period.</li> </ul> <p>Inconsistent with the National Policy – If the plan fails to allocate an appropriate amount of housing land or in the right location, having particular regard to the need for housing in rural locations as emphasized in the revised NPPF</p>	

**Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)****Emerging Draft LPR Policy: RSA1 The Kennet Centre, Newbury**

Number of responses received: 14

<b>Respondent</b> <i>(with lpr ref)</i>	<b>Response</b>	<b>Council Response</b>
<b>Internal</b>		
Archaeology Team West Berkshire Council (lpr765)	<p>Support for policy.</p> <p>Mention needs to be made of archaeological potential; despite the redevelopment of the 1970s below ground deposits may survive within the Kennet Centre that could tell us more about Newbury's origins. A programme of assessment will be required.</p>	<p>Support for allocation noted.</p> <p>The site will now be removed from the LPR due to flood risk. As the site lies within the settlement boundary there is already a presumption in favour of development as set out in Policy SP1.</p> <p>The site was originally promoted as part of the 'call for sites' for the Housing and Economic Land Availability Assessment (HELAA) in 2017. The promoter at the time indicated that there was potential to accommodate residential and/or a hotel to complement the existing uses on the site.</p> <p>The Level 1 Strategic Flood Risk Assessment (SFRA) indicated that 40% of the site was within Flood Zone 1 (low risk of flooding), with 60% within Flood Zone 2 (medium risk of flooding). The Site Selection Background Paper for the emerging draft (Regulation 18) Local Plan Review (LPR) therefore advised that any residential development should be located within the southern area of the site which falls within Flood Zone 1.</p> <p>Since the Regulation 18 consultation on the LPR, the site has changed ownership and alternative proposals have been put forward by the promoter. These proposals seek a comprehensive redevelopment with residential uses spread across much of the site.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The National Planning Policy Framework states at paragraph 159 that “<i>inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at highest risk (whether existing or future).</i>” It goes on to state at paragraph 161 that “<i>all plans should apply a sequential, risk-based approach to the location of development – taking into account all sources of flood risk and the current and future impacts of climate change – so as to avoid, where possible, flood risk to people and property.</i>”</p> <p>There are other more sequentially preferable sites (ie. which are at a low risk of flooding) that are suitable for allocation.</p> <p>It is however recognised that the site is brownfield, within a sustainable location, and presents a significant opportunity for redevelopment.</p>
<b>Statutory consultees</b>		
Historic England (lpr1567)	<p>There is currently no conservation area appraisal for Newbury town centre. Given the scale of the proposed development (250 dwellings), ideally, a conservation area appraisal should be carried out to evidence that this scale of development would be appropriate here and to help inform the design approach of the development. As a minimum, a heritage impact assessment should be carried out prior to allocation, in order to ensure an appropriate level of development is allocated in the plan. Without such evidence to inform the plan-making stage, there is a risk that the plan could allocate too much or too little development on the site.</p> <p>In terms of detailed policy criteria for archaeology, we would recommend that the Council be guided by advice from the West Berkshire Archaeology Service. As a minimum, we would expect a desk-based analysis, and subject to the results of the DBA, field evaluation.</p>	<p>Comments noted.</p> <p>A Conservation Area Appraisal for Newbury Town Centre is currently in preparation.</p> <p>The site will now be removed from the LPR due to flood risk. As the site lies within the settlement boundary there is already a presumption in favour of development as set out in Policy SP1. Further details of this are set out above in the Council’s response to representation lpr765.</p>
Natural England (lpr1611)	<p>This allocation is extremely close to the River Kennet SSSI, at 35-40m at the closest point. Extreme care will have to be taken at the planning stage to ensure no impact from construction on the river.</p>	<p>Comments noted.</p>

Respondent (with lpr ref)	Response	Council Response
		The site will now be removed from the LPR due to flood risk. As the site lies within the settlement boundary there is already a presumption in favour of development as set out in Policy SP1. Further details of this are set out above in the Council's response to representation lpr765.
Newbury Town Council (lpr2250)	We strongly support this site but have some reservations about the heights of some buildings proposed in the draft Master Plan. We note that currently there is no housing within the site, which is 100% town centre uses. We support the proposed mix of uses, the use of ground source heat pumps and the degree of vitality that should come with a large residential component.	Support for allocation noted.  The site will now be removed from the LPR due to flood risk. As the site lies within the settlement boundary there is already a presumption in favour of development as set out in Policy SP1. Further details of this are set out above in the Council's response to representation lpr765.
Shaw-Cum-Donnington Parish Council (lpr218)	No comment	Noted.
Savills (UK) Ltd for Thames Water (lpr1774)	<p><b>Water response:</b> The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website <a href="https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development">https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development</a>.</p> <p><b>Waste Response:</b></p>	Comments noted.  The site will now be removed from the LPR due to flood risk. As the site lies within the settlement boundary there is already a presumption in favour of development as set out in Policy SP1. Further details of this are set out above in the Council's response to representation lpr765.

Respondent (with lpr ref)	Response	Council Response
	<p>The scale of development/s is likely to require upgrades to both the wastewater network and sewage treatment infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing and infrastructure phasing plan. The plan should determine the magnitude of spare capacity currently available within the network and what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The developer can request information on the network and treatment infrastructure by visiting the Thames Water website <a href="https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development">https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development</a>. <b>General consultation bodies</b>		
Heritage Forum (lpr85)	<p>Support for allocation.</p> <p>We agree that the design and scale of the Kennet Centre development should complement existing buildings and the Newbury Conservation Area.</p>	<p>Support for policy noted.</p> <p>The site will now be removed from the LPR due to flood risk. As the site lies within the settlement boundary there is already a presumption in favour of development as set out in Policy SP1. Further details of this are set out above in the Council's response to representation lpr765.</p>
Newbury Society (lpr1150)	<p>We think that the proposed development sites need to be handled with sensitivity, with the views of existing residents taken into account. In relation to Newbury, we are in favour of flats being built above the Kennet Centre, but would need to see designs before we can assess appropriate numbers. We are not yet convinced that the centre can comfortably take 250, let alone the 400 currently proposed by a developer. We think that development approval should be conditional on spending a significant part of</p>	<p>Comments noted.</p> <p>The site will now be removed from the LPR due to flood risk. As the site lies within the settlement boundary there is already a presumption in favour of development as set out in Policy SP1. Further details of this are set out above in the Council's response to representation lpr765.</p>

Respondent (with lpr ref)	Response	Council Response
	the financial return from the flats on revitalising the ground floor premises, whether for shops or other uses. This could be an opportunity to improve the appearance of this part of Newbury.	
<b>Other stakeholders</b>		
Keith Hoddinott (lpr1995)	<p>The recent application for the redevelopment of the Kennet Centre, concerns were expressed at the height of the buildings. I would suggest that no new construction roof line should be higher than one floor below the iconic Town Hall clock tower.</p> <p>What is to be the future of the Bayer complex, which has significant underground parking? There were rumours of locating all public organisations (Council, police, citizens advice etc) here.</p>	<p>Comments noted.</p> <p>The site will now be removed from the LPR due to flood risk. As the site lies within the settlement boundary there is already a presumption in favour of development as set out in Policy SP1. Further details of this are set out above in the Council's response to representation lpr765.</p> <p>Bayer House in Newbury town centre has prior approval for 191 residential apartments.</p>
Susan Millington (lpr470)	This part of town is very susceptible to flooding. I am concerned that further high rise buildings on this site, with the requirement for deep foundations, will affect the drainage of this whole area.	<p>Comments noted.</p> <p>The site will now be removed from the LPR due to flood risk. As the site lies within the settlement boundary there is already a presumption in favour of development as set out in Policy SP1. Further details of this are set out above in the Council's response to representation lpr765.</p>
Ian Parsons (lpr832)	<p>Support for allocation.</p> <p>Housing in town centres, especially where the provision suits first time buyers and young families is to be welcomed.</p> <p>Also, it would be great if the council were able to prevent housing being bought by private landlords and then rented out.</p>	<p>Support for allocation and comments noted.</p> <p>The site will now be removed from the LPR due to flood risk. As the site lies within the settlement boundary there is already a presumption in favour of development as set out in Policy SP1. Further details of this are set out above in the Council's response to representation lpr765.</p> <p>It is recognised that the site is brownfield, within a sustainable location, and presents a significant opportunity</p>

Respondent (with lpr ref)	Response	Council Response
		for redevelopment. It is therefore proposed amend policy SP1 Spatial Strategy to reflect this.
Clive Tombs (lpr134)	<p>Support for allocation.</p> <p>The area identified under policy RSA1 appears to offer the potential to deliver residential development in a sustainable location in the heart of Newbury, that affords easy access to transport links including cycle routes, train and bus stations, as well as offering the potential to help sustain existing shops and local services.</p> <p>Any re-development of the Kennet Centre needs to avoid being overbearing and creating a canyon effect on Market Street when considered with the Weavers Yard development on the opposite side of the road.</p> <p>Provision could also usefully be made, within the proposed Eagle Quarter redevelopment, for a covered market (similar to Oxford's) as a distinctive feature to attract people to Newbury, encourage new stalls, and as a means to hold the charter market under cover especially during bad weather.</p>	<p>Support for allocation and comments noted.</p> <p>The site will now be removed from the LPR due to flood risk. As the site lies within the settlement boundary there is already a presumption in favour of development as set out in Policy SP1. Further details of this are set out above in the Council's response to representation lpr765.</p> <p>It is recognised that the site is brownfield, within a sustainable location, and presents a significant opportunity for redevelopment. It is therefore proposed amend policy SP1 Spatial Strategy to reflect this.</p>
Councillor Tony Vickers (lpr562)	<p>Support for allocation.</p> <p>We welcome the zero carbon commitment of this developer as well as the high number of new dwellings it will deliver in a town centre location to enhance the town's vitality.</p>	<p>Support for allocation and comments noted.</p> <p>The site will now be removed from the LPR due to flood risk. As the site lies within the settlement boundary there is already a presumption in favour of development as set out in Policy SP1. <b>Landowners, site promoters and developers</b>		
Lochailort Newbury Ltd (lpr2037)	<p><b>Context</b></p> <p>Following its heyday, the Kennet Centre entered a period of gradual but sustained decline, affected by a number of factors including:</p>	<p>Comments noted.</p> <p>The site will now be removed from the LPR due to flood risk. As the site lies within the settlement boundary there is</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• In 2011 a competing shopping centre opened on the opposite side of the town centre at Parkway, which saw one of the Kennet Centre’s two anchor stores (Debenhams) relocate to the new centre and footfall drawn away from the Kennet Centre. The 300,000sqft Parkway centre has 48 shops and 550 car parking spaces – but following the recent closure of its two anchor stores (Debenhams and John Lewis) is now struggling with the demise of High Street retail.</li> <li>• The other of the Kennet Centre’s two anchor stores (Sainsburys) moved to new premises at Hector’s Way in 1995, which were extended in 1999 and then doubled in size in 2013 to a total of 86,000sqft net sales area (140,000sqft total area) with 529 free parking spaces.</li> <li>• Newbury Retail Park had opened at Pinchington Lane in 1997 and was extended in 2006 to a total of 180,000sqft across 14 stores and 4 restaurants. The retail park is well over a mile south of the town centre and has 770 free car parking spaces – almost double that of the Kennet Centre multi-storey pay &amp; display car park. The adjacent Tesco store, originally opened in 1988, was itself extended in 2003 a total of 91,000sqft net sales area (99,000sqft total area) with 645 free parking spaces.</li> <li>• During this period, Vodafone moved from several offices in the town centre to a new world headquarters campus on a Green Belt site two miles north of the town centre. When the 575,000sqft facility opened in 2001 (with its 2,457 car parking spaces) 4,500 Vodafone staff relocated out of the town centre to the new out-of-town office campus.</li> </ul> <p>These locally-specific factors occurred at a time when UK retailing was itself going through a significant structural transition towards online retailing. Online sales went from virtually zero in 1998 to 17.8% of all UK retail spend in 2018, having a well-documented adverse effect on UK High Streets.</p> <p><b>Imminent planning application</b></p>	<p>already a presumption in favour of development as set out in Policy SP1. Further details of this are set out above in the Council’s response to representation lpr765.</p> <p>It is recognised that the site is brownfield, within a sustainable location, and presents a significant opportunity for redevelopment. It is therefore proposed amend policy SP1 Spatial Strategy to reflect this.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Following our purchase of the Kennet Centre in January 2020, we have assembled an extensive professional team and have consulted widely on our proposals to comprehensively redevelop the centre. A detailed full planning application is being finalised and will be submitted this month, proposing:</p> <p><i>“Full: Phased redevelopment of the Kennet Centre comprising (i) partial demolition of existing building (ii) flexible-use commercial space (iii) headquarters office building (iv) 400 dwellings plus residents’ ancillary facilities (v) access, car parking and cycle parking (vi) landscaping &amp; open space (vii) sustainable energy installations (viii) associated works”</i></p> <p>Our commercial property advisors have been clear that there is significant risk in constructing a new headquarters office building without an occupier prelet being in place, and therefore in order to provide flexibility in the development mix and to avoid delays in the scheme’s delivery, a second “Scheme B” application is also being submitted which replaces the office element of there development with a 91-unit retirement living scheme.</p> <p>Our masterplan has been subject to several rounds of preapplication consultation with the Local Authority, the Town Council, technical consultees, interested parties and the general public. There has been widespread support for both the principle of redevelopment and for the mix of uses proposed.</p> <p><b>National planning policy context</b></p> <p>We have already identified exceptionally strong policy support for our proposed comprehensive redevelopment within the National Planning Policy Framework, Planning Practice Guidance, and the numerous ministerial and Prime Ministerial announcements and speeches on the importance of revitalising our town centres. It is trite to repeat those policy imperatives here, but suffice to say there is unequivocal national policy support for increased residential, employment and leisure spaces in highly sustainable town centre locations such as the Kennet Centre.</p> <p>It is within the context of the above background that we make the following representations.</p>	

Respondent (with lpr ref)	Response	Council Response
	<p><b>Draft Policy RSA1 The Kennet Centre, Newbury (Site Ref: NEW3)</b>            We support the identification of the Kennet Centre as a site in need of regeneration.            We support the explicit recognition that this is a highly sustainable location.            We also support the flexible wording of the policy in referring to a mix of uses rather than setting out any use mix requirement or restriction.            However, we also request the following policy changes to align the emerging site-specific allocation with our comprehensive redevelopment masterplan that has already been subject to extensive consultation:</p> <ol style="list-style-type: none"> <li>1. <u>Quantum of residential development</u>              The iterative masterplanning process that we have undertaken over the past months has confirmed that, as part of a mix of uses, this highly-sustainable location could accommodate 400 dwellings. The reference to “<i>approximately 250 dwellings</i>” in the draft policy should be increased to “<i>approximately 400 dwellings, or approximately 500 dwellings should C2 uses form part of the redevelopment.</i>”</li> <li>2. <u>Existing uses</u>              It would be difficult to extend or redevelop the Kennet Centre in its current form from an engineering and energy performance perspective and to that end, whilst we intend to retain the existing multi-storey car park and the 2009-built cinema wing, the rest of the centre (built in phases from the 1970s onwards) will be demolished in its entirety. The policy wording should be amended to read “<i>The residential aspect would complement any retained and/or additional non-residential uses on the site.</i>”</li> <li>3. <u>Development density</u>              The Kennet Centre occupies a significant parcel of land in West Berkshire’s largest town centre. It benefits from excellent sustainable transport links by virtue of its location mid-way between the railway station and bus station. It has a level of accessibility to services, facilities and employment opportunities that no other brownfield site in the District can equal. Its comprehensive redevelopment offers an unparalleled opportunity to revitalise and regenerate this part of the town centre.</li> </ol>	

Respondent (with lpr ref)	Response	Council Response
	<p>Consequently, the site’s unique sustainability credentials, together with its scale, mean that redevelopment here should be maximised to make the most efficient use of the site and thus minimise the quantum of development needed on greenfield land elsewhere. The opportunity for sustainable energy installations is also maximised with higher density schemes. This means that an appropriate development density should be informed by proper masterplanning and contextual analysis, rather than being led or constrained by the more generalised approach adopted in the West Berkshire Density Pattern Book. Accordingly, the policy wording should be amended to read <i>“The site occupies a highly sustainable location and presents an opportunity for a substantially higher density than estimated using the West Berkshire Density Pattern Book.”</i></p> <p>4. <u>Appraisal criteria</u> We support the “town centre first” strategy and the sequential approach within it. We also support the presumption in favour of sustainable development and that the redevelopment of previously-developed land within defined settlement boundaries will be acceptable in principle. To ensure consistency with the above changes to draft Policy RSA1, draft Policy SP1 should be amended to read <i>“Other developments will include redevelopment of previously developed land, including a substantial element of residential use as part of a town centre mixed use development at the Kennet Centre (Policy RSA1).”</i></p>	

## Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

### Emerging Draft LPR Policy: RSA2 Land north of Newbury College, Monks Lane, Newbury (Site ref HSA 1)

### (Proposed Submission LPR Policy: RSA1 Land north of Newbury College, Monks Lane, Newbury)

Respondent (with lpr ref)	Response	Council Response
<b>Statutory consultees</b>		
Newbury Town Council (lpr2247)	These sites (RSA2, 4 and 6) all have planning consent and much of RSA6 is already built and occupied. We do support their allocation in the Plan. In policy terms, the consented planning applications seem to make their inclusion superfluous.	Comments noted. Development has not yet commenced on the site. The allocation will therefore continue to be included in the LPR.
Shaw-Cum-Donnington Parish Council (lpr219)	We question whether it is wise provide housing here rather than reserve it for the future extension to the college.	Comments noted. The land has been promoted by Newbury College.
Historic England (lpr1568)	We support the requirement for proposals to be informed by an archaeological desk based assessment and field evaluation to assess the historic environment potential of the site, in accordance with NPPF paragraph 189.	Comments noted.
Savills (UK) Ltd for Thames Water (lpr1744)	On the information available to date we do not envisage infrastructure concerns regarding water supply network infrastructure in relation to this development/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. On the information available to date we do not envisage infrastructure concerns regarding wastewater infrastructure capability in relation to this site.	Comments noted. A phase 1 and phase 2 water cycle study has now been prepared and will be reflected in the policy as follows - <u>'An integrated water supply and drainage strategy will be provided in advance of development to ensure the provision of adequate and appropriate infrastructure for water supply and waste water, both on and off site. Development will be occupied in line with this strategy.'</u>

Respondent (with lpr ref)	Response	Council Response
		These comments will inform the emerging draft Infrastructure Delivery Plan.
<b>Other stakeholders</b>		
Councillor Tony Vickers (lpr563)	This site has full planning consent. It is likely to be complete before the new Local Plan is adopted.	Comments noted. Development has not yet commenced. The site will therefore continue to be included in the LPR.

Number of responses received: 5

Respondent (with lpr ref)	Response	Council Response
<b>Statutory consultees</b>		
Thatcham Town Council (lpr1408)	We make some observations where principles of environmental protection set a principle that must be applied equality to policy SP 17. Policy RSA 3: We note that this non-strategic site places emphasis on noise and air quality surveys, environmental protection such as habitat protection for wildlife, limitation of built form to avoid development on the skyline, tree planted landscapes and tree belts, and that rights-of-way across the site will be protected. We would expect that a strategic, rural, countryside site would also at least the same environmental protection. This policy establishes a principle of protection that should apply equally to policy SP 17. It is necessary to include the same principles to SP 17 including noise and air quality surveys and environmental protection.	Comments noted.  These comments relate to Policy SP17 and no changes to this policy are required in light of this representation. Please see the Council's response to comments on Policy SP17.
Historic England (lpr1569)	We support the requirement for proposals to be informed by an archaeological desk based assessment and field evaluation to assess the historic environment potential of the site, in accordance with NPPF paragraph 189.	Comment noted.
<b>General consultation bodies</b>		
Mid and West Berkshire Local	MWBLAF warmly welcomes the statement in this policy that: The rural character of the existing Public Rights of Way across the site will be protected.	Comments noted.

Respondent (with lpr ref)	Response	Council Response
Access Forum (lpr1866)	The Forum believes that this should apply to all sites in this Local Plan that are crossed by or adjacent to public rights of way.	The Local Plan policies seek to protect and enhance public rights of way.
<b>Other stakeholders</b>		
Councillor Tony Vickers (lpr566)	Policy is supported. This site has had full planning consent for a year. The allocation should remain in the Plan in case the developer fails to complete it early.	Comments noted. As development has not yet commenced, the site will continue to be included in the LPR.
<b>Landowners, site promoters and developers</b>		
Pro Vision on behalf of Sir Richard Sutton Limited (lpr1271)	<p>Policy is supported.</p> <p>Sir Richard Sutton Ltd (SRSL) own all of the land comprised in the RSA3 Allocation (with the exception of a small section of the former railway line which serves to maintain an existing footpath link between the two development parcels only). SRSL fully supports the proposed allocation and confirm that it is deliverable; that is, it is available now, is in a suitable location and development is achievable within the next 5 years.</p> <p>SRSL supports draft policy RSA3 because it allocates housing on the edge of the Newbury urban area, which will be the focus for most new development, recognising that additional allocations are required to meet the need for additional housing in the area.</p> <p>The SA/SEA that supported the site's previous allocation in the HSADPD noted that "There are no significant sustainability issues with this site. The site is easily accessible by public transport, walking and cycling and with close proximity to open countryside and local sports facilities to help promote a healthy active lifestyle all of which will have a positive impact on sustainability". There have been no material changes to the local area since the HSADPD was adopted. The Local Plan Review (LPR) SA/SEA confirms that the site is in a sustainable location, close to a wide range of services.</p> <p>The RSA3 site is not subject to any significant constraints that might limit or delay development in the manner proposed. The site is capable of being readily accessed and serviced. Indeed, the site benefits from outline planning permission (OPP). The site is therefore capable of early delivery; an important consideration given the current Housing Land Supply position in the area.</p>	Comments noted.

Respondent (with lpr ref)	Response	Council Response
	does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website. On the information available to date we do not envisage infrastructure concerns regarding wastewater infrastructure capability in relation to this site.	
<b>General consultation bodies</b>		
Mid & West Berks Local Access Forum (lpr1867)	<p>MWBLAF supports the statement within the policy: This site will be delivered in accordance with the following parameters:</p> <ul style="list-style-type: none"> <li>• Comprises a development design and layout that includes the following measures:</li> <li>• Provides cycle and footpath connections into existing routes and beyond into the open countryside.</li> </ul> <p>However, there do not appear to be any existing connections from this site to the open countryside, and particularly to the nearby public footpaths. The Forum would welcome clarification on what is intended.</p>	Comments noted. No changes to the policy are required in light of this representation. The proposed footpath connections for this site are detailed in the documents accompanying the planning application for this site (reference 20/00604/FULEXT). Footpath and cycle connections are also included in the emerging draft Infrastructure Delivery Plan.
<b>Other stakeholders</b>		
Name withheld (lpr1465)	I believe the site for 75 proposed houses at Coley Park is also not suitable for the large development proposed for many of the same reasons as the above [see lpr1464]. Additionally, I cannot believe that this site is planned considering the dreadful access along Stoney Lane, both from South & North. This road is a narrow country lane which makes travelling it very dangerous at certain points. What is to stop the new residents of this development turning right out of the site to travel North & joining the Cold Ash road at the Ridge/Ashmore Green crossroads in order to access the M4 at Chieveley? Negotiating this crossroads in itself is a very difficult prospect in rush hour. Stoney Lane going North is totally unsuitable for any volume of traffic at all. Access from the south would involve ripping out hedgerows/trees in order to widen the road & provide pedestrian access by footpath. This area is also a haven for wildlife.	Comments noted. Several sources will ensure a continuous supply of housing across the plan period. These include retained allocations in the Local Plan. The site is currently allocated in the Housing Site Allocations DPD which forms part of the existing Local Plan. Because development has not yet been built out, the allocation is being retained. The site has planning permission. The site will therefore continue to be included in the plan and no further amendments need to be made in light of this representation.
Paula Sanderson (lpr971)	Hasn't this already been agreed, if so this revised plan is already out of date?	Comments noted. No changes to the policy are required in light of this representation.

Respondent (with lpr ref)	Response	Council Response
		Several sources will ensure a continuous supply of housing across the plan period. These include retained allocations in the Local Plan. The site is currently allocated in the Housing Site Allocations DPD which forms part of the existing Local Plan. Because development has not yet been built out, the allocation is being retained. The site has planning permission. As development has not yet commenced, the site will continue to be included in the LPR.
Councillor Tony Vickers (lpr568)	We opposed this allocation but it now has full planning consent. The developer wants to start soon. However should this not happen, we would welcome planning consent lapsing.	Comments noted. No changes to the policy are required in light of this representation.
<b>Landowners, site promoters and developers</b>		
Solve Planning Ltd for West Development Partnership (lpr1426)	Policies SP13 and RSA4 identify a site at Stoney Lane for the delivery of up to 75 dwellings. This site is well placed on the edge of Newbury but, alongside an additional site has the potential to deliver more dwellings on the edge of the main settlement of Newbury. Previous representations have been made relating to the additional site to the north and this has the potential to increase further the level of housing delivery from this site. Changes to be made/preferred approach: Extension of allocation HSA3 to increase the extent of the allocation. See additional information that accompanies this submission.	Comments noted. No changes to the policy are required in light of this representation. These comments relate to the HELAA site CA8 (Land off Stoney Lane, Stone Copse, Newbury). The HELAA has assessed that site CA8 is 'not developable within the next 15 years'.
Southern Planning Practice Ltd on behalf of The Saunders Family (lpr1931)	The land to the south west of the site, land at Coley Farm, is allocated for the development of 75 dwellings in the Local Plan Review. The site is also currently allocated in the adopted Local Plan under policy HSA3. An online planning history search has revealed that outline planning permission for 75 dwellings was permitted in May 2016 and an application for full planning permission was submitted in March 2020. This application was presented at the November 2020 committee and was recommended for approval by Officers, however the minutes of the committee meeting were not published at the time of writing.	Comments noted. No changes to the policy are required in light of this representation. Comments are made in relation to HELAA site CA9 (Land north of Waller Drive (West of Yate's Copse) Newbury). The HELAA recommended that site CA9 is potentially developable in part. Full details on why the site was not taken forward as an allocation are set out in the Site Selection Paper.

Respondent (with lpr ref)	Response	Council Response
	<p>We note that the site layout plan for the 2020 application provides opportunities for links to the land east of Stoney Lane. There are two obvious access points to the site, one to the north and one to east.</p> <p>In light of the approval on land at Coley Farm and links that is provides to the land east of Stoney Lane, it is considered that the land east of Stoney provides a logical extension to the previous allocation and is clearly located in an area which the Council considers appropriate for the development of new homes.</p> <p>Conclusion: Paragraph 15 of the NPPF makes it clear that plans should be prepared in a way that is aspirational but deliverable.</p> <p>It is considered that as currently drafted, the emerging local plan is not positively prepared and is unlikely to assist the Government in its objective to significant boost the supply of new homes as it carries forward previous allocations which have failed to deliver and proposes new allocations which also may not deliver new homes or take a long time to provide new homes, when the need is now.</p> <p>To remedy this deficiency, it is considered that the council should allocate further sites of varying size to provide a flexible, responsive and deliverable housing land supply. In this respect, we would point out the suitability of the land east of Stoney Lane.</p> <p>In accordance with the definition of 'deliverable' within the National Planning Policy Framework (2019), the site is available for development now, it is a suitable and sustainable location for future residential development and it is achievable with a realistic prospect that housing will be delivered on site within five years following its allocation.</p> <p>The opportunities and constraints plan demonstrates how the site could be delivered to provide a landscape-led residential development. The plan details the potential development area together with open space, links to green infrastructure together with links to the wider area.</p> <p>In conclusion, as demonstrated throughout these representations, the land east of Stoney Lane is available, suitable and achievable and would make a positive contribution to help meet West Berkshire's housing need, in particular the housing need for Newbury. The site could also potentially contribute to meeting unmet need arising from Reading Borough.</p>	

### Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

#### Emerging Draft LPR Policy: RSA5 Land adjoining New Road, Newbury (Site Ref: GRE6)

Number of responses received: 7

<b>Statutory consultees</b>		
BBOWT (lpr988)	BBOWT believe that it would be difficult to develop this site without significant impact on the ancient woodland, particularly when considered in combination with the amount of recent development within close proximity. The site provides a semi-natural buffer which would be hard to retain in sufficient quantity in any development proposals. There would also be increased recreational pressures from new residents.	Comments noted. Drainage officers comment that development of the site would lead to a reduction in groundwater level affecting the hydrology of the site to the detriment of the Ancient Woodland. A stream runs through the eastern part of the site. Development should be kept away Planning application 18/01148/OUTD for four dwellings, roads, ancillary structures, and landscaping, with access to New Road was refused on 19 <sup>th</sup> July 2018. Aside from the reason of the site being located outside of the settlement boundary, the second reason for refusal focused on the resulting pressure on the Ancient Woodland, with the canopies of the trees around the site coming under undue pressure from the occupiers of the dwellings. Given that the site is proposed to be allocated for approximately 10 dwellings, and with the updated advice, it is considered

Respondent (with lpr ref)	Response	Council Response
		<p>that the pressure on the Ancient Woodland would be too great to progress with the site as a housing site. The allocation will now be removed from the LPR, due to the adverse impact on the surrounding Ancient Woodland. Standing advice in relation to ancient woodland has changed recently. There is significant pressure from all sides on the adjacent wood which would be close to residential areas within the site. The buffer zone required would be greater than 15 metres. The loss of green infrastructure cannot be enhanced. Following the NPPF which states at paragraph 180 c) that 'development resulting in the loss or deterioration of irreplaceable habitats (such as ancient woodland and ancient or veteran trees) should be refused, unless there are wholly exceptional reasons and a suitable compensation strategy exists', and further to the refused planning application for four dwellings, it is considered that the impact on the ancient woodland would be so great that the site is not suitable for development.</p>
Natural England (lpr1610)	<p><b>Policies RSA5, RSA6</b> These allocations are directly adjacent to an area of ancient woodland, and their development will reduce connectivity between the woodland and other areas of green infrastructure. Please refer to Natural England's standing advice (<a href="https://www.gov.uk/guidance/ancient-woodland-and-veteran-trees-protection-surveys-licences#avoid-impacts-reduce-mitigate-impacts-and-compensate-as-a-last-resort">https://www.gov.uk/guidance/ancient-woodland-and-veteran-trees-protection-surveys-licences#avoid-impacts-reduce-mitigate-impacts-and-compensate-as-a-last-resort</a>) on ancient woodland to avoid significant impact. Planning decisions should be made in line with para. 175 (c) of the NPPF.</p>	<p>Comments noted. Respondent (with lpr ref)	Response	Council Response
	<p><u>Housing Requirement and Supply</u> The Council needs to ensure that there is sufficient flexibility in the Local Plan with regards to the overall housing strategy. The National Planning Policy Framework ('the Framework') acknowledges at paragraph 68 that small and medium sized sites '<i>can make an important contribution to meeting the housing requirement of an area, and are often built-out relatively quickly</i>'. Accordingly, the Local Plan should identify a range of sites of various sizes – from small scale to large scale developments - to provide extra resilience and flexibility to the Local Plan. With this in mind, we welcome the proposed allocation of our client's land for a small-scale development of around 10 dwellings at Newbury which will provide choice and contingency to the market.</p> <p><u>Land adjoining New Road, Newbury</u> We agree with the Council's conclusions in the HELAA and the Site Selection Background Paper (December 2020) that the site is suitable for allocation for development of approximately 10 dwellings. It is considered that developing the 'Land adjoining New Road, Newbury' is a developable option for the following reasons:</p> <ul style="list-style-type: none"> <li>(a) There is a need to identify small/medium scale sites for housing in West Berkshire to meet the indicative housing requirements during the plan period.</li> <li>(b) The site is located in the 'Newbury and Thatcham Area' which is capable of accommodating significant levels of growth given the range of services and facilities it currently offers and is therefore a sustainable location for development.</li> <li>(c) The land has a strong relationship with the existing residential development to the north and follows the existing pattern of the settlement.</li> <li>(d) The site is visually well contained by existing woodland and trees which affords a degree of separation from the wider landscape.</li> <li>(e) An appropriate buffer (i.e. 15 metres) can be maintained to the Ancient Woodland.</li> </ul>	<p>four dwellings, it is considered that the impact on the ancient woodland would be so great that the site is not suitable for development.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>(f) The site is not subject to any specific environmental or statutory designations such as Green Belt, Special Protection Area (SPA), Area of Outstanding Natural Beauty (AONB) or Site of Special Scientific Interest (SSSI).</p> <p>(g) The site is located in Flood Zone 1 (i.e. low probability of flooding) and a sustainable drainage system would be provided.</p> <p>(h) The site has access to local employment opportunities within Newbury, Greenham and beyond;</p> <p>(i) The site is in close proximity to local bus routes, and within walking distances of key facilities and services available. Future residents would therefore benefit from these existing services.</p> <p>(j) A vehicular access and appropriate visibility splays can be delivered from New Road;</p> <p>(k) The scale of dwellings proposed (i.e. around 10 new homes) is capable of delivering housing in line with local objectives, such as need for affordable housing.</p> <p>(l) Further opportunity to deliver new areas of green infrastructure and the creation of areas of green amenity/open space for recreation, ecological and biodiversity enhancements.</p> <p>(m) The site is greenfield - therefore it is likely that there are no significant constraints (such as contamination) which would preclude development of the site on viability grounds.</p> <p>(n) The site is available for a residential development immediately. The land is within single landownership and Rivar have an option to purchase the site which will facilitate its timely development early in the plan period.</p> <p>(o) Furthermore, as far as we are aware, there are no legal problems which would prevent this site coming forward for residential development.</p> <p>Accordingly, it is considered that there are no identifiable constraints that would prevent the delivery of the site for a small-scale residential development. The site is therefore suitable, available, and achievable for around 10 new homes, in a timely and sustainable manner.</p>	

**Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)****Emerging Draft LPR Policy: RSA6 Land off Greenham Road and New Road, South East Newbury (Site Ref: HSA 4)****(Proposed Submission LPR Policy: RSA4 Land off Greenham Road, Newbury)**

<b>Respondent</b> <i>(with lpr ref)</i>	<b>Response</b>	<b>Council Response</b>
<b>Statutory consultees</b>		
Newbury Town Council (lpr2249)	These sites (RSA2, 4 and 6) all have planning consent and much of RSA6 is already built and occupied. We do support their allocation in the Plan. In policy terms, the consented planning applications seem to make their inclusion superfluous.	Comments noted. Several sources will ensure a continuous supply of housing across the plan period. These include retained allocations in the Local Plan. The site is currently allocated in the Housing Site Allocations DPD which forms part of the existing Local Plan. It is acknowledged that two of the parcels of land which make up the site have now been built out and so these will be removed from the LPR. The allocation is however being retained across the remaining part of the site that has not yet been built out. The policy will be amended accordingly.
Natural England (lpr1609)	These allocations [RSA5 and RSA6] are directly adjacent to an area of ancient woodland, and their development will reduce connectivity between the woodland and other areas of green infrastructure. Please refer to Natural England's standing advice ( <a href="https://www.gov.uk/guidance/ancient-woodland-and-veteran-trees-protection-surveys-licences#avoid-impacts-reduce-mitigate-impacts-and-compensate-as-a-last-resort">https://www.gov.uk/guidance/ancient-woodland-and-veteran-trees-protection-surveys-licences#avoid-impacts-reduce-mitigate-impacts-and-compensate-as-a-last-resort</a> ) on ancient woodland to avoid significant impact. Planning decisions should be made in line with para. 175 (c) of the NPPF.	Comments noted. The site is currently allocated in the Housing Site Allocations DPD which forms part of the existing Local Plan. Two of the parcels of land which make up the site have now been built out and so these will be removed from the LPR. The allocation is however being retained across the remaining part of the site that has not yet been built out. The policy will be amended accordingly.

Respondent (with lpr ref)	Response	Council Response
		These comments will also inform the emerging draft Infrastructure Delivery Plan. The emerging draft IDP already includes costings for developer contributions towards woodland in relation to the site. The policy wording referring to buffers between the development and ancient woodland will be strengthened.
Thames Water (lpr1772)	<p>The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website <a href="https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development">https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development</a>.</p> <p>The wastewater network capacity in this area may be unable to support the demand anticipated from this development. Local upgrades to the existing drainage infrastructure may be required to ensure sufficient capacity is brought forward ahead of the development. Where there is a potential wastewater network capacity constraint, the developer should liaise with Thames Water to determine whether a detailed drainage strategy informing what infrastructure is required, where, when and how it will be delivered is required. The detailed drainage strategy should be submitted with the planning application</p>	<p>Comments noted. A Phase 1 and Phase 2 Water Cycle Study have since been prepared and will be reflected in the policy as follows -  <u>'An integrated water supply and drainage strategy will be provided in advance of development to ensure the provision of adequate and appropriate infrastructure for water supply and waste water, both on and off site. Development will be occupied in line with this strategy.'</u></p> <p>These comments will inform the emerging draft Infrastructure Delivery Plan.</p>
<b>General consultation bodies</b>		
Mid and West Berkshire Local	Public footpath GREE/13/1 passes through the northern part of this site. However, this part of the site is already built, at least in part. Any further	Comments noted. ## Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

### Emerging Draft LPR Policy: RSA7 Land at Lower Way, Thatcham (Site Ref: HSA 5)

### (Proposed Submission LPR Policy: RSA5 Land at Lower Way, Thatcham)

Number of responses received: 7

Respondent (with lpr ref)	Response	Council Response
<b>Statutory consultees</b>		
Environment Agency (lpr1667)	There should be no adverse impacts on the protected sites to the south: Thatcham Reed Beds SSSI; River Kennet SSSI; Kennet and Lambourn Floodplain Special Area of Conservation (SAC). Without this wording strengthening the allocation, the local plan could be found unsound in the future.	<p>Comments noted. Several sources will ensure a continuous supply of housing across the plan period. These include retained allocations in the Local Plan. The site is currently allocated in the Housing Site Allocations DPD which forms part of the existing Local Plan. Because development has not yet been built out, the allocation is being retained. The site has planning permission.</p> <p>The policy will be amended to address these comments as follows –  ‘Development will be informed by an <u>appropriate Ecological Impact Assessment (EclA) extended phase 1 habitat survey together with further detailed surveys arising from that as necessary</u>. Appropriate avoidance and mitigation measures will need to be implemented, to ensure any <u>designated sites and/or</u> protected habitats and/or species are not adversely affected <u>This includes any adverse impact on the Thatcham Reed Beds SSSI, River Kennet SSSI and Kennet and Lambourn Floodplain SAC. Opportunities to improve biodiversity and green</u></p>

Respondent (with lpr ref)	Response	Council Response
		<p><u>connectivity alongside the nearby Long Lake Marsh Local Wildlife Site should be considered.</u>'</p> <p>These comments will also inform the emerging draft Infrastructure Delivery Plan. The emerging draft IDP already includes costings for developer contributions towards biodiversity in relation to the allocation.</p>
Historic England (lpr1570)	We support the requirement for proposals to be informed by an archaeological desk based assessment as a minimum and field evaluation if required to assess the historic environment potential of the site, in accordance with NPPF paragraph 189.	Comments noted. No further amendments need to be made in light of this representation.
Natural England (lpr1608)	<p>This allocation has the potential to cause adverse impact on the Kennet and Lambourn Floodplain SAC and Thatcham Reedbeds SSSI, if mitigation isn't implemented at planning application stage.</p> <p>There is also significant opportunity here to improve biodiversity and green connectivity at this site, with the Berkshire, Buckinghamshire and Oxfordshire Wildlife Trust alongside the nearby Long Lake Marsh Local Wildlife Site. Any future planning application should explore these opportunities to contribute to a biodiversity net gain.</p>	<p>Comments noted. This policy rolls forward allocations from the former Housing Site Allocations DPD which have not yet been completed but remain available and deliverable. This site has planning permission. Several sources will ensure a continuous supply of housing across the plan period. These include retained allocations in the Local Plan. The site is currently allocated in the Housing Site Allocations DPD which forms part of the existing Local Plan. Because development has not yet been built out, the allocation is being retained.</p> <p>The policy will be amended to address these comments as follows –</p> <p>'Development will be informed by an <u>appropriate Ecological Impact Assessment (EclA)</u> <del>extended phase 1 habitat survey together with further detailed surveys arising from that as necessary.</del> Appropriate avoidance and mitigation measures will need to be implemented, to ensure any <u>designated sites and/or</u> protected habitats and/or species are not adversely affected. <u>This includes any adverse impact on the Thatcham Reed Beds SSSI, River Kennet SSSI and Kennet and Lambourn Floodplain SAC. Respondent (with lpr ref)	Response	Council Response
Mid and West Berkshire Local Access Forum (lpr1870)	<p>MWBLAF supports the statements:</p> <ul style="list-style-type: none"> <li>• Pedestrian and cycle linkages will be expected through the site and linking to the surrounding area.</li> <li>• It is expected that development will ... be set back from the existing public rights of way to the east and west of the site.</li> </ul> <p>The Forum notes that a new public footpath runs along the southern boundary of the site and then crosses the site to join Lower Way close to its junction to Paynesdown Road. This new public right of way does not appear to be addressed in the policy. We suggest that this route could be enhanced and extended as a traffic-free cycle route along the southern boundary to the entrance to the Discovery Centre, and also possibly extended eastwards beyond the site to The Moors. This would provide a continuous traffic-free cycle route from The Moors estate towards Newbury.</p> <p>The Forum recommends the following addition to item iv):            (iv) It is expected that development will front onto Lower Way to enable effective integration with the existing built form and be set back from the existing public rights of way <b>within or adjacent to to the east, and west of the site, which should be retained as distinct routes, <u>separate from the roads within the development.</u></b></p>	<p>Comments noted. The policy will be amended to address these comments as follows –            'It is expected that development will front onto Lower Way to enable effective integration with the existing built form and be set back from the existing public rights of way <u>within or adjacent to the east and west of the site, which should be retained as distinct routes separate from the roads within the development.</u>'</p> <p>These comments will also inform the emerging draft Infrastructure Delivery Plan. The emerging draft IDP already includes costings for developer contributions towards footpaths in relation to the allocation.</p>
<b>Other stakeholders</b>		
Nataliya Topliss (lpr811)	<p>The site will be accessed via Lower Way that leads to the A4. The A4 is of full capacity with excessive congestion daily (when there is no lockdown). West Berks Council's strategy of 2012 identified, that after a period of rapid housing growth, infrastructure in Thatcham had failed to keep pace and there should be a period for regeneration and new facilities. Since then, there has been no such regeneration so the Council's conclusions of 2012 must still stand.</p>	<p>Comments noted. No further changes are required in light of this representation. Several sources will ensure a continuous supply of housing across the plan period. These include retained allocations in the Local Plan. The site is currently allocated in the Housing Site Allocations DPD which forms part of the existing Local Plan. Because development has not yet been built out, the allocation is being retained. The site has planning permission.</p>
Councillor Tony Vickers (lpr574)	<p>Policy is supported.            This site has full planning consent.</p>	<p>Comments noted.</p>

## Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

### Emerging Draft LPR Policy: RSA8 Land at Poplar Farm, Cold Ash (Site Ref: HSA 6)

Number of responses received: 4

Respondent (with lpr ref)	Response	Council Response
<b>Statutory consultees</b>		
Thames Water (lpr1748)	<p>The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website <a href="https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development">https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development</a>.</p> <p>On the information available to date we do not envisage infrastructure concerns regarding wastewater infrastructure capability in relation to this site.</p> <p>This response is provided assuming that discharge will be via gravity and that no surface water will be discharged to the wastewater network.</p>	<p>Comments noted.</p> <p>The site was allocated within the Housing Site Allocations Development Plan Document (HSA DPD) which was adopted in May 2017.</p> <p>The National Planning Policy Framework (NPPF) at paragraph 122 states that:  <i>“Planning policies and decisions need to reflect changes in the demand for land. They should be informed by regular reviews of both the land allocated for development in plans, and of land availability. Where the local planning authority considers there to be no reasonable prospect of an application coming forward for the use allocated in a plan...they should, as part of plan updates, reallocate the land for a more deliverable use that can help to address identified needs (or, if appropriate, deallocate a site which is undeveloped)...”</i></p> <p>Further to this, Planning Practice Guidance (PPG) (para 019, ref ID: 3-019-20190722) states that a site can be considered available if there is confidence that there are no legal or ownership impediments to development. It also states that the existence of planning permission can be a good indication of availability, as can the delivery record of landowners / developers.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>In terms of achievability, the PPG (para 020, ref ID: 3-020-20190722) states that a site is considered achievable for development where there is a reasonable prospect that the particular type of development will be developed on the site at a particular point in time.</p> <p>In the nearly 5 years since the HSA DPD was adopted there has been no progress on bringing the site forward. The site does not have planning permission and no planning applications have ever been submitted. In light of this, the fact that no one landowner has overall control of the site, and the issues around financial viability, officers consider that it is not possible to demonstrate that the site is still available, achievable, and deliverable.</p> <p>The allocation will be removed from the LPR due to concerns over deliverability.</p>
Historic England (lpr1571)	<p>We support the requirement for a heritage impact assessment to assess the impact of development on the Grade II listed Poplar Farmhouse and its setting and to inform development on the site and for development to ensure the conservation and enhancement of the Farmhouse and its setting.</p>	<p>Comments noted.</p> <p>It is proposed that the allocation be removed due to concerns over deliverability. (see response to Thames Water above)</p>
<b>General consultation bodies</b>		
Mid and West Berkshire Local Access Forum (lpr1871)	<p>MWBLAF welcomes the recognition in this policy of the effect of developments on the appearance of the landscape from viewpoints. The Forum therefore supports the following statement:</p> <p>The scheme ... will include: ... The provision of woodland blocks in the north western corner and along the southern edge to mitigate effects on views from the public rights of way to the north west and to the south.</p> <p>The Forum recommends that the Council considers including a similar statement in other policies where development would have a similar effect on views.</p>	<p>Comments noted.</p> <p>The allocation will be removed from the LPR due to concerns over deliverability. (see response to Thames Water above)</p>

Respondent (with lpr ref)	Response	Council Response
<b>Other stakeholders</b>		
Name withheld (lpr1464)	<p>Policy not supported.</p> <p>My main area of comment is in regards to any further housing development in Cold Ash as that is where I live &amp; that is therefore my foremost area of interest but having said that I do have general comments to make about potential proposed housing sites across the West Berkshire area.</p> <p>Firstly, I have concerns about the proposed site at Poplar farm Cold Ash. Although some of this site is currently taken up by farm buildings/farmyards, which incidentally I would not like to see go, a chunk of it is greenfield land currently used for grazing of one sort or another. This land is notoriously wet &amp; I fear that any building on this site would increase the chances of flooding to the houses just a little further down the hill.</p> <p>Also the proposed access points are both a contentious point. The first access point would use the current lane leading into the farm which is directly opposite the very dangerous &amp; much overused junction with Collaroy Road. In normal circumstances, when schools are fully attended &amp; we are not in a lockdown situation, this junction is exceedingly busy with numerous cars using Collaroy Road as a rat run to St Finians school. The junction comes out onto Cold Ash hill which is also extremely busy at several times during the day &amp; where traffic is usually going far in excess of the 30mph limit in place through Cold Ash. In fact I have seen traffic actually overtaking on the approach to Collaroy Road on several occasions &amp; that is no exaggeration ...ask anyone who lives along this stretch of road. There have been serious accidents at this junction previously. A crossroads there would increase the risk to traffic emerging from the junctions &amp; traffic travelling on the hill itself. The Collaroy junction also has bad visibility when exiting as does the current farm lane.</p> <p>The second proposed access appears from the plan to go across the middle of the existing paddock below Orchard End. As mentioned previously this paddock is extremely wet at times &amp; so building a road across it may increase potential flooding issues for the housing below. There is also the more obvious problem that if a road is built through that field, planners will see that as a golden opportunity to "infill" with further housing between Orchard End &amp; the first house South of the paddock. Any further loss of greenfield sites in Cold Ash would be terrible for the village, the wildlife</p>	<p>Comments noted.</p> <p>The site specific policy for this site (Policy RSA8) takes account of the flood risk on the site and seeks the delivery of a detention pond on the southern part of the site to accommodate development drainage. The policy also requires that any scheme is informed by a Flood Risk Assessment which will include the provision of safe flow routes and appropriate flood mitigation measures, including SuDS, as it is recognised the site and adjacent properties are susceptible to surface water flooding.</p> <p>The policy sets out options for the access points to the site, and requires an upgrade, as necessary, to the existing access should this be retained. Any development on the site would need to ensure adequate access is provided through a planning application.</p> <p>Policy SP23 of the LPR sets out the planning policy approach for infrastructure requirements and delivery. Developer contributions are sought on most new development within the District. These contributions are sought in order to provide for additional facilities and infrastructure demands as a result of new development.</p> <p>The allocation will be removed from the LPR due to concerns over deliverability. (see response to Thames Water above)</p>

Respondent (with lpr ref)	Response	Council Response
	<p>population, biodiversity &amp; indeed, the loss in this case of good old fashioned meadow grazing currently used for horses, pigs, donkeys &amp; geese. The loss of some beautiful views &amp; landscapes I am sure would also be of great concern to all those who live in this area of Cold Ash as well as myself. We live in a much sort after &amp; beautiful village which is in danger of becoming just another urban sprawl.</p> <p>The increase in housing in the village is also a concern with regards to general infrastructure. The doctors surgeries in Thatcham are full to bursting point with very long waits to access appointments at the best of times. St Marks school is full to breaking point &amp; I believe under no circumstances should any attempt be made to build a replacement in the village as that would also have to take up more valuable greenfield land. The local bus service is almost non existent &amp; cycling to Thatcham on Cold Ash hill is a very dangerous prospect indeed these days. Thatcham is also a considerable distance to walk if you are carrying heavy shopping or are in the older age bracket. Of course, further housing also increases the traffic on the already overused rat run of Cold Ash hill.</p> <p>From a wider prospective, I totally understand the need for some additional housing in the West Berkshire area but I do believe that new housing should be concentrated on brown field sites, on sites which do not suffer from flooding already or where building would cause flooding from drain off, &amp; should not take place except on very exceptional circumstances on our very precious greenfield land which is home to British wildlife flora &amp; birdlife, which once built on can never be replaced. I also believe that in order for housing to be built the correct infrastructure should be in place beforehand &amp; consideration should be taken to the increase in traffic &amp; the nightmare which ensues for the existing residents of those areas.</p> <p>Please consider my views when taking the local plan forward into its next stages.</p>	

### Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

<b>Statutory consultees</b>		
Thames Water (lpr1749)	<p>On the information available to date we do not envisage infrastructure concerns regarding water supply network infrastructure in relation to this development/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing.</p> <p>On the information available to date we do not envisage infrastructure concerns regarding wastewater infrastructure capability in relation to this site.</p> <p>Thames Water have no concerns relating to wastewater capacity based upon the assumption that the connection is via gravity and that no surface water shall be discharged to the Thames Water foul sewer network.</p>	<p>Comments noted.</p> <p>The site was allocated within the Housing Site Allocations Development Plan Document (HSA DPD) which was adopted in May 2017.</p> <p>Outline planning permission (16/02529/OUTD) was granted in October 2017 and Reserved Matters permission (19/00832/REM) in January 2021.</p> <p>The allocation will now be removed from the LPR as the site has planning permission and development is under construction.</p>
<b>Other stakeholders</b>		
Councillor Tony Vickers (lpr941)	<p>We strongly objected to this allocation but it now has full planning consent. Remove from Plan as it is likely to be built before Plan adoption.</p>	<p>Comments noted.</p> <p>The site was allocated within the Housing Site Allocations Development Plan Document (HSA DPD) which was adopted in May 2017.</p> <p>Outline planning permission (16/02529/OUTD) was granted in October 2017 and Reserved Matters permission (19/00832/REM) in January 2021.</p> <p>The allocation will now be removed from the LPR as the site has planning permission and development is under construction.</p>

Respondent (with lpr ref)	Response	Council Response
<b>Landowners, site promoters and developers</b>		
Pro Vision on behalf of TA Fisher and Sons Ltd (lpr1933)	<p>Our client supports the proposed allocation of the site and is keen to continue working collaboratively with the Council to secure its sustainable development. These representations therefore focus on responding to / clarifying specific elements in the wording of Policy RSA9 to ensure that it is clear and factually accurate.</p> <p>Table 9.1 of the Council's Site Selection Background Paper (December 2020) provides the Council's deliverability update.</p> <p>The only comments that we have in relation to the Council's deliverability update is to confirm that, as noted above, Reserved Matters consent has now been granted (at appeal).</p> <p>Regarding Policy RSA9 of the draft Local Plan, our only comments relate to ensuring that its wording reflects the details of the site / development for which Outline planning permission and Reserved Matters consent was granted (ref. 16/02529/OUTD and 19/00832/REM). This relates to the following:</p> <p>Part ii) refers to individual accesses being provided from The Ridge in keeping with the local pattern. However, the approved development shows three access points to serve the five new dwellings. Therefore, while one dwelling has an individual access, the remaining four dwellings share two access points. We therefore respectfully request the following amendment if the remaining wording is deemed necessary:  <del>"(ii) Individual accesses</del> <u>Access will be provided from The Ridge in keeping with the local pattern."</u></p> <p>Part ii) refers to individual accesses being provided from The Ridge in keeping with the local pattern. However, the approved development shows three access points to serve the five new dwellings. Therefore, while one dwelling has an individual access, the remaining four dwellings share two access points. We therefore respectfully request reference to individual access points is deleted.</p> <p>Part (iii) (bullet 3) refers to the retention of the front boundary hedgerow treatment. However, the approved development shows the removal of some hedgerow to allow access to the new dwellings. We therefore respectfully request the following amendment:</p>	<p>Comments noted.</p> <p>The site was allocated within the Housing Site Allocations Development Plan Document (HSA DPD) which was adopted in May 2017.</p> <p>Outline planning permission (16/02529/OUTD) was granted in October 2017 and Reserved Matters permission (19/00832/REM) in January 2021.</p> <p>The allocation will now be removed from the LPR as the site has planning permission and development is under construction.</p>

Respondent <i>(with lpr ref)</i>	Response	Council Response
	<p><i>“The retention of the front boundary hedgerow treatment <u>where possible, with the exception of that required for access and visibility splays.</u>”</i></p> <p>Part (iii) (bullet 3) refers to the retention of the front boundary hedgerow treatment. However, the approved development shows the removal of some hedgerow to allow access to the new dwellings. We therefore respectfully request the wording is adjusted to reflect that it will be necessary to remove some boundary hedge to facilitate the points of access.</p>

Historic England (lpr1572)	We support the requirement for proposals to be informed by an archaeological desk based assessment and field evaluation to assess the historic environment potential of the site, in accordance with NPPF paragraph 189.	Comments noted. The site was allocated within the Housing Site Allocations Development Plan Document (HSA DPD) which was adopted in May 2017. Outline planning permission (16/01223/OUTMAJ) was granted in December 2016 and Reserved Matters permission (19/00718/RESMAJ) in June 2019. The allocation will now be removed from the LPR as the site has planning permission and development is under construction.
Thames Water (lpr1751)	The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website.	Comments noted. A Phase 1 and Phase 2 Water Cycle Study have since been prepared. The site was allocated within the Housing Site Allocations Development Plan Document (HSA DPD) which was adopted in May 2017. Outline planning permission (16/01223/OUTMAJ) was granted in December 2016 and Reserved Matters permission (19/00718/RESMAJ) in June 2019. The allocation will now be removed from the LPR as the site has planning permission and development is under construction.

Respondent (with lpr ref)	Response	Council Response
	On the information available to date we do not envisage infrastructure concerns regarding wastewater network or wastewater treatment infrastructure capability in relation to this site/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing.	
<b>General consultation bodies</b>		
Mid and West Berkshire Local Access Forum (lpr1873)	<p>Contrary to what is stated, the path to the north of this site does not form part of a Berkshire Circular Route. For part of its length, it is adjacent to the site, but for another part it is within the boundary of the site – as shown on the map in the draft Local Plan.</p> <p>MWBLAF therefore supports the references in the policy to public rights of way, but suggests that they are clarified, to refer to the public right of way that is both within and adjacent to the boundary of this part of the site.</p> <p>The Forum recommends the following changes to the policy: The site will be developed in accordance with the Landscape Capacity Assessment (2014) and will include: <i>Tree planting along Long Lane and the edge of Stonehams Farm, the retention of the trees and boundary hedgerows along Long Lane <del>and Berkshire Circular Route</del> and the provision of a new tree belt and hedgerow along the northern exposed boundary, to preserve the character of the public footpath.</i></p>	<p>Comments noted.</p> <p>The site was allocated within the Housing Site Allocations Development Plan Document (HSA DPD) which was adopted in May 2017.</p> <p>Outline planning permission (16/01223/OUTMAJ) was granted in December 2016 and Reserved Matters permission (19/00718/RESMAJ) in June 2019.</p> <p>The allocation is now proposed to be removed from the LPR as the site has planning permission and development is under construction.</p>

<b>Respondent</b> <i>(with lpr ref)</i>	<b>Response</b>	<b>Council Response</b>
<b>Statutory consultees</b>		
Purley on Thames Parish Council (lpr1853)	<p>Purley on Thames Parish Council is generally supportive of the proposals to meet the requirements for housing development by location and type taking account of the AONB locations. Specific comments relating to Purley on Thames are as follows:</p> <ul style="list-style-type: none"> <li>We are satisfied with the approved plans for 72 Purley Rise included in Section 8 as it provides a green buffer between the Housing and existing open land together with the inclusion of a Public Open Space.</li> <li>As there is very little potential for development within Purley on Thames we do have concerns over attempts to apply for planning permission in the woodland adjoining the A329 which forms the green corridor either side of the A329 through the village.</li> </ul>	Comments noted. No further amendments need to be made in light of this representation. Several sources will ensure a continuous supply of housing across the plan period. These include retained allocations in the Local Plan. The site is currently allocated in the Housing Site Allocations DPD which forms part of the existing Local Plan. As development has not yet been built out, the allocation is being retained.
Historic England (lpr1573)	We support the requirement for proposals to be informed by an archaeological desk based assessment and field evaluation to assess the historic environment potential of the site, in accordance with NPPF paragraph 189.	Comments noted. No further amendments need to be made in light of this representation.

Councillor Tony Vickers (lpr962)	Policy is supported.	Support noted.

Respondent (with lpr ref)	Response	Council Response
<b>Landowners, site promoters and developers</b>		
John Phillips Planning Consultancy on behalf of Mr Henry Venners (lpr1166)	<p>Despite the development area where housing is suggested being previously developed land and not within any sensitive area nor near any heritage interests the allocation seeks to provide an excessive amount of open space around the site. Considering all the sites allocated for housing within the plan - many of which are within the AONB - very much smaller areas are suggested as being needed for 'open space' proportionally to the area to be developed</p> <p>The suggested land take is excessive, but this can be addressed (see box below)</p> <p><b>Criterion (wording of)</b> 'The open northern part will be retained as undeveloped open space' to be deleted and replaced with 'residential buildings shall be confined to the blue highlighted area'</p> <p>Or 'landscaping, fields, and/or open space shall be provided on the northern part of the site as shown hatched'</p> <p>Land adjacent the railway cannot be planted with trees and there is no reason why farm use cannot continue there. Fields need not be defined as 'open space'. Other peripheral areas not needed for tree planting nor public open space should be able to be retained as field and the policy make that clear. It would not be appropriate for members of the public to be encouraged next to the railway for safety reason nor for trees etc to be planted inappropriately.</p> <p>This area is also required for access to other farm fields and access should be considered an acceptable use.</p> <p>Drainage infrastructure is 'development' yet would be acceptably located within the suggested open space areas. It is inappropriate to use the term undeveloped when types of 'development' such as drainage infrastructure, landscaping, and change of use are acceptable forms of development within the 'non-housing area'. The clumsy and therefore the unhelpful language employed should be changed- avoid the word development which means a different thing in planning legislation to what was meant- which actually means buildings.</p>	<p>Comments noted.</p> <p>The site is currently allocated in the Housing Site Allocations DPD which forms part of the existing Local Plan and reflects the site as promoted through the HELAA. As a large part of the site is not considered appropriate for development this is reflected in the amount of the site allocated as required landscape buffer.</p> <p>As part of the LPR, and in the interests of clarity, the Council now intends to adjust the boundary of the allocated site to remove the landscape buffer. The site allocated in the LPR will therefore encompass the current developable area of the site only.</p> <p>Amend the policy as follows –</p> <p><del>The scheme will be informed by an archaeological desk based assessment as a minimum and field evaluation if required to assess the historic environment potential of the site.</del></p> <p>The site will be developed in accordance with the Landscape Capacity Assessment (2015) and will include: ...</p> <ul style="list-style-type: none"> <li>• <del>The open northern part will be retained as undeveloped open space.</del></li> <li>• <del>The tree cover on the site and around the boundaries will to be retained.</del></li> <li>• <del>Open space and Green Infrastructure will be provided to conserve and enhance the setting of the AONB and the landscape character of the settlement edge.</del></li> </ul>

Respondent (with lpr ref)	Response	Council Response
Boyer Planning on behalf of Shanly Homes (lpr1976)	<p>Policy is supported. Some wording changes are suggested given that the site has outline permission with some assessments already submitted. Shanly Homes are currently preparing Reserved Matters applications which will undertake assessments in relation to Flood Risk Assessment and a Phase 1 Habitat Survey in order to demonstrate the site is suitable to accommodate new development. The site is a proposed allocation for up to 35 residential units with an element of self-build homes. Policy RSA 12 provides an indicate map of developable area of approximately 1 hectare. The outline permission is consistent with the developable area illustrated within the LPR as it makes an appropriate balance between making efficient use of land and protecting the surrounding landscape. The Policy states that the site will be developed in accordance with a Landscape Visual Impact Assessment (LVIA). The outline permission was informed by a LVIA that has taken into account the Landscape Capacity Assessment (2015) which would ensure the site has capacity to accommodate the proposed development whilst ensuring the densities and the mass and scale of development would reflect the adjacent settlement character and be designed to avoid increasing the visual prominence of development on the edge of Purley. The LVIA concluded that the overall balance of landscape effects accommodating demolition, clearance and construction, with extensive landscape measures is assessed to lead to a minor/moderate local impact significance, with the balance of works leading to a neutral effect in year 1. The assessment concludes that the landscape measures will lead to a moderate positive local landscape effect at year 10 and will result in a positive landscape enhancement thereafter. Given that a detailed LVIA has been undertaken for the site already, it is recommended that the wording of section (vii) is changed to read “The scheme will be informed by the findings of a full detailed Landscape Visual Impact Assessment (LVIA)”.</p> <p>Policy RSA 12 states that the scheme will be supported by a Flood Risk Assessment, a Phase 1 Habitat Survey and an Archaeological Desk Based Assessment.</p>	<p>Comments noted.</p> <p>The site is currently allocated in the Housing Site Allocations DPD which forms part of the existing Local Plan and reflects the site as promoted through the HELAA. As a large part of the site is not considered appropriate for development this is reflected in the amount of the site allocated as required landscape buffer. As part of the LPR, and in the interests of clarity, the Council intends to adjust the boundary of the allocated site to remove the landscape buffer. The site allocated in the LPR will therefore encompass the current developable area of the site only.</p> <p>Amend the policy as follows –</p> <p><del>The scheme will be informed by an archaeological desk based assessment as a minimum and field evaluation if required to assess the historic environment potential of the site.</del></p> <p>The site will be developed in accordance with the Landscape Capacity Assessment (2015) and will include: ...</p> <ul style="list-style-type: none"> <li><del>• The open northern part will be retained as undeveloped open space.</del></li> <li><del>• The tree cover on the site and around the boundaries will to be retained.</del></li> <li><del>• Open space and Green Infrastructure will be provided to conserve and enhance the setting of the AONB and the landscape character of the settlement edge.</del></li> </ul>

Respondent (with lpr ref)	Response	Council Response
	<p>As part of the outline permission the Council's Archaeological Officer reviewed the application using the approach set down in the NPPF and concluded that there would be no major impact on any features of archaeological significance. The Archaeological Officer made reference to the desk-based assessment and field evaluation reports which supported the pre-application stage of the application and concluded that no archaeological assessment or programme of investigation and recording is necessary for the proposed development.</p> <p>It is therefore suggested that reference to the Archaeological Desk Based Assessment is removed from Policy RSA 12. For clarity this would remove section (v) from Policy RSA 12.</p> <p>Shanly Homes are currently preparing Reserved Matters applications which will undertake these assessments in relation to Flood Risk Assessment and a Phase 1 Habitat Survey in order to demonstrate the site is suitable to accommodate new development.</p> <p><b>Conclusion</b></p> <p>Shanly Homes is seeking to promote 72 Purley Rise, Purley on Thames housing allocation. We welcome West Berkshire Local Plan Review (2037) Regulation 18 Consultation and proposed allocation of 72 Purley Rise to accommodate new development. The site is owned by Shanly Homes, who are a willing developer committed to bringing this land and the reserved matters forward. Shanly Homes look forward to working with West Berkshire Council on the reserved matters applications.</p> <p>The proposed 29 dwellings is an appropriate balance between making efficient use of land and protecting the surrounding landscape while also providing 34% affordable housing and providing an element of self-build homes.</p> <p>On the basis of the above, the land is deliverable for housing development in the context of existing and emerging national planning policy contained within the NPPF.</p> <p>Given that a detailed LVIA has been undertaken for the site already, it is recommended that the wording of section (vii) is changed to read "The scheme will be informed by the findings of a full detailed Landscape Visual Impact Assessment (LVIA)".</p>	

<b>Respondent</b> <i>(with lpr ref)</i>	<b>Response</b>	<b>Council Response</b>
	Suggested that reference to the Archaeological Desk Based Assessment is removed from Policy RSA 12. For clarity this would remove section (v) from Policy RSA 12.

<b>Other stakeholders</b>		
Melanie Paul (lpr1371)	<p>West Berkshire's own policy C1 outlines that the council are opposed to developing the countryside. Yet all the areas identified in the plans in and around Theale are part of a small area of countryside that we have left as you have persisted in your unrelenting drive to destroy the village. The areas identified are home for wildlife of many types, including for example; Deer, Roebuck, Foxes, Owls and Pheasant. We can't keep blindly pushing animals out, this is selfish and only represents West Berkshire Council's support for human greed and the belief that humans own this world and every other being is irrelevant. This has to stop, animals need a habitat to live in too.</p> <p>The well-being of the people that live in the village have had no consideration in the planning. Theale residents have had enough of West Berkshire Council's need to dump all the development at this end of the County. There is plenty of space to choose from at the Newbury end. Please stop your land grabbing in and around the area near the M4, it's impacting the wellbeing of the residents you are supposed to represent.</p> <p>Covid-19 has demonstrated that packing people into closely built housing estates only fuels the spread. West Berkshire's cases have been lower because of the open areas. This needs to be considered for future as there is no doubt there will be more exposure to pandemics if we continue to ignore the need for green space and less compacted settlement areas.</p> <p>The areas in question act as natural borders around Theale, protecting us from the noise of the M4 &amp; A4.</p>	<p>Comments noted.</p> <p>No further changes to the policy are required in light of this representation because this site already has planning permission. Several sources will ensure a continuous supply of housing across the plan period. These include retained allocations in the Local Plan. The site is currently allocated in the Housing Site Allocations DPD which forms part of the existing Local Plan. Because development has not yet been built out, the allocation is being retained.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>We don't need more commercial buildings, Arlington Business Park and the Arrowhead Road area has plenty of un-used space on the other other side of the A4. By building on the Village side, you only increase traffic volumes in the village and cause more noise and air pollution.</p> <p>The volume of traffic in Theale, and the area of Junction 12 of the M4 is already ridiculously heavy, your plans will only make this worse, and absolutely insufferable for residents that live here.</p> <p>Previous applications to build on these sites have been declined for reasons already highlighted by residents etc. Nothing has changed in the views of the people that have objected previously. Why include the areas in your planning, we keep going around this loop, it's getting you nowhere.</p> <p>West Berkshire Council should consider the bigger picture and not just pockets of land in isolation. With the planning being considered in and around Theale, we are looking at excessive business and residential traffic, the area cannot take it all, movement on the roads will stop.</p> <p>We don't have the infrastructure and support services to accommodate any more housing and its residents. We need better drainage, better roads and improved medical services. The new primary school is already full.</p> <p>Please take my concerns and those from others, that I am sure you will receive, more seriously and stop this madness just to meet unreasonable government targets.</p>	
Councillor Tony Vickers (lpr974)	Policy is supported.	Comments noted.
<b>Landowners, site promoters and developers</b>		
Savills on behalf of Englefield Estate (lpr1534)	<p>The LPR Emerging Draft proposes to carry forward a significant number of site allocations from the Housing Site Allocations DPD (HSA DPD), including two sites owned by the Englefield Estate at The Green, Theale (HSA DPD ref. HSA14) and at Pondhouse Farm, Burghfield Common (HSA DPD ref. HSA15). As noted above, the intention to carry forward these two sites is welcomed. It is noted that the new draft LPR Policies RSA15 (Land between A340 and The Green, Theale) and RSA18 (Land adjoining Pondhouse Farm, Clayhill Road, Burghfield Common) are identical to HSA DPD Policies HSA14 and HSA15.</p>	<p>Comments noted. Several sources will ensure a continuous supply of housing across the plan period. These include retained allocations in the Local Plan. The site is currently allocated in the Housing Site Allocations DPD which forms part of the existing Local Plan. As development has not yet been built out, the allocation is being retained. The site has planning permission.</p>

**Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)**

**Emerging Draft LPR Policy: RSA16 Whitehart Meadow, Theale**

**(Proposed Submission LPR Policy: RSA10 Whitehart Meadow, Theale)**

Number of responses received: 25

Respondent <i>(with lpr ref)</i>	Response	Council Response

<b>Statutory consultees</b>		
Theale Parish Council (lpr1103)	<p><b>Theale’s character</b> Theale is a historic village with its own rural identity. Its location entails strong rail and road links, making it an excellent location for businesses. However, this presents a risk to the village’s character and makes it vital to keep the two areas separate. The allocated and proposed sites for development listed below bely this.</p> <p><b>Proposed residential developments at Whitehart Meadow (RSA 16) and the former sewage works (RSA 17)</b> The proposed sites for development at Whitehart Meadow and the former sewage works present similar issues. Both sites suffer from inadequate access. The former would increase traffic on the High Street and at the A4 roundabout with Hoad Way, which presents risks to pedestrians and drivers alike. Both developments would result in a significant loss of green space between the village and the M4. This green barrier helps to retain the village’s rural character. It is also an unnecessary change to the existing settlement</p>	<p>Comments noted.</p> <p>The Highways Authority comment that the site should be accessed from the High Street, entailing the removal of the road block facilities. The Highways Authority also comment that in highway capacity terms there is support for the use of the High Street and the mini-roundabout at Hoads Way. There is a need for a Transport Assessment to model the junctions at the A4 and M4 to fully assess the capacity of the A4.</p> <p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessments (LCA) for a number of sites in the LPR. Whitehart Meadow is subject of a LCA. The LCA identifies a number of landscape receptors which could be affected by</p>

Respondent (with lpr ref)	Response	Council Response
	<p>boundary. Both sites also sit on a flood plain. Any development would remove necessary ground drainage and increase the risk of flooding.</p> <p><b>Theale's infrastructure</b></p> <p>The proposed developments present a substantial increase in Theale's population. Following the approval of the Lakeside development of over 300 houses—already a large increase—the village needs an adjustment period to recognise deficiencies in the existing infrastructure. The following facilities would need addressing urgently:</p> <ul style="list-style-type: none"> <li>• the medical centre would need to expand</li> <li>• sewage and drainage would need upgrading</li> <li>• the new primary school was built to accommodate the existing number of pupils attending—this would need to expand and</li> <li>• there would need to be a community hub or leisure centre—something which is currently lacking.</li> </ul> <p><b>Conclusion</b></p> <p>Taken in their totality, the additional sites for development identified in the draft Local Plan represent an unacceptable increase to the size of Theale. The parish council strongly encourages a period of adjustment following the already approved large-scale developments, otherwise it is concerned how the existing infrastructure will be able to cope.</p> <p>The parish council strongly encourages a period of adjustment following the already approved large-scale developments, otherwise it is concerned how the existing infrastructure will be able to cope.</p>	<p>development on site. Development only across the north western part of the site could be accommodated without totally compromising the separate settlement identity of Theale from Calcot. This is subject to limiting the developable area to extend up to the pylons (to the east), and the watercourse (to the south), with the area beyond left for open space, and that development to be limited to two storeys in height. Landscaping features should be incorporated including buffer planting along the north eastern edge; development to be a lower density to allow significant tree planting; adequate buffer space to the watercourse, and to enhance the existing public right of way.</p> <p>The developable area would not be within Flood Zone 2, and the policy includes a criterion that no development would be permitted in this area. A FRA and SuDS scheme would also need to accompany a planning application.</p> <p>In relation to infrastructure the development would generate CIL monies to be put towards the improvement of facilities, though the development would not be large enough to justify the provision of a community hub or leisure centre.</p> <p>Thames Water comment that the water network capacity will need to be improved, and request a detailed water supply strategy informing what infrastructure is required, where, when and method of delivery. Implementation of the strategy would be secured through the planning permission.</p> <p>The Education Authority comment that mitigation may be needed to absorb the additional pupils, and avoid displacement of existing families.</p>

Respondent (with lpr ref)	Response	Council Response
		Given the landscape advice provided and the reduction of the developable area the number of dwellings expected to be delivered would reduce from 100 to approximately 40.
Environment Agency (lpr1668)	<p>The headwaters of the Sulham Brook (main river) flow through the centre of the site and there is an ordinary watercourse on the eastern boundary. Headwaters of rivers are important as they play a number of essential roles including maintaining biodiversity, retaining nutrients and providing natural flood control measures. They are often extremely valuable for fish spawning that would include native brown trout and bullhead in this location. Therefore a detailed environmental appraisal would need to be undertaken to assess potential impacts of a development, from direct loss of habitats in the footprint of the development and indirect impacts such as changes in the groundwater.</p> <p>If this site was to become an allocated site for development, we would require a minimum 10m wide undeveloped buffer zone on both sides of the Sulham Brook, preferably wider given these are the headwaters. It would also need to be proven that there were no adverse impacts on the springs arising from the chalk that feeds the brook. Without this wording strengthening the allocation, the local plan could be found unsound in the future.</p>	<p>Comments noted.</p> <p>The policy will require a minimum 10m wide undeveloped buffer zone on both sides of the Sulham Brook.</p> <p>The policy will also include a criterion requesting an ecological assessment, to include an investigation of direct and indirect changes to habitats.</p>
Natural England (lpr1607)	Similarly to EMP6, the line of pylons form a good natural point to end any development out of Theale, whilst still providing buffer to the M4 and disconnect from Reading. The triangle of open green space at the north west of the site should be retained and enhanced into the site to create areas which are of recreational benefit for people enjoying the outdoors, as well as improved and managed habitats for biodiversity. Development itself should not come hard up against the triangle of open space to avoid overlooking (which might cause safety concerns for people using green space and lead to lack of use). We welcome the proposed further landscape assessment to determine the developable area.	<p>Comments noted.</p> <p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessments (LCA) for a number of sites in the LPR. Whitehart Meadow is subject of a LCA.</p> <p>The LCA identifies a number of landscape receptors which could be affected by development on site. Development only across the north western part of the site could be accommodated without totally compromising the separate settlement identity of Theale from Calcot. This is subject to</p>

Respondent (with lpr ref)	Response	Council Response
		limiting the developable area to extend up to the pylons (to the east), and the watercourse (to the south), with the area beyond left for open space, and that development to be limited to two storeys in height. Landscaping features should be incorporated including buffer planting along the north eastern edge; development to be a lower density to allow significant tree planting; adequate buffer space to the watercourse, and to enhance the existing public right of way.
Thames Water Utilities (lpr1754)	<p>The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website <a href="https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development">https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development</a>.</p> <p>The wastewater network capacity in this area may be unable to support the demand anticipated from this development. Local upgrades to the existing drainage infrastructure may be required to ensure sufficient capacity is brought forward ahead of the development. Where there is a potential wastewater network capacity constraint, the developer should liaise with Thames Water to determine whether a detailed drainage strategy informing what infrastructure is required, where, when and how it will be delivered is required. The detailed drainage strategy should be submitted with the planning application</p>	<p>Comments noted.</p> <p>A Phase 1 and Phase 2 Water Cycle Study have since been prepared and will be reflected in the policy as follows -</p> <p><u>'An integrated water supply and drainage strategy will be provided in advance of development to ensure the provision of adequate and appropriate infrastructure for water supply and waste water, both on and off site. Development will be occupied in line with this strategy.'</u></p> <p>These comments will inform the emerging draft Infrastructure Delivery Plan.</p>
<b>General consultation bodies</b>		

Respondent (with lpr ref)	Response	Council Response
BBOWT (lpr996)	<p>The Whitehart Meadow site appears to support a varied habitat mosaic and has potential to support a variety of protected species that have not been considered in the policy wording.</p> <p>BBOWT suggests the suitability of this site to support the proposed scale of development should be informed by an ecological assessment.</p>	<p>Comments noted.</p> <p>The site is within close proximity to a number of environmental receptors. An ecological assessment will be required as part of a planning application, together with appropriate mitigation, as follows:</p> <p><u>'An Ecological Impact Assessment (EclA) will be required. Appropriate avoidance and mitigation measures will need to be implemented, to ensure any designated sites and/or protected habitats and/or species are not adversely affected. Such a survey will cover the potential impacts from the direct loss of habitats in the footprint of the development and indirect impacts such as changes in the groundwater.'</u></p> <p>The development design should also aid in retaining habitat, including the buffer to the Sulham Brook and extensive amounts of landscaping and tree planting.</p>
Mid & West Berks Local Access Forum (lpr1876)	<p>MWBLAF notes that a public footpath runs through this site, but that the route of the 'footpath on the ground' does not appear from satellite photos to follow the line of the public right of way on the definitive map. This is not addressed in the policy.</p> <p>The Forum recommends that an additional statement is added to this policy, to address this public footpath:  <b><u>The public footpath should be retained as a distinct route for pedestrians, and not absorbed into the road network of this development.</u></b></p>	<p>Comments noted.</p> <p>The following criterion is proposed:</p> <p><u>'Main internal walking and cycle routes for the site will be provided and will be linked to existing routes including the Public Rights of Way network'.</u></p>
North Wessex Downs AONB (lpr1616)	<p>The existing site is overgrown scrub which has a negative impact on the setting of the AONB and Theale. An appropriately scaled and design development has the potential to enhance the local landscape. A strong landscape buffer on the NE edge would soften the edge of the M4 whilst providing a natural acoustic barrier to any new homes. The existing</p>	<p>Comments noted.</p> <p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessments (LCA)</p>

Respondent (with lpr ref)	Response	Council Response
	overhead lines (pylons) provides a natural break point for defining the developable area.	for a number of sites in the LPR. Whitehart Meadow is subject of a LCA. The LCA identifies a number of landscape receptors which could be affected by development on site. Development only across the north western part of the site could be accommodated without totally compromising the separate settlement identity of Theale from Calcot. This is subject to limiting the developable area to extend up to the pylons (to the east), and the watercourse (to the south), with the area beyond left for open space, and that development to be limited to two storeys in height. Landscaping features should be incorporated including buffer planting along the north eastern edge; development to be a lower density to allow significant tree planting; adequate buffer space to the watercourse, and to enhance the existing public right of way.
<b>Other stakeholders</b>		
Councillor Alan Macro (lpr761)	<p>This site is important to the setting of Theale and to its maintenance as a separate settlement. Any development on this site would erode Theale's separation from Calcot and Tilehurst, contrary to the requirement in policy SP1 that "the individual identities of the separate settlements within this [Eastern Spatial] area will be maintained".</p> <p>The site is bounded by the M4 motorway and thus subject to noise and air pollution. The latter is exacerbated in the morning peak because the M4 eastbound frequently slows to a crawl or standstill past this site. This worsens air pollution because:</p> <ul style="list-style-type: none"> <li>• The density of vehicles increases as they close up</li> <li>• Vehicle engines produce more pollution when idling or running slowly</li> <li>• The pollution does not disperse so widely because it is not dispersed by moving traffic.</li> </ul> <p>High voltage power lines run over the site. In addition to visual intrusion and danger of electrocution (e.g. from climbing ladders or scaffolding or from flying kites), scientific research shows that they generate ozone and nitrogen</p>	<p>Comments noted.</p> <p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessments (LCA) for a number of sites in the LPR. Whitehart Meadow is subject of a LCA.</p> <p>The LCA identifies a number of landscape receptors which could be affected by development on site. Development only across the north western part of the site could be accommodated without totally compromising the separate settlement identity of Theale from Calcot. This is subject to limiting the developable area to extend up to the pylons (to the east), and the watercourse (to the south), with the area beyond left for open space, and that development to be limited to two storeys in height. Landscaping features</p>

Respondent (with lpr ref)	Response	Council Response
	<p>oxide air pollution (increased by 13% and 30% over normal levels according to paper "Emissions of pollutants and air quality in the area of influence of high voltage overhead electrical lines" by Cociorva Danut, Mihaela Andreea Mitiu and Natalia Raischi:  <a href="https://www.researchgate.net/publication/319878124">https://www.researchgate.net/publication/319878124</a>  <u>Emissions of pollutants and air quality in the area of influence of high voltage overhead electrical lines</u>).</p> <p>This would add to the pollution caused by the M4.</p> <p>The site also suffers from groundwater flood risk and much of it is in flood zone 2. High groundwater levels also preclude infiltration as a SUDS solution.</p> <p>The site is the source of the Sulham Brook and the high peat content of its soil attenuates surface water run-off into the brook. Any development of the site would significantly reduce this attenuation and increase the flood risk downstream (the brook flooded part of Pangbourne in 2007).</p> <p>Traffic generated from the housing would contend with the traffic from the congested High Street at the Hoad Way Junction and with that on the busy A4, particularly in the morning peak. This would add to congestion in the High Street, at the Hoad Way/A4 roundabout and at M4 J12. It would also exacerbate traffic problems elsewhere in the highway network in Theale as described in the comments on the Non-strategic site allocations section.</p> <p>The use identified in the HELAA is "Employment uses (B2/B8)". Residential use is therefore contrary to policy SP1 of this plan which states that "allocations will be related to the role and function of settlements and the development opportunities <b>identified through the HELAA</b>".</p> <p>The reasons for removing this site from the Housing Site Allocations DPD are still valid:</p> <ul style="list-style-type: none"> <li>The site was assessed in the 2013 Strategic Housing Land Availability Assessment (site ref was THE002) as 'potentially developable'. The site was subsequently assessed in more detail during the preparation of the Housing Site Allocations Development Plan Document, whereby the site was not recommended for allocation due to the location of the site adjacent to the M4 (and resultant noise and air quality issues), and the location of a pylon in the centre of the site</li> </ul>	<p>should be incorporated including buffer planting along the north eastern edge; development to be a lower density to allow significant tree planting; adequate buffer space to the watercourse, and to enhance the existing public right of way.</p> <p>It is recognised that the site is in close proximity to the M4. Given the restraint on the location of housing, to the west of the pylons, the buffer, together with some landscaping, should soften the impact. As with the development at Dorking Way, which is closer to the road network, the policy will require a noise and air quality survey, with appropriate mitigation.</p> <p>The site has been the subject of a challenge to the Flood Zone designation (landowner led), where the Environment Agency has amended the area of flood risk. The developable area would not be within Flood Zone 2, and the policy includes a criterion that no development would be permitted in this area. A FRA and SuDS scheme would also need to accompany a planning application.</p> <p>The Environment Agency has specified that a 10m buffer is provided and maintained either side of the Sulham Brook, and this will form part of the policy criteria.</p> <p>The Highways Authority comment that the site should be accessed from the High Street, entailing the removal of the road block facilities. The Highways Authority also comment that in highway capacity terms there is support for the use of the High Street and the mini-roundabout at Hoads Way. There is a need for a Transport Assessment to model the junctions at the A4 and M4 to fully assess the capacity of the A4.</p> <p>The site has also been promoted for housing.</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>In addition, the Environment Agency strongly recommended that the site was not allocated due to majority of it being in Flood Zone 2. A sequential test would have been required to allocate the site in the Housing Site Allocations Development Plan Document. Other suitable sites with a lower risk of flooding were available in Theale and across the district, so the Council would have been unable to carry out the sequential test.</li> </ul> <p>Site RSA16 should be removed from the plan</p>	
Councillor Tony Vickers (lpr575)	<p>This site is important to the setting of Theale and to its maintenance as a separate settlement. Any development on this site would erode Theale's separation from Calcot and Tilehurst, contrary to policy.</p> <p>The site is bounded by the M4 motorway and thus subject to noise and air pollution. The latter is exacerbated in the morning peak because the M4 eastbound frequently slows to a crawl or standstill past this site. This worsens air pollution because:</p> <p>The density of vehicles increases as they close up  Vehicle engines produce more pollution when idling or running slowly  The pollution does not disperse so widely.</p> <p>High voltage power lines run over the site. In addition to visual intrusion and danger of electrocution (e.g. from climbing ladders or scaffolding or from flying kites), scientific research shows that they generate ozone and nitrogen oxide air pollution (increased by 13% and 30% over normal levels according to paper "Emissions of pollutants and air quality in the area of influence of high voltage overhead electrical lines" by Cociorva Danut, Mihaela Andreea Mitiu and Natalia Raischi <a href="https://www.researchgate.net/publication/319878124_Emissions_of_pollutants_and_air_quality_in_the_area_of_influence_of_high_voltage_overhead_electrical_lines">https://www.researchgate.net/publication/319878124_Emissions_of_pollutants_and_air_quality_in_the_area_of_influence_of_high_voltage_overhead_electrical_lines</a>). This would add to the pollution caused by the M4.</p> <p>The site also suffers from groundwater flood risk and much of it is in floodzone 2. Whitehart Meadow is subject of a LCA.</p> <p>The LCA identifies a number of landscape receptors which could be affected by development on site. Development only across the north western part of the site could be accommodated without totally compromising the separate settlement identity of Theale from Calcot. This is subject to limiting the developable area to extend up to the pylons (to the east), and the watercourse (to the south), with the area beyond left for open space, and that development to be limited to two storeys in height. Landscaping features should be incorporated including buffer planting along the north eastern edge; development to be a lower density to allow significant tree planting; adequate buffer space to the watercourse, and to enhance the existing public right of way.</p> <p>It is recognised that the site is in close proximity to the M4. Given the restraint on the location of housing, to the west</p>

Respondent (with lpr ref)	Response	Council Response
	<p>site would significantly reduce this attenuation and increase the flood risk downstream (the brook flooded part of Pangbourne in 2007). Traffic generated from the housing would contend with the traffic from the congested High Street at the Hoad Way Junction and with that on the busy A4, particularly in the morning peak. This would add to congestion in the High Street, at the Hoad Way/A4 roundabout and at M4 J12</p>	<p>of the pylons, the buffer, together with some landscaping, should soften the impact. As with the development at Dorking Way, which is closer to the road network, the policy will require a noise and air quality survey, with appropriate mitigation.</p> <p>The site has been the subject of a challenge to the Flood Zone designation (landowner led), where the Environment Agency has altered the area of flood risk. The developable area would not be within Flood Zone 2, and the policy includes a criterion that no development would be permitted in this area. A FRA and SuDS scheme would also need to accompany a planning application. The Environment Agency has specified that a 10m buffer is provided and maintained either side of the Sulham Brook, and this will form part of the policy criteria.</p> <p>The Highways Authority comment that the site should be accessed from the High Street, entailing the removal of the road block facilities. The Highways Authority also comment that in highway capacity terms there is support for the use of the High Street and the mini-roundabout at Hoads Way. There is a need for a Transport Assessment to model the junctions at the A4 and M4 to fully assess the capacity of the A4.</p>
Yvonne Thorngate (lpr36)	<p>I live in Rotherfield Close and the noise and pollution from the Motorway is horrendous. In fact I am in the process of moving because of this. I am sure the pollution must exceed the legal levels, and in the recent case of a child dying from the effects of breathing in vehicle fumes who lived along side the North Circular in London. I am appalled that you would expect families with young children to live so close to this busy Motorway. I therefore find it hard to believe you are proposing to allow homes to be build even nearer to the M4 than the home I am currently living in. The noise levels are so bad that at certain times of the day it is impossible to sit outside. As well as the Motorway these new properties will have high voltage electric pylons</p>	<p>Comments noted.</p> <p>It is recognised that the site is in close proximity to the M4. Given the restraint on the location of housing, to the west of the pylons, the buffer, together with some landscaping, should soften the impact. As with the development at Dorking Way, which is closer to the road network, the policy will require a noise and air quality survey, with appropriate mitigation.</p>

Respondent (with lpr ref)	Response	Council Response
	overhead. You may think I just don't want houses built near to my property, but this is not the case at all. The land which you are proposing to allow building on is an eyesore, but it is entirely unsuitable for homes for young families.	National Grid have advised the Council that there should be a buffer around the high voltage power lines. Guidance has been released which the developers will need to take into account, as per the criterion in the policy.
David Addis (lpr40)	100 homes on Whitehart Meadow - Again totally insufficient access and significantly increased traffic both on the High Street and into Woodfield Way.	Comments noted.  The Highways Authority comment that the site should be accessed from the High Street, entailing the removal of the road block facilities. The Highways Authority also comment that in highway capacity terms there is support for the use of the High Street and the mini-roundabout at Hoads Way. There is a need for a Transport Assessment to model the junctions at the A4 and M4 to fully assess the capacity of the A4.
Diane Spence (lpr1020)	<p>I wish to raise my objections to the following proposals for yet more development in Theale village. This is despite the fact that you have already given the OK to build 400+ homes on the western side of Theale. We do not want Theale to become a town like Thatcham – we want to remain a village.</p> <p><u>RSA16 100 homes on Whitehart Meadow</u></p> <p>My objections are:- flood risk, noise and pollution from M4, possible land contamination and the existence of pylons.</p> <p><u>General objections</u> to the above (including 70 homes at old Theale Sewage site) – do you ever take into account the pressure large development will cause to the already over subscribed Theale Medical Centre and the increased traffic. (We don't all ride bikes).</p> <p>Lastly, I know this view will not count, but can't we leave some field space for the deer to roam – we have already taken acres away from them and they were here first?</p>	<p>Comments noted.</p> <p>The Spatial Strategy for West Berkshire promotes development on three spatial areas: Newbury and Thatcham, Eastern Area and North Wessex Downs AONB. Theale is included in the Eastern Area and is a sustainable location, with good public transport links and active travel links. Theale, as a Rural Service Centre, is identified as a focus for additional housing through existing commitments and new allocations.</p> <p>It is important for the development (and taking into account the Sewage Treatment Works) to respect the character of the area, the gap between Theale and Calcot, and the setting of the AONB. Landscape work has been commissioned and has recommended development is focused to the west of the pylons, allowing open space and a landscaped buffer.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The developable area would not be within Flood Zone 2, and the policy includes a criterion that no development would be permitted in this area. A FRA and SuDS scheme would also need to accompany a planning application.</p> <p>It is recognised that the site is in close proximity to the M4. Given the restraint on the location of housing, to the west of the pylons, the buffer, together with some landscaping, should soften the impact. As with the development at Dorking Way, which is closer to the road network, the policy will require a noise and air quality survey, with appropriate mitigation.</p> <p>The policy requires the submission of a contamination report, identifying any mitigation should it be necessary.</p> <p>National Grid have advised the Council that there should be a buffer around the high voltage power lines. Guidance has been released which the developers will need to take into account, as per the criterion in the policy.</p> <p>In relation to infrastructure the development would generate CIL monies to be put towards the improvement of facilities. Legal agreements, to be prepared through the planning application, may also include mitigation for essential services.</p> <p>An ecological survey will need to be provided with a planning application, together with avoidance and mitigation measures. The development design should also aid in retaining habitat, including the buffer to the Sulham Brook and extensive amounts of landscaping and tree planting.</p>
Lisa Cox (lpr1245)	<u>RSA 16 &amp; 17</u>	Comments noted.

Respondent (with lpr ref)	Response	Council Response
	<p>WBC have already approved 425+ dwellings at the opposite end of the village with no regard for improvements to the infrastructure that cannot cope. The Primary School and Doctors Surgery are already at capacity, drainage and sewerage facilities need updating.</p> <p>There are a lack of community facilities such as a leisure centre (nearest one is not accessible by public transport routes and requires a car to access it) or community hub.</p> <p>I firmly believe WBC need to see and assess the effect the already approved dwellings have on the village and its infrastructure before designating further land to housing.</p> <p>This land could be used for the community facilities the village is desperately needing and WBC should give that consideration rather than its current proposal.</p> <p>RSA 16 &amp; 17 – consider this land for use to deliver community facilities</p>	<p>In relation to infrastructure the development would generate CIL monies to be put towards the improvement of facilities, and this could include sports facilities, as the development may not be large enough to justify the provision of a community hub or leisure centre. Legal agreements, to be prepared through the planning application, may also include mitigation for essential services.</p> <p>The Education Authority comment that mitigation may be needed to absorb the additional pupils, and avoid displacement of existing families.</p> <p>The Spatial Strategy for West Berkshire promotes development on three spatial areas: Newbury and Thatcham, Eastern Area and North Wessex Downs AONB. Theale is included in the Eastern Area and is a sustainable location, with good public transport links and active travel links. Theale, as a Rural Service Centre, is identified as a focus for additional housing through existing commitments and new allocations.</p>
Ami Painter (lpr1260)	<p>I would like to submit my objections to the Local Plan Review 2020 -2037 Emerging Draft December 2020 in relation to the sites Whitehart Meadow (RSA16), the Old Sewage Works (RSA17) and the open land situated near Junction 12 EMP6.</p> <p>The area of Theale on the opposite side of the A4 to Arlington should be kept to the existing residential areas and not be expanded for the above reasons. In addition to this, there are already office and commercial sites in both Arlington and the Station Road areas where buildings are sat empty with no companies taking up the leases. With the increase in home working and out of town warehouse sites, it would not be appropriate to impact the local environment and put stresses on the local highways by adding unnecessary commercial properties, where there are already redeveloped</p>	<p>Comments noted (relating only to Whitehart Meadow. The comments relating to Theale Sewage Treatment Works are considered under responses to RSA17, and for the employment site THE8 under SP21).</p> <p>It is important for the development (and taking into account the Sewage Treatment Works) to respect the character of the area, the gap between Theale and Calcot, and the setting of the AONB. Landscape work has been commissioned and has recommended development is focused to the west of the pylons, allowing open space and a landscaped buffer. The policy contains criteria which guide development and associated landscaping.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>sites across Theale that are not in use and have been sat empty for some time.</p> <p>The green spaces of Theale should be left as such before the village becomes an overdeveloped struggling area of West Berks that merges into Reading Borough Council, with facilities and resources that are not fit for purpose and drives existing residents away for the sake of building on land for financial gain and not considering the people, environmental and highway impacts it would have.</p>	<p>The Highways Authority comment that the site should be accessed from the High Street, entailing the removal of the road block facilities. The Highways Authority also comment that in highway capacity terms there is support for the use of the High Street and the mini-roundabout at Hoads Way. There is a need for a Transport Assessment to model the junctions at the A4 and M4 to fully assess the capacity of the A4. It is not envisaged that Blossom Lane would be used for Whitehart Meadow.</p>
Beth Pert (lpr1287)	<p>I would like to submit my objections to the Local Plan Review 2020 -2037 Emerging Draft December 2020 in relation to the sites Whitehart Meadow (RSA16), the Old Sewage Works (RSA17) and the open land situated near Junction 12 EMP6.</p> <p>The plan includes the following:</p> <p>100 homes on Whitehart Meadow (the area of land between the Woodfield Way estate and the M4)</p> <p>70 homes on the site of the old Theale sewage works (the far end of Blossom Lane).</p> <p>20,000 square metres of new office space on the field next to M4 Junction 12.</p> <p>I object to the draft for the following reasons (across all sites):</p> <ul style="list-style-type: none"> <li>• Flood risk</li> <li>• High voltage overhead power lines cross the site</li> <li>• Noise and pollution from the motorway</li> <li>• Possible land contamination</li> <li>• Need to preserve the gap between Theale and Calcot/Tilehurst</li> <li>• Impact on the Area of Outstanding Natural Beauty</li> <li>• Risk from fluvial, surface water and ground water flooding</li> <li>• Separated from the Arlington Business Park by the busy A4 Theale bypass</li> <li>• Impact on the Theale High Street Conservation Area</li> <li>• Impact on surrounding housing</li> </ul>	<p>Comments noted (relating only to Whitehart Meadow. The comments relating to Theale Sewage Treatment Works are considered under responses to RSA17, and for the employment site THE8 under SP21).</p> <p>The developable area would not be within Flood Zone 2, and the policy includes a criterion that no development would be permitted in this area. A FRA and SuDS scheme would also need to accompany a planning application.</p> <p>National Grid have advised the Council that there should be a buffer around the high voltage power lines. Guidance has been released which the developers will need to take into account, as per the criterion in the policy.</p> <p>It is recognised that the site is in close proximity to the M4. Given the restraint on the location of housing, to the west of the pylons, the buffer, together with some landscaping, should soften the impact. As with the development at Dorking Way, which is closer to the road network, the policy will require a noise and air quality survey, with appropriate mitigation.</p> <p>The policy requires the submission of a contamination report, identifying any mitigation should it be necessary.</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• Unsuitable access via single-track Blossom Lane and Crown Lane</li> <li>• The requirement for office space was based on a council commissioned study that was carried out before the covid 19 outbreak.</li> </ul> <p>As a resident of Theale, my objections are based on my experience of living in the village on and off for nearly 20 years.</p> <p>The basic infrastructure of the village cannot cope with a further 170 homes. The GP surgery is already stretched to breaking point and not able to provide a high standard of patient care for local residents. An extra 170 homes would see upwards of 350 patients. This would overwhelm the surgery completely. This is even more of an issue given that the residents of the homes currently under construction on Beansheaf side of the M4 will also be registering at Theale Medical centre when the properties are completed.</p> <p>The local primary school, which was built on land used for sports and recreation, is also near to capacity. Building more homes and bringing more families in to Theale will mean the school is no longer fit for purpose and will require further extension, taking up yet more valuable green land.</p> <p>Having lived in a flat with no useable outside space during the covid pandemic, it has become even more evident how important local green space is. Building on Whithart Meadow will take away precious green space that is local to residents. The impact on our local wildlife would be irreversible too.</p> <p>The access to both sites is problematic. Woodfield Way is already very busy and with parked cars on both sides of the road, the road is already noisy and at times can be dangerous. As new homes are regularly built without sufficient parking, more cars would be using local access roads as a car park, thus increasing the noise, traffic and antisocial problems associated with on street parking. Blossom Lane has similar issues with the added problem of being very narrow. Construction traffic would cause a great deal of disruption to local residents too.</p> <p>Building on sites which have a risk of flooding seems incredibly short sighted, especially at a time where a change in our climate indicates an increased amount of annual rainfall. By building on these sites, there may be an increased risk to existing homes as well as any new homes.</p>	<p>It is important for the development (and taking into account the Sewage Treatment Works) to respect the character of the area, the gap between Theale and Calcot, and the setting of the AONB. Landscape work has been commissioned and has recommended development is focused to the west of the pylons, allowing open space and a landscaped buffer. The policy contains criteria which guide development and associated landscaping. Open space provision, including the joining up of existing rights of way, are required in policy.</p> <p>The Conservation Officer does not raise an objection to the proposal's impact on the conservation area.</p> <p>The development will be visible from existing dwellings, though planning policies are in place in the Local Plan to protect amenity. Sufficient distances shall be maintained and good design will be required. It is important that the development integrates with existing development, rather than as a stand alone development.</p> <p>In relation to infrastructure the IDP sets out the infrastructure requirements.</p> <p>The Education Authority comment that mitigation may be needed to absorb the additional pupils, and avoid displacement of existing families.</p> <p>The Highways Authority comment that the site should be accessed from the High Street, entailing the removal of the road block facilities. The Highways Authority also comment that in highway capacity terms there is support for the use of the High Street and the mini-roundabout at Hoads Way. There is a need for a Transport Assessment</p>

Respondent (with lpr ref)	Response	Council Response
	<p>While I understand the need to more homes to ease the housing crisis, I feel better options are available. Commissioning further studies in to the regeneration of empty, dilapidated and part derelict office blocks and warehouses in to energy efficient homes would be more beneficial to the local community and saving our precious green space.</p>	<p>to model the junctions at the A4 and M4 to fully assess the capacity of the A4. It is not envisaged that Blossom Lane would be used for Whitehart Meadow.</p> <p>The Local Plan provides parking standards, depending on the number of bedrooms and location. The development should therefore cater for vehicles. The location is sustainable, with access to public transport and public rights of way, and thus there is a choice of movement.</p> <p>An ecological survey will need to be provided with a planning application, together with avoidance and mitigation measures. The development design should also aid in retaining habitat, including the buffer to the Sulham Brook and extensive amounts of landscaping and tree planting.</p> <p>The District is still in need of office and warehouse space, and permitted development rights exist to convert offices to dwellings. It is not considered that such evidence is necessary.</p>
Jayne Dowe (lpr2096)	<p>I would like to comment that I do not support the areas proposed for development (<i>in Theale</i>) for the following reasons:</p> <ul style="list-style-type: none"> <li>• The impact of additional traffic on the village. The proposed access route for Whitemeadow and the adjacent field is a major route used by pedestrians to access the footbridge over the motorway. Additional traffic will raise risks to pedestrians, particularly school children. The high street is narrow and already ill-equipped to deal traffic. The junction is already busy due to its proximity to the motorway, business parks and the A4.</li> <li>• Blossom Lane is a narrow quiet residential road, increased traffic would cause further risks and inconvenience.</li> <li>• The impact on the estates that will be adjacent to the development – Woodfield Way, Alderfield Close etc, leading to overcrowding,</li> </ul>	<p>Comments noted (relating only to Whitehart Meadow. The comments relating to Theale Sewage Treatment Works are considered under responses to RSA17, and for the employment site THE8 under SP21).</p> <p>The Highways Authority comment that the site should be accessed from the High Street, entailing the removal of the road block facilities. The Highways Authority also comment that in highway capacity terms there is support for the use of the High Street and the mini-roundabout at Hoads Way. There is a need for a Transport Assessment to model the junctions at the A4 and M4 to fully assess the capacity of the A4. It is not proposed to use Blossom Lane for access to Whitehart Meadow.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>impact on view, traffic through the local area. This will impact on the living standards of existing residents.</p> <ul style="list-style-type: none"> <li>• The development will reduce the protective barrier between existing homes and the motorway.</li> <li>• The negative impact on living standards in regards to the new developments being in extremely close proximity to the overhead power lines and the motorway, leading to poor air quality, noise pollution and poor living environment for potential 'new' residents.</li> <li>• The impact on services within Theale, which are already under strain, particularly at this time health services.</li> <li>• Reduction in the boundaries between Theale and Calcot.</li> <li>• All three locations are abundant with wildlife, whose habitat would be destroyed.</li> <li>• Much of the office space within Arlington business park is currently not in use, therefore it is unclear why further office space would be required. The visual impact of the structures will affect the outlook of the village on approach.</li> <li>• The continued development in these areas will continue to spoil the aesthetic of the village as a whole. There are already approved areas of significant housing development within Theale, if these additional areas are also approved the village will lose its character and become overcrowded, overrun by traffic and will have a significant negative impact on existing residents.</li> </ul>	<p>The development will be visible from existing dwellings, though planning policies are in place in the Local Plan to protect amenity. Sufficient distances shall be maintained and good design will be required. It is important that the development integrates with existing development, rather than as a stand alone development.</p> <p>It is recognised that the site is in close proximity to the M4. Given the restraint on the location of housing, to the west of the pylons, the buffer, together with some landscaping, should soften the impact. As with the development at Dorking Way, which is closer to the road network, the policy will require a noise and air quality survey, with appropriate mitigation.</p> <p>National Grid have advised the Council that there should be a buffer around the high voltage power lines. Guidance has been released which the developers will need to take into account, as per the criterion in the policy.</p> <p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessments (LCA) for a number of sites in the LPR. Whitehart Meadow is subject of a LCA. The LCA identifies a number of landscape receptors which could be affected by development on site. Development only across the north western part of the site could be accommodated without totally compromising the separate settlement identity of Theale from Calcot. This is subject to limiting the developable area to extend up to the pylons (to the east), and the watercourse (to the south), with the area beyond left for open space, and that development to be limited to two storeys in height. Landscaping features should be</p>

Respondent (with lpr ref)	Response	Council Response
		<p>incorporated including buffer planting along the north eastern edge; development to be a lower density to allow significant tree planting; adequate buffer space to the watercourse, and to enhance the existing public right of way.</p> <p>An ecological survey will need to be provided with a planning application, together with avoidance and mitigation measures. The development design should also aid in retaining habitat, including the buffer to the Sulham Brook and extensive amounts of landscaping and tree planting.</p> <p>The Spatial Strategy for West Berkshire promotes development on three spatial areas: Newbury and Thatcham, Eastern Area and North Wessex Downs AONB. Theale is included in the Eastern Area and is a sustainable location, with good public transport links and active travel links. Theale, as a Rural Service Centre, is identified as a focus for additional housing through existing commitments and new allocations.</p>
Harvey Fletcher (lpr1967)	<p>I object to RSA16, the proposed allocation for mixed-use development in Whitehart meadow for the following reasons:</p> <ul style="list-style-type: none"> <li>• Inadequate road access will put too much traffic through the small roundabout on Theale high street and cause excess noise pollution</li> <li>• The development will negatively affect the Theale High Street conservation area</li> <li>• I do not want to look out my window and see offices and houses, I would much rather see the open green space which is there now. The proposed site is right next to my residence.</li> <li>• There is no demand for office space in this area. Half of the current existing Arlington business park is vacant.</li> <li>• The noise levels from the motorway (M4) would make it uncomfortable for residents of the proposed housing.</li> </ul>	<p>Comments noted.</p> <p>The Highways Authority comment that the site should be accessed from the High Street, entailing the removal of the road block facilities. The Highways Authority also comment that in highway capacity terms there is support for the use of the High Street and the mini-roundabout at Hoads Way. There is a need for a Transport Assessment to model the junctions at the A4 and M4 to fully assess the capacity of the A4.</p> <p>The conservation officer has not objected to the proposal based on the impact on the conservation area.</p>

Respondent (with lpr ref)	Response	Council Response
	I do not want the proposed changes for RSA16 or RSA17 approved.	<p>The development will be visible from existing dwellings, though planning policies are in place in the Local Plan to protect amenity. Sufficient distances shall be maintained and good design will be required. It is important that the development integrates with existing development, rather than as a stand alone development.</p> <p>It is recognised that the site is in close proximity to the M4. Given the restraint on the location of housing, to the west of the pylons, the buffer, together with some landscaping, should soften the impact. As with the development at Dorking Way, which is closer to the road network, the policy will require a noise and air quality survey, with appropriate mitigation.</p> <p>The site would not accommodate any offices.</p>
Melanie Paul (lpr1372)	<p>[See also for other Theale sites, lpr 1371,1373] I am writing to provide feedback on West Berkshire's Local Plan Review 2020 -2037 Emerging Draft December 2020.</p> <ul style="list-style-type: none"> <li>- West Berkshire's own policy C1 outlines that the council are opposed to developing the countryside. Yet all the areas identified in the plans in and around Theale are part of a small area of countryside that we have left as you have persisted in your unrelenting drive to destroy the village.</li> <li>- Thea areas identified are home for wildlife of many types, including for example; Deer, Roebuck, Foxes, Owls and Pheasant. We can't keep blindly pushing animals out, this is selfish and only represents West Berkshire Council's support for human greed and the belief that humans own this world and every other being is irrelevant. This has to stop, animals need a habitat to live in too.</li> <li>- The well-being of the people that live in the village have had no consideration in the planning. Theale residents have had enough of West Berkshire Council's need to dump all the development at this end of the</li> </ul>	<p>Comments noted (relating only to Whitehart Meadow. The comments relating to Theale Sewage Treatment Works are considered under responses to RSA17, and for the employment site THE8 under SP21).</p> <p>The Spatial Strategy for West Berkshire promotes development on three spatial areas: Newbury and Thatcham, Eastern Area and North Wessex Downs AONB. Theale is included in the Eastern Area and is a sustainable location, with good public transport links and active travel links. Theale, as a Rural Service Centre, is identified as a focus for additional housing through existing commitments and new allocations.</p> <p>There are significant housing developments planned in Thatcham and Newbury. Due to the coverage of the Area of Outstanding Natural Beauty, areas of flood risk and the restriction of development around the Atomic Weapons Establishments there are limited locations for development</p>

Respondent (with lpr ref)	Response	Council Response
	<p>County. There is plenty of space to choose from at the Newbury end. Please stop your land grabbing in and around the area near the M4, it's impacting the wellbeing of the residents you are supposed to represent.</p> <ul style="list-style-type: none"> <li>- Covid-19 has demonstrated that packing people into closely built housing estates only fuels the spread. West Berkshire's cases have been lower because of the open areas. This needs to be considered for future as there is no doubt there will be more exposure to pandemics if we continue to ignore the need for green space and less compacted settlement areas.</li> <li>- The areas in question act as natural borders around Theale, protecting us from the noise of the M4 &amp; A4.</li> <li>- We don't need more commercial buildings, Arlington Business Park and the Arrowhead Road area has plenty of un-used space on the other otherside of the A4. By building on the Village side, you only increase traffic volumes in the village and cause more noise and air pollution.</li> <li>- The volume of traffic in Theale, and the area of Junction 12 of the M4 is already ridiculously heavy, your plans will only make this worse, and absolutely insufferable for residents that live here.</li> <li>- Previous applications to build on these sites have been declined for reasons already highlighted by residents etc. Nothing has changed in the views of the people that have objected previously. Why include the areas in your planning, we keep going around this loop, it's getting you no where.</li> <li>- West Berkshire Council should consider the bigger picture and not just pockets of land in isolation. With the planning being considered in and around Theale, we are looking at excessive business and residential traffic, the area cannot take it all, movement on the roads will stop.</li> <li>- We don't have the infrastructure and support services to accommodate any more housing and it's residents. We need better drainage, better roads and improved medical services. The new primary school is already full.</li> </ul>	<p>needed to meet housing targets. The Council are considering the 'overall picture' in seeking to place developments in locations which are accessible and have existing infrastructure.</p> <p>Development would include green space, which will be public, and still of benefit to existing residents.</p> <p>It is recognised that the site is in close proximity to the M4. Given the restraint on the location of housing, to the west of the pylons, the buffer, together with some landscaping, should soften the impact. As with the development at Dorking Way, which is closer to the road network, the policy will require a noise and air quality survey, with appropriate mitigation.</p> <p>An ecological survey will need to be provided with a planning application, together with avoidance and mitigation measures. There is a need for a Transport Assessment to model the junctions at the A4 and M4 to fully assess the capacity of the A4.</p> <p>In relation to infrastructure the development would generate CIL monies to be put towards the improvement of facilities. Legal agreements, to be prepared through the</p>

Respondent (with lpr ref)	Response	Council Response
	Please take my concerns and those from others, that I am sure you will receive, more seriously and stop this madness just to meet unreasonable government targets.	planning application, may also include mitigation for essential services. The Education Authority comment that mitigation may be needed to absorb the additional pupils, and avoid displacement of existing families.
Melanie Paul (lpr1373)	As per 1372 above (duplicate representation).	As above representation lpr1372.
Meg Randall (lpr1440)	<p>I am writing to oppose the recent plans made for housing and offices in whitehart meadow, Theale sewage works and the field next to the m4 junction 12. I believe it is of great importance to keep these few areas of wildlife we still maintain in Theale and for a village so quaint and with such character these unlikely areas contribute greatly to the feel of the village. In times like these we have learned how important nature is to a community such as the one in Theale. These areas are the only accessible walks within the village out of the way of houses and the only thing I believe can improve Theale would be more wildlife and walks! This has benefitted my mental health greatly as well as other people's and I strongly believe we need to maintain these natural and fascinating locations rather than expanding a village that has always thrived off of its old and quaint character.</p> <p>Thankyou for taking the time to read my email and I really hope you take this into consideration</p>	<p>Comments noted (relating only to Whitehart Meadow. The comments relating to Theale Sewage Treatment Works are considered under responses to RSA17, and for the employment site THE8 under SP21).</p> <p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessments (LCA) for a number of sites in the LPR. 		<p>would be permitted in this area. A FRA and SuDS scheme would also need to accompany a planning application.</p> <p>The settlement boundary would be drawn around the site.</p>
J Painter (lpr2014)	<p><i>(Response to RSA16, RSA17, EMP6. Included text relevant to RSA16)</i> I am objecting to the Local Plan Review 2020 -2037 Emerging Draft December 2020 in relation to the sites Whitehart Meadow (RSA16), the Old Sewage Works (RSA17) and land situated near Junction 12 EMP6.</p> <p>I am a resident of Theale of over 20 years and have seen the impact that several developments over this time has had on the infrastructure of the village.</p> <p>Theale Medical Centre struggles to provide adequate facilities for the 10,000+ patients it has over the Theale and Calcot areas. With the proposed 170 properties to be built in the Surgery's geography, the impact on the current patient levels and care provided will be detrimental. This would be in addition to the already growing numbers of patients given the development site that is currently being built opposite the Sainsbury's retail site near Junction 12 in Calcot, who will also be served by Theale Medical Centre.</p> <p>Theale Primary School also had to be redeveloped onto a new site on North Street playing fields, which meant local footballs teams and the community lost open space to play on and use for recreational purposes. The impact of 170 new homes would mean more residents would not have enough space for recreational use, as well as new families moving into the village putting pressure onto the primary school, which is becoming quickly overwhelmed with the number of pupils it already has.</p> <p>The local highways in Theale would also not be able to cope with the increase in traffic across all sites. As a resident of Woodfield Way, there have been numerous times where the access to this part of Theale has been blocked due to traffic issues along the A4 and M4. The High Street is often used as a cut through when the bypass is at a standstill and this means local residents are either trapped in the village unable to leave, or unable to</p>	<p>Comments noted (relating only to Whitehart Meadow. The comments relating to Theale Sewage Treatment Works are considered under responses to RSA17, and for the employment site THE8 under SP21).</p> <p>In relation to infrastructure the IDP sets out infrastructure requirement</p> <p>The Education Authority comment that mitigation may be needed to absorb the additional pupils, and avoid displacement of existing families.</p> <p>The Highways Authority comment that the site should be accessed from the High Street, entailing the removal of the road block facilities. The Highways Authority also comment that in highway capacity terms there is support for the use of the High Street and the mini-roundabout at Hoads Way. This is subject to limiting the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>access their homes due to the volume of traffic. As there is only 1 access point for the Woodfield Way area of Theale, increasing pressure on this site with the addition of 100 home and 20,000 sqft of commercial property will cause not only disruption to those who live in these areas, but will also increase the impact on the environment with more vehicles and the pollution it will cause.</p> <p>The increase in numbers of vehicles will also cause issues given the current problems experienced with restrictions in access around the Woodfield Way/High Street area. Commercial units at the top of Woodfield Way park their vehicles outside of their units, and residents who have multiple vehicles use the roads to park their cars/vans which narrows the road access. There is constantly a risk that emergency services would not be able to get to the properties furthest down Woodfield Way due to the current number of vehicles that use the roads as a car park. Adding 100 homes, with the same number if not more cars/vans etc. would be more than the local highways would be able to cope with.</p> <p>Now more than ever the open green land of Theale should be left as such, as it allows the community the ability to take exercise without travelling which is key given the current pandemic. To lose this land would also impact on the natural habitats of the wildlife living there, which will displace many animals. Trees have already been cut in the Whitehart Meadow site, and this has caused an increase in light and noise pollution from Junction 12, IKEA and its car park along with the overnight roadwork noises from the smart motorway works. Placing 100 properties on this land would be detrimental to those who live next to and opposite the site due to the disruption the development would cause on both the residents and highways, along with it being built on a site of flood risk and uncomfortably close to the overhead power lines/pylons situated in the land.</p> <p>Lastly, with building on the proposed sites, the gap between Theale and Calcot/Tilehurst will significantly decrease. Theale is already situated in a difficult location where emergency services are pulled from opposite towns to the furthest reach of their geography to attend to us. Both Reading and Newbury Police and Ambulance crews find it difficult to attend as we are</p>	<p>developable area to extend up to the pylons (to the east), and the watercourse (to the south), with the area beyond left for open space, and that development to be limited to two storeys in height. Landscaping features should be incorporated including buffer planting along the north eastern edge; development to be a lower density to allow significant tree planting; adequate buffer space to the watercourse, and to enhance the existing public right of way.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>approx. 10 - 15 miles from each local station for crews to be sent. By adding more residential and commercial sites to Theale this will add increasing pressure to services such as blue lights which is already stretched given our location and the current pandemic situation.</p> <p>For the above reasons, in addition to a site already marked for development along The Green near the Tidmarsh/A4 end of Theale, I object to the local plan review 2020 - 2037 covering sites Whitehart Meadow, The Old Sewage Works and the open land besides the A4 and M4 opposite Whitehart Meadow.</p> <p>I hope this objection will be well considered along with the areas of Theale that are already over developed and struggling to cope with the current population of the village.</p>	
<b>Landowners, site promoters and developers</b>		
Bell Cornwell LLP for Central Corporation Projects Ltd (lpr2297)	<p>We support the proposed allocation of White Hart Meadow for residential development.</p> <p>This is a positive approach by the Council which reflects the highly sustainable location of the site. We have included an indicative masterplan as part of these representations which shows how the site can be delivered. Whilst the site is allocated in policy RSA 16 for 'approximately' 100 dwellings, we seek flexibility with regard to the final numbers for the site to ensure that an effective use of land is achieved, at an appropriate density for the site and the surroundings. The final number is proposed to be informed by the technical work for the site.</p> <p>The site has the benefit of being able to provide a high level of green infrastructure to provide a buffer to separate the developable area from the highways network and to ensure the separate identity of Theale is maintained.</p> <p>We would be pleased to work with the Council to confirm a detailed policy to guide the development of the site, based on the technical information that we have prepared.</p> <p>We confirm that White Hart Meadow can be confirmed as a deliverable site and is being actively promoted by a willing developer who is committed to bringing the site forward.</p>	<p>Comments noted.</p> <p>The Local Plan is landscape-led. Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessments (LCA) for a number of sites in the LPR. Whitehart Meadow is subject of a LCA. The LCA identifies a number of landscape receptors which could be affected by development on site. Development only across the north western part of the site could be accommodated without totally compromising the separate settlement identity of Theale from Calcot. This is subject to limiting the developable area to extend up to the pylons (to the east), and the watercourse (to the south), with the area beyond left for open space, and that development to be limited to two storeys in height. Landscaping features should be incorporated including buffer planting along the north eastern edge; development to be a lower density to allow significant tree planting; adequate buffer space to the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Whilst the site is allocated in policy RSA 16 for ‘approximately’ 100 dwellings, we seek flexibility with regard to the final numbers for the site to ensure that an effective use of land is achieved, at an appropriate density for the site and the surroundings. The final number is proposed to be informed by the technical work for the site.</p>	<p>watercourse, and to enhance the existing public right of way.</p> <p>The landscape assessment reduces the developable area, and taking the area of flood risk into account this reduces the potential number of houses to approximately 40.</p>
<p>Pegasus Planning Group Ltd for Calcot Park Golf Club (lpr2330)</p>	<p>(Full representation under SP14) It is considered that some of these sites are not ideally suited or justified and they should be removed from the list. In particular, the following:</p> <ol style="list-style-type: none"> <li>1. RSA 16 – Whitehart Meadow, Theale (Site Ref THE1)</li> <li>2. RSA 17 – Former Theale Sewage Treatment Works, Theale (Site Ref THE7)</li> </ol> <p>All of these sites are small and currently in use as open fields. Although they each adjoin the edge of a settlement, they offer very limited opportunities for landscaping, as well as biodiversity and geodiversity net gain. The plans in the local plan show they have issues with flooding, motorway noise or they are 95% covered in new development with a narrow “landscaped buffer” on the site edges. These sites are less suitable for allocation and they are poor choices for new housing to help meet the local need in the next few years than that proposed at Calcot Park Golf Club (CPGC).</p> <p>This policy states that this site should be allocated in the local plan for approximately 100 dwellings. The plan shows only a red line around the site. No “landscape buffers” are indicated on the boundaries of the site. Without any details on the plan, it must be assumed that these boundary treatments will be narrow and/or weak in their likely effectiveness. Such unsubstantial boundary treatments will not provide the 10% bio and geodiversity net gain required by policy SP11. Also, they will not provide the level of landscape and visual impact mitigation that is required by policy SP10. Boundary screening will be especially important in this location, which is low-lying land to the north of Theale and will therefore be visible in several long-distance views. In addition, the area is known to be very low-lying and liable to flooding, given proximity to the Sulham Brook, as well as being close to the M4, which will create problems of noise and air quality.</p>	<p>Comments noted.</p> <p>The Local Plan is landscape-led. Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessments (LCA) for a number of sites in the LPR. Whitehart Meadow is subject of a LCA. The LCA identifies a number of landscape receptors which could be affected by development on site. Development only across the north western part of the site could be accommodated without totally compromising the separate settlement identity of Theale from Calcot. This is subject to limiting the developable area to extend up to the pylons (to the east), and the watercourse (to the south), with the area beyond left for open space, and that development to be limited to two storeys in height. Landscaping features should be incorporated including buffer planting along the north eastern edge; development to be a lower density to allow significant tree planting; adequate buffer space to the watercourse, and to enhance the existing public right of way.</p> <p>The landscape assessment reduces the developable area, and taking the area of flood risk into account this reduces the potential number of houses to approximately 40.</p> <p>The Spatial Strategy for West Berkshire promotes development on three spatial areas: Newbury and</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The site, which has been previously refused by the Council in 2017 on grounds of being located within the countryside and flood risk, ref: 16/03613/OUTMAJ, provided a landscape strategy, but it is considered that in the form as previously submitted the scheme would not effectively overcome issues relating to proximity to the M4 nor would it adequately mitigate flooding and drainage concerns.</p> <p><i>Policy RSA 16 – Whitehart Meadow, Theale (Site Ref: THE 1) should be removed from the local plan, because the site is not suitable for residential development.</i></p>	<p>Thatcham, Eastern Area and North Wessex Downs AONB. Theale is included in the Eastern Area and is a sustainable location, with good public transport links and active travel links. Theale, as a Rural Service Centre, is identified as a focus for additional housing through existing commitments and new allocations.</p> <p>The draft policy for the site allocation did not include detail on policy criteria or mapping. This will be done for the submission version of the plan. Landscaping is an important part of the development, particularly given the setting of the AONB and in recognition of the gap between Theale and Calcot. The recommendations of the LCA are to be built in to the policy criteria. Criteria would also deal with flood risk and noise and air quality.</p> <p>Since the refusal of the planning application there has been a successful challenge to remove some of the land out of Flood Zone 2. The flood maps have since been updated.</p>

<b>Statutory consultees</b>		
Theale Parish Council (lpr1104)	<p><b>Theale’s character</b> Theale is a historic village with its own rural identity. Its location entails strong rail and road links, making it an excellent location for businesses. However, this presents a risk to the village’s character and makes it vital to keep the two areas separate. The allocated and proposed sites for development listed below bely this.</p> <p><b>Proposed residential developments at Whitehart Meadow (RSA 16) and the former sewage works (RSA 17)</b> The proposed sites for development at Whitehart Meadow and the former sewage works present similar issues. Both sites suffer from inadequate access. The latter would require the use of Blossom Avenue. This road is inadequate for heavy construction vehicles and the ensuing increase in car traffic. Both developments would result in a significant loss of green space between the village and the M4. This green barrier helps to retain the village’s rural character. It is also an unnecessary change to the existing settlement</p>	<p>Comments noted.</p> <p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessments (LCA) for a number of sites in the LPR. The Sewage Treatment Works is subject of a LCA. The LCA identifies a number of landscape receptors which could be affected by development on site. It is recommended to limit the developable area, and to retain landscaped buffer areas to retain the immediate planted landscape setting. The development should be designed as a positive extension to the settlement pattern of Theale, by providing an attractive façade to the public open space to the south. Tree planting will be needed to break up the development form. Such buffer planting and</p>

Respondent (with lpr ref)	Response	Council Response
	<p>boundary. Both sites also sit on a flood plain. Any development would remove necessary ground drainage and increase the risk of flooding.</p> <p><b>Theale's infrastructure</b></p> <p>The proposed developments present a substantial increase in Theale's population. Following the approval of the Lakeside development of over 300 houses—already a large increase—the village needs an adjustment period to recognise deficiencies in the existing infrastructure. The following facilities would need addressing urgently:</p> <ul style="list-style-type: none"> <li>• the medical centre would need to expand</li> <li>• sewage and drainage would need upgrading</li> <li>• the new primary school was built to accommodate the existing number of pupils attending—this would need to expand and</li> <li>• there would need to be a community hub or leisure centre—something which is currently lacking.</li> </ul> <p><b>Conclusion</b></p> <p>Taken in their totality, the additional sites for development identified in the draft Local Plan represent an unacceptable increase to the size of Theale. The parish council strongly encourages a period of adjustment following the already approved large-scale developments, otherwise it is concerned how the existing infrastructure will be able to cope.</p>	<p>design parameters (such as two storey dwellings) should aid in maintaining the wooded view from the AONB, as well as screening the M4.</p> <p>The landscape assessment has considered the cumulative impact of the developments at the Sewage Treatment Works and Whitehart Meadow. Development of both sites could integrate well into the existing settlement form and pattern of Theale, with green infrastructure improvements.</p> <p>The Highways Authority identify that improvements would be required to Blossom Lane to allow appropriate access, and would be deemed suitable in principle. The Highways Authority comment that the impact of the trips from the development to Blossom Lane and Crown Lane would not find an objection. A transport assessment would be required to assess the impact on Blossom Lane leading into Theale. Such investigation and mitigation would be set out in the policy. Further work was undertaken as part of the planning application 16/02850/OUTMAJ where access issues were overcome.</p> <p>The developable area would not be within Flood Zone 2, and the policy includes a criterion that no development would be permitted in this area. A FRA and SuDS scheme would also need to accompany a planning application.</p> <p>In relation to infrastructure the development may not be large enough to justify the provision of a community hub or leisure centre. Infrastructure requirements are set out in the IDP.</p> <p>The Education Authority comment that mitigation may be needed to absorb the additional pupils, and avoid displacement of existing families.</p>

Respondent (with lpr ref)	Response	Council Response
		Thames Water comment that the water network capacity will need to be improved, and request a detailed water supply strategy informing what infrastructure is required, where, when and method of delivery. Implementation of the strategy would be secured through the planning permission.
Englefield Parish Council (lpr724)	Englefield Parish Council objects to the proposed allocation under Policy RSA 17 of the Former Theale Sewage Treatment Works, Theale (Site Ref THE7) for residential development comprising approximately 70 dwellings. Having objected to an application on this site in 2016 our concerns remain unchanged. The access to this site via Blossom Lane and Crown Lane is wholly inadequate for carrying the volume of traffic concerned. The roads are too narrow and pass through quiet residential areas. If permitted, there will be unacceptable harm to local residents which will outweigh the benefit of new homes in this location. We are also concerned about the residential development being so close to the motorway given issues of noise and air quality.	<p>Comments noted.</p> <p>The Highways Authority identify that improvements would be required to Blossom Lane to allow appropriate access, and would be deemed suitable in principle. The Highways Authority comment that the impact of the trips from the development to Blossom Lane and Crown Lane would not find an objection. A transport assessment would be required to assess the impact on Blossom Lane leading into Theale. Such investigation and mitigation would be set out in the policy. Further work was undertaken as part of the planning application 16/02850/OUTMAJ where access issues were overcome.</p> <p>It is recognised that the site is in close proximity to the M4. Given the restraint on the location of housing, to the west of the pylons, the buffer, together with some landscaping, should soften the impact. As with the development at Dorking Way, which is closer to the road network, the policy will require a noise and air quality survey, with appropriate mitigation.</p>
Environment Agency (lpr1669)	This site is a short distance downstream of Whitehart Meadow (RSA 16), but for this site the Sulham Brook forms the eastern boundary and an ordinary watercourse flows through the site. There are also springs arising from the chalk and therefore this is also part of the headwaters of the Sulham Brook. Therefore all of our concerns and requirements as described for RSA 16 are the same for RSA 17.	<p>Comments noted.</p> <p>The policy will require a minimum 10m wide undeveloped buffer zone on both sides of the Sulham Brook.</p>

Respondent (with lpr ref)	Response	Council Response
		The policy will also include a criterion requesting an ecological assessment, to include an investigation of direct and indirect changes to habitats.
Natural England (lpr1606)	<p>This site represents the most sensitive site for development to the East of Theale. The gap between the M4 and Theale town gets wider here and it has a very different, much more rural feel to EMP6 and RSA16.</p> <p>Development in this location would be an oddly-shaped expansion out of the existing townscape and beyond into the countryside, and would significantly alter the rural character. The triangle of non-AONB land North of Theale (between the major roads) still represents the setting of the North Wessex Downs AONB. Edging out of existing Theale into this countryside with a disconnected development could contribute to a presumption of more development in this area. The cumulative effect of this would be of significant detriment to the surrounding AONB. This allocation is one that Natural England have the most concerns with in the whole Local Plan. We would advise it is removed as a site allocation.</p>	<p>Comments noted.</p> <p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessments (LCA) for a number of sites in the LPR. The Sewage Treatment Works is subject of a LCA. The LCA identifies a number of landscape receptors which could be affected by development on site.</p> <p>It is recommended to limit the developable area, and to retain landscaped buffer areas to retain the immediate planted landscape setting. The development should be designed as a positive extension to the settlement pattern of Theale, by providing an attractive façade to the public open space to the south. Tree planting will be needed to break up the development form. Such buffer planting and design parameters (such as two storey dwellings) should aid in maintaining the wooded view from the AONB, as well as screening the M4.</p> <p>The landscape assessment has considered the cumulative impact of the developments at the Sewage Treatment Works and Whitehart Meadow. Development of both sites could integrate well into the existing settlement form and pattern of Theale, with green infrastructure improvements.</p>
Thames Water Utilities Ltd (lpr1762)	The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at	<p>Comments noted.</p> <p>A Phase 1 and Phase 2 Water Cycle Study have since been prepared and will be reflected in the policy as follows -</p>

Respondent (with lpr ref)	Response	Council Response
	<p>the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website <a href="https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development">https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development</a>.</p> <p>The wastewater network capacity in this area may be unable to support the demand anticipated from this development. Local upgrades to the existing drainage infrastructure may be required to ensure sufficient capacity is brought forward ahead of the development. Where there is a potential wastewater network capacity constraint, the developer should liaise with Thames Water to determine whether a detailed drainage strategy informing what infrastructure is required, where, when and how it will be delivered is required. The detailed drainage strategy should be submitted with the planning application</p>	<p>'An integrated water supply and drainage strategy will be provided in advance of development to ensure the provision of adequate and appropriate infrastructure for water supply and waste water, both on and off site. Development will be occupied in line with this strategy.'</p> <p>These comments will inform the emerging draft Infrastructure Delivery Plan.</p>
<b>General consultation bodies</b>		
BBOWT (lpr998)	<p>The former Theale Sewage Treatment Works site appears to support a varied habitat mosaic and has potential to support a variety of protected species that have not been considered in the policy wording.</p> <p>BBOWT suggests the suitability of this site to support the proposed scale of development should be informed by an ecological assessment.</p>	<p>Comments noted.</p> <p>The site is within close proximity to a number of environmental receptors. An ecological assessment will be required as part of a planning application, together with appropriate mitigation, as follows:</p> <p><u>'An Ecological Impact Assessment (EclA) will be required. Appropriate avoidance and mitigation measures will need to be implemented, to ensure any designated sites and/or protected habitats and/or species are not adversely affected. Such a survey will cover the potential impacts from the direct loss of habitats in the footprint of the development and indirect impacts such as changes in the groundwater.'</u></p>

Respondent (with lpr ref)	Response	Council Response
		The development design should also aid in retaining habitat, including the buffer to the Sulham Brook and landscaping and tree planting.
North Wessex Downs AONB (lpr1617)	<p>The site is set out on a limb away from the settlement edge. It has a strong rural character that is detached from the urban character of Theale. The character of THE7 is significantly different to that of THE1. Development in this location would be at odds with the open countryside to the north and townscape to the south which would significantly alter the rural character of this part of Blossom Lane. The site forms an important gap within the setting of the AONB.</p> <p>The site should not be titled as former sewage treatment works as that suggests a brownfield site which is far from the case. All that remains of the sewage works are concrete foundations which occupy a tiny area of the site. The site adjoins THE1, it would have been logical to merge the 2 as one allocation which suggests the LPA are not overly confident or comfortable in including THE7 as an allocation and have therefore kept them separate which would make it easier to remove from the plan at a future stage.</p> <p>That policy RSA 17 and site THE7 be removed from the plan.</p>	<p>Comments noted.</p> <p>Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessments (LCA) for a number of sites in the LPR. The Sewage Treatment Works is subject of a LCA. The LCA identifies a number of landscape receptors which could be affected by development on site.</p> <p>It is recommended to limit the developable area, and to retain landscaped buffer areas to retain the immediate planted landscape setting. The development should be designed as a positive extension to the settlement pattern of Theale, by providing an attractive façade to the public open space to the south. Tree planting will be needed to break up the development form. Such buffer planting and design parameters (such as two storey dwellings) should aid in maintaining the wooded view from the AONB, as well as screening the M4.</p> <p>The landscape assessment has considered the cumulative impact of the developments at the Sewage Treatment Works and Whitehart Meadow. Development of both sites could integrate well into the existing settlement form and pattern of Theale, with green infrastructure improvements.</p>
<b>Other stakeholders</b>		
Councillor Alan Macro (lpr762)	The site is severely contaminated from its history as a sewage works (until the mid-1980s) and as a depot for the old Bradfield Rural District Council.	Comments noted.

Respondent (with lpr ref)	Response	Council Response
	<p>The cost of de-contamination would make the provision of affordable housing on the site unviable, and perhaps make development of the site unviable.</p> <p>The site is close to the M4 motorway and thus subject to noise and air pollution. The latter is exacerbated in the morning peak because the M4 eastbound frequently slows to a crawl or standstill past this site. This worsens air pollution because:</p> <ul style="list-style-type: none"> <li>• The density of vehicles increases as they close up</li> <li>• Vehicle engines produce more pollution when idling or running slowly</li> <li>• The pollution does not disperse so widely.</li> </ul> <p>High voltage power lines run over the site. In addition to visual intrusion and danger of electrocution (e.g. from climbing ladders or scaffolding or from flying kites), scientific research shows that they generate ozone and nitrogen oxide air pollution (increased by 13% and 30% over normal levels according to paper "Emissions of pollutants and air quality in the area of influence of high voltage overhead electrical lines" by Cociorva Danut, Mihaela Andreea Mitiu and Natalia Raischi:  <a href="https://www.researchgate.net/publication/319878124_Emissions_of_pollutants_and_air_quality_in_the_area_of_influence_of_high_voltage_overhead_electrical_lines">https://www.researchgate.net/publication/319878124_Emissions_of_pollutants_and_air_quality_in_the_area_of_influence_of_high_voltage_overhead_electrical_lines</a>).</p> <p>This would add to the pollution caused by the M4.</p> <p>A large proportion of the site is in floodzone 2. The site also has a risk from surface water and groundwater flooding (please see section in the HELAA). This significantly reduces the extent of deliverable land and the latter makes SUDS problematic.</p> <p>The access to the site would be from the single-track end of Blossom Lane. Blossom Lane is very narrow in places and also has narrow footways. The footway on its southern side (that most likely to be used by pedestrians from the site) is not continuous, meaning that pedestrians would either have to walk in the road or cross it twice giving road safety concerns.</p> <p>The majority of pedestrians walking to the western end of Theale High would walk along Blossom Lane and Crown Lane. Crown Lane's footways are extremely narrow, only 60cm in places, meaning that pedestrians would have to step off footways to pass each other. There is no footway at all on</p>	<p>Environmental Health officers note that there is a high risk of contamination at the site. This does not necessarily rule out development, and investigation, plus any remediation and possible future monitoring may be required. This is usually a planning condition with a planning permission, and was recommended for planning application 16/02850/OUTMAJ. The policy requires the submission of a contamination report, identifying any mitigation and remediation. The planning application 16/02850/OUTMAJ did not raise any viability issues in respect of contamination, as reports submitted with the application did not preclude development.</p> <p>It is recognised that the site is in close proximity to the M4. Given the restraint on the location of housing, to the west of the pylons, the buffer, together with some landscaping, should soften the impact. As with the development at Dorking Way, which is closer to the road network, the policy will require a noise and air quality survey, with appropriate mitigation.</p> <p>The developable area would not be within Flood Zone 2, and the policy includes a criterion that no development would be permitted in this area. A FRA and SuDS scheme would also need to accompany a planning application.</p> <p>The Highways Authority identify that improvements would be required to Blossom Lane to allow appropriate access, and would be deemed suitable in principle. The Highways Authority comment that the impact of the trips from the development to Blossom Lane and Crown Lane would not find an objection. A transport assessment would be required to assess the impact on Blossom Lane leading into Theale. Such investigation and mitigation would be set out in the policy. Further work was undertaken as part</p>

Respondent (with lpr ref)	Response	Council Response
	<p>the west side of Crown Lane at its southern end. The combination of increased pedestrian traffic and narrow and missing footways means increased numbers walking in, and crossing, the road. This, in combination with increased vehicle movements caused by the development would pose road safety dangers.</p> <p>The majority of traffic accessing the site would use Crown Lane*. It would impose another 48 to 52 movements in the am peak and 40 to 48 in the pm peak**. This would have the following problems:</p> <ul style="list-style-type: none"> <li>• The lane is effectively sing-track because its eastern side is a parking bay reserved for residents. Opposing vehicles could cause gridlock.</li> <li>• Contention with traffic on the convoluted junction with the High Street would increase tailbacks on Crown Lane.</li> <li>• It would add to congestion on the High Street and at the Station Road min roundabout.</li> </ul> <p>12 to 16 vehicles accessing the site would use the Play Platt/Englefield Road junction in both peaks*. This would exacerbate the existing delays of 40 seconds in the am peak at this junction.</p> <p>It would also exacerbate traffic problems elsewhere in the highway network in Theale as described in the comments on the Non-strategic site allocations section.</p> <p>The reasons that the site was not allocated in the Housing Site Allocations DPD are still valid:</p> <ul style="list-style-type: none"> <li>• When the preferred options version of the Housing Site Allocations Development Plan Document was consulted upon, significant concern was raised regarding access to the site, with limited scope for improvements to be made without acquiring third party land.</li> <li>• Further technical work was carried out following preferred options, in particular landscape assessment work indicated that the site would be suitable for development subject to various mitigation measures, including a buffer to separate the site from the existing village. As a result, the site was not considered to be well related to the existing settlement and could result in a negative impact in terms of impact on the character of the built environment.</li> </ul> <p>At the submission stage, the site was not recommended for allocation.</p>	<p>of the planning application 16/02850/OUTMAJ where access issues were overcome.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>* Traffic movement information from the traffic assessment in the planning statement for application 16/02850/OUTMAJ, 88 homes at Former Sewage Treatment Works Theale, adjusted for 70 homes Site RSA17 should be removed from the plan</p>	
Councillor Tony Vickers (lpr576)	<p>The site is severely contaminated from its history as a sewage works (until the mid1980s) and as a depot for the old Bradfield Rural District Council. The cost of de-contamination would make the provision of affordable housing on the site unviable.</p> <p>The access to the site would be from the single-track end of Blossom Lane. Respondent (with lpr ref)	Response	Council Response
	<p>permanently blocked in, with no available access for police, emergency and service vehicles.</p> <p>5. Due to the narrow and uneven pavements, Blossom Lane and Crown Lane roadways are shared with the following vulnerable groups: walkers (especially dog walkers), cyclists, horse riders, carriage drivers, people pushing golf trolleys, prams, pushchairs and people using mobility frames and mobility scooters. Increased traffic from a potential 140 more cars would obstruct their access and egress and represent a major threat to their personal safety.</p> <p>No development of the old sewage works at Blossom Lane.</p>	<p>Authority comment that the impact of the trips from the development to Blossom Lane and Crown Lane would not find an objection. A transport assessment would be required to assess the impact on Blossom Lane leading into Theale. Such investigation and mitigation would be set out in the policy. Further work was undertaken as part of the planning application 16/02850/OUTMAJ where access issues were overcome.</p>
David Addis (lpr23)	<p>70 homes are proposed on the site of the old Theale sewage works. This would be accessed off Blossom Lane.</p> <p>The access from Blossom Lane and indeed to there off Englefield Road is totally insufficient, especially considering the existing traffic to and from the primary school.</p>	<p>Comments noted.</p> <p>The Highways Authority identify that improvements would be required to Blossom Lane to allow appropriate access, and would be deemed suitable in principle. The Highways Authority comment that the impact of the trips from the development to Blossom Lane and Crown Lane would not find an objection. A transport assessment would be required to assess the impact on Blossom Lane leading into Theale. Such investigation and mitigation would be set out in the policy. Further work was undertaken as part of the planning application 16/02850/OUTMAJ where access issues were overcome.</p>
Elaine Morrall (lpr89)	<p>The development of this site would require access along Crown Lane and Blossom Lane. These roads are already congested with residents parking and in effect are single track roads. They would not be able to support the increase in traffic to support 70 dwellings, let alone the construction traffic. The pavements along these roads are narrow and in some places non-existent meaning that pedestrians are often walking in the road. There is also an offshoot of Crown Lane. Where this joins the main section of Crown Lane vision is already restricted by the limited splays which are not in line with current guidelines and can't be increased due to the lack of residents parking. An increase in traffic would make it more dangerous for traffic</p>	<p>Comments noted.</p> <p>The Highways Authority identify that improvements would be required to Blossom Lane to allow appropriate access, and would be deemed suitable in principle. The Highways Authority comment that the impact of the trips from the development to Blossom Lane and Crown Lane would not find an objection. A transport assessment would be required to assess the impact on Blossom Lane leading into Theale. Such investigation and mitigation would be</p>

Respondent (with lpr ref)	Response	Council Response
	<p>exiting this minor road. The traffic from the road is also likely to increase given the recent planning permission for flats for 19/19a High Street.</p> <p>If the former sewage works site is to be developed alternative access needs to be sought through Whitehart Meadow</p>	<p>set out in the policy. Further work was undertaken as part of the planning application 16/02850/OUTMAJ where access issues were overcome.</p>
Ollie Aylett (lpr364)	<p>Repeat of lpr2 + 6. It is a flood risk.</p>	<p>See also response to LPR2 above.</p> <p>The developable area would not be within Flood Zone 2, and the policy includes a criterion that no development would be permitted in this area. A FRA and SuDS scheme would also need to accompany a planning application.</p>
Diana Spence (lpr1022)	<p>I wish to raise my objections to the following proposals for yet more development in Theale village. This is despite the fact that you have already given the OK to build 400+ homes on the western side of Theale. We do not want Theale to become a town like Thatcham – we want to remain a village. <u>70 homes on old Theale Sewage site</u></p> <p>My objection is: the very congested access via Blossom Lane and Crown Lane.</p> <p><u>General objections</u> to the above (including 100 homes on Whitehart Meadow) – do you ever take into account the pressure large development will cause to the already over subscribed Theale Medical Centre and the increased traffic. (We don't all ride bikes).</p> <p>Lastly, I know this view will not count, but can't we leave some field space for the deer to roam – we have already taken acres away from them and they were here first?</p>	<p>Comments noted.</p> <p>The Spatial Strategy for West Berkshire promotes development on three spatial areas: Newbury and Thatcham, Eastern Area and North Wessex Downs AONB. Theale is included in the Eastern Area and is a sustainable location, with good public transport links and active travel links. Theale, as a Rural Service Centre, is identified as a focus for additional housing through existing commitments and new allocations.</p> <p>The Highways Authority identify that improvements would be required to Blossom Lane to allow appropriate access, and would be deemed suitable in principle. The Highways Authority comment that the impact of the trips from the development to Blossom Lane and Crown Lane would not find an objection. A transport assessment would be required to assess the impact on Blossom Lane leading into Theale. Such investigation and mitigation would be set out in the policy. Further work was undertaken as part of the planning application 16/02850/OUTMAJ where access issues were overcome.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>In relation to infrastructure the IDP sets out the infrastructure requirements.</p> <p>An ecological survey will need to be provided with a planning application, together with avoidance and mitigation measures. The development design should also aid in retaining habitat, including the buffer to the Sulham Brook and extensive amounts of landscaping and tree planting.</p>
Lisa Cox (lpr1249)	<p><u>RSA 16 &amp; 17</u> WBC have already approved 425+ dwellings at the opposite end of the village with no regard for improvements to the infrastructure that cannot cope. The Primary School and Doctors Surgery are already at capacity, drainage and sewerage facilities need updating.</p> <p>There are a lack of community facilities such as a leisure centre (nearest one is not accessible by public transport routes and requires a car to access it) or community hub.</p> <p>I firmly believe WBC need to see and assess the effect the already approved dwellings have on the village and its infrastructure before designating further land to housing.</p> <p>This land could be used for the community facilities the village is desperately needing and WBC should give that consideration rather than its current proposal.</p> <p>RSA 16 &amp; 17 – consider this land for use to deliver community facilities</p>	<p>Comments noted.</p> <p>In relation to infrastructure the development the development may not be large enough to justify the provision of a community hub or leisure centre. Infrastructure requirements are set out in the IDP.</p> <p>The Education Authority comment that mitigation may be needed to absorb the additional pupils, and avoid displacement of existing families.</p> <p>The Spatial Strategy for West Berkshire promotes development on three spatial areas: Newbury and Thatcham, Eastern Area and North Wessex Downs AONB. Theale is included in the Eastern Area and is a sustainable location, with good public transport links and active travel links. Theale, as a Rural Service Centre, is identified as a focus for additional housing through existing commitments and new allocations.</p> <p>The site has been promoted for residential development, and the Council is duty bound to identify and assess housing and economic land to meet targets for delivery. There are no allocations for community uses.</p>

Respondent (with lpr ref)	Response	Council Response
Ami Painter (lpr1261)	<p>I would like to submit my objections to the Local Plan Review 2020 -2037 Emerging Draft December 2020 in relation to the sites Whitehart Meadow (RSA16), the Old Sewage Works (RSA17) and the open land situated near Junction 12 EMP6.</p> <p>The area of Theale on the opposite side of the A4 to Arlington should be kept to the existing residential areas and not be expanded for the above reasons. In addition to this, there are already office and commercial sites in both Arlington and the Station Road areas where buildings are sat empty with no companies taking up the leases. With the increase in home working and out of town warehouse sites, it would not be appropriate to impact the local environment and put stresses on the local highways by adding unnecessary commercial properties, where there are already redeveloped sites across Theale that are not in use and have been sat empty for some time.</p> <p>The green spaces of Theale should be left as such before the village becomes an overdeveloped struggling area of West Berks that merges into Reading Borough Council, with facilities and resources that are not fit for purpose and drives existing residents away for the sake of building on land for financial gain and not considering the people, environmental and highway impacts it would have.</p>	<p>Comments noted (relating only to the Sewage Treatment Works. The comments relating to Whitehart Meadow are considered under responses to RSA16, and for the employment site THE8 under SP21).</p> <p>It is important for the development (and taking into account Whitehart Meadow) to respect the character of the area, the gap between Theale and Calcot, and the setting of the AONB. Landscape work has been commissioned and has recommended development is focused to part of the site. The policy contains criteria which guide development and associated landscaping.</p>
Beth Pert (lpr1288)	<p>I would like to submit my objections to the Local Plan Review 2020 -2037 Emerging Draft December 2020 in relation to the sites Whitehart Meadow (RSA16), the Old Sewage Works (RSA17) and the open land situated near Junction 12 EMP6.</p> <p>The plan includes the following:</p> <p>100 homes on Whitehart Meadow (the area of land between the Woodfield Way estate and the M4)</p> <p>70 homes on the site of the old Theale sewage works (the far end of Blossom Lane).</p> <p>20,000 square metres of new office space on the field next to M4 Junction 12.</p>	<p>Comments noted (relating only to the Sewage Treatment Works. The comments relating to Whitehart Meadow are considered under responses to RSA16, and for the employment site THE8 under SP21).</p> <p>The developable area would not be within Flood Zone 2, and the policy includes a criterion that no development would be permitted in this area. A FRA and SuDS scheme would also need to accompany a planning application.</p> <p>National Grid have advised the Council that there should be a buffer around the high voltage power lines. Guidance has been released which the developers will need to take into account, as per the criterion in the policy.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>I object to the draft for the following reasons (across all sites):</p> <ul style="list-style-type: none"> <li>• Flood risk</li> <li>• High voltage overhead power lines cross the site</li> <li>• Noise and pollution from the motorway</li> <li>• Possible land contamination</li> <li>• Need to preserve the gap between Theale and Calcot/Tilehurst</li> <li>• Impact on the Area of Outstanding Natural Beauty</li> <li>• Risk from fluvial, surface water and ground water flooding</li> <li>• Separated from the Arlington Business Park by the busy A4 Theale bypass</li> <li>• Impact on the Theale High Street Conservation Area</li> <li>• Impact on surrounding housing</li> <li>• Unsuitable access via single-track Blossom Lane and Crown Lane</li> <li>• The requirement for office space was based on a council commissioned study that was carried out before the covid 19 outbreak.</li> </ul> <p>As a resident of Theale, my objections are based on my experience of living in the village on and off for nearly 20 years.</p> <p>The basic infrastructure of the village cannot cope with a further 170 homes. The GP surgery is already stretched to breaking point and not able to provide a high standard of patient care for local residents. An extra 170 homes would see upwards of 350 patients. This would overwhelm the surgery completely. This is even more of an issue given that the residents of the homes currently under construction on Beansheaf side of the M4 will also be registering at Theale Medical centre when the properties are completed.</p> <p>The local primary school, which was built on land used for sports and recreation, is also near to capacity. Building more homes and bringing more families in to Theale will mean the school is no longer fit for purpose and will require further extension, taking up yet more valuable green land.</p> <p>Having lived in a flat with no useable outside space during the covid pandemic, it has become even more evident how important local green space is. Building on Whithart Meadow will take away precious green space</p>	<p>It is recognised that the site is in close proximity to the M4. The restraint on the location of housing and landscaping should soften the impact. As with the development at Dorking Way, which is closer to the road network, the policy will require a noise and air quality survey, with appropriate mitigation.</p> <p>The policy requires the submission of a contamination report, identifying any mitigation and remediation.</p> <p>It is important for the development (and taking into account Whitehart Meadow) to respect the character of the area, the gap between Theale and Calcot, and the setting of the AONB. Landscape work has been commissioned and has recommended development is focused to part of the site. The policy contains criteria which guide development and associated landscaping.</p> <p>The Conservation Officer does not raise an objection to the proposal's impact on the conservation area.</p> <p>The development will be visible from existing dwellings, though planning policies are in place in the Local Plan to protect amenity. Sufficient distances shall be maintained and good design will be required. It is important that the development integrates with existing development, rather than as a stand alone development.</p> <p>The Highways Authority identify that improvements would be required to Blossom Lane to allow appropriate access, and would be deemed suitable in principle. The Highways Authority comment that the impact of the trips from the development to Blossom Lane and Crown Lane would not find an objection. A transport assessment would be</p>

Respondent (with lpr ref)	Response	Council Response
	<p>that is local to residents. The impact on our local wildlife would be irreversible too.</p> <p>The access to both sites is problematic. Woodfield Way is already very busy and with parked cars on both sides of the road, the road is already noisy and at times can be dangerous. As new homes are regularly built without sufficient parking, more cars would be using local access roads as a car park, thus increasing the noise, traffic and antisocial problems associated with on street parking. Blossom Lane has similar issues with the added problem of being very narrow. Construction traffic would cause a great deal of disruption to local residents too.</p> <p>Building on sites which have a risk of flooding seems incredibly short sighted, especially at a time where a change in our climate indicates an increased amount of annual rainfall. By building on these sites, there may be an increased risk to existing homes as well as any new homes.</p> <p>While I understand the need to more homes to ease the housing crisis, I feel better options are available. Commissioning further studies in to the regeneration of empty, dilapidated and part derelict office blocks and warehouses in to energy efficient homes would be more beneficial to the local community and saving our precious green space.</p>	<p>required to assess the impact on Blossom Lane leading into Theale. Such investigation and mitigation would be set out in the policy. Further work was undertaken as part of the planning application 16/02850/OUTMAJ where access issues were overcome.</p> <p>In relation to infrastructure the development may not be large enough to justify the provision of a community hub or leisure centre. Infrastructure requirements are set out in the IDP.</p> <p>The Education Authority comment that mitigation may be needed to absorb the additional pupils, and avoid displacement of existing families.</p>
Jayne Dowe (lpr2097)	<p>I would like to comment that I do not support the areas proposed for development (<i>in Theale</i>) for the following reasons:</p> <ul style="list-style-type: none"> <li>• The impact of additional traffic on the village. The proposed access route for Whitemeadow and the adjacent field is a major route used by pedestrians to access the footbridge over the motorway. Additional traffic will raise risks to pedestrians, particularly school children. The high street is narrow and already ill-equipped to deal traffic. The junction is already busy due to its proximity to the motorway, business parks and the A4.</li> <li>• Blossom Lane is a narrow quiet residential road, increased traffic would cause further risks and inconvenience.</li> <li>• The impact on the estates that will be adjacent to the development – Woodfield Way, Alderfield Close etc, leading to overcrowding, impact on view, traffic through the local area. This will impact on the living standards of existing residents.</li> </ul>	<p>Comments noted.</p> <p>The Highways Authority identify that improvements would be required to Blossom Lane to allow appropriate access, and would be deemed suitable in principle. The Highways Authority comment that the impact of the trips from the development to Blossom Lane and Crown Lane would not find an objection. A transport assessment would be required to assess the impact on Blossom Lane leading into Theale. Such investigation and mitigation would be set out in the policy. Further work was undertaken as part of the planning application 16/02850/OUTMAJ where access issues were overcome.</p> <p>It is recognised that the site is in close proximity to the M4. The restraint on the location of housing and landscaping</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• The development will reduce the protective barrier between existing homes and the motorway.</li> <li>• The negative impact on living standards in regards to the new developments being in extremely close proximity to the overhead power lines and the motorway, leading to poor air quality, noise pollution and poor living environment for potential 'new' residents.</li> <li>• The impact on services within Theale, which are already under strain, particularly at this time health services.</li> <li>• Reduction in the boundaries between Theale and Calcot.</li> <li>• All three locations are abundant with wildlife, whose habitat would be destroyed.</li> <li>• Much of the office space within Arlington business park is currently not in use, therefore it is unclear why further office space would be required. The visual impact of the structures will affect the outlook of the village on approach.</li> <li>• The continued development in these areas will continue to spoil the aesthetic of the village as a whole. There are already approved areas of significant housing development within Theale, if these additional areas are also approved the village will lose its character and become overcrowded, overrun by traffic and will have a significant negative impact on existing residents.</li> </ul>	<p>should soften the impact. As with the development at Dorking Way, which is closer to the road network, the policy will require a noise and air quality survey, with appropriate mitigation.</p> <p>National Grid have advised the Council that there should be a buffer around the high voltage power lines. Guidance has been released which the developers will need to take into account, as per the criterion in the policy.</p> <p>In relation to infrastructure the development may not be large enough to justify the provision of a community hub or leisure centre. Meg Randall (lpr1441)	I am writing to oppose the recent plans made for housing and offices in whitehart meadow, Theale sewage works and the field next to the m4 junction 12. I believe it is of great importance to keep these few areas of wildlife we still maintain in Theale and for a village so quaint and with such character these unlikely areas contribute greatly to the feel of the village. In times like these we have learned how important nature is to a community such as the one in Theale. These areas are the only accessible walks within the village out of the way of houses and the only thing I believe can improve Theale would be more wildlife and walks! This has benefitted my mental health greatly as well as other people's and I strongly believe we need to	<p>Comments noted (in relation to the sewage treatment works).</p> <p>An ecological survey will need to be provided with a planning application, together with avoidance and mitigation measures. The development design should also aid in retaining habitat, including the buffer to the Sulham Brook and extensive amounts of landscaping and tree planting.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>maintain these natural and fascinating locations rather than expanding a village that has always thrived off of its old and quaint character. Thankyou for taking the time to read my email and I really hope you take this into consideration</p>	<p>As part of the proposals, and the landscaping assessment, the proposals would retain much of the existing open space and connect better with the existing public play space to the south. Links to public footpaths would be created.</p> <p>The Spatial Strategy for West Berkshire promotes development on three spatial areas: Newbury and Thatcham, Eastern Area and North Wessex Downs AONB. Theale is included in the Eastern Area and is a sustainable location, with good public transport links and active travel links. Theale, as a Rural Service Centre, is identified as a focus for additional housing through existing commitments and new allocations.</p>
Kevin Aylett (lpr821)	<p>Objection to RSA17 Old sewage works, Theale Access road too narrow for extra volume of traffic Contamination of land from previous usage A habitat wild animals including deer and hedgehogs. Outside the settlement boundary Flood risk as shown on 2<sup>nd</sup> Feb flood alert map</p>	<p>Comments noted.</p> <p>The Highways Authority identify that improvements would be required to Blossom Lane to allow appropriate access, and would be deemed suitable in principle. The Highways Authority comment that the impact of the trips from the development to Blossom Lane and Crown Lane would not find an objection. A transport assessment would be required to assess the impact on Blossom Lane leading into Theale. Such investigation and mitigation would be set out in the policy. Further work was undertaken as part of the planning application 16/02850/OUTMAJ where access issues were overcome.</p> <p>Environmental Health officers note that there is a high risk of contamination at the site. This does not necessarily rule out development, and investigation, plus any remediation and possible future monitoring may be required. This is usually a planning condition with a planning permission, and was recommended for planning application 16/02850/OUTMAJ. The policy requires the submission of</p>

Respondent (with lpr ref)	Response	Council Response
		<p>a contamination report, identifying any mitigation and remediation.</p> <p>An ecological survey will need to be provided with a planning application, together with avoidance and mitigation measures. The development design should also aid in retaining habitat, including the buffer to the Sulham Brook and extensive amounts of landscaping and tree planting.</p> <p>The site is currently outside of the settlement boundary. However, as part of the Local Plan Review additional sites are required and these necessitate an extension to settlement boundaries.</p> <p>The developable area would not be within Flood Zone 2, and the policy includes a criterion that no development would be permitted in this area. A FRA and SuDS scheme would also need to accompany a planning application.</p>
J Painter (lpr2015)	<p><i>(Response to RSA16, RSA17, EMP6. Included text relevant to RSA17).</i> I am objecting to the Local Plan Review 2020 -2037 Emerging Draft December 2020 in relation to the sites Whitehart Meadow (RSA16), the Old Sewage Works (RSA17) and land situated near Junction 12 EMP6.</p> <p>I am a resident of Theale of over 20 years and have seen the impact that several developments over this time has had on the infrastructure of the village.</p> <p>Theale Medical Centre struggles to provide adequate facilities for the 10,000+ patients it has over the Theale and Calcot areas. With the proposed 170 properties to be built in the Surgery's geography, the impact on the current patient levels and care provided will be detrimental. This would be in addition to the already growing numbers of patients given the development site that is currently being built opposite the Sainsbury's retail site near Junction 12 in Calcot, who will also be served by Theale Medical Centre.</p>	<p>Comments noted (in relation to the sewage treatment works).</p> <p>In relation to infrastructure the development may not be large enough to justify the provision of a community hub or leisure centre. Infrastructure requirements are set out in the IDP.</p> <p>The Education Authority comment that mitigation may be needed to absorb the additional pupils, and avoid displacement of existing families.</p> <p>The Highways Authority identify that improvements would be required to Blossom Lane to allow appropriate access, and would be deemed suitable in principle. The Highways Authority comment that the impact of the trips from the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Theale Primary School also had to be redeveloped onto a new site on North Street playing fields, which meant local footballs teams and the community lost open space to play on and use for recreational purposes. The impact of 170 new homes would mean more residents would not have enough space for recreational use, as well as new families moving into the village putting pressure onto the primary school, which is becoming quickly overwhelmed with the number of pupils it already has.</p> <p>The local highways in Theale would also not be able to cope with the increase in traffic across all sites. As a resident of Woodfield Way, there have been numerous times where the access to this part of Theale has been blocked due to traffic issues along the A4 and M4. The High Street is often used as a cut through when the bypass is at a standstill and this means local residents are either trapped in the village unable to leave, or unable to access their homes due to the volume of traffic. As there is only 1 access point for the Woodfield Way area of Theale, increasing pressure on this site with the addition of 100 home and 20,000 sqft of commercial property will cause not only disruption to those who live in these areas, but will also increase the impact on the environment with more vehicles and the pollution it will cause.</p> <p>The increase in numbers of vehicles will also cause issues given the current problems experienced with restrictions in access around the Woodfield Way/High Street area. Commercial units at the top of Woodfield Way park their vehicles outside of their units, and residents who have multiple vehicles use the roads to park their cars/vans which narrows the road access. There is constantly a risk that emergency services would not be able to get to the properties furthest down Woodfield Way due to the current number of vehicles that use the roads as a car park. Adding 100 homes, with the same number if not more cars/vans etc. would be more than the local highways would be able to cope with.</p> <p>Now more than ever the open green land of Theale should be left as such, as it allows the community the ability to take exercise without travelling which is key given the current pandemic. To lose this land would also impact on the natural habitats of the wildlife living there, which will displace many animals. Trees have already been cut in the Whitehart Meadow site, and this has caused an increase in light and noise pollution from Junction 12, IKEA</p>	<p>development to Blossom Lane and Crown Lane would not find an objection. A transport assessment would be required to assess the impact on Blossom Lane leading into Theale. Such investigation and mitigation would be set out in the policy. Further work was undertaken as part of the planning application 16/02850/OUTMAJ where access issues were overcome.</p> <p>An ecological survey will need to be provided with a planning application, together with avoidance and mitigation measures. The development design should also aid in retaining habitat, including the buffer to the Sulham Brook and extensive amounts of landscaping and tree planting.</p> <p>As part of the proposals, and the landscaping assessment, the proposals would retain much of the existing open space to the east and connect better with the existing public play space to the south. Links to public footpaths would be created.</p> <p>The Spatial Strategy for West Berkshire promotes development on three spatial areas: Newbury and Thatcham, Eastern Area and North Wessex Downs AONB. Theale is included in the Eastern Area and is a sustainable location, with good public transport links and active travel links. Theale, as a Rural Service Centre, is identified as a focus for additional housing through existing commitments and new allocations.</p> <p>It is important for the development (and taking into account Whitehart Meadow) to respect the character of the area, the gap between Theale and Calcot, and the setting of the AONB. Landscape work has been commissioned and has recommended development is focused to part of the site.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>and its car park along with the overnight roadwork noises from the smart motorway works. Placing 100 properties on this land would be detrimental to those who live next to and opposite the site due to the disruption the development would cause on both the residents and highways, along with it being built on a site of flood risk and uncomfortably close to the overhead power lines/pylons situated in the land.</p> <p>Lastly, with building on the proposed sites, the gap between Theale and Calcot/Tilehurst will significantly decrease. Theale is already situated in a difficult location where emergency services are pulled from opposite towns to the furthest reach of their geography to attend to us. Both Reading and Newbury Police and Ambulance crews find it difficult to attend as we are approx. 10 - 15 miles from each local station for crews to be sent. By adding more residential and commercial sites to Theale this will add increasing pressure to services such as blue lights which is already stretched given our location and the current pandemic situation.</p> <p>For the above reasons, in addition to a site already marked for development along The Green near the Tidmarsh/A4 end of Theale, I object to the local plan review 2020 - 2037 covering sites Whitehart Meadow, The Old Sewage Works and the open land besides the A4 and M4 opposite Whitehart Meadow.</p> <p>I hope this objection will be well considered along with the areas of Theale that are already over developed and struggling to cope with the current population of the village.</p>	<p>The policy contains criteria which guide development and associated landscaping.</p> <p>There is no identified issue with emergency services.</p>
<b>Landowners, site promoters and developers</b>		
<p>Pegasus Planning Group Ltd for Calcot Park Golf Club (lpr2331)</p>	<p>(Full representations in SP14) The policy (SP14) lists a number of sites of varying sizes, which are proposed to be allocated for residential development. It is considered that some of these sites are not ideally suited or justified and they should be removed from the list. In particular, the following:</p> <ol style="list-style-type: none"> <li>1. RSA 16 – Whitehart Meadow, Theale (Site Ref THE1)</li> <li>2. RSA 17 – Former Theale Sewage Treatment Works, Theale (Site Ref THE7)</li> </ol>	<p>Comments noted, in relation to the sewage treatment works.</p> <p>The Local Plan is landscape-led. Since the publication of the Local Plan Review (LPR) further landscape work has been undertaken, as part of a Landscape Sensitivity and Capacity Assessments (LCA) for a number of sites in the LPR. The Sewage Treatment Works is subject of a LCA. The LCA identifies a number of landscape receptors which could be affected by development on site.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>All of these sites are small and currently in use as open fields. Although they each adjoin the edge of a settlement, they offer very limited opportunities for landscaping, as well as biodiversity and geodiversity net gain. The plans in the local plan show they have issues with flooding, motorway noise or they are 95% covered in new development with a narrow “landscaped buffer” on the site edges. These sites are less suitable for allocation and they are poor choices for new housing to help meet the local need in the next few years than that proposed at Calcot Park Golf Club (CPGC).</p> <p>This policy states that this site should be allocated in the local plan for 70 dwellings. The plan shows only a red line around the site. No “landscape buffers” are shown on the plan, so it must be assumed that these boundary treatments will be weak and ineffective. Such unsubstantial boundary treatments will not provide the 10% bio and geodiversity net gain required by policy SP11. Also, they will not provide the level of landscape and visual impact mitigation that is required by policy SP10. Boundary screening will be especially important in this location, which is low-lying land to the north of Theale, which will be visible in several long-distance views. A large part of the site will be sterilised by high voltage cables running across it. In addition, the area is known to be very low-lying and liable to flooding, as well as being close to the M4, which will create problems of noise and air quality.</p> <p>An application for development of 88 dwellings was made in 2017, ref: 16/02850/OUTMAJ, but was withdrawn further to objection from Highways Officers in respect of substandard road access and width, as well as concerns raised in respect of landscape and visual impact. It is considered that on the basis of the quantum of dwellings still proposed, it is unlikely that a technical solution can be found that would deliver development as envisaged.</p> <p><i>Policy RSA 17 – Former Sewage Works, Theale (Site Ref: THE7) in its current form should be removed from the local plan, because the site is not suitable for residential development. Alternatively, the proposed allocation should be reduced in quantum to a level that can be technically</i></p>	<p>It is recommended to limit the developable area, and to retain landscaped buffer areas to retain the immediate planted landscape setting. The development should be designed as a positive extension to the settlement pattern of Theale, by providing an attractive façade to the public open space to the south. Tree planting will be needed to break up the development form. Such buffer planting and design parameters (such as two storey dwellings) should aid in maintaining the wooded view from the AONB, as well as screening the M4.</p> <p>The Spatial Strategy for West Berkshire promotes development on three spatial areas: Newbury and Thatcham, Eastern Area and North Wessex Downs AONB. Theale is included in the Eastern Area and is a sustainable location, with good public transport links and active travel links. Theale, as a Rural Service Centre, is identified as a focus for additional housing through existing commitments and new allocations.</p> <p>The draft policy for the site allocation did not include detail on policy criteria or mapping. This will be done for the submission version of the plan. Landscaping is an important part of the development, particularly given the setting of the AONB and in recognition of the gap between Theale and Calcot. The recommendations of the LCA are to be built in to the policy criteria.</p> <p>An ecological survey will need to be provided with a planning application, together with avoidance and mitigation measures. The development design should also aid in retaining habitat, including the buffer to the Sulham Brook and extensive amounts of landscaping and tree planting.</p>

<b>Respondent</b> <i>(with lpr ref)</i>	<b>Response</b>	<b>Council Response</b>
	<i>accommodated taking into consideration known site access and landscape matters</i>	Application 16/02850/OUTMAJ was withdrawn. Access and landscape issues had been overcome.

### Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

**Emerging Draft LPR Policy: RSA18 Land adjoining Pondhouse Farm, Clayhill Road, Burghfield Common (Site Ref: HSA 15)**

**(Proposed Submission LPR Policy: RSA12 Land adjoining Pondhouse Farm, Clayhill Road, Burghfield Common)**

Number of responses received: 8

Respondent (with lpr ref)	Response	Council Response
<b>Statutory consultees</b>		
Burghfield NDP Steering Group (lpr473)	<p>The Burghfield Neighbourhood Development Plan Steering Committee support the parameters:-</p> <p>Ensure a 15m buffer to ancient woodland and retain existing woodland on the site.</p> <p>Provide footpaths and cycleways to serve the site, enabling connections to the existing network of footpaths and local routes in the surrounding housing areas to increase permeability.</p> <p>Protect the water course along the south eastern boundary of the site. This is because these facets of development have been specifically identified during the work to produce an NDP.</p> <p>The Burghfield Neighbourhood Development Plan Steering Committee would like to add a buffer of trees between the housing and Clayhill Road.</p>	<p>Comments noted. However, no changes to the policy are required in light of this representation because the policy already refers to the need for the development scheme to protect and strengthen landscaping.</p>
Environment Agency (lpr1670)	<p>An ordinary watercourse forms the south eastern boundary of the site. We would therefore require a minimum 5m wide undeveloped buffer zone adjacent to this watercourse as well as an ecological assessment including protected species surveys.</p>	<p>Comments noted. The policy already refers to protecting the watercourse, but reference to a buffer zone will be added to the policy as follows –</p> <p>‘Protect the water course <u>with a 5m buffer zone</u> adjacent to the watercourse along the south eastern boundary of the site.’</p>

Respondent (with lpr ref)	Response	Council Response
Historic England (lpr1576)	We support the requirement for proposals to be informed by an archaeological desk based assessment and field evaluation to assess the historic environment potential of the site, in accordance with NPPF paragraph 189.	Comments noted. No further changes to the policy are required in light of this representation.
Natural England (lpr1605)	<p>This allocation proposal serves to add a significant green infrastructure disconnect between two areas of ancient woodland - Clayhill Copse and Pondhouse Copse. A housing development of approximately 100 dwellings would serve to cut off the connectivity between the woodlands, as well as be likely to cause edge effects on the woodlands from increased vehicle traffic and pedestrians.</p> <p>Para. 174 of the NPPF states that Plans should ‘promote the conservation, restoration and enhancement of priority habitats, ecological networks...’, and para 175 (c) states that ‘development resulting in the loss or deterioration of irreplaceable habitats (such as ancient woodland and ancient or veteran trees) should be refused, unless there are wholly exceptional reasons and a suitable compensation strategy exists’.</p> <p>Any future planning application will have to show how it will mitigate for the impacts on the woodlands, and how green infrastructure through the development will help to alleviate the disconnect.</p>	<p>Comments noted. The wording in the policy referring to ancient woodland will be strengthened as follows –</p> <p><del>‘Ensure a 15m buffer to ancient woodland and</del> <u>Retain existing woodland on the site and provide an appropriate buffer of at least 15 metres between the development and the areas of ancient woodland. The precise buffer will be determined through detailed assessment and design when proposals are submitted for development’</u></p>
Thames Water (lpr1763)	<p>The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website.</p> <p>On the information available to date we do not envisage infrastructure concerns regarding wastewater network or wastewater treatment infrastructure capability in relation to this site/s. It is recommended that the</p>	<p>Comments noted. A Phase 1 and Phase 2 Water Cycle Study have since been prepared and will be reflected in the policy as follows -</p> <p><u>‘An integrated water supply and drainage strategy will be provided in advance of development to ensure the provision of adequate and appropriate infrastructure for water supply and waste water, both on and off site. Development will be occupied in line with this strategy.’</u></p> <p>These comments will inform the emerging draft Infrastructure Delivery Plan.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing.</p> <p>Thames Water have no concerns relating to wastewater capacity based upon the assumption that the connection is via gravity and that no surface water shall be discharged to the Thames Water foul sewer network.</p> <p>Thames Water recognises this catchment is subject to high infiltration flows during certain groundwater conditions. The scale of the proposed development doesn't materially affect the sewer network and as such we have no objection. In the longer term Thames Water, along with other partners, are working on a strategy to reduce groundwater entering the sewer network.</p>	
<b>General consultation bodies</b>		
Mid and West Berkshire Local Access Forum (lpr1877)	<p>MWBLAF supports the following statements in these policies:          Provide footpaths and cycleways to serve the site, enabling connections to the existing network of footpaths and local routes in the surrounding housing areas to increase permeability. (RSA 18)          Explore options to provide footpath and cycle links to existing and proposed residential development to increase permeability to other parts of Burghfield Common. (RSA 19)          However, it is unclear from the definitive map and street gazetteer what is the 'existing network of footpaths' referred to in RSA 18.</p>	<p>Comments noted. The policy will be amended to strengthen and clarify the requirements in relation to footpath and cycle links as follows –</p> <p>'Provide footpaths and cycleways to serve the site, enabling connections to the existing network of footpaths and local routes in the surrounding housing areas to increase permeability <u>and to ensure that residents of the site can access school provision in Burghfield Common via accessible, safe and sustainable transport options.</u>'</p>

Pro Vision on behalf of TA Fisher & Sons Ltd (lpr1934)	Policy is supported. The land allocated by Policy RSA19 is roughly divided up on the indicative map into four parcels. Our client has an interest in the three most western parcels of land labelled "RSA19". The eastern parcel of land labelled "RSA19" is owned by, and being brought forward by Crest Nicholson. The site's recent planning history relates to the eastern parcel of land i.e. not the land in which our clients have an interest.	Comments noted. The allocation will be removed from the Local Plan Review following objections by Emergency Planning. The site was included as an allocation within the Housing Site Allocations Development Plan Document (HSA DPD) which was adopted in May 2017. At Regulation 18 it had

Respondent (with lpr ref)	Response	Council Response
	<p>Table 9.1 of the Council's Site Selection Background Paper (December 2020) provides the Council's deliverability update.</p> <p>The only comments that we have in relation to the Council's deliverability update is to confirm that the land in which our client has an interest does not yet benefit from planning permission. Nonetheless, it will be brought forward as a separate and subsequent phase to the eastern land. The land is however considered deliverable and available, being within the control of a local house builder.</p> <p>Regarding Policy RSA19 of the draft Local Plan, our only comments relate to confirming that the remaining number of dwellings allocated by Policy RSA19 (32 out of the allocated "approximately 60 dwellings") can be achieved on the western land. This land will be brought forward in line with the requirements of Policy RSA19 and remains deliverable.</p> <p>With reference to Policy SP4 of the draft Local Plan, it is noted that the site falls within the Atomic Weapons Establishment (AWE) Detailed Emergency Planning Zone (DEPZ) for AWE Burghfield, as identified by Figure 4. Policy SP4 explains that "In the interests of public safety, residential development in the Detailed Emergency Planning Zone (DEPZ) of AWE Aldermaston and AWE Burghfield is likely to be refused planning permission by the Council, especially when the Office for Nuclear Regulation (ONR) has advised against that development."</p> <p>However, as the site is a retained allocation, the principle of residential development should remain acceptable.</p> <p>We note the conclusion of the Council's Site Selection Background Paper in relation to Benhams Farm (ref. SUL1), where that site was not recommended for allocation for the following reason: "Following the recent review of the DEPZ, the Council's Emergency Planning Team has advised that the site should not be allocated. This follows on from the Office for Nuclear Regulation (ONR) indicating that on the basis of its current model for testing the acceptability of residential developments around the AWE sites, it would advise against nearly all new residential development within the DEPZs."</p> <p>Our client's land however has been re-allocated for development in the draft Local Plan. Therefore, the delivery of housing at the site remains acceptable despite the revision to the AWE consultation zones. We support this view. In</p>	<p>been proposed to retain the allocation in the LPR as development had not yet been built out.</p> <p>At the time of the preparation of the HSA DPD, Council Emergency Planners allowed for the 60 units. However, since 2019 the Government advised following further technical research that the inner Detailed Emergency Planning Zone (DEPZ) for the Burghfield Atomic Weapons Establishment (AWE) site under the REPPiR Radiation [Emergency Preparedness and Public Information] Regulations 2019 be revised.</p> <p>The site lies in the inner DEPZ of AWE Burghfield. Development will increase the population density of the area, which will inevitably compromise the effectiveness of emergency evacuation procedures in the event of an incident at the AWE. There is potential harm to future public safety.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>summary, it is concluded that the development allocated in Policy RSA19 of the draft Local Plan has already been factored into AWE Burghfield's emergency planning.</p> <p>It is also noted that the site falls within the Outer Consultation Zone (OCZ) for AWE Aldermaston, as identified by Figure 3 of the draft Local Plan. The table provided in Policy SP4 outlines the consultation arrangements for applications within the OCZ. In reviewing this it does not appear that the proposals for the site would trigger the need for consultation with the ONR.</p>	
<p>John Cornwell on behalf of Messers I. Cheshire, R. Shaw and The Russell Trust (lpr1647)</p>	<p>Policy is supported.</p> <p>These submissions are made on behalf of the above landowners who own land on the southern part of the adopted housing allocation Ref: HSA16 Phase 1 of this allocation, at the northern end, is currently nearing construction completion by Crest Homes Plc. The above landowners together own the southern Phase 2 part of this allocation for circa 30 or so dwellings.</p> <p>The area of land owned by the above landowners has dwelling capacity for 30 or so new dwellings (depending on the final approved layout). The Phase 1 Crest scheme is now nearly complete, with the estate access road in to sub-base level up to the boundary of the Phase 1 and Phase 2 sites.</p> <p>The above landowners are in the final stages of entering into a Development Agreement with T A Fisher Homes of Reading to develop Phase 2. The great majority of technical assessments and surveys for this work have already been carried out, and a significant amount of civil engineering work has been undertaken to devise the most appropriate estate road route through the site, given the levels differences across it.</p> <p>The only outstanding technical requirement is the updating of the Phase 1 Habitats Assessment carried out in 2015 by GreenLink Ecology Ltd. That assessment found evidence of common reptiles which will need translocating before any development takes place. The update cannot take place until mid-April to allow for revised bat surveys. It is therefore anticipated that a detailed planning application for this land will be submitted around July 2021.</p> <p>The land is therefore very well placed to commence implementation late 2021, and be completed during 2022.</p>	<p>Comments noted.</p> <p>The allocation will be removed from the Local Plan Review following objections by Emergency Planning.</p> <p>The site was included as an allocation within the Housing Site Allocations Development Plan Document (HSA DPD) which was adopted in May 2017. At Regulation 18 it had been proposed to retain the allocation in the LPR as development had not yet been built out.</p> <p>At the time of the preparation of the HSA DPD, Council Emergency Planners allowed for the 60 units. However, since 2019 the Government advised following further technical research that the inner Detailed Emergency Planning Zone (DEPZ) for the Burghfield Atomic Weapons Establishment (AWE) site under the REPPiR Radiation [Emergency Preparedness and Public Information] Regulations 2019 be revised.</p> <p>The site lies in the inner DEPZ of AWE Burghfield. Development will increase the population density of the area, which will inevitably compromise the effectiveness of emergency evacuation procedures in the event of an incident at the AWE. There is potential harm to future public safety.</p>

<b>Landowners, site promoters and developers</b>		
Woolf Bond for JPP Land Ltd (lpr2076)	<p><i>See attachment on the Local Plan Review Consultation Portal (<a href="https://consult.westberks.gov.uk/kse/event/35924/peoplesubmissions/section/">https://consult.westberks.gov.uk/kse/event/35924/peoplesubmissions/section/</a>) for full response to the Local Plan Review.</i></p> <p><b>Introduction</b></p> <p>We refer to the above consultation event and respond on behalf of our client, JPP Land Ltd. Our client's interests relate to land located north of Bath Road, Woolhampton. The site has a significant planning history, including its previous identification as a preferred allocation within the Draft Housing Site Allocations Local Plan (preferred option 15 – site ref WOOL001). This draft allocation indicated that the 0.83ha site could accommodate approximately 20 dwellings.</p> <p>It is acknowledged that within the current Emerging Draft Local Plan, our client's land is included as a proposed allocation for 20 dwellings (site ref RSA20) in policies SP14 and RSA20. We concur with the Council that the site is suitable for allocation, as assessed in the Sustainability Appraisal of Site Options alongside Appendix 4e of the Site Selection Background Paper. The suitability of the site for residential development is further demonstrated by the technical evidence that has been submitted to the Council as part of the current planning application for 16 dwellings on the site (ref 20/03028/OUTMAJ). Therefore, we reconfirm that the 0.83ha site is suitable for housing development comprising between 16 and 20 dwellings in a sustainable location as an extension to the settlement of Woolhampton. The site is an available, suitable and deliverable site, with no constraints to bringing the land forward for development at an early stage during the emerging plan period. This is supported by the Technical evidence which accompanies the current planning application.</p>	<p>Support for allocation noted.</p> <p>The site was promoted as part of the 'call for sites' for the Council's HELAA. To determine the development potential on sites proposed for residential uses, the West Berkshire Density Pattern Book Study was used.</p> <p>Regulation 18 is an early stage of a plans preparation, and as further evidence is produced and technical data becomes available, numbers will be refined.</p> <p>Since the Regulation 18 consultation, technical data has been submitted by the applicant which indicates that 16 dwellings is achievable on the site. This has taken into account matters such as the buffer for the ancient woodland and pipeline easements.</p> <p>The development potential on the site will therefore be amended down from 20 to 16 dwellings.</p>

Respondent (with lpr ref)	Response	Council Response
	<p><b>National Planning Policy Framework (NPPF) and the Tests of Soundness</b></p> <p>The NPPF (February 2019) sets out the principal components to be included in local plans. Paragraph 35 requires that in order to be “sound” a Development Plan Document (‘DPD’) should be positively prepared, justified, effective and consistent with national policy.</p> <p>In order to be justified the DPD must be founded upon a proportionate evidence base and represent an appropriate strategy when considered against the reasonable alternatives.</p> <p>Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the Statement of Common Ground.</p> <p>The positive preparation test requires plans to as a minimum, seeks to meet the area’s objectively assessed needs and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical.</p> <p>For the reasons set out in these submissions there are a number of potential matters that need to be addressed in future iterations of the emerging Plan. These are outlined following the relevant questions and supporting information within the consultation document.</p> <p><b>The Vision Statement</b></p> <p>In our response to the earlier draft version of the Local Plan (December 2018), we highlighted our concern regarding the inconsistency of the Council’s proposed vision with the approach of the NPPF, particularly paragraph 78). This related to the failure of the proposed vision to effectively support growth in villages. The revision to the vision (particularly the second paragraph) which includes references to both towns and villages is therefore consistent with national advice, as is the allocation our client’s land north of Bath Road, Woolhampton.</p> <p><b>Further matters – Comments on draft Policy RSA20 regarding the allocation of land north of Bath Road, Woolhampton</b></p> <p>The draft policy indicates that the site is proposed to be allocated for a residential development comprising approximately 20 dwellings. On behalf of our clients, an outline application for the erection of 16 dwellings has been submitted and is currently under consideration by the authority (20/03028/OUTMAJ). This followed an earlier outline application (19/01942/OUTMAJ) for 16 dwellings on the site which was refused by the authority. The Council’s determination of the earlier application together with the technical information submitted with the current scheme highlight those matters which are most likely to be relevant for inclusion in a policy for the development of the site.</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>In contrast, the assessment of the site for the Local Plan (through both the 2020 HELAA and the Site Selection Background Paper (December 2020)) have unjustifiably identified other issues which should not be detailed in any policy for the development of the site.</p> <p>The technical information submitted with the current application confirms that development of the site could proceed with mitigation to address any potential impacts upon the adjoining Local Wildlife Site. The inclusion of a 15m buffer along the site's western boundary ensures development of the site also safeguards the ancient woodland which is the designated Local Wildlife Site. This is shown on the illustrative layout submitted with the application [see attachment].</p> <p>A review of the Council's published Housing Economic Land Availability Assessment (HELAA) 2020 in light of the current planning application scheme reaffirms the suitability, deliverability and availability of the site.</p> <p>The site was one of five sites assessed in Midgham Parish, three of which lie on the edge of Woolhampton. The conclusion of the Assessment is that the site is the only site with development potential at Woolhampton. The suitability of the site is acknowledged in the December 2020 update on the HELAA, which re-affirms that it is the sole site at Woolhampton with development potential. As to the site itself, the Assessment assumes a density of 30 dwellings per hectare which contrasts with the more sensitive and agreed lower density of 19.4 dwellings per hectare proposed for the application scheme. Accordingly, the HELAA Assessment should be seen in this light. The HELAA looks at:</p> <ol style="list-style-type: none"> <li>1. Development potential;</li> <li>2. Suitability;</li> <li>3. Availability;</li> <li>4. Achievability; and</li> <li>5. Deliverability Each is addressed in turn below.</li> </ol> <p><b>1. Development potential</b></p> <p>The first section of the HELAA deals with development potential. The Assessment highlights site specific issues which could affect capacity as relating to the ancient woodland and the need for a buffer. The illustrative application scheme includes such a buffer, consistent with Natural England guidelines, with a depth of 15 m. In withdrawing reason for refusal 3 in connection with the previous application, the Council now confirms that the site can be developed without harm to the ancient woodland. The Assessment assumes a density of 30 dwellings per hectare and an estimated development potential of 20 dwellings. This contrasts to the more sensitive and agreed lower density of 19.4 dwellings per hectare and the 16 dwellings proposed.</p>	

Respondent (with lpr ref)	Response	Council Response
	<p><b>2. Suitability</b></p> <p>Under relevant planning history, the HELAA Assessment confirms no relevant planning applications but records the site being assessed as “potentially developable” in the 2013 strategic housing land availability assessment as recorded above. The Council’s assessment notes that:</p> <p>“During the site selection work for the Housing Site Allocations Development Plan Document, the site was recommended as an option for allocation in the Housing Site Allocations (HSA) DPD because it was well connected to existing settlement, close to local services and facilities.</p> <p>At preferred options the Parish Council commented that development of the site would extend the village westwards. Concern was also raised over additional traffic movement on to New Road Hill. The Parish Council stated a preference for WOOL006 to be allocated for development.”</p> <p>The application scheme no longer proposes an access onto New Road Hill. Whilst the proposal would “extend the village westwards”, the alternative site was extending the settlement eastwards. There is no distinguishing difference between the principle of such an extension. In any event, the proposal is contained by a mature woodland block which screens and encloses the site from the more open and wider landscape further to the west. In this sense the suggested extension of the village is not out into the wider open countryside but up to a very well established and contained landscape feature. The relationship of the scheme to this landscape feature is also respected.</p> <p>In respect of location (settlement hierarchy, relationship to settlement boundary) the HELAA Assessment notes that the site is adjacent to the settlement of Woolhampton, an identified Service Village that has a more limited range of services and “some limited development potential”. The reference to the settlement having a limited range of services fails to acknowledge the significant, higher order, railway station within Woolhampton. The Assessment records that the site adjoins the settlement boundary on the northern and eastern sides. The A4 Bath Road together with a community facility, car park, allotments and some frontage dwellings lie to the south and south east. The HELAA Assessment confirms that development on the site would not result in harm to the AONB.</p> <p>In respect of highways and access, the Assessment confirms the position in respect of the planning application that there are no objections to the proposed means of access off the Bath Road, no significant impact is expected in respect of local highway capacity, and Highways England has advised that individually, the site would be unlikely to materially impact on the operation of the strategic road network.</p> <p>In respect of flooding, the Assessment confirms that the site lies within flood zone 1 with a low probability of flooding.</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>No issues are raised in relation to surface water, ground water flood risk and the Council's drainage officer confirms that the site is suitable for development.</p> <p>The Assessment confirms that the site is not defined as public open space and that there is no requirement for additional public open space provision over and above development plan policy requirements.</p> <p>The Assessment confirms that the site has not been identified as Local Green Space which reinforces the point that the site is not significant in townscape terms.</p> <p>In respect of agricultural land, the site is classified as non-agricultural land. This is hardly surprising given the well contained nature of the site, and its divorced nature from the more open and usable countryside further to the west, all of which point to the site being of limited use other than paddock land on the settlement edge.</p> <p>The Assessment under the heading air quality, pollution and contamination refers to the location of the site adjacent to the A4, with possible Nitrogen Dioxide and Particulate Matter from construction and operational impacts, and possible contamination and high risk of noise and vibration problems to future residents from the A4. It is relevant to note that no such objections were raised in relation to the planning application in respect of these matters. Furthermore, the site allocated and under construction at the eastern end of the village shares a similar frontage relationship onto the Bath Road. These are not therefore considered determinative issues.</p> <p>In respect of potential adverse nature conservation impacts, the Thames Valley Environmental Research Centre highlights the site lying within 500m of priority habitats, ancient woodland, European protected species, priority species, statutory sites, SSSI Impact Risk Zone and local wildlife sites.</p> <p>The Berkshire, Bucks and Oxon wildlife Trust highlight a number of potential impacts to these interests in the absence of any avoidance or mitigation measures. The planning application includes appropriate avoidance and mitigation measures such that the only outstanding nature conservation impacts relate to bats and dormice surveys. The recent surveys submitted to the council as part of the current planning application confirm that these do not present a constraint to the development of the site in the manner proposed. The Council's withdrawal of reason for refusal 3 to an earlier application confirms this too.</p> <p>The 15m buffer zone also confirms appropriate avoidance and mitigation to the nearby ancient woodland.</p> <p>In respect of whether development would be appropriate in the context of existing settlement form, pattern and character of the landscape, a generic passage from the West Berkshire Landscape Character Assessment (2019) is set out in the HELAA. This could apply to any edge of settlement</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>field thereby precluding any form of development at the edge of a sustainable settlement within the identified settlement hierarchy.</p> <p>The site-specific comment does recognise the fact that there is existing residential development to the east and north of the site. It records: “Western boundary of the site nearby open countryside is well screened by mature trees. Further landscape assessment required”. This does not rule out the development having regard to this consideration. “Further landscape assessment required” comes in the form of the application Landscape and Visual Impact Addendum report that accompanies this Statement.</p> <p>The Assessment confirms no harm to or loss of significance to any designated heritage assets. In terms of designated heritage assets, a desk-based archaeological assessment together with some possible fieldwork techniques may be necessary. However, the determination of the earlier application has not identified any such interest. The Planning Statement (paragraph 4.41) also notes that whilst heritage has been identified as a potential matter to be reviewed, this was not identified in the Council’s earlier determination of application 19/01942/OUTMAJ.</p> <p>In terms of minerals and waste, it is noted that the site lies within an existing and proposed mineral safeguarding area. Although the Site Assessment Background Paper refers to a need to consider minerals steralisation issues, as the Planning Statement accompanying the pending application 20/03028/OUTMAJ confirms (paragraph 4.41) states:</p> <p>The site could not reasonably be quarried in a standalone respect due to its limited area and the need to ensure appropriate buffers to the residential properties, oil pipeline and ancient woodland within or adjoining the site. However, should any minerals be observed on site during construction, these can be sent to a local processor rather than sent to landfill [footnote: It is understood that quarries within West Berkshire can accept such limited quantities of minerals for processing]. Again, this could be dealt with by condition. Consequently, mineral extraction is therefore not a constraint for the site.</p> <p>This flexibility should be acknowledged within any policy although as explained above, this is not considered to be a relevant factor for the determination of the earlier application.</p> <p>The suitability conclusions refer to the need for appropriate avoidance and mitigation measures in respect of the ancient woodland, the potential high risk of adverse nature conservation impacts. These have now been addressed as confirmed in the recent ecological survey report and Council’s withdrawal of reason for refusal 3 to the earlier application. The only outstanding matter therefore relates to a further landscape assessment. This as noted is now provided through this application which confirms the acceptable effect of the scheme in landscape character terms. The Assessment confirms that all other sites at the edge of Woolhampton are unsuitable, leaving the application site as the only suitable site at this sustainable Service Village, which the HELAA confirms is suitable</p>	

Respondent <i>(with lpr ref)</i>	Response	Council Response
	<p>and capable of accommodating additional development. To not support additional meaningful development at Woolhampton, bearing in mind the level of existing transport infrastructure (in particular the railway station), would not be sustainable.</p> <p><b>3 and 4. Availability and Achievability</b> The HELAA confirms that the site is immediately available and achievable with no new issues constraining the development of the site. This representation and the current planning application reaffirm this matter.</p> <p><b>5. Deliverability</b> Within this section of the HELAA the Assessment confirms that the site is available, achievable, potentially developable in part owing to a buffer required joining the ancient woodland on the western site boundary, with suitability unknown due to the outstanding nature conservation surveys and landscape assessment, both of which are now addressed through this application.</p> <p><b>Concluding remarks on 2020 HELAA</b> Overall, the Council’s most recent Assessment highlights the suitability of the site even for a higher level of development than that proposed through the current application scheme. The lower number of dwellings now proposed allows for the appropriate identified mitigation and avoidance measures to be incorporated, in particular in relation to the ancient woodland buffer. The outstanding nature conservation constraints are now resolved through the recent season sensitive bat and dormice surveys, whilst the submitted Landscape and Visual Impact Assessment Addendum to the current application addresses landscape impact. That said, the acknowledgement of the well contained nature of the site confirms the landscape and visual impact is limited. Moreover, the planning officer’s report on the earlier application confirms that “the presence of housing would be conspicuous in public views, albeit localised and filtered (to varying degrees) but would inevitably be an intrinsic change to the character of the area (the site) in this location”. There can be no doubt that with virtually every greenfield site the presence of housing would be conspicuous in public views, but in this case, it is acknowledged that these would be “localised and filtered”. Furthermore, the change from a greenfield site to a housing development, albeit set within a settled and mature landscape, would bring about a change, however, the degree of change in this case is limited, as well as that change being well related to existing built form seen in the same context of the site. This too reduces further the extent of change and impact to a level that is judged by the applicants to be acceptable.</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>It is clear that the Council's determination of application 19/01942/OUTMAJ has reviewed the various factors which would need to be addressed to enable residential development of the draft allocation to proceed. Although the HELAA and Site Assessment Background Paper have listed other issues, it is evident that the recent planning application scheme and material submitted with it have addressed these. Council's provisional identification of heritage and minerals as potential factors for development of the site should consequently not be incorporated into the specific expectations of the authority within the policy of the draft Submission Local Plan.</p> <p>The inclusion of our client's land north of the Bath Road in Woolhampton as envisaged by draft Policy RSA20, whilst assisting in the enhancement or maintenance of the vitality of rural communities as required by the NPPF (paragraph 78), will also contribute towards the minimum of 10% of housing allocations to meet the district's overall housing need on a site of less than 1ha, as required by paragraph 68.</p> <p><u>Summary</u></p> <p>These are substantial benefits of the site which have been identified and accepted by officers of the Council through its allocation in policies SP14 and RSA20 of the Emerging Draft Local Plan for the erection of about 20 dwellings.</p> <p>As demonstrated through the submission of applications, including the application currently under consideration ref 20/03028/OUTMAJ, it is under the control of a local housing developer, who is in a position to bring forward the site for approximately 16 no. dwellings, parking, open space and landscaping. The site is therefore deliverable in the immediate five year period and can provide a material number of housing units, including affordable housing, in a location where the short term need is pressing.</p> <p>For the reasons set out above the site's provisional allocation for around 20 dwellings should be retained and confirmed through the Submission Draft Local Plan. The settlement boundary should therefore be revised outlined earlier in this response.</p> <p><b>Conclusion</b></p> <p>Whilst we concur with the Council's inclusion of our client's land north of Bath Road, Woolhampton as an allocation for around 20 dwellings in policies SP14 and RSA20.</p> <p>We welcome the opportunity to open up dialogue with the Council in order to further proposals and the formulation of the detailed policy requirements associated with the allocation of our client's land as currently envisaged in policies SP14 and RSA20.</p>

Thames Water Utilities Ltd (lpr1756)	<p>The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website <a href="https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development">https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development</a>.</p> <p>The wastewater network capacity in this area may be unable to support the demand anticipated from this development. Local upgrades to the existing drainage infrastructure may be required to ensure sufficient capacity is brought forward ahead of the development. Where there is a potential wastewater network capacity constraint, the developer should liaise with</p>	<p>Comments noted.</p> <p>The site was allocated within the Housing Site Allocations Development Plan Document (HSA DPD) which was adopted in May 2017. Outline planning permission (16/03061/OUTMAJ) was granted in November 2017 and Reserved Matter permission (19/01406/RESMAJ) was granted in February 2020.</p> <p>The allocation will be removed from the LPR as the site has planning permission and the development is under construction.</p>

Respondent (with lpr ref)	Response	Council Response
	Thames Water to determine whether a detailed drainage strategy informing what infrastructure is required, where, when and how it will be delivered is required. The detailed drainage strategy should be submitted with the planning application	
<b>General consultation bodies</b>		
CPRE Berkshire (lpr1700)	CPRE Berkshire has voiced concerns over the site previously about the large-scale development of 100 houses its impact on the AONB landscape. Exception conditions do not exist for the development in the AONB, which has now started and its distance from the main town is not appropriate for key workers, low income families and those without private transport.	<p>Comments noted. The principle of developing the site was established through the Housing Site Allocations Development Plan Document. Planning permission has already been granted and development is under construction.</p> <p>The site was allocated within the Housing Site Allocations Development Plan Document (HSA DPD) which was adopted in May 2017. Outline planning permission (16/03061/OUTMAJ) was granted in November 2017 and Reserved Matter permission (19/01406/RESMAJ) was granted in February 2020.</p> <p>The allocation will be removed from the LPR as the site has planning permission and the development is under construction.</p>
Mid and West Berkshire Local Access Forum (lpr1879)	<p>This site is crossed by a public footpath. However, unlike other policies this is not shown on the map. The footpath is adjacent to a hedgerow that continues beyond the site. MWBLAF proposes that this hedgerow is preserved, to retain the character of the footpath.</p> <p>The Forum recommends that the preservation of the hedgerow should be recognised in the policy: The development will be delivered in accordance with the following parameters:</p> <ul style="list-style-type: none"> <li>• The retention of the Public Right of Way <b>and the preservation of the adjacent hedgerow</b> through the site.</li> </ul>	<p>Comments noted. It is understood that the footpath will not be diverted.</p> <p>The site was allocated within the Housing Site Allocations Development Plan Document (HSA DPD) which was adopted in May 2017. Outline planning permission (16/03061/OUTMAJ) was granted in November 2017 and Reserved Matter permission (19/01406/RESMAJ) was granted in February 2020.</p>

Respondent (with lpr ref)	Response	Council Response
		The allocation will be removed from the LPR as the site has planning permission and the development is under construction.
<b>Other stakeholders</b>		
Councillor Tony Vickers (lpr578)	<p>This site is being built out, has full planning consent. However the Applicant is now trying to avoid having any social housing or allotments. This must be resisted at all costs. See comments on SPs 10, 11 &amp; 19 above.</p> <p>No change other than to update the detail on numbers.</p>	<p>Comments are noted. The matters of social housing and allotments are covered by existing policies in the Core Strategy, which the decision maker will need to take into consideration.</p> <p>The site was allocated within the Housing Site Allocations Development Plan Document (HSA DPD) which was adopted in May 2017. Outline planning permission (16/03061/OUTMAJ) was granted in November 2017 and Reserved Matter permission (19/01406/RESMAJ) was granted in February 2020.</p> <p>The allocation will be removed from the LPR as the site has planning permission and the development is under construction.</p>

**Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)****Emerging Draft LPR Policy: RSA22 Land adjoining Lynch Lane, Lambourn (Site Ref: HSA 19)****(Proposed Submission LPR Policy: RSA14 Land adjoining Lynch Lane, Lambourn)**

Number of responses received: 10

<b>Respondent</b> <i>(with lpr ref)</i>	<b>Response</b>	<b>Council Response</b>
<b>Statutory consultees</b>		
Lambourn NDP Steering Group (lpr1709)	<p>We note the parameters in Policy RSA22 and agree with them. They must be applied.</p> <p>This is a particularly sensitive site, given its proximity to the River Lambourn and the distinctive landscape feature, Lynch Wood.</p> <p>The Landscape Character Appraisal (<i>attached to representation</i>) undertaken to inform the LNDP has identified a Landscape Character Area centred on Lynch Wood, and including this site, to be of major landscape importance within the Parish. It states:</p> <ul style="list-style-type: none"> <li>• The housing allocation for some 60 dwellings (Housing Site Allocations DPD Policy) at Lynch Lane needs to be carefully scaled and designed to complement the village's existing built form and embrace sylvan qualities whilst maintaining strong visual links with the church.</li> <li>• The existing built form includes low density housing often comprising bungalows. Any new development should carefully consider the strong riverine valley features with the hanging woodland that make this location so distinctive.</li> </ul> <p>It further notes: The 2015 Landscape Capacity Study of the land near Lynch Wood concluded that: New development should be severely restricted to conserve character of existing settlements - large-scale developments are not appropriate in this narrow river valley.</p>	<p>Comments noted.</p> <p>The requirements set out in the policy already address these issues.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The number of houses should be no more than 60. The density and height of housing will be of critical importance at this edge of settlement.</p> <p>The River Lambourn, as a protected chalk stream, is of international importance and any development on this site must ensure it is not adversely impacted. Water quality in the river needs to be improved and any run-off from the site, or damage to the river banks and bed, will affect water quality throughout the whole of its course.</p> <p>The LNDP is developing Design Codes which may be relevant to development on this site, but the LPR does state a high standard of housing design is expected.</p> <p>According to Policy SP19 - and given the need for affordable housing <b>in the Parish</b>, especially to support employees in the valuable racehorse training industry - this greenfield site is expected to provide 40% affordable housing.</p> <p>NB: Average figures for rented property in Lambourn are as follows (June 2020):</p> <p><b>Sovereign</b> (social rent): 3 bed: £139 - £146 per week; 2 bed: £127 - £131 per week</p> <p><b>Private rented:</b> 3 bed: £219 per week (£950 per month); 2 bed: £185 per week (£800 per month)</p> <p><b>Affordable rented at 80%:</b> 3 bed: £175 per week; 2 bed £148 per week.</p> <p>Those on single lower quartile incomes (£23,803 pa in Lambourn) are limited to only one form of tenure - social rent. They cannot afford "Affordable" rented accommodation.</p>	
Lambourn Parish Council (lpr1444)	<p>RSA22: (Formerly HSA19) Land adjoining Lynch Lane: 60 dwellings</p> <p>RSA23: (Formerly HSA20) Land at Newbury Road: 5 dwellings</p> <p>This leaves a shortfall of 25 units, 90 being the number of houses WBC judge will be needed. (This number can be updated during the life of the Local Plan). Housing, especially affordable housing, is needed in Lambourn. WBC are aware the emerging Lambourn NDP is not planning to bring forward sites for the allocation of housing. It is anticipated natural development will fill the quota. The emerging LNDP will contain Design Codes to address issues of density and appearance. A NDP, once made is subject to monitoring and review.</p>	<p>Comments noted.</p> <p>Comments in relation to housing numbers and the NDP are dealt with under the Council's response to Policy SP1 and Policy SP12.</p> <p>The Landscape Character Appraisal undertaken for the emerging Lambourn Neighbourhood Development Plan (Lambourn LCA) will usefully inform the required Landscape and Visual Impact Assessment (LVIA)</p>

Respondent (with lpr ref)	Response	Council Response
	<p>RSA22: (Formerly HSA19) Land adjoining Lynch Lane: 60 dwellings. The developers of the site are currently in pre-planning discussions with WBC. They would like to build a larger number of houses on the site than 60. The on-going problems with the incursion of groundwater into the sewers is a constraint on the development.</p> <p>The Landscape Character Appraisal undertaken for the emerging Lambourn Neighbourhood Development Plan (Lambourn LCA) has identified Lynch Wood (LCA5) as a Landscape Character Area which includes this site. In Recommendations to plan, manage and protect distinctiveness of LC5 it states:</p> <p>Lynch Wood should continue to be managed on a sustainable basis, maximising biodiversity and visual appeal.</p> <ul style="list-style-type: none"> <li>• The woodland management needs to plan for the effects of climate change.</li> <li>• Broad leaved species are a key characteristic of the woodland and should continue to prevail.</li> <li>• The housing allocation for some 60 dwellings (Housing Site Allocations DPD Policy) at Lynch Lane needs to be carefully scaled and designed to complement the villages existing built form and embrace sylvan qualities whilst maintaining strong visual links with the church.</li> <li>• The existing built form includes low density housing often comprising bungalows. Any new development should carefully consider the strong riverine valley features with the hanging woodland that make this location so distinctive.</li> <li>• The 2015 Landscape Capacity Study of the land near Lynch Wood concluded that “New development should be severely restricted to conserve character of existing settlements - large-scale developments are not appropriate in this narrow river valley.</li> </ul> <p>The density of development at the edge of the settlement is important, as is sensitivity to the River Lambourn and the SSSI. The River Lambourn is one of only 210 chalk streams in the world. There are already difficulties with water quality, not just with sewage discharge, so care must be taken not to make this worse when</p> <p>Changes:[For RSA22] The policy in the Local Plan Review (RSA22, formerly HSA19) has not changed since the Housing Site Allocations DPD (2006-</p>	

Respondent (with lpr ref)	Response	Council Response
	2026) was adopted in 2017. Many of the concerns about development of the site are addressed in it. We expect those criteria/conditions to be adhered to and would like consideration to be given to the recommendations in the Lambourn LCA.	
Environment Agency (lpr1672)	<p>We welcome the fact that Development will not take place within Flood Zones 2 and 3 including essential infrastructure and water compatible development. This will ensure that flood risk is not increased elsewhere as a result of the proposed development.</p> <p>As the site is adjacent to the River Lambourn SSSI and SAC, which is an internationally important chalk river. It supports valuable habitats and protected species and is sensitive to nutrient loading. We therefore agree with the recommendations, particularly for a wide undeveloped buffer zone, detailed ecological assessments and the requirement for a Habitat Regulations Assessment to accompany any future planning application. The development must also connect to the main sewerage system, to avoid any further sewage discharges from package treatment plants into the Lambourn.</p> <p>We have serious concerns about additional development at this site, due to known issues with sewer network capacity and infiltration. As additional development could exacerbate the problem, a more thorough investigation of the WWTW and the sewer network would be needed. Without this, the development could contribute to, or be adversely affected by, unacceptable levels of water pollution in accordance with Paragraph 170 of the NPPF. Therefore, this allocation would cause the local plan to be found unsound in the future.</p>	<p>Comments noted.</p> <p>A Phase 1 and Phase 2 Water Cycle Study have since been prepared and will be reflected in the policy as follows <u>'An integrated water supply and drainage strategy will be provided in advance of development to ensure the provision of adequate and appropriate infrastructure for water supply and waste water, both on and off site. Development will be occupied in line with this strategy. Infiltration from groundwater into the network has been identified as a strategic issue within Lambourn; therefore development on the site will connect to the mains sewerage system. A housing phasing plan will be required to ensure development does not outpace delivery of essential network upgrades to the East Shefford Sewage Treatment Works.'</u></p> <p>Also amend the policy as follows – <u>'Development on the site will not adversely affect the adjacent River Lambourn SSSI/SAC and a Habitat Regulations Assessment will be required to accompany any future planning application. The site lies within the hydrological catchment of the River Lambourn SSSI/SAC and the development must demonstrate nutrient neutrality. A Habitats Regulations Assessment will be required to accompany any future planning application. This will be supported by an appropriate Nutrient Neutrality Assessment and Mitigation Assessment. Mitigation required will need to be operational and in place prior to any nutrient pollution being discharged;'</u></p> <p>These comments will inform the emerging draft Infrastructure Delivery Plan.</p>

Respondent (with lpr ref)	Response	Council Response
Historic England (lpr1578)	We support the requirement for proposals to be informed by an archaeological desk based assessment and field evaluation to assess the historic environment potential of the site, in accordance with NPPF paragraph 189.	Comments noted. No changes are required to the policy in light of this representation.
Natural England (lpr1604)	This site is acceptable in terms of the North Wessex Downs AONB due to the scale, design and density work which has been completed. We do however harbour some concerns about the close proximity to the River Lambourn SAC, despite the minimum buffer distances. Great care will have to be taken when considering the required Habitats Regulations Assessment with any future planning application.	Comments noted. Amend the policy as follows – <del>Development on the site will not adversely affect the adjacent River Lambourn SSSI/SAC and a Habitat Regulations Assessment will be required to accompany any future planning application.</del> <u>The site lies within the hydrological catchment of the River Lambourn SSSI/SAC and the development must demonstrate nutrient neutrality. A Habitats Regulations Assessment will be required to accompany any future planning application. This will be supported by an appropriate Nutrient Neutrality Assessment and Mitigation Assessment. Mitigation required will need to be operational and in place prior to any nutrient pollution being discharged;</u>
Thames Water (lpr1757)	The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website. The wastewater network capacity in this area may be unable to support the demand anticipated from this development. Local upgrades to the existing drainage infrastructure may be required to ensure sufficient capacity is brought forward ahead of the development. Where there is a potential	Comments noted.  A Phase 1 and Phase 2 Water Cycle Study have since been prepared and will be reflected in the policy as follows <u>'An integrated water supply and drainage strategy will be provided in advance of development to ensure the provision of adequate and appropriate infrastructure for water supply and waste water, both on and off site. Development will be occupied in line with this strategy. Infiltration from groundwater into the network has been identified as a strategic issue within Lambourn; therefore development on the site will connect to the mains sewerage system. A housing phasing plan will be required to ensure development does not outpace delivery of essential network upgrades to the East Shefford Sewage Treatment Works.'</u>

Respondent (with lpr ref)	Response	Council Response
	wastewater network capacity constraint, the developer should liaise with Thames Water to determine whether a detailed drainage strategy informing what infrastructure is required, where, when and how it will be delivered is required. The detailed drainage strategy should be submitted with the planning application.	These comments will inform the emerging draft Infrastructure Delivery Plan.
<b>General consultation bodies</b>		
Mid and West Berkshire Local Access Forum (lpr1880)	<p>MWBLAF welcomes the commitment in this policy to improvements in public rights of way. However, the statement as currently worded is very ambiguous, and needs to be clarified in order that the intended improvements are delivered:</p> <p>(iii) Public Rights of Way and bridleway improvements will include improvement of the pedestrian/bridle link between Lynch Lane and the village centre, and improved connectivity between Lower and Upper Lambourn.</p> <p>A bridleway is normally a class of public right of way. If a permissive bridleway is intended, this should be stated. This no 'pedestrian/bridle link' shown on the West Berkshire online map in the vicinity of Lynch Lane, on either the public rights of way or the local street gazetteer layer.</p> <p>The Forum requests that the improvements to routes for non-motorised users are clarified. It is not clear from the current wording what new or improved routes are proposed, and whether they are intended to become public rights of way. The Forum is therefore unable to proposed specific changes to the wording.</p>	Comments noted.

<b>Landowners, site promoters and developers</b>		
Armstrong Rigg Planning on behalf of Manor Oak Homes Ltd (lpr2423)	The Local Plan Review (LPR) intends to review the planning policies of the adopted Local Plan (covering the period up to 2026) and identify the need for future housing, employment land and infrastructure provision in the period up to 2037. The current Regulation 18 consultation seeks comments	<p>Comments noted.</p> <p>These comments relate to the HELAA site LAM7. This site was assessed in the HELAA as not developable within the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>on an early draft of the LPR and follows a call for sites in 2017 and two previous Regulation 18 consultations on the scope and vision of the LPR in early and late 2018 respectively.</p> <p>These representations seek to assess the approach that the LPR should take towards facilitating appropriate and sustainable growth in Lambourn and promotes our client's site at Land at Fairview, Greenways, Lambourn. Our client's site has previously been promoted to the LPR (HELAA Ref. LAM7) for residential development on 2.28ha of land, but our client now wishes to also promote an alternative option for the development of a smaller 1.27ha area comprising just the northern part of LAM7. To ensure that these two site options are considered separately in the HELAA, we are pleased to enclose separate call for sites forms for each.</p> <p>The need to increase the housing requirement across the District and to increase supply in Lambourn to ensure a fair distribution is compounded by the fact that, as demonstrated in these representations, the current allocation for 60 dwellings at Land Adjoining Lynch Lane cannot be considered deliverable. The proposed reallocation of this site by Policy RSA 22 must therefore be removed from the plan in accordance with NPPF paragraph 120 and new deliverable allocations made to ensure housing delivery to meet local needs.</p> <p>Our client's proposals at Land at Fairview, Greenways, Lambourn have been designed to specifically meet the unique housing requirements of Lambourn in providing a high proportion of smaller dwellings and in particular 1 bedroom social rent dwellings suitable for younger staff in the racehorse community. The tailoring of the proposal in this way will provide a significant benefit to the community in meeting local needs. Lambourn's location in the AONB means that its future development is constrained. In this context it is crucial that sites that do come forward maximise the opportunity to deliver the size, type and tenure of housing most needed in the local area. This is our client's firm intention as demonstrated by their current discussions with Racing Welfare as to the possibility of racing related affordable housing forming part of the proposed scheme.</p> <p>The illustrative proposals for our client's site are based on thorough technical assessments of highways, landscape and arboricultural constraints and respond positively to the pre-application advice of officers. Lambourn's</p>	<p>next 15 years. The site was found to be unsuitable because an appropriate access cannot be provided.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>location within the North Wessex Downs AONB constrains the potential development options available to meet the village's significant need and we recognise in this respect that no site is perfect and that choosing the most suitable location for housing is a balance between the various constraints to development and the ability of the site proposed to deliver the size, type and tenure of housing most needed. In this context, we consider our client's proposals to represent the most sustainable solution to helping meet Lambourn's housing needs. It is our understanding that the emerging Lambourn Neighbourhood Plan will not allocate sites and as such we consider our client's land should be allocated in the emerging LPR.</p> <p>Our client firmly objects to the reallocation of this site in the emerging LPR. The site has been allocated since 2017 and was an emerging allocation before this meaning that the developer has had in excess of 5 years to bring forwards proposals on the site. Despite this, no planning application has been submitted and it is not yet included in the Council's housing trajectory for the current five year period, indicating concerns regarding its delivery. The Council's Five Year Housing Land Supply at December 2019 report states that the site is owned by Hygrove Homes Ltd (a small housebuilder currently building out two small sites in South West Wales) who did not respond to the Council's consultation to confirm the deliverability of the site. This combined with the small size of the company and lack of local experience would appear to confirm that the Council are right to be concerned about its deliverability. Further, we are aware from discussions with Lambourn Parish Council that the developer has previously stated that the site is not able to viably deliver the most pressing affordable housing needs of the village (i.e. 1 bedroom social rent dwellings for racing staff). This is further indication that the allocation is not viable or deliverable. Further, part of the allocation is in Flood Zone 3 and near to River Lambourn SAC / SSSI, such that we consider a review of its suitability is required. NPPF paragraph 120 advises Local Planning Authorities that planning policies and decisions need to reflect changes in the demand for land and should be informed by regular reviews of both the land allocated for development in plans, and of land availability. Where the local planning authority considers there to be no reasonable prospect of an application coming forward for the use allocated in a plan they should, if appropriate,</p>	

Respondent (with lpr ref)	Response	Council Response
	deallocate sites which are undeveloped. We do not consider Land Adjoining Lynch Lane to be deliverable and therefore recommend that the Council should consider other more appropriate sites to meet the village's housing needs.	
Carter Planning Ltd on behalf of Mr R.L.A. Jones (lpr1904)	<p>The policy is not supported. Our Clients have made representations elsewhere that the housing provision in the Plan is inadequate and extra sites should be included, in particular our Client's Site formerly known as "Land between Folly Road, Rockfel Road and Stork House Drive (SHLAA site reference LAM007)".</p> <p>However if the Council considers that extra sites are not required then LAM007 should be included instead of sites RSA22 or more particularly RSA23 in the Draft Plan document.</p> <p>RSA 22 has the disadvantage of being a very large site for the village to accommodate. The capacity of the site has risen arbitrarily since the 2014 Preferred Options document and yet the constraints have increased. It lies alongside an SSI/SAC and part of the site is liable to flooding from the River Lambourn which flows along the northern boundary. No work was carried out on a number of aspects including archaeology before its previous allocation. It appears that the site capacity has arbitrarily increased by 4 units from 56 in the 2014 document to 60 in the adopted document merely so that, together with site RSA23, it tried to compensate for the unjustified omission in this version of the Plan of site LAM007 which was previously included.</p> <p>The Summary of Lambourn Sites previously noted the negative points in relation to environmental sustainability and flooding. The need for a buffer zone and the inability to develop within the flood zone appear to reduce the size and capacity of the site and not to increase it as was previously suggested (from 56 to 60) in the adopted DPD.</p> <p>When the site was proposed in the adopted Plan the Parish Council within their response included the following key points:-</p> <ul style="list-style-type: none"> <li>• "Environment -the site is within the AONB. The site is immediately adjacent to the River Lambourn, the corridor of which is a Site of Special Scientific Interest.</li> </ul>	<p>Comments noted.</p> <p>Several sources will ensure a continuous supply of housing across the plan period. These include retained allocations in the Local Plan. The site is currently allocated in the Housing Site Allocations DPD which forms part of the existing Local Plan. Because development has not yet been built out, the allocation is being retained.</p> <p>The site LAM1 was promoted as part of the HELAA which concluded the site was 'potentially developable in part'. Development of the lower eastern sections of the site would not harm the natural beauty of the AONB and would relate to the existing settlement pattern.</p> <p>Following the publication of the HELAA in February 2019 and the update in December 2020, further evidence for the LPR has been produced. The Level 2 Strategic Flood Risk Assessment (SFRA) published in December 2021 indicates that part of the site is at risk from groundwater emergence during a 1 in 100 year flood event.</p> <p>The Level 2 SFRA mentions that whilst there weren't any reported incidences of groundwater flooding on the site during the 2013/14 flood event, this might have been because the site is grassland rather than a habited property so wasn't reported. Groundwater emergence modelling indicates that part of the site was affected. The revised NPPF published in July 2021 now places emphases on considering "...flood risk from all sources and the current and future impacts of climate change..." (para 160). The NPPF is clear at para 159 that "...inappropriate development in areas at risk of flooding</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• Housing and the Community – Lambourn needs a period of consolidation to adjust to the social impact resulting from recent rapid growth.</li> <li>• Industry – impact on the racehorse industry– safety of horses and riders will be affected by increased traffic generation.</li> <li>• Archaeology – Lambourn formed part of the parkland of Lambourn Place, and the site is believed to be a site of a Saxon palace. Any development would destroy this.</li> <li>• Roads – roads are narrow, with blind bends and dangerous junctions. Inadequate footpaths and the roads are busy. Any increase in traffic will be detrimental to the safety of the road users".</li> </ul> <p>These matters not satisfactorily addressed.  The Lambourn Site Assessments document, in its summary notes that "the Parish Council had various concerns about this site, as does the local community". Indeed this was the least favoured site for development by the residents responding to the survey.  Since being selected for the last Local Plan and accepted by the Inspector in April 2017 the site has not come forward.  No applications have been made for its development.  It does not appear to be genuinely available and should now be omitted from the emerging Draft Plan.  The Plan's approach to the selection of sites is not justified.  The Draft Plan's approach to the selection of sites is not justified. Land adj. Lynch Lane has not come forward for development since its inclusion in the former Plan in April 2017. Further the detailed examination of Policy RSA22 means that it may not be delivered in future either or may only delivered with reduced capacity. Our Clients would prefer that Site RSA22 is now omitted. However if there is a need for additional housing then our Client's site formerly LAM007 Land off Rockfell/Folly Road should be included as a site to ensure that the Local Plan Review is both sound and effective.</p>	<p><i>should be avoided by directing development away from areas at highest risk (whether existing or future)."</i></p>

Lambourn NDP Steering Group (lpr1710)	<p>We note the parameters in Policy RSA23 and agree with them. They must be applied.</p> <p>In looking at the edge of settlement in Lambourn, the Landscape Character Appraisal (<i>attached to the representation</i>) undertaken for the Lambourn NDP commented on this site:</p> <p>Development at land allocation HSA20 on Newbury Road should be designed to consider this viewpoint (from the north west) and the existing western boundary of the village. Landscaping proposals for the site should ensure native broadleaved trees form the upper part of the allocation as per planning policy HSA20 of the local plan.</p> <p>Upper valley sides are important to the setting of Lambourn in context of the AONB.</p> <p>Development above the natural topographic enclosure of the village would be detrimental to the overall setting and views at this location. Development at land allocation HSA20 on Newbury Road should be designed to consider this viewpoint (<i>from the southwest</i>) and the existing western boundary of the village. Landscaping proposals for the site should ensure native broadleaved trees form the upper part of the allocation as per planning policy HSA20 of the local plan.</p> <p>These comments largely align with the parameters in Policy RSA23.</p>	Comments noted.

Respondent (with lpr ref)	Response	Council Response
	<p>We note the planning application 20/00972/FULMAJ for this site is for 8, not 5 dwellings.</p> <p>Our Emerging Settlement Character Appraisal has identified that Woodbury and indeed the other dwellings on the north side of Newbury Road are set well back from the road creating good transition from the countryside into the village.</p>	
Lambourn Parish Council (lpr2471)	<p>RSA22: (Formerly HSA19) Land adjoining Lynch Lane: 60 dwellings            RSA23: (Formerly HSA20) Land at Newbury Road: 5 dwellings            This leaves a shortfall of 25 units, 90 being the number of houses WBC judge will be needed. (This number can be updated during the life of the Local Plan). Housing, especially affordable housing, is needed in Lambourn.</p> <p>WBC are aware the emerging Lambourn NDP is not planning to bring forward sites for the allocation of housing. It is anticipated natural development will fill the quota. The emerging LNDP will contain Design Codes to address issues of density and appearance. A NDP, once made is subject to monitoring and review.</p> <p>RSA23: (Formerly HSA20) Land at Newbury Road: 5 dwellings            An amended Planning Application for 8 dwellings on this site is currently with WBC, to which Lambourn Parish Council has commented:            20/00972/FULMAJ - Land North of Newbury Road, Lambourn – Erection of eight semi-detached 'build to rent affordable eco-dwellings, parking, landscaping and associated works. Amended plans received. LPC objected to the original plan in June, on the grounds that: 1. Twice as many houses as allocated for site, which increases traffic and demands on parking spaces 2. Detrimental impact on AONB – unimaginative and inappropriate design, poorly screened 3. Level of affordable housing rent was unrealistic 4. Access unsuitable for elderly residents (Both 3 and 4 miss identified housing shortage groups) 5. Concerns re: drainage and sewers            Delighted to see amended plan both reduces the number of houses (from 10 to 8) and substantially alters the design of the houses. There are now 4 different versions of the plans, so each pair of houses is different, and screening and parking has been improved. The applicants are to be commended for all of this. Regarding the house plans, we suggest they do</p>	<p>Comments noted</p> <p>Comments in relation to housing numbers and the NDP are dealt with under the Council's response to Policy SP1 and Policy SP12.</p> <p>Planning permission for development on the site was granted in September 2021. Because development has not yet been built out, the allocation is being retained.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>not use type 2, because the flat roof does look very different to the others, which all have gables in some form or another. Repeating the design of type 1, 3 or 4 would be a good fit. LPC is still concerned about the level of affordable housing rent. We note the Housing Development Officer has reservations about the lack of detail concerning affordable housing. LPC's concerns about the drainage and sewers remain.</p> <p>The Lambourn LCA also comments: Development at land allocation HSA20 on Newbury Road should be designed to consider this viewpoint (from the South West of Lambourn) and the existing western boundary of the village. Landscaping proposals for the site should ensure mature broadleaved trees form the upper part of the allocation as per planning policy HSA20 of the local plan.</p> <p>Changes: [For RSA23] We expect the criteria/conditions in the policy to be adhered to and would like consideration to be given to the recommendations in the Lambourn LCA.</p>	
Environment Agency (lpr1673)	<p>Due to the proximity of the River Lambourn SSSI and SAC, any development must be shown to have no adverse impacts on the river and its corridor, for instance from surface water run-off. As with RSA 22, the development must connect to the main sewerage system.</p>	<p>Comments noted.</p> <p>A Phase 1 and Phase 2 Water Cycle Study have since been prepared and will be reflected in the policy as follows -</p> <p><u>'An integrated water supply and drainage strategy will be provided in advance of development to ensure the provision of adequate and appropriate infrastructure for water supply and waste water, both on and off site. Development will be occupied in line with this strategy. Development on the site will connect to the mains sewerage system. Infiltration from groundwater into the</u></p>

Because development has not yet been built out, the allocation is being retained.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Our client does not object to the reallocation of this site, as despite some clear difficulties with bringing the site forward (one application refused – Ref: 17/00825/FULD – due to a failure to agree an off-site affordable contribution and a second application with outstanding landscape and housing objections - 20/00972/FULMAJ), there is clear intent on behalf of the landowner to bring the site forward.</p>	
<p>Carter Planning Ltd on behalf of Mr R.L.A. Jones (lpr1905)</p>	<p>The policy is not supported. RSA 23 should be deleted and replaced by our Clients previously preferred Option Site “Land between Folly Road, Rockfel Road and Stork House Drive” (SHLAA site reference LAM007). Site RSA 23 has not commenced development since being allocated in April 2017.</p> <p>Indeed planning permission was refused that year because:- “1. Notwithstanding the fact that the application forms part of the HSADPD 2017 as adopted, the applicant has failed to enter into a s106 planning obligation to achieve an appropriate contribution, for affordable housing of £400,000, in accord with policy CS6 in the West Berkshire Core Strategy 2006 to 2026. It is thus contrary to policies GS1 and HSA20 in the HSADPD of 2017 and policy CS6 as identified and the advice in the NPPF”. Please see application 17/00825/FULD and the refusal notice dated 19th October 2017.</p> <p>Further application has been made to develop the site which remains undetermined.</p> <p>In the 2017 application the Parish Council and Natural England objected because of the visual impact on the landscape. There was no information on flooding and archaeology and there were highways problems with bin storage, the need to move a bus stop and the lack of a foot path across the entire site frontage. No affordable housing was provided.</p> <p>This rather suggests that the site is not practical or economic to develop. Application ref. 20/00972/FULMAJ has been amended from 10 to 8 dwellings which exceeds the Local Plan density. Despite being submitted on 21 April 2020 it remains undetermined.</p> <p>The principal problem with the development is stated to be the effect on the wider landscape character of the area, in particular against the underlying objective to conserve and enhance the landscape character of the AONB. The proposed development due to its high density of dwellings is thought to</p>	<p>Comments noted.</p> <p>Several sources will ensure a continuous supply of housing across the plan period. These include retained allocations in the Local Plan. The site is currently allocated in the Housing Site Allocations DPD which forms part of the existing Local Plan. Because development has not yet been built out, the allocation is being retained.</p> <p>The site LAM1 was promoted as part of the HELAA which concluded the site was ‘potentially developable in part’. Development of the lower eastern sections of the site would not harm the natural beauty of the AONB and would relate to the existing settlement pattern.</p> <p>Following the publication of the HELAA in February 2019 and the update in December 2020, further evidence for the LPR has been produced. The Level 2 Strategic Flood Risk Assessment (SFRA) published in December 2021 indicates that part of the site is at risk from groundwater emergence during a 1 in 100 year flood event.</p> <p>The Level 2 SFRA mentions that whilst there weren’t any reported incidences of groundwater flooding on the site during the 2013/14 flood event, this might have been because the site is grassland rather than a habited property so wasn’t reported. Groundwater emergence modelling indicates that part of the site was affected. <b>Statutory consultees</b>		
Thames Water (lpr1765)	<p>The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website <a href="https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development">https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development</a>.</p> <p>On the information available to date we do not envisage infrastructure concerns regarding wastewater network or wastewater treatment infrastructure capability in relation to this site/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing.</p> <p>Groundwater: The applicant is advised that their development boundary falls within a Source Protection Zone for groundwater abstraction. These zones may be at particular risk from polluting activities on or below the land surface. To prevent pollution, the Environment Agency and Thames Water</p>	<p>Comments noted.</p> <p>The site was allocated within the Housing Site Allocations Development Plan Document (HSA DPD) which was adopted in May 2017.</p> <p>Outline planning permission (17/03411/OUTMAJ) was granted in February 2019 and Reserved Matters permission (20/02410/RESMAJ) in January 2021.</p> <p>The allocation will now be removed from the LPR as the site has planning permission and development is under construction.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>(or other local water undertaker) will use a tiered, risk-based approach to regulate activities that may impact groundwater resources. The applicant is encouraged to read the Environment Agency's approach to groundwater protection and may wish to discuss the implication for their development with a suitably qualified environmental consultant.</p> <p>There may be existing public sewers crossing the site. If building over or close to a public sewer is agreed to by Thames Water it will need to be regulated by a 'Build over or near to' Agreement in order to protect the public sewer and/or apparatus in question. It may be possible for public sewers to be moved at a developer's request so as to accommodate development in accordance with Section 185 of the Water Act 1989.</p> <p>Thames Water have no concerns relating to wastewater capacity based upon the assumption that the connection is via gravity and that no surface water shall be discharged to the Thames Water foul sewer network.</p>	
<b>Other stakeholders</b>		
Councillor Tony Vickers (lpr981)	<p>The policy is supported.</p> <p>We believe that other HELAA sites adjacent (Brad2/3/5) could increase the allocation here by about 45. Add in HELAA sites Brad2/3/5 at the numbers promoted.</p>	<p>Support noted.</p> <p>The site was allocated within the Housing Site Allocations Development Plan Document (HSA DPD) which was adopted in May 2017.</p> <p>Outline planning permission (17/03411/OUTMAJ) was granted in February 2019 and Reserved Matters permission (20/02410/RESMAJ) in January 2021.</p> <p>The allocation will now be removed from the LPR as the site has planning permission and development is under construction.</p>

**Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)****Emerging Draft LPR Policy: RSA25 Land North of Southend Road, Bradfield Southend****(Proposed Submission LPR Policy: RSA16 Land North of Southend Road, Bradfield Southend)**

<b>Statutory consultees</b>		
Bradfield Parish Council (lpr1856)	<p>The proposed access to the site “Access from South End Road, via the small industrial estate...” is impractical. The options for access to the site which, we understand have been considered are:</p> <ul style="list-style-type: none"> <li>• Access from South End Road: The road/track is not wide enough to support access to the proposed development site. Use of the track would mix industrial/commercial traffic with residential traffic. There is not enough width for a footway or utilities strip.</li> <li>• Access via Stretton Close: This is unlikely to be possible. The development of Land off Stretton Close (see RSA 24) has been granted planning permission (see 17/03411/OUTMAJ and 20/02410/RESMAJ) which does not include a sacrifice strip to enable access to the site. The approved highway is a ‘shared surface’. The housing density approved, precludes this access.</li> <li>• Access from Cock Lane via Crack Willow would require highway construction across both BRAD2 and BRAD3. Both these sites were discounted for development following the HELAA submission.</li> </ul>	<p>Comments noted.</p> <p>The Highways Authority comment that adoptable access is achievable immediately on to Southend Road. The scheme is relatively small scale, and thus the access is appropriate for a development of this size.</p> <p>Bradfield Southend is a Service Village, where there is potential for some limited and small-scale development potential, appropriate to the character and function of the village, in order to meet local needs. Bradfield Southend benefits from some key facilities, including a shop and primary school. 20 dwellings is considered appropriate as a small scale development in this location.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The plot of land is essentially landlocked. The earlier assessments of the sites in Bradfield were based upon there being a regular two hourly bus service; this has since been reduced to a bus service on Monday and Wednesday only.</p>	
Thames Water Utilities (lpr1766)	<p>The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website <a href="https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development">https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development</a>.</p> <p>On the information available to date we do not envisage infrastructure concerns regarding wastewater network or wastewater treatment infrastructure capability in relation to this site/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email <a href="mailto:Devcon.team@thameswater.co.uk">Devcon.team@thameswater.co.uk</a> tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p>Groundwater: The applicant is advised that their development boundary falls within a Source Protection Zone for groundwater abstraction. These zones may be at particular risk from polluting activities on or below the land surface. To prevent pollution, the Environment Agency and Thames Water (or other local water undertaker) will use a tiered, risk-based approach to regulate activities that may impact groundwater resources. The applicant is encouraged to read the Environment Agency's approach to groundwater protection (available at</p>	<p>Comments noted. The developer will be aware of their responsibilities through the planning process, and in consideration of Policy DM7.</p> <p>A criterion will be added to the policy: '<u>An integrated water supply and drainage strategy will be provided in advance of development to ensure the provision of adequate and appropriate infrastructure for water supply and waste water, both on and off site. Development will be occupied in line with this strategy</u>'.</p>

Respondent (with lpr ref)	Response	Council Response
	<p><a href="https://www.gov.uk/government/publications/groundwater-protection-position-statements">https://www.gov.uk/government/publications/groundwater-protection-position-statements</a>) and may wish to discuss the implication for their development with a suitably qualified environmental consultant.</p> <p>Thames Water have no concerns relating to wastewater capacity based upon the assumption that the connection is via gravity and that no surface water shall be discharged to the Thames Water foul sewer network. If possible foul water discharge should be split between sewers to the north and south to reduce the impact on the existing infrastructure.</p>	
<b>General consultation bodies</b>		
North Wessex Downs AONB (lpr1618)	<p>Supports the allocation. The site is the logical choice and would tie in with the existing allocation, landscape buffer would reduce the developable area to one that is more appropriate for the settlement. Development along the south western edge in line with the current allocation would be acceptable without detriment to the north western boundary of Bradfield Southend. This part of the site is well contained by existing landforms, vegetation and the existing built environment.</p>	<p>Comments noted. The site specific policy will detail the landscape buffer.</p>
<b>Other stakeholders</b>		
Jonathan Alderman (lpr547)	<p>The site is land locked because the access proposed is non-viable. A report, produced in 2014 by Michael Wheat, assessed 3 options to access the land behind Stretton Close, including the access proposed for this site. It was concluded that the proposed access was non-viable and unacceptable due to the inability to upgrade it to an appropriate adoptable standard in terms of layout and visibility without acquiring third party land. The access also passes through a small industrial estate and it was considered inappropriate to mix commercial and residential traffic. The access via Stretton Close is also non-viable as the site (RSA24) has now been granted outline planning permission.</p> <p>Re RSA25 there are no changes I am seeking as it is a non-starter. The decisions on site allocation in Bradfield Southend all carry ramifications linked to infrastructure provision and transport for the village. These are all</p>	<p>The Highways Authority comment that adoptable access is achievable immediately on to South End Road.</p> <p>Bradfield Southend is a Service Village, where there is potential for some limited and small-scale development potential, appropriate to the character and function of the village, in order to meet local needs. Bradfield Southend benefits from some key facilities, including a shop and primary school. 20 dwellings is considered appropriate as a small scale development, and residents will be able to support these services.</p> <p>The formal consultations held for the Local Plan Review are one method of engaging with Parish Councils, and the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>very poor currently and will not sustain any significant development proposals.</p> <p>The LDP review of Bradfield Southend should involve the local Parish Council and other community stakeholders to determine the best way to proceed. Perhaps a Neighbour Plan is one option.</p>	<p>Parish Council has engaged with the process. The Parish Council is able to prepare a Neighbourhood Development Plan.</p>
Michelle Belcher (lpr2276)	<p>Does not agree with the proposed site allocation.</p>	<p>Comments noted.</p>
Fiona McPherson Crowther (lpr2143)	<p>I am writing to register my objection to the emerging draft of the Local Plan, with particular reference to the proposed RSA25 site ref BRAD5 Bradfield Southend. This site sits in an ANOB, thus would have a detrimental and significantly adverse impact on local wildlife. The site sits next to a recently approved development, meaning the village is likely to become overdeveloped. The village does not have sufficient infrastructure or services to sustain more housing, with no reliable and regular public transport. The proposed site access is unsuitable, with existing covenants and Stretton Close is also unsuitable given the recent approval of a development. In addition the field floods, causing surface water to collect in the track and gardens. The increased traffic will bring further pollution to an AONB. The long term impact of moving settlement boundaries has not been thoroughly considered, as it will lead to a significant loss of established, rich wildlife habitat and allow for potential extensive future infill of the village.</p>	<p>Comments noted.</p> <p>Based on the site area there is potential for some 33 dwellings. However, it was considered that due to the AONB location and impact on the landscape, the size of Bradfield Southend with services contained within, and following on from a landscape assessment, that part of the site is appropriate for development. On this basis 20 dwellings is considered appropriate.</p> <p>The site is within Flood Zone 1, and therefore has the lowest probability of flooding. There is an existing watercourse in the northern part of the site. Development would not be located in this area. SuDS would be required, as required by Policy SP6 of the Local Plan Review.</p>
Diane Turner (lpr2133)	<p>I am writing to you today regarding the proposed RSA25 site ref BRAD5 Bradfield Southend. This consists of a proposal of up to 13 new dwellings with access from South End Road. The site marked out on the map includes access from the main road down a track to the proposed field. This is a privately owned.</p> <p><b>Policy RSA 25 Land North of Southend Road, Bradfield Southend (Site Ref: BRAD5)</b></p> <p>The site, as identified on the indicative map, is proposed to be allocated for residential development.</p> <p>The site has a developable area of approximately 0.8ha, taking into account the outcomes of the Landscape Capacity Assessment (2014).</p>	<p>Comments noted.</p> <p>The Highways Authority comment that adoptable access is achievable immediately on to South End Road.</p> <p>The site promoters consider that they are able to use the access road to Southend Road. It is not envisaged in this policy that access, through the Stretton Close development, would be a reserve option. This is particularly important given the presence of trees protected under Tree Protection Orders on the eastern boundary of the site.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The developable area of the site could accommodate up to 13 dwellings. Detailed policy criteria will be developed to highlight specific mitigation measures and infrastructure requirements that will include amongst others: The provision of a substantial tree belt along the northern boundary, linking to the existing tree belt on the eastern boundary and with new tree planting in site RSA24.</p> <p>Access from South End Road, via the small industrial estate, subject to an assessment of the impact on existing trees.</p> <p>A full detailed landscape and visual impact assessment that will inform the final capacity of the site.</p> <p>However, if the plans are approved in the future for RSA25 but access cannot be gained from South End Road this could impact us in Stretton Close as a proposed site has been applied for and now approved with up to 10 dwellings RSA24 site ref: HSA22.</p> <p>I would like it noted that I <b>object</b> to the proposed site RSA25 <b>or access</b> through Stretton Close. The impact of further traffic through a small village and through a small entrance in Stretton Close will have a significant impact on current households. The facilities within the village are already stretched and with the possibility of further housing on the horizon is worrying and stressful.</p>	<p>Bradfield Southend is a Service Village, where there is potential for some limited and small-scale development potential, appropriate to the character and function of the village, in order to meet local needs. Bradfield Southend benefits from some key facilities, including a shop and primary school. 20 dwellings is considered appropriate as a small scale development, and residents will be able to support these services.</p>
Councillor Tony Vickers (lpr982)	Supports the allocation. Notes it was promoted for 33 dwellings. Suggest an increase to 30.	Comments noted. It is considered that approximately 20 dwellings would be appropriate for this location, and alongside the adjacent site on land at Stretton Close. This is in regard to the AONB location and landscape evidence, and in consideration of the size of Bradfield Southend with services contained within.
<b>Landowners, site promoters and developers</b>		
Pro Vision for Rivar Ltd (lpr1515)	<p>Supports the allocation.</p> <p>Policy SP 15 of the Consultation Document identifies part of the 'Land north of Southend Road, Bradfield Southend' as a preferred site allocation for approximately 13 dwellings.</p> <p>A site-specific Policy is included at Policy RSA 25 of the Consultation Document and confirms that part of the site has been allocated due to the</p>	Comments noted.

Respondent (with lpr ref)	Response	Council Response
	<p>outcomes in the Council's Landscape Capacity Assessment (2014) and located in the North Wessex Area of Outstanding Natural beauty (AONB). However, it is acknowledged that there is a need for a detailed landscape and visual impact assessment (LVIA) to inform the final capacity of the site. We agree with the Council's conclusions in the HELAA and the Site Selection Background Paper (December 2020) that the site is suitable for allocation for residential development.</p> <p>It is considered that the subject site is a developable option for the following reasons:</p> <ul style="list-style-type: none"> <li>a) There is a need to identify small/medium scale sites for housing in West Berkshire to meet the indicative housing requirements during the plan period.</li> <li>b) Bradfield Southend is identified as a 'service village' in the settlement hierarchy and, therefore, a suitable location for reasonable additional growth.</li> <li>c) The site would adjoin the existing built-up area and is considered an appropriate extension to Bradfield Southend.</li> <li>d) Residential development in this location would be in keeping with the surrounding area and will seek to conserve and enhance the AONB.</li> <li>e) The provision of additional tree planting provides an opportunity to provide a robust boundary to the settlement and provide landscape and ecological enhancements.</li> <li>f) Further opportunity to deliver new areas of green infrastructure and the creation of areas of green amenity/open space, including biodiversity benefits.</li> <li>g) The site is located in Flood Zone 1 (i.e. low probability of flooding) and a sustainable drainage system would be provided.</li> <li>h) The development of the site will assist in supporting local facilities and other business services in the village through an uplift in population and their associated increase in local expenditure.</li> <li>i) The site is in close proximity to key local facilities and services available. Future residents would therefore benefit from these existing services.</li> <li>j) A vehicular access can be delivered along the existing commercial roadway via Southend Road.</li> <li>k) The scale of dwellings proposed is capable of delivering housing in line with local objectives, such as need for affordable housing.</li> </ul>	

Respondent (with lpr ref)	Response	Council Response
	<p>l) The site is greenfield - therefore it is likely that there are no significant constraints (such as contamination) which would preclude development of the site on viability grounds.</p> <p>m) The site is available for a residential development immediately. The development land is within single ownership and Rivar has an agreement to purchase this land.</p> <p>n) Furthermore, as far as we are aware, there are no factors which would prevent this site coming forward for residential development.</p> <p>Accordingly, there are no identifiable constraints that would prevent the delivery of the site for residential development. The site is therefore suitable, available, and achievable for a small/medium scale development of new homes, in a timely and sustainable manner.</p> <p>We trust the above comments clearly set out Rivar's position at this stage. We look forward to engaging with the Council through the continued preparation of the Plan and to provide further information to support the proposed allocation of the site. We would be very happy to arrange a meeting to enable further discussions.</p>	
West Build Homes (lpr2141)	<p>Westbuild contends that RSA25 (land north of Southend Road, Bradfield) cannot be delivered with the vehicular access as shown, due to adverse impact on protected trees, and insufficient geometry/ width for an adopted road between the existing buildings, root protection zones and boundaries. Site RSA25 should be removed from SP15.</p>	<p>Comments noted.</p> <p>The Highways Authority do not report concerns and comment that an adoptable access is achievable immediately on to Southend Road. The policy would ensure that the access would need to take into account the TPOs on the eastern boundary.</p>
Bell Cornwell for Friday Street Developments (lpr2362)	<p><i>Representation promoting the allocation of land at Ash Grove, Bradfield Southend.</i></p> <p>We object to the allocation RSA 25 land north of Southend Road, which we have assessed is not justified in terms of the evidence. We consider that the Council has been inconsistent in their assessment of that site, particularly in regard to the selection of a partial area of the site for allocation – and their previous assessment of the site.</p>	<p>Comments noted.</p> <p>The site was previously ruled out based on landscape advice. If Stretton Close was to remain undeveloped the site would be poorly connected to the rest of the settlement. Now that the site at Stretton Close has outline and reserved matters permission granted with development underway, the proposed allocated site would be read alongside this site. As outlined in the AONB Board's comments the site would be a logical extension. Appropriate landscaping would be required in the site specific criteria.</p>

<b>Statutory consultees</b>		
Chieveley Parish Council (lpr1723)	<p>Disagree with the proposed allocation.</p> <ol style="list-style-type: none"> <li>1. There is insufficient information on this proposed allocation and how the form of development proposed. This is evident when compared to other allocation proposals set out in the Plan. The issues mentioned below are of particular concern.</li> <li>2. Following the Parish Plan consultation there is a need in the Chieveley to provide a new burial ground. Site RSA 26 is also the site of the most likely location for a new burial ground. There is no mention as to how this will be achieved if RSA 26 goes ahead and as currently proposed the allocation would prevent the future development of a burial ground in this location.</li> <li>3. It is not clear how the site and/or individual dwellings would be accessed from East Lane, including whether there would be individual accesses to East Lane from the 15 dwellings.</li> </ol>	<p>Comments noted.</p> <p><u>Information on the proposed allocation:</u></p> <p>Within the Regulation 18 draft emerging Local Plan Review (LPR) it was made clear that the detailed policy criteria for the new allocations was still to be developed.</p> <p>In the time available to prepare the draft emerging LPR for a Regulation 18 consultation in December 2020, it was unfortunately not possible to prepare detailed policies for the new residential allocations.</p> <p>A number of residential allocations within the draft emerging LPR have been retained from the Housing Site Allocations Development Plan Document (HSA DPD), which forms part of the current Local Plan. It is for this</p>

Respondent (with lpr ref)	Response	Council Response
	<p>4. Traffic is already an issue in Chieveley, notably at the East Lane/High Street junction and around the Doctor's surgery. More development and accesses in this location would need full assessment.</p> <p>5. Impact on the environment including the landscape impact of the loss of hedgerows and trees and their protection.</p> <p>That said, Chieveley Parish Council agrees with the Council and its landscape assessment that the larger area of land at RSA 26 which is shown edged blue on the inset plan for this site should not be developed.</p> <p><b><i>What changes are you seeking / what would be your preferred approach?</i></b></p> <p>Removal of site RSA 26 from the Local Plan.</p>	<p>reason that some allocation policies were more detailed than others.</p> <p><u>Burial ground:</u></p> <p>At the time of the Regulation 18 consultation on the draft emerging LPR, West Berkshire Council (WBC) were unaware that the burial space available at St. Mary's Church was running out.</p> <p>As part of their Regulation 18 representations, the landowner of proposed allocation 'Land at Chieveley Glebe' suggested that a burial ground could be accommodated within the wider area of land originally promoted for development.</p> <p>A Landscape Sensitivity Assessment (LSA) carried out in 2011 (which considers the wider area of land promoted for development) advises that the site is large in scale in comparison to the settlement, and extends further back from the roads than typical elsewhere. The LSA goes on to advise that the site has a strong relationship with countryside to the north.</p> <p>The LSA recommends that the whole site would be unsuitable for development because it would not be possible to repeat the linear pattern of the rest of Chieveley.</p> <p>The proposed allocation is for a line of linear development along East Lane to ensure that the existing settlement pattern is reflected.</p> <p><u>Access and traffic:</u></p>

Respondent (with lpr ref)	Response	Council Response
		<p>The dwellings would front onto East Lane, and a number of private accesses would be provided. The Local Highway Authority have not raised any objections to this.</p> <p>The Local Highway Authority have advised that they have no concerns regarding the provision of 15 dwellings with regards to traffic impact.</p> <p><u>Environmental impact:</u></p> <p>The site was promoted through the ‘call for sites’ for the Council’s Housing and Economic Land Availability Assessment (HELAA). The HELAA forms part of the evidence base for the Local Plan Review (LPR) and it makes a preliminary assessment of the suitability and potential of sites.</p> <p>As part of this work, a desktop assessment of the impact that development might have on nature conservation was undertaken by the Thames Valley Environmental Research Centre (TVERC). Comments were also sought from Natural England and the Berkshire, Buckinghamshire and Oxfordshire Wildlife Trust (BBOWT).</p> <p>The assessment by TVERC highlighted there was a medium risk of adverse impacts. Natural England advised that the site was unlikely to have an impact on a Site of Special Scientific Interest, whilst there might be water quality impacts on the River Lambourn Special Area of Conservation which would need to be considered through the Habitats Regulations. BBOWT advised that a net gain in biodiversity must be delivered.</p> <p>The policy for the allocation will include a requirement for surveys, and the final developable area will be dependent</p>

Respondent (with lpr ref)	Response	Council Response
		<p>upon the extent of any appropriate evidence and mitigation measures. The wording of the requirement will be as follows:</p> <p><i><u>f. The scheme will be informed by an extended phase 1 habitat survey with further detailed surveys arising from that as necessary Ecological Impact Assessment (EclA). Appropriate avoidance and mitigation measures will need to be implemented to ensure any designated sites and/or protected habitats and/or species are not adversely affected;</u></i></p> <p>All development sites will be required to provide a minimum 10% net biodiversity gain as per policy SP11 (Biodiversity and Geodiversity).</p> <p><u>Landscape assessment:</u></p> <p>Support for the LSA noted.</p>
Historic England (lpr1580)	<p><i>See attachments on Objective for full response to the Local Plan Review consultation.</i></p> <p>This site is adjacent to a conservation area that lacks a conservation area appraisal. A conservation area appraisal should be carried out as part of the plan-making process (i.e. prior to allocation), in to inform development on this site. As a minimum, a heritage impact assessment should be carried out prior to allocation, in order to ensure that the principle of development on this site is acceptable, in terms of impact on the setting of the conservation area and that an appropriate level of development is allocated in the plan. Without such evidence to inform the plan-making stage, there is a risk that the plan could allocate too much or too little development on the site.</p>	<p>Comments noted.</p> <p>The Council is in the process of preparing Conservation Area Appraisals.</p> <p>The site allocation policy will include a requirement for a Heritage Impact Assessment:</p> <p><i><u>g. The development design and layout will be further informed by a Heritage Impact Assessment.</u></i></p>
Savills (UK) Ltd for Thames Water (lpr1758)	<b>Water response:</b>	Comments noted.

Respondent (with lpr ref)	Response	Council Response
	<p>On the information available to date we do not envisage infrastructure concerns regarding water supply network infrastructure in relation to this development/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p><b>Waste Response:</b></p> <p>On the information available to date we do not envisage infrastructure concerns regarding wastewater network or wastewater treatment infrastructure capability in relation to this site/s. An integrated water supply and drainage strategy will be provided in advance of development to ensure the provision of adequate and appropriate infrastructure for water supply and waste water, both on and off site. Development will be occupied in line with this strategy. A housing phasing plan will be required to ensure development does not outpace delivery of essential network upgrades to the Chieveley Sewage Treatment Works.</u></i></p>
<b>General consultation bodies</b>		
North Wessex Downs AONB (lpr1619)	Agree with the proposed allocation.	Support for allocation noted.

Respondent (with lpr ref)	Response	Council Response
	<p>The original site promotion has been radically reduced inline with previous comments and is considered acceptable. Its linear form will ensure the pattern of development on the northern side of East lane is continuous and sympathetic to the village. The detail within an application will be important and in particular the northern boundary treatment with the field. A landscape buffer other than a hedge would not be appropriate and we are pleased not to see a large buffer included.</p>	
<b>Other stakeholders</b>		
Mr & Mrs Avery (lpr49)	<p>Having viewed the draft plan by the council I am writing to voice our concerns with this proposal. In our view development of the land as set out in the draft plan is completely inappropriate. There are a number of features and considerations that make this identified area unsuitable for development as outlined below.</p> <p><b>Character of the village</b></p> <p>The character of the village is subject to protection by the terms of the ANOB designation. An important part of that character is the maintenance of the rural vistas. East Lane is an important route of access to the village and the proposal will change the presentation from one that is rural to one that is essentially urban. This is not consistent with the ANOB designation.</p> <p><b>Safety</b></p> <p>East Lane is a narrow country lane. The proposal will inevitably mean more traffic and the likelihood of obstruction of access. This is particularly important as the doctors surgery is sited opposite the western end of the proposed site. There are already difficulties with obstruction around the surgery and the proposal will exacerbate these problems. Furthermore the entrances at either end of East Lane are difficult junctions and there have already been a number of serious accidents, particularly at the junction with the Old Oxford Road.</p>	<p>Comments noted.</p> <p><u>Character of the village:</u></p> <p>A Landscape Sensitivity Assessment (LSA) carried out in 2011 (which considers the wider area of land promoted for development) advises that the site is large in scale in comparison to the settlement, and extends further back from the roads than typical elsewhere. The LSA goes on to advise that the site has a strong relationship with countryside to the north.</p> <p>The LSA recommends that the whole site would be unsuitable for development – it would not be possible to repeat the linear pattern of the rest of Chieveley without developing along the rural road to the east, which would harm the countryside setting on the east side of the village.</p> <p>In light of the recommendations of the LSA, only a small amount of linear development is proposed along the frontage of East Lane.</p> <p>The Local Highway Authority does not object to accesses off East Lane.</p> <p><u>Safety:</u></p>

Respondent (with lpr ref)	Response	Council Response
	<p><b>Environmental impact</b></p> <p>The proposed site is along the road/field boundary currently occupied by a hedge containing a number of ancient trees. The hedge would meet the criteria for protection under the Hedgerow Regulations 1997 due to it's length, location, because it contains endangered/protected species and because it forms the boundary of Glebe land. The hedge line is home to a number of important species such as bats, hedgehogs, birds (including owls) and also facilitates the movement of these species and others including deer. The proposal will clearly have a very significant adverse impact on these animals</p> <p><b>Infrastructure</b></p> <p>Chieveley has already seen significant expansion over the last 20 years and it is clear that aspects of the existing infrastructure struggle to cope with the current population level. Of particular concern is the level of medical coverage. The current doctor's practice already has difficulty in maintaining an appropriate level of service, this will be compounded by the proposals to designate areas for housing in Compton which this practice also covers. There are also concerns with the provision of local school places and as previously outlined, the existing road structure. We are also concerned that the proposal to allocate this land for housing will be on top of the land already available at Bardown which is currently underutilised. Should this also be developed the population increase would not only break the existing infrastructure but would fundamentally change the character of the village.</p> <p>In conclusion, in our view, this particular site has numerous issues that render it unsuitable for residential or mixed use development.</p>	<p>The Local Highway Authority provided comments on the site as part of work on the Housing and Economic Land Availability Assessment and site assessment work. No concerns were raised around safety, although they have specified that to achieve the required sightlines, accesses may be needed to serve more than one property.</p> <p><u>Environmental impact:</u></p> <p>There is no ancient woodland within the site or on the site's boundaries. Nor are there any trees subject to a Tree Preservation Order.</p> <p>The site was promoted through the 'call for sites' for the Council's Housing and Economic Land Availability Assessment (HELAA). The HELAA forms part of the evidence base for the Local Plan Review (LPR) and it makes a preliminary assessment of the suitability and potential of sites.</p> <p>As part of this work, a desktop assessment of the impact that development might have on nature conservation was undertaken by the Thames Valley Environmental Research Centre (TVERC). Comments were also sought from Natural England and the Berkshire, Buckinghamshire and Oxfordshire Wildlife Trust (BBOWT).</p> <p>The assessment by TVERC highlighted there was a medium risk of adverse impacts. Natural England advised that the site was unlikely to have an impact on a Site of Special Scientific Interest, whilst there might be water quality impacts on the River Lambourn Special Area of Conservation which would need to be considered through the Habitats Regulations. BBOWT advised that a net gain in biodiversity must be delivered.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The policy for the allocation will include a requirement for surveys, and the final developable area will be dependent upon the extent of any appropriate evidence and mitigation measures. The wording of the requirement will be as follows:</p> <p><i><u>f. The scheme will be informed by an extended phase 1 habitat survey with further detailed surveys arising from that as necessary Ecological Impact Assessment (EclA). Appropriate avoidance and mitigation measures will need to be implemented to ensure any designated sites and/or protected habitats and/or species are not adversely affected;</u></i></p> <p>All development sites will be required to provide a minimum 10% net biodiversity gain as per policy SP11 (Biodiversity and Geodiversity).</p> <p><u>Infrastructure:</u></p> <p>Existing pressure on some local services and facilities is recognised, such as GP surgeries. An interim Infrastructure Delivery Plan (IDP) has been produced that considers all the infrastructure that will be required to support the development required through the LPR (including the scale of development allocated to each of the spatial areas). The IDP will be updated in partnership with service providers once the sites have been confirmed and any necessary infrastructure improvements will be taken forward.</p> <p>Service providers are aware of the potential sites for future development and discussions are taking place as to the provision of additional services/facilities to serve the new</p>

Respondent (with lpr ref)	Response	Council Response
		<p>population. New facilities/services as a result of development would also benefit the existing community.</p> <p>New residential development is subject to the Community Infrastructure Levy (CIL). Financial contributions towards mitigating the impact of increased population on infrastructure could be sought through CIL</p>
Ray Baker (lpr24)	<p>Disagree with the proposed allocation.</p> <p>Very concerned with regard the additional traffic onto East lane as there is no foot path and is already a busy road due to the growing use of the Doctors surgery. Many people using this road race up and down[ to possibly get to appointments ] and with older people and young children walking on a road with no footpath it is proving a worry and if you build 15 homes with access onto this road that could add up to 60 car movements a day in addition. We also have a problem with people parking outside the surgery-pharmacy which causes a bottleneck and forces walkers into the middle of the road.</p> <p>A footpath would have to be installed before any consideration of additional homes-traffic as the likelihood of an accident would increase dramatically.</p> <p><b><i>What changes are you seeking / what would be your preferred approach?</i></b></p> <p>A FOOT PATH AND NO PARKING ON THE EAST LANE ROAD</p>	<p>Comments noted.</p> <p><u>Additional traffic:</u></p> <p>The dwellings would front onto East Lane, and a number of private accesses would be provided. The Local Highway Authority have not raised any objections to this.</p> <p>The Local Highway Authority have advised that they have no concerns regarding the provision of 15 dwellings with regards to traffic impact.</p> <p><u>Infrastructure:</u></p> <p>Existing pressure on some local services and facilities is recognised, such as GP surgeries. An interim Infrastructure Delivery Plan (IDP) has been produced that considers all the infrastructure that will be required to support the development required through the LPR (including the scale of development allocated to each of the spatial areas). The IDP will be updated in partnership with service providers once the sites have been confirmed and any necessary infrastructure improvements will be taken forward.</p> <p>Service providers are aware of the potential sites for future development and discussions are taking place as to the provision of additional services/facilities to serve the new</p>

Respondent (with lpr ref)	Response	Council Response
		<p>population. New facilities/services as a result of development would also benefit the existing community.</p> <p>New residential development is subject to the Community Infrastructure Levy (CIL). Financial contributions towards mitigating the impact of increased population on infrastructure could be sought through CIL.</p> <p><u>Footpath:</u></p> <p>The policy for the allocation will include a requirement for a footway fronting the site as follows:</p> <p><i>c. A footway fronting the site that links to the existing footway to the west of the site.</i></p>
Andrew Bower (lpr52)	<p>Disagree with the proposed allocation.</p> <p>This may not be the right time in the process to put forward our thoughts and feelings but given that we know nothing about how the process works, lockdown has not allowed us to talk with our neighbours or anyone that could give us guidance, please forgive our lack of understanding.</p> <p>This is land and outside the village settlement and an area of outstanding natural beauty. If the land is to lose its protection we would like to see the look of the lane preserved. That is of individually designed homes set back from the lane with ample parking and in a pretty leafy country village. It would be very sad to see urban footpaths and street lighting.</p> <p>The hedge to the south of the site is a feature of the lane and gives that country village feel to the lane and the village. It also holds back the rain water from the field that is in some parts 1meter higher than the road surface. Flooding would be concern should it be removed. When heavy rain falls in the High Street the drains in East Lane overflow and the lane</p>	<p>Comments noted.</p> <p><u>Location of site outside of village settlement / preservation of the look of the lane:</u></p> <p>As part of the preparation of the LPR the council has undertaken a Settlement Boundary Review .The settlement boundary criteria make clear that boundaries will include sites allocated through the Local Plan process.</p> <p>The policy for the site will include a criteria that requires that the development design and layout will be informed by a Landscape Visual Impact Assessment (LVIA):</p> <p><i>e. The development design and layout will be further informed by a full detailed LVIA.</i></p> <p><u>Location of site within AONB:</u></p>

Respondent (with lpr ref)	Response	Council Response
	<p>becomes a torrent. Many of the bungalows to the south of the lane would be at risk of flooding if this water was any deeper.</p> <p>We would not want the existing homes on the south of the lane to loose any of their land to enable a road realignment to facilitate the added traffic and parking created by added development.</p> <p>Any new dwelling built here will be in the very best of locations we would like to see it add to the look of the lane and the village rather than detract from it. The proposed plots would be slightly smaller than the existing and on a deceptively sharp bend in the lane given that all vehicles associated with the building and occupation of the new dwelling will need to be parked on site, as there is no on street parking in the lane 15 dwellings may be a bit of a squeeze.</p> <p>The population continues to grow at an alarming rate housing is needed everywhere equally at the other end of the scale people die. This is church land and outside the village settlement. The village grave yard is nearing fullness, this land was proposed to become the new grave yard for the village. If we are to loose an area of outstanding natural beauty this would be the better option for the people of the village for today and the future.</p>	<p>The National Planning Policy Framework is clear that great weight should be given to conserving landscape and scenic beauty in AONBs. To this end, a Landscape Sensitivity Assessment was carried out for the wider site area that was promoted for development. This advised against development across the whole site because it would not be possible to repeat the linear pattern of the rest of Chieveley.</p> <p>The proposed allocation is for a line of linear development along East Lane to ensure that the existing settlement pattern is reflected.</p> <p><u>Flood risk:</u></p> <p>The Environment Agency's surface water flood risk data does not show the site nor any of the properties along the south of East Lane to be at risk of surface water flooding.</p> <p>The emerging draft LPR policy on flood risk requires that on all development sites, surface water will be managed in a sustainable manner through the implementation of sustainable drainage systems.</p> <p><u>Road realignment:</u></p> <p>There are no proposals to re-align East Lane, and the Local Highway Authority have not advised that the road needs re-aligning.</p> <p><u>Church land / burial ground:</u></p> <p>The site was promoted to the Council by the landowner, the Diocese of Oxford.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>At the time of the Regulation 18 consultation on the draft emerging LPR, West Berkshire Council (WBC) were unaware that the burial space available at St. Mary's Church was running out.</p> <p>As part of their Regulation 18 representations, the landowner of proposed allocation 'Land at Chieveley Glebe' suggested that a burial ground could be accommodated within the wider area of land originally promoted for development.</p> <p>A Landscape Sensitivity Assessment (LSA) carried out in 2011 (which considers the wider area of land promoted for development) advises that the site is large in scale in comparison to the settlement, and extends further back from the roads than typical elsewhere. The LSA goes on to advise that the site has a strong relationship with countryside to the north.</p> <p>The LSA recommended that the whole site would be unsuitable for development because it would not be possible to repeat the linear pattern of the rest of Chieveley.</p> <p>In light of the recommendations of the LSA, only a small amount of linear development is proposed along the frontage of East Lane.</p>
Stephen Crundwell (lpr47)	One of the reason I moved to my property was that it was not overlooked and has views of the fields at both the front and rear giving me the privacy I was looking for. My privacy will be compromised as I will be overlooked by many of the proposed properties. This would also impact my visual amenity in this area of outstanding natural beauty. There are also ancient hedgerows	<p>Comments noted.</p> <p><u>Overlooking / privacy:</u></p> <p>National Planning Practice Guidance requires that planning policies and decisions do not undermine quality of life. Policy SP7 (Design Principles) of the LPR requires that development will provide a high quality of amenity and</p>

Respondent (with lpr ref)	Response	Council Response
	<p>beside this land and the road on East Lane which is used by many birds as observed by myself some birds nesting in this stretch of hedgerow.</p> <p>For a small village I feel the traffic on East lane is already excessive due to people who live outside the village using the Downland Doctors Surgery. More houses will increase the road traffic and as I haven't seen any plans for the buildings I would wonder if there are driveways for their cars or would they park on East Lane causing more issues.</p> <p>East lane suffers from surface water when it rains and this also causes large areas of water to form in my driveway even though my drive is gravel. The proposed land is also much higher than that of the level of the road and I feel that if this development goes ahead the rain water that is already being dispersed in the field will be vastly reduced causing more surface water on the road and will ultimately find its way in my boundary causing more of a nuisance.</p> <p>On the West Berkshire council website a Landscape Charter Assessment was undertaken by Kirkham Landscape planning ltd and The Terra Firma Consultancy Ltd for development on this site in 2011. <a href="https://info.westberks.gov.uk/lca">https://info.westberks.gov.uk/lca</a> In the report it states</p> <p>Impact on Key Visual Characteristics.</p> <ol style="list-style-type: none"> <li>1. Localised impact on views to the countryside from the village</li> <li>2. Loss of the open countryside setting of the village</li> <li>3. Development would be prominent in views from the road and countryside to the north.</li> </ol> <p>Impact on key settlement characteristics</p>	<p>privacy for both occupants of the development and neighbouring properties and land.</p> <p><u>Hedgerows / birds:</u></p> <p>The site was promoted through the 'call for sites' for the Council's Housing and Economic Land Availability Assessment (HELAA). The HELAA forms part of the evidence base for the Local Plan Review (LPR) and it makes a preliminary assessment of the suitability and potential of sites.</p> <p>As part of this work, a desktop assessment of the impact that development might have on nature conservation was undertaken by the Thames Valley Environmental Research Centre (TVERC). Comments were also sought from Natural England and the Berkshire, Buckinghamshire and Oxfordshire Wildlife Trust (BBOWT).</p> <p>The assessment by TVERC highlighted there was a medium risk of adverse impacts. Natural England did not provide any comments, and BBOWT identified that there could be harm should mitigation measures not be implemented.</p> <p>The policy for the allocation will include a requirement for surveys, and the final developable area will be dependent upon the extent of any appropriate evidence and mitigation measures. The wording of the requirement will be as follows:</p> <p><i><u>f. The scheme will be informed by an extended phase 1 habitat survey with further detailed surveys arising from that as necessary Ecological Impact Assessment (EclA). Appropriate avoidance and mitigation</u></i></p>

Respondent (with lpr ref)	Response	Council Response
	<p>1. Development of this whole site would be out of keeping with existing settlement pattern, which is characterised by small estates, with houses closely associated with the main roads</p> <p>in the report it also states that Development on this site would result in harm to the natural beauty of this area of outstanding natural beauty and that this site as a whole should not be pursued as a SHLAA site. It would not be possible to repeat the linear pattern of the rest of Chieveley without developing along the rural road to the east, which would harm the countryside setting on the east side of the village</p> <p>In the response to the west Berkshire Landscape Sensitivity Assessment dated March 2011 all the observations were agreed with and it was considered inappropriate for development and should not be pursued as a SHLAA Site.</p> <p>As this proposed site has already been assessed previously and the conclusion was that it should not even be considered for development then I would like to know why it is being proposed for development now.</p>	<p><u>measures will need to be implemented to ensure any designated sites and/or protected habitats and/or species are not adversely affected;</u></p> <p>All development sites will be required to provide a minimum 10% net biodiversity gain as per policy SP11 (Biodiversity and Geodiversity).</p> <p><u>Traffic:</u></p> <p>The dwellings would front onto East Lane, and a number of private accesses would be provided. Respondent (with lpr ref)	Response	Council Response
		<p>population. New facilities/services as a result of development would also benefit the existing community.</p> <p>New residential development is subject to the Community Infrastructure Levy (CIL). Financial contributions towards mitigating the impact of increased population on infrastructure could be sought through CIL.</p> <p><u>Surface water:</u></p> <p>The Environment Agency's surface water flood risk data does not show the site nor any of the properties along the south of East Lane to be at risk of surface water flooding.</p> <p>The emerging draft Local Plan Review policy on flood risk requires that on all development sites, surface water will be managed in a sustainable manner through the implementation of sustainable drainage systems.</p> <p><u>Landscape assessment:</u></p> <p>The 2011 Landscape Sensitivity Assessment (LSA) considered the wider area of land promoted for development. The LSA concluded that the site as a whole should not be developed because it would not be possible to repeat the linear pattern of the rest of Chieveley.</p> <p>The proposed allocation is for a line of linear development along East Lane to ensure that the existing settlement pattern is reflected.</p>
Bob & Joy Eastaugh (lpr57)	Having viewed the draft plan by the council I am writing to voice our concerns with this proposal. In our view development of the land as set out in the draft plan is completely inappropriate. There are a number of features	<p>Comments noted.</p> <p><u>Character of the village:</u></p>

Respondent (with lpr ref)	Response	Council Response
	<p>and considerations that make this identified area unsuitable for development as outlined below.</p> <p><b>Character of the village</b></p> <p>The character of the village is subject to protection by the terms of the ANOB designation. An important part of that character is the maintenance of the rural vistas. East Lane is an important route of access to the village and the proposal will change the presentation from one that is rural to one that is essentially urban. This is not consistent with the ANOB designation.</p> <p><b>Safety</b></p> <p>East Lane is a narrow country lane. The proposal will inevitably mean more traffic and the likelihood of obstruction of access. This is particularly important as the doctors surgery is sited opposite the western end of the proposed site. There are already difficulties with obstruction around the surgery and the proposal will exacerbate these problems. Furthermore the entrances at either end of East Lane are difficult junctions and there have already been a number of serious accidents, particularly at the junction with the Old Oxford Road.</p> <p><b>Environmental impact</b></p> <p>The proposed site is along the road/field boundary currently occupied by a hedge containing a number of ancient trees. The hedge would meet the criteria for protection under the Hedgerow Regulations 1997 due to its length, location, because it contains endangered/protected species and because it forms the boundary of Glebe land. The hedge line is home to a number of important species such as bats, hedgehogs, birds (including owls) and also facilitates the movement of these species and others including deer. The proposal will clearly have a very significant adverse impact on these animals</p>	<p>The National Planning Policy Framework is clear that great weight should be given to conserving landscape and scenic beauty in AONBs. An interim Infrastructure Delivery Plan (IDP) has been produced that considers all the infrastructure that will be required to support the development required through the LPR (including the scale of development allocated to each of the spatial areas). The IDP will be updated in partnership</p>

Respondent (with lpr ref)	Response	Council Response
		<p>with service providers once the sites have been confirmed and any necessary infrastructure improvements will be taken forward.</p> <p>Service providers are aware of the potential sites for future development and discussions are taking place as to the provision of additional services/facilities to serve the new population. New facilities/services as a result of development would also benefit the existing community.</p> <p>New residential development is subject to the Community Infrastructure Levy (CIL). Financial contributions towards mitigating the impact of increased population on infrastructure could be sought through CIL.</p>
Lucy Lubbe (lpr38)	<p>I think some more affordable family homes in the village and local areas is a good. 3 or 4 bed houses, semi-detached or detached, family homes to keep families local and help populate the local schools. Chieveley currently is made up from a large number of larger, more expensive houses so this would help balance out the village.</p>	<p>Support for allocation noted.</p>
Bradley Merchant (lpr51)	<p>Whilst I can appreciate that considerable time and effort has been spent on the consultation document, it would appear that the choice of the 'allocated' site proposal has not been investigated thoroughly before the proposed site is announced.</p> <p>The Local Council do not have the right to propose development on East Lane in the location identified as the site is outside of the village settlement boundary and therefore cannot be developed under current legislation. Should WBCC wish to negotiate changes to the village settlement boundary then this should take place before any discussions of development are entertained.</p>	<p><u>Location of site outside of village settlement boundary:</u></p> <p>As part of the preparation of the Local Plan Review (LPR) the Council has undertaken a Settlement Boundary Review. The settlement boundary review criteria make clear that boundaries will include sites allocated through the Local Plan process.</p> <p>Settlement boundaries help direct development to those areas where there are opportunities for infill development and for re-use of brownfield land. Further greenfield allocations are however needed, and the plan seeks to allocate a range of sites of varying sizes.</p> <p><u>Road safety:</u></p>

Respondent (with lpr ref)	Response	Council Response
	<p>In addition to the above, attention must be drawn to the current safety issues on East Lane which should be solved before issuing any proposal to add dwellings.</p> <p>I have lived in East Lane since 1974 and have witnessed a steady deterioration in the quality of life throughout this period due to:</p> <ul style="list-style-type: none"> <li>• The development of Hazeldene</li> <li>• The Downlands Practice</li> <li>• The increased number of vehicles using the roads (in general) and the speed in which they travel</li> </ul> <p>East Lane was once a quite village lane that allowed us, as children, to play safely in the countryside, climb the trees, ride bikes and walk safely at the side of the road, something not now afforded to our children, today. The constant flow of cars that visit the surgery for appointments, the medical delivery vans and the increased quantity of cars owned by residents (most of which drive at speeds in excess of the speed limit) make the road a very busy and dangerous lane now. Additional dwellings in the numbers planned will increase the quantity of vehicles, thus increasing the danger and increasing the likelihood of a serious accident.</p> <p>East Lane is increasingly affected by the insufficient parking provision caused by the scale of which The Downland Practice has grown, when permission was granted for the construction of the surgery on East Lane, it was intended as a village service with a calculated parking provision to accommodate the parish constituents, this has been exceeded many times over by the increased number of users from an ever-expanding catchment. Indeed, The Surgery was never intended to be the size it is now and has outgrown the site. The parking problems are known, worsening and create a significant hazards and danger for walkers on East Lane in particular families with young children, families with push chairs, children on bikes and scooters, dog walkers, Wheelchair users and Mobility scooters. The plan to add houses in Chieveley and the surrounding villages only increases the</p>	<p>The Local Highway Authority provided comments on the site as part of work on the Housing and Economic Land Availability Assessment and site assessment work. No concerns were raised around safety, although they have specified that to achieve the required sightlines, accesses may be needed to serve more than one property.</p> <p>The dwellings would front onto East Lane, and a number of private accesses would be provided. The Local Highway Authority have not raised any objections to this.</p> <p>The Local Highway Authority have advised that they have no concerns regarding the provision of 15 dwellings with regards to traffic impact.</p> <p><u>Brownfield sites:</u></p> <p>In regards to the development of brownfield sites, when determining which new sites to allocate the Council are only able to consider land that is submitted to them through the Housing and Economic Land Availability Assessment (HELAA, one of the evidence documents for the LPR). The HELAA includes brownfield sites that the Council are aware of.</p> <p>The supporting text to policy SP12 (Approach to Housing delivery) of the emerging draft LPR identifies that several sources will ensure a continuous supply of land across the plan period. These include amongst others, existing planning commitments (unallocated sites with planning permission), many of which are brownfield sites.</p> <p>Policy SP1 (Spatial Strategy) of the emerging draft LPR makes it clear that in order to meet the Council's housing</p>

Respondent (with lpr ref)	Response	Council Response
	<p>number of vehicles visiting the Practice, where they are already unable to park and will be further complicated by the addition of more dwellings, all of which would bring additional vehicles, additional deliveries, and further confusion to the situation.</p> <p>East Lane has a straight clear stretch of road from the junction at Oxford Rd, allowing excess speed followed by a blind bend into a chaotic, congested parking arrangement outside of the surgery. It is already dangerous to cars and lethal to walkers - nothing positive can be achieved to resolve the existing problems by the inclusion of more dwellings and the increase of residents within the catchment. Logic could however be granted to the idea to add dwellings in East Lane if the Downlands Practice were to be relocated – the Showground being an ideal site.</p> <p>It is understood that Chieveley must consider an increase in housing to satisfy an increase in demand, but for all the available sites within the village I would suggest that the decision to propose construction on East Lane is poorly considered, narrow minded and short sighted. Thorough evaluation is needed to fully appreciate the current use of East Lane to allow clarity before this process commences.</p> <p>Other more appropriate Brownfield Sites, not included within the consultation document, but within the settlement boundary should be considered in more detail first before overloading East Lane. Bardown was a perfectly suitable housing estate before demolition, albeit in a state of disrepair. To redevelop that site would improve the area of the village with little or no impact on the busy areas of the village.</p> <p>Aside the visual impact of housing on an agricultural aspect, including trees that are decades old, there is good reason that the land has not been developed for housing during previous opportunity.</p> <p>The land proposed for housing development is also sought after by the parish for an extension to the village cemetery, which coupled with a parking</p>	<p>requirement development on Greenfield sites on the edge of settlements is necessary. Sensitive design will be important to respect and enhance the character and appearance of the area.</p> <p>Whilst planning permission was granted for residential development at Bardown, the permission expired and no further planning application for development has since been submitted.</p> <p><u>Burial ground:</u></p> <p>At the time of the Regulation 18 consultation on the draft emerging LPR, West Berkshire Council (WBC) were unaware that the burial space available at St. Mary's Church was running out.</p> <p>As part of their Regulation 18 representations, the landowner of proposed allocation 'Land at Chieveley Glebe' suggested that a burial ground could be accommodated within the wider area of land originally promoted for development.</p> <p>A Landscape Sensitivity Assessment (LSA) carried out in 2011 (which considers the wider area of land promoted for development) advises that the site is large in scale in comparison to the settlement, and extends further back from the roads than typical elsewhere. The LSA goes on to advise that the site has a strong relationship with countryside to the north.</p> <p>The LSA recommends that the whole site would be unsuitable for development because it would not be possible to repeat the linear pattern of the rest of Chieveley.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>facility for the Surgery would make very sensible use for any land made available for development. We cannot accommodate additional housing on East Lane <u>with</u> the existing facilities in place for The Downland Practice – one or the other.</p>	<p>The proposed allocation is for a line of linear development along East Lane to ensure that the existing settlement pattern is reflected.</p>
Oliver Reichardt (lpr115)	<p>Disagree with the proposed allocation.</p> <p>Chieveley village has some unique transport characteristics which are dangerous and would never be allowed now. For example the main street has pedestrian exits from houses which step straight into the road. It has vehicle exits straight onto the road which are blind to oncoming traffic. The street narrows so that it can only accommodate a single car at one point which is on a blind bend. It narrows to a single lane at multiple other points, including for a significant distance which causes queueing when busy.</p> <p>While these things give the place character, they are only acceptable in terms of safety if there is a low level of traffic. Unfortunately the increase in traffic over the years has made it dangerous. Any extra housing only increases the danger, and 15 dwellings would be a significant increase in traffic.</p> <p>It could be argued that the majority of these dwellings would use East Lane and Oxford Road when driving, and while this may happen to some extent, it is bound to drive up traffic through the village as well.</p> <p>My preferred approach would be to put safety first, and to look how dangerous the high street already is before more dwellings are added. There are many, many places in West Berkshire that have a better road system and dwellings should be put in these places first, rather than add more pressure on an already dangerous high street.</p>	<p>Comments noted.</p> <p>The Local Highway Authority provided comments on the site as part of work on the Housing and Economic Land Availability Assessment and site assessment work. No concerns were raised around safety, although they have specified that to achieve the required sightlines, accesses may be needed to serve more than one property.</p> <p>The dwellings would front onto East Lane, and a number of private accesses would be provided. The Local Highway Authority have not raised any objections to this.</p> <p>The Local Highway Authority have advised that they have no concerns regarding the provision of 15 dwellings with regards to traffic impact.</p>
Sharon Riddell (lpr918)	<p>Disagree with the proposed allocation.</p> <ul style="list-style-type: none"> <li>• destruction of rural setting and an extremely old hedge that hosts multiple wildlife</li> </ul>	<p>Comments noted.</p> <p><u>Disruption of rural setting:</u></p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• light pollution</li> <li>• overlooking</li> <li>• destruction of current lane usage - do not want to see East Lane being used as a 'rat run'</li> <li>• overload on local doctors surgery</li> <li>• overload on schools</li> <li>• drainage issues and flooding</li> </ul> <p><b><i>What changes are you seeking / what would be your preferred approach?</i></b></p> <p>no building</p>	<p>A Landscape Sensitivity Assessment (LSA) carried out in 2011 (which considers the wider area of land promoted for development) advises that the site is large in scale in comparison to the settlement, and extends further back from the roads than typical elsewhere. The LSA goes on to advise that the site has a strong relationship with countryside to the north.</p> <p>The LSA recommends that the whole site would be unsuitable for development – it would not be possible to repeat the linear pattern of the rest of Chieveley without developing along the rural road to the east, which would harm the countryside setting on the east side of the village.</p> <p>In light of the recommendations of the LSA, only a small amount of linear development is proposed along the frontage of East Lane.</p> <p><u>Impact on wildlife:</u></p> <p>The site was promoted through the 'call for sites' for the Council's Housing and Economic Land Availability Assessment (HELAA). The HELAA forms part of the evidence base for the Local Plan Review (LPR) and it makes a preliminary assessment of the suitability and potential of sites.</p> <p>As part of this work, a desktop assessment of the impact that development might have on nature conservation was undertaken by the Thames Valley Environmental Research Centre (TVERC). Comments were also sought from Natural England and the Berkshire, Buckinghamshire and Oxfordshire Wildlife Trust (BBOWT).</p>

Respondent <i>(with lpr ref)</i>	Response	Council Response
		<p>The assessment by TVERC highlighted there was a medium risk of adverse impacts. Natural England advised that the site was unlikely to have an impact on a Site of Special Scientific Interest, whilst there might be water quality impacts on the River Lambourn Special Area of Conservation which would need to be considered through the Habitats Regulations. BBOWT advised that a net gain in biodiversity must be delivered.</p> <p>The policy for the allocation will include a requirement for surveys, and the final developable area will be dependent upon the extent of any appropriate evidence and mitigation measures. The wording of the requirement will be as follows:</p> <p><i><u>f. The scheme will be informed by an extended phase 1 habitat survey with further detailed surveys arising from that as necessary Ecological Impact Assessment (EclA). Appropriate avoidance and mitigation measures will need to be implemented to ensure any designated sites and/or protected habitats and/or species are not adversely affected;</u></i></p> <p>All development sites will be required to provide a minimum 10% net biodiversity gain as per policy SP11 (Biodiversity and Geodiversity).</p> <p><u>Light pollution:</u></p> <p>All street lighting will need to be designed in accordance with the guidance set out in the Council’s Quality Design SPD (part 5, External Lighting) to reduce instances of light pollution.</p> <p>The Local Plan Review includes a policy on</p>

Respondent (with lpr ref)	Response	Council Response
		<p><u>Overlooking:</u></p> <p>National Planning Practice Guidance requires that planning policies and decisions do not undermine quality of life. Policy SP7 (Design Principles) of the LPR requires that development will provide a high quality of amenity and privacy for both occupants of the development and neighbouring properties and land.</p> <p><u>Highways:</u></p> <p>The Local Highway Authority provided comments on the site as part of work on the Housing and Economic Land Availability Assessment and site assessment work. No concerns were raised around safety, although they have specified that to achieve the required sightlines, accesses may be needed to serve more than one property.</p> <p>The dwellings would front onto East Lane, and a number of private accesses would be provided. The Local Highway Authority have not raised any objections to this.</p> <p>The Local Highway Authority have advised that they have no concerns regarding the provision of 15 dwellings with regards to traffic impact.</p> <p><u>Infrastructure:</u></p> <p>Existing pressure on some local services and facilities is recognised, such as GP surgeries. An interim Infrastructure Delivery Plan (IDP) has been produced that considers all the infrastructure that will be required to support the development required through the LPR (including the scale of development allocated to each of</p>

Respondent (with lpr ref)	Response	Council Response
		<p>the spatial areas). The IDP will be updated in partnership with service providers once the sites have been confirmed and any necessary infrastructure improvements will be taken forward.</p> <p>Service providers are aware of the potential sites for future development and discussions are taking place as to the provision of additional services/facilities to serve the new population. New facilities/services as a result of development would also benefit the existing community.</p> <p>New residential development is subject to the Community Infrastructure Levy (CIL). Financial contributions towards mitigating the impact of increased population on infrastructure could be sought through CIL.</p> <p><u>Drainage issues and flooding:</u></p> <p>The site is not at risk of flooding.</p> <p>The emerging draft LPR policy on flood risk requires that on all development sites, surface water will be managed in a sustainable manner through the implementation of sustainable drainage systems.</p>
Tracy Snook (lpr2336)	<p>Accept it is important that some development takes place in a village for sustainability purposes and growth but 15 dwellings along the East Lane frontage with individual accessways will decimate an old hedgerow, cause highway safety issues as near a bend in the lane, opposite a busy Doctor Surgery where patients park in the road to visit the pharmacy and doctors. The number of dwellings is excessive. 5 may be more appropriate and more in keeping with the location and consideration that driveway access are shared to limit impact on the highway.</p>	<p><u>Highways:</u></p> <p>The Local Highway Authority provided comments on the site as part of work on the Housing and Economic Land Availability Assessment and site assessment work. No concerns were raised around safety, although they have specified that to achieve the required sightlines, accesses may be needed to serve more than one property.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>15 dwellings is over intensive development along that side of the lane compared to housing already present on that side. It will create a hard wall of building. Consideration should also be given to any housing in this location to not be full height to limit the impact on the environment and landscape aspect.</p> <p>The land would be suitable for access and parking for a new burial ground which Chieveley community expressed support for in the Parish Plan. The Parish Council are still trying to establish through discussions and contact with the Diocese on options in this regard. Any development permitted should accommodate and support the Parish Plan aspirations as part of development considerations or conditioned. In addition a footpath across the land from East Lane to the Recreational Centre land to improve off road infrastructure for cycle and walking around the village would be welcome.</p>	<p>The dwellings would front onto East Lane, and a number of private accesses would be provided. The Local Highway Authority have not raised any objections to this.</p> <p>The Local Highway Authority have advised that they have no concerns regarding the provision of 15 dwellings with regards to traffic impact.</p> <p><u>Dwelling numbers:</u></p> <p>A Landscape Sensitivity Assessment (LSA) carried out in 2011 (which considers the wider area of land promoted for development) advises that the site is large in scale in comparison to the settlement, and extends further back from the roads than typical elsewhere. The LSA goes on to advise that the site has a strong relationship with countryside to the north.</p> <p>The LSA recommends that the whole site would be unsuitable for development – it would not be possible to repeat the linear pattern of the rest of Chieveley without developing along the rural road to the east, which would harm the countryside setting on the east side of the village.</p> <p>In light of the recommendations of the LSA, only a small amount of linear development is proposed along the frontage of East Lane. This is considered to be in keeping with the village.</p> <p><u>Burial ground:</u></p> <p>At the time of the Regulation 18 consultation on the draft emerging LPR, West Berkshire Council (WBC) were unaware that the burial space available at St. Mary's Church was running out.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>As part of their Regulation 18 representations, the landowner of proposed allocation 'Land at Chieveley Glebe' suggested that a burial ground could be accommodated within the wider area of land originally promoted for development.</p> <p>A Landscape Sensitivity Assessment (LSA) carried out in 2011 (which considers the wider area of land promoted for development) advises that the site is large in scale in comparison to the settlement, and extends further back from the roads than typical elsewhere. The LSA goes on to advise that the site has a strong relationship with countryside to the north.</p> <p>The LSA recommends that the whole site would be unsuitable for development because it would not be possible to repeat the linear pattern of the rest of Chieveley.</p> <p>The proposed allocation is for a line of linear development along East Lane to ensure that the existing settlement pattern is reflected.</p>
Councillor Tony Vickers (lpr984)	<p>Agree with the proposed allocation.</p> <p>Capable of accommodating 125 homes. The harm to landscape is minimal and we do not think having a ribbon type development is good use of the land.</p> <p>Increase the allocation to 100</p>	<p>Support for allocation noted.</p> <p>A Landscape Sensitivity Assessment (LSA) carried out in 2011 (which considers the wider area of land promoted for development) advises that the site is large in scale in comparison to the settlement, and extends further back from the roads than typical elsewhere. The LSA goes on to advise that the site has a strong relationship with countryside to the north.</p> <p>The LSA recommends that the whole site would be unsuitable for development – it would not be possible to</p>

Respondent (with lpr ref)	Response	Council Response
		<p>repeat the linear pattern of the rest of Chieveley without developing along the rural road to the east, which would harm the countryside setting on the east side of the village.</p> <p>In light of the recommendations of the LSA, only a small amount of linear development is proposed along the frontage of East Lane.</p>
<b>Landowners, site promoters and developers</b>		
<p>Fisher German for M and W Musgrave and Begley (lpr1232)</p>	<p>Disagree with the proposed allocation.</p> <p>We welcome and support the Council's acknowledgement that Chieveley should receive residential allocations. This will assist to ensure its long-term vitality and vibrancy by meeting local housing needs. Whilst in the AONB, high quality new development which fits with existing settlements is considered to have a limited impact on this designation. The failure to deliver sufficient housing will however have very real impacts on the day to day lives of residents, forcing young people away due to rising house prices and lack of suitable available homes. Populations in rural areas will likely age, trends which can be seen locally and nationally, and average house occupancy will lower as children grow up and move away. This lowering and ageing of the rural population will have repercussions on the ability of services and facilities to stay open, which will lead to a gradual decline of sustainability. Chieveley has a high level of service provision, as demonstrated by the Settlement Audit, and this is something which must be supported by commensurate new housing, ensuring the vitality of the community.</p> <p>Concern is however raised at the Council's preferred choice of allocation, and it is not considered sufficient consideration has been had for the impacts of this scheme on the Chieveley Conservation Area and Grade II Listed Vicarage, as well as other listed buildings in the centre of Chieveley. The north of East Lane is the only open approach to the centre of Chieveley, its historic core. The development of this site will fundamentally change the</p>	<p>Comments noted.</p> <p><u>Heritage impact:</u></p> <p>The Council is in the process of preparing Conservation Area Appraisals. The site allocation policy will include a requirement for a Heritage Impact Assessment:</p> <p><i>g. The development design and layout will be further informed by a Heritage Impact Assessment.</i></p> <p><u>Highways impact:</u></p> <p>The Local Highway Authority provided comments on the site as part of work on the Housing and Economic Land Availability Assessment and site assessment work. No concerns were raised around safety, although they have specified that to achieve the required sightlines, accesses may be needed to serve more than one property.</p> <p>The dwellings would front onto East Lane, and a number of private accesses would be provided. The Local Highway Authority have not raised any objections to this.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>transition into the village, reducing the sense of openness prior to arriving at the village's central crossroads, creating a more urban feel.</p> <p>This part of East Lane already has issues with on street parking associated with the centre of Chieveley, the existing housing and where the GP practice's car park overflows. New housing in this location will add to the burden, by adding to the number of cars parked here and forcing on-street parking onto the south side of the road to facilitate access to the dwellings. This will cause issues both in terms of traffic, but also in terms of having a damaging impact on this important approach to the conservation area, further creating an urban feel and having a negative impact on the character of the settlement. Draft Policy SC8 sets out that development proposals that affect the setting of a Conservation Area should assess and clearly demonstrate how the character, appearance and significance of the Conservation Area will be preserved and enhanced. It does not appear that this has been undertaken to support this allocation. It is not appropriate to await a planning application, as the suitability of allocated sites is an issue that relates to this Plan's soundness and is vital to ensure the Plan is internally consistent.</p> <p>To facilitate the site, significant areas of mature hedgerow will need to be removed. This will have significant impacts on biodiversity, whilst further causing damage to the settlement character on the approach to Chieveley. The removal of such a large amount of mature, tall vegetation must be afforded significant weight, and serious concerns about the suitability of this allocation. It is noted that this is not even mentioned in the Site Proforma, which raises concerns to the extent that this has been considered in formulating the allocation.</p> <p>On the basis of the above, whilst we support the Council's decision to allocate in Chieveley, we do not support the Council's preferred choice and consider it should be deleted for the reasons listed above. We contend, that our client's land offers a suitable opportunity to allocate a smaller site, as has been the approach for the current draft allocation, although would be free from many of the constraints which impact the current allocation. It is</p>	<p>The Local Highway Authority have advised that they have no concerns regarding the provision of 15 dwellings with regards to traffic impact.</p> <p><u>Biodiversity impact:</u></p> <p>The site was promoted through the 'call for sites' for the Council's Housing and Economic Land Availability Assessment (HELAA). The HELAA forms part of the evidence base for the Local Plan Review (LPR) and it makes a preliminary assessment of the suitability and potential of sites.</p> <p>As part of this work, a desktop assessment of the impact that development might have on nature conservation was undertaken by the Thames Valley Environmental Research Centre (TVERC). Comments were also sought from Natural England and the Berkshire, Buckinghamshire and Oxfordshire Wildlife Trust (BBOWT).</p> <p>The assessment by TVERC highlighted there was a medium risk of adverse impacts. Natural England advised that the site was unlikely to have an impact on a Site of Special Scientific Interest, whilst there might be water quality impacts on the River Lambourn Special Area of Conservation which would need to be considered through the Habitats Regulations. BBOWT advised that a net gain in biodiversity must be delivered.</p> <p>The policy for the allocation will include a requirement for surveys, and the final developable area will be dependent upon the extent of any appropriate evidence and mitigation measures. The wording of the requirement will be as follows:</p>

Respondent (with lpr ref)	Response	Council Response
	<p>not clear why a smaller parcel of the allocated site has been considered, when this approach would clearly overcome many of the issues which form the basis of other site omissions.</p> <p>It is also noted that the draft allocation site is not currently available, as there is an ongoing lease for the land. Whilst this is only to 2023, it does mean that the site is not available now and cannot be used in five-year housing land supply calculations.</p> <p>In respect of our client's site, the Council's stage 1 sieving document concludes:</p> <p><i>"Development would result in harm to the AONB, and would be inappropriate in the context of the existing settlement form and pattern.</i></p> <p><i>Highways concerns about the lack of pedestrian route into Chieveley, and difficulties in providing one."</i></p> <p>Linear development similar to that allocated by the Draft Local Plan, on Graces Lane and/or East Lane would have no more impact in terms of harm to the AONB than the preferred allocation, and arguably even less so when having regard for the potential harm to historic designated assets associated with the current allocation. Linear development would also not be inappropriate in terms of existing settlement form and pattern, it would be entirely in accordance with the prevailing settlement form, which is frontage developments onto the existing road network. Whilst the highways concern is noted, it is clearly not a demonstrable issue for existing residents, and it would equally be applicable to the draft allocation, so cannot reasonably form a reason for exclusion.</p> <p>Development on our client's site would have a highly limited impact on the historic core of Chieveley, unlike the draft allocation, by virtue of being located away from the historic core of the settlement, its Conservation Area and Listed Buildings. Development here would also not impact on highways,</p>	<p><i>f. The scheme will be informed by an extended phase 1 habitat survey with further detailed surveys arising from that as necessary Ecological Impact Assessment (EclA). Appropriate avoidance and mitigation measures will need to be implemented to ensure any designated sites and/or protected habitats and/or species are not adversely affected;</i></p> <p>All development sites will be required to provide a minimum 10% net biodiversity gain as per policy SP11 (Biodiversity and Geodiversity).</p> <p><u>Alternative site (CHI20):</u></p> <p>Site CHI20 (Land adjacent to Oxford Road, Chieveley) was promoted to the Council as part of the call for sites for the Housing and Economic Land Availability Assessment (HELAA). The HELAA is one of the evidence documents for the Local Plan Review (LPR) and it makes a preliminary assessment of the suitability and potential of sites.</p> <p>Site CHI20 was assessed as 'not developable within the next 15 years' in the HELAA, and it was therefore not subject to further site selection work.</p> <p>Development of the whole site would be out of keeping with the existing settlement pattern, which is characterised by houses closely associated with the main roads.</p> <p>The 2011 Landscape Sensitivity Assessment identified that the northern section of the site adjacent to the road is important open countryside at the entrance to the village, and would not be suitable for development. It went on to note that if the north west corner of the site was developed,</p>

Respondent (with lpr ref)	Response	Council Response
	<p>as on street parking is less of an issue here, and there isn't the pressure for parking from the services and facilities in the village centre.</p> <p>Whilst there would need to be some removal of hedgerow, it is considered the ecological impact would be far less than the draft allocation. Particularly so on land north of Graces Lane, as access could be gained from east of the public right of way, where there is only low-level scrub. This would have a significantly less impact than that proposed by the draft allocation. The removal of this vegetation is considered to have a limited impact on settlement character, unlike the removal of the mature vegetation on the draft allocation, which will have more significant impacts.</p> <p>On the basis of the above, it is considered that there is compelling justification to remove the allocation and replace it with land under our client's control. As referenced above, we do not consider sufficient justification has been provided as to why the Council have considered a smaller section of the draft allocation, and seemingly not any omission sites. This approach is prejudicial to those landowners whose sites have been excluded, as the approach taken has not been consistent. Clearly, we contend if that approach is adopted in respect of our client's land, there are two opportunities to allocate land (linear development along Graces and East Lane) which are demonstrably preferable to the Council's preferred allocation, for the reasons set out above.</p> <p>We also consider that land under our client's control can be allocated to assist and deliver any shortfall of housing land supply, particularly to assist in meeting any needs arising in respect of the Council's preferred allocations, particularly the strategic allocations. Despite being in the AONB, Chieveley is a sustainable settlement which can deliver a higher quantum of growth than is currently proposed, without causing any undue harm to the AONB.</p> <p>On the basis of the above, it is considered that there is compelling justification to remove the allocation and replace it with land under our</p>	<p>thus extending housing back from the roads, the straight, strongly vegetated edge of the settlement would be lost.</p> <p>As part of the assessment of the site within the HELAA the Local Highway Authority advised that a further pedestrian route is possible onto East Lane, but the footway would need to be completed along East Lane to link with existing footways to the west. However it is not possible to provide a convenient pedestrian route along Graces Lane into Chieveley which is a desirable pedestrian route. On this basis the Local Highway Authority advised that they did not support the site.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>client's control. As referenced above, we do not consider sufficient justification has been provided as to why the Council have considered a smaller section of the draft allocation, and seemingly not any omission sites. This approach is prejudicial to those landowners whose sites have been excluded, as the approach taken has not been consistent. Clearly, we contend if that approach is adopted in respect of our client's land, there are two opportunities to allocate land (linear development along Graces and East Lane) which are demonstrably preferable to the Council's preferred allocation, for the reasons set out above.</p> <p>We also consider that land under our client's control can be allocated to assist and deliver any shortfall of housing land supply, particularly to assist in meeting any needs arising in respect of the Council's preferred allocations, particularly the strategic allocations. Despite being in the AONB, Chieveley is a sustainable settlement which can deliver a higher quantum of growth than is currently proposed, without causing any undue harm to the AONB.</p>	
Diocese of Oxford (lpr1940)	<p>The Diocese of Oxford supports the allocation of the Land at Chieveley Glebe for up to 15 dwellings.</p> <p>There is a need for further burial space within the settlement and the Diocese will support the provision of the burial space on land north of East Lane and west of Oxford Road working in conjunction with the Parish Council, PCC and local vicar.</p> <p>As stated in the reps to the HELAA, the site will be available for the delivery of residential development in 6-10 years.</p>	<p>Support for allocation and need for additional burial space noted.</p> <p>The Diocese of Oxford has suggested that a burial ground could be accommodated within the wider area of land originally promoted for development.</p> <p>A Landscape Sensitivity Assessment (LSA) carried out in 2011 (which considers the wider area of land promoted for development) advises that the site is large in scale in comparison to the settlement, and extends further back from the roads than typical elsewhere. The LSA goes on to advise that the site has a strong relationship with countryside to the north, and development of the whole site would result in the loss of the open countryside setting of the village.</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The LSA recommends that the whole site would be unsuitable for development because it would not be possible to repeat the linear pattern of the rest of Chieveley.</p> <p>The proposed allocation is for a line of linear residential development along East Lane to ensure that the existing settlement pattern is reflected. Access to the dwellings would be from East Lane.</p> <p>The Local Highways Authority has advised that vehicular access can be obtained via Oxford Road for the burial ground. The introduction of landscaping around the burial ground in addition to an access from Oxford Road through the site would impact upon the open countryside setting of the wider site. Officers therefore do not propose to amend the allocation to include a burial ground use.</p>

### Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

**Emerging Draft LPR Policy: RSA27 Pirbright Institute Site, Compton (Site Ref: HSA 22)**

**(Proposed Submission LPR Policy: RSA18 Pirbright Institute Site, Compton)**

Number of responses received: 7

Respondent (with lpr ref)	Response	Council Response
<b>Internal consultee</b>		
Highways (lpr135)	<p>The policy is supported. This will be a worthwhile re-development of a previously developed site. However, it is important that sufficient supporting services are sustained for this relatively remote village location. Amenities for the Compton area that need to be provided or retained, and ideally enhanced include:</p> <ul style="list-style-type: none"> <li>• Doctors' surgery in High Street: does this have the capacity to support the additional residents?</li> <li>• Bus service 6 to/from Newbury (currently 2-hourly frequency Mon-Sat and no Sunday service)-retain and restore post-Covid, consider scope to enhance, perhaps linked in with the Didcot link bus mentioned below, or with current student-only services to/from the Downs School;</li> <li>• Additional bus connection to/from Didcot via Harwell Business Campus and also serving Didcot Parkway Station (with onwards connection available from there to Milton Park business estate), to ensure sustainable access to nearby employment and other opportunities from this otherwise isolated housing site;</li> <li>• Extension of good-quality, surfaced, segregated cycle- and pedestrian route up from Hampstead Norreys to Compton, using the</li> </ul>	<p>Comments noted. The Local Plan policies seek to retain and improve community facilities and services. No changes to this policy are required in light of this representation. These comments will inform the emerging draft Infrastructure Delivery Plan.</p>

Respondent (with lpr ref)	Response	Council Response
	former railway alignment where possible, and with this ultimately being extended over the Downs to Upton and Didcot.	
<b>Statutory consultees</b>		
Environment Agency (lpr1674)	<p>We welcome the fact that no development will be permitted within Flood Zones 2 and 3, including essential infrastructure and water compatible development. This will ensure that flood risk is not increased elsewhere as a result of the proposed development.</p> <p>The headwaters of the River Pang flow parallel to the southern boundary of the site, but there is a road between the river and the site. Any development should ensure no adverse impacts on the Pang, for example from contaminated surface water run-off.</p> <p>Similar to RSA 22, there are known groundwater infiltration issues in this area, which could cause the pumping station to discharge storm overflow outside of the permit. A more thorough investigation of the WWTW, and the sewer network is required. Without this, the development could contribute to, or be adversely affected by, unacceptable levels of water pollution in accordance with Paragraph 170 of the NPPF. Therefore, this allocation would cause the local plan to be found unsound in the future.</p>	Comments noted. No changes to this policy are required because the phase 1 and phase 2 Water Cycle Study have now been completed. These comments will inform the emerging draft Infrastructure Delivery Plan.
Historic England (lpr1581)	We support the requirement for an archaeological desk based assessment as a minimum and field evaluation if necessary to assess the historic environment potential of the site, in accordance with NPPF paragraph 189.	Comments noted. No changes to this policy are required in light of this representation.
Thames Water (lpr1759)	The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace	Comments noted. A Phase 1 and Phase 2 Water Cycle Study have since been prepared and will be reflected in the policy as follows - <u>'An integrated water supply and drainage strategy will be provided in advance of development to ensure the provision of adequate and appropriate infrastructure for water supply and waste water, both on and off site. Development will be occupied in line with this strategy.'</u> These comments will inform the emerging draft Infrastructure Delivery Plan.

Respondent (with lpr ref)	Response	Council Response
	<p>delivery of essential network upgrades to accommodate future development/s in this catchment.</p> <p>The wastewater network capacity in this area may be unable to support the demand anticipated from this development. Local upgrades to the existing drainage infrastructure may be required to ensure sufficient capacity is brought forward ahead of the development. Where there is a potential wastewater network capacity constraint, the developer should liaise with Thames Water to determine whether a detailed drainage strategy informing what infrastructure is required, where, when and how it will be delivered is required. The detailed drainage strategy should be submitted with the planning application.</p>	
<b>General consultation bodies</b>		
Mid and West Berkshire Local Access Forum (lpr1881)	<p>MWBLAF welcomes the statements in the policy and supplementary planning document (SPD) on the creation of links for non-motorised users. The SPD states that the public footpath across the site was diverted in 2003, presumably because the Pirbright Institute was then an integrated industrial/research facility. Now that this is no longer the case, the historic route of this footpath should be reinstated.</p> <p>It is unclear why the beginning of this item refers to both footpath and pedestrian links. Is there a difference?</p> <p>The Forum recommends the following changes: (vii) Footpath, bridleway and pedestrian links will be created throughout the site to improve connectivity with the wider existing network and to provide linkages between the village centre and the site. <del>The opportunity to reinstate the former east/west public footpath through the site should be reinstated explored and the adjacent line of trees and remnants of the hedgerow should be retained.</del></p>	<p>Comments noted. These comments will inform the emerging draft Infrastructure Delivery Plan.</p> <p>The Policy will be amended as follows: 'Footpath <u>and</u> bridleway and pedestrian links will be created throughout the site to improve connectivity with the wider existing network and to provide linkages between the village centre and the site. <del>The opportunity to reinstate the former east/west public footpath through the site should be reinstated and the adjacent line of trees and remnants of the hedgerow should be retained. In re-explored. If feasible, access for residents to Compton Primary School and/or The Ilsleys Primary School should be provided.</del></p>
<b>Other stakeholders</b>		
Councillor Tony Vickers (lpr985)	The policy is supported.	Comments noted. No changes to this policy are required in light of this representation.
<b>Landowners, site promoters and developers</b>		

Respondent (with lpr ref)	Response	Council Response
Homes England (lpr2209)	<p>Homes England are the landowner of the former Pirbright site in Compton following the transfer from the Department for Business, Energy and Industrial Strategy (BEIS). As a former agricultural research station, the site has a complicated history and legacy of contamination relating to the previous use. As such, and as can often be the case with previously developed/brownfield sites, the costs of unlocking the development potential are significant.</p> <p>Homes England submitted a planning application (ref. 20/01336) in June 2020. We continue to work proactively with Officers and statutory consultees to address objections and to develop a proposal that is capable of being granted planning permission.</p> <p>Our clear aspiration is to develop a scheme which delivers housing, including policy compliant affordable, within a development which is well designed and responds to the landscape and ecological constraints, providing a betterment in respect of biodiversity. The Homes England approach to the selection of development partners has evolved in recent years, increasing the expectation and focus placed on delivery high quality design and placemaking thus ensuring the commitment to a positive outcome and legacy.</p> <p>We continue to support the principle of the allocation of the site. Despite this, as is being considered through the current planning application, there is a strong case to demonstrate that the current allocation for approximately 140 homes unduly caps the development potential for the site which potentially renders it undeliverable when considered in the context of the costs involved in unlocking the site. It is acknowledged that the previous examination of the policy concluded that the site could be deliverable at this level of housing, however this was to some extent based on details that are arguably now out of date, particularly in respect of the true costs of remediation, and as such the housing level would not be as robust if re-examined now.</p> <p>In particular, it is a recognised that the consideration of deliverability/viability assessments at Plan Making stage are, by their nature, high level, albeit are required to consider the costs of development.</p> <p>Since the site was allocated, via the development of the current planning application, significantly more information is available to understand the extent of work required to facilitate development on the site. Specifically, this</p>	<p>Comments noted.</p> <p>Outline planning permission has been granted for 160 dwellings on the developable area identified by policy HSA23 under planning application 20/01336/OUTMAJ. As this is an 'in principle' approval, rather than full approval, where the quantum of development could still be amended, and in recognition of the work undertaken in developing the Supplementary Planning Document for the site, and the most recent Compton Neighbourhood Development Plan, which now forms part of the development plan, the policy will remain in allocating 'approximately 140 dwellings'. This is considered to provide flexibility in the policy, as demonstrated in the decision maker's consideration of the planning application.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>relates to a more detailed understanding of the extent and nature of contamination on the site together with the methods and costs involved in remediation. On this basis, in the context of the National Planning Policy Guidance (PPG), it is important to ensure that the future allocation is predicated on realistic, up-to-date information.</p> <p>In light of the above, we support the principle of rolling forward the site allocation given the significant potential for it to make a positive contribution across a range of issues and the advanced stage at which the application has reached. However, as currently adopted, we consider that the policy risks unduly constraining development and in turn potentially fails to accord with the principle of making best use of previously developed land and is no longer appropriate in the context of the available evidence on the costs of unlocking the potential through demolition and remediation.</p> <p>Our response to Question 3 sets out how we consider the policy/allocation could be amended to ensure delivery.</p> <p>We seek a flexible approach to how the quantum of development allowed for on the site is set out in Policy.</p> <p>We consider that the allocation should be more closely aligned to the principles set out in the National Planning Policy Framework (NPPF2019) in respect of previously development land. Specifically, the policy, should be revised to ensure that the redevelopment potential is maximised i.e. best use is made. The NPPF is clear in this regard, in particular paragraphs 117 and 118 (our emphasis):</p> <p><b>117 Planning policies and decisions should promote an effective use of land in meeting the need for homes and other uses, while safeguarding and improving the environment and ensuring safe and healthy living conditions. Strategic policies should set out a clear strategy for accommodating objectively assessed needs, in a way that makes as much use as possible of previously-developed or 'brownfield' land.</b></p> <p><b>118 1c) give substantial weight to the value of using suitable brownfield land within settlements for homes and other identified needs, and support appropriate opportunities to remediate despoiled, degraded, derelict, contaminated or unstable land;</b></p> <p>(NB the 2021 NPPF revision consultation updates the paragraph numbers (each moves on one) but not the substance)</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>Furthermore, there is an expectation within the PPG that (our emphasis) <b>“plan makers in collaboration with the local community, developers and other stakeholders, to create realistic, deliverable policies. Drafting of plan policies should be iterative and informed by engagement with developers, landowners, and infrastructure and affordable housing providers.”</b> (ID: 10-002-20190509).</p> <p>We do not suggest that amendments should result in the removal of criteria for how the development is managed. Rather, we consider that the technical opportunities and constraints should inform the development alongside an understanding and appreciation for what redevelopment would look like in the context of the existing built form of the village.</p> <p>The Development Management process is well placed to undertake this exercise, as evidenced by the current planning application. A particular example of how this approach works, and thus is appropriate, is in respect of landscape. The consultee response to the application raised concerns, amongst others, about the potential development of Area A to the north of the site and the impact on the Area of Outstanding Natural Beauty. As a result of this, we are currently undertaking work to revise plans to respond to concerns and will present these as an update to the application in due course.</p> <p>For this reason, it is entirely appropriate to amend the policy to ensure that there is flexibility in terms of the development capacity. This would support the Council in terms of overall housing delivery, protecting Compton from potential green field speculative applications outside of the built form of the village together with flexibility on overall development numbers ensuring the ability to maximise the affordable housing provision, thus supporting younger generations in their desire to remain within Compton.</p> <p>Such amendments, rather than ceding control of the development and design process, would ensure that the site is capable of being brought forward in the context of the constraints, including remediation costs, allowing a scheme to be delivered which accords with NPPF2019 paragraphs 117 and 118.</p> <p>Homes England remain committed to working collaboratively with Officers to develop a proposal for the site that meets the wider aspirations of the Council, community and ourselves. As well as continued positive</p>	

Respondent <i>(with lpr ref)</i>	Response	Council Response
	engagement with Officers through the Development Management process, we continue to seek the same positive engagement through Policy making, as envisaged by the PPG, to ensure we are able to support the development of a realistic, deliverable allocation.	

**Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)****Emerging Draft LPR Policy: RSA28 Land west of Spring Meadows, Great Shefford****(Proposed Submission LPR Policy: RSA19 Land west of Spring Meadows, Great Shefford)**

Number of responses received: 9

Great Shefford Parish Council (lpr1855)	<p>The development is likely to be detrimental to the Parish in a number of areas:</p> <ol style="list-style-type: none"> <li>1. It will add cumulatively to existing flood impacts in the village. The area was withdrawn from the WBC Local Plan in the last review on this point alone – nothing has substantially changed since this</li> <li>2. Adding a number of dwellings (15+) to this end of the village will lead to additional foul/sewage system impacts and flood potential impacts. We had significant sewage issues last winter, despite years of Thames Water 'mitigation' in the valley. The issue is real and unresolved, and this development would add to it.</li> <li>3. The proposed development area is on substantially higher ground than the existing development and will have a significant impact on existing dwellings at this point in the village. It will also lead to an increased view of new development in the village from surrounding footpaths and the A338 as this height will make a new development here more prominent, creating a landscape impact in the AONB.</li> </ol>	<p><u>Flood impacts</u></p> <p>The existing Local Plan did not include any allocations in Great Shefford. This was because there has been significant flooding in the village when the Housing Site Allocations Development Plan Document (HSA DPD) was being prepared. Since then, there are proposals for a flood mitigation scheme within Great Shefford.</p> <p>As part of the preparation of the Local Plan Review (LPR), Level 1 and Level 2 Strategic Flood Risk Assessments (SFRA) have been prepared which consider the site. Sites within Great Shefford were not specifically considered within the SFRA prepared for the Core Strategy or HSA DPD.</p> <p>The site itself lies within Flood Zone 1 whereby there is a low risk of flooding. The boundary of the site at its northern</p>

Respondent (with lpr ref)	Response	Council Response
	<p>4. The location is unsustainable, it is in a rural village with no substantial public transport links, our public transport has been gradually reduced by WBC over the last 20 years</p> <p>Great Shefford Parish Council agrees that the area of land at RSA 28 which is shown edged red on the inset plan for this site should not be developed.</p>	<p>corner is at low risk of flooding from a surface water flow path during a 1 in 1000 year rainfall event. Development would need to be avoided on this part of the site, and the allocation for the site will require this.</p> <p>Groundwater emergence modelling identifies that the north eastern corner of the site is predicted to be affected by groundwater emergence during a 1 in 30 year and 1 in 100 year event. Development would need to be avoided on this part of the site, and the allocation for the site will require this.</p> <p>The site allocation for the policy will require a Flood Risk Assessment as part of any planning application.</p> <p>In relation to flooding, the policy will read as follows:</p> <p><u>g. The scheme will be informed by a Flood Risk Assessment for the site. This is due to the presence of a surface water flow path flows across the northeast corner of the site, in addition to a small area of groundwater emergence in the north east corner of the site. Development will need to be avoided in this area;</u></p> <p><u>Foul / sewage system</u> A Phase 1 and Phase 2 Water Cycle Study have been prepared and will be reflected in the policy as follows</p> <p><u>i. An integrated water supply and drainage strategy will be provided in advance of development to ensure the provision of adequate and appropriate infrastructure for water supply and waste water, both on and off site. Development will be occupied in line with this strategy. Infiltration from groundwater into the network has been identified as a strategic issue within this catchment;</u></p>

Respondent (with lpr ref)	Response	Council Response
		<p><u>therefore development on the site will connect to the mains sewerage system. A housing phasing plan will be required to ensure development does not outpace delivery of essential network upgrades to the East Shefford Sewage Treatment Works;</u></p> <p><u>Landscape impact</u>                      A Landscape Sensitivity Assessment (2011) indicated that development on the site would not cause significant harm to the landscape character, and subject to a number of mitigation measures development would be acceptable. It is a small site that is well contained by landform and housing, with hedges along the western and northern boundaries. Development could be accommodated and retain small scale pattern and not intrude into the wider AONB. The site lies on the lower valley side, mostly below 115m AOD, with just the north corner rising slightly above.</p> <p>The policy will include the mitigation measures set out in the LSA and will also include a requirement for a Landscape and Visual Impact Assessment:</p> <p>d. <u>The scheme will be developed in accordance with the Landscape Sensitivity Assessment (2011):</u></p> <ul style="list-style-type: none"> <li>• <u>Retention of the existing boundary vegetation;</u></li> <li>• <u>Buildings to be kept off the northern-most corner of the site; and</u></li> <li>• <u>New planting to integrate buildings into the landscape and soften the edge.</u></li> </ul> <p>e. <u>The development design and layout will be further informed by a full detailed Landscape and Visual Impact Assessment (LVIA);</u></p> <p><u>Unsustainable location</u></p>

Respondent (with lpr ref)	Response	Council Response
		<p>The site is located adjacent to the settlement of Great Shefford, which is identified as a Service Village in the settlement hierarchy. Service Villages have a more limited range of services and some limited development potential.</p> <p>Policy SP1 (Spatial Strategy) of the Local Plan Review is clear that the focus of development in each spatial area will follow the District-wide settlement hierarchy set out in Policy SP3 which takes account of the function and sustainability of settlements.</p>
Savills (UK) Ltd for Thames Water (lp71767)	<p><b>Water response:</b></p> <p>The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website <a href="https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development">https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development</a>.</p> <p><b>Waste response:</b></p> <p>The wastewater network capacity in this area may be unable to support the demand anticipated from this development. Local upgrades to the existing drainage infrastructure may be required to ensure sufficient capacity is brought forward ahead of the development. Where there is a potential wastewater network capacity constraint, the developer should liaise with</p>	<p>Comments noted. A Phase 1 and Phase 2 Water Cycle Study have been prepared and will be reflected in the policy as follows -</p> <p>i. <u>An integrated water supply and drainage strategy will be provided in advance of development to ensure the provision of adequate and appropriate infrastructure for water supply and waste water, both on and off site. Development will be occupied in line with this strategy. Infiltration from groundwater into the network has been identified as a strategic issue within this catchment; therefore development on the site will connect to the mains sewerage system. A housing phasing plan will be required to ensure development does not outpace delivery of essential network upgrades to the East Shefford Sewage Treatment Works;</u></p> <p>These comments will inform the emerging draft Infrastructure Delivery Plan.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Thames Water to determine whether a detailed drainage strategy informing what infrastructure is required, where, when and how it will be delivered is required. The detailed drainage strategy should be submitted with the planning application</p> <p><b>Additional comments:</b></p> <p>Thames Water have no concerns relating to wastewater capacity based upon the assumption that the connection is via gravity and that no surface water shall be discharged to the Thames Water foul sewer network.</p>	
<b>General consultation bodies</b>		
North Wessex Downs AONB (lpr1620)	<p>Agree with the proposed allocation.</p> <p>The site relates well to the settlement pattern and would be well contained by the existing landform and housing. The site offers potential for development and would have only a localised impact on views from neighbouring properties but would not harm the landscape and scenic beauty of the AONB. Allocating the site for development would also provide an opportunity to soften the existing raw edge of the village.</p>	Support for allocation noted.
Mid & West Berks Local Access Forum (lpr1882)	<p>A public footpath runs to the west of this site, but is neither shown on the map nor mentioned in the policy. It appears that the boundary of the sites might cut diagonally across this footpath towards the north west of the site, but this may just be lack of precision in the drawing of the boundary.</p> <p>A hedgerow with trees currently separates this footpath from the site, which should be retained to keep the rural character of the footpath.</p> <p>The Forum recommends that the public footpath should be added to the map, so that it is clear that it is outside the boundary of the site (or not).</p> <p>We recommend that following sentence is added to the policy:</p>	<p>Comments noted. Public Right of Way GTSH/1/1 runs adjacent to the western site boundary. The policy will be updated to include a map, and the footpath will be included on the map.</p> <p>The policy will be updated to include criteria to guide the development of the site. The criteria will be informed, amongst others, by the recommendations of the 2011 Landscape Sensitivity. One of the recommendations of the LSA is for the retention of all existing boundary vegetation, and the criteria in the policy will read as follows:</p>

Respondent (with lpr ref)	Response	Council Response
	<p><b><u>The hedgerow with trees on the western boundary of the site should be retained, to maintain the rural character of the footpath that runs alongside this boundary.</u></b></p>	<p>d. The scheme will be developed in accordance with the <u>Landscape Sensitivity Assessment (2011)</u>:</p> <ul style="list-style-type: none"> <li>• <u>Retention of the existing boundary vegetation;</u></li> <li>• <u>Buildings to be kept off the northern-most corner of the site; and</u></li> <li>• <u>New planting to integrate buildings into the landscape and soften the edge.</u></li> </ul>
<b>Other stakeholders</b>		
Alexander Bell (lpr1851)	<p>On the previous plan, it was not recommended for allocation. What is different this time around?</p> <p>There is large ground water, even now the garden is saturated from the recent rains.</p> <p>The land that is being suggested for allocation of 15 houses is raised and much higher than that of the houses that border it by some few good metres.</p> <p>This will cause huge oversight and privacy issues, as well as all the houses that lie on the boundary an unattractive outlook.</p> <p>Privacy is lost, as well as garden views. No one wants a house looking down on another house.</p> <p>The suggested access via Spring Meadows is also of concern. 15 houses average of 30 additional cars using the road as access, that already has cars parked on the road and is school access.</p> <p>This should be re-addressed. Not to mention the change in land level, which I repeat is multiple metres from current Spring meadows to the land that is being allocated.</p>	<p><u>Flood risk:</u> The existing Local Plan did not include any allocations in Great Shefford. This was because there has been significant flooding in the village when the Housing Site Allocations Development Plan Document was being prepared. Since then, there are proposals for a flood mitigation scheme within Great Shefford.</p> <p>As part of the preparation of the Local Plan Review (LPR), Level 1 and Level 2 Strategic Flood Risk Assessments (SFRA) have been prepared which consider the site. Sites within Great Shefford were not specifically considered within the SFRA prepared for the Core Strategy or HSA DPD.</p> <p>The site itself lies within Flood Zone 1 whereby there is a low risk of flooding. The boundary of the site at its northern corner is at low risk of flooding from a surface water flow path during a 1 in 1000 year rainfall event. Development would need to be avoided on this part of the site, and this will be specified within the policy for the site.</p> <p>Groundwater emergence modelling identifies that the north eastern corner of the site is predicted to be affected by groundwater emergence during a 1 in 30 year and 1 in 100</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The landscape regardless of any planted boundaries will be affected, as these dwellings will sit so high in the skyline and the lie of the land in comparison to the rest of Spring Meadows.</p> <p>Flood alleviation works are proposed for the village, but when and what effect this will have is not yet determined.</p> <p>Many flood alleviations schemes have been put in that do not have the desired effect.</p> <p>Ground water run-off from the chalk hills, in this area of settlement on Spring Meadows will undoubtedly be affected by further housing on the land being allocated.</p> <p>Much consideration and investigation need to be put into this.</p> <p>Will the land be excavated to bring it down to the level of the other houses? If not, surely house cannot be built literally 'on top' of other houses, to look down into the gardens.</p> <p>Their ground floor will be level with the top floor or above of the existing houses that lie on the boundary.</p> <p>Things to note and things that will certainly need addressing:</p> <ol style="list-style-type: none"> <li>1. Ground Level</li> <li>2. Ground Water</li> <li>3. Water Run Off</li> <li>4. Existing dwellings privacy</li> <li>5. Existing road use</li> </ol>	<p>year event. Development would need to be avoided on this part of the site, and this will be specified within the policy for the site.</p> <p>The site allocation for the policy will also require a Flood Risk Assessment as part of any planning application.</p> <p>In relation to flooding, the policy will read as follows:</p> <p><u>h. The scheme will be informed by a Flood Risk Assessment for the site. This is due to the presence of a surface water flow path flows across the northeast corner of the site, in addition to a small area of groundwater emergence in the north east corner of the site. Development will need to be avoided in this area;</u></p> <p><u>Landscape impact</u> A Landscape Sensitivity Assessment (2011) indicated that development on the site would not cause significant harm to the landscape character, and subject to a number of mitigation measures development would be acceptable. It is a small site that is well contained by landform and housing, with hedges along the western and northern boundaries. Development could be accommodated and retain small scale pattern and not intrude into the wider AONB. The site lies on the lower valley side, mostly below 115m AOD, with just the north corner rising slightly above.</p> <p>The policy will include the mitigation measures set out in the LSA and will also include a requirement for a Landscape and Visual Impact Assessment:</p> <p><u>f. The scheme will be developed in accordance with the Landscape Sensitivity Assessment (2011):</u></p> <ul style="list-style-type: none"> <li>• <u>Retention of the existing boundary vegetation;</u></li> </ul>

Respondent (with lpr ref)	Response	Council Response
	<p>6. Effect of the proposed dwellings on the flooding on Wantage Road (further hard standing and water run off downhill to the Wantage Road)</p> <p>I refer you back to the previous Local Plan, with all the comments made by residents and professionals, and that the previous Local Plan did not approve for allocation.</p> <p>It is not understood how this can change in 5 years to now make this site viable for development. This email is to object to the decision that the site is recommended for allocation as per the Local Plan to 2037.</p> <p>Reference to the HSA DPD and SEA which outlined reasons made by the Council for not previously allocating the site.</p> <p>I have seen no justification for why this reasoning has changed. This 2nd email is further to show my objection to the site being suitable for 15 dwellings.</p> <p>In addition to my objection to make reference to my statement please see here: <a href="https://info.westberks.gov.uk/CHttpHandler.ashx?id=43955&amp;p=0">https://info.westberks.gov.uk/CHttpHandler.ashx?id=43955&amp;p=0</a>.</p> <p>Please go to page 51, and I highlight here in a snippet. It must be explained how this has changed since May 2017 [see attachment].</p> <p>[Para 2.47 of the Housing Site Allocations Development Plan Document (HSA DPD)] “...It is not proposed to allocate any sites in Great Shefford due to concerns over flood risk and recent severe flooding in the village.”</p> <p>Also, please see here previous comments and reasons for the site NOT being allocated, how has this changed? [see attachment from the</p>	<ul style="list-style-type: none"> <li>• <u>Buildings to be kept off the northern-most corner of the site; and</u></li> <li>• <u>New planting to integrate buildings into the landscape and soften the edge.</u></li> </ul> <p>g. <u>The development design and layout will be further informed by a full detailed Landscape and Visual Impact Assessment (LVIA);</u></p> <p><u>Privacy / overlooking:</u> National Planning Practice Guidance requires that planning policies and decisions do not undermine quality of life. Policy SP7 (Design Principles) of the LPR requires that development will provide a high quality of amenity and privacy for both occupants of the development and neighbouring properties and land.</p> <p><u>Access:</u> The Highways Authority provided comments as part of the Housing and Economic Land Availability Assessment (HELAA) and site assessment work. They advised that whilst the site does not appear to have direct access onto the public highway, if access can be obtained it would be obtained from Spring Meadows adjacent number 41.</p> <p>Except for the section fronting number 41, Spring Meadow is generally wide enough varying in width from 4.8 to 5.5 metres. However the section fronting 41 would be short. A footway would need to be provided from the development to the existing footway fronting 31. This is possible within the public highway.</p> <p>The site promoter has indicated that access is possible from the road along the northern boundary over land in the same ownership.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Sustainability Appraisal/Strategic Environmental Assessment of the HSA DPD].</p> <p>I have seen no justification why this reasoning has changed.</p>	<p>The policy for the site will require that access is taken from Spring Meadows:</p> <ul style="list-style-type: none"> <li>• <u>Access to the site will be provided from Spring Meadows. A footway will need to be provided from the development to the existing footway in Spring Meadow;</u></li> </ul> <p>The Local Highways Authority have not raised any concerns in relation to the impact upon the local highway network.</p>
Caroline Farrant (lpr45)	<p>Huge concerns with regard to access to the proposed site. Access through Spring Meadows would put increased pressure on an already 'busy' area with cars frequently partially blocking the road, school vehicles turning limited driveway parking. Access along the track on Wantage road provides its own issues as the A338 is very fast a visibility is poor to exit that track. Not only does access need addressing but the speed in which vehicles travel through the village.</p> <p>'Approximately 15 dwellings' could mean many more than that?</p> <p>when Spring Meadows was built there were massive issues with ground water, how will this be addressed.</p> <p>Such a pity WBC spot a little bit of land and want to fill it with housing.</p> <p><b>What changes are you seeking / what would be your preferred approach?</b></p> <p>I would prefer the land not to be used for any housing, because access to that area is virtually impossible.</p>	<p><u>Access:</u> The Highways Authority provided comments as part of the Housing and Economic Land Availability Assessment (HELAA) and site assessment work. They advised that whilst the site does not appear to have direct access onto the public highway, if access can be obtained it would be obtained from Spring Meadows adjacent number 41.</p> <p>Except for the section fronting number 41, Spring Meadow is generally wide enough varying in width from 4.8 to 5.5 metres. However the section fronting 41 would be short. A footway would need to be provided from the development to the existing footway fronting 31. This is possible within the public highway.</p> <p>The site promoter has indicated that access is possible from the road along the northern boundary over land in the same ownership.</p> <p>The policy for the site will require that access is taken from Spring Meadows:</p>

Respondent (with lpr ref)	Response	Council Response
		<p><u>'Access to the site will be provided from Spring Meadows. A footway will need to be provided from the development to the existing footway in Spring Meadow.'</u></p> <p>The Local Highways Authority have not raised any concerns in relation to the impact upon the local highway network.</p> <p><u>Dwelling numbers:</u> The final dwelling number will be informed by a Landscape Visual Impact Assessment.</p> <p><u>Groundwater:</u> Groundwater emergence modelling identifies that the north eastern corner of the site is predicted to be affected by groundwater emergence during a 1 in 30 year and 1 in 100 year event. Development would need to be avoided on this part of the site, and this will be specified within the policy for the site.</p> <p>The site allocation for the policy will also require a Flood Risk Assessment as part of any planning application.</p> <p>In relation to flooding, the policy will read as follows:</p> <p><u>g. The scheme will be informed by a Flood Risk Assessment for the site. This is due to the presence of a surface water flow path flows across the northeast corner of the site, in addition to a small area of groundwater emergence in the north east corner of the site. Development will need to be avoided in this area;</u></p>
Gareth Knass (lpr634)	Disagree with the proposed allocation.	<p><u>Landscape impact</u> A Landscape Sensitivity Assessment (2011) indicated that development on the site would not cause significant harm to the landscape character, and subject to a number of</p>

Respondent (with lpr ref)	Response	Council Response
	<p>I wish to <b>object</b> to this part of the proposed policy. The addition of this site as a housing site is contrary to existing and emerging Council policies, will impact significantly locally, and does not preserve the previous planning history for the site. I will set out my concerns in turn below:</p> <p><b>Landscape - contrary to Policy Area Delivery Plan Policy 5, CS19 and emerging policy SP2</b></p> <p>The site is currently outside of the curtilage of Great Shefford village and within the Area of Outstanding Natural Beauty (AONB). It should be noted that the ground steps up from the existing development at Spring Meadows so is approximately 2m above the level of existing housing at the eastern end and then banded at the western/north western end where a public right of way (PROW) runs on top of the bund. The development will be seen from a number of local PROW and from the A338, and as a result of the different levels will make a development here look out of place with the flow of the village, and contribute to the ribbon development along the A338 reducing the value of the AONB. It will also result in loss of view for the local primary school. For example, looking at the village from the PROW to Trindledown Copse, the roof level of a new development here would be significantly higher than the existing village.</p> <p>The AONB is a dark sky area. Historical residential development within Spring Meadows has resulted in an existing impact on this (it is one of the most lit parts of the village). New development with associated street lighting will add cumulatively to this impact. Local residents in the past have requested down time on the street lights in the village (eg between midnight -5am), but this was rejected by the Parish Council following public consultation. Provision of new LED lighting does not reduce the impact. The provision of lighting on higher ground in a new development would be detrimental to the local landscape.</p> <p><b>Flood Impact – contrary to Policy CS 16 and emerging policy SP6</b></p>	<p>mitigation measures development would be acceptable. It is a small site that is well contained by landform and housing, with hedges along the western and northern boundaries. Development could be accommodated and retain small scale pattern and not intrude into the wider AONB. The site lies on the lower valley side, mostly below 115m AOD, with just the north corner rising slightly above.</p> <p>The policy will include the mitigation measures set out in the LSA and will also include a requirement for a Landscape and Visual Impact Assessment:</p> <p>h. <u>The scheme will be developed in accordance with the Landscape Sensitivity Assessment (2011):</u></p> <ul style="list-style-type: none"> <li>• <u>Retention of the existing boundary vegetation;</u></li> <li>• <u>Buildings to be kept off the northern-most corner of the site; and</u></li> <li>• <u>New planting to integrate buildings into the landscape and soften the edge.</u></li> </ul> <p>i. <u>The development design and layout will be further informed by a full detailed Landscape and Visual Impact Assessment (LVIA):</u></p> <p><u>Flood impact:</u></p> <p>The existing Local Plan did not include any allocations in Great Shefford. This was because there has been significant flooding in the village when the Housing Site Allocations Development Plan Document was being prepared. Since then, there are proposals for a flood mitigation scheme within Great Shefford.</p> <p>As part of the preparation of the Local Plan Review (LPR), Level 1 and Level 2 Strategic Flood Risk Assessments (SFRA) have been prepared which consider the site. Sites</p>

Respondent (with lpr ref)	Response	Council Response
	<p>(1) Great Shefford has been subject to a number of flooding events in the last 20+ years, including flooding from the Great Shefford Stream that runs along the A338. The winter 2014 flood event resulted in closure of the A338 for a period, flooding of private dwellings, disruption to the village, loss of power, and failure of the sewage system from ground water and flooding ingress. Allowing new development in this location will exacerbate existing issues here, which have yet to be resolved. Further, a proposed plan for alleviation of the flooding with a new pipe diverting excess flow on the Great Shefford stream at times of flood is being delayed, with no firm agreement between all partners, or date of delivery yet provided. The previous housing delivery plan in the Local Plan rejected this site on this basis and despite efforts of the Great Shefford Flood Alleviation Association and Parish Council, this situation has not changed since that decision. Therefore it the site should not be added to this plan.</p> <p>The impact on flooding includes sewage issues, where by residents in Spring Meadows and the wider village have in the past been asked to reduce the use of private waste water services from dwellings in order to reduce the impact on those further down the system in the village where sewage is surcharging into properties and open spaces during high water and flood events. A new development here would significantly add to this impact and Thames Water have not been able to mitigate successfully despite sealing man holes and lining sewars in the local area. Last winter sewage issues in the lower part of the village were still significant.</p> <p>(2) In addition to flooding along the Great Shefford Stream, there is also potential for flash flooding, as occurred in 2007. This resulted in surface water run off flooding from high ground to parts of the village – a number of houses in the village were flooded as a result. Allowing a new development in this location will increase such flood risk potential onto existing adjacent properties, this is a concern given the higher level of the existing ground, its green field nature and potential for directional run off from a new road system connecting to the end of Spring Meadows. A development here would increase this flood risk locally.</p>	<p>within Great Shefford were not specifically considered within the SFRA prepared for the Core Strategy or HSA DPD.</p> <p>The site itself lies within Flood Zone 1 whereby there is a low risk of flooding. The boundary of the site at its northern corner is at low risk of flooding from a surface water flow path during a 1 in 1000 year rainfall event. Development would need to be avoided on this part of the site, and the allocation for the site will require this.</p> <p>Groundwater emergence modelling identifies that the north eastern corner of the site is predicted to be affected by groundwater emergence during a 1 in 30 year and 1 in 100 year event. Development would need to be avoided on this part of the site, and the allocation for the site will require this.</p> <p>The site allocation for the policy will require a Flood Risk Assessment as part of any planning application.</p> <p>In relation to flooding, the policy will read as follows:</p> <p><u>g. The scheme will be informed by a Flood Risk Assessment for the site. This is due to the presence of a surface water flow path flows across the northeast corner of the site, in addition to a small area of groundwater emergence in the north east corner of the site. Development will need to be avoided in this area;</u></p> <p><u>Wastewater:</u> A Phase 1 and Phase 2 Water Cycle Study have been prepared and will be reflected in the policy as follows</p>

Respondent (with lpr ref)	Response	Council Response
	<p><b>Biodiversity Impact – contrary to policy CS17 of the Local Plan and emerging policy SP11</b></p> <p>(1) The sewage system in the village is not able to cope with the existing load during periods of high rainfall and particularly high groundwater. Over the last 10 years alone there has been events that has resulted in raw sewage leaving the system and entering surface water systems in the village. This then means that the sewage will enter the River Lambourn which is an internationally rare chalk stream habitat protected under national legislation as a Site of special Scientific Interest (SSSI), and as a Special Area of Conservation (SAC). Under the Habitat Regulations 2017 (as amended) all plans and projects should be subject to an appropriate assessment of their impacts where there is a likely significant effect alone or in-combination with other plans or projects. Given that there is an existing impact on the River Lambourn SAC from sewage pollution events, the cumulative impact of additional residential development on the local sewage system will lead to increased cumulative impact. It should be noted that, through the Lambourn Valley Flood Forum, Thames Water, as mentioned above, have spent much time and effort seeking mitigation measures to reduce and avoid impacts as described above in the village. This has not to date been successful and the problem persists, and it is difficult to see how they will be able to separate the sewage system fully from ground water infiltration.</p> <p>(2) It is noted that the site had some thorn scrub adjacent to the school boundary removed around a decade ago, that provided habitat for farmland birds including Red Listed Birds of Conservation Concern. I have noted Yellowhammer, Linnet, Grey Partridge using the site. The protected reptiles, Slow Worm and Grass Snake have been noted locally and may use habitats within the field edges.</p> <p><b>Sustainability – contrary to emerging policy SP5</b></p>	<p>i. <u>An integrated water supply and drainage strategy will be provided in advance of development to ensure the provision of adequate and appropriate infrastructure for water supply and waste water, both on and off site. Development will be occupied in line with this strategy. Infiltration from groundwater into the network has been identified as a strategic issue within this catchment; therefore development on the site will connect to the mains sewerage system. A housing phasing plan will be required to ensure development does not outpace delivery of essential network upgrades to the East Shefford Sewage Treatment Works;</u></p> <p><u>Biodiversity impact:</u> The site was promoted through the ‘call for sites’ for the Council’s Housing and Economic Land Availability Assessment (HELAA). The HELAA forms part of the evidence base for the Local Plan Review (LPR) and it makes a preliminary assessment of the suitability and potential of sites.</p> <p>As part of this work, a desktop assessment of the impact that development might have on nature conservation was undertaken by the Thames Valley Environmental Research Centre (TVERC). Comments were also sought from Natural England and the Berkshire, Buckinghamshire and Oxfordshire Wildlife Trust (BBOWT).</p> <p>The assessment by TVERC highlighted there was a medium risk of adverse impacts.</p> <p>Natural England commented that there was the potential for development to have an adverse impact upon a Site of Special Scientific Interest, and that development may have an adverse impact on the integrity of a Special Area of</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The site is not sustainable. There are very few options for public transport in the village, and these are in decline. At present only a small bus service route runs in the village. Any development would therefore be tied to car use, which is against existing and emerging policy on sustainability.</p> <p><b>Impact on Existing Dwellings – Contrary to emerging Policy DC 30</b></p> <p>(1) As already stated the land subject to the proposed policy is significantly higher than the existing development within Spring Meadows. Development will result in significant impact on existing dwellings as a result.</p> <p>(2) In order to supply pavement to this development there would require land take from existing front gardens and drives on either or both sides of the existing cul-de-sac at Spring Meadows. This will be resisted by local residents.</p> <p><b>Parking – contrary to emerging policy DC36</b></p> <p>The existing development on Spring Meadows did not provide sufficient off road parking for all dwellings, this is the case in the cul-de-sac section adjacent to the proposed policy site. There are bottlenecks and reduced access through necessary on street parking. Allowing development here and associated reduction in driveways of existing dwellings to create a pavement will exacerbate this issue, reducing the driveway lengths further below the standard in the emerging policy for the existing dwellings adjacent to the site.</p> <p><b>Affordable Housing – contrary to Area Delivery Plan Policy 5</b></p> <p>The last survey carried out by the Parish Council found no additional need in the village for affordable housing. New development recently permitted within the village curtilage has provided additional new dwellings locally.</p>	<p>Conservation through discharge, abstraction, construction, run-off/drainage.</p> <p>BBOWT commented that the site is within 1km of a Special Area of Conservation and development may not be appropriate. Habitat Regulation Assessment may be required. They also commented that the site is within 1km of a Site of Special Scientific Interest, development may not be appropriate</p> <p>The policy for the allocation will include a requirement for surveys, and the final developable area will be dependent upon the extent of any appropriate evidence and mitigation measures. The wording of the requirements will be as follows:</p> <p>f. <u>The scheme will be informed by an Ecological Impact Assessment (EclA). Appropriate avoidance and mitigation measures will need to be implemented to ensure any designated sites and/or protected habitats and/or species are not adversely affected;</u></p> <p>h. <u>The site lies within the hydrological catchment of the River Lambourn SSSI/SAC and the development must demonstrate nutrient neutrality. A Habitats Regulations Assessment will be required to accompany any future planning application. This will be supported by an appropriate Nutrient Neutrality Assessment and Mitigation Assessment. Mitigation required will need to be operational and in place prior to any nutrient pollution being discharged;</u></p> <p><u>Sustainability:</u> Policy SP1 of the LPR sets out the spatial strategy for the district. The overall approach to development will be based</p>

Respondent (with lpr ref)	Response	Council Response
	<p><b>Site History – Contrary to Green Infrastructure Policy and Settlement Boundary principles</b></p> <p>When the Spring Meadows development was granted permission in 1999 the land under the current proposed policy was given to the village as recreation space (to be used as a Football club as long as there was need). When the club folded the changing facility was built on by the landowner precluding any future use for football. Despite this, locals used the field for informal recreation until the owner fenced this out. Objections to this were made at the time. Allowing development here will take away from the village the benefits of planning gain from a historical development and should be resisted.</p>	<p>on three spatial areas, one of which includes the North Wessex Downs AONB. The focus of development in each spatial area will follow the district-wide settlement hierarchy set out in policy SP3.</p> <p>Within the settlement hierarchy, Great Shefford is identified as a ‘Service Village’. Service Villages are smaller rural settlements which offer some limited and small-scale development potential appropriate to the character and function of the village in order to meet local needs.</p> <p><u>Impact on existing dwellings:</u> The Local Highway Authority has advised that A footway would need to be provided from the development to the existing footway fronting 31. This is possible within the public highway.</p> <p><u>Parking:</u> Development proposals will need to comply with LPR Emerging Draft LPR Policy DM36 (Parking).</p> <p><u>Affordable Housing:</u> The West Berkshire Housing Needs Assessment Update (July 2022) identifies that there is a need for affordable housing across the district.</p> <p><u>Green infrastructure:</u> Policy SP10 (Green Infrastructure) of the LPR requires all development proposals to:</p> <ul style="list-style-type: none"> <li>• protect or enhance existing Green Infrastructure (GI) and the functions this performs,</li> <li>• create additional GI which is integrated into the overall development design from the outset,</li> </ul>

Respondent (with lpr ref)	Response	Council Response
		<ul style="list-style-type: none"> <li>take opportunities to achieve multi-functionality by bringing GI functions together.</li> </ul>
Terry McCarthy (lpr1910)	<p>I wish to <b>object</b> to this proposed policy. The addition of this site as a housing site is contrary to existing and emerging Council policies, will impact significantly locally, and does not preserve the previous planning history for the site. I will set out my concerns in turn below:</p> <p><b>Landscape - contrary to Policy Area Delivery Plan Policy 5, CS19 and emerging policy SP2</b></p> <p>The site is currently outside of the curtilage of Great Shefford village and within the Area of Outstanding Natural Beauty (AONB). It should be noted that the ground slopes from the existing development at Spring Meadows so is approximately 2m above the level of existing housing at the eastern end and then bunded at the western/north western end where a public right of way (PROW) runs on top of the bund. The development will be seen from a number of local PROW and from the A338, and as a result of the different levels will make a development here look out of place with the flow of the village, and contribute to the ribbon development along the A338 reducing the value of the AONB. It will also result in loss of view for the local primary school. For example, looking at the village from the PROW to Trindledown Copse, the roof level of a new development here would be significantly higher than the existing village.</p> <p>The AONB is a dark sky area. Historical residential development within Spring Meadows has resulted in an existing impact on this (it is one of the most lit parts of the village). New development with associated street lighting will add cumulatively to this impact. Local residents in the past have requested down time on the street lights in the village (eg between midnight -5am), but this was rejected by the Parish Council following public consultation. Provision of new LED lighting does not reduce the impact. The provision of lighting on higher ground in a new development would be detrimental to the local landscape.</p>	<p><u>Landscape impact</u></p> <p>A Landscape Sensitivity Assessment (2011) indicated that development on the site would not cause significant harm to the landscape character, and subject to a number of mitigation measures development would be acceptable. It is a small site that is well contained by landform and housing, with hedges along the western and northern boundaries. Development could be accommodated and retain small scale pattern and not intrude into the wider AONB. The site lies on the lower valley side, mostly below 115m AOD, with just the north corner rising slightly above.</p> <p>The policy will include the mitigation measures set out in the LSA and will also include a requirement for a Landscape and Visual Impact Assessment:</p> <p>i. <u>The scheme will be developed in accordance with the Landscape Sensitivity Assessment (2011):</u></p> <ul style="list-style-type: none"> <li><u>Retention of the existing boundary vegetation;</u></li> <li><u>Buildings to be kept off the northern-most corner of the site; and</u></li> <li><u>New planting to integrate buildings into the landscape and soften the edge.</u></li> </ul> <p>k. <u>The development design and layout will be further informed by a full detailed Landscape and Visual Impact Assessment (LVIA);</u></p> <p><u>Flood impact:</u></p> <p>The existing Local Plan did not include any allocations in Great Shefford. <b>Statutory consultees</b>		
Hermitage Parish Council (lpr1816)	It is too late to object to these policies because both sites are already in the planning process. A decision is awaited on RSA 29, land off Charlotte Close Hermitage and RSA 30 land to south east of Old Farmhouse, although superseded is being appealed.	<p>Comments noted.</p> <p>Several sources will ensure a continuous supply of housing across the plan period. These include retained allocations in the Local Plan. The site is currently allocated in the Housing Site Allocations DPD which forms part of the existing Local Plan. This site has planning permission. As development has not yet been built out, the allocation is being retained.</p>
Environment Agency (lpr1675)	An ordinary watercourse is in culvert beneath this site. Therefore any development is an opportunity to open up the culvert which could contribute to biodiversity net gain. There should also be a minimum 5m wide undeveloped buffer zone to the watercourse whether it is de-culverted or not. This is because any new buildings closer than 5m could undermine the culvert and would also preclude the opportunity to de-culvert in the future.	<p>Comments noted.</p> <p>The policy will be amended to reflect these comments as follows -  'A Flood Risk Assessment (FRA) will be required as the site falls within an area at risk from surface water flooding with a small part of the site within a Critical Drainage Area. The FRA should consider all potential sources of flood risk and advise on the necessary SuDS techniques/mitigation measures to be incorporated within the scheme. <u>An ordinary watercourse is in culvert beneath the site. The development scheme should include opportunities to open up the culvert and contribute to biodiversity net gain. The development scheme should incorporate a 5m wide undeveloped buffer zone to the watercourse.</u>'</p> <p>These comments will inform the emerging draft Infrastructure Delivery Plan</p>
Historic England (lpr1582)	Much of this site overlaps an area identified from aerial photography as ridge and furrow. We recommend a desk based assessment and, subject to the results of the desk based assessment, field evaluation. Ideally, this should take place prior to allocation, in order to confirm allocation of this site is appropriate and to avoid over- or under- allocating the site.	<p>Comments noted.</p> <p>The policy will be amended to reflect these comments as follows –</p>

Respondent (with lpr ref)	Response	Council Response
		<u>'The development will be informed by a desk-based archaeological assessment followed by field evaluation if necessary.'</u>
Natural England (lpr1603)	There is potential for development at these sites [RSA29 and RSA30], which would improve the connection between the core of the village and the Hermitage Green development. The allocations could accommodate two parcels of development with integrated open spaces, green infrastructure and woodland which would better integrate with the existing landscape character.	Comments noted.  The policy will be amended to reflect these comments as follows – <u>'green infrastructure that integrates the site within the existing landscape character'</u>
Thames Water (lpr1760)	The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. On the information available to date we do not envisage infrastructure concerns regarding wastewater infrastructure capability in relation to this site. Thames Water have no concerns relating to wastewater capacity based upon the assumption that the connection is via gravity and that no surface water shall be discharged to the Thames Water foul sewer network.	Comments noted.  A Phase 1 and Phase 2 Water Cycle Study have since been prepared and will be reflected in the policy as follows - <u>'An integrated water supply and drainage strategy will be provided in advance of development to ensure the provision of adequate and appropriate infrastructure for water supply and waste water, both on and off site. Development will be occupied in line with this strategy.'</u>
<b>General consultation bodies</b>		
Mid and West Berkshire Local Access Forum (lpr1883)	The Hermitage to Hampstead Norreys off-road path (the Eling Way) opened in 2020 for all non-motorised users for utility and recreational purposes along the disused Didcot to Newbury railway line, and has been a huge success. There are proposals to extend it northwards to Compton and southwards to	Comments noted.  The policy will be amended to reflect these comments as follows –

<b>Statutory consultees</b>		
Hermitage Parish Council (lpr1817)	It is too late to object to these policies because both sites are already in the planning process. A decision is awaited on RSA 29, land off Charlotte Close Hermitage and RSA 30 land to south east of Old Farmhouse, although superseded is being appealed.	Comments noted. Several sources will ensure a continuous supply of housing across the plan period. These include retained allocations in the Local Plan. The site is currently allocated in the Housing Site Allocations DPD which forms part of the existing Local Plan. This site has planning permission. As development has not yet been built out, the allocation is being retained.
Environment Agency (lpr1676)	An ordinary watercourse is in culvert beneath this site. Therefore any development is an opportunity to open up the culvert which could contribute to biodiversity net gain. There should also be a minimum 5m wide undeveloped buffer zone to the watercourse whether it is de-culverted or not. This is because any new buildings closer than 5m could undermine the culvert and would also preclude the opportunity to de-culvert in the future.	Comments noted. The policy will be amended to reflect these comments as follows -  'A Flood Risk Assessment (FRA) will be required as the site falls within an area at risk from surface water flooding with a small part of the site within a Critical Drainage Area. The FRA should consider all potential sources of flood risk and advise on the necessary SuDS techniques/mitigation measures to be incorporated within the scheme. <u>An ordinary watercourse is in culvert beneath the site. The development scheme should include opportunities to open up the culvert and contribute to biodiversity net gain. The</u>

Respondent (with lpr ref)	Response	Council Response
		<p><u>development scheme should incorporate a 5m wide undeveloped buffer zone to the watercourse.'</u></p> <p>These comments will inform the emerging draft Infrastructure Delivery Plan</p>
Historic England (lpr1583)	We support the requirement for an archaeological desk based assessment as a minimum and field evaluation if necessary to assess the historic environment potential of the site, in accordance with NPPF paragraph 189.	Comments noted.
Natural England (lpr1602)	There is potential for development at these sites [RSA29 and RSA30], which would improve the connection between the core of the village and the Hermitage Green development. The allocations could accommodate two parcels of development with integrated open spaces, green infrastructure and woodland which would better integrate with the existing landscape character.	<p>Comments noted.</p> <p>The policy will be amended to reflect these comments as follows –  <u>'.....green infrastructure that integrates the site within the existing landscape character'</u></p>
Thames Water (lpr1768)	<p>The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. 	east of the Old Farmhouse. Consideration will be given to making these linkages part of a Hermitage to Newbury off-road path which is open to all non-motorised users including horses.	
Councillor Tony Vickers (lpr992)	The policy is supported.	Support noted
<b>Landowners,</b>		
Pro Vision on behalf of T A Fisher & Sons Ltd (lpr1935)	<p>The policy is supported.</p> <p>Policy RSA30 of the draft Local Plan allocates land owned by our client to the south east of the Old Farmhouse, Hermitage, for approximately 10 dwellings. This carries forward the allocation of the site for development from the adopted Housing Site Allocations Development Plan Document (DPD) (May 2017), as set out in Policy HSA25.</p> <p>The site's recent planning history is summarised below.</p> <p>Outline planning permission was granted on 20 November 2018 (ref. 17/03290/OUTMAJ) for the following development:  <i>“Outline application for demolition of farmyard buildings, retention of The Old Farmhouse and the erection of up to 21 new dwellings, improved vehicular access off Newbury Road, car parking, public open space and landscaping. Matters to be considered – Access”</i></p> <p>On 15 July 2020, the Council refused an application under Section 73 of the Town and Country Planning Act 1990 (as amended) “to vary Condition 4 (approved plans) of previously approved application 17/03290/OUTMAJ to amend the parameter plan”. An appeal against this decision was subsequently lodged and is yet to be determined.</p> <p>Paragraph 9.3 of the Council's Site Selection Background Paper (December 2020) explains that <i>‘The promoters of all the sites allocated in the Core Strategy and HSA DPD were contacted in the summer of 2020 for an update on deliverability so that it could be determined whether sites should be rolled forward into the LPR or not’</i>.</p> <p>Table 9.1 of the Council's Site Selection Background Paper (December 2020) provides the Council's deliverability update. In relation to land owned by our client (ref: HSA25), it is noted that:</p> <ul style="list-style-type: none"> <li>• <i>‘Site has planning permission</i></li> </ul>	<p>Comments noted.</p> <p>The outline planning consent (17/03290/OUTMAJ) relates to a larger site, of which the site allocated under RSA29 is only a part. It is this larger site which has been granted permission for up to 21 dwellings.</p> <p>In order to introduce some flexibility with regards to access, the policy will be amended as follows -</p> <p><u>‘The site will be accessed via Newbury Road and/or Lipscombe Close with the provision of pedestrian and cycle linkages from Lipscombe Close through the site to the allocations at RSA20 (Land off Charlotte Close) and RSA22 (land adjacent Station Road). with the provision of pedestrian and cycle linkages through the site to HSA 24 (Land off Charlotte Close).</u></p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• S.73 application recently refused – appeal lodged. New full application to be submitted later in 2020</li> <li>• Site owned by a developer</li> <li>• Anticipated build out rates: 2021/22:21 dwellings</li> <li>• Allocation will be rolled forward into the LPR’.</li> </ul> <p>The only comments that we have in relation to the Council’s deliverability update is to confirm that a new full application has not been submitted. Regarding Policy RSA30 of the draft Local Plan, our only comments relate to ensuring that its wording reflects the details of the site / development for which Outline planning permission was granted (ref. 17/03290/OUTMAJ). This relates to the following: Outline Planning Permission has been granted for up to 21 dwellings, with an approved developable area of approximately 0.98 hectares, as opposed to the 0.6 hectares quoted. We therefore respectfully request the following amendment: <i>“The site, as shown on the indicative map, has a developable area of approximately <del>0.6 hectares</del> 0.98 hectares”</i> The Outline application granted planning permission for up to 21 dwellings. The illustrative layout confirms that this level of development can be accommodated on the site as opposed to 10 dwellings as cited in the policy. We therefore respectfully request the following amendment: <i>“(i) The provision of approximately <del>10 dwellings</del> 21 dwellings to be developed at a mass and density that reflects the adjacent settlement character.”</i> Policy HSA25 states that the site will be accessed via Lipscombe Close. However Outline Planning Permission has been granted allowing access from Newbury Road. We therefore respectfully request the following amendment: <i>“The site will be accessed via Newbury Road, with the provision of pedestrian and cycle linkages from Lipscombe Close through the site to HER001 (Land off Charlotte Close). Access can also be provided off Station Road if the site is developed in conjunction with HER001 or via Lipscombe Close.”</i> <b>Conclusion</b></p>	

Respondent <i>(with lpr ref)</i>	Response	Council Response
	<p>These representations have been prepared by Pro Vision on behalf of our client T A Fisher &amp; Sons Ltd in response to West Berkshire Council's consultation on its Local Plan Review 2020- 2037: Emerging Draft (December 2020).</p> <p>Our client owns land in the District that has been allocated for development in the draft Local Plan. This relates to Land to the south east of the Old Farmhouse, Hermitage, which is proposed for allocation in Policy RSA30 for approximately 10 dwellings. This carries forward the allocation of the site for development from the adopted Housing Site Allocations Development Plan Document (DPD) (May 2017), as set out in Policy HSA25.</p> <p>Our client supports the proposed allocation of the site and is keen to continue working collaboratively with the Council to secure its sustainable development. These representations therefore focus on responding to / clarifying specific elements in the wording of Policy RSA30 to ensure that it is clear and factually accurate.</p>	

## Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

### Policy ref: RSA31 Land adjoining The Haven, Kintbury (Site Ref: KIN6)

Number of responses received: 20

Respondent (with lpr ref)	Response	Council Response
<b>Statutory consultees</b>		
Kintbury Parish Council (lpr1725)	<p>Kintbury Parish Council acknowledges that there is in West Berkshire a need/requirement for more housing and, in particular, Affordable and Social Housing. In this respect, Kintbury has to play its part, on a limited basis, in accordance with the Plan.</p> <p>Kintbury Parish Council does raise the following concerns: Kintbury residents are very concerned about the increasing traffic through the Village centre and, particularly, the effect on the Conservation Area where the streets are of C18th origin or earlier, are extremely narrow with many streets without footways or ones that are inadequate. There are a number of pinch-points which result in congestion and create pollution where homes are close to the highway. In addition the growth of traffic already traversing the Village has resulted in long queues trying to cross the railway creating more congestion and pollution in the centre together with a difficult access to the A4, where most of the traffic is headed. Any development will have a deleterious effect on the level of traffic needing to pass through the centre of the Village.</p> <p>The proposed site (KIN 6) at The Haven is located outside of the Village Settlement Boundary and is in the AONB where the scenic quality is high and is a valued landscape. The site is surrounded by open fields and the Recreation Ground forming a part of the surrounding countryside and landscape. There is concern that the development could cause harm to the landscape quality and the value of the AONB. The site will be visible from highways and public rights of way. Access to KIN 6, via The Haven, could worsen the environment for residents of The Haven and the resulting removal of the garage site could create more on street parking unless it is replaced as part of the development. If the development is included in the Local Plan Review thought should be given to improving the environment within The Haven including providing additional parking and other facilities to take account of the environmental damage caused by the development.</p>	<p>Comments noted.</p> <p><u>Traffic:</u> The site was promoted through the 'call for sites' for the Council's Housing and Economic Land Availability Assessment (HELAA). The HELAA forms part of the evidence base for the Local Plan Review (LPR) and it makes a preliminary assessment of the suitability and potential of sites.</p> <p>The site was assessed as 'potentially developable' in the HELAA, and it was then subject to more detailed site assessment work.</p> <p>The Highways Authority provided comments as part of the HELAA and site assessment work. They advised that extensive on street parking within the High Street limits potential for additional traffic flow. There are already problems with getting bus and other larger vehicles through High Street, Newbury Street, Holt Road and the northern end of Inkpen</p>

Respondent (with lpr ref)	Response	Council Response
		<p>Road due to road width, parking, hedges and adjoining land uses. Double yellow lines in High Street, Newbury Street, Holt Road and the northern end of Inkpen Road could help mitigate the effects of additional development in the village. It is not considered that the increase in traffic at the Inkpen Road/High Street junction (in relation to the existing traffic using the junction) is of significant concern.</p> <p>Any future planning application will need to be accompanied by a Transport Statement, and the requirement for this will be included in the site specific policy for the site and worded as follows:</p> <p><u>'A Transport Statement will be required as part of any planning application.'</u></p> <p><u>AONB:</u>  A Landscape Sensitivity Assessment (LSA) was prepared in 2011. The LSA advised that development on the site would be acceptable, subject to certain recommendations. The recommendations from the LSA will be incorporated into the policy as follows:</p> <p>(a) <u>The scheme will be developed in accordance with the Landscape Sensitivity Assessment (2011):</u></p> <ul style="list-style-type: none"> <li>(i) <u>Replacement of the conifer hedge to the western boundary with more appropriate planting;</u></li> <li>(ii) <u>Views from the surrounding countryside, Public Right of Way, and the neighbouring recreational</u></li> </ul>

Respondent (with lpr ref)	Response	Council Response
		<p><i>field would need to be carefully considered; and</i></p> <p>(iii) <i>New planting to integrate the buildings into the landscape.'</i></p> <p>In addition, the policy will also include the following requirement for a Landscape and Visual Impact Assessment:  <u>The development design and layout will be in accordance with policy SP7 and further informed by a full detailed LVIA.</u></p> <p>As part of the assessment of the site for the HELAA, the AONB Unit commented that there is the potential for development and that a landscape assessment would be required.</p> <p><u>Access:</u>  The Highways Authority provided comments as part of the HELAA and site assessment work. They advised that an acceptable access onto The Haven should be achievable via the existing garages. Any parking lost to the garages will need to be relocated. Sight lines at The Haven / Inkpen Road junction will need to be improved but a technical note provided in July 2015 has shown that land is available. The policy for the site will include the following criteria as follows:  <u>Access to the site will be provided from The Haven via the existing garages. Any parking lost will need to be relocated.</u></p> <p><u>A Transport Statement will be required as part of any planning application.</u></p>

Respondent (with lpr ref)	Response	Council Response
Thames Water (lpr1769)	<p>See attachment on the Local Plan Review Consultation Portal (<a href="https://consult.westberks.gov.uk/kse/event/35924/peoplesubmissions/section/">https://consult.westberks.gov.uk/kse/event/35924/peoplesubmissions/section/</a>) for full response to the Local Plan Review.</p> <p><u>Water response:</u> On the information available to date we do not envisage infrastructure concerns regarding water supply network infrastructure in relation to this development/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p><u>Waste response:</u> On the information available to date we do not envisage infrastructure concerns regarding wastewater network or wastewater treatment infrastructure capability in relation to this site/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p><u>Additional comments:</u> Thames Water have no concerns relating to wastewater capacity based upon the assumption that the connection is via gravity and that no surface water shall be discharged to the Thames Water foul sewer network.</p>	<p>Comments noted. Development will be occupied in line with this strategy.</u></p> <p>These comments will inform the emerging draft Infrastructure Delivery Plan.</p>
<b>General consultation bodies</b>		
BBOWT (lpr1004)	<p>The policy is not supported.</p> <p>The land adjoining the Haven is within 200m of a BBOWT reserve (Kintbury Newt Ponds) which supports protected species, including great crested newt and reptiles.</p> <p>The site appears to comprise habitats that may be suitable for these species and therefore a detailed site assessment will be required to determine the level of mitigation required. As well as the potential loss of suitable habitat, the development of this site could result in habitat fragmentation and isolation and BBOWT would like to see this addressed in the policy wording.</p>	<p>Comments noted.</p> <p>The site selection work undertaken for the draft emerging LPR recognised that Catmore and Winterly Copses SSSI and land at Inkpen Road Local Wildlife Site (LWS) lie within a 500m radius surrounding the site. It also identified that the LWS is also a BBOWT</p>

Respondent (with lpr ref)	Response	Council Response
		<p>nature reserve (Kintbury Newt Ponds) which hosts a large breeding population of Great Crested Newts. There are also European protected species and priority species within 500m of the site. The site selection background paper therefore recommended that up to date ecological surveys would be needed to establish current site conditions and the presence of any protected species at the site. An additional Great Crested Newt survey would also be required.</p> <p>The policy will include the following requirement for the following surveys as follows:  <u>An EclA [Ecological Impact Assessment] will be required which should include a Great Crested Newt survey. The final developable area will be dependent upon the extent of any appropriate avoidance and mitigation measures required to be implemented to ensure any designated sites and/or protected habitats and/or species will not be adversely affected.</u></p>
CPRE Berkshire (lpr1699)	<p>The proposed development of 20 dwellings at The Haven raises considerable concerns relating to the additional traffic through the main centre, which at peak times is excessive for a small rural village, and also has to accommodate through traffic entering from Inkpen, as their main exit route to join the A4. The road network is not robust enough to take additional traffic and the heavy goods lorries associated with a new development and subsequent deliveries, which will also inevitably impact on the air quality.</p> <p>The proposed site is not designated as an 'exception site' and will remove the central recreation area used by residents – it will not enhance and conserve the AONB and have significant impact on the 'openness' of the landscape.</p>	<p><u>Traffic:</u>  The site was promoted through the 'call for sites' for the Council's Housing and Economic Land Availability Assessment (HELAA). The HELAA forms part of the evidence base for the Local Plan Review (LPR) and it makes a preliminary assessment of the suitability and potential of sites.  The site was assessed as 'potentially developable' in the HELAA, and it was then</p>

Respondent <i>(with lpr ref)</i>	Response	Council Response
		<p>subject to more detailed site assessment work.</p> <p>The Highways Authority provided comments as part of the HELAA and site assessment work. They advised that extensive on street parking within the High Street limits potential for additional traffic flow. There are already problems with getting bus and other larger vehicles through High Street, Newbury Street, Holt Road and the northern end of Inkpen Road due to road width, parking, hedges and adjoining land uses. Double yellow lines in High Street, Newbury Street, Holt Road and the northern end of Inkpen Road could help mitigate the effects of additional development in the village. It is not considered that the increase in traffic at the Inkpen Road/High Street junction (in relation to the existing traffic using the junction) is of significant concern. Any future planning application will need to be accompanied by a Transport Statement, and the requirement for this will be included in the site specific policy for the site and worded as follows:</p> <p><u><i>A Transport Statement will be required as part of any planning application.</i></u></p> <p><u>Exception site:</u> Rural exception sites are defined in the glossary of the National Planning Policy Framework as: <i>“Small sites used for affordable housing in perpetuity where sites would not normally be used for housing. Rural exception sites seek to address the needs of the local community</i></p>

Respondent (with lpr ref)	Response	Council Response
		<p><i>by accommodating households who are either current residents or have an existing family or employment connection. A proportion of market homes may be allowed on the site at the local planning authority's discretion, for example where essential to enable the delivery of affordable units without grant funding."</i></p> <p>The Local Plan Review does not designate land as rural exception sites, it does however include a policy (DM16) which sets out parameters for when rural exception housing schemes will be permitted.</p> <p><u>Recreation:</u> The site is not currently accessible to the public.</p> <p><u>AONB:</u> A Landscape Sensitivity Assessment (LSA) was prepared in 2011. The LSA advised that development on the site would be acceptable, subject to certain recommendations. The recommendations from the LSA will be incorporated into the policy as follows:</p> <p><u><i>The scheme will be developed in accordance with the Landscape Sensitivity Assessment (2011):</i></u></p> <ul style="list-style-type: none"> <li>(i) <u><i>Replacement of the conifer hedge to the western boundary with more appropriate planting;</i></u></li> <li>(ii) <u><i>Views from the surrounding countryside, Public Right of Way.</i></u></li> </ul>

Respondent (with lpr ref)	Response	Council Response
		<p><i>and the neighbouring recreational field would need to be carefully considered; and</i></p> <p>(iii) <i>New planting to integrate the buildings into the landscape.</i></p> <p>In addition, the policy will also include the following requirement for a Landscape Visual Impact Assessment as follows:  <u>The development design and layout will be, in accordance with policy SP7 and further informed by a full detailed Landscape and Visual Impact Assessment.</u></p> <p>As part of the assessment of the site for the HELAA, the AONB Unit commented that there is the potential for development and that a landscape assessment would be required.</p>
<p>North Wessex Downs AONB Unit (lpr1621)</p>	<p>The policy is supported.</p> <p>The AONB raised no objections with the inclusion of this site in the Housing allocations DPD, however it was not allocated at the time as it was undeliverable. We see no reason to alter our opinion, the site is well contained and provides an opportunity for landscape enhancement by replacing the belt of conifer trees to the western boundary.</p>	<p>Support for policy noted.</p> <p>The policy will include recommendations from the 2011 Landscape Sensitivity Assessment, one of which is the replacement of the conifer hedge. The requirement in the policy will read as follows:  <u>The scheme will be developed in accordance with the Landscape Sensitivity Assessment (2011):</u></p> <p>(i) <u>Replacement of the conifer hedge to the western boundary with more appropriate planting;</u></p> <p>(ii) <u>Views from the surrounding countryside, Public Right of Way, and the neighbouring recreational</u></p>

Respondent (with lpr ref)	Response	Council Response
		<p><i>field would need to be carefully considered; and</i> (iii) <i>New planting to integrate the buildings into the landscape.'</i></p>
<b>Other stakeholders</b>		
Christine Britnell (lpr2207)	<p><i>Personal information removed</i></p> <p>There are reasons for me being against this.</p> <ol style="list-style-type: none"> <li>1. Parking is already an issue on The haven and it can be tight getting a car down let alone ambulance etc.</li> <li>2. The road is unsuitable for the amount of construction lorries and vehicles this would bring to the site</li> <li>3. We have quite a few children along the road and it will make it unsafe for them with the increase in traffic.</li> <li>4. The garages that are being knocked down help provide extra parking as well being to have the garages for storage as the houses are small and have no storage as well as tiny back gardens for other storage solutions.</li> <li>5. Parking is already an issue when there is football on as cars are doubled park on the road and the increased volume of traffic is unsafe to let our children out.</li> <li>6. The amount of wildlife that can be seen in the field is amazing and my children enjoy seeing it but again animals are losing a safe environment to building sites.</li> </ol> <p>So I am opposing against this planning application as the Haven is not an appropriate site as stated above and the safety of my children along with them not going to be able to play safely outside the front of there home due to increased traffic.</p>	<p><u>Parking:</u> It is not proposed that any parking will be lost, nonetheless the policy for the site will include a requirement for the re-provision of any parking that is lost. The requirement will be worded as follows: <u>Access to the site will be provided from The Haven via the existing garages. Any parking lost will need to be reprovided.</u></p> <p><u>Construction lorries:</u> The matter of construction traffic would be dealt with at the planning application stage and would be dealt with through planning conditions.</p> <p><u>Safety / traffic:</u> The Highways Authority provided comments on the site as part of work on the HELAA and site assessment work. No concerns were raised around safety.</p> <p><u>Wildlife:</u> The site was promoted through the 'call for sites' for the Council's Housing and Economic Land Availability Assessment (HELAA). The HELAA forms part of the evidence base for the Local Plan Review (LPR) and it makes a</p>

Respondent (with lpr ref)	Response	Council Response
		<p>preliminary assessment of the suitability and potential of sites.</p> <p>As part of this work, a desktop assessment of the impact that development might have on nature conservation was undertaken by the Thames Valley Environmental Research Centre (TVERC). Comments were also sought from Natural England and the Berkshire, Buckinghamshire and Oxfordshire Wildlife Trust (BBOWT).</p> <p>The assessment by TVERC highlighted there was a medium risk of adverse impacts. Natural England did not provide any comments, and BBOWT identified that there could be harm should mitigation measures not be implemented.</p> <p>The policy for the allocation will include a requirement for surveys, and the final developable area will be dependent upon the extent of any appropriate evidence and mitigation measures. The wording of the requirement will be as follows:  <u>An EclA [Ecological Impact Assessment] will be required which should include a Great Crested Newt survey. The final developable area will be dependent upon the extent of any appropriate avoidance and mitigation measures required to be implemented to ensure any designated sites and/or protected habitats and/or species will not be adversely affected.</u></p>

Respondent (with lpr ref)	Response	Council Response
<p>Chrissy Hearn (lpr1999)</p>	<p><i>Some personal details have been removed from representation. Image enclosed with representation - see attachment on the Local Plan Review Consultation Portal (<a href="https://consult.westberks.gov.uk/kse/event/35924/peoplesubmissions/section/">https://consult.westberks.gov.uk/kse/event/35924/peoplesubmissions/section/</a>)</i></p> <p>I am writing to object strongly about the houses being built behind The Haven. There are numerous reasons as to why I feel this is not a suitable site for any dwellings.</p> <p>The road in The Haven is narrow and children are used to playing in the road in safety. There are issues now with increased cars per family and therefore cars are often parked on both sides of the roads making it difficult for larger vehicles such as ambulances, fire engines, delivery vans and bin lorries. This is increased when the football club has matches or is used for other functions as people tend to park along The Haven sometimes making it difficult to get access to garages or park outside or near houses. The pressure is even greater now that residents from The Crescent park at the back of their houses even though they have room at the front. Some have dropped curbs to their gardens or built garages in their back gardens. Then their visitors park outside their gardens in The Haven. All very frustrating as it wasn't like this when we moved here.</p> <p>The access road to the proposed new houses would mean loss of garages which have been rented for many years. Due to the very small gardens residents really need the use of the garage. We own a car and two motorcycles they won't fit in the road now so would add to the problem.</p> <p>The area behind is a green belt area and is home to many types of wildlife. I often see three different types of deer (that come right up to the fence). There are slow worms, smooth snakes, hedgehogs, field mice, toads and birds of prey. I even hear foxes calling. Also many types of birds too including Owls, Kites and Woodpeckers to name a few, among the many small birds that come to the garden bird feeder.</p> <p>I object to the plans. The noise and mess would be horrendous. At present there is often rubbish piled at the front of the flats. The open space behind houses is very important to me. It has been space with clean air for me to breathe.</p> <p>I have seen many houses built since living here. People struggle to park around the village especially at the doctors surgery who have to cope with so many more people.</p>	<p><u>Narrow road / safety:</u> The Highways Authority provided comments as part of the HELAA and site assessment work. They advised that an acceptable access onto The Haven should be achievable via the existing garages. Any parking lost to the garages will need to be relocated. Sight lines at The Haven / Inkpen Road junction will need to be improved but a technical note provided in July 2015 has shown that land is available. No concerns were raised around safety or the width of the road.</p> <p><u>Loss of garages:</u> It is not proposed that any parking will be lost, nonetheless the policy for the site will include a requirement for the re-provision of any parking that is lost. The requirement will be worded as follows: <i><u>Access to the site will be provided from The Haven via the existing garages. Any parking lost will need to be re-provided.</u></i></p> <p><u>Wildlife / greenbelt:</u> There is no greenbelt in West Berkshire. The site was promoted through the 'call for sites' for the Council's Housing and Economic Land Availability Assessment (HELAA). The HELAA forms part of the evidence base for the Local Plan Review (LPR) and it makes a preliminary assessment of the suitability and potential of sites. As part of this work, a desktop assessment of the impact that development might have on nature conservation was undertaken by the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>How lucky I saw the information about the planning of building houses behind the Haven or I wouldn't of known about it. There must be many more residents who haven't seen or know of the proposed plans for behind The Haven. I feel this information should of been posted to us so we could of responded.</p>	<p>Thames Valley Environmental Research Centre (TVERC). Comments were also sought from Natural England and the Berkshire, Buckinghamshire and Oxfordshire Wildlife Trust (BBOWT).</p> <p>The assessment by TVERC highlighted there was a medium risk of adverse impacts. Natural England did not provide any comments, and BBOWT identified that there could be harm should mitigation measures not be implemented.</p> <p>The policy for the allocation will include a requirement for surveys, and the final developable area will be dependent upon the extent of any appropriate evidence and mitigation measures. The wording of the requirement will be as follows:</p> <p><u><i>An EcIA [Ecological Impact Assessment] will be required which should include a Great Crested Newt survey. The final developable area will be dependent upon the extent of any appropriate avoidance and mitigation measures required to be implemented to ensure any designated sites and/or protected habitats and/or species will not be adversely affected.</i></u></p> <p><u>Noise / mess:</u> The Council's Environmental Health Team were consulted on the site as part of the preparation of the HELAA.</p> <p>There is a medium risk of noise and vibration problems to future occupants from the sports facilities to the north. A noise survey will be required as part of a planning application, and</p>

Respondent <i>(with lpr ref)</i>	Response	Council Response
		<p>the site allocation policy will specify that such a study is required. The wording of the requirement will be as follows:  <u><i>A noise survey will be required as part of planning application due to the proximity of the site to a sports ground.</i></u></p> <p>Development is unlikely to result in adverse impact/worsening of air quality. There is possible particulate matter from construction and operational impacts. The level of impact on minimising emissions depends on the location of development within the site, building materials / construction, transport / design.</p> <p><u>Infrastructure / services:</u>  Existing pressure on some local services and facilities is recognised. An interim Infrastructure Delivery Plan (IDP) has been produced that considers all the infrastructure that will be required to support the development required through the LPR (including the scale of development allocated to each of the spatial areas). The IDP will be updated in partnership with service providers once the sites have been confirmed and any necessary infrastructure improvements will be taken forward.  Service providers are aware of the potential sites for future development and discussions are taking place as to the provision of additional services/facilities to serve the new population. New facilities/services as a result</p>

Respondent (with lpr ref)	Response	Council Response
		<p>of development would also benefit the existing community.</p> <p>New residential development is subject to the Community Infrastructure Levy (CIL). Financial contributions towards mitigating the impact of increased population on infrastructure (such as GP services) could be sought through CIL</p> <p><u>Information on the consultation:</u> The consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p>
Kelly Hearn-Smith (lpr1637)	<p>The policy is not supported.</p> <ol style="list-style-type: none"> <li>1. This area is the natural habitat of many species of birds, reptiles and amphibians, including some which are rare. Building here would therefore cause damage to the habitat and cause death to these organisms.</li> <li>2. The Haven is overcrowded with cars as it is. Cars are often parked on both sides of the road as well as in the garages where access is proposed. Therefore additional through traffic would very likely result accidents and injury and it is unlikely that access would be viable to refuse collection vehicles and emergency services.</li> <li>3. The garages where the access is proposed have been on long-term rental to residents, with many investing time and money to their upkeep and organisation. This seems unfair that some elder people will be forced to get rid of their belongings such as gardening equipment, bicycles etc as there simply isn't room on their properties. Others park their cars in the garage which will again further increase the parking problem.</li> <li>4. Residents in the housing of The Haven currently benefit from not being overlooked as their neighbours in The Crescent have long gardens in addition to the two paths and road separating them. Some residents have lived here since they were build and would feel threatened were buildings build closer than this behind.</li> </ol>	<p><u>Wildlife:</u> The site was promoted through the 'call for sites' for the Council's Housing and Economic Land Availability Assessment (HELAA). The HELAA forms part of the evidence base for the Local Plan Review (LPR) and it makes a preliminary assessment of the suitability and potential of sites. As part of this work, a desktop assessment of the impact that development might have on nature conservation was undertaken by the Thames Valley Environmental Research Centre (TVERC). Comments were also sought from Natural England and the Berkshire, Buckinghamshire and Oxfordshire Wildlife Trust (BBOWT). The assessment by TVERC highlighted there was a medium risk of adverse impacts.</p>

Respondent <i>(with lpr ref)</i>	Response	Council Response
	<p>5. There is insufficient infrastructure and amenities to cope with further buildings and an increased population in the village. Of particular concern are healthcare provision (doctors surgery), education/school places at primary and nursery, youth activities, sports facilities available (for free or subsidised).</p> <p>6. Insufficient local road network for an increase in cars - Newbury Street, Station Road, Inkpen Road and the High Street are frequently backed up due to traffic. Further Road users would exacerbate this problem.</p>	<p>Natural England did not provide any comments, and BBOWT identified that there could be harm should mitigation measures not be implemented.</p> <p>The policy for the allocation will include a requirement for surveys, and the final developable area will be dependent upon the extent of any appropriate evidence and mitigation measures. Tim Hearn (lpr1998)	<p><i>Some personal details removed from representation</i></p> <p>I am writing to strongly object houses being build behind The Haven for numerous reasons. I feel this site is not a viable site for any dwellings. The plans show that the site would be accessed via where the current garages are. The Haven is a very narrow road. There is already parking on both sides of the pavements, making it difficult for those in wheelchairs and with prams and pushchairs to walk along at many times. I am concerned about the dwellings increasing accessibility issues and the safety of residents if this became an access road for other dwellings. Many people that live in The Crescent park at the back of their houses (in the Haven), which restricts parking for residents that live in the Haven. They have entrances to garages and drop-down curves to the back of their houses which reduces parking further. When parking is an issue already, I am concerned how being an access route would add to this. Children daily ride their bikes, scooters and play ball games in the road opposite the flats and play ball games in the garages. I am concerned of the number of wing mirrors and accidents that will happen as a result of additional traffic. Due to the closeness to Kintbury football club those that do not live here park on the streets and grassy areas for quick access to the fooball club. In non pandemic times the street, pavements</p>	<p><u>Narrow road / safety:</u> The Highways Authority provided comments on the site as part of work on the HELAA and site assessment work. No concerns were raised around safety or the width of The Haven.</p> <p><u>Loss of garages:</u> It is not proposed that any parking will be lost, nonetheless the policy for the site will include a requirement for the re-provision of any parking that is lost. The requirement will be worded as follows: <u><i>Access to the site will be provided from The Haven via the existing garages. Any parking lost will need to be reprovided.</i></u></p>

Respondent (with lpr ref)	Response	Council Response
	<p>and grass areas of The Haven are regularly parked on for football training, matches, social events at Kintbury Football club open many evenings. People fill the garages and the road both sides all the way down to the end to attend the football club. I know you might say they can park at the football club, but they choose not to as they would have to walk further to the club from the parking area.</p> <p>The access road would also mean garages, which are vital as gardens are so small, would be knocked down. Residents with garages would have nowhere to store bikes, motorbikes, garage gym equipment and cars. This would have a detrimental effect on quality of life not being able to continue with healthy leisure pursuits when the government are trying to get people fit and healthy. The flats and houses were designed for 1 car households, which does not fit well with modern day families so the road is full of cars on both sides of the road.</p> <p>I feel that the area is an area of outstanding natural beauty and a conservation area and therefore should not be built on. Residents enjoy a significant amount of wildlife on a daily basis. At the moment lucky enough to have three types of deer, hedgehogs, field mice, foxes, toads, slow worms, smooth snakes and birds of prey (by night and day) as well as lots of different species. In the proposed site I am most concerned about the toads and smooth snakes which are rare and protected. I do not feel that their habitat should be destroyed. They have always been in the Kintbury area since I was a boy. It is therefore vital you consider the local ecology in regard to any planned building work. Support can be provided by The Wildlife Trust.</p> <p>I object the plans as I feel there would be more issues of noise pollution as the houses were built with small gardens, which were just acceptable to buyers, due to the fact that there were fields for miles behind the houses so long gardens were not needed. I am concerned that there would be so much noise being surrounded by houses. I feel that longer gardens would be needed to stop noise pollution and fields in between. In The Haven the very small gardens have always looked onto open fields. Residents have therefore always had privacy and do not want to be overlooked or feel claustrophobic, or in the shadow of nearby buildings. I feel that an open space is much needed for quite enjoyment and quality of life.</p> <p>Some Sovereign Housing Association properties are tired looking flats, sometime built up rubbish outside the flats. I am concerned that more houses in a very small area backing on to small gardens would make this issue worse.</p> <p>The current village infrastructure does not support any more dwellings being built in any shape or form. The surgery is extremely busy as it is, and not always easy to get an appointment and the car park is always full and hard for people to find a space. This makes the entrance of the surgery dangerous and more dwellings would create more traffic with more households needing to use it</p>	<p><b>AONB:</b> A Landscape Sensitivity Assessment (LSA) was prepared in 2011. The LSA advised that development on the site would be acceptable, subject to certain recommendations. The recommendations from the LSA will be incorporated into the policy:</p> <p><u>The scheme will be developed in accordance with the Landscape Sensitivity Assessment (2011):</u></p> <ul style="list-style-type: none"> <li>(i) <u>Replacement of the conifer hedge to the western boundary with more appropriate planting;</u></li> <li>(ii) <u>Views from the surrounding countryside, Public Right of Way, and the neighbouring recreational field would need to be carefully considered; and</u></li> <li>(iii) <u>New planting to integrate the buildings into the landscape.'</u></li> </ul> <p>In addition, the policy will also include the following requirement for a Landscape Visual Impact Assessment: <u>The development design and layout will be, in line with policy SP7, further informed by a full detailed Landscape and Visual Impact Assessment.</u></p> <p>As part of the assessment of the site for the HELAA, the AONB Unit commented that there is the potential for development and that a landscape assessment would be required.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>and make the surrounding streets and car park more dangerous. Increasing the households in the village would decrease the quality of life for others, and reduce the quality of current services. I object to the creeping urbanisation of the village which would ruin the sense of peace and rural area and erode the historic settlement where my family have lived for generations and open landscape beyond the once small village. I wonder what next will we be part of Hungerford? I am concerned about the significant harm to the area of natural beauty and the wider local landscape and valuable green infrastructure. I feel that there are not enough doctors, large roads, school places, nurseries, leisure facilities to support more households and dislike the continuous reduction in valuable green areas in the village that have occurred over time.</p> <p>I am concerned for all the villagers who like to come to the football field and walk around the local fields with their dogs and get lots of quiet enjoyment and relaxation from the nature, wild plants, wildlife and animals, especially at the time in a pandemic where rural walks are all we have to do. I am concerned that all over West Berkshire houses keep being built with little or no thought to the infrastructure provided for local people, whilst developers make money and move on to destroy the next village or town, reducing the quality of life for local people. There is already a large and increasing amount of traffic through the village and building more houses would increase the traffic issues in the area and I feel the transport impacts would be severe.</p> <p>I am concerned about the impact on quality of life as I take great pleasure in the wildlife. Please see attached picture of a deer. I am concerned about the noise, road traffic, rare animals, plants, trees, damaging effects on wild life plants and animals, and the devaluation of property.</p> <p>I have seen houses built on the land in front and behind The Blue Ball pub in Kintbury. These were both on allotment land. After this building took place on the allotments and the old coal yard but no locals appeared to benefit. Then land on Miss Lawrence's field (to which there was a lot of opposition).</p> <p>I feel strongly that you must do more to make all residents of The Haven and The Crescent and Football Club aware of proposals. Many people in the street are elderly and do not have access to the internet, from speaking to a few passers-by nobody that lives in the road is aware at all about the plans which I think is atrocious. I think you need a door step approach to consultation on these matters.</p>	<p><u>Wildlife:</u> The site was promoted through the 'call for sites' for the Council's Housing and Economic Land Availability Assessment (HELAA). The HELAA forms part of the evidence base for the Local Plan Review (LPR) and it makes a preliminary assessment of the suitability and potential of sites.</p> <p>As part of this work, a desktop assessment of the impact that development might have on nature conservation was undertaken by the Thames Valley Environmental Research Centre (TVERC). Comments were also sought from Natural England and the Berkshire, Buckinghamshire and Oxfordshire Wildlife Trust (BBOWT).</p> <p>The assessment by TVERC highlighted there was a medium risk of adverse impacts. Natural England did not provide any comments, and BBOWT identified that there could be harm should mitigation measures not be implemented.</p> <p>The policy for the allocation will include a requirement for surveys, and the final developable area will be dependent upon the extent of any appropriate evidence and mitigation measures. The wording of the requirement will be as follows: <u>An EclA [Ecological Impact Assessment] will be required which should include a Great Crested Newt survey. The final developable area will be dependent upon the extent of any appropriate avoidance and mitigation measures required to be implemented to ensure any designated sites and/or protected</u></p>

Respondent (with lpr ref)	Response	Council Response
		<p><u>habitats and/or species will not be adversely affected.</u></p> <p><u>Noise pollution:</u> The Council's Environmental Health Team were consulted on the site as part of the preparation of the HELAA. There is a medium risk of noise and vibration problems to future occupants from the sports facilities to the north. A noise survey will be required as part of a planning application, and the site allocation policy will specify that such a study is required. The wording of the requirement will be as follows: <u>A noise survey will be required as part of planning application due to the proximity of the site to a sports ground.</u></p> <p><u>Overlooking:</u> National Planning Practice Guidance requires that planning policies and decisions do not undermine quality of life. Policy SP7 (Design Principles) of the LPR requires that development will provide a high quality of amenity and privacy for both occupants of the development and neighbouring properties and land.</p> <p><u>Rubbish outside existing properties:</u> This is a matter outside the scope of planning.</p> <p><u>Infrastructure:</u> Existing pressure on some local services and facilities is recognised. An interim Infrastructure Delivery Plan (IDP) has been</p>

Respondent (with lpr ref)	Response	Council Response
		<p>produced that considers all the infrastructure that will be required to support the development required through the LPR (including the scale of development allocated to each of the spatial areas). The IDP will be updated in partnership with service providers once the sites have been confirmed and any necessary infrastructure improvements will be taken forward.</p> <p>Service providers are aware of the potential sites for future development and discussions are taking place as to the provision of additional services/facilities to serve the new population. New facilities/services as a result of development would also benefit the existing community.</p> <p>New residential development is subject to the Community Infrastructure Levy (CIL). Financial contributions towards mitigating the impact of increased population on infrastructure (such as GP services) could be sought through CIL.</p> <p><u>Urbanisation:</u> Policy SP1 of the LPR sets out the spatial strategy for the district. The overall approach to development will be based on three spatial areas, one of which includes the North Wessex Downs AONB. The focus of development in each spatial area will follow the district-wide settlement hierarchy set out in policy SP3.</p> <p>Within the settlement hierarchy, Kintbury is identified as a 'Service Village'. Service Villages are smaller rural settlements which</p>

Respondent (with lpr ref)	Response	Council Response
		<p>offer some limited and small-scale development potential appropriate to the character and function of the village in order to meet local needs.</p> <p><u>Impact on quality of life:</u> A key thread throughout the National Planning Policy Framework (NPPF) is to secure a good standard of amenity so that quality of life is not impacted, for example at paragraphs 92, 130, 185, and 189. Policy SP7 (Design Quality) of the LPR requires that all development must strengthen a sense of place through high quality locally distinctive design and place shaping. It must enable healthy place making, making places better for people, taking opportunities for conserving and enhancing the character, appearance, and quality of an area and the way it functions. The Council's Quality Design Supplementary Planning Document provides guidance on the impacts of development on neighbouring living conditions.</p> <p><u>Notification of the consultation:</u> The consultation was widely publicised, in accordance with the council's Statement of Community Involvement (SCI), on the Council's website and in the local press and via notification emails to those registered on the Council's consultation database.</p>
Nikki Hutchins (lpr682)	I am against the development of the land behind the haven, kintbury because : ( <i>personal information removed</i> ) and the number of cars has increased immensely.	<p><u>Traffic:</u> The site was promoted through the 'call for sites' for the Council's Housing and Economic</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The road is narrow because of all the cars and It is already difficult and sometimes impossible for emergency vehicles to go along it.</p> <p>The haven is a cul-de-sac and numerous children live here and it would be incredibly dangerous with lorries and construction vehicles going up and down.</p> <p>If access was through where the garages are now that would be even more dangerous and would increase the number of cars parked in the road.</p> <p>It would affect the wildlife in the area behind the haven which is home to badgers, rabbits, deer and many birds of all sizes.</p> <p>The haven is also home to elderly persons, bungalows-a hazard for these residents also.</p> <p>It would also increase the number of people at the doctors surgery which is already at capacity.</p> <p>The residents in the flats have no parking spaces so have to park in the street, their are also cars going in and out of the garages own the rear gardens of houses in the crescent.</p> <p>There are already numerous lorries going up and down the Inkpen road which causes chaos in the narrow village streets especially exiting Inkpen road at the square.</p> <p>Preferred Approach: For the Land to be left how it is.</p>	<p>Land Availability Assessment (HELAA). The HELAA forms part of the evidence base for the Local Plan Review (LPR) and it makes a preliminary assessment of the suitability and potential of sites.</p> <p>The site was assessed as ‘potentially developable’ in the HELAA, and it was then subject to more detailed site assessment work.</p> <p>The Highways Authority provided comments as part of the HELAA and site assessment work. They advised that an acceptable access onto The Haven should be achievable via the existing garages. Any parking lost to the garages will need to be relocated. Sight lines at The Haven / Inkpen Road junction will need to be improved but a technical note provided in July 2015 has shown that land is available.</p> <p><u>Safety:</u> The Highways Authority provided comments as part of the HELAA and site assessment work. They advised that an acceptable access onto The Haven should be achievable via the existing garages. Any parking lost to the garages will need to be relocated. Sight lines at The Haven / Inkpen Road junction will need to be improved but a technical note provided in July 2015 has shown that land is available. No concerns were raised around safety.</p> <p><u>Wildlife:</u> The site was promoted through the ‘call for sites’ for the Council’s Housing and Economic</p>

Respondent (with lpr ref)	Response	Council Response
		<p>Land Availability Assessment (HELAA). The HELAA forms part of the evidence base for the Local Plan Review (LPR) and it makes a preliminary assessment of the suitability and potential of sites.</p> <p>As part of this work, a desktop assessment of the impact that development might have on nature conservation was undertaken by the Thames Valley Environmental Research Centre (TVERC). Comments were also sought from Natural England and the Berkshire, Buckinghamshire and Oxfordshire Wildlife Trust (BBOWT).</p> <p>The assessment by TVERC highlighted there was a medium risk of adverse impacts. Natural England did not provide any comments, and BBOWT identified that there could be harm should mitigation measures not be implemented.</p> <p>The policy for the allocation will include a requirement for surveys, and the final developable area will be dependent upon the extent of any appropriate evidence and mitigation measures. Respondent (with lpr ref)	Response	Council Response
		<p><u>Infrastructure / services:</u> Existing pressure on some local services and facilities is recognised. An interim Infrastructure Delivery Plan (IDP) has been produced that considers all the infrastructure that will be required to support the development required through the LPR (including the scale of development allocated to each of the spatial areas). The IDP will be updated in partnership with service providers once the sites have been confirmed and any necessary infrastructure improvements will be taken forward.</p> <p>Service providers are aware of the potential sites for future development and discussions are taking place as to the provision of additional services/facilities to serve the new population. New facilities/services as a result of development would also benefit the existing community.</p> <p>New residential development is subject to the Community Infrastructure Levy (CIL). Financial contributions towards mitigating the impact of increased population on infrastructure (such as GP services) could be sought through CIL.</p> <p><u>Parking:</u> It is not proposed that any parking will be lost, nonetheless the policy for the site will include a requirement for the re-provision of any parking that is lost. The requirement will be worded as follows:</p>

Respondent (with lpr ref)	Response	Council Response
		<p><u>Access to the site will be provided from The Haven via the existing garages. Any parking lost will need to be reprovided.</u></p> <p><u>Local highway network:</u> The Highways Authority provided comments as part of the HELAA and site assessment work. They advised that extensive on street parking within the High Street limits potential for additional traffic flow. There are already problems with getting bus and other larger vehicles through High Street, Newbury Street, Holt Road and the northern end of Inkpen Road due to road width, parking, hedges and adjoining land uses. Double yellow lines in High Street, Newbury Street, Holt Road and the northern end of Inkpen Road could help mitigate the effects of additional development in the village. It is not considered that the increase in traffic at the Inkpen Road/High Street junction (in relation to the existing traffic using the junction) is of significant concern. Any future planning application will need to be accompanied by a Transport Statement, and the requirement for this will be included in the site specific policy for the site and worded as follows: <u>A Transport Statement will be required as part of any planning application.</u></p>
James Lipscombe (lpr2085)	<p><i>Representation has been summarised to remove personal details</i></p> <p>Representation expresses concern that garages would be knocked down if scheme goes ahead and raises issue of compensation.</p>	<p><u>Garages:</u> It is not proposed that any parking will be lost, nonetheless the policy for the site will include a requirement for the re-provision of any parking that is lost. The requirement will be worded as follows:</p>

Respondent (with lpr ref)	Response	Council Response
		<u>Access to the site will be provided from The Haven via the existing garages. Any parking lost will need to be reprovided.</u>
John Maher (lpr2205)	<p>Please lodge our objection to any proposed development on this greenfield site behind the Haven Kintbury.</p> <p>My reasons are as follows</p> <ul style="list-style-type: none"> <li>• Traffic down the haven would be increased. <ul style="list-style-type: none"> <li>○ The intersection into Inkpen Road from the Haven is a dangerous one, due to limited visibility up Inkpen road (I have had a couple of near misses there myself).</li> <li>○ Increased pressure on the intersection with station road, which can get congested easily.</li> <li>○ Heavy duty trucks in the village, especially down the haven road would be downright dangerous.</li> <li>○ Parking in the haven is already very scarce, this would add to the problem</li> </ul> </li> <li>• Extra pressure on the village's existing social resources. <ul style="list-style-type: none"> <li>○ It is already impossible to get Doctors' appointments (outside of covid restrictions) let alone adding in more families.</li> </ul> </li> <li>• The village has already had very recent developments, in Leylands Green, and Mrs Lawerences fields.</li> </ul> <p>We believe the village has already had its fair share.</p>	<p>Comments noted.</p> <p><u>Traffic:</u> The site was promoted through the 'call for sites' for the Council's Housing and Economic Land Availability Assessment (HELAA). The HELAA forms part of the evidence base for the Local Plan Review (LPR) and it makes a preliminary assessment of the suitability and potential of sites.</p> <p>The site was assessed as 'potentially developable' in the HELAA, and it was then subject to more detailed site assessment work.</p> <p>The Highways Authority provided comments as part of the HELAA and site assessment work. Jen Truby (lpr450)	<p>I specifically disagree with the site allocated for residential development in Kintbury, LPR policy RSA31.</p> <p>1) This land supports a variety of wildlife including (but not limited to) deer, foxes, toads, owls and bats. Destruction of this greenfield site in order to build houses would be significantly detrimental to the local environment and the AONB.</p> <p>2) Local access. The closest road to this site is The Haven. The Haven is a cul-de-sac on which there is no off street parking for residents, and barely enough on street parking to accommodate the cars already there. Most days it is not possible to have traffic moving in two directions due to all the parked cars. Adding additional traffic, both during construction and afterwards, does not</p>	<p><u>Wildlife:</u> The site was promoted through the 'call for sites' for the Council's Housing and Economic Land Availability Assessment (HELAA). The HELAA forms part of the evidence base for the Local Plan Review (LPR) and it makes a preliminary assessment of the suitability and potential of sites.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>seem safe. In addition, connecting the site to The Haven will likely reduce the amount of parking available to local residents, exacerbating this problem further.</p> <p>3) Further detriment to existing residents. The land is higher than the houses already present on The Haven, which are currently not overlooked by any other properties. Building on this land would likely result in a) loss of light and b) loss of privacy, to those existing houses.</p> <p>4) General access in Kintbury. The roads in Kintbury are extremely narrow, and contain many parked cars due to lack of off street parking in this old village. Pavements, are also extremely narrow or entirely absent in parts of the village. Various road junctions, including the Inkpen Road/High Street junction - which new residents would likely use daily - have very poor lines of sight and frequently cause traffic issues. Adding additional users to these roads doesn't seem safe or reasonable. This point is an objection against any site in Kintbury, not just this one.</p> <p>5) Impact of existing in-progress development. Development is already happening at another site in Kintbury, with an expected increase in road usage. Adding more development before assessing the ultimate impact of that and cumulative impact with further development seems short-sighted. This is another objection against any further development in Kintbury.</p> <p>6) Impact on services. The Parish Council's assessment says that the GP and primary school are both at capacity, and have concerns about the ability of the water and sewerage systems to cope with additional development. Another objection against any further development in Kintbury. I don't believe that building on previously undeveloped sites in the AONB should be allowed at all. I think our natural environment should be our first priority, and any building that is required should be done on previously developed sites.</p> <p>If it must be done on a greenfield site to meet quotas, then I would suggest an alternative site should be found, ideally one that doesn't also have the other issues outlined above. Kintbury has many issues, and The Haven even more. I would suggest finding alternative sites elsewhere in the county, or at least elsewhere in Kintbury.</p> <p>If there are no other possible sites in Kintbury, then I would suggest that minimizing the impact on existing residents should be a priority. Both access and parking issues, and the detriment to current properties due to being overlooked and overshadowed by new houses are problems. Find alternative access to the site (other than The Haven) and providing a significant buffer of undeveloped land between existing houses and the new development would be a start.</p>	<p>As part of this work, a desktop assessment of the impact that development might have on nature conservation was undertaken by the Thames Valley Environmental Research Centre (TVERC). Comments were also sought from Natural England and the Berkshire, Buckinghamshire and Oxfordshire Wildlife Trust (BBOWT).</p> <p>The assessment by TVERC highlighted there was a medium risk of adverse impacts. Sue Truby (lpr481)	<p>My objection to any housing development in and around Kintbury, and especially in the area backing onto The Haven.  Kintbury is a beautiful, old, small village to the West of Newbury. The roads through it are narrow. Much of the original housing has no garages so cars have to be parked on those roads. It is unusual to be able to drive through any of its roads without having to effectively have one-way traffic because of parked cars. Further development would add more cars and add to congestion. Access to Kintbury itself from Newbury to the west through the countryside or along the A4 and then South through countryside, flood plain and over the canal and railway, is not suited to increased traffic. The roads are narrow and already have one-way sections over various bridges. These are not suitable for construction traffic either.  Kintbury is situated in a designated Area of Outstanding Natural Beauty. The surrounding fields and woods are home to many species of birds, bats, butterflies, insects, mammals. The Newt Pond is a delight. The canal is home to kingfishers, egrets, herons and many species of duck. Further development would be to the detriment of this wildlife and negatively affect the enjoyment of the residents in their area. This has been particularly important during the lockdowns and restrictions of 2020, and 2021, and the increased leisure use of the surrounding area is unlikely to reduce.</p>	<p>Comments noted.</p> <p><u>Narrow roads / construction traffic:</u>  The site was promoted through the 'call for sites' for the Council's Housing and Economic Land Availability Assessment (HELAA). The HELAA forms part of the evidence base for the Local Plan Review (LPR) and it makes a preliminary assessment of the suitability and potential of sites. Respondent (with lpr ref)	Response	Council Response
	<p>The area behind The Haven is at a higher level than the housing in The Haven itself. Any development there would overlook the housing in The Haven and lead to loss of light and privacy as well as increased noise pollution. Access from The Haven itself would be problematic as again many of the houses have no garages so there has to be on-road parking, leading to congestion. This congestion would be particularly bad during construction.</p> <p>Areas of Outstanding Natural Beauty should be just that. Building on any AONB means that it will no longer be an AONB. Please therefore do not build in this AONB.</p> <p>If there are absolutely no other options other than to build on this AONB, then please do not build in/around Kintbury. As I've explained, Kintbury is totally unsuitable for further housing development. In particular the area behind The Haven is the worst possible option there.</p> <p>If you absolutely have no option but to build behind The Haven, then please leave a strip at least 100m wide of undeveloped (wild) land between any new development and the existing housing in The Haven. This would provide habitat for wildlife and also provide some barrier between the existing and new housing to mitigate the overlooking and loss of privacy.</p>	<p>for additional traffic flow. There are already problems with getting bus and other larger vehicles through High Street, Newbury Street, Holt Road and the northern end of Inkpen Road due to road width, parking, hedges and adjoining land uses. Double yellow lines in High Street, Newbury Street, Holt Road and the northern end of Inkpen Road could help mitigate the effects of additional development in the village. 		<p>development will provide a high quality of amenity and privacy for both occupants of the development and neighbouring properties and land.</p> <p><u>Development in Kintbury:</u> Policy SP1 of the LPR sets out the spatial strategy for the district. The overall approach to development will be based on three spatial areas, one of which includes the North Wessex Downs AONB. The focus of development in each spatial area will follow the district-wide settlement hierarchy set out in policy SP3. Within the settlement hierarchy, Kintbury is identified as a 'Service Village'. Service Villages are smaller rural settlements which offer some limited and small-scale development potential appropriate to the character and function of the village in order to meet local needs.</p>
Ccouncillor Tony Vickers (lpr993)	The policy is supported.	Support for policy noted.
<b>Landowners, site promoters and developers</b>		
Bell Cornwell on behalf of Baylight Properties Plc (lpr2278)	<p>See attachment on the Local Plan Review Consultation Portal (<a href="https://consult.westberks.gov.uk/kse/event/35924/peoplesubmissions/section/">https://consult.westberks.gov.uk/kse/event/35924/peoplesubmissions/section/</a>) for full response to the Local Plan Review.</p> <p>The policy is not supported.</p> <p>Re site at Holt Road, Kintbury (KIN005).</p>	<p>Comments noted.</p> <p>The site (KIN5) was assessed as 'not developable within the next 15 years' in the HELAA that was published in December 2020. This was because development would result in significant harm to the natural beauty</p>

Respondent (with lpr ref)	Response	Council Response
	<p>On behalf of our client, Baylight Properties, we are writing in response to the current Regulation 18 consultation on the emerging West Berkshire Local Plan.</p> <p>Our client is the owner of a site at Holt Road in Kintbury. It was given the reference KIN005 by the Council (Land off Holt Road). The site is situated within the North Wessex Downs AONB and has been rejected by the Council from shortlisting for allocation in the Local Plan review on landscape grounds, meaning that it has not progressed to a more detailed assessment.</p> <p>However, this analysis has been based on a larger scale of development which has involved developing on the whole of the site. Whilst the site in our client's ownership remains the same, we are now promoting the site for 20 units, which is recognised by the Council as an appropriate level of development for a service village. We show the location plan at the end of this letter and confirm that the 20 uses would be provided adjacent to the residential area.</p> <p>We continue to include a significant area of public open space on the site, to provide a parkland for existing and new residents and to provide a soft landscaped edge to the AONB, an amenity area plus an opportunity to provide enhanced landscape and opportunities for biodiversity net gain.</p> <p>We have previously rebutted the Council's landscape conclusions and note that West Berkshire's landscape sensitivity work has been successfully challenged on other sites and is, in reality, a very top level assessment that does not constitute a Landscape and Visual Assessment (LVIA). Caution should therefore be applied when using this work to reject sites from allocation without a more detailed assessment. It is also relevant that Natural England did not object to a previous application for 40 dwellings on the site.</p> <p>Land north of Holt Road can make a useful contribution to meeting the continued needs of Kintbury without having a harmful impact on the character of the town, the AONB, the highway network or any other amenities.</p> <p>The Holt Road site is located adjacent to the settlement boundary of Kintbury, to the east of the village, and within the North Wessex Downs Area of Outstanding Natural Beauty (NWD AONB) (which covers 74% of West Berkshire). There is a housing estate (Pentlands) to the west of the site which forms a hard-built edge to the current settlement, with limited architectural merit. To the south of the site is Holt Road, which has additional areas of residential development off it. In terms of the site's location, it forms a logical small extension to Kintbury.</p> <p>We note that Kintbury continues to be designated as a Service Village in the spatial strategy of the emerging Local Plan, which is the same designation as within the Core Strategy. The spatial strategy seeks to direct development to the most sustainable locations in the District, the principle of additional residential development in Kintbury has therefore been accepted.</p>	<p>of the North Wessex Downs Area of Outstanding Natural Beauty (AONB).</p> <p>A 2014 Landscape Capacity Assessment had concluded that development on the site would result in significant harm to the natural beauty of the AONB. Development would be prominent in views from the wider landscape to the east and north and would impact on the countryside setting of the east side of the village.</p> <p>As part of the preparation of the HELAA, comments were sought from the AONB Unit. They advised that development would result in harm due to the open to views and vistas. They went on to advise that there was a strong rural character despite influence of settlement edge.</p> <p>Appeal decision (ref: APP/W0340/W/17/3183931) concluded that proposals would cause serious harm to the landscape quality and value of the AONB and that the harm to the valued landscape could not be overcome. The Inspector noted that '<i>although the site abuts the village, it does so at the very extremity of the built-up area...whilst the existing built development has mainly been confined to the plateau area, at the appeal site the land starts to slope away from the village, connecting it visually with the shallow valley to the east, and exposing it to views from this direction...the appeal site has only a weak relationship with the built up area. Rather, it appears as connected with, and as an integral part of, the surrounding countryside and landscape.</i>'</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Kintbury plays an important role and function for the surrounding area which is an important consideration. The village will therefore require a continued amount of development in the future to ensure that local needs for both market and affordable housing can be met. We note that the Settlement boundary review topic paper which has informed the Local plan review, shows that Kintbury scores very highly in terms of its facilities and services and was almost at the next level of the hierarchy – rural service centre. That would have, in principle meant that the area was suitable for a higher quantity of development.</p> <p>However, only a very limited amount of development has been allocated to Kintbury through the emerging Local Plan Review. This has allocated just one site for 20 dwellings which is insufficient, particularly when set in the context of West Berkshire’s longer term housing needs. Additionally, In recent years, the amount of housing development that has taken place at Kintbury has been small. A sizeable development took place at Inglewood, which is within the Parish, but this is some way outside the village itself, and occupation is limited to over-55s. Only one small site was allocated in the Housing Site Allocations DPD, at Leyland Grove, and this alone is unlikely would not satisfy the needs arising from the existing community</p> <p>We are therefore promoting land at Holt Road for a housing site of approximately 20 units as either a replacement for land adjacent to the Haven or as an additional site for allocation to add flexibility into the Council’s housing supply. We note that the Council has previously accepted that a proposal for 32 units on the site would not constitute major development in the North Wessex Downs AONB which is a helpful precedent.</p> <p>In terms of landscape impact, we note the conclusion of the Landscape Sensitivity Assessment 2011. However, we rebut the conclusions of this, with reference to our own more detailed landscape information which has been submitted to the Council as part of planning application ref 17/03561/OUTMAJ. This is set out in full Landscape and Visual Impact Assessment which has been prepared by Lockhart Garatt. We are also submitting a smaller area of the site for development which should be assessed separately from the larger site.</p> <p>With regard to deliverability, the site is deliverable in terms of the definition in the NPPF; i.e. it is available now, offers a suitable location for development now and development is both achievable and viable. The site is in the control of a willing developer. The planning application that was previously prepared for the site was supported by the full range of technical studies to confirm that the site was deliverable. We have not submitted these alongside this promotion of the site as it has previously been submitted as part of the previous planning applications on the site. We can, however, make the technical work available if it would be useful.</p> <p>We are able to confirm that the site can come forward at an early opportunity and contribute to the housing needs of the District within the next five years.</p>	<p><u>Reduced dwelling number:</u> The site will be re-assessed within the update to the HELAA for a reduced number of dwellings (20). As part of the re-assessment of the site, views from the AONB Unit have been sought. They have advised that their previous comments remain, and a reduction does not alter the impact of development upon the AONB. Whilst the HELAA update is in progress, the comments from the AONB Unit mean that the site will continue to be “not developable within the next 15 years’.</p> <p>The AONB is a nationally significant landscape, and the NPPF is clear at paragraph 176 that “<i>great weight should be given to conserving and enhancing landscape and scenic beauty in...Areas of Outstanding Natural Beauty which have the highest status of protection in relation to these issues.</i>”</p>

Respondent (with lpr ref)	Response	Council Response
	<p>In terms of detail, our client is happy to work with the Council to ensure an appropriate development on site. The proposal would be policy compliant in terms of the delivery of affordable housing (we note that policy SP 19 seeks 40% affordable housing on greenfield sites) and would provide a mix to respond to local needs (we have had regard to table 3 of the emerging local plan which sets out information about the indicative housing size by number of bedrooms but note that this will vary depending on site specific circumstances).</p> <p>Additionally there is scope to provide an element of self-build or custom build products on the site to respond to demand for these in accordance with emerging policy DC17.</p> <p>Our client is committed to a high-quality development which would take a design –led approach to the scheme, with a particular focus on ensuring improvements to the existing position, especially with respect of the hard-urban edge of the Pentlands estate. Allocating the site would assist the Council in delivering sustainable development whilst meeting identified local needs. The low level of growth to Kintbury in recent years cannot possibly have been meeting local needs and we are aware that the housing waiting list remains lengthy in the area. The ability of the sites to address local housing pressure in a sustainable location weights strongly in favour of the allocation.</p>	
<p>Jackson Planning on behalf of Mrs Adcock and Mrs Hamer (lpr2088)</p>	<p>See attachment on the Local Plan Review Consultation Portal (<a href="https://consult.westberks.gov.uk/kse/event/35924/peoplesubmissions/section/">https://consult.westberks.gov.uk/kse/event/35924/peoplesubmissions/section/</a>) for full response to the Local Plan Review.</p> <p>Mrs Adcock &amp; Mrs Hamer OBJECT to the allocation of site KIN6 as currently set out in the consultation draft of the plan and request modifications are made to the plan are made so that it is positively prepared and is consistent with National policy.</p> <p>Whilst generally my clients are supportive of the plan overall and support the allocation of appropriate development sites in the plan, they are keen to assist the Council in achieving a plan that meets all the test of soundness. The approach is to recommend where changes can be made to assist the Council to achieve a sound plan and achieve the proper planning of the area. The submissions are supported by a sketch alternative site to KIN6.</p> <p>The requested modifications to the current document are based on matters of detail and to assist the plan to be entirely consistent with national policy, and previously adopted local policies in order to create a high-quality development. This representation offers the opportunity to assist with delivery of an appropriate form of development.</p> <p><b>Tests of Soundness</b></p>	<p>Comments noted.</p> <p><u>SA/SEA consistency:</u> It is not proposed to amend the SA/SEA summary for KIN3. KIN6 is closer to a larger number of facilities and services than KIN3</p> <p><u>Problematic access:</u> The Highways Authority provided comments as part of the HELAA and site assessment work. They advised that an acceptable access onto The Haven should be achievable via the existing garages. Any parking lost to the garages will need to be relocated. Sight lines at The Haven / Inkpen Road junction will need to be improved but a technical note provided in July 2015 has shown that land is available. Site KIN6 is being promoted by Sovereign Housing who also own the garages and most of the properties in The Haven. Sovereign</p>

Respondent <i>(with lpr ref)</i>	Response	Council Response
	<p>Whilst the plan is currently at an early consultation stage it will be considered at the formal Regulation 19 stage against the tests of soundness for a Local Plan, and it is important that early drafts of the plan consider these tests.</p> <p>The NPPF 35 sets out the tests of soundness. Whilst the plan is not at this formal stage it is important as the plan progresses that these tests are met.</p> <p><b>POSITIVELY PREPARED, JUSTIFIED, EFFECTIVE and consistent with NATIONAL POLICY</b></p> <p>The plan must be</p> <p>Positively Prepared – the plan should be prepared on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development;</p> <p>Justified- the plan must be the appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence;</p> <p>Effective – the plan should be deliverable over its period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and</p> <p>Consistent with National Policy – enabling the delivery of sustainable development in accordance with policies in the Framework.</p> <p>The submissions consider the tests of soundness at this early stage.</p> <p>Policy RSA31 – Land adjoining the Haven, Kintbury (Site Ref: KIN6) Assessment</p> <p><b>Background</b></p> <p>The site KIN6, subject of this representation, does not represent the appropriate strategy when considered against the alternatives. This statement sets out why the development of my clients' site is a more appropriate strategy to achieve the local plans objectives.</p> <p>The sustainability assessment (SA) has assessed those sites in Kintbury deemed suitable for development in the HEELA. For my clients' site (KIN3) the overall assessment was as follows:  <i>Overall the site is likely to have a neutral effect on sustainability and the SA/SEA does not highlight any significant sustainability effects. When considered alongside the site allocated within the HSADPD, the site would have a good relationship with the existing settlement. Development on the site has the potential to improve the built environment through a well designed scheme. It is close to local facilities and services but the degree of car dependency is still likely to be high. Whilst acknowledging the existing situation regarding parking and traffic in Kintbury, the increase in traffic from development on this site is not a significant concern. The site is underlain with clay</i></p>	<p>have advised that the properties that front onto Inkpen Road are within their ownership. There is therefore the ability to bring back the hedgerows so that visibility splays can be put in place.</p> <p>It is not proposed for any garages to be lost, nonetheless the policy for the site will include the following criteria in respect of the loss of any garages:  <u>Access to the site will be provided from The Haven via the existing garages. Any parking lost will need to be relocated.</u></p> <p>At Reg 18, the new sites proposed for allocation did not have detailed site allocation policies / plans as the detail had not been worked up at that stage. This is why the access was not shown on the plan.</p> <p><u>Amenity:</u></p> <p>In respect of the flood lights at the sports ground to the north of the site, a line of trees separates the site from the sports ground. Environmental Health were consulted as part of the sites assessment for the HELAA and they raised no issues in respect of the flood lights.</p> <p>No garages are proposed to be lost, nonetheless the site allocation policy will include a criteria that requires the re-provision of any parking.</p> <p>SSE have advised that where overhead powerlines cross a site, these can generally remain in place with uses such as open</p>

Respondent (with lpr ref)	Response	Council Response
	<p><i>which would restrict the scope for SuDS. Appropriate mitigation measures would need to be put into place to reduce any potential negative impacts. As the site is close to a site with Great Crested Newts, there is also potential for a negative impact on environmental sustainability, unless appropriate avoidance and mitigation measures are implemented. (My emphasis).</i></p> <p>The summary for the assessment for the chosen site KIN6  <i>“Overall the site is likely to have a neutral effect on sustainability and the SA/SEA does not highlight any significant sustainability effects. The site has a strong relationship with the existing settlement and is close to local facilities and services. Development on the site has the potential to improve the built environment through a well designed scheme. The degree of car dependency is still likely to be high, but whilst acknowledging the existing situation regarding parking and traffic in Kintbury, the increase in traffic from development on this site is not a significant concern. “</i></p> <p>The assessments in summary are inconsistent. The actual scoring for KIN6 and my clients’ site KIN3 are identical. The negative comments on KIN3 would apply to KIN6 and equally the positive comments that have been made in relation to KIN6 could equally apply to KIN3. However, in reality the sustainability scoring for KIN3 is better than KIN6 as the policy has not considered the demolition of twelve garages as part of the proposal. This is not assessed as part of the SA. It is clear that access to the site requires the demolition of twelve garages. The KIN6 Haven site has the following technical issues:</p> <p><b>Problematic Access</b></p> <p>The access to the site KIN6 is compromised. The access is shown through an existing active garage court. The distance between the two garage frontages is just over eight metres. Given there is a need for a 6 metre reversing space for a vehicle in front of a garage space at minimum there is no opportunity to provide an access and protect the garages. Twelve private garages will need to be demolished to gain a workable access to the site. This is not a sustainable solution as the embedded carbon in the garage buildings will be lost through demolition, and this creates demolition waste. The SA in 8b) is incorrect in relation to this item it states the following: “The site’s location is unlikely to have any positive or negative impact on the overall amount of waste produced, collected and or land filled”. The site will generate landfill from the demolition waste of twelve garages. This should result in a negative score on this metric in the SA.</p> <p>It is not clear if the owners of the garages have agreed to their demolition. Is this part of the site subject to ransom? Will this render the proposal unviable for affordable housing? Is the access</p>	<p>space, parking, garages or public highways generally being permitted in proximity to the overhead lines. There are no overhead powerlines that run across the site itself, they are instead within close proximity to the site. Likewise, the underground cables are in close proximity.</p> <p><u>Settlement form:</u>  A Landscape Capacity Assessment (2011) outlines that the site is different in nature to the countryside to the west and south, being flat and enclosed transitional landscape made up of rough grass with no visual link to the wider landscape. It goes on to state that whilst development would discontinue the linear nature of development, a deeper pattern of development is common elsewhere in Kintbury. The site has a strong relationship with the settlement, even though it is not within the settlement boundary.</p> <p><u>Site size and effective use of land:</u>  Within the settlement hierarchy (as set out in policy SP3), Kintbury is identified as a ‘Service Village’. Service Villages are smaller rural settlements which offer some limited and small-scale development potential appropriate to the character and function of the village in order to meet local needs. Site KIN6 lies at the edge of the settlement within the AONB. Policy SP1 (Spatial Strategy) of the LPR states that developments on the edge of defined settlements are</p>

Respondent (with lpr ref)	Response	Council Response
	<p>truly available and deliverable.? This critical access to the site is not currently shown on the allocation red line. This makes the site inaccessible, and undeliverable as currently shown.</p> <p><b>Amenity Issues</b> The proposal site is located adjacent to the Kintbury Rangers Football club. This is a lower league club. The football ground has flood lighting and a stand. The club hosts league matches that draw away teams and supporters. The impact of this existing established use has not been considered in the SA or the site assessment. The only reference to it is in relation to noise and vibration as follows: “There is a medium risk of noise and vibration problems to future occupants from the sports facilities to the north. A noise survey would be required as part of a planning application” The assessment has not considered the impact of floodlighting in relation to the amenity of future residents. The site assessment also noted “SSE has noted there is a network of existing HV overhead lines (OHLs) and underground cable in close proximity of the site.” The impact of this on future occupiers had not been considered. The additional on-street parking that will result from the loss of 12 garages and the subsequent loss of storage for the twelve garages has not been assessed.</p> <p><b>Settlement Form</b> The proposal to develop KIN 6 extends the village significantly westwards within the AONB area and extends into the undeveloped edge of the settlement. It will be understood in settlement form as a distinct westwards’ extension of the settlement. This takes Kintbury in a different direction as a village and expands it from the more compact form of the settlement.</p> <p><b>Site Size and Effective use of Land</b> It is inefficient to allocate the site for 20 dwellings when it is clear that at 1.3 hectares the site could accommodate over 40 dwellings. The NPPF section 11, especially paragraph 123 requires avoiding homes being built at low density is making sure that developments make optimal use of the potential of the site. As currently set out the site would be built out at a density of 15dwellings per hectare. This is not compliant with the NPPF. To be effective, and compliant with the national requirements in NPPF 123 this site would need to accommodate 40 dwellings. This amount of development would have an unacceptable impact on residents of the Haven. 40 dwellings would generate over 200 vehicle movements a day.</p> <p><b>Access</b></p>	<p>generally expected to secure a net density of 30 dwellings per hectare. However, lower density developments will be appropriate in certain areas of the District that are particularly sensitive to the impact of intensification and redevelopment. This may be because of the prevailing character of the area, the sensitive nature of the surrounding countryside or built form, and/or the relative remoteness from public transport. The site, and all of Kintbury, lies within the North Wessex Downs AONB. The AONB is a nationally significant landscape, and the primary purpose of its designation is to conserve and enhance the natural beauty of the area. The West Berkshire Density Pattern Book (2019) sets out that in edge of village / settlement locations within the AONB, density will be 20 dwellings per hectare.</p> <p><u>Access:</u> The Highways Authority provided comments as part of the HELAA and site assessment work. They advised that extensive on street parking within the High Street limits potential for additional traffic flow. There are already problems with getting bus and other larger vehicles through High Street, Newbury Street, Holt Road and the northern end of Inkpen Road due to road width, parking, hedges and adjoining land uses. Double yellow lines in High Street, Newbury Street, Holt Road and the northern end of Inkpen Road could help mitigate the effects of additional development</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The site assessment identifies issues with access generally in Kintbury. “Extensive on street parking within the High Street limits potential for additional traffic flow. There are already problems with getting bus and other larger vehicles through High Street, Newbury Street, Holt Road and the northern end of Inkpen Road due to road width, parking, hedges and adjoining land uses. Double yellow lines in High Street, Newbury Street, Holt Road and the northern end of Inkpen Road could help mitigate the effects of additional development in the village. It is not considered that the increase in traffic at the Inkpen Road/High Street junction (in relation to the existing traffic using the junction) is of significant concern”.</p> <p>Whist the limitations also apply to my clients’ site, there is a point of difference. With the Haven site the vast majority of the trips from the site must use the central crossroads of Inkpen Road and High Street. This is extremely congested, whereas, with our alternative site no vehicles need to use the crossroads to gain access to the station, the A4 or Newbury – the main destinations in the village.</p> <p><b>Advantages of KIN3</b></p> <p>In addition to the problems with KIN6 there are significant physical advantage to my clients’ site (KIN3) that show that it is appropriate site for development as it has none of the serious issues with the proposed site set out above.</p> <p>This site consolidates the village by rounding off the existing village structure rather than extending it west. It also has the significant opportunity to create a better approach to the village from the east. The current hard edge of the back of the houses.</p> <p>This site creates an opportunity to form an east/west pedestrian link at the south east of the village and create better internal walking connections generally to improve sustainability. The proposed site offers no such benefit.</p> <p>This site is not visible from footpaths, the Haven site is visible from footpath KINT15/1 and the recreation ground. The site KIN6 therefore has more receptors in terms of landscape impact.</p> <p>The extensive ownership of land adjacent to this site allows for more off-site planting and biodiversity mitigation with the developer’s control.</p> <p>The development of this site does not impact the amenity of existing residents in the village by the new traffic generated by the development to the same extent as the proposed site. Site KIN6 will impact significantly on all the existing residents of the Haven, They will be adversely affected during construction and when the site is occupied.</p> <p>The residents of KIN3 would not use the crossroads junction of the Inkpen Road and High Street to gain access to Newbury or the train station.</p>	<p>in the village. It is not considered that the increase in traffic at the Inkpen Road/High Street junction (in relation to the existing traffic using the junction) is of significant concern. Any future planning application will need to be accompanied by a Transport Statement, and the requirement for this will be included in the site specific policy for the site and worded as follows:</p> <p><u><i>A Transport Statement will be required as part of any planning application.</i></u></p> <p><b>KIN3:</b></p> <p>It is not proposed to allocate site KIN3, and KIN6 will remain as the proposed allocation in Kintbury. KIN6 is closer to a larger number of facilities and services than KIN3.</p> <p>In light of the particular features of Kintbury (ie. Service Village so only suitable for a limited amount of development, traffic related concerns), it is considered that the development of both KIN3 and KIN6 would be too great for the village.</p>

Respondent (with lpr ref)	Response	Council Response
	<p><b>Draft Policy RSA31</b> My clients OBJECT the draft allocation policy RSA31 and site KIN6 for the following key reasons</p> <ul style="list-style-type: none"> <li>• When properly assessed the site scores worse in the Sustainability Appraisal than Site KIN3. The main reason being that it will generate construction waste from the demolition of the garages. This also wastes the embedded carbon required for the construction of the garages</li> <li>• The proposal will result in the wasteful loss of 12 well used private garages</li> <li>• The proposal will be impacted by noise and floodlighting from the Kintbury Rangers Football club. No proper account of the lighting impact is made in the site assessment</li> <li>• The site density proposed is inconsistent with national policy. The allocation should be closer to 40 dwellings to avoid wasteful low density development. This would generate over 200 vehicle movements per day for the development and would significantly adversely impact the existing residents of the Haven.</li> <li>• The proposed site offers no wider benefits in terms of biodiversity.</li> </ul> <p>Overall, if the policy is taken forward as currently proposed the problems with the proposed site KIN6 would fail the tests of soundness of the local plan. The choice of site is not justified by the evidence. The proposal is not an appropriate strategy and it is not consistent with National Policy.</p> <p>Suggested revised policy The Site KIN3 is allocated for 20 dwellings, access directly from Holt Road, pedestrian access to be provided to Layland's Green. Off-site planting will be provided to enhance biodiversity and provide strategic screening.</p> <p><i>The objectors have submitted a site plan showing a layout plan that reflects the draft alternative policy.</i></p>	
Onnalee Cubitt (lpr2192)	<p>The policy is supported.</p> <p>The landowners and Sovereign support Policy RSA 31 and the specific identification of the Land Adjoining The Haven, Kintbury (Site Ref: KIN6) as a residential development site. The landowners and Sovereign have entered into dialogue to bring forward the development site in accordance within the emerging Local Plan via The Haven. Whilst we support the identification of the site for development, we believe that the site is capable of accommodating a greater level of development than that identified. Aldermaston Parish Council (lpr1056)	APC remains of the view that there is insufficient space for 8 new (permanent) pitches at New Stocks Farm, Paices Hill.	Comments noted.  It is considered that there is sufficient space on site. The GTAA 2021 recommends further pitches on site.
Wokingham Borough Council (lpr1470)	(In presenting the whole LPR to Wokingham Borough Council's Individual Member Decision, the following is relevant). Policy RSA 32 proposes to allocate an additional 8 permanent pitches at the existing private site at Paices Hill within an area of land currently comprising transit pitches. This allocation is carried forward from the existing HSA. This site appears to be located within the DEPZ of AWE Aldermaston as recently updated. The Site Selection Background Paper identifies that the pitches are in place but do not benefit from planning permission. It is unclear whether this additional accommodation would be compatible with the Off-Site Emergency Plan and whether planning permission would be forthcoming. The deliverability of this site would need to be clarified by WBDC's Emergency Planning team. Informal advice to WBC is that emergency planners would advise against	Comments noted.  In allocating the site through the Housing Site Allocations Development Plan Policy in 2017 this would have been considered and planned for in the Off-Site Emergency Plan. It is appreciated that caravans are a vulnerable shelter. However, the permanent pitches replace transit pitches where there are existing caravans. Permanent pitches also offers the opportunity for amenity buildings/day rooms which have the potential to provide a more robust shelter in the event of an emergency at the AWE. Planning permission has recently been granted for

Respondent (with lpr ref)	Response	Council Response
	<p>permitting caravans within the DEPZ. WBC would also request clarification on how the use of this land for permanent pitches rather than transit pitches would impact on the need for transit pitches within WBDC and wider.</p>	<p>the change of use of the land from 8 transit pitches to 8 permanent pitches.</p> <p>The GTAA identifies that 4 transit pitches are required in the plan period, and an option is to retain the Paices Hill site. The GTAA 2021 provides further options, and the Council will be exploring such options going forward.</p>
<p>Wokingham Borough Council (lpr1471)</p>	<p>Policy RSA 32 proposes to allocate an additional 8 permanent pitches at the existing private site at Paices Hill within an area of land currently comprising transit pitches. This allocation is carried forward from the existing HSA. This site appears to be located within the DEPZ of AWE Aldermaston as recently updated. The Site Selection Background Paper identifies that the pitches are in place but do not benefit from planning permission. It is unclear whether this additional accommodation would be compatible with the Off-Site Emergency Plan and whether planning permission would be forthcoming. The deliverability of this site would need to be clarified by WBDC's Emergency Planning team. Informal advice to WBC is that emergency planners would advise against permitting caravans within the DEPZ. WBC would also request clarification on how the use of this land for permanent pitches rather than transit pitches would impact on the need for transit pitches within WBDC and wider.</p> <p>The deliverability of this site would need to be clarified by WBDC's Emergency Planning team. <b>Statutory consultees</b>		
Environment Agency (lpr677)	<p>An ordinary watercourse flows along the western boundary of the site. Where the watercourse changes direction and flows from west to east this is through the development site so a minimum 5m wide buffer zone will be required.</p> <p>We support the statement “no caravans will be permitted within Flood Zones 2 and 3 at the northern edge of the site”. It should also be mentioned that a site-specific Flood Risk Assessment will be required to accompany any planning applications for this site.</p>	<p>Comments noted.</p> <p>In response to the buffer to the watercourse, a further criterion will be added as follows -  <u>‘(xi) A minimum 5 metre buffer zone will be provided and maintained between the watercourse running through the site and any proposed plots.’</u></p> <p>Policy DC20 of the LPR Proposed Submission sets out a detailed list of assessments required for travelling showpersons sites, including a Flood Risk Assessment and sustainable urban drainage systems.</p>
Thames Water Utilities (lpr1770)	<p>On the information available to date we do not envisage infrastructure concerns regarding water supply network infrastructure in relation to this development/s. It is recommended that the Developer and the Local</p>	<p>Comments noted.</p> <p>The developer would be encouraged to liaise with Thames Water during the planning application process, and to take</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing.</p> <p>On the information available to date we do not envisage infrastructure concerns regarding wastewater infrastructure capability in relation to this site</p> <p>Groundwater: The applicant is advised that their development boundary falls within a Source Protection Zone for groundwater abstraction. These zones may be at particular risk from polluting activities on or below the land surface. To prevent pollution, the Environment Agency and Thames Water (or other local water undertaker) will use a tiered, risk-based approach to regulate activities that may impact groundwater resources. The applicant is encouraged to read the Environment Agency's approach to groundwater protection and may wish to discuss the implication for their development with a suitably qualified environmental consultant.</p> <p>Whilst Thames Water have no concerns for this development, please be aware that there is no sewer network serving the area.</p>	<p>appropriate advice regarding groundwater protection, taking into account LPR Proposed Submission Policy DM7. The developer would need to plan for no sewer network serving the area.</p>
Wokingham Borough Council (lpr1472)	<p>Policy RSA 33 proposes to allocate a site at Long Copse Farm, Enborne for a Travelling Showpersons yard comprising 24 plots. This site would meet the identified need in full to 2036. Again, this proposed allocation is carried forward from the existing HSA.</p> <p>However, it is noted that the plan period covers an additional year (to 2037) compared to the GTAA. It is therefore unclear how or whether this additional year's need is taken into account.</p>	<p>Comments noted.</p> <p>The GTAA 2021 has been updated to extend the period to 2037/38. The GTAA did not identify a further need for Travelling Showpeople, and the site at Long Copse Farm would be able to meet the need.</p>
<b>General consultation bodies</b>

## Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

### Emerging Draft LPR Policy: DC1 Development in the Countryside

### (Proposed Submission LPR Policy: DM1 Residential Development in the Countryside)

Number of responses received: 21

Respondent (with lpr ref)	Response	Council Response
<b>Internal</b>		
<b>Statutory consultees</b>		
Greenham Parish Council (lpr908)	GPC would like to make an explicit reference to Zero carbon homes. To allow for innovative solutions in response to climate change. Developments that achieve or closely approach zero carbon or better in terms of their overall impact in any location within the countryside are likely to be looked on favourably, if they also fit one or more of the above criteria Cross-ref. to DC23 & DC33.	Comments noted. This policy needs to be read in conjunction with other relevant policies in the LPR including Emerging Draft LPR Policies SP5, SP7, SP8 and DC3 Building Sustainable Homes. The policies make clear that all development, regardless of its location, should contribute to West Berkshire becoming and staying carbon neutral by 2030. Even if a development is carbon neutral or better it should still confirm with other relevant policies in the Plan.
Hungerford Town Council (lpr150)	Supports the policy	Comments noted
Newbury Town Council (lpr2246)	Make explicit reference to zero carbon homes. <b>Reason:</b> To allow for innovative solutions in response to climate change. <b>Change Proposed:</b> In 9.7 of the supporting text and especially in relation to 'c', 'd' and 'j' of the listed 'criteria' in the policy, add the following sentence:	Comments noted. This policy needs to be read in conjunction with other relevant policies in the LPR including Emerging Draft LPR Policies SP5, SP7, SP8 and DC3 Building Sustainable Homes. The policies make clear that all development, regardless of its location, should

Respondent (with lpr ref)	Response	Council Response
	“Developments that achieve or closely approach zero carbon or better in terms of their overall impact in any location within the countryside are likely to be looked on favourably, if they also fit one or more of the above criteria.” Cross-ref. to DC23 & DC33.	contribute to West Berkshire becoming and staying carbon neutral by 2030. Even if a development is carbon neutral or better it should still confirm with other relevant policies in the Plan.
Shaw cum Donnington Parish Council (lpr220)	We support this policy	Comments noted
Stratfield Mortimer Parish Council (lpr409)	Supports the policy	Comments noted
Thatcham Town Council (lpr1411)	<p><i>Full representation relating to north east Thatcham strategic site allocation attached to representation on SP17.</i></p> <p>As we have noted in SP17 there is an inconsistency in policy between selecting SP17 as a strategic site and DC1 that sets a presumption against development in the countryside and outside settlement boundaries. This is a position that West Berkshire Council argued strongly in 2016/7 for the Siege Cross development noting that Siege Cross contains historic settlements, is best and most versatile land, and forms part of the setting of AONB making a positive contribution to the wider landscape. It is necessary for the countryside in Thatcham to be given the same weighting in protection, to that of countryside elsewhere.</p>	Comments noted. The Council is undertaking a review of settlement boundaries (SBR) as part of the LPR. The SBR criteria set out the general principles followed when defining a boundary and give guidance as to what would usually be included and what would usually be excluded. This makes clear that sites allocated through the LPR will be included within the boundary. Such sites are only allocated through the plan led process after a thorough site assessment and sustainability appraisal. For North East Thatcham the site assessment has included a Landscape Sensitivity Assessment which is being published as part of the evidence base for the LPR. There is therefore no conflict with Emerging Draft LPR Policy SP1 or Policy DC1.
<b>General consultation bodies</b>		
Canal and River Trust (lpr884)	This policy allows for development that support the rural economy, so would be relevant to marina applications, and boating related businesses in general. With this policy having a presumption against development outside of a settlement boundary it should be recognised that many boating related businesses are non- footloose, due to needing to be located adjacent to the canal, and so need to be located outside of a settlement boundary. We would hope that water-based development would be considered favourably subject to the requirements of policy DC32.Can this be clarified?	Comments noted. The Council believes this issue would be best considered under Emerging Draft LPR Policy DC32 and so as the respondent has made similar comments (lpr907) under that policy, the Council’s response is set out there.  Emerging Draft LPR Policy DC1 will be amended for the Proposed Submission LPR to cover residential

Respondent (with lpr ref)	Response	Council Response
		development in the countryside only. This is in the interests of clarity. Proposed Submission LPR Policy DM35 will set out the Council's approach to sustaining a prosperous rural economy.
West Berkshire Green Exchange (lpr1558)	<p>Exceptions to this are solely limited to development which is appropriately designed and located and satisfies one or more of the following criteria:</p> <p>.....</p> <p>j. development of an isolated new dwelling whose design is of exceptional quality, truly outstanding or innovative, reflecting the highest standards in architecture, and which significantly enhances its immediate setting and is sensitive to the defining characteristics of the local area; <u>and which are built to HQM level 5 and an HEPR of 0.900 or above.</u></p>	Comments noted. This policy needs to be read in conjunction with other relevant policies in the LPR including Emerging Draft LPR Policies SP5 Climate Change, SP7 Design Principles, SP8 Landscape Character and DC3 Building Sustainable Homes. The policies make clear that all development, regardless of its location, should contribute to West Berkshire becoming and staying carbon neutral by 2030. Even if a development is carbon neutral or better it should still confirm with other relevant policies in the Plan.
West Berkshire Heritage Forum (lpr87)	Supports the policy. The AONB (which could be equally termed an Area of Outstanding Cultivated Landscape) is not a self-sustaining resource but is maintained by the rural businesses located in it. To do this, the local businesses must remain viable and this will require them to grow and develop. Such appropriate development should be allowed for expressly.	<p>Comments noted. This policy needs to be read in conjunction with other relevant policies in the LPR including Emerging Draft LPR Policies SP2 North Wessex Downs AONB.</p> <p>Emerging Draft LPR Policy DC1 will be amended for the Proposed Submission LPR to cover residential development in the countryside only. This is in the interests of clarity. Proposed Submission LPR Policy DM35 will set out the Council's approach to sustaining a prosperous rural economy.</p>
<b>Other stakeholders</b>		
Peter Benest (lpr32)	Whilst there is a presumption against, there are too many 'get out' clauses.	Comments noted. The LPR has to be prepared in accordance with the National Planning Policy Framework (NPPF).
Sam Coppinger (lpr304)	Supports the policy	Comments noted

Respondent (with lpr ref)	Response	Council Response
Ian Parsons (lpr834)	The importance of the existing settlement boundary should be recognised. In addition, infill building should be discouraged unless it can be shown that it makes a significant contribution to the life of the local community - CIL money is not enough in this regard.	Comments noted. The importance of the settlement boundary is clearly recognised in both Emerging Draft LPR Policies SP1 and DC1.
Councillor Tony Vickers (lpr581)	We strongly support having some controls along these lines in the Plan but wish to see explicit reference to zero carbon homes and some relaxation of controls for them to encourage innovative solutions in response to climate change. In 9.7 of the supporting text and especially in relation to ‘c’, ‘d’ and ‘j’ of the listed ‘criteria’ in the policy, add the following sentence: “Developments that achieve or closely approach zero carbon or better in terms of their overall impact in any location within the countryside are likely to be looked on favourably, if they also fit one or more of the above criteria.” Cross-reference to DC23 & DC33.	Comments noted. This policy needs to be read in conjunction with other relevant policies in the LPR including Emerging Draft LPR Policies SP5 Climate Change, SP7 Design Principles, SP8 Landscape Character and DC3 Building Sustainable Homes. The policies make clear that all development, regardless of its location, should contribute to West Berkshire becoming and staying carbon neutral by 2030. Even if a development is carbon neutral or better it should still confirm with other relevant policies in the Plan.
<b>Landowners, site promoters and developers</b>		
Barton Willmore for Copas Farms (lpr1973)	Our client supports the identification of the redevelopment of PDL as an exception to the presumption against new development outside of adopted settlement boundaries. As indicated above, PDL supports the NPPF’s emphasis on making as much use as possible of PDL or brownfield land and can assist in supporting the provision of much needed smaller sites across the District.	Comments noted.  Emerging Draft LPR Policy DC1 will now be amended for the Proposed Submission LPR to cover residential development in the countryside only. This is in the interests of clarity. Proposed Submission LPR Policy DM35 will set out the Council’s approach to sustaining a prosperous rural economy. The supporting text to the policy will state - <u>‘The overarching spatial strategy for West Berkshire focuses development on previously developed land (PDL). Whilst developers are expected to make the best use of PDL within settlement boundaries, this policy provides some limited flexibility, to allow for some development on PDL in the countryside to enable the sustainable growth of rural businesses and/or to meet the needs of the local community through the development of accessible local services or community facilities, as long as it meets the wider objectives of the Local Plan. However,</u>

Respondent (with lpr ref)	Response	Council Response
		<u>all proposals will firstly be considered in a landscape led context because previously developed sites will not always be appropriate in terms of landscape character. Wider development needs and pressures will not be accepted as a reason to develop on any site outside of settlement boundaries.'</u>
Fisher German for Mr M & W Musgrave & Begley (1234)	<p>Whilst we broadly support Policy DC1, we consider a further criterion must be added to ensure the Plan is as flexible and robust as possible. Whilst there is an allowance for rural exception sites, we consider that this Policy does not go far enough in that it only relates to affordable housing need. Clearly there may equally be market housing need in any given settlement, and it is considered unfair and prejudicial that by not qualifying for affordable housing would preclude people from having access to suitable housing in their chosen area. Smaller settlements do not always have suitable housing available for sale at any time, so this cannot be used as justification for such an approach. It is considered that market and affordable housing needs could exist in a given settlement and should be treated equally. To manage such a criterion, there could be a requirement that any such scheme must be supported by appropriate evidence, for example a housing needs survey. If there is a need for market housing, it could be a requirement that it must be demonstrated that there is not appropriate accommodation for sale. This approach ensures that market housing is not built unduly and is considered fair, ensuring that the Plan remains flexible and is able to respond to emerging rural housing needs throughout the Plan period. This approach would also assist the Council in meeting its high windfall targets.</p>	<p>Comments noted. This policy needs to be read in conjunction with other relevant policies in the LPR including Policy SP1 which sets out the overall spatial strategy for housing across the District.</p> <p>In that context, Emerging Draft LPR Policy DC16 and paragraph 11.7 of the supporting text make clear that rural exception schemes can allow for a proportion of market housing where this enables the closing of a funding gap (which must be evidenced) and where the market homes are integrated with the affordable homes to form a single scheme.</p>
Fowler Architecture (lpr1790)	<p>It is unclear why the policy opens by stating there is a 'presumption against new development' in the countryside. The NPPF is clear that sustainable development can occur in the countryside, including but not limited to those specified at paragraphs 79, 83 and 84. There are clearly typologies of sustainable development relating to land-based and rural enterprises that cannot occur outside of the countryside, consequently there is no presumption against such development when reading the NPPF. It is our recommendation that the policy must open by setting out a positive vision</p>	<p>Comments noted.</p> <p>This policy is set within the context of the Council's spatial strategy, Policy SP1, which will be amended as follows - 'The focus of development in each spatial area will follow the District-wide settlement hierarchy set out in Policy SP3 which takes account of the function and sustainability of settlements across the District and promotes sustainable</p>

Respondent (with lpr ref)	Response	Council Response
	<p>and thereafter define the typologies of sustainable development within the countryside.</p> <p>Criterion (d) goes beyond the NPPF paragraph 79(c) that requires that the re-use of redundant or disused buildings should enhance its immediate setting only in isolated locations. Not all locations in the countryside (as defined for planning purposes) will be isolated. Enhancement is of course desirable, however re-use of a disused building or site may prevent long term environmental degradation over time, which – if the Council is resolved to seek further direct environmental benefit from the (already beneficial) re-use of existing buildings – must be taken into account when considering the impact upon the setting. As such, while schemes in non-isolated locations may enhance their immediate setting, and this may be desirable, the Local Plan goes beyond the NPPF in making enhancement determinative of the principle of development and this is unjustified.</p> <p>Criterion (I) carries forward Housing Site Allocations DPD Policy C1 in supporting limited infill development (one or two units) which may be possible in settlements without a defined settlement boundary where it is appropriately located within a group of existing dwellings. The principles of this policy and flexibility in utilising infill in all settlements to meet housing need are supported, however we have two concerns.</p> <p>Firstly, there is tension in identifying how gaps and clusters are required to be a 'closely knit cluster'. Invariably closely knit clusters do not contain gaps or small undeveloped plots, particularly when the policy limits development to frontages. We therefore question the actual effectiveness of carrying forward the existing policy without a review of its terms and ability to effectively utilise land within all settlements.</p> <p>Secondly, the policy should also explicitly support the conversion or subdivision of buildings in settlements in the countryside. In supporting conversions, it should not be a requirement to demonstrate that a building is genuinely disused or redundant (as per Policy DC23(ii)).</p> <p>As such, the policy should be revised to be permissive by:</p> <ul style="list-style-type: none"> <li>- Replacing the term 'existing dwellings' under criterion (i) with 'existing buildings'. Whereby a settlement can qualify under this policy where an</li> </ul>	<p>communities. <del>There will be a presumption in favour of sustainable</del> Development and redevelopment within the settlement boundaries of those settlements identified in Appendix 2 and outlined on the Policies Map <u>will be supported</u>. Outside of settlement boundaries land will be treated as open countryside where development will be more restricted, as set out in Policy DGM1 <u>and DM35</u>.  ..... <u>Proposals to strengthen and diversify the rural economy will be encouraged, particularly where they are located in or adjacent to Rural Service Centres and Service Villages identified in the settlement hierarchy. Existing small and medium sized enterprises within the countryside will be supported in order to provide local job opportunities and maintain the vitality of smaller rural settlements and their communities.</u></p> <p>Emerging Draft LPR Policy DC1 will be amended for the Proposed Submission LPR to cover residential development in the countryside only. This is in the interests of clarity. Proposed Submission LPR Policy DM35 will set out the Council's approach to sustaining a prosperous rural economy.</p> <p>The policy will be applied in accordance with other policies in the LPR including Emerging Draft LPR Policies SP7 Design Principles and SP8 Landscape Character. These make clear that new development will strengthen a sense of place through high quality, locally distinctive design and will be landscape led, conserving and enhancing the landscape character and the historic context of both the site and its surroundings.</p> <p>As this policy already makes clear that the Council's approach to the conversion of existing redundant and disused buildings is set out in Emerging Draft LPR</p>

Respondent (with lpr ref)	Response	Council Response
	<p>existing community facility, employment or service (such as a public house, shop, employment, hall, church) exists as part of a group of dwellings</p> <ul style="list-style-type: none"> <li>- Removing the restriction under criterion (i) that the infill development should be located 'adjacent to, or fronting an existing highway'. Instead, criterion (i) should state 'It is within a closely knit cluster of 10 or more buildings'. This provides greater recognition that groups of dwellings exist, including where a proportion are situated in a backland position.</li> <li>- Promotion of the use of previously developed land for housing at qualifying groups.</li> <li>- Expressly support the conversion of existing buildings and subdivision.</li> </ul>	<p>Policy DC23, for clarity it will amend criterion d) as follows – 'conversion and/or re-use of redundant or disused buildings which would enhance their immediate setting in accordance with Policy DC23;'</p> <p>Criterion I has worked well to date and the Council considers it provides both flexibility and an appropriate balance. Development in the countryside is strictly limited, particularly for residential development. This follows the approach in the NPPF in directing development to sustainable communities. The policy is not intended to allow the conversion/subdivision of all buildings within the countryside, and this follows the approach in the NPPF.</p> <p>Emerging Draft LPR para 11.48 makes clear that not all buildings will be suitable for conversion, due to their location, condition or appearance. Para 11.49 also states that 'the redevelopment of derelict buildings, are classed as new residential development in the countryside and would be assessed against Policy DC1.</p> <p>Backland development may not always be appropriate when considering the character of a settlement. Many settlements are linear in form and pattern, and backland can be damaging to this character.</p>
Lucy White Planning for Bradfield College (lpr1155)	<p>Bradfield Colleges supports the provisions within policy DC1 for development to be permitted outside adopted settlement boundaries which accords with Policy DC32. This comprises development to support the rural economy, in accordance with paragraph 83 of the National Planning Policy Framework (2019).</p> <p>The College also supports the provision for rural worker housing, including staff accommodation to serve education establishments, to be provided</p>	Comments noted

Respondent (with lpr ref)	Response	Council Response
	outside the adopted settlement boundaries, where proposals accord with Policy DC22 and paragraphs 77-79 of the National Planning Policy Framework (2019). Detailed comments on policies DC22 and DC32 are set out in separate responses.	
Pro Vision for Wasing Estate (lpr2066)	In relation to land at Manor Farm, Brimpton (full representation attached) Draft Policy DC1 explains that although there will be a presumption against new development outside of adopted settlement boundaries, there will be exceptions, such as sites allocated as part of the Development Plan. We support this, recognising the importance of sustainable growth in rural communities to help enhance their vitality, as highlighted in the NPPF.	Comments noted
Rural Solutions for Karine Giannamore (lpr2305)	<p>Policy DC1 is perceived as overly restrictive, not in line with the social economic responsibilities that the emerging Local Plan should consider for rural areas.</p> <p>In line with the NPPF, paragraph 78 states “<i>To promote sustainable development in rural areas, housing should be located where it will enhance or maintain the vitality of rural communities. Planning policies should identify opportunities for villages to grow and thrive, especially where this will support local services. Where there are groups of smaller settlements, development in one village may support services in a village nearby.</i>”</p> <p>We reinforce the use of an additional circumstance within the policy which does allow small-scale development. The term ‘small-scale’ could be defined to ‘no more 6 dwellings within parishes’ that don’t have a defined settlement boundary / or within the village cluster areas.</p> <p>One Part of Policy DC1 tries to achieve the above by:</p> <ol style="list-style-type: none"> <li>i. <i>limited residential infill in settlements in the countryside with no defined settlement boundary where:</i></li> <li>ii. <i>it is within a closely knit cluster of 10 or more existing dwellings adjacent to, or fronting an existing highway; and</i></li> <li>iii. <i>the scale of development consists of infilling a small undeveloped plot commensurate with the scale and character of existing dwellings within an otherwise built-up frontage; and</i></li> <li>iv. <i>it does not extend the existing frontage at either end; and</i></li> </ol>	<p>Comments noted.</p> <p>This policy is set within the context of the Council’s spatial strategy, Policy SP1, which makes clear that: ‘The focus of development in each spatial area will follow the District-wide settlement hierarchy set out in Policy SP3 which takes account of the function and sustainability of settlements across the District and promotes sustainable communities.’</p> <p>In terms of the threshold for limited infill development, 10 dwellings is considered appropriate. It clearly indicates the scale and level of existing development the Council would expect in order for this exception to the policy to apply. It accords with the definition of minor development as set out in the Town and Country Planning (Development Management Procedure) (England) Order 2015.</p> <p>Criterion I has worked well to date and the Council considers it provides both flexibility and an appropriate balance. Development in the countryside is strictly limited, particularly for residential development and the policy is clear that proposals must not harm or undermine the existing relationship of a settlement within the open</p>

Respondent (with lpr ref)	Response	Council Response
	<p>v. <i>the proposed plot size and spacing between dwellings is similar to adjacent properties and respects the rural character and street scene of the locality</i></p> <p><i>Planning permission will not be granted where a proposal harms or undermines the existing relationship of a settlement within the open countryside, where it does not enhance the character and distinctiveness of the rural area, including the special qualities and natural beauty of the landscape of the AONB or where development would have an adverse cumulative impact on the environment or highway safety.</i></p> <p>We agree with the requirement that the site should be located adjacent an existing cluster of existing dwellings, but suggest this should go further and perhaps it could be worded to state ‘along a continuous road frontage’ where dwellings / built form are situated.</p> <p>Suggest that i) has the word “approximately” added, so there is some flexibility in the number of dwellings found along a frontage. 10 dwellings does seem appropriate.</p> <p>However, we consider the third criteria of the policy “<i>iii. it does not extend the existing frontage at either end</i>” is too restrictive. Some villages which are characterised by a ribbon form of development could achieve sustainable and proportionate growth using this infill policy, but the opportunities for this would be somewhat hampered by criteria iii. Having a sensible restriction of say 6 dwellings and ensuring that village identities are retained as a result would be sufficient to ensuring that development is proportionate to its context, alongside other Local Plan Policies which seek to protect the landscape.</p> <p>This policy could also be used to support Self and Custom Build Homes, as this is unlikely to be delivered within the proposed allocations as indicated in the policy currently. People looking to purchase plots for self and custom build housing are unlikely to seek locations within an area that contains large scale major development. It is more akin to small sized developments or village locations.</p>	<p>countryside. Inappropriately elongating existing linear settlements could be harmful, particularly in the AONB. Infill development is more appropriate as it doesn’t extend development further out of a settlement’s ‘natural’ boundaries, but focuses it within them.</p> <p>The Council has proposed residential allocations in the LPR that will include an element of self-build (North East Thatcham and Purley Rise). Such homes are not necessarily located in rural areas.</p>
Savills for Englefield Estate (lpr1536)	Draft LPR Policy DC1 sets out a presumption against new development outside of adopted settlement boundaries apart from a number of stated exceptions. It is noted that the Council is currently reviewing where and how settlement boundaries are drawn across the district, as set out at LPR	<p>Comments noted.</p> <p>The settlement boundary review (SBR) criteria set out the general principles followed when defining a boundary and</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Appendix 3, which will help to inform where Policy DC1 is applied. As explained above, it is our view that a settlement boundary should be identified at Englefield to facilitate sustainable development within the village. It is also recommended, with regard to the criteria set out at LPR Appendix 3, that adopted settlement boundaries are drawn to allow flexibility for appropriate limited future expansion.</p> <p>Given the predominantly rural character of the district, it is crucial that adequate provision is made for development in the countryside in order to meet rural needs. This is reflected in paragraphs 77-79 of the NPPF which encourage sustainable development in rural areas to meet local needs and to enhance the vitality of rural communities. The exceptions which are set out at parts a-l of draft Policy DC1 provide additional clarity to that of Policy C1 of the HSA DPD (which would be superseded by Policy DC1, as per LPR Appendix 9) and reflect the provisions of NPPF paragraph 79. The additional exception of part b 'development which supports the rural economy in accordance with policy DC32' in particular is welcomed and supported. ....</p> <p>Part k of draft Policy DC1 supports enabling development outside settlement boundaries to secure the future of a heritage asset, however this is subject to a number of additional caveats which are considered to be onerous and unjustified, based on the NPPF, and should therefore be removed in order to ensure that necessary enabling development can occur.</p> <p>The requirement for all developments to '<i>enhance the character and distinctiveness of the rural area</i>' should be amended to instead require that developments conserve the character and distinctiveness of the rural area. This will help to ensure that appropriate development will come forward to meet the needs of the rural area whilst continuing to protect its character.</p> <p>The Estate's experience previously is that similar policies have been applied to prohibit development; however as set out above, given the rural character of the district and development needs, it is critical that draft LPR DC1 is applied positively in line with paragraphs 77-78 of the NPPF.</p>	<p>give guidance as to what would usually be included and what would usually be excluded.</p> <p>There is no existing settlement boundary around the settlement at Englefield and the SBR does not propose to introduce one. The informal nature of Englefield and the strong relationship it has as part of the wider rural landscape means that the introduction of a boundary is still not considered the best way forward.</p> <p>Paragraph 9.8 of the Emerging Draft LPR makes clear that enabling development should only ever be regarded as a last resort in restoring heritage assets and that the Council will use the tests set by Historic England to determine any proposals submitted. For the Proposed Submission LPR the policy and supporting text will be amended to remove the sections on enabling development. These will instead be incorporated into Policy SP9 and its supporting text.</p> <p>It is agreed the LPR should clarify this issue and so the final paragraph of the policy will be amended as follows – '..... where it does not <del>enhance</del> <u>contribute to</u> the character and distinctiveness of the rural area.....'</p>
Turley for A2 Dominion (lpr1498)	<p><i>Full representations made by Turley on behalf of A2 Dominion in relation to Land East of Reading Road, Streatley are attached.</i></p> <p>As discussed elsewhere in these representations, there is an internal conflict between the presumption in favour of development within settlements in Policy SP1 (Spatial Strategy) (and a presumption against development</p>	<p>Comments noted. The policy will be considered within the context of Policy SP1. The LPR should be read as a whole.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>outside of settlements) and the broadly permissive approach set out in Policy DC18 (Specialised Housing) which requires <i>“The location is appropriate, in terms of accessibility of facilities, services and public transport.”</i></p> <p>For reasons we set out above, the Local Plan should be amended so as to avoid this internal inconsistency and ensure that it acts to support the delivery of specialist accommodation. If that flexibility is not embedded into the Local Plan, it is unlikely that the needs of this important (and growing) group of the community will be met.</p> <p>The Local Plan should be amended so as to avoid this internal inconsistency between the presumption in favour of development within settlements in Policy SP1 (Spatial Strategy) and a presumption against development outside of settlements, and the broadly permissive approach set out in Policy DC18 and ensure that it acts to support the delivery of specialist accommodation.</p>	

## Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

### Emerging Draft LPR Policy: DC2 Health & Wellbeing

### (Proposed Submission LPR Policy: DM3 Health & Wellbeing)

Number of responses received: 13

Respondent (with lpr ref)	Response	Council Response

<b>Statutory consultees</b>		
Hungerford Town Council (lpr151)	Supports the policy	Comments noted
Newbury Town Council (lpr2245)	We support this policy. This is a vital aspect of “place making”. However, it needs to take account of the whole life of the development, its surroundings, and future occupants - not just initial build quality and residents.	Comments noted. The supporting text makes clear that Health Impact Assessments will consider the likelihood, significance and duration of both the potential positive and negative impacts of proposals and will identify what will be monitored, how and by whom. They will also take into account the cumulative impacts of development.
Shaw cum Donnington Parish Council (lpr221)	We support this policy. It is difficult to understand how the policy will be applied. For example, with the North Newbury Development no Health Impact assessment appears to have been made and it is difficult to appreciate what it might have said.	Comments noted. The policy cannot be applied retrospectively, The policy makes clear that a Health Impact Assessment should be prepared in accordance with guidance from Public Health England and the supporting text of the policy sets out what would be required as part of this.

Respondent (with lpr ref)	Response	Council Response
Stratfield Mortimer Parish Council (lpr410)	Supports the policy	Comments noted
Thatcham Town Council (lpr1412)	<ul style="list-style-type: none"> <li>"will promote, support and enhance positive mental and physical health and wellbeing and thus contribute to reducing health inequalities."</li> </ul> <p>As we have noted in SP 17 and earlier, the loss of green-space and rights-of-way to neighbouring countryside will have an adverse impact on the wellbeing of existing residents in Thatcham. Of all responses received from residents to Councillors the most pressing concern is the loss of green-space and this dominates over other aspects including GP access. We therefore disagree that SP 17, and Thatcham NE, is an outcome that either promotes, supports, or enhances wellbeing.</p> <p>Residents in Thatcham have lost green space over recent years. Several of the playing fields and parks have been subsumed within the flood alleviation works with the result that the fields hold water for greater periods of the year. The woodland in Dunston Park that was promoted as recreational space when that housing estate was being developed was subsequently not adopted by West Berkshire Council on completion of the estate; consequently, the land has been partitioned into individual lots and sold privately preventing long-term management of an Ancient Woodland and restricting access. Land that is legally recognised as access land for recreational purposes adjacent to the Nature Discovery Centre is fenced off by West Berkshire due to concerns related to gas emissions from underground waste and therefore is unlikely to be made accessible. The loss of this green belt for NE Thatcham will be felt negatively across a very large community.</p> <ul style="list-style-type: none"> <li>"Development that would have an unacceptable impact on the health or wellbeing of existing or new communities will not be permitted."</li> </ul> <p>It is necessary to define and quantify what is an unacceptable impact on health. As well as the loss of natural green-space and the subsuming of rights-of-way within a housing development, the development of SP 17 will</p>	<p>Comments noted.</p> <p>As far as defining and quantifying what is an unacceptable impact on health, the policy makes clear that a Health Impact Assessment will need be prepared in accordance with guidance from Public Health England. The supporting text makes clear that Health Impact Assessments will consider the likelihood, significance and duration of both the potential positive and negative impacts of proposals and will identify what will be monitored, how and by whom. They will also take into account the cumulative impacts of development.</p> <p>Other issues are considered as part of the Council response to issues raised under Policy SP17.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>increase traffic and congestion in an Air Quality Management Area and add to noise pollution.</p> <p>In our view the loss of wellbeing on existing communities arising through the loss of surrounding countryside, noise pollution from increased traffic in close proximity to properties on Floral Way, and air quality on the A4, result in an unacceptable conflict between this policy and SP 17. This must be addressed for existing residents.</p>	
<b>General consultation bodies</b>		
British Horse Society (lpr856)	<p>The Society supports this policy. Provision of active travel routes near developments and public open space as part of developments (eg Sandleford &amp; North east Thatcham) encourage healthy lifestyles.</p> <p>Please note our suggested insert in relation to SP22 Transport: <i>‘Housing and industrial development inevitably brings increased motor traffic to local roads including those minor roads favoured by non-motorised users. As traffic levels increase, use of roads by non-motorised users decreases. Provision for all non-motorised users needs to be made to encourage healthy lifestyles’</i></p> <p>The Society encourages the use of the term ‘non-motorised user’ in the whole document as favoured by Highway England, though for the avoidance of any doubt it would be good to see this appended with the phrase “..including equestrians.”. Use of the terms ‘pedestrian &amp; cyclists’ is not inclusive of equestrians as well as other legal road users, and causes difficulties for us as we often have to make the case for equestrians project by project.</p>	Comments noted.
Canal and River Trust (lpr885)	<p>Fully supported please note that the Kennet &amp; Avon canal uses an ampersand (paragraph 10.2) any new water based activities on the canal, as promoted through the draft Leisure strategy 2021-2031 should be discussed with the Canal &amp; River Trust at the earliest opportunity, and preferably before planning permission is sought.</p>	Comments noted. References to the Kennet & Avon Canal will be amended throughout the LPR accordingly.
Mid and West Berkshire Local	<p>MWBLAF supports this policy. Provision of active travel routes near developments and public open space as part of developments (eg Sandleford &amp; North East Thatcham) encourage healthy lifestyles.</p>	Comments noted.

Respondent (with lpr ref)	Response	Council Response
Access Forum (lpr1885)	<p>The supporting text mentions the Council’s draft Leisure Strategy. In its response to the consultation on this draft, the Forum pointed out that “Dog walking is a popular way of taking physical activity including those in older age groups.” Of all leisure activities, dog walking is probably the one that is most dependent on suitable provisions within the layout of a development. We note that Hampshire County Council has a guidance document “Planning for Dog Ownership in New Developments: Reducing Conflict – Adding Value”:</p> <p>The Forum recommends that a paragraph is added to the supporting text for this policy to recognise the importance of dog walking, and this should be developed further in policy DC 37 – Public Open Space.</p> <p>Please note our suggested insert in relation to SP22 Transport: Housing and industrial development inevitably brings increased motor traffic to local roads including those minor roads favoured by non-motorised users. As traffic levels increase, use of roads by non-motorised users decreases. Provision for all non-motorised users needs to be made to encourage healthy lifestyles.</p> <p>The Forum recommends that the following paragraph should be added to the supporting text for this policy (with wording taken from the Hampshire guidance document): <b><u>Dog walking is a popular way of taking physical activity including those in older age groups. Dog owners are traditionally one of the most frequent, year-round users of urban greenspace and public access to the wider countryside. The particular needs of dog walkers should be considered in the design of developments – see policy DC37 on Public Open Space.</u></b></p>	<p>The Council believes that this issue is best considered under Emerging Draft Policy DC37 and as the respondent has made similar comments (lpr1892) under that policy, the Council’s response is set out there.</p>
West Berkshire Heritage Forum (lpr90)	<p>Supports the policy. The Council should encourage the installation of automatic fire suppression (sprinklers) in appropriate buildings that are not mandated to have them. This includes dwellings of multiple occupation (flats, care homes, hotels, boarding houses and guest houses), buildings frequented by the public (halls, shops and leisure centres), industrial buildings and offices.</p> <p>Supporting text: No one has lost their life in the UK in a building equipped with working sprinklers. The damage done by a fire in an equipped building is greatly reduced to the extent that a building can be brought back into use in a short time.</p>	<p>Comments noted. The Council believes this issue is best considered under Policy SP7 which sets out the Council’s strategic approach to the principles of design.</p>

Respondent (with lpr ref)	Response	Council Response
<b>Other stakeholders</b>		
Sam Coppinger (lpr305)	Supports the policy	Comments noted
Colin Duff (lpr455)	<p>With proposed major expansion to the West Berks population due to the Sandford and NE Thatcham developments hospital provision within West Berks itself will be woefully inadequate.</p> <p>GP capacity within West Berks is already strained - waiting for three weeks for a routine appointment is common - with practices claiming they cannot attract doctors to work in the area.</p> <p>A strategic plan with the NHS will be required to deliver both greater GP provision and full hospital facilities without having to travel, out of the district.</p>	<p>Comments noted. Proposed Submission LPR Policy SP24 sets out the Council's approach to infrastructure requirements and delivery.</p> <p>In preparing the LPR, the Council is working in partnership with infrastructure providers, both internal departments and external organisations, to identify the infrastructure required to support and facilitate the new development proposed. Details of this will be contained in the Council's Infrastructure Delivery Plan as well as the CIL Charging Schedule and related documents governing planning obligations.</p>
Nataliya Topliss (lpr813)	<p>Destroying 170 acres of green land will promote positive mental and physical health. Thatcham is a derelict grey town with very little trees and green spaces. Every single green space is given for the development. The residents of Thatcham have no green park to visit. We breathe congested air as West Berks Council does nothing to address local air quality issues.</p> <p>West Berks Council's strategy of 2012 identified, that after a period of rapid housing growth, infrastructure in Thatcham had failed to keep pace and there should be a period for regeneration and new facilities. Since then, there has been no such regeneration so the Council's conclusions of 2012 must still stand.</p>	<p>Comments noted.</p> <p>The issues raised are considered as part of the Council response to issues raised under Policy SP17.</p>
Councillor Tony Vickers (lpr582)	We strongly support this policy.	Comments noted
<b>Landowners, site promoters and developers</b>

## Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

### Emerging Draft LPR Policy: DC3 Building Sustainable Homes and Businesses

### (Proposed Submission LPR Policy: DM4 Building Sustainable Homes and Businesses)

Number of responses received: 30

Respondent (with lpr ref)	Response	Council Response
<b>Internal</b>		
West Berkshire Council Ecologist (lpr1694)	In the supporting text add a point about low tech solutions/building materials.	Comment noted.
<b>Statutory consultees</b>		
Environment Agency (lpr1679)	There appear to be some references that need completing in paragraph 10.19 "(XXXX)"	Comment noted. The policy has been amended.
Newbury Town Council (lpr2244)	We support the approach to homes having a nationally recognised and measurable standard of quality. However, we do not support the treatment of Renewable Energy are merely a class of Business: category "3". Reason: Renewable Energy should be a separate DC policy on its own to highlight its importance. There are 'developments' which are purely for renewable energy, e.g. solar arrays, micro-hydro and wind turbines. Under '3' currently there is 'A' which deals with renewable energy as part of a residential or commercial development. 'B' is for renewable energy developments that are 'stand-alone'. These should be in the Local Plan but as a separate category with its own policy, in particular to cover schemes in 'countryside'. This should be referenced in the proposed amendment to SP5 (see above) and only the sub- category "A" should be part of this policy.	The comments are noted. The Proposed Submission LPR policy is generally supportive of renewable energy schemes subject to and according to their proposed location.

Respondent (with lpr ref)	Response	Council Response
	<p>Changes: Change Proposed: New DC policy linked to an amended SP5 and worded as '3.B' here. The policy should also explicitly encourage developments that have local community backing and/or where the energy and/or revenue generated from the development will accrue to homes and/or businesses in West Berkshire.</p> <p>The Supporting Text from 10.22 to 10.24 should be moved to accompany the new policy.</p>	
Thatcham Town Council (lpr1413)	<p>We acknowledge that high quality and sustainable homes are essential for supporting the net zero carbon objectives of West Berkshire. We note that the West Berkshire Environment Strategy states the definition for net zero is that "carbon dioxide will be reduced to a net zero level. In other words, any carbon dioxide gas emissions within West Berkshire will be balanced with an equivalent of emissions that are either offset or prevented". This inclusion of this definition is necessary to align terminology and should be part of this Policy.</p> <p>We recognise that Homes Quality Mark level 4 is a standard that is designed to deliver a high-quality holistic approach to dwellings and building communities. Nevertheless, there are aspects of the scheme that are open to being 'gamed' by developers as assessment issues deliver 'credits' can be played-off against each other. This is particularly the case for a large development where 'credits' can be obtained in one part of the development at relative ease that avoid more difficult issues being confronted. Careful oversight is required to ensure that good outcomes for West Berkshire are delivered.</p> <p>We would suggest that HQM Level 4 is a requirement, but that the 'credits' related to energy efficiency are called out explicitly. There may be several ways to do this: In the HQM request that a minimum of Home Energy Performance Ratio (HEPR) of 0.9 is specified. Define a Dwelling Emission Rate (DER) in Part L 1A that align with net zero and can be assessed using Standard Assessments Procedures (SAP) The disadvantage of (1) is that the HEPR calculation within HQM is based on a proprietary algorithm (although it appears to be related to Part L</p>	<p>Comments noted. The Proposed Submission LPR policy is generally supportive of renewable energy schemes subject to and according to their proposed location.</p> <p>The Proposed Submission LPR policy goes a long way to meet the requirements set out here.</p> <p>The Council is aware of the challenges in putting the new policies into practice and is looking at ways to ensure they are delivered satisfactorily.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Building Standards) and the selected value (HEPR=0.9) needs to be reviewed against their definition to ensure it does meet the objectives of the West Berkshire. This is beyond the scope of our assessment.</p> <p>Basing a solution on (2) enables West Berkshire to set their own targets. We understand that an approach by London Authorities attempts something similar, and where developers fail to meet the targets set, they pay a penalty towards carbon offsetting schemes. This produces a market incentive to deliver buildings that are close to net zero carbon and provides the Council with a revenue source to fund offsetting.</p> <p>Whatever approach is chosen key requirements are related to high quality insulation, airtightness, careful design to avoid cold-bridges, controlled ventilation and heat recovery. As buildings will no longer be heated by fossil fuels, the use of ground or air-source heat pumps are likely to become standard. We recommend that new buildings have radiators and associated plumbing designed for lower heat distribution - requiring larger surface areas and piping - in order the heat pumps can operate with high coefficients of performance. It is also likely that larger heat-stores will be required that enable solar heating of hot-water, or the use of immersion heaters from solar or off-peak low-carbon electricity, to be maximised and any supplemental high-carbon electricity to be minimised.</p> <p>An essential part of delivering high quality buildings is also related to enforcement. We would expect to see policy statements that define how testing to a defined target will be assessed. For example, airtightness may be measured on a subset of houses to ensure that standards are being met in the field. The enforcement procedure should also define penalties and remedies required if standards are not met.</p> <p>As we note earlier, we believe that renewable energy resource should be assessed in a similar manner to material extraction in advance of allocating planning and assigning land use. For example, solar radiance and wind are the key resources available. National policy has been opposed to onshore wind in recent years but there are indications this may change.</p> <p>We state in our response to SP 17 that the formal and legal relationship between the Master-Planning exercise and policies in the Local Plan is unclear. There is a statement in the Stage 3 masterplan that states "most of</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>the homes in NE Thatcham will not be connected to the gas grid". We believe that this should be a policy that applies to all new houses in order to de-carbonise heating and it should be reflected in policy DC 3.</p> <p>Finally, we also recognise that the national Better Homes Standards (Part L Building Standards) have recently been published by central government. An important outcome of the consultation, published on the 19th January 2021 during this Local Plan consultation period, is that "local authorities will retain powers to set local energy efficiency standards for new homes". Therefore, we fully expect that West Berkshire will chose to adopt policies that are consistent with their adopted Environment Strategy published in 2019.</p> <p>To align with the West Berks Environment Strategy the following amendments to policy are necessary:</p> <p>The policy should refer to the definition of net zero as described in the West Berkshire Environment Strategy</p> <p>All new developments must be carbon audited in order that required carbon offsetting aligned with the West Berkshire Environment Strategy can be quantified</p> <p>All new development must have legally binding zero-carbon policies</p> <p>Policies must reflect the latest national policy guidance on the Better Homes Standards</p> <p>Section 10.19 "natural environment (XXX) and health (xxx)" These statements appear to be incomplete.</p> <p>Section 10.24 "Where appropriate, renewal energy proposals will be integrated in to the proposed scheme" This appears to be a weak statement, as it enables a developer to make arguments to avoid renewable energy for many reasons. If an appropriate standard is set the renewable energy should be a central pillar of any multi-dwelling new development. If a development site has poor solar resource due to North facing a developer contribution towards offsetting should be sought (as noted earlier).</p> <p>Section 10.25 "Measures to increase the adoption of retro-fitting energy efficiency measures."</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>We support this measure. The transition towards net-zero starts with improving efficiency of assets (typically this is lower cost and returns higher carbon benefits) as renewable energy tends to be higher cost for the return on carbon delivered.</p> <p>Section 10.27 "Changes to national targets." As noted earlier we acknowledge this may happen sooner rather than later.</p> <p>Section 10.28 "The Council will carefully scrutinise proposals." We also expect Council to scrutinise carefully ongoing and final build quality.</p>	
Kintbury Parish Council (lpr1726)	The Parish Council fully supports the proposals for residential development to meet minimum standards of construction as included in Policy DC3.	The support is noted
Greenham Parish Council (lpr909)	Add comments from TV's document, plus Carbon neutral homes need to be locked in but in addition GPC would like to see houses with a HERP greater than .9 will have the full 40 points awarded, as .9 equals carbon neutrality and therefore delivery any houses that are better than .9, equals a carbon negative house, which is required to 'payback' the carbon emissions generated when building the houses.	Comments noted. The Council has taken a different approach which is now set out in the Proposed Submission LPR.
Shaw-cum-Donnington Parish Council (lpr222)	<p>Whilst we support the policy we do not understand how it will be enforced. As we understand it, dwellings only need to achieve minimum building regulations. In the past the Council attempted to enforce BREEAM excellent on new developments but this was abandoned after an appeal against the policy was lost. What is there to give confidence that any of these policies can be implemented without a change to the building regulations or addition powers to enforce such policies by government.</p> <p>A similar comment applies to renewable energy.</p> <p>10.17 We note that planning policy guidance allows LPAs to "set energy performance standards for new housing.... only to level 4 of Code for Sustainable Homes". We note that this was not imposed on the North Newbury development that only comes up to minimum building regulations. Policy used the terms HQM and BREEAM whilst 10.17 policy refer to Code for Sustainable Homes. It is difficult to understand from the text (without research) what this means in terms of what the policy can achieve.</p>	<p>Comments noted.</p> <p>The Council is aware of the challenges in putting the new policy into practice and is looking at ways to ensure they are delivered satisfactorily.</p>

Respondent (with lpr ref)	Response	Council Response
	10.22 We note that the Race Course development (or part of it) was expected to have a combined heat and power scheme that was dropped. So what assurances can we have that such policies can be enforced in the future.	
Hungerford Town Council (lpr152)	We agree in principle with the intent but...Whilst we understand that LPAs are constrained to some extent at least by central government dictat regarding their ability to require environmental standards of new homes, this continues to be a national policy area of woeful achievement. Central governments 2019/20 "Future Homes Standard" consultation has just now been published. We understand it now gives LPAs more scope for their own standards at least for the next few years and we would urge WBC to take full advantage of this option. Can the previous WBC Local Plan ambitions re Code Level 6 which were ruled out be re-instated? Even today in Hungerford and elsewhere new homes with gas boilers, no sustainable energy provision and the tradionally poor achieved energy performance are being built with impunity. We feel this policy should be much more demanding.	The support in general for the approach is noted.  The Council is using the powers it has to tackle the issues of climate change and the policy has been revised with new standards.
Stratfield Mortimer Parish Council (lpr411)	We support this with reservations: It is good to see the inclusion of policies which will help with the fight against Climate change. However, bearing in mind the Government's increasingly tight requirements, are the standards in this policy adequate in both timing and scope? We would suggest not. For instance, why not go for HQM 4 star from the start of the plan?  Changes: Please see above. Would it also be sensible to future proof the policy by saying the very latest standards/requirements/innovations will be used?	The support in general for the approach is noted.
<b>General consultation bodies</b>		
Canal and River Trust (lpr886)	10.22 This paragraph should include water based Heating and Cooling schemes and HEP which can be delivered without any adverse impact on biodiversity. Any Energy Assessment proposing use of such technology for	Comments noted but the approach would not be appropriate for the majority of planning applications.

Respondent (with lpr ref)	Response	Council Response
	any major commercial or residential development (more than 100 houses) should demonstrate evidence of consultation with the Canal & River Trust. These sources should be included as options within studies of renewable energy potential. Applicants for major developments adjacent to the canal should consider whether the canal can be used to provide renewable energy and discuss this with the Canal & River Trust's Utilities team.	
Home Builders Federation (lpr1952)	<p>The Government, as the Council have noted in paragraph 10.17 and we have noted above, have stated in paragraph 6-012 of PPG that energy efficiency improvements should not be higher than those achieved by level 4 of the Code for Sustainable Homes (CSH). It is not clear whether the Housing Quality Mark would see improvements beyond level 4 and as such whether it is consistent with national policy. Given that from 2022 the new part L Building Regulation will see improvements higher than those achieved through level 4 of the CSH we do not consider it necessary to include an additional minimum standard.</p> <p>As set out in our comments on SP5 the HBF considers a universal standard is necessary to allow research and development and supply chains to focus upon responding to agreed national targets, and for training providers to plan their programmes to equip the labour force to meet these new requirements. Therefore, the HBF consider the phased approach taken by Government towards adopting the Future Homes Standard in 2025 to be most effective way to achieve improvements in the energy efficiency of new homes whilst also maintaining delivery and that the requirement for</p> <p>Given that from 2022 the new part L Building Regulation will see improvements higher than those achieved through level 4 of the CSH we do not consider it necessary to include an additional minimum standard.</p> <p>The requirement for residential development to meet the Homes Quality Mark be deleted from DC3.</p>	<p>Comments noted.</p> <p>The Council is using the powers it has to tackle the issues of climate change and the policy has been revised with new standards.</p>
West Berkshire Heritage Forum (lpr104)	Supports the policy	The support is noted.
<b>Other stakeholders</b>		

Respondent (with lpr ref)	Response	Council Response
Jonathan Alderman (lpr551)	<p>In paragraph 10.22 (i) CHP plant is included as an option for renewable electricity generation. The definition is very vague and open to interpretation. CHP plant without Carbon Capture and Storage technology fitted is detrimental to the Climate Change agenda. It also generates a serious impact on the Air Quality and health of residents living close to the CHP plant.</p> <p>CHP plant can also burn plastic (residual waste) and waste wood as a fuel stock, all a source of CO2 emissions.</p> <p>I would like to see the paragraph 10.22 (i) modified as follows:  "Combined heat and power (CHP) with a modest plant being able to serve a large number of dwellings and commercial uses in a small geographical area <b>may be considered subject to a full and comprehensive demonstration of the plant's green credentials, i.e., the integration of Carbon Capture and Storage (CCS) technology to significantly reduce CO2 emissions to the air and is fuelled by a fuel that generates less CO2 than fossil fuel-based feedstocks e.g., plastic or waste wood.</b>"</p>	Comments noted.
Susan Millington (lpr471)	<p>Unambitious target!  Why wait till 2029 to enforce 4 star ratings? Introduce immediately.</p>	<p>Comments noted.</p> <p>The Council is using the powers it has to tackle the issues of climate change and the policy has been revised with new standards.</p>
Graham Storey (lpr592)	<p>Why wait till 2029 to enforce 4 star ratings?  Introduce immediately.</p>	<p>Comments noted.</p> <p>The Council is using the powers it has to tackle the issues of climate change and the policy has been revised with new standards.</p>
West Berkshire Green Exchange (lpr1559)	<p><b>Energy Production</b>  In addition to renewable energy the Government's 10-point Green Industrial plan advocated the use of nuclear power to provide the continuous demand when renewables are unable to. West Berks is not a primary location for a 3GW power plant as these are reserved for coastal locations. However</p>	<p>Comments noted.</p> <p>The Council is using the powers it has to tackle the issues of climate change and the policy has been revised with new standards.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>certain locations may be suitable for a Small Modular Reactor including the AWE sites (which are already nuclear licensed) or RAF Welford.</p> <p>As far as possible, all new builds should include solar PV panels on the roofs, with local provision for power storage.</p>	
West Berkshire Green Party (lpr1845)	<p>We do not agree with waiting until 2029 to enforce 4-star ratings and propose that these should be introduced immediately.</p>	<p>Comments noted.</p> <p>The Council is using the powers it has to tackle the issues of climate change and the policy has been revised with new standards.</p>
Councillor Tony Vickers (lpr585)	<p>We broadly support this policy but: proposals for Renewable Energy (e.g. solar farms) should be a distinct policy; the HQM requirement is not ambitious enough with large sites; and We wish to see reference to life-cycle carbon costs.</p> <ol style="list-style-type: none"> <li>1. Renewable Energy should be a separate DC policy on its own to elevate the status of the need to achieve zero carbon.</li> </ol> <p>There are 'developments' which are purely for renewable energy, e.g. solar arrays, micro-hydro and wind turbines. Under '3' in the policy currently there is 'A' which deals with renewable energy as part of a residential or commercial development. 'B' is for renewable energy developments that are 'stand-alone'. These should be in the Local Plan but as a separate category with its own policy, in particular to cover schemes in 'countryside'. This should be referenced in the proposed amendment to SP5 (see above).</p> <ol style="list-style-type: none"> <li>2. The requirement for development of up to 200 homes to achieve HQM 4 stars by 2029 is not ambitious enough. "10-200" and "200+" are ambiguous.</li> <li>3. We welcome the reference in 10.14 to "benefits derived by the end user".</li> </ol> <p>We also welcome the recognition that national guidance on sustainable development is very likely to change during the Plan period.</p> <p>Changes:</p>	<p>The broad support is noted.</p> <p>The Council is using the powers it has to tackle the issues of climate change and the policy has been revised with new standards.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>1. New DC policy linked to an amended SP5 and worded as '3.B' here. The policy should also explicitly encourage developments that have local community backing and/or where the energy and/or revenue generated from the development will accrue to homes and/or businesses in West Berkshire.</p> <p>The Supporting Text from 10.22 to 10.24 should be moved to accompany the new policy.</p> <p>2. The HQM requirements for 0-9 and 10-200 are the same and should be amalgamated.</p> <p>The requirement for 200+ homes needs to be qualified so that phases of a 200+ development that are themselves less than 200 homes are covered by the requirement.</p> <p>The timescale for the requirement to achieve HQM 4 stars should be changed to 2025.</p> <p>3. Add to end of supporting text 10.14 "Account should be taken of whole life-cycle costs in use of new and extended properties, especially those in residential use."</p>	
<b>Landowners, site promoters and developers</b>		
<p>Bloor Homes &amp; Sandford Farm (lpr2175)</p>	<p>Policy DC3 proposes that new residential development meet minimum standards of construction framed by BREAAAM's Housing Quality Mark.</p> <p>The Home Quality Mark is a voluntary scheme, whereas the practical effect of policy DC3 is to give it the statutory weight of the Development Plan. This policy should be recast to encourage new development to achieve and exceed these standards rather than obliging them to do so.</p> <p>We are aware that other draft Local Plans that include reference to the HQM do so largely in the above terms.</p>	<p>Comments noted.</p> <p>The Council is using the powers it has to tackle the issues of climate change and the policy has been revised with new standards.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The policy also requires that, where appropriate, for a development of 10 or more dwellings, a minimum of 20% of future energy use is provided from renewable energy sources.</p> <p>The Government intends that amendments to the Building Regulations are the basis for improving the energy efficiency of new housing. In 2019, Government consulted on proposed changes to Building Regulations Part L which included the following two options:</p> <p>Option 1 – ‘Future Homes Fabric’: 20% reduction in CO2 emissions compared to current standards, envisaged to be met predominantly by very high fabric standards.</p> <p>Option 2 – ‘Fabric plus technology’: 31% reduction in CO2 emissions compared to current standards, to be met through higher fabric standards and low and zero carbon technologies.</p> <p>The Government recently published its response to the consultation and have signaled their intentions which point to Option 2. Importantly this allows for fabric first solutions and renewable energy.</p> <p>By requiring that 20% of future energy use is provided from renewable energy sources, this may prove to be inconsistent with the proposed changes to Building Regulations, which would not dictate how reductions in energy use and carbon dioxide emissions are achieved.</p> <p>In any event, these requirements will be enshrined in the Building Regulations and are not intended to be controlled by local planning policies. The Written Ministerial Statement on Plan Making dated 25 March 2015 and the PPG clarified the use of plan policies and conditions on energy performance standards for new housing developments. This Policy should be recast to reflect the above considerations.</p>	
Bluestone Planning for Darcliff Homes Ltd.(lpr2431)	The policy is considered to be a duplication of those matters already required by Building Regulations and because it is specific, it is likely to become out of date quickly. It would be more appropriate to require that	Comments noted.

Respondent (with lpr ref)	Response	Council Response
	<p>construction is required to meet the minimum standards set out by building regulations. Where specific named standards are referred to, these should be clarified as or their successors as well as offering an equivalent alternative to ensure that meeting standards is not prohibitively expensive or onerous to smaller developers.</p>	<p>The Council is using the powers it has to tackle the issues of climate change and the policy has been revised with new standards.</p>
<p>CALA Homes (Chiltern) (lpr2367)</p>	<p>We also wish to comment generally of the draft development control policies. For example, addressing the causes and impacts of climate change, in the context of the Council declaring a climate emergency, is clearly a very important matter for the LPR.</p> <p>The policy needs to be precise to confirm what is expected of developers. It also needs to be supported by clear evidence, which appears to be lacking at this stage of the emerging plan.</p> <p>Evidence is needed, in particular, on viability of development, to ensure that development needs can be met. National planning policy guidance<sup>11</sup> states that:</p> <p>“The role for viability assessment is primarily at the plan makings stage” and that it “should not compromise sustainable development but should be used to ensure that polices are realistic, and total cumulative cost of relevant policies will not undermine deliverability of the plan”.</p> <p>The strategy should also include district wide initiatives not just individual developments, and therefore, there is likely to be a role for the Community Infrastructure Levy.</p>	<p>Comments noted.</p> <p>The Council is using the powers it has to tackle the issues of climate change and the policy has been revised with new standards.</p>
<p>Copas Farms (lpr1975)</p>	<p>Draft policy DC3 set out the minimum standards of construction for both residential and non-residential development. Our client is aware of the emphasis in national policy that states (paragraph 148) that Council's support the transition to a low carbon future and shape places in ways that contribute to radical reductions in greenhouse gas emissions, minimise vulnerability and improve resilience to the effects of climate change.</p> <p>However, due to site specific reasons (i.e. location of the site) or reason of viability, it may not be possible to meet these minimum requirements but still deliver a sustainable development.</p> <p>Changes:</p>	<p>Comments noted.</p> <p>The Council is using the powers it has to tackle the issues of climate change and the policy has been revised with new standards.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>On this basis we consider that the text for parts 1 and 2 of this draft policy should be amended as follows:</p> <ol style="list-style-type: none"> <li>1. Proposals for residential development will, where reasonably possible, meet the following minimum standards of construction unless:</li> <li>2. Proposals for new non-residential development will, <b>where reasonably possible</b>, meet the following minimum standards of construction:</li> </ol>	
Feltham Properties (lpr2284)	<p>Emerging Policy DC3 sets a requirement for new residential developments to meet the Homes Quality Mark (HQM). The supporting text in the Consultation Document advises that viability work undertaken for the Local Plan Review has already tested the viability based on “carbon neutral” development and has concluded it is not a barrier to development in West Berkshire. However, this evidence does not appear to have been published. While Feltham supports the move to carbon neutral, as a point of detail we have concern that the Policy is unsound in the absence of publishing this supporting evidence.</p> <p>Furthermore, the Government has established that through Part L and Part 6 of the Building Regulations, emissions allowed from new buildings will continually be reduced as a ‘stepping stone’ to “zero carbon” buildings. The Government will introduce the Future Homes Standard from 2025 which will produce 75-80% less carbon emissions than homes delivered under current regulations. Accordingly, it is considered that the Council should review the requirement to deliver the HQM and perhaps rely on nationally adopted standards and the subsequent introduction of the Future Homes Standard. This would provide a simpler and more streamlined process and does not rely on an independent certification model.</p>	<p>Comments noted.</p> <p>The Council is using the powers it has to tackle the issues of climate change and the policy has been revised with new standards.</p>
Greenham Trust Ltd. (lpr2375)	<p>This representation on the Local Plan Review (LPR) is made on behalf of Greenham Trust (the Trust), specifically in regard to its interests at Greenham Business Park (GBP) as the major land owner and manager of the park.</p>	<p>Comments noted.</p> <p>The Council is using the powers it has to tackle the issues of climate change and the policy has been revised with new standards.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>As such, the Trust is a stakeholder in the local plan process and is keen to engage proactively with the Council and other stakeholders to assist with preparing a positive and deliverable local plan to meet development needs in sustainable way over the plan period.</p> <p>The aspiration for achieving high standards for new residential and non-residential is supported in principle, noting the requirement for BREEAM Excellent on non-residential buildings.</p> <p>Our comments about viability and national guidance set out above in regard to draft Policy SP 5 also apply to draft Policy DC 3.</p> <p>The policy should be supported by evidence of feasibility and viability, through consultation with the development industry, and include some flexibility to allow for specific context so that otherwise suitable and sustainable development is delivered. For example, in some cases BREEAM Excellent may not be achievable or viable, but a proposal might still deliver development in accessible locations, or on previously developed land with high remediation costs, thereby delivering significant environmental benefits in specific ways.</p> <p>The LPR should be reviewed in respect of viability and other relevant evidence to underpin policy requirements so that development needs are delivered over the plan period while also addressing key issues including tackling the causes and impacts of climate change.</p>	
Lichfields for North East Thatcham Partnership (lpr2407)	<p>Hilson Moran has provided a detailed response to this policy in Appendix 1. In summary, whilst we acknowledge and support the objective of delivering sustainable homes, we are unpersuaded that the Home Quality Mark (HQM) ought to be mandated in local planning policy and consider that the delivery of sustainable buildings can still be met within the remit of other local plan policies (and building regulations). In particular, we note that the Government's recent consultation on the Future Homes Standard confirmed that whilst LPAs do have the power to set local energy efficiency standards for new homes:</p> <p><i>“as we move to ever higher levels of energy efficiency standards for new homes with the 2021 Part L uplift and Future Homes Standard, it is less</i></p>	<p>Comments noted.</p> <p>The Council is using the powers it has to tackle the issues of climate change and the policy has been revised with new standards.</p>

Respondent (with lpr ref)	Response	Council Response
	<p><i>likely that local authorities will need to set local energy efficiency standards in order to achieve our shared net zero goal.”</i></p> <p>The HQM mixes a range of measures which, aligned to the star thresholds and timed implementation, makes it unclear whether or not it is the appropriate basis for homes built on sites across the authority. We consider that more evidence is needed from the Council to confirm why the HQM needs to be set within policy and that the specific star ratings and time thresholds are justified and appropriate. We make these comments in the context that we are not aware of any other local plans including the HQM as a standard, making it a relatively untested measure for planning purposes. However, we fully concur that the BREEAM Assessment System can be used for non-residential development and are supportive in this regard. Absent justification that the HQM is an appropriate standard for enshrining in policy in the way it is, we would suggest the deletion of policy statements 1 and 3 of Policy DC3.</p>	
Lochailort Newbury Ltd (lpr2041)	<p>We support the Council's objective to achieve net zero carbon by 2030.</p> <p>Changes: here are two amendments required to the policy to ensure that its requirements do not prejudice development delivery:</p> <ol style="list-style-type: none"> <li>1. Minimum standards Requirements for residential development to meet specific Homes Quality Mark scores, for commercial development to meet minimum BREEAM scores, and for the benchmark minimum level of onsite electricity generation, must all be caveated with the following additional policy wording: "subject to viability and an assessment of the site-specific appropriateness of renewable energy technologies."</li> <li>2. Relationship with sustainable travel objectives It is counter-productive for a development to be completed to high levels of energy sustainability, only for this to be undermined by a separate requirement for unnecessarily high levels of car parking. To address this, a</li> </ol>	<p>Comments noted.</p> <p>The Council is using the powers it has to tackle the issues of climate change and the policy has been revised with new standards.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>new Section 4 should be added to draft Policy DC3 to read: “Where developments can demonstrate that non car-based travel modes have been maximised (for example through the implementation of car share schemes, by virtue of proximity to public transport hubs, or through enhanced cyclists’ facilities) a reduced level of onsite car parking will be supported.”</p>	
<p>Pegasus for Donnington New Homes (lpr1948)</p>	<p>Representation on behalf of Donnington New Homes in support of continued allocation of Sandford Park</p> <p>At present, Home Quality Mark standards are voluntary and are not enshrined in Government policy. The Home Quality Mark clarifies the purposes of HQM stating that it 'has been created to serve the UK's Housebuilders...' as opposed to providing a basis from which to create new Policy. As such, at this stage, compliance with HQM standards cannot be required and it is therefore inappropriate to create a new policy requirement based on them. Instead, as suggested in our comments on Policy SP5, this policy should reflect the current and proposed requirements of Part L of the Building Regulations and reference to HQM standards should be deleted.</p> <p>Changes: This policy should reflect the current and proposed requirements of Part L of the Building Regulations and reference to HQM standards should be deleted.</p>	<p>Comments noted.</p> <p>The Council is using the powers it has to tackle the issues of climate change and the policy has been revised with new standards.</p>
<p>Shanly Homes (lpr1977)</p>	<p>Full representation on behalf of Shanly Homes, supporting allocation of site at 72 Purley Rise, is attached to representation on RSA12.</p> <p>This policy requires all new homes to be built to Homes Quality Mark 3 stars. It is recommended that wording be added in to the policy to take account of any possible successor to the Homes Quality Mark.</p> <p>The policy does not provide for any leniency on achieving 3 stars but it is considered that there should be scope for a site-by-site justification if achieving 3 stars is not possible.</p>	<p>Comments noted.</p> <p>The Council is using the powers it has to tackle the issues of climate change and the policy has been revised with new standards.</p>

Respondent (with lpr ref)	Response	Council Response
Sovereign Housing Association Ltd (lpr2165)	<p>Whilst SHA support building sustainable homes as a means of addressing the climate emergency and reducing the impact of fuel poverty we have reservations around the application of the Housing Quality Mark (HQM) as a policy requirement. SHA are developing a Homes and Place Standard that is aspirational against the building regulations and believe Local Plans should recognise and support developers who are aspirational. That said, at a regulatory level it is important development follows a single statutory set of standards. The incremental approach set out in Governments Future Homes Standard are likely to exceed the HQA in short order with changes already made to part L of the Building Regulations, coming in to force in 2022, requiring improvements that exceed those previously set out in level 4 of the Code for Sustainable Homes. We suggest making reference to the Future Homes standards in the supporting text and either removing the HQM requirement or and again moving it to the supporting text as something desirable.</p>	<p>Comments noted.</p> <p>The Council is using the powers it has to tackle the issues of climate change and the policy has been revised with new standards.</p>

## Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

### Emerging Draft LPR Policy: DC4 Environmental Nuisance and Pollution Control

### (Proposed Submission LPR Policy: DM5 Environmental Nuisance and Pollution Control)

Number of responses received: 10

Respondent (with lpr ref)	Response	Council Response
<b>Internal</b>		
<b>Statutory consultees</b>		
Hungerford Town Council (lpr153)	Agree with the proposed policy. Perhaps in the light of our earlier comments on DC3, household carbon emissions from heating systems in new developments should also be classed as additional pollution and require avoidance or mitigation?	Comments noted. No change proposed, the energy used to heat the spaces we live and work in is one of the highest contributors to our individual carbon footprints. West Berkshire Council declared a Climate Change Emergency in 2019 and the district's target is to become carbon neutral by 2030. The Local Plan is a key tool to build climate resilience and take action and net zero carbon modelling will inform the next stage of the Local Plan.
Thatcham Town Council (lpr1414)	<p><i>Full representation relating to north east Thatcham strategic site allocation attached to representation on SP17.</i></p> <ul style="list-style-type: none"> <li>“no harm to the amenity of occupants of neighbouring land and buildings, and future occupants of the development, through an unacceptable increase in pollution, including from light, noise, dust, vibration and/or odour.”</li> </ul>	Comments noted. If there is an existing issue with noise and odour, and if it amounts to a statutory nuisance, this can be pursued through the Council's Environmental Health team. Concerns regarding the increase in noise are noted and the policy will be revised to ensure adverse impacts on health and quality of life arising from noise from new development is mitigated and minimised. The Policy will be amended to include criteria e):

Respondent (with lpr ref)	Response	Council Response
	<p>We have received several comments from residents on Floral Way who are very concerned about the implication of increased noise. This is because properties have been built up to the boundary of Floral Way, in some cases on elevated land, and the noise is already producing an environmental nuisance as windows are unable to be opened adjacent to the road. Residents also complain about vibration from heavy goods vehicles on both the A4 and Floral Way.</p> <p>We note that odour control is a major nuisance to Thatcham residents that live close to the Sewage Works on Lower Way and concern has been expressed regards the capacity of the existing site, its ability to manage greater volumes, and the odour emitted.</p> <p>It is necessary to amend the policy to consider the cumulative effect on existing residents in areas outside the immediate development area.</p>	<p><u>It would not cause noise or vibrations of a level which would disturb areas that are valued for their tranquillity in terms of recreation or amenity. Development proposals that generate significant levels of noise must be accompanied by an assessment to mitigate such effects, having regard to the nature of surrounding uses:</u></p>
Stratfield Mortimer Parish Council (lpr412)	<p>We support this but make the following comment: Emphasis on reduction/avoidance of pollution supported. Policy on lighting - having no lighting policy, or specific type should be determined by an NDP if made. Lighting can have major impact on wildlife and biodiversity, landscape etc.</p> <p>The DC is woolly worded, What does ‘unacceptable’ mean? How is it measured? Who decides? Similarly ‘suitable mitigation measures’ who decides what is suitable, how is it decided what measurable criteria? NDPs should be able to establish whether any pollution levels are deemed acceptable, if so what and whether and what mitigation is acceptable. For example policy on lighting - having no lighting policy, or specific type - should be determined by an NDP if made.</p> <p>The bullet a of the DC should be reworked to become coherent with and supportive of the objective ‘where it does not lead to adverse effects on pollution of the environment’. Define ‘unacceptable’ in quantifiable terms. Include setting of pollution levels appropriate for the neighbourhood and each development site can be determined by an NDP.</p> <p>Need reference to light pollution; this should be included in policies on biodiversity, Design codes, landscape etc. and role of NDPs and local preferences to inform lighting decisions.</p>	<p>Comments noted. Further information will be provided within the supporting text to aid policy interpretation.</p> <p>Agreed, the policy will be expanded to include light pollution as follows –</p> <p><u>All reasonable steps are taken through design, siting and technological solutions to ensure the abatement of obtrusive light to avoid sky glow, glare and light spillage, intrusion and any adverse impact to wildlife and neighbouring residents. A Lighting Appraisal in accordance with the current guidance from the Institute of Lighting Professionals (ILP) (or similar body), national guidance and British Standards will be required for proposed developments that include outdoor lighting:</u></p>

Respondent (with lpr ref)	Response	Council Response
Shaw-cum-Donnington Parish Council	Support the policy.	Comments noted.
Berkshire, Bedfordshire, Oxfordshire Wildlife Trust (lpr715)	<p>Agree with the proposed policy, but recommend additional content on protecting biodiversity: Lighting within and around development is expected to respect the ecological functionality of movement corridors. Certain species of invertebrate and mammal are highly sensitive to inappropriate lighting. In these circumstances surveys are expected to determine where these movement corridors are and measures put forward that demonstrate how these will be protected and enhanced. Recommended policy wording: <b>“In considering development involving potentially adverse lighting impacts to wildlife the Council will expect surveys to identify movement corridors and ensure that these corridors are protected and enhanced.”</b></p> <p>Nitrogen oxides from both industrial and vehicle emissions can have a significantly detrimental effect on wildlife habitat. Policy wording will be needed to address this. It is recommended this include the following: <b>“Air quality assessments will also be required for development proposals that would be likely to have a significantly adverse impact on biodiversity by generating an increase in air pollution”</b></p> <p>Many wildlife habitats are highly vulnerable to changes in both water quality and water quantity. Policy wording is needed to ensure that appropriate measures (Sustainable Drainage Systems, silt traps and oil interceptors) must be put in place to ensure no change in groundwater flows, surface water run-off rates or water quality so that the water quantity / quality that will affect designated sites and priority habitat and the stream and river network is maintained.</p>	<p>Comments noted.</p> <p>The policy will be expanded to include light pollution and its impact on wildlife as follows –</p> <p><u>All reasonable steps are taken through design, siting and technological solutions to ensure the abatement of obtrusive light to avoid glow, glare and light spillage, intrusion and any adverse impact to wildlife and neighbouring residents. A Lighting Appraisal in accordance with the current guidance from the Institute of Lighting Professionals (ILP) (or similar body), national guidance and British Standards will be required for proposed developments that include outdoor lighting;</u></p> <p>Add the following text to the end of Emerging Draft LPR paragraph 10.36 – <u>‘In considering development involving potentially adverse lighting impacts to wildlife the Council will expect surveys to identify movement corridors and ensure that these corridors are protected and enhanced.’</u></p> <p>These suggestions would be better considered through Emerging Draft LPR Policy DC5 (water quality) and Policy DC7 (air quality).</p>
Natural England (lpr1601)	Due to the prevalence of the North Wessex Downs AONB in West Berkshire, and its impact on the character of the landscape of the Plan area, we advise mention within this policy of the requirement to reduce light pollution. This	Policy SP2 of the Local Plan Review seeks to preserve dark night skies in the AONB. However, it is acknowledged that this DM policy could go further in terms

Respondent (with lpr ref)	Response	Council Response
	will bring the policy in line with para. 180 (c) of the NPPF which states that policies should ' <i>limit the impact of light pollution from artificial light on local amenity, intrinsically dark landscapes and nature conservation</i> '. The AONB has significant areas of dark skies which should be preserved through planning policies and development control.	of light pollution and so another criterion has been added to the policy to cover this issue as follows -  <u>All reasonable steps are taken through design, siting and technological solutions to ensure the abatement of obtrusive light to avoid sky glow, glare and light spillage, intrusion and any adverse impact to wildlife and neighbouring residents. A Lighting Appraisal in accordance with the current guidance from the Institute of Lighting Professionals (ILP) (or similar body), national guidance and British Standards will be required for proposed developments that include outdoor lighting;</u>
<b>General consultation bodies</b>		
Theatres Trust (lpr1008)	The Trust welcomes inclusion of part b. of this policy which protects existing facilities from negative impacts from incompatible development, reflecting paragraph 182 of the NPPF. This matter will become particularly critical as Prior Approvals are broadened to a wider range of town centre uses; noise impacts are a criteria to be addressed. Challenges to venues including music venues, nightclubs, pubs and theatres have come forward in boroughs and districts of a similar profile to West Berkshire; a recent Inquiry dismissed an appeal against refusal of residential development adjoining the Corn Exchange in Wallingford (South Oxfordshire) for example.	Comment noted.
The Woodland Trust (lpr1012)	We particularly welcome c) and e), recognising that environmental nuisance should be reduced not only due to the impacts on human wellbeing but also on the natural environment.  We support the principle that development will not be permitted when it is considered that unacceptable effects will be imposed on the health, amenity, or natural environment of the surrounding area, taking into account the cumulative effects of other proposed or existing sources of air pollution in the locality.	Comments noted. The following text will be included within the supporting text of the Proposed Submission LPR Policy DM15: Trees, Woodlands and Hedgerows:  <u>All ammonia-emitting developments, such as intensive livestock units, which fall within 5 kilometres of an ancient woodland site will require an additional assessment to include a detailed Ancient Woodland Nitrogen Impact Assessment of the ancient woodland(s) of concern. This will need to demonstrate that there will be no deterioration as a result of the contributions from the development.</u>

<b>Respondent</b> <i>(with lpr ref)</i>	<b>Response</b>	<b>Council Response</b>
	Ancient woodland is greatly at risk from ammonia pollution. We recommend therefore adding specific requirements that additional screening will be required of all ammonia-emitting developments, such as intensive livestock units, within 5km of an ancient woodland site, with a detailed 'Ancient Woodland Nitrogen Impact Assessment' of the ancient woodland of concern. This will need to demonstrate that there will be no deterioration or impacts as a result of the contributions from this development.	
North Wessex Downs AONB (lpr1613)	Dark skies are a special quality of the AONB yet it features little in our LPAs development plans which often results in schemes being approved without consideration of lighting. Part c. of the policy which refers to the impact of pollution on the environment should including light pollution.	Policy SP2 of the Local Plan Review seeks to preserve dark night skies in the AONB. However, it is acknowledged that this DM policy could go further in terms of light pollution and another criterion has been added to the policy to cover this issue as follows -  <u>All reasonable steps are taken through design, siting and technological solutions to ensure the abatement of obtrusive light to avoid sky glow, glare and light spillage, intrusion and any adverse impact to wildlife and neighbouring residents. A Lighting Appraisal in accordance with the current guidance from the Institute of Lighting Professionals (ILP) (or similar body), national guidance and British Standards will be required for proposed developments that include outdoor lighting;</u>
<b>Other stakeholders</b>		
Councillor Tony Vickers (lpr586)	Agree with the proposed policy.	Comments noted.
<b>Landowners, site promoters and developers</b>		

## APPENDIX 6

## Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

## Emerging Draft LPR Policy: DC5 Water Quality

## (Proposed Submission LPR Policy: DM6 Water Quality)

Number of responses received: 9

Respondent	Response	Council Response
<b>Internal</b>		
West Berkshire Council Ecologist (lpr1695)	Policy neither supported nor not supported.  Does a point around water quality distinctness protect need to be added, relating if an area is naturally alkali or acidic?	Comment noted, paragraph 174 of the NPPF highlights that planning policies should ‘help to improve local environmental conditions such as air and water quality, taking into account relevant information such as river basin management plans’. As such a comprehensive approach to water quality has been taken within this policy rather than adding additional complexity.
<b>Statutory consultees</b>		
Natural England (lpr1600)	Policy neither supported nor not supported.  <b>1st bullet point</b> - Water Framework Directive (WFD) ‘Good’ status is not adequate to meet Favourable condition for the River Kennet SSSI and River Lambourn SSSI (and SAC) which have conservation objective targets for water quality. The policy as it stands is setting the bar too low. We suggest it be reworded to “...that it will prevent future attainment of Favourable condition for SSSI rivers, waterbodies or wetlands (as required by Wildlife and Countryside Act 1981 (as amended)), or ‘good status’ for other waterbodies under the Water Environment”.	Suggested wording accepted criteria a) and b) will be amended to:  <i><u>‘a) that it causes no deterioration in the quality of waterbodies, surface and groundwater, nor that it will prevent future attainment of Favourable condition for Sites of Special Scientific Interest (SSSI) rivers, waterbodies or wetlands (as required by Wildlife and Countryside Act 1981 (as amended), or ‘good status’ for other waterbodies under the Water Environment (Water Framework Directive)</u></i>

Respondent	Response	Council Response
	<p><b>2nd bullet point</b> – As above, we advise rewording to have a SSSI objective – “enhancements where waterbodies are not achieving Favourable condition (for SSSI’s) or, good ecological or chemical status for non-SSSI waterbodies”.</p> <p>In addition, we would welcome a watercourse specific policy, to include dedicated protection and enhancement for the designated Kennet and Lambourn rivers, and bring together elements such a biodiversity, green infrastructure, water quality and climate change . This will be able to be applied to the above site allocations which have the potential to impact on the rivers.</p> <p>We would include within this policy the requirement for closer inspection within 500m of SSSI waterbodies of the risks to water quality, (and achievement of SSSI water quality targets) from the small scale sewage treatment plants where developments are not connecting to the sewer network. At the nearby Habitats Sites, a Habitats Regulations Assessment is likely to be required under the precautionary principle.</p> <p>The Environment Agency (EA) specifies a minimum width of undeveloped buffer zone of 10m for main rivers and 5m for ordinary watercourses. We support this to be included within Policy, but would advise that for ecological purposes, larger buffers may often be required. This may be to help mitigate recreational impacts from a large development, particularly where the watercourses are designated SSSIs.</p> <p>Some Local Authorities go further than the EA’s minimum buffer width. Basingstoke and Deane BC’s <a href="#">Landscape, Biodiversity and Trees SPD</a> gives clear guidance on buffer sizes. Box B6 specifies a minimum buffer of 20m on both sides of the channel for main rivers, and 5m for other watercourses and waterbodies. Natural England would be very supportive of this approach if it were to be taken in West Berkshire. The new policy will need to protect water quality, but also protect these buffer zones and riparian corridors. Historic development in West Berkshire has enabled housing and gardens right up to the river bank, which has been detrimental for both ecology and flood risk, and for future positive management.</p>	<p><i>(England and Wales) Regulations 2017 and Groundwater (Water Framework Directive) (England) Direction 2016 or any subsequent amendment;</i></p> <p><i>b) that it contributes positively to the water environment and its ecology and delivers enhancements where waterbodies are not achieving ‘favourable condition’ for SSSI’s or, ‘good’ ecological or chemical status for non-SSSI waterbodies;’</i></p> <p>Comment noted, a new criterion will be included specific to the River Kennet and River Lambourn which reads:</p> <p><i>g. how the proposal will support improving the status and overall health of the River Kennet and River Lambourn</i></p> <p>The supporting text will expand upon the criteria to include elements relating to biodiversity, green infrastructure, water quality and climate change. The supporting text at paragraph 11.60 will read:</p> <p><i>Proposals which contribute to the protection and enhancement of the River Kennet and River Lambourn’s overall health and improved status under the Water Framework Directive will be supported. Well-designed development will assist the conservation and enhancement of the biodiversity, landscape and recreational value of the watercourses whilst building climate resilience. Applicants must also have specific regard to Policy SP10 Green Infrastructure.</i></p> <p>Policy SP10 Green Infrastructure will be expanded to make it clear that the policy also covers ‘blue spaces’. The policy will draw together biodiversity, green infrastructure and blue space and strengthen climate resilience within West Berkshire.</p>

Respondent	Response	Council Response
		<p>An additional criterion will be added to the Policy to include a buffer as per the recommendations contained within the West Berkshire Strategic Flood Risk Assessment (2022). Criterion will read:</p> <p><i><u>f. Proposals for built development will be required to be at least ten metres away from the top of the bank of the nearest watercourse or main river.</u></i></p>
Environment Agency (lpr1663)	<p>Policy neither supported nor not supported.</p> <p>We welcome the policy's reference to meeting the requirements of the Water Framework Directive, and protection and enhancement of classified waterbodies as identified in the Thames River Basin Management Plan. As noted above, the River Kennet and River Lambourn are Sites of Special Scientific Interest (SSSIs), with the Lambourn being additionally designated as a Special Area of Conservation (SAC). These designations are required to meet Common Standards Monitoring (CSM), which sets additional, higher water quality standards than under the Water Framework Directive.</p> <p>Given the importance of these watercourses in West Berkshire, the above wording should be added to the policy, or the local plan would be found unsound in the future. Without this, the local plan not safeguard the enhancement of the natural and local environment by:</p> <p>Preventing new and existing development from contributing to, being put at unacceptable risk from, or being adversely affected by, unacceptable levels of water pollution in accordance with Paragraph 170 of the NPPF.</p> <p>The Water Cycle Study (WCS) states that 3 Waste Water Treatment Works (WWTWs) are predicted to, or are already exceeding their flow permits during the plan period. These are Chieveley, Hungerford and Newbury. It also states that many WWTWs (Thames Water highlighted East Shefford,</p>	<p>Comments noted.</p> <p>Wording as suggested by Natural England is accepted, criteria a) and b) will be amended to:</p> <p><i>a. that it causes no deterioration in the quality of waterbodies, surface and groundwater, nor that it will prevent future attainment of <u>Favourable condition for Sites of Special Scientific Interest (SSSI) rivers, waterbodies or wetlands (as required by Wildlife and Countryside Act 1981 (as amended), or 'good status' for other waterbodies under the Water Environment (Water Framework Directive) (England and Wales) Regulations 2017 and Groundwater (Water Framework Directive) (England) Direction 2016 or any subsequent amendment;</u></i></p> <p><i>b) that it contributes positively to the water environment and its ecology and delivers enhancements where waterbodies are not achieving <u>'favourable condition' for SSSI's or, 'good' ecological or chemical status for non-SSSI waterbodies;</u></i></p> <p>This has been inserted into Emerging Draft LPR Policy DM6 Water Resources and Waste Water.</p>

Respondent	Response	Council Response
	<p>Leckhampstead, Silchester &amp; Washwater) would require upgrades during the plan period, and West Berkshire Council should consider the time taken to undertake these upgrades when phasing development. It is important that this policy is strengthened to reflect the recommendations in the WCS, otherwise the infrastructure would not support the quantum of development and the plan would be found unsound in the future.</p> <p>The policy in its current form does not do enough to prevent new and existing development from contributing to, being put at unacceptable risk from, or being adversely affected by, unacceptable levels of water pollution in accordance with Paragraph 170 of the NPPF.</p>	<p>The Water Cycle Study (Phase 2) (2021) was completed following the Regulation 18 Local Plan Review Consultation and forms part of the Local Plan evidence base. It is considered that wastewater issues would be suited to be covered in Emerging Draft LPR Policy DC6 Water Resources which is to be renamed to include waste water.</p> <p>Noted, an additional criterion will be added to Proposed Submission LPR Policy DM7 Water Resources and Wastewater to ensure new proposals do not adversely impact on the water quality, ecological value or drainage function of water bodies in the District. This criteria will read:</p> <p><i><u>f. It will not adversely impact the water quality, ecological value or drainage function of water bodies in the District, including any adverse impacts on Source Protection Zones (SPZ)</u></i></p>

<b>Statutory consultees</b>		
Hungerford Town Council (lpr158)	Policy is supported.	Comment noted.
Tilehurst Parish Council (lpr1984)	<p>Policy neither supported nor not supported.</p> <p>There is little or no mention of utilities on new developments. For larger development, consideration should be given to adoption of models used successfully elsewhere, whereby a single, specially covered off-road utilities trench is used for water, sewerage, power and telecoms, making ease of access without disrupting road traffic.</p> <p>For larger development, consideration should be given to adoption of models used successfully elsewhere, whereby a single, specially covered off-road utilities trench is used for water, sewerage, power and telecoms, making ease of access without disrupting road traffic.</p>	<p>This policy relates to the wise use of water and water conservation. The point regarding utilities on new developments is a matter for the design and construction of the development. However, this level of detail would apply at the planning application stage.</p>

Respondent	Response	Council Response
Shaw-cum-Donnington Parish Council (lpr225)	<p>We support the policy.</p> <p>We are concerned at how the aim meets BREEAM excellent for waste consumption will be enforced without changes to building regulations.</p> <p>10.44 It is stated that the council has the option to set additional technical requirements but this must have limits that are not referred to in the text. However we support the objective.</p>	<p>Comments noted.</p> <p>The option has been exercised in the policy as West Berkshire lies within a ‘water stressed’ region.</p>
Stratfield Mortimer Parish Council (lpr414)	<p>It is good to see policies that address this important issue but we have some reservations:</p> <p>The concept of water-neutral is not explained, as far as can be seen, surely it does not mean that every development should not require any net increase in water consumption. Without the explanation it is difficult to tell if the policy is appropriate.</p> <p>Even so there is a blatant get-out clause which says that viability/feasibility can override the core policy. Surely if the plan is serious about water-neutrality it should not allow such an easy way out but insist on the standards it wants or not allow the development to proceed.</p> <p>Explain water-neutrality and remove the get-out about feasibility/viability.</p>	<p>The primary aim of the water neutrality concept is to reduce demand for water from households and other buildings in new development by means of water efficiency and water recycling to minimise use as the policy states. Text will be added to the supporting text to provide an explanation of ‘water neutrality’.</p> <p>The policy requires demonstration of the grounds for feasibility and viability to the satisfaction of the Council. It does not “override” the core policy.</p>
Thames Water Utilities Ltd (lpr1741)	<p>Policy neither supported nor not supported. Suggestions made.</p> <p>We support Policy DC6 and supporting paragraphs as they are largely in line with our previous representations.</p> <p>We consider it would be clearer and more accurate to rename the Policy: “Water resources <b><u>and wastewater</u></b>”</p> <p>Thames Water seeks to co-operate and maintain a good working relationship with local planning authorities in its area and to provide the support they need with regards to the provision of water supply and sewerage/wastewater treatment infrastructure.</p>	<p>Comments noted.</p> <p>Accept the renaming of the Policy as suggested; Water resources <u>and wastewater</u>.</p>

Respondent	Response	Council Response
	<p>Water and wastewater infrastructure is essential to any development. Failure to ensure that any required upgrades to the infrastructure network are delivered alongside development could result in adverse impacts in the form of internal and external sewer flooding and pollution of land and water courses and/or low water pressure.</p> <p>A key sustainability objective for the preparation of Local Plans and Neighbourhood Plans should be for new development to be co-ordinated with the infrastructure it demands and to take into account the capacity of existing infrastructure. Paragraph 20 of the revised National Planning Policy Framework (NPPF), February 2019, states: “Strategic policies should set out an overall strategy for the pattern, scale and quality of development, and make sufficient provision for... infrastructure for waste management, water supply, wastewater...”</p> <p>Paragraph 28 relates to non-strategic policies and states: “Non-strategic policies should be used by local planning authorities and communities to set out more detailed policies for specific areas, neighbourhoods or types of development. This can include allocating sites, the provision of infrastructure...”</p> <p>Paragraph 26 of the revised NPPF goes on to state: “<i>Effective and on-going joint working between strategic policy-making authorities and relevant bodies is integral to the production of a positively prepared and justified strategy. In particular, joint working should help to determine where additional infrastructure is necessary....</i>”</p> <p>The web based National Planning Practice Guidance (NPPG) includes a section on ‘water supply, wastewater and water quality’ and sets out that Local Plans should be the focus for ensuring that investment plans of water and sewerage/wastewater companies align with development needs. The introduction to this section also sets out that “<i>Adequate water and wastewater infrastructure is needed to support sustainable development</i>” (Paragraph: 001, Reference ID: 34-001- 20140306).</p>	

Respondent	Response	Council Response
	<p>It is important to consider the net increase in water and wastewater demand to serve the development and also any impact that developments may have off site, further down the network. The new Local Plan should therefore seek to ensure that there is adequate water and wastewater infrastructure to serve all new developments. Thames Water will work with developers and local authorities to ensure that any necessary infrastructure reinforcement is delivered ahead of the occupation of development. Where there are infrastructure constraints, it is important not to under estimate the time required to deliver necessary infrastructure. For example: local network upgrades take around 18 months and Sewage Treatment &amp; Water Treatment Works upgrades can take 3-5 years.</p> <p>Local Authorities should also consider both the requirements of the utilities for land to enable them to meet the demands that will be placed upon them. This is necessary because it will not be possible to identify all the water and wastewater/sewerage infrastructure required over the plan period due to the way water companies are regulated and plan in 5 year periods (AMPs). Thames Water are currently in AMP7 which covers the period from 1st April 2020 to 31st March 2025. AMP8 will cover the period from 1st April 2025 to 31st March 2030. The Price Review, whereby the water companies' AMP8 Business Plan will be agreed with Ofwat during 2024.</p> <p>We therefore support Policy DC6 and supporting paragraphs in this respect.</p> <p><b>Water Efficiency/Climate Change</b></p> <p>The Environment Agency has designated the Thames Water region to be “<i>seriously water stressed</i>” which reflects the extent to which available water resources are used. Future pressures on water resources will continue to increase and key factors are population growth and climate change. Water conservation and climate change is a vitally important issue to the water industry. Not only is it expected to have an impact on the availability of raw water for treatment but also the demand from customers for potable (drinking) water. Therefore, Thames Water support the mains water consumption target of 110 litres per head per day (105 litres per head per day plus an allowance of 5 litres per head per day for gardens) as set out in the NPPG (Paragraph: 014 Reference ID: 56-014-20150327) and support the inclusion of this requirement in Policy.</p>	

Respondent	Response	Council Response
	<p>Thames Water promote water efficiency and have a number of water efficiency campaigns which aim to encourage their customers to save water at local levels. Further details are available on the our website via the following link: <a href="https://www.thameswater.co.uk/Be-water-smart">https://www.thameswater.co.uk/Be-water-smart</a></p> <p>It is our understanding that the water efficiency standards of 105 litres per person per day is only applied through the building regulations where there is a planning condition requiring this standard (as set out at paragraph 2.8 of Part G2 of the Building Regulations). As the Thames Water area is defined as water stressed it is considered that such a condition should be attached as standard to all planning approvals for new residential development in order to help ensure that the standard is effectively delivered through the building regulations.</p> <p>Proposed policy text:  <b><i>“Development must be designed to be water efficient and reduce water consumption. Refurbishments and other non-domestic development will be expected to meet BREEAM water-efficiency credits. Residential development must not exceed a maximum water use of 105 litres per head per day (excluding the allowance of up to 5 litres for external water consumption). Planning conditions will be applied to new residential development to ensure that the water efficiency standards are met.”</i></b></p>	<p>Comments noted, the Council will amalgamate some of the suggested wording into the policy although considers the wording regarding water usage is clearer in the drafted policy. The wording will be amended to read:</p> <p><u><i>Development will be required to be designed to be water efficient and reduce water consumption. Refurbishments and other non-domestic development will be expected to meet BREEAM water-efficiency credits. All new residential developments (including replacement dwellings) will meet the Building Regulation optional higher water efficiency standard of 110 litres per person per day, as set out in Building Regulations part G2. Planning conditions will be applied to new residential development to ensure that the water efficiency standards are met.</i></u></p>
Environment Agency (lpr1664)	<p>We welcome that this policy correctly identifies the need to use the tighter water efficiency target of 110l/p/d for new developments. West Berkshire sits within a water stressed catchment, and therefore every effort should be made to reduce water usage. We also encourage the incorporation of water-neutrality into the policy.</p> <p><b>Contaminated Land</b>  From the list of polices provided, there doesn't seem to be any policy about contaminated land. There should be a policy requiring robust evidence regarding investigation and remedial measures to prevent discharge to groundwater aquifers through land affected by contamination. This should</p>	<p>Comments noted.</p> <p>Policy DC4 Environmental nuisance and pollution control in the emerging draft LPR considers contaminated land. The policy will be reviewed to ensure that it meets the</p>

Respondent	Response	Council Response
	<p>link with or be included in the above policy about pollution prevention and water quality.</p> <p>We recommend including the following text on page 148 to protect groundwater quality:  <i>Developments should allow sufficient shallow drainage areas if infiltration is to be used. The use of deep soakaways for infiltration (e.g. boreholes) are not a recognised SUDS solution and may be refused a permit. This is to protect groundwater quality.</i></p> <p>By including the above issues in the local plan policy this will be consistent with paragraphs 170 and 178 of the NPPF.</p>	<p>requirements set out in the National Planning Policy Framework and accompanying guidance.</p> <p>The suggested text is added to Emerging Draft LPR Policy DM6, paragraph 11.62 of the Supporting Text in the first bullet point.</p>
<b>General consultation bodies</b>		
West Berkshire Green Exchange (lpr1560)	<p>Policy neither supported nor not supported.</p> <p>The Environment Agency informs us that water scarcity will be an increasing problem. Therefore, in the planning of housing development, water supplies need better consideration and techniques such as rainwater harvesting and grey water use should be implemented. We support the statement in paragraph 5b.</p>	Comments noted.
<b>Other stakeholders</b>		
Cllr Tony Vickers (lpr589)	<p>Policy is supported.</p> <p>Conservation of water resources is very important, as is the need to protect foul sewage treatment works from over-loading with surface water.</p>	Comments noted.
Sam Coppinger (lpr309)	Policy is supported.	Comment noted.
Camilla Kingham (lpr2155)	Policy neither supported nor not supported.	Note. Amend first sentence of Emerging Draft LPR paragraph 11.66 as follows – <i>‘Most of the water is abstracted from groundwater aquifers supported by some</i>

Respondent	Response	Council Response
	<p>In the supporting text to Policy SP6 Water Resources, you wrote "Most of the water is abstracted from groundwater aquifers supported by some river extraction, notably the Rivers Kennet, Lambourn and Pang." Please remember that Thames Water no longer abstracts from the Pang or its chalk aquifers having ceased abstraction in Compton some years ago. Whilst Thames Water has a drought permit to abstract in Pangbourne (<a href="https://www.thameswater.co.uk/media-library/home/about-us/regulation/drought-plan/appendices/drought-plan-appendix-b.pdf">https://www.thameswater.co.uk/media-library/home/about-us/regulation/drought-plan/appendices/drought-plan-appendix-b.pdf</a>) that is only for drought reasons. In no account must any developments cause day-to-day abstraction from the Pang, within the AONB, to be restarted.</p>	<p><i>river extraction, notably the Rivers Kennet and Lambourn and Pang.'</i></p>
<b>Landowners, site promoters and developers</b>		
<p>Lichfields for North East Thatcham Consortium (lpr2408)</p>	<p>We note the policy requires all residential developments to meet the Building Regulation optional higher water efficiency standard of 110 litres per person per day. Although this level of water consumption is an optional standard, the requirement is justified on the back of government guidance (unreferenced) that the Council has the option to set additional technical requirements in the Local Plan on exceeding the minimum standard required by the Building Regulations relating to water efficiency.</p> <p><b>Water Cycle Study Phase 1 – Scoping report</b></p> <p>This study assesses potential issues relating to future development on water supply, wastewater collection and treatment and water quality. The findings are presented on a site-by-site basis in Appendix A (Site Tracker). We note that there is a need to upgrade water treatment works to treat water flowing to NET as well as sewage treatment works that would need to be upgraded to treat sewage from NET. No indication is given as to whether there are plans to commit funding to upgrade these facilities in the AMP7 (2020-2025) period. This requires further investigation and will require consideration in any future viability works undertaken by the Council.</p>	<p>Comments noted, The Phase 1 Scoping Study provided an initial assessments of water resources and supply, wastewater network and treatment capacity, water quality, flood risk and odour for potential allocations. Following on from this a Phase 2 Study has been completed and updates each assessment based on updated growth forecasts. Potential allocation sites and wastewater treatment works likely to serve growth in the area were identified and were assessed to understand the additional wastewater flow resulting from the planned growth. Thames Water were consulted as part of this process and have identified where further modelling and/or upgrades to the network would be required in order to serve those sites.</p>

**Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)****Emerging Draft LPR Policy: DC7 Air Quality****(Proposed Submission LPR Policy: DM8 Air Quality)**

Respondent	Response	Council Response
Thatcham Town Council (lpr1415)	<p>Full representation relating to north east Thatcham strategic site allocation attached to representation on SP17. "Development will be permitted where it does not lead to adverse effects on health or the environment either from the development itself or cumulatively." We are very concerned that the AQMA on the A4 is not being regularly monitored, and that insufficient consideration is given to the emissions in the local environment. This is particularly important due to the vicinity of a primary school close to the A4 in Thatcham. We note that West Berkshire recognise Thatcham as an Air Quality Management Area and that the most recently referred to measurements on the website are from 2016 which states that "the annual mean NO2 concentration was exceeded at 2 sites within the Thatcham AQMA". We do not agree that the Sustainability Assessment had demonstrated evidence that the new Thatcham NE development passes the test outlined in (a), (b), or (c) as the cumulative effect to traffic on the A4 may lead to adverse health. It is clearly not appropriate to perform an AQA whilst vehicle traffic levels are suppressed during Covid, so we seek guidance on the approach that has been taken to monitor NOx and particulate levels during peak AM periods when children are more likely to be exposed to heavy traffic flow. For reasons outlined earlier we do not believe that a mitigation approach of diverting A4 traffic onto residential roads (Floral Way and then Bowling Green Road) would be credible or sustainable. Within Thatcham there is a recurring issue related to odour nuisance from the sewage works at Lower Way. We require that the policy reflect odour nuisance as a part of policy. Therefore, it is essential that evidence for Thatcham NE is provided that: Demonstrates the AQMA monitoring is recent and that future growth will not adversely affect air quality during any period from 2020 - 2037 within the Local Plan. It is essential that the policy reflects odour nuisance, and how this will be assessed.</p>	<p>Comments respecting the efficacy of monitoring methodology are noted, however the Council would like to direct the respondent to the West Berkshire Local Air Quality Management Annual Status Report 2021 which provides an overview of air quality in West Berkshire during 2020 to meet Part IV of the Environment Act (1995) and the relevant Policy and Technical Guidance documents. This Report is an annual report and previous versions are available on the Public Protection Partnership's website. This document sets out air quality monitoring data from 2016 to 2020 and demonstrates that the Thatcham AQMA is being regularly monitored and contains measures to improve air quality within the area including: Further development of A4 cycle route; Optimisation of traffic signal timings on A4; and On-street electric vehicle charge points.</p> <p>The LPR should be read as a whole and our approach with regard to odour is included in policies DM4 Environmental nuisance and pollution control, and DM30 Residential Amenity. The Council agrees that decisions should be based on accurate and up to date information and therefore the Council is updating and extending its air quality evidence base in regards to development proposals resulting from the LPR and in combination with other relevant strategies and plans.</p>
<b>General consultation bodies</b>

<b>Other stakeholders</b>		
Sam Coppinger (lpr310)	Support for the policy.	Support for the policy is noted.

Respondent	Response	Council Response
Alastair Jarman (lpr223)	<p>Support for the policy.</p> <p>I strongly believe in element e: it does not expose occupiers who are particularly sensitive to air pollution, such as those in schools, health care establishments or housing for older people; This aspiration is only any use if it is applied. There is now overwhelming evidence of the damage caused by fine particulate matter in sensitive receptors. It is responsible for over 30,000 deaths in the UK annually as well as non-lethal health issues which affect quality of life. "The World Health Organization acknowledges that current evidence suggests no safe level for PM2.5." Public Health England 11 th March 2019 <a href="https://www.gov.uk/government/news/public-health-england-publishes-air-pollution-evidence-review?fbclid=IwAR3pymcshBLAF0HWJAV7BXkOhIzJJolL8QwtuHKvG3fKdH8Tk4h4uYYWHjuY">https://www.gov.uk/government/news/public-health-england-publishes-air-pollution-evidence-review?fbclid=IwAR3pymcshBLAF0HWJAV7BXkOhIzJJolL8QwtuHKvG3fKdH8Tk4h4uYYWHjuY</a>. Now is our opportunity to create a clean air generation of children, by implementing interventions in a coordinated way. By making new developments clean by design we can create a better environment for everyone, especially our children. I note that in some environmental statements, PM created during construction phase is described as temporary and reversible, I disagree with how this is defined and considered. For example, if a child is exposed over a twenty-year construction phase to fine particulate matter, that child starting a school at early years could be exposed over their whole primary and secondary educational life through to sixth form. Once the construction is completed, the particulate matter produced by the construction phase will indeed cease, but importantly the effect on the child's lungs will be permanent.</p>	Comments noted.
Councillor Tony Vickers (lpr 593)	We support this policy. However we wish to see supporting text expanding on explaining the value of green infrastructure (e.g. green walls, certain tree species) which significantly mitigate the harm caused by particulates.	<p>Comments noted.</p> <p>Agree, supporting text will be expanded to include the following text:</p> <p><u>11.76. ... or well-designed green infrastructure can offer significant physical health benefits and equality via improved air quality, if planned and designed correctly, that is, with the right vegetation in the right place, by reducing the public's exposure to pollutants.</u></p>

Respondent	Response	Council Response
		The text will also be expanded to direct readers to other policies in the Local Plan which have regard to air quality or include mitigation which can improve air quality, such as SP10 Green Infrastructure.

Respondent (with lpr ref)	Response	Council Response
Historic England (lpr1584)	<p>Typographical: 'criteria'.</p> <p>We support criteria i-viii. However, a key component appears to be missing: what makes a particular conservation area special. This goes to the heart of conservation areas and the legislation under which they are created and managed. Normally, conservation area appraisals illuminate what is special about a conservation area. The lack of reference to specialness in this policy is perhaps related to another problem: the lack of conservation area appraisals. We discuss this in further depth below, but in terms of the policy wording, we would recommend that suitable references are added to refer to both specialness, and conservation area appraisals, in the main part of the policy text. The importance of specialness is recognised in the supporting text, though reference to the Listed Buildings and Conservation Areas Act (10.54): A Conservation Area is an area of special architectural or historic interest, the character or appearance of which it is desirable to preserve or enhance (Listed Building and Conservation Areas Act, 1990). The text continues (10.55) The special character and appearance of a Conservation Area can be derived from many different aspects including its physical features, spaces, landscape, views, the uses of an area, and the relationship between these elements. Other aspects of character may be more intangible perceptions of a place, such as historical or cultural associations with a place or building. Others may be relatively ephemeral or transitory, such as the smells and sounds associated with specific activities, which may occur only at certain times of the day or year. The above commentary highlights why it is important to clearly define what is special about a particular conservation area. Out of 53 conservation areas, only two have appraisals. This leads to uncertainty for applicants. In turn, this makes assessments of significance less likely to be adequate, placing a greater resource burden upon the council's conservation officers in the day-to-day development management of the area. Additionally, the absence of conservation area appraisals makes allocating sites within conservation areas or their settings more challenging, as, again, what is special about the conservation area needs to be determined without reference to an appraisal. The supporting text tacitly acknowledges this deficiency (10.56) in identifying work that is on-going, with the West Berks Heritage Forum and communities, to review existing conservation areas and adopt new ones. We welcome this work.</p>	<p>Comments noted.</p> <p>Typographical error will be corrected Add '<a href="#">special</a>' before 'character' in first and second paragraphs of policy</p> <p>The policy makes clear that proposals for development will be determined in accordance with Policy SP9. Policy SP9 already sets out the proposals should be informed by Conservation Area Appraisals (CAA).</p> <p>The Council recognises the importance of CAAs and is undertaking an active programme of CAAs as part of its strategy for the conservation and enjoyment of the historic environment. In 2019 funding was obtained to establish a prioritisation methodology to identify those Conservation Areas (CAs) within West Berkshire that are under the greatest level of pressure from development and which have been subject to the greatest level of change. A priority list of all CAs was drawn up which forms the basis for a proposed phased programme of reviews up to July 2026, subject to resources. Phase 1, which sets out the top ten CAs most in need of review, includes the larger and more complex areas. The CAA for Newbury town centre is due to be complete in 2023 and CAAs for Thatcham and Hungerford will follow. Monitoring of the CAA review programme will be undertaken through the Council's Annual Monitoring report (AMR).</p> <p>Amend para 10.55 as follows – 'The Council has a statutory duty to pay special attention to the desirability of preserving or enhancing the character and appearance of the District's 53 Conservation Areas. As part of this duty <a href="#">and as part of its strategy to maximise opportunities for the conservation and enjoyment of the</a></p>

Respondent (with lpr ref)	Response	Council Response
	<p>However, our view is that the plan should go further. It should set out defined goals in relation to conservation area appraisals that are clearly measurable. It is clear that conservation area appraisals are a component of the evidence on which the plan should be based. Their absence marks a flaw both in the plan's evidence base, and that an active programme of conservation area appraisals is part of the plan's obligation to set out a positive strategy for the conservation and enjoyment of the historic environment. Each of these aspects render the plan inconsistent with national policy, and the former also leaves it unjustified, and it is therefore considered unsound. To remedy this, we recommend the following. We recognise that the Council may not have the time or resources available to appraise the 51 outstanding conservation areas prior to plan submission (although, with dedicated resource, this level of output has been achieved elsewhere). However, we do not think it unreasonable for the Council to commit to at least five conservation area appraisals per year. With appropriate prioritisation of conservation areas more affected by development proposed in the plan, this rate would likely allow for those areas to have an appraisal adopted or at least drafted by the time the plan is submitted.</p>	<p><a href="#">historic environment</a> the Council is undertaking a project <a href="#">phased programme of Conservation Area Appraisals (CAAs)</a>, in partnership with the West Berkshire Heritage Forum <del>to encourage community involvement in their review and adoption of further Conservation Area Appraisals.</del> <a href="#">As well as helping to define what is special about a particular Conservation Area,</a> The project will provide local communities with an understanding of how and why Conservation Area status is appraised, designated, and applied in future development and conservation management decisions....'</p>
<b>General consultation bodies</b>		
West Berkshire Heritage Forum (lpr91)	<p>The means to assess the effect of a proposed development in a Conservation Area on its character, appearance, and significance should be provided by its Conservation Area Assessment.</p> <p>10.56 The Heritage Forum looks forward to being involved in CAAs via the Working Group. It is essential that the Local Plan includes target dates, broadly as agreed early in 2020, and sufficient resource to both prepare the CAAs and manage the process. Voluntary contributions will not cover either of these sufficiently, and a contribution will be needed from Planning Policy.</p> <p>10.60 We should not be afraid of approving repurposing of a heritage asset which provides that asset with viable long-term support, so long as its character and significance are conserved.</p>	<p>Comments noted</p> <p>The Council welcomes the involvement of the Heritage Forum and recognises the importance of CAAs as part of its strategy for the conservation and enjoyment of the historic environment. As the Heritage Forum has noted, a priority list of all CAs was drawn up which forms the basis for a proposed phased programme of reviews up to July 2026, subject to resources. Phase 1, which sets out the top ten CAs most in need of review, includes the larger and more complex areas.</p> <p>As a result of Council funding, the CAA for Newbury town centre is due to be complete by 2023 and CAAs for Thatcham and Hungerford will follow.</p>

Respondent (with lpr ref)	Response	Council Response
		Monitoring of the CAA review programme will be undertaken through the Council's Annual Monitoring report (AMR).
<b>Other stakeholders</b>		
Sam Coppinger (lpr311)	Supports the policy	Comments noted
Ian Parsons (lpr838)	Supports the policy. It would be good if areas that do have older buildings but which don't have Conservation status because of modern infill were to be considered anew, perhaps under some slightly different designation.	
Councillor Tony Vickers (lpr594)	We support this policy. However we would like to ensure that funding (CIL?) is available from all major developments in CAs or affecting the setting of a CA to help carry out CA assessments. This could be in a new paragraph of supporting text. See above. We are unsure what might be appropriate	Comments noted.  The Council recognises the importance of CAAs as part of its strategy for the conservation and enjoyment of the historic environment however CAAs are not able to be funded through strategic CIL funding.
<b>Landowners, site promoters and developers</b>		
Fowler Architecture and Planning (lpr1791)	Paragraph 16(f) of the NPPF confirms plans should serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area. Policy SP9 relates to the historic environment and provides an over-arching framework to consider development proposals. Proposed policies DC8, DC9, DC10, DC11, DC12 and DC13 do not serve a clear purpose and they run contrary to the NPPF at Section 16. It must not be the role of a development plan (as Policy DC8 does within criteria i to viii) to define and restrict new development affecting heritage assets. Instead, the NPPF is clear that in determining applications, local planning authorities should require an applicant to describe the significance of any heritage assets affected, including any contribution made by their setting. The level of detail should be proportionate to the assets importance and no more than is sufficient to understand the potential impact of the proposal on their significance. The understanding of significance, through	Comments noted.  The Council considers that a targeted DM policy is necessary to guide development, and to provide clear and transparent advice to developers and DM officers. It is noted that Historic England agrees with this approach.  The policy makes clear that proposals for development will be determined in accordance with Policy SP9. Policy SP9 makes clear that the historic character, sense of place, environmental quality and local distinctiveness will be sustained and enhanced through new development.

Respondent (with lpr ref)	Response	Council Response
	<p>the heritage statement (a requirement under Policy SP9), will itself determine how any heritage asset should be conserved in a manner appropriate to their significance. It is therefore unnecessary for a development management policy to define what may or may not be appropriate when considering change to a heritage asset and its significance.</p> <p>The reading of the criteria under Policy DC8 can only be interpreted in requiring only the preservation of character or appearance in the context of a conservation area. These leave no opportunity to (1) consider the desirability of new development making a positive contribution to local character and distinctiveness; and (2) looking for opportunities for new development within Conservation Areas, and within the setting of heritage assets, to enhance or better reveal their significance.</p> <p>In terms of the second limb of Policy DC8 concerning demolition, it should not necessarily follow that demolition of an element which makes a positive contribution to the significance of a conservation should be treated as substantial harm, as criteria (i) to (ii) infer. A balanced judgement must still be undertaken to identify the level of harm relative to the significance of the asset as a whole.</p> <p>The test under criterion (i) that all possible measures to sustain an existing use or find an alternative use have been explored and failed is ambiguous and provides no clear basis upon which such a test will be properly judged. Does this require marketing and for how long?</p> <p>The test under criterion (i) that “redevelopment bring substantial benefits goes beyond the basis outlined in Section 16 of the NPPF, which does not prescribe (as a starting point) the level of benefit sufficient to outweigh harm. The justification set out in criterion (iii), that demolition should be to remove an element that is unsightly or otherwise inappropriate, is overly restrictive. Removal of elements that offer no more than a neutral contribution to the significance any asset should not require further justification, all other things being equal.</p>	<p>This DM policy also seeks opportunities for development to enhance the character or appearance of a CA. The first paragraph of the policy states “Proposals for development in a Conservation Area, or for development that affects its setting or important views into, out of, across or through the area, will assess and clearly demonstrate how the character, appearance and significance of the Conservation Area will be preserved <b>or</b> enhanced”.</p> <p>It is agreed that criterion (i) of the Emerging Draft LPR is not necessary and could be removed.</p> <p>The second limb of the policy already refers to the demolition of the buildings, walls, structures that make a positive contribution to the character of the CA, therefore criterion (iii) will also be removed.</p>

## Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

### Emerging Draft LPR Policy: DC9 Listed Buildings

### (Proposed Submission LPR Policy: DM10 Listed Buildings)

Lambourn Neighbourhood Development Plan Steering Group (lpr1712)	The Lambourn NDP is mindful of the wealth of heritage assets in the Parish of Lambourn. The Steering Group will work closely with WBC to conserve and protect this legacy.	Comments noted
Shaw cum Donnington Parish Council (lpr229)	We support the policy	Comments noted

Respondent (with lpr ref)	Response	Council Response
Stratfield Mortimer Parish Council (lpr417)	We support this with reservations: While it is good to see a policy that addresses this issue, the wording is very vague and does not allow the success of this policy to be valued. In particular, simply saying 'development must have regard to' could be satisfied by a statement that a very small element has been taken into consideration. Strengthen the wording and make clear what is and is not acceptable.	Comments noted. The policy makes clear that proposals for development will be determined in accordance with Policy SP9. SP9 sets out the principle that development which would lead to substantial harm to, or loss of, the significance of a listed buildings or its setting will not be permitted. It also makes clear that development which would lead to less than substantial harm to the significance of a listed building or its setting will not be permitted, unless the harm is outweighed by the public benefits of the proposal. This DM policy sets out more detailed criteria that will be taken into account when determining individual proposals for development.
Historic England (lpr1585)	We welcome and support this policy. We consider the level of detail it includes to be appropriate and clear.	Comments noted
<b>General consultation bodies</b>		
West Berkshire Heritage Forum (lpr99)	Supports the policy	Comments noted
<b>Other stakeholders</b>		
David Hill (lpr718)	Policies surrounding Listed Buildings are out of date and often not conducive to good practice surrounding energy efficiency. The policy needs to be updated to be practical and reflect modern building standards and practices. Alterations to Listed buildings to facilitate improved energy efficiency should be approved provided that they can demonstrate that these changes will not substantially alter the appearance and character of a listed building.	Comments noted. The Council agrees proposals for energy saving measures should be designed with the knowledge and understanding of the building's significance and supports a holistic 'whole building' approach. This, as set out in the supporting text to the policy, helps to ensure that energy efficient measures are suitable, robust, well-integrated, properly coordinated and sustainable.
Councillor Tony Vickers (lpr595)	Supports the policy	Comments noted
<b>Landowners, site promoters and developers</b>		

Respondent (with lpr ref)	Response	Council Response
Fowler Architecture and Planning (lpr1792)	<p>Paragraph 16(f) of the NPPF confirms plans should serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area. Policy SP9 relates to the historic environment and provides an over-arching framework to consider development proposals. Proposed policies DC8, DC9, DC10, DC11, DC12 and DC13 do not serve a clear purpose and they run contrary to the NPPF at Section 16.</p> <p>It must not be the role of a development plan (as Policy DC9 does within 2nd section criteria i to viii) to define and restrict new development works affecting heritage assets. Instead, the NPPF is clear that in determining applications, local planning authorities should require an applicant to describe the significance of any heritage assets affected, including any contribution made by their setting. The level of detail should be proportionate to the assets importance and no more than is sufficient to understand the potential impact of the proposal on their significance. It is correct that harm to the significance of a listed building should be avoided, and harm to the significance of a heritage asset should require justification. It is not, however, reasonable to set out a policy seeking refusal of any applications that result in such harm. The NPPF sets out a clear decision making process for the weighing of harm to heritage assets against the benefits of a given proposal. The third paragraph of this policy, together with its three criteria, run in conflict with the NPPF. The understanding of significance, through the heritage statement (a requirement under Policy SP9), will itself determine how any heritage asset should be conserved in a manner appropriate to their significance. It is therefore unnecessary for a development management policy to define what may or may not be appropriate when considering change to a heritage asset and its significance.</p>	<p>Comments noted. The Council considers that a targeted DM policy is necessary to guide development, and to provide clear and transparent advice to developers and DM officers. It is noted that Historic England agrees with this approach.</p>

<b>General consultation bodies</b>		
British Horse Society (lpr857)	We are unsure if West Berks commons should be added to this policy or to DC11. We feel that West Berkshire commons are not recognised well enough in this Local Plan Review, possibly because they are not well recognised within the Council as a whole. Many, but not all, are registered and are protected by law, by Schemes of Management and via the Planning Inspectorate. Commons with Schemes of Management include Bucklebury, Padworth, Snelsmore, Wokefield made under the 1899 Commons Act. Greenham and Crookham Commons have their own Act of Parliament. Hungerford Common managed by the ancient Town & Manor of Hungerford. Smaller commons at Oare, East Ilsley, West Isley, Stroud Green. This is not a comprehensive list there may be more. All these commons have public access rights and are heavily used by the public for air & exercise as of right historically. Many of these commons have equestrian rights and are important as traffic-free areas for equestrians. Supporting text, Para 10.75: Add registered and non-registered commons to the list.	Comments noted.  Add another bullet point to Emerging Draft LPR para 10.75 to include <u>‘features on registered and non-registered common land, both those relating to its use by commoners and relict monuments that have survived due to lack of development’</u>

Respondent (with lpr ref)	Response	Council Response
Canal & River Trust (lpr888)	DC10 generally support this policy but seek clarification. Para 10.73 The canal should be considered as a non-designated heritage asset as well as some canal related structures also being listed as heritage assets in their own right. It is noted that the canal is not mentioned as a NDHA, nor were the Trust consulted when the list was revised.	Comments noted.  Add another bullet point to Emerging Draft LPR para 10.75 to include <u>'Built elements of the Kennet &amp; Avon Canal not already on the National Heritage List for England'</u>
Mid and West Berkshire Local Access Forum (lpr1886)	MWBLAF is unsure if West Berkshire commons should be added to this policy or to DC11. We feel that West Berkshire commons are not recognised well enough in this Local Plan Review, possibly because they are not well recognised within the Council as a whole. Many, but not all, are registered and are protected by law, by Schemes of Management and via the Planning Inspectorate. Commons with Schemes of Management made under the 1899 Commons Act include Bucklebury, Padworth, Snelsmore and Wokefield. Greenham and Crookham Commons have their own Act of Parliament. Hungerford Common is managed by the ancient Town & Manor of Hungerford. Smaller commons include Oare, East Ilsley, West Isley and Stroud Green. All of these commons have public access rights and are heavily used by the public for air & exercise as of right historically. The Forum recommends adding an extra bullet to paragraph 10.75: many of which might also be candidates for the Local List of Heritage Assets including: registered and non-registered commons	Comments noted.  See response to (lpr857 above)
West Berkshire Heritage Forum (lpr92)	10.75 The Heritage Forum supports these ambitious objectives, but we are presently limited by its voluntary nature. To advance, Councillors and officers could become more involved in proposing local listings, in research and information, in overcoming hesitations by owners, and especially in promoting the process across the District. The independent nature of the Selection Panel would facilitate this, and its meetings could without undue effort be doubled from the present one per year. Undesignated archaeology sites could be added to the target list. Larger and more complex sites such as the Second Battle will require particular support.	Comments noted
<b>Other stakeholders</b>		

Respondent (with lpr ref)	Response	Council Response
Sam Coppinger (lpr314)	Supports the policy	Comments noted
Councillor Tony Vickers (lpr599)	<p>We support this policy. However we wish to see clear recognition of the heritage value of many public rights of way. The rights of way network in England is a globally unique heritage of enormous historic and cultural value. Its value largely lies in its impact on the landscape and in West Berkshire we have a widespread and varied collection of historic routes. These can be degraded and their heritage value lost even without structures being destroyed. For example, the number of tree species in a hedge bordering a path and their existence alongside banks and/or ditches can be indications of the age and function of a route, even if the hedge or bank was not manmade: banks can result from geological processes where a hedge has existed for many centuries because it protected a route. A "landscape" consists of numerous features some of which may have heritage value and can be objectively described, whereas as a landscape in its entirety cannot. An ancient hedgerow may have archaeological origin - particularly if it forms the boundary of an ancient way. In 10.75 the bullet point "structures relating to transport routes" may include features that carry little evidence of being man-made structures but nevertheless have heritage value. Change "landscapes" in line 2 to "landscape features". Same in 10.72 &amp; 10.73 line 1. In 10.75, insert 'and other features' after 'structures' in the bullet point Structures relating to transport routes.</p>	<p>Comments noted</p> <p>The NPPF defines a heritage asset as 'a building, monument, site, place, area or landscape identified as having a degree of significance meriting consideration in planning decisions, because of its heritage interest.' This policy uses the same definition for consistency.</p> <p>Add another bullet point to Emerging Draft LPR para 10.75 to include <u>'structures and earthworks found along historic routeways'</u>.</p> <p>Add to the supporting text of Proposed Submission LPR Policy DM15 - <u>'West Berkshire District's trees, woodland and hedgerows are valued visual and ecological assets in our towns, villages and countryside, adding local character and distinctiveness to the landscape, streets, parks, gardens, public rights of way and other open spaces.'</u></p> <p>The list in para Emerging Draft LPR para 10.75 is not exhaustive.</p>

Archaeology Team West Berkshire Council (lpr781)	Policy is supported.	Comments noted
West Berkshire Council Ecologist (lpr1696)	Para 10.100 - The purpose of this Policy is to ensure the management, including conservation and enhancement, of existing trees, woodland and hedgerows, and to ensure that opportunities for restoration and new planting are realised. This policy does not prevent the appropriate management of trees, woodlands and hedgerow or removal of trees and hedges that are not in character with their locality <u>particularly if they are a non-native species of flora.</u>	Comments noted.  Amend the supporting text as follows: 'This policy does not prevent the appropriate management of trees, woodlands and hedgerow or removal of trees and hedges that are not in character with their locality <u>particularly if they are a non-native species of flora. For new planting the use of UK and Ireland sourced and grown tree stock is encouraged.</u> '
<b>Statutory consultees</b>		
Greenham Parish Council (lpr911)	Whilst the Council supports the planting of trees in the countryside, GPC would like to add that if it is proposed to carry out large scale tree planting within two expected tree heights of an existing development a planning application should be required.	Comments noted. It is not the intention of the policy to enable large scale planting. The large scale planting of trees is not a matter for planning legislation.
Holbrook Parish Council (lpr1326)	Policy DC14 is welcomed. In particular, 'the policy encourages new planting and protects trees, woodland and hedgerows because of their habitat value,	Comments noted.

Respondent (with lpr ref)	Response	Council Response
	important role in the mitigation and adaptation to climate change and the contribution to the amenity of a particular locality’.	
Hungerford Town Council (lpr160)	Strongly support for current visual / wildlife and carbon sequestration.	Comments noted.
Newbury Town Council (lpr2243)	<p>Include provision in this policy for large tree planting schemes in or near settlements to have prior planning permission. Reason: Large areas of new tree planting near to residential areas should require planning permission. They can cause harm to the amenity of nearby homes. Change proposed: Add to end of policy, in separate paragraph: “Whilst the Council supports the planting of trees in the countryside, which is normally not a matter for the LPA, large areas of tree planting can over time cause harm to the amenity of nearby residential properties. Therefore, schemes for more than [n] trees capable of reaching a height in excess of [m] metres may require planning consent if within a settlement area or if the nearest settlement boundary is within [x] metres of any part of the proposed planted area.</p>	<p>Comments noted. The suggested paragraph falls outside the scope of the Local Plan Review.</p>
Shaw-cum-Donnington Parish Council (lpr234)	We support the policy.	Comments noted.
Stratfield Mortimer Parish Council (lpr422)	<p>The policy should be to not plant trees of genus/species that are subject to fatal diseases and listed as such by the RHS and/or DEFRA. Also, tree genus and/or species should be chosen that have characteristics that are likely to be suitable for the consequences of climate change - heat and ability to absorb water and act as a flood defence.</p>	<p>Comments noted. Amend policy to include text as follows – <u>‘Where appropriate, suitable opportunities should be identified and incorporated for the restoration and planting of new trees, woodland and hedgerows. New planting should:</u></p> <ul style="list-style-type: none"> <li>• <u>Be suitable for the site conditions;</u></li> <li>• <u>Use appropriate tree pit sizes and soil volumes;</u></li> <li>• <u>Use native species whenever appropriate;</u></li> <li>• <u>Be informed by and contribute to local character;</u> <u>and</u></li> <li>• <u>enhance or create new habitat linkages.</u></li> </ul>

Respondent (with lpr ref)	Response	Council Response
		<p><u>To ensure the sustainable growth of restored or newly planted trees, development will be required to include appropriate measures to secure their long term maintenance.'</u></p> <p>Amend the supporting text as follows:            'The purpose of this Policy is to ensure the management, including conservation and enhancement, of existing trees, woodland and hedgerows, and to ensure that opportunities for restoration and new planting are realised <u>where appropriate. Development proposals will be considered in accordance with the latest guidance in British Standard BS5837 'Trees in relation to demolition, design and development.</u></p> <p>This policy does not prevent the appropriate management of trees, woodlands and hedgerow or removal of trees and hedges that are not in character with their locality particularly if they are a non-native species of flora. For new planting the use of UK and Ireland sourced and grown tree stock is encouraged <u>particularly if they are a non-native species of flora. For new planting the use of UK and Ireland sourced and grown tree stock is encouraged.'</u></p>
Thatcham Town Council (lpr1416)	<p><i>Full representation relating to north east Thatcham strategic site allocation attached to representation on SP17.</i></p> <p>'The policy encourages new planting and protects trees, woodland and hedgerows because of their habitat value' - We support the protection of trees, woodland and hedgerows. Historic hedgerows are of particular value in rural countryside areas surrounding NE Thatcham as they provide wildlife corridors between disjointed areas of remaining ancient woodland. It is important that such hedgerows are preserved.            'will be considered in accordance with policy DC12, for those within Registered Parks and Gardens, or policy DC11 for those forming part of</p>	<p>Comments noted.</p> <p>The cross references to other policies will be corrected.</p> <p>Some of the comments relate specifically to Policy SP17 and so will be considered as part of the Council's response under that policy.</p> <p>Amend the supporting text to include the following paragraphs as follows –</p>

Respondent (with lpr ref)	Response	Council Response
	<p>non-designated heritage assets.’ It is unclear to us whether these cross references are correct as DC 12 refers to registered battlefields, and DC 11 refers to registered parks and gardens.</p> <p>‘Loss or damage of non-protected trees, woodland or hedgerows should be avoided, and if demonstrated as being unavoidable, appropriate replacement or compensation including aftercare will be required.’ - It is unclear what period of after care is required. The replacement of ancient, or mature, hedgerows with replacement requires a maintenance contract for many decades.</p> <p>It is necessary that the references to other policies is corrected.</p> <p>It is essential that this policy reads through to the Stage 3 Strategic Plan for Thatcham and mature hedgerows are preserved.</p> <p>It is necessary to define the period of aftercare and that supporting text describes the type of maintenance required.</p>	<p><u>‘The protection of existing trees, woodland and hedgerows and the addition of new planting contributes greatly to conserving and enhancing the local character of an area. Boundary treatments are particularly important and the character of an area can easily be lost if front gardens or boundary hedgerows are removed. There is evidence in both rural and urban areas of the district of long established boundary hedgerows being ripped out and replaced by close boarded fencing or walls. A proportion of these result in retrospective applications to retain fences or walls in excess of 1 metre next to highways. Where planning applications are required to propose new boundary treatments or retrospective applications are required to regularise works already undertaken and it is clear that an established hedgerow will or has been removed, the Council will require sufficient space to be left to allow for the retention of an existing hedge or planting of a new one to replace the one that has been removed.</u></p> <p><u>The retention of existing trees and hedgerows within new gardens adds a sense of establishment and maturity to any new development. New planting can also add value, with the use of dwarfing rootstocks a way of accommodating trees in smaller gardens.’</u></p> <p>The Environment Act establishes that long term maintenance is considered to be 30 years.</p>
Historic England (lpr1590)	We welcome and support this policy. We consider the level of detail it includes to be appropriate and clear.	Comments noted
<b>General consultation bodies</b>

		<p>This policy does not prevent the appropriate management of trees, woodlands and hedgerow or removal of trees and hedges that are not in character with their locality particularly if they are a non-native species of flora.</p> <p>For new planting the use of UK and Ireland sourced and grown tree stock is encouraged <u>particularly if they are a non-native species of flora. For new planting the use of UK and Ireland sourced and grown tree stock is encouraged.</u></p>
Alastair Jarman (lpr721)	<p>Policy not supported. I believe there is a general weakness in DC14 in that it lacks an advisory framework or guidance of sufficient breadth and weight to fulfil its role. Whilst other plan elements hint at aspects of the NPPF and other regulatory requirements regarding landscape and the natural environment, I feel that a policy with woodlands, trees and hedgerows as its heading should be the primary reference.</p> <p>By comparison, Basingstoke and Deane, who share their southern border with West Berkshire and therefore have to work together on cross border planning and development issues, support their local plan with a Landscape, Biodiversity and Trees Supplementary Planning Document 2018. This document is not site specific but is guidance that can be used in advance of site selection and planning to inform early decision making and help avoid monetary or environmental costs later in a project that could have been avoided. <a href="https://www.basingstoke.gov.uk/content/page/59292/Landscape,%20Biodiversity%20and%20Trees%20SPD.pdf">https://www.basingstoke.gov.uk/content/page/59292/Landscape,%20Biodiversity%20and%20Trees%20SPD.pdf</a></p> <p>It states in its introduction.</p> <p>“1.1 This Supplementary Planning Document (SPD) has been produced to expand upon the natural environment policies in the Basingstoke and Deane Local Plan (2011- 2029). It addresses how landscape, biodiversity, and tree considerations should inform new development to deliver high quality, sustainable places to live, that enhance biodiversity and support healthy lifestyles.”</p> <p>I would like to see either stronger wording and guidance within this policy, or reference made to a Supplementary Planning Document relating specifically to trees, woodland and hedgerows that would contain guidance and policy reflecting the same principles as adjoining local authorities. I believe this also assist on sites with cross boundary issues.</p>	<p>Comments are noted.</p> <p>The LPR and Basingstoke and Deane Local Plan approach this topic differently; the latter containing more general policies covering the natural environment rather than a specific policy on trees, woodland and hedgerows. At this stage the Council believes the policy should be effective without the need for further detailed guidance in a specific Supplementary Planning Document. The Council will be producing further local design guidance in accordance with the NPPF and it is anticipated that this issue will be covered in that way. Should the situation change once the LPR is adopted however, and further specific guidance prove to be necessary then the Council will act accordingly.</p> <p>The cross references to other policies and any presentational anomalies will be corrected.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>OBSERVATION. I note this policy is simply listed in the left-hand selection pane as CS14, it is missing its described title, unlike other policies. It makes it feel like an afterthought and harder to find.</p> <p>“1.6 The SPD explains how landscape, biodiversity and tree considerations should be integrated into the development process from the outset, to ensure that legislation and Local Plan policy requirements are met and best practice standards are achieved. It expands upon the policies in the Local Plan and details the council’s requirements for new development that must be met to achieve planning permission. Where development does not accord with the guidance set out in this document it may be refused.”</p>	
Alastair Jarman (lpr363)	<p>I agree with this policy, which makes mention of the NPPF 2019, but paragraph 170 of this new policy now has stronger protection for sites of biodiversity value and a requirement that wherever possible development should help improve local environmental conditions. There has also been a shift from minimising impacts on biodiversity and geodiversity to protection and enhancement. Paragraph 175 c) has introduced stronger protection for irreplaceable habitats (including ancient woodlands and veteran trees) where any development should be refused unless there are wholly exceptional reasons. Footnote 58 introduces a public benefit test with specific examples including nationally significant infrastructure projects, Transport and Works Act Orders and hybrid bills.</p> <p>I do not feel the meaning of "exceptional reasons" when considering ancient woodland regarding para 175 c of NPPF 2019 is being correctly applied in all cases. I would consider something like the HS2 or the Channel Tunnel would meet this description, even the Newbury Bypass, which became part of the national strategic road network and removed traffic from the centre of Newbury, albeit temporarily, would also meet this test. I do not believe local housing sites which are commonplace and bring further pressures not only to the ancient woodland, its ecology and habitat, but also the roads and residents across all of Newbury and beyond fit the definition of exceptional. Mitigations for loss or deterioration should only be considered once this first test of exceptional circumstances has been proven. Ancient woodland, ancient trees and veteran trees are irreplaceable and consequently, compensation measures should not consider as part of the assessment of the merits against any development proposal.</p>	<p>Comments noted.</p> <p>The NPPF has been updated since the representation was made and this is reflected in policy SP11 which sets out the Council’s approach to biodiversity and geodiversity. This policy should be read alongside that policy.</p> <p>Amend the end of the 3<sup>rd</sup> paragraph of the policy as follows – <u>‘Ancient woodland, ancient and veteran trees are irreplaceable habitats. Development resulting in their loss or deterioration of ancient woodland or veteran trees which are irreplaceable will be considered in accordance with Policy SP11. be refused unless it accords with the exceptional reasons identified within the National Planning Policy Framework. If exceptional reasons are justified a suitable compensation including its delivery and ongoing upkeep will need to be secured. The scale and quality of the compensation measures required will be commensurate to the loss or deterioration of the irreplaceable habitat.’</u></p> <p>Amend the 5<sup>th</sup> paragraph of the supporting text as follows - <u>‘Development should buffer any ancient woodland, ancient and veteran trees it affects by providing sufficient space to afford surrounding protection and allow</u></p>

Respondent (with lpr ref)	Response	Council Response
	<p>I note a lack of consistency regarding ancient woodland buffers. These include, provide a 15m buffer, buffers of at least 15m, one makes no mention of buffer distance, one mentions TPO woodland and one site with many TPO woodlands makes no mention of them or buffer distance. It is important to note but not properly explained policy, that for ancient woodlands, you should have a buffer zone of at least 15 metres to avoid root damage, which is classed as direct impact. Where assessments show other impacts may extend beyond this distance, you are likely to need a larger buffer zone. For example, the effect of air pollution from development that results in a significant increase in traffic. It is therefore not appropriate to dictate a direct impact buffer of 15m in the local plan without clarifying that further details and surveys need to be produced to inform the actual buffer dimensions required. It is welcomed that ancient woodland is identified within each development area, but the wording should be similar in effect to, “A minimum of 15m for root protection and other direct impacts must be maintained, additional distance may be required to prevent deterioration from indirect impacts.”</p> <ol style="list-style-type: none"> <li>1. RSA 6 - Appropriate buffers of at least 15 metres between the development and the areas of ancient woodland.</li> <li>2. RSA 10 - Provide a 15m buffer to ancient woodland.</li> <li>3. RSA 18 - Ensure a 15m buffer to ancient woodland and retain existing woodland on the site.</li> <li>4. RSA 26 - Provide a buffer of 15 metres to the areas of ancient woodland to the west of the site and provide appropriate buffers to the rest of the TPO woodland.</li> <li>5. RSA 20 Detailed policy criteria will be developed to highlight specific mitigation measures and infrastructure requirements that will include amongst others, the need for a buffer between the developable area and the ancient woodland and Local Wildlife Site which adjoin the site to the west.</li> <li>6. SP16 - conserve the areas of ancient woodland and provide appropriate buffers between the development and the ancient woodland; mitigate the increased recreational pressure on nearby sensitive wildlife sites, secure strategic biodiversity enhancements.</li> </ol>	<p>for future growth and expansion where possible. <u>Development near ancient woodland will be treated in accordance with the most up to date joint Natural England and Forestry Commission Standing Advice. This currently advises that development proposals should have a buffer zone of at least 15 metres from the boundary of the woodland to avoid root damage. For ancient and veteran trees the buffer zone should be at least 15 times larger than the diameter of the tree. The buffer zone should be 5 metres from the edge of the tree’s canopy if that area is larger than 15 times the tree’s diameter. Precise buffers would need to be determined through detailed assessment and design when proposals are submitted for development. The Council will adopt a precautionary approach as to what would be considered appropriate in order to ensure that any buffer fulfils the specific requirements of its location and the type of development proposed.</u></p> <p><u>It is important that a buffer zone consists of semi-natural habitats such as woodland and/or a mix of scrub, grassland, heathland and wetland. Development proposals, including gardens would not be appropriate. Sustainable drainage schemes would only be considered acceptable if they did not affect root protection areas and any changes to the water table did not negatively affect ancient woodland or ancient and veteran trees. The Woodland Trust <a href="http://woodlandtrust.org.uk">planners-manual-for-ancient-woodland.pdf (woodlandtrust.org.uk)</a> highlights the importance of protecting and enhancing natural habitats around ancient woodland in order to help reverse the historic fragmentation of this irreplaceable habitat and to improve ecological connectivity with the surrounding landscape.’</u></p> <p>By definition “wholly exceptional circumstances” is subject to exceptional consideration and does not fall within a set</p>

Respondent (with lpr ref)	Response	Council Response
	<p>In a recent response to a planning refusal for 20/01238/OUTMAJ the case officer stated: “5.16 Ancient Woodland. The Applicants’ plans and documentation refer to a 15m buffer between built development and the Ancient Woodlands, consistent with the SPD. The intended design approach for the buffer is also shown in the Design and Access Statement, again reflecting the principles in the SPD.</p> <p>5.17 A planning condition could be drafted to specify (1) that each buffer should be not less than 15m in width, (2) the measure for calculating this, and (3) the uses that would be permissible within the buffer zone. Such a planning condition would control the reserved matters applications and the various schemes which are proposed in relation to landscape and ecological management and the design of the Country Park.</p> <p>7.5 Ancient Woodland. See para 5.16 and 5.17 for comments regarding the definition of the Buffer and how this would inform the reserved matters stage. Whilst the existing sports facilities at Park House School do have lighting, the Park House School Feasibility Study prepared by the Applicants does not include lighting of the new playing field and hence it was not considered in the lighting assessment (the earlier Park House School Study prepared by Corde on behalf of the Council did not specify lighting).”</p> <p>I believe these 3 statements within the 238-page response provide evidence that non-direct impacts are not being given sufficient consideration by developers. Firstly, they show a failure to recognise that this minimum buffer is solely for direct impacts on root protection and yet are already indicating activity within the buffer. Secondly the fact that lighting is not being considered shows a lack of consideration of non-direct impacts.</p> <ul style="list-style-type: none"> <li>○ Greater guidance should be given on what is “exceptional”. I have read many inspector reports where the Local Authorities understanding of exceptional is not shared with inspectors. Para 175 C cannot be applied correctly if “exceptional” holds different means for different people with differing agendas.</li> <li>○ Greater emphasis and clarity on direct impact and non-direct impact regarding buffers. If this aspect were better communicated in the policy it would inform not only the housing site allocation selection, but hopefully</li> </ul>	<p>of ‘rules’. The outcome is informed by individual assessment and the judgement applied to planning decisions taking account of all relevant matters in each case. Compensation will only be taken into account once the test of wholly exceptional circumstances is satisfied.</p> <p>The lack of consistency regarding ancient woodland buffers relating to individual site allocation policies will be considered further under each of the relevant RSA policies. Depending on the individual site circumstances, each policy will contain the following text - <u>‘There will be an appropriate buffer of at least 15 metres between the development and ancient woodland. The precise buffer will be determined through detailed assessment and design when proposals are submitted for development.’</u></p> <p>The cross references to other policies will be corrected.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>land use within the site when initial plans are being discussed or submitted.</p> <ul style="list-style-type: none"> <li>○ Housing numbers must not be the driver for designs around any irreplaceable habitats, the drivers must be stopping degradation of irreplaceable habitats which should then inform the level of housing, site use, layout, design, and financial viability in advance of applications.</li> <li>○ OBSERVATION “historic parks and gardens will be considered in accordance with policy DC12, for those within Registered Parks and Gardens, or policy DC11 for those forming part of non-designated heritage assets.” - Note, these references are incorrect.</li> </ul>	
Ian Parsons (lpr841)	Is it feasible to increase the significance of hedgerows in planning applications, and also to protect them in the same way that trees are protected?	<p>Comments noted. That is the intention of the policy.</p> <p>Amend the supporting text to include the following paragraphs –</p> <p><u>The protection of existing trees, woodland and hedgerows and the addition of new planting contributes greatly to conserving and enhancing the local character of an area. Boundary treatments are particularly important and the character of an area can easily be lost if front gardens or boundary hedgerows are removed. There is evidence in both rural and urban areas of the district of long established boundary hedgerows being ripped out and replaced by close boarded fencing or walls. A proportion of these result in retrospective applications to retain fences or walls in excess of 1 metre next to highways. Where planning applications are required to propose new boundary treatments or retrospective applications are required to regularise works already undertaken and it is clear that an established hedgerow will or has been removed, the Council will require sufficient space to be left to allow for the retention of an existing hedge or planting of a new one to replace the one that has been removed.</u></p> <p>The retention of existing trees and hedgerows within new gardens adds a sense of establishment and maturity to any</p>

Respondent (with lpr ref)	Response	Council Response
		new development. <u>New planting can also add value, with the use of dwarfing rootstocks a way of accommodating trees in smaller gardens.'</u>
Nataliya Topliss (lpr816)	<p>The developments always result in mature trees being cut down. The council approve planning permission where little space left for any landscaping. All mature trees get cut down by the developers or the new residents as they have no space left near their property by excessive development. The policy DC14 does not work.</p> <p>I believe that the policy DC14 does not work as the council issues the policy and do follow its terms. The council always allow the developers to destroy mature trees, woodlands and hedgerows. We, the residents, have all witnessed this in Thatcham area.</p>	<p>Comments noted.</p> <p>Whilst not accepting the premise, it should be noted that this is a new policy to the Local Plan and reflects the importance to which the Council is giving trees, woodland and hedgerows in the District.</p>
Councillor Tony Vickers (lpr605)	<p>We support this policy. However we wish to include provision for large tree planting schemes in or near settlements to have prior planning permission. Large areas of new tree planting near to residential areas can cause harm to the amenity of nearby homes.</p> <p>Add to end of policy, in separate paragraph:          "Whilst the Council supports the planting of trees in the countryside, which is normally not a matter for the LPA, large areas of tree planting can over time cause harm to the amenity of nearby residential properties. Therefore schemes for more than [n] trees capable of reaching a height in excess of [m] metres may require planning consent if within a settlement area or if the nearest settlement boundary is within [x] metres of any part of the proposed planted area.          A Tree Officer should advise on the appropriate number dimensions.</p>	<p>Comments noted.</p> <p>The suggested paragraph falls outside the scope of the Local Plan Review.</p>
<b>Landowners, site promoters and developers</b>		
Lichfields for North East Thatcham Consortium (lpr2409)	The North East Thatcham site includes tree and hedgerow coverage and abuts woodland in multiple locations. Whilst every effort will be made to conserve and enhance these features in situ through a landscape led masterplan, if there is need for any losses we recognise that the policy	Comments noted

Respondent (with lpr ref)	Response	Council Response
	allows for appropriate replacement or compensation for non-protected features.	
LRM Planning for Bloor Homes and Sandford Farm (lpr2176)	<p>Paragraph 3 of this policy concerns ancient woodland and veteran trees, indicating that the loss or deterioration of such features would only be permissible where it accords with the exceptional circumstances identified within the NPPF. Footnote 58 of the NPPF refers to exceptional circumstances but this is prefaced by "for example". These examples are not therefore exhaustive, requiring each situation to be considered on the basis of its individual circumstances. As presently drafted, this Policy appears to prohibit this interpretation and should be recast accordingly.</p> <p>Moreover, this policy seeks to retain or prevent damage to non-protected trees, woodland and hedgerows. Whilst the arboricultural resource is important to the natural environment, there are instances where the value of such existing features is especially limited (low value category) and do not warrant retention as a matter of principle. Equally there may be features which, if required to be retained, could preclude design benefits or advantages from being achieved that would contribute to other policy objectives. In this context design considerations need to be assessed in the round.</p>	<p>Comments noted.</p> <p>Amend the policy as follows – '<u>Ancient woodland, ancient and veteran trees are irreplaceable habitats. Development resulting in their loss or deterioration of ancient woodland or veteran trees which are irreplaceable will be considered in accordance with Policy SP11. be refused unless it accords with the exceptional reasons identified within the National Planning Policy Framework. If exceptional reasons are justified a suitable compensation including its delivery and ongoing upkeep will need to be secured. The scale and quality of the compensation measures required will be commensurate to the loss or deterioration of the irreplaceable habitat.</u>'</p> <p>Amend the 5<sup>th</sup> paragraph of the supporting text as follows - '<u>Development should buffer any ancient woodland, ancient and veteran trees it affects by providing sufficient space to afford surrounding protection and allow for future growth and expansion where possible. Development near ancient woodland will be treated in accordance with the most up to date joint Natural England and Forestry Commission Standing Advice. This currently advises that development proposals should have a buffer zone of at least 15 metres from the boundary of the woodland to avoid root damage. For ancient and veteran trees the buffer zone should be at least 15 times larger than the diameter of the tree. The buffer zone should be 5 metres from the edge of the tree's canopy if that area is larger than 15 times the tree's diameter. Precise buffers would need to be determined through detailed assessment and design when proposals are submitted for development. The Council will adopt a precautionary</u></p>

Respondent (with lpr ref)	Response	Council Response
		<p><u>approach as to what would be considered appropriate in order to ensure that any buffer fulfils the specific requirements of its location and the type of development proposed.</u></p> <p><u>It is important that a buffer zone consists of semi-natural habitats such as woodland and/or a mix of scrub, grassland, heathland and wetland. Development proposals, including gardens would not be appropriate. Sustainable drainage schemes would only be considered acceptable if they did not affect root protection areas and any changes to the water table did not negatively affect ancient woodland or ancient and veteran trees. The Woodland Trust <a href="http://woodlandtrust.org.uk">planners-manual-for-ancient-woodland.pdf (woodlandtrust.org.uk)</a> highlights the importance of protecting and enhancing natural habitats around ancient woodland in order to help reverse the historic fragmentation of this irreplaceable habitat and to improve ecological connectivity with the surrounding landscape.'</u></p> <p><u>Amend the policy as follows – 'Development proposals will be expected to clearly demonstrate that wherever possible opportunities have been taken for the restoration, enhancement and/or planting of existing trees, woodland and hedgerows and where identified that they have been incorporated into the design and layout of a scheme from the outset. Where this cannot be achieved the onus is on the applicant to justify the loss of trees and/or other features as part of the proposals. The planting of native species will be favoured. Any invasive species on site will be removed.'</u></p>
Pegasus Group for Donnington New Homes (lpr1949)	Objection is raised to this policy as drafted. This Policy is too restrictive in only allowing protected trees to be removed in "exceptional circumstances". It should be amended to allow for the removal of trees where it can be demonstrated that the removal of trees is a) appropriate in the context of a wider development, b) trees proposed for removal are coming to the end of	<p>Comments noted.</p> <p>The premise of the policy is to retain protected trees for that reason, and not to consider them at the outset as a tradeable natural asset.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>their life, and / or c) it can be demonstrated that appropriate, replacement trees can be provided as part of a wider landscaping scheme. The Policy needs to be broadened to allow for the aforementioned eventualities and the following text is suggested as appropriate: '...circumstances where it can be satisfactorily justified and demonstrated that a tree stock of future equivalent type or quality can be incorporated into a development' or similar.</p>	<p>Amend the policy as follows – ‘Development proposals will <u>be expected to clearly demonstrate that wherever possible opportunities have been taken for the restoration, enhancement and/or planting of existing trees, woodland and hedgerows and where identified that they have been incorporated into the design and layout of a scheme from the outset. Where this cannot be achieved the onus is on the applicant to justify the loss of trees and/or other features as part of the proposals. The planting of native species will be favoured. Any invasive species on site will be removed.</u>’</p> <p>The <del>removal of other</del> <u>loss or deterioration</u> of protected trees, groups of trees, woodland or important hedgerows will only be permitted in exceptional circumstances and in accordance with the relevant legislation, policy and good practice recommendations....’</p>

## Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

### Emerging Draft LPR Policy: DC15 Entry level exception schemes

#### (Proposed Submission LPR Policy: DM16 First Homes exception sites)

Councillor Tony Vickers (lpr606)	Do you agree with the proposed policy? Yes	Support noted
<b>Landowners, site promoters and developers</b>		
Savills on behalf of Englefield Estate Office (lpr1537)	<p>The Annual Monitoring Report 2019 (January 2021) notes the higher than average house prices in the district and thereby emphasises the need for additional affordable housing, particularly for young people and key workers (AMR paragraph 1.11, page 38). Accordingly, it is important that measures are taken to address this need. The general approach of draft LPR Policies DC15 and DC16, to allow entry level exception schemes and rural exception schemes adjacent to settlement boundaries, is therefore supported. This approach will also help to meet rural housing needs and enhance the vitality of rural communities in the district, in line with NPPF paragraph 78, and therefore it is important that a positive approach is taken to considering such schemes.</p> <p>In light of the important contribution that these schemes can make to meeting affordable housing needs and benefiting rural communities, it is considered that draft LPR Policy DC15 should include some allowance for a</p>	<p>Comments noted</p> <p>The policy will be amended. National policy in the recent PPPG and the Written Ministerial Statement on First Homes are now clear that these sites can include a small proportion of market housing if this is considered essential to enable the delivery of First Homes without grant funding. The third bullet point criteria (c) in the Policy, and the supporting text have therefore been amended to reflect this.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>proportion of enabling market housing on entry-level exception schemes where appropriate, as per the approach to rural exception schemes in draft LPR Policy DC16.</p> <p>Draft LPR Policy DC16 and the supporting text set out the requirement for rural exception schemes to meet local housing needs, identified through a local needs survey. Whilst acceptable in theory, there may be additional ways in which local housing need can be demonstrated and the policy would benefit from setting out additional guidance on what evidence should support planning applications. Our experience to date is that the lack of clarity and consistency, as well as onerous expectations relating to housing needs surveys, has been a disincentive to landowners to release otherwise appropriate sites for this type of development. It is also considered that draft LPR Policy DC16 also includes some unnecessary repetition, regarding the need to consider local character and the AONB, which is covered by other LPR policies.</p>	<p>Comments in relation to DC16 (Rural Exception Housing) are considered as part of the Council's response to comments made under that policy.</p>
Sovereign Housing Association Ltd. (lpr2166)	<p>To ensure that the properties remain affordable for future residents suggests a restriction on staircasing, and an implementation of a DPA and threshold on equity for purchasers in these sites? If so, we would want to discuss this in greater detail as this is likely to have an impact on demand and the viability of a site.</p>	<p>Comments noted. Since the draft policy was consulted on, new national policy has been published (Written Ministerial Statement on First Homes) which replaces paragraph 72 of the National Planning Policy Framework. Entry-level exception sites have therefore been replaced with First Homes exception sites. Also New PPG on First Homes has also been published with further guidance on First Homes exception sites.</p> <p>The Council's Executive on the 9<sup>th</sup> June 2022 approved a First Homes Policy Position.</p> <p>West Berkshire Council will assess applications from potential buyers to check they meet the eligibility criteria in the Policy. As well as the national criteria the approved policy position also sets a local connection criteria to ensure that local people in need of affordable housing would be given priority access to First Homes.</p> <p>This includes on First Homes exception sites.</p>
Fowler Architecture & Planning Ltd.	<p>Paragraph 71 of the NPPF does not limit the type of settlement where an entry-level exception can be proposed, except that they should not be</p>	<p>Comments noted. However national policy Written Ministerial Statement on First Homes, and PPG requires</p>

Respondent (with lpr ref)	Response	Council Response
(lpr1797)	<p>permitted within AONBs (as relevant to West Berkshire). The policy unduly restricts the location of entry level exception sites to existing settlements with a settlement boundary. This stipulation must be removed and instead amended to confirm such sites are feasible at all settlements in the spatial areas of Newbury / Thatcham and the Eastern Area.</p> <p>Bullet points 4 and 6 restrict entry level exception sites to local needs. Again, this is inconsistent with the NPPF that confirms the purpose of this policy relate to needs within the local authority's area. While schemes may also be driven by local needs, the strategic District need cannot be ignored and bullet points 4 and 6 should be revised to reflect this – or 'Local' should be defined as the 'District'.</p> <p>While the NPPF envisages provisions should be in place to ensure housing remains at a discount for future eligible households, the blanket approach to remove permitted development rights is unjustified. The Planning Practice Guidance states that the 'blanket removal of freedoms to carry out small scale domestic and non-domestic alterations that would otherwise not require an application for planning permission are unlikely to meet the tests of reasonableness and necessity'.</p>	<p>First Home exception sites to be located adjacent to existing settlements and to be proportionate in size to the scale of those existing settlements.</p> <p>The Written Ministerial Statement and PPG on First Homes also clearly state that First Homes exception sites cannot come forward in areas designated as Green Belt, within the Broads Authority, or in designated rural areas as defined in Annex 2 of the National Planning Policy Framework. In these areas rural exception sites are the sole permissible type of exception site.</p> <p>The designated rural areas as defined in the NPPF, includes National Parks and Areas of Outstanding Natural Beauty and areas designated as 'rural' under Section 157 of the Housing Act 1985 where rural exception sites will remain as the sole exception site which can come forward.</p> <p>In West Berkshire most the parish council areas fall within the AONB or are designated rural areas. However, the Newbury and Thatcham parish council areas do not fall within the AONB and are not designated rural areas, First Home exception sites can therefore come forward in Newbury and Thatcham parish council areas, and other non-designated parishes in the Eastern Area.</p> <p>National policy (the Written Ministerial Statement on First Homes) allows local authorities to set local connection criteria. The Council's adopted First Homes Policy Position requires the assessment of applications from potential buyers to check they meet the eligibility criteria in the Policy. The approved Policy sets a local connection criteria to ensure that local people in need of affordable housing would be given priority access to First Homes</p>

Respondent (with lpr ref)	Response	Council Response
		<p>The part of the policy referring to the removal of permitted development rights has been deleted in response to comments.</p> <p>In light of the above the policy has been revised to reflect the latest in National policy and guidance.</p>
Rural Solutions (lpr2304)	Policy DC15 has restricted the Entry Level Housing Schemes to the spatial area of Newbury/Thatcham and Eastern Area. This limited the potential delivery of this type of affordable housing tenure.	<p>Considered and noted, however national policy (the Written Ministerial Statement on First Homes requires First Home exception sites to be located adjacent to existing settlements and to be proportionate in size to the scale of those existing settlements.</p> <p>The Written Ministerial Statement and PPG on First Homes also clearly state that First Homes exception sites cannot come forward in areas designated as Green Belt, within the Broads Authority, or in designated rural areas as defined in Annex 2 of the National Planning Policy Framework. In these areas rural exception sites are the sole permissible type of exception site.</p> <p>The designated rural areas as defined in the NPPF, includes National Parks and Areas of Outstanding Natural Beauty and areas designated as 'rural' under Section 157 of the Housing Act 1985 where rural exception sites will remain as the sole exception site which can come forward.</p>

It is expected that....'</del></p>
Sovereign Housing Association Ltd. (lpr2167)	<p>As we are seeking to create balanced communities with a mix of tenures, the likelihood of DPA's in rural areas may limit the desirability &amp; lending criteria for shared owners. As supported by paragraph 77 of the NPPF, in order to support viability and achieve a mix of tenures we would welcome the opportunity to include some homes for open market sale (considered on a case by case basis), as this will offer another option to local residents and help achieve the balance that we seek.</p> <p>We'd welcome an opportunity to become involved earlier in the engagement process to help shape the communities.</p>	Comments noted
Rural Solutions (Karine Giannamore) (lpr2303)	Policy DC16 does allow an element of market housing provision to facilitate the delivery of an affordable housing scheme, however, this should form part of the policy more, rather than rely on the supporting text.	Comments noted, however, the main body of Emerging Draft LPR Policy DC16 (not just the supporting text) does allow for a proportion of market housing where this enables the closing of a funding gap (and this must be evidenced) and where the market homes are integrated with the affordable homes to form a single scheme.

**Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)****Emerging Draft LPR Policy: DC17 Self and custom build housing****(Proposed Submission LPR Policy: DM18 Self and custom build housing)**

<b>Internal</b>		
<b>Statutory consultees</b>		
Hungerford Town Council (lpr162)	Self-build homes often bring greater design innovation and self-builder occupant's interest in on-going running (eg heating) costs rather than commercial builder focus primarily on construction costs.	Comments noted
Shaw-cum-Donnington Parish Council (lpr 237)	We support the policy.	Comment noted
Newbury Town Council (lpr2240)	We strongly support this policy.  Reason: see SP 18. Quality of housing is generally higher when designed and built for an end user. We would like to see more publicity given to the policy, because surveys by the national association for self- and custom-built housing show that few people know about these as a separate category and it should be actively promoted.	Comments noted

Respondent (with lpr ref)	Response	Council Response
Stratfield Mortimer Parish Council (lpr425)	Do you agree with the proposed policy? Yes	Comment noted
Greenham Parish Council (lpr915)	Do you agree with the proposed policy? Yes	Comment noted
<b>General consultation bodies</b>		
West Berkshire Green Exchange (lpr1561)	Provision should be made for the sale of a number of serviced plots at a reasonable price on sites of over 30 houses for self build homes. There is a large demand for this but because the major builders monopolise the land supply locally it is very difficult if not impossible for people to purchase a suitable plot. These self build houses often show a quality that is sadly lacking in spec built houses so should be encouraged by the Council.	<p>Comments noted. The supporting text of this policy sets out that large-scale major residential development will be encouraged to provide serviced plots for sale for self and custom-build housing, but this is not a requirement of the policy and therefore it will be removed from the supporting text.</p> <p>The Council has proposed residential allocations in the Plan that will include an element of self-build (North East Thatcham and Purley Rise). It is not considered necessary to have site allocations specifically for self- and custom-build housing in order for this type of development to come forward.</p> <p>Under this policy, applications for self- and custom-build developments will need to demonstrate high quality design and be sensitive to the characteristics of the local area.</p>
<b>Other stakeholders</b>		
Sam Coppinger (lpr322)	Do you agree with the proposed policy? Yes But please put an end to boxy carbuncles on the landscape. The rest of us have to look at them!	Comments noted. Under this policy, applications for self- and custom-build developments will need to demonstrate high quality design and be sensitive to the characteristics of the local area.
Councillor Tony Vickers (lpr610)	We strongly support this policy.	Comments noted.

Respondent (with lpr ref)	Response	Council Response
	<p>The Council should promote the local self-build register more widely and proactively, because self- and custom-build homes have been shown to have higher standards of design and meet the needs of end users significantly better than homes supplied by large national home builders.</p> <p>Changes: Delete the words “Where appropriate” in the last sentence of the policy and insert “proactively” after “The Council will work”</p>	<p>The Council agrees that the Council should work with other parties to address local requirements for self and custom-build homes. However, in some cases the Council won’t need to take a proactive or interventionist role in order for these developments to come forward. Therefore it is considered appropriate to retain the ‘where appropriate’ wording in the policy.</p>
<b>Landowners, site promoters and developers</b>		
Bloor Homes & Sandford Farm (lpr2177)	<p>We agree that this Policy should not require individual development sites, particularly the large sites, to provide a proportion of plots for self and custom build as the persons who aspire to such a housing product are likely to be motivated by the creation of a unique housing product away from rather than part of a new residential community.</p> <p>No information is provided as to the scale of demand for self and custom build housing in the District, however, this will be known to the Council from its Register. The Council may therefore consider it appropriate to identify small site allocations specifically for the purpose of self and custom build housing.</p>	<p>Comments noted.</p> <p>The supporting text of this policy sets out that large-scale major residential development will be encouraged to provide serviced plots for sale for self and custom-build housing, but this is not a requirement of the policy and therefore it will be removed from the supporting text. It is not considered necessary to have site allocations specifically for self- and custom-build housing in order for this type of development to come forward.</p>
Fowler Architecture & Planning Ltd. (lpr1798)	<p>We welcome a policy concerning the promotion of self and custom build development. However, Policy DC17 does not adequately explain the context of the local authority’s self and custom build register and the actual demand for serviced plots in the area. Such evidence within the supporting text will be very useful in clarifying the demand.</p> <p>The policy support for the principle of schemes must be clarified in the context of where such services plots and land will be provided. The assembly of land for self and custom builders must compete with higher land values for standard residential development and as such locational policy incentives must be stated in DC17 to set out a positive framework for this typology of homes to be supported in the countryside, similar to exception sites.</p>	<p>Comments noted.</p> <p>The Council maintains a register of individuals and associations of individuals who have expressed an interest in self- and custom-build homes. Due to privacy reasons it would not be appropriate to publish this list in support of the Local Plan as it contains personal information. However, an indication of current demand and interest, from the register will be set out in supporting evidence to the policy.</p> <p>Noted and considered. However, there is sufficient demand and viability for this development to come forward</p>

Respondent (with lpr ref)	Response	Council Response
	Support for the benefits of self-build should also be extended to small scale or single unit schemes on sites not previously identified as self-build sites.	without additional incentives. Therefore it is considered that no change is needed.
Rural Solutions for Karine Giannmore (lpr2302)	This policy does not go far enough to encourage the delivery of Self and Custom Build Homes. The proposed allocations currently indicated in the emerging local plan are unlikely to meet local needs. People looking to purchase plots for self and custom build housing are unlikely to seek locations within an area that contains large scale major development. It is more akin to small sized developments or village locations.	Comments noted.  However, there is sufficient demand and viability for this development to come forward without additional incentives or allocations. Therefore it is considered that no change is needed.
Shanly Homes (lpr1979)	Full representation on behalf of Shanly Homes, supporting allocation of site at 72 Purley Rise, is attached to representation on RSA12.  Policy DC 17 encourages the provision of self-build housing, however these must be of high-quality design and sensitive to the characteristic of the local area. The outline planning permission seeks to provide 3 self-build/custom-build dwellings. Hence the outline permission complies with the Policy DC 17 of the LRP.	Comments noted.  Under this policy, applications for self- and custom-build developments will need to demonstrate high quality design and be sensitive to the characteristics of the local area

## Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

### Emerging Draft LPR Policy: DC18 Specialised Housing

### (Proposed Submission LPR Policy: DM19 Specialised Housing)

Number of responses received: 10

Sovereign Housing Association (lpr2168)	SHA are in broad support of the aims set out in policy DC18. With regards to housing for older people, SHA is developing a Live Well Age Well approach to providing housing options, support and services to help our communities to Live Well. This ties in well with the aims of the local plan and	Comments noted  This policy has been drafted in the context of the Council's Reducing Homelessness & Rough Sleeping Strategy 2020 - 2025

Respondent (with lpr ref)	Response	Council Response
	<p>we would want to work closely with you to develop some local approaches to Ageing Well in West Berkshire.</p> <p>There remains a conflict between fulfilling individual requests for DFG funding – to enable an individual older resident to stay in family sized accommodation - whilst at the same time, there are vacancies in accommodation specifically designed for older people and a demand for family sized homes. We would want to work closely with you to deliver Extra Care and Older Peoples housing schemes to meet the needs of our local ageing population.</p> <p>The draft document references the separate homeless strategy – which talks about providing more small-scale provision for residents with complex needs. How do you see this being achieved? We would see this as linking in with a “tenancy ready” project - assisting applicants to access training and skills. Being proactive in supporting individuals with complex backgrounds, to demonstrate their potential to manage a tenancy. The homeless strategy refers to the need for increased move-on accommodation from supported housing - how is this being considered?</p> <p>Through our Thriving Communities strategy 2020-24 vision we identified Employment and Training, Money and Digital and supporting communities as key priorities. Our youth offer includes a youth voice panel to help young people shape services and improve communities where they live. We would be keen to work with you in these.</p>	
Councillor Tony Vickers (lpr611)	Supports the policy	Support noted
<b>Landowners, site promoters and developers</b>		
Feltham Properties (lpr2283)	<p>The Updated Housing Needs Assessment (dated, May 2020) prepared by Icenl (on behalf of the Council) demonstrates a projected growth in those aged 65 and over of 14,500 persons over the 2018-36 period, representing 49% growth in West Berkshire. This forms part of the national picture which is described as “critical” in national policy guidance (National Planning Policy Guidance Paragraph 001 Reference ID: 63-001-20190626).</p>	<p>Comments noted</p> <p>The Policy and supporting text has been amended to clarify that the need implies locally identified need in the whole District.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Evidence locally and nationally, therefore, demonstrates that there is a significant need for housing for older persons (i.e. specialist housing units and care/nursing beds) in West Berkshire during the plan period.</p> <p>In which case, emerging Policy DC18 is not sufficiently positive to ensure that this problem is addressed. We have concerns that the policy requires evidence that each individual scheme meets a ‘proven locally identified need’ for that specific housing product to be supported by the Council. The Council’s approach is clearly flawed as the evidence base already demonstrates that there is a significant need for specialist housing for older persons during the plan period. The Policy therefore adds another onerous and unnecessary step to the process that may impede delivery of schemes for older persons accommodation.</p> <p>With the above in mind, it is considered that the Council needs to remove the requirement for evidence of a local need within Policy DC18. The Policy should positively encourage development for specialist accommodation for older persons in areas with good access to public transport and local facilities and services.</p>	<p>It is considered that Proposed Submission LPR revised Policies SP18 (Housing Type and Mix) and DM19 (Specialized Housing) are positive and encourage the provision of all types of specialist housing to meet the requirements of older people. Policy SP18 now requires all housing development to meet the needs of the elderly and disabled. All new homes to be built to the accessible and adaptable dwellings (Part M4(2)) of the Building Regulations standard with some meeting the needs of wheelchair users.</p> <p>Policy SP18 now outlines how the accommodation needs of older people are expected to be met during the plan period.</p>
Turley on behalf of A2dominion Housing Group Ltd (lpr1499)	<p>A2Dominion welcome the provision of a policy which provides for specialist housing. The context of this is seen in the National Planning Practice Guidance (NPPG Housing for Older and Disabled People, paragraph 63-001-20190626) which states:</p> <p>“The need to provide housing for older people is critical. People are living longer lives and the proportion of older people in the population is increasing. In mid-2016 there were 1.6 million people aged 85 and over; by mid-2041 this is projected to double to 3.2 million. Offering older people a better choice of accommodation to suit their changing needs can help them live independently for longer, feel more connected to their communities and help reduce costs to the social care and health systems. Therefore, an understanding of how the ageing population affects housing needs is something to be considered from the early stages of plan-making through to decision-taking.”</p> <p>A2Dominion note that nationally there is an ageing population. The West Berkshire Strategic Housing Market Assessment (‘SHMA’) published in 2016</p>	<p>Comments noted</p> <p>It is important that housing schemes reflect the local needs. The updated evidence in the West Berkshire Local Housing Need Assessment Reports 2020 and 2022 set out the evidence on local needs for specialised housing at a district level. This has been clarified in the additional and amended text.</p> <p>The level of need for specialist housing for older people in the District is now considered in the supporting text to the Policy.</p> <p>Explanation of how the need for specialist housing to meet the needs of the old age population is explained in proposed amendments to policies SP19: Affordable</p>

Respondent (with lpr ref)	Response	Council Response
	<p>confirmed that West Berkshire had the highest representation of older people amongst those authorities in its HMA as of 2013 (GL Hearn (2016) Berkshire (including South Bucks) Strategic Housing Market Assessment, Table 109).</p> <p>A review of population estimates released by the ONS confirms that this remains the case. As shown at Table 4.1 below, the latest data confirms that nearly one in five West Berkshire residents (19%) were aged 65 or above in 2018, while 8% were aged 75 and over. (Table sourced from ONS appears as Table 3.1 in full representation)</p> <p>The Council's updated Housing Needs Evidence (May 2020) equally addresses the ageing demographic profile of West Berkshire when it states: "West Berkshire is projected to see a notable increase in the older person population, with the total number of people aged 65 and over projected to increase by 49% over the 18-years to 2036. This compares with overall population growth of 7% and a modest decrease in the Under 65 population of 2.5%."</p> <p>A2Dominion note the Council set out in the additional text for Policy DC18 stating that 'All specialist housing provision within the built-up area should meet an identified unmet need in the local area proposed for development and the location must be appropriate having regard to access to facilities, services and public transport.' The text is not clear on whether specialised accommodation in a built-up area could also meet unmet need elsewhere and not just 'identified unmet need in the local area'. We suggest the text is made clearer to inform whether a specialised housing scheme could meet unmet need from elsewhere in the District.</p> <p>The need for specialised housing is set out in the Council's evidence base, but it is not clear what the Council considers the definition of 'local need' to be. Given the evidence of an ageing population in the District, A2Dominion consider that it would be a flawed approach to only permit development where a 'local need' is demonstrated. We note that the approach advocated by A2Dominion in this regard is the same as that supported by the Inspector who examined the Hart Local Plan – that need is a matter which should be based at the District level.</p>	<p>Housing; SP18: Housing Type and Mix as well as Proposed Submission LPR Policy DM19 Specialist Housing. The amendments outline the requirements which will be expected from developments in order to meet the needs of the elderly and disabled for all new homes to be built to the accessible and adaptable dwellings (Part M4(2)) of the Building Regulations standard with some meeting the needs of wheelchair users.</p> <p>Policy SP18 now outlines how the accommodation needs of older people are expected to be met during the plan period.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Similarly, it is evident that despite the compelling evidence of the ageing population, the Local Plan does not include any explanation as to the level of that need.</p> <p>During the examination of the Vale of Aylesbury Local Plan (VALP) the inspector expressed that the Plan was unsound because it did not meet the current needs of specialised housing for older people. Subsequently, the Council had to revisit its Local Plan and submit further documentation which addressed the need. We suggest that West Berkshire avoids the same situation by addressing the need clearly following Regulation 18 consultation.</p> <p>Whilst there is support for general presumption in Policy DC18, there are no specific allocations for this type of development and we have already expressed the concerns over the internal inconsistencies of the Plan which likely to complicate or fetter the delivery of schemes to meet this identified need. Therefore, unless schemes for this type of development are brought forward on a speculative basis, the 'identified need' is likely to go unmet. The Council should revisit this, address inconsistency and identify specific allocations for this type of development in order to address need.</p> <p>We welcome fact that there has been an identified need for specialised housing within West Berkshire. A2Dominion have historically promoted the site east of Reading Road for residential development. However they acknowledge that a scheme for specialised accommodation could also provide suitable development in Streatley.</p>	
Turley on behalf of Pangbourne College (lpr2352)	<p>Pangbourne College welcomes the provision of a policy which provides for specialist housing, in particular given the guidance within the National Planning Practice Guidance (NPPG) which states:</p> <p>"The need to provide housing for older people is critical. People are living longer lives and the proportion of older people in the population is increasing. In mid-2016 there were 1.6 million people aged 85 and over; by mid-2041 this is projected to double to 3.2 million. Offering older people a better choice of accommodation to suit their changing needs can help them live independently for longer, feel more connected to their communities and help reduce costs to the social care and health systems. Therefore, an understanding of how the ageing population affects housing needs is</p>	<p>Comments noted.</p> <p>The accommodation needs of an ageing population has been an important consideration in the housing need assessments and in policy formulation from the early stages.</p> <p>The SHMA, 2016 and Local Housing Need evidence updates 2020 and 2022 have assessed the needs of different groups, including the elderly on a West Berkshire District level basis.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>something to be considered from the early stages of plan-making through to decision-taking.”</p> <p>The Council’s updated Housing Needs Evidence (May 2020) addresses the ageing demographic profile of the District. It states:</p> <p>“West Berkshire is projected to see a notable increase in the older person population, with the total number of people aged 65 and over projected to increase by 49% over the 18-years to 2036. This compares with overall population growth of 7% and a modest decrease in the Under 65 population of 2.5%.”</p> <p>In the supporting text to Policy DC18 the emerging plan refers to “identified unmet need in the local area” but it is not clear what the Council considers the definition of ‘local need’ to be. Given the evidence of an ageing population in the District, it would not appear justified to only permit development where a ‘local need’ is demonstrated.</p> <p>Whilst the College supports the general presumption in Policy DC18, there are no specific allocations for this type of development. We feel that this should be reviewed with the potential to include sites to deliver specialist housing, and in particular older person accommodation, considered.</p>	<p>In relation to the provision of accommodation to meet the needs of the old age population amendments have been made to Policies SP19: Affordable Housing; SP18: Housing Type and Mix as well as Proposed Submission LPR Policy DM19 Specialist Housing. The amendments outline the requirements which will be expected from developments in order to meet the needs of the elderly and disabled for all new homes to be built to the accessible and adaptable dwellings (Part M4(2)) of the Building Regulations standard with some meeting the needs of wheelchair users.</p> <p>Policy SP18 now outlines how the accommodation needs of older people are expected to be met during the plan period.</p>

<b>Statutory consultees</b>		
Reading Borough Council (lpr1491)	<p>The position regarding whether the Draft Local Plan meets the identified need for gypsy and traveller accommodation is not clear. Paragraph 11.24 states that identified need for permanent pitches by 2036 from the Gypsy and Traveller Accommodation Assessment (GTAA) is 48 (under Planning Policy for Traveller Sites definition) or 51 (cultural need) pitches. However, the only additional site allocated to meet a need is for 8 pitches at New Stocks Farm (RSA32), and this in itself would result in a reduced transit provision. The Local Plan argues that the GTAA factors in the high turnover at Paices Hill, and this reduces the need to 19 (PPTS) or 21 (cultural) pitches. The GTAA is unpublished, so we are not able to view the details of this calculation. Even so, a shortfall of around 20 pitches appears to arise in the Local Plan. RBC believes that it is essential that the Local Plan should make provision to accommodate West Berkshire's full need for gypsy and traveller pitches.</p> <p>In addition, as has been previously raised, RBC has an unmet need for permanent gypsy and traveller pitches. Our own GTAA identified a need for 10-17 permanent pitches in Reading, and, despite considerable efforts to</p>	<p>Comments noted. The GTAA has been refreshed, and available on the Council's website. The plan period (to 2037) need reduces to 20 pitches. Accounting for the allocation at Paices Hill, Aldermaston, this need reduces to 12 pitches. No sites have been identified through the Regulation 18 consultation, which included a question as to whether any land was available for Gypsy and Traveller pitches. Sites coming forward through the development management process could assist in achieving numbers, and this is one reason for proposing this policy. The Council are looking at options to meet its own permanent need, through a Development Plan Document.</p> <p>It is unlikely that West Berkshire would be able to aid in meeting the permanent need for Reading, at least in the short term. This will continue to be monitored as the GTAA is refreshed and the Local Plan is reviewed.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>identify possible sites, the Reading Borough Local Plan was unable to find suitable land, due to the nature of the Borough. On 21<sup>st</sup> February 2018, RBC made a request under the duty to Co-operate to a number of authorities, including WBDC, to understand whether there is potential to meet these permanent needs outside Reading's boundaries. At the time it was understood that WBDC was not yet in a position to know whether this was possible and was assessing its own needs. However, in drawing up this version of the Local Plan, more progress on understanding needs and capacity has been made. The Local Plan should recognise that there are unmet needs from Reading, and RBC would want to discuss the opportunities for helping to meet these needs in more detail. In doing so, RBC would welcome a discussion about what resources would be required to help meet these needs.</p>	
<p>Wokingham Borough Council (lpr1469)</p>	<p>The West Berkshire District Gypsy and Traveller Accommodation Assessment 2019 (GTAA) identifies the need for additional pitches over the period 2018/19 to 2035/36. Though the GTAA has not yet been published, its findings are set out in the Plan. The GTAA identifies the need for 'cultural' Gypsy and Travellers and a separate need for Gypsy and Travellers who meet the definition set out in the Planning Policy for Traveller Sites (PPTS)1. It also identifies a separate need for Travelling Showpeople. The overall need over the plan period is for 51 pitches for 'cultural' and 48 pitches for PPTS Gypsies and Travellers (i.e. 99 pitches in total) and 24 plots for Travelling Showpeople. Paragraph 11.30 states that the GTAA recommends that turnover at a private Gypsy and Traveller site in Paices Hill should be factored into supply with the effect that this reduces pitch need significantly to 22 and 19 pitches for 'cultural' and PPTS Gypsies and Travellers respectively. It is noted that WBC's own GTAA, produced by the same consultants, outlined how need might be reduced if turnover on public sites was factored in i.e. those sites over which WBC has control over occupancy. However, its final recommendation was that needs should be planned for in full without an allowance for turnover included. WBC wishes to understand the evidence behind the recommendation in WBDC's GTAA and considers that very clear evidence would be required to justify such a reduction in need, particularly</p>	<p>Comments noted. The GTAA has been refreshed, and the 2019 and 2021 documents are available on the Council's website.</p> <p>The plan period (to 2037) need reduces to 20 pitches. Accounting for the allocation at Paices Hill, Aldermaston, this need reduces to 12 pitches. No sites have been identified through the Regulation 18 consultation, which included a question as to whether any land was available for Gypsy and Traveller pitches. Therefore, it is proposed to rely on the sites allocated in the Housing Site Allocations being rolled forward to the Local Plan and for the development management process. The Council are looking at options to meet its own permanent need, through a Development Plan Document.</p> <p>The refreshed GTAA 2021 comments that there is a reduction in the number of households planning to move at Paices Hill and very limited turnover is expected. The refreshed GTAA 2021 therefore does not make an allowance for turnover on Paices Hill.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>as it would relate to a private site where occupancy is not managed by the council.</p> <p>The Plan also states that an existing council run site (Four Houses Corner), which the GTAA identifies as containing 7 occupied pitches, is planned for refurbishment /redevelopment. It is not clear whether this would comprise redevelopment to an alternate use or whether it might allow for additional pitches to be delivered.</p> <p>It is understood that the remaining need for pitches will be met through the planning application process, with proposals assessed against the criteria set out in Policy DC19. This would require a significant amount of need to be met through windfalls.</p> <p>It is recommended that WBC seeks clarification regarding the evidence used to justify the turnover allowance and associated reduction in need. It is further recommended that WBC seek clarification over the deliverability of the proposed site allocation for additional pitches at Paices Hill, the impact of this proposed allocation on transit pitch need, and over the potential additional capacity (if any) that could be accommodated at the Four Houses Corner council run site. WBC expects WBDC to meet its Gypsy and Traveller need in full for the whole plan period to 2037, which may require additional sites to be identified and allocated.</p> <p>WBC seeks clarification regarding the evidence used to justify the turnover allowance and associated reduction in need. WBC seek clarification over the deliverability of the proposed site allocation for additional pitches at Paices Hill, the impact of this proposed allocation on transit pitch need, and over the potential additional capacity (if any) that could be accommodated at the Four Houses Corner council run site. WBC expects WBDC to meet its Gypsy and Traveller need in full for the whole plan period to 2037, which may require additional sites to be identified and allocated.</p>	<p>Four Houses Corner is not able to accommodate any additional pitches due to on-site conditions. 17 pitches would be made available following refurbishment, an increase of one pitch over and above the previous number of pitches prior to the temporary closure.</p> <p>The refreshed GTAA 2021 highlights an interview with the site owner of Paices Hill, demonstrating that the site is deliverable. There is a commitment from the site owner to convert the existing transit pitches to permanent pitches. This does mean that transit need provision would reduce. The refreshed GTAA 2021 outlines recommendations for transit/stopping needs, which the Council is exploring, through a Development Plan Document.</p>
Basingstoke and Deane Borough Council (lpr1484)	The draft Plan also sets out the council's strategy for meeting gypsy and traveller needs, including through the replacement of transit pitches with permanent pitches at New Stocks Farm on Paices Hill (Policies DC19 and RSA32). Although Policy DC19 states that 'The Council will meet the identified need... by allocating land for plots and/or pitches' it appears that	Comments noted. The GTAA has been refreshed, and the 2019 and 2021 documents are available on the Council's website. The plan period (to 2037) need reduces to 20 pitches, taken from the refreshed GTAA 2021. Accounting for the

Respondent (with lpr ref)	Response	Council Response
	<p>there would still be an overall shortfall in pitches (as explained in para 11.30). BDBC wishes to ensure that WBC has a robust strategy to meet its gypsy and traveller needs in full to ensure that those needs would not need to be met in Basingstoke and Deane.</p> <p>BDBC is keen to continue to engage in suitable discussions under the Duty to Cooperate, in relation to the issues set out above and those discussed at our meeting in late 2020.</p>	<p>allocation at Paices Hill, Aldermaston, this need reduces to 12 pitches. No sites have been identified through the Regulation 18 consultation, which included a question as to whether any land was available for Gypsy and Traveller pitches. Sites coming forward through the development management process could assist in achieving numbers. The Council are looking at options to meet its own permanent need, through a Development Plan Document.</p>
Vale of White Horse & South Oxfordshire District Councils (lpr1779)	<p>At Vale of White Horse District Council, we are committed to working collaboratively with our neighbouring authorities. Thank you again for the opportunity to review your consultation document and we hope that a positive working relationship between the two councils continues as you progress with your Local Plan Review to 2037.</p>	<p>Comments noted.</p>
South Oxfordshire District Council (lpr1784)	<p>We note the future shortfall in gypsy and traveller pitch provision identified in paragraph 11.30 and will look forward to understanding how this will be addressed through future versions of the Plan.</p>	<p>Comments noted. The GTAA 2021 update records a reduced need of 20 pitches across the plan period, further reducing to 12 pitches when including the allocated site at Paices Hill. The Council are looking at options to meet its own permanent need, through a Development Plan Document.</p>
Hungerford Town Council (lpr164)	<p>Agree with the proposed policy.</p>	<p>Comments noted.</p>
Shaw-cum-Donnington Parish Council (lpr245)	<p>We support the policy. We have difficulty understanding how the needs have been assessed and are concerned that an over-provision of sites could prove an attraction.</p>	<p>Comments noted. The GTAA is available on the website. It is the intention that the Council will seek to meet the needs of Gypsies and Travellers as identified in the GTAA, through a Development Plan Document and thus will not be in a position to over-supply sites.</p>
Stratfield Mortimer Parish Council (lpr427)	<p>Agree with the proposed policy.</p>	<p>Comments noted.</p>

Respondent (with lpr ref)	Response	Council Response
Greenham Parish Council (lpr917)	Agree with the proposed policy.	Comments noted.
Newbury Town Council (lpr2238)	We support this policy apart from the inclusion of the need to be on previously developed land which we feel is not at all necessary. Whilst desirable, the words “previously developed” [land] should be prefaced by “high quality agricultural or public open space (or access) – or (preferably) -”.	The Planning Policy for Traveller Sites and the NPPF support the use of brownfield/previously developed land for development, including that for gypsy and traveller pitches. It is considered appropriate to seek to direct gypsy and traveller pitches to previously developed land where possible.
<b>General consultation bodies</b>		
Canal and River Trust (lpr897)	<p>Does not agree with the policy DC19.</p> <p>It is noted that the GTAA does not appear to have considered the need for boat travellers. Although the eastern end of the canal is generally quieter that the west end, there are several places which are increasing popular with liveaboard boaters especially where there are good transport connections (in most cases right next to the canal). Newbury, Aldermaston, Thatcham and Hungerford all offer liveaboard boaters access to local services and facilities.</p> <p>Policy DC19 would need amending if it is decided that there is a recognised need to provide residential moorings for liveaboard boaters. This matter would require further discussion with the Canal &amp; River Trust. It should be noted that the Trust will not comment on the need for such development, but will consider possible locations and amendment to the policy if necessary.</p>	<p>The GTAA does not identify a need for boat travellers. Many of the existing moorings are for leisure purposes, and it is not proposed to seek to provide sites for residential moorings.</p> <p>It is proposed to add the following sentence to the supporting text (when discussing need): <u>‘The GTAA does not identify a need for houseboat dwellers, and thus the LPR does not provide for any permanent houseboats.’</u></p>

Councillor Tony Vickers (lpr613)	We strongly support this policy.	Comment noted
<b>Landowners, site promoters and developers</b>		
Fowler Architecture and Planning Ltd (lpr1799)	The justification for this policy is not clear to demonstrate why explicit safeguarding is needed in the development plan. If such sites are considered to provide low-cost home ownership accommodation, then their redevelopment should not be restricted to 100% affordable housing as this is more restrictive than existing terms of operation. Instead any redevelopment should provide equivalent accommodation in terms of the size, range and tenure of housing, which may not itself be affordable housing as defined by the Framework.	Comments noted, however there is a need to ensure that these sites which currently provide low-cost accommodation continue to provide affordable accommodation.

## Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

Greenham Parish Council (lpr921)	Supports the policy	Comments noted
Hungerford Town Council (lpr166)	Supports the policy	Comments noted
Newbury Town Council (lpr2235)	<p>This policy is not applicable to Newbury or Greenham although many “rural workers” are currently living in the Newbury settlement area and we support it.</p> <p>However, as: “The Council is responsible for the local highway, cycle and walking, and public right of way networks as well as supporting public transport networks..... All development proposals will be required to demonstrate that they do not adversely affect these networks or that they can mitigate the adverse impact.”, we would like to add: “In the case of active travel networks, we wish to see opportunities to enhance them adopted. We expect all major development proposals to demonstrate how they have considered ways of improving local permeability into, out of and through their developments.”</p>	<p>Comments noted.</p> <p>Applications will be assessed in consideration of this policy as well as any other relevant policies, including transport infrastructure and travel planning, as well as taking into account the Local Transport Plan. However, it should be noted that dwellings for rural workers are, in most cases, small scale schemes, being one dwelling. This is not major development, and it is not envisaged to be large scale developments needing major upgrades/changes to the site.</p>

<b>General consultation bodies</b>		
British Horse Society (lpr861)	Nationally, the horse industry is the second biggest land-based industry (LANTRA) and rural West Berks is no exception. Considering the importance put on the horse industry in other parts of the LPR, it should be specified here	<p>Comments noted.</p> <p>It is recognised that the horse industry forms an important part of West Berkshire's landscape and economy. Emerging Draft LPR Paragraph 11.47 and 11.48 in the supporting text relates specifically to the equestrian and racehorse industry, and outlines that the policy should be read in conjunction with Emerging Draft LPR policy DC34 (Submission version policy DM37). The first criterion of the policy therefore is applicable for equestrian development not related to the racehorse industry.</p> <p>Criterion a) reads as follows to account for the change - 'It is proven as essential to the continuing use of land and buildings for agriculture, forestry or a <u>similar land based rural enterprise</u>;</p>
<b>Other stakeholders</b>		
Councillor Tony Vickers (lpr619)	We support this policy but would like a minor amendment to ensure that new housing in this category remains occupied by a working family in perpetuity. When an estate worker retires, currently their licence to occupy the property is not removed. In some cases, the dwelling was permitted for the exclusive use of a particular kind of employee (e.g. a security guard at/near an estate entrance). When a security guard retires or dies, this particular dwelling may no longer serve the purpose for which it was permitted if he or his dependents remain in it. The Council should be able to require the owner to	<p>Comments noted. It is the case that a dwelling with an agricultural tie will remain in use for those employed, or last employed, in agricultural or forestry, or a widow or widower of such a person and any resident dependents. Any new dwelling on the land will require permission, and be subject of this policy to assess its appropriateness.</p> <p>Planning case law shows that it may not be reasonable to force a retiring rural worker, or his/her widow/widower to</p>

Respondent (with lpr ref)	Response	Council Response
	<p>re-house the employee's dependent family, thus enabling a new security guard (in this example) to occupy the dwelling.</p> <p>In the Armed Forces, there is no right for an ex-service person to remain in occupation of their home. The same should be the case in some circumstances with non-Service occupants of homes in rural areas that were given planning consent for a particular reason.</p> <p>We are unsure how this can be incorporated in planning policy but suggest supporting text could refer to it and make some provision.</p> <p><b>11.37</b> The rural economy plays an important role in the District, in providing employment and in managing the rural landscape. The Council encourages viable agricultural, forestry, <b>equestrian</b> and other rural enterprises that support the delivery of a wide range of public benefits and sees them as essential to the maintenance of a thriving rural economy.</p>	<p>move out to provide the property to an active worker. The planning policy will not stipulate whether a planning condition with such detail (of dependents, widow/widower, etc) will be required, and this will be ultimately up to the decision maker, taking into account the merits of the case.</p> <p>It is difficult for the planning policy, and indeed for decision makers, to require the re-homing of an employee's dependent family. Changes to the supporting text would not necessarily deal with this issue as if the retired rural workers were rehomed this would not necessitate the need for a new dwelling. However, as part of any evidence to be submitted in support of an application for a new dwelling, paragraph 12.48 will be amended as follows:  <u>'Suitable alternative buildings that should be considered before creating a new dwelling unit, are existing vacant residential buildings or buildings suitable for conversion to residential use. Applicants should detail in their planning submission whether it is possible for the retired rural worker/their dependents/their widow or widower to be housed in alternative existing accommodation, thus allowing the existing residence to be used for the incoming rural worker.'</u></p> <p>It is recognised that the horse industry forms an important part of West Berkshire's landscape and economy. Emerging Draft LPR Paragraph 11.47 and 11.48 in the supporting text relates specifically to the equestrian and racehorse industry, and outlines that the policy should be read in conjunction with Emerging Draft LPR Policy DC34 (Submission version policy DM37). The first criterion of the policy therefore is applicable for equestrian development not related to the racehorse industry.  Criterion a) reads as follows to account for the change -</p>

Respondent (with lpr ref)	Response	Council Response
		'It is proven as essential to the continuing use of land and buildings for agriculture, forestry or a <u>similar land based rural enterprise</u> .'
<b>Landowners, site promoters and developers</b>		
Lucy White Planning for Bradfield College (lpr1156)	<p>Bradfield College objects to the ambiguous nature of policy DC22. Paragraph 11.38 advises that Policy DC22 applies to schools and colleges in the rural areas, for the provision of staff accommodation. However, it also acknowledges that not all criteria of policy DC22 would apply. It states: <b>“In such instances it is acknowledged that buildings currently being used for tourist or temporary accommodation are unlikely to be appropriate when seeking the availability of suitable alternative dwellings in that location. The Council is also unlikely to ask for proof of financial viability.”</b></p> <p>The text does not clarify whether all other policy criteria would be applied to schools and colleges. If the remaining policy criteria are applicable, Bradfield College objects on the following basis:</p> <p>Criteria i) requires evidence to demonstrate that the staff accommodation is proven to be essential to the ongoing use. This indicates that evidence would need to demonstrate that the enterprise concerned would no longer be viable unless the proposed staff accommodation was provided. Whilst this may be appropriate for smaller scale rural businesses, such as agricultural and forestry based activities, it is unlikely to apply to independent schools and colleges.</p> <p>The rationale behind the provision of staff accommodation for schools and colleges is based on factors beyond overall viability, including the need:</p> <ol style="list-style-type: none"> <li>1. For staff to be resident on the school/college campus to provide out of hours tuition and to be on call for out of hours emergencies; and</li> <li>2. To provide pastoral care for pupils throughout the weekday, evenings and weekends.</li> </ol> <p>The authority for such is contained within the Income Tax (Earnings and Pensions) Act, which recognises the need for staff accommodation at boarding schools. It states:</p> <p><b>“99 Accommodation provided for performance of duties</b> (1) living accommodation provided for an employee if it is necessary for the</p>	<p>Comments noted.</p> <p>The policy attempts to place elements of Local Plan policy ENV27 (Development on existing institutional and educational sites in the countryside) into the policy on housing for rural workers, as it is recognised that schools in the countryside have a housing stock for staff and schemes for new staff accommodation. It is agreed that some ambiguities have resulted in the merging of such policies.</p> <p>DM38 (development on existing educational and institutional sites in the countryside) has been included in the Submission Version, and would replace Local Plan policy ENV27.</p> <p>Delete the second paragraph (emerging plan version 11.39) in the supporting text as follows: <del>‘There are a number of existing educational and institutional establishments within the rural area of West Berkshire. This policy will be applied for new housing associated with these uses (e.g. staff accommodation). In doing so, the Council recognises that not all of the criteria set out in the policy may be relevant. In such instances it is acknowledged that buildings currently being used for tourist or temporary accommodation are unlikely to be appropriate when seeking the availability of suitable alternative dwellings in that location. The Council is also unlikely to ask for proof of financial viability. The Council will, however, normally require applicants for such</del></p>

Respondent (with lpr ref)	Response	Council Response
	<p>proper performance of the employee’s duties that the employee should reside in it.</p> <p>(2) living accommodation provided for an employee if—</p> <p>(a) it is provided for the better performance of the duties of the employment, and</p> <p>(b) the employment is one of the kinds of employment in the case of which it is customary for employers to provide living accommodation for employees.</p> <p><b>Section 99(2) ITEPA 2003</b></p> <p>You can accept the following classes of employee get the living accommodation exemption available under Section 99(2) ITEPA 2003</p> <ul style="list-style-type: none"> <li>• in boarding schools where staff are provided with accommodation on or near the school premises</li> <li>• head teacher</li> <li>• other teachers with pastoral or other irregular contractual responsibilities outside normal school hours (for example house masters)</li> <li>• bursar</li> <li>• matron, nurse and doctor.”</li> </ul> <p>Taking these factors into account, a failure to secure new staff accommodation beyond the settlement boundaries is unlikely to result in the establishment becoming unviable and ceasing to operate, but it could compromise its operations, inhibit its ability to enhance its pastoral care and safeguarding obligations (responding to changes in the regulations for boarding schools), increase running costs and reduce its ability to compete with other independent schools and colleges nationally which may be better equipped to attract staff of a high calibre and excellent pastoral care.</p> <p>In the case of Bradfield College, it is important to attract and retain staff who can offer high standards of education and pastoral care. As a full boarding school, with over 800 pupils, operating weekend and evening programmes, the College’s policy is to house all teaching staff and staff responsible for the health, safety and security of pupils and residents within Bradfield. The College has to attract the best teaching staff from all regions of the country and the provision of staff accommodation is essential to that aim. Teachers’ salaries alone do not typically allow them to live in such a high housing cost area. The College is a prominent local business employing around 500 staff,</p>	<p><del>development to enter into a legal agreement to ensure that it remains ancillary to the main use of the site and to ensure that staff accommodation is not sold off separately to be followed by applications for further housing or residential accommodation. For all other proposals related to educational and institutional establishments policy DC32 will be applicable.</del></p> <p>In terms of criterion vii) the impact on the AONB is a significant factor in assessing the impact of development. The Local Plan is landscape led, and this is reflected in Local Plan Policy SP2, to consider the landscape in all development proposals.</p> <p>Amend the policy to refer to compliance with Policy SP2 as follows:</p> <p><del>‘(g) The development has no adverse impact on the rural character and heritage assets of the area and its setting within the wider landscape, and is in accordance with Policies SP2 and SP7. Where it affects the AONB the impact on its special qualities and natural beauty of the landscape will be the overriding consideration;’</del></p>

Respondent (with lpr ref)	Response	Council Response
	<p>including part-time and full-time staff, around 100 seasonal staff and 150 support staff.</p> <p>The demands placed on teaching staff continue to increase as the regulatory requirements and expectations in relation to Health and Safety, Security and Child Protection are raised. ISI Inspections have made clear the importance of staff devoting as many hours as possible towards pupils achieving the highest levels of education and pastoral care. This is unattainable when teaching staff live off campus, many miles away.</p> <p>The success of the College is in large part attributed to the sense of community which has been established through the close relationships between staff and pupils. The ability of staff to live on campus and to be available to pupils during the day and night has made a significant contribution to this success and continues to be a fundamental reason for seeking to maintain and increase its provision of staff accommodation.</p> <p>Policy DC22 (i) as drafted could unreasonably fetter the provision of new staff housing. It is therefore requested that criterion (i) does not apply to schools and colleges, but rather the appropriate test is that set out under criteria (ii), namely that:</p> <p><b>“Detailed evidence is submitted showing the relationship between the proposed housing and the existing or proposed rural enterprise and demonstrating why the housing is required for a full time worker in that location.”</b></p> <p>Under criterion (ii) schools and colleges should be able to put toward a reasoned, evidenced case for the provision of additional staff accommodation to meet its needs, with reference to its operational needs, its current levels of staff and accommodation and the mix of housing types required, and taking into account a number of the considerations outlined above.</p> <p>Objection is raised to criterion (vii), which states that the impact of proposed development on the special qualities and natural beauty of the AONB will be the overriding consideration in determining the suitability of proposed housing. Whilst great weight should be afforded to conserving and enhancing the AONB (NPPF, paragraph 172), Government policy also</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>attributes great weight to the creation, expansion and alteration of schools (NPPF, paragraph 94) and to outstanding, sustainable design (NPPF, paragraph 131). In the planning balance, each of these considerations would be afforded equal weight and this should be reflected in Policy DC22. Policy DC22 to provide further clarity on the relevant policy tests for educational establishments. Criteria i) and ii) should not apply. Policy DC22, criterion (vii) to attribute great weight to the AONB, rather than it being an overriding consideration.</p>	
Fowler Architecture and Planning (lpr1801)	<p>A policy to set out how the decision maker should react to such proposals is welcomed in principle. However, a distinction needs to be made between locations in the countryside that are isolated, and not isolated. Criterion (iii) should not require consideration of buildings being used as tourist accommodation as part of a sequential approach towards the provision of the workers dwelling. Such units form part of the diversification of holdings and can contribute positively to the rural economy. Additionally, this criterion should not require that there are no buildings suitable for residential conversion, as other buildings, whether suitable for residential conversion or not, may have a significant bearing on the functioning of the business; to eliminate this problem, text to the effect that there is a preference towards the re-use of existing buildings for this purpose should be employed, and that the Council may require justification for new build as opposed to conversion where this appears to be an option. Criterion (iv) is unnecessary as the functional need for the dwelling relating to the enterprise and its location is a matter covered by criterion (ii). The criterion also places an onerous test concerning '...or proposed provision within existing settlement boundaries' which will be impossible to prove or have control over the delivery of such proposed dwellings if they are not within the ownership of the holding. Criterion (viii) is unreasonable with any year, let alone a 10-year rule, concerning dwellings sold or converted. Rural enterprises continue to face pressures to change and adapt and their previous actions to be responsive cannot weigh against their future growth. Furthermore, not all dwellings serving or associated with the rural enterprise will be subject to restrictions under the planning acts by condition or obligations concerning their use and occupation. Enterprises should not be penalised by doing as</p>	<p>Comments noted.</p> <p>This policy applies to all sites outside of any defined settlement boundaries, and therefore it is not considered necessary in the policy to define what is isolated and what is not.</p> <p>It is important to demonstrate that all alternatives to a new dwelling have been discounted, to avoid the development and associated urbanisation of land in rural areas. The particular circumstances of a case will be examined as part of a planning application, and should there be a reasonable explanation for the tourist accommodation not being suitable or available on site this would be taken into account.</p> <p>It is important to demonstrate that there are no sites or properties available within settlement boundaries. Some enterprises can be within a relatively short distance to settlements, and rather than build a new dwelling in the countryside, the applicants would need to explore sites in such settlements. Applicants will need to show they have taken reasonable steps to finding alternative accommodation, and the reasons for discounting such alternatives. Again, the particular circumstances of a case will need to be examined as to whether travelling any kind of distance is appropriate for the rural enterprise. This is a</p>

Respondent (with lpr ref)	Response	Council Response
	<p>they see fit with their existing stock of dwellings without any planning restrictions.</p> <p>In the final paragraph concerning the removing of occupancy conditions, the reference to 'agricultural' should be removed as the preceding context relates to housing for any rural workers. The paragraph should also recognise that any marketing can only be for the terms imposed by the planning condition. As such, the requirement that the dwelling 'cannot meet an existing local housing need' will go beyond the terms that the condition was imposed.</p>	<p>different to criterion ii) which seeks to ensure the dwelling is needed in connection with a rural enterprise.</p> <p>In consideration of a '10 year rule' the point of the criterion is to avoid the development of new dwellings where there was one or more dwellings on the land which could have been made use of. This is regardless of whether any restrictions exist on such dwellings. If the occupiers choose to remove dwellings from their stock it does not mean then that there is an automatic 'in principle' acceptance of building further dwellings. This then adds to the domestication and urbanisation of land. Again, the particular circumstances of a case will need to be examined.</p> <p>It is considered that a stepped approach to removing an occupancy tie is appropriate, due to the particular restraint of such housing in the countryside. This is a long established approach to considering the need for rural housing and this is a method for searching for affordable accommodation before releasing previously restricted housing to 'open market'. This is particularly relevant in West Berkshire where affordable housing is in high demand.</p>

## Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

**Emerging Draft LPR Policy: DC23 Conversion and/or re-use of existing redundant and disused buildings in the countryside to residential use**

**(Proposed Submission LPR Policy: DM24 Conversion of existing redundant and disused buildings in the countryside to residential use)**

Number of responses received: 12

<b>Landowners, site promoters and developers</b>		

Respondent (with lpr ref)	Response	Council Response
Englefield Estate (lpr1539)	<p>The overall approach of draft LPR Policy DC23 to supporting conversion and reuse of redundant buildings to residential use is supported. However we are concerned that the draft policy contains a number of detailed criteria with unnecessary duplication of other policies (e.g. relating to heritage, amenity and ecology) which may prejudice suitable development being delivered in rural areas. Further, the need to satisfy ‘all’ of the criteria may serve to unnecessarily restrict development which through a balanced judgement is acceptable and would otherwise bring important economic, social and environmental benefits. As noted above, the Estate’s experience previously is that similar policies have been applied to prohibit development, and instead it is important that a positive approach is taken towards new development in the countryside in line with NPPF paragraphs 77-78.</p>	<p>Comments noted. It is considered that the policy aligns with Paragraph 80 of the NPPF, which avoids isolated homes in the countryside unless particular circumstances apply, one of those being the re-use of redundant or disused buildings. The Council does take a positive approach to rural housing, given that West Berkshire is predominately a rural district. Taking paragraphs 78 and 79 of the NPPF into account the Council has outlined a Spatial Strategy, which identifies urban areas, rural service centres and service villages. It is proposed to allocate sites for residential housing in rural service centres and service villages, as well as allocating housing numbers for Neighbourhood Planning groups to carry forward in their Plans. Rural exception sites are also permitted in particular circumstances.</p> <p>Development in the countryside is strictly managed, and it is important for development proposals to be considered against all criteria within the policy. A proactive approach is always taken, and there may be cases where issues need to be finely balanced. Should a particular criterion not be relevant to a proposal (e.g. it is not a heritage asset) this would not apply to the consideration of the proposal.</p>
Fowler Architecture and Planning (lpr1802)	<p>The first paragraph of Policy DC23 should be amended to clarify this policy operates in the countryside outside of settlements.</p> <p>Criterion (ii) requires the building be proven as ‘genuinely redundant or disused’. The term ‘genuinely’ is ambiguous (see paragraphs 8 and 9 of Appeal APP/W0340/W/17/3185410) and needs to be further clarified at paragraphs 11.52 and 11.53 as these do not provide a precise definition on how this test will be applied to decisions, because they introduce other ambiguous terms such as ‘significant efforts’. If it is the Council’s expectation that marketing be required then this should be stated.</p> <p>Criterion (iii) does not apply in all cases and should be treated as mutually exclusive of the other criteria. It references ‘internal changes’. Not all internal changes amount to development and therefore cannot weigh against a</p>	<p>Comments noted.</p> <p>Amend the first sentence of the policy as follows – ‘The conversion and/or re-use of existing redundant and disused buildings <u>in the countryside</u> to residential use...’</p> <p>Clarify paragraph 12.55 of the supporting text as follows – ‘In determining whether a building is genuinely redundant or disused, it is important that the original use of the building for that purpose no longer exists. The nature of the use, when it ceased and the reason why it ceased will be carefully considered by the Council. An empty or part</p>

Respondent (with lpr ref)	Response	Council Response
	<p>proposal. It would be helpful to clarify criterion (iii) in requiring ‘represent the optimal viable reuse of a heritage asset in a manner that does not harm the significance of a heritage asset and its setting’ to be consistent with the NPPF.</p> <p>Criterion (vi) is a duplication of the matters considered under criterion (iv) and it is not clear what else this is meant to cover.</p> <p>The final paragraph restricts replacement buildings thereafter. It is unclear whether this is desirable and feasible mindful of the changing needs of rural enterprises. Furthermore, it is unclear as to how long such a presumption against will last for and whether this would apply should, for instance, an agricultural unit be subdivided and that divided unit requires buildings. This paragraph should be removed as the role of the planning system is to consider the impacts of new development, which may replace a building required following a change of use, but there is no other harm.</p>	<p>empty, building is not an unequivocal sign of redundancy, a bigger picture has to be considered. It will be necessary for applications to clearly demonstrate why the building is no longer needed and that significant efforts to re-use it have both tried and failed. <u>The Council will take account of all the circumstances and judge, whether taken together, they indicate the building is no longer needed or useful.</u></p> <p>Marketing is not a tool that is always required (the loss of a public house, where this would be required, would be considered under DM39). However, it can be a useful tool in considering whether there is any future opportunity for alternative use of the building.</p> <p>It is agreed that planning permission is not always required for internal changes, however, criterion (iii) applies to heritage assets, where, in the case of listed buildings, internal changes do need to be assessed.</p> <p>Amend criterion c) as follows ‘Any internal or external changes do not harm the significance of a heritage asset <u>or its setting in accordance with policies SP9 and DM12</u>’.</p> <p>This is different to securing an optimal viable reuse as required by para 80 of NPPF, which is considered under Policy SP9. The criterion focuses on any impact on the heritage asset rather than as an ‘exception within an exception’ type of development.</p> <p>Criterion d) (Emerging policy iv) is plot specific, and criterion f) (Emerging policy vi) looks at the wider context.</p> <p>The policy is for the conversion of buildings, not the redevelopment for residential purposes. The redevelopment of buildings/sites is covered under Policy</p>

Respondent <i>(with lpr ref)</i>	Response	Council Response
		<p>DM35 where proposals support the rural economy. This is in line with Paragraph 80 of the NPPF which only refers to conversion of buildings being an exception to residential schemes in the countryside.</p> <p>When it is the case that there has been a conversion under the policy and further extensions/buildings are proposed at a later date, the proposal would be determined under householder policies. However, it is the case that proposals would also be considered against the original policy, otherwise it undermines the aim of the policy which is to ensure a restrained conversion in the countryside, where residential development would not otherwise be appropriate.</p>

<b>General consultation bodies</b>		
North Wessex Downs AONB (lpr1615)	<p>The policy is not restrictive enough and has resulted in small affordable dwellings in the AONB being more than doubled in size to manor style properties. Replacement dwellings in the AONB should be restricted to an increase of no more than 33% (a third) of the original volume of the dwelling. It's key that the measurement is volume as floorspace does not account for multiple storeys. The AONB landscape is sensitive to changes in building mass/bulk. This is something that has been documented in the evidence at para 11.59 but is not reflected in the wording of the policy.</p>	<p>Comments noted.</p> <p>The Council has, through the Housing Site Allocations Development Plan Document, moved towards examining the overall design, including scale, mass and bulk. This is considered to allow applicants and their designers, and the decision maker, greater flexibility in considering the impact of a replacement dwelling on the landscape than purely looking at a numerical size increase. The applicants and decision makers still need to very carefully consider whether the replacement dwelling is proportionate to the existing dwelling, and any size increase has to be considered on the basis of the impact of a particular property in a particular location.</p> <p>The supporting text does provide some information on what would be considered in determining if a replacement dwelling is proportionate.</p> <p>Strengthen paragraph 12.63 (Submission version) of the supporting text of the supporting text to align with changes to DC28 (residential extensions) as follows - 'If a replacement dwelling is disproportionate it will not be acceptable. The key components of proportionality are the scale, massing (<u>volume</u>), height, <u>width</u>, <u>length</u>, <u>footprint (floorspace)</u> of a development, and <u>position within the plot</u></p>

Respondent (with lpr ref)	Response	Council Response
		<u>(layout) and general context of the locality, and layout of a development.</u>
<b>Other stakeholders</b>		
Councillor Tony Vickers (lpr654)	<p>We support this policy. However as our comments on SP2 &amp; SP5 indicate, we wish to encourage proposals for replacement dwellings that are clearly able to achieve or approach a carbon neutral outcome, even if that involves an increase in curtilage to accommodate features of a smallholding. Tackling climate change is at least as important as preserving the landscape character.</p> <p>Amend the wording of criteria (iii) &amp; (iv) to reflect this.</p>	<p>Comments noted.</p> <p>Amend criterion c) as follows – ‘.....uses appropriate materials and sustainable technologies in accordance with <u>policy SP7</u> and does not have an adverse impact on.....’</p> <p>Paragraph 131 of the NPPF states that ‘in determining applications, great weight should be given to outstanding or innovative designs which promote high levels of sustainability, or help raise the standard of design more generally in an area, so long as they fit in with the overall form and layout of their surroundings.’</p> <p>Add the following text to the supporting text – ‘<u>A replacement dwelling creates an opportunity to take positive action on climate change. Replacement dwellings which maximise the opportunities to enhance resilience to climate change in accordance with Policies SP5 and SP7 are encouraged.</u>’</p>
<b>Landowners, site promoters and developers</b>		
Fowler Architecture and Planning (lpr1803)	<p>The NPPF does not seek to control replacement dwellings as a matter of principle, including that replacement dwellings should be proportionate in size and scale to the existing dwelling. Instead, the assessment of proposals should be managed through design, landscape, ecological and heritage policies of the Local Plan. Policy DC24 should be deleted.</p> <p>Nonetheless, as drafted, the following comments on Policy DC24 are provided.</p> <p>The opening paragraph should be amended to confirm that it operates outside of settlements.</p>	<p>Whilst the NPPF does not provide specific guidance relating to replacement of dwellings in the countryside it is clear about the need for good design of development and the importance of responding to local character and distinctiveness, reflecting the identity of local surroundings. The replacement of existing dwellings in the countryside is an important local issue in West Berkshire and the policy will continue to provide a framework for decision making on this matter.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Criterion (ii) is narrowly restrictive and should be revised to also allow consideration of the existing dwelling and its existing outbuildings, as well as the size of the plot the existing dwelling sits within. There should be no limitation that replacement dwellings be proportionate in size and scale, and instead the appropriate size of a replacement dwelling (and capacity of the site to accommodate change) should be landscape and context led.</p> <p>Paragraph 11.59 has identified a perceived problem with the proliferation of replacement dwellings that are alien to the local context and the special qualities of the and natural beauty of the landscape of the AONB, which fails to conserve the landscape of the AONB. The solution to this, if it must be set out in policy, is not restriction of size based on proportionality to existing buildings, but to avoid development where this would result in alien structures that fail to conserve the landscape of the AONB.</p> <p>Criterion (iv) is inconsistent with the NPPF. It is only where an existing dwelling has its use and occupation controlled by the planning system by condition or obligation, that such restrictions on use and occupation could be reasonably imposed on a subsequent application for a replacement dwelling (if the dwelling continued to meet an essential need for a rural worker to live at or near their place of work in the countryside).</p>	<p>Both the title and the first sentence of the policy make it clear it applies to existing dwellings in the countryside.</p> <p>The replacement of small country dwellings with larger houses can radically change the character of a site to one of a more suburban nature and also reduce the supply of smaller rural dwellings. A replacement dwelling, when clearly disproportionate to the original, can be tantamount in its impact to a new dwelling and would therefore undermine both national and local policies on the restriction of new residential development in the countryside. The replacement of existing dwellings will therefore be assessed on the basis of the impact of the new development relative to the existing property on the local character of the area.</p> <p>Dwellings for rural workers are approved as an exception to the restrictive approach to housing in the countryside. This is consistent with the approach taken in the NPPF (paragraph 80) and the Council's Local Plan (Policy C5 of the HSA DPD and LPR submission Policy DM23). It is important that the dwelling still continues to be essential to the enterprise to which it is attached. In West Berkshire it is unusual for rural worker's dwellings not to have occupancy conditions applied. In the event that there isn't a condition applied (if the dwelling was present prior to needing planning permission) it is considered appropriate to ensure the future of the dwelling continues to operate as a rural worker's dwelling.</p>

Englefield Estate (lpr1540)	Provision for the sub-division of existing dwellings in the countryside will help to further meet the needs of rural communities and boost the overall supply of housing. The introduction of draft LPR Policy DC26 is therefore welcomed. It will be important that a positive approach is taken to considering applications for such schemes.	Comments noted
Fowler Architecture and Planning (lpr1789)	<p>The NPPF does not seek to control the subdivision of an existing dwelling in the countryside as a matter of principle. Instead, the assessment of proposals should be managed through design, landscape, ecological and heritage policies of the Local Plan. Policy DC26 should be deleted. Nonetheless, as drafted, the following comments on Policy DC26 are provided.</p> <p>The Government has consulted on revisions to the NPPF. A change at proposed paragraph 80 is that subdivision need not be just of an existing dwelling, but an 'existing building' and therefore the wording of Policy DC26 should reflect the precise definition in the NPPF.</p> <p>Criterion (iii) does not apply in all cases and should be treated as mutually exclusive of the other criteria. It references 'internal changes'. Not all internal changes amount to development and therefore cannot weigh against a proposal. It would be helpful to clarify criterion (iii) in requiring 'represent the optimal viable reuse of a heritage asset in a manner that does not harm the significance of a heritage asset and its setting' to be consistent with the NPPF.</p> <p>Criterion (vii) needs further clarification on how it will operate in conjunction with DC30(h) and (i) which may not be feasible in cases where subdivision does not enable the expansion of the garden.</p> <p>The final paragraph under Policy DC26 (and 11.67) to require consideration of accessibility principles is inconsistent with the NPPF. Paragraph 79</p>	<p>Comments noted</p> <p>The Council considers that a targeted DM policy is necessary to guide development, and to provide clear and transparent advice to developers and DM officers.</p> <p>The NPPF published in July 2021 has not incorporated this change and refers to 'residential building'.</p> <p>It is agreed that planning permission is not always required for internal changes, however, criterion (d) (submission version) applies to heritage assets, where, in the case of listed buildings, internal changes do need to be assessed. Amend criterion (d) (submission version) as follows 'Any internal or external changes do not harm the significance of a heritage asset <a href="#">or its setting in accordance with Policy SP9</a>'</p> <p>Criterion (h) (submission version) deals with curtilages. LPR Policy DM31 (residential amenity) refers to the length of a garden, but does caveat it with 'where possible'. DM31 seeks to ensure sufficient distance between windows</p>

<b>Respondent</b> <i>(with lpr ref)</i>	<b>Response</b>	<b>Council Response</b>
	<p>confirms that isolated homes in the countryside can be formed through subdivision, whereby accessibility to local services and facilities is not determinative of the principle of the development. Given subdivision is expressly supported in isolated locations in the countryside, there cannot be any restrictions on the principle of subdivision in non-isolated locations in the countryside. A lack of accessibility cannot be a justified policy reason to refuse the development.</p>	<p>serving habitable rooms and a garden size would not affect this as the buildings would already be there, rather than assessing the curtilage.</p> <p>The NPPF does allow subdivision in the countryside, but this does not prevent other factors coming in to the assessment of a scheme (and also does not override the statutory status of the development plan as a starting point for decision making). The NPPF also seeks 'accessible services' and for land to be available in the right places (para 8) whilst the whole of section 9 in the NPPF is about promoting sustainable transport. It is therefore still considered consistent with the NPPF to consider accessibility in a development plan policy for West Berkshire.</p>

The Woodland Trust (lpr999)	<p>We support h) in favour of the retention of trees in line with policy DC14 and i) in support of enhancing biodiversity.</p> <p>As well as providing a pleasant residential environment, trees and gardens contribute towards biodiversity and health and well-being and can also help screen or soften the visual impact of a new extension and help to integrate it with the surroundings.</p> <p>We further request that where there is an unavoidable loss of trees on site, that an appropriate number of suitable replacement trees will be required to be planted. We recommend setting a proposed ratio of tree replacement, which reflects the Woodland Trust guidance on <i>Local Authority Tree Strategies</i> (July 2016).</p>	Comments noted. LPR Policy DM15 sets out the Council's approach to trees, woodland and hedgerows. This makes clear that 'where loss or damage to non-protected trees, woodland or hedgerows is unavoidable, that appropriate replacement or compensation, including aftercare, will be required.' The guidance produced by The Woodland Trust will usefully inform that process.
<b>Other stakeholders</b>		
Councillor Tony Vickers (lpr657)	Supports the policy	Comments noted
<b>Landowners, site promoters and developers</b>		
Fowler Architecture and Planning (lpr1806)	<p>The NPPF does not seek to control the extension of an existing dwelling as a matter of principle. Instead, the assessment of proposals should be managed through design, landscape, ecological and heritage policies of the Local Plan. Policy DC27 should be deleted.</p> <p>Nonetheless, as drafted, the following comments on Policy DC27 are provided.</p> <p>Criterion (a). There is no justification for the assessment of the scale of the enlargement to be related to the 'original dwelling'. The planning assessment of the appropriateness of the scale of the enlargement must be relative to the host building as exists at the time of the application.</p>	<p>Comments noted.</p> <p>A great deal of planning applications in the District are for householder extensions. It is not unusual, or unsound, to include detailed planning policies in Local Plans to aid in the design of household extensions and the decision making process in assessing such schemes. The policy gives applicants, agents, interested parties and decision makers clear criteria under which a household extension would be assessed against, thus creating a level of</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Criterion (b). There is no justification for the assessment of the plot characteristics to be judged against the 'original dwelling'. The planning assessment of the appropriateness of the proposal must be relative to the host building as exists at the time of the application.</p> <p>The above criteria do not accord with the Government's objectives to ensure homeowners are able to alter and extend their homes, in all locations. The wording of criterion (a) would preclude an upward extension, which by definition, would not be clearly subservient to an existing dwelling given the increase in height. The scale of an enlargement must consider the host building AND the wider locality. It may be appropriate for extensions that are not subservient provided that they are well designed. The policy must not preclude well-designed extensions.</p> <p>The final paragraph of 11.84 is inconsistent with the Permitted Development Order, which defines the terms for prior notification applications for larger extensions and upward extensions. Proposals subject to prior approval are not subject to policies of the development plan for their assessment. This sentence must be removed.</p>	<p>certainty in what is expected from extensions. The policy would also be read alongside the policies listed in the representation.</p> <p>It is not proposed to delete the policy.</p> <p>It is important to consider the original dwelling, particularly for dwellings outside of any defined settlement boundary. An extension has the potential to dominate the character and appearance of a dwelling and of its locality, and when in the countryside, lead to an overdevelopment and being disproportionate. However, the criterion allows the decision maker to take into account the existing dwelling, ensuring that the extension is of appropriate design and in character.</p> <p>It is particularly important to assess the original dwelling, as it could be the case that extensions upon extensions could significantly change the character of the dwelling, the plot within which it sits, and of the locality, to their detriment. When in the countryside this may suburbanise the plot and adversely affect the rural character and qualities of the area.</p> <p>It is not considered that the policy precludes well designed extensions. The assessment depends very much on the particular circumstances of the dwelling, whether it has been extended previously, its plot, and its surroundings, as well as whether it lies within any designated areas (AONB or Conservation Area). These factors and the proposal would fall into the balance of considerations when determining a planning application.</p> <p>It is not considered the policy precludes certain types of development, but seeks to ensure that extensions do not adversely affect the character of the building, the site, and the surrounding area. The policy cannot preclude permitted development proposals. As outlined below only the impact of amenity can be considered (subject to neighbour objection).</p>

Respondent (with lpr ref)	Response	Council Response
		<p>It is agreed that the policy cannot be used to assess permitted development schemes which are subject to prior approvals in their entirety. Only neighbour amenity can be considered (should a neighbour object).</p> <p>Amend paragraph in the supporting text as follows  <a href="#">‘Proposals which are permitted development subject to prior approval (e.g. larger extensions) can be assessed using criterion d of this policy, as well as Policy DM31 (amenity), in the event where neighbouring residents raise objections’</a>. The decision maker is able to rely on planning policies when making an assessment on neighbour amenity, which Development Management case officers already do.</p>

Heritage Forum (lpr93)	In the absence of national standards, the Council might wish to consider the London Housing Design Guide (2010) <a href="http://www.london.gov.uk/sites/default/files/interim_london_housing_design_guide.pdf">www.london.gov.uk/sites/default/files/interim_london_housing_design_guide.pdf</a> or Housing Design Quality and Standards SPG (2020) <a href="http://www.london.gov.uk/sites/default/files/hdspg_2020_module_c.pdf">www.london.gov.uk/sites/default/files/hdspg_2020_module_c.pdf</a>	Comments noted
Home Builders Federation (lpr1953)	<p>Policy DC29 requires development to meet national spaces standards as a minimum. Whilst the HBF share the Council desire good quality homes delivered within West Berkshire we also consider that space standards can, in some instances, have a negative impact upon affordability issues and reduce customer choice. In terms of choice, for example, some developers will provide entry level two, three and four-bedroom properties which may not meet the optional nationally described space standards, but which would allow on lower incomes can afford a property which has their required number of bedrooms.</p> <p>Given the poor affordability of property in the area and the tight constraints on development it is therefore important that the Council can provide, in line with PPG, robust evidence that there is a need to introduce the optional space standards – that these standards are a must have rather than a nice to have policy. However, we could not find any evidence prepared by the Council to suggest that development below space standards is an endemic concern within West Berkshire. As such we would suggest that policy D5 is deleted from the plan. This would give the Council greater flexibility to maximise the number of sites that are developable as well as extending consumer choice to more households.</p> <p>Changes: We could not find any evidence prepared by the Council to suggest that development below space standards is an endemic concern within West Berkshire. As such we would suggest that policy D5 is deleted from the plan. This would give the Council greater flexibility to maximise the number of sites that are developable as well as extending consumer choice to more households.</p>	<p>Comments noted The supporting evidence will be updated to strengthen the proposed policy and demonstrate that the policy is both needed, and viable as follows –</p> <p><u>'Measurement of dwellings permitted in West Berkshire since the adoption of the Core Strategy show that a significant proportion do not meet the nationally described space standard. This has been found to be the case across the District but is particularly notable for the conversion of residential annexes and for town centre development.'</u></p> <p><u>The West Berkshire whole plan viability assessment has concluded that development across the District can comply with the nationally described space standard (along with the other policies set out in the Local Plan) and remain viable.'</u></p>

<b>Landowners, site promoters and developers</b>		
Bloor Homes and Sandford Farm (lpr2178)	<p>Policy DC29 requires new residential development to meet, as a minimum, national space standards. In addition, this Policy seeks to secure the 'optional' space standards. The PPG advises that:</p> <p>Where a need for internal space standards is identified, local planning authorities should provide justification for requiring internal space policies. Local planning authorities should take account of the following areas: need – evidence should be provided on the size and type of dwellings currently being built in the area, to ensure the impacts of adopting space standards can be properly assessed, for example, to consider any potential impact on meeting demand for starter homes. viability – the impact of adopting the space standard should be considered as part of a plan's viability assessment with account taken of the impact of potentially larger dwellings on land supply. Local planning authorities will also need to consider impacts on affordability where a space standard is to be adopted timing – there may need to be a reasonable transitional period following adoption of a new policy on space standards to enable developers to factor the cost of space standards into future land acquisitions.</p> <p>Rather than provide the justification necessary to include these 'optional' standards in the Local Plan, the Council's approach is to place the burden of justifying a departure from this policy requirement on to the developer/applicant. This is plainly at odds with the Government's intention and results in highly prescriptive standards being required as a matter of course.</p>	<p>Comments noted The supporting evidence will be updated to strengthen the proposed policy and demonstrate that the policy is both needed, and viable as follows –</p> <p><u>'Measurement of dwellings permitted in West Berkshire since the adoption of the Core Strategy show that a significant proportion do not meet the nationally described space standard. This has been found to be the case across the District but is particularly notable for the conversion of residential annexes and for town centre development.'</u></p> <p><u>The West Berkshire whole plan viability assessment has concluded that development across the District can comply with the nationally described space standard (along with the other policies set out in the Local Plan) and remain viable.'</u></p>
Sovereign Housing Association Ltd. (lpr2170)	SHA strongly believe everyone should have access to a safe, adequately sized and energy efficient home. The impact of national and regional lockdowns, enforced during the global pandemic, have highlighted the importance of ensuring people have access to adequately sized homes.	Comments noted. The proposed policy will be amended to avoid repeating national policy and to ensure clarity as follows –

Respondent (with lpr ref)	Response	Council Response
	<p>SHA broadly support the aspiration of Policy DC29 requiring all development within West Berkshire to meet the nationally described space standards.</p> <p>It is noted the policy sets out eight additional components to be achieved. These components mirror those already set out within the NDSS and are unnecessarily listed and risk confusion should the NDSS be revised during the Plan Period.</p>	<p><u>'All new dwellings, including from permitted development, change of use, and conversion, should comply with the Proposals for new residential units will be required to meet nationally described space standards, as set out in the Technical Housing Standards (2015) or as superseded.</u></p> <p>[4]</p> <p>In addition to the above, the following should be provided, where practicable:</p> <p>a) A dwelling with two or more bedspaces shall have at least one double (or twin) bedroom;</p> <p>b) In order to provide one bedspace, a single bedroom shall have a floor area of at least 7.5 sq m and is at least 2.15 m wide;</p> <p>c) In order to provide two bedspaces, a double (or twin bedroom) shall have a floor area of at least 11.5 sq m;</p> <p>d) One double (or twin bedroom) shall be at least 2.75 m wide and every other double (or twin) bedroom shall be at least 2.55 m wide;</p> <p>e) Any area with a headroom of less than 1.5 m shall not be counted within the gross internal area unless used solely for storage (if the area under the stairs is to be used for storage, assume a general floor area of 1.0 sq m within the gross internal area);</p> <p>f) Any other area that shall be used solely for storage and has a headroom of 900-1500 mm (such as under eaves) shall be counted at 50% of its floor area, and any area lower than 900 mm shall not be counted at all;</p> <p>g) A built-in wardrobe counts towards the gross internal area and bedroom floor area requirements, but shall not reduce the effective width of the room below the minimum widths set out above. A built-in area in excess of 0.72 sq m in a double bedroom and 0.36 sq m in a single bedroom counts towards the built-in storage requirement; and</p> <p>h) The minimum floor to ceiling height shall be 2.3 m for at least 75% of the gross internal area.</p>

Respondent (with lpr ref)	Response	Council Response
		[1] <del>Appropriate space standards are achieved by meeting the nationally described space standard, or any subsequent Government standard.</del> <sup>1</sup>
Tetlow King Planning Ltd for Aster Group (lpr2356)	<p>Nationally Described Space Standard</p> <p>We understand that Policy DC 29 requires all new residential development to adhere to the Nationally Described Space Standard (NDSS). If the Council seeks to require NDSS across all residential development, it must be demonstrated that it is being done to address a clearly evidenced need, as set out in Planning Practice Guidance (Paragraph: 002 Reference ID: 56-002-20160519). In the absence of this evidence, a blanket application of NDSS might undermine the viability of development schemes and through viability testing of application proposals, will result in fewer affordable homes being delivered across West Berkshire. The NDSS is not a building regulation and remains solely within the planning system as a form of technical planning standard. It is not therefore essential for all dwellings to achieve the standard in order to provide good quality living. For affordable housing in particular, there may be instances where achieving NDSS is impractical and unnecessary.</p> <p>We also note that footnote [1] of Policy DC 29 states that “Appropriate space standards are achieved by meeting the nationally described space standard, or any subsequent Government standard.” Requiring future development to comply with a standard that is currently unknown and therefore not robustly viability tested in West Berkshire at this stage would be inappropriate. Viability testing against any new future standard would be needed before the local plan could require applicants to comply with such a standard.</p> <p>Changes: We recommend that the Council reviews the local plan viability assessments with regard to these matters in accordance with the PPG tests which require that where a need for the standards is identified, local planning authorities should justify inclusion of a policy, taking account of need, viability and timing:</p>	<p>Comments noted.</p> <p>The supporting evidence will be updated to strengthen the proposed policy and demonstrate that the policy is both needed, and viable as follows –</p> <p><u>‘Measurement of dwellings permitted in West Berkshire since the adoption of the Core Strategy show that a significant proportion do not meet the nationally described space standard. This has been found to be the case across the District but is particularly notable for the conversion of residential annexes and for town centre development.</u></p> <p><u>The West Berkshire whole plan viability assessment has concluded that development across the District can comply with the nationally described space standard (along with the other policies set out in the Local Plan) and remain viable.’</u></p> <p>Agreed. Future standards cannot be predicted at this stage and would need to be considered before being introduced in the local plan. The supporting text will be amended as follows -</p> <p><u>‘It is important that new homes should provide an adequate living environment for their occupiers. Building to appropriate space standards will ensure new homes provide sufficient space for basic daily activities and needs.</u> <u>New homes in England are amongst the smallest in Europe and houses that are too small, or that are</u></p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• <b>“need</b> – evidence should be provided on the size and type of dwellings currently being built in the area, to ensure the impacts of adopting space standards can be properly assessed, for example, to consider any potential impact on meeting demand for starter homes.</li> <li>• <b>viability</b> – the impact of adopting the space standard should be considered as part of a plan’s viability assessment with account taken of the impact of potentially larger dwellings on land supply. Local planning authorities will also need to consider impacts on affordability where a space standard is to be adopted.</li> <li>• <b>timing</b> – there may need to be a reasonable transitional period following adoption of a new policy on space standards to enable developers to factor the cost of space standards into future land acquisitions.”</li> </ul> <p>(Paragraph: 020 Reference ID: 56-020-20150327)</p> <p>We also note that footnote [1] of Policy DC 29 states that “<i>Appropriate space standards are achieved by meeting the nationally described space standard, or any subsequent Government standard.</i>” Requiring future development to comply with a standard that is currently unknown and therefore not robustly viability tested in West Berkshire at this stage would be inappropriate. Viability testing against any new future standard would be needed before the local plan could require applicants to comply with such a standard.</p>	<p><u>overcrowded, can impact on the quality of life of the residents of those homes. West Berkshire Council’s evidence indicates that new homes in the District often fall short of the nationally described space standards.</u></p> <p>The NPPF highlights that high quality design and a good standard of amenity should be sought in new development. National policy also recognises that local planning authorities should address barriers to improving health and wellbeing through a high standard of housing design. This policy requires new homes to have appropriate space for occupants to enable them to have a good quality of life and healthy lifestyle.</p> <p><u>The Government has introduced nationally described space standards to help the delivery of houses that are of a sufficient size for the occupiers of those homes. This policy sets out that the Council will require all new residential development in the District to comply with the nationally described space standards (or any subsequent Government standard). that new housing in the district are expected to achieve.</u> The Council’s starting point will be for all new homes, including subdivisions of larger properties and conversions, to meet the appropriate space standards.  <del>Nationally described space standards have been issued by the Ministry of Housing, Communities and Local Government (MHCLG) in order to advise local authorities, the minimum standards that should be achieved. The Council will therefore require all residential development to meet the nationally described space standard (or any subsequent Government standard). unless it can be shown that the standards are not practicable in the face of other material considerations and policy requirements. For example, an exception may be</del></p>

Hungerford Town Council (lpr174)	Agree with the proposed policy.	Comments noted.
Shaw-cum-Donnington Parish Council (lpr256)	We support the policy. How does the parking apply to flats particularly in the town centre? In these cases little or no amenity space is provided apart from cycle or (if you are lucky) car parking space.	The Policy provides guidance for outdoor amenity space for flats. There is no distinction between town centre locations and out of centre locations, as the local environment (e.g. proximity to public green spaces) may affect the amount of open space provided as part of a development. Parking does not count in the amenity space calculation. Furthermore, balconies, where they do provide high quality space (e.g. Newbury Racecourse) may be counted as outdoor amenity space.
Stratfield Mortimer Parish Council (lpr438)	Agree with the proposed policy.	Comments noted.

Respondent (with lpr ref)	Response	Council Response
Greenham Parish Council (lpr930)	Agree with the proposed policy.	Comments noted.
Newbury Town Council (lpr2227)	We support this policy	Comments noted.
<b>General consultation bodies</b>		
Heritage Forum (lpr94)	<p>Based on current trends, should not new dwellings include space which can be used as office space?</p> <p>11.100 We suggest that this clause is included in DC30.</p>	<p>The Policy is primarily aimed at ensuring that new developments do not have an adverse impact on neighbouring properties, and ensure that there is adequate private amenity (garden) space and a source of natural light.</p> <p>Adequate provision of amenity space can vary between properties, particularly where there is already a garden space which is smaller than what the policy is trying to achieve. As the policy applies to flats as well as houses it is considered appropriate to keep the guide for sizes in the supporting text.</p> <p>Emerging Draft LPR Policy DM30 (Residential Space Standards) refers to internal residential space standards, with a cross reference to that policy in DM31.</p>
<b>Other stakeholders</b>		
Councillor Tony Vickers (lpr660)	Agree with the policy.	Comments noted.
<b>Landowners, site promoters and developers</b>		
Bloor Homes & Sandford Farm (lpr2179)	<p>We agree that all development should provide a high standard of amenity for existing and future occupiers of land and buildings. These are considerations that vary from case to case and must therefore be determined on that basis. The second half of the policy prescribes various amenity requirements. Whilst unobjectionable as a matter of principle, certain of these set out particular standards (by reference to DC29), dimensions or distances.</p>	<p>The policy seeks to provide a high standard of amenity for existing and future users of land and buildings, and includes particular criteria for the designer and decision maker to consider. The recommended garden distance is a long established method of seeking to achieve a distance of 21 metres between windows, to avoid overlooking.</p>

<b>Respondent</b> <i>(with lpr ref)</i>	<b>Response</b>	<b>Council Response</b>
	<p>We have made comments in relation to DC29 already and do not repeat these here.</p> <p>In respect of garden dimensions and separation distances, there may justifiable reasons why in individual circumstances these cannot be achieved. Determination of a planning application will require judgement as to whether, in those instance, residential amenity would be materially harmed on the basis of factor and degree. This requires a degree of flexibility to be introduced into the policy.</p>	<p>The policy is a starting point, and should there be any justified ground on which the criteria cannot be complied with, evidence can be provided with the scheme (at pre-application/planning application stage). It is then for the decision maker to make a judgement on whether the scheme is acceptable.</p>

Shaw cum Donnington Parish Council (lpr257)	We support the policy. We note that proposals that would result in the loss of employment floorspace will not be permitted. How does this relate to the conversion of office buildings to residential use that has recently been permitted by government? So how is it intended to protect such office buildings from conversion?	<p>Comments noted. No changes to the policy are required in light of this representation.</p> <p>Support for the policy is noted.</p> <p>In accordance with national legislation, the General Permitted Development Order (GDPO as amended) allows for the conversion of offices to residential under permitted development rights, subject to the prior approval process. Supporting text will be added to highlight that were necessary and appropriate planning conditions may be imposed to restrict changes of use on new development in order to maintain the supply of space/land.</p>
Stratfield Mortimer Parish Council (lpr439)	<p>Policy is supported.</p> <p>We have slight reservations about this: This is the first time that Employment outside designated Employment Areas is mentioned in any meaningful way. Would it not be appropriate to mention this in the SPs? This is particularly appropriate with the home working economy having risen so quickly due to the pandemic.</p>	<p>Comments noted.</p> <p>Emerging Draft LPR Policies SP20 and SP21 set out the Council's strategic approach to business development, which seeks to encourage such development to locate within settlement boundaries and Designated Employment Areas (DEAs), as well as existing employment locations and allocated sites.</p> <p>The Emerging Draft LPR policy will be amended to provide clarity and avoid duplication with other policies within the</p>

Respondent (with lpr ref)	Response	Council Response
		plan. Text relating to business development outside DEAs will be moved to Policy SP20, and signposted to Proposed Submission LPR Policy DM35 – Sustaining a Prosperous Rural Economy – which considers economic development, including office, industry, storage and distribution, in the countryside.
Greenham Parish Council (lpr931)	<p>Policy is not supported.</p> <p>There isn't an understandable definition of small scale commercial in the proposed policy.</p> <p>Changes to be made/preferred approach: GPC would like a definition created to define what is meant by small scale commercial.</p>	Comments noted. The policy will be amended to provide clarity regarding development within DEAs.
Newbury Town Council (lpr2226)	<p>We broadly support this policy, but it is unclear what is meant by “small scale commercial and services uses” or why they might not be permitted in DEAs.</p> <p><b>Reason:</b> Every kind of “commercial and services” land use would seem to involve “employment”. So, it is unclear why there is a need for any policy to control it. It might even be encouraged, because if (for example) it means personal services like hairdresser or food takeaway food, then locating such businesses within a DEA surely should reduce the need of customers working in that DEA to travel to/from the DEA to secure those services.</p> <p>An entire rethink of “business uses” within the Local Plan appears to be needed. So much “business” now takes place within the home. It makes the separation of “residential” and “non- residential” property for all purposes (including local taxation) seem outdated. However, this is a matter beyond planning policy although linked to it.</p> <p>There should perhaps be some reference to “live-work” units here – or in a separate policy.</p> <p>Changes to be made/preferred approach: None proposed at this stage. Examples are needed to show why this aspect of the policy is required,</p>	<p>Comments noted. The policy will be amended to provide clarity regarding development within DEAs.</p> <p>This policy relates to DEAs, their role and function as well as the uses permitted within these areas. They are locations across the District designated for business development, and for the purposes of the LPR business development relates to offices, industry, storage and distribution uses. Other employment generating uses, such as hairdressers, supermarkets etc. fall under the term economic development which is wider than the term business development within this plan.</p> <p>The Planning Practice Guidance (PPG) requires strategic policy-making authorities to gather evidence on existing business needs and plan for future business uses.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>especially with the major changes expected to the nature of “offices”. However, that part which allows for “Outside of DEA” business uses is supported, although the use of “(a)” when there is no “(b)” is redundant.</p>	
<p>Lambourn Neighbourhood Development Plan Steering Group (lpr1708)</p>	<p>EMP5 - The LNDP welcomes the opportunity to comment on West Berkshire's Local Plan Review.</p> <p>We have based our comments on our findings from the Residents' Survey undertaken by the LNDP as well as recognizing and embracing the need to further develop employment opportunities locally. The Landscape Character Appraisal for the emerging Lambourn Neighbourhood Development Plan includes a local Landscape Character Area, within the Shefford Wooded Downland LCA, based on Membury Airfield (LCA3). It recommends that to help plan, manage and protect the distinctiveness of LCA3, <i>The scale and planning of development at this location needs much careful consideration of any further growth to help avoid further change in character.</i></p> <p>Although recognised as an area of low demand, with constraints of being in an AONB. with a few Heritage Sites and Conservation Areas we would actively encourage the development of small local enterprise as we want the Parish to be a place where people want to live and work, as well as continuing to strengthen and the develop the Racing Industry within the Valley and the cluster industries that surround it.</p> <p>In the plan there is an intention to extend the DEA at Membury, this is one area where we believe there is little evidence to support the expansion, that would not have a detrimental impact on the rural character of the area and the AONB.</p> <p>We have seen much development of the existing compact Membury site and have witnessed a marked increase of HGV'S and other large transporters to the area, any further development in this area would be unsustainable. Other areas within the Parish are Lowesdon work, the Membury Business Park, Hurst Farm, Hadley Farm, and the Membury Business Park. These sites are spread out along Ermin Street and Ramsbury Road and sit amongst the</p>	<p>Comments noted.</p> <p>This representation is a duplicate of the representation made on Emerging Draft LPR Policy SP21. See the Council's response to this representation on Emerging Draft LPR Policy SP21 (ref: lpr1707).</p> <p>To inform the LPR the Council has undertaken landscape sensitivity and capacity assessments on the Membury Industrial Estate and Lowesdon Works (Membury Business Park) to gain a better understanding of the impact of existing and planned/proposed development on the area. The Landscape Sensitivity and Capacity Assessments will be published alongside the Regulation 19 consultation.</p> <p>Proposed Submission LPR Policy DM35 – Sustaining a Prosperous Rural Economy recognises that many rural areas host a large number of small and medium sized enterprises which are vital to providing local job opportunities and a diverse economy. The policy therefore seeks to support appropriate new or expanding businesses in the countryside, supporting sustainable economic growth within the rural areas without detriment to the environment.</p> <p>Further to this, Proposed Submission LPR Policy DM37 relates to the Equestrian and Horseracing Industry and seeks to maintain and allow for its sensitive growth, whilst conserving environmental quality and countryside character.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>open green spaces within the AONB - the importance of maintaining the balance between the spread-out Hamlets and Industry is key as we do not want to lose the vistas and open spaces.</p> <p>Four of the above-mentioned sites offer opportunities for small local enterprise in keeping with the North Wessex Downs AONB Policy, two are yet to be redeveloped, but have acquired planning consent (Hadley Farm and Lowesdon Works) whilst Membury Business Park has several units unoccupied, as does Ariel Business Park.</p> <ul style="list-style-type: none"> <li>• Economic forecasts show industrial job growth is predominantly in the East of west Berkshire-not in the West where this sloe is located.</li> <li>• There is poor road access to the M4. The distance from Membury to Junction 14 is 7kms, mainly along unclassified rural lanes and the B4000 (Ermin Street), none of which have pavements.</li> <li>• The proposed site is located within the Area of Outstanding Natural Beauty and previously additional development in this area has been deemed unsustainable by both West Berkshire Council's own Highways and Environmental Planning experts. This year the annual AONB Conference (29/01/21) again stressed the importance of protecting and conserving these areas. Plans to encroach on these areas need to have a major economic benefit and must have considered alternative sites. Within the WBC Employment Land Review (ELR), alternative sites are identified, in areas where demand for this type of expansion is required, therefore the extension of EMP5 cannot be justified.</li> <li>• Over a third of all proposed industrial expansion in West Berkshire is at EMP5 in the Western area. The ELR however identifies that all major housing developments are in Newbury and the East. This leads to an imbalance between new homes and new work opportunities. In effect, people would need to commute to work which would again impact on the local road networks around Membury - which would increase the unsustainability of this site.</li> <li>• Carbon Dioxide levels show West Berkshire as the worst performing region in the whole of Berkshire, and well above South East England by 38%. EMP5 will generate significantly longer travel journeys than</li> </ul>	<p>Sites identified through the HELAA, the call for sites, and Regulation 18 consultation have been assessed for their potential to be allocated for employment uses. All site assessments can be found in the HELAA and the site selection process is documented within the SA/SEA published alongside the Regulation 19 consultation. In addition, the Council's employment land evidence (ELR 2020 and ELR 2022) considers sites promoted to the Council from a property market perspective and this evidence has also inform the proposed site allocations within the LPR.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>other sites, increasing the carbon emissions for the area, when WBC wish to reduce these in West Berkshire.</p> <ul style="list-style-type: none"> <li>The Membury PEA (now DEA) is made up of 8 parcels of land in Lambourn Woodlands. Two of the largest DEA sites lie adjacent to the proposed extension area, (this does not include the Motorway Services). Ramsbury Road and Ermin Street (B4000) are the access routes in the main to Membury, although traffic is also travelling along the A4 and reaching the site via Chilton Foliat. The B4000 is on the WBC Freight Route Plan, but this has not been updated since 2009, and there has been a significant increase in traffic to Membury since then by HGVs as the businesses have developed on site. The EMP5 site is the industrial site furthest from an A road.</li> </ul>	
<b>General consultation bodies</b>		
West Berkshire Heritage Forum (lpr95)	<p>Policy is supported.</p> <p>It may be implied, but is not stated, that DEA's will afford protection against conversion of premises to housing under PDR's. Is that correct? If so, it will be a great relief.</p>	<p>Comments noted. No changes to the policy are required in light of this representation</p> <p>In accordance with national legislation, the General Permitted Development Order (GDPO as amended) allows for the conversion of offices to residential under permitted development rights, subject to the prior approval process. Supporting text will be added to highlight that where necessary and appropriate planning conditions may be imposed to restrict changes of use on new development in order to maintain the supply of space/land.</p>
<b>Other stakeholders</b>

	<p>1. Examples are needed in supporting text to make clear the purpose of this policy and what exactly it means, especially with the major changes expected to the nature of “offices”. However that part which allows for “Outside of DEA” business uses is supported, although the use of “(a)” when there is no “(b)” is redundant.</p> <p>2. This site should be re-named “<b>Theale Rail-served Site</b>” and policy wording changed to “The rail-served site at Wigmore Lane, Theale, is reserved solely for those uses that require rail access....”</p>	
Savills on behalf of Englefield Estate (lpr1541)	<p>Draft LPR Policy DC31 relates to Designated Employment Areas (DEAs) and states that proposals for employment uses will continue to be focused within DEAs. Whilst this is a logical and sustainable approach, it is important to ensure that this is balanced with supporting the needs of the rural economy as set out at draft LPR Policy DC32. The NPPF sets out a positive approach towards supporting the rural economy and is clear that planning policies should enable <i>‘the sustainable growth and expansion of all types of business in rural areas’</i> (paragraph 83). It is therefore important that the LPR does not restrict rural employment development in rural areas and that draft LPR Policies DC31 and DC32 are applied together.</p> <p>Draft LPR Policy DC31 also supports proposals for business uses <i>‘outside of Designated Employment Areas’</i> which are compatible with surrounding uses and does not have harmful highways or amenity impacts. It is assumed that this wording relates to sites close to DEAs or within the urban area, rather than the wider rural area (more specifically covered by draft LPR Policy DC32), and therefore further clarification is required.</p>	<p>Comments noted. The policy will be amended to provide clarity.</p> <p>Proposed Submission LPR Policy DM35 – Sustaining a Prosperous Rural Economy recognises that many rural areas host a large number of small and medium sized enterprises which are vital to providing local job opportunities and a diverse economy. The policy therefore seeks to support appropriate new or expanding businesses in the countryside, supporting sustainable economic growth within the rural areas without detriment to the environment.</p> <p>Emerging Draft LPR Policies SP20 and SP21 set out the Council’s strategic approach to business development, which seeks to encourage such development to locate within settlement boundaries and Designated Employment Areas (DEAs), as well as existing employment locations and allocated sites.</p> <p>The Emerging Draft LPR policy will be amended to provide clarity and avoid duplication with other policies within the plan. Text relating to business development outside DEAs will be moved to Policy SP20, and signposted to Proposed Submission LPR Policy DM35 – Sustaining a Prosperous Rural Economy – which considers economic development,</p>

		including office, industry, storage and distribution, in the countryside.
Deloitte on behalf of Green Park Reading No.1 LLP (lpr2030)	<p><i>Full representation attached in relation to expansion of Green Park, Reading.</i></p> <p>Whilst Policy DC31 states that proposals for business uses outside the District's defined Designated Employment Areas will be permitted subject to various criteria, any new business uses in the Green Park area would need to address the sequential test set out in Policy DC20. This creates a potential barrier to the long-term investment and sustainable growth of the Park.</p>	<p>Comments noted. No changes to the policy are required in light of this representation.</p> <p>Emerging Draft LPR Policies SP20 and SP21 set out the Council's strategic approach to business development, which seeks to encourage such development to locate within settlement boundaries and Designated Employment Areas (DEAs), as well as existing employment locations and allocated sites.</p> <p>Whilst the Emerging Draft LPR Policy SP20 will be amended to remove the requirement for office developments within a DEA to satisfy the sequential test, proposals for office development not within a DEA or town or district centre will be required to satisfy the sequential test.</p>
Ptarmigan Group (lpr2347)	Draft Policy DC31 relates to DEAs and states that proposals for employment uses will continue to be focused within DEAs. This is a logical and sustainable approach and aligns with Section 6 (Building a strong, competitive economy) of the NPPF.	Comments noted. No changes to the policy are required in light of this representation.
Pro Vision on behalf of Wasing Estate (lpr2069)	<p>In relation to Larkwhistle Farm, Brimpton (full representation attached)</p> <p>Draft Policy DC31 states that proposals for employment uses will continue to be focused within the District's Designated Employment Areas. We consider the LPR should not rely heavily on existing and Designated Employment Sites to meet the identified requirements. The Council should be flexible and consider if additional land can be identified, as noted in the Employment Land Review.</p> <p>Nonetheless, although no specific sites are identified, draft Policy DC31 does allow for business uses outside of the District's defined Designated</p>	<p>Comments noted. No changes to the policy are required in light of this representation.</p> <p>Emerging Draft LPR Policies SP20 and SP21 set out the Council's strategic approach to business development, which seeks to encourage such development to locate within settlement boundaries and Designated Employment Areas (DEAs), as well as existing employment locations and allocated sites.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Employment Areas where they are compatible with uses in the surrounding area and do not result in conflict from vehicular movement and/or with the amenity of neighbouring occupiers. We support this allowance and flexibility.</p> <p>Larkwhistle Farm is within close proximity (approximately 600m) to Calleva Park, a Designated Employment Area and could be seen as an extension to this Area. Employment uses at the site would be compatible with the uses in the surrounding area, as described above and therefore would not result in conflict with these neighbouring occupiers.</p> <p>The site is of a sufficient distance away from existing residential development as well as there being intervening fields, meaning there would be no harm to residential amenity. This accords with draft Policy DC31.</p>	<p>The Emerging Draft LPR policy will be amended to provide clarity and avoid duplication with other policies within the plan. Text relating to business development outside DEAs will be moved to Policy SP20, and signposted to Proposed Submission LPR Policy DM35 – Sustaining a Prosperous Rural Economy – which considers economic development, including office, industry, storage and distribution, in the countryside.</p> <p>Sites identified through the HELAA, the call for sites, and Regulation 18 consultation have been assessed for their potential to be allocated for employment uses. All site assessments can be found in the HELAA and the site selection process is documented within the SA/SEA published alongside the Regulation 19 consultation.</p>
Savills on behalf of Lambourn Business Park (lpr2106)	<p>We write on behalf of Lambourn Business Park. The Park provides office, storage and industrial space, south of Lambourn itself in Lambourn Woodlands (close to Membury). The Business Park focuses on providing flexible, cost effective accommodation for local businesses. It enjoys a strong location between Swindon and Newbury and close to Junction 14 of the M4. Full details can be seen at <a href="http://lambournbusinesspark.co.uk">lambournbusinesspark.co.uk</a>.</p> <p>The estate was formerly known as Lowesdon Works but has since been rebranded. Accordingly the site is identified as a Designated Employment Area (Appendix 6) as Lowesdon Works and we would request that the Local Plan is updated to identify the site as Lambourn Business Park.</p> <p>We support the identification of the site as a Designated Employment Area. However, we request that the Local Plan Review reflects the contribution that the Lambourn Business Park could make to the West Berks economy.</p> <p>We note that the Local Plan Review suggests extensions to various Designated Employment Areas at Thatcham, Aldermaston and the Membury Industrial Estate at Lambourn Woodlands. There appears to be no justification as to why these Designated Employment Areas are considered</p>	<p>Comments noted.</p> <p>This representation is a duplicate of the representation made on Emerging Draft LPR Policy SP21. See the Council's response to this representation on Emerging Draft LPR Policy SP21 (ref: lpr2105).</p> <p>The policy will be amended to reflect the rebranding of the site.</p> <p>Sites identified through the HELAA, the call for sites, and Regulation 18 consultation have been assessed for their potential to be allocated for employment uses. All site assessments can be found in the HELAA and the site selection process is documented within the SA/SEA published alongside the Regulation 19 consultation.</p> <p>As part of the evidence base which informs the LPR the Council has undertaken a review of the District's Protected Employment Areas, to be renamed Designated</p>

Respondent (with lpr ref)	Response	Council Response
	<p>to be appropriate for expansion whilst the Lambourn Business Park is not considered appropriate. We consider that the Lambourn Business Park is entirely suitable for expansion and indeed enjoys an extant planning permission for new building. The Local Plan Review should be updated to reflect this.</p> <p>Changes to be made/preferred approach: There are two potential areas for expansion at the Lambourn Business Park. The first area (shown in blue) would expand the site up to the built form and tree boundary at the western edge of the site. Most of this land benefits from an extant planning permission for development (planning reference APP/W0340/A/12/2177100 (LPA ref 11/01822/OUTMAJ) for erection of buildings to accommodate “increased storage and warehousing facilities and ancillary training and office facilities, associated car parking, landscaping, surface water drainage storage, and associated works”). At the very least, the Local Plan Review should be updated to reflect the extant planning permission.</p> <p>Additionally there is the potential to expand the Lambourn Business Park southwards as far as the existing southernmost part of development (shown in green).</p> <p>The expansion of the Lambourn Business Park would contribute to the identified need for c60,000 sq m of industrial floorspace over the plan period. It would build on the success of an existing Designated Employment Area in a location that has proven to be successful. Additional floorspace at the Lambourn Business Park would give the employment area greater critical mass and increase its attractiveness to local businesses. Other employment areas within West Berkshire have been identified for expansion and there is no reason why the Lambourn Business Park should not also be considered.</p> <p>The NPPF requires planning policies to help create the conditions in which businesses can invest, expand and adapt. Significant weight should be placed on the need to support economic growth and productivity (paragraph 80). Paragraph 84 states that planning policies and decisions should recognise that sites to meet local business needs in rural areas may have to</p>	<p>Employment Areas (DEAs) through the LPR process. As part of this work, the Lowesdon Works (Lambourn Business Park) site including the parcels of land identified within this representation has been considered and subject to a landscape sensitivity and capacity assessment. The conclusions of the DEA review work and Landscape Sensitivity and Capacity Assessment will be published alongside the Regulation 19 consultation.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>be found adjacent to or beyond existing settlements. The identification of a small expansion of Lambourn Business Park would accord with those policy adjectives.</p>	
<p>Bell Cornwell on behalf of Kerridge Properties Ltd (lpr2129)</p>	<p>Policy is not supported.</p> <p>(In relation to land at Charnham Park, Hungerford - <i>see attached for full representation</i>)</p> <p>These representations are submitted on behalf of our client Kerridge Properties Ltd in response to the current consultation on the Regulation 18 version of the emerging West Berkshire Local Plan.</p> <p>On their behalf, we are promoting an area of land at Charnham Park in Hungerford as suitable for removal from the proposed boundary of the Designated Employment Area (DEA) in this location.</p> <p>The site is currently included within the Protected Employment Area (PEA) of Charnham Park. This is a long-standing planning designation which seeks (in summary) to protect land within the employment area for uses within the historic B use classes (business, general industrial and storage/distribution). The land has not come forward for an employment use despite being included within an employment area for over 20 years.</p> <p>We therefore seek the removal of the land from this restrictive use to give additional flexibility for the site to be developed for an alternative use. Our clients would seek a use which was compatible with the area and, in any case, the relationship of any proposal with the surrounding uses would be fully assessed as part of the development management process.</p> <p>We consider that the information that we will set out within these representations provides a robust support of our client's position and that making this change to the boundary would be a justified strategy which would increase the effectiveness of the Local Plan.</p> <p>The proposed amendment would also be consistent with national policy. We</p>	<p>Comments noted.</p> <p>This representation is a duplicate of the representation made on Emerging Draft LPR Policy SP20. See the Council's response to this representation on Emerging Draft LPR Policy SP20.</p> <p>As part of the evidence base which informs the Local Plan Review the Council has undertaken a review of the District's Protected Employment Areas, to be renamed Designated Employment Areas (DEAs) through the LPR process. As part of this work, Charnham Park and the parcel of land submitted within this representation has been considered. The conclusions of the DEA review work will be published alongside the Regulation 19 consultation.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>will refer to the National Planning Policy Framework (NPPF) and the supporting Planning Practice Guidance (PPG) on the issue of the effective use of land and evidence regarding whether land should be reallocated for a more deliverable use.</p> <p>We show below, for ease of reference, the area of land which we are promoting as suitable for removal from the proposed Designated Employment Area (DEA) at Charnham Park. We also include a full sized version of this plan as Appendix A. <i>See attached</i></p> <p>The red hatched area is the undeveloped area of land that we are seeking to be excluded from the DEA. This is shown on the plan in two parcels – Parcel A is to the north of the pipeline and measures 2264 sqm. Parcel B measures 5970 sqm. The blue area is other land within our client’s ownership at Charnham Park.</p> <p>It can be seen that the land is split by a fuel pipeline which runs directly to Heathrow. This cannot be moved and has to be protected in perpetuity. The undeveloped land runs to the south of the pipeline. The area also extends to the north of the pipeline. This area is also generally unmade and currently used as overflow parking by CDK.</p> <p>Whilst we seek the removal of all of the hatched area, if the Council does not consider that this would be a justified amendment to the DEA then we would be willing to accept the release of Area B in isolation.</p> <p>Site History</p> <p>The site lies on part of an extant permission for B1 uses as permitted under application reference 01/01227/ful. Part of this has been implemented and comprises the office block to the north of the application site. 01/01227/ful. Erection of Headquarters B1 development (6158m2) comprising research and development facilities, management training centre plus ASP centre plus 217 car parking spaces Erection of 2 storey Amenity and Recreation Building (2035m2) plus parking. This was granted consent in</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>2003 but only partially implemented through the construction of an office block to the north of the site.</p> <p>10/00845/COMIND. This was an application for a 65-bed hotel development including ancillary facilities and a restaurant, together with 42 car parking spaces for the hotel plus a further 23 spaces to be shared with the adjoining offices to the rear.</p> <p>The proposal was on part of the land covered by the extant B1 consent from 2001. The application was refused by the Council but won on appeal. The appeal decision concluded that <i>the hotel proposal would provide for employment generating development which would make a positive contribution to the local tourism industry and the economy of the area, and meet the objectives of up to date Government policy</i></p> <p>The appeal Inspector also concluded that the site was in a sustainable location and that the hotel proposal would not be harmful to the AONB or to the character or appearance of the Kennet and Avon canal.</p> <p>Whilst the consent has been implemented in planning terms, it has not, however, been delivered for a hotel use.</p> <p>It is also relevant that our client successfully appealed a refusal by the Council (and won partial costs) for the change of use of a former children's creche (use class D1) at the adjacent Herongate Leisure Centre to 4 serviced apartments (use class C1). This was application reference 19/00429/FUL from 2019. The Inspector stated that: <i>it is apparent that uses falling outside the B Classes of the UCO have been found acceptable within the area that is the subject of the employment designation.</i></p> <p>The Council has demonstrated inflexibility on an ongoing basis with regard to the interpretation of its employment policy, which has led to suitable proposals outside of business uses being refused by the Council but won at appeal. This gives a considerable additional degree of uncertainty and</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>potential high costs when considering the future use of the site. This is off-putting for future operators when considering the potential of the site.</p> <p>No development in the historic B use classes has come forward on the site outside the original B1 office consent which was granted 20 years ago. By continuing to restrict development on the site on an ongoing basis by applying an out of date policy position, the Council is rendering the land unusable. This is not a proactive response, nor is it responsive to the changing working environment or the wider needs of Hungerford Town.</p> <p>Emerging Policy and Evidence</p> <p>Within the extant development plan, the site currently lies within a Protected Employment Area (PEA) and the policy approach to development within the PEAs is set out in policy CS9 of the adopted Core Strategy (Location and Type of Business Development). This policy, in turn, replaced policy ECON 1 of the 'old' West Berkshire Local Plan, but did not update the boundaries of the employment areas.</p> <p>The supporting text to policy CS9 confirms that 'a comprehensive assessment of existing Protected Employment Areas and their boundaries will take place as part of the Site Allocations and Delivery DPD.....evidence such as business surveys, Annual Monitoring Reports and the composition of each Protected Employment Area including the age, quality, location and capacity of sites and premises must be taken into account, together with the surrounding uses'.</p> <p>The Protected Employment Areas are now becoming Designated Employment Areas (DEAs) in the emerging Local Plan. Whilst some areas are proposed as new DEAs, the Council does not appear to have reviewed the boundaries of the existing PEAs in detail to see if any areas should be removed from them. This did not take place through the Site Allocations and Delivery DPD either. Policy CS9 of the Core Strategy was found sound on the basis that the policy set out a clear framework for the detailed review of the employment areas within a short period of time. This has not happened.</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>The Council's evidence base to support the employment policy is the Employment Land Review, which was prepared by Stantec and published in August 2020, but this work does not seem particularly detailed or granular with regard to boundary reviews, or consider why parts of existing employment sites have not come forward for development.</p> <p>We disagree with the Council's approach to largely 'carrying over' the geographical extent of the employment site boundaries. These are now very old and were defined either through the 'old' Local Plan which was adopted in 2002 – or at same date prior to that. They are therefore considerably out of date and should be proactively reviewed in detail against a transparent and consistent set of criteria as part of the emerging Local Plan process to ensure that they are fit for purpose.</p> <p>With regard to Charnham Park, the Employment Land Review states that there is one undeveloped parcel which has consent for a hotel. It does not explain that this consent was granted on appeal in 2011 and has not yet come forward, or raise any suggestions about why this land has remained undeveloped. This is not helpful, nor positive. The ELR also states that the adjacent Charnham Lane employment area should be included within the DEA. However, this recommendation does not appear to have been accepted by the Council.</p> <p>The emerging policy to manage development in the DEAs is policy DC11. This has the same principles as extant policy CS9, however the national policy has evolved since that policy was adopted in 2012. We do not consider that the Council's approach is fully in conformity with national policy as we set out below.</p> <p>The NPPF (2019) chapter 11 seeks an effective use of land. Paragraph 120 is particularly relevant. This states that:</p> <p><i>Planning policies and decisions need to reflect changes in the demand for land. They should be informed by regular reviews of both the land allocated for development in plans and of land availability. Where the local planning</i></p>	

Respondent (with lpr ref)	Response	Council Response
	<p><i>authority considers there is no reasonable prospect of an application coming forward for the use allocated in a plan:</i></p> <p><i>a) They should, as part of plan updates, reallocate the land for a more deliverable use that can help to address identified needs (or, if appropriate, deallocate a site which is undeveloped); and</i></p> <p><i>b) In the interim, prior to updating the plan, applications for alternative uses on the land should be supported, where the proposed use would contribute to meeting an unmet need for development in the area.</i></p> <p>We note that the Council has been reluctant to permit applications for alternative uses on the land, despite the evidence which demonstrates that the site is unlikely to come forward or the fact that alternative uses can provide significant wider benefits to the employment area (as has been accepted elsewhere).</p> <p>Given that the site has not been developed since it was designated (at least 20 years ago) our assessment is that there is no realistic prospect that it will now come forward for the business uses envisaged by the Council.</p> <p>The Planning Practice Guidance (Paragraph: 001 Reference ID: 66-001-20190722) that provides additional information about how to deliver the NPPF confirms what needs to be taken into account when considering whether or not an allocated site is likely to come forward for its intended use. These matters include the following:</p> <ul style="list-style-type: none"> <li>• the length of time since the site was allocated in the development plan;</li> <li>• the planning history of the site including any planning applications or pre-application enquiries;</li> <li>• whether there is evidence that the site has been actively marketed for its intended use for a reasonable period, and at a realistic price; and</li> <li>• whether there are any changes of circumstance that mean that take-up of the site for its intended use is now unlikely.</li> </ul> <p>In response to these matters, we have explained how the site was allocated over 20 years ago and has not been developed for either employment use or employment generating use to date. Whilst there have been a couple of</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>planning applications, one (for business use) was only partially implemented due to a change of ownership and the hotel consent (won at appeal) has not been taken up and is now ten years old. This is despite active marketing by Kerridge Properties Ltd on both a sale and lease basis. Given changing working practices in recent times, it is even less likely that the site will be taken up for a business use.</p> <p>Our assessment is that continuing to include the site within the Designated Employment Area boundary would not be consistent with national policy. Given the information set out above, the Council should revise the boundary of the DEA to remove the site, either in full, or part, to allow it to come forward for an alternative use.</p> <p>Conclusion</p> <p>We seek the removal of an area of land at Charnham Park (either in full or part) from the Charnham Park Designated Employment Area to give flexibility to bring the site forward for alternative uses.</p> <p>We have explained in these representations that despite being included within the boundary of the Charnham Park employment area for at least twenty years, the site has not been developed to date for either employment or hotel uses, although it has been marketed on an ongoing basis. There have not been any planning applications on the site for a number of years.</p> <p>The site is in an important road frontage location, and should be seen as part of the gateway to Hungerford. It now needs to be considered positively, rather than artificially restricted by a historic policy approach, to allow an appropriate development can come forward.</p> <p>Given the history and the active encouragement within national policy and guidance to ensure effective use of land, the Council should not continue apply a designation to this land which simply is not proving to be attractive to the market.</p>	

Respondent (with lpr ref)	Response	Council Response
	<p>A more detailed approach to reviewing the boundaries of the employment sites in the District to ensure that they are fit for purpose would be a justified and effective way forward for the Local Plan Review. It is very clear that the policy approach to an unused site, with a road frontage in a prime location, must be reconsidered.</p>	
<p>Pro Vision on behalf of Greenham Trust Ltd (lpr2369)</p>	<p><i>*see attached for full representation*</i></p> <p>This representation on the Local Plan Review (LPR) is made on behalf of Greenham Trust (the Trust), specifically in regard to its interests at Greenham Business Park (GBP) as the major land owner and manager of the park.</p> <p>As such, the Trust is a stakeholder in the local plan process and is keen to engage proactively with the Council and other stakeholders to assist with preparing a positive and deliverable local plan to meet development needs in sustainable way over the plan period.</p> <p>In summary, these representations state that:</p> <ul style="list-style-type: none"> <li>• The Trust supports the proposal to continue to recognise the importance of GBP to the economy by identifying it as a Designated Employment Area;</li> <li>• The LPR should expressly recognise that there is an adopted Local Development Order at GBP;</li> <li>• That GBP can continue to play an important role in meeting the identified need for office and industrial space over the plan period;</li> <li>• The employment evidence and LPR policies will need to be updated to factor in the emerging impacts of the COVID-19 pandemic;</li> <li>• It is important that the standards for development imposed through policy take, to tackle the causes of climate change for example, take into account feasibility and viability at the plan-making stage.</li> </ul> <p>It is noted that specific development management matters for the DEAs are proposed in draft Policy DC 31. We would welcome clarification in draft Policy SP 21 that draft Policy DC 31 applies to the existing DEAs.</p>	<p>Comments noted.</p> <p>This representation is a duplicate of the representation made on Emerging Draft LPR Policy SP21. See the Council's response to this representation on Emerging Draft LPR Policy SP21 (ref: lpr2366).</p> <p>Text will be added to the LPR to recognise the current Local Development Order for Greenham Business Park.</p> <p>The Council recognise the contribution that Greenham Business Park makes to the local economy, and in accordance with the recommendations set out in the Council's evidence base, the ELR 2020, it is proposed that the site becomes a DEA.</p> <p>Emerging Draft LPR Policies SP20 and SP21 set out the Council's strategic approach to business development, which seeks to encourage such development to locate within settlement boundaries and Designated Employment Areas (DEAs), as well as existing employment locations and allocated sites. The policies also identify some existing employment locations, including Greenham Business Park, as new DEAs.</p> <p>This policy relates to DEAs, their role and function as well as the uses permitted within these areas. They are locations across the District designated for business development, and for the purposes of the LPR business development relates to offices, industry, storage and</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The element of flexibility added to draft Policy DC 31, allowing some “small scale commercial and service uses” within DEAs is generally supported, recognising that modern business environments thrive where there is a mix of complementary uses.</p> <p>However, the draft policy states that “Proposals that would result in the net loss of employment floorspace will not be supported”. The Trust has concern that this could mean a lack of support for occasions where old, redundant floorspace, perhaps office space or industrial space, is redeveloped to meet modern standards for alternative employment land, such as R&amp;D or logistics, or to meet other economic development needs, for example data centres. Therefore, the policy should amend “floorspace” to “land”.</p> <p>Draft Policy DC 31, and other relevant policies, should be reviewed with the benefit of an updated assessment. One implication may be, for example, greater flexibility over the appropriate uses in DEAs to deliver the flexibility and adaptability that the changing market is likely to need as it rebounds.</p> <p>Summary and conclusion</p> <p>Greenham Trust is the major owner and manager of Greenham Business Park, one of the primary employment areas in the district.</p> <p>It is welcomed that the significance of the business park will continue to be recognised in the local plan by designation as a Designated Employment Area, and that the plan will continue to direct new employment development to these areas.</p> <p>The employment evidence base will need to be reviewed to factor-in the emerging impacts of the COVID-19 pandemic. Policies of the LPR, including draft Policy DC 31, should be reviewed in light of updated evidence.</p>	<p>distribution uses. This policy applies to all DEAs within the District, existing and new.</p> <p>The policy will be amended with regard to the loss of floorspace within DEAs. The evidence clearly points to safeguarding land/floorspace particularly in DEAs for office, industry, storage and distribution uses. As such, the policy will be amended and will support the regeneration and redevelopment of DEAs to provide additional employment development (office, industry, storage and distribution) that meets the needs of the District.</p> <p>Given the preparation of the ELR 2020 was undertaken prior to the COVID 19 pandemic, the Council has taken the opportunity to update this work using the most recent economic forecasts which take account of the major macro-economic changes which have taken place, including COVID and Brexit. The update to the ELR will inform the LPR and will be published alongside the Regulation 19 consultation.</p> <p>The LPR has been subject to whole plan viability in accordance with the NPPF. The whole plan viability assessment concluded that the delivery of economic development and employment floorspace would be viable taking into account other policy requirements within the plan. The Whole Plan Viability Assessment can be found as part of the evidence base.</p> <p>It is important that development proposals take into account climate change from the outset, including in costings. Technologies are likely to become more available and cheaper in the coming years. Tackling climate change through site and building design is one of the most important ways in reducing carbon output and</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The LPR should recognise the adopted Local Development Order as an important part of the economic strategy, a positive planning tool to boost the local economy and optimising the potential of the business park.</p> <p>The LPR should be reviewed in respect of viability and other relevant evidence to underpin policy requirements so that development needs are delivered over the plan period while also addressing key issues including tackling the causes and impacts of climate change.</p>	genuinely enabling each development to contribute to combating the effects of climate change.
West Berkshire Council as landowner of London Road Industrial Estate (LRIE) (LATE SUBMISSION)	<p><b>Propose the renaming of the LRIE DEA.</b> There is the potential for confusion between the existing London Road Industrial Estate DEA which includes the adjoining Riverpark Industrial Estate, and the area within the Council's freehold ownership for which the Council as landowner has aspirations – also known as the London Road Industrial Estate (expected to be renamed in early 2023). This should be addressed either by renaming the DEA or by providing clarification within the supporting text.</p> <p><b>If not included in supporting text for SP21 as proposed above,</b> propose expansion of para 12.7 in the supporting text with the following wording, to align with the Council as landowner's aspirations for the LRIE site as set out in Executive Report EX4219 approved on 9 June 2022 and supporting documents, available at <a href="https://info.westberks.gov.uk/lrie">https://info.westberks.gov.uk/lrie</a>:</p> <p><i>12.7 In addition, the London Road Industrial Estate has scope for <del>comprehensive regeneration</del> intensification of employment use within the plan period to maximise the potential of the site. Some mixed use development may be appropriate in the context, such that no net loss of employment floorspace results from that development.</i></p> <p><i><u>"The Council-owned London Road Industrial Estate (LRIE) currently has an estimated 23,000 sqm of employment space (Avison Young</u></i></p>	<p>(LATE SUBMISSION) Comments noted.</p> <p>There is a subtle difference between the names as the DEA is titled 'London Road Industrial Estates', which includes the majority of the Council owned LRIE and the adjoining Riverpark Industrial Estate. Given the Council expect the name of the Council owned land to change in early 2023, it is not proposed to amend the name of the DEA in the LPR. Proposed Submission LPR Policy SP20 will address this matter within the supporting text, along with the current status of the LRIE.</p>

Respondent (with lpr ref)	Response	Council Response
	<p><u>Development Brief 2020) occupied by 36 businesses that employ about 300 people. Following a review taking into account evolving economic drivers, market demand and the district's ambition to be carbon neutral by 2030, a revised Delivery Strategy for LRIE approved by Executive on 9/6/22 aims to increase employment floorspace on the site by at least 30%, safeguard 300 jobs and create at least 200 new jobs by 2030.</u></p> <p><u>The Council as freeholder will work with leaseholders to deliver environmental enhancements on the site including on carbon net zero, nutrient neutrality, sustainable drainage and biodiversity net gain. Further details to be set out in an LRIE Place-making Strategy which will be submitted as a Supplementary Planning Document in due course and progressed through the statutory planning process in parallel with the Local Plan Review."</u></p>	

## Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

### Emerging Draft LPR Policy: DC32 Supporting the Rural Economy

#### (Proposed Submission LPR Policy: DM35 Sustaining a prosperous rural economy)

Number of responses received: 16

Respondent (with lpr ref)	Response	Council Response
<b>Statutory consultees</b>		
Shaw cum Donnington Parish Council (lpr258)	We support the policy.	Comments noted.
Stratfield Mortimer Parish Council (lpr440)	Policy is supported.	Comments noted.
Greenham Parish Council (lpr932)	Policy is supported.	Comments noted.
Newbury Town Council (lpr2225)	<p>We support the policy. However, there is lack of clarity about the definition or “rural” in this context. Market towns like Newbury, Thatcham and Hungerford are integral to the “rural economy” but the policy appears to be intended to relate purely to businesses located in what in planning terms is “open countryside” and not in “settlements” at or near the top of the hierarchy used in this Plan.</p> <p><b>Reason:</b> this policy should not exclude development in larger settlements across the District which genuinely support “rural business” (e.g. breweries) but should make it clearer under what circumstances a development proposal that doesn’t need to be located in the countryside might be permitted.</p>	<p>Comments noted.</p> <p>The policy is specifically for economic development in the countryside, for locations outside of settlement boundaries.</p> <p>The policy does not exclude development in larger settlements, but as development in rural areas is generally more restrictive, the policy is aimed at providing opportunities for particular development, and in particular circumstances in rural areas. The principle of developing in the settlement boundaries of market towns (Newbury, Thatcham, Hungerford) is generally supported, and</p>

Respondent (with lpr ref)	Response	Council Response
		therefore does not require a specific policy. As part of the submission version of the Plan there will be a specific policy for local community facilities.
<b>General consultation bodies</b>		
West Berkshire Heritage Forum (lpr96)	<p>Policy is supported.</p> <p>The AONB (which could be equally termed an Area of Outstanding Cultivated Landscape) is not a self-sustaining resource but is maintained by the rural businesses located in it. To do this, the local businesses must remain viable and this will require them to grow and develop. Such appropriate development should be allowed for expressly.</p>	Comments noted. No changes are proposed based on these comments.
British Horse Society (lpr862)	<p>Policy is not supported.</p> <p>Para 12.20 infers that this statement also relates to public rights of way (byways, restricted byways, bridleways and footpaths) and thus the Society suggests that public rights of way are included in policy statement vii. Increase of motor traffic on rural roads, including commercial vehicles, is the main factor in deterring non-motorised travel on rural roads. In addition, changes to public rights of way to accommodate motor traffic generated by developments can make these unattractive to equestrians.</p> <p>12.13: it is odd to just refer to the racehorse industry here when DC34 refers to the whole horse industry ie racing and non-racing horse industry. We suspect that there is a lack of awareness locally of the economic contribution that the non-racing horse industry makes to the local rural economy and the number of farmers who have diversified, and continue to diversify, into non-racing horse enterprises using redundant farm buildings and land for horse keeping. Please see points under DC34.</p> <p>Changes to be made/preferred approach: <i>viii: it would not generate traffic of a type or amount inappropriate for the rural roads <b>and public rights of way (byways, restricted byways, bridleways and footpaths)</b> affected</i></p>	<p>Comments noted.</p> <p>Policy SP10 (Green Infrastructure) seeks to protect and enhance Green Infrastructure assets, which include public rights of way. However, in consideration of the points raised by the consultee it is byways and restricted byways which may be affected rather than footpaths and bridleways.</p> <p>Proposed changes:</p> <p>Criterion h) (submission version): 'it would not generate traffic of a type or amount inappropriate for the rural roads <u>and byways and restricted byways</u> affected by the proposal or require improvements to these roads and public rights of way which could be detrimental to their character <u>and use by motorised and non-motorised traffic</u>'</p> <p>Delete paragraph 12.13 (emerging draft version) as these matters are now covered in other policies.</p>

Respondent (with lpr ref)	Response	Council Response
	<p><i>by the proposal or require improvements to these roads and public rights of way which could be detrimental to their character &amp; use by motorised and non-motorised traffic'</i></p> <p>12.13 'The <del>racehorse</del><b>horse</b> industry and tourism also make a vital contribution to the local economy, as do educational and institutional establishments including boarding schools. All sectors of the rural economy are covered by this policy, which seeks to foster economic growth without detriment to the environment'</p>	<p><del>12.13 'The racehorse industry and tourism also make a vital contribution to the local economy, as do educational and institutional establishments including boarding schools. All sectors of the rural economy are covered by this policy, which seeks to foster economic growth without detriment to the environment'.</del></p> <p>The supporting text is considered appropriate to remain.</p>
Canal and River Trust (lpr907)	<p>Policy is not supported.</p> <p>This policy allows for development that support the rural economy, but specifically refers to land based development and so apparently would not be relevant to marina applications, or boating related businesses in general. It should be recognised that many boating related businesses are non-footloose, due to needing to be located adjacent to the canal, and so need to be located outside of a settlement boundary.</p> <p>Changes to be made/preferred approach: Remove the reference to land based business in the first sentence, or include water based too.</p>	<p>Comments noted.</p> <p>The policy is proposed to be altered to remove the first paragraph.</p> <p>Policy SP10 relating to Green Infrastructure is also considered to apply to 'blue infrastructure' and so the Local Plan has an approach to examples as provided by the Canal and River Trust.</p>
Mid and West Berkshire Local Access Forum (lpr1890)	<p>Para 12.20 infers that this statement also relates to public rights of way (byways, restricted byways, bridleways and footpaths) and thus MWBLAF suggests that public rights of way are explicitly included in policy statement viii.</p> <p>Increase of motor traffic on rural roads, including commercial vehicles, is the main factor in deterring non-motorised travel on these roads. In addition, changes to public rights of way to accommodate motor traffic generated by developments can make these unattractive to non-motorised users.</p> <p>The Forum supports the statement in paragraph 12.20 on 'rural tracks, footpaths and bridleways'. However, this sentence is unnecessary if section viii. in the policy is amended as suggested above. As written, it is unclear</p>	<p>Comments noted.</p> <p>Policy SP10 (Green Infrastructure) seeks to protect and enhance Green Infrastructure assets, which include public rights of way. However, in consideration of the points raised by the consultee it is byways and restricted byways which may be affected rather than footpaths and bridleways.</p> <p>As per response to comment lpr862, proposed changes:</p> <p>Criterion h) (submission version): 'it would not generate traffic of a type or amount inappropriate for the rural roads <u>and byways and restricted byways</u>) affected by the</p>

	<p>what a rural track is – private or public – and whether footpaths and bridleways refer to public rights of way.</p> <p>Changes to be made/preferred approach: The Forum recommends that item viii. in the policy is clarified as follows:</p> <p><i>All proposals for development relating to rural enterprises should demonstrate that they satisfy all of the following criteria:</i></p> <p><i>viii. it would not generate traffic of a type or amount inappropriate for the rural roads <b>and public rights of way (byways, restricted byways, bridleways and footpaths)</b> affected by the proposal or require improvements to these roads which could be detrimental to their character;</i></p> <p>If this change is made, then the sentence in paragraph 12.20 should be deleted:  <i>12.20 Assessment of the highway implications will be made on the basis of the proposal and what would be considered necessary in terms of improvements by the Highway Authority. <del>The reference to ‘rural roads’ is a generic term and the Council would be concerned as to the effects of the proposed development on rural tracks, footpaths and bridleways.</del> Relevant considerations would include past and existing levels of traffic generated from the site; the level, type and frequency of traffic likely to be generated by the proposed development; and traffic levels accepted under any existing planning permission attached to the land.</i></p>	<p>proposal or require improvements to these roads and public rights of way which could be detrimental to their character <u>and use by motorised and non-motorised traffic'</u></p> <p>Delete paragraph 12.13 (emerging draft version) as these matters are now covered in other policies.</p> <p><del>12.13 'The racehorse industry and tourism also make a vital contribution to the local economy, as do educational and institutional establishments including boarding schools. All sectors of the rural economy are covered by this policy, which seeks to foster economic growth without detriment to the environment'.</del></p> <p>The supporting text is considered appropriate to remain.</p>
<b>Other stakeholders</b>		
Councillor Alan Macro (lpr768)	<p>Policy is not supported.</p> <p>"adaptation of existing buildings" would appear to allow the change of use of residential buildings.</p>	<p>Comments noted.</p> <p>The policy is specifically for development for economic purposes. The policy does not restrict the change of use away from residential. It would be for the decision maker to balance up the loss of housing with the benefit to the rural economy, and when considering SP12 which states that there should be no net losses from the existing housing stock, unless there is a reasoned justification.</p>

Respondent (with lpr ref)	Response	Council Response
Councillor Tony Vickers (lpr662)	<p>Policy is supported.</p> <p>Two comments:</p> <p>1. There is lack of clarity about the definition or “rural” in this context. Market towns like Newbury, Thatcham and Hungerford are integral to the “rural economy” but the policy appears to be intended to relate purely to businesses located in what in planning terms is “open countryside” and not in “settlements” at or near the top of the hierarchy used in this Plan. This policy should not exclude development in larger settlements across the District which genuinely support “rural business” (e.g. breweries) but should make it clearer under what circumstances a development proposal that doesn’t need to be located in the countryside might be permitted.</p> <p>2. The mention of “adaptation of existing buildings” implies that residential buildings are included. Is this the intention? It may be intentional to allow residential buildings – even in the countryside - to be converted to non-residential use to benefit the rural economy but we are not sure this is the intention.</p> <p>Changes to be made/preferred approach: We have no suggestions at this point until these comments have been dealt with.</p>	<p>Comments noted.</p> <p>The policy is specifically for economic development in the countryside, for locations outside of settlement boundaries.</p> <p>The policy is primarily aimed at rural areas, where the principle of development is generally more restrictive than in settlements. The principle of developing within the settlement boundaries of market towns (Newbury, Thatcham, Hungerford) is generally supported, and therefore does not require a specific policy. Policy DM39 considers local community facilities.</p> <p>Breweries do not have to be solely rural businesses. There are examples of breweries, microbreweries and gin distilleries within settlements in the District, which are considered against general ‘within settlement policies’.</p> <p>It is not altogether clear what types of ‘rural businesses’ which would not need to be located outside of settlements might be, and therefore it would be difficult to set out circumstances. This may also confuse the policy as it is aimed at locations outside of settlements.</p> <p>The policy is specifically for development for economic purposes. The policy does not restrict the change of use away from residential. It would be for the decision maker to balance up the loss of housing with the benefit to the rural economy, and when considering SP12 which states that there should be no net losses from the existing housing stock, unless there is a reasoned justification.</p>

Respondent (with lpr ref)	Response	Council Response
Savills on behalf of Englefield Estate (lpr542)	<p>It is noted that draft LPR Policy DC32 supports proposals for the diversification of rural businesses, <i>'provided that the applicant demonstrates that the changes will make a long-term contribution to sustaining the enterprise as a whole and meets the detailed criteria within this policy.'</i> The overall support for development relating to rural businesses is welcomed; however we are concerned that draft LPR Policy DC32 as currently worded is not consistent with the NPPF and contains a number of detailed criteria (in addition to the current Core Strategy Policy CS10) which may prejudice suitable development being delivered in rural areas.</p> <p>In particular, the requirement for proposals to justify that other existing buildings cannot be used (part iii) and to demonstrate that proposals will <i>'make a long-term contribution to sustaining the enterprise as a whole'</i> is considered to be onerous and unjustified (and indeed contrary to the NPPF). Further, the need to satisfy <i>'all'</i> of the criteria may serve to unnecessarily restrict development which through a balanced judgement is acceptable and would otherwise bring important economic, social and environmental benefits. Policy DC32 also includes a number considerations which are not unique to development in rural areas (e.g. the need for appropriate design and to control impacts on amenity, heritage and ecology) but which are covered by other LPR policies, and therefore the policy as currently worded has unnecessary repetition.</p> <p>The NPPF is clear that planning policies should <i>'enable the sustainable growth and expansion of all types of business in rural areas'</i> (paragraph 83). It is important therefore that the LPR does not seek to restrict rural employment uses, but rather takes a positive approach which supports diversification and the vitality of rural settlements.</p> <p>In this regard, it is also important to note that 2021 sees the start of the seven-year transition away from EU- based rules for agriculture and forestry businesses, which will involve cuts in support and considerable change for farming businesses, and therefore it is essential that rural diversification and associated investment is not stifled with consequent damage to the rural economy and communities.</p>	<p>Comments noted.</p> <p>It is recognised that the NPPF supports the rural economy, though this is specifically through the conversion of existing buildings and well-designed new buildings. It therefore does place some restriction on the types of development, and it appropriate that the policy seeks to manage the impact of development. This is in consideration of the landscape-led approach to the Local Plan, whilst supporting the rural economy.</p> <p>The policy would replace Core Strategy policy CS10. It is important that the applicant does demonstrate they can sustain the enterprise, and in the long term in consideration of sustaining the rural economy. This is rather than having businesses which may not succeed and leave buildings, potentially then be converted to uses which may not be appropriate in the location (e.g. residential). A business plan or documentation to show that the business is viable would be of use in demonstrating such a contribution. The supporting text (para 13.20 submission version) has been updated to the following:  <u>In demonstrating that the business can make a long term contribution to the rural economy it is expected that a business plan, whole estate plans, or similar, will be presented with a planning application. For new businesses in particular, this can aid in illustrating the viability of the proposal. It is considered necessary to demonstrate a long term contribution to avoid pressure for non-economic uses in locations which may not be suitable (e.g. residential).</u></p> <p>Whilst the Local Plan should be read as a whole the criteria in DM35 seek to draw attention to particular issues which are important to ensure development is sustainable</p>

Respondent (with lpr ref)	Response	Council Response
		<p>and appropriate in terms of location and impact on the landscape and character of the site and area.</p> <p>It is considered that the policy is positively supporting businesses in rural areas, and is flexible in its approach. It is important to ensure that development is suitable and sustainable, particularly in the AONB, and considering the accessibility of places in the District.</p> <p>A new policy, covering farm diversification, will be proposed for the submission version of the Local Plan.</p>
<p>Lucy White Planning on behalf of Bradfield College (lpr1157)</p>	<p>Policy is not supported.</p> <p>Policy DC32 is intended to control the development of rural enterprises in the open countryside, including the expansion of schools and colleges, through the provision of new academic and pastoral facilities. The policy states that:</p> <p><b>“Proposals for new or expanding rural enterprises will be permitted so long as they meet the detailed criteria within this policy. This includes proposals for leisure and visitor developments where they provide new and enhanced attractions, facilities and/or accommodation. In the case of educational and institutional establishments it must be demonstrated to the satisfaction of the Council that development is necessary to meet the reasonable needs and operational requirements of the establishment.”</b></p> <p>The policy does not clarify whether the obligation imposed upon education establishments is <b>in addition</b> to the detailed policy criteria, or <b>in lieu</b> of one or more of the criteria.</p> <p>Criteria (i) requiring development proposals to be suitable for the rural location should not apply to schools and colleges, providing criteria (iii) onwards are met to ensure the impact of the proposed development is acceptable in its location.</p>	<p>Comments noted.</p> <p>It is proposed to include a new policy for educational and institutional establishments in the countryside (DM38).</p> <p>The policy is in the same spirit as Local Plan ENV27 which this policy would replace. All of the criteria are relevant to schemes for educational establishments in the countryside.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Criteria (ii) requires the proposed development to benefit the wider economy of the rural area. Whilst, it is acknowledged that independent schools and colleges make a significant contribution to the rural and district-wide economy, this criteria is not a relevant test for school proposals, where the principal function should be to enhance or expand education facilities.</p> <p>Changes to be made/preferred approach: For the above reasons, Policy DC32 should be amended to clarify that education proposals should demonstrate that development is necessary to meet the reasonable needs and operational requirements of the establishment and criteria iii) – xi) only.</p>	
Fowler Architecture and Planning Ltd (lpr1808)	<p>The NPPF does not seek to control the growth required to support the rural economy as a matter of principle. Instead, the assessment of proposals should be managed through design, landscape, ecological and heritage policies of the Local Plan. Policy DC32 should be deleted.</p> <p>Nonetheless, as drafted, the following comments on Policy DC32 are provided.</p> <p>The opening of the policy should be consistent with paragraph 83 of the NPPF that supports the conversion of existing buildings and well-designed new buildings. As the policy explicitly references re-use or adaptation of existing buildings it puts significant focus on this option for diversification when it should also refer to well-designed new buildings. The requirement that such changes ‘will make a long-term contribution’ is incompatible with some enterprise needs for economic growth that may only be short term and temporary in nature, such as temporary housing and other interim solutions.</p> <p>It is unclear how all cases can demonstrate ‘benefit to the economy of the surrounding area’ under criterion (ii) as some growth and expansion may only benefit the holding itself.</p> <p>The second limb of criterion (iii) is unreasonable. There may be very real reasons why a business has disposed of assets. The need for a new</p>	<p>Comments noted.</p> <p>The policy is proposed to be altered to remove the first paragraph.</p> <p>It is important that the applicant does demonstrate they can sustain the enterprise, and in the long term in consideration of sustaining the rural economy. This is rather than having businesses which may not succeed and leave buildings, potentially then be converted to uses which may not be appropriate in the location (e.g. residential). A business plan or documentation to show that the business is viable would be of use in demonstrating such a contribution. The supporting text (paragraph 13.20 of the submission version) has been updated to the following:  <u>In demonstrating that the business can make a long term contribution to the rural economy it is expected that a business plan, whole estate plans, or similar, will be presented with a planning application. For new businesses in particular, this can aid in illustrating the viability of the proposal. It is considered necessary to demonstrate a long term contribution to avoid pressure for non-economic uses in locations which may not be suitable (e.g. residential).</u></p>

Respondent (with lpr ref)	Response	Council Response
	<p>building should only be assessed on the basis of the impact of the development and not the past actions of the enterprise.</p>	<p>Criterion a) (was ii emerging draft version) – delete ‘The development can make a long term contribution to sustaining the rural business as a whole’.</p> <p>Criterion d) (was iii emerging draft version) – should there be reasons why a business has disposed of assets can be considered as part of the consideration of the proposal. The policy is intended to manage the amount of new buildings in the countryside, particularly where there are existing buildings to be made use of.</p>
<p>Pegasus Planning Group Ltd on behalf of Newbury &amp; Crookham Golf Club (lpr2057)</p>	<p>Policy is not supported.</p> <p>Newbury and Crookham Golf Club (NCGC) is a rural business, located beyond the settlement boundary of Newbury, but close to many homes and local residents who make use of its attractive open spaces to play golf and enjoy the countryside. The sport of golf is currently under a great deal of pressure. Player numbers are on a long-term downward trend and balance sheets around the world have been hit hard by Covid-19 related closures. In this context, there have been two recent closures; the Racecourse and Donnington Valley, the latter of which has closed to members. In addition, there are several examples of other golf courses with the Council area or in adjacent Districts and Boroughs seeking to similarly plan for their future through discreet residential development and/or diversification of the leisure offer.</p> <p>It is therefore important to plan proactively to ensure retention of sports and leisure facilities for the local community, especially ones that provide opportunities for exercise in the open air, which is good for fitness, health and mental well-being. NCGC is a leisure facility located in a rural area in a very accessible location. It is a business that supports 20 direct and indirect jobs, invests over £300k per annum in the local economy and maintains 50 hectares of attractive countryside, which would otherwise suffer from lack of stewardship. There are significant community, well-being and environmental</p>	<p>Comments noted.</p> <p>The NPPF and Policy DM1 of the LPR consider enabling development in the context of securing the future of heritage assets. Historic England further define enabling development as development which would not be in compliance with local and/or national planning policies, and not normally be given planning permission, except for the fact it would secure the future conservation of a heritage asset.</p> <p>Whilst there may be appeal examples and legal challenges relating to enabling development for non-heritage asset related development, this is a factor to be considered on a case by case basis, examining the evidence and consideration of housing policies (considering that DM35 is not a housing policy).</p> <p>The policy will not be changed in respect of these comments.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>benefits accruable from ensuring that the golf club is retained and encouraged to thrive into the future.</p> <p>Policy DC 32 states that proposals for development relating to rural enterprises, such as NCGC, should demonstrate that they comply with a long list of criteria. As mentioned previously, NCGC proposes to demolish and replace its existing clubhouse and car park. The new clubhouse will have much-improved facilities for use by members and the general public. The enhanced facilities will create opportunities for greater training, work with schools and the local community. Significant landscape and biodiversity improvements will be possible because the golf club owns 50 hectares of rural land, which offers tremendous scope for investment in the local area. It will not just be a case of allocating 2 hectares of land and getting c.35 dwellings in return. The benefits of the allocation of the proposed enabling development will be substantial and will ensure that the community gains considerable tangible benefits from the scheme over many years.</p> <p>The proposal, which is supported by England Golf, will help to attract new and varied membership, diversify income streams and ensure that the future of the golf club will be secure for decades to come. However, this will only be possible in these testing times, if an enabling development of c.35 dwellings on surplus land, which adjoins the existing settlement, is permitted in order to fund the redevelopment of the clubhouse and to provide capital to ensure the golf club is robust and can thrive into the future.</p> <p>Changes to be made/preferred approach: The policy as worded does not include any reference to enabling development and the Council currently only recognises this in the context of the preservation of historic buildings. Whilst 'enabling development' is a concept set out in the NPPF in reference to funding the retention and repair of heritage assets, this has a wider scope beyond the protection of heritage assets as confirmed through legal judgements such as R (on the application of Thakeham Village Action Ltd) v Horsham District Council, 29 January 2014 where paragraphs 213 and 214 of that judgement state that:</p>	

Respondent (with lpr ref)	Response	Council Response
	<p><i>“I do not believe that the principles of enabling development are limited to ventures that would protect a heritage asset or a facility that serves or is accessible to the public. And I also reject the submission that those principles do not extend to a financial contribution that would support development undertaken by another company on another site.</i></p> <p><i>The jurisprudence does not support either of those concepts. The scope for enabling development is wide. There are many ways in which it may serve a proper planning purpose. It may fund works of repair or improvement to a listed building. It may fund the protection of a particular habitat. It may fund the provision of a swimming pool for public use, or some other public facility. But that is far from being an exhaustive list of the benefits it may help to provide.”</i></p> <p>Accordingly, appropriate wording should be added to the policy to provide greater flexibility and allow for proactive assistance to be given to community assets that will otherwise fail, as follows:</p> <p><i>xii. Enabling development will be permitted in circumstances where the capital generated will be used to improve the facilities of the rural enterprise, such that it can continue to provide economic, environmental and social benefits for the community in the long-term future. Planning permission will only be granted for enabling development schemes, if sufficient justification is provided to demonstrate that the level of capital generated is proportionate to the cost of providing the improved facilities.</i></p> <p>Policy DC 32 - Supporting the Rural Economy is objected to in its present form. The policy needs to be amended to include the above additional criterion, which will allow for a wider and more appropriate definition of enabling development, which in turn will help to maintain rural enterprises, like NCGC, into the foreseeable future.</p>	
Rural Solutions (lpr2301)	We support the ambition of the Local Plan Review to support proposals for diversification of existing agricultural and other land based rural businesses.	Comments noted.  Criterion g) (was vi in emerging draft): It is important to manage the impact of new development on the site’s

Respondent (with lpr ref)	Response	Council Response
	<p>Proposals for new or expanding rural enterprises will also be permitted, so long as they meet the detailed criteria set out within Policy DC32.</p> <p>We are seeking some flexibility in terms of the policy criteria vi). This could be more positively worded. The policy states:</p> <p>1. <i>wherever possible, new or replacement buildings are located within or adjoining an existing group of buildings and further expansion into the countryside is avoided;</i></p> <p>When establishing a new rural enterprise, it is not always possible to locate new buildings within or adjoining an existing group of buildings. However, we can consider the landscape setting and how any new buildings will be viewed e.g. against a skyline or from higher ground. For example, a proposal could use the backdrop of an existing woodland or a mature field boundary to ensure it is carefully located, alongside appropriate materials (depending on its context) and planting to ensure the agricultural buildings blend into its setting. I would also reinforce the message that you do expect to see agricultural buildings within the countryside given it is a working landscape.</p>	<p>character and surrounding landscape. However, suitable justification, such as a landscape and visual impact assessment, may aid in determining whether an alternative location within the site would be more appropriate, which the decision taker would then take into account.</p>
Pegasus Planning Group Ltd on behalf of Calcot Park Golf Club (lpr2329)	<p>Policy is not supported.</p> <p>Calcot Park Golf Club (CPGC) is a rural business, located within the Eastern Area adjacent to many homes and local residents who make use of its attractive open spaces to play golf and visit the facilities. The sport of golf is currently under a great deal of pressure. Player numbers are on a long-term downward trend and balance sheets around the world have been hit hard by Covid-19 related closures. Nevertheless, it is important for the local community to retain sports facilities, especially ones that provide opportunities for exercise in the open air, which is good for fitness, health and mental well-being.</p> <p>CPGC is a leisure facility located in a rural area in a highly accessible location. It is a business that supports 32 jobs and it maintains c.81 hectares of attractive countryside, which would otherwise suffer from lack of stewardship. There are significant community, well-being and environmental benefits accruable from ensuring that the golf club is retained and encouraged to thrive into the future.</p>	<p>Comments noted.</p> <p>The NPPF and Policy DM1 of the LPR consider enabling development in the context of securing the future of heritage assets. Historic England further define enabling development as development which would not be in compliance with local and/or national planning policies, and not normally be given planning permission, except for the fact it would secure the future conservation of a heritage asset.</p> <p>Whilst there may be appeal examples and legal challenges relating to enabling development for non-heritage asset related development, this is a factor to be considered on a case by case basis, examining the evidence and consideration of housing policies (considering that DM35 is not a housing policy).</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Policy DC 32 states that proposals for development relating to rural enterprises, such as CPGC, should demonstrate that they comply with a long list of criteria. As mentioned previously, CPGC proposes to demolish and replace its existing clubhouse and car park. The new clubhouse will have much improved facilities for use by members and the general public. The enhanced facilities will create opportunities for greater training, work with schools and the local community. Significant landscape and biodiversity improvements will be possible; the golf club ownership of c.81 hectares of rural land offers tremendous scope for investment in the local area. It will not just be a case of allocating 6 hectares of land and getting 70 dwellings in return. The benefits of the allocation of the proposed enabling development will be substantial and will ensure that the community gains considerable tangible benefits from the scheme over many years.</p> <p>A scheme of 70 dwellings is currently proposed, as this has been subject to initial assessment and identified as a quantum that could provide both the enabling development desired and a policy-compliant level of affordable housing. Therefore, should a lower quantum of housing be considered appropriate on-site further to discussions with the Council, it will need to be acknowledged that retention of long-term golf at CPGC is the scheme driver and that there will be consequential reduction in the delivery of affordable housing; to be determined by Viability Assessment.</p> <p>The proposal will help to attract new and varied membership, diversify income streams and ensure that the future of the golf club will be secure for decades to come. However, this will only be possible in these testing times, if an enabling development of c.70 dwellings on surplus land, which adjoins the existing settlement, is permitted in order to fund the redevelopment of the clubhouse and to provide</p> <p>Changes to be made/preferred approach: The policy as worded does not include any reference to enabling development and the Council currently only recognises this in the context of the preservation of historic buildings. Whilst 'enabling development' is a concept set out in the NPPF in reference to funding the retention and repair of heritage assets, this has a wider scope beyond the protection of heritage assets as confirmed through legal</p>	<p>The policy will not be changed in respect of these comments.</p>

The policy needs to be amended to include the above additional criterion, which will allow for a wider and more appropriate definition of enabling development, which in turn will help to maintain rural enterprises, like CPGC, into the foreseeable future.</p>	

## Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

### Emerging Draft LPR Policy: DC33 Redevelopment of previously developed land in the countryside

Number of responses received: 9

Respondent (with lpr ref)	Response	Council Response
<b>Internal</b>		
Archaeology (Sarah Orr) (lpr784)	Agree with the proposed policy. Should also include reference to heritage assets of archaeological interest which might be on the site of previously developed land - cross ref to SP9 and DC13	Comments noted.  The policy is to be amalgamated into Policy DM35 (Sustaining a Prosperous Rural Economy). The policy makes reference to heritage assets, which includes assets of archaeological interest. Reference will also be made to relevant policies in the Local Plan Review.
<b>Statutory consultees</b>		
Shaw-cum-Donnington Parish Council (Paul Bryant) (lpr259)	Support the policy.	Comments noted.
Stratfield Mortimer Parish Council (Lynn Hannawin) (lpr441)	Support the policy.	Comments noted.
Greenham Parish Council (Clerk) (lpr934)	Would like to add two changes to the policy. Proposed changes: <ul style="list-style-type: none"> <li>In the first line of the policy delete “existing buildings on”</li> <li>Start “i)” with “The land or any existing buildings are ...”</li> </ul>	Comments noted.  The policy is to be amalgamated into Policy DM35 (Sustaining a Prosperous Rural Economy). It is important

Respondent (with lpr ref)	Response	Council Response
		to limit the impact of development on the site and surrounding landscape, and although the NPPF's definition of previously developed land includes the curtilage of land which is or was occupied by a permanent structure, the policy seeks to limit the extent of building in the site itself to reduce impact on the landscape.
<b>General consultation bodies</b>		
NA		
<b>Other stakeholders</b>		
Councillor Tony Vickers (lpr663)	<p>We support this policy, but it should be made clear that it applies not just to land with buildings on it but also to land where there may be no trace or record of what building[s] previously existed.</p> <p>All that should be needed to enable development to occur in accordance with DC 1 and this policy is the existence of a hard and stable man-made foundation of no archaeological value.</p> <p>1) In the first line of the policy delete "existing buildings on" 2) Start "i)" with "The land or any existing buildings are ..."</p>	<p>Comments noted. Land with no trace or record of what building(s) previously existed is excluded from the NPPF's definition of previously developed land, and therefore the development on such land would not be compliant with the policy.</p> <p>The policy is to be amalgamated into Policy DM35 (Sustaining a Prosperous Rural Economy), which shall include allowance for the redevelopment of existing buildings for economic development in the countryside. It is important to limit the impact of development on the site and surrounding landscape, and although the NPPF's definition of previously developed land includes the curtilage of land which is or was occupied by a permanent structure, the policy seeks to limit the extent of building in the site itself, unless justified, to reduce impact on the landscape.</p>
<b>Landowners, site promoters and developers</b>		
Savills for Englefield Estate Office (lpr1543)	It is noted from LPR paragraph 12.21 that draft LPR Policy DC33 relates to the rural economy and not residential uses and therefore it is recommended that additional clarity is provided within the policy wording itself.	<p>Comments noted.</p> <p>The policy is to be amalgamated into Policy DM35 (Sustaining a Prosperous Rural Economy). This is</p>

Respondent (with lpr ref)	Response	Council Response
	<p>As per our comments regarding Policy DC32 above, the overall support for the redevelopment of existing buildings in the countryside is welcomed, however we are concerned that the wording of draft LPR Policy DC33 is not consistent with the NPPF and may prejudice suitable development being delivered in rural areas. In particular it is noted that draft LPR Policy DC33 refers only to allowing <i>'limited'</i> redevelopment to enable the <i>'sustainable growth'</i> of rural businesses, and requires that the redevelopment proposal <i>'has no greater impact'</i> (including in terms of size) than the existing development. The NPPF (paragraph 83), however, does not seek to restrict rural employment uses but rather encourages policies to allow for the <i>'sustainable growth and expansion of all types of business in rural areas, both through conversion of existing buildings and well- designed new buildings'</i> [our emphasis]. It is important therefore that this positive approach is reflected in draft LPR Policy DC33 and that the wording is revised accordingly, to omit specific restrictions on the scale of development but rather to encourage appropriate and sustainable development.</p> <p>Similarly as above, the criteria within draft Policy LPR DC33 includes unnecessary repetition based on the provisions of other policies within the LPR, and the need to satisfy 'all' of the criteria may serve to unnecessarily restrict redevelopment which through a balanced judgement is deemed acceptable.</p> <p>In addition, draft LPR Policy DC33 adds that particular regard will be had to the accessibility of development and relationship to existing settlements and services. Whilst paragraph 84 of the NPPF encourages use of previously developed land which is well-related to existing settlements, this guidance also makes clear that, 'planning policies and decisions should recognise that sites to meet local business and community needs in rural areas may have to be found adjacent to or beyond existing settlements, and in locations that are not well served by public transport.' The wording of draft LPR Policy DC33 should be amended to reflect this. Further, it is therefore important to ensure that a balanced approach is taken to considering the redevelopment of previously developed land in the countryside and that the appropriate redevelopment of rural sites is not prevented</p>	<p>specifically for economic development projects in the countryside, and not for residential development. The policy seeks to ensure that new, redeveloped or adapted buildings are appropriate in their setting, and are designed to reflect their setting. It is recognised that the NPPF supports the sustainable growth and expansion of businesses in rural areas, though this needs to be reconciled with another aim of the NPPF, which refers to the need to recognise the intrinsic character and beauty of the countryside and protect and enhance valued landscapes such as the AONB (para 170). The policy attempts to strike a balance between allowing certain development in the countryside against the need to protect the qualities of the countryside.</p> <p>For the above reasons it is considered appropriate that all of the criteria are met. Decisions are made in line with development plan policies unless material considerations indicate otherwise. Any material considerations will therefore need to be taken into account by the decision maker and weighed in the balance.</p> <p>It is recognised that the NPPF outlines that not all rural businesses and community projects will be in locations served by public transport. However, proposals for economic development proposals in the countryside will need to take account of LPR Policies SP3 and DM1, and active and sustainable methods of transport will be encouraged.</p>

Respondent (with lpr ref)	Response	Council Response
Fowler Architecture & Planning Ltd	<p>The inclusion of a policy that is supportive of previously developed land (PDL) in the countryside is welcomed.</p> <p>The wording of DC33 infers that appropriate limited redevelopment relates only to the replacement of existing buildings on PDL, ultimately on a like-for-like basis. This fails to properly grasp the opportunities to utilise the rare resource of PDL as encouraged by paragraphs 84, 117 and 118 of the NPPF.</p> <p>The policy should not prohibit optimising PDL if it has a capacity to absorb change with a greater amount of buildings than presently exists, given the extent of the curtilage of PDL, hardstanding and storage.</p> <p>Criterion (i) requires the building be proven as ‘genuinely redundant or disused’. The term ‘genuinely’ is ambiguous (see paragraphs 8 and 9 of Appeal APP/W0340/W/17/3185410) and needs to be further clarified at paragraph 12.25 as this does not provide a precise definition on how this test will be applied to decisions, because they introduce other ambiguous terms such as ‘significant efforts’. If it is the Council’s expectation that marketing be required then this should be stated.</p> <p>Criterion (i) is also imprecise as to its natural meaning, and it should be clear that the replacement to which this refers is replacement of the original form of development elsewhere.</p> <p>The final paragraph refers to the accessibility of a site in the countryside to its location and its relationship to the settlement hierarchy, however paragraph 84 of the NPPF recognises that sites to meet local business and community needs in rural areas may have to be found beyond existing settlements. The final part of paragraph 84 does not require the use of PDL to be physically well-related to existing settlements, instead its reuse should be promoted in all parts of the countryside. The proposed restriction in DC33 that PDL be related to existing settlements is unjustified. Furthermore, DC33 does not provide any clarity on what ‘particular regard’ means in practice and whether ultimately this means applications will be refused if they are remote from a settlement, how remote or detached from a settlement is unacceptable?</p>	<p>Comments noted.</p> <p>The policy is to be amalgamated into Policy DM35 (Sustaining a Prosperous Rural Economy) which shall include allowance for the redevelopment of existing buildings for economic development in the countryside. It is important to limit the impact of development on the site and surrounding landscape, and although the NPPF’s definition of previously developed land includes the curtilage of land which is or was occupied by a permanent structure, the policy seeks to limit the extent of building in the site itself, unless justified, to reduce impact on the landscape.</p> <p>It is not proposed to include criterion i) in DM35 (Sustaining a Prosperous Rural Economy). It is not considered this test is necessary for proposals relating to proposals relating to economic development in the countryside, only for conversions to residential under DM24.</p> <p>It is recognised that the NPPF outlines that not all rural businesses and community projects will be in locations served by public transport. However, proposals for economic development proposals in the countryside will need to take account of LPR Policies SP3 and DM1, and active and sustainable methods of transport will be encouraged.</p>

## Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

### Emerging Draft LPR Policy: DC34 Equestrian/racehorse industry

### (Proposed Submission LPR Policy: DM37 Equestrian and Horseracing Industry)

Number of responses received: 9

Respondent (with lpr ref)	Response	Council Response
<b>Statutory consultees</b>		
Greenham Parish Council (lpr935)	<p>There has been a significant increase in evening events at Newbury Racecourse that are not related to racing, at the same time as a very large increase in numbers of homes on adjacent land within the Racecourse's ownership. This could harm the amenity of residents who may have been unaware of the frequency and type non-racing activities.</p> <p>Development proposals in support of events not related to the racing industry and likely to occur mainly in evenings or at weekends, must demonstrate community support and sensitivity to noise and traffic impacts on the neighbourhood and highway network.</p>	<p>Comments noted</p> <p>Add the following text to end of the unnumbered para (after 12.43) in the Emerging Draft LPR relating to Newbury Racecourse - <u>The consideration of neighbour amenity will be an important issue when considering development proposals in support of events not related to the horseracing industry.</u></p>
Lambourn Neighbourhood Development Plan Steering Group (lpr1714)	<p>Title - Equestrian/racecourse industry (Should this be raceHORSE industry?)</p> <p>The inclusion of the "North Wessex Downs AONB Racehorse Industry" from Policy CS12 of the previous Local Plan is welcome.</p> <p>The racing industry is vital to the economic well-being of the parish of Lambourn and of West Berkshire, as illustrated in the SQW Report "Horse Racing in Lambourn Valley. The Industry's Economic and Social Impacts. January 2019". Upper Lambourn and Lambourn are at the core of the industry and we would wish to see it continue to be supported.</p> <p>There is a tendency to assume that almost any development associated with racing is a "good thing" and should be permitted. This is not always the case</p>	<p>Comments noted.</p> <p>Amend title as follows Equestrian <u>and</u> Horseracing <del>racecourse</del> Industry</p> <p>Clarify and amend the supporting text as follows:            'The Local Plan recognises the important links between the various aspects of the equestrian industry and the shared facilities and infrastructure that support it, such as <del>farriers,</del> <u>farriers,</u> <del>horse feed merchants,</del> <u>horse feed merchants,</u> veterinary practices, <u>institutions</u> <u>providing social and medical support, specialist retailers and equipment suppliers, farriers and horse transporters, horse</u></p>

Respondent (with lpr ref)	Response	Council Response
	<p>and the suitability and necessity tests in DC34 should be clarified to ensure such development really does bring benefit, not harm. The submission by Jockey Club Estates is broadly supported and in particular Section 4.9 of their Report.</p> <p>The businesses associated with the racing industry also need to be considered, as do the demands for suitable housing for racing staff. Evidence for this, more holistic view, seems to be lacking in the LPR and may limit the opportunities for the emerging LNDP to frame policies, based on detailed local knowledge, in general conformity with the emerging Local Plan.</p> <p>The emerging Local Plan should present well-informed policies, which can be applied consistently and which balance the needs of this important industry with the well-being of the community and the environment.</p>	<p><u>feed merchants, livery yards and riding schools which cater to both commercial and more recreational markets. Whilst this policy sets out the Council's approach specifically to equestrian development, proposals for related development such as those providers of goods and services to the industry will be considered in accordance with Policy DM35.....</u></p> <p><u>Land used for equestrian activities such as grazing land, stables, field shelters and other equine buildings, gallops and access routes, can all impact on both the visual and physical nature of the environment. It is particularly important that development proposals are in keeping with the character and appearance of the local area and prevent the spread of the built form in the countryside and AONB and this will be expected to be addressed through good quality design.....'</u></p> <p><b><u>'North Wessex Downs AONB Racehorse Industry....</u></b>  <b><u>Necessity test:</u></b> <u>Proposals for redevelopment or change of use will need to</u> <del>it is no longer necessary to retain the yard or facility in its current use.</del> <u>demonstrate the absence of harm to the horseracing industry through the loss of the existing facility. In order to show that there is no longer a demand for the yard or facility in that particular location a robust marketing plan, to the satisfaction of the Local Planning Authority, will be required as evidence from the applicant to show that all reasonable attempts have been made to sell or let the site at a realistic price. Any proposal for the loss of a training yard will need to demonstrate how it will not detrimentally alter the critical balance and/or range of yard sizes available in the area. It is important to retain a supply of yards which are of various sizes to allow for market churn.</u> <u>development proposals will be required to provide:</u></p> <ul style="list-style-type: none"> <li><u>A robust assessment which clearly demonstrates the absence of demand for the existing use and the absence</u></li> </ul>

Respondent (with lpr ref)	Response	Council Response
		<p><u>of demand for an alternative horseracing industry related use (which should be the first priority);</u></p> <ul style="list-style-type: none"> <li>• <u>An assessment of the existing contribution that the facility makes to the horseracing industry, or in the case of a vacant site, the last known contribution;</u></li> <li>• <u>In the case of a derelict/vacant site, an assessment of the reasons for dereliction including a history of the previous uses and the attempts made to reuse it for horseracing industry related uses; and</u></li> <li>• <u>a robust marketing plan, to the satisfaction of the Council, as evidence to show that all reasonable attempts have been made to sell or let the site at a realistic price. Its scope should be agreed with the Council in advance but it would be expected to cover a sufficient period, show that the site has been marketed at an appropriate value and has been advertised in publications that are accessible to the horseracing industry.</u></li> </ul> <p>Proposals for fragmentation of existing establishments and facilities should not adversely affect the operational use of the site or the industry as a whole. <u>It is important to retain a supply of yards which are of various sizes to allow for market churn, ensuring the facilitation of start-up businesses as well as established businesses. The loss of a facility should therefore not detrimentally alter the critical balance and/or range of yard sizes available in the area.</u></p> <p>..... It is the Council's preference for workers to be accommodated within existing nearby villages, so as to contribute to the overall sustainability of settlements and limit development in the countryside. <u>Whilst racing charities provide some subsidised and/or hostel accommodation in the area, it is recognised there is still a specific need for affordable single person accommodation in Lambourn..'</u></p>

Respondent (with lpr ref)	Response	Council Response
Lambourn Parish Council (lpr1446)	<p>The racehorse training industry and its associated businesses are of vital importance to the Parish of Lambourn and to the wider West Berkshire district.</p> <p>It was a Lambourn Councillor who spearheaded the writing of policies ECON8 and ECON9 in the 1990s, ensuring the racehorse industry was specifically included in the Local Plan. These policies were superseded by policy CS12 (not CS13, as stated in the LPR). It has, in the main, served its purpose and we do not wish to see it watered down. Policy DC34 appears to include more details, especially about general equestrian use. The section on the NWD AONB Racehorse Industry is copied word for word from CS12. We are pleased to see a reference in the supporting text (9.253) to the importance of the links between the various supporting businesses, and the recognition (9.255) that proposals for development be in keeping with the character and appearance of the local area and prevent the spread of the built form in the countryside and the AONB.</p>	<p>Comments noted.</p> <p>Amend 'Superseded West Berkshire Core Strategy 2006-2026 Policy' in Appendix 9 of the Emerging Draft LPR as follows –</p> <p>CS13<del>2</del> Equestrian/<del>racecourse</del><u>horse</u> industry</p>
Newbury Town Council (lpr2223)	<p>We support this policy, apart from concern about the possible impact of Racecourse events (noise) on neighbouring residential land. not in policy</p> <p><b>Reason:</b> There has been a significant increase in evening events at Newbury Racecourse that are not related to racing, at the same time as a very large increase in numbers of homes on adjacent land within the Racecourse's ownership. This could harm the amenity of residents who may have been unaware of the frequency and type non-racing activities there. We are also concerned about the more general disregard for the interests of their leaseholders and occupiers exhibited by the Racecourse and by the 'gagging clause' in their lease to property owners which seems to disenfranchise them with respect to this. Whilst this may not be entirely a planning matter, we believe it has an impact on how future proposals for development by the Racecourse should be regarded.</p> <p><b>Change Proposed:</b> Add to end of Supporting Text for Newbury Racecourse:</p> <p>"Development proposals in support of events not related to the racing industry and likely to occur mainly in evenings or at weekends must demonstrate community support and sensitivity to noise and traffic impacts on the neighbourhood and highway network."</p>	<p>Comments noted</p> <p>Add the following text to end of the Emerging Draft LPR unnumbered para(after 12.43) relating to Newbury Racecourse - <u>The consideration of neighbour amenity will be an important issue when considering development proposals in support of events not related to the horseracing industry.</u></p>

Respondent (with lpr ref)	Response	Council Response
Shaw cum Donnington Parish Council (lpr260)	We support the policy	Comments noted
<b>General consultation bodies</b>		
British Horse Society (lpr868)	<p>The Society applauds and supports inclusion of this policy because, as read, it applies to both the racing and non-racing horse industry. It might be noticed, and referenced, that nationally the horse industry is the second largest rural employer after the agriculture industry in the UK (British Horse Industry Confederation 2017) and, because of the rural nature of West Berkshire, it is unlikely that the position is different in West Berks</p> <p>Title: Presumably 'racehorse' not 'racecourse' is meant?</p> <p>Nationally this industry is referred to as the 'horse industry' to cover racing and non-racing activities. We suggest 'horse industry' is used in the LPR to be consistent with national policies.</p> <p>See <a href="https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/69260/pb11323-en-horse-industry-strategy-051128.pdf">https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/69260/pb11323-en-horse-industry-strategy-051128.pdf</a></p> <p><a href="https://documents.hants.gov.uk/countryside/Equestrians-in-Hampshire.pdf">https://documents.hants.gov.uk/countryside/Equestrians-in-Hampshire.pdf</a></p> <p><a href="https://www.bvec.co.uk/downloads/external-information/mid-term-review-manifesto-for-the-horse-v7-jan-2017.pdf">https://www.bvec.co.uk/downloads/external-information/mid-term-review-manifesto-for-the-horse-v7-jan-2017.pdf</a></p> <p>We request that the wording of para 12.32 is modified or that the paragraph is removed. While we accept that there are some equestrian establishments where best practice might not be observed, there are others where it is and such establishments enhance the rural ambience. Furthermore, for example, there are agricultural premises and farm yards which are a blight on the landscape. To focus on equestrian establishments does not appear balanced to us.</p>	<p>Comments noted.</p> <p>Amend title as follows <u>Equestrian and Horseracing</u> <del>racecourse</del> Industry</p> <p>Clarify and amend the supporting text as follows:  'The Local Plan recognises the important links between the various aspects of the equestrian industry and the shared facilities and infrastructure that support it, such as <del>farriers, horse feed merchants,</del> <u>veterinary practices, institutions providing social and medical support, specialist retailers and equipment suppliers, farriers and horse transporters, horse feed merchants, livery yards and riding schools</u> which cater to both commercial and more recreational markets. <u>Whilst this policy sets out the Council's approach specifically to equestrian development, proposals for related development such as those providers of goods and services to the industry will be considered in accordance with Policy DM35.....</u></p> <p><u>Land used for equestrian activities such as grazing land, stables, field shelters and other equine buildings, gallops and access routes, can all impact on both the visual and physical nature of the environment.</u> It is particularly important that development proposals are in keeping with the character and appearance of the local area and prevent the spread of the built form in the countryside and AONB <u>and this will be expected to be addressed through good quality design.....'</u></p>

Respondent (with lpr ref)	Response	Council Response
Pegasus for Jockey Club Estates (lpr1907)	<p>JCE has reviewed the Regulation 18 draft of the Local Plan and submits these representations to assist in the drafting of appropriate policies to protect and enhance the success of the horse-racing industry centred at Lambourn – within an area known as the Valley of the Racehorse. These representations seek to ensure that the industry can thrive and continue to make a substantial contribution to the economic and cultural well-being of the area. A thriving racing industry ensures that this important part of the fabric of Lambourn and the wider area is protected, and the high-quality characteristics of the area can be maintained and enhanced. Achieving these goals has wider knock-on benefits for those not involved in horse-racing that may be involved in many industries that count horse-racing as part of their client/customer base.</p> <p>JCE is keen to assist the Council in preparing the new Local Plan so that the objectives and goals of the HRI can be aligned and complementary to the objectives and goals of the Council. JCE is able to draw upon extensive experience and knowledge regarding the HRI that it feels would be beneficial for the Council when it is preparing and implementing the new Local Plan. JCE extends an invitation to the Council to collaborate and it is on this basis that the representations are made.</p> <p>JCE considers that the plan (including the associated evidence base) should accommodate the following matters:</p> <ol style="list-style-type: none"> <li>1. Acknowledgment and consideration of the importance of the HRI when assessing the options for the strategic distribution of growth – the baseline information signalled as being prepared in this regard must be incorporated in further SA work;</li> <li>2. The need to ensure that distribution options avoid or minimise impacts on the HRI since the HRI is not susceptible itself to seeking alternative locations or options (other than on a very local scale).</li> <li>3. The need for appropriate policies to protect the industry both from itself and from other development that may impact upon</li> </ol> <p>JCE notes and welcomes the reference at paragraph 4.15 to Lambourn being the heart of one of the most important areas for horseracing in the country. It also welcomes the reference at paragraph 11.41 to the importance of the industry to the local rural economy. However, JCE considers that this underplays the contribution that the industry currently</p>	<p>Comments noted and the general support of the Jockey Club Estates is welcomed.</p> <p>Specific comments in relation to the Sustainability Appraisal are dealt with as part of the Council's response to comments on that document.</p> <p>Comments in relation to the Site Selection Background Paper will be incorporated as appropriate into that document, an updated version of which will be published with the Proposed Submission LPR.</p> <p>Amend the LP Context text as follows: 'The importance of agriculture, <u>the horseracing industry</u> and <u>other rural businesses</u>,.....are all important issues and challenges to be considered through the review of the Local Plan....'</p> <p>Amend the supporting text of the policy as follows: '<u>The North Wessex Downs AONB is home to around 10% of Britain's racehorse trainers and the Lambourn area is a nationally important centre of activity for the horseracing industry second only to Newmarket. The horseracing industry is one of the strongest rural industries in the district, employing over 700 people and contributing £22 million each year to the economy. Substantial investments in recent years, including the upgrading of the public gallops by the Jockey Club Estates and other training yards, has also enhanced Lambourn's status within the industry. The industry has long been a fundamental part of the character of Lambourn and the surrounding villages with the Lambourn Valley sometimes referred to as 'The Valley of the Racehorse'. The traditional gallops landscape and views of racehorses training are valued features of the character of the area.</u>'</p>

Respondent (with lpr ref)	Response	Council Response
	<p>makes to the wider economy given the national importance of horseracing to the economy and the complementary role that various horseracing locations around the country have in this regard. Lambourn is an area of growing importance to the industry and is one that JCE is very keen to protect. JCE considers that it is important that the evidence for the Local Plan includes documents that clarify the economic significance to the area so that the impacts of development proposed through the Local Plan can be fully understood and evaluated.</p> <p>The importance of the industry stretches beyond economic considerations. It also contributes to the characteristics of the area and assists in making the area an extremely beautiful place to live, work and visit. JCE considers that the next stages of the Plan will need to ensure that this is adequately explained and evidenced with appropriately worded policies to deliver the protection and support for growth that appears to be within the Regulation 18 documents. To assist in this regard, JCE has provided comments on the consultation documents.</p> <p>We consider first the evidence base documents before moving on to the Local Plan - see lpr1908.</p> <p>JCE considers that the Local Plan can and should be strengthened in the approach that it takes to the HRI. Strong and effective policies provide protection for existing businesses involved in the industry and provide confidence to new investors. Both are equally important, and both assist in supporting the economic success of the area. This economic success gives rise to positive social benefits for the community as well as ongoing contributions to the landscape character of the area.</p> <p>JCE wishes to make it clear that policy CS12 (Appendix 9 of the draft Local Plan mistakenly refers to CS13 being replaced by DC34) of the Core Strategy has proven to be very effective at protecting the industry and is pleased to see that emerging policy DC34 takes forward many aspects of this policy. The comments it now wishes to make are about strengthening that position as the industry continues to grow and as we approach a period of economic uncertainty as we get ever closer to emerging from the current pandemic.</p> <p>The Plan should identify and acknowledge the extent of the HRI in the District. This goes beyond the acknowledgment of the contribution that the</p>	<p>The contribution that the industry makes to the character of the area is also set out in more detail in the West Berkshire Landscape Character Assessment (2019). It is agreed the Landscape Character Appraisal prepared to inform the Lambourn Neighbourhood Development Plan will also be a particularly useful source of information in the consideration of planning applications.</p> <p>Amend Emerging Draft LPR Appendix 9 to refer to the correct policy as follows: ‘CS132’</p> <p>Clarify and amend the supporting text of the policy as follows:  ‘The Local Plan recognises the important links between the various aspects of the equestrian industry and the shared facilities and infrastructure that support it, such as <del>farriers, horse feed merchants,</del> <u>farriers, providing social and medical support, specialist retailers and equipment suppliers, farriers and horse transporters, horse feed merchants,</u> livery yards and riding schools which cater to both commercial and more recreational markets. <u>Whilst this policy sets out the Council’s approach specifically to equestrian development, proposals for related development such as those providers of goods and services to the industry will be considered in accordance with Policy DM35.....</u></p> <p>The LPR has to cover a wide variety of significant issues and it would not be appropriate to devote a whole chapter to the horseracing industry. More detailed policies are more appropriately considered as part of the Lambourn Neighbourhood Plan. Once this has been made, if further detail is then considered necessary to support the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>industry makes to the North Wessex Downs AONB. Although the importance of the industry is identified, JCE considers that it is relevant to explain where the industry is located and acknowledge the differences between the cluster centred on Lambourn and the uses that extend beyond this area. The Plan should also acknowledge the role that the industry plays in contributing to the character of the area, including the AONB. JCE suggests that the industry should be identified as being brownfield or greenfield in characteristics to assist in the consideration of future development proposals.</p> <p>As you are aware, Lambourn Parish Council is in the process of preparing a Neighbourhood Plan in consultation with local residents. This has involved the preparation of a number of background documents that will no doubt be of assistance to the Council in its preparation of the Local Plan. JCE urges the Council to liaise with Lambourn Neighbourhood Plan Steering Group to explore the benefit of doing this. JCE suggests that the Council would find particular merit in having regard to the Landscape Character Assessment that has been prepared for Lambourn and suggests that this should be used to help inform the commentary on the Local Plan regarding the characteristics of the HRI.</p> <p>JCE suggests that the Plan include a separate chapter on this topic to both signify the importance the Plan gives this industry and assist the reader in identifying the relevant considerations. That chapter should include the policies that relate to the HRI as well as a plan to identify the areas where the HRI is located and the differences between the areas.</p> <p>JCE considers that it is important that the policies also consider two important aspects: protecting the industry from itself and protecting the industry from impacts arising from non-HRI uses. We take these points in turn below.</p> <p><u>Protecting the industry from itself</u> - The Council has successfully resisted applications that have sought to diminish the value of a particular site to the HRI in pursuit of other economic gains (to the site owner). JCE has no desire to inhibit the economic betterment of individuals but it is concerned when it sees individual establishments redeveloped/lost. Such an action causes irreparable damage to the variety of sites within the industry that collectively cause significant harm to the value of the area for horseracing. It fully</p>	<p>development plan policies then the Council would welcome the support of the JCE in its preparation.</p> <p>Amend the supporting text as follows:  '<b>Necessity test:</b> <del>Proposals for redevelopment or change of use will need to it is no longer necessary to retain the yard or facility in its current use.</del> <u>demonstrate the absence of harm to the horseracing industry through the loss of the existing facility. In order to show that there is no longer a demand for the yard or facility in that particular location a robust marketing plan, to the satisfaction of the Local Planning Authority, will be required as evidence from the applicant to show that all reasonable attempts have been made to sell or let the site at a realistic price. Any proposal for the loss of a training yard will need to demonstrate how it will not detrimentally alter the critical balance and/or range of yard sizes available in the area. It is important to retain a supply of yards which are of various sizes to allow for market churn.</u> development proposals will be required to provide:</p> <ul style="list-style-type: none"> <li>• <u>A robust assessment which clearly demonstrates the absence of demand for the existing use and the absence of demand for an alternative horseracing industry related use (which should be the first priority);</u></li> <li>• <u>An assessment of the existing contribution that the facility makes to the horseracing industry, or in the case of a vacant site, the last known contribution;</u></li> <li>• <u>In the case of a derelict/vacant site, an assessment of the reasons for dereliction including a history of the previous uses and the attempts made to reuse it for horseracing industry related uses; and</u></li> <li>• <u>a robust marketing plan, to the satisfaction of the Council, as evidence to show that all reasonable attempts have been made to sell or let the site at a realistic price. Its scope should be agreed with the Council in advance but it would be expected to cover a</u></li> </ul>

Respondent (with lpr ref)	Response	Council Response
	<p>supports policies that intend to resist this. It suggests that the supporting text of policy DC34 can be strengthened to explain this as being the intention of the policy and providing further guidance to the reader on how the policy will be applied.</p> <p>JCE suggests that the following should be added as being required for any application where policy DC34 relates:</p> <ol style="list-style-type: none"> <li>1. The completion of an appropriate marketing exercise to demonstrate the absence of demand for the existing use and the absence of demand for an alternative HRI use (which should be the first priority). The scope of the exercise should be agreed with the Council before It must cover a sufficient period, market the site at an appropriate value and be advertised in publications that are accessible to the HRI.</li> <li>2. An assessment of the existing contribution of the facility to the HRI (or in the case of a vacant site, the last known contribution).</li> <li>3. In the case of a derelict/vacant site, an assessment of the reasons for dereliction including a history of the previous uses and the attempts made to reuse it for HRI-related</li> <li>4. Evidence to demonstrate the absence of harm to the HRI through the loss of the existing facility – recognising the need to preserve a variety of sites that facilitate start-up businesses in the HRI as well as established businesses.</li> <li>5. The cumulative losses prior to the application and before the decision is made should be taken into account when undertaking this</li> </ol> <p>JCE considers that such an approach is justified to ensure that the strength of the equine cluster can be preserved so that it continues to be a major contributor to the economy and contribute to the landscape character of the District.</p> <p>JCE is keen to avoid the experiences in other horseracing centres where development pressures have caused the decline of the industry in that location. Epsom provides an appropriate cautionary tale to be aware of. In 1970, Epsom had 520 horses in training and by 2019 this had fallen to 139. Epsom has now reached the level where it is financially unsustainable and is currently being supported financially by The Jockey Club. The decline at</p>	<p><u>sufficient period, show that the site has been marketed at an appropriate value and has been advertised in publications that are accessible to the horseracing industry.</u></p> <p>Proposals for fragmentation of existing establishments and facilities should not adversely affect the operational use of the site or the industry as a whole. <u>It is important to retain a supply of yards which are of various sizes to allow for market churn, ensuring the facilitation of start-up businesses as well as established businesses. The loss of a facility should therefore not detrimentally alter the critical balance and/or range of yard sizes available in the area.</u></p> <p>The concerns of the JCE are noted in relation to the protection of the industry from other development but it is important to note that the policies in the LPR need to be read as a whole. The impact of potential future development on the HRI at both a strategic level and individual application stage would therefore be taken into account as appropriate.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Epsom has taken place despite the growth of the industry as a whole and is the result of a combination of increased urbanisation in the area and an absence of adequate planning policy to protect the industry. JCE is confident that WBC will not let that happen in Lambourn and is keen to work with the Council to ensure that the appropriate policy framework is in place to secure this.</p> <p><u>Protecting the industry from other development</u> - JCE considers that it is equally important to ensure that there is a separate policy that deals explicitly with the assessment of impacts on the HRI arising from non-HRI uses. This is not just on sites that are currently or were last in HRI use, which are already covered in suggested policy DC34. This is also for those sites that are not in HRI use but, because of the location of the site, may have an impact on the HRI. This is especially significant when considering the distribution of new development through the Plan as well as the consideration of applications that subsequently come forward on such sites. The HRI can be sensitive to developments that interrupt or delay the movement of the industry around the area as well as uses that increase noise and disruption near existing uses. Other environmental impacts that should be considered are air quality, ecology and arboriculture. All of these are relevant considerations in any development control function but JCE considers that it is important to signpost developers to the need to give specific consideration of these factors on the HRI. Fundamentally, all developments within a defined area (to be identified in the Plan) should consider the economic, environmental and social impacts (both positive and negative) on the HRI.</p> <p>JCE considers that it is important that the policies of the new Local Plan are consistently applied and recognises the complicated and unusual nature of the HRI. It therefore suggests that the Council prepare a Supplementary Planning Document to guide the implementation of its policies and JCE offers full support and assistance in drafting this document</p> <p><u>Measures sought</u> -</p> <p>To address the points raised above, JCE considers that the Local Plan should be amended as follows:</p> <ol style="list-style-type: none"> <li>1. Include reference to the importance of preserving and enhancing the HRI in the vision and strategic objectives identified in section 3</li> </ol>	

Respondent (with lpr ref)	Response	Council Response
	<ol style="list-style-type: none"> <li>2. Update the evidence base to include HRI baseline assessment documents and refer to these as being 'key pieces of evidence' in section 4 of the Plan.</li> <li>3. Update Figure 1 (West Berkshire Constraints) to include information relating to the location of the HRI and refer to this in the supporting text</li> <li>4. Amend policy SP1 (spatial strategy) to explicitly refer to the objective of preserving and enhancing the HRI</li> <li>5. Review to the importance of preserving the landscape character associated with the HRI in policy SP8 and update the supporting text to explain this character</li> <li>6. Create a separate chapter to deal with the HRI</li> <li>7. Incorporate a new policy to deal with the assessment of impacts of non- HRI development on the HRI</li> <li>8. Prepare Supplementary Planning Document to help guide the application of the HRI policies of the Plan</li> </ol>	
<b>Other stakeholders</b>		
Councillor Tony Vickers (lpr664)	<p>We support this policy, apart from concern about the impact of non-racing Racecourse events (noise) on neighbouring residential land not in policy. Significant increase in evening events not related to racing is occurring, which cause harm to the amenity of residents.</p> <p>Add to end of Supporting Text for Newbury Racecourse:  “Development proposals in support of events not related to the racing industry and likely to occur mainly in evenings or at weekends must demonstrate community support and sensitivity to noise and traffic impacts on the neighbourhood and highway network.”</p>	<p>Comments noted</p> <p>Add the following text to end of the Emerging Draft LPR unnumbered para (after 12.43) relating to Newbury Racecourse - <u>The consideration of neighbour amenity will be an important issue when considering development proposals in support of events not related to the horseracing industry.</u></p>
<b>Landowners, site promoters and developers</b>		
Fowler Architecture and Planning (lpr1810)	<p>The section on the North Wessex Downs AONB Racehorse Industry should be broadened to reflect the need for the industry to modernise their stable complexes and facilities so that they remain fit-for-purpose. Explicit recognition is therefore needed in policy to support the retention, expansion and modernisation of existing establishments in order to maintain their</p>	<p>Comments noted.</p> <p>Amend the supporting text as follows:  <u>'The horseracing industry is one of the strongest rural industries in the district, employing over 700 people and contributing £22 million each year to the economy.</u></p>

<b>Statutory consultees</b>		
Greenham Parish Council (lpr937)	<p>GPC would like to see an aim to reduce need to travel by car.</p> <p>In 12.48 of Supporting Text, in last sentence replace “re-use the alignment” with “replace that part”; also delete all after “railway line to provide” and replace with: “...,between Hermitage and Newbury, a route for both leisure and potentially commuter use, incorporating existing minor roads and bridle ways as necessary.</p> <p>In Supporting Text – preferably at the end of first para (12.44) or immediately after it, there needs to be a statement such as:- “At all stages in planning for a major development, proposals should consider ways of reducing the need to travel, especially during the working day. Where possible, all facilities needed on a daily basis should be located within a 15-minute journey time of a new place of employment or residence by means of active travel means. If necessary, facilities should be provided on site.</p>	<p>Comments noted</p> <p>A link from Newbury to connect with the Hermitage to Hampstead Norreys former railway cycle path is recognised as an important leisure cycling corridor (as well as being having potential for future commuter use). The Council would be supportive of initiatives to develop and deliver a link from Newbury with the Hermitage to Hampstead Norreys active travel route.</p> <p>Amend paragraph in the supporting text as follows –  ‘....Specifically this could include opportunities to <u>replace that part</u> <del>reuse the alignment</del> of the former Didcot, Newbury &amp; Southampton railway line to provide <del>a leisure walking and cycling route between Hermitage and Hampstead Norreys</del> <u>between Hermitage and Newbury, a route for both leisure and potentially commuter use,</u></p>

Respondent (with lpr ref)	Response	Council Response
		<p><u>incorporating existing minor roads and bridle ways as a walking, cycling and equestrian route. Opportunities at other locations, including use of the Kennet and Avon canal towpath, (although opportunities at other locations will be sought where applicable).</u></p> <p>Add the following text to the end of the first paragraph of the supporting text as follows -  <u>'...At all stages, proposals should consider the need of reducing the need to travel, especially during the working day. Where possible, services and facilities should be located within an acceptable walking and cycling distances of new places of employment or residences.'</u></p>
Hermitage Parish Council (lpr1814)	<p>HPC agrees with the policy that 'new development will only be permitted where the relevant transport infrastructure is delivered in a timely manner and that new developments would be expected to make a proportionate contribution to the provision or improvement of a range of transport infrastructure'.</p> <p>However, the PC would like to make the following statement as it believes that a further increase of 20 dwellings in the village would be unfair due to the considerable developments that have taken place in Hermitage. In the last 15 or so years the number of dwellings has increased by 36% to 786 or 42 % if all those currently in the planning process are included. It is understood that this community has absorbed one of the greatest increases in homes in the area, second only to Cold Ash. Perception by the community is that Hermitage will cease to be a village.</p> <p>As well as Forest Edge and Hermitage Green being fairly substantial developments, there are a number of smaller developments that are currently going through the planning process: Cala Homes development behind Charlotte Close, the Old Farmhouse off the main street as well as the new CoOp and houses on the old garage site. This has subsequently led to an increase in the amount of traffic on the B4009.</p> <p>The potential for a number of houses in Compton will inevitably have an effect on the traffic going through Hermitage towards Newbury in the future too, as will any future developments that are agreed.</p>	<p>Comments noted</p> <p>Comments around which sites should be allocated will be picked up in other parts of the Local Plan Review. Transport modelling has taken place which incorporates the combined impact of proposed new development through the plan period. Detailed transport work for each development (where applicable) will come forward at the planning application stage.</p>

Respondent (with lpr ref)	Response	Council Response																																													
	<p><b>Road Safety Concerns:</b>  <b>Speed:</b>            At the moment the PC in conjunction with WB Traffic and Road Safety Team (Cheryl Evans) are monitoring the speed of the traffic due to concerns that the road is becoming a rat run and that drivers are not adhering to the speed limit, despite there being a primary school towards the north end of the road. Our current findings can be seen in the table below (data acquired between June 2020 and January 2021).</p> <p>KR ProGen5 treatment summary: B4009, Hermitage</p> <table border="1" data-bbox="436 719 1323 1031"> <thead> <tr> <th>Treatm ent</th> <th>Av. mph</th> <th>Max mph</th> <th>85<sup>th</sup> m ph</th> <th>% Above ACPO</th> <th>IN mph</th> <th>OUT mph</th> <th>Reduct ion mph</th> <th>Reduct ion %</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>31</td> <td>59</td> <td>39</td> <td>31.7</td> <td>31</td> <td>27</td> <td>-4</td> <td>-13</td> </tr> <tr> <td>2</td> <td>31</td> <td>75</td> <td>37</td> <td>28.8</td> <td>31</td> <td>28</td> <td>-3</td> <td>-10</td> </tr> <tr> <td><b>3 (Ghost)</b></td> <td><b>32</b></td> <td><b>65</b></td> <td><b>39</b></td> <td><b>32.4</b></td> <td><b>32</b></td> <td><b>30</b></td> <td><b>-2</b></td> <td><b>-6</b></td> </tr> <tr> <td>3</td> <td>31</td> <td>60</td> <td>37</td> <td>28</td> <td>31</td> <td>29</td> <td>-2</td> <td>-6</td> </tr> </tbody> </table> <p>As you can see from the data between 28% and 32% of the traffic on this road (Northbound) are over the ACPO –(10% + 2mph =35mph). With the highest speed recorded at 75mph. A quite shocking statistic.</p> <p>Previous Community Speed Watch deployment data prior to the pandemic showed:            Total cars caught between 30 and 50mph – 39 cars in 1 hour            -35 cars captured between 31 and 40 (this is likely to be 35-40mph)            -4 cars captured between 41 and 50mph</p>	Treatm ent	Av. mph	Max mph	85 <sup>th</sup> m ph	% Above ACPO	IN mph	OUT mph	Reduct ion mph	Reduct ion %	1	31	59	39	31.7	31	27	-4	-13	2	31	75	37	28.8	31	28	-3	-10	<b>3 (Ghost)</b>	<b>32</b>	<b>65</b>	<b>39</b>	<b>32.4</b>	<b>32</b>	<b>30</b>	<b>-2</b>	<b>-6</b>	3	31	60	37	28	31	29	-2	-6	<p>The current issues relating to speeding is an operational issue that is currently being dealt with by WBC’s Traffic and Road Safety Team.</p>

Respondent (with lpr ref)	Response	Council Response
	<p><b>Demographic</b> Hermitage Parish – 9 cars -mainly from Forest Edge and B4009 Compton and Hampstead Norreys 9 cars Total for Local areas including: Shaw, Newbury, Downland Villages, Cold Ash and Upper Bucklebury -29 cars Total for Outside areas including: Reading, Bracknell, Swindon, Hungerford, Marlborough 10 cars. These vehicles were sent letters from TVP. The Parish Council, having now collected sufficient data to enable further deployment of Community Speed Watch (but has been thwarted by the Covid Pandemic) Is concerned that further development within the area will only exacerbate the situation without due consideration to the capacity of an already busy and quite dangerous B -road.</p> <p>The Parish Council requests that proactive consideration for traffic calming measures on the B4009 is at the forefront of the LPR. Southbound data will be collected as soon as the pandemic allows for normal life to be resumed as well as data from the Yattendon road – residents have complained to the PC that they feel that the speed along this road is also excessive.</p> <p><b>Road visibility:</b> Further concern is directed at the mini-roundabout at the Priors Court Road junction – the visibility when entering and exiting the roundabout is difficult and the roundabout is near capacity – further developments within Hermitage would need this roundabout to be modified/ improved.</p> <p><b>Green Strategy:</b> WB in its strategy is committed to improving green transport and reducing its carbon footprint (WB Environment strategy July2020 and the Local Transport Plan)– the very successful Eling way that connects Hampstead Norreys and Hermitage has gone some way of improving the B4009 for cyclists and pedestrians alike. However, the Parish Council feels that for it truly to be committed to its Green Policy, the Active Travel Route <b>must</b> be continued south to link Hermitage and Newbury and a suitable route found –</p>	<p>Requests for Community Speed Watch and specific traffic management measures, such as traffic calming, are not covered in the Local Plan Review. These can be raised with the Council via the current highways network management processes.</p> <p>Local highway, traffic management and safety issues would be considered as part of the Development Management process should further applications come forward. Any such required improvement identified through this process would need to be in accordance with this policy.</p> <p>A link from Newbury to connect with the Hermitage to Hampstead Norreys former railway cycle path is recognised both as an important leisure and potential commuter cycling route, including being shown in the Council’s Local Walking &amp; Cycling Infrastructure. WBC would be supportive of initiatives to develop and deliver a link from Newbury to the new Eling Way active travel path.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Bullet point 7 DC 35. This would be a great step forward in both reducing the traffic on the B4009 and reducing emissions as well as providing a safe route for cyclists and would ensure that bullet points1 and 2 DC35 are met.</p> <p><b>Transport:</b> Public transport -bus services have been reduced over the years, HPC would like to see improvements to this provision.</p> <p><b>Summary:</b> Hermitage Parish Council is concerned that following the developments of the above housing estates (FE and HG) there has been little improvement in the infrastructure -such as traffic calming, speed cameras etc in the village since the building of these sites and is also concerned that if further development is to be allowed the same will be true. The PC urges the WB Council to fully review the traffic situation through Hermitage. It asks WBC to ensure that Bullet point 6-‘improvements to the safety and operational capacity of the local road network’ is met and to prohibit further development in an AONB.</p>	<p>Where contributions from new development can be sought towards passenger transport services these opportunities are taken. However, this is normally only effective connected with large developments. Other ways of supporting travel choice in areas outside of the main urban areas of West Berkshire will be explored through the Bus Service Improvement Plan and review of the Local Transport Plan. Traditional bus services are not sustainable with small passenger numbers.</p>
<p>Newbury Town Council (lpr2222)</p>	<ol style="list-style-type: none"> <li>1. Minor change regarding re-use of former railway lines</li> <li>2. Aim to reduce need to travel by car</li> </ol> <p>Reason: The Hermitage to Hamstead Norreys cycle path has recently been completed. The current focus is the link between Hermitage and Newbury, which will require considerably most funding but also potentially have much greater</p> <p>The ideal transport policy would not rely on private car ownership at all. The concept of a “15-minute neighbourhood” applied to a sustainable modern settlement in a Climate Emergency would require all daily needs to be met without a car.</p> <p>Change Proposed: In 12.48 of Supporting Text, in last sentence replace “re-use the alignment” with “replace that part”; also delete all after “railway line to provide” and replace with: “... between Hermitage and Newbury, a route</p>	<p>Comments noted.</p> <p>A link from Newbury to connect with the Hermitage to Hampstead Norreys former railway cycle path is recognised both as an important leisure and potential commuter cycling route, including being shown in the Council’s Local Walking &amp; Cycling Infrastructure. WBC would be supportive of initiatives to develop and deliver a link from Newbury to the new active travel path.</p> <p>Add the following text to the end of the first paragraph of the supporting text as follows -  <u>‘...At all stages, proposals should consider the need of reducing the need to travel, especially during the working day. Where possible, services and facilities should be located within an acceptable walking and cycling distances of new places of employment or residences.’</u></p>

Respondent (with lpr ref)	Response	Council Response
	<p>for both leisure and potentially commuter use, incorporating existing minor roads and bridle ways as ”</p> <p>Somewhere in Supporting Text – preferably at the end of first para (12.44) or immediately after it, there needs to be a statement such as: “At all stages in planning for a major development, proposals should consider ways of reducing the need to travel, especially during the working day. Where possible, all facilities needed on a daily basis should be located within a 15-minute journey time of a new place of employment or residence by means other than the private car. If necessary, facilities should be provided on site.”</p>	
Shaw-cum-Donnington Parish Council (lpr261)	We support the policy.	Comments noted
Stratfield Mortimer Parish Council (lpr442)	<p>While the policy is sensible, it does not deliver the requirements in SP 5 or SP 22. It is accepted that this is difficult to achieve but there are no radical policies that attempt to ‘shift the dial’ on, for instance, climate change. The vague reference to “expect to make a proportional contribution” is a very weak wording and the only real climate change element is the “provision of electric vehicle charging points and associated infrastructure”. Once again this is very vague.</p> <p>Changes: A more robust and radical approach that will deliver on the Strategic Policies.</p>	<p>Comments noted.</p> <p>Amend the first paragraph of the policy to strengthen the link between the policy and how it can contribute to addressing the climate emergency, as follows - ‘Proposals for new development will be expected to demonstrate the type and level of travel activity likely to be generated. <u>In order to assist in tackling the climate emergency, this travel activity will be expected to be minimised by the design of developments that support low levels of travel with a focus on local journeys that can be made sustainably. Developments must be supported through a range of infrastructure associated with different transport modes...</u>’</p> <p>The provision of electric vehicle charging points and infrastructure is currently actively sought in the development management process and will remain the case in the Local Plan Review. The Council is also currently developing its own guidance to outline the requirements that developers will be expected to provide.</p>

Respondent (with lpr ref)	Response	Council Response
		The UK Government has recently announced that new homes and buildings, including those undergoing renovations, are now required to install electric vehicle charging points as part of English Building Regulations.
Defence Infrastructure Organisation (lpr2072)	Many MOD establishments have specific operational access requirements, in particular logistics. The dimensions and weights of some of the vehicles used by the MOD can be beyond that normally used by public/commercial vehicles. When designing schemes which affect key access routes to MOD establishments it is therefore recommended that the access requirements are taken into account and the MOD is consulted	Comments noted
<b>General consultation bodies</b>		
AWE (lpr521)	Changes: There should be reference to transport infrastructure accommodating electric scooters in the event their use on the external highway network becomes legal. Similarly, electric scooters should be referenced in paragraph 12.46 in the event their use on the external highway network becomes legal.	Comments noted.  The Council is aware of the issues surrounding electric scooters and that they may potentially, in time, become legal on the local highway network.  The Council will be undertaking a review of its Local Transport Plan following the Local Plan Review. It is highly likely that this will consider policies surrounding the role that new technologies will have on the District over future years. This will include the need to respond to and cater for new and emerging micro-mobility technologies, such as e-scooters.
British Horse Society (lpr 876)	The wording in this section does not support the horse industry policy (DC34) because, although this section includes recreational travel, there is no mention of equestrian travel. It is vital to include equestrian travel to support the horse industry.  Changes: To the policy:	Comments noted.  Amend the policy and supporting text to include references to equestrian travel where appropriate:  1 <sup>st</sup> , 2 <sup>nd</sup> and 8 <sup>th</sup> bullet points of the policy as follows

Respondent (with lpr ref)	Response	Council Response
	<p><i>'Connections and improvements to local pedestrian, cycle and <b>equestrian</b> networks, including access to public transport routes.'</i>  <i>'Walking, cycling <b>and equestrian</b> infrastructure identified in relevant Local Cycling and Walking Infrastructure Plans.'</i>  <i>'Works to allow the re-use of former railway line alignments as walking, cycle and <b>equestrian</b> routes.'</i></p> <p>To the supporting text (changes in bold)  <b>12.46</b> <i>The Council actively seeks to further develop walking, cycling <b>and equestrian</b> networks in the District to encourage more travel by sustainable modes. As part of this, Local Cycling and Walking Infrastructure Plans (LCWIPs) identify specific walking, cycling and equestrian improvements on key corridors. <b>Cycling and walking improvements</b> are largely centred on the urban areas with one covering Newbury and Thatcham urban area and the other including the Eastern Urban Area. For the latter plan the Council has partnered with Reading and Wokingham Borough Councils in the development of a LCWIP for the wider Reading urban area. The LCWIPs will be used to inform the Council's own future investment strategies and CIL funding bids as well as to guide the delivery of the most appropriate walking, cycling <b>and equestrian</b> infrastructure to support new development.</i></p> <p><b>12.48</b> <i>Whilst it is anticipated that the majority of development will be focused in existing urban areas and within settlement boundaries, it is important that improvements are also sought to encourage sustainable leisure and recreational opportunities in the rural areas of the District. Specifically this could include opportunities to re-use the alignment of the former Didcot, Newbury &amp; Southampton railway line to provide a leisure walking, cycling <b>and equestrian</b> route between Hermitage and Hampstead Norreys (although opportunities at other locations will be sought where applicable).</i></p>	<ul style="list-style-type: none"> <li>• Connections and improvements to local pedestrian, <del>and</del> cycle <u>and equestrian</u> networks, including access to public transport routes.</li> <li>• Walking, <del>and</del> cycling <u>and equestrian</u> infrastructure identified in relevant Local Cycling and Walking Infrastructure Plans</li> <li>• Works to allow the re-use of former railway line alignments as walking, <u>cycling and equestrian</u> <del>and cycle</del> routes.</li> </ul> <p>Amend the supporting text as follows –  'The Council actively seeks to further develop walking, cycling <u>and equestrian</u> networks in the District to encourage more travel by sustainable modes.....The LCWIPs will be used to inform the Council's own future investment strategies and CIL funding bids as well as to guide the delivery of the most appropriate walking, cycling <u>and equestrian</u> infrastructure to support new development.</p>
Canal and River Trust (lpr 910)	Changes: Please add works to improve the Kennet & Avon towpath as a walking and cycling route.	Comments noted.  The Kennet & Avon Canal is, and will continue to remain an important walking and cycling route in West Berkshire (recognised in the Council's Local Walking & Cycling Infrastructure Plan).

Respondent (with lpr ref)	Response	Council Response
		<p>Amend paragraph in the supporting text as follows –  ‘...Specifically this could include opportunities to <u>replace that part reuse the alignment</u> of the former Didcot, Newbury &amp; Southampton railway line to provide a <u>leisure walking and cycling route between Hermitage and Hampstead Norreys between Hermitage and Newbury, a route for both leisure and potentially commuter use, incorporating existing minor roads and bridle ways as a walking, cycling and equestrian route. Opportunities at other locations, including use of the Kennet and Avon canal towpath, (although opportunities at other locations will be sought where applicable).</u>’</p>
<p>Mid and West Berkshire Local Access Forum (lpr1891)</p>	<p>MWBLAF welcomes the inclusion in this policy of “Works to allow the re-use of former railway line alignments as walking and cycle routes” and the specific mention in paragraph 12.48 of the leisure walking and cycling route between Hermitage and Hampstead Norreys. This route has been completed, and is therefore not a future opportunity as suggested in this paragraph. The value of this route will be greatly enhanced if it can be extended to Newbury to Compton, and it could then become used for commuting as well as leisure. Note that this route is for equestrian use as well as walking and cycling.</p> <p>The Forum supports the British Horse Society’s view that reference to equestrians must be included in this section – please see the Society’s response for specific proposals.</p> <p>Changes:  The Forum recommends that paragraph 12.48 is amended to reflect the current status of the Hermitage to Hampstead Norreys leisure route, and the aspiration to extend it:  12.48 Whilst it is anticipated that the majority of development will be focused in existing urban areas and within settlement boundaries, it is important that improvements are also sought to encourage sustainable leisure and recreational opportunities in the rural areas of the District. Specifically this could include opportunities to re-use the alignment of the former Didcot,</p>	<p>A link from Newbury to connect with the Hermitage to Hamstead Norreys former railway cycle path is recognised as an important leisure cycling corridor (as well as being having potential for future commuter use). WBC would be supportive of initiatives to develop and deliver a link from Newbury with the Hermitage to Hampstead Norreys active travel route as would opportunities to extend the route northwards to Compton.</p> <p>Please see response to lpr876</p> <p>The amendment to the supporting paragraph specifically looks to provide a link to replace the former railway alignment between Hermitage and Newbury.</p> <p>Although the potential to extend the Hermitage and Hampstead Norreys route north to Compton has not been included in revised supporting text, opportunities to develop this would be supported.</p>

Respondent (with lpr ref)	Response	Council Response
	Newbury & Southampton railway line to <del>provide a</del> <b>extend the new</b> leisure walking <del>and</del> -cycling <b>and equestrian</b> route between Hermitage and Hampstead Norreys <b>to Newbury and Compton</b> (although opportunities at other locations will be sought where applicable).	
Home Builders Federation (lpr1954)	<p>This policy introduces requirements for electric vehicle charging points and any associated infrastructure to be provided on all development. The HBF supports the use of electric and hybrid vehicles and the introduction of the necessary supporting infrastructure via a national standardised approach implemented through the Building Regulations to ensure a consistent approach to future proofing the housing stock. It is the industry's preference for a national approach to the provision of charging points rather than local authorities setting their own standards. We consider this is necessary to allow research and development and supply chains to focus upon responding to agreed national targets, and for training providers to plan their programmes to equip the labour force to meet these new requirements. It is fundamentally inefficient to create a plurality of standards.</p> <p>The Government has recognised in recent consultations the possible impact of any requirement to provide electric vehicle charging points on housing supply, where the requirements are not technically feasible. The same consultation proposed introducing exemptions for such developments. The costs of installing the cables and the charge point hardware will vary considerably based on site-specific conditions in relation to the local grid. The introduction of Electric Vehicle Charging Points (EVCP) in new buildings will impact on the electricity demand from these buildings especially for multi-dwelling buildings. A requirement for large numbers of EVCPs will require a larger connection to the development and will introduce a power supply requirement, which may otherwise not be needed. The level of upgrade needed is dependent on the capacity available in the local network resulting in additional costs in relation to charge point instalment.</p> <p>Where such costs are high the Government are proposing that any potential negative impact on housing supply should be mitigated with an appropriate exemption from the charge point installation requirement based on the grid connection cost. The consultation proposes that the threshold for the exemption is set at £3,600. In instances where the additional costs are likely to make developments unviable, it is the Government's view that the EVCP</p>	<p>Comments noted.</p> <p>The Council is supportive of a standardised approach recently introduced through English Building Regulations Approved Document S, whereby electric vehicle charging points would be mandated in new buildings and dwellings (as well as those undergoing major refurbishment).</p> <p>The supporting text recognises that the provision of charging points are now mandated in developments (and will contain a footnote reference to the Building Regulations Approved Document S). The policy wording also recognises a need for new developments, where appropriate, to assist in helping to achieve a wider public charging network to help achieve the achievement of a net zero West Berkshire by 2030. The development of a local Electric Vehicle Charging Strategy guidance note will help developers to provide the necessary infrastructure required by the new Building Regulations and any further provision agreed through the development management process.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>requirements should not apply and only the minimum Energy Performance of Buildings Directive requirements should be applied. As such we would suggest that the requirement for EVCPs should not be included in the local plan because the Government's proposed changes to Building Regulations will provide a more effective framework for the delivery of charging points for electric vehicles.</p> <p>Changes: Suggest that the requirement for EVCPs should not be included in the local plan because the Government's proposed changes to Building Regulations will provide a more effective framework for the delivery of charging points for electric vehicles.</p>	<p>The policy has now been worded to take into account the mandating the delivery of charging points into the Building Regulations. The policy seeks to work with developers, where appropriate, to go beyond the requirements to assist in developing a more comprehensive public charging network in West Berkshire.</p>
<b>Other stakeholders</b>		
Ian Parsons (lpr852)	<p>Public transport in the AONB is inconsistent - and heavily subsidised by parish councils. A council owned and operated bus service, similar to the one in Reading, would be welcomed, both for residents and visitors.</p>	<p>Comments noted. It is recognised that many rural parts of the district have no, or a very minimal bus service. Due to the difficulty in providing cost-effective transport in rural areas, the Council has encouraged and supported community transport. The Council has recently published a Bus Service Improvement Plan, which outlines that Demand Responsive Transport options are being investigated for rural areas where there are no bus services (e.g. between Hungerford and Lambourn).</p>
Councillor Tony Vickers (lpr665)	<p>We support this policy apart from wanting:  <b>1. Minor change regarding re-use of former railway lines</b>  The Hermitage to Hamstead Norreys cycle path has recently been completed. The current focus is the link between Hermitage and Newbury, which will require considerably most funding but also potentially have much greater benefits. There is also a need to explore the continuation of a safe off-road route, using the old railway line if possible, from Hampstead Norreys to Compton and beyond towards Didcot.  <b>2. Aim to reduce need to travel by car.</b></p>	<p>Comments noted. A link from Newbury to connect with the Hermitage to Hampstead Norreys former railway cycle path is recognised both as an important leisure and potential commuter cycling route, including being shown in the Council's Local Walking &amp; Cycling Infrastructure. The Council would be supportive of initiatives to develop and deliver a link from Newbury to the new Eling Way active travel path, as would opportunities to extend the route northwards to Compton.</p>

Respondent <i>(with lpr ref)</i>	Response	Council Response
	<p>The ideal transport policy would not rely on private car ownership at all. The concept of a “15-minute neighbourhood” applied to a sustainable modern settlement in a Climate Emergency would mean all daily needs can be met without a car.</p> <p>Changes:</p> <ol style="list-style-type: none"> <li>1. In 12.48 of Supporting Text, in last sentence replace “re-use the alignment” with “replace that part”; also delete all after “railway line to provide” and replace with: “..., between Hermitage and Newbury, a route for both leisure and potentially commuter use, incorporating existing minor roads and bridle ways as necessary.”</li> <li>2. Somewhere in Supporting Text – preferably at the end of first para (12.44) or immediately after it, there needs to be a statement such as:-</li> </ol> <p>“At all stages in planning for a major development, proposals should consider ways of reducing the need to travel, especially during the working day. Where possible, all facilities needed on a daily basis should be located within a 15-minute journey time of a new place of employment or residence by means other than the private car. If necessary, facilities should be provided on site.”</p>	<p>Accessibility to main services and facilities, including education and employment has been a key consideration in the Council’s Housing &amp; Employment Sites Availability Assessment. This has included looking at walking and cycling distances, as well as the proximity to bus and rail services (and assessing service frequencies).</p>
<b>Landowners, site promoters and developers</b>		
<p>Deloitte for Green Park Business Park (lpr2034)</p>	<p>Policy DC35 identifies the types of transport infrastructure that new development will be expected to make a proportionate contribution towards. GPR wishes to emphasise the need for the continued enhancement of sustainable transport options and infrastructure, in particular the M4 corridor, which serves Green Park. This is vital to supporting West Berkshire and the wider Thames Valley area as it continues to grow as an important employment location.</p> <p>Changes: GPR therefore requests that an additional bullet point is included in Policy DC35 as follows: “Improvements to the M4 motorway and strategic road network in the Thames Valley.”</p>	<p>Comments noted. Policy DC35 specifically relates to where new development will be expected to contribute towards the provision or improvement of transport infrastructure. National Highways are a statutory consultee for both the Local Plan Review process and the development management process, where any potential new developments are located close to or may have an impact on the Strategic Road Network. Network Rail and GWR are also similarly consulted in terms of issues relating to the railway lines and rail services in the district.</p>

Respondent (with lpr ref)	Response	Council Response
Lichfield for North East Thatcham Consortium (lpr2405)	<p>We support the inclusion of this policy. The policy states “<i>new development will only be permitted where the relevant transport infrastructure is delivered in a timely manner</i>”; this is obviously important and will need to be factored into the appropriate phasing of development – and assessment of viability - undertaken through the next stages of the local plan.</p> <p>TPA’s note at Appendix 3 provides commentary on the “<i>proportionate contribution to the provision or improvement of a range of transport infrastructure</i>” that NET might provide.</p>	Comments noted.
Pro Vision for Feltham Properties (lpr2280)	<p>We welcome the inclusion of the provision of electric vehicle charging points and associated infrastructure within the scope of ‘transport infrastructure’ at Policy DC35. Provision of EV charging hubs or stations is likely to become in increasing demand over the plan period.</p> <p>Paragraph 12.49 of the Consultation Document acknowledges that developers will be encouraged to go further than charging points on all properties to help achieve a comprehensive public charging network in public car parks, supermarkets and retail parks, railway stations, and where is safe to do so, at petrol filling stations. However, the Local Plan provides no detail on how this will be achieved.</p> <p>Whilst it is envisaged that for the most part vehicle charging will take place at home, it should be recognised that a widespread charging point network is important for drivers who do high mileage, travel long distances or who do not have access to charging points at home or at work.</p> <p>The Ten Point Plan for a Green Industrial Revolution (November 2020) now increases the urgency for the development of charging infrastructure by bringing forward the ban of the sale of new petrol, diesel and most hybrid cars to 2030. As a result, delivering a widespread charging network is critical to encouraging the uptake of EV ownership. Indeed, the Government’s ‘Road to Zero’ (July 2018) Paper confirms that the Government’s ambition is that the UK should have one of the best and most comprehensive charging networks in the world.</p> <p>As a result, it is considered that to positively encourage the delivery of infrastructure for electric vehicles, the Local Plan should include a separate Policy (or be suitably incorporated into Policy DC35 and/or DC36) that seeks to actively encourage development for new electric vehicle charging infrastructure (e.g. charging stations) in suitable locations, including close to</p>	<p>Comments noted.</p> <p>The supporting text recognises that the provision of charging points are now mandated in new developments (with a footnote reference to the Building Regulations Approved Document S). It also recognises a need for new developments, where appropriate, to assist in helping to achieve a wider public charging network (including charging hubs or stations) to help achieve the achievement of a net zero West Berkshire by 2030. The development of a local Electric Vehicle Charging Strategy guidance note will help developers to provide the necessary infrastructure mandated by the new Building Regulations and any further provision agreed through the development management process.</p> <p>Amend the paragraph in the supporting text to take account of the new 2030 date for banning the sale of new petrol and diesel cars as follows –  ‘The provision of electric vehicle charging points and associated infrastructure supports the need for readiness for the banning <u>the sale</u> of new petrol, diesel or hybrid cars in the UK, which will occur during the lifetime of the plan, <u>by 2030 in 2035</u>.’</p> <p>Footnote links to the relevant strategy documents will be provided. Furthermore, this is likely to form part of the</p>

<b>Respondent</b> <i>(with lpr ref)</i>	<b>Response</b>	<b>Council Response</b>
	the strategic road network, on primary transport routes, and close to existing areas of retail and leisure etc.	review of the Council's Local Transport Plan taking place during 2022.

## Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

### Emerging Draft LPR Policy: DC36 Parking and Travel Plans

#### (Proposed Submission LPR Policies: DM44 Parking and DM45 Travel Planning)

Number of responses received: 15

Respondent (with lpr ref)	Response	Council Response
<b>Internal</b>		
<b>Statutory consultees</b>		
Greenham Parish Council (lpr938)	<p>GPC would like to see Parking and travel as two separate issues, not one.</p> <p>GPC would like the creation of individual policies for Parking and Travel plans</p>	<p>Comments noted.</p> <p>A separate policy covering Travel Plans will be prepared for the Regulation 19 submission. The importance of the role for good travel planning to influence people's travel choices and behaviour is recognised.</p>
Hermitage Parish Council (lpr1819)	<p>We are very pleased to read and fully support the requirement for all new developments to include electrical charging points for all private homes</p> <p>We are also pleased to read and support the fact that garages do not count for the purpose of required parking spaces</p> <p>However, one point we would like to see incorporated into the policy, is a ban on collinear or continuous parking (see below for further details)</p> <p>We would like to see a ban on collinear parking, in the design of new developments.</p>	<p>Comments noted.</p> <p>Guidance on the design and layout of car parking will be covered in the Council's emerging Highways Design Guide for Residential Development.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>'The Chapter Aims' in section 8 of 'Manual of streets' as referred to in parking policy P1, states the following;  <i>Explain how the parking of vehicles is a key function of most streets in residential areas and that it needs to be <u>properly considered</u> in the design process.</i>  <i>Confirm that, having regard to the policy in Planning Policy Statement 3: Housing (PPS3), 1 designers need to <u>consider carefully how to accommodate the number of cars that are likely to be owned by residents</u> (Wales: refer to TAN 18: Transport 2).</i></p> <p>It is our belief that collinear parking is neither properly considered nor accommodates fully, the likely number of cars in a household.  Real life experience tells us that (for example) when a four bedroom property is designed with a carport and two linear parking spaces in front of the carport, neither the carport nor the next space get used, as the last car in would need to be moved to allow access to the other two spaces.  This design can lead to only a single car being parked on the driveway instead of three, consequently encouraging home owners to park on the road side.  We would therefore like to see all new developments move away from this design, with the introduction of the following (or similar) statement into the new parking policy;  Wherever possible, private off road parking spaces should be parallel to each other, not collinear and not blocking access to a garage or carport.</p>	
Newbury Town Council (lpr2221)	<ol style="list-style-type: none"> <li>1. Travel Plans should be in a separate</li> <li>2. Add reference to on-road parking outside Residents Parking Zones</li> </ol> <p>Reason:</p> <ol style="list-style-type: none"> <li>1. There is much more to travel planning than relates to It needs a separate policy because of its importance to spatial planning of new developments.</li> <li>2. With new on-road cycle lanes being introduced with the LCWIPs, we need to protect roadsides that are designated for cyclists as no-parking for all</li> </ol> <p>Changes:</p>	<p>Comments noted.</p> <p>A separate policy covering Travel Plans will be prepared for the Regulation 19 submission. The importance of the role for good travel planning to influence people's travel choices and behaviour is recognised.</p> <p>Route audits undertaken for the LCWIP included on-street car parking, which will be considered where new cycle schemes are developed. If a mandatory cycle lane is proposed (i.e. marked with a solid white line), then</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Completely re-word to emphasise that travel needs to be a core consideration in any major development, whether there is land for parking or not. It is the need for vehicular travel that Climate Emergency requires consideration of. This would then obviate the need for the first sentence in this part of Policy DC36.</p> <p>Add new paragraph immediately above current "Travel Plans": "Where any proposed development abuts a designated primary cycle route on a road that has insufficient width to provide that route segregated from vehicular traffic or pedestrians, the development must not result in additional on-road parking and should where possible enable any existing on-road parking to be accommodated within the This applies outside Residents Parking Zones and even beyond settlement boundaries – but not where speed limits are below 30mph."</p>	<p>motorists should never enter or park in it. If cycle lanes are advisory (i.e. marked with a hatched line), motorists should not enter or park in them if it is unavoidable. These issues will be considered on a scheme-by-scheme basis.</p> <p>These points will be considered in the re-draft of a new separate Travel Plans policy.</p> <p>The presence of a designated cycle route (such as those outlined in the Council's LCWIP) would be considered in the development application process.</p>
Shaw-cum-Donnington Parish Council (lpr262)	We support the policy.	Comment noted.
Stratfield Mortimer Parish Council (lpr443)	Supports the policy	Comment noted.
<b>General consultation bodies</b>		
AWE (lpr522)	<p>The policy advises that the provision of electric vehicle charging points should follow the requirements set out in the Council's guidance 'Electric Vehicle Charging Points for new development.' It is understood that no such guidance document currently exists and so it is not possible to advise if AWE consider the provision to be correct. However, providing AWE are consulted on the guidance document when it is produced then this is considered acceptable.</p> <p>With respect to non-residential car parking, the level of vehicular parking required should also take account of existing car parking that is provided and the occupants of the proposed development. Developments should not necessarily be required to provide additional car parking if existing spare car parking can accommodate the car parking demand. Similarly, if the</p>	<p>Comments noted.</p> <p>The provision of electric vehicle charging points and infrastructure in new developments is currently actively sought in the development management process and is now mandated in the English Building Regulations. The Council is also currently developing its own guidance to outline the requirements that developers will be expected to provide, a link to which will be included as a footnote.</p> <p>The onus would be on the applicant to provide evidence to demonstrate whether there is sufficient existing spare car</p>

Respondent (with lpr ref)	Response	Council Response
	development is not going to lead to an increase in the number of occupants of a development (e.g. in the event that a development is simply updating / improving the safety of an existing facility) then additional car parking should not necessarily have to be provided.	parking capacity that would be able to accommodate the demand.
<b>Other stakeholders</b>		
Keith Hoddinott (lpr1994)	<p>When will those formulating policies recognize the obvious fact that residents want and need cars. In towns such as the size of Newbury, public transport cannot be as comprehensive and frequent as in a large city to support a comprehensive &amp; frequent public transport system, whereby commuters can expect a bus/tram/underground every 10 minutes as in large cities such as London. In parts of Newbury, even a 30 minute service would be appreciated.</p> <p><b>The standard of 1.25 cars per household is totally unrealistic.</b> It is ironic that on estates built in the 1950's (such as Chestnut Crescent), when house holders probably had few cars, there is now plenty of space for off street parking (in most cases 3 or more), and that most properties actually have 3 or more vehicles. Contrast this with some modern estates, where the density is so intense &amp; parking spaces limited to 2 or less, that parking has to be on the pavements and makes driving through hazardous. Of course, developers accede to these requirements, as they can increase the density of units. The social climate at the moment means that the majority of households need 2, 3 or more cars. Even those who perhaps no longer drive will have visitors &amp; carers. The cost of acquiring a house/apartment/flat has meant that more households are becoming multi-generational.</p> <p>It would be interesting to know how many officers, councillors, &amp; developers have 2 or more vehicles!!</p> <p>With the high cost of housing for first time buyers &amp; un-affordable for renters, homes are becoming multi-generational, &amp; several parking spaces are required (given the preponderance of vans etc. used by individuals working from home). The standards set are totally inadequate for current (&amp; foreseeable) lifestyles, but eagerly accepted by developers as they can achieve higher densities of properties. It was disappointing that the proposals at Market Street did not encompass more underground parking.</p> <p>Changes:</p>	<p>Comments noted.</p> <p>The residential parking standards were developed as part of the Council's Housing Site Allocations DPD, underpinned by a robust evidence base. These standards were then considered at a Public Examination in front of a Planning Inspector in 2016. Upon considering the evidence and representations, the Inspector concluded that the standards presented were sound, and were formally adopted by the Council in 2017.</p>

Respondent (with lpr ref)	Response	Council Response																																
	<u><i>In a country short of horizontal space, planners, architects, engineers &amp; developers should think vertically in order to make the most efficient use of the horizontal area of any proposed developments.</i></u>																																	
Simon Pike on behalf of town councillors from West Thatcham ward (lpr2312)	<p>The policy on parking places the whole of the area within the current settlement boundary for Thatcham in Zone 2 for Residential Parking for New Development (apart, oddly from a small area to the north of Westfield Road). We understand that was last reviewed for the 2016 DPD. This is in contrast to Newbury, where the most of the town away from the centre is in Zone 3, and Hungerford, where the whole town is in Zone 3. Zone 3 provides an additional 0.25 parking spaces for one and two bedroom flats, as shown in the table below. These figures are given as the minimum; however, our experience is that they are also in practice the maximum for dense housing developments.</p> <table border="1" data-bbox="436 742 1310 922"> <thead> <tr> <th></th> <th colspan="3">Flats</th> <th colspan="4">Houses</th> </tr> <tr> <th>Bedrooms</th> <th>1</th> <th>2</th> <th>3</th> <th>1</th> <th>2</th> <th>3</th> <th>4</th> </tr> </thead> <tbody> <tr> <td>Zone 2</td> <td>1.25</td> <td>1.5</td> <td>2</td> <td>1.25</td> <td>2</td> <td>2.5</td> <td>2.5</td> </tr> <tr> <td>Zone 3</td> <td>1.5</td> <td>1.75</td> <td>2</td> <td>1.5</td> <td>2</td> <td>2.5</td> <td>3</td> </tr> </tbody> </table> <p>The new development of Francis Close in West Thatcham, on the corner of Bath Road and Henwick Lane, has since demonstrated that the allocation of parking spaces for flats in Zone 2 is inadequate. This development comprises seven houses and 38 flats (mostly one or two bedroom). Since the development was completed, around a dozen cars have been parked on the neighbouring streets of Henwick Lane, Barfield Road and Roman Way. This has caused obstruction of both the carriageway and pavements, and inconvenience to residents.</p> <p>This number of cars needing to park on the street roughly corresponds to the difference between the Zone 2 and Zone 3 parking allocations. The evidence of Francis Close therefore clearly demonstrates that the parking allocation of Zone 3 is necessary to accommodate the vehicle of residents of new developments.</p>		Flats			Houses				Bedrooms	1	2	3	1	2	3	4	Zone 2	1.25	1.5	2	1.25	2	2.5	2.5	Zone 3	1.5	1.75	2	1.5	2	2.5	3	<p>Comments noted.</p> <p>The areas covered by the Zones in the residential parking standards will be reviewed to ensure that there is consistency in time for the Regulation 19 submission.</p> <p>The decision as whether an application is an exception case will be determined on a case-by-case basis.</p>
	Flats			Houses																														
Bedrooms	1	2	3	1	2	3	4																											
Zone 2	1.25	1.5	2	1.25	2	2.5	2.5																											
Zone 3	1.5	1.75	2	1.5	2	2.5	3																											

Respondent (with lpr ref)	Response	Council Response
	<p>Thattham Town Council has declared a climate emergency, and the Councillors therefore do not wish to encourage unnecessary use of private cars. However, our experience is that constraining the number of parking spaces does not of itself reduce car ownership or use - it merely results in antisocial and dangerous parking in neighbouring streets.</p> <p>Car ownership may well change significantly during the period of the Local Plan, but it is too early to build specific assumptions on this into the plan.</p> <p>Changes:</p> <p>1) The whole of the area of the settlement boundary of Thattham should be in Zone 3 for Residential Parking for New Development, as is already the case for the whole of Hungerford and the suburban part of Newbury. This should also apply to any extensions of the settlement boundary for Thattham that might result from the Local Plan review. The map in appendix 7 of the 'Local Plan Review 2020 - 2037: Emerging Draft' document should therefore be modified accordingly.</p> <p>2) The circumstances in which exceptional cases to the policy applies should be clarified:</p> <p>There may be exceptional circumstances where there is a case for providing parking that does not accord with the above levels. These cases will be considered on an individual basis, <b><u>where it can be demonstrated that the car ownership of the expected demographic of residents will be below the average.</u></b></p>	
Councillor Alan Marco (lpr764)	<p>Agree with policy for residential parking. However, requirements for the most common forms of non-residential development should be given to give developers and residents certainty.</p> <p>Changes:</p> <p>Requirements for the most common forms of non-residential development, e.g. office and retail, should be given.</p>	<p>Comments noted.</p> <p>It is recognised that the current non-residential standards are based on maximum standards and are now out of date. A set of new non-residential standards or guidance relating to how the LPA will approach their assessment will be developed in due course.</p>
Councillor Tony Vickers (lpr666)	<p>We support this policy but:</p> <ol style="list-style-type: none"> <li>1. Travel Plans should be in a separate policy.</li> <li>2. We wish to add reference to on-road parking <b>outside</b> Residents Parking Zones</li> </ol>	<p>Comments noted.</p> <p>A separate policy covering Travel Plans will be prepared for the Regulation 19 submission. The importance of the</p>

Respondent (with lpr ref)	Response	Council Response
	<ol style="list-style-type: none"> <li>3. Garages that are significantly larger than British Standard should be allowed to count as parking spaces.</li> <li>4. Requirements for parking for the most common types of non-residential development should also be given here.</li> <li>1. There is much more to travel planning than relates to parking. It needs a separate policy because of its importance to spatial planning of new developments.</li> <li>2. With new on-road cycle lanes being introduced with the LCWIPs, we need to protect roadsides that are designated for cyclists as no-parking for all vehicles.</li> <li>3. It is largely because the BS for parking space and garage size has not kept pace with the increase in width of cars that garages are no longer capable of being used for parking cars. Cars are also built to be more resistant to rust and theft, so can be left unsecured by lockable garage doors. However there seems no reason to disallow garages as part of good design, because parked vehicles can detract from the urban landscape especially in Conservation Areas.</li> <li>4. We thought that there are already parking standards at either national or local level for non-residential developments. If not there should be and they should be at least referenced here.</li> </ol> <p>Changes:</p> <ol style="list-style-type: none"> <li>1. Have a separate Travel Planning DC policy. Completely re-word to emphasise that travel needs to be a core consideration in any major development, whether there is land for parking or not. It is the need for vehicular travel that Climate Emergency requires consideration of. This would then obviate the need for the first sentence in this part of Policy DC 36.</li> <li>2. Add new paragraph immediately above current “Travel Plans”: “Where any proposed development abuts a designated primary cycle route on a road that has insufficient width to provide that route segregated from vehicular traffic or pedestrians, the development must not result in additional on-road parking and should where possible enable any existing on-road parking to be accommodated</li> </ol>	<p>role for good travel planning to influence people’s travel choices and behaviour is recognised.</p> <p>A set of new non-residential standards or guidance relating to how the LPA will approach their assessment will be developed in due course.</p> <p>(see NTC response – lpr2221)</p> <p>The issue of not counting garages as parking spaces was considered at Public Examination by an Inspector as part of the Housing Sites Allocations DPD in 2016.</p> <p>The development of parking standards are left for local councils to determine, as they know what would work best for their area.</p> <p>See above.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>within the site. This applies outside Residents Parking Zones and even beyond settlement boundaries – but not where speed limits are below 30mph.”</p> <p>3. Amend the paragraph on garages and car ports: “Garages will not <b>normally</b> be counted as parking <b>spaces</b> for the purposes of meeting the required levels of parking set out in this policy. <b>However well-designed car ports and garages capable of taking modern cars and well integrated with the overall design of the property may be accepted as parking spaces.</b>”</p> <p>4. No specific changes proposed but a response to this comment given.</p>	<p>This was considered in detail by the Inspector as part of the Housing Sites Allocations DPD Inquiry in 2016.</p>
<b>Landowners, site promoters and developers</b>		
<p>Lichfield for North East Thatcham Partnership (lpr2406)</p>	<p>We support this policy. To promote the use of sustainable modes of transport a Travel Plan will be developed and implemented at NET, while parking provision will be consistent with local standards.</p> <p>With regards to electric vehicle charging points, we do not object to their inclusion in the scheme but would wish to see it acknowledged that the technology will develop rapidly over the course of the delivery of NET and we would expect to see some flexibility in delivery to factor in future changes as appropriate.</p>	<p>Comments noted.</p> <p>There will be separate policies for Parking and Travel Plans for the Regulation 19 submission.</p> <p>The provision of electric vehicle charging points and infrastructure is currently actively sought in the development management process, although this is now mandated as part of the English Building Regulations. The Council is also currently developing its own guidance to outline the requirements that developers will be expected to provide, which will also be agile enough to respond to changes in technologies that are likely to arise during the lifetime of the plan.</p>
<p>Lochailort Newbury Ltd. (lpr2042)</p>	<p>We object to the inflexibility of the minimum car parking standards set out in draft Policy DC36. The policy directly and indirectly encourages car ownership and usage to the detriment of other more sustainable forms of travel, and threatens the delivery of the Council’s target of net zero carbon by 2030.</p>	<p>Comments noted.</p> <p>The residential parking standards were developed as part of the Council’s Housing Sites Allocations DPD, underpinned by a robust evidence base. These standards were then considered at a Public Examination in front of a Planning Inspector in 2016. Upon considering the</p>

Respondent (with lpr ref)	Response	Council Response
	<p>In order to mitigate this risk, the weakly phrased exception text in draft Policy DC36 should be amended as follows:</p> <p>"There may be exceptional circumstances where there is a case for providing parking that does not accord with the above levels. These cases will be considered on an individual basis. (delete these sentences) It will increasingly be the case that the level of onsite car parking should be reduced in the most sustainable locations. Where developments can demonstrate that non car-based travel modes have been maximised (for example through the implementation of car share schemes, by virtue of proximity to public transport hubs, or through enhanced cyclists' facilities) a reduced level of onsite car parking will be actively supported. Residential car parking within defined town centres will not be required to have regard to the minimum provision set out in this policy but instead will be assessed on an individual basis."</p>	<p>evidence and representations, the Inspector concluded that the standards were sound, and were formally adopted by the Council in 2017.</p> <p>This highlights the need to balance provision of parking and the support of the climate emergency and encouragement not to own / use personal cars as the primary form of transport but to make use of other transport choices including car clubs where the car is the most practical option.</p>
Pegasus for Donnington New Homes (lpr1950)	<p><i>Representation on behalf of Donnington New Homes in support of continued allocation of Sandford Park</i></p> <p><u>Objection</u> is raised to this Policy as drafted because it excludes garages from being counted as part of parking provision on housing sites. No justification has been provided for this. Garages should be included where alternative storage space is provided on plot or within a garage of adequate dimensions for items such as bicycles. For comparison, <b>BCP Council's "Parking Standards SPD"</b> (adopted January 2021) allows garages to be counted as parking spaces where they meet minimum size requirements of 7m x 3.3m. Paragraphs 3.2.10 - 3.2.11 of this SPD state: <i>"Research has shown that in many developments less than half of all garages are used for car parking, instead being used for storage. In terms of sizes, an internal minimum of 7m x 3.3m is considered appropriate to ensure that a large modern family car (eg SUV) will fit comfortably with a minimum circulation space to allow for some general storage which may include cycles..."</i></p>	<p>Comments noted.</p> <p>The issue of excluding garages from being counted as parking spaces was considered as part of the development of the Council's current residential parking standards, included as part of the Local Plan Housing Sites Allocations DPD, adopted May 2017. The process to develop the standards included consultation and presented before a Planning Inspector.</p> <p>Visitor parking is considered as part of the residential parking standards</p>

Respondent (with lpr ref)	Response	Council Response
	<p><i>"This 7m x 3.3m must be a clear, unobstructed space to allow a vehicle to enter and exit safely. Garages must also have entrances wide and high enough to allow for large family cars.....Garages will only be counted as a parking space where they meet the minimum size requirements..."</i></p> <p>It is recommended that the Council takes this approach to the treatment of garages as parking spaces. Otherwise, to completely discount garages from every housing site's parking provision will have significant negative effects on the efficient use of land, contrary to Government guidance.</p> <p>The Policy also fails to acknowledge and allow for the valuable contribution that on-street car parking can make to parking provision on a site, particularly for visitors. It is considered that the Policy, as drafted, lacks sufficient detail to address these issues and that a new Parking SPD should be prepared and adopted by the Council to address this matter.</p> <p>It is recommended that the Council takes alternative approach to the treatment of garages as parking spaces, as outlined.</p> <p>A new Parking SPD should be prepared and adopted by the Council to address the matter of on-street parking.</p>	
Potential Ltd for Aldi Stores (lpr2290)	<p>Policy DC 36 'Parking and Travel Plans' states that electric vehicle charging points should be installed for all development. We support this approach and consider it beneficial to help tackle climate change moving forward.</p> <p>Considering the level of vehicular parking required on a case-by-case basis taking account of the accessibility of the development, the type, mix and use of development, and the availability of and opportunities for public transport ensures that sufficient parking will be delivered by new development.</p> <p>However, the Council should recognise that onerous parking requirements for development can make the delivery and redevelopment of sites unviable.</p>	<p>Comments noted.</p> <p>The provision of electric vehicle charging points and infrastructure is currently actively sought in the development management process, although this is now mandated for new buildings/dwellings (or those undergoing major refurbishment) as part of the English Building Regulations (Approved Document S). The Council is also currently developing its own guidance to outline the requirements that developers will be expected to provide.</p> <p>The quantum of parking required is guided by the Council's residential parking standards, which have been developed taking cognisance of a detailed evidence base. They were subject to consultation and scrutiny by a Planning Inspector at Public Examination in 2016 prior to being adopted.</p>

Respondent (with lpr ref)	Response	Council Response
Pro Vision for Feltham Properties (lpr2285)	<p><i>(comments repeated under DC35)</i></p> <p>We welcome the inclusion of the provision of electric vehicle charging points and associated infrastructure within the scope of ‘transport infrastructure’ at Policy DC35. Provision of EV charging hubs or stations is likely to become in increasing demand over the plan period.</p> <p>Paragraph 12.49 of the Consultation Document acknowledges that developers will be encouraged to go further than charging points on all properties to help achieve a comprehensive public charging network in public car parks, supermarkets and retail parks, railway stations, and where is safe to do so, at petrol filling stations. However, the Local Plan provides no detail on how this will be achieved.</p> <p>Whilst it is envisaged that for the most part vehicle charging will take place at home, it should be recognised that a widespread charging point network is important for drivers who do high mileage, travel long distances or who do not have access to charging points at home or at work.</p> <p>The Ten Point Plan for a Green Industrial Revolution (November 2020) now increases the urgency for the development of charging infrastructure by bringing forward the ban of the sale of new petrol, diesel and most hybrid cars to 2030. As a result, delivering a widespread charging network is critical to encouraging the uptake of EV ownership. Indeed, the Government’s ‘Road to Zero’ (July 2018) Paper confirms that the Government’s ambition is that the UK should have one of the best and most comprehensive charging networks in the world.</p> <p>As a result, it is considered that to positively encourage the delivery of infrastructure for electric vehicles, the Local Plan should include a separate Policy (or be suitably incorporated into Policy DC35 and/or DC36) that seeks to actively encourage development for new electric vehicle charging infrastructure (e.g. charging stations) in suitable locations, including close to the strategic road network, on primary transport routes, and close to existing areas of retail and leisure etc.</p>	<p>Comments noted.</p> <p>The provision of electric vehicle charging points and infrastructure is currently actively sought in the development management process and will remain the case in the Local Plan Review. The Council is also currently developing its own guidance to outline the requirements that developers will be expected to provide. The UK Government has recently announced that new homes and buildings, including those undergoing renovation will be required to install EVCP’s from 2022, to be included as part of English Building Regulations.</p> <p>Proposals for charging points on the Strategic or Primary Road Network, along at existing retail/leisure areas may be guided by a wider approach (e.g. TfSE), and will be considered further as part of the review of the Council’s Local Transport Plan, due to commence in 2022.</p>

## Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

### Emerging Draft LPR Policy: DC37 Public Open Space

### (Proposed Submission LPR Policy: DM40 Public Open Space)

Number of responses received: 14

Respondent (with lpr ref)	Response	Council Response
<b>Internal</b>		
Archaeology Team West Berkshire Council (lpr785)	Supports the policy. Archaeological monuments discovered during the evaluation of development sites can often be preserved in situ under public open space.	Comments noted.
Ecologist, West Berkshire Council (lpr1697)	In (d) in the policy, there is a trade-off between access to nature/recreation use and biodiversity.	Comments noted
<b>Statutory consultees</b>		
Burghfield NDP Steering Group (lpr476)	The Burghfield Neighbourhood Development Plan Steering Committee support the overall principle of "Proposals for residential development of 10 dwellings or more will provide high quality public open space". This is because this facet of development has been specifically identified during the work to produce an NDP.	Support noted
Newbury Town Council (lpr2220)	We support a generous provision of public open space in all housing developments. 'Public' means public. Public space should not be exclusive to any specific development but rather should include the wider community.	Comments noted

Respondent (with lpr ref)	Response	Council Response
Shaw-cum-Donnington Parish Council (lpr263)	We support the policy.	Support noted
Stratfield Mortimer Parish Council (lpr444)	Supports the policy	Support noted
<b>General consultation bodies</b>		
British Horse Society (lpr881)	<p>To encourage active travel and deter car use, it is vital that connectivity by non-motorised means is preserved and maintained.</p> <p>Horses have been ridden (and driven) through villages since time immemorial, it should be made possible for them to pass through new residential development unless there are clear, well-defined reasons as to why this is not thought appropriate.</p> <p>Changes:</p> <p><i>(f) Its easy and safe accessibility from adjoining development areas by foot, cycle <b>and horse, connectivity to any local public rights of way and where necessary, public transport; and</b></i></p>	<p>Comments noted.</p> <p>This policy will be read in conjunction with other policies in the LPR including Policy SP10 Green Infrastructure. The Council will strengthen Policy SP10 by adding additional wording to the 5<sup>th</sup> paragraph of the policy as follows – <u>‘Development proposals must take account of existing access networks within and around the site. Opportunities should be sought to protect and enhance the Public Rights of Way network within and adjacent to development proposals in line with the NPPF, having particular regard to ensuring the needs of all users have been provided throughout the year. The addition of new connections and status upgrades to the existing rights of way network will be supported.’</u></p>
Heritage Forum (lpr97)	A maintenance agreement will be needed for each such public open space, and legally enforceable arrangements to contribute to the cost. The companies carrying out such work should be credible in the longer term.	<p>Comments noted.</p> <p>The issues raised are covered by the Planning Obligations Supplementary Planning Document and so no changes to the policy are required.</p>
Mid and West Berkshire Local Access Forum (lpr1892)	<p>To encourage active travel and deter car use, it is vital that connectivity by non-motorised means is preserved and maintained – including to the network of public rights of way.</p> <p>In its comment on policy DC2, Health and Wellbeing, MWBLAF pointed out that Dog walking is a popular way of taking physical activity including those</p>	<p>Comments noted.</p> <p>This policy will be read in conjunction with other policies in the LPR including Policy SP10 Green Infrastructure. The Council agrees that rights of way have an important role in</p>

Respondent (with lpr ref)	Response	Council Response
	<p>in older age groups. It is therefore important that dog walking is taken into account in the selection and design of public open spaces. We note that Hampshire County Council has a guidance document on planning for dog ownership in new developments; the paragraph that we suggest be added to the supporting text of this policy is based on the introduction to this document.</p> <p>The Forum would encourage West Berkshire Council to develop guidance on this topic, or perhaps to make use of the Hampshire County Council document "Planning for Dog Ownership in New Developments: Reducing Conflict – Adding Value":  <a href="https://documents.hants.gov.uk/ccbs/countryside/planningfordogownership.pdf">https://documents.hants.gov.uk/ccbs/countryside/planningfordogownership.pdf</a></p> <p>Changes:</p> <p>1) The Forum recommends that connectivity to any local public rights of way should be a consideration for public open spaces:  Particular regard will be given to;  (f) Its easy and safe accessibility from adjoining development areas by foot and cycle, <u>connectivity to any local public rights of way</u>, and where necessary, public transport;</p> <p>2) We recommend that a paragraph is added to the supporting text, addressing the importance of considering the needs of dog owners:  <u>Dog owners are traditionally one of the most frequent, year-round users of urban open space and public access to the wider countryside. Owning a dog – or the aspiration to do so – has a significant influence on where people choose to live. Furthermore, once moved in, a dog in the home has a profound impact on where family members go and what they do. It is therefore important that the location, design and access to in and around new housing recognises the fundamentally different needs of dog owners, compared to residents without dogs</u></p>	<p>the green infrastructure network and so will strengthen Policy SP10 by adding additional wording to the 5<sup>th</sup> paragraph of the policy as follows –  <u>'Development proposals must take account of existing access networks within and around the site. Opportunities should be sought to protect and enhance the Public Rights of Way network within and adjacent to development proposals in line with the NPPF, having particular regard to ensuring the needs of all users have been provided throughout the year. The addition of new connections and status upgrades to the existing rights of way network will be supported.'</u></p> <p>To add additional text in the supporting text specifically for dog owners is considered too detailed for this broad policy. It is noted that Hampshire County Council produced a separate SPD on this issue. If considered appropriate, additional guidance could be developed by the Council at a later date.</p>
The Woodland Trust (lpr1003)	<p>We support the principle that residential developments should have access to the natural environment, including to woodland.</p> <p>We recommend adopting policy standards for residential developments that support access to the natural environment and woodland for informal recreation.</p> <p>Changes:</p>	<p>Comments noted.</p> <p>This policy will be read in conjunction with other policies in the LPR including Proposed Submission LPR Policy SP10 Green Infrastructure, SP11 Biodiversity and Geodiversity</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Natural England’s Accessible Natural Green Space Standard recommends that all people should have accessible natural green space: Of at least two hectares in size, no more than 300m (five minutes’ walk) from home. At least one accessible 20-hectare site within 2km of home. One accessible 100-hectare site within 5km of home. One accessible 500-hectare site within 10km of home. A minimum of one hectare of statutory local nature reserves per 1,000 people. The Woodland Trust has developed a Woodland Access Standard to complement the Accessible Natural Green Space Standard. This recommends that: That no person should live more than 500m from at least one area of accessible woodland of no less than 2ha in size. That there should also be at least one area of accessible woodland of no less than 20ha within 4km (8km round trip) of people’s homes.</p>	<p>and DM15 Trees, Woodland and Hedgerows which set out the Council’s approach to the issues raised.</p>
<b>Other stakeholders</b>		
Ian Parsons (lpr844)	Supports the policy	Support noted
Councillor Tony Vickers (lpr667)	<p>We support this policy but it should be explicitly stated that “public” means accessible to all. We support a generous allocation of public open space. However it must be made clear that this space is available to all persons lawfully entitled to be present, not just the occupants of the development. It must also not be enclosed: for example to provide allotments, which should be given a separate allocation. Changes: In 12.55, amend the first sentence from: “...needs of the <b>whole</b> community, <b>not just occupants of the development, other than in exceptional cases.</b>”</p>	<p>Comments noted.  Para 12.66 of the supporting text makes clear that ‘<i>Public open space should be genuinely available to the public at large.....</i>’  Para 12.55 also notes ‘<i>Public open space is land available to satisfy the recreation and leisure needs of the community. It can fulfil a number of functions including amenity land, play areas, informal recreation and leisure or formal sporting activity. It will also fulfil an important function in supporting the overall green infrastructure in the district.</i>’</p>

Respondent (with lpr ref)	Response	Council Response
		<p>Para 12.59 goes on to say that ‘open space that is provided with the intention of being used exclusively by residents will not be an acceptable alternative to public open space provision.....’</p> <p>No changes to the policy are proposed.</p>
<p>Councillor Tony Vickers (lpr1654)</p>	<p>“Planning for Dog Ownership in New Developments: Reducing Conflict – Adding Value”: Can we perhaps put something in DC 37 about this? It could also get a mention under “Health &amp; Wellbeing” DC2</p>	<p>Comments noted.</p> <p>To add additional text in the supporting text specifically for dog owners is considered too detailed for this broad policy. It is noted that Hampshire County Council produced a separate SPD on this issue. If considered appropriate, additional guidance could be developed by the Council at a later date.</p>
<p><b>Landowners, site promoters and developers</b></p>		
<p>Fowler Architecture and Planning (lpr1811)</p>	<p>While it is recognised that new residential development of 10 or more dwellings should provide high quality open space meeting a standard, the policy must be revised to recognise that the need to provide open space will depend on the existing qualitative surplus / deficit of open space in the locality. Given existing provision elsewhere, not all residential developments may need to provide public open space.</p> <p>The standard of 3 – 4.3ha per 1000 population should be defined as to what typologies of open space this relates to. It may not be possible for all sites to provide public open space on-site that can fulfil a number of functions including amenity land, play areas, informal recreation and leisure or formal sporting activity. For instance, formal sporting activity will not be feasible on-site in all but the largest developments.</p> <p>The range of functions of public open space at 12.55 should recognise the function and value of Accessible Natural Greenspace (ANG) in urban and rural areas as a separate typology of open space that provides informal recreation in a natural environment where biodiversity enhancement is a key principle.</p>	<p>Comments noted.</p> <p>The Council considers the policy is sufficiently flexible to cover a range of situations. The policy uses the following wording - “<b>wherever possible</b>” and <i>where more appropriate to the circumstances of the site or the open space requirements</i>”.</p> <p>Amend Emerging Draft LPR paragraph 12.55 as follows – ‘Public open space is land available to satisfy the recreation and leisure needs of the community. It can fulfil a number of functions including amenity land, <u>Accessible Natural Greenspace (ANG)</u>, play areas, informal recreation and leisure or formal sporting activity. It will also fulfil an important function in supporting the overall green infrastructure in the district.’</p>

## Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)

### Emerging Draft LPR Policy: DC38 Promotion of FTTP (fibre to the premises)

### (Proposed Submission LPR Policy: DM41 Digital Infrastructure)

Number of responses received: 11

Respondent (with lpr ref)	Response	Council Response
<b>Internal</b>		
None		
<b>Statutory consultees</b>		
Burghfield NDP Steering Group (lpr477)	The Burghfield Neighbourhood Development Plan Steering Committee support the overall policy of "Promotion of FTTP (fibre to the premises)" because the parish residents need faster internet access than at present.	Support for policy noted
Hermitage Parish Council (lpr1815)	Hermitage PC believes that high speed broadband access is now essential everywhere. It is also essential that mobile phone signals are greatly improved as the signal is so poor in parts of the parish, e.g. Hermitage Green.	Comments noted.
Newbury Town Council	We support and encourage this policy.  We would like to see broadband infrastructure funded by the CIL pot.	Support for policy noted.  Emerging Draft LPR Policy SP23 (Infrastructure Requirements and Delivery) supports digital infrastructure.  The Infrastructure Delivery Plan consultation in March 2021 did not put forward any comments/suggests in relation to digital infrastructure, or more importantly

Respondent (with lpr ref)	Response	Council Response
		<p>infrastructure projects from any of the digital infrastructure providers.</p> <p>Community Infrastructure Levy (CIL) cannot be handed over to an external provider (private company/organisation) but the Council can work with providers on projects – not studies or personnel or project management funding – but on actual infrastructure.</p>
Shaw-Cum-Donnington Parish Council (lpr267)	<p>DC38 Promotion of FTTP. (Fibre to the premises)</p> <p>We think this policy is beyond the control of the local authority. Although a laudable aim, how is it intended to achieve it? Normally telecommunications facilities are provided by the appropriate telecommunications companies and come with arrangements between the developer and telecom provider with no requirements by way of the planning permission. As with the other code operators (gas, electricity and water) these providers are not under the control of the local authority.</p>	<p>Although Government and the National Planning Policy Framework (NPPF)<sup>1</sup> both support and encourage the inclusion of high speed broadband, there are no statutory requirements which support this aspiration. Local planning authorities can, however encourage and support high speed broadband provision within new development sites.</p> <p>The Government's guidance 'Digital and telecoms: resources for local authorities'<sup>1</sup> sets out that Local Planning Authorities have a crucial role in the deployment of fibre infrastructure.</p> <p>The guidance comments that local authorities can help to create incentives for future investment in digital infrastructure in their area by ensuring Local Plans effectively support it. To do this Local Plans can outline how planning policies will support the rollout of fixed and mobile infrastructure.</p> <p>The National Planning Policy Framework (NPPF)<sup>2</sup> at paragraph 114 states that Local Planning Authorities should support the expansion of electronic</p>

<sup>1</sup> Digital and telecoms: resources for local authorities: <https://www.gov.uk/guidance/resources-for-local-authorities#guidance-for-the-local-planning-authority>

<sup>2</sup> National Planning Policy Framework (July 2021): <https://www.gov.uk/government/publications/national-planning-policy-framework--2>

Respondent (with lpr ref)	Response	Council Response
		<p>communications networks including full fibre broadband connections.</p> <p>Paragraph 114 goes on to state that policies should set out how high quality digital infrastructure, providing access to services from a range of providers, is expected to be delivered and upgraded over time; and should prioritise full fibre connections to existing and new developments (as these connections will, in almost all cases, provide an optimum solution).</p> <p>Through the Berkshire Digital Infrastructure Group<sup>3</sup>, the Berkshire Unitary Authorities are implementing a Digital Strategy and have set-out a “Connected Berkshire Vision and Strategy” to ensure that over 95% of households and business have access to full fibre coverage (providing Gigabit capable connectivity) and to eliminate all 4G poor coverage areas by 2025.</p> <p>To help achieve the strategy, a suite of guidance is in preparation which will include planning guidance, a Dig-Once approach, and a universal wayleaves agreement.</p>
Stratfield Mortimer Parish Council (lpr445)	Do you agree with the proposed policy? Yes	Support for policy noted
<b>General consultation bodies</b>		
Heritage Forum (lpr107)	Do you agree with the proposed policy? Yes	Support for policy noted

<sup>3</sup> Berkshire Digital Infrastructure Group: <http://www.thamesvalleyberkshire.co.uk/digital-infrastructure-group>

Respondent (with lpr ref)	Response	Council Response
West Berkshire Green Party (lpr1846)	Change “presumption in favour of” to “requirement” for developments of more than 10 homes (0.5ha) except where this is impossible.	<p>The policy does not include the wording ‘presumption in favour of’.</p> <p>Since 1 April 2020, developers building sites of 20 or more dwellings have been eligible to have full fibre connectivity built across their sites at no cost if they register with Openreach.</p>
<b>Other stakeholders</b>		
Gary Clarke (lpr707)	Absolute necessity as the full potential of working from home is realised cutting commuter miles and improving quality of life.	Support for policy noted
Ian Parsons (lpr823)	It is likely to be the case that home working will increase, given the events of 2020, and so it would be beneficial if the district council were able to support a greater range of fast internet suppliers than, in the case of Basildon, are currently available. At present we are in the hands of a virtual monopoly - Gigaclear.	<p>Through the Berkshire Digital Infrastructure Group, the Berkshire Unitary Authorities have set-out a “Connected Berkshire Vision and Strategy” to ensure that over 95% of households and business have access to full fibre coverage (providing Gigabit capable connectivity) and to eliminate all 4G poor coverage areas by 2025.</p> <p>A key factor in achieving the objectives of the Digital Strategy is to help reduce the commercial roll out costs for the market and suppliers, especially in more rural and remote areas. Minimising construction costs for connectivity in new developments is a critical component of this and will be supported by guidance in the Berkshire Dig-Once Strategy.</p>
Graham Storey (lpr596)	<p>FTTP should be mandatory in new developments.</p> <p>Changes: Change to a requirement for developments of over 10 homes (0.5Ha)– unless it is not possible to deliver.</p>	<p>Since 1 April 2020, developers building sites of 20 or more dwellings have been eligible to have full fibre connectivity built across their sites at no cost if they register with Openreach.</p> <p>The policy cannot therefore be amended as suggested.</p>
Councillor Tony Vickers (lpr668)	The Internet is arguably a more important means of communication than road transport and likely to remain so.	Support for policy noted

Respondent <i>(with lpr ref)</i>	Response	Council Response

**Responses received to the emerging draft of the Local Plan Review (consultation December 2020 – February 2021)****Emerging Draft LPR Policy: DC39 Local shops, farm shops and community facilities****(Proposed Submission LPR Policy: DM39 Local Community Facilities)**

Number of responses received: 12

<b>Respondent</b> <i>(with lpr ref)</i>	<b>Response</b>	<b>Council Response</b>
<b>Statutory consultees</b>		
Newbury Town Council (lpr2218)	Developers must provide a more generous and flexible allocation of land for community facilities and provide it earlier in the build – done in partnership with the local council(s).	<p>Comments noted. Developer contributions are sought on most new development within the District. These contributions are sought in order to provide for additional facilities and infrastructure demands as a result of new development.</p> <p>Where a development is large enough to support additional facilities on site (for example, strategic in size), these will be provided.</p> <p>Policy SP23 of the Emerging Draft LPR sets out the planning policy approach for infrastructure requirements and delivery.</p>
Shaw cum Donnington Parish Council (lpr265)	We support the policy. It is a pity that there is no requirement to provide local shops and commercial facilities in new residential developments.	Comments noted. Developer contributions are sought on most new development within the District. These contributions are sought in order to provide for additional facilities and infrastructure demands as a result of new development.

Respondent (with lpr ref)	Response	Council Response
		<p>Where a development is large enough to support additional facilities on site (for example, strategic in size), these will be provided.</p> <p>Policy SP23 of the Emerging Draft LPR sets out the planning policy approach for infrastructure requirements and delivery.</p>
Stratfield Mortimer Parish Council (lpr446)	Policy is supported.	Comments noted.
Thatcham Town Council (lpr1418)	<p><i>Full representation relating to north east Thatcham strategic site allocation attached to representation on SP17.</i></p> <ul style="list-style-type: none"> <li>"New developments of 1,500 homes or more will be expected to include a local shop as part of the development scheme, located so as to maximise footfall and links to the existing community."</li> </ul> <p>This threshold is unclear, and there is no indication as to how this policy scales if developments are substantially more than 1,500 homes. Does a single local shop apply equally for 1,500 homes and 10,000 homes?</p> <p>There is no indication to phasing. Is it the intention of the policy that a local shop is delivered at the completion of a development, or near to the beginning?</p> <p>The policy as written indicates that the entirety of NE Thatcham could be served by the inclusion of 1 shop. We do not think that the NE Thatcham development, that has the equivalent scale of a New Town the size of Hungerford, should aspire to be served by one shop. This appears to be a wholly inadequate approach to securing community services.</p> <p>It is necessary for the policy to define how the support for local shops increases with the number of dwellings, and phasing. A strategic approach</p>	<p>Comments noted. Strategic sites within the LPR have a site specific policy which sets out the detail in relation to the infrastructure provision for the site. In this case, see Council's full response to comments under Emerging Draft LPR Policy SP17.</p> <p>Emerging Draft LPR Policy DC39 to be amended to remove the second paragraph of the policy as it is considered sites of this size should be comprehensively masterplanned and include the necessary infrastructure to meet the needs of the proposed development.</p> <p>With regard to meeting the need of the existing community, the Emerging Draft LPR policy and supporting text will be amended to clarify that the policy relates to the provision and retention of local community facilities in both new and existing communities.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>must be defined that relates to developments that are on the scale of a new town.</p> <ul style="list-style-type: none"> <li>"presumption in favour of the provision of new or enhanced community facilities"</li> </ul> <p>It is clear that a new development must meet the needs of a new community. It is unclear as to the provision that will be provided to existing adjacent communities if there is an existing shortfall on identified services - for examples larger libraries, dentists, GP surgeries, policing presence, leisure centre, etc. This is relevant for Thatcham where it is recognised in the Thatcham Stage 1 report that there the town is under provisioned relative to towns of a similar size.</p> <p>It is necessary for policy to reflect on the needs of adjacent communities.</p> <p>Changes to be made/preferred approach: It is necessary for the policy to define how the support for local shops increases with the number of dwellings, and phasing. A strategic approach must be defined that relates to developments that are on the scale of a new town.</p> <p>It is necessary for policy to reflect on the needs of adjacent communities.</p>	
<b>General consultation bodies</b>		
West Berkshire Heritage Forum (lpr98)	<p>Policy is supported.</p> <p>Community uses should include meeting venues for voluntary bodies, such as was provided by Greenham Arts before it was redeveloped. There is a currently a lack of these, which are largely limited to church halls, and will be needed again after Covid problems are overcome.</p>	Comments noted.
Theatres Trust (lpr1011)	<p>The Trust welcomes this policy and the protection it affords to supporting and protecting local facilities, building on earlier paragraph 7.9 and reflecting the comments we submitted at the previous stage. We also welcome that paragraph 12.80 makes clear it covers theatres; the Newbury Corn Exchange, New Era and Watermill are examples of valued theatre facilities in the district.</p>	<p>Comments noted.</p> <p>The Emerging Draft LPR policy and supporting text is to be amended to clarify that the policy relates to local community facilities, including cultural buildings. Larger cultural facilities will be covered under the Town Centres</p>

Respondent (with lpr ref)	Response	Council Response
		policy as these are a main town centre use in accordance with the NPPF.
<b>Other stakeholders</b>		
Councillor Alan Macro (lpr769)	<p>Policy is not supported.</p> <p>The policy should be split into two: one for local and farm shops and one for provision of community facilities. The threshold of 1,500 homes is too high and facilities other than shops should be required.</p> <p>Developments of 800+ homes should be required to provide a convenience store (i.e. one stocking food and household essentials). Developments of 1,500+ homes should be required to provide community facilities, such as a meeting hall.</p> <p>Changes to be made/preferred approach: The policy should be split into two: one for local and farm shops and one for provision of community facilities.</p> <p>Developments of 800+ homes should be required to provide a convenience store (i.e. one stocking food and household essentials). Developments of 1,500+ homes should be required to provide community facilities, such as a meeting hall.</p>	<p>Comments noted.</p> <p>Strategic sites within the LPR have a site specific policy which sets out the detail in relation to the infrastructure provision for the site. In this case, see Council's full response to comments under Emerging Draft LPR Policy SP16 and Policy SP17.</p> <p>Emerging Draft LPR Policy DC39 to be amended to remove the second paragraph of the policy as it is considered sites of this size should be comprehensively masterplanned and include the necessary infrastructure to meet the needs of the proposed development.</p> <p>The provision and retention of local community facilities is essential to the creation of sustainable communities. The Emerging Draft LPR policy and supporting text will be amended to clearly outline the uses to be considered under this policy.</p> <p>Proposals for farm shops will now be considered under a new Farm Diversification policy – Proposed Submission LPR Policy DM36.</p>
Councillor Tony Vickers (lpr669)	<p>Policy is not supported.</p> <p>We wish to split this policy into two and strengthen the “community facilities” part.</p>	<p>Comments noted.</p> <p>Strategic sites within the LPR have a site specific policy which sets out the detail in relation to the infrastructure provision for the site. In this case, see Council's full response to comments under Emerging Draft LPR Policy SP16 and Policy SP17.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The threshold of 1500 homes for provision of a local shop is already too high and in a post-Covid, Climate Emergency age needs to be much lower. There are three different functions here, which need to be separated out.</p> <ol style="list-style-type: none"> <li><b>Farm shops</b> should be seen mainly as supporting rural enterprises, as adjuncts to local food producers but also inescapably drawing customers, perhaps as tourists or local employees, from beyond the area from which the 'farm' draws its supplies.</li> <li><b>Local shops</b> are needed in larger residential estates to enable local people who neither possess cars nor have access to the internet to meet their essential daily shopping needs. Where possible, local policies – including shopping – as well as national policies should encourage reduction in “food miles” and result in more local produce being sold in these local shops. However they should be seen as much as community facilities and for general retail as for food retail.</li> <li><b>Climate Emergency</b> should lead us to take proactive planning policy measures to facilitate the “15-minute neighbourhood” concept in all settlements for all residents, which logically would lead to larger more comprehensive local community “hubs”. All daily material and social needs of residents should be capable of being met without use of a private car within a 15-minute journey. These Local Centres should also be able to fulfil a business support function for home-workers in the future flexible economy.</li> </ol> <p>It may be possible and will generally be desirable to use existing facilities to serve one or more of these needs but if not then a major housing developer should be required to provide serviced land and perhaps also buildings to help meet demonstrable needs of the development.</p> <p>Changes to be made/preferred approach: The policy should be reviewed in this context. We believe developments of 800+ homes should be required to provide for a convenience store (i.e. one stocking food and household essentials). Developments of 1,200+ homes should be required to provide for services community facilities, such as a meeting hall.</p>	<p>Emerging Draft LPR Policy DC39 to be amended to remove the second paragraph of the policy as it is considered sites of this size should be comprehensively masterplanned and include the necessary infrastructure to meet the needs of the proposed development.</p> <p>The provision and retention of local community facilities is essential to the creation of sustainable communities. The Emerging Draft LPR policy and supporting text will be amended to clearly outline the uses to be considered under this policy.</p> <p>Proposals for farm shops will now be considered under a new Farm Diversification policy – Proposed Submission LPR Policy DM36.</p>
<b>Landowners, site promoters and developers</b>		

<b>Respondent</b> <i>(with lpr ref)</i>	<b>Response</b>	<b>Council Response</b>
Onnalee Cubitt (lpr2193)	Both Sovereign and the landowners [of site ref: KIN6] support the recognition within supporting paragraph 12.74 that Kintbury is a large settlement within the rural area and therefore is one that is capable of accommodating growth.	Comments noted.
Fowler Architecture (lpr1812)	<p>Clarification is required to confirm that Policy DC39 concerns the change of use of facilities in settlements, whereas Policy DC23 will also apply to proposals in the countryside, outside of settlements.</p> <p>The requirement for a 'local needs assessment' under (c)(i) should be clarified under the supporting text, including what is meant by easily accessible and what should form part of a local needs assessment.</p> <p>What is meant by a 'reduced realistic and active marketing exercise' under (c)(ii)? Paragraph 12.78 requires a 6-month period in all cases and does not infer any reduced exercise.</p> <p>Paragraph 12.78 final paragraph is confusing and should be amended to not discourage marketing from continuing following the submission of the planning application. Amend to 'The period of marketing should not end before the date of the planning application being submitted'.</p>	<p>Comments noted.</p> <p>Emerging Draft Policy DC23 relates to the conversion and/or re-use of existing redundant and disused buildings in the countryside for residential use. This policy (Emerging Draft LPR Policy DC39) relates to the provision and retention of local community facilities across the District. Policies within the LPR need to be read as a whole.</p> <p>Emerging Draft LPR Policy DC39 and supporting text to be amended to reflect more clearly the policy requirements.</p> <p>Supporting text will be amended to state that the minimum 6 months marketing period should be prior to the planning application being submitted.</p>
Savills on behalf of Englefield Estate (lpr1544)	The NPPF is clear that planning policies 'should identify opportunities for villages to grow and thrive' (paragraph 78) and should enable the development of accessible local services and community facilities such as local shops (paragraph 83d). The overall presumption in favour of local shops and farm shops in draft LPR Policy DC39 therefore reflects the provisions of the NPPF and is supported.	Comments noted.
Sovereign Housing (lpr2189)	Both Sovereign and the landowners [of site ref: KIN6] support the recognition within supporting paragraph 12.74 that Kintbury is a large settlement within the rural area and therefore is one that is capable of accommodating growth.	Comments noted.

Archaeology Team West Berkshire Council (lpr786)	Support. My analysis of historic village scores defined in the Historic Landscape Characterisation project, current Conservation Areas and existing Settlement Boundaries indicates that it would be useful to review the boundaries with the historic and architectural interest in mind. Several villages or hamlets outside the AONB have no Conservation Areas or Settlement Boundaries - eg Beech Hill, Ufton Nervet and Wasing.	Comments noted
<b>Statutory consultees</b>		
Hermitage Parish Council (lpr1813)	HPC agrees that settlement boundaries should be led by a landscape led approach. It believes that settlement boundaries should not be elastic merely to allow proposed developments to go ahead. The boundary was pushed outwards in the current DPD to accommodate HSA 24 and 25 (RSA 29 and 30). Specifically, current draft proposals for Hermitage imply that a boundary extension will be needed solely for WBC to ratify site allocations within the Emerging Plan. HPC therefore feels that this proposed expansion of Hermitage settlement boundary is being presented as inevitable. However, HPC strongly objects to this approach. This extended envelope would cover a significant area, presenting a substantial risk of further extension uphill to Slanting Hill thus enabling	Comments noted. The settlement boundary review criteria set out the general principles followed when defining a boundary and give guidance as to what would usually be included and what would usually be excluded. This makes clear that sites allocated through the LPR will be included within the boundary. Such sites are only allocated after a thorough site assessment.  The work has been undertaken in co-operation with parish/town councils and neighbourhood planning groups. The Council gave all town/parish councils and neighbourhood planning groups across the District an

Respondent (with lpr ref)	Response	Council Response
	<p>a concentration of dwellings, possibly on a scale similar to the existing Forest Edge development at the North end of Hermitage. The Parish Council is strongly against any such developments.</p> <p>HPC firmly believes that any extension of current Hermitage settlement boundary would not sensibly fit with its position within the North Wessex Downs AONB. No expansion of the settlement boundary should be agreed by WBC which removes a significant chunk of green space within the defined AONB.</p> <p>HPC would ask WBC to also be mindful of recent extensive surface water flooding of fields within Hermitage and to take account of evidence of speeding traffic through the village and frequent incidences of traffic congestion, when any proposal to extend the existing settlement boundary should be raised.</p>	<p>opportunity to undertake an initial review of boundaries in February and March 2020. As far as possible the results from this exercise were used as a clear community steer for the way forward. This information was then considered together with the requests that were submitted by residents and other developers for small extensions to boundaries in some settlements. Proposed new boundaries were then drawn up. Town/parish councils and neighbourhood planning groups across the District were also given another opportunity to comment in March and April 2021 and boundaries amended as appropriate.</p> <p>Maps of individual settlements showing the finalised new settlement boundaries will be set out in a Settlement Boundary Review Background Paper which will be published as part of the evidence base for the Proposed Submission LPR. The settlements boundaries will also be shown on the Policies Map.</p>
Hungerford Town Council (lpr175)	Hungerford Town Council has already provided their input (Feb 2020) on adjustments to the settlement boundary. See also comments re RSA21.	Comments noted
Lambourn Neighbourhood Development Plan Steering Group (lpr1715)	<p>The area designated in the emerging Lambourn Neighbourhood Development Plan includes two settlements with settlement boundaries - Lambourn and Eastbury. Decisions about the Lambourn Settlement boundary have yet to be taken and the boundary of the Lambourn urban area shown in the Landscape Character Appraisal for the Lambourn NDP should not be seen as a proposed settlement boundary. When the Settlement Character Appraisal for Lambourn is completed, the Steering Group will then be in a position to clarify this. Some residents of Eastbury have expressed dissatisfaction with the current settlement boundary, but the debate about where the boundary should go is ongoing, based on the criteria set out in the LPR. Upper Lambourn does not have a settlement boundary but in the light of recent developments there is an ongoing debate about the need for one.</p>	<p>Comments noted. The Council acknowledges that when these comments were made the settlement boundaries for settlements within the parish of Lambourn were going to be revised as appropriate through the Lambourn Neighbourhood Development Plan using the criteria set out in the LPR.</p> <p>In August 2021 the NDP Steering Group asked the Council to incorporate the work it had done separately already for Eastbury, Lambourn and Upper Lambourn into the overall settlement boundary review for the District. Further details are set out in Appendix 3 of the SBR itself. Proposed new boundaries for Lambourn and Eastbury will be set out in the Proposed Submission LPR.</p>

Shaw cum Donnington (lpr268)	We have commented on this in a previous consultation.	Comments noted
Stratfield Mortimer Parish Council (lpr447)	Supports the approach	Comments noted
Thatcham Town Council (lpr1419)	<p><i>Full representation relating to north east Thatcham strategic site allocation attached to representation on SP17.</i></p> <ul style="list-style-type: none"> <li>"We are also undertaking a detailed 'on the ground' community led assessment of each individual settlement. This work is being undertaken in co-operation with parish and town councils and neighbourhood planning groups and is still in progress."</li> </ul> <p>We are unclear as to the consultation process that has been undertaken with Thatcham Town Council and request that guidance is provided to the Town Council on the community led assessment that this is referring to.</p> <ul style="list-style-type: none"> <li>"The Council will take a landscape led approach."</li> </ul> <p>We note that the landscape for NE Thatcham is recognised by West Berkshire Council in their submission to the Secretary of State as being countryside, and not urban fringe.</p> <ul style="list-style-type: none"> <li>Principle include that "settlement boundaries protect the character of a settlement and prevent unrestricted growth into the countryside."</li> </ul> <p>We note that the existing settlement boundary on the North side of Thatcham was defined to prevent unrestricted growth and the proposed extension is in conflict with existing boundaries.</p> <ul style="list-style-type: none"> <li>Boundaries will exclude "Recreational or amenity open space which extends into the countryside."</li> </ul> <p>We note that the NE Thatcham proposed site would require the settlement boundary to extend into the countryside and is in conflict with this definition.</p> <ul style="list-style-type: none"> <li>Boundaries will exclude "Highly visible areas such as exposed ridges, land forms or open slopes; Open undeveloped parcels of land;</li> </ul>	<p>Comments noted.</p> <p>The work on the SBR has been undertaken in co-operation with parish/town councils and neighbourhood planning groups. The Council gave all town/parish councils and neighbourhood planning groups across the District an opportunity to undertake an initial review of boundaries in February and March 2020. As far as possible the results from this exercise were used as a clear community steer for the way forward. This information was then considered together with the requests that were submitted by residents and other developers for small extensions to boundaries in some settlements. Proposed new boundaries were then drawn up. Town/parish councils and neighbourhood planning groups across the District were also given another opportunity to comment in March and April 2021 and boundaries amended as appropriate.</p> <p>Maps of individual settlements showing the finalised new settlement boundaries will be set out in a Settlement Boundary Review Background Paper which will be published as part of the evidence base for the Proposed Submission LPR. The settlements boundaries will also be shown on the Policies Map.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Recreational or amenity open space which extends into the countryside; Tree belts, woodland areas"</p> <p>These are all examples of excluded boundaries that a NE Thatcham development would be in conflict with.</p> <p>The concepts that boundaries can be arbitrarily drawn to include sites that are allocated in the Local Plan is in conflict with Policy SP 1 that states that "environmental assets will continue to be protected and enhanced and used positively in development to establish a sense of place that nurtures human health and well-being". Essentially the redrawing of a settlement boundary to meet a housing need is a self-fulfilling prophesy that enables West Berkshire Council to justify placing housing where it wishes, and not where it does not wish, without any objective evidence base.</p> <p>It is necessary that:</p> <ul style="list-style-type: none"> <li>• The community led consultation process on settlement boundaries is explained to Thatcham Town Council</li> <li>• That the settlement boundary review is performed in a self-consistent way that respects the rules and principles that are defined in the review</li> <li>• The clear conflict between respecting the policy SP 1 and the extension of a settlement boundary that breaks this policy is resolved.</li> </ul>	<p>The Council has taken a landscape led approach to the drawing of settlement boundaries. There is a wealth of information already contained in landscape character assessments and community led documents such as town and village design statements, parish plans and neighbourhood plans which have been used as a guide. A detailed 'on the ground' community led assessment of each individual settlement has also been undertaken. The settlement boundary review criteria set out the general principles followed when defining a boundary and give guidance as to what would usually be included and what would usually be excluded. This makes clear that sites allocated through the LPR will be included within the boundary. Such sites are only allocated through the plan led process after a thorough site assessment and sustainability appraisal. For North East Thatcham the site assessment included a Landscape Sensitivity Assessment which is published as part of the evidence base for the LPR. There is therefore no conflict with Policy SP1.</p> <p>It is acknowledged that the settlement boundary is currently drawn around the whole of the proposed allocated site at North East Thatcham whilst Policy SP17 notes that development will be expected to deliver 'a network of green infrastructure which will include a new strategic country park linking Thatcham to the plateau and the AONB.' The Council is clear that development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which will provide the context within which any proposed development would need to conform. As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst the study makes clear that there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it</p>

Respondent (with lpr ref)	Response	Council Response
		<p>does not assess the capacity of individual components of the site in relation to individual planning proposals. At this stage it is therefore not possible to draw the settlement boundary any tighter. As the LPR progress and more detailed work is done on the sensitivity and capacity of different parts of the site to accommodate development the boundary will be amended accordingly.</p> <p>The Proposed Submission LPR policy will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development, design and layout of the site.</p>
<b>General consultation bodies</b>		
Mid & West Berkshire Local Access Forum (lpr1893)	MWBLAF welcomes and supports the statement that: Boundaries will exclude ... Roads, tracks and public rights of way running along the edge of a settlement.	Comments noted
<b>Other stakeholders</b>		
Caroline Andrews (lpr1785)	I have never done this before however I wanted to put my views through before the deadline of the first phase in regards to the Settlement Boundary Review and the application that was originally put forward in July of 2012 for 4 Dwellings at the land Opposite Fairbanks between Cedar House, The Lythe and Rectory Cottages in Wickham, Newbury. The application was not approved back in 2014 due to the settlement being in an area of natural outstanding beauty, which is still very much the case. I believe another application has been put through after that, however I don't know the details of it. We moved to the area a few years ago, for simply the reason of living in a beautiful place that was not so built up and wouldn't like for any more properties being built so close to our property and I believe this view will be shared with most of my neighbours.	<p>Comments noted. The settlement boundary review criteria set out the general principles followed when defining a boundary and give guidance as to what would usually be included and what would usually be excluded.</p> <p>The work has been undertaken in co-operation with parish/town councils and neighbourhood planning groups.</p> <p>The land along Church Hill in Wickham is being promoted for inclusion within the settlement boundary by the landowner (see lpr1956). The Council believes that appropriate linear development along Church Hill would follow the existing pattern of development and does not consider that this would harm the form and character of the settlement as a whole. Whilst therefore appreciating the</p>

Respondent (with lpr ref)	Response	Council Response
		<p>views of some local residents and also the parish council who oppose its inclusion, on balance, the Council believes that this site could provide a suitable small scale infill opportunity.</p> <p>Although Wickham is within the AONB it is inevitable and appropriate that it will continue to change and develop but the Council is clear that change should be both appropriate and sustainable.</p>
Blandy & Blandy for Sir Christopher & Lady Gent (lpr2086)	<p>The Council will be aware of previous representations made to the Council in respect of land known as Land to the West of Wantage Road (“Site”). (Reference SCD2). Our Clients are pleased to see that the Council has not allocated SCD2 for residential development within the Local Plan. We understand that the reason for the exclusion of the Site is its location outside of the settlement hierarchy, rather than the site “not being developable within the next 15 years”. Our Client’s position remains that the site is not developable not only due to its location outside of the settlement area but also its proximity to Donnington Castle and further the existence of various restrictive covenants which our Clients would seek to enforce. Our Clients understand that the Council is still working on an updated Policies Map and that it is still finalising the settlement boundaries. The Emerging Local Plan places Donnington under the spatial area of Newbury and Thatcham. According to Emerging Policy SP1 “the focus of development in each spatial area will follow the District-wide settlement hierarchy” as set out in Emerging Policy SP3. Emerging Policy SP1 provides that “outside of settlement boundaries land will be treated as open countryside where development will be more restricted”. There is further guidance on criteria developments on the edge of defined settlements would need to meet, such as density expectations. Emerging Policy SP3 sets out the settlement hierarchy and Donnington is not included within either the Urban Area, Rural Service Centres or Service Villages. This Emerging Policy SP3 confirms instead that where development is proposed outside of the smaller settlements (here Donnington), development will be restricted to that which is appropriate for</p>	Comments noted

Respondent (with lpr ref)	Response	Council Response
	<p>rural countryside as set out in Emerging Policy DC1. This position is supported by our Clients.</p> <p>The Council's Existing Core Strategy locates the Site outside of the defined settlement boundary of Donnington. It is submitted that for the reasons set out above and in previous correspondence that should the Council reconsider the drawing of the settlement boundary for Donnington that it is not extended to include the Site.</p>	
Councillor Alan Law (lpr1079)	<p>I am supportive of the proposed Landscape led review of Settlement Boundaries and the referencing to Parish Plans, Village design statements, Conservation area appraisals, AONB landscape character assessments, and other Landscape and Historical assessments.</p> <p>I particularly support the exclusion of "Areas of isolated development which are physically or visually detached from the settlement", "Large gardens which visually relate to the open countryside rather than the settlement", "Loose knit arrangements of buildings on the edge of settlements", and "Roads, Tracks and Public rights of way running along the edge of the settlement".</p> <p>As far as Streatley and Upper Basildon are concerned, the desire to retain the current Settlement Boundary is very strongly supported by the residents and the two parish councils. With Streatley, this is the overwhelming desire of 80% plus of residents as reflected in the adopted Parish Plan 2006 and its adopted refresh in 2016.</p> <p>In Streatley, a couple of local land owners have lobbied for extensions of the SB, but these are solely motivated by a desire for personal profit by incorporating</p> <ul style="list-style-type: none"> <li>• their field (already rejected as an unsuitable development site following the initial review of the call for sites), or</li> <li>• their house and back garden, to enable a new back garden development in what is currently a location well outside the SB.</li> </ul> <p>These two presentations have been totally rejected as unsuitable by the Parish Council.</p>	Comments noted
Ian Parsons (lpr847)	<p>In rural and semi-rural areas there are spaces outside of existing settlement boundaries that are viewed as potential development sites by their owners.</p>	<p>Comments noted. Councillor Tony Vickers (lpr672)	<p>We acknowledge that as the Plan evolves it will be necessary to review settlement boundaries. However we would like to also see the criteria for determining settlement boundaries reviewed at regular intervals.</p> <p>We would prefer to see settlement boundaries follow the <b>outer</b> line of roads that define the edge of a settlement than be drawn on the edge closest to</p>	<p>Comments noted. As noted in the SBR background paper, the Council's approach is to align boundaries along roads to the edge closest to the settlement. The Council sought comments on the proposed criteria for the settlement boundary review as part of the <a href="#">second round of Regulation</a></p>

Respondent (with lpr ref)	Response	Council Response
	the settlement, because it is essential to provide for all forms of settlement related travel within the road, which might require the full width of a boundary road to be modified.	<a href="#">18 consultation</a> we undertook between 9 November to 21 December 2018. From the comments we received it was clear that there was overwhelming support for the principle of the Council's landscape led approach to the drawing of settlement boundaries. Details are set out in the <a href="#">Consultation Statement (June 2019)</a> .
Peter West (lpr722)	<p>I object to any change in the Thatcham northern settlement boundary along Floral Way.</p> <p>Local residents have long appreciated the open fields to the north of Floral Way and the A4 as one of Thatcham's open spaces. The area is outside the current settlement boundary and I think most Thatcham residents want it to stay that way. As a resident of Simmons Field, the open views to the north beyond Floral way are a cherished reminder to me that I live on the edge of the countryside.</p> <p>One piece of land – the rising open slope visible when you drive north east up Harts Hill Road past 'The Mill' pub - appears to meet the exception criteria shown in Appendix 3:</p> <p>"Boundaries will exclude:</p> <ul style="list-style-type: none"> <li>• Highly visible areas such as exposed ridges, land forms or open slopes on the edge of settlements</li> <li>• Open undeveloped parcels of land on the edges of settlements which are not either functionally or physically or visually related to the existing built up area.</li> </ul>	Comments noted. See Council response to Thatcham Town Council (lpr1419 above)
<b>Landowners, site promoters and developers</b>		
Barton Willmore for Donfield Homes (lpr2101)	<p>We are in agreement with the Council's intention to review settlement boundaries.</p> <p>Our comments in relation to the Review of Settlement Boundaries relate specifically to Lower Basildon and should be read in the context of our promotion of our client's site "Land North of Reading Road, Lower Basildon". The site was identified as 'deliverable' under reference BAS1 within the West Berkshire Housing and Economic Land Availability Assessment ('HELAA') (February 2020).</p>	Comments noted. It is acknowledged that the SBR criteria state that boundaries will include 'single plot or other similar which would provide infill and rounding off opportunities small scale development opportunities that are physically, functioning and visually related to the existing built up area, taking account of any environmental development constraints.' A site for approximately 9 dwellings in this particular location is not considered to fulfil this criterion.

Respondent (with lpr ref)	Response	Council Response
	<p>The Site is situated off Reading Road (A329) and is south-west of the railway line. The area of the site proposed for inclusion within the settlement boundary comprises approximately 0.55Ha of land and lies on the edge of the settlement boundary of Lower Basildon and would be a logical extension to the settlement.</p> <p>The site adjoins the north-western edge of the existing Lower Basildon settlement boundary. To the north east of the site is the railway line. The residential dwellings of Grey Kite House and Pelynt House are within the settlement and to the south-east of the site. To the north-west of the site are two existing residential dwellings which are currently beyond the settlement boundary; Lower Basildon View (approved for a change of use from a restaurant to residential use under planning application reference: 12/00881/FULD) and a former outbuilding associated with the dwelling which obtained permission for conversion to a separate residential dwelling under application reference: 17/03322/FULD. White Lodge, The White House, Swan Yard Farm, and number of semidetached houses (No.6 to 12 Reading Road) lie the opposite side of Reading Road, immediately to the south-west of the Site. As such, the site is surrounded by existing residential uses on three sides and “reads” as part of the linear settlement.</p> <p>Appendix 3 of the local plan states that as part of the review, boundaries will include small-scale development opportunities “which would provide infill and rounding off opportunities that are physically, functionally and visually related to the existing built-up area, taking account of any environmental development constraints.” The alteration of the settlement boundary at Lower Basildon to include our client’s land which could accommodate approximately 9 dwellings would provide a rounding off opportunity for a more logical settlement boundary. The revised boundary which would reflect the existing residential uses to the north west of our client’s site introduced since the settlement boundaries were last updated. In relation to environmental development constraints, these representations are accompanied by technical documents including a Preliminary Ecology Appraisal (November 2020, prepared by John Wenman Consultancy), a Settings Appraisal (November 2020, prepared by Archway Heritage) and a Report on Landscape and Visual Matters (October 2020, prepared by David Williams Consultancy). These reports demonstrate that there are no</p>	<p>It is not the role of the SBR to allocate sites for development.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>environmental development constrains which would prevent the delivery of the site. In addition, we have considered technical constraints including archaeology (Initial Archaeology Study (November 2020), prepared by Archway Heritage) and highways (Highway Assessment (November 2020), prepared by Highway Planning Ltd.) which are also provided with these representations and evidence the deliverability of the site. An indicative site layout is also provided which illustrates how 9 dwellings could be accommodated on the site.</p> <p>We understand that in defining updated settlement boundaries, the Council are seeking to, where possible, follow clearly defined features such as hedgerows, railway lines or roads. Whilst there is a railway line to the rear our client's land which the Council may wish to consider as an appropriate boundary, we note that development within the settlement is typically closer to Reading Road and, as a result the Council should note that the extent of the land promoted (please refer to the site boundary plan reference 18752 01 submitted in response to the call for sites and again with this submission for ease of reference) suggests a north-eastern boundary in keeping with residential development to the north-west and south-east of the site. It is proposed that the area of land shown in blue on the Site Boundary Plan is retained undeveloped and put to a community use such as allotments or open space dependent on community need. In addition, it should be noted that landscape features to mark this boundary, by way of new hedgerow and tree planting, would be included with any landscape proposals for the development. The introduction of new hedgerow and tree planting would mitigate against landscape and visual impacts of small-scale residential development in this location by strengthening boundaries as well as providing screening which would limit views towards the proposed development. This suggested approach is consistent with the Council's approach to allocating Land at Chieveley Glebe, Chieveley under Policy RSA 26.</p> <p>In reviewing the settlement boundaries, we would encourage the Council to have regard to the Report on Landscape and Visual Matters prepared by David Williams Landscape Consultancy (dated October 2020) submitted with these representations which consider the landscape impacts of the development of this site within the AONB in detail. The report concludes that</p>	

Respondent (with lpr ref)	Response	Council Response
	the layout and design (scale, height and massing) of the development would reflect, and be keeping with, the existing pattern and grain of development within Lower Basildon and that the development would not result in significant landscape or visual impacts or effects.	
Bluestone Planning for Jeremy Flawn (lpr182)	<p>The decision to review the settlement boundaries in the District is to be welcomed. It is understood that a landscape-led approach is being adopted, but that it is being enhanced with community-led assessments of each individual settlement.</p> <p>The main criteria for drawing boundaries to include land are understood to be as follows. Boundaries will, in future, <u>include</u>:</p> <ul style="list-style-type: none"> <li>• The main settlement area. i.e. the area of close knit physical character</li> <li>• Sites allocated through the Local Plan and Neighbourhood Plan processes</li> <li>• Curtilages which are contained, are visually part of the built up area and are separated from the open or wider countryside</li> <li>• Recreational or amenity open space which is physically surrounded by the settlement (or adjoined on three sides by the settlement)</li> <li>• Existing community facilities (such as churches, schools and village halls) which are physically and visually related to the settlement</li> <li>• Single plots or other similar small scale development opportunities which would provide infill and rounding off opportunities that are physically, functionally and visually related to the existing built up area, taking account of any environmental development</li> </ul> <p>In contrast it is understood that the following will be <u>excluded</u> from settlement boundaries:</p> <ul style="list-style-type: none"> <li>• Highly visible areas such as exposed ridges, land forms or open slopes on the edge of settlements</li> <li>• Open undeveloped parcels of land on the edges of settlements which are not either functionally or physically or visually related to the existing built up area</li> <li>• Recreational or amenity open space which extends into the countryside or primarily relates to the countryside in form and nature. This includes designated Local Green Space</li> </ul>	<p>Response noted. As part of the LPR the Council has undertaken a review of the existing settlement boundaries across the District and this site was considered as part of that process. Whilst acknowledging the argument put forward by the site promoter, the Council does not believe the site meets the criteria for inclusion within the boundary. It is not considered to form part of the main settlement area i.e. the area of close knit physical character.</p> <p>Maps of individual settlements showing the finalised new settlement boundaries will be set out in a Settlement Boundary Review Background Paper which will be published as part of the evidence base for the Proposed Submission LPR. The settlements boundaries will also be shown on the Policies Map.</p>

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• Tree belts, woodland areas, watercourses and other features which help to soften, screen existing development and form a boundary to the settlement</li> <li>• Areas of isolated development which are physically or visually detached from the settlement and areas of sporadic, dispersed or ribbon development</li> <li>• Large gardens or other areas, such as orchards, paddocks, allotments, cemeteries and churchyards, which visually relate to the open countryside rather than the settlement</li> <li>• The extended curtilages of dwellings where future development has the capacity to harm the structure, form and character of the settlement</li> <li>• Loose knit arrangements of buildings on the edge of a settlement</li> <li>• Farmsteads, agricultural buildings, or converted agricultural buildings on the edge of a settlement which relate more to the rural context</li> <li>• Horse related development, minerals extraction, landfill, water features, public utilities (sewage treatment plants, substations) on the edge of a settlement</li> <li>• Important gaps between developed areas in fragmented settlements. Settlement boundaries do not need to be continuous. It may be appropriate, given the nature and form of a settlement, to define two or more separate elements of it.</li> <li>• Roads, tracks and public rights of way running along the edge of a settlement</li> </ul> <p>Land at Vicarage Lane, Streatley (postcode RG8 9HX) represents a parcel of land containing three properties which, although outside the settlement boundary for Streatley as depicted on the adopted Local Plan proposals map, are logically part of the settlement and should be included following the boundary review of the settlement boundary for Streatley.</p> <p>The three properties have been described by name in the Village Design Statement for Streatley (2009) p.17 as lying <u>within</u> the settlement boundary. These properties are Waterford House (previously the Vicarage); the Old Vicarage; and Windrush.</p> <p>Under the heading “THE VILLAGE OF STREATLEY WITHIN THE SETTLEMENT BOUNDARY” the text on page 17 states:</p>	

Respondent (with lpr ref)	Response	Council Response
	<p><i>“Vicarage Lane lies opposite Church Lane and to the south of the High Street. A two-storey, 20th century house on the west side of Vicarage Lane occupies part of the originally extensive gardens of Streatley House.</i></p> <p>The proposed extension to the settlement boundary is attached as figure 1. The three properties and their associated curtilages clearly read as forming part of the physical settlement rather than lying outside the settlement. The Streatley Conservation Area Appraisal takes this further confirming in Appendix 7 that the three properties form part of the historic settlement or recent settlement growth (see Figure 2 attached) and that they form a part of the setting of – or are included within - the Conservation Area boundary for the Streatley Conservation Area (see extract from Appendix 8 in Figure 3 attached). Southfields to the south of Waterford House is significant because it does not form part of the continuum of built development on Vicarage Lane and is therefore not a logical part of the settlement. It is an outlier property which takes its access off the Reading Road and is remote, both physically and visually, from the Vicarage Lane properties.</p> <p><i>On the east side of Vicarage Lane is the attractive, riverside Millstream House. The Lane leads to a landmark building – the <u>19th century Vicarage, now a private house, with cream painted brickwork. The stables to that Vicarage have been converted into a two-storey family house. Adjacent to the “Old Vicarage” lies the 1960s vicarage. All these houses are in traditional style with brick walls and plain tile roofs. The windows vary in type, casement or vertical sash, and some frames are painted white whilst others are in natural hardwood finish.</u></i>” (the three properties in question are those underline above).</p> <p>Over the last 20 years Vicarage Lane has changed from a rural muddy track extending southwards out of the village of Streatley into a low density residential road with built development and village amenities along the length of the Lane.</p> <p>In particular the following changes have taken place:</p> <ul style="list-style-type: none"> <li>• The 1960s Vicarage was redeveloped in 2010 to create Waterford House, a modern well- appointed detached dwelling and grounds leading to the edge of the River Thames</li> <li>• Vicarage Lane was resurfaced in 2011 and is now well-used for vehicular traffic every day</li> </ul>	

Respondent (with lpr ref)	Response	Council Response
	<ul style="list-style-type: none"> <li>• In 2011 planning permission was granted for the construction of a manege and equestrian facilities on the west side of Vicarage Lane</li> <li>• In 2017 the Granary was demolished and a new dwelling was constructed on the eastern side of Vicarage Lane to the north of Windrush</li> <li>• The land immediately to the north of Windrush was acquired by the Parish Council for the benefit of the community in 2011</li> <li>• In 2015 Windrush was substantially extended to form an impressive family home</li> <li>• An impressive indoor swimming pool was built by Streatley House in their garden adjoining the Lane in 2020</li> </ul> <p>The Lane forms an integral part of the built area of the village of Streatley, and it is therefore entirely logical to include the three properties within an extension to the settlement boundary.</p> <p>The inclusion of these properties within the boundary will neither harm the setting of the Conservation Area nor the AONB, as the properties are already <i>in situ</i> and no change is proposed as part of this proposed boundary extension. The land clearly reads and is understood by the casual observer to form part of the settlement already. The environmental constraints that affect these three properties (ANOB, Conservation Area / trees / River Thames corridor etc) will serve to ensure that by including these properties within the settlement boundary there is no greater prospect of further development taking place that there is today. This satisfies the third objective for sustainable development in the NPPF – the environmental objective.</p>	
Carter Jonas for Mr & Mrs Steljes (lpr1939)	<p>We object to the Section 8 of the Local Plan as it does not allocate the land at Hillfield, Lower Basildon for residential development.</p> <p>Even though the settlement is one of the smaller ones in the District the boundary of the settlement is fixed which gives limited scope for future development.</p> <p>It is requested that the boundary of the settlement is extended to allow the development of the land to the north of the settlement boundary to be developed.</p>	<p>Response noted. As part of the LPR the Council has undertaken a review of the existing settlement boundaries across the District and this site was considered as part of that process. Whilst acknowledging the argument put forward by the site promoter, the Council does not believe the site meets the criteria for inclusion within the boundary. A site for approximately 8 dwellings in this particular location is not considered to fulfil this criterion.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Once the settlement boundary is amended to include the land at Hillfield, it is requested that the site be allocated in the Local Plan for residential development. If the site is not allocated the amended settlement boundary would enable the site to come forward as infill in accordance with Policy SP1 and SP2.</p> <p>The site is in the North Wessex Downs AONB but adjacent to the built development of Lower Basildon to the south and two residential properties to the north and is located to the west of the busy A329. As such the development of the site will conserve and enhance the special landscape qualities of the AONB and not detract from it. The proposed development of 8 dwellings will not be major development and accordingly exceptional circumstances will not be required nor will the development need to be in the public interest to justify the development.</p> <p>The land is available, and the development of the site can be delivered within the next 5 years.</p> <p>The extend of the site that is requested to be included in the settlement is shown below (<i>plan attached</i>) identified as BAS2:</p> <p>The northern boundary of the settlement boundary for Lower Basildon is amended to include the site at Hillfield (BAS2).</p> <p>Allocate the site at Hillfield for residential development of up to 8 dwellings.</p>	<p>It is not the role of the SBR to allocate sites for development.</p> <p>Maps of individual settlements showing the finalised new settlement boundaries will be set out in a Settlement Boundary Review Background Paper which will be published as part of the evidence base for the Proposed Submission LPR. The settlements boundaries will also be shown on the Policies Map.</p>
Carter Planning for RLA Jones (lpr1906)	<p>Objection.</p> <p>We do support a new boundary review but as proposed it will be ineffective and inadequate. Setting the parameters narrowing the review before carrying out the review is flawed. For instance existing allocated but undeveloped sites are automatically included in the settlement boundary whatever their landscape impact may be.</p> <p>The Plan's approach to the selection of sites prior to the review of settlement boundaries is flawed and not justified.</p> <p>In particular site RSA22 is a large extension to the settlement with no particular boundaries to the north and RSA23 can be described as a ribbon of development which is sporadic and not part of the close knit physical character of the village of Lambourn.</p> <p>RSA 23 has been selected and yet there is no landscaped boundary.</p>	<p>Comments noted. The Council has taken a landscape led approach to the drawing of settlement boundaries. There is a wealth of information already contained in landscape character assessments and community led documents such as town and village design statements, parish plans and neighbourhood plans which have been used as a guide. A detailed 'on the ground' community led assessment of each individual settlement has also been undertaken. The settlement boundary review criteria set out the general principles followed when defining a boundary and give guidance as to what would usually be included and what would usually be excluded. This makes clear that sites allocated through the LPR will be included within the boundary. Such sites are only allocated through the plan led process after a thorough site assessment and</p>

Respondent (with lpr ref)	Response	Council Response
	<p>The site is on a ridge, and an open area on the edge of the settlement seen at the entrance to the village.</p> <p>The Plan's review of settlement boundaries was previously poorly applied and that will continue if settlement boundaries are not comprehensively re-examined.</p> <p>It is nonsensical if an unallocated site which has little impact on the landscape can be examined but a previously allocated site which has not been developed and has undesirable landscape impacts is ignored.</p> <p>Sites RSA22 and 23 should be removed if not required, or one should be replaced by LAM007 or alternatively LAM007 "Land between Folly Road, Rockfel Road and Stork House Drive" should be included in the settlement boundary alteration for Lambourn in addition to meet overall housing need. In particular RSA 23 compares unfavourably with LAM007. It is irregular in shape, has no natural containment and is further from the village centre. It is unable to provide the variety of mix and type of housing which can be delivered by LAM007 and is centred on the provision of low density high cost housing unsuited to the low cost housing required by the horse racing economy of Lambourn.</p> <p>Site LAM007 should be included in the Draft Plan.</p> <p>Carry out an unconstrained boundary review to include all sites on the edge of urban areas, especially around Lambourn, and not a limited review.</p>	<p>sustainability appraisal. For sites in Lambourn these assessments also included Landscape Sensitivity Assessments which are published as part of the evidence base for the LPR.</p> <p>It is not the role of the SBR to allocate sites for development.</p> <p>As part of the LPR the Council has undertaken a review of all of the existing settlement boundaries across the District.</p>
John Davies (lpr1821)	<p>I agree with your 'principles of inclusion of land uses', page 230 and your 'boundaries will include....' Pages 230 and 231. The present boundary of East Garston differs significantly from your clear and well identified criteria on pages 230 and 231. I submitted corrections to remove this anomaly to your HSADPD but was later informed that East Garston was too small to be reviewed.</p> <p>Review of East Garston's boundaries according to your criteria in the Emerging Draft</p>	<p>Response noted. As part of the LPR the Council has undertaken a review of all of the existing settlement boundaries across the District, including East Garston.</p> <p>Maps of individual settlements showing the finalised new settlement boundaries will be set out in a Settlement Boundary Review Background Paper which will be published as part of the evidence base for the Proposed Submission LPR. The settlements boundaries will also be shown on the Policies Map.</p>

Respondent (with lpr ref)	Response	Council Response
JSA Architects for Colthrop Village Consortium (lpr782)	<p>See Comments above about the Landscape Character Assessment and the Local Landscape Character Areas around Thatcham. The area 8D: South Thatcham Valley Farmland is quite extensive and not all of the area is of medium to high landscape sensitivity. The Rainsford Farm/former Paper Mill site is compromised by former industrial workings, electricity pylons, the edge of the colthrop industrial area, a large electricity sub-station and a railway line with overhead catenary which has only been installed since the study was undertaken. This part of the area is less tranquil and more intruded-upon by urban development and should therefore be seen as less sensitive.</p> <p>The landscape-led approach is valid to a point but other planning criteria, including the transportation benefits of proximity to the railway station should be weighed in the balance.</p> <p>Expressly acknowledge the planning balance and the sustainability benefits of proximity to Thatcham Railway Station and ensure that the criteria do not preclude development South of the railway and canal where there sustainability benefits from allowing development.</p>	<p>Response noted. As part of the LPR the Council has undertaken a review of the existing settlement boundaries across the District and this site was considered as part of that process. Whilst acknowledging the argument put forward by the site promoter, the Council does not believe the site meets the criteria for inclusion within the boundary. It is not the role of the SBR to allocate sites for development.</p> <p>Maps of individual settlements showing the finalised new settlement boundaries will be set out in a Settlement Boundary Review Background Paper which will be published as part of the evidence base for the Proposed Submission LPR. The settlements boundaries will also be shown on the Policies Map.</p>
Pro Vision for Feltham Properties (2279)	<p>The Consultation Document, at Appendix 3, confirms that as part of the Local Plan Review, the Council will review the settlement boundaries across the district.</p> <p>The Council's advises that settlement boundaries will include [inter alia]:</p> <ul style="list-style-type: none"> <li>• the main settlement area (i.e. the area of close-knit physical character); and</li> <li>• single plots or other similar small scale development opportunities which would provide infill and rounding off opportunities that are physically, functionally and visually related to the existing built-up area, taking account of any environmental development constraints.</li> </ul> <p>We support the intention to review existing settlement boundaries. In particular, we welcome the confirmation that single plots/small-scale sites that are well related to the existing built-up area will be included, or retained in the Plan, and encourage the Council to maximise these opportunities in conjunction with allocations as an important element of significantly boosting the supply of housing in accordance with the NPPF (paragraph 59).</p>	Comments noted

Pro Vision for Wasing Estate (lpr2064)	<p>Re Land at Manor Farm, Brimpton (2 sites)</p> <p>In addition to housing site allocations, there also appears to be scope to extend the settlement boundary of Brimpton as part of the settlement boundary review.</p> <p>Appendix 3 of the draft LPR sets out the Council's intention to undertake this review. Settlement boundaries identify the main built-up area within which</p>	<p>Response noted. As part of the LPR the Council has undertaken a review of the existing settlement boundaries across the District and these sites were considered as part of that process. Whilst acknowledging the argument put forward by the site promoter, the Council does not believe they meet the criteria for inclusion within the boundary.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>development is considered acceptable in principle. The LPR confirms that settlement boundaries will include characteristics such as:</p> <ul style="list-style-type: none"> <li>• The main settlement area i.e. the area of close knit physical character; and</li> <li>• Single plots or other similar small scale development opportunities which would provide infill and rounding off opportunities that are physically, functionally and visually related to the existing built-up area, taking account of any environmental development constraints.</li> </ul> <p>The current settlement boundary of Brimpton is drawn tightly around the majority of the built-up area, however there appears to be spaces which are not currently included within the boundary, but which clearly follow the existing settlement pattern. Both sites, as can be seen in the above map, are physically, functionally and visually well related to the existing built-up area, immediately adjoining the close-knit linear pattern of frontage development along Brimpton Road. The inclusion of these sites within a revised settlement boundary would represent logical rounding off opportunities to the settlement.</p> <p>We support the upcoming settlement boundary review, including at Brimpton, as this will encourage and enable the delivery of some small-scale development in the village. In addition to allocations, the delivery of small-scale sites will assist in meeting the Council's housing requirements over the Plan period, noting the important contribution small and medium sites can make as they are often built-out relatively quickly, as confirmed by the NPPF4.</p>	<p>Maps of individual settlements showing the finalised new settlement boundaries will be set out in a Settlement Boundary Review Background Paper which will be published as part of the evidence base for the Proposed Submission LPR. The settlements boundaries will also be shown on the Policies Map.</p>
Southern Planning Practice for The Saunders family (lpr1932)	<p><i>Extract of representation on behalf of the Saunders Family promoting development to the east of Stoney Lane</i></p> <p>We understand that the Local Plan Review is looking to review the existing settlement boundaries in the district through a landscape-led approach. Appendix 3 sets out how the council intend to do this.</p> <p>We agree that when reviewing the boundary for any given settlement, the council should look to its landscape evidence to assess which areas should be included and which should be excluded from the settlement boundary.</p> <p>We encourage the Council to review settlement boundaries to include suitable and sustainable sites for residential development and other development needs within the District. A previous settlement boundary review included the land at Coley Farm to facilitate its allocation.</p>	<p>Response noted. As part of the LPR the Council has undertaken a review of the existing settlement boundaries across the District and this site was considered as part of that process. Whilst acknowledging the argument put forward by the site promoter, the Council does not believe the site meets the criteria for inclusion within the boundary. It is not the role of the SBR to allocate sites for development.</p> <p>Maps of individual settlements showing the finalised new settlement boundaries will be set out in a Settlement Boundary Review Background Paper which will be</p>

Respondent (with lpr ref)	Response	Council Response
	<p>With regards to the land east of Stoney Lane, the site is not located in a sensitive landscape designation and it is very well related to existing and future development. It is therefore considered that the principle of its inclusion for residential development in the revised settlement boundary for Newbury is accepted. It is key to note that the southern section, including one of the sites accesses onto Waller Drive is located within the existing settlement boundary of Newbury.</p> <p>The revision to the settlement boundary to include land east of Stoney Lane would follow clearly defined boundaries and would result in a logical rounding of the urban area of Newbury. Whilst the site is currently countryside, it is very well located to the existing built up area of Newbury and is surrounded by existing and future residential development.</p>	<p>published as part of the evidence base for the Proposed Submission LPR. The settlements boundaries will also be shown on the Policies Map.</p>
Southern Planning Practice for The Saunders family (lpr2120)	<p><i>Extract of representation on behalf of the Saunders Family promoting land at Coombe Bottom Farm, Streatley</i></p> <p>We understand that the Local Plan Review is looking to review the existing settlement boundaries in the district through a landscape-led approach. Appendix 3 sets out how the council intend to do this.</p> <p>We agree that when reviewing the boundary for any given settlement, the council should look to its landscape evidence to assess which areas should be included and which should be excluded from the settlement boundary. We encourage the Council to review settlement boundaries to include suitable and sustainable sites for residential development and other development needs within the District.</p> <p>With regards to the land at Coombe Bottom Farm, we believe that Streatley's existing settlement boundary should be amended to include this area of land. The Landscape and Visual Appraisal submitted with these representations demonstrate how the site is well related to the existing settlement and it is both physically and visually very well contained in the surrounding landscape, with only glimpse, filtered views are achievable. The existing settlement boundary for Streatley is considered to be mostly appropriate given its AONB location and the physical and environmental constraints around the settlement. However, the inclusion of the land at Coombe Bottom Farm, would represent a logical extension and a 'rounding' of the western built-up area of the settlement.</p> <p>As demonstrated throughout these representations, the site is an</p>	<p>Response noted. As part of the LPR the Council has undertaken a review of the existing settlement boundaries across the District and this site was considered as part of that process. Whilst acknowledging the argument put forward by the site promoter, the Council does not believe the site meets the criteria for inclusion within the boundary. It is not the role of the SBR to allocate sites for development.</p> <p>Maps of individual settlements showing the finalised new settlement boundaries will be set out in a Settlement Boundary Review Background Paper which will be published as part of the evidence base for the Proposed Submission LPR. The settlements boundaries will also be shown on the Policies Map.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>appropriate location for new landscape-led residential development. Through the implementation of landscape-led development parameters and mitigation measures, development of the site would not result in an adverse impact on the AONB or any landscape designation. Such sites are very rare in the North Wessex Downs AONB and therefore this site should be considered carefully by the Council.</p> <p>Whilst at present, the site is not allocated through the Local Plan and nor is it allocated by a Neighbourhood Plan as Streatley does not have one, the inclusion of the site within the revised settlement boundary of Streatley would present a great opportunity for a suitable and sustainable new development which would provide new residential development and directly contribute to West Berkshire's Housing Land Supply in the North Wessex Downs AONB.</p>	
Turley for Richborough Estates (lpr2389)	<p><i>Full Representation promoting allocation of land north of Silchester Road, Tadley is set out under Policy SP14.</i></p> <p>It is noted that Tadley is only referred to once in the whole of the Draft Local Plan Review 2037, which is in Appendix 3 on page 229.</p> <p>As highlighted in the commentary above (<i>in reps on other policies and in full representation</i>), it is considered that Tadley has not received sufficient recognition within the Draft Local Plan. The suggested amendments to the text of policies SP1, SP3 and SP20 would improve the representation of Tadley within the Local Plan.</p>	<p>Response noted. The comments do not directly relate to the SBR and so have been considered elsewhere under other relevant policies.</p> <p>It is not the role of the SBR to allocate sites for development.</p>
Woolf Bond for Donnington New Homes (lpr2102)	<p>Without prejudice to our strong judgment that an allocation for a housing development opportunity should be identified at our client's site at Ashmore Green Farm, Stoney Lane we would consider that in order to take in an appropriate response to existing curtilages associated with existing properties, the Ashmore Green settlement boundary should be revised so to include the curtilage of Apple Tree Cottage and Ashmore Green Farmhouse. This settlement boundary amendment is indicated using a dashed red line (<i>shown in the plan in full representation</i>). The current settlement boundary (indicated using a black line) does not provide an accurate depiction of the situation on the ground and would therefore benefit from amendment.</p>	<p>Response noted. As part of the LPR the Council has undertaken a review of the existing settlement boundaries across the District and these sites were considered as part of that process. The boundary has been drawn around the curtilage of Apple Tree Cottage but the Council does not believe Ashmore Green Farmhouse meets the criteria for inclusion. It does not form part of the main settlement area.</p> <p>Maps of individual settlements showing the finalised new settlement boundaries will be set out in a Settlement Boundary Review Background Paper which will be published as part of the evidence base for the Proposed</p>

Respondent (with lpr ref)	Response	Council Response
		Submission LPR. The settlements boundaries will also be shown on the Policies Map.
Woolf Bond for JPP Land (lpr2078)	<p>(Taken from cover letter, including map to suggest settlement boundary) Within appendix 3 of the Local Plan Review 2020-2037 document, the Council refers to a range of services and facilities which it considers potentially informs the sustainability of a location for growth. Whilst we acknowledge that proximity to facilities might be relevant, we nevertheless comment that the Council's assessment pre-judges the boundary of the settlement in making the appraisal.</p> <p>Furthermore, whilst Core Strategy policy CS1 committed the authority to review all settlement boundaries in the forthcoming Site Allocations and Delivery Local Plan, this did not include reconsideration of those for smaller villages. Therefore, in undertaking the review of settlement boundaries which would result in the inclusion of all allocations including that on land north of Bath Road, Woolhampton (consistent with the approach of the authority in the Site Allocations Local Plan), it should also reassess those boundaries for all places within the hierarchy.</p> <p>Taking account of the proposed allocation of the land north of Bath Road, Woolhampton for residential development, together with the draft approach outlined in appendix 3, we would advocate that the settlement boundary is revised as shown to include the land edged in red. This would result in the inclusion of both the land allocated north of Bath Road together with the car park associated with the Village Hall (as this is clearly related to an existing community facility as per the fourth bullet of the list of areas that the boundaries will include).</p>	<p>Response noted. As part of the LPR the Council has undertaken a review of all of the existing settlement boundaries across the District, including Woolhampton. In accordance with the criteria the boundary has been drawn around the site proposed for allocation in the LPR. The boundary has not been revised to include the car park associated with the Village Hall however, because it does not meet the criteria for inclusion. The Council has taken into consideration the wider setting and important views into and out of the settlement.</p> <p>Maps of individual settlements showing the finalised new settlement boundaries will be set out in a Settlement Boundary Review Background Paper which will be published as part of the evidence base for the Proposed Submission LPR. The settlements boundaries will also be shown on the Policies Map.</p>
Woolf Bond for JPP Land and Spitfire Bespoke Properties (lpr2320)	<p>In our earlier representation on the Scope of the emerging Local Plan Review together with the November 2018 Regulation 18 Consultation, we highlighted an existing anomaly regarding the settlement boundary for Burghfield Common through its exclusion of the established residential developments off Roman Way and Saxon Gate. Whilst these developments were detached from Burghfield Common prior to the adoption of the Council's Housing Site Allocations Local Plan, through the allocation of land at Pondhouse Farm within this document for 100 dwellings (policy HSA15), they now adjoin the settlement.</p>	<p>Response noted. As part of the LPR the Council has undertaken a review of the existing settlement boundaries across the District and these sites were considered as part of that process. Whilst acknowledging the argument put forward by the site promoter, the Council does not believe they meet the criteria for inclusion within the boundary. Both developments are detached from the main settlement area.</p>

Respondent (with lpr ref)	Response	Council Response
	<p>Once Pondhouse Farm is developed, the established residential development off Roman Way and Saxon Gate will be both visually and physically integrated with the remainder of Burghfield Common. This will occur through the implementation of the approved application by Englefield Estate for up to 100 dwellings on Pondhouse Farm (LPA ref 18/02485/OUTMAJ).</p> <p>It is therefore essential that the Roman Way and Saxon Gate residential areas are included within the overall extent of Burghfield Common. This would be appropriate as it would consequently reflect the guidance in appendix 3 of the Draft Local Plan since it would be visually part of Burghfield Common following the development at Pondhouse Farm. Furthermore, it is noted that the Roman Way development is the largest extent of existing dwellings which is not within a settlement boundary – this anomaly should therefore be addressed. This representation details how this revision could be achieved.</p> <p>Alternatively, should the Roman Way development be retained outside of a settlement, it would nevertheless be appropriate to include Brook House Farm as an extension to Burghfield village. This is appropriate as reviews of the settlement boundaries of all the district's location must be undertaken as the Housing Site Allocations Local Plan did not undertake this, contrary to the obligation in the Core Strategy (Policy CS1).</p> <p>Whilst the draft criteria for excluding areas is outlined in the document, due to the need to identify sites for housing, the potential implications of these for inadvertently ruling out suitable sites should be critically examined. For example, whilst the last criterion listed for excluding a site relates to important gaps between developed areas, the need to retain such areas must be balanced against the wider benefits for sustainable development which may arise due to proximity of such places to facilities together with the clear need detailed above to identify further sites, together with at least 10% being delivered on sites of less than 1ha. The artificial rejection of sites logically forming part of a settlement will therefore hinder the ability of the authority to prepare a sound plan and accommodate the necessary growth to support each of the district's communities as envisaged in the revised NPPF.</p>	<p>Maps of individual settlements showing the finalised new settlement boundaries will be set out in a Settlement Boundary Review Background Paper which will be published as part of the evidence base for the Proposed Submission LPR. The settlements boundaries will also be shown on the Policies Map.</p>

<b>Statutory consultees</b>		
Shaw-cum-Donnington Parish Council (lpr270)	We note with disappointment that this appendix has not been provided.	<p>Comments noted.</p> <p>Policy SP23 will be amended to delete the reference to 'critical' infrastructure as follows -            'The <u>key strategic and local</u> infrastructure schemes required to facilitate new development and secure the delivery of development within this plan <del>include, but are not limited to, those schemes set out within the Infrastructure Delivery Plan.</del> <u>will be linked to the phasing of new development. Phasing and specific infrastructure requirements are set out within the Infrastructure Delivery Plan (IDP). A schedule of the infrastructure which has been assessed as critical to the delivery of the Local Plan Review will be included within an appendix.'</u></p> <p>The appendix will therefore not be include in the Proposed Submission LPR.</p>
<b>General consultation bodies</b>		

Respondent (with lpr ref)	Response	Council Response
Canal & River Trust (lpr933)	Please ensure that the Canal & River Trust are given the opportunity to comment on an updated IDP.	Comments noted. Please see response to lp933
<b>Other stakeholders</b>		
Councillor Alan Marco (lpr770)	<p>This is a major omission!</p> <p>Many residents' concerns about new developments centre on the anticipated effect on infrastructure and services, such as highways and medical services. The omission of an infrastructure delivery plan means they cannot determine whether planned infrastructure will be adequate</p> <p>Changes: Critical infrastructure should include a new bypass connecting the A4 east of Thatcham with the A339 and A34 south of Newbury. This would relieve the A4 and A339 of traffic, and resulting pollution, both existing and from the proposed strategic housing site north east of Thatcham. It would also remove heavy goods vehicles from the A4 and A34 and the resulting noise, vibration and air pollution. It would also relieve pressure on the Station Road level crossing in Thatcham</p> <p>The infrastructure delivery plan should be developed and incorporated in the local plan which should then be consulted upon.</p>	Comments noted. Please see response to lp933
Councillor Tony Vickers (lpr674)	<p>We are very disappointed not to see more information about specific kinds of infrastructure and an indication of the main projects within the Plan at this stage.</p> <p>For example it should be clear that a development as large as Thatcham NE will need to come with major road infrastructure such as a new bridge over the main railway line east of the town and a road link to A339 and on to A34 bypass.</p> <p>Changes: Anything more than a blank!</p>	Comments noted. Please see response to lp933.
Alastair Jarman (lpr360)	You cannot comment on a policy element that has not been made available for comment. I am concerned as to what critical infrastructure will be in this delivery plan.	Comments noted. Please see response to lp933.

Respondent (with lpr ref)	Response	Council Response
	The IDP should be made available at the start of the process. It is not possible to comment on other elements of the Local Plan fully if you do not know what is in the critical infrastructure plan.	
Alastair Jarman (lpr631)	<p>There is no IDP here to support or object to at present, but I would make one observation.</p> <p>The Highways response of January 2021 indicates how difficult it has been to balance infrastructure to housing sites and housing numbers. These two paragraphs in particular seem to illustrate the dilemma and impact that is placed on highways in trying to deliver road infrastructure in Newbury.</p> <p><a href="http://planning.westberks.gov.uk/rpp/showimage.asp?j=18/00828/OUTMAJ&amp;index=1925146">http://planning.westberks.gov.uk/rpp/showimage.asp?j=18/00828/OUTMAJ&amp;index=1925146</a></p> <p>31. During the PM peak as what would be expected there is an increase in traffic congestion southbound on the A339 particularly the A339 / Fleming Road junction. Further impacts are found at the A339 / B3421 Kings Road / Bear Lane junction and at the Hambridge Road / Hambridge Lane Roundabout. <b>I am also concerned regarding the extensive traffic queue northbound on the A339 adjacent the Newtown Road Household Waste Recycling Centre.</b></p> <p>32. <b>I consider that the proposed junction is so extensive that it will be possible to hold traffic back for an appropriate time from overwhelming the more congested junctions to the north. The above mentioned proposed access onto the A339 to the north of the HWRC could also be used in this regard.</b></p> <p>I am concerned that highways are being required to find solutions to multiple sites, with insufficient influence over the housing numbers and by association traffic generation at each site at an early enough stage in the process. It appears to me that highways have in the past been expected to come up with solutions that are approaching insoluble.</p>	Comments noted. Please see response to lp933.

Shaw cum Donnington Parish Council (lpr271)	We note with disappointment that this appendice have not been provided.	Comments noted.  A list of existing Designated Employment Areas (DEAs) was provided as part of the Emerging Draft Regulation 18 Local Plan Review (LPR) (Appendix 6).
<b>Other stakeholders</b>		
Councillor Alan Macro (lpr771)	Appendix is not supported.  "Station Road and adjacent estates" is ambiguous.  "Station Road and adjacent estates" should be reworded: "Estates off Brunel Road and Station Road, Theale".	Comments noted.  Clarity with regard to the name of the DEA in question will be provided.  Emerging Draft LPR Appendix 6 to be updated to include new DEAs as listed in Policy SP21.
Councillor Tony Vickers (lpr675)	Appendix is supported.  This is a useful statement of fact. However we have a better suggestion for the name of "Station Road and adjacent estates", because there are several Station Roads in the District.  "Station Road and adjacent estates" should be reworded: "Estates off Brunel Road and Station Road, Theale"	Comments noted.  Clarity with regard to the name of the DEA in question will be provided.  Emerging Draft LPR Appendix 6 to be updated to include new DEAs as listed in Policy SP21.

<b>Respondent</b> <i>(with lpr ref)</i>	<b>Response</b>	<b>Council Response</b>
Savills on behalf of Lambourn Business Park (lpr2107)	<p>Appendix is not supported.</p> <p>The estate was formerly known as Lowesdon Works but has since been rebranded. Accordingly the site is identified as a Designated Employment Area (Appendix 6) as Lowesdon Works and we would request that the Local Plan is updated to identify the site as Lambourn Business Park.</p>	<p>Comments noted.</p> <p>Clarity with regard to the name of the DEA in question will be provided.</p> <p>Emerging Draft LPR Appendix 6 to be updated to include new DEAs as listed in Policy SP21.</p>

Number of responses received: 4

Respondent	Response	Council Response
<b>Statutory consultees</b>		
Shaw-cum-Donnington Parish Council (lpr274)	We note the schedule.	Response noted.
<b>General consultation bodies</b>		
Canal & River Trust (lpr939)	<p>We are aware that the Council understands the benefits that the Kennet &amp; Avon canal brings to the area and we acknowledge your support and recognition of these benefits in policy documents. However, we ask that the council consider whether the multi-functional nature of the canal would be better served by a specific waterways related policy dealing more broadly with issues relating to moorings, liveaboards, good waterside design and recreation. The Canal &amp; River Trust would be happy to work with the Council on such a policy.</p> <p>Whilst the Kennet &amp; Avon Conservation Management plan still exists as a guidance document, the Trust has produced an e-planning toolkit which provides advice on the Waterway proofing of planning policies at local plan level. The Trust is also producing a new document titled 'Good Waterside Places' and this will be made available as soon as possible.</p> <p>The local plan should aim to help unlock the economic, environmental and social benefits offered by the waterways and to secure the long-term sustainability and use of waterways as assets for the communities through which they pass. In formulating a specific policy, there are several important waterway factors to be considered.</p> <ul style="list-style-type: none"> <li>• Canals and rivers have different characteristics and principal functions.</li> </ul>	<p>Comments noted.</p> <p>The issues raised are covered by a number of policies in the LPR and so the Council does not consider that a specific policy is needed.</p>

Respondent	Response	Council Response
	<ul style="list-style-type: none"> <li>• Waterways are multi-functional by nature.</li> <li>• Waterways are public assets accessible to local communities free of charge and usage is set to increase as local communities have discovered the value of local spaces during the pandemic. Some areas have noted 400% increases in usage.</li> <li>• waterways, towpaths and water spaces are a part of a wider network that crosses administrative boundaries and cannot be viewed in isolation. A common approach should be considered. Wiltshire council are also reviewing the own local plan. Should a joint policy be considered?</li> <li>• There are particular land use implications and locational requirements arising from the inherent constraint of inland waterways being ‘non-footloose’ assets.</li> <li>• Development and regeneration can impose burdens and liabilities upon the waterway infrastructure, facilities and environs.</li> <li>• There is a need to provide essential boat services and facilities to support the use of waterways for navigational purposes.</li> <li>• Waterways and towing paths are spaces in their own right, and not just settings or backdrops to development or edges to policy designations.</li> <li>• The proposals map should indicate waterways and their corridors and not just flood zones</li> <li>• The use of waterborne freight should be considered</li> <li>• Do the design and placemaking policies adequately cover the needs for good waterside design, such as encouraging new developments to: integrate land and water; open up access to, from and along the waterway; explore the added value and use of water space; and view the waterway, towpath and environs as part of the public realm.</li> <li>• Does the plan recognise that living afloat contributes towards increasing choice in housing types and lifestyle, and contributes to the life, vitality and natural surveillance of the waterway. Housing authorities must “consider the needs of people residing in or resorting to their district with respect to the provision of places on inland waterways where houseboats can be moored”.</li> </ul> <p>The Trust would welcome a meeting with the council before the next stage of the plan to ensure that all these matters are considered and to discuss whether a specific policy is justified.</p>	
<b>Other stakeholders</b>		

Respondent	Response	Council Response
Councillor Alan Macro (lpr772)	RL5 Kennet and Avon Canal superseded by SP18 Housing type and mix? Correct the table	Comment noted. Policy RL5 dealt with the provision of houseboat moorings which is now covered by policy SP18.
Councillor Tony Vickers (lpr677)	This is a very useful list but we have found one error. RL5 Kennet and Avon Canal superseded by SP18 Housing type and mix? Correct this mistake.	Comment noted. Policy RL5 dealt with the provision of houseboat moorings which is now covered by policy SP18.
