<p>Please give reasons for your answer</p>	<p>As a resident of Upper Bucklebury I would like to OBJECT to the SP17 proposal as contained in the WBC LPR. I would like to refer back to the Regulation 18 consultation, as very little appears to have changed in the WBC mindset from that time. I would like to see a change in this time. The plan is unsound because:</p> <p>Traffic. There will be a significant, and potentially dangerous, increase in the traffic on the rural roads through Bucklebury from the site onto Harts Hill, and traffic modelling carried out for Bucklebury Parish Council (BPC) shows that significant traffic will be displaced from major roads onto wholly unsuitable rural roads. WBC assesses that there will be some displacement of traffic but this will have a positive impact on road safety. Given the nature of these roads it is hard to reconcile a vastly increased traffic flow with a positive safety impact. Traffic flows over areas such as the Thatcham level crossing, through the village, and A34 will just cause gridlock in all areas. The proposal offers no plan as to how this traffic will be mitigated, nor how it will be managed. The plan falls dramatically short in this area.</p> <p>Healthcare. There is no detail into strategic healthcare planning included in the proposal. Given the development's proximity to the town, it should include a Health Impact Assessment (HIA), but this does not appear to have been completed. There is little chance of a new practice being commissioned, so the households within the site will have to be merged into already overstretched local practices. The plan as to how this integration would be successfully achieved. A similar overstretch exists within dental practices in the area, but the plan fails to address any form of primary healthcare provision requirement, and is woefully inadequate in this area.</p> <p>Environment. The proposed site will cause permanent damage to the Bucklebury Plateau Biodiversity Opportunity Area, and development in the setting of the North Wessex AONB, and cause detrimental impacts to legally protected wildlife. The plan fails to mitigate these far reaching and irreversible effects, and the LPR's own sustainability appraisal accepts that SP17 will be detrimental to environmental sustainability. It is shameful that WBC entertain a proposal with no concrete mitigations for the development, and does nothing to meet legal requirements to improve biodiversity aspects.</p> <p>The management vision for Bucklebury Common necessitates the minimising of extra human pressures upon it. By the nature of the site, it will necessarily cause an overspill of people to reek havoc with the fragile ecosystems of the Common. The site would be a significant loss of the AONB, and there appears to be no strategy to meet the requirement to achieve the required biodiversity net gain. The plan fails to protect the environment generally, and in legally required areas to improve biodiversity. There is no evidence of a plan to analyse and address the consequences of this proposal. It is completely unsound in this area.</p> <p>Education. There is no end to end plan for education within the plan. The plan does not provide evidence of the education plan, school location, the number of Form Entries at any school, timing of funding, and whether any funding is sufficient to provide education.</p> <p>It appears that less than a 6FE school is unsustainable, so it not clear as to what the education plan is. The current provision is not for enough houses to justify a new secondary school, so pupils would have to be crammed into already overstretched facilities to add to Thatcham's education problems rather than provide any form of answer. It is sadly laughable that the plan fails to consider demographic predictions for education demand, or predictions of the long term capacities of local schools. Obviously, the associated facilities (such as sports fields) would also not be available to the community, leading to another failure of the SP17. WBC has a duty to make arrangements for suitable school provision. The proposal fails to provide evidence of a plan to meet. As such, the plan is unsound in another major area.</p> <p>Removal of the Strategic Gap. Until this proposal was tabled, the land north of Floral Way has provided the gap between Bucklebury and Thatcham, and breach of the strategic gap has been cited by WBC to refuse planning applications in the recent past. WBC plan to grant planning permission will not be granted where a proposal harms or undermines the existing relationship of a settlement within the AONB, and does not enhance the character and distinctiveness of the rural area, including the special qualities and natural beauty of the area.</p> <p>The strategic gap between Bucklebury and Thatcham is an important one. Bucklebury is a rural parish within the AONB, with Floral Way the boundary between them. WBC policies require the maintenance of these as separate entities to maintain this feeling of separateness. The mitigations included in the proposal are ultimately meaningless and ineffective in maintaining the rural settlements. As Upper Bucklebury is lost into Thatcham, so too is the edge of the AONB. The proposal is unsound because it fails to protect the rural environment and specifically fails to protect the setting of the AONB.</p> <p>Site selection. All through this 'process' there has appeared to be different criteria applied to different sites. The process has been flawed and is marked by U-turns, confused thinking, and making a developer-led 'solution' fit. The Site Selection Background Report for the Core Strategy was clear that Thatcham was to receive a lower allocation than other Urban Areas given the rapid expansion of the town over recent years. This was to allow a period of consolidation, ensuring the infrastructure and town centre facilities could meet the demands of the existing population." Was this assessment completely wrong, because suddenly there is a requirement for a new site in Thatcham?</p> <p>WBC were obviously left blindsided by the failure of the Grazeley proposal, but it appears that rather than thoroughly evaluate the developer-led proposal at Thatcham North East was seen as the answer to all the problems. Never mind the damage to the AONB, its lack of suitability on almost all fronts, and the WBC strategies that would have to be ignored for it to be taken forward, the plan to see this site as the answer to their problems.</p> <p>The entire site selection process appears flawed throughout. Suitable sites have been ignored or discounted, whereas sites that have been ignored when Thatcham North East has been considered. There are numerous examples within the SSBP where sites have been "not considered for allocation" because of traffic, AONB, environmental, and flooding reasons. As each of these points relate to small scale issues, it is unreasonable to assume that give the proposed size of the development within SP17, the size of the response and the number of sites to be proportionately larger. Instead the report on the Thatcham North East site simply states that there are very few sites that would be suitable for the site would have.</p>

	<p>Thatcham North East would have disproportionately larger adverse effects than the sites discounted during the selection process. These sites have just been glossed over. One only has to consider proposed site THA9, where there were concerns that development in the countryside between Thatcham and Newbury / Greenham, and introduce built form to south of Lower Way, as the site for development would not be appropriate in the context of the existing settlement form and character of the landscape. The objections were not written relating to Thatcham North East, in the context of Thatcham/ Upper Bucklebury, built form to the north of the buffer to development, and development being inappropriate to settlement form and landscape character. These concerns are noteworthy for a 36 house development, but were not mentioned for a multi-thousand house one.</p> <p>This confused thinking is prevalent throughout the plan process. In 2015, WBC were, rightly, relentless in their argument that the Siege Cross would have an adverse effect on the local area. It is somewhat strange that, as Thatcham was to be left alone, the Siege Cross would be badly affected by 500 houses, but a multiple in the same vicinity would now be beneficial.</p> <p>To the layman, the site selection process appears woefully inadequate in its execution. The criteria used appear not to be relevant. The only reasonable conclusion is that WBC has chosen an answer to its perceived housing problems, as put forward in the plan, and that any sensible evaluation process appears to have been ignored. The plan again is unsound in its strategic objectives.</p> <p>For me as an individual, execution of the SP17 proposal would have devastating effects on the Bucklebury area. The plan would create a gridlock on the major routes, and local roads would then be unable to accommodate the overspill from those major roads. This will reduce the impact of traffic through the local villages.</p> <p>The Common itself and its delicate ecosystems will just become overrun. Its species and biodiversity will never cope with the loss of the separate village community of Upper Bucklebury. As the strategic gap is removed, so the rural AONB village will be subsumed into the urban environment of Thatcham. The village might have some limited separation but it will become part of Thatcham.</p> <p>All these elements should be protected within the frameworks that WBC works to, but to its shame they appear converted into housing. This is unsound, and should be confined to history.</p> <p>On 6th December 2022, the Secretary of State for Housing and Communities detailed that the housing number should be a target point and not be mandatory, and that Planning Inspectors should no longer override sensible local decision making in the face of local constraints and concerns.</p> <p>The NPPF consultation which ran until yesterday also focused on the need to take into account the character when planning to accommodate housing. Many sensible local authorities paused their plan making process accordingly. It would make no sense as this proposal might be trying to fit, and appearing to do so badly, a need that is no longer present.</p> <p>In summary, I would like to lodge my objections to the SP17 proposal. The NPPF requires that “great weight must be given to the landscape and scenic beauty in Areas of Outstanding Natural Beauty” and “local wildlife-rich habitats should be protected from irretrievable damage to the local area, its wildlife, and the AONB. Roads would become gridlocked, and education and health services and inadequate at the very best. I urge WBC to reconsider this unsafe plan. It is unsound in too many areas with too many objections.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	N/A
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the	

<p>delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>Landscape Capacity Assessment</p> <p>[Representation part of a wider rep for SP17]</p> <p>[See attached documents Attachment 1 and 2]</p> <p>The evidence base for this Regulation 19 consultation includes a total of 33 Landscape Capacity Assessments prepared. Of these reports were prepared by Liz Allen EPLA on behalf of West Berkshire Council. The exception is the 'Landscape Capacity Assessment for Land North East of Thatcham', which was undertaken on behalf of David Lock Associates by Lloyd Jones.</p> <p>The report states that David Lock Associates are "planning consultants appointed to West Berkshire Council". This is the Thatcham Strategic Growth Study for the Council. However, it DOES NOT say that West Berkshire Council commissioned a Landscape Capacity Assessment. This is confirmed by the response to a Freedom of Information request that I made to the Council on 11/01/2017 in relation to these representations. The reasoning why West Berkshire Council did not commission or fund the Landscape Capacity Assessment is that the information provided in the response indicates that the Council was only involved in the final review of the draft report.</p> <p>Paragraph 2.12 of the report includes a curious statement:</p> <p>"The project brief requires the visual sensitivity of the study site to be considered as a single tract of landscape, and not broken down into individual parcels of land." It is difficult to understand why this should be an explicit requirement of the study.</p> <p>David Lock Associates has a potential conflict of interest in relation to this study; it had already pre-determined its view on the site through undertaking the Thatcham Strategic Growth Study for 2,500 dwellings, which was funded by the proponents of the Landscape Capacity Assessment not to be broken down into individual parcels of land masks the proportion of the site that is suitable for its capacity.</p> <p>Paragraph 1.12 of the report in the section 'Determination of Landscape Capacity within the Site' states:</p> <p>"Because the project brief requires the sensitivity of the study site to be assessed as a single tract of landscape, rather than sub-components, no attempt has been made to plot variability of landscape capacity within the study site boundary, although this is present and is a constraint that should inform design. It will be down to individual applicants to assess the capacity of their site in relation to individual planning proposals, should the land be brought forward for development."</p> <p>The statement in the second sentence is true for West Berkshire Council as well as applicants.</p> <p>The conclusion of the report, given in paragraph 1.7, is:</p> <p>"Having followed the template methodology, and made judgements concerning landscape and visual sensitivity, and the value of the landscape value, this exercise has concluded that overall the study site THA20 has a Medium Capacity. This is defined as follows: 'The landscape could accommodate areas of new development in some parts, providing it has regard to the setting and the character and sensitivity of adjacent landscape character areas. There are landscape and visual constraints and visual characteristics must be retained and enhanced.'"</p> <p>This is obviously inadequate to assess whether the site does indeed have a capacity of 1,500 dwellings, or how they would be distributed. West Berkshire Council has commissioned studies of landscape capacity for a substantial part of this site in relation to the application for Siege Cross. The summary of Statement of Case of West Berkshire Council's expert witness on landscape capacity and constraints of development of this site, and is provided as Attachment 2 to my representations.</p> <p>This document is available online at:</p> <p>http://planning.westberks.gov.uk/rpp/showimage.asp?j=15/00296/OUTMAJ&index=1175645</p> <p>REASONING ON FREEDOM OF INFORMATION REQUEST</p> <p>The freedom of information request explicitly requested "Information relating to the procurement of this study, including the tender response and the value of the contract; or if the study was not procured by competitive tender, the equivalent documentation".</p> <p>Clause 1 of the Freedom of Information Act 2000 states:</p> <p>"General right of access to information held by public authorities.</p> <p>(1) Any person making a request for information to a public authority is entitled—</p> <p>(a) to be informed in writing by the public authority whether it holds information of the description specified in the request;</p> <p>(b) if that is the case, to have that information communicated to him."</p> <p>This right of access is subject to a number of exemptions but, if these are invoked, the person making the request must be informed in writing in the response does not refer to any exemption, so this must in law be interpreted that none of these exemptions apply (and that any of them would apply to the information requested apart from a few redactions).</p> <p>The response to the freedom of information request does not explicitly state if the Council holds the information. However, the Council has a duty to provide the requested information unless one of the exemptions apply. Therefore, the facts that the information requested was not provided and exemptions were invoked must be interpreted in law as meaning that the documents do not exist.</p> <p>If "Information relating to the procurement of this study, including the specification, the successful tender response and the equivalent documentation" does not exist, then the Council cannot be said to have played any part in its definition.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>N/A</p>
<p>4. Proposed Changes</p>	<p>West Berkshire Council needs to commission a Landscape Sensitivity and Capacity Assessment that provides enough information on landscape capacity across the site and its sub-components to inform a Landscape and Visual Impact Assessment (LVIA) of the total capacity.</p> <p>The wording of Policy SP17 needs to be amended as follows:</p>

	<p>The LVIA will be informed by a Landscape Sensitivity and Capacity Assessment <u>that considers variability of landscape</u> Landscape Sensitivity Assessment (2021) of the site. <i>(added text is underlined; deleted text is struck through)</i></p> <p>Until there has been a quantitative Landscape Capacity Assessment for the site, Policy SP17 should not specify a n</p>

* Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	There are several inconsistencies between Policy SP17 and the map on page 65 of the draft Local Plan, and unexplained: 1) Policy SP17 states that the Green Infrastructure will include “A new community park linking Thattham to the North East” but the map shows three small and disconnected areas described as “Country Park / Public Open Space”. These are close to the AONB contour, rather than their relationship to the AONB. 2) The purpose of the car park on Harts Hill Road is unclear, and conflicts with the policies in the draft Local Plan to not have a car park on a blind bend on Harts Hill Road. 3) The “Green linkages between Country Park / Public Open Space” are not mentioned in Policy SP17, and their purpose is unclear. They are for wildlife or pedestrians. If they are for wildlife, then the wildlife pass through Long Grove Copse (between Siege Hill and the AONB) rather than all the way round its periphery. 4) The three areas of “Country Park / Public Open Space” and the “Green linkages between Country Park / Public Open Space” are not mentioned in the description of ‘Green and Blue Infrastructure’ that are described in paragraphs 4.8 – 4.14 of the Thattham Strategic Site Allocation. Policy SP17 states “provides guiding principles for the delivery of the site”.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	N/A
4. Proposed Changes	The areas of Country Park / Public Open Space and Green Linkages need to be removed from the map on page 65 of the draft Local Plan on the completion of the ‘studies and work’ called for in Paragraph 6.58. The ‘North East Thattham Proposal’ layers need to be removed from the Policies Map for the time being.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	Thattham Town Council is the principal representative body of the community of Thattham, which is the location of the site allocated for development in the draft Local Plan. The suitability of this site for development is reliant on having adequate infrastructure. However, the infrastructure promised in the current Local Plan has not materialised, and would not be delivered through the policies in the draft Local Plan. The Town Council provides local insight to the examination about Thattham, and particularly on the substantial deficit of infrastructure in the area. The Town Council would like to elaborate on its other concerns about the current proposals for the North East Thattham Strategic Site Allocation, as set out in the representation. The Town Council anticipates that changes necessary to the draft Local Plan in relation to site allocations are greater than ‘minor modifications’. If, however, the Inspector is minded to consider recommending ‘main modifications’ to policy SP17, it would welcome the opportunity to provide its perspective on what modifications would be required.

<p>Please give reasons for your answer</p>	<p>I wish to make the following observations on the Reg19 consultation.</p> <p>I have represented Bucklebury on WBC since 1987 and broadly support the Local Plan, it is essential that we remain to comment specifically on SP17 and it's impact on all rural villages to the north of the proposed site especially Bucklebury.</p> <p>1. Traffic. When developments in North Thatcham took place in the 1990s there was a considerable increase in "rat" rural road network. Unless planned and managed carefully SP17 will add considerable volumes of such traffic, a lot of road improvements to the A4 but it is essential that there should be no direct access to Harts Hill Road which would impact on Bucklebury even more. There should be no carparks on Harts Hill Road as this is totally unnecessary!</p> <p>2. Bucklebury Common is common land open to all, we welcome careful visitors, but it is a fragile ecosystem careful not to be used for new development and should not be used as such. Access to the AONB must not be enhanced or directly encouraged. Any development should be contained on site.</p> <p>3. For many years we had a "strategic gap" between Thatcham and Upper Bucklebury, a policy that no longer exists. The "gap" identified in the Plan as suggested elsewhere between settlements.</p> <p>4. A proposal for development at Siege Cross was submitted in 2016 for around 850 houses just after the current Local Plan was adopted but a Planning Inspector was minded to approve the proposal. The Secretary of State refused the application on the basis that the number of houses to be built on a small part of SP17 but I firmly believe the "Colthrop" site should be reconsidered, to include a bridge over the railway line and canal/River.</p> <p>In any case since the proposed number of homes on SP17 has been reduced from 2,500 to 1,500 there should be a clearly defined proposed site.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>I firmly believe the "Colthrop" site should be reconsidered, this would provide a much needed bridge over the railway line.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>I would wish to be invited to the public enquiry to expand on the points I have raised and to answer any questions.</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the</p>	

Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No

<p>Please give reasons for your answer</p>	<p>As a resident, in the neighbouring Chapel Row village for 12 years, I am writing to lodge my strong objection to this development. This would have a significant and an irreversible negative impact on the existing communities, infrastructure and wildlife. The planned infrastructure to support such a large development is not sufficient, and will put pressure on the police, roads and transport services, not to mention the water and waste services. I don't believe there has been sufficient consideration warrant the approval of such a development and the plan does not address, to an acceptable level, the additional demands. Adding new schools does not address all the other infrastructure needs. I have not seen plans for a new train station nor how this additional load will be managed on an already high risk water and waste network. We have seen recent developments in Thatcham for doctor surgeries, with a move to transfer patients to the Chapel Row surgery making it impossible now. Building such a development of this size near an AONB and many other surrounding areas that are at risk of flooding will have a detrimental impact to the AONB and there is a flagrant disregard on conserving and enhancing the natural beauty of the area providing easy access to roads going through Chapel Row village. This road is not designed to take this level of pressure with no footpaths. Currently Chapel Row caters for cyclist and horse riders; a quiet and idyllic village that you are destroying. You might meet your goal of introducing houses to hit your target of 9,775 homes for 2037 but in doing so you will be out of control for years to come.</p> <p>In recent years local objections to developments in the area have evidently been ignored, such as building on the Thatcham too late to carry out more in-depth impact analysis and course correct, I implore you to do so.</p>

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.	

* Yes
* No

Please give reasons for your answer

I write with regard to the Local Plan Review, in particular the proposal to build 1500-2500 houses on land in NE Thatcham Bucklebury, I am horrified and strongly object on the basis that the development would have an overwhelmingly negative impact on the residents and wildlife of the area and that many components of the plan are unsound. I note that my previous Consultation Statement document of December 2022 and would ask that the comments below are taken into account.

Objection 1 – Environment

I note that in its responses to objections regarding the impact on the environment, the council frequently states that the development would be within an AONB. However a development of such a scale on the proposed site would have a devastating impact on the Bucklebury Plateau Biodiversity Opportunity Area and the surrounding ancient heaths, woodlands and Common. The area is home to a number of **legally protected species** which would surely mean that any action causing a detrimental impact cannot understand how such a huge development would be anything other than large-scale, wilful, illegal damage to the past alluded to mitigation measures but this is unsubstantiated 'greenwashing'. There is no way of mitigating damage.

As part of this proposed 'mitigation', WBC has previously alluded to the creation of two 'country parks' which have morphed into 'community parks'. Such parks would need to be properly planned, funded and managed in order to attempt to significantly improve existing levels - which would seem to be an impossible task. The absence of any detail is indicative of a total lack of understanding of the local environment. (One is left to speculate that perhaps such parks may just be areas of tarmac, with perhaps a few trees and swings?) No man-made park could in any way 'compensate' for the loss of habitat for local species – there is no compensation they go any way at all to replacing an area which is enjoyed by local people and contributes considerably to their well-being. I include myself in this. I have walked the area with my children and dogs for the past <redacted> years and have always found it a place of relaxation, a place to remember that I am part of nature, not disconnected from it. (Those in favour of this proposal will find it nothing less than devastating that this area might be destroyed – seemingly because some people want to make the cost to the natural world.

WBC has stated in the LPR that a Sustainability Charter must be produced, outlining how policy requirements will be met, including biodiversity net gains and an overall positive impact on environmental sustainability. The supporting documents which have not been made publicly available for the consultation. I would like to know if they exist and if so, why they have not been made available.

The LPR also states that it intends SP17 to drive more people (presumably including the 4000+ residents of the development) to work in the area again shows a staggering lack of understanding on the part of WBC. The management vision for Bucklebury Common adds additional pressure on ecosystems which need to be restored, nurtured and protected.

A great deal of money seems to have been spent by WBC preparing housing plans and attempting to justify such a development without any evidence of a serious effort to understand the consequences for the local environment.

Objection 2 – Transport

The significant increase in cars on roads in the area which the development would cause is extremely worrying. WBC states that traffic from the development would link to Floral Way and the A4 but I understand that the Phase 2 Transport Assessment shows an exit at the north of the site onto Harts Hill, together with a car park - the purpose of which is unclear. Traffic from this area would travel through Ash and through the village towards Chapel Row, significantly increasing the number of cars in the village. This would change the character of the village but would also make Harts Hill (which is already a tricky road to navigate due to the number of narrow lanes, especially for those on foot or bike. The Sustainability Appraisal/SEA which accompanies the Local Plan Consultation and the Sustainability Objectives, of which No.4 is 'To promote and maximise opportunities for all forms of safe and sustainable transport'. Modelling data for this junction, how can WBC have concluded as it has that the LPC will have a positive impact on road traffic? Travel time will be critical to the design of the site' but where is its supporting evidence for this? Similarly WBC has assessed a 'Positive Impact' on 'opportunities for walking, cycling and the use of public transport' but again no evidence has been provided. Common sense would suggest the contrary.

Moreover, the lack of a detailed plan for the provision of education and the siting of new schools makes it impossible to plan for the future in the area – see below.

Objection 3 – Education

WBC has an obligation to provide education for children in the county but there is no clearly defined plan in the LPR. For SP17 states that 'the site will provide Early Years provision' and gives no detail at all. For primary education provision of £12million be contributed by the developers but the number of schools and Form Entry requirements are unspecified. (Clearly such provision needs to be in place before houses are built) and no sites are specified. Furthermore as the data used for this is from 2011, how does WBC know that this provision will be enough? Surely WBC has an obligation to use current data produced over a decade ago? The NE Thatcham Development Plan even states that 'this study has not engaged in a detailed prediction and modelling exercise to determine future primary and early years educational demand across the town, and the long-term capacities of existing schools'. Why not?

The LPR is similarly incomplete with regards to secondary provision in Thatcham and the surrounding area. It proposes £15million towards the provision of secondary education but again no locations and nor timescales are specified. And

that secondary schools with less than a 6 Form Entry are untenable and the data used is out of date, how does WBC would be viable or that the proposed level of funding would be sufficient?

It is my belief that the LPR is scant and unsound in respect of educational provision within Thatcham and the surround

Objection 4 – Recreational Facilities / Sports Fields

The LPR mentions the provision of sports fields but no sites or funding appears to have been allocated for these. Su ground and the only flat area of the site is adjacent to the A4 and would be liable to high levels of traffic fumes.

It should also be noted that the only leisure facility currently available to the public in Thatcham is at Kennet School a both the school and the public.

Objection 5 – Healthcare

I note that SP17 proposes a primary healthcare centre which it suggests would be offered to a suitable public health centres are commissioned by the NHS, even where there is need, and information in the public domain shows that t in other areas than there are in West Berkshire. It would seem therefore that there is no likelihood whatsoever of a n built. Nor would it make any sense for an existing local practice to set up a branch on the proposed site because of t the impracticalities of working across two sites. All three existing practices which cover the site are already overstret each GP looks after just under 2000 patients and this workload has been further impacted by the recent closures of a n

Similarly dental practices in the area are already stretched with many residents travelling outside of the area for eith

There is no evidence in the plan that WBC has communicated with healthcare agencies or providers nor has it produ for the North-East Thatcham development. I am extremely concerned about the potential for a severe lack of healthc new residents of the area should the development go ahead, which would without doubt put lives at risk. I find WBC's u attitude towards this aspect of the plan particularly shocking and deeply worrying.

Objection 6 – Updated Planning Guidance

On 6th December the Secretary of State for Levelling Up, Housing and Communities released a statement detailing longer be mandatory but serve as a starting point and that the Planning Inspectorate should no longer overrule local making should itself reflect local concerns and constraints.

Several Local Authorities have subsequently paused their planning and I do not understand why WBC has not taken the NPPF which runs until 2nd March this year not only states that the housing requirement figure will now be advisory I **area must be considered in any assessment**. The development area proposed by SP17 is rural and loved as such development on it – particularly of the extraordinary size proposed – would forever change this.

In conclusion

-
I understand that there is a great need for more affordable housing, especially for young people and young families. F for a case study in how not to plan a housing development, this could be it. It seems to be a ill-conceived, lazy and g target which is no longer even valid, by dumping a huge number of houses on the edge of an existing town without g sustainable infrastructure so people can live well there with minimum impact on the local environment or planet. I thi frankly I think WBC should be embarrassed to have produced it.

On a personal level I'm dismayed and horrified by the potential loss of countryside which is dear to myself and my fa fauna in the area, the potential for multiple forms of pollution (air, light, soil etc) and flooding, and by the prospect of so close to our family home.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	<p>Regulation 12 of The Environmental Assessment of Plans and Programmes Regulations 2004 states:</p> <p>“(1) Where an environmental assessment is required by any provision of Part 2 of these Regulations, the responsible person shall prepare, and submit to the competent authority, an environmental report in accordance with paragraphs (2) and (3) of this regulation.</p> <p>(2) The report shall identify, describe and evaluate the likely significant effects on the environment of—</p> <p>(a) implementing the plan or programme; and</p> <p>(b) reasonable alternatives taking into account the objectives and the geographical scope of the plan or programme.</p> <p>The SA/SEA Environmental Report describes how only a single alternative was considered in the Interim SA/SEA for Regulation 19 Consultation, two alternatives are considered, for 1,500 homes and 2,500 homes. No explanation is given as to why alternatives with fewer than 1,500 homes were not considered.</p> <p>One ‘reasonable alternative’ that should have been considered is to divide the required number of homes between two sites. The SA/SEA states that “A large strategic site can deliver a number of positive benefits”. This is undoubtedly true, but it is not true, as evidenced by the analysis in Section 2 - Soundness below:</p> <ul style="list-style-type: none"> • The NE Thatcham site would have two primary schools, so two smaller sites could have one school each. • The provision of a GP surgery is not related to the number of houses; it would be provided by the proposal for 2,500 houses. • The site is stated to have “local centres providing local retail facilities and small-scale employment for communities”. If these centres, then they could be distributed between several smaller sites. • A site of either 1,500 or 2,500 homes is not sufficient by itself to support the provision of secondary education.

	<p>The SA/SEA for Policy SP13 states:</p> <p>“Due to the proposed strategic allocation in Thatcham, it is not considered appropriate to allocate any further sites in Thatcham as all suitable sites have been assessed.”</p> <p>The Sustainability Appraisal / Strategic Environmental Assessment (SA/SEA) for Policies SP1 and SP13 are therefore not considered appropriate as they have not considered all of the ‘reasonable alternatives’ to a single development of 1,500 homes.</p>
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	As the sustainability appraisal is not legally compliant, the Local Plan cannot be in accordance with Paragraph 32 of the NPPF.
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	N/A
<p>4. Proposed Changes</p>	A review of Table 30 should be part of a wider review of the Sustainability Appraisal / Strategic Environmental Assessment for North East Thatcham.
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	Yes
<p>5. Independent Examination</p>	Thatcham Town Council is the principal representative body of the community of Thatcham, which is the location of the site in the draft Local Plan. The suitability of this site for development is reliant on having adequate infrastructure. However, the site is not considered suitable for development as it is not in the draft Local Plan.

	<p>promised in the current Local Plan has not materialised, and would not be delivered through the policies in the draft provide local insight to the examination about Thatcham, and particularly on the substantial deficit of infrastructure in to elaborate on its other concerns about the current proposals for the North East Thatcham Strategic Site Allocation, as o</p> <p>The Town Council anticipates that changes necessary to the draft Local Plan in relation to site allocations are greater 'main modifications'. If, however, the Inspector is minded to consider recommending 'main modifications' to policy SP Policies, it would welcome the opportunity to provide its perspective on what modifications would be required.</p>
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	<p>The viability of the proposed GP surgery should have been considered as part of the Sustainability Appraisal for Pol Healthcare is identified in the Sustainability Appraisal as a 'Key sustainability issue' under the social category. The si clearly not an adequate assessment, and appears to have been written without any consideration of the specific pro</p> <p>"The policy is likely to have a positive impact on accessibility community services and facilities, including education pr other services/facilities".</p> <p>The Sustainability Appraisal is clearly not legally compliant, because it does not appraise for Policy SP17 what has b sustainability.</p>
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need	

<p>and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>Thattham Town Council questions whether the '450 sq. metres GP Surgery' proposed for North East Thattham in P is viable, given the increasing range of NHS healthcare services being provided through primary care.</p> <p>We are concerned that the Duty to Cooperate Statement makes no mention of any discussions between West Berkshire, Oxfordshire and Berkshire West Integrated Care Board, or its predecessor the West Berkshire Clinical Commissioning Group, that it will be offered to it.</p> <p>We understand that that a facility of this nature requires the preparation of a Health Impact Assessment (HIA) in accordance with guidance from Public Health England. While this assessment may not be a requirement at this stage, it would be prudent for West Berkshire to commission such an assessment before specifying the size of a surgery in the draft Local Plan. If it transpires that 450 sq.metres is not viable, that it will be built but never adopted by a GP practice, or that a developer will decline to build the larger facility that is proposed, then the Council will consider the implications for the Local Plan.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>Section 33A of the Planning and Compulsory Purchase Act 2004 states:</p> <p>Duty to co-operate in relation to planning of sustainable development</p> <p>(1) Each person who is—</p> <p>(a) a local planning authority,</p> <p>(c) a body, or other person, that is prescribed or of a prescribed description,</p> <p>must co-operate with every other person who is within paragraph (a), (b) or (c) or subsection (9) in maximising the extent to which the activities within subsection (3) are undertaken.</p> <p>(2) In particular, the duty imposed on a person by subsection (1) requires the person—</p> <p>(a) to engage constructively, actively and on an ongoing basis in any process by means of which activities within subsection (3) are undertaken,</p> <p>(b) to have regard to activities of a person within subsection (9) so far as they are relevant to activities within subsection (3).</p> <p>Paragraph 4 of The Town and Country Planning (Local Planning) (England) Regulations 2012 states:</p> <p>Duty to co-operate</p> <p>1 (1) The bodies prescribed for the purposes of section 33A(1)(c) of the Act are —</p> <p>(g) each Primary Care Trust established under section 18 of the National Health Service Act 2006 or continued in existence by section 25 of the National Health Service Act 2006. Primary Care Trusts were replaced in 2013 by Clinical Commissioning Groups, and these were replaced on 1st July 2013 by the Oxfordshire, Buckinghamshire and Berkshire West Integrated Care Board. In this case, the Buckinghamshire, Oxfordshire and Berkshire West Integrated Care Board.</p>

	<p>Paragraphs 4.30 and 4.32 of the 'West of Berkshire Area Statement of Common Ground for Local Plan-Making (August 2022)' identify primary health care as falling within the Duty to Cooperate.</p> <p>Paragraphs 5.31 to 5.34 of the Duty to Cooperate Statement address Health. However, they only discuss health and general terms, in relation to draft Local Plan policy DM3.</p> <p>There is no mention in the Duty to Cooperate Statement of primary healthcare. In particular, there is no mention of cooperation with the Oxfordshire and Berkshire West Integrated Care Board in relation to the proposal for a 450 sq. metres GP Surgery at Thatcham.</p> <p>The Council has therefore failed to comply with its legal duty to cooperate with the Buckinghamshire, Oxfordshire and Berkshire West Integrated Care Board, or its predecessor the West Berkshire Clinical Commissioning Group.</p> <p>This proposed surgery is not mentioned in the Infrastructure Delivery Plan (January 2023).</p>
4. Proposed Changes	<p>The draft Local Plan cannot be adopted until West Berkshire Council has received confirmation from the Buckinghamshire, Oxfordshire and Berkshire West Integrated Care Board that the proposed GP Surgery meets its requirements.</p> <p>If the Local Plan is submitted for examination before that has happened, it would need to be rejected through non-compliance with the requirements of the Local Plan.</p>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	<p>Thatcham Town Council is the principal representative body of the community in the area. The location of the Strategic Site Allocation is the location of only new strategic site allocation in the draft Local Plan. The development for development is reliant on having adequate infrastructure. However, the requirements for development promised in the current Local Plan has not materialised, and would not be delivered by the policies in the draft Local Plan. The Town Council can provide local insight to the examination of the draft Local Plan for Thatcham, and particularly on the substantial deficit of infrastructure in the local area. The Town Council is happy to elaborate on its other concerns about the current proposals for the Strategic Site Allocation, as described in these representations.</p> <p>The Town Council anticipates that changes necessary to the draft Local Plan in relation to the Strategic Site Allocations are greater than could be addressed through 'main modifications'. If the Council is minded to consider recommending 'main modifications' to policy SP17 and related policies, it would welcome the opportunity to provide its perspective on what is required.</p>
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	It is understood the Council has followed the Duty to Cooperate under Section 33A of the Planning and Compulsory Plan Review (LPR) is being produced through close partnership working with West Berkshire Council's neighbouring cross-boundary planning issues are being taken into account and a Duty to Cooperate Statement accompanies the Draft a Sustainability Appraisal and a range of background evidence has informed the LPR.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	Our representations are prepared in relation to the strategic promotion of land known as North East Thatcham ("NET" which comprises A2Dominion, Catesby Estates, Donnington New Homes and Ptarmigan Land who are jointly promoted by its landowners. The Partnership has signed a collaboration agreement to ensure that the site at NET comes forward for piecemeal development. The agreement should give the Council confidence that a comprehensive approach will be taken and the Partnership remains fully committed to progressing a planning application as soon as the site's allocation within the Local Plan is

We consider that the overarching approach of the Local Plan in selecting Thatcham for large-scale housing growth to be focused on the NET via Policy SP17, is sound. However, there are some individual elements of the policy that have not been made sound and meets the tests of the NPPF.

The key policy considered in this representation is Policy SP17 (North East Thatcham Strategic Site Allocation) and Policy SP18 (Housing Type and Mix) allocated for residential and mixed-use development in Newbury and Thatcham) and SP18 (Housing Type and Mix) allocated for the NET strategic site.

We support Policy SP17's proposal to include the land at NET as a significant future allocation to deliver a residential development.

Policy SP17 has been informed by a comprehensive Local Plan process and the evidential foundations exist to support the policy. The policy is modified in ways that we explain later in these representations

The Scale of Development at NET

It is helpful to set out the evolution of the NET allocations in the emerging Local Plan to explain the basis for the specific allocations and why the plan is sound.

In February to March 2018, West Berks Council began the process of bringing forward its Local Plan and consulted on the Draft Local Plan Report and assembling the evidence base to explore and then establish the basis for bringing forward the site at NET. A Reg 18 consultation took place to explore the broad issues around scale of growth, settlement hierarchies and effects of growth.

Paragraph 11 a) of the NPPF is at the heart of plan-making, encouraging a presumption in favour of sustainable development. It states that "development should promote a sustainable pattern of development that seeks to: *meet the development needs of their area; align with the natural environment; mitigate climate change and adapt to its effects.*" (Lichfields emphasis).

In this context, the evidence which underpins Policy SP17 has sought to achieve a sustainable pattern of development that meets the development needs of the area and ensuring that future growth is aligned with infrastructure provision to enable that growth and the wider infrastructure improvements needed.

Part of the Local Plan evidence base included a study by David Lock Associates (DLA) – the Thatcham Strategic Growth Study. This study is in three parts – the past, present and future.

The broad thrust and approach of the TSGS work and its conclusions identified that Thatcham has a series of infrastructure needs. It concluded that only growth of a strategic scale could support the service provision and regeneration that Thatcham needed. This demonstrated the suitability and deliverability of the NET site as a driver for the regeneration of Thatcham.

The TSGS sets out that NET has the potential to accommodate up to 2,500 new homes, 40% of these being affordable. It also sets out how the site's development could include provision for:

- a new strategic country park for the whole town, linking Thatcham to the plateau and AONB
- Approximately 50% of the site given over to green open space of different types
- Surface water management approaches that could deliver net gain for the town
- Biodiversity net gain through habitat restoration and linkages
- Two new primary schools (1x 3FE, 1x 2FE) with flexibility on locations and provision
- An 8FE secondary school serving all of Thatcham
- Dedicated sports fields and dual-use sporting facilities shared with the secondary school
- Local centres providing local retail, facilities and small-scale employment space
- New local facilities and an extension of area for Colthrop Industrial Estate
- Active travel improvements on routes between the site, town centre and railway station
- Potential for community spaces at key locations adjacent to the country park; and
- Public transport and active travel provision

The TSGS "Concept Plan" for the site (pages 60-65 within part 3, the Future document) provided an illustration for how the site could be developed at that scale, whilst identifying a need for flexibilities and more technical work to inform a more precise plan (e.g. pupil requirements / school provision; specific flood attenuation design; impact of views on the skyline etc).

The HELAA was first published in February 2020 and has subsequently been updated in December 2020 and January 2021. It was considered as four different parcels (THA6, THA8, THA10 and THA20). Following the forming of the Partnership and agreement, these parcels were amalgamated to form one strategic site submission known as "THA20." As part of the process, the parcels were appraised in the Thatcham area but were eventually concluded as unsuitable. It was considered that due to the strategic scale of development required a site to be the best site to deliver this, no further allocations in Thatcham should take place within the Local Plan period. The HELAA comprises agricultural fields at present, the majority of land within the district is agricultural (Grades 2 and 3) and the paragraph 3.30 that "no sites have been considered unsuitable because they contain the best and most versatile agricultural land in the volume of agricultural land across the district, for delivery of strategic level

development, it will be inevitable that some agricultural land must be released.

The Site Selection Background Paper pulls together the key conclusions arising from the local plan evidence base and be brought forward as allocations. Based on the TSGS and HELAA, the Paper importantly states that NET is suitable *with infrastructure*." This assumes development up to 2,500 dwellings in line with the studies to date. It concludes that could support the service provision and regeneration that Thatcham requires." (Lichfields emphasis)

The emerging draft LPR (published December 2020 under Regulation 18) put forward Policy SP17 (North East Thatcham). Policy SP17 stated that *"the site as allocated on the map is allocated as a residential-led development comprising a part of this, development of the site will be expected to deliver:*

- At least 40% affordable housing
- A housing mix which complies with the housing mix contained in Table 4 of policy SP18 Housing type and mix
- At least 3% of dwellings to be delivered via serviced custom/ self-build plots
- On-site renewable energy to assist in the delivery of a carbon neutral development
- 2 new primary schools (1 x 3FE, 1 x 2FE) and the sports infrastructure requirements of those schools
- A new secondary school (8FE) and the sports infrastructure requirements of that school
- Surface water management approaches that could deliver net gain for Thatcham town
- Biodiversity net gain through habitat restoration and linkages
- A network of green infrastructure which will include a new strategic country park linking Thatcham to the plateau
- Local centres providing retail facilities and small-scale employment space
- Active travel improvements on routes between the site, town centre and railways station
- Appropriate vehicular accesses and a through route
- Sustainable transport through routes

Representations were made on behalf of the Partnership (December 2020-Feb 2021) which endorsed the Council's approach of a strategic scale, noting that the development will help regenerate Thatcham and contribute towards meeting its infrastructure needs. The Partnership's representations included an overview of the work undertaken by technical advisors and the underlying evidence.

The West Berkshire Interim Sustainability Appraisal Report (Dec 2020) identified that the Council's spatial strategy (continued approach to focusing development in settlements in line with a District-wide settlement hierarchy. Thatcham urban area, is noted as a sustainable location for development and it highlights that a new urban extension allocated for development and will provide a new residential neighbourhood with supporting facilities and green infrastructure. This will enable long term planning for Thatcham.

It anticipates delivery of at least 1,250 dwellings within the plan period and notes that there are a number of significant benefits that developing the site would have, including maximising the provision of: affordable housing; custom and self-build plots; and public open space, new community infrastructure; including primary and secondary schools; and improvements to transport to improve opportunities for sustainable travel.

The SA/ SEA Environmental Report (November 2022), Appendix 4 assesses two development quantum of allocations of 2,500 homes and 1,500 homes. In the case of the *"up to 2,500 home"* allocation there are shown to be more positives than negatives. This is mainly in respect of two issues – housing and infrastructure; 2,500 homes will enable a significantly higher provision of facilities to meet needs, in a sustainable location meaning fewer additional sites will be required across the district in due course to meet need than for 1,500 homes. 2,500 homes would allow for infrastructure necessary to support the development of the site to be provided within the site. The new homes will be located. It would also support regeneration and improvement of other community facilities within Thatcham. In the 1,500 home allocation, the site would only allow for some of the infrastructure necessary to support the development of the site to be provided and it is stated it may be unable to support some of the larger community infrastructure projects required to allow for growth (e.g. education facilities).

In summarising the effects, it concludes that the allocation of *"up to 2,500 homes"* will have a positive effect on all elements of the development provides for community infrastructure to be delivered on site, resulting in a significantly positive impact. The *"1,500 home"* allocation would simply have a neutral impact on all elements of sustainability and the development would require a wider range of facilities to support Thatcham.

Following Reg 18, there was a slight delay to the Local Plan as a result of further work by the Council responding to representations. In parallel, the Partnership has been working to undertake its own masterplanning and feasibility work taking into account access design, topographical survey, tree survey and landscape constraints. The emerging conclusions of this work indicate an estimated yield of around 2,275 dwellings, with a theoretical maximum of 2,670 alongside proposals for two primary schools and a secondary school alongside the site.

Separately, two parties - Croudace Homes and Colthrop Village Consortium - have joined together to suggest an 'Alternative' strategy claimed it could deliver Thatcham's housing needs for the Local Plan period on two smaller sites (totalling 1,100 dwellings) and reduce the impact of new development on Thatcham residents. The Council's position however remains the same as the background evidence. This position is that growth of a strategic scale needs to occur in Thatcham and the focus

be on one strategic site. The site assessed as being most suitable to deliver this is North East Thatcham. Other alternative sites in Thatcham have been discounted – through the evidence, including the HELAA - for a number of reasons such as flood risk. These were also able to deliver the scale of growth that Thatcham needs.

Towards the end of 2022, the Council appears to have revisited its approach to the scale of the NET site. The change in the policy in the Regulation 19 Submission West Berks Local Plan Review (WBLPR) allocating the site to “approximately 1,500 homes” is not supported by the Council’s evidence to date does not support the reduced number; indeed, the evidence shows that significantly more homes can be supported on the site. As mentioned, the SA/SEA shows this higher quantum to generate more positive outcomes but the November 2022 SA/SEA Environmental Report states that up to 2,500 homes is no longer to be taken forward as the “potential impact to local community is considered high and on the site is considered to be more acceptable.”

Precisely how many homes would come forward on the site will need to be established through further detailed technical work. This will be based on a range of factors including a masterplanning exercise and a Landscape and Visual Impact Assessment. This will inform the final capacity, development, design and layout of the site and requirements for green infrastructure and open space. The Council’s evidence base and the Partnership’s work to date indicates that up to 2,500 homes could be delivered at NET, yet the ability to do so would now be limited by the current wording of the SP17 policy, contrary to its evidence base.

The Indicative Site Plan, which accompanies Policy SP17 appears to assume that no development should occur above the 110m contour line. It is speculated that views may be more open (guided by previous work set out within the TSGS). Importantly, the TSGS used “should form a ‘soft constraint’ to development, with local conditions considered.” The Partnership has commissioned a study to carry out an analysis to consider at what heights development could be introduced on the site in a way that would be acceptable in terms of and visual impact. This work shows that development on the higher ground (e.g. above the 110m contour line) is possible, whilst the introduction of green space in other areas will ensure that almost exactly half of the site can be left as landscape. It is considered that it would be premature to establish limits to the scale of homes or spatial extent of development before the technical work is prepared.

The Indicative Site Plan should be limited to a red line site plan that clearly shows the extent of the wider allocation boundary. This is unevidenced and unjustified, and which pre-empt further masterplanning and technical work that can provide all the evidence that the potential of the site is achieved, whilst ensuring LVIA and other relevant matters are properly protected. It is important that Policy SP17 therefore retains a degree of flexibility to meet the tests of soundness, making provision for up to 2,500 homes to be delivered subject to further detailed evidence (e.g.

Masterplanning, LVIA and viability work) in the future, and for it to support the appropriate scale of growth which Thatcham needs.

Our objections to the policy therefore focus on the reference to “approximately 1,500 homes” not being sound. We do not have a specific aspect of the policy is:

1) Not positively prepared: The West Berkshire Strategic Vision 2050 (produced by the Council in response to the Interim Strategic Planning Review) provides the basis for looking at growth over the long term. It shows that any expansion of Thatcham – within and beyond the current boundaries – should be directed to the north of the town. It is therefore not appropriate to limit the scale of growth at NET to an arbitrary figure. The site has a realistic prospect of accommodating more than this. Meeting OAN for the plan period is a minimum requirement. If the Council has opportunities to do more than this, they should be actively taken.

2) Justified by evidence: as explained above, the evidence base relied on by the Council for NET finds that the site could support up to 2,500 homes and there is no evidence supporting imposing a lower cap on the quantum of development; indeed, the evidence shows that up to 2,500 homes on the site - shows the higher quantum of development to generate more positive outcomes.

3) Not effective: a larger scale of development on the site can support more infrastructure and the Council’s evidence base shows that the capacity of the site at 1,500 is aligned to the level of infrastructure.

4) Not consistent with national policy: Among the aspects of concern, we would flag four references:

1 NPPF para 124 states that “*Planning policies and decisions should support development that makes efficient use of land, taking account of a range of factors. None of these have been identified with evidence by the Council in justifying limiting the capacity of the site to 1,500 when previous work has indicated a capacity of up to 2,500. Policy SP17 requires in any event to establish a capacity of 1,500 based on a masterplan and LVIA work. Further, it is clearly relevant to para 124, that the density for the site should be supported by improvement of infrastructure and services and in this regard, it is clearly relevant to the provision of social and community facilities such as educational facilities such as a secondary school. The IDP notes the benefits of secondary school provision and that the capacity of the site at NET should be set through the masterplan under Policy SP17 that in due course takes education provision into account; the evidence does not currently support the idea of limiting the capacity of the site to 1,500.*”

1 Paragraph 16 of the NPPF states that, “*Plans should: d) contain policies that are clearly written and unambiguous so that the planning maker should react to development proposals.*” It is inconsistent for Policy SP17 to limit the capacity of the site to 1,500 when the evidence suggests the site could potentially accommodate more and when the policy itself says that the capacity should be determined with reference to further technical work that has not yet been completed. If that further work shows that the site could accommodate more than 1,500 homes (perhaps closer to the number estimated in the Council’s own evidence base)

- 1 Paragraph 22 of the NPPF (July 2021) states, “Where larger scale developments such as new settlements or villages and towns form part of the strategy for the area, policies should be set within a vision that looks further into account the likely timescale for delivery.” The findings of the 2050 Vision work – prepared by the Council in re – demonstrate that there are limited long term options available to West Berkshire for growth of Thatcham. It would be to set a density for the whole site that is artificially and unjustifiably low and would prevent it from fulfilling a role. There is evidence to show that approximately 1,500 sets the threshold for an acceptable scale of development. Of note, the Paper (Jan 2023) projects a trajectory of 150 dwellings/ annum from 2029-2039 for NET.
- 1 Paragraph 73 of the Framework refers to the opportunity for large scale developments and the requirement – in NET for these forms of development – to ensure their size and location will support a sustainable community with employment opportunities within the development itself. This points to the need – through the evidence – to set the proposed scale of housing capacity within the site, which the Council has not done. By contrast, a policy that would (as proposed in the Reg 18 Plan) would have done so via the existing evidence base, notably the TSGS).

Taken together, the solution to the problems identified is to change the wording of the policy so that rather than referring to it instead refers to “a minimum of 1,500 homes”. A consequential change would also be required to Policy SP13 which refers to homes at NET”.

Housing Mix

The approach of Policy SP17 to housing mix also requires adjustment to be sound because it provides no flexibility to be provided on NET from that identified in Table 3 of Policy SP18.

We support the approach of Policy SP18 (Housing Type and Mix) itself, which refers to Table 3 in setting the SHMA’s to be applied to planning applications on different housing sites. Of note, point b. allows for schemes to have some flexibility prescribed strategic level mix in Table 3. Point b. states that in determining any variation from the mix, the Council will “mix for the site’s size and location”.

However, Policy SP17 – which cross refers to the mix in Table 3 of SP18 - does not provide the equivalent flexibility to be afforded to NET within Policy SP17 in order to secure its future delivery and be consistent with Policy SP18. Whilst the level mix is in line with the NPPF and may be appropriate for the District and as a starting point for setting a mix in individual phases, it would be the ability to set an appropriate NET specific mix to respond to wider considerations such as market need and viability as well as site planning and design within individual phases. As it stands, this part of the policy as drafted would not be effective or consistent with national policy.

In simple terms, in order to be sound, the flexibility afforded to any site in the District by SP18 should similarly apply to NET.

We have suggested amended wording below to Policy SP17

The scale of Community Uses on the site

Whilst the overall approach to provision of community facilities is supported, it is premature to specify the quantum of facilities as the capacity of the site being determined through the masterplanning and LVIA exercise specified in the Policy. For example, if the LVIA shows that the site capacity is increased from the 1,500 homes identified as a minimum (to reflect the efficient use of land), this might change the quantum of retail facilities, or number of schools, or community indoor facilities. This is not justified with reference to the evidence base for the NET allocation, and in any event given the scale of residential development (and thus the need of the population for the scale of these facilities) is not yet fixed.

The policy is therefore not justified, effective or consistent with national policy.

We have suggested changes to the policy accordingly, referring to the facilities being what is necessary to meet the needs of the community.

The new community park and the AONB

We support the concept of a new community park, but we are concerned at the reference in the policy to it “linking Thatcham Downs AONB”. This is because the boundary of the AONB and the NET allocation are not contiguous, so it is not clear how it can be delivered within the site allocation. This aspect of the policy would thus not be directly achievable; nor therefore – if one accepts a direct link is not possible – would the policy expectation meet the NPPF (para 16) requirement “in terms of how a decision maker would react to development proposals” that did not provide that direct connection. This requirement should be removed, so the requirement is limited to provision of a community park. The objective of ensuring the connection to the AONB from Thatcham is in any event secured by the second bullet point listed under the policies ‘Green Infrastructure’ “Greenways which connect through the site to the park, facilitate connection to the AONB, and include leisure routes”.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?
* Yes

Yes

* No	
Please give reasons for your answer	A Duty to Cooperate Statement (January 2023) has been prepared to support the proposed submission (Regulation 19 of the LPR the council has identified that it has engaged with a wide range of duty to co-operate partners. The council has considered relevant strategic matters which they need to address in their plans. They have undertaken and maintained effective and constructive strategic policy-making authorities and relevant bodies. In particular, joint working has helped to determine where additional development and whether development needs that cannot be met wholly within a particular plan area could be met elsewhere.
4. Proposed Changes	<p>We suggest the following changes (in bold text) to Policy SP17 are required to make the Local Plan sound. This is in section 2 above.</p> <p>Policy SP17</p> <p>North East Thatcham Strategic Site Allocation</p> <p>Land as shown on the Policies Map is allocated for a sustainable low carbon, urban extension comprising of distinct landscape and connected and contributing to Thatcham, and woven through with natural habitats and links. The site will be developed as a whole to achieve a comprehensive development. The provision of all infrastructure, services, open space and facilities what is necessary to meet the needs of the development, timely and co-ordinated. The Thatcham Strategic Growth Study provides guiding principles and proposals will therefore demonstrate that these guiding principles have been positively met.</p> <p>Homes</p> <p>The site is to be allocated for approximately 1,500 dwellings which will be completed within the period of the plan and a minimum of 1,500 dwellings up to 2,500 dwellings. These dwellings will comprise of a housing mix which complies with the requirements contained in Table 3 of Policy SP18. In addition at least:</p> <ul style="list-style-type: none"> • 40% of dwellings will be affordable housing; • and 3% of dwellings will be delivered via serviced custom/self-build plots. <p>Community</p> <p>The site will provide:</p> <ul style="list-style-type: none"> • Local centres to meet the needs of the development, providing local retail facilities and small-scale employment (including and F2 and Sui Generis); • 450-sqm GP Surgery to meet the needs of the development and to be offered to the Buckinghamshire, Oxfordshire and Berkshire Integrated Care Board or other such appropriate body; • Early years provision; • A 2.5 FE Primary school provision on site and sports infrastructure requirements of the school to meet the needs of the development and land is to be provided and build costs to be met by the applicant; • Secondary provision - Land to meet the impact of the development. The nature and cost of the mitigation will be undertaken at the applicant's expense and prepared in collaboration with the Council and local stakeholders; • A 1,200-sqm community indoor facility to be used for sport and community uses with a variety of room sizes (including meet the identified need of the development); • Outdoor formal and informal sports pitches and areas to meet the identified need of the development; • Open space to meet the needs of the development in accordance with Policy DM401; <p>Green Infrastructure</p> <p>The site will provide a comprehensive green infrastructure network which will take advantage of the landscape features of the site. This network will comprise:</p> <ul style="list-style-type: none"> • A new community park linking Thatcham to the North Wessex Downs AONB; • Greenways which connect through the site to the park, facilitate connection to the AONB, and include leisure routes; • A comprehensive network of other accessible routes and connections within the development which provide walking and cycling routes; • Existing and new Public Rights of Way; and • Retained and new trees, hedgerows and other appropriate native planting which contribute to biodiversity net gain. <p>Transport</p> <p>Measures will be included to improve accessibility by, and encourage use of, non-motorised transport modes. A Transport Strategy will be prepared on how this will be achieved, including:</p> <ul style="list-style-type: none"> • Active travel improvements on routes between the site, Thatcham town centre and the railway station; • A vehicular through route; • Sustainable transport through routes; • Mitigation of the development's impacts on the highways network with improvements to existing junctions where necessary and new access points for all forms of movement and transport to the site at locations to be agreed with the planning authority.

- How adverse impacts on air quality will be minimised.

Sustainability

Development of the site will be supported by a Sustainability Charter which will establish how policy requirements will be supported by:

An Energy Strategy which sets out measures to achieve a model low carbon development (following the energy hierarchy SP5 and DM4, including:

- net zero carbon (regulated and unregulated energy) emissions for dwellings;
- BREEAM 'excellent' non residential buildings;
- on-site renewable energy to assist in the delivery of a net zero carbon neutral development; and
- carbon off-setting

An Integrated Water Supply and Drainage Strategy which will set out:

- measures to ensure the provision of adequate and appropriate infrastructure for water supply and waste water treatment;
- surface water management approaches that could deliver net gain for Thatcham town, including use of on-site water storage (SuDS).

An Ecology Strategy which will set out:

- a Biodiversity Net Gain Strategy to show how net gain will be achieved including through habitat restoration and creation;
 - how priority habitats and ecological features will be protected and enhanced;
 - the creation of new ecological features; and
 - a site-wide management plan.
- A Green Infrastructure Strategy which will show how a network of multifunctional green infrastructure will be delivered including:
 - A Public Rights of Way Strategy to demonstrate how existing Public Rights of Way will be protected and enhanced, including bridleway links and safe crossing points.
 - A Lighting Strategy which will include consideration of dark skies, particularly in relation to the nearby North Wessex Downs to mitigate the impact on biodiversity.
 - A Landscape and Visual Impact Assessment (LVIA) in accordance with the Landscape Institute Guidelines for LVIA Assessment 3rd ed. 2013. This will inform the final capacity, development, design and layout of the site and the provision of public open space. The LVIA will be informed by the Landscape Sensitivity Assessment (2021) of the site.
 - A Mineral Resource Assessment (MRA).
 - A Historic Environment Strategy to demonstrate how the listed buildings in the area will be conserved and how their settings has been considered.
 - A Construction and Operations Management Plan (COMP) shall accompany any planning application on the site to protect the oil pipeline from operational works, including the provision of an appropriate buffer.

Above – Plan to be amended to show site boundary only [See attachment 'PS1493 – Lichfields (NET Partnership)]

Supporting Text

6.52 Thatcham has experienced rapid population growth during the post-war period, expanding more than 5 times since 1950, accompanied by infrastructure growth in transport, and a considerable expansion in the built-up area to match the population growth. Over the decades, the provision of social infrastructure has not kept pace with housing growth.

6.53 The vision for Thatcham contained in the Core Strategy DPD (2012) was that Thatcham town centre would be a vibrant town to fulfil its role within the District's Hierarchy of Centres by improving the retail offer and enhancing the street scene and community facilities for all ages would be improved and encouraged within the town centre. The town would become a range of job opportunities and encouraging residents to shop and socialise locally. Additionally, the Core Strategy DPD encouraged housing expansion in Newbury.

6.54 In reviewing the vision for Thatcham as part of the LPR, and to best understand how to plan for growth in Thatcham, the Council commissioned masterplanning work (Thatcham Strategic Growth Study (TSGS) 2020).

6.55 This evidence draws on other recent evidence produced to support the LPR such as the Landscape Character Assessment, Housing and Employment Land Availability Assessment (HELAA) (2020). The TSGS shows that Thatcham compares well in terms of overall service provision, including public services and commercial services. The town's self-image is of a vibrant, thriving market town.

6.56 In addition, it demonstrates that recent planning decisions support the approach that only growth of a strategic nature and provision and regeneration that Thatcham requires.

6.57 The TSGS considers the sites promoted to the Council as part of the LPR and recommends that if strategic development is the most appropriate location to examine in more detail is the site promoted at North East Thatcham.

6.58 The western edge of the site is adjacent to the existing Thatcham settlement boundary along Floral Way and Basingstoke Road. The site is adjacent to Colthrop Industrial Estate, which is contiguous with Thatcham. The new revised settlement boundary is the studies and work identified in the policy at the application stage.

	<p>6.59 Stage 3 of the TSGS examines the North East Thatcham site in detail and, using community objectives which were discussed at the stakeholder workshop, provides context for how development could come forward at the site.</p> <p>6.60 The Council's spatial strategy is outlined in Policy SP1 and affirms a continued approach to focusing development on the District-wide settlement hierarchy (contained in Policy SP3). Thatcham, as part of the Newbury and Thatcham urban area, is allocated for development. The TSGS shows the most sustainable way for development to come forward in the town and this policy is intended to support this development.</p> <p>6.61 Hence, Thatcham is now a focus for regeneration, for new housing and for improved provision of services and facilities. The area to the north east of the town is allocated for development and will provide a new residential neighbourhood with supporting infrastructure and enable long-term planning for Thatcham's future. Delivery of approximately 1,500 dwellings is anticipated.</p> <p>6.62 British Geological Survey data identifies that the site is underlain in part by construction aggregate mineral deposits. A Mineral Resource Assessment will be carried out to determine the possibility of prior extraction of the mineral in accordance with the West Berkshire Local Plan 2020-2037.</p> <p>6.63 Further detailed work will be required to develop a coherent masterplan or development framework to take the site forward. This will be produced in collaboration with the community and other stakeholders.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
5. Independent Examination	Participation is essential to enable further clarification and justification of the points made above. The reps made comments and further evidence will be required to be presented to fully make our case at EIP.

<p>1. Do you consider the Local Plan Review is legally compliant? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to object to these plans as I find them unsound.</p> <p>The plans as they stand will have a significant impact on my personal well-being.</p> <p>The road noise on Broad Lane is already significant and prevents us from having our bedroom windows open overnight. This will only get worse with the expected increase in traffic.</p> <p>My husband and I currently enjoy the AONB. Under the proposed plans there is insufficient planned recreational space and the risk of over-spill into the AONB for those seeking green space.</p> <p>As a healthcare professional I also think that the plans fail to consider the current scarcity of healthcare resources. This is a concern for the current population without the additional burden of people from the proposed development.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>

Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where	

<p>practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>I am objecting to the plan relating to the Thatcham NE Development as I believe that there are components of this plan that are as follows.</p> <p>SAFE AND SUSTAINABLE TRANSPORT</p> <p>I understand that the WBC state the policy is likely to have a positive impact on road safety as safe travel will be critical to an increase in opportunities for walking and cycling.</p> <p>However, the likely significant increase in traffic in the Upper Bucklebury area generated by the additional +4000 residents will result in an increase in serious accidents. This will certainly result in less likelihood of us using our local roads for these pursuits. Many of these roads are without pavements. Such a scenario will massively increase the dangers to the many walkers, cyclists & horse riders that use these roads. These are roads that our family use regularly for these pursuits. Many of these roads are without pavements. Such a scenario will massively increase the dangers to the many walkers, cyclists & horse riders that use these roads. This will result in an increase in serious accidents. This will certainly result in less likelihood of us using our local roads for these pursuits.</p> <p>HEALTHCARE</p> <p>I am concerned about the impact +1500 homes in this area will have on our already overloaded healthcare services. This will result in significantly increased waiting times at our local surgery for Doctors appointments, blood tests etc.</p> <p>I understand that WBC and the developers are proposing a new healthcare site to be built for this area. However, the purpose Healthcare Impact Assessment, nor provided evidence of having liaised appropriately with local healthcare facilities, local general practices and dental practices. Surely the provision of increased healthcare facilities to accommodate the additional +1500 homes to be secured before this project can be considered?</p> <p>In essence, the objective of WBC and the developers to improve access to the health service component of community health care, as they have failed to provide evidence for the provision of the required primary care medical facility. The impact of this on the community will be significantly negative.</p> <p>ENVIRONMENT</p> <p>I have major concerns regarding the impact that building so many new houses in this small area of countryside will have on the environment. I understand that the Bucklebury Parish Council have reviewed the background documentation provided by the WBC and BPC has concluded that there is no evidence to support claims that SP17 will have a positive impact on the environment. This will result in a significantly negative impact.</p> <p>We live in a beautiful area. I am concerned that the impact of the proposed 1500 houses (potentially 2500 houses in total) will result in significant issues to our environment with potential collateral damage to Bucklebury Common due to significantly increased footfall.</p>

	<p>on legally protected wildlife. Indeed, the LPR states its intent for SP17 to drive additional traffic (people & cars) into the area, which is likely to have a detrimental impact on the fragile ecosystems that people are currently working on to restore and nurture.</p> <p>The LPR's own Sustainability Appraisal accepts that SP17 will have a negative impact on environmental sustainability. This impact is to be mitigated, no details have been provided regarding how this would be carried out.</p> <p>It is obvious that the policy is to build as many houses as possible in a small area of countryside, on a cost effective basis. There are no substantiated policies regarding mitigation of the impact on the local environment.</p> <p>INACCESSIBILITY OF DOCUMENTS</p> <p>The volume and complexity of documentation that one is expected to review when considering points to raise is overwhelming for any one person to deal with. Having spoken to numerous people in our community, many of them have stated that it is too costly and time consuming. Consequently, they won't be taking part in this process.</p> <p>A true consultation should involve two way communication open to everyone. In my opinion, the WBC is failing in its duty to consult on this. One wonders if this is deliberate in order to reduce the number of objections to the plan?</p> <p>In conclusion, I object to the proposed Thatcham NE Development for the aforementioned reasons. I believe that the proposed development of houses in an area of countryside that is not suitable, resulting in a significantly adverse impact on the local community and quality of our lives.</p> <p>The plan has various flaws, ambiguities and is full of unsubstantiated policies. Consequently it should be rejected.</p>

Please give reasons for your answer	Policy SP17 North-East Thatcham strategic allocation

	<p>3.34 The strategic allocation of 1,500 dwellings for North-East Thatcham as set out in Part 1 of the Regulation 18 Plan consultation. concludes that :</p> <p><i>“This option was originally to be taken forward and was included in the Reg 18 consultation as a considerable number of new homes and community infrastructure to support these. For the Thatcham community the potential impact the local community is considered too high, the number on the site is considered to be more acceptable. Therefore, this option will not be taken forward.”</i></p> <p><i>“This option was considered in light of the responses received to the Reg 18 consultation. The council considered that 2,500 dwellings in Thatcham was too many. In response, the council has reduced the number of dwellings, which still enables a strategic level of development which can provide for the needs of the community. It is noted, that compared to a higher number of dwellings, this option may provide for the education provision originally envisaged on the site, or the additional improvements to the site within Thatcham. However, a reduced number on the site is considered to be more acceptable.”</i></p> <p>3.35 Therefore, whilst it is still acknowledged that the scale of the development proposed is a significant opportunity of providing some infrastructure, the Council have conceded level of infrastructure provision is reduced, and therefore the extent of the sustainability advantages it could provide has been reduced.</p> <p>3.36 The allocation, if confirmed, will obviously require a detailed planning application and significant Masterplanning work, to be submitted and approved, as well significant infrastructure provision. Any dwellings can be constructed. It is clear that if confirmed the allocation will not be completed in the short-medium term of the LPR period.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	No
Please give reasons for your answer	
4. Proposed Changes	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
5. Independent Examination	Our position is that the site should be included as a proposed residential allocation and that the LPR does not provide for housing supply.

Please give reasons for your answer	<p>I understand the problems of allocations of development. However the inclusion of a large scale development in NE</p> <ol style="list-style-type: none"> 1. There has been insufficient consideration of Transport Issues caused by the size of the development not being into 2. Insufficient provision of Health facilities. 3. Insufficient provision of Education facilities 4. Insufficient provision of Sports Facilities 5. Negative impact on adjoining Common land. <p>Transport Issues</p> <p>The development has been grafted of Floral way and does not show how the additional traffic, which will be generated to the major employment, educational and shopping centres. This will create more traffic using totally unsuitable local on minor junctions. I live in <redacted> and the commuter traffic using the route through Upper Bucklebury rather than calming measures that could mitigate the increased traffic.</p> <p>Public transport in this part of West Berkshire is insufficient for the existing population and during the past few years bus There are no proposals for new public transport linking the development with transport hubs.</p> <p>Health Facilities</p> <p>In Chapel Row we have a good doctor's surgery. However due to increased demand the availability has reduced. Fu pressure The facilities.</p> <p>Education</p> <p>New Homes will have a serious impact on local schools and children will have to travel further a field to be educated to cope. Addition numbers will impact upon Local education.</p> <p>Sports Facilities</p> <p>More people will need new Facilities and there are not any provision for New Facilities. Any new facilities would have for informal recreation which will be at risk.</p> <p>Negative Impact on adjoining Common Land</p> <p>As I live on the <redacted> I am fully aware on the increased usage of the common. However, the increased use by ecology and public paths have deteriorated through over use. More houses have appeared on the common. The traf deterioration of air quality and abuse of byways. As mentioned in transportation issues the increase in Rat Running congested.</p> <p>In conclusion a very limited review of this plan quite clearly demonstrated that the extension to NE Thatcham is unso</p>

Please give reasons for your answer	OBJECTING to plan SP17 as it is unsound due to the following reasons and negative impacts: - I enjoy walking in the countryside and woodland in our local area. This countryside supports several fragile ecosystems and heathlands. I am also concerned about losing more of the natural habitat for our local wildlife. - With more residents and therefore cars, we will experience higher levels of pollution which affects the health of people and a higher chance of more accidents. - I currently use the Chapel Row GP surgery, which is already at capacity. The addition of these houses in the immediate first line of health care for doctor appointments.

Please give reasons for your answer	I write to object to the proposed Thatcham NE Housing Development as I find the proposal unsound on the following 1.0 Transport 1. There will be increased pressure on the existing highway infrastructure from the additional people in the new housing, public houses, and the walks across the Common 2. The housing development will generate increased traffic through the village which is already under pressure as a result of the settlements to local schools and for travel to the M4 and Reading. The roads locally have become rat runs avoiding traffic with this proposal. 3. This will generate further pollution and increased noise levels in a village setting within the North Wessex Downs AONB

4. Although there is a traffic calming layout in the village, this is in effect groups up cars, lorries, agricultural vehicles producing constant streams of traffic which at busy times can make the road difficult to cross at prime travel times. In the additional traffic movements from the proposed development will cause logjams as increased traffic slows down.
5. Also, as I recently witnessed there are instances where individuals are becoming impatient with the traffic calming traffic travelling through Upper Bucklebury due to frustration at the slowed traffic putting other local road users including especially the elderly, dog walkers and children along with their parents going to school at great risk. Increasing the will further prejudice and endanger the lives of the people who live here leading to further traffic calming solutions had after an accident has occurred.
6. Upper Bucklebury is at risk of having to have a fast streamlined roadway removing the traffic calming to cope with will destroy the character of the village.
7. The proposed scheme exacerbates an already dangerous problem as the route along Harts Hill Road between NE lacks pathways, street lighting and is a fast but narrow winding road. Surface water constantly runs down and across has the potential to freeze as happened earlier this year with increased traffic flow resulting in the likelihood of increased proposed development will also place increased pressure on Thatcham itself and the A4 between Newbury and Reading flooded with surface water runoff from the fields adjoining this road.
8. Traffic approaching Upper Bucklebury via The Avenue is already a fast road where many drivers chance their luck increased through traffic to Thatcham this will further endanger road users from speeding cars.
9. There is a lack of public transport serving the local communities and the increased housing will heighten this issue. places greater pressure on the road systems.
10. All the above is contrary to WBC Strategic Environmental Assessment objective 4 – to promote and maximise of and sustainable transport.

2.0 Environment

1. There will be major adverse impacts on the North Wessex Downs AONB from siting a major housing development the continuing enjoyment of the existing local community and the many visitors that the area attracts through all season walks.
2. Although the area already attracts many visitors the intensification of visits from the increased population from the will place pressure on the existing wildlife which may prove to be tipping point for the continued health of this fragile.
3. The existing ecosystems within the AONB are already fragile and just coping – the extra numbers of visitors will do fatally damage the remnants of old ecosystems reducing the quality and the purpose of the AONB.
4. It will also cause more roadkill of wildlife which is already frequent enough now.
5. This will in turn lead to greater traffic generation and the need for additional car parks to accommodate the increased additional car parks will eat into existing woodland / heathland and could also lead to increased antisocial behaviour.
6. For the above reasons new greenfield development abutting the AONB and the Common should be discouraged to possible existing biodiversity.
7. There is a lack of evidence of current supporting ecological research or assessments provided for the proposal. The an overall biodiversity gain from the scheme and lack of mitigation of the negative impacts new housing will have on Bucklebury Parish Council have undertaken their own investigations into the existing flora and fauna which has high position on this.

3.0 Lack of Strategic Gap between Thatcham and Upper Bucklebury

1. Each settlement needs to protect its individuality and so to prevent further development creep in the future by be protected from new development. This scheme is effectively allowing the blurring the lines between Thatcham and Upper individual settlements which in time will become merged allowing developer lead schemes being approved by appeal.
2. The northern edge of the Bath Road and Floral Way should be retained as countryside and protected to prevent do for the foreseeable future with an effective green belt established to lie between the 2 settlements.

4.0 Number of Houses

1. The number proposed has been misleading as the Plan now extends to 2039 rather than 2036 giving rise to 'at least clarity on the specific number proposed or the exact location of these houses within the red line boundary of the plan fact be a lot more and could lead to developer lead proposals increasing the minimum number.
2. The infrastructure which should be provided to support the estimated of new people in the area has not been sufficient education facilities, healthcare and recreational facilities and may not be delivered over the lifetime of the Plan.
3. Consideration of alternative sites especially brownfield sites should be preferred before developing this greenfield.
4. I understand that the basis for assessing housing requirements is undergoing a consultation process meaning that the WBC could be reduced if the consultation recommendations allow. In the light of this it is best that the results of the consultation that WBC should at least delay the consideration of the additional houses in this location if not stop it completely.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?

- * Yes
- * No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	<p>Status of the Thatcham Strategic Growth Study</p> <p>Policy SP17 states: “The Thatcham Strategic Growth Study provides guiding principles for the delivery of the site therefore proposals with these principles have been positively responded to.”</p> <p>As explained in my representation on the wording of Policy SP17 as a whole, the word “will” has many different meanings and is completely ambiguous. The sentence only carries any weight if it is intended as a requirement – if it is merely an aspirational policy. Therefore, the word ‘will’ in this sentence MUST be replaced by “must”.</p> <p>This sentence therefore means that the Thatcham Strategic Growth Study is incorporated by reference into Policy SP17. The Council states: “The Thatcham Strategic Growth Study (TSGS) is a consultant’s report commissioned by the Council. The Council has used the TSGS to provide evidence in relation to various issues that relate to the local plan and all of these can be viewed on the Council’s website. It is therefore neither a development plan document nor a supplementary planning document. It was not formally part of the Regulation 19 Consultation and only forms part of the supporting evidence to the Regulation 19 Consultation. It has not been approved by any member of the Council nor, as far as I am aware, through delegated authority.</p> <p>The Thatcham Strategic Growth Study is an integral part of the draft Local Plan through incorporation by reference into Policy SP17. It is not formally part of the Regulation 19 consultation. Policy SP17 therefore is not legally compliant with the requirements of the Town and Country Planning (Local Planning) (England) Regulations 2012’. It therefore also does not comply with the requirements of the Local Plan Involvement.</p>
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based	

<p>on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>Status of the Thattham Strategic Growth Study</p> <p>[SP17 - first paragraph. Representation part of a wider rep for SP17]</p> <p>Paragraph 16 of the NPPF (July 2021) states that: “Plans should: d) contain policies that are clearly written and unambiguous and a decision maker should react to development proposals”.</p> <p>Policy SP17 states: “The Thattham Strategic Growth Study provides guiding principles for the delivery of the site therefore proposals with these guiding principles have been positively responded to.”</p> <p>This sentence is totally unclear and ambiguous, for four reasons: (i) There is no section of Thattham Strategic Growth Study titled “Guiding Principles”, and no section that could reasonably be interpreted as such. This study is effectively the set of ideas by one consultancy about one possible configuration for a development. (ii) The Study was based on a development of 2500 dwellings, and it is totally unclear how it might be applied to a development of a different scale, which aspects would be different and which would be unchanged. (iii) The Study includes the employment area south of the A4 (Policy ESA1 in the draft Local Plan) as an integral element of the development between SP17 and ESA1 in the draft Local Plan. (iv) The phrase “positively responded to” is completely meaningless in planning terms.</p> <p>As a result of this lack of clarity and ambiguities, a developer could claim that almost any proposed development meets the requirements in Policy SP17.</p> <p>Paragraph 6.63 of the supporting text to the policy contradicts paragraph 6.54: “6.54 In reviewing the vision for Thattham as part of the LPR, and to best understand how to plan for growth in Thattham, the Council commissioned masterplanning work (Thattham Strategic Growth Study (TSGS) 2020).” “6.63 Further detailed work will be required to develop a coherent masterplan or development framework to take the vision forward to be produced in collaboration with the community and other stakeholders”.</p> <p>It therefore appears that West Berkshire Council believes that the Thattham Strategic Growth Study is not coherent, and is not a development forward.</p> <p>I share this view. The Study Stage 3 Report contains a mix of hand-drawn sketches, numerous concept diagrams, maps, and a ‘concept masterplan’ that is not based on any landscape assessment. As highlighted above, the document does not provide a clear and consistent view and it is unclear to what extent the plans in earlier parts of the document are referenced from the ‘conclusions’ section.</p> <p>I suspect that the Study was produced to be a starting point for further stages of work, and not to be referenced directly in the Local Plan.</p> <p>Paragraph 6.59 of the draft Local Plan is misleading to claim that “community objectives which emerged during a community workshop”. The statement in paragraph 6.5 of the Stage 3 report that it is “building on principles established at a community representation workshop at this stage of the study” is incorrect, because the workshop participants did not collectively establish or endorse any principles.</p> <p>I was one of the Thattham Town Councillors who attended this workshop. We were given no advance notice of the nature of the workshop. The Town Councillors were spread among different ‘teams’, and there was no follow-up. The ‘results’ of this workshop were not taken as a considered view of the Council or of the community. In retrospect, the workshop seems more like a token exercise taken as a first step in a sincere attempt to engage with the community.</p> <p>I did not give my permission for a photograph of myself taken during the workshop to be included in the report, and I do not endorse the description of the workshop or of the report.</p> <p>The Thattham Strategic Growth Study is therefore unsound, because it does not comply with paragraph 16 of the NPPF.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>N/A</p>
<p>4. Proposed Changes</p>	<p>As I propose in another representation, the word “will” in the first paragraph of Policy SP17 MUST be replaced by “may”.</p> <p>“The Thattham Strategic Growth Study provides guiding principles for the delivery of the site therefore proposals with these guiding principles have been positively responded to.”</p> <p>In order to make the Local Plan review legally compliant, the Thattham Strategic Growth Study needs to be reviewed and updated to reflect the delivery of 2500 dwellings, and the resulting ‘guiding principles’ then need to be incorporated into the draft Local Plan or a supplementary planning document. This needs to undergo public consultation in accordance with the Statement of Community Involvement. This cannot be a mere technical examination.</p>

	I cannot see how the Local Plan could be considered to be “ready for independent examination”. Therefore, in accordance with the Planning and Compulsory Purchase Act 2004, West Berkshire Council should submit it in its present form to the Secretary of State.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	If it would assist the examination.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>Please give reasons for your answer</p>	<p>I write to object please to the LPR's plans to allow the building of 1250-2500 houses to the North East of Thatcham. Thatcham is already completely underserved compared to Newbury and other similar towns as regards</p> <ul style="list-style-type: none"> • Doctors surgeries • Pharmacies – a big problem at the moment • Supermarkets • Shops – clothing, shoes, furniture • Parking • Post Offices – both counters and sorting office (the latter is terrible) • Road network <p>The traffic on the Relief Road has already massively increased over the 24 years that I have lived in North Thatcham out of Dunston Park onto the Relief Road because of the volume of traffic.</p> <p>The problems at the level crossing have also massively increased.</p> <p>Thatcham Post Office sorting office is already completely unfit for purpose and massively understaffed. Whenever we receive no post deliveries for a week. There are no covering staff at all.</p> <p>Thatcham Bath Road Doctors Surgery already has trouble recruiting doctors and has tremendous delays in answering they have stopped inviting ladies to Well Women Clinics because of staff shortages. That is plainly storing up health local population.</p> <p>Also our dustbin emptying has already gone from weekly to two weekly while we have lived here.</p> <p>I moved to North Thatcham in part because of its lovely semi-rural location. It would be a complete disaster to build on its beautiful trees, flora and fauna. We have already had to endure months of works directly across the Relief Road on what was previously a beautiful field and view.</p> <p>The air quality has already diminished tremendously while we have lived here, due to traffic pollution. That is a particular such as my son.</p> <p>Please do think again on those plans. We just do not have the infrastructure or resources at all in North Thatcham to</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is	

<p>consistent with achieving sustainable development.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to object to this proposal as I believe it is unsound, that it will have a negative impact to the environment and potential road safety implications.</p> <p>We outline our objections below.</p> <p>Environment (AONB SP1 & SP 2) – the proposed development abuts Bucklebury Common and the North Wessex Downs AONB. The proposed new developments will be drawn to the Common and will significantly increase the pressures already evident on the Common and existing wildlife. Parking on and around the Common is already exceeding capacity, with verges being used during the winter months. The development is relatively close, not all residents will walk/cycle to the Common they are more likely to drive. The open spaces proposed will not be big enough or as appealing as the Common land within the AONB</p> <p>The response that "<i>The development would involve a significant amount of open space which would be expected to be used for recreation (and benefit the existing population)</i>" does not address the concern that an existing mature and diverse Common area within a housing development for dog walkers, cyclists, off-roaders, etc.</p> <p>Wildlife (SP11) - the impact on local eco systems and wildlife will be significant. Whilst plans identify mitigating actions to support sustainable development it is quite clear that this development of farmland and natural open habitat will destroy areas of wildlife. The open spaces proposed in the development areas will not be enough either for the wildlife or the residents. The loss of habitat is inevitable, will also impact wildlife on Bucklebury Common and the AONB.</p> <p>The response that "<i>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council has stated that the development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) for the AONB and which will provide the context within which any proposed development would need to conform. The LCA states there is no strong inter[1]visibility between the site and the AONB it does lie close to it and concludes that the site is not within the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation of the site.</i>" does not address the impact of bulldozing existing mature farmland, building and laying tarmac.</p> <p>Being "<i>landscape-led</i>" is a not a sound argument when you've squashed all the wildlife and the songbird, bee and butterfly and return in a 2-3 generation when we're being asked to protect our Countryside for future generations.</p> <p>Traffic (SP17, SP22) - Thatcham is already a bottleneck for traffic flowing through the town on the A4 between Newbury and Andover. A new road network with the proposed traffic calming, traffic lights and roundabouts, the impact of on the flow of traffic through the town above will have a knock-on detrimental effect on the local roads and quiet lanes in Bucklebury as the additional cars and lorries will</p>

chaos in and around Thatcham and the associated A4 area. The local lanes and roads which are designed with layout only local traffic will be used as short cuts through to Reading, Newbury and the M4 to avoid the A4 congestion. We note the proximity of the proposed developments to Thatcham Railway Station. The ability to get to the station at peak times is important. While we appreciate the plan places an emphasis on sustainable travel there is no requirement for residents to complete pedestrian routes may be included and built by the developers but in poor weather, the dark winter months and for children in their cars and further impact on the already congested road network.

There was **no response** to our Objection and we have subsequently found out that there is a plan for an undisclosed road onto Harts Hill which connects Upper Bucklebury, Cold Ash and Bradfield indirectly to Thatcham.

They also provide access to the M4 at Chieveley and Theale and act as a "rat run".

Cold Ash has no footpaths and a School where cars regularly park in the road and children are offloaded - this is unsafe. There are small Villages on B-roads which are in poor repair and are lined by Schools i.e. Cold Ash, Upper Bucklebury, Bradfield.

Flood Risk (SP6) - Recent flood alleviation works to the North of Thatcham have been put in place to protect houses in the areas most severely affected by the 2007 flooding event. The events will only increase. Whilst there are proposals for surface water down into the valley (SUDS) they are not designed to support the heavy volume of water from such a development. In extreme weather events which it is recognised will only increase in frequency and intensity, SUDS will simply release the flood management scheme adding pressure on it and increasing the risk of Thatcham flooding again.

The response that **"In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures are being developed. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way, part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP."** This all sounds good but they are tested who knows if they will work. Thatcham flooded in 2007 largely because of the relatively small development significantly larger and on higher steeper ground.

Pollution – the development will generate significant levels of light pollution again impacting on wildlife and the ecology of these natural pleasures away from the area. Notwithstanding the effect for local residents on their night sky.

Pollution - the volume of homes and associated transport requirements will generate increased pollution from carbon dioxide associated with population density. The clean air experienced on the Common and the AONB currently will be a thing of the past.

The response given does not address our concerns, the street lighting you can control is one aspect, Domestic lighting (in the season) are beyond your control. Cars and central heating fumes are also beyond your control.

Rail - While Thatcham railway station is within a reasonable distance of the proposed sites there is no capacity for additional parking. There is no reference to any consideration around improving the infrastructure networks around the railway station. The creaking system will be overwhelmed and fail. The trains currently stopping at Thatcham are governed by the length of the platform. Additional trains will require a further platform extension and will require the level crossing to be closed for longer periods.

Our Rail concern is not addressed in the response however the issue of increased traffic is recognised **"TA report a concern has been raised that there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the development. Some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation measures used do show significant impacts along the A4 and Floral Way"** - it's impact is recognised but not adequately addressed.

"Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure is not supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the plan will be taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with providers"

Medical - Medical services in Thatcham Bucklebury Cold Ash Chapel Row and Bradfield Southend are already under strain. New services are included in the proposed scheme (GP surgery) however there is no obligation for these services to be provided. The need for the housing. Indeed, we believe these will wait until the demand reaches a specified level. In the intervening period existing surgeries and services already at capacity. We wonder how and when the NHS will be engaged on these people. The influx of thousands of families who will expect schools GPs and hospitals to take care of them.

Our concerns have not been addressed.

The provision of medical services is not within the gift of the Developers, only the NHS and ultimately the Department of Health control the funding for GP Practices and Dentists. These are over-subscribed in Thatcham and the surrounding districts. There aren't the Doctors, Dentists or Healthcare Professional to staff them. Don't build a future problem for existing residents that will present itself.

	<p>Observations</p> <p>These still stand, Thatcham remains a small town that has little or no investment over the years.</p> <p>By granting permission for this development the local authority is again devolving its responsibilities by placing the n infrastructure onto others. Before West Berkshire Council considers further development in Thatcham it should first c its commitment to invest in the area. Without this WBC will continue to face strong opposition to applications that see significantly while anticipating the infrastructure and investment will be made by others in their own timeframes.</p> <p>The response to our earlier submission does not reassure me, quite the contrary.</p> <p>The new undisclosed northern access from the development to Harts Hill and Upper Bucklebury giving cars access to avoid the congested A4 fills me with dread...</p> <p>We are opposing the North East Thatcham Development Proposal THA20.</p>

Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	I wish to object to WBC LPR Regulation 19 Plan Policy SP17 for the following reasons:- 1. Traffic. I'm concerned that the volume of traffic through Upper Bucklebury will increase significantly as a consequence of the development. Traffic from the new development will inevitably use the route through Upper Bucklebury as an alternative to using the main road if there is an exit at the north of the development onto Harts Hill road. There is also in the plan a proposed car park off Harts Hill road which will add to the problems of a road which is too narrow for the volume of traffic. 2. Consequential Damage to the Bucklebury Common.

	<p>With the number of additional people who would be within easy reach of Bucklebury Common it would lead to unacceptably high levels of pressure on the common and lead to unsustainable damage to an important eco system of national importance.</p> <p>3. Environment. This is the development of a "greenfield" land which has a high elevation and abuts an AONB which would have an adverse impact on the area and biodiversity.</p> <p>4. Pressure on Medical and Complementary Services. The medical and complementary services in the area only just cope at the moment so with the proposed development more people requiring these services it would inevitably lead to significant deterioration - more detail is required in the plan.</p> <p>5.Lack of Strategic Gap between Thatcham and Upper Bucklebury The development will significantly decrease the green gap between Thatcham and Upper Bucklebury and could set a precedent in the future resulting in Upper Bucklebury becoming part of Thatcham.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
Please give reasons for your answer	
4. Proposed Changes	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	No
5. Independent Examination	I am not prepared to appear at the public enquiry if invited.

Please give reasons for your answer	Please add my objections to the proposed developments being considered to the North east of thatcham. This is in n current infrastructure will not tolerate it. For starters: 1.Schools. Kennet school currently has a massive 1,815 students. Both my children attend, and they cannot even sit down anyv eat. Adding to this number from the development just will not work, has this been taken into consideration and another secondary school to the area is Shaw House, which also is already heavily subscribed. 2 Doctors.

	<p>I live very close to the proposed development. I CANNOT get a doctor's appointment booked in less than 2 weeks, unless an emergency appointment. -And a lot of the time I am unable to do this. -Again, adding more numbers to an already over-extended medical practice will help nobody. Is a new doctor's practice being built?</p> <p>3 Drainage.</p> <p>With more concrete and residencies, less water will be absorbed and have to run downhill. We all can remember the problems because of this, is the drainage system to be upgraded?</p> <p>4 Traffic.</p> <p>I live on <personal details>, just the other side of the proposed development. Some mornings the traffic is queuing for the A4 being also very busy. Adding 2,000 odd extra houses just won't work, we don't currently have good enough infrastructure in the area.</p> <p>5 Parks and green areas.</p> <p>There are not enough as it stands, and access to the closest ones from my estate (which has none) is either across the road to the station or the skate park, both posing significant risk to any children trying to access them due to traffic (see point 4).</p> <p>Thatcham has over doubled in its size in the 35 years I've lived here, with very little increase in local amenities such as schools, etc,etc. I understand more housing is needed, but this proposal will add even more strain to an already overloaded council. AHEAD!</p> <p>Please add my name to the list of those objecting to this proposal. Thatcham cannot take any further developments without adequate current infrastructure and local community.</p> <p>I do hope the council sees sense on this and decides again to refuse it.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	As a local resident, likely to be severely affected, I would like to OBJECT to this plan on the following grounds: 1. Principle - were permission to be granted the number of dwellings proposed will lead to an intolerable burden on the village. There have been a number of infill developments to the north of Thatcham over the years, as well as to many other villages in the area. Where will this all end ? As a general principle it would be better to redevelop former industrial units within current town boundaries.

	<p>The proposed site is also on the edge of an AONB and close to various SSIs - again highly questionable positioning</p> <p>2. Roads - many of the current roads in the area are either very narrow or very restricted B roads - and are already carrying intended volume. (A4, Cold Ash, Pang Valley etc) This will place new burdens of danger and emissions on the existing roads.</p> <p>3. Environment - it is undoubtedly the case that the development will completely destroy greenfield sites and their associated benefits. There is no proper mitigation plan, nor any proper offset plan. The plan is flawed in every way in this area and offers no real benefit. Given the inevitable road traffic volumes there seems to be only cursory lip service paid to increased CO2 emissions. The plan for development is an attractive one and shouldn't be carved up. Period.</p> <p>4. Services - this development and the precedent it sets will add more burden onto the provision of services in the area such as hospitals etc. How will this increased population be serviced? We are already paying the price of the extra homes built over the past 15 years that haven't had infrastructure support. Again this will exacerbate the parlous roads capacity issues.</p> <p>5. Precedent - if this is approved where next? Each approval merely encourages the next swathe of construction.</p> <p>Summary</p> <p>This plan is not fit for purpose. Too many houses are proposed, in the wrong place, with too much collateral damage, with no real benefit. It is a disaster.</p> <p>Given the current demand for new housing a more profitable approach in every way would be the redevelopment of the area. There are a number of well managed examples in the area - specifically along the A4 and along the railway line to Reading. If this plan is approved it will cause damage for generations to come and fundamentally wreck West Berkshires remaining greenfield. Those who live there.</p> <p><u>I would like to be invited to any public hearing in connection with this plan's review please.</u></p>

Please give reasons for your answer	RE: NE Thatcham Development I object to this proposed development. Here are my key concerns: <ol style="list-style-type: none"> 1 With this scale of development increased traffic pressure is inevitable. With the proposed exit on to Harts Hill and via Burdens Heath to Cold Ash/Hermitage and the M4 and via Upper Bucklebury to Chapel Row. These roads are inconsistent with encouraging the use of safe walking and cycling. 2 Harts Hill is a notoriously bad road with frequent accidents. Funnelling more traffic in this direction is dangerous. 3 I understand that more houses are needed. However, the scale of this development is wholly out of reasonable amenities to cope. It merely continues with further residential development in the Thatcham areas which lacks a

	<p>that encourages and enables green travel within local communities and a viable local economy. It appears that targets without insightful thought as to how to create viable and environmentally sustainable local communities</p> <p>4 Thatcham has been blighted by high volumes of HGVs from the Colthrope site which was a fundamental strategic lives of Thatcham residents for decades. NET development only intensifies the out of balance nature of such la</p> <p>5 Please ban HGVs accessing major truck routes via Thatcham; they should be routed east to the M4.</p> <p>6 I would like to challenge WBC statement that "The policy is likely to have a significant impact on walking, cycling did WBC arrive at this unsubstantiated conclusion?</p> <p>7 I would like to challenge WBC on the detailed plan that will result in enhanced health care facilities for a significant WBC assumptions are unsubstantiated and not evidence based and joined up with other healthcare agencies.</p> <p>8 NHS dental provision in Thatcham is wholly inadequate today. WBC have not addressed how this issue will be population.</p> <p>9 The proposed NET development will cause harm to the Bucklebury Plateau Biodiversity Opportunity Area; however of this scale and impact. This is not acceptable.</p> <p>10 This is a greenfield development within a landscape setting of the NWD AONB. The enjoyment and protection of development of this scale. I challenge WBC to provide evidence to support the claim that this development will be environment.</p> <p>11 WBC proposal of 'country parks' normally means glorified dog toilets. This is no real amenity at all; only of limited place to avoid for everyone else.</p> <p>12 The provision for all educational ages is not thought through or substantiated. Over the past 3 years 14% of early in the UK. WBC can not simply ignore the wider policy issues and provision of early years facilities and impact for many to work opportunities.</p> <p>13 The children of Bucklebury should continue to have a choice of secondary school and not be shoehorned towards no sense.</p>

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	Roads - negative impact - lack of modelling or plan for the traffic that will be pushed from the development onto Harts Hill and through the local roads in Bucklebury, Chapel Row and Bradfield Southend. The route through this will become a "rat run" to get to the M4 and Farnham on the already busy A4 will not solve this. There will be a negative impact to both Thatcham and local villages. The increase in new properties plus the associated increased in deliveries, hgv's, visitors etc will also have a negative impact on the environment.

- speeding is a huge issue in these local villages, and particularly on the road that runs from Harts Hill through Upper Southend to Common Hill. Nothing is shown in the plan help prevent this issue. Negative impact on local villages. Negative impact on road safety, both for road users and pedestrians.
- The junction where Union Road meets Common Hill, and where Common Hill then meets the A340 can not cope with particularly the A340 junction. This will be made much worse if the new houses are built and when this route becomes M4. Negative impact on road users. Negative impact on environment.
- the final stretch of Union road where it meets Common Hill is not suited for additional vehicles. It is already narrow and needs improvement. Negative impact on road users. Negative impact on road safety. Negative impact on environment.
- there appears to be little consideration for additional pollution the extra vehicles will produce. Negative impact on environment.
- there appears to be little concern for other environmental impacts additional cars will cause - noise, inconsiderate driving on residents in local area. Negative impact on road safety.
- there appears to have been very little thought on how to provide public transport so that not using a car is a sensible option for environment, local population. Negative impact on the environment.
- what is the car park on Harts Hill for if use of Harts Hill is going to be dissuaded? Negative impact on local population.
- I understand the SEA states the development will have a positive impact on safe travel. This clearly won't be the case. Negative impact on road safety as cars use country roads rather than A4. Negative impact on environment.
- I understand the SEA states the development will have a positive impact on walking, cycling and public transport. This is not how. Significant improvement in public transport needed so stop creation of driving "rat runs". Negative impact on local population and the environment.

Healthcare - negative impact

- it is already hard to get a GP appointment in this area of West Berks. Adding thousands of additional people to the situation worse. Relying on current GPs in Thatcham and local villages will not work. It will also promote the use of local GPs to proposed GP surgeries i.e. to Chapel Row. Negative impact on local population.
- proposal for GP surgery to be built isn't clear. Doesn't appear to have been discussed with local GPs, which surely has a negative impact on local population.
- how long would it take to get the surgery open? Acknowledged it is very difficult to establish a new GP surgery. Surely housing is completed. Negative impact on local population.
- this new development will rely on GP surgeries with a high elderly demographic, with higher reliance on healthcare services. This will have a hugely detrimental effect on current users. Negative impact on local population.

Environmental - negative impact

- obviously this development will have a huge detrimental impact on the local environment and ecology simply by paving over greenfield. Negative impact on environment, ecology, the AONB, local countryside, local native and protected species, on the fight against climate change.
- there will be significant protected species that will be negatively impacted regardless of measures put in place. Negative impact on environment and ecology.
- no evidence presented that it will have a positive impact, as appears to be stated in the proposal.
- replacing countryside with country parks! This appears a strange approach. Surely just leave it as countryside. Negative impact on environment and ecology.
- how will the country parks improve ecology and biodiversity? Negative impact on local ecology.
- the development should make an ecological improvement to the area, this plan doesn't clearly show any benefit. Negative impact on environment and ecology.
- a development of this size on a greenfield site will have a negative impact on national efforts to prevent climate change against climate change.
- a development of this size on a greenfield site will have a negative impact on local efforts to prevent climate change against climate change.

Education - negative impact

- the plan seems to miss significant aspect of end to end education provision. No clear plan for early years/pre-school provision, no clear plan for a secondary school. Negative impact on current population. Negative impact on overstretched education system and second provision.
- development will significantly impact secondary provision, with already oversubscribed schools. Likely to result in increased traffic on village roads. Negative impact on overstretched education system, particularly second provision. Negative impact on environment and fight against climate change.
- where will schools (if built) be placed? Obviously will need to be close to A4 and not near rural roads. How likely is it to be in the catchment?
- when will the proposed funding for school provision be made available? Surely the school(s) need to be in place prior to moving to the area.

Legal requirement - Inconsistent with current central govt guidance

- central government has removed the legal requirements for specific housing numbers to be met by councils, these are intended to understand why WBC is continuing to force through this huge development? What are the other external factors making it build between 1,500 and 2,500 houses in this area where roads, public transport, GPs and schools are already created?
- the removal of the legal requirement makes it a great opportunity to pause and produce a properly put together, more sensible plan for this area.

Character of the local area

	- this development will effectively make Upper Bucklebury part of Thatcham, eroding Upper Bucklebury village's unique potential to open up further developments that erode the countryside that defines and separates the various towns and villages from another. Ensuring villages remain just that, villages, is an important part of this part of West Berkshire. This proposal will erode the character of the area and on the local population.

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to object to the proposal to build 1500-2500 houses in NE Thatcham because I find the plan unsound. I object to the plan because the plan for secondary school provision is unsound. I have young children and I am concerned that in a secondary school there will not be space/ provision for them in local schools because the first set of houses could be not built or complete. It's also not clear how many pupils the new school is to cater for, where it will be located, the new school includes a 6th form (which I believe it will need). I can't see the evidence that West Berkshire Council education authority has made suitable school provision for the children that are likely to live in this estate or the families that remain in other parts of the estate once it's built.</p> <p>I am also concerned with how the health care services will cope with the increased demand. I haven't seen evidence of a health care assessment, and I'm concerned that Thatcham's two primary healthcare centres are already overloaded, it's significant that the waiting time for a GP appointment now than it was in 2019, how are they going to cope? Again, with a young family this is of great concern as it's difficult to get access to adequate health care services when they're needed.</p>

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I wish to object to the WBC LPR Regulation 19 Development Plan on the grounds that the plan is unsound, and will re Bucklebury, and surrounding areas, should the plan be passed.</p> <p>Thatcham and its immediate surrounding areas have had many housing developments over the last 40 or 50 years, and on agricultural greenfield land, is not in the best interest of the local population. This plan was initially brought forward requirement to provide a set number of houses each year. This requirement was dropped in January 2023, but WBC this development.</p> <p>There is no accurate up to date data to support this plan such as traffic data, education support data etc. Without current plan should not proceed: it is being presented using incorrect data. I have major concerns over nursery, primary and schools are already at capacity. The development plan lacks detail on how local education needs will be met, support</p> <p>Thatcham and the local area has seen a big increase in traffic over the years. Obviously this development will bring which the road system is not capable of supporting: no plan exists to upgrade the local road system.</p> <p>As with many regions access to GP surgeries and dental practices is difficult around the Thatcham area. The development but has very little detail on how it will be supported and funded.</p> <p>In Upper Bucklebury we have had to tolerate a poor water supply over many years. This was eventually resolved when station replaced an existing one on Harts Hill Road. I have concerns over what impact the plan will have on our water electrical supply.</p> <p>My husband and I moved to Upper Bucklebury almost 40 years ago due to its rural location and abundance of biodiversity spread of Thatcham due to many large scale housing developments, which have significantly added pressure on biodiversity. We will lose our village identity as well as the precious biodiversity; the plan appears not to care about the legally protected area. This development plan will alter the area in such a way that I feel it will never recover.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>*LATE RESPONSE*</p> <p>I wish to object to the proposed North East Thatcham Development.</p> <p>This is a major development of the largest scale and is not supported by the local community. I understand and am concerned about the impact of additional housing and understand it needs to go somewhere. However this site can not support a development of this scale.</p> <p>Specific reasons for objection include:</p> <ol style="list-style-type: none"> 1. Roads Harts Hill Road is simply not suitable for the large amount of traffic. I regularly cycle from Thatcham station to Bucklebury with the existing level of traffic. It would be intolerably dangerous with the additional volumes. I am also concerned that the routes around Upper Bucklebury will become 'rat runs' The level crossing at Thatcham already causes huge delays which will only be worsened by this development. 2. Other infrastructure The power grid, water system and sewage are all already under pressure. A development of this scale will struggle to cope. 3. Schools As far as I understand it there is no budget from the developers for sufficient schooling. Thatcham is already over capacity and children have to travel to Newbury. It is unacceptable to build new housing without schools 4. GP surgeries As above I understand there is no provision for new NHS facilities, this makes no sense to me. 5. Surrounding area The proposed area is a critical 'green lung' between Thatcham and Upper Bucklebury and an important part of the amenity. The loss of dwellings in both settlements would suffer. Similarly the loss of biodiversity would be a major negative impact. 6. "The thin end of the wedge" I am also very concerned that any form of development would end up being significantly extended as is so often the case with 'the thin end of the wedge' any consent effectively to prevent this.
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I also strongly object to this proposal for the same reasons outlined below by my husband,</p> <p>Please add my objections to the proposed developments being considered to the North east of thatcham. This is in n current infrastructure will not tolerate it.</p> <p>For starters:</p> <p>1.Schools. Kennet school currently has a massive 1,815 students. Both my children attend, and they cannot even sit down any eat. Adding to this number from the development just will not work, has this been taken into consideration and another secondary school to the area is Shaw House, which also is already heavily subscribed.</p> <p>2 Doctors. I live very close to the proposed development. I CANNOT get a doctor's appointment booked in less than 2 weeks, u emergency appointment. -And a lot of the time I am unable to do this. -Again, adding more numbers to an already ov cope practice will help nobody. Is a new doctor's practice being built?</p> <p>3 Drainage. With more concrete and residencies, less water will be absorbed and have to run downhill. We all can remember the because of this, is the drainage system to be upgraded?</p> <p>4 Traffic. I live on Archangel Way, just the other side of the proposed development. Some mornings the traffic is queuing from A4 being also very busy. Adding 2,000 odd extra houses just won't work, we don't currently have good enough infras area.</p> <p>5 Parks and green areas. There are not enough as it stands, and access to the closest ones from my estate (which has none) is either across th station or the skate park, both posing significant risk to any children trying to access them due to traffic (see point 4)</p> <p>Thatcham has over doubled in its size in the 35 years I've lived here, with very little increase in local amenities such a etc,etc. I understand more housing is needed, but this proposal will add even more strain to an already overloaded c AHEAD!</p> <p>Please add my name to the list of those objecting to this proposal. Thatcham cannot take any further developments current infrastructure and local community.</p> <p>I do hope the council sees sense on this and decides again to refuse it.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>

2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an	

<p>appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>As a resident of Bucklebury Parish I wish to raise my objections to the proposed development at North East Thattham Strategic Gap between Thattham and Bucklebury</p> <p>The land north of Floral Way has provided the gap between Thattham and Bucklebury, and breach of the strategic gap has led to the refusal of refuse planning applications in the recent past.</p> <p>Bucklebury is a rural parish within the AONB, whilst Thattham is an urban town, with Floral Way the boundary between the two. The proposed development will remove much of the strategic gap between Bucklebury and Thattham - urbanising the village and the edge of the AONB. This will have a huge detrimental effect on the landscape, light pollution, and fragile ecosystems that WBC are required to maintain. WBC are required to require the maintenance of settlements as separate entities. The proposed development will have a significant detrimental effect on the AONB and the North Wessex AONB. The natural beauty of the area will be irretrievably lost if the development goes ahead.</p> <p><u>Traffic</u></p> <p>A development of the scale proposed would lead to a significant increase in traffic, which has not been adequately catered for. The current road infrastructure will not be sufficient to support this level of increased level of traffic. It is an assumption that the A4, accessed via Floral Way; the A4 is already commonly overloaded at peak times, causing significant congestion which is experienced by both old and new residents would look to other routes. These routes would likely be through the Parish villages, particularly for rural single-carriageway roads with blind corners and many without footpaths, therefore ill-suited to coping with the increased traffic. The bus station and town centre are too far from the development, so people will continue to use their cars, further clogging the roads. The proposed development will not meet the requirements, and doing little to help WBC achieve its Carbon Neutrality targets.</p> <p><u>Education</u></p> <p>The provision for education is not clearly defined within the Local Plan Review (LPR). There are no details in the LPR on the provision for Primary Education is unclear and contradictory. Secondary school detailing is also inconsistent and incomplete. The sum of £15 million to be contributed by the developers to Secondary Education but there are no details on the location of the schools and hence no possibility of assessing its suitability.</p> <p>West Berkshire Council as an education authority has a duty to make arrangements for suitable school provision. However, the number of school years is not defined or evidenced in the LPR</p> <p><u>Healthcare</u></p> <p>West Berkshire Council and the developer appear to have neither arranged a relevant HIA nor provided evidence of consultation with local health care agencies or providers.</p> <p>The proposed North-East Thattham development site is unsuitable for NHS primary care with local practises not having the capacity to cope. The proposed development will not mitigate the burden 1500 or more new houses will make on a local NHS struggling to cope.</p> <p><u>Conservation</u></p> <p>The proposal would do significant and irreparable damage to the biodiversity and fragile ecosystems of Bucklebury and Thattham, including a number of protected species. The proposal fails to meet the WBC core objective of protecting and enhancing the natural environment and biodiversity habitats. The original Thattham Growth Plan had a vague proposal for 2 country parks inside the Bucklebury parish. Now in the updated SP17 text these parks have been downgraded to undefined 'community parks' which highlights the importance of given to protecting the natural environment and public enjoyment it.</p> <p>The LPR's own sustainability Appraisal, which suggests that SP17 will have a negative on environmental sustainability (largely by ignoring the environmental consequences in favour of social and economic benefits) show that the proposal will not analyse and address the consequences of this development.</p> <p>I feel the council should take the opportunity, as others have, to pause the plan making and to bring forward a revised Local Plan Review guidance when this comes in later in 2023.</p> <p>I would like to reiterate my objections to the proposal at Thattham North East as part of the review of WBC's Local Plan</p>

<p>Please give reasons for your answer</p>	<p>I write to object most strongly about the proposed housing development along the A4 and up Harts Hill on the following. The size of the proposed development would be detrimental to the local area for the following reasons:</p> <ol style="list-style-type: none"> 1. Traffic congestion on the A4. 2. Consequent rat-running through the villages of Upper Bucklebury, Chapel Row, and Southend Bradfield, already a problem due to accidents. 3. Lack of schooling and doctors' surgeries to cope with the extra population. 4. Destruction of the Common which increases every year, due to users not adhering to the rules. The increased population makes it more difficult and impact the wildlife.

Please give reasons for your answer	The opening to SP17 includes a commitment to masterplan the site and for the Thatcham Strategic Growth Study (TS) for the delivery of the site. As a connected point of detail, the final sentence of the first paragraph in policy SP17 does needs to be revised.

	<p>We note that the scale of development in SP17 has been significantly reduced from what is set out in the TSGS. Even if the principles in the TSGS could still usefully contribute to future proposals. That said, the TSGS's contribution on the area's historic environment is limited to only limited resonance on heritage.</p> <p>We note and support a proposed requirement in policy SP17 for a Historic Environment Strategy. However, we advise against the narrow treatment of listed buildings on the site. Linked with this it would be helpful to define the Historic Environment Strategy that this needs to be informed by heritage impact assessment, which the Council's HELAA states is required for area THA10. A Historic Environment Strategy could support effective place-shaping and enhance local character and the historic Dunston Park, Seige Cross and the land around Colthrop Manor), if it were to connect with <u>all</u> elements of the site.</p> <p>We suggest revised wording below, which that responds also to the lack of reference to archaeological assessment that is included in the HELAA associated with different sites within SP17. We note that the TSGS stage 3 report states: "In settled places in the country, archaeological remains are likely. The site displays varied potential for unearthing historical remains that indicate the presence of Palaeolithic and Mesolithic flint working, and the potential for Iron Age workings related to a series of earthenworks are visible on LIDAR scans in the north-western part of the site."</p> <p>We regard policy SP17 is unsound without suitable reference to archaeological assessment, which should also be agreed with an external adviser.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Historic Environment Strategy to demonstrate how the <u>site's historical development, archaeological remains, historic buildings, assets and parkland will inform the scheme and help to create a sense of place. It should:</u></p> <ol style="list-style-type: none"> 1 <u>be informed by proportionate heritage impact assessment, desk-based archaeological assessment and, if necessary, field-based archaeological assessment.</u> 2 <u>articulate how the proposed scheme would support an appropriate future use of the Listed Buildings in the area and how the significance (including demonstrating listed buildings in the area will be conserved and how the impact of the development will be considered).</u>

Please give reasons for your answer	I would like to object to the planned development on the north east area of Thatcham on the grounds that the plans are impact on the area Particular areas that are unsound are:

	<p>Increased traffic in the area without improved roads and junctions</p> <p>No provision for additional healthcare and schooling.</p> <p>It will have a negative effect on the environment especially Bucklebury common which is an area of outstanding natural beauty. Any development into the common will do a great deal of damage to the vegetation and wildlife.</p> <p>I have lived in this area all of my life and do not to see it ruining will another massive housing estate destroying more</p>

Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>*LATE RESPONSE*</p> <p>As a resident of <Address Redacted> I would like to share my objections to the Thatcham North East Development. Due to the need for increased housing in West Berkshire and government targets, the chosen site for such a large project appears to be unsound. I am strongly against the proposals and believe that they should be reconsidered.</p> <p>Thatcham already has a high flood risk, with alleviation systems being created. This risk would predictably increase with the proposed systems in the proposed site area and the movement of ground, alongside the residential streets. The natural landscape and ANOB around the proposed site, would definitely be negatively affected by the project. Reduction of green space shows a negative impact on wellbeing, physical opportunities and natural ecosystems.</p> <p>Noise, light and air pollution would increase. Traffic congestion through Thatcham on the A4 and on the route to the M4, particularly at peak times, and especially when there are difficulties on the M4. It is difficult to see how this could be alleviated. The need for this increased volume of traffic, more roundabouts, widened carriageways and daily disruption. There would be a negative impact on the quality of life of present Thatcham residents.</p> <p>Demands for services such as dentists, GPs and pharmacies would be unprecedented. The present situation is already difficult. The budgets are increasing. Any proposed influx in residents would raise concerns regarding the proposal of only one secondary school.</p> <p>It has previously been agreed that the land between Floral Way and Bucklebury provides a natural gap, creating a conservation area. The elevation of the land suggests the possibility of three residential areas that would loom over the rest of Thatcham.</p>

	<p>than part of a connected town. The sheer size of the proposal would undermine the present town. Thatcham already has a high street and needs a different focus to improve its infrastructure, such as developing the high street and sports facilities. What other possible sites are there in West Berkshire that would not create the same negative impact on the surrounding villages?</p> <p>As already stated, I am strongly opposed to the proposals and hope that you listen carefully to the voice of the residents of the surrounding villages. I urge you to rethink and stop these plans.</p>

<p>Please give reasons for your answer</p>	
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>Traffic. There will be a significant, and potentially dangerous, increase in the traffic on the rural roads through Bucklebury from the site onto Harts Hill, but no wider traffic modelling is available. WBC assesses that there will be some displacement of traffic on other roads, but this will have a positive impact on road safety. Given the nature of these roads it is hard to reconcile a vast increase in traffic with a positive safety impact. Traffic flows over areas such as the Thatcham level crossing, through the M4 and A34 will just cause gridlock and unmitigated pollution in all areas.</p> <p>The plan falls dramatically short in this area.</p> <p>Healthcare. There is no detail into strategic healthcare planning included in the proposal. Given the development's proximity to the site, it is essential to include a Health Impact Assessment (HIA), but this does not appear to have been completed. There is little chance of a new HIA being commissioned, so the households within the site will have to be merged into already overstretched local practices. A new dental practices in the Thatcham area.</p> <p>The proposal fails to address any form of primary healthcare provision requirement.</p> <p>Environment. The proposed site will cause permanent damage to the Bucklebury Plateau Biodiversity Opportunity Area and development in the setting of the North Wessex AONB, and cause detrimental impacts to legally protected wildlife. The scale of these far reaching and irreversible effects, and the LPR's own sustainability appraisal accepts that SP17 will have a negative impact on sustainability. It is shameful that WBC entertain a proposal with no concrete mitigations for the devastation that would be caused. The vision for Bucklebury Common necessitates the minimising of extra human pressures upon it. By way of contrast, SP17 would cause an overspill of people to wreak havoc with the fragile ecosystems of the Common. The site would forever be a scar on the environment of the AONB. The proposal fails to meet the strategy to meet the requirement to achieve the required biodiversity net gains.</p> <p>The proposal fails in all areas of protecting the environment generally, and in legally required areas to improve biodiversity. There are no serious attempts to investigate, analyse and address the consequences of this proposal. It is unsound in this area.</p>

	<p>Education. There is no end to end plan for education within the plan. The plan does not provide evidence of the education plan, school location, the number of Form Entries at any school, timing of funding, and whether any funding is sufficient to provide education.</p> <p>It appears that less than a 6FE school is unsustainable, so it not clear as to what the education plan is. The current plan does not have enough houses to justify a new secondary school, so pupils would have to be crammed into already overstretched facilities. Thatcham's education problems rather than provide any form of answer. It is sadly laughable that the plan fails to detail any predictions for education demand, or predictions of the long term capacities of local schools. Obviously if the schools facilities (such as sports fields) would not be available to the community.</p> <p>WBC has a duty to make arrangements for suitable school provision. The LPR fails to provide evidence as to how this duty is as such is unsound in another major area.</p> <p>On 6th December 2022, the Secretary of State for Housing and Communities detailed that the housing number should be a starting point and not be mandatory, and that Planning Inspectors should no longer override sensible local decision making in favour of local constraints and concerns.</p> <p>The NPPF consultation which ran until yesterday also focussed on the need to take into account the character when planning to accommodate housing. Many sensible local authorities paused their plan making process accordingly. It would make no sense as this proposal might be trying to fit (badly) a need that is no longer present.</p> <p>I urge WBC to reconsider this unsafe plan. It is unsound in too many areas with too many questions unanswered.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	The Sustainability Appraisal of Policy SP17 is so inadequate that it does not comply with the requirement of Paragraph 204 of the Assessment of Plans and Programmes Regulations 2004: "The report shall identify, describe and evaluate the likely significant effects on the environment of - (a) implementing the plan or programme; and (b) reasonable alternatives taking into account the objectives and the geographical scope of the plan or programme." Many of the 'scores' for the 'Effects of Policy SP17 on SA Objectives' are not justified by what is actually contained in the Sustainability Appraisal with the supporting evidence supplied with the consultation or provided by Thatcham Town Council in these representations.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a	No

<p>minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>The sustainability appraisal of Policy SP17 is extremely superficial, and provides no evidence to support the assessment and "should" are used to justify a benefit, when there is no evidence to support this.</p> <p>The assessment within the SA/SEA is inconsistent with the assessment for site THA20 (the previous name for NE THA HELAA 2020 (referenced in paragraph 6.55 of policy SP17).</p> <p>There is no appraisal whatsoever of the viability and accuracy of the points in the policy. Thatcham Town Council is providing justifications for the following:</p> <ul style="list-style-type: none"> - The provision for land for a secondary school is substantially below the minimum in West Berkshire Council's own policy for funding. - The health centre also appears to be too small to be viable, and West Berkshire Council has not complied with its funding policy. - Policy SP17 does nothing to rectify the current deficit of infrastructure in Thatcham, let alone provide the additional infrastructure for additional new residents. <p>These issues are considered in detail in specific representations by the Town Council.</p> <p>A detailed analysis of the sustainability appraisal of Policy SP17 is provided in the table below. The first six columns are the Sustainability Appraisal, and the last two columns are the comments of Thatcham Town Council and its assessment of the effects of the policy.</p> <p><See attachment - Thatcham Town Council_SP17 SA/SEA></p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	N/A
<p>4. Proposed Changes</p>	<p>A proper sustainability appraisal of Policy SP17 needs to be undertaken, followed by a new assessment of the reasons for the need (at different sites). The results need to be reflected in main Sustainability Appraisal / Strategic Environmental Assessment Tables 30 and 31).</p> <p>As justification, the Examination should consider whether the assessment of SP17 in the Sustainability Appraisal is consistent with the assessment of site THA20 in the HELAA.</p>

5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	<p>Thattham Town Council is the principal representative body of the community and is the location of only new strategic site allocation in the draft Local Plan. The development for development is reliant on having adequate infrastructure. However, the infrastructure promised in the current Local Plan has not materialised, and would not be delivered by the policies in the draft Local Plan. The Town Council can provide local insight to the community of Thattham, and particularly on the substantial deficit of infrastructure in the local area. We are happy to elaborate on its other concerns about the current proposals for the Strategic Site Allocation, as described in these representations.</p> <p>The Town Council anticipates that changes necessary to the draft Local Plan in relation to site allocations are greater than could be addressed through 'main modifications'. If the Council is minded to consider recommending 'main modifications' to policy SP17 and related Policies, it would welcome the opportunity to provide its perspective on what changes are required.</p>

<p>1. Do you consider the Local Plan Review is legally compliant? * Yes * No</p>	
<p>Please give reasons for your answer</p>	N/A
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>Paragraph 16 of the NPPF (July 2021) states that: "Plans should: d) contain policies that are clearly written and unambiguous so that the decision maker should react to development proposals".</p> <p>The word "will" has many different meanings when it forms part of a modal verb, including:</p> <ul style="list-style-type: none"> • To issue commands, to express intention or determination; • To make requests, or invite; • To wish, desire or want. <p>Within the draft Local Plan, the word "will" is used with all three meanings. In some cases, the intended meaning is clear. This leads to considerable ambiguity, and the risk that the policy could be interpreted in the future in ways that are not intended or that the policy could be challenged through planning appeal.</p> <p>This ambiguity exists throughout the draft Local Plan, but the concern of Thattham Town Council is focussed on policy SP17. The Policy refers to the "Thattham Strategic Growth Study provides guiding principles for the delivery of the site". This is a study of the Past, Thattham Present and Thattham Future. Presumably, only the last of these is relevant to Policy SP17, so this</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	

Please give reasons for your answer	N/A
4. Proposed Changes	<p>It is necessary to replace the word “will”, where the intended meaning is a commitment or obligation. The two possible alternatives are “shall” and “must”. We prefer the use of “must”, as recommended in ‘The Office of Parliamentary Counsel: Drafting Guidance’; June 2020. https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/892409/OPC_drafting_guidance_June_2020-1.pdf (retrieved 12/02/2023) <see attached Town Council OPC drafting guidance June 2020></p> <p>Policy SP17 North East Thatcham Strategic Site Allocation</p> <p>Land as shown on the Policies Map is allocated for a sustainable low carbon, urban extension comprising of distinct landscape and connected and contributing to Thatcham, and woven through with natural habitats and links. The site is to be delivered as a whole to achieve a comprehensive development. The provision of all infrastructure, services, open spaces and co-ordinated. The Thatcham Strategic Growth Study Stage 3 Report Thatcham Future provides guiding principles for proposals <u>must</u> will demonstrate that these guiding principles have been positively responded to.</p> <p><i>[NOTE: we are unclear how “positively responded to” would be interpreted in planning policy terms, especially as the site was for 2500 houses]</i></p> <p>Homes</p> <p>The site is to be allocated for approximately 1,500 dwellings which <u>are expected to</u> will be completed within the period of 5 years. <u>must</u> will comprise of a housing mix which complies with the housing mix contained in Table 3 of Policy SP18. In addition:</p> <ul style="list-style-type: none"> • 40% of dwellings <u>must</u> will be affordable housing; and • 3% of dwellings <u>must</u> will be delivered via serviced custom/self-build plots. <p>Community</p> <p>The site <u>must</u> will provide:</p> <ul style="list-style-type: none"> • Local centres providing local retail facilities and small-scale employment for community use (approximately 1,100 sq. metres); • 450 sq. metres GP Surgery to be offered to the Buckinghamshire, Oxfordshire and Berkshire West Integrated Care System; • Early years provision; • A 2.5 FE primary school on site and sports infrastructure requirements of the school, land to be provided and built out; • Secondary provision - Land to meet the impact of the development. The nature and cost of the mitigation <u>must</u> will be studied, undertaken at the applicants expense and prepared in collaboration with the Council and local stakeholders; • 1,200 sq m community indoor facility to be used for sport and community uses with a variety of room sizes (cultural, meeting, etc.); • Outdoor formal and informal sports pitches and areas to meet the identified need of the development; • Open space to meet the needs of the development in accordance with Policy DM41; <p>Green Infrastructure</p> <p>The site <u>must</u> will provide a comprehensive green infrastructure network which will take advantage of the landscape features of the site. This network will comprise:</p> <ul style="list-style-type: none"> • A new community park linking Thatcham to the North Wessex Downs AONB; • Greenways which connect through the site to the park, facilitate connection to the AONB, and include leisure routes; • A comprehensive network of other accessible routes and connections within the development which provide walking and cycling routes; • Existing and new Public Rights of Way; and • Retained and new trees, hedgerows and other appropriate native planting which contribute to biodiversity net gain. <p>Transport</p> <p>Measures <u>must</u> will be included to improve accessibility by, and encourage use of, non-motorised transport modes. A detailed transport strategy will provide detail on how this will be achieved, including:</p> <ul style="list-style-type: none"> • Active travel improvements on routes between the site, Thatcham town centre and the railway station; • A vehicular through route; • Sustainable transport through routes; • Mitigation of the development’s impacts on the highways network with improvements to existing junctions where necessary and new access points for all forms of movement and transport to the site at locations to be agreed with the planning authority; • How adverse impacts on air quality will be minimised. <p>Sustainability</p> <p>Development of the site <u>must</u> will be <u>in accordance with</u> supported by a Sustainability Charter which will establish how the site will be achieved. This will be informed by:</p> <ul style="list-style-type: none"> • An Energy Strategy which <u>must</u> sets out measures to achieve a model low carbon development (following the requirements of Policy SP5 with Policies SP5 and DM4, including: <ul style="list-style-type: none"> • net zero carbon (regulated and unregulated energy) emissions for dwellings; • BREEAM ‘excellent’ non residential buildings; • on-site renewable energy to assist in the delivery of a net zero carbon neutral development; and carbon offsetting. • An Integrated Water Supply and Drainage Strategy which <u>must</u> will set out: <ul style="list-style-type: none"> • measures to ensure the provision of adequate and appropriate infrastructure for water supply and waste water treatment.

	<ul style="list-style-type: none"> • surface water management approaches that could deliver net gain for Thatcham town, including use of on-site SuDS). • An Ecology Strategy which <u>must</u> will set out: <ul style="list-style-type: none"> • a Biodiversity Net Gain Strategy to show how net gain will be achieved including through habitat restoration and linkages; • how priority habitats and ecological features will be protected and enhanced; • the creation of new ecological features; and • a site-wide management plan. • A Green Infrastructure Strategy which <u>must</u> will show how a network of multifunctional green infrastructure will be established; • A Public Rights of Way Strategy <u>which must</u> to demonstrate how existing Public Rights of Way will be protected and new ones will be established, including bridleway links and safe crossing points. • A Lighting Strategy which <u>must will</u> include consideration of dark skies, particularly in relation to the nearby North Downs Way, and measures to mitigate the impact on biodiversity. • A Landscape and Visual Impact Assessment (LVIA) in accordance with the Landscape Institute Guidelines for Landscape Assessment 3rd ed. 2013. This will inform the final capacity, development, design and layout of the site and requirements for the provision of public open space. The LVIA will be informed by the Landscape Sensitivity Assessment (2019). • A Mineral Resource Assessment (MRA). • A Historic Environment Strategy <u>which must</u> to demonstrate how the listed buildings in the area will be conserved and development on their settings has been considered. <p>A Construction and Operations Management Plan (COMP) shall accompany any planning application on the site. The COMP shall include a pipeline from operational works, including the provision of an appropriate buffer.</p> <p><i>[NOTE: This final paragraph should not be a sub-bullet of Sustainability]</i></p>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	<p>Thatcham Town Council is the principal representative body of the community in the area. The location of only new strategic site allocation in the draft Local Plan. The need for development is reliant on having adequate infrastructure. However, the infrastructure promised in the current Local Plan has not materialised, and would not be delivered by the policies in the draft Local Plan. The Town Council can provide local insight to the examination of the draft Local Plan for Thatcham, and particularly on the substantial deficit of infrastructure in the local area. We are happy to elaborate on its other concerns about the current proposals for the Strategic Site Allocation, as described in these representations.</p> <p>The Town Council anticipates that changes necessary to the draft Local Plan in relation to site allocations are greater than could be addressed through 'main modifications'. If the Council is minded to consider recommending 'main modifications' to policy SP17 and related Policies, it would welcome the opportunity to provide its perspective on what changes are required.</p>

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.	

* Yes * No	
Please give reasons for your answer	<p>The North East Thatcham Strategic Site Allocation is located within 1.7km of the Floodplain Special Area of Conservation (SAC). The size of the allocated site and its proximity to the SAC would trigger the need for a Habitat Regulations Assessment (HRA) to determine if the development of the site could have any impact on the SAC. The allocated site is covered by the Habitat Regulations Assessment of the West Berkshire Core Strategy (West Berkshire Council, 2010) and therefore there is no clear evidence that the allocation would not have an impact on the SAC.</p> <p>The site borders six LWSs all comprising woodland, the majority of which are Ancient Woodland. Part of the western side of the site supports the UK Biodiversity Action Plan Priority Habitat Wood-pasture and Parkland and therefore has the potential to support a range of trees. There is a significant risk of the woodland/parkland habitats being damaged or degraded should the site be developed due to potential construction impacts and increased pressure and threats from anti-social behavior, vandalism and fly-tipping. Sites of Special Scientific Interest (LWS) are at risk of being enveloped by development which would leave them in small areas of woodland. We would also like to see provisions of suitable greenspace, etc, to mitigate the impact on designated sites, especially associated with increased development within close distance of designated sites with highly sensitive ground nesting birds.</p> <p>We could not find ecological surveys or assessments for the proposed allocation to determine the potential impact on designated sites or identified the potential for protected species. Para. 158 of the NPPF requires Local Planning Authorities to base local plan policies on <i>up-to-date and relevant evidence</i> ... As such surveys are required to inform judgement on the scale and capacity of development sites. We consider this particularly important where there are designated sites such as the SAC and LWS's. The potential lack of ecological surveys could conflict with the NPPF and could result in allocations being found unsound.</p> <p>BBOWT believe that biodiversity has not been considered sufficiently in allocations and it is unclear how an allocation of this scale could be developed without a significant impact on the SAC.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review

1. Do you consider the Local Plan Review is legally compliant?	
* Yes	
* No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.	
* Yes	
* No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.	
* Yes	
* No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.	
* Yes	
* No	

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>I would like to formally register my objection to WBC LPR Regulation 19, the proposed development of 1500 to 2500 as I find it completely unsound for the following reasons:</p> <ol style="list-style-type: none"> 1. It will dramatically reduce the greenbelt between Thatcham and Upper Bucklebury. 2. The rural nature of this area would be completely lost with Upper Bucklebury becoming part of Thatcham. 3. It would be a massive over development of our beautiful countryside in an area which consists of rolling hills and fields. If large scale are approved there will not be any open rural areas left for future generations to enjoy. 4. The proposed land is not particularly suitable for development as it is very hilly land and has had issues as a flood plain. 5. The view that Thatcham is best placed to take a development of this size in this location is misplaced, un-proven and wrong. 6. According to the Transport Assessment paragraph 3.26, <i>'The access arrangements for the Northern end of the Northern junctions on both Floral Way and Harts Hill Road. Results from the modelling suggest that these will not cause problems for this so I am unsure as to why this has been stated. Please can you share these with me? How can increased traffic on an already dangerous and busy road (without the development), be seen as not causing a problem?'</i> 7. I am also aware that there are drawings showing a new car park on Harts Hill. This again will increase traffic to an area which is highly likely to promote anti-social behaviour, illegal activities, fly tipping and littering which we see regularly on Bucklebury Hill. 8. In terms of <i>'reducing accidents and improving safety'</i> your assessment has concluded that <i>'the policy is likely to have a significant positive impact on walking, cycling and public transport as safe travel will be critical to the design of the site'</i>. Also regarding <i>'increasing opportunities for walking, cycling and public transport'</i> your assessment concluded <i>'the policy is likely to have a significant positive impact on walking, cycling and public transport designed with these in mind'</i>. I wholeheartedly disagree with both of these assessments and I have concerns with the assessment. Please can you provide me with the evidence and conclusions for both these assessments? Also, it's not just about the development, it's about the surrounding areas, villages and community which exist today and have done for years. What assessment has been done for these with the increased traffic? 9. Further to the above, this development will have a significant impact on traffic levels and the associated pollution to be increasing: <ul style="list-style-type: none"> • Traffic and speeding through Upper Bucklebury, which is already a significant and serious concern, especially along this road to the Primary School. • In particular the triangle containing my house, P&T panel Beaters and Sarb Garage, there are no paths, it is significant that increased traffic would result in harm to pedestrians. • Traffic from Thatcham through Upper Bucklebury to Chapel Row on roads which are not designed for large traffic volumes. • Increased traffic through ALL the surrounding villages in general, especially as there is a plan for an exit at the top of the village. This will significantly increase traffic towards Upper Bucklebury, Chapel Row, Bradfield, Cold Ash and Hermitage. <i>'displacement of A4 traffic onto wider rural routes such as Upper Bucklebury'</i>. This is a total understatement and a concern for road safety, especially as the roads are already inadequate, have no pavements and are extremely dangerous. The potential for serious/fatal accidents is already high and this proposed housing development and exit will mean a significant increase in the number of accidents. • Traffic on the route into Thatcham and Newbury. These roads approaching the station are already heavily congested and an event of any minor traffic disruption. 10. This level additional of housing will inevitably have an adverse impact on local facilities, schooling, medical and welfare services which are overstretched. 11. Regarding healthcare, there is a significant lack of detail around strategic healthcare planning and the NE Thatcham area. I am aware, neither WBC or the developers have arranged or published a prospective Health Impact Assessment for this development. There is no engagement between the North-East Thatcham Development Consortium and local general practises. Why hasn't a new GP site being available will result in the three existing practises in the area being overstretched even further? Why has not provided evidence for the provision of a viable primary care medical facility. To add to this Thatcham Dental Practice providing dental care for the local population, this will also get worse with the proposed development. 12. Regarding the environment, there will be damage to the Bucklebury Plateau Biodiversity Opportunity Area and the surrounding countryside. This development will also destroy the enjoyment of the local countryside by local communities in terms of Downs AONB and will cause negative impact to legally protected wildlife. There is no evidence to support claims that the development will have a positive impact on the environment but instead it will have a significant and serious negative impact on the overall environment and sustainability. Environmental sustainability is defined as: <i>'the ability to maintain an ecological balance and conserve natural resources to support the wellbeing of current and future generations'</i>. I am honest to say that WBC is not protecting the sustainability of our precious environment. In addition, as far as I am aware there is no assessment that has been done to analyse and address the negative environmental consequences. Why not? 13. Regarding education, within the Local Plan Review the provision for Nursery, Early Years, Infant and Secondary school education has been clearly defined. The provision for Primary and Secondary school education is unclear and contradictory. WBC, the developers and the local community have not provided any evidence to support the provision of a viable primary care medical facility.

	<p>duty to make arrangements for suitable school provision. How this obligation will be met across all school years has the LPR. The plan for the schools needs to take priority and should be confirmed before any housing development is likely that houses will be built and no additional school provision will be provided, leading to oversubscribed schools and for our children. The LPR talks of provision of school fields however no evidence for funding or a suitable location (a space and air polluted A4 does not suffice as suitable) has been identified by the WBC or NE Thatcham Development Committee.</p> <p>14. The development will significantly increase the noise and light pollution to the Bucklebury residents. There are no other options.</p> <p>15. There is no evidence that this development will enhance Thatcham town centre (or the area in general).</p> <p>16. It is not likely to attract new businesses to the area or create or significantly increase employment.</p> <p>17. The local shop and pub are unlikely to benefit. The local shop is under significant threat as the new development will take up the site.</p> <p>18. There is now particular focus within the Consultation National Planning Policy Framework on taking into account the need to assess how much housing can be accommodated. As a result of this, several local authorities have paused their plans to await the outcome of the consultation on the basis that a <i>lower housing requirement could be applicable to the plans planned for</i>. Although I am completely against the NE Thatcham housing development, I would ask that WBC should consider (if they have), to hold on the plan and present a revised plan in line with the updated planning guidance when this comes in. To conclude, this development is unnecessary, inappropriate, and ill-conceived and should be rejected.</p> <p>Please do not take the opportunity to live and play in our beautiful countryside away from our families today and future generations. Thatcham housing development go ahead.</p> <p>Observations</p> <ol style="list-style-type: none"> 1. Why is WBC not writing to all residents to make them aware of this development and encourage/seek comments from a wider audience as possible? 2. Up to now I was under the impression that WBC was committed to keep a substantial greenbelt between Thatcham and the development. Consideration of this approval now certainly seems to totally contradict this stated commitment. 3. Finally, why is WBC are now considering this development when a previous application was rejected by the secretaries?
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>I am prepared to appear at the public enquiry, if invited.</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No</p>

2. Do you consider the Local Plan Review is sound? - Consistent with national policy:	No

the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.
 * Yes
 * No

Please give reasons for your answer

This letter is to set out my strong **Objection** to the revised Local Plan because it is fundamentally Unsound and fails

- **Democratic process and Timing**
- **Damage to the Environment**
- **Education provision**
- **Transport infrastructure**
- **Healthcare provision**

I set out further details which I hope will be fully taken into account in the sections below and wish to make **personal Inspectorate** on each of the topics. My representations are made against the tests of soundness as set out in paragraphs that plans are 'sound' if they are:

- Positively prepared — providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs in accordance with agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical, with achieving sustainable development;
- Justified — an appropriate strategy, taking into account the reasonable requirements of the community and proportionate evidence;
- Effective—deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy — enabling the delivery of sustainable development in accordance with the policies and statements of national planning policy, where relevant.

The LPR is unsound as it fails against each of the tests as set out above in numerous areas of the plan. The failings are summarised below

- **The LPR is not positively prepared** and would not achieve the goal of sustainable development for West Berkshire area.
- **The LPR is not justified.** Many of the grounds for assessment of impacts and benefits lack credibility and are not Reasonable alternatives have not been adequately explored and there is no basis to demonstrate that the allocation represents an appropriate strategy for WBC.
- **The LPR is not effective.** There is no evidence that the development of 1,300 homes at North East Thatcham within the plan period.
- **The LPR is not consistent with national policy.** In many instances the allocation for development of North East Thatcham would directly conflict with national policy, particularly in relation to landscape character and impact upon the AONB. The impact of development under policy SP17 through the sustainability appraisal is fatally flawed and is not a matter that can be corrected through modifications to the plan. The process for selection of North East Thatcham as a development site is set out below.

In addition all aspects of the plan where greenfield sites are used have a negative impact on the locations itself and will hugely affect the local environment, wildlife species and the health and wellbeing of residents with such a dramatic in result.

Overview of key subjects for my Objections are:

- Democratic Process and Timing
 - o The consultation, selections process and appraisals have all been severely flawed, lacking in evidence
 - o The decision making is undemocratic by failing to obtain full council sign off after Regulation 19 consultation and by not consulting the Secretary of State
 - o Government consultation for the NPPF is currently underway, is likely to reduce housing requirements for councils and will be by proceeding when they should pause the development of the local plan
 - o Number of houses for NE Thatcham is now "at least 1,500"— From an initial site assessment of 2,500 of which 1,200 were allocated for the period, this has now in fact increased to 1,500 houses because the Plan extends to 2039 rather than 2036 (as originally intended)
 - Environment
 - o Lack of strategic gap between Thatcham and Bucklebury—Thatcham and Upper Bucklebury will effectively merge and lose its identity
 - o Consequential damage to Bucklebury Common — increased footfall; increasing damage to an ecosystem of national importance
 - o Greenfield development abutting an AONB with no up-to-date evidence nor strategy for positive impact and overall sustainability
 - o A 'Country park' — this has a specific accepted definition which is not met in this Plan. The three small, isolated areas within the boundary have no meaningful environmental value or commitment to exclude subsequent development
 - Education
 - o Unacceptable pressure on secondary schools — Kennet is already over-subscribed; accommodation for additional schools has not been specifically stated
 - Transport
 - o A severe increase in traffic through Upper Bucklebury and other villages will be dangerous; WBC propose a new road to reduce traffic in and out of the northern end of the development, and a car park, also on Harts Hill, both highly inappropriate
 - o Severe additional congestion on the A4 will be bad for citizens and business
 - Healthcare
 - o Unacceptable pressure on medical & complementary services—additional GP surgeries are not part of NHS strategy

Specific Objections WBC's process and timings

Government consultation on the NPPF

The NPPF consultation launched in December 2022 runs until 2nd March, 2023. The Consultation Version of the NPPF (2022) Method for calculating the housing requirement (as used by West Berkshire for the regulation 19 version of the plan)

and should only be the starting point for local plan. There is a particular focus within the consultation NPPF on taking area when assessing how much housing can be accommodated.

Therefore, it is unacceptable that West Berkshire are continuing to consult on the current version of the local plan, the final version of the plan to be brought back to them for before it is submitted to the Planning Inspectorate for examination.

On the back of this announcement, several Local Authorities have paused their plan making process whilst they await guidance on the basis that a lower housing requirement could be applicable to the plans than the one currently being planned.

We feel that the council should take the opportunity, as others have, to pause the plan making and to bring forward a new local plan with updated planning guidance when this comes in later in 2023.

Specific Objections: Healthcare provision

The North-East Thatcham development plan (SP17) proposes a 450 sq m primary healthcare facility with the suggestion to refer the proposal to the Buckinghamshire, Oxfordshire and Berkshire West Integrated Care Board or other such appropriate body. However, there is no detail or insight into strategic healthcare planning.

Proposals for a major development that is likely to have a significant health impact in relation to its size and location, require a Health Impact Assessment (HIA) in accordance with the current guidance from Public Health England. To date, no HIA has been carried out. How the proposals for development have been discussed with health service providers regarding impacts on primary care is not clear. Development proposals should demonstrate how the conclusions of the HIA have been considered in the design of the development. It is of concern that neither V&A nor the developers appear to have arranged or published a prospective HIA specific to the proposed development. Public Health England and private stakeholders respectively, appear to have arranged or published a prospective HIA specific to the proposed development.

Tackling health and wellbeing requires a multi-agency approach. The Berkshire West Health and Wellbeing Strategy was developed by the Reading, West Berkshire and Wokingham Health and Wellbeing Boards together with the Berkshire West Health and Wellbeing Consortium. Developers are encouraged to engage with the healthcare providers at the earliest opportunity in order to determine the impact of the development associated with new development. It is of concern that there appears to have been no direct engagement between the North-East Thatcham Development Consortium and local general practices.

Few new GP practices are commissioned by NHS England, even where they consider there to be patient demand for a new practice. Figures of patients registered in the NHS Berkshire West Clinical Commissioning Group (CCG) confirm there is an ever increasing demand in areas of the country. There is therefore no realistic prospect of a new GP practice being established in Thatcham or in the future.

GP practices look to create efficiencies and economies of scale to make general practice more financially sustainable. It would extend the range of services and primary healthcare professionals available on a single site. It would make no financial sense for an existing local GP practice to set up a branch surgery on the proposed new development because of the additional costs and encumbrance working across two sites.

There has been no approach by WBC or the developers to any local GP practice to discuss an appropriate site, floor space or more practices could relocate. An enlarged primary healthcare site is required and might be better located close to the centre of the population to access and minimise traffic as the proposed NE Thatcham development is peripheral to the centre of the population. The proposal by Thatcham Town Council but has not been suggested in the sustainability appraisal of site options. Local practices are not suitable for an inadequate 450 sq m floor size proposal which they only discovered with the SP17 Policy of December 2022, Appendix 1.

The proposed North-East Thatcham development site is covered by the existing practice boundaries of Thatcham Moor (north of Chapel Row), Burdwood Surgery (east of Harts Hill Road) and Chapel Row surgery (the whole area). All three practices are run independently of each other, and their combined lists include approximately 27,800 patients per GP. Newly registered patients moving into housing developments tend to make a greater demand on primary care. There are more young children, a higher maternity workload, less local extended family support and there is initially a higher demand for primary care and repeated temporary pharmacy closures in Thatcham have further exacerbated pressure on primary care locally.

Thatcham dental practices are unable to provide dental care for the whole population with a significant minority of patients registered for NHS and private dental care. Thatcham Vision, endorsed by WBC in 2016, confirmed only 60% of residents have access to a dentist (with 17.5% registered with a doctor outside Thatcham). There is no evidence provided that either WOC or the developers have consulted any local dental practices regarding the potential impact of increased workload resulting from additional housing.

Reviewing the scanty healthcare recommendations within the Thatcham Strategic Growth Study (David Lock and Associates 2016), the present paragraph 4.10 states: 'A dialogue with the relevant healthcare and education agencies should be established to address concerns that social infrastructure may not be provided.' The Stage 3: Thatcham Future report published in 2016 provides no further detail except the outcome of a community representatives' workshop, that the existing GP facilities are at the heart of the health centre.

Conclusion:

WBC and the developers appear to have neither arranged a relevant HIA nor provided evidence of having approached relevant agencies or providers.

They are proposing a healthcare site that is unsuitable for NHS primary care and so have not made provision to mitigate the impact on the new houses will make on a local NHS struggling to cope.

The objective of WBC and the North-East Thatcham Development Consortium to improve access to the health service through new infrastructure has not been met as they have not provided evidence for the provision of a viable primary care medical centre.

Specific Objections: Transport

1 Increased Traffic

Reviewing the comments by Bucklebury residents submitted at Regulation 18 about North East Thatcham, a recurring theme was the impact on the villages. We sought assurances and were led to understand by WBC planners that traffic from the development would be managed via the A4. This is true but what they 'forgot' to mention was a plan for an exit at the north of the site onto Harts Hill. This was first mentioned in January when the Transport assessment was published: [Phase 2 Transport Assessment Report July 2021.pdf \(west Berkshire Council\)](#)

This is serious for us because traffic from, or to, the site is only going to go in one direction from this exit —towards Upper Bucklebury. This is between the traffic going through Cold Ash and the traffic through Upper Bucklebury and Chapel Row.

The proposed development will funnel traffic from the development and, WBC predicts, - 'some displacement of A4 traffic onto Upper Bucklebury'. This would be where the roads are inadequate, without pavements and have the potential for a significant impact on increasing opportunities for walking and cycling — under 'Safe' Transport.

1 Access and junctions

The Transport Assessment says at paragraph 3.26 : *'The access arrangements for the northern end of the NET site (with right turn lanes where appropriate) on both Floral Way and Harts Hill Road. Results from the modelling suggest that...* However, the document has no modelling results for this. There are drawings for all the other proposed junctions but not?

1 Car Parks

We have also seen drawings showing a new car park on Harts Hill. The purpose is a mystery but will surely add more to an already a dangerous road and may also promote the night-time antisocial behaviour all too apparent in the car park.

1 Safe and Sustainable Transport

The Sustainability Appraisal (SA) / Strategic Environmental Assessment (SEA) which accompanies the Local Plan for North East Thatcham against key Sustainability Objectives.

Objective 4 is — *To promote and maximise opportunities for all forms of safe and sustainable transport.* The SEA makes

- *'To Reduce Accidents and Improve SafeW council Assessment - The policy is likely to have a Positive Impact on walking, cycling and use of public transport. This will be critical to the design of the site.*
- *'To increase opportunities for walking, cycling and use of public transport'*

Council Assessment — Significant Positive Impact

Council Commentary - *The policy is likely to have a significant impact on walking, cycling and public transport as the Council has to take these into mind.*

Specific Objection: Education - Schools and Sports Fields Provision

1 Schools Provision

The provision for education from Nursery, Early Years, through Infant to Secondary education is not clearly defined within the Plan. There is no coherent end-to-end plan: this therefore breaches the Council's obligations to provide education facilities for the Plan for a large new housing development is untenable.

The lack of a coherent Plan on Schools Provision across the various proposed developments also means that it is impossible to assess the impact on traffic. The siting of a secondary school to the NE of Thatcham would result in a significant increase in traffic in the area, not considered in the traffic plans and models in the LPR.

Pre-secondary School Provision:

There are no details in the LPR of the provision for Nursery or Early Years education. Policy 5P17 NE Thatcham Strategic Environmental Assessment states that 'the site will provide Early Years provision'.

The provision for Primary school education is unclear and contradictory. There is no data or evidence on the planned primary school requirements. The LPR proposes that the sum of £12 million be contributed by the developers to primary education. Even if this is available (the only data referenced is from 2011), it is impossible to assess if this is sufficient. It also does not state the location of the school or place provision. Clearly, schools need to be available before houses are built.

Secondary Education Provision:

The current situation for secondary school students from Bucklebury is that they have a choice of either The Downs or Bucklebury. Both are in the catchment area for both.

Where schools are oversubscribed those children who live nearer to the school are given precedence. This means that those from Thatcham development would be able to opt for Kennet and those from Bucklebury would then be limited to The Downs.

The LPR is inconsistent, incomplete and contradictory on the provision of secondary schooling in and around Thatcham. It is inconsistent with the supporting documentation. It proposes that the sum of £15 million be contributed by the developers to Secondary Education. It does not provide details of the location of the land to be provided and hence no possibility of assessing its suitability.

Please see the link below to The Thatcham NE Development Plan 2020 (part of the LPR Supporting documentation) <https://www.westberks.gov.uk/media/49799/Thatcham-Strategic-Growth-Study-Stage-3-Thatcham-Future/pdf/Thatcham-NE-Development-Plan-2020-3.pdf?m=63791050245970000>

The Thatcham NE development plan 2020, produced by David Locke Associates and Stantec on behalf of WBC, proposes a new (6-8 Form Entries) secondary school, half-funded by developer contribution.

Government guidelines are that Secondary Schools with less than a 6FE are not sustainable.

However, the Development Plan states that the NE Thatcham development (which proposed 2,500 houses), is not sustainable. Specifically:-

5.18 Provision of a new secondary school in North East Thatcham is an essential part of enabling growth in the town. The current provision proposed is not sufficient on its own to fill a 6-8 FE secondary school

5.19 secondary schools need to be of sufficient scale to make them sustainable and able to provide suitable facilities. A school with less than 6FE is not considered feasible for a new school to be smaller than 6FE.

With an apparent 40% reduction in the housing allocation in the 2023 LPR (2022 to 2039) to 1500 houses, a secondary school is not sustainable in this location.

Earlier in this same Thatcham NE Development Plan it was noted that the education provision exercise was based on a study in 2011. Clearly the use of 11 year old data is inadequate. The Development Plan states:

4.83 This study has not engaged in a detailed demographic prediction and modelling exercise to determine future primary school demand across the town, and has not attempted to predict the long-term capacities of existing schools. Inevitably education provision will be in more detail as any development comes forward.

The LPR Review to 2039, Policy SP17, now states that land (but not the Secondary school itself) will be provided for a secondary school.

In summary, it is therefore clear that the plan for secondary school provision is 'unsound':

- there is no satisfactory evidence of the number of pupils the school is to cater for;
- the location of a school is not clear;
- the number of Form Entries is not defined, but it is noted that anything less than a 6FE school is unsustainable;
- the timing of the funding is not clear; and
- there is no evidence that the proposed funding is sufficient to meet the Council's obligations to provide education.

Conclusion on Schooling:

West Berkshire Council, as an education authority, has a duty to make arrangements for suitable school provision. This duty across all school years is not defined or evidenced in the LPR.

2 Sports Fields Provision

The LPR talks of the provision of sports fields. This raises two issues not answered in the LPR:

- Sports fields require flat ground. The only flat area of ground in the proposed site is that which is closest to the road, the most traffic fumes.
- There is no funding earmarked for these facilities.

Although unclear, the LPR appears to assume that the school playing fields would also be available as Sports Fields. If not, then the playing fields will not materialise. Additionally, many schools are reluctant to open their playing fields to the public for other concerns.

The objective of WBC and the North-East Thatcham Development Consortium to provide sports fields has not been supported. There is no evidence for funding or for a suitable location.

Specific Objections Environmental Issues

There are a number of **serious environmental threats** posed by the proposed Thatcham North East strategic development:

- 1 Collateral damage to the Bucklebury Plateau Biodiversity Opportunity Area [see attached Ornithological Club report] and heaths, in particular the Common;
- 2 Siting a major greenfield development in the broader landscape setting of the North Wessex Downs AONB threatening the open countryside by local communities;
- 3 Causing detrimental impacts to legally protected wildlife known to be present on the site, whilst erroneously assuming that measures can be taken after development e.g. through the vague promise of a 'community park'.

Taken together, and after a thorough professional review of the background documentation provided by WBC in support of the LPR, there is no evidence to support claims that 5P17 will have a positive impact on the environment. By contrast, there is evidence to suggest it will have a significantly negative impact.

For example, the WBC states in the LPR that a Sustainability Charter is required to establish how 'policy requirements' will be met (including legally required biodiversity net gains and the anticipated overall positive impact on environmental sustainability). It is not 'informed' by various strategy documents (including one on ecology). Yet, the strategy documents either do not exist or are not available for the Regulation 19 consultation.

At least 4,000 people will be concentrated in the development site. They of course must have access to green space for recreation. The claimed provisions for green space cannot satisfy this demand on site. The original Thatcham Growth Plan had 'country parks' spaced across the top of the slope, inside the Biodiversity Opportunity Area, claiming the potential for significant recreation on its current land use. No details were provided about how they would be formed. The feasibility study by Bucklebury Parish Council, in lack of preparation for such country parks, not least that they should be merged, and properly managed and funded for recreation enhancement. Now, in the updated SP17 text the country parks have been downgraded to undefined 'community parks'. This is a commitment WBC has given to protecting the natural environment and public enjoyment of it.

Since SP17 has no proven plans for providing adequate green space and protecting biodiversity, there will inevitably be impacts on adjacent areas. Indeed, the LPR states its intent for SP17 to drive additional traffic (people and cars) into the AONB, through a network which will 'take advantage of the landscape' to 'facilitate connection to the AONB, and include leisure routes'.

Meanwhile, the management vision for Bucklebury Common is explicitly focused on not increasing human pressure on the site, working to restore and nurture.

In fact, the LPR's own Sustainability Appraisal accepts that 5P17 will have a negative impact on environmental sustainability and therefore, would result in a negative impact on environmental sustainability which would need to be mitigated. There is no evidence on any such mitigation measures: the assumption is simply that they will somehow be found during the planning application process.

However, the very same Sustainability Appraisal suggests that the 5P17 policy is likely to have an overall positive impact on environmental sustainability (by absurdly ignoring the environmental consequences in favour of social and economic benefits that are anyway high priority for the area herein).

The overall thrust of the 5P17 policy is clearly to build as many houses as possible in a small area of countryside, without regard to how the environment — human and natural — will be improved or, if not mitigated. Despite all the money spent on consultation plans and justify the 'growth' requirement, there is no evidence of any serious attempt to investigate, analyse and systemically address the impacts. Everything will be all right because their own unsubstantiated policies say it will be.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes	No

<p>* No</p> <p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>It is fundamentally Unsound and fails to deal with the following topics:</p> <ul style="list-style-type: none"> • Democratic process and Timing • Damage to the Environment • Education provision • Transport infrastructure • Healthcare provision <p>I set out further details which I hope will be fully taken into account in the sections below and wish to make personal representations to the Inspectorate on each of the topics. My representations are made against the tests of soundness as set out in paragraph 1.10 of the NPPF. It is not the case that plans are 'sound' if they are:</p> <ul style="list-style-type: none"> • Positively prepared – providing a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs, taking into account the need to meet the requirements of any agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so, with achieving sustainable development; • Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate and balanced evidence; • Effective—deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters rather than deferred, as evidenced by the statement of common ground; and • Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies of national planning policy, where relevant. <p>The LPR is unsound as it fails against each of the tests as set out above in numerous areas of the plan. The failings are summarised below</p> <ul style="list-style-type: none"> • The LPR is not positively prepared and would not achieve the goal of sustainable development for West Berkshire area. • The LPR is not justified. Many of the grounds for assessment of impacts and benefits lack credibility and are not based on evidence. Reasonable alternatives have not been adequately explored and there is no basis to demonstrate that the allocation of land represents an appropriate strategy for WBC. • The LPR is not effective. There is no evidence that the development of 1,500 homes at North East Thatcham will be completed within the plan period. • The LPR is not consistent with national policy. In many instances the allocation for development of North East Thatcham would directly conflict with national policy, particularly in relation to landscape character and impact upon the AONB. The impact of development under policy SP17 through the sustainability appraisal is fatally flawed and is not a material consideration through modifications to the plan. The process for selection of North East Thatcham as a development site is set out in the plan. <p>In addition all aspects of the plan where greenfield sites are used have a negative impact on the locations itself and the surrounding area. It is extremely disappointing that this Plan has been produced in such an unprofessional way.</p> <p>Overview of key subjects for my Objections are:</p> <ul style="list-style-type: none"> • Democratic Process and Timing <ul style="list-style-type: none"> • The consultation, selections process and appraisals have all been severely flawed, lacking in evidence • The decision making is undemocratic by failing to obtain full council sign off after Regulation 19 consultation with the Secretary of State • Government consultation for the NPPF is currently underway, is likely to reduce housing requirements for the area recklessly by proceeding when they should pause the development of the local plan • Number of houses for NE Thatcham is now “at least 1,500” – From an initial site assessment of 2,500 of v. 2019. Over the Plan period, this has now in fact increased to 1,500 houses because the Plan extends to 2039 rather than 2036 • Environment <ul style="list-style-type: none"> • Lack of strategic gap between Thatcham and Bucklebury – Thatcham and Upper Bucklebury will effectively be joined and will lose its identity • Consequential damage to Bucklebury Common – increased footfall; increasing damage to an ecosystem • Greenfield development abutting an AONB with no up-to-date evidence nor strategy for positive impact and mitigation • A ‘Country park’ – this has a specific accepted definition which is not met in this Plan. The three small, isolated settlements settlement boundary have no meaningful environmental value or commitment to exclude subsequent development • Education

- Unacceptable pressure on secondary schools – Kennet is already over-subscribed; accommodation for a has not been specifically stated
- **Transport**
 - A severe increase in traffic through Upper Bucklebury and other villages will be dangerous; WBC proposed to allow traffic in and out of the northern end of the development, and a car park, also on Harts Hill, both
 - Severe additional congestion on the A4 will be bad for citizens and business
- **Healthcare**
 - Unacceptable pressure on medical & complementary services – additional GP surgeries are not part of the

Specific Objections : Healthcare provision

The North-East Thattham development plan (SP17) proposes a 450 sq m primary healthcare facility with the suggestion to the Buckinghamshire, Oxfordshire and Berkshire West Integrated Care Board or other such appropriate body. However, **no detail or insight** into strategic healthcare planning.

Proposals for a major development that is likely to have a significant health impact in relation to its size and location, for purpose **Health Impact Assessment (HIA)** in accordance with the current guidance from Public Health England. However, to how the proposals for development have been discussed with health service providers regarding impacts on primary development proposals should demonstrate how the conclusions of the HIA have been considered in the design of the development. The impact on the health and wellbeing of existing or new communities will not be permitted. It is of concern that **neither** public and private stakeholders respectively, **appear to have arranged or published a prospective HIA specific to Thattham development.**

Tackling health and wellbeing requires a **multi-agency approach**. The Berkshire West Health and Wellbeing Strategy has been developed by the Reading, West Berkshire and Wokingham Health and Wellbeing Boards together with the Berkshire Partnership. Developers are encouraged to engage with the healthcare providers at the earliest opportunity in order to meet requirements associated with new development. It is of concern that **there appears to have been no direct engagement with the Thattham Development Consortium and local general practices.**

Few new GP practices are commissioned by NHS England, even where they consider there to be patient demand. Digital figures of patients registered in the NHS Berkshire West Clinical Commissioning Group (CCG) confirm there is a shortage in other areas of the country. There is therefore **no realistic prospect of a new GP practice being established in Thattham** in the foreseeable future.

GP practices look to create efficiencies and economies of scale to make general practice more financially sustainable and extend the range of services and primary healthcare professionals available on a single site. It would make **no financial sense for an existing local GP practice to set up a branch surgery** on the proposed new development because of the additional and staffing costs and encumbrance working across two sites.

There has been **no approach by WBC or the developers to any local GP practice to discuss an appropriate site** which one or more practices could relocate. An enlarged primary healthcare site is required and might be better located to improve access and minimise traffic as the proposed NE Thattham development is peripheral to the centre of the village to be supported by Thattham Town Council but has not been suggested in the sustainability appraisal of site options. However, with the inadequate 450 sq m floor size proposal which they only discovered with the SP17 Policy of December 2021.

The proposed North-East Thattham development site is covered by the existing practice boundaries of Thattham Mill (Harts Hill Road), Burdwood Surgery (east of Harts Hill Road) and Chapel Row surgery (the whole area). **All three practices are** two Thattham doctors' surgeries run independently of each other, and their combined lists include approximately 2700 under 2,000 patients per GP. Newly registered patients moving into housing developments tend to make a greater demand as there are more young children, a higher maternity workload, less local extended family support and there is initially a permanent and repeated temporary pharmacy closures in Thattham have further exacerbated pressure on primary care.

Thattham dental practices are unable to provide dental care for the whole population with a significant minority of patients out of area for NHS and private dental care. Thattham Vision, endorsed by WBC in 2016, confirmed only 60% of residents have a dentist (with 17.5% registered with a doctor outside Thattham). There is no evidence provided that either WBC or the developers have consulted any local dental practices regarding the potential impact of increased workload resulting from additional housing.

Reviewing the scanty healthcare recommendations within the Thattham Strategic Growth Study (David Lock and Associates), paragraph 4.10 states: 'A dialogue with the relevant healthcare and education agencies should be established as part of the process to address concerns that social infrastructure may not be provided.' The Stage 3: Thattham Future report published in 2016 provides no further detail except the outcome of a community representatives' workshop, that the existing GP facilities are at the heart of the health centre.

Conclusion:

WBC and the developers appear to have neither arranged a relevant HIA nor provided evidence of having arranged a dialogue with health care agencies or providers. They are proposing a healthcare site that is unsuitable for NHS primary care and will not mitigate the burden that 1,500 or more new houses will make on a local NHS struggling to cope.

The objective of WBC and the North-East Thattham Development Consortium to improve access to the health services in Thattham. The infrastructure has not been met as they have **not provided evidence for the provision of a viable primary care network.**

Specific Objections: Transport

1 Increased Traffic

Reviewing the comments by Bucklebury residents submitted at Regulation 18 about North East Thattham, a recurring theme is the villages. We sought assurances and were led to understand by WBC planners that traffic from the development would be managed on the A4. This is true but what they 'forgot' to mention was **a plan for an exit at the north of the site onto Harts Hill**. This was mentioned in a letter dated 6th January 2021 when the Transport assessment was published: Phase 2 Transport Assessment Report July 2021.pdf . However, the traffic from, or to, the site is only going to go in one direction from this exit – **towards Upper Bucklebury** where it will be managed through Cold Ash and the traffic through Upper Bucklebury and Chapel Row.

The proposed development will funnel traffic from the development and, **WBC predicts**, - '**some displacement of A4 traffic such as Upper Bucklebury**'. This would be where the roads are inadequate, without pavements and have the potential to be dangerous. Also point 4 below on increasing opportunities for walking and cycling – under 'Safe' Transport.

2 Access and junctions

The Transport Assessment says at paragraph 3.26 : '*The access arrangements for the northern end of the NET site proposed (right turn lanes where appropriate) on both Floral Way and Harts Hill Road. Results from the modelling suggest that the proposed access arrangements are sustainable.*' However, the document has **no** modelling results for this. There are drawings for all the other proposed junctions but why not?

3 Car Parks

We have also seen drawings showing **a new car park on Harts Hill**. The purpose is a mystery but will surely add more to an already a dangerous road and may also promote the night-time antisocial behaviour all too apparent in the car park.

4 Safe and Sustainable Transport

The **Sustainability Appraisal (SA) / Strategic Environmental Assessment (SEA) which accompanies the Local Development Plan for the allocation of North East Thatcham against key Sustainability Objectives.**

Objective 4 is – To promote and maximise opportunities for all forms of safe and sustainable transport. The following are the key findings from the assessments:

- 'To Reduce Accidents and Improve Safety'

Council Assessment - The policy is likely to have a Positive Impact on road safety as safe travel will be critical to the success of the development.

- 'To increase opportunities for walking, cycling and use of public transport'

Council Assessment – Significant **Positive Impact**

Council Commentary - *The policy is likely to have a significant impact on walking, cycling and public transport as these are key objectives with these in mind.*

Specific Objection: Education - Schools and Sports Fields Provision

1 Schools Provision

The provision for education from Nursery, Early Years, through Infant to Secondary education is **not clearly defined** in the LPR. There is no coherent end-to-end plan: this therefore breaches the Council's obligations to provide education for all children in this provision, the Plan for a large new housing development is untenable.

The lack of a coherent Plan on Schools Provision across the various proposed developments also means that it is impossible to assess the impact on traffic. The siting of a secondary school to the NE of Thatcham would result in a significant increase in traffic in the area, not considered in the traffic plans and models in the LPR.

Pre-secondary School Provision:

There are **no details** in the LPR of the provision for **Nursery or Early Years** education. Policy SP17 NE Thatcham states that 'the site will provide Early Years provision'.

The provision for **Primary** school education is **unclear and contradictory**. There is no data or evidence on the plan for primary school entry requirements. The LPR proposes that the sum of £12 million be contributed by the developers to primary education. As no data available (the only data referenced is from 2011), it is impossible to assess if this is sufficient. It also does not state how many school place provision. Clearly, schools need to be available before houses are built.

Secondary Education Provision:

The **current situation** for secondary school students from Bucklebury is that they have a choice of either The Downs or Bucklebury if they are in the catchment area for both.

Where schools are **oversubscribed** those children who live nearer to the school are given precedence. This means that those from NE Thatcham development would be able to opt for Kennet and those from Bucklebury would then be limited to The Downs.

The LPR is **inconsistent, incomplete and contradictory** on the provision of **secondary schooling** in and around Thatcham, in contradiction to the *Supporting documentation. It proposes that the sum of £15 million be contributed by the developers to secondary education. There are **no details of the location of the land** to be provided and hence no possibility of assessing its suitability.

Please see the link below to **The Thatcham NE Development Plan 2020** (part of the LPR *Supporting documentation) www.westberks.gov.uk/media/49799/Thatcham-Strategic-Growth-Study-Stage-3-Thatcham-Future/pdf/Thatcham_Strategic_Growth_Study_Stage_3.pdf?m=637910502456970000

The Thatcham NE development plan 2020, produced by David Locke Associates and Stantec on behalf of WBC, proposes a new secondary school, half-funded by developer contribution.

Government guidelines are that Secondary Schools with less than a 6FE are not sustainable.

However, the Development Plan states that the **NE Thatcham development** (which proposed 2,500 houses), **is not sustainable without a secondary school**: Specifically :-

5.18 Provision of a new secondary school in North East Thatcham is an essential part of enabling growth in the town and the proposed is not sufficient on its own to fill a 6-8FE secondary school.

5.19 Secondary schools need to be of sufficient scale to make them sustainable and able to provide suitable facilities. It is considered feasible for a new school to be smaller than 6FE.

With an apparent 40% reduction in the housing allocation in the 2023 LPR (2022 to 2039) to 1500 houses, a secondary school is not sustainable in this location.

Earlier in this same Thatcham NE Development Plan it was noted that the education provision exercise was based on **study in 2011**. Clearly the use of 11 year old data is inadequate. The Development Plan states:

4.83 This study has not engaged in a detailed demographic prediction and modelling exercise to determine future primary school demand across the town, and has not attempted to predict the long-term capacities of existing schools. Inevitably education provision will need to be planned in more detail as any development comes forward.

The LPR Review to 2039, Policy SP17, now states that land (but not the Secondary school itself) will be provided for

In summary, it is therefore clear that the plan for secondary school provision is 'unsound':

- there is no satisfactory evidence of the number of pupils the school is to cater for;
- the location of a school is not clear;
- the number of Form Entries is not defined, but it is noted that anything less than a 6FE school is unsustainable;
- the timing of the funding is not clear; and
- there is no evidence that the proposed funding is sufficient to meet the Council's obligations to provide education.

Conclusion on Schooling :

West Berkshire Council, as an education authority, has a duty to make arrangements for **suitable school provision** across all school years is **not defined or evidenced in the LPR.**

2 Sports Fields Provision

The LPR talks of the provision of sports fields. This raises two issues not answered in the LPR:

- Sports fields require flat ground. The only flat area of ground in the proposed site is that which is closest to the road, and is therefore exposed to the most traffic fumes.
- There is no funding earmarked for these facilities.

Although unclear, the LPR appears to assume that the school playing fields would also be available as Sports Fields. If not, then the playing fields will not materialise. Additionally, many schools are reluctant to open their playing fields to the public due to other concerns.

The objective of WBC and the North-East Thatcham Development Consortium to provide **sports fields has not been met. There is no evidence for funding or for a suitable location.**

Specific Objections : Environmental Issues

There are a number of **serious environmental threats** posed by the proposed Thatcham North-East strategic development:

- 1 **Collateral damage** to the **Bucklebury Plateau Biodiversity Opportunity Area** (*refer to PS1309 Val Osmond and heaths, in particular the Common;
- 2 Siting a **major greenfield development** in the broader landscape setting of **the North Wessex Downs AONB**, which will damage the character of the open countryside by local communities;
- 3 Causing **detrimental impacts to legally protected wildlife** known to be present on the site, whilst erroneously suggesting that appropriate measures can be taken after development e.g. through the vague promise of a 'community park'.

Taken together, and after a thorough professional review of the background documentation provided by WBC in support of the LPR, **there is no evidence to support claims that SP17 will have a positive impact on the environment. By contrast, it will have a significantly negative impact.**

For example, the WBC states in the LPR that a **Sustainability Charter is required** to establish how 'policy requirements for the legally required biodiversity net gains and the anticipated overall positive impact on environmental sustainability) will be informed by' various strategy documents (including one on ecology). **Yet, the strategy documents either do not exist or are not publicly available for the Regulation 19 consultation.**

At least **4,000 people will be concentrated in the development site**. They of course must have access to green space for their wellbeing. The claimed provisions for green space cannot satisfy this demand on site. The original Thatcham Growth Strategy proposed **two 'country parks'** spaced across the top of the slope, inside the Biodiversity Opportunity Area, claiming the potential for biodiversity enhancement over its current land use. No details were provided about how they would be formed. The feasibility study showed the complete lack of preparation for such country parks, not least that they should be merged, and properly managed to deliver the stated biodiversity enhancement. Now, in the updated SP17 text, the country parks have been **downgraded to uncultivated grassland**, which only proves how little commitment WBC has given to protecting the natural environment and public enjoyment of it.

Since SP17 has no proven plans for providing adequate green space and protecting biodiversity, there will be a negative impact on the environment in the surrounding visiting adjacent areas.

Indeed, the LPR states its intent for SP17 to drive additional traffic (people and cars) into the AONB. It provides a green route which will 'take advantage of the landscape' to 'facilitate connection to the AONB, and include leisure routes accessible to all'. Meanwhile, the management vision for Bucklebury Common is explicitly focused on not increasing human pressure on the site, and working to restore and nurture.

In fact, **the LPR's own Sustainability Appraisal accepts that SP17 will have a negative impact on environmental sustainability** on this greenfield site and therefore, would result in a negative impact on environmental sustainability which would need to be mitigated by whatever whatsoever on any such mitigation measures: the assumption is simply that they will somehow be found during the planning process.

However, **the very same Sustainability Appraisal suggests that the SP17 policy is likely to have an overall positive impact on the environment** – largely by absurdly ignoring the environmental consequences in favour of social and economic benefits that are outlined in other articles herein).

The overall thrust of **the SP17 policy** is clearly to build as many houses as possible in a small area of countryside, with little regard for how the environment – human and natural – will be improved or, if not, mitigated. Despite all the money spent on

	plans and justify the 'growth' requirement, there is no evidence of any serious attempt to investigate, analyse and consequences. Everything will be all right because their own unsubstantiated policies say it will be. (attachment PS1039 Val Osmond - map.pdf)

1. Do you consider the Local Plan Review is legally compliant? * Yes	No

* No	
Please give reasons for your answer	The regeneration of Thatcham Town Centre and the provision of social infrastructure in the town are recognised as important. The economic and social impacts are greater than the criterion of 'significant' in the Government Guidance "Strategic environmental sustainability appraisal". These should therefore have been considered specifically in the Sustainability Appraisal.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>The current Local Plan states in the introduction to Policy Area Delivery Plan Policy 3:</p> <p>"Thatcham town centre will be a focus for regeneration, enabling the town to fulfil its role within the District's Hierarchy of retail offer and enhancing the streetscape. The provision of leisure and community facilities for all ages will be improved in the town centre."</p> <p>The policy itself includes the following objectives:</p> <ul style="list-style-type: none"> • Thatcham's services and facilities will be improved allowing the town to fulfil its role within the District Settlement Centres, serving the local population, not only within Thatcham, but also the surrounding rural areas. • The town centre will be regenerated with the redevelopment of the Kingsland Centre driving this improvement, providing a new environment and enhanced retail offer. This redevelopment is proposed to deliver approximately 17,200 sq.m of new space including, among others, retail, residential, office and community space. • The streetscape and public realm throughout the town will be improved, along with upgrades to the A4/Bath Road to enhancing Thatcham's image. • The range of leisure facilities within Thatcham will be expanded, utilising those at the existing Newbury Leisure Facility and providing opportunities for leisure within the town centre through any future regeneration projects. <p>The Infrastructure Delivery Schedule (2013) includes the following:</p> <ul style="list-style-type: none"> • A new library is 'necessary' as 'Library needs to be about 900 sq.m larger than current provision', at a cost of £1.5m. <p>However, none of this regeneration has materialised, no new developments have materialised, and the Newbury Leisure Facility Area Delivery Plan Policy 3 from the current Local Plan is provided as Attachment 4 to these representations (see <i>attachment 4 - Town Council Attachment 4_ADPP3</i>).</p> <p>The draft Local Plan states:</p>

	<p>6.52 Thatcham has experienced rapid population growth during the post-war period, expanding more than 5 times since accompanied by infrastructure growth in transport, and a considerable expansion in the built-up area to match the population. recent decades, the provision of social infrastructure has not kept pace with housing growth.</p> <p>6.53 The vision for Thatcham contained in the Core Strategy DPD (2012) was that Thatcham town centre would be the town to fulfil its role within the District's Hierarchy of Centres by improving the retail offer and enhancing of leisure and community facilities for all ages would be improved and encouraged within the town centre. The town would be providing a range of job opportunities and encouraging residents to shop and socialise locally.</p> <p>In the January 2023 Infrastructure Delivery Plan, the new library has been replaced by 'A new library / community hub' with no indication on when this might materialise. The only other significant proposed infrastructure developments for the North East Thatcham development.</p> <p>During the current plan period, the town will have grown by several hundred dwellings due to non-strategic development of regeneration' has materialised, and if anything has degenerated – the Kingsland Centre has not been redeveloped, closed, and the library might benefit from a disabled toilet. There have been no other significant compensating enhancements.</p> <p>The premise of Policy SP17 that Thatcham is able 'to fulfil its role within the District's Hierarchy of Centres' is fundamental to Policy SP17 and its assessment in Appendix 4 of the Sustainability Appraisal either incorrectly assess or ignore the infrastructure in Thatcham, and therefore cannot have assessed 'the area's objectively assessed need'. Policy SP17 is not justified. Policy SP17 also cannot be based on proportionate evidence, and is therefore not Justified.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	N/A
<p>4. Proposed Changes</p>	<p>There needs to be a clear policy for the regeneration of Thatcham, and in particular its social infrastructure. This need must be completed in advance of any further housing development or at specified stages of construction. This could be Policy SP17 or a separate policy.</p> <p>The Infrastructure Delivery Plan is not sufficiently robust for this purpose. It is described as a 'living document', and the fact that it includes can 'die' at the discretion of the Council without any need for public consultation.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
<p>5. Independent Examination</p>	<p>Thatcham Town Council is the principal representative body of the community and is the location of only new strategic site allocation in the draft Local Plan. The need for development is reliant on having adequate infrastructure. However, the regeneration promised in the current Local Plan has not materialised, and would not be delivered by the policies in the draft Local Plan. The Town Council can provide local insight to the regeneration of Thatcham, and particularly on the substantial deficit of infrastructure in the local area. I am happy to elaborate on its other concerns about the current proposals for the Strategic Site Allocation, as described in these representations.</p> <p>The Town Council anticipates that changes necessary to the draft Local Plan in relation to site allocations are greater than could be addressed through 'main modifications'. If the Council is minded to consider recommending 'main modifications' to policy SP17 and related Policies, it would welcome the opportunity to provide its perspective on what is required.</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	Yes

6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	N/A
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by	

<p>the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>There are a number of incorrect assumptions and inadequate and contradictory information in the studies on traffic at <u>Level Crossing at Thatcham Station</u></p> <p>The lived experience of residents of Thatcham is that the location of most serious congestion is the level crossing at Heath Lane. The queue can build to more than half an hour in duration, when there is an unfortunate combination of train movements. The impact on the local community and any increase in delays is completely unacceptable.</p> <p>The WSP study does not build this into its model. The West Berkshire Local Plan Review Phase 2 Transport Assessment states "the model also indicates that these queues clear when the level crossing gates are open", which is an obvious but incorrect assumption.</p> <p>It is clear that any increase in housing in Thatcham will result in a corresponding increase in traffic over the level crossing. The queues are located at the east of the town.</p> <p>Paragraph 110 of NPPF states:</p> <p>"In assessing sites that may be allocated for development in plans, or specific applications for development, it should be taken into account that impacts from the development on the transport network (in terms of capacity and congestion), or on highway safety, should be limited to an acceptable degree."</p> <p>Thatcham Town Council is of the view that any adverse impact on the already unacceptable delays at the level crossing should be mitigated to mitigate this, because most of the journeys using the level crossing are not served by public transport and are too long to be served by a bus.</p> <p><u>Additional journeys by non-residents of NE Thatcham</u></p> <p>The traffic studies assume that any additional journeys will be generated by residents of the North East Thatcham development. The development proposes a secondary school with a large proportion of pupils who are not residents of the development. This and the development will generate a substantial number of vehicle movements during the morning rush hour.</p> <p>The "Local centres providing local retail facilities and small-scale employment for community use (approximately 1,100 sqm) will generate additional vehicle movements, although the magnitude of this is as unclear as the intended use of these facilities."</p> <p><u>Queues on Floral Way/Heath Lane</u></p> <p>Paragraphs 3.26 and 3.27 of the West Berkshire Local Plan Review Phase 2 Transport Assessment Report (July 2016) state that "traffic queues on Floral Way might extend from the A4 back to Heath Lane – a distance of a mile. If that is the case, it is unlikely to reduce traffic delays to an acceptable level."</p> <p><u>Provision (or not) of through route for traffic</u></p> <p>The Thatcham Strategic Growth Study envisages several distinct neighbourhoods, with "Public transport through-route between neighbourhoods" (Stage 3 Study, figure 64). However, the West Berkshire Strategic Transport Model – Local Plan Forecasting Report (July 2016) did not include this route in its traffic forecast (Paragraph 2.4.8, based on Section 5 of the report by Transport Planning Associates). The development proposals include a link road through the site joining the A4 at Gables Way with Harts Hill Road, and the model should account for internalisation of trips and use of the link road."</p> <p><u>Impact of Policy ESA1 (Land east of Colthrop Industrial Estate, Thatcham)</u></p> <p>Outline planning permission has already been granted for this site for B2 and/or B8 development, addressing access to the site. "The application and provision of a Traffic Regulation Order prohibiting right turn movements from the access". This is to prevent right turn movements for vehicles leaving the site and heading east along the A4, as they will need to turn left and then turn back right. This need to be taken into account in the traffic modelling.</p> <p><u>Consistency of road and junction layout</u></p> <p>The Thatcham Strategic Growth Study shows Floral Way diverted into the development between the A4 and Harts Hill Road. However, the West Berkshire Strategic Transport Model – Local Plan Forecasting Report has assumed only the current layout in its modelling.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>N/A</p>
<p>4. Proposed Changes</p>	<p>The Strategic Transport Assessment should take the issues identified in this representation into account, and the traffic assessment should be carried out. The results of the Strategic Transport Assessment should then be considered in the Sustainability Appraisal (SA/SEA), prior to the submission of the draft Local Plan.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it</p>	<p>Yes</p>

necessary to participate at the examination hearing session(s)? * Yes * No	
5. Independent Examination	<p>Thatcham Town Council is the principal representative body of the community and is the location of only new strategic site allocation in the draft Local Plan. The development for development is reliant on having adequate infrastructure. However, the infrastructure promised in the current Local Plan has not materialised, and would not be delivered by the policies in the draft Local Plan. The Town Council can provide local insight to the examination of Thatcham, and particularly on the substantial deficit of infrastructure in the local area. We are happy to elaborate on its other concerns about the current proposals for the Strategic Site Allocation, as described in these representations.</p> <p>The Town Council anticipates that changes necessary to the draft Local Plan in relation to site allocations are greater than could be addressed through 'main modifications'. If the Council is minded to consider recommending 'main modifications' to policy SP17 and related Policies, it would welcome the opportunity to provide its perspective on what changes are required.</p>

<p>Please give reasons for your answer</p>	<p>We moved to Upper Bucklebury from Newbury 5 years ago to live in a village and enjoy being part of a small community. Never would have thought that a development of this size could be built on our doorstep and could influence our life and grandchildren's.</p> <p>I understand that some(!) houses need to be built and there is a demand but to build that many in that location is a real problem.</p> <p>The biggest problem is the sheer volume that scares everyone in the vicinity.</p> <p>The developers won't care about the people already living here, they won't care how much extra pressure they put on the roads, dentists, pubs etc.</p> <p>Schools are mentioned in the development plan but would they be built before people actually move in, ready to take the children to surgery/ies to take all these families?</p> <p>To come back to our village, Upper Bucklebury with a primary school and sadly already some speeding through the village.</p> <ul style="list-style-type: none"> • would create a massive extra traffic going through our village, increasing noise and pollution levels • traffic to Thattham station is already chock a block • the boundaries of the new development are too close to Upper Bucklebury risking the village to be sucked in by Thattham • parking in Thattham is already an issue • the volume and frequency of trains going through Thattham station cannot cater for these proposed new residents • Who are these houses built for? Can the developers see 2500+ new job opportunities in the vicinity? The plan far outstrips the local economy. • there is a proposed country park. We already have one in Bucklebury. What effect would this have on that one? • traffic: there are children at Bucklebury Primary School from Thattham. Their school run would be hugely affected. What about the secondary school? • secondary school: Kennet School at Thattham is already struggling with capacity. We are in the catchment area but we don't have priority of getting a place over us as they will be built between us? Again when would the proposed secondary school affect current catchment areas?

<p>Please give reasons for your answer</p>	<p>Overdevelopment/Settlement Boundaries - In my opinion, West Berkshire Council should be protecting the wonderful the county and extending settlement boundaries into the countryside, closing the areas/gaps between our towns and (e.g. & Bucklebury) will end the separation of communities, which the current settlement boundaries are designed to do, not those communities.</p> <p>Traffic - Thatcham, but specifically the roads within the NE area of Thatcham are already loaded. And developing the area will have a impact on the traffic in the area. Unfortunately public transport is not a option for many people in this area.</p> <p>Impact of the countryside / wildlife - This is a greenfield site, and was determined so for the very reason is should be protected. I object to West Berkshire Council reviewing and potentially changing this greenfield area in the local plan.</p> <p>Education - The education / schools are already beyond capacity and increasing the NE of Thatcham would be create a have a severely detrimental impact on the education system of our local children.</p> <p>Healthcare - The proposals to increase healthcare are no sufficient, and therefore proposed land for development would be three local healthcare provisions which are already beyond capacity.</p> <p>In summary, I strongly object to the local plan review of this area, and any future proposed development of the NE T</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to you to express my concern regarding the proposed development of North East Thattham along Hart's proposed plan as it is unsound. The plan does not specify in any detail the provision of much-needed infrastructure needed even before the allocation of up to 2,500 new homes. In addition specific provision to protect the local ecology this proposal to develop a green field site adjacent to an ANOB. If my presence is requested, I am prepared to appear at the meeting.</p> <p>I am very concerned that this plan does not provide adequate healthcare provision. The area of the proposed development contains GP practices at Chapel Row, Burdwood Surgery and Thattham Medical Practice. All three practices are already over capacity and need parking. This plan needs a specific provision for an extra GP surgery not just to be provided by the Buckinghamshire Integrated Care Board but one specifically to cater for the needs of this particular development and arguably should be provided in the development, in order to meet the goals of sustainability and allow people to walk and bicycle to services. There is a need for a pharmacy and with the closure of one of the pharmacies there are currently long queues in order to obtain most prescriptions. Specific provision for services should be made in the plan to make it a viable option.</p> <p>The plan does not adequately detail provision for education in the proposed area of development. There are no details for nursery or Early Years education. While the LPR proposes that the developers contribute £12 million to primary education, this money will go to existing or new schools and when any new schools would be built or extended. Moreover, there are no details of the planned number of schools or Form Entry requirements. Similarly the plan merely suggests that the developers will provide for the provision of secondary education. However, there are no details of where additional land for schooling would be located, indeed even the timing of the funding. There is no satisfactory evidence of the numbers of pupils the school is to cater for, the desperate need of additional secondary schooling, the number of form entries is not defined in the plan and anything that is not been categorised as not sustainable by the government.</p> <p>There is absolutely no evidence that a major greenfield development abutting and adjacent to the North Wessex Downs will have a positive impact on the local environment. On the contrary, unless managed appropriately, increased human activity is detrimental to the open spaces. The management of Bucklebury Common has been working hard to restore the natural habitat and legally protected species including bats, newts and many species of ground nesting birds. While the plan intends to protect Bucklebury Common it has no mention of how the Council will manage the human and canine impact on this fragile ecosystem, litter bins or managing fires which have been increasingly frequent as a result of climate change and the ensuing dry conditions are a risk to the ancient woodlands. Without adequate management of human impact, there is a potential that the enjoyment of Bucklebury Common will be lost to future generations.</p> <p>The plan is also unsound because it does not provide adequately for traffic provision. With limited public transport options, people will have to drive. Each household will in all likelihood have at least two cars out of necessity, which would potentially increase traffic on the local roads. The plan specifically states that increased traffic from the proposed development will be encouraged to travel to Theale and Hermitage (junctions 12 and 13 of the M4 respectively) via Broad Lane and surrounding roads. These roads are paved pavements or hard verges. The small lanes surrounding Broad Lane are all single file lanes with hedging and limited parking. They are currently deeply rutted with potholes, which makes it necessary for drivers to swerve or stop suddenly making them dangerous. They are all heavily used by cyclists enjoying the countryside. Without cycle lanes, these roads will become too busy for cyclists. The negative impact of traffic emissions on children walking to school in Upper Bucklebury and Bradfield Southend has been highlighted. While the Sustainability Appraisal (SA) / Strategic Environmental Assessment (SEA) highlights the objectives of "Resilient and Safe": and "To increase opportunities for walking, cycling and use of public transport", there has been no adequate provision for footpaths, cycle lanes or adequate lighting for the current roads to cope with the higher volume of traffic.</p>

<p>Please give reasons for your answer</p>	<p>I am extremely concerned about the hideous plans to erect multiple homes NE of Thatcham.</p> <p>The facilities and infrastructure in the local area are already at bursting point, and to the point where it's becoming a have to get public transport or need to find schools.</p> <p>The stunning local conservation areas are becoming destroyed with the number of people who are accessing them will destroy both them and the local wildlife that presides there.</p> <p>The traffic already flying through the conservation areas where horses, children, deer and others roam is so high, the it now takes to drive anywhere.</p> <p>I am totally against this, and it MUST NOT be allowed to go ahead!</p> <p>It will cause many more concerns and issues for both the local community and indeed the local council moving forward.</p>

<p>Please give reasons for your answer</p>	<p>I am objecting to the plan as I find it unsound. I think this is an extremely poorly thought out plan and it is clear that it is not in any real regard for the local area and the current community.</p> <p>I am concerned by the increase in traffic that will affect travel along the A4 and at busy times all junctions on to, and about the impact of traffic that will travel up Harts Hill and either out through Upper Bucklebury and Bradfield or along Cold Ash. Through Cold Ash there are no pavements past St Finian's (I am amazed no children have been involved with parked cars to the school) . There are huge issues at pick up and drop off time with cars queuing to get in and cars trying to overtake on a blind corner. There were many accidents and issues on Harts Hill in the icy weather imagine how much more with the increased weight of traffic, not to mention the danger for anyone pushing bikes up this EXTREMELY narrow road with no pavement.</p> <p>How will traffic get across the railway crossing when we can already queue back for many minutes often almost to the point where the traffic the queues will go back to, and block up, the A4.</p> <p>I am concerned that no Health Impact Statement has been carried out and the increased pressure this development will put on GP surgeries. You often cannot get an appointment when needed so what will happen when there are more people ailing? This development have a huge impact on our hospitals as there will then be an increased overflow into hospitals and the medical help they need in the right time frame.</p> <p>I am horrified by the impact on the local environment, we have already experienced large amounts of flooding in Thatcham. To effectively concrete over the whole of one side of the valley you will just increase the run off, and the speed of the water for Thatcham.</p> <p>The effect of the spill over into the local areas is a real worry living in Bucklebury Common. We already experience a lot of motorbikes, mountain bikers and 4x4s in the common. We meet lots of people dog walking and we ourselves keep horses. During lockdown when everyone was seeking space to walk for recreation we had lots more people walking through the common this seemed a positive thing but it soon became apparent there were cars being parked all over the common (covering up the ancient surface and damaging the roots of the trees), they did not make eye contact or say hello and many did not have horses i.e. letting dogs run up which would bark and spook the horses. We keep chickens in an allotment and they are often to have come across from the paths in the common. During Covid we would find people wandering through the allotment to walk anywhere. The more people that are pushed into Bucklebury Common, the more antisocial behaviour will happen with dogs chasing horses/ animals, motorbikes frightening horses, off roaders taking to any area of the common.</p> <p>SP17 is a seriously poorly thought out policy building on green, open agricultural land and ruining yet another area of significant impact on our local ancient and protected woodland and the wildlife that is found within. There must surely be a better way for these houses.</p>

<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>1. Introduction and Executive Summary</p> <p>1.1 These representations are made on behalf of Bucklebury Parish Council (BPC) in response to the regulation 19 Council (WBC) Local Plan Review (LPR). The representations set out that there are multiple significant flaws in the review which are incapable of being remedied prior to the submission of the document for examination. The Local Plan evidence base, is fundamentally unsound for numerous reasons as set out within these detailed representations.</p> <p>1.2 These representations have been prepared with significant input from experts on a variety of technical matters. Technical by Yes Engineering in relation to highways and the Nature Bureau in relation to biodiversity and ecology and are approved by the Council.</p> <p>1.3 The representations have been informed by ongoing consultation with the residents of Bucklebury and the surrounding area, and the knowledge of the history and constraints of North East Thatcham. This has uncovered a substantial lack of logic in the plan to allocate the area to the North East of Thatcham for significant housing growth.</p> <p>1.4 At the time of these submissions, a consultation is taking place (until 2 March 2023) for proposed changes to the National Planning Policy Framework (NPPF). The potential impact of those changes in respect of the WBC Local Plan Review are discussed in subsequent paragraphs. However, the main thrust of these representations is made against the existing tests of soundness as set out in paragraph 35 of the framework. This states that plans are 'sound' if they are:</p> <p>Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs in co-operation with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so as part of sustainable development;</p> <p>Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;</p> <p>Effective—deliverable over the plan period, and based on effective joint working on cross- boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and</p> <p>Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies of the NPPF, statements of national planning policy, where relevant</p> <p>1.5 For the reasons set out within these representations, it is considered that the plan is unsound and fails against each of the tests set out in paragraph 35 of the framework in numerous areas of the LPR. The failings against the tests of soundness are set out in detail in the following paragraphs of these representations.</p> <p>1.6 The LPR is not positively prepared and would not achieve the goal of sustainable development for WBC and the surrounding area.</p> <p>1.7 The LPR is not justified. Many of the grounds for assessment of impacts and benefits lack credibility and are not supported by evidence. Reasonable alternatives have not been adequately explored and there is no basis to demonstrate that the allocation of the area to the North East of Thatcham is an appropriate strategy for WBC.</p> <p>1.8 The LPR is not effective. There is no evidence that the development of 1,500 homes at North East Thatcham is deliverable over the plan period.</p> <p>1.9 The LPR is not consistent with national policy. In many instances the allocation for development of North East Thatcham would directly conflict with national policy, particularly in relation to landscape character and impact upon the AONB.</p> <p>1.10 The process of assessing the impact of development under policy SP17 through the sustainability appraisal is flawed and the impact which can be easily remedied through modifications to the plan.</p> <p>1.11 The process for selection of North East Thatcham as a development site is severely flawed and lacks evidence.</p>

Development in the Countryside and the 'Strategic Gap'

4.23 The strategic gap between Bucklebury and Thatcham is an extremely important one. Bucklebury is a rural parish and its rural character and identities will be lost. Thatcham is an urban town. Floral Way is the important boundary between them, and it should not be breached. The Bucklebury Vision states that *local residents highly value the rural nature of the area in which they live and wish to see this for future generations to enjoy.*

4.24 All policies point to the requirement that these settlements should be distinctly separate and maintain their own character. The need for separate settlements is made even more important if the remote nature of the AONB is to be protected in accordance with the policies.

4.25 Unfortunately, the development at North East Thatcham would destroy this important feeling of separateness, with the housing estate with the rural setting of Upper Bucklebury. Although there is a "country park" strip between them, this is ineffective in maintaining the gap between the settlements. As Upper Bucklebury is lost into Thatcham, so too is the rural setting.

Siege Cross

4.26 Siege Cross is a constituent part of the site allocation at North East Thatcham, making up one of the three proposals which are the subject of developers' plans in 2015/16, but planning permission for around 500 houses was refused and dismissed on appeal. A recovered appeal decision (APP/W0340/W/15/3141449). It is puzzling that a site for 500 houses should be heavily resisted when a site promoted for a significantly larger scheme.

4.27 It may assist to reiterate some of the arguments WBC itself used to oppose the Siege Cross proposal. The elements of the case, and multiple similar points successfully deployed by WBC in refusing the Siege Cross application.

4.28 WBC Planning Officers put forward the following in the 15/00296/OUTMAJ West Berkshire Council's Statement of Reasons in relation to Landscape and Visual Impact:

Landscape and Visual Impact

The development would result in significant and demonstrable harm in terms of landscape character; settlement form; and the historic environment. In particular:

(c) The proposed development would result in harm to the character and identity of Thatcham and erode the open landscape character of Upper Bucklebury.

(d) The development would have an adverse impact on the distinctive local landscape character and appearance of the AONB the boundary of which runs some 575 metres to the north of the site.

(e) The development would urbanise the key areas of sensitivity within the Local Landscape Character Area 14F (Countryside) including: the lower slopes of an important ridge line; Big Gully, a local landmark; good views across the area and the lack of development with scattered buildings.

(f) The development would detract from the enjoyment of the character and appearance of the AONB in views from the Kennet.

...the development fails to have due regard to the sensitivity of the area to change. The development is inappropriate in scale on the whole site, and its scale in the context of the existing settlement form, pattern and character of Thatcham. The development would erode the historic landscape setting and rural context of Siege Cross Farm.

The development is contrary to guidance in the relevant landscape character assessments, and therefore fails to protect the rural character and distinctiveness. The development would erode the identity of Thatcham as being separate to that of the surrounding countryside.

...the application is contrary to the National Planning Policy Framework, the Planning Practice Guidance, Policies AD1 and AD2 of the West Berkshire Core Strategy (2006- 2026), the relevant landscape character assessments, the North Wessex Downs AONB (2014- 2019), and the North Wessex Downs AONB Position Statement on Setting (2012).

...the Council will highlight that the appeal site is largely undeveloped land outside of the existing defined settlement boundary. The Council will give evidence on the weight that should be applied to individual policies, and will demonstrate the proposal is inconsistent with the National Planning Policy Framework, Policies ADPP1, ADPP3 and CS1 of the West Berkshire Core Strategy, Policies AD1 and AD2 of the West Berkshire District Local Plan 1991-2006 (Saved Policies 2007) and emerging Policy C1 of the Housing Site Allocation Plan at the location of new development.

4.29 It is notable that WBC were particularly concerned about the effect of the Siege Cross development on the wider rural setting with National and local policies and on the AONB. However, in the SP17 proposed development, WBC proposes a site which erroneously implies that there will be no harm to it or to the wider countryside.

4.30 The Officer Report also set out commentary in relation to the impact on the North Wessex Down AONB as follows:

S.5...I set out the North Wessex Downs AONB's objections to the proposed development, which I support.

S.7...the attributes of the site and its immediate setting are recognised as key features which should be conserved and enhanced to protect the local character and distinctiveness of the landscape and the rural setting to Thatcham and the North Wessex Downs AONB.

S.10...The site makes an important contribution to the setting of the AONB and to the setting of both ecological and historic interest (Big Copse, Big Gully and Siege Cross Farm).

S.11 ... it is a 'valued' landscape within the meaning of NPPF 109 which should be protected and enhanced... which provides significant benefits. The proposed development would result in significant and demonstrable harm to a valued landscape and to the rural setting of this landscape ...the proposed development is not environmentally sustainable contrary to NPPF para 7.

S.12 ...The proposed development on the appeal site would therefore be an extensive arm into this open elevated rural landscape and is not a logical extension to Thatcham as it will intrude into an overwhelmingly rural landscape, which forms an intrinsic part of the AONB and Thatcham, well beyond a clearly defined and established landscape boundary to the settlement.

S.14...The value of the landscape is enhanced by the presence of historic assets in this case two Grade II listed buildings, Siege Cross Farm ...

S.17... adverse effect of the development on the physical and visual setting and character of the site environment... consequences of the location, extent and mass and scale of the development, nor the impact on many views...consequence, the development would result in long term major and moderate-major adverse landscape and visual effects and several additional moderate adverse effects. It is concluded that the proposed development on the appeal site would result in significant and demonstrable harm to a valued landscape and character of that landscape by:

- Harming the character, value and visual appearance of the site as part of the open countryside;*

- *Harming the landscape and visual setting of the historic Siege Cross Farm and its Grade II listed buildings;*
- *Harming the setting of the North Wessex Downs Area of Outstanding Natural Beauty..”*

S.19 *In conclusion, the Inspector and Secretary of State are respectfully requested to dismiss the appeal on unaccepted grounds.”*

4.31 It is abundantly clear that WBC’s own expert was categorical in the assessment of the damage that Siege Cross would cause. This expert opinion was repeated throughout WBC’s vigorous opposition to the site.

4.32 BPC emphasise that the Siege Cross site now forms part of the THA20 proposal. However, this current proposal is much closer to the AONB. The potential damage caused would be significantly greater.

4.33 WBC have provided no new information or analysis to overturn their earlier conclusion. If that process was sought, it is clear that the current conclusion cannot be.

Thatcham Growth Study

4.34 The three stages of the Thatcham Growth Study (TGS) are included within the evidence base for the LPR and it is the context of the LPR.

4.35 BPC understand that the promoters of the NE Thatcham site paid WBC the sum of £100,000 which was spent on a HEELA study which recommended the allocation of the site. The report contains material inaccuracies such as disqualification to properly consider the benefits; a bridge over the railway at Thatcham to replace a dangerous and crowded level crossing were alerted to this by BPC and others but declined to correct the report even though on any rational scoring scheme the result would be different.

4.36 WBC then proceeded in subsequent stages of the TGS to make NE Thatcham a condition of the work. This is a process where that evidence is collected that supports the HEELA rather than continuing to consider all options. The primary example of this is in this the consultant (ceni) were instructed in the statement of requirements to provide a vision assuming THA20 was not here. Firstly, the vision work should have preceded the site selection and secondly, the vision fails to be more than a condition made.

4.37 Overall, the serious flaws in the site selection process have led to erroneous selection of North East Thatcham. As a result, the plan is not justified and wholly unsound on this basis alone. This is not a matter which can be remedied through the evidence base in advance of examination.

4.38 BPC will continue to amass evidence on the scope, methodology and funding of the TGS to present this to the Inspector in the context of the LPR.

5. Sustainability Appraisal

5.1 BPC has serious concerns over the approach taken to the Sustainability Appraisal which accompanies the LPR. The assessment of impacts and benefits of the allocation of North East Thatcham against the sustainability objectives are seriously flawed in their rationality. As a result, the true impacts of the allocation of North East Thatcham under policy SP17 have been underestimated in the evidence base.

5.2 Paragraph 32 of the framework requires that Local Plans and Spatial Development Strategies should be informed by a Sustainability Appraisal (SA) that meets the relevant legal requirements.

5.3 The legal frameworks for SAs are set out within section 19 of the Planning and Compulsory Purchase Act 2004 which requires to prepare a plan *with the objective of contributing to the achievement of sustainable development*. Moreover, the requirements of the Assessment of Plans and Programmes Regulations 2004 states that SAs must ensure the potential environmental effects alongside social and economic issues.

5.4 For the reasons set out within this section, and other sections in these representations, it is not considered that the conclusions to all effects nor are the conclusions of the SA in respect of those impacts robust and logical.

5.5 Paragraph 32 of the framework goes on to state that the SA should *demonstrate how the plan has addressed relevant environmental objectives (including opportunities for net gains)*. *Significant adverse impacts on these objectives should be avoided where possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts cannot be avoided, mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered)*.

Sustainability Appraisal for SP17 – North East Thatcham Strategic Site

5.6 The SA sets out the assessment of the council of the development of North East Thatcham against the key SA Objectives.

5.7 In **all instances**, BPC consider that the approach taken to the assessment and scoring of the site against the SA Objectives is flawed. BPC has prepared its own analysis against the SA Objectives, and this is included with the reps at appendix 2 [see *Black Consulting (Bucklebury Parish Council)*’].

5.8 Many, if not most of the conclusions are not based on any accurate or available evidence and an accurate or realistic assessment of the site performing poorly against all SA objectives. Commentary on the assessment in relation to individual policies and implications in sections of these representations. Given that site selection should be an iterative process that is informed by the SA Objectives, the allocation to allocate SP17 is severely inadequate and must be wholly disregarded.

5.9 This is a matter of legal compliance which goes to the heart of the preparation of the plan. It is not an error which can be corrected by amendments or further update to the SA.

Reasonable Alternatives

5.10 The Planning Practice Guidance sets out the way in which the SA can assess reasonable alternatives and identify the preferred alternative as follows:

The sustainability appraisal needs to consider and compare all reasonable alternatives as the plan evolves, including the impacts of each alternative against the baseline environmental, economic and social characteristics of the area and the likely situation if the preferred alternative is adopted. In doing so it is important to:

- *outline the reasons the alternatives were selected, and identify, describe and evaluate their likely significant effects on the environment and social factors using the evidence base (employing the same level of detail for each alternative option). Critical issues where the significance of effects on the environment are set out in schedule 1 to the Environmental Assessment of Plans and Programmes Regulations 2004;*
- *as part of this, identify any likely significant adverse effects and measures envisaged to prevent, reduce and, where possible, compensate for them.*

- *provide conclusions on the reasons the rejected options are not being taken forward and the reasons for selection of the*

Any assumptions used in assessing the significance of the effects of the plan will need to be documented. Reasonable realistic options considered by the plan-maker in developing the policies in the plan. They need to be sufficiently diverse to show sustainability implications of each so that meaningful comparisons can be made.

The development and appraisal of proposals in plans needs to be an iterative process, with the proposals being revised in light of findings.

Paragraph: 018 Reference ID: 11-018-20140306

Revision date: 06 03 2014

5.11 Table 30 of the Sustainability Appraisal sets out the following in relation to Quantum of Development at North East Thatcham

[See page 21 of the attachment 'Andrew Black Consulting (Bucklebury Parish Council)'].

5.12 The conclusion against the quantum of 2,500 homes on site that it would likely to result in a **positive impact on sustainability** is wholly irrational and illogical. This is further compounded by the suggestion that a quantum of 1,500 homes would result in **elements of sustainability** which again is simply not the case.

5.13 No option for no development at NE Thatcham or a further lower amount. 1,500 dwellings is still a considerable amount for 250-500 dwellings along the southern end of the site in small areas of development adjacent to the Bath Road

5.14 BPC has undertaken a justified and accurate assessment of the impacts of the allocation of North East Thatcham. The assessment demonstrates that the approach taken by WPC lacks justification and is not positively prepared in any way whatsoever. The inspector at examination process to demonstrate that lack of rationality in approach taken by WPC in preparation of the plan.

6. North East Thatcham Strategic Allocation

6.1 The full policy wording of policy SP17 is set out below with some comments made against each section.

North East Thatcham Strategic Site Allocation

Land as shown on the Policies Map is allocated for a sustainable low carbon, urban extension comprising of development by their landscape and connected and contributing to Thatcham, and woven through with natural habitats and green infrastructure masterplanned and delivered as a whole to achieve a comprehensive development.

6.2 It is illogical that Masterplanning is yet to take place for the site and that there is no vision for how the homes will be delivered, especially as the site is sloping and its access is compromised by the pipeline.

The provision of all infrastructure, services, open space and facilities will be timely and co-ordinated. The Thatcham Plan provides guiding principles for the delivery of the site therefore proposals will demonstrate that these guiding principles have been responded to.

6.3 There is no detail on the infrastructure or other facilities. It is also clear from the viability work undertaken that the site is not deliverable adequately and there is no available evidence that the site is deliverable.

Homes

The site is to be allocated for approximately 1,500 dwellings which will be completed within the period of the plan. The dwellings will comprise of a housing mix which complies with the housing mix contained in Table 3 of Policy SP18. In addition:

40% of dwellings will be affordable housing; and

3% of dwellings will be delivered via serviced custom/self-build plots. Community

The site will provide:

Local centres providing local retail facilities and small-scale employment for community use (approximately 100 sq metres F2);

450 sq metres GP Surgery to be offered to the Buckinghamshire, Oxfordshire and Berkshire West Integrated Care System or appropriate body;

6.4 Further consideration on the viability and deliverability of the GP Surgery is set out within subsequent sections of the plan.

Early years provision;

A 2.5 FE primary school on site and sports infrastructure requirements of the school, land to be provided and delivered by the applicant;

Secondary provision - Land to meet the impact of the development. The nature and cost of the mitigation measures to be studied, undertaken at the applicants expense and prepared in collaboration with the Council and local stakeholders;

6.5 It is noted that the school provision has not been costed within the viability appraisal and therefore the deliverability of the school is unjustified.

1,200 sq m community indoor facility to be used for sport and community uses with a variety of room sizes (including a multi-use hall);

6.6 This is a substantial size for a community indoor facility and no details or costings are provided for this within the plan.

Outdoor formal and informal sports pitches and areas to meet the identified need of the development; Open spaces to be provided in accordance with Policy DM41;

6.7 Given that most of the site is on a gradient it is unclear how formal or informal sports provision will be brought forward.

Green Infrastructure

The site will provide a comprehensive green infrastructure network which will take advantage of the landscape and green infrastructure around the site. This network will comprise:

A new community park linking Thatcham to the North Wessex Downs AONB;

Greenways which connect through the site to the park, facilitate connection to the AONB, and include leisure routes;

6.8 It is unclear why links to the AONB are being encouraged as part of the proposed allocation. Given the sensitivity of the AONB then impact through an increase in access should not be encouraged. This is expanded on within further sections of the plan.

A comprehensive network of other accessible routes and connections within the development which provide direct routes to the AONB;

6.9 Given the gradient and level change across the site, it is not considered that a comprehensive network of cycle paths can be delivered.

Existing and new Public Rights of Way; and

Retained and new trees, hedgerows and other appropriate native planting which contribute to biodiversity net gain.

Transport

Measures will be included to improve accessibility by, and encourage use of, non-motorised transport modes. The report will provide detail on how this will be achieved, including:

Active travel improvements on routes between the site, Thatcham town centre and the railway station;

A vehicular through route; Sustainable transport through routes;

Mitigation of the development's impacts on the highways network with improvements to existing junctions and the delivery of new access points for all forms of movement and transport to the site at locations to be agreed with the highway authority.

How adverse impacts on air quality will be minimised.

6.10 Detailed comments on highway impact are set out in subsequent sections of these representations. BPC has significant concerns that the base for trip rates and trip distribution is highly flawed and mitigation measures will not be successful. The highway network at Thatcham is already over capacity and development of this scale will lead to severe traffic impact which would breach the requirements of 111 of the NPPF.

Sustainability

Development of the site will be supported by a Sustainability Charter which will establish how policy requirements will be informed by:

An Energy Strategy which sets out measures to achieve a model low carbon development (following the energy efficiency measures in Policies SP5 and DM4, including:

net zero carbon (regulated and unregulated energy) emissions for dwellings;

6.11 It is highly unlikely that the dwellings will be brought forward as net zero carbon and no allowance has been made for this in the Sustainability Appraisal for the site.

BREEAM 'excellent' non-residential buildings;

on-site renewable energy to assist in the delivery of a net zero carbon neutral development; and carbon offsetting.

An Integrated Water Supply and Drainage Strategy which will set out:

measures to ensure the provision of adequate and appropriate infrastructure for water supply and waste water treatment; and surface water management approaches that could deliver net gain for Thatcham town, including use of on-site water storage (SuDS).

6.12 It is unclear how any development on this site would deliver a 'net gain' for Thatcham Town in terms of drainage infrastructure within the viability report for the site.

An Ecology Strategy which will set out:

a Biodiversity Net Gain Strategy to show how net gain will be achieved including through habitat restoration and creation; how priority habitats and ecological features will be protected and enhanced; the creation of new ecological features; and a site-wide management plan.

6.13 Further comments are made on the ecology of the site within these representations.

A Green Infrastructure Strategy which will show how a network of multifunctional green infrastructure will be delivered.

A Public Rights of Way Strategy to demonstrate how existing Public Rights of Way will be protected and enhanced, and how new ones will be established, including bridleway links and safe crossing points.

A Lighting Strategy which will include consideration of dark skies, particularly in relation to the nearby North Downs Way, and measures to mitigate the impact on biodiversity.

6.14 It is clear from the wording of this section of the allocation policy that WBC accept that the site is within the setting of the North Downs Way and that this will be an element of harm (in respect of lighting) which requires mitigation. This position conflicts the position in the Sustainability Appraisal where the impact as being neutral in this respect.

6.15 It is considered that the harm to the AONB extends to a far greater impact than just lighting and is a severe failure of the Sustainability Appraisal.

A Landscape and Visual Impact Assessment (LVIA) in accordance with the Landscape Institute Guidelines for Landscape and Visual Impact Assessment 3rd ed. 2013. This will inform the final capacity, development, design and layout of the site and the provision of public open space. The LVIA will be informed by the Landscape Sensitivity Assessment.

6.16 Given the highly sensitive location of the site it is illogical that an LVIA has not already been carried out for the site.

A Mineral Resource Assessment (MRA).

A Historic Environment Strategy to demonstrate how the listed buildings in the area will be conserved and how their settings have been considered.

6.17 Consideration of heritage impact should have been undertaken as part of the site selection process and subsequently. It is not considered appropriate that this is left to later stages of the planning application process.

A Construction and Operations Management Plan (COMP) shall accompany any planning application on the site, including the oil pipeline from operational works, including the provision of an appropriate buffer.

6.18 The Oil Pipeline is shown in figure 39 of the Thatcham Growth Study and runs along the entirety of the southern boundary of the site to a 6m easement either side. Assuming that this also includes a restriction on building roads then this could lead to the need for the implementation of any development on the site.

[See page 26 of the attachment 'Andrew Black Consulting (Bucklebury Parish Council)' for Figure 39 of the Thatcham Growth Study]

6.19 Paragraph 2.44 of the Growth Study states:

*The low gradient land at the southern edge of the site is also compromised by the presence of an oil pipeline (detailed in the NPPF). **no development is possible for access reasons.***

6.20 Given the significant ambiguity over the position of the impact of the oil pipeline it is considered unclear on whether the site is **deliverable** and **developable** as set out in the glossary of the NPPF. Given that WBC are acutely aware of these constraints, no further work has not been undertaken. Further information will be presented by BPC at the examination on this matter.

[See page 27 of the attachment 'Andrew Black Consulting (Bucklebury Parish Council)' for Figure 39 of the Thatcham North-East Strategic Development Plan.]

7. Landscape and Character Impact

7.1 BPC has identified three key areas of environmental objection to the proposed Thatcham North-East strategic development. The main points of objection were summarised in the Bucklebury public meeting on December 2nd as follows:

- Damage to the Common
- Greenfield development in an AONB
- Poor excuse of a 'country park'

7.2 There is no evidence to support claims that SP17 will have a positive impact on the environment. By contrast, the development will have a significantly negative impact.

7.3 The National Planning Policy Framework is clear that plans should recognise the intrinsic character and beauty of landscapes. Policies should provide for the conservation and enhancement of landscapes. This can include nationally and locally important landscapes in the wider countryside.

7.4 Paragraph 2.1 of the Context Section of the LPRPS sets out that 74% of West Berkshire is within the AONB and is a significant part of the overall make-up of the district.

7.5 Policy SP2 of the LPRPS sets out the approach to development in connections with the North Wessex Downs AONB. It includes specific reference to the Management Plan for the North Wessex Downs.

7.6 During the regulation 18 consultation, a significant number of objections were raised based on the development's impact on the AONB. WBC responded to these objections by stating:

'In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development should be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the context within which any proposed development would need to conform. The LCA notes that whilst there is no statutory AONB on the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be used as the council's evidence base to inform the proposed allocation.'

The updated version of the proposed allocation policy in the next published version of the LPR will set out that a Landscape Sensitivity and Capacity Assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development and the site.

With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' with accompanying explanatory text, to

provide details in relation to matters such as the parameters of the site, height parameters, green open space, etc.'

7.7 The Policy lacks focus for development within the setting of the AONB. Given the wide area of land (74%) that is covered by the AONB there will consequently be a large amount of land that will be within its setting.

7.8 The North Wessex Downs AONB statement on development in the setting of the AONB states that 'examples of impacts on the North Wessex Downs AONB include:

- development which would have a significant visual impact on views in or out of the AONB
- breaking the skyline, particularly when this is associated with developments that have a vertical emphasis and tall buildings (or blades for example)
- loss of tranquillity through the introduction or increase of lighting, noise, or traffic movement or other environmental impacts
- loss of spatial associations and historic relationships
- introduction of abrupt change of landscape character
- loss of biodiversity, particularly of habitats or species of importance to the AONB
- loss of features of historic and natural landscape interest, particularly if these are contiguous with the AONB;
- change of use of land such that to cause harm to landscape character
- development individually or cumulatively giving rise to significantly increased traffic flows to and from the AONB and erosion of the character of rural roads and lanes
- Increase in air and water pollution

7.9 It is considered that the development of North East Thatcham would give rise to all of these adverse impacts to some extent.

7.10 The Planning Practice Guidance sets out the following in relation to landscape with special characteristics:

Where landscapes have a particular local value, it is important for policies to identify their special characteristics and to provide evidence. Policies may set out criteria against which proposals for development affecting these areas will be assessed to avoid adverse impacts on landscapes and to set out necessary mitigation measures, such as appropriate design and landscaping where necessary. The cumulative impacts of development on the landscape need to be considered carefully.

Paragraph: 036 Reference ID: 8-036-20190721

Revision date: 21 07 2019

7.11 The Planning Practice Guidance goes on to set out how the character of such landscapes can be assessed.

For a designated landscape, the relevant management plan will contain further information on the area's particular characteristics.

Where appropriate, landscape character assessments can be prepared to complement Natural England's National Landscape Character Assessment. Natural England provides guidance on undertaking these assessments.

To help assess the type and scale of development that might be able to be accommodated without compromising landscape character, a Landscape Sensitivity and Capacity Assessment can be completed.

To demonstrate the likely effects of a proposed development on the landscape, a Landscape and Visual Impact Assessment can be completed.

Paragraph: 037 Reference ID: 8-037-20190721

Revision date: 21 07 2019

7.12 The PPG goes on to states:

All planning policies and decisions need to be based on **up-to date information** about the natural environment and including drawing, for example, from River Basin Management Plans, Areas of Outstanding Natural Beauty Management Plans (including environmental net gain and Nature Recovery Networks), Tree and Woodland Strategies, and Landscape Working with Local Nature Partnerships and other public bodies where appropriate, this should include an assessment of components of ecological networks, biodiversity resources and landscapes.

7.13 The Supporting Text of policy SP8 (Landscape Character) sets out the following in paragraph 5.41:

Other relevant landscape character assessments include the North Wessex Downs AONB Landscape Character Assessment produced in order to manage and guide change across a designated area extending beyond West Berkshire. In addition, the Landscape Characterisation (2007) and Historic Environment Character Zoning (2007) [footnote 30], which provide a sound understanding of the context of West Berkshire, can also be used by the Council to inform and support planning decisions.

7.14 It is not considered that the Landscape Character Assessment that is now more than 20 years old can be considered consistent with the guidance.

7.15 The Planning Practice Guidance goes on to state:

A Sustainability Appraisal which meets the relevant legal requirements on strategic environmental assessment should inform the preparation of spatial development strategies and local plans, and should consider all the likely significant effects on the environment, including social factors, and inform the strategy being progressed. Where relevant, strategic policy-making authorities will need to consider the effects generated by existing businesses when allocating sites, in accordance with the "agent of change" policy set out in the National Planning Policy Framework.

Plans may require a variety of other environmental assessments, such as under the Habitats Regulations where the development is a Habitats Site (which may not necessarily be within the same local authority area and may include in combination effects from other sites).

Paragraph: 043 Reference ID: 61-043-20190315

Revision date: 15 03 2019

7.16 The Thatcham Strategic Growth Study (TSGS) offers little assessment of the damage THA20 would cause to the AONB that the AONB partnership has objected to it, and that there is "little intervisibility between the two if an appropriate buffer is provided. This does not adequately assess the effect the development would have on the AONB. The document goes on to say "the Downs is less strong" and then promotes links as a benefit for the town, with absolutely no consideration of the impact on the AONB.

7.17 WBC is well aware of the negative impact on the AONB. The Site Selection Background Paper December 2020 (later CA sites) states:

It is the Council's preferred approach to allocate site THA20 as a strategic site. Due to the scale of development that would be considered that there should be no further allocations in Thatcham in the period to 2037 particularly as development in Thatcham would result in the loss of the separate identities of Cold Ash and Bucklebury, and would harm the setting of the AONB.

7.18 This clearly states that by developing THA20 WBC is accepting that the separate identity of Bucklebury would be harmed and cause harm to the AONB setting.

7.19 In short, all evidence points to the inappropriate nature of this proposal. It would have a direct and irretrievable impact on the AONB. WBC are charged to protect the AONB, and should reconsider the positioning of THA20 as a viable site.

Proposed Country Park

7.20 The LPR makes provision for a country park which is indicated as three areas on the plan accompanying the LPR.

7.21 The Reg 18 version of the LPR contained only 2 areas for the country park, the third was added for landscape reasons for rural separation on Harts Hill.

7.22 The AONB board objects to the concept of a country park in close proximity to the AONB as it will encourage visitors and potential to cause further harm to the wider areas.

7.23 The 'country park' has not been designed to support biodiversity net gain – not only are the areas indicated short of the broader habitat network) but also there is no evidence to suggest the levels of biodiversity net gain they might achieve on the scale of development it is there to buffer.

7.24 A carpark has been provided to attract users to the country park, but this is counter intuitive to the need to protect the AONB.

7.25 The Sustainability Appraisal sets out the allocation for development at North East Thatcham under policy SP17 which is against the objective to *conserve and enhance the character of the landscape*. The WBC justification for this assessment is *to have a positive impact on landscape character as consideration of the landscape is written into the policy*. This is not a valid justification.

Conclusion in respect of Landscape and Character Impact

7.26 It is not considered that plan is positively prepared, justified or effective in regard to landscape and the AONB and is therefore, regardless of the conclusions against other elements of the LPR.

8. Ecology and Biodiversity Impact

8.1 It is considered that there are some significant issues with soundness on the approach taken to ecology and biodiversity and allocation of the land at North East Thatcham.

8.2 BPC commissioned reports from the Nature Bureau in relation to biodiversity and the country park and these are attached to the LPR.

8.3 Paragraph 174 of the NPPF sets out the following in relation to biodiversity and ecology.

Planning policies and decisions should contribute to and enhance the natural and local environment by (inter alia) protecting and enhancing valued landscapes, sites of biodiversity or geological value and soils (in a manner consistent with the statutory status or identified quality in the development plan);

8.4 The site is in the setting of the AONB and as such the development of the land would not protect nor enhance this setting. **the intrinsic character and beauty of the countryside, and the wider benefits from natural capital and ecosystem services, including economic and other benefits of the best and most versatile agricultural land, and of trees and woodland;**

8.5 The development of this site would have a significant impact on the character and beauty of Thatcham and Bucklebury. **c) minimising impacts on and providing net gains for biodiversity, including by establishing coherent ecological networks and resilient to current and future pressures;**

8.6 There is no evidence that the impact of the development on biodiversity or the provision of net gains for biodiversity. Instead, this is being left to the application stage. This is considered too late and runs contrary to the approach set out in the Framework.

d) preventing new and existing development from contributing to, being put at unacceptable risk from, or being put at unacceptable levels of soil, air, water or noise pollution or land instability. Development should, wherever possible, improve environmental conditions such as air and water quality, taking into account relevant information such as river quality.

8.7 Again, there is no evidence that the impact on these matters has been taken into account by WBC in the selection of sites.

8.8 Paragraph 174 of the Framework goes on to state:

Plans should: distinguish between the hierarchy of international, national and locally designated sites; allocate land to sites of amenity value, where consistent with other policies in this Framework [footnote 58]; take a strategic approach to managing habitats and green infrastructure; and plan for the enhancement of natural capital at a catchment or landscape scale.

8.9 As set out, there is a distinct lack of evidence base documents in relation to such sites. Where such an evidence base is provided, it is to be significantly out of date.

8.10 Paragraph 179 of the Framework goes on to state:

To protect and enhance biodiversity and geodiversity, plans should:

a) identify, map and safeguard components of local wildlife-rich habitats and wider ecological networks, including the national and locally designated sites of importance for biodiversity [footnote 61]; wildlife corridors and stepping stones that connect national and local partnerships for habitat management, enhancement, restoration or creation [footnote 62]; and

b) promote the conservation, restoration and enhancement of priority habitats, ecological networks and the protection of them, and identify and pursue opportunities for securing measurable net gains for

8.11 The Planning Practice Guidance sets out the following:

Section 40 of the Natural Environment and Rural Communities Act 2006 places a duty on all public authorities in England in the exercise of their functions, to the purpose of conserving biodiversity. A key purpose of this duty is to embed conservation as an integral part of policy and decision making throughout the public sector, which should be seeking to make a significant contribution to the commitments made by government in its 25 Year Environment Plan.

Guidance on the law concerning designated sites and protected species is published separately because its application in applying this, the aim should be to fulfil statutory obligations in a way that minimises delays and burdens.

Paragraph: 009 Reference ID: 8-009-20190721

Revision date: 21 07 2019

8.12 The council has not embedded biodiversity as part of the plan and have instead chosen to leave this to the application stage.

8.13 The PPG goes on to set out how planning authorities can plan for biodiversity and geodiversity as follows:

Development plans and planning decisions have the potential to affect biodiversity or geodiversity outside as well as within the boundaries of the plan area.

Planning authorities and neighbourhood planning bodies can work collaboratively with other partners, including Local Nature Partnerships, to deliver a strategic approach to protecting and improving the natural environment based on local priorities and evidence, and consider the opportunities that individual development proposals may provide to conserve and enhance biodiversity and geodiversity, including habitat connectivity in the wider area (including as part of the Nature Recovery Network).

In this context, it is useful to consider:

- the latest government policies that are relevant, including the commitments in the 25 Year Environment Plan;*
- the contents of existing up-to-date plans and strategies for biodiversity and nature recovery;*
- the potential effects of a development on the habitats or species on the Natural Environment and Rural Communities Act 2006;*
- whether an ecological survey is appropriate;*
- opportunities to restore or enhance local ecological networks, including those that contribute to the wider Nature Recovery Network;*
- how to secure net gains for biodiversity as part of green infrastructure provision; and*
- opportunities to work strategically in order to streamline development decisions: for example, by establishing a 'zero net loss' approach.*

Paragraph: 010 Reference ID: 8-010-20190721

Revision date: 21 07 2019

8.14 There is no evidence that WBC has taken into account any of these factors in the preparation of the plan.

8.15 The PPG sets out the evidence which needs to be taken into account in identifying and mapping local ecological networks:

Relevant evidence in identifying and mapping local ecological networks can include:

- the broad geological, geomorphological and bio-geographical character of the area, creating its main landscape character;*
- key natural systems and processes within the area, including fluvial and coastal;*
- the location and extent of internationally, nationally and locally designated sites;*
- the distribution of protected and priority habitats and species;*
- areas of irreplaceable natural habitat;*
- habitats where specific land management practices are required for their conservation;*
- main landscape features which, due to their linear or continuous nature, support migration, dispersal and gene flow, and therefore improve species resilience;*
- areas identified by national or local partnerships with potential for habitat enhancement or restoration, including those that adapt to climate change or which could assist with the habitat shifts and species migrations arising from climate change;*
- audits of green infrastructure, such as open space within urban areas;*
- information on the biodiversity and geodiversity value of previously developed land and the opportunities for improvement;*
- areas of geological value which would benefit from enhancement and management.*

Local Nature Partnerships and similar partnerships working to conserve wildlife can be a useful source of information.

Paragraph: 011 Reference ID: 8-011-20190721

Revision date: 21 07 2019

8.16 There is no evidence that WBC has taken into account any of these factors in the preparation of the plan.

8.17 The LPR states (p46):

8.18 Where a proposal is likely to result in harm to sites of local importance (including habitats or species of principal importance), sites that meet the criteria for designation as a Local Wildlife Site or designation as a Local Geological Site), development should follow the following sequential approach:

Firstly, seek an alternative site in the District with a lesser impact than that proposed

Secondly, if the first is not possible, demonstrate mitigation measures can be taken on site

Thirdly, and as a last resort, seek appropriate compensation measures, on site wherever possible and off site where necessary, to ensure long term management and maintenance.

Damage to Bucklebury Common

8.19 Bucklebury Common is one of the largest Commons in Southern England, containing the largest heathland in the region. It includes the historic Avenue of Oaks at Chapel Row, notable ancient woodlands, and other important habitats. It is part of the Bucklebury Plateau Biodiversity Opportunity area, and as such is considered to include 'important and rare' habitats, one of the country's most important adder communities, and numerous protected animals and plants.

8.20 Management of the Common is entering a new phase and has presented its vision for the enrichment and on-going management of this rare and precious environment. The management team for the Common includes Natural England, BBOWT, NWD AONB, along with members of the local community and ecological consultants.

8.21 At a presentation of the vision to the broader community, it was acknowledged that the Common is an open area and requires very careful management to protect it.

8.22 It is a key part of the Bucklebury vision for the Common to not increase the number of visitors, but to place the emphasis on providing a chance to restore itself and thrive, both in terms of the diversity and abundance of its fragile ecosystem.

8.23 Based on the housing mix described in the LPR, the proposed development represents an additional 4000+ people being added into the AONB, which includes the irreplaceable habitats found in Bucklebury Common, with its ancient woodlands and historic ponds.

8.24 The Common is already struggling to balance accessibility and leisure usage with the needs of the environment, and dog walkers particularly impacting ground-nesting birds, notably woodcock, and other wildlife.

Damage to Ecology

8.25 The land immediately adjacent to the proposed development area for SP17 contains 41 Local Wildlife Sites and is part of the Biodiversity Opportunity Area.

8.26 The data being used to establish the presence of species is out of date. In 2020, Bucklebury Parish sought environmental data impacted by SP17:

- 80% of surveys were conducted more than 15 years ago
- 50% were more than 20 years old
- 44% were over 30 years old

8.27 BPC has appointed ecologists to conduct an independent study of the impacted area. The findings from a single study indicated that the site had a much higher biodiversity value than previously appreciated, including the presence of several bird species and one threatened migratory species, several bat species and abundant badger setts. The hedges, old trees and corridors linking up different habitats within and beyond the site boundaries. These initial findings imply that a full study of the area and measures and BNG will be far more complex for the development than was anticipated by the planners.

8.28 This one study has provided more information about the site than has been presented in the whole the LPR and the area has a much higher biodiversity value than assessed by WBC.

8.29 Protected species are present across the site and will be impacted. No detail on mitigation measures has been provided. Network features are under threat from the development and will severely impact distribution of key species.

8.30 The Sustainability Appraisal states that the allocation of development at North East Thatcham will have a significant impact on policy SP17. The WBC justification states that *the policy is likely to have a significantly positive impact on biodiversity and the environment for the development.*

Conclusions in respect of Ecology and Biodiversity Impact

8.31 Based on the representations made in relation to this matter it is not considered that the plan is justified, effective and is unsound on this basis alone.

9. Highway Impact

9.1 YES Engineering Group Limited was appointed by Bucklebury Parish Council to review the transport related evidence for the Berkshire Council emerging Local Plan specially with regards to the proposed allocation of NE Thatcham. The full report is available for these representations. References are set out within the report to THA20 rather than SP17 as this is how the site is shown on the evidence base.

9.2 The WBC Phase 1 Transport Assessment report identified some junctions and links that would be affected by the development. These were particularly focussed near to the proposed strategic North East Thatcham site, indicating delays and congestion at junctions along the A4 corridor, with through traffic diverting onto unsuitable routes.

9.3 Concept junction improvements are set out in Appendix A of the WBC Phase 2 report which essentially provides for the A4 corridor purely to facilitate the increase in traffic associated with development of North East Thatcham. However, this may be contrary to WBC Policy CS 13 which seeks to mitigate the impact on the local transport network and the strategic road network.

9.4 Journey time analysis during the AM and PM peak hours was undertaken over a 2-week period from 13th to 24th. The most desirable routes for those travelling east (towards Reading) or west towards M4 Chieveley. As shown within Appendix B it is demonstrated that the quickest route in each direction is via Harts Hill Road or via Cold Ash Lane rather than the strategic routes. This situation on these routes has not been assessed and this is a fundamental flaw within the modelling assessment.

9.5 Whilst the WBC Phase 2 report confirms other mitigation measures will be required to reduce car dependency for the development they cannot reduce the congestion (which already exists) to such levels that the most desirable route will no longer be via Harts Hill Road or Cold Ash Lane. This situation already occurs, and the WBC Phase 1 report has confirmed that these routes are the most desirable.

selection of North East Thatcham for significant development is fundamentally wrong as traffic will need to divert off the site based mitigation measures are almost impossible to achieve due its location/topography.

9.6 The A4 itself will create severance of the site from Thatcham rail station for pedestrian/cycle activity as it will be a strategic road, whilst any formal crossing points will cause further delay on the road network.

9.7 Congestion has been raised by WBC as a Key Issue and is consistently cited in the Council's annual residents' survey as an issue improving in the local area. The district has a high level of car ownership and usage that is in excess of the South East population growth, housing, and employment in the last few decades, as well as the proximity to other larger urban areas and demand for travel and a reliance on journeys made by the private car. The development at NE Thatcham is located with limited access to public transport. As such it is expected that the development would only add to the already congested Local Transport Goals to minimise congestion on the transport networks.

9.8 The WBSTM report confirms "Traffic flows increase (compared to the Reference Case) on major roads such as the A4, the A303, the A30, Road/Crookham Hill and the Broad Lane, as a result of increased traffic demand generated by the preferred Local Plan. This is due to re-assignment of traffic in all Local Plan scenarios (compared to the Reference Case) due to naturally increased demand in the centre in particular, though local roads in general seem to demonstrate low levels of highway demand increases across the district. Increases in Local Plan traffic demand though the corridor, as well as THA20 site traffic directly accessing the A4 in particular, displacement onto wider routes away from the A4, through local villages such as Upper Bucklebury". As set out in Section 9.12, these routes are unsuitable (no footways, no lighting, high speed, tight bends) for an increase in traffic flows and would create high impacts for residents.

9.9 The trip rate criteria is considered unreliable, whilst the a trip rate reduction of 25% due to mitigation measures is considered unrealistic.

9.10 NPPF paragraph 111 states that 'development should only be prevented or refused on highways grounds if there are grounds on highway safety, or the residual cumulative impacts on the road network would be severe.'

9.11 As demonstrated within the appended report, the impacts are served and as acknowledged in the WBSTM report, the development at North East Thatcham is likely to cause displacement onto wider routes away from the A4, through local villages such as Upper Bucklebury. Phase 1 Transport Assessment describes these routes as **undesirable** and critically the impact has not been assessed. The assessment presented in support of the emerging local plan. Additionally, there are fundamental flaws within the trip assessment and the assumptions presented.

9.12 In summary in relation to transport it can be concluded that:

- **The trips rates set out by WBC are unreliable and not**
- **The trip distribution is unrealistic (all evidence suggest traffic will be diverted from the A4).**
- **The proposed mitigation measures suggested by WBC are improbable at**
- **The location of site means car traffic will dominate the**
- **The Highway network in the vicinity of THA20 is already over**
- **No assessment has been made of the routes most likely to be affected by an increase in**
- **Increase in traffic through Bucklebury will pose highway safety**

10. Heritage Impact

10.1 The allocation at North East Thatcham surrounds the Grade II listed Colthrop Manor.

10.2 The Planning Practice Guidance sets out the following in relation to local plans and historic environment:

Planning policies need to be based on up-to-date evidence about the historic environment in their area. Strategic policies should set out how they will use this evidence to assess the significance of heritage assets and the contribution they make to their environment and to the wider community, and to identify and protect unidentifiable heritage assets being discovered in the future. Authorities may draw on a wide range of evidence sources including the historic environment record, the National Heritage List for England, conservation area management plans and appraisals, and other local planning documents to identify assets of local historic importance.

Where a landscape character assessment is being prepared, strategic policy making authorities may wish to integrate landscape character and, for areas where there are major expansion options assessments of landscape sensitivity.

Good practice advice on the Historic Environment in local plans can be found on Historic England's website.

Paragraph: 045 Reference ID: 61-045-20190315

Revision date: 15 03 2019

10.3 There is no evidence that the WBC has taken into account the setting or significance of Colthrop Manor as a result of the allocation of North East Thatcham nor has WBC considered the impact of the development or the way in which the car will be used by it.

10.4 The wording of policy SP17 requires the submission of a *Historic Environment Strategy to demonstrate how the historic environment is conserved and how the impact of the development on their settings has been considered.*

10.5 This should have been undertaken as part of the site selection process.

10.6 The Sustainability Appraisal states that the allocation of North East Thatcham under policy SP17 would have a negative impact on the historic environment *to protect or conserve and enhance the built and historic environment to include sustaining the significant interest of historic buildings and places that this assessment is justified in any way whatsoever and the policy lacks credibility as a result.*

10.7 The LPR is not considered to be justified or consistent with national policy in respect of heritage impact and is therefore not considered to be a sound basis for the development.

11. Infrastructure and Services

11.1 BPC submits that there are significant failings with the LPR on whether the provision of infrastructure associated with the development at North East Thatcham under policy SP17 is viable or deliverable. It is not considered that the LPR has been positively prepared and the wording of the policy be effective in delivering the infrastructure required for the scope of development suggested for the site within the wording of policy SP17.

11.2 The Planning Practice Guidance sets out the following on the evidence that is needed to plan for health and well-being:

Strategic policy-making authorities can work with public health leads and health organisations to understand and take account of the projected health status and needs of the local population, including the quality and quantity of, and accessibility to, health services. Health and well-being growth may have on this. Authorities will also need to assess the quality and quantity of, and accessibility to, green infrastructure, recreation and places of worship including expected future changes, and any information about relevant barriers to health and well-being outcomes. Strategic policy-making authorities may consult any relevant Health Impact Assessments and consider the potential health impact and risks of development proposals.

Healthcare Facilities

11.3 The North-East Thattham development plan (SP17) proposes a 450 sq m primary healthcare facility with the site to be offered to the Buckinghamshire, Oxfordshire and Berkshire West Integrated Care Board or other such appropriate body in the absence of detail or insight into strategic healthcare planning.

11.4 Proposals for a major development that is likely to have a significant health impact in relation to its size and location should undergo a fit for purpose Health Impact Assessment (HIA) in accordance with the current guidance from Public Health England. The way to how the proposals for development have been discussed with health service providers regarding impacts on primary care development proposals should demonstrate how the conclusions of the HIA have been considered in the design of the development. It is of concern that neither V&P nor the local authority appear to have arranged or published a prospective HIA specific to the proposed development. It is of concern that neither V&P nor the local authority and private stakeholders respectively, appear to have arranged or published a prospective HIA specific to the proposed development.

11.5 Tackling health and wellbeing requires a multi-agency approach. The Berkshire West Health and Wellbeing Strategy has been developed by the Reading, West Berkshire and Wokingham Health and Wellbeing Boards together with the Berkshire Partnership. Developers are encouraged to engage with the healthcare providers at the earliest opportunity in order to address requirements associated with new development. It is of concern that there appears to have been no direct engagement with the Development Consortium and local general practices.

11.6 Few new GP practices are commissioned by NHS England, even where they consider there to be patient demand. Digital figures of patients registered in the NHS Berkshire West Clinical Commissioning Group (CCG) confirm there is no prospect in other areas of the country. There is therefore no realistic prospect of a new GP practice being established in Thattham in the foreseeable future.

11.7 GP practices look to create efficiencies and economies of scale to make general practice more financially sustainable. It would extend the range of services and primary healthcare professionals available on a single site. It would make no financial sense for an existing local GP practice to set up a branch surgery on the proposed new development because of the additional land and staffing costs and encumbrance working across two sites.

11.8 There has been no approach by WBC or the developers to any local GP practice to discuss an appropriate site where one or more practices could relocate. An enlarged primary healthcare site is required and might be better located closer to the centre to improve access and minimise traffic as the proposed NE Thattham development is peripheral to the centre of the parish. The development to be supported by Thattham Town Council but has not been suggested in the sustainability appraisal of site options. Local authorities with the inadequate 450 sq m floor size proposal which they only discovered with the SP17 Policy of December 2021.

11.9 The proposed North-East Thattham development site is covered by the existing practice boundaries of Thattham Hill Road), Burdwood Surgery (east of Harts Hill Road) and Chapel Row surgery (the whole area). All three practices are run by two Thattham doctors' surgeries run independently of each other, and their combined lists include approximately 2700 patients under 2,000 patients per GP. Newly registered patients moving into housing developments tend to make a greater demand on primary care services. There are more young children, a higher maternity workload, less local extended family support and there is initially a demand for permanent and repeated temporary pharmacy closures in Thattham have further exacerbated pressure on primary care services.

11.10 Thattham dental practices are unable to provide dental care for the whole population with a significant minority of patients further afield for NHS and private dental care. Thattham Vision, endorsed by WBC in 2016, confirmed only 60% of registered patients are served by Thattham dentist (with 17.5% registered with a doctor outside Thattham). There is no evidence provided that either V&P nor the local authority approached any local dental practices regarding the potential impact of increased workload resulting from additional housing developments.

11.11 Reviewing the scanty healthcare recommendations within the Thattham Strategic Growth Study (David Lock and Associates 2016). Present, paragraph 4.10 states: 'A dialogue with the relevant healthcare and education agencies should be established to address concerns that social infrastructure may not be provided.' The Stage 3: Thattham Future report published in 2016 provides no further detail except the outcome of a community representatives' workshop, that the existing GP facilities are at Thattham Hill Road health centre.

11.12 WBC and the developers appear to have neither arranged a relevant HIA nor provided evidence of having approached any local primary care agencies or providers. They are proposing a healthcare site that is unsuitable for NHS primary care and so has the potential to add to the burden that 1,500 or more new houses will make on a local NHS struggling to cope.

11.13 The objective of WBC and the North-East Thattham Development Consortium to improve access to the health services in thattham infrastructure has not been met as they have not provided evidence for the provision of a viable primary care medical centre.

Education Facilities

11.14 The provision for education from Nursery, Early Years, through Infant to Secondary education is not clearly defined in the Local Plan (LPR). There is no coherent end-to-end plan and this therefore breaches the obligations of WBC to provide education services. In the absence of this provision, the Plan for a large new housing development is wholly unsound.

11.15 The lack of effective or justified education provision across the various proposed developments also means that the subsequent impact on traffic. The location of a secondary school in the North East Thattham development under policy SP17 NE Thattham will increase in traffic across the whole Thattham area and this has not been adequately considered in the traffic plans and the LPR.

11.16 There are no details in the LPR of the provision for Nursery or Early Years education. Policy SP17 NE Thattham states that *the site will provide*

Early Years provision.

11.17 The provision for primary school education is unclear and contradictory. There is no data or evidence on the level of demand for 'entry' requirements. The LPR proposes that the sum of £12 million will be sourced from the developers of SP17 to fund the provision of primary education. However, with no recent data available (the only data referenced is from 2011), it is impossible to assess the impact on the delivery of the required education provision.

11.18 The current situation for secondary school students from Bucklebury is that they have a choice of either The Datchet or The Datchet as they are in the catchment area for both.

11.19 Where schools are oversubscribed, children who live nearer to the school are given precedence. This means that children from the NE Thattham development would be able to opt for Kennet and those from Bucklebury would then be limited to The Datchet.

11.20 The LPR is inconsistent, incomplete, and contradictory on the provision of secondary schooling in and around thattham. It is a contradiction to the supporting documentation. It proposes that the sum of £15 million will be sourced from the developers of SP17 to fund the provision of secondary education.

of secondary education. There are no details of the location of the land to be provided and hence no possibility of assessment or achievability.

11.21 The Thatcham Growth Study, produced by David Locke Associates and Stantec on behalf of WBC, proposes a new secondary school, half-funded by developer contribution.

11.22 Government guidelines are that Secondary Schools with less than a 6FE are not sustainable or deliverable. The Growth Study previously stated that the NE Thatcham development (at the time allocated for 2,500 homes) was not sufficient to justify a new secondary school.

5.18 Provision of a new secondary school in North East Thatcham is an essential part of enabling growth in the town. The current provision proposed is not sufficient on its own to fill a 6-8FE secondary school.

5.19 Secondary schools need to be of sufficient scale to make them sustainable and able to provide suitable facilities. It is not considered feasible for a new school to be smaller than 6FE.

11.23 With an apparent 40% reduction in the housing allocation in the 2023 LPR (2022 to 2039) to 1500 houses, a new secondary school would not be sustainable or deliverable in this location.

11.24 Furthermore, the Thatcham Growth Study also noted that the education provision was based on WBDC data of 2011. Clearly the use of 11-year-old data is inadequate.

11.25 The Growth Study states:

4.83 This study has not engaged in a detailed demographic prediction and modelling exercise to determine future population demand across the town and has not attempted to predict the long-term capacities of existing schools. Inevitably education provision will be in more detail as any development comes forward.

11.26 The LPR now states that land (but not the Secondary School itself) will be provided for the development.

11.27 In summary, it is therefore clear that the plan for secondary school provision is 'unsound' for the following reasons:

- There is no satisfactory evidence of the number of pupils the school is to cater
- The location of a school within the proposed development is not
- The number of Form Entries is not defined, but it is noted that anything less than a 6FE school is
- The timing and responsibility for the funding is not clear and has not been adequately costed in the viability
- There is no evidence that the proposed funding is sufficient to meet the Council's obligations to provide

11.28 West Berkshire Council, as an education authority, has a duty to make arrangements for suitable school provision to be met across all school years is not defined or evidenced in the LPR.

Sports Fields Provision

11.29 The LPR requires the provision of sports fields and facilities as part of the development of NE Thatcham under policy SP17. Issues not answered in the LPR.

11.30 Firstly, that playing pitches require flat ground. The only flat area of ground in the proposed site is that which is currently used for parking. There is no funding earmarked for these facilities nor has the provision of these facilities been adequately costed within the viability appraisal.

11.31 The objective of WBC and the North-East Thatcham Development Consortium to provide sports fields has not been met. There is no evidence for funding or for a suitable location.

11.32 Overall, it is plainly apparent that there are significant failings with the LPR on whether the provision of infrastructure for sports fields as part of development at North East Thatcham under policy SP17 is viable or deliverable. It is not considered that the LPR has regard nor would the wording of the policy be effective in delivering the infrastructure required for the scope of development at North East Thatcham or set out within the wording of policy SP17.

12. Climate Change and Flood Risk

12.1 BPC has significant concerns that WBC has failed to properly address the impacts on climate change and flood risk, specifically the development of housing at North East Thatcham through policy SP17.

12.2 WBC has included addressing Climate change as a major objective. This is further developed in Policy SP5. However, the principles of climate change mitigation and adaptation will be embedded into new development..." (SP5), development must meet carbon targets. Development "will be expected" to contribute positively to carbon reduction, the plan contained in Thatcham Stage 3 was extremely limited in the coverage of carbon neutrality and the effects of Climate Change.

12.3 Given the scale of the development proposed at North East Thatcham under policy SP17, the proposal should meet the requirements of SP5. The Thatcham Stage 3 document is very sketchy on this area, and only seemed to note that this in detailed building regulations."

12.4 Policy SP17 states that the proposed site will be expected to deliver "on-site renewable energy to assist in the development." Policy DC3, 3.A requires a minimum provision of 20% energy from renewable sources. Policy DC3, 3.B requires renewable energy applications if they are suitable for the area, are accompanied by a landscape assessment, and caused no harm. Given that any form of required renewable energy generation will have a highly detrimental effect on local amenity, the proposal does not address this requirement. There is no mention of this in the Thatcham Stage 3 document.

12.5 Policy SP5 requires developments to provide for "...sustainable forms of vehicular and personal transport..." Given the plan included in the proposal, it is felt that this requirement is far from being met. Thatcham's roads are already over capacity, the railway station and services inadequate, and people are unlikely to walk into the town centre further applying pressure on the roads. This will increase traffic pressures, and rat running onto inefficient roads will be prevalent. All of this increases carbon generation.

12.6 The proposal allocates two bullet points to "Net Zero Carbon Development" and again is woefully inadequate in that a net zero carbon development would be viable or has been costed as part of the viability appraisal produced for the proposal.

Flood Risk

12.7 Flood risk is a significant threat to Thatcham, and so, by interpretation of WBC's own policy SP6, the development under policy SP17 is not appropriate.

12.8 There are available sites at lower flood risk, and so the "and" requirement is not met. Mitigations may be possible at the site will increase flood risk in the town. By WBC's own requirements, THA20 is an inappropriate site. Also, DC6 s

“Development which would overload available facilities and create or exacerbate problems of flooding or pollution without doubt that the introduction of 2,500 houses and associated infrastructure will exacerbate problems. Both DC6 and the nature of this site.

12.9 The Thatcham Strategic Growth Study even reinforces these arguments:

48 “Flood risk and surface water drainage is a key consideration...particularly so within the town of Thatcham where this was experienced in 2007.”

- 48 “There is a risk of surface water flooding within the site along the natural drainage routes based on Environment Agency data.”
- 51 “The extent of surface water risk to the site is highest at the north-western end of the site, known as Dunston.”
- Box 4.2 “An essential issue to address for development at North East Thatcham is the management of surface water drainage.”
- 8 “Management of surface water drainage is a key concern for development on the slopes above Thatcham”.

12.10 For a development of this size, it is clear that the flood risk to the site and subsequent impact on flood risk to the town (designated as nationally significant ‘Flood Risk Area for surface water flood risk within the 2018 Environment Agency Planning Policy Framework) have not been considered. The LP references the Strategic Flood Risk Assessment (SFRA) for how flood risk will be assessed, but there is very little mention of this proposal, and no known local plan site screening has been published for this proposal.

12.11 The SFRA also states that ‘Areas at risk from surface water or locations at risk of groundwater emergence should be identified to ensure flow routes are not blocked.’ As outlined in the SFRA this proposal site is underlain by clay and therefore is at risk of groundwater emergence. The areas downstream of the site are identified as at high risk of surface water flooding. If this development is approved, it contradicts what it outlined in the supporting SFRA.

12.12 As per the NPPF, priority should be given to sustainable drainage. In the LPR there is no evidence in the plans placed within the development area. As it states within the West Berks SFRA, *flood risk should be considered at an early stage and design of a site to provide an opportunity to reduce flood risk within a development.* It is clear that this has not happened.

12.13 The allocation for policy SP17 states that the proposal will *incorporate Surface water management approaches within Thatcham town.* There is no justification for this statement, or any evidence provided to substantiate this claim.

12.14 The site of THA20 is currently a greenfield site and the development will be subject to meeting the greenfield runoff rate. Developments must limit runoff to below greenfield conditions. It is especially important at this site that the runoff rates be noted that there are a number of factors not taken into account in the national greenfield runoff rate figure which can vary significantly from runoff rates from a site. These include the vegetated land characteristics e.g., grassland, woodland, farmed land and the presence of trees. These are key to this proposal due to the elevation of the land proposed for development and the removal of trees which will increase both surface and ground water. An increase in flood risk to an area that is already identified as a nationally significant flood risk is unacceptable.

Conclusions in respect of Climate Change and Flood Risk

12.15 The Sustainability Appraisal is ambiguous in relation to flood risk. It states that the development at North East Thatcham will have a positive impact but there is also a ‘?’ place in the assessment box. The justification for the assessment given is *requires consideration of SuDS that could deliver net gains for Thatcham, but there is no other reference made to flood risk or requirements for GI, ecology and sustainability measures to be included which may all have a positive impact on flood risk.*

12.16 It is not considered that this is a credible assessment, and the question mark demonstrates that WBC are unsure of the assessment.

12.17 It is not considered that the LPR is justified, effective or consistent with national policy and is unsound on this basis.

13. Water Supply and Foul Drainage

13.1 Currently the water for Thatcham and the environs is extracted at Bishops Green and Speen.

13.2 Sarah Bentley, CEO of Thames Water has recently stated that the current requirement for water per person is 120 l/p/d. The demand for fresh, potable water is having a profound impact on the water table in both the Kennet and Pang River valleys, such as Chichester, Horsham and Crawley this has given rise to significant concern of water neutrality in highly sensitive areas.

13.3 The River Pang that runs through the villages of Bucklebury and the adjacent village of Bradfield completely ran dry through the prolonged dry season but also as a result of the reduced level of the aquifer.

13.4 In the past there are accounts of the river not running (1838 - Environs of Newbury), but this was during the first half of a couple of months and again in 1976. In 2022 the river did not run for a considerable time and, even after the very wet winter, it was still bone dry in November and not really flowing until 9 December 2022. A devastating impact on the environment has been caused by over extraction at Compton and neighboring extraction points and is in complete contradiction to the Water Framework Directive Regulation 19. There are no mitigation measures, the only action is to make this the sole responsibility of Thames Water.

13.5 The Infrastructure Plan also points out this is a major problem in sections 5.65 & 5.66.

13.6 Thames Water (TW) is responsible for supplying the entire West Berkshire area with water. The WCS identifies significant serious water stress, in common with the rest of the South East. It comments that the more stringent water efficiency requirements of 110 l/p/d allowed under Building Regulations is justified, however West Berkshire Council may want to consider going further, particularly in larger strategic developments.

13.7 The WCS states that growth plans defined in Water Resource Management Plans (WRMPs) are broadly in line with the West Berkshire Council. “The WRMP does not predict a supply-demand deficit, except in peak week or drought conditions. The WRMP planning period to improve resilience”.

13.8 It is unsound to state that there is no predicted supply demand deficit when we are experiencing predicted extreme water stress. We have had a hose pipe ban in force for weeks, it was only lifted on 22 November 2022. The existing infrastructure in Bucklebury is old and in poor condition and suffers from numerous bursts and fractures.

River Pang – 26 October 2022 [see page 52 of attachment ‘Andrew Black Consulting (Bucklebury Parish Council)’ final report]
River Pang once it started flowing again – 9 December 2022 [see page 52 of attachment ‘Andrew Black Consulting (Bucklebury Parish Council)’ final report]
photo]

13.9 By adding a larger pump and increasing the pressure the problem is only exaggerated.

13.10 There is a lack of evidence or supporting information on how the developers of North East Thatcham will achieve water neutrality.

Sewage

13.11 Thatcham, Newbury and the surround district is service by Thames Waters sewage treatment plant in Lower Way (and Dia 15") running from Faraday Road to Lower Way that are cast Iron, in poor repair and over 100 years in age. The sewage and surface water from the older area of the town as many of the properties have combined down pipes. The Turnpike serving that area with a pumping station at Beedon Hill. Another pipe from the pumping station in Station Road is a gravity feed system feeding all the current estates in the north of Thatcham and the town centre. This facility also smaller village septic tank systems tankered into Lower Way and commercial septic/cesspool collections.

13.12 Currently there are 600 new houses being constructed near Vodaphone, 167 the new flats at Boundary Road and 200 houses near the Tesco Supermarket (Retail Park). 100 houses with planning approval in Lower Way. In total 1,024 extra development (say and additional $1024 \times 300 = 307,200$ litres/day). The current TH.20 proposal add an additional 1,500,000 litres per day).

13.13 The current system at Lower Way has a maximum intake capacity of about 600 litres/second. If the input figure frequently occurs, the foul water is fed into two overflow tanks. The regulated input is fed into Fermentation Settling Tank system with percolating filter. If these are over capacity, or if the overflow tanks are full, raw sewage is delivered directly to the river.

13.14 There is no mention of how the infrastructure is going to be improved with regards to this simple sewage requirement is 150 litres per person per day, that is a staggering additional 450,000 litres/day from just SP17 that has been does not take into account and surface water that might have been connected to the sewer system, new buildings and necessary infrastructure and, more importantly, the above additional input from the recent developments. In our equity, additional 1,100 dwelling built recently at The Race Course (330,000 litres/day).

13.15 This waste water facility that is already over capacity and has been for the past twenty years will also be expected to deal with sites designated HSA1 to HSA7, HAS17 & HAAS22.

13.16 West Berkshire Council (WBC) has just passed this burden on to the Thames Water utility company (please see the Development Plan: 5.36), but where is the public consultation and due diligence when referring and developing the infrastructure plan?

13.17 Without the necessary infrastructure the proposed housing development in this area is ill considered and will certainly increase the Biological Oxygen Demand (BOD) and Chemical Oxygen Demand (COD) on the outflow will certainly have to increase. It is very apparent that there is very little room for further expansion on the site, maybe an additional storage tank? But the risk of pollution into the Kennet, far from it.

13.18 If the outdated plant cannot cope with the increase in flow, then there is no option other to increase BOD (and COD) into the Kennet and this will exceed the permitted percentile limit set by the Environment Agency. The only other option for compliance demand therefore is to reduce the maximum compliance Limit!

13.19 This is completely contra to the Water Framework Directive cited in Regulation 19 as these are for restoration of the river. Pollution into the Kennet basin without adequate provision is just - wrong. Please note that much of the drinking water comes from this source and is abstracted at Fobney downstream of this Lower Way and the proposed development.

13.20 It is inconceivable that in the twenty first century this, untreated discharge, can be allowed. To compound the problem, the facilities at Kintbury and Hungerford discharge directly into the river during peak flow periods – criminal and an environmental disaster.

13.21 West Berkshire Council has allegedly identified the requirement, it is mentioned in 5.63 of Infrastructure Development Plan: 5.63 *The Study indicates that "new homes require the provision of clean water, safe disposal of wastewater and protection of large numbers of new homes in certain 35 locations may result in the capacity of existing available infrastructure to service them could potentially cause service failures to water and wastewater customers, adverse impacts to the environment, or health and wastewater assets being passed on to the bill payers."*

Conclusion

13.22 If this problem has been clearly identified by WBC, surely no planning development should be considered until the problem is solved. The existing sewers and infrastructure feeding Lower Way are a real matter for concern, as there is no simple method of solving this Victorian system, short of excavating the A4 main road while this extensive works could be carried out.

13.23 There is absolutely no doubt that the existing infrastructures is failing with extreme infiltration identified in Faraday Road a very large iceberg. Recently an old section failed on the junction to Hambridge Road, which hopefully, is well documented but will have resulted in surface and subterranean pollution.

13.24 The LPR just touches briefly on the subject with the casual "suitable land and access is safeguarded for the maintenance of resources and wastewater, flood defences and drainage infrastructure". Where is the detail? potential developers, residents need this information.

13.25 The development Plan Control Policies 10.45 States:

Developers will need to demonstrate that existing, planned and/or committed infrastructure is sufficient to accommodate the development. This includes demonstrating that there is adequate water supply, surface water drainage, foul drainage and sewage treatment infrastructure off site to service the development. Necessary improvements to sewerage water treatment infrastructure will be programmed and need to be completed prior to occupation of the development. This is to ensure that such infrastructure is in place on the environment such as sewage flooding of residential and commercial property and pollution of land and water. This may make it necessary for developers to arrange for appropriate studies to ascertain whether the proposed development is compatible with the existing local infrastructure. Where there is a capacity problem in the local network developers will be expected to fund infrastructure improvements.

13.26 If this is adopted and implemented by West Berks Council (WBC), any planning developments should be refused unless a condition is submitted by developers and approved by WBC. This is a key clause and should be fully implemented and enforced.

13.27 The Local Plan Review does not mention any improvements to the existing sewage network or planning provisions. It alone make the current proposal unsound.

14. Conclusions

14.1 These representations make it abundantly clear that there are significant failings with the soundness of the plan.

14.2 The LPR is **not positively prepared** and would not achieve the goal of sustainable development for WBC.

14.3 The LPR is **not justified**. Many of the grounds for assessment of impacts and benefits lack credibility and are not credible. Reasonable alternatives have not been adequately explored and there is no basis to demonstrate that the allocation of land is an appropriate strategy for WBC.

	<p>14.4 The LPR is not effective. There is no evidence that the development of 1,500 homes at North East Thatcham is</p> <p>14.5 The LPR is not consistent with national policy. In many instances the allocation for development of North Ea would directly conflict with national policy, particularly in relation to landscape character and impact upon the AONB.</p> <p>14.6 The process of assessing the impact of development under policy SP17 through the sustainability appraisal is f which can be easily remedied through modifications to the plan.</p> <p>14.7 The process for selection of North East Thatcham as a development site is severely flawed and lacks evidence.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	No
<p>Please give reasons for your answer</p>	BPC has wider concerns around the way in which WBC has undertaken the consultation process for the LPR and th Failings with Duty to Cooperate are matters which are not capable of being remedied in advance of the plan being s set out further details of these failings to the inspector should the plan be submitted to the Planning Inspectorate by

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	N/A
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	<p>Housing allocation for North East Thattham</p> <p>[Representation part of a wider rep for SP17]</p> <p>The draft Local Plan was approved to move to Regulation 19 Consultation by a meeting of West Berkshire Council on [redacted] was given on the basis that the size of the development when complete would be approximately 1,500 dwelling. The decision stated:</p> <p>"Councillors allocated a new strategic development of 1,500 new homes in north-east Thattham, a significant decrease from the [redacted] proposed."</p> <p>"We have cut the proposals for any future development in north-east Thattham by 1,000 homes, which is a big change from the [redacted] proposals."</p> <p>The emerging draft Local Plan (December 2020) stated at paragraphs 6.12 and 6.13:</p> <p>"This includes the strategic allocation at North West Thattham for up to 2,500 homes where delivery of at least 1,250 homes is anticipated within the plan period."</p> <p>The Local Plan Submission draft (January 2023) states in Policy SP17: "The site is to be allocated for approximately 1,500 homes to be completed within the period of the plan.";</p> <p>at paragraph 6.22: "additional housing supply on newly allocated sites ... includes the strategic allocation at North West Thattham for up to 2,500 homes within the plan period.";</p> <p>and at paragraph 6.61: "Delivery of approximately 1,500 dwellings is anticipated within the plan period."</p>

	<p>Policy SP17 is silent on the possibility of additional dwellings following the plan period.</p> <p>Policy SP17 also states: "The Thatcham Strategic Growth Study provides guiding principles for the delivery of the site that these guiding principles have been positively responded to."</p> <p>The Thatcham Strategic Growth Study was prepared for a site allocation of 2,500 dwellings, and has not been updated. There has been an interpretation that one of the 'guiding principles' of the Growth Study is a final size for the development of 2,500 dwellings. Even worse, an applicant for planning permission might 'cherry pick' a site allocation of up to 2,500 dwellings with the SP17 that are based on the needs of 1,500 dwellings.</p> <p>The wording of Policy SP17 is therefore unclear and ambiguous on the expected final number of dwellings on the site. It is therefore not evident how a decision maker (whether West Berkshire Council or the Planning Inspectorate in case of a refusal) should apply the policy.</p> <p>Paragraph 16 of the NPPF (July 2021) states that: "Plans should: d) contain policies that are clearly written and unambiguous so that a decision maker should react to development proposals". Policy SP17 is therefore not in accordance with Paragraph 16 of the NPPF and is not consistent with national policy.</p> <p>NOTE: as stated in other representations, I believe that the number of 1,500 homes needs to be reviewed. This represents a lack of clarity of the wording, and not the number.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	N/A
<p>4. Proposed Changes</p>	To make this aspect of policy SP17 sound, it must be clarified that the number of dwellings defined in the second paragraph is the total number when development is completed, and not just the number completed during the plan period.
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
<p>5. Independent Examination</p>	If it would assist the examination.
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No</p>	Yes

Please give reasons for your answer	I am writing to raise objection to the proposed plan to build 1500-2500 houses in NE Thatcham. We have lived here in Thatcham for several years, and over that time with the increased development and new houses we have noticed a distinct deterioration in the local area, specifically with regard to medical services for which we have seen waiting times to see clinicians increase as well as number of pharmacies decrease or overwhelmed medication dispensation. These services are already over-subscribed and likely to become worse as more housing is built here that, despite government 'marketing', that generally there are national problems in provision of adequate health and social care. The north Thatcham area is likely to become worse as more demand will be placed on current services by an increased population. Mandating and increased funding for healthcare services provision we have to strongly object to the proposed housing development.

	We have also in our time seen the level of local traffic increased and an influx of new housing will only make this situation worse. This raises concerns around traffic safety especially with the amount of children going to and from schools in the area. The lack of adequate shopping and parking spaces has not increased accordingly. This situation in our opinion will become worse with development.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No

<p>Please give reasons for your answer</p>	<p>SA/SEA Appraisal for Policy SP17 - number of homes</p> <p>Regulation 12 of The Environmental Assessment of Plans and Programmes Regulations 2004 requires the consideration of the proposed policy</p> <p>The SA/SEA Environmental Report describes that only a single alternative was considered in the Interim SA/SEA for Policy SP17. For the Regulation 19 Consultation, two alternatives are considered, for 1,500 homes and 2,500 homes – and there were also alternatives with fewer than 1,500 homes were not considered.</p> <p>The SA/SEA states that “A large strategic site can deliver a number of positive benefits”. This is undoubtedly true, but it is not false:</p> <ul style="list-style-type: none"> - The two primary schools proposed in SP17 could be located on two smaller sites. - The “local centres providing local retail facilities and small-scale employment for community use”. could be distributed across the area. - A site of either 1,500 or 2,500 homes is not sufficient by itself to support the provision of secondary education. <p>The SA/SEA for Policy SP13 states that the only considered is the one in Policy SP17: “Due to the proposed strategic allocation in Thatcham, it is not considered appropriate to allocate any further sites in the area. All sites have been assessed.”</p> <p>Therefore, the Sustainability Appraisal / Strategic Environmental Assessment (SA/SEA) for Policies SP1 and SP13 are not considered.</p>
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>SA/SEA Appraisal for Policy SP17 - number of homes</p> <p>[Representation part of a wider rep for SP17]</p> <p>As the sustainability appraisal is not legally compliant, the Local Plan cannot be in accordance with Paragraph 32 of the NPPF.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>N/A</p>

4. Proposed Changes	The Sustainability Appraisal / Strategic Environmental Assessment (SA/SEA) needs to consider 'reasonable alternatives'
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	If it would assist the examination.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes

Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>[Same comments submitted in PS1808 under Appendix 2 Settlement Boundary Review]</p> <p>[Representation part of a wider rep for SP17]</p> <p>[See attached document Attachment 2]</p> <p>Appendix 2 of the draft Local Plan defines Settlement Boundaries as follows: "They identify the main built up area of a settlement and the area which is considered acceptable in principle, subject to other policy considerations."</p> <p>This definition creates a presumption in favour of development unless this would conflict with policies within the Local Plan.</p> <p>The area for housing will in any case need to be reduced from what was envisaged in the Strategic Growth Study, in densities defined in the West Berkshire Density Pattern Book. The settlement boundary needs to reflect this.</p> <p>Appendix 2 states that "Boundaries will exclude: Recreational or amenity open space which extends into the countryside in form and nature. This includes designated Local Green Space." The map on page 65 shows three areas of "Local Green Space" adjacent to the 'site boundary'. These are clearly 'recreational or amenity open space' – so must be outside the settlement boundary. There is no supporting evidence to support their location and size – so their position on the map must be considered incorrect.</p> <p>Paragraph 6.58 of the draft Local Plan states: "The new revised settlement boundary will be defined following the settlement boundary policy at the application stage."</p> <p>The 'red line' boundary map of the map on page 65 of the draft Local Plan is described as the "North East Thatcham settlement boundary" of site THA20. However, this same boundary has been incorrectly transferred to the Policies Map and shown in map 1 of the Settlement Boundary Review paper as the settlement boundary.</p> <p>The 'Landscape Capacity Assessment of Potential Housing Sites within and adjacent to the North Wessex Downs Area of Outstanding Natural Beauty West Berkshire: Report Thatcham (August 2015)' by Kirkham Landscape Planning Ltd provides an assessment for site THA20. The settlement boundary of Thatcham to its north. The existing housing adjacent to this site extends to a higher elevation than the settlement boundary to SP17.</p> <p>This report concludes for THA11:</p> <p>"It is recommended that only part of the site should be pursued further as a potential housing site ... to conserve and enhance the character of the land north of Thatcham:</p> <ul style="list-style-type: none"> - The potential development area is ... limited to land on the lower slopes lying below the 95m AOD contour" <p>West Berkshire Council has commissioned studies of landscape capacity for a substantial part of this site in relation to the application for Siege Cross. West Berkshire Council's expert witness on landscape was Bettina Kirkham DipTP BLD. Her Statement of Case to the appeal inquiry provides the following conclusion:</p> <p>"The site contains pasture farmland, within well-established woodlands, and mature hedgerows. It is also on rising ground on the southern flank of the open countryside hillside ridge of the AONB above Thatcham. Extending from 75m AOD to 105m AOD, this area lies well above the local limit of development of 90m AOD and above the limit within eastern Thatcham of 95m AOD. Any development on the appeal site would therefore be an extensive arm into this open elevated and prominent landscape. It is clearly not in keeping with the landscape as it will intrude into an overwhelmingly rural landscape, which forms an intrinsic part of the wider landscape between Thatcham and the settlement beyond a clearly defined and established landscape boundary to the settlement."</p> <p><i>This document is provided as Attachment 2 to my representations (paragraph S.12 is copied above).</i></p>

	Therefore, the available evidence on the landscape character and capacity for the North East Thatcham site indicate extend above the 95m AOD contour, and probably not above the 90m AOD contour.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	N/A
4. Proposed Changes	<p>The term “settlement boundary” is not used in legislation or Government guidance on planning. There is therefore no in a Local Plan to fall within a settlement boundary. It is clearly premature to specify any new settlement plan, and in of the draft Local Plan.</p> <p>The map on page 65 of the draft Local Plan provides a way forward, because it shows the boundary of the site, rather than (i) Paragraph 6.58 needs to be modified as follows: “The new revised settlement boundary will be defined <u>within the ‘North East Thatcham’</u> in the accompanying map.’ following the studies and work identified in the policy for a development of <u>at most approximately 100 dwellings</u> application stage. <u>The settlement boundary will exclude any country park or public open space on the edge of the development</u> (ii) The settlement boundary on the Policies Map needs to be restored to its current position – along Bath Road and Floral Way. Paragraph 6.58 of the draft Local Plan.</p> <p>(iii) A revision of the document ‘Settlement Boundary Review (SBR) December 2022’ needs to be published, in which to show the settlement boundary in its current position – along Bath Road and Floral Way.</p> <p>If however, the Examination concludes that it is appropriate to modify the settlement boundary for North East Thatcham, the settlement boundary should extend no further than the 95m AOD contour, in line with the recommendations of the “Landscape Character Assessment of Potential Housing Sites within and adjacent to the North Wessex Downs Area of Outstanding Natural Beauty, West Berkshire (August 2015) and the statements of West Berkshire Council’s expert witness for landscape at the Planning Appeal for North East Thatcham (August 2015) (if, however, the Examination concludes that it is appropriate to extend the settlement boundary for North East Thatcham, not support, because this needs further analysis), the new settlement boundary should certainly not extend above the 90m contour, in accordance with the best available evidence on landscape.</p>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	If it would assist the examination.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>*LATE RESPONSE*</p> <p>I'm writing to strongly object to proposed north-east Thatcham development.</p> <p>I have been living close to Thatcham for 39 years and during that time I have seen massive expansion in what was once a small town. The infrastructure of the town has not really been coping for at least a decade. If this latest expansion goes ahead the town will be overstretched further.</p> <p>Healthcare</p> <p>As a Thatcham GP for over 30 years I know from personal experience how stretched healthcare is. During my time at Thatcham Cross, Dunston Park and the estate on the old army depot. The last two estates were built without any additional healthcare provision.</p>

	<p>assurances that this would be the case. The result was that the two existing surgeries in Thatcham and also the surrounding villages have seen the increased population. Newly located families tend to be quite high demand and of course GP list sizes increased to accommodate these services.</p> <p>Transport</p> <p>There will inevitably be a significant increase in the amount of traffic both in Thatcham town but also the surrounding villages. The increase in traffic to Floral Way and Harts Hill Road will result in traffic being diverted towards Upper Bucklebury and potentially lead to increased traffic in the villages of Cold Ash and Chapel Row.</p> <p>Environment</p> <p>With an additional 3000 to 4000 extra residents there will be a greater demand for access to green spaces for recreation. The original Thatcham Growth Plan had a proposal for two country parks in the near vicinity. Not surprisingly no details of these country parks would be developed. More worryingly the current management proposal for Bucklebury Common has placed a significant strain on the fragile ecosystem that already exists. I live in Bucklebury Common and over the last 30 years I have seen a significant increase in littering, fly tipping, trial motorbike riding and four-wheel drive abuse. This will inevitably increase with the additional residents in Thatcham. As the site for the new development is also a greenfield site this obviously results in a negative impact on the environment.</p> <p>Education</p> <p>As with healthcare I am aware that this new development will put significant pressure on the existing school provision. There is currently a vague plan to build a further secondary school but there is no active negotiation with the Education Department for this purpose. I have heard that the developers will contribute £15 million towards overcoming this problem but will not be able to deliver on two different things.</p>

Please give reasons for your answer	As family residents of Upper Woolhampton (address/ details below), we object to your plan as we find it unsound and have the following objections: 1. Increase in traffic pollution and hazards in Upper Bucklebury and Chapel Row. The WBC predicts 'some displacement of traffic to routes such as Upper Bucklebury' which we seriously object to. We moved to this area to live in the countryside and avoid traffic and pollution. Over the 10 years or so we have lived in Upper Woolhampton, we have already noticed a significant increase in traffic on Upper Woolhampton and Bucklebury roads. The introduction of such a huge development to the area would necessarily increase traffic pollution and hazards.

hazards to cyclists and walkers and dog walkers (a number of neighbours have sadly lost dogs on the road hit by sp including snakes, have been run over) and cause significantly more disturbance to the residents and nature, on wha unlit roads and lanes.

2. Significant increase in traffic on the A4 which is already busy and gets heavily congested at peak times. When the delays/congestion on the A4, drivers resort to the rural routes which are simply not designed for these increased traff in the area stands to significantly increase the traffic volume on our rural roads that are not designed for any increas ever be!) Increase in traffic and increased potential of speeding through Upper Bucklebury, which is of a major conce many family residents with children (and pet dogs/ cats). With an increase in traffic, this will only worsen the situatio

3. Access and junctions – The transport assessment at para 3.26 shows NO modelling result. Why is this?

4. The proposed new carpark on Harts Hill will only add to more traffic on an already dangerous road and may also p behaviour.

5. I see absolutely NO positive impact on current (or any) residents on significantly increasing cars on our roads, wh the safety and enjoyment of walking, cycling – NOT increase it as the council claims!?

6. West Berkshire declared a climate emergency on 2 July 2019.

https://www.westberks.gov.uk/media/48362/Draft-Environment-Strategy-2020-2030-Summary-document-January-2020-/pdf/WBC_Environmental_Strategy_Summary_A4_20.pdf?m=637141844400230000

WBC - Environment Strategy - with declaration of climate emergency. Building 1500 new houses will certainly increa goes against the emergency/accelerated goal of carbon neutrality and "protecting and enhancing our natural environ certainly be created by the entire construction process, increased light pollution from the development and more car pollution and noise pollution to our rural area. There are seemingly NO environmental advantages of building a mass large development can only bring negative environmental impact and therefore goes against the intent, statement and p strategy.

7. It is cited in the Bucklebury vision and Bucklebury Plan to maintain a strong greenbelt in our area. The vision and village community, for the village to remain a predominantly rural AONB. That there is no wish amongst residents to alle and nature of our historic, rural community identity. This document is approved and agreed with WBC and should be in consideration – yet it is not mentioned in the WBC documentation!?

8. Loss of village identity. There is simply not enough space between the proposed development and Upper Bucklebu WBC are therefore suggesting that the Parish of Bucklebury should maintain its identity but the proximity of the deve WBC's own intentions.

9. Unacceptable impact on our AONB. According the gov.uk, an AONB has to a combination of several criteria, two o

- relative wildness, such as distance from housing or having few roads
- relative tranquillity, where natural sounds, such as streams or birdsong are predominant.

Both of these points stand to be significantly impacted by such a massive nearby development and may no longer b

10. Impact on Nature. We have seen a number of protected species including the great crested newt, adder, slow wo Bucklebury Common. There are also birds such as the nightjar, which are under conservation concern. We fear incre visiting the area of outstanding natural beauty will have a large negative impact. Wildlife like this needs to be protect The development to the south of Blacklands Copse and Harts Hill Copse will mean open space dramatically reduce adding more pressure on species in decline. Over the last 7 years we have seen a significant increase in the litter in tipping in the area. Bringing significantly more people to the area stands to cause more problems like this and more d ecosystem.

11. Bringing more houses and cars to the area will significantly increase the noise and light pollution to a predomina people live to escape from developments like the one proposed.

12. The proposal is an over development of the countryside of rolling hills and farmland and also stands to overdevel development is out of character for the area plans and will have a detrimental impact for the town itself as well as the is at capacity as it. Pre-covid, it was often hard to find a parking space in the town centre, doctors/dentists are appar parking at the train station and already almost full train services at peak times into London. Not to mention the traffic is no evidence that the development will enhance Thatcham town centre (or indeed Newbury).

13. A previous application was resoundingly rejected by the secretary of state in 2017

<https://www.newburytoday.co.uk/news/news/22093/very-strong-message-to-developers-after-thatcham-appeals-turned-down.html>

Why, only a few years after this, are WBC now considering this site in light of the previous rejection, what has chang application has been refused once and that there is clearly significant local objection again, why have massive funds

14. Re Healthcare – neither WBC or the developers, as public and private stakeholders appear to have arranged or pu to the proposed N-E Thatcham development.

15. There has been no direct engagement between the N-E Thatcham Development Consortium and the local GPs.

16. Few new GP practises are commissioned by NHS England and there seems very little realistic prospect of a ne in Thatcham or West Berks in the foreseeable future. The current GP practises are extremely busy - overstretched - a any further capacity to add so many potential new residents to their lists. There has been no approach by WBC or th practise to discuss possible relocation and expansion of a current practise.

17. Thatcham dental care are unable to provide dental care for the current population. There is no evidence that WBC o any local dentists about their capacity/ ability to work with the plans – or not!!

18. WBC and the developers appear not to have arranged a relevant HIA or provided evidence of having appropriate agencies or providers. They are proposing a healthcare site that is unsustainable and therefore have not made provi 1,500 or more new houses. Local NHS provision is significantly unsatisfactory for these new houses. This is not impro worse for everyone. They have not provided evidence for a viable primary care medical facility.

19. There is no evidence to support claims that SP17 will have a positive impact on the environment. By contrast, the will have a significant negative impact. IN a time where we need to protect species – particularly pollinators – a nega sustainability is not acceptable.

	<p>20. SP17 has no proven plans for providing adequate green space and protecting biodiversity, so there will be spill-over areas.</p> <p>21. Schooling – the provision of extra schooling is not clearly defined. Secondary schools are currently over-subscribed, school provision is unsound with no clarity on that the proposed funding is sufficient to meet the council obligations and if the numbers will even be high enough to sustain a new school!? Many local families are very concerned that the proposed local village schools that currently attract a good number of pupils and maintain a good balance of class sizes. Just because there are new schools, it does not mean that new families moving to the area will necessarily choose them. Many may well prefer the sought-after, traditional village schools, causing increased class sizes, over-stretching of school resources, increased pressure on small rural villages.</p> <p>22. West Berks Council has a duty as an education authority to make arrangements for suitable school provision. How this is done for all school years is not defined or evidenced. Please do keep us posted with an update on this important matter.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>I would like to object to this application, which I believe to be unsound.</p> <p>I now understand that there is going to be an exit from the site to the north, on to Harts Hill. The road from here all the way to Chapel Row and Bradfield Southend is already busy with farm traffic, commercial traffic (e.g. delivering to McVeigh Farm), school traffic and parcel deliveries. This is a road that used to be used by cyclists and occasional cars and it is now being used by many more vehicles using it already. The area on Union Road, as it approaches Common Hill is incredibly narrow and often results in a tractor meeting a tractor. This road is not suitable for the current traffic load and certainly could not cope with a large additional traffic load. This wasn't on the original plan and adding it will provide a rat-run for traffic from the site, that would normally have gone on these narrow rural roads. It's really unsuitable and unsafe; and the way it has been added without reference and without consultation is very concerning. I drive along the road from Chapel Row to Theale or from Chapel Row to Thatcham most days; the current traffic load witnessed (involving cars, bicycles, tractors and wildlife) is already too high and adding a significant amount of additional traffic will increase the likely impact.</p> <p>I am particularly concerned about the impact on GP services. It already takes a long time to get a GP appointment at the current Surgery. The plan suggests that a new GP surgery will be built but suggests that people will be moving in before the new surgery is built.</p>

	<p>staff are recruited. Site residents are not going to wait for the new surgery to be built before accessing health services demand on existing supply. The right way to do this is to put the supporting services (not just for health, but that is the first and only after that, build the properties to allow the residents to move in. The current plan is unsound as it does not. I am a <AGE REDACTED> pensioner who had <PERSONAL INFORMATION> and I need GP support. My wife will not move to this site is accepting residents. It is a frightening prospect that access to a GP could get even worse than it is at present.</p> <p>I have other concerns which I am happy to share later, but I believe that the description above identifies the two issues I like to object because the current plan doesn't take any account of my needs (and the needs of many others) as a local resident. It is unsound.</p>

Please give reasons for your answer	<p>I write with regard to the WBC LPR Regulation 19 Objection - SP17. As a resident of Upper Bucklebury I am still struck by the significant impact the development will have towards our local environment and the impact on key services such as schools which I believe have not been thoroughly considered nor the necessary changes made in the Consultation Statement. Therefore, I ask for the comments below to be taken into account for this round of consultation.</p> <p>Objection 1 - Environment</p> <p>At a national scale, we cannot afford to continue damaging our environment and prevent it from becoming a main focus, even at a local scale of Upper Bucklebury, in order to sustain crucial flood risk management. The documentation provided by WBC in support of the draft LPR shows no evidence to suggest that it will have a positive impact on the environment. This to me is appalling as building a sustainable environment is a priority of WBC. The new proposal for 'community parks' in the SP17 instead of the original 'country parks,' only shows the inconsiderate commitment WBC has to protect the environment and the upholding the countryside landscape around us. This negativity against the environment is in direct contrast to the LPR's Sustainability Appraisal which accepts how the SP17 will have a negative impact on the environment's sustainability: 'The site is a greenfield site and therefore, would result in a negative impact on the environment.'</p>

sustainability which would need to be mitigated.' This mitigation is not highlighted in the plan and once again proves how the impact towards the environment is not being acknowledged.

For me this is devastating, how can you continue to not put the environment at the forefront of your plans?

Objection 2 - Education

The LPR does not have specific details upon how Nursery or Early Years will access the new housing. It states how the housing will be made 'affordable' thus suggesting it will attract young families, leading to an increased number of young children who need to access Nursery who will not be able to be put on the surrounding nurseries. Moreover, for Primary education, the LPR appears to lack evidence for the planned numbers of schools. For Secondary education, the schools (Kennet School or The Downs) are already oversubscribed - which is putting more pressure on resources and the quality of education for its students.

Objection 3 - Healthcare

I take note of SP17's proposal for a primary healthcare facility, which indicates it will be managed by an appropriate public health body. However, even in locations where there is a need, the construction of a few new GP centres, and data in the public domain indicates that other regions have struggled in West Berkshire. So, it would appear that there is absolutely no chance of constructing a new facility with funding from the NHS. Due to the increased expenses required and the impracticality of building on green sites, it would also not make sense for an existing local practice to open a branch on the new sites.

Each of the three currently operating practices that serve the area is already overburdened. According to statistics, each Doctor is responsible for slightly under 2000 patients—and the recent addition of pharmacies in Thatcham have added to this burden.

Conclusion

In conclusion, I object to the LPR Regulation 19 Objection - SP17 for the reasons highlighted above. On a personal level, I believe the damage to the AONB land will ruin the heritage of Upper Thatcham and the connection residents have had with the local environment and countryside for years. The impact on the landscape that will be ruined. The poor consideration by WBC towards the impacts on the environment is why I object.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p><i>Increased traffic. I am very concerned about the amount of increased traffic that the development will bring to not only the village of Cold Ash but also other nearby villages such as Cold Ash. In particular I am extremely concerned about the plan for an exit at the north end of the development onto Harts Hill Road. There are no modelling results for this junction in the Transport Assessment and no drawings or photographs for all the other proposed junctions, I find it very worrying that the proposed junction on Harts Hill Road does not appear to have been researched fully. As anyone who frequents Harts Hill Road will be able to confirm, this road is completely inadequate for the amount of traffic it carries, no pavements and has a high potential for serious accidents, as can be confirmed from just earlier this year with large numbers of accidents on the icy road and with the police having to be called out to at least one accident due to the road conditions.</i></p> <p><i>Safe and sustainable transport. I question the Council Assessment that states 'the policy is likely to have a positive impact on walking, cycling and public transport' will be critical to the design of the site.' Considering WBC also contradicts itself by predicting that there will be 'some benefits from wider rural rounds such as Upper Bucklebury, I fail to see how both statements can be true when the rural route leading to the development is inadequate and unsafe for the reasons previously stated above.</i></p> <p><i>I also question the council statement that 'the policy is likely to have a significant impact on walking, cycling and public transport should be designed with these in mind.' Firstly, the popular and scenic walking route over the fields between Upper Bucklebury and Thatcham should be replaced with houses, and I do not how this can be considered a positive change. Secondly, the increased traffic on Harts Hill Road is this even more dangerous for cyclists, and it is already dangerous to the point where I would not cycle along it myself. Considering that I am expecting my oldest child to start attending Kennet School in September, it would be an extreme inconvenience for me to cycle to and from school, especially as sustainability is something that is important to me, however there is absolutely no chance of considering allowing her to cycle on Harts Hill Road as it is already too dangerous, narrow and busy for cyclists to feel safe on – which will put both the local public transport service under yet more pressure and also make it more difficult for residents to access public transport due to the increased traffic on Harts Hill Road – will be a positive thing.</i></p> <p><i>Primary school and nursery provisions. There are no details in the LPR for the provision of nursery, early years and primary school data or evidence on the planned number of schools or form entry requirement, and with the only referenced data being from 2010, this can be relevant to current requirements.</i></p> <p><i>Secondary education provision. Currently, many children from Bucklebury attend Kennet School (our nearest catchment school) every single year. As children who live nearer to the school are given precedence, this would mean that children from the development would take priority, although Kennet would be very unlikely to be able to accommodate all of them. Children would have to go to The Downs, which firstly they are only in a secondary catchment for, and secondly is a 45 minute bus ride and a long journey to Kennet.</i></p> <p><i>It is clear that already there are not enough secondary school places in Thatcham and therefore a secondary school would be a matter of necessity for this proposed development. However, there are no details of the land to be provided. In addition, it is clear that the NE Thatcham development is not sufficient to fill a 6 Form Entry secondary school on its own, so it is unclear how it can be at all, and the plan is therefore not even considering the effect this would have on the children already living in the local area. The development would be unable to attend their local school. Obviously, it goes without saying, that forcing children to attend a school further away will both contribute to the increased traffic issues and will be extremely detrimental to sustainability objectives.</i></p> <p><i>Sports fields. The LPR mentions providing sports fields, however these need to be on flat ground of which the only suitable area is the area and therefore in the area with the most traffic fumes (see my earlier point regarding transport, for info on increased traffic). There should be any funding for these facilities, and the LPR also seems to assume that the school playing fields (assuming the school is built) can be available to use as sports fields. Obviously it is highly unlikely that this would be the case, as schools would not be able to use their grounds, for safeguarding reasons among many others.</i></p> <p><i>It is extremely concerning that the LPR fully states its intent to purposely direct extra traffic straight into the area of A4 traffic onto wider rural routes such as Upper Bucklebury). It is clear that the proposed development on a greenfield site and which currently provides a home to legally protected wildlife will have a huge detrimental effect to the local environment.</i></p> <p><i>A request for an access road for just five new homes in Cold Ash has recently been refused by the council due to the impact this would cause. The same argument also applies for this development, only on a much larger scale. I cannot think of a better way to impact, than situating thousands of new homes on greenfield land just a mile from the AONB.</i></p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	N/A
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a	

<p>minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>The draft Local Plan was approved to move to Regulation 19 Consultation by a meeting of West Berkshire Council on 12th December 2020. The decision was given on the basis that the size of the development when complete would be approximately 1,500 dwelling. The decision stated:</p> <p>“Councillors allocated a new strategic development of 1,500 new homes in north-east Thatcham, a significant decrease on the 2,500 homes previously proposed.”</p> <p>“We have cut the proposals for any future development in north-east Thatcham by 1,000 homes, which is a big change from the 2,500 homes proposed below - See attached document <i>Thatcham Town Council_Press Release Dec 22</i>)</p> <p>The emerging draft Local Plan (December 2020) stated at paragraphs 6.12 and 6.13:</p> <p>“This includes the strategic allocation at North West Thatcham for up to 2,500 homes where delivery of at least 1,250 homes is expected within the plan period.”</p> <p>The Local Plan Submission draft (January 2023) states in Policy SP17: “The site is to be allocated for approximately 1,500 homes to be completed within the period of the plan.”;</p> <p>at paragraph 6.22: “additional housing supply on newly allocated sites ... includes the strategic allocation at North West Thatcham for up to 2,500 homes within the plan period.”;</p> <p>and at paragraph 6.61: “Delivery of approximately 1,500 dwellings is anticipated within the plan period.</p> <p>Policy SP17 is silent on the possibility of additional dwellings following the plan period.</p> <p>Policy SP17 also states: “The Thatcham Strategic Growth Study provides guiding principles for the delivery of the site that these guiding principles have been positively responded to.”</p> <p>The Thatcham Strategic Growth Study was prepared for a site allocation of 2,500 dwellings, and has not been updated since 2017. It should therefore be interpreted that one of the ‘guiding principles’ of the Growth Study is a final size for the development of 2,500 dwellings.</p> <p>Even worse, an applicant for planning permission might ‘cherry pick’ a site allocation of up to 2,500 dwellings with the site allocation of 1,500 dwellings in Policy SP17 that are based on the needs of 1,500 dwellings.</p> <p>The wording of Policy SP17 is therefore unclear and ambiguous on the expected final number of dwellings on the site. It is therefore not evident how a decision maker (whether West Berkshire Council or the Planning Inspectorate in case of an appeal) should interpret the policy.</p> <p>Paragraph 16 of the NPPF (July 2021) states that: “Plans should: d) contain policies that are clearly written and unambiguous so that a decision maker should react to development proposals”. Policy SP17 is therefore not in accordance with Paragraph 16 of the NPPF and is not consistent with national policy.</p>

3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	N/A
4. Proposed Changes	<p>To make this aspect of policy SP17 sound, it must be clarified that the 1,500 dwellings is the final number when development is completed during the plan period.</p> <p>Supporting evidence needs to be provided to justify this number.</p> <p><i>NOTE: This comment is without prejudice to other representations by the Town Council on Policy SP17.</i></p>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	<p>Thattham Town Council is the principal representative body of the community and is the location of only new strategic site allocation in the draft Local Plan. The development for development is reliant on having adequate infrastructure. However, the infrastructure promised in the current Local Plan has not materialised, and would not be delivered by the policies in the draft Local Plan. The Town Council can provide local insight to the development of Thattham, and particularly on the substantial deficit of infrastructure in the local area. We are happy to elaborate on its other concerns about the current proposals for the Strategic Site Allocation, as described in these representations.</p> <p>The Town Council anticipates that changes necessary to the draft Local Plan in relation to site allocations are greater than could be addressed through 'main modifications'. If the Council is minded to consider recommending 'main modifications' to policy SP17 and related Policies, it would welcome the opportunity to provide its perspective on what is required.</p>
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	<p>Policy SP17 states:</p> <p>"The Thatcham Strategic Growth Study provides guiding principles for the delivery of the site therefore proposals which have been positively responded to."</p> <p>As discussed in another representation by Thatcham Town Council, the word "will" has many different meanings, and is ambiguous. The sentence only carries any weight if it is intended as a requirement – if it is merely an aspiration, it has no weight. Therefore, the word 'will' in this sentence MUST be replaced by "must".</p> <p>This sentence therefore means that the Thatcham Strategic Growth Study is incorporated by reference into Policy SP17. The Council states:</p> <p>"The Thatcham Strategic Growth Study (TSGS) is a consultant's report commissioned by the Council. The Council has not formally part of the Regulation 19 consultation and only forms part of the supporting evidence to the Regulation 19 Consultation. It has not been approved by any member of the Council, nor, as far as we are aware, through delegated authority. This is demonstrated by the saved web pages for the Regulation 19 Consultation provided Attachments 1 and 2 to the Town Council's representations. <See attachments PS1672 Thatcham Town Council_Attachment 1 - Reg 18 webpage and PS1672 Thatcham Town Council_Attachment 2 - Reg 18 evidence webpage></p> <p>The Thatcham Strategic Growth Study is an integral part of the draft Local Plan through incorporation by reference into Policy SP17. It is not formally part of the Regulation 19 consultation. Policy SP17 therefore is not legally compliant with the requirements of the Town and Country Planning (Local Planning) (England) Regulations 2012'. It therefore also does not comply with the requirements of the Local Plan Involvement.</p>
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>Paragraph 16 of the NPPF (July 2021) states that: "Plans should: d) contain policies that are clearly written and unambiguous and a decision maker should react to development proposals".</p> <p>Policy SP17 states:</p> <p>"The Thatcham Strategic Growth Study provides guiding principles for the delivery of the site therefore proposals which have been positively responded to."</p> <p>This sentence is totally unclear and ambiguous, for three reasons:</p> <ul style="list-style-type: none"> • There is no section of Thatcham Strategic Growth Study titled "Guiding Principles", and no section that could reasonably be interpreted as such. This study is effectively the set of ideas by one consultancy about one possible configuration for a development. • The Study was based on a development of 2500 dwellings, and it is totally unclear how it might be applied to a site which aspects would be different and which would be unchanged. • The phrase "positively responded to" is completely meaningless in planning terms. <p>As a result of this lack of clarity and ambiguities, a developer could claim that almost any proposed development meets the requirements in Policy SP17.</p> <p>Paragraph 6.63 of the supporting text to the policy contradicts paragraph 6.54:</p> <p>"6.54 In reviewing the vision for Thatcham as part of the LPR, and to best understand how to plan for growth in Thatcham, the Council commissioned masterplanning work (Thatcham Strategic Growth Study (TSGS) 2020)."</p> <p>"6.63 Further detailed work will be required to develop a coherent masterplan or development framework to take the site forward to be produced in collaboration with the community and other stakeholders".</p> <p>It therefore appears that West Berkshire Council believes that the Thatcham Strategic Growth Study is not coherent, and is not development forward. It is therefore unsound, because it does not comply with paragraph 16 of the NPPF.</p> <p>Paragraph 1.10 of the Thatcham Strategic Growth Study Stage 3 report mis-represents the involvement of Thatcham representatives' workshop". A limited number of places in this workshop were offered to the Town Council, with no advisory or participatory nature. Under the legislation governing Town and Parish Councils, individual Councillors can only 'represent' the community mandated by a Committee (there is no equivalent to the scheme of delegation for Principal Authorities). Therefore, the workshop were participating in an individual (albeit informed) capacity. The Councillors who attended did not agree with the workshop specified for the 'interactive masterplanning session'. The Town Council has requested that this be corrected, but this has not been done.</p> <p>Paragraph 6.59 of the draft Local Plan is therefore also misleading to claim that "community objectives which emerged from the workshop".</p> <p>The Town Council's representations to the Regulation 18 Consultation highlighted a number of errors and misleading information in the Strategic Growth Study – for example the incorrect assertion that "enhancement of a 3G pitch at Henwick Worthy would provide an additional 1ha of sports pitches towards the NE Thatcham total". In fact, the Henwick Worthy site is already fully utilised as an existing grass one.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>N/A</p>
<p>4. Proposed Changes</p>	<p>As proposed in another representation by Thatcham Town Council, the word "will" in the first paragraph of Policy SP17 should be "may".</p> <p>"The Thatcham Strategic Growth Study provides guiding principles for the delivery of the site therefore proposals which have been positively responded to."</p> <p>In order to make the Local Plan review legally compliant, the Thatcham Strategic Growth Study needs to be reviewed and updated to reflect the 2500 dwellings, and the resulting 'guiding principles' then need to be incorporated into the draft Local Plan or a supplementary planning document. This needs to undergo public consultation in accordance with the Statement of Community Involvement.</p> <p>This cannot be achieved through modification at examination.</p> <p>It is clear that the Local Plan is therefore "not ready for independent examination". Therefore, in accordance with Section 238 of the Compulsory Purchase Act 2004, West Berkshire Council must not submit it to the Secretary of State for examination.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>Thatcham Town Council is the principal representative body of the community and is the location of only new strategic site allocation in the draft Local Plan. The site for development is reliant on having adequate infrastructure. However, the re</p>

	<p>promised in the current Local Plan has not materialised, and would not be de policies in the draft Local Plan. The Town Council can provide local insight to t Thatcham, and particularly on the substantial deficit of infrastructure in the lo happy to elaborate on its other concerns about the current proposals for the Strategic Site Allocation, as described in these representations.</p> <p>The Town Council anticipates that changes necessary to the draft Local Plan i allocations are greater than could be addressed through 'main modifications'. If, is minded to consider recommending 'main modifications' to policy SP17 and r Policies, it would welcome the opportunity to provide its perspective on what r required.</p>

<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>The evidence base for this Regulation 19 consultation includes a total of 33 Landscape Capacity Assessments prepared by Liz Allen EPLA on behalf of West Berkshire Council. The exception is the 'Landscape Capacity Assessment for Land North East of Thatcham', which was undertaken on behalf of David Lock Associates by Lloyd Jones Associates.</p> <p>The report states that David Lock Associates are "planning consultants appointed to West Berkshire Council". This is not the Thatcham Strategic Growth Study for the Council. However, it DOES NOT say that West Berkshire Council commissioned a Landscape Capacity Assessment, and we have reason to believe that it did neither.</p> <p>Paragraph 2.12 of the report includes a curious statement:</p> <p>"The project brief requires the visual sensitivity of the study site to be considered as a single tract of landscape, and not broken down into individual parcels of land."</p> <p>It is difficult to understand why this should be an explicit requirement of the study.</p> <p>David Lock Associates has a potential conflict of interest in relation to this study; it had already pre-determined its view on the site through undertaking the Thatcham Strategic Growth Study for 2,500 dwellings, which was funded by the proponents of the study. The Landscape Capacity Assessment not to be broken down into individual parcels of land masks the proportion of the site that is suitable for development and its capacity.</p> <p>Paragraph 1.12 of the report in the section 'Determination of Landscape Capacity within the Site' states:</p> <p>"Because the project brief requires the sensitivity of the study site to be assessed as a single tract of landscape, rather than broken down into sub-components, no attempt has been made to plot variability of landscape capacity within the study site boundary, and this variability is present and is a constraint that should inform design. It will be down to individual applicants to assess the capacity of the study site in relation to individual planning proposals, should the land be brought forward for development."</p> <p>The statement in the second sentence is true for West Berkshire Council as well as applicants.</p> <p>The conclusion of the report, given in paragraph 1.7, is:</p> <p>"Having followed the template methodology, and made judgements concerning landscape and visual sensitivity, and having considered the landscape value, this exercise has concluded that overall the study site THA20 has a Medium Capacity. This is defined as 'The landscape could accommodate areas of new development in some parts, providing it has regard to the setting and the character and sensitivity of adjacent landscape character areas. There are landscape and visual constraints and characteristics that must be retained and enhanced.'"</p> <p>This is obviously inadequate to assess whether the site does indeed have a capacity of 1,500 dwellings, or how they should be distributed. West Berkshire Council has commissioned studies of landscape capacity for a substantial part of this site in relation to the application for Siege Cross. The summary of Statement of Case of West Berkshire Council's expert witness on landscape capacity and constraints of development of this site, and is provided as Attachment 3. (see attached document PS1677 Thatcham Strategic Growth Study 3_Siege Cross Landscape Statement of Case)</p>

3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	N/A
4. Proposed Changes	<p>West Berkshire Council needs to commission a Landscape Sensitivity and Capacity Assessment that provides enough landscape capacity across the site and its sub-components to inform a Landscape and Visual Impact Assessment (LVIA) of total capacity.</p> <p>The wording of Policy SP17 needs to be amended as follows:</p> <p>The LVIA will be informed by a Landscape Sensitivity and Capacity Assessment <u>that considers variability of landscape</u> Landscape Sensitivity Assessment (2021) of the site.</p> <p><i>(added text is underlined; deleted text is struck through)</i></p> <p>Until there has been a quantitative Landscape Capacity Assessment for the site, Policy SP17 should not specify a number of units.</p>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes

2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	The Policies Map shows the open space between Sowerby Street and Tull Way (on the west side of Thatcham, to the garden centre) as being outside the Settlement Boundary and part of the 'proposed green gap' between Thatcham and "Thatcham W" of the paper 'Settlement Boundary Review (SBR) December 2022' shows the settlement boundary as

	In the Regulation 18 consultation, the Town Council proposed that the open space between Sowerby Street and Tull settlement boundary, and this was accepted by West Berkshire Council - Settlement Boundary Review Background responses (pdf page 115).
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	N/A
4. Proposed Changes	The settlement boundary in the Settlement Boundary Review (SBR) December 2022, map "Thatcham W" needs to be updated as the area of open space between Tull Way and Sowerby Street is outside the settlement boundary.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	<p>Thatcham Town Council is the principal representative body of the community and is the location of only new strategic site allocation in the draft Local Plan. The development for development is reliant on having adequate infrastructure. However, the infrastructure promised in the current Local Plan has not materialised, and would not be delivered by the policies in the draft Local Plan. The Town Council can provide local insight to the examination of Thatcham, and particularly on the substantial deficit of infrastructure in the local area. We are happy to elaborate on its other concerns about the current proposals for the Strategic Site Allocation, as described in these representations.</p> <p>The Town Council anticipates that changes necessary to the draft Local Plan in relation to site allocations are greater than could be addressed through 'main modifications'. If the Council is minded to consider recommending 'main modifications' to policy SP17 and related Policies, it would welcome the opportunity to provide its perspective on what is required.</p>
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	<p>The Local Plan Review web page on the West Berkshire Council website for the evidence base of transport assessments states:</p> <p>“Transport is one of the key considerations to be assessed as part of the Local Plan Review (LPR) process. A Strategic Transport Assessment (STA) is being undertaken to run concurrently with the LPR process to determine the potential impacts of the emerging draft Local Plan and to identify and assess mitigation measures to address such impacts.”</p> <p>(https://westberks.gov.uk/transport-assessments retrieved 26/02/2023 - copied below < see attached document PS1708 Assessment webpage>)</p> <p>Regulation 12 of The Environmental Assessment of Plans and Programmes Regulations 2004 states:</p> <p>“(1) Where an environmental assessment is required by any provision of Part 2 of these Regulations, the responsible authority shall prepare, and submit to the Secretary of State, the preparation of, an environmental report in accordance with paragraphs (2) and (3) of this regulation.</p> <p>(2) The report shall identify, describe and evaluate the likely significant effects on the environment of—</p> <p>(a) implementing the plan or programme</p> <p>If the document “to determine the potential impacts of the emerging draft LPR” is “being undertaken to run concurrently with the LPR process, the evidence for the SA/SEA cannot have been available when the Sustainability Appraisal: Appendix 5 SA/SEA of the Local Plan was prepared.</p> <p>The SA/SEA Summary for Transport Policy in Table 59 Appendix 5 of the SA/SEA states:</p> <p>“The policy is likely to have a positive impact on all sustainability objectives as it seeks to promote and encourage the use of sustainable travel, such as walking, cycling and the use of public transport over car use. A number of indirectly positive environmental impacts have been identified, which relate to benefits that a reduction in car use would have that are not directly related to the policy. No significant negative impacts have been identified as a result of this policy.”</p> <p>It describes the ‘Overall effect’ as “Positive”. There is no basis for this conclusion, as the Strategic Transport Assessment (STA) is not yet completed.</p> <p>The proposal for approximately 1,500 homes at North East Thatcham will increase the overall level of traffic in and around the village. The Strategic Transport Model – Local Plan Forecasting Report concludes (paragraphs 5.4.1 and 5.4.2):</p> <p>“5.4.1 The analysis set out in this assessment indicates where small impacts may still occur as a result of Local Plan growth, however due to network constraints it will not necessarily be feasible to mitigate all such impacts.</p> <p>5.4.2. It is important to note, however, that the Local Plan impacts have been assessed against a Reference Case with no growth (the current adopted Local Plan) in housing and employment within West Berkshire, which is an unrealistic situation; the Local Plan is expected to deliver growth across the district, and the district is committed to deliver that growth.”</p> <p>Regulation 12 requires the EA/SEA to assess the plan as a whole, not policy-by-policy. It is therefore clear that the impact of the Local Plan in relation to transport is negative, even without taking into account the growth in housing and employment within West Berkshire. The draft Local Plan does not comply with the requirement of Paragraph 12(2)(b) of The Environmental Assessment of Plans and Programmes Regulations 2004.</p>
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable	

alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	As the sustainability appraisal is not legally compliant, the Local Plan cannot be in accordance with Paragraph 32 of
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	N/A
4. Proposed Changes	The SA/SEA needs to be reviewed in relation to transport after completion of the Strategic Transport Analysis.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	<p>Thattham Town Council is the principal representative body of the community is the location of only new strategic site allocation in the draft Local Plan. 1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	N/A
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>Ambiguous use of the word 'will' and other ambiguities [Representation part of a wider rep for SP17] Paragraph 16 of the NPPF (July 2021) states that: “Plans should: d) contain policies that are clearly written and unambiguous so that the decision maker should react to development proposals”. The word “will” has many different meanings when it forms part of a modal verb, including: (i) To issue commands, to express intention or determination; (ii) To make requests, or invite; (iii) To wish, desire or want. Within the draft Local Plan, the word “will” is used with all three meanings. In some cases, the intended meaning is clear. This leads to considerable ambiguity, and the risk that the policy could be interpreted in the future in ways that are not intended or that the policy could be challenged through planning appeal. This ambiguity exists throughout the draft Local Plan, but the focus of my concern of is on policy SP17. The Policy refers to the “Thatcham Strategic Growth Study provides guiding principles for the delivery of the site”. This study is split into Past, Thatcham Present and Thatcham Future. Presumably, only the last of these is relevant to Policy SP17, so this is the intended meaning.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p></p>
<p>Please give reasons for your answer</p>	<p>N/A</p>
<p>4. Proposed Changes</p>	<p>It is necessary to replace the word “will”, where the intended meaning is a commitment or obligation. The two possible alternatives are “shall” and “must”. I have extensive experience in the development of technical standards in Technical Bodies of the European Telecommunications Standards Institute (ETSI). Its drafting rules specifically prohibit the use of the word ‘will’ in standards, and any document containing this word must be referred to the ETSI Secretariat to the Technical Body for amendment. The word used by ETSI for a requirement is “shall” – largely consistent with other languages. For the draft Local Plan, I prefer the use of “must”, as recommended in ‘The Office of Parliamentary Counsel: Drafting Standards’ (https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/892409/OPC_drafting_standards.pdf) (retrieved 12/02/2023) In addition to the changes proposed in the representation by Thatcham Town Council, I would change the two instances of “will” to “must”, to make it clear that this provision carries the same weight as the other requirements in the Policy. Policy SP17 North East Thatcham Strategic Site Allocation Land as shown on the Policies Map is allocated for a sustainable low carbon, urban extension comprising of distinct neighbourhoods, which are well served by public transport, and connected and contributing to Thatcham, and woven through with natural habitats and links. The site is to be delivered as a whole to achieve a comprehensive development. The provision of all infrastructure, services, open spaces and co-ordinated. The Thatcham Strategic Growth Study Stage 3 Report Thatcham Future provides guiding principles for the development. All proposals <u>must</u> will demonstrate that these guiding principles have been positively responded to. [NOTE: I do not understand how “positively responded to” would be interpreted in planning policy terms, especially as the Study was for 2500 houses] Homes The site is to be allocated for approximately 1,500 dwellings which <u>are expected to will</u> be completed within the period of the plan. The dwellings <u>must</u> will comprise of a housing mix which complies with the housing mix contained in Table 3 of Policy SP18. In addition to the following: • 40% of dwellings <u>must</u> will be affordable housing; and • 3% of dwellings <u>must</u> will be delivered via serviced custom/self-build plots. Community The site <u>must</u> will provide: • Local centres providing local retail facilities and small-scale employment for community use (approximately 1,100 sq m)</p>

- 450 sq. metres GP Surgery to be offered to the Buckinghamshire, Oxfordshire and Berkshire West Integrated Care body;
- Early years provision;
- A 2.5 FE primary school on site and sports infrastructure requirements of the school, land to be provided and built;
- Secondary provision - Land to meet the impact of the development. The nature and cost of the mitigation must will be undertaken at the applicants expense and prepared in collaboration with the Council and local stakeholders;
- 1,200 sq m community indoor facility to be used for sport and community uses with a variety of room sizes (current);
- Outdoor formal and informal sports pitches and areas to meet the identified need of the development;
- Open space to meet the needs of the development in accordance with Policy DM41;

Green Infrastructure

The site must will provide a comprehensive green infrastructure network which will take advantage of the landscape features of the site. This network will comprise:

- A new community park linking Thattham to the North Wessex Downs AONB;
- Greenways which connect through the site to the park, facilitate connection to the AONB, and include leisure routes;
- A comprehensive network of other accessible routes and connections within the development which provide walking routes;
- Existing and new Public Rights of Way; and
- Retained and new trees, hedgerows and other appropriate native planting which contribute to biodiversity net gain.

Transport

Measures must will be included to improve accessibility by, and encourage use of, non-motorised transport modes. A detailed plan will provide detail on how this will be achieved, including:

- Active travel improvements on routes between the site, Thattham town centre and the railway station;
- A vehicular through route;
- Sustainable transport through routes;
- Mitigation of the development's impacts on the highways network with improvements to existing junctions where the development provides access points for all forms of movement and transport to the site at locations to be agreed with the planning authority;
- How adverse impacts on air quality will be minimised.

Sustainability

Development of the site must will be in accordance with supported by a Sustainability Charter which will establish how sustainability will be achieved. This will be informed by:

• An Energy Strategy which must sets out measures to achieve a model low carbon development (following the energy efficiency policies SP5 and DM4, including:

- net zero carbon (regulated and unregulated energy) emissions for dwellings;
- BREEAM 'excellent' non residential buildings;
- on-site renewable energy to assist in the delivery of a net zero carbon neutral development; and
- carbon off-setting.

• An Integrated Water Supply and Drainage Strategy which must will set out:

- measures to ensure the provision of adequate and appropriate infrastructure for water supply and waste water, both surface and groundwater;
- surface water management approaches that could deliver net gain for Thattham town, including use of on-site sustainable drainage systems.

• An Ecology Strategy which must will set out:

- a Biodiversity Net Gain Strategy to show how net gain will be achieved including through habitat creation, restoration and linkages;
- how priority habitats and ecological features will be protected and enhanced;
- the creation of new ecological features; and
- a site-wide management plan.

• A Green Infrastructure Strategy which must will show how a network of multifunctional green infrastructure will be provided.

• A Public Rights of Way Strategy which must to demonstrate how existing Public Rights of Way will be protected and new ones will be established, including bridleway links and safe crossing points.

• A Lighting Strategy which must will include consideration of dark skies, particularly in relation to the nearby North Wessex Downs AONB to mitigate the impact on biodiversity.

• A Landscape and Visual Impact Assessment (LVIA) in accordance with the Landscape Institute Guidelines for Landscape Assessment 3rd ed. 2013. This will inform the final capacity, development, design and layout of the site and requirements for green infrastructure and public open space. The LVIA will be informed by the Landscape Sensitivity Assessment (2021) of the site.

• A Mineral Resource Assessment (MRA).

• A Historic Environment Strategy which must to demonstrate how the listed buildings in the area will be conserved and their settings has been considered.

A Construction and Operations Management Plan (COMP) shall must accompany any planning application on the site and the oil pipeline from operational works, including the provision of an appropriate buffer.

[NOTE: This final paragraph should not be a sub-bullet of Sustainability]

5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	N/A
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes	No

<p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>Level Crossing [Representation part of a wider rep for SP17]</p> <p>As a resident of Thatcham, the location in the town where I experience the most serious congestion is the level crossing. The queue can build to more than half an hour in duration, when there is an unfortunate combination of train movements. This is unacceptable, and any increase in delays is completely unacceptable.</p> <p>The WSP study does not build this into its model. The West Berkshire Local Plan Review Phase 2 Transport Assessment states "the model also indicates that these queues clear when the level crossing gates are open", which is an obvious but incorrect assumption.</p> <p>It is clear that any increase in housing in Thatcham will result in a corresponding increase in traffic over the level crossing. The houses are located at the east of the town.</p> <p>The increase in population and Government policies to encourage travel by public transport are likely to increase the number of trains using the station. This will increase the delays, because the level crossing barriers need to be down for longer for a train to pass at speed.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	N/A
<p>4. Proposed Changes</p>	<p>The future Strategic Transport Assessment should take into account the delays due to the level crossing at Thatcham. Any necessary changes for this should be carried out. The results of the Strategic Transport Assessment should then be considered in the Strategic Environmental Assessment (SA/SEA), prior to the submission of the draft Local Plan.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	The regeneration of Thatcham Town Centre and the provision of social infrastructure in the town are recognised as in economic and social impacts are greater than the criterion of 'significant' in the Government Guidance "Strategic environmental sustainability appraisal". These should therefore have been considered specifically in the Sustainability Appraisal.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by	

<p>the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>[SP17 - Deficit of Social Infrastructure for Thattham. Representation part of a wider rep for SP17] [See attached documents Attachment 3 and 6]</p> <p>The current Local Plan states in the introduction to Policy Area Delivery Plan Policy 3: “Thattham town centre will be a focus for regeneration, enabling the town to fulfil its role within the District’s Hierarchy of Centres, serving the local population, not only within Thattham, but also the surrounding rural areas. The provision of leisure and community facilities for all ages will be improved and enhanced retail offer and enhancing the streetscape. The provision of leisure and community facilities for all ages will be improved and enhanced retail offer and enhancing the streetscape.”</p> <p>The policy itself includes the following objectives:</p> <ul style="list-style-type: none"> • Thattham’s services and facilities will be improved allowing the town to fulfil its role within the District Settlement Hierarchy of Centres, serving the local population, not only within Thattham, but also the surrounding rural areas. • The town centre will be regenerated with the redevelopment of the Kingsland Centre driving this improvement, providing a high quality environment and enhanced retail offer. This redevelopment is proposed to deliver approximately 17,200 sq.m of new space including, among others, retail, residential, office and community space. • The streetscape and public realm throughout the town will be improved, along with upgrades to the A4/Bath Road and Bath Road, enhancing Thattham’s image. • The range of leisure facilities within Thattham will be expanded, utilising those at the existing Newbury Leisure Park and providing opportunities for leisure within the town centre through any future regeneration projects. <p>The Infrastructure Delivery Schedule (2013) includes the following:</p> <ul style="list-style-type: none"> • A new library is ‘necessary’ as ‘Library needs to be about 900 sq.m larger than current provision’, at a cost of £3,700,000. <p>However, none of this regeneration has materialised, no new developments have materialised, and the Newbury Leisure Park Area Delivery Plan Policy 3 from the current Local Plan is provided as Attachment 6 to these representations.</p> <p>The draft Local Plan states:</p> <p>6.52 Thattham has experienced rapid population growth during the post-war period, expanding more than 5 times since 1951, accompanied by infrastructure growth in transport, and a considerable expansion in the built-up area to match the population growth. Recent decades, the provision of social infrastructure has not kept pace with housing growth.</p> <p>6.53 The vision for Thattham contained in the Core Strategy DPD (2012) was that Thattham town centre would be a focus for regeneration, enabling the town to fulfil its role within the District’s Hierarchy of Centres by improving the retail offer and enhancing the streetscape. The provision of leisure and community facilities for all ages would be improved and encouraged within the town centre. The town would be provided with a range of job opportunities and encouraging residents to shop and socialise locally.</p> <p>In the January 2023 Infrastructure Delivery Plan, the new library has been replaced by ‘A new library / community hub’ with no indication on when this might materialise. The only other significant proposed infrastructure developments for Thattham are for the North East Thattham development.</p> <p>During the current plan period, the town will have grown by several hundred dwellings due to non-strategic development. The ‘regeneration’ has materialised, and if anything has degenerated – the Kingsland Centre has not been redeveloped, the library has been closed, and the library might benefit from a disabled toilet. There have been no other significant compensating enhancements.</p> <p>Attachment 3 to this response contains the formal answers to questions that I submitted to the meeting of the Executive on 12th January 2023 – see Item (A) on page 3 and Item (H) on page 8 (the question on page 6 is not relevant to the local plan). These questions confirm that there has been no major investment in infrastructure for Thattham in recent years. Much of the money spent was for refurbishment, rather than regeneration. The answer to Item (H) also indicates that the Council does not intend any expansion of the Newbury Leisure Park (Covid-related grants are irrelevant, because they were for the purpose of providing improvements).</p> <p>The premise of Policy SP17 that Thattham is able ‘to fulfil its role within the District’s Hierarchy of Centres’ is fundamental to the Local Plan. Policy SP17 and its assessment in Appendix 4 of the Sustainability Appraisal either incorrectly assess or ignore the need for social infrastructure in Thattham, and therefore cannot have assessed ‘the area’s objectively assessed need’. Policy SP17 is not justified. Policy SP17 also cannot be based on proportionate evidence, and is therefore not Justified.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>N/A</p>
<p>4. Proposed Changes</p>	<p>There needs to be a clear policy for the regeneration of Thattham, and in particular its social infrastructure. This need must be completed in advance of any further housing development or at specified stages of construction. This could be done through Policy SP17 or a separate policy.</p> <p>The Infrastructure Delivery Plan is not sufficiently robust for this purpose. It is described as a ‘living document’, and the fact that it includes can ‘die’ at the discretion of the Council without any need for public consultation.</p>

5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	If it would assist the examination.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is	No

<p>consistent with achieving sustainable development.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>I have read the representations made by Bucklebury Parish Council and agree with their objections to the Regulation 19 version of the LPR.</p> <p>There are clearly significant flaws in the Regulation 19 version of the LPR. West Berkshire District Council (WBC) should have examined the document more thoroughly before it is submitted for examination.</p> <p>I have referred to some, but not all, of these flaws below:</p> <p>1. Timing of Consultation</p> <p>The Housing Delivery Test results published in January 2022 show that West Berkshire Council (WBC) provided 117% of the preceding three years. Closer examination shows a more significant oversupply in the last year. This could mean that some of the sites such as North East Thatcham are unnecessary.</p> <p>The LPR is based on outdated ONS projections and a flawed methodology for deriving the appropriate housing target. The LPR is based on a plan-led system where the amount of housing which must be planned for within any local plan is likely to be significantly higher than the figure in the LPR.</p> <p>Other local authorities have chosen to pause further progress on local plans until recent changes to planning policy are better understood. This is at odds with WBC's approach.</p> <p>The LPR is not ready for examination, which contravenes Section 20 b) of the Planning and Compulsory Purchase Act 2004.</p> <p>3. Site Selection Process</p> <p>There is little evidence of a rigorous process being undertaken in the Site Selection Methodology Paper. Thatcham Town Council was not adequately consulted.</p> <p>The LPR contains very limited information regarding AWE Aldermaston and AWE Burghfield. There is a lack of consultation with the residents of AWE Aldermaston and AWE Burghfield in the preparation of the LPR. The Site Selection Background Paper (Reg18 SSBP) refers to Site THA9 and raises concerns that this development would create a strategic gap between Thatcham and Newbury. The same concerns are not expressed in relation to Site THA20 (2,500 houses) development. This makes no sense. The analysis is inconsistent. The strategic gap is of fundamental importance between Thatcham village (i.e. Thatcham and Upper Bucklebury) and Newbury.</p> <p>The proposed development would destroy the separate identity of each settlement and jeopardise the remote nature of the settlements.</p> <p>The proposal is at odds with WBC's own objections to the Siege Cross plans in 2015/16 (500 houses) - 15/00296/OU. WBC's own expert in that case was categorical in the assessment of the damage that Siege Cross would cause to the local environment. This was repeated throughout WBC's vigorous opposition to the site. Siege Cross now forms part of the THA20 proposal. The THA20 is 10 times the size and much closer to the AONB. The potential damage would be significantly greater.</p> <p>There are also flaws in the Thatcham Growth Study (TGS), particularly in relation to the site selection process.</p> <p>4. Sustainability Appraisal</p> <p>BPC has prepared an analysis against the Sustainability Appraisal (SA) objectives (Appendix 2 of its representation). The conclusions are not based on any accurate or available evidence. An accurate or reasonable assessment leads to the conclusion that all SA objectives. WBC's approach to the assessment and scoring of the site against the SA objectives is severely flawed.</p> <p>5. North East Thatcham Strategic Allocation</p>

Masterplanning is yet to take place and there is no vision for how the homes will be accommodated on the site, especially as access is compromised by the pipeline.

There is no detail on the infrastructure or other facilities. The infrastructure has not been costed adequately and therefore the site is deliverable.

The school provision has not been costed within the viability appraisal and therefore the deliverability of this element is uncertain.

There are no details or costings provided for the proposed 1,200 sq m community indoor facility

It is unclear how the proposed outdoor formal and informal sports pitches will be provided when most of the site is occupied by the pipeline.

Given the gradient and level change across the site, it is not considered that a comprehensive network of cycle paths can be delivered.

Links and access to the AONB are being encouraged without consideration of the sensitivity of the common and wider landscape.

The evidence base for trip rates and trip distribution is highly flawed and mitigation measures will not be successful.

The highway network in the vicinity of North East Thatcham is already over capacity and development of this scale would breach the threshold set out in paragraph 111 of the NPPF.

It is highly unlikely that the dwellings will be brought forward as net zero carbon and no allowance has been made for this in the viability appraisal for the site.

It is unclear how any development on this site would deliver a 'net gain' for Thatcham Town in terms of drainage and flood risk within the viability report for the site.

Given the highly sensitive location of the site it is illogical that a Landscape and Visual Impact Assessment has not been undertaken for the proposed allocation.

Consideration of heritage impact should have been undertaken as part of the site selection process and subsequent appraisal. It is not considered appropriate that this is left to later stages of the planning application process.

Given the significant ambiguity over the position of the impact of the oil pipeline it is unclear whether the site would be considered developable as set out in the glossary of the NPPF. Given that WBC are acutely aware of these constraints it is illogical that no assessment has been undertaken.

6. Landscape and Character Impact

There is no evidence to support claims that SP17 will have a positive impact on the environment. By contrast, there is evidence to suggest that it will have a significantly negative impact.

The North Wessex Downs AONB statement on development in the setting of the AONB states that *'examples of adverse impacts on the AONB include: development which would have a significant visual impact on views in or out of the AONB, particularly when this is associated with developments that have a vertical emphasis and / or movement (chimneys, pylons, etc); loss of tranquillity through the introduction or increase of lighting, noise, or traffic movement or other environmental impacts; loss of tranquillity through the introduction of abrupt change of landscape character; loss of biodiversity, particularly of species of importance to the AONB; loss of features of historic and natural landscape interest, particularly if these are contiguous with the AONB; loss of tranquillity through development individually or cumulatively giving rise to significant impacts on the AONB; and from the AONB, resulting in loss of tranquillity and erosion of the character of rural roads and lanes. Increase in the number of vehicles on the roads in the AONB.'*

The development of North East Thatcham would give rise to all of these adverse impacts to some degree or another.

The Landscape Character Assessment is now more than 20 years old so can be considered as up-to-date in accordance with the NPPF.

The Thatcham Strategic Growth Study (TSGS) offers little assessment of the damage the proposed THA20 site would cause to the AONB, acknowledging that the AONB partnership has objected to it, and that there is "little intervisibility between the two if any proposals." This does not adequately assess the effect the development would have on the AONB.

WBC is aware of the negative impact on the AONB. The Site Selection Background Paper December 2020 Table 8.2 states that "in developing THA20 WBC is accepting that the separate identity of Bucklebury would be lost and there would be defining impacts on the AONB."

The proposal would have a direct and irretrievable negative impact on the AONB. WBC are charged to protect the AONB and the positioning of THA20 as a viable site.

The AONB board has objected to the concept of a country park in close proximity to the AONB, as it will encourage development in the area (with the potential to cause further harm to the wider areas).

7. Ecology and Biodiversity Impact

The proposed site is in the setting of the AONB and, as such, the development of the land would not protect nor enhance the AONB.

The development of this site would have a significant impact on the character and beauty of Thatcham and Bucklebury.

There is no evidence that the impact of the development on biodiversity or the provision of net gains for biodiversity has been assessed. Instead, this is being left to the application stage. This is considered too late and runs contrary to the approach set out in the NPPF.

There is no evidence of the impact of the site insofar as it may contribute to, put at unacceptable risk or adversely affect the AONB through air, water or noise pollution or land instability. This appears to contravene the NPPF approach, which says that development should help to improve local environmental conditions such as air and water quality, taking into account relevant information from the local planning authority's plans.

WBC has not embedded biodiversity as part of its plan and has instead chosen to leave this to the application stage.

WBC has not planned for biodiversity and geodiversity in line with the Planning Practice Guidance, specifically paragraph 8-010-20190721, Revision date: 21 07 2019.

It is a key part of the Bucklebury vision for the Common not to increase the number of visitors, but to place the emphasis on giving the Common a chance to restore itself and thrive, both in terms of the diversity and abundance of its fragile ecosystem. Based on the LPR, the proposed development represents an additional 4000+ people being actively encouraged into the AONB, with the loss of habitats found in Bucklebury Common, with its ancient woodlands and heaths, pastures, greens and historic ponds. The development is intended to balance accessibility and leisure usage with the needs of the environment, with increased usage from cyclists and walkers, and ground-nesting birds, notably woodcock, and other wildlife.

The land immediately adjacent to the proposed development area for SP17 contains 41 Local Wildlife Sites and is part of the Bucklebury Biodiversity Opportunity Area.

The data being used to establish the presence of species is out of date. In 2020, Bucklebury Parish sought environmental impact assessment for the area impacted by SP17:

- 80% of surveys were conducted more than 15 years ago
- 50% were more than 20 years old
- 44% were over 30 years old

BPC has appointed ecologists to conduct an independent study of the impacted area. The findings from a single day survey indicated that the site had a much higher biodiversity value than previously appreciated, including the presence of several bird species, including several species of birds and one threatened migratory species, several bat species and abundant badger setts. The hedges, old trees and hedgerows provide corridors linking up different habitats within and beyond the site boundaries. These initial findings imply that a full study of the site and the measures and BNG will be far more complex for the development than was anticipated by the planners. This one study provides more information about the site than has been presented in the whole the LPR and its available evidence base. The area has a much higher biodiversity value than assessed by WBC.

Protected species are present across the site and would be impacted. No detail on mitigation measures has been provided. Protected network features are under threat from the development and will severely impact distribution of key species.

8. Highway Impact

YES Engineering Group Limited was appointed by Bucklebury Parish Council to review the transport related evidence. The review indicates there would be delays and congestion occurring around key junctions along the A4 corridor, with through traffic being diverted to other routes.

Journey time analysis was carried out and assessed the most desirable routes for those travelling east (towards Reading). It was demonstrated that the quickest route in each direction is via Harts Hill Road or via Cold Ash Lane rather than via the A4. The impact on these routes has not been assessed and this is a fundamental flaw within the modelling assessment.

The selection of North East Thatcham for significant development is fundamentally wrong as traffic will need to divert to other routes. Non-highway based mitigation measures are almost impossible to achieve due to its location/topography.

Development at North East Thatcham is likely to cause displacement onto wider routes away from the A4, through local roads in Bucklebury. The WBC Phase 1 Transport Assessment describes these routes as undesirable and, critically, the impact on these routes. Any of the evidence presented in support of the emerging local plan. Additionally, there are fundamental flaws within the assessment.

In summary:

- The trip rates set out by WBC are unreliable and not robust.
- The trip distribution is unrealistic (all evidence suggests traffic will be diverted from the A4).
- The proposed mitigation measures suggested by WBC are improbable at best.
- The location of site means car traffic will dominate the area.
- The Highway network in the vicinity of THA20 is already over capacity.
- No assessment has been made of the routes most likely to be affected by an increase in traffic. Increase in traffic through the area will create safety issues.

9. Heritage Impact

WBC does not appear to have taken into account the setting or significance of Colthrop Manor as a designated heritage asset. The location of East Thatcham or considered the impact of the development or the way in which the capacity of the site would be affected.

10. Infrastructure and Services

There are significant failings with the LPR on whether the provision of infrastructure associated with the development under policy SP17 is viable or deliverable.

The North-East Thatcham development plan (SP17) proposes a 450 sq m primary healthcare facility with the suggestion that it be provided to the Buckinghamshire, Oxfordshire and Berkshire West Integrated Care Board or other such appropriate body. However, there is no detail or insight into strategic healthcare planning.

Few new GP practices are commissioned by NHS England, even where they consider there to be patient demand for them. The figures of patients registered in the NHS Berkshire West Clinical Commissioning Group (CCG) confirm there is an ever increasing demand in areas of the country. There is therefore no realistic prospect of a new GP practice being established in Thatcham or the surrounding area in the future. There has been no approach by WBC or the developers to any local GP practice to discuss an appropriate site for a new practice or one or more practices could relocate. All three existing practices are already overstretched.

Thatcham dental practices are unable to provide dental care for the whole population with a significant minority of patients unable to access dental care for NHS and private dental care. Thatcham Vision, endorsed by WBC in 2016, confirmed only 60% of residents have access to a dentist (with 17.5% registered with a doctor outside Thatcham). There is no evidence provided that either WBC or the developers have consulted any local dental practices regarding the potential impact of increased workload resulting from additional housing.

The provision for education from Nursery, Early Years, through Infant to Secondary education is not clearly defined within the LPR. There is no end-to-end plan, which appears to breach the obligations of WBC to provide education facilities for children.

The lack of effective or justified education provision across the various proposed developments also means it is impossible to assess the impact on traffic.

The location of a secondary school in the North East Thatcham development under policy SP17 would inevitably result in increased traffic across the whole Thatcham area and this has not been adequately considered in the traffic plans and modelling in the LPR.

There are no details in the LPR of the provision for Nursery or Early Years education. SP17 merely states that the site should be suitable for such provision.

The provision for primary school education is unclear and contradictory. There is no data or evidence on the planned provision of primary school education. The LPR proposes that the sum of £12 million will be sourced from the developers of SP17 to fund the provision of primary school education. However, with no recent data available (the only data referenced is from 2011), it is impossible to assess if this funding will be sufficient for the delivery of the required education provision.

The plan for secondary school provision is unsound for the following reasons:

- There is no satisfactory evidence of the number of pupils the school is to cater for
- The location of a school within the proposed development is not clear
- The number of Form Entries is not defined, but it is noted that anything less than a 6FE school is unsustainable.

	<ul style="list-style-type: none"> • The timing and responsibility for the funding is not clear and has not been adequately costed in the viability appraisal. • There is no evidence that the proposed funding is sufficient to meet the Council's obligations to provide education. <p>11. Climate Change and Flood Risk</p> <p>The Sustainability Appraisal is ambiguous in relation to flood risk. It states that the development at North East Thatcham has a positive impact but there is also a '?' place in the assessment box. The justification for the assessment given by WBC for consideration of SuDS that could deliver net gains for Thatcham, but there is no other reference made to flood risk. The assessment for GI, ecology and sustainability measures to be included which may all have a positive impact on flood risk. It is not clear from the assessment, and the question mark demonstrates that WBC are unsure of the impacts in this regard. It is not considered effective or consistent with national policy and is unsound on this basis alone.</p> <p>12. Water Supply and Foul Drainage</p> <p>Flood risk is a significant threat to Thatcham, and lack of evidence to suggest this has been adequately considered.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>2. Consultation and Duty to Co-operate</p> <p>WBC announced the Regulation 19 consultation on 20th January 2023. Interested parties were then notified that the website would be unavailable on 21st and 22nd January due planned maintenance of the website. It was unclear whether any review of the LPR evidence could not begin until 23rd January 2023. This effectively shorted the consultation period to the required 6-week period.</p> <p>WBC did not properly consult Bucklebury Parish Council (BPC) in the first instance when carrying out the Settlement Review and their representations.</p>
4. Proposed Changes	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<ul style="list-style-type: none"> • It will dramatically reduce the greenbelt between Thatcham and Upper Bucklebury. • The rural nature of this area would be completely lost with Upper Bucklebury becoming part of Thatcham. • It would be a massive over development of our beautiful countryside in an area which consists of rolling hills and if this scale are approved there will not be any open rural areas left for future generations to enjoy. • The proposed land is not particularly suitable for development as it is very hilly land and has had issues as a flood plain. • The view that Thatcham is best placed to take a development of this size in this location is misplaced, un-proven. • According to the Transport Assessment paragraph 3.26, 'The access arrangements for the Northern end of the junctions on both Floral Way and Harts Hill Road. Results from the modelling suggest that these will not cause

modelling results for this so I am unsure as to why this has been stated. Please can you share these with me? H and pollution on an already dangerous and busy road (without the development), be seen as not causing a pro

- I have been made aware that there are drawings showing a new car park on Harts Hill. This again will increase tr road and is highly likely to promote anti-social behaviour, illegal activities, fly tipping and littering which we see
- In terms of 'reducing accidents and improving safety' your assessment has concluded that 'the policy is likely to safety as safe travel will be critical to the design of the site'. Also regarding 'increasing opportunities for walking, your assessment concluded 'the policy is likely to have a significant positive impact on walking, cycling and pul should be designed with these in mind'. I wholeheartedly disagree with both of these assessments and I have such as 'likely'. Please can you provide me with the evidence and conclusions for both these assessments? Al more importantly about the surrounding areas, villages and community which exist today and have done for ye done to assure road safety for these with the increased traffic?
- Further to the above, this development will have a significant impact on traffic levels and the associated pollutio increasing:
 - Traffic from Thattham through Upper Bucklebury to Chapel Row on roads which are not designed for larg
 - Traffic on the route from Thattham and Newbury. These roads approaching the station are already heavil the event of any minor traffic disruption
 - Increased traffic through ALL the surrounding villages in general, especially as there is a plan for an exit Hill. This will significantly increase traffic towards Upper Bucklebury, Chapel Row, Bradfield, Cold Ash and 'some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury'. This is a total unders any concern for road safety, especially as the roads are already inadequate, have no pavements and are ex traffic. The potential for serious/fatal accidents is already high and this proposed housing development an
 - Traffic and speeding up to and through Upper Bucklebury
- This level additional of housing will inevitably have an adverse impact on local facilities, schooling, medical and v overstretched.
- Regarding healthcare, there is a significant lack of detail around strategic healthcare planning and the NE That aware, neither WBC or the developers have arranged or published a prospective Health Impact Assessment fo also been no engagement between the North-East Thattham Development Consortium and local general practi The unlikelihood of a new GP site being available will result in the three existing practises in the area being ove the developers have not provided evidence for the provision of a viable primary care medical facility. To add to are already unable to provide dental care for the local population, this will also get worse with the proposed de
- Regarding the environment, there will be damage to the Bucklebury Plateau Biodiversity Opportunity Area and the common. This development will also destroy the enjoyment of the local countryside by local communities in te Downs AONB and will cause negative impact to legally protected wildlife. There is no evidence to support claims will have a positive impact on the environment but instead it will have a significant and serious negative impact protected wildlife, natural vegetation and sustainability. Environmental sustainability is defined as: 'the ability to in our planet's natural environment and conserve natural resources to support the wellbeing of current and future shocked and disappointed that WBC is not protecting the sustainability of our precious environment. In addition significant attempt to investigate, analyse and address the negative environmental consequences. Why not?
- Regarding education, within the Local Plan Review the provision for Nursery, Early Years, Infant and Secondary been clearly defined. The provision for Primary and Secondary school education is unclear and contradictory. V has a duty to make arrangements for suitable school provision. How this obligation will be met across all schoo evidenced in the LPR. The plan for the schools needs to take priority and should be confirmed before any housi this is done it is likely that houses will be built and no additional school provision will provided, leading to overs ineffective education for our children. The LPR talks of provision of school fields however no evidence for fundi field near the busy, congested and air polluted A4 does not suffice as suitable) has been identified by the WBC Consortium.
- There is no evidence that this development will enhance Thattham town centre (or the area in general).
- It is not likely to attract new businesses to the area or create or significantly increase employment.
- The local shop and pub are unlikely to benefit. The local shop is under significant threat as the new developme
- There is now particular focus within the Consultation National Planning Policy Framework on taking into accou assessing how much housing can be accommodated. As a result of this, several local authorities have paused they await the outcome of the consultation on the basis that a lower housing requirement could be applicable t being planned for. Although I am completely against the NE Thattham housing development, I would ask that (as others have), to hold on the plan and present a revised plan in line with the updated planning guidance wh

To conclude, this development is unnecessary, inappropriate, and ill-conceived and should be rejected.

Please do not take the opportunity to live and play in our beautiful countryside away from those that currently cherish and the feeling of community that this area offered to all.

We as a community should not have what was inflicted on Shinshield near Reading happen to us here. As anyone t more was lost by the masses of houses being erected than gained by the local community.

Observations

- Why is WBC not writing to **all** residents to make them aware of this development and obtain /seek comments o audience as this development will effect?
- Up to now I was under the impression that WBC was committed to keep a substantial greenbelt between That consideration of this approval now certainly seems to totally contradict this stated commitment.
- Why is WBC are now considering this development when a previous application was rejected by the secretary

I am prepared to appear at the public enquiry, if invited.

Please see PS1349 Elizabeth Bailey - photos as attached with the representation

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?

- * Yes
- * No

Please give reasons for your answer	
4. Proposed Changes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements	

<p>with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>Please find below my objection to the proposed NE Thatcham development and my concerns about the planning document.</p> <p>Healthcare and education</p> <ul style="list-style-type: none"> • 2500 extra houses will need healthcare, the plans state this will be provided with a new primary care facility however, as major surgeries are rarely ever approved by NHS England, there is a current staffing crisis in the NHS which will make it difficult to establish before any development could go ahead to maintain safety of new and existing residents. These concerns should be taken into regard. • Education facilities have also not been properly outlined in this document. There is no detail as to how/where/viability of funding for the new development. There are contradictions in the document such as stating that funding will be partially covered by a new school, but then stating that the development is not big enough to justify a new secondary school. This is again a concern. <p>Traffic:</p> <ul style="list-style-type: none"> • Current road conditions are unable to cope with existing traffic burden (poor road maintenance, potholes, serious accidents with higher traffic burden) • Many roads don't have pavements but are quiet enough for this to not be a problem, increased traffic trying to get through to the A4 will render this a disaster for pedestrian/cyclist safety • Why is there an additional car park on Harts hill road? No clear use set out for this in the document. This is a high speed road and this will worsen the problem. Also concerned about encouraging antisocial behaviour as this is already an issue in the area. • No detail about how walking/cycling/public transport will be improved in this planning document. How will this be funded? The current document just proposes increased risks to walkers and cyclists from higher road traffic but does not outline how these risks are going to be mitigated without outlining how. <p>Environmental</p> <ul style="list-style-type: none"> • Bucklebury common is an ecologically diverse site and the addition of 4000 extra people into the area can only have a negative impact on the site. • The document clearly states that your own analysis shows this development will have a negative impact on sustainable development of the site. • There are no clear plans on how environmental impacts will be mitigated, just vague statements that they will be. • The location of this proposed development will turn Upper Bucklebury from a small village into the outskirts of a town which will undeniably change the ambiance and character of the village. This is likely to result in residents who have lived in the area, and taking with them their investments in the local community and infrastructure. The size of this development is a concern. <p>General</p> <ul style="list-style-type: none"> • The recent change in governmental view on housing provision from a mandatory number of properties to an advisory number is a concern. They also state that the Planning Inspectorate should not override sensible local decision making simply to meet a target. WBC not taking the opportunity to pause the planning process while awaiting the outcome of the revised plan is a concern. This year rather than pushing forward with a clearly unsound and damaging development of far too many properties.

	I object to the proposed development for the reasons outlined above as I feel the planning is unsound and the risks h and mitigated.

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to voice my objection to, and grave concerns regarding, the Council's proposal to build up to 2500 new houses on green belt fields to the north east of Thatcham. This would represent a very large increase in the population of Thatcham and surrounding area on the wider area, much of which remains deeply rural (and much of which to the north is protected by the AONB for its natural beauty).</p> <p>We moved as a family with small children to the Thatcham area from a more heavily developed suburban area precisely because we wanted to get away from crowded schools and roads and for the fresh rural air. The proposal to house an extra 10,000 people, representing an increase of over 30% in local population of Thatcham and surrounding area is unbelievable.</p> <p>How are so many additional people going to get to work? The A4 is single carriageway and the roads along the side are narrow and smaller. There is no way they could cope with an extra 2,500 commutes and school runs, and the "increased use of public transport? The train services are on their knees and buses even worse.</p> <p>Where are these extra 10,000 people going to register with GPs? I work on the frontline in healthcare myself and see how busy and overcrowded our healthcare service are. Without huge increased capacity an increase in the local population of Thatcham and surrounding area will collapse our local services.</p> <p>Local schools are also at capacity yet the Council plans for where an extra 5,000 children might go to school seem to be "on paper" with no concrete strategy for schooling within this plan.</p> <p>The local environment and Bucklebury Common are ecology unique, including Ancient Woodkand, and loved by visitors. The environmental impact of an extra 10,000 people less than a mile away does not seem to have been given much consideration. The council's with wildly optimistic claims that the impact can be minimised, without an concrete evidence of how this can possibly be achieved. The loss of green belt fields in a rural area, rather than looking for dispersed brownfield sites, seems like environmentally unjustified.</p>

	While I understand the need for more housing in West Berkshire, for the Council to focus such a huge increase in a without consideration of local schools, medical services or transport is completely unjustifiable and would have a gra wellbeing, services and the character of the area.

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>I object as the plan is unsound because:</p> <ol style="list-style-type: none"> 1 Traffic. There will be a significant, and potentially dangerous, increase in the traffic on the rural roads through E an exit from the site onto Harts Hill, but no wider traffic modelling is available. WBC assesses that there will be the rural roads, but this will have a positive impact on road safety. Given the nature of these roads it is hard to flow through local villages with a positive safety impact. Traffic flows over areas such as the Thatcham level cr the A4, and to the M4 and A34 will just cause gridlock and unmitigated pollution in all areas. The plan falls dramatically short in this area. 2 Healthcare. There is no detail into strategic healthcare planning included in the proposal. Given the developme should include a Health Impact Assessment (HIA), but this does not appear to have been completed. There is being commissioned, so the households within the site will have to be merged into already overstretched local exists within dental practices in the Thatcham area. The proposal fails to address any form of primary healthcare provision requirement. 3 Environment. The proposed site will cause permanent damage to the Bucklebury Plateau Biodiversity Opportu development in the setting of the North Wessex AONB, and cause detrimental impacts to legally protected wild to mitigate these far reaching and irreversible effects, and the LPR's own sustainability appraisal accepts that S on environmental sustainability. It is shameful that WBC entertain a proposal with no concrete mitigations for unleashed. The management vision for Bucklebury Common necessitates the minimising of extra human pres SP17 would necessarily cause an overspill of people to reek havoc with the fragile ecosystems of the Common on the environment of the AONB, and there appears to be no strategy to meet the requirement to achieve the The proposal fails in all areas of protecting the environment generally, and in legally required areas to improve of serious attempts to investigate, analyse and address the consequences of this proposal. It is unsound in th 4 Education. There is no end to end plan for education within the plan. The plan does not provide evidence of th secondary school location, the number of Form Entries at any school, timing of funding, and whether any funding obligations to provide education. It appears that less than a 6FE school is unsustainable, so it not clear as to what the education plan is. The cu enough houses to justify a new secondary school, so pupils would have to be crammed into already overstretched add to Thatcham's education problems rather than provide any form of answer. It is sadly laughable that the pla

	<p>demographic predictions for education demand, or predictions of the long term capacities of local schools. Ob then their associated facilities (such as sports fields) would not be available to the community.</p> <p>WBC has a duty to make arrangements for suitable school provision. The LPR fails to provide evidence as to and as such is unsound in another major area.</p> <p>For me personally, the disregard of the effect of traffic on the Bucklebury area is particularly worrying. The area will be seriously affected because all other roads will become gridlocked. My ability to walk and cycle on local roads will be seriously affected around the local area. However, this is nothing compared to the dramatic and irreversible catastrophe that would occur without reasonable mitigation to prevent wholesale damage. WBC must take time to reconsider.</p> <p>On 6th December 2022, the Secretary of State for Housing and Communities detailed that the housing number should be a target point and not be mandatory, and that Planning Inspectors should no longer override sensible local decision making in the face of local constraints and concerns.</p> <p>The NPPF consultation which ran until yesterday also focussed on the need to take into account the character of an area and its ability to accommodate housing. Many sensible local authorities paused their plan making process accordingly. It was the same, as this proposal might be trying to fit (badly) a need that is no longer present.</p> <p>I urge WBC to reconsider this unsafe plan. It is unsound in too many areas with too many questions unanswered.</p>

Please give reasons for your answer	<p>I am objecting in the strongest possible terms to the plan to build on our beautiful countryside to the detriment of the fields and trees much admired in the area.</p> <p>Since moving to Upper Bucklebury in 2006 traffic through the village has increased considerably and the majority of come through the village in preference to the A4 which will make it extremely difficult to turn out of our drives onto B</p> <p>New residents will be given preference to Kennet School which is already crowded which will mean that children in E to Downs School. Vast swathes of our countryside have been concreted on. Wildlife is increasingly limited to smaller appreciate people have to live somewhere but brownfield sites are underused and apparently an area in Colthrop is b has even offered to build a new bridge.</p> <p>I hope and pray that the numerous objections will be listed to and taken into account.</p>

	<p>People in Bucklebury and Upper Bucklebury live where they do as they want to live in a country village and not part I have been told that the development will be over a period of 20 years and whilst its completion will no longer affect countryside in the future and our younger population who will still benefit from our fields and woods.</p> <p>PLEASE consider the future of the countryside.</p>

<p>1. Do you consider the Local Plan Review is legally compliant? * Yes</p>	Yes

* No	
Please give reasons for your answer	Regarding the Spatial Strategy, a Strategic Environmental Assessment (SEA) has been carried out, as part of the LPR to promote sustainable environmental considerations in the preparation of the local plan.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	This allocation which is for approximately 1,500 dwellings which will be completed within the period of the Plan has been made taking into account environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of the site. Including this information in the policy page will provide perspective which then highlights the need for the necessary resources on this site.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	The Council (Under Section 33A of the Planning and Compulsory Purchase Act) in its Duty to Cooperate with other local authorities when preparing the LPR in order to address strategic planning issues relevant to their areas has engaged generally during the Plan making process.
4. Proposed Changes	The below should be addressed and included in Policy SP17 - North East Thatcham Strategic Site Allocation as follows: Requirements There should be no penetration of the London Clay strata. No discharge into groundwater and information should be provided to the Environment Agency's Approach to Groundwater Protection guidance Environment Agency's Approach to Groundwater Protection guidance for all types of development proposals. [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/67111/Environment-Agency-approach-to-groundwater-protection.pdf] The 'North East Thatcham' strategic site contains an area which is an existing flood defence, recently completed by West Berkshire Council (the 'East Thatcham Park Flood Storage Area'). In addition, further surface water management schemes are being planned by West Berkshire Council including 'East Thatcham'. The existing and planned surface water schemes should be mentioned in this section, including the 'East Thatcham' strategic site.

	<p>of these schemes in a comprehensive flood risk assessment when planning development in this area. This site would which demonstrates requirements of NPPF and PPG. This is due to its size and strategic nature.</p> <p>We would not support any additional flows to Newbury STW (as is the case for some other allocations). Newbury STW its dry weather flow - DWF capacity, and the development planned to drain to the STW would certainly take it over capacity. It would be required that ensured no deterioration of any quality elements. Newbury STW is to get a 0.1mg/l phosphorus permit to meet the CSMG requirements of getting the River Kennet SSSI to good status. Before any development connecting to the STW would need to have confidence that the additional phosphorus load would not undermine the AMP 8 objectives. 0.1mg/l would need to have confidence they would be able to meet that target with any additional loading. The Environment Agency would need to reduce their phosphorous loading from STWs by 80% from a 2020 baseline. Permit limits lower than 0.25mg/l do not allow higher loads to a STW with a permit limit lower than 0.25mg/l may undermine a water companies' ability to meet the requirements. Newbury is a high spiller, and additional developments and flows will increase frequency of spilling. Therefore, we would not support flows entering - the Newbury STW, a known high spiller until significant work has been done to tackle the causes of the spills. Notes on Policy DM7, adequate water supply and wastewater treatment infrastructure capacity resources must be available for proposed development proposed prior to the occupation.</p> <p>Opportunities</p> <p>There may be opportunities to enhance the river corridor which would contribute to biodiversity net gain.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	Yes
<p>5. Independent Examination</p>	<p>We wish to attend the examination for an opportunity to explain the need for this site allocation to include</p> <ul style="list-style-type: none"> • environmental constraints • site requirements to enable development and • opportunities to ensure the sustainable delivery

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	We are unable to confirm whether the Local Plan Review is considered legally compliant.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	The current plan to improve access to the health service component of community infrastructure has not been met as t for the provision of a viable primary care medical facility nor working with the current practices in the area so the NPPF
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	No
Please give reasons for your answer	As far as we have been made aware the development has neither arranged a relevant HIA nor provided evidence of local health care agencies or providers. They are proposing a healthcare site that is unsuitable for NHS primary care to mitigate the burden that 1,500 or more new houses will make on a local NHS struggling to cope, so the duty to co been met.

2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>The amended text to this policy in relation to delivery of M4(3) wheelchair user dwellings is supported, however it is questionable whether this applies to major development only, and the wording on delivery against each tenure is ambiguous and should be amended for clarity.</p> <p>The update to Table 3, now including recommended housing mix split by different affordable housing tenures is supported. This, together with the supporting text acknowledging that rigid application of the mix may not always be appropriate, is a useful tool in bringing forward mixed tenure development, and justified.</p> <p>It appears that there is text missing from the end of paragraph 6.68 (clean version and 6.73 in the tracked change version).</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>The amended text to this policy in relation to delivery of M4(3) wheelchair user dwellings is supported, however it is questionable whether this applies to major development only, and the wording on delivery against each tenure is ambiguous and should be amended for clarity.</p> <p>All dwellings should be delivered as accessible and adaptable dwellings in accordance with Building Regulations M4(2). <u>On developments of 10 or more dwellings</u> around 10% of the new market housing and <u>10% of the affordable dwellings, up to</u> a maximum of 5 units should also meet the wheelchair accessible standard M4(3) wheelchair user dwellings unless evidence clearly demonstrates that this would <u>be impracticable or</u> make the scheme unviable.</p> <p>The addition of the wording "<i>be impracticable or</i>" reflects the supporting text at paragraph 6.72 (clean version and 6.77 in the tracked change version), and is important given the practical, physical requirements of meeting M4(3) which may not be possible on all sites, or in the proposed housing mix.</p> <p>It appears that there is text missing from the end of paragraph 6.68 (clean version and 6.73 in the tracked change version). This should be checked, and updated.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	<p>No</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	We believe that the Plan accords with the requirements of the relevant legislation.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.	Yes

* Yes * No	
Please give reasons for your answer	We support the requirement for residential developments to contribute to the delivery of an appropriate mix of dwelling tenures, types, and sizes to meet the existing and future housing needs of all sectors of the community. However, we disagree with the requirement for market dwellings on developments of 10 or more dwellings to reflect the mix set out in Table 3 of the draft Plan. We are of the view that the mix and size of market units should be determined by current market preferences as well as the location and size of the site, as set out in points a-d in the draft policy, rather than stipulating a specific blanket mix of dwellings to be applied to all sites. For example, an appropriate mix for an urban site in a town centre location would generally comprise smaller units whereas in a rural location the appropriate mix would generally comprise larger units.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	We believe that the Plan sufficiently addresses strategic planning issues relevant to the area.
4. Proposed Changes	We suggest that the requirement to reflect the market housing mix in Table 3 is deleted, with this mix applicable to affordable housing only, and points a-d in the draft policy remain as the considerations for determining the appropriate market housing mix. We therefore suggest the policy wording is amended to state "residential developments should provide a mix of unit sizes. The mix of affordable dwellings on all sites should reflect the requirements of Table 3 in the supporting text to this policy, or any more recent evidence published by the Council. The mix of market dwellings will have regard to [points a-d]". In regard to accessible and adaptable dwellings, we disagree with the requirement for 10% of market units to be designed to M4(3) standards. This is an optional standard introduced by the Government, and we suggest that this should apply on a site-by-site basis to reflect the local need and demand for such market units. We therefore suggest that the requirement for M4(3) market units is deleted.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No

* No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a	

<p>minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>Councils do not appear to be singing to the same "hymn sheer as the Government.</p> <p>Housing is clearly the answer to many issues beyond the simple need of "roofs over heads" - financing social needs being one example (high rents for low income & homeless. Are high rents discouraging lower paid care workers into the area to fill job vacancies?).</p> <p>One area where I believe housing could be undertaken is west of the end of Craven Road, south of the canal, and adjoining Enborne Road unto the A34, with a new access onto the A34 - once again coordinated with any future improvements to the A34, which have recently been advocated with public and local MP support, and maybe in the Chancellor's INFRASTRUCTURE budget recently announced.</p> <p>This access would give another exit/entry for the town south of the river.</p> <p>I believe that unless a far-reaching vision is not formulated to prevent the strangulation of the movement within the conurbation, Newbury will face a permanent gridlock.</p> <p>The provision of housing is a major issue, and local opinion can be a major factor in resisting proposed development. However, it is clear that more housing is required if</p> <p>Newbury is to continue to prosper. The advent of the electrification of the train service to London will only increase the demand on the limited supply, which will inevitably increase prices unless the supply is increased. Un-fortunately it is inevitable that cherished open green field sites will have to be developed, but the densities should be low. Clearly in a small country such as the UK, horizontal space is at a premium. Therefore, there should be some vision to think vertically, such as more 3 floor properties, and the consideration of basements</p> <p>& underground parking. Within the boundaries of the town, there are plenty of examples of this style of building from previous generations.</p> <p>Houses should be adaptable to be extended (incl. use of roof space) at a later date to accommodate, say an elderly relative, live-in carers, sons/daughters living at home, but working/studying.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>

<p>Please give reasons for your answer</p>	<p>Holybrook welcomes the statement in this policy: 'All dwellings should be delivered as accessible and adaptable dwelling in accordance with Building Regulations M4(2).'</p> <p>But would like to see this strengthened to specifically state <i>that 'All dwellings, including change of use, should be delivered.....'</i>. Accessibility and inclusivity must be given Material Planning Consideration status, especially where the change of use is from a dwelling to a care home. Holybrook has been subjected to planning approvals for change of use where accessibility, in particular, has been ignored at the planning stage and told that accessibility comes under Building Regulations. Where a building is new or is undergoing a change of use it is vital that accessibility formulates part of the planning proposals and where plans do not meet accessibility regulations, it should be refused.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	Accessibility and inclusivity must be given Material Planning Consideration status.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	Yes

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	This policy seeks a mix of different sizes of homes based on updated Strategic Housing Market Assessment work. It is worth noting in this context that the need for homes in Reading is for approximately 50% 3-bed or larger, but the actual delivery is very significantly below this due to the realities of the types of site that come forward, where much of the delivery is at high density in the town centre. This will mean a need to place further emphasis on delivering family accommodation in adjoining areas, particularly where those areas are within the wider Reading urban area.
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>RBC suggests that changes be made to the supporting text to allow this to be considered when planning applications are determined. The suggested changes are set out below:</p> <p>“To ensure mixed and balanced communities, a mix of dwelling sizes, in line with the table above, will be sought from developments delivering new homes. While developments will be expected to reflect this mix, rigid application of these requirements may not be appropriate in all cases. When considering the appropriate mix, the Council will have regard to:</p> <ul style="list-style-type: none"> • the scale of development; • individual site circumstances including location, character of surrounding area, and any physical building constraints, particularly in relation to conversions; and market conditions. • viability, subject to the applicant submitting a viability assessment at the application stage and its independent assessment by the Council; • <u>the latest position on delivering the size of dwellings required, including in adjoining authorities where it is part of the same urban area;</u> and • information within made neighbourhood plans and any associated local housing needs surveys”

<p>Please give reasons for your answer</p>	<p>Thank you for the opportunity to comment on the West Berkshire Council Local Plan Review 2022-2039 Proposed Submission Reg 19 draft – January 2023. McCarthy Stone is the leading provider of specialist housing for older people in the UK.</p> <p>Given the large amount of specialised housing for older people identified in para 11.18 of the Local Plan review (1,718 units) and the requirements of national policy detailed in our response to SP12 (NPPF Paragraph 62, PPG Housing for Older and Disabled People, paragraph 001 Reference ID: 63-001-20190626 , para 003 Reference ID: 63-003-20190626 and para 006 Reference ID: 63-006-20190626), Policy SP18 should be amended to emphasise and encourage this need.</p> <p>In addition, it is noted that a change to policy SP18 introduced following the regulation 18 consultation brings into the plan a requirement for M4 (2) (accessible and adaptable) and M4 (3) wheelchair housing. This change to policy SP18 states '<i>All dwellings should be delivered as accessible and adaptable dwellings in accordance with Building Regulations M4(2). Around 10% of the new market housing and a maximum of 5 units of the affordable sector should also meet the wheelchair accessible standard M4(3) wheelchair user dwellings unless evidence clearly demonstrates that this would make the scheme unviable.</i>'</p> <p>The Council should note that the 'Viability Assessment Update (2021 -2022) Local Plan Review Autumn 2022, Dixon Searle' states at para 3.1.44 that '<i>However, although the larger footprints could be designed in at early feasibility stage, the current view of costs associated with M4(3) provision is such that in our view this could have an impact which not all schemes may be able to bear. This could impact more on some schemes on PDL in particular, where there tend to be more constraints.</i>'</p> <p>We would like to remind the Council of the increased emphasis on Local Plan viability testing in Paragraph 58 of the NPPF and that the PPG states that "<i>The role for viability assessment is primarily at the plan making stage. Viability assessment should not compromise sustainable development but should be used to ensure that policies are realistic, and that the total cumulative cost of all relevant policies will not undermine deliverability of the plan</i>" (Paragraph: 002 Reference ID: 10-002-20190509). M4 (3) of the Building Regulations in particular has a cost implication as recognised by the Council's viability assessment and therefore including the requirement for 10% of new housing to be built to M4 (3) is contrary to the findings of the Council's own evidence and will result in schemes not being delivered and should therefore be removed.</p> <p>The Council should also note that ensuring that residents have the ability to stay in their homes for longer through the provision of wheelchair housing, is not, in itself, an appropriate manner of meeting the housing needs of older people. Adaptable houses do not provide the on-site support, care and companionship of specialist older persons' housing developments nor do they provide the wider community benefits such as releasing under occupied family housing as well as savings to the public purse by reducing the stress of health and social care budgets. The recently published Healthier and Happier Report by WPI Strategy (September 2019) calculated that the average person living in specialist housing for older people saves the NHS and social services £3,490 per year. A supportive local planning policy framework will be crucial in increasing the delivery of specialist older persons' housing and it should be acknowledged that although adaptable housing can assist it does not remove the need for specific older person's housing. Housing particularly built to M4(3) standard may serve to institutionalise an older person's scheme reducing independence contrary to the ethos of older persons and particularly extra care housing. In addition, as M4 (2) is to be incorporated into the Building Regulations this element of the paragraph should also be removed.</p> <p>Recommendation:</p> <p>For the policy to be consistent with national policy and in accordance with the Council's own evidence policy Para 1 of SP18 should be amended to emphasise the importance of older people so it reads:</p> <p>Residential development will contribute to the delivery of an appropriate mix of dwelling tenures, types and sizes to meet the existing and future housing needs of all sectors of the community, including older people and those with specialist requirements.</p> <p>New para 4 should be deleted from policy SP18 as this repeats the Building Regulations and is contrary to national policy and the Council's own viability study:</p> <p>'All dwellings should be delivered as accessible and adaptable dwellings in accordance with Building Regulations M4(2). Around 10% of the new market housing and a maximum of 5 units of the affordable sector should also meet the wheelchair accessible standard M4(3) wheelchair user dwellings unless evidence clearly demonstrates that this would make the scheme unviable.'</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	

Please give reasons for your answer	
4. Proposed Changes	<p>Recommendation:</p> <p>For the policy to be consistent with national policy and in accordance with the Council's own evidence policy Para 1 of SP18 should be amended to emphasise the importance of older people so it reads:</p> <p>Residential development will contribute to the delivery of an appropriate mix of dwelling tenures, types and sizes to meet the existing and future housing needs of all sectors of the community, including older people and those with specialist requirements.</p> <p>New para 4 should be deleted from policy SP18 as this repeats the Building Regulations and is contrary to national policy and the Council's own viability study:</p> <p>All dwellings should be delivered as accessible and adaptable dwellings in accordance with Building Regulations M4(2). <p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>Sandleford Park West (SPW) Policy SP18 (Housing Type and Mix) now requires 10% market dwellings, and 5 affordable units, to be Building Regulations Part M4(3) compliant. It is unnecessary to repeat Building Regulation requirements within Planning Policy and, accordingly, the policy should be amended to delete this requirement.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	No
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes

5. Independent Examination	To make the relevant points before the Inspector and provide answers to any queries arising.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	SP18 has not assessed the fact that Thatcham already has a very high number of social housing and that the area of the North East is rated highly in terms of social deprivation so the housing mix should be bias towards equalising this disparity and creating higher percentage of larger family homes. The home sizes have not reflected the fact that people these days mostly work from home and therefore a 2 bed is really a 1bed plus office.. so there needs to be a higher proportion of 3-4 bed dwellings to cater for home working.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes	

* No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No

<p>Please give reasons for your answer</p>	<p>See attachment 'Paula Saunderson - Full LPR Rep' for full consultation response. Comments on each chapter/policy can be found at the specific consultation point.</p> <p>SP18 – HOUSING TYPE AND MIX</p> <p>As well as addressing Accessible Housing this policy also needs to ensure a sufficient supply of Adapted Housing to cater for Older Adults with Dementia who require specific types of housing to cater for their incurable regressive brain disease along with a Carer either Family Unpaid Carer or paid Care Giver. I tried to find such Accommodation for 2 years and nothing <u>Affordable</u> was available. People are buying new properties and having fittings ripped out to accommodate elderly relatives and this is not sustainable development.</p> <p>West Berkshire is a Dementia Friendly Council and within this plan there is no DM Policy to support this Approach unlike Milton Keynes which has a Dementia Friendly SPD.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>

<p>Please give reasons for your answer</p>	<p>Last year the Government published its response to the consultation on the building regulations governing accessibility - Part M (https://www.gov.uk/government/consultations/raising-accessibility-standards-for-new-homes/outcome/raising-accessibility-standards-for-new-homes-summary-of-consultation-responses-and-government-response). This response states that the Government will make part M4(2) the mandatory standard. Whilst this is still to be introduced, given the likelihood that the Government will make M4(2) the mandatory standard we would recommend that the Council amend its policy accordingly to ensure no unnecessary repetition of building regulations within planning policy.</p> <p>With regard to option standard for wheelchair accessible housing set out in part M4(3) we are concerned that the requirement for 10% of market housing and a maximum of five affordable units are built to this standard is not supported by the Council's evidence. It is estimated that there is a need for 1,400 additional homes for wheelchair user homes. This level of need is arrived at on the basis that there is an existing need of 420 homes and projected increase in need of 797 such homes over the plan period. However, the projected need does not appear to take into account the fact that many of these additional households will already live in the Borough and will live in homes that can be adapted to meet their needs. As the Council note in relation to existing households about 25% live in home where it would be problematic or unfeasible to make visitable and therefore it cannot be assumed that all those with such a need in future will seek to have that need met by moving to a new home. If the 25% is applied to future households, then the newly arising need for homes built to M4(3) is around 200 households, giving a total need of 620 homes, significantly lower than the 1,200 homes suggested by the Council. Therefore, the requirements relating to M4(3) are not justified and should be reduced to reflect the evidence.</p> <p>The policy also lacks clarity as to what is required of an applicant. With regard to the provision of M4(3) in market housing the policy reads more as a statement of a broader ambition rather than a requirement placed on all development. Paragraph 16 of the NPPF requires policies to be clearly written and unambiguous and the Council needs to set out in policy more clearly what it is expecting from development with regard to this optional standard.</p>

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	Support policy in general, but object to the statement "Around 10% of the new market housing and a maximum of 5 units of the affordable sector should also meet the wheelchair accessible standard M4(3) wheelchair user dwellings...". The word "around" is far too vague and the reason for "a maximum of 5 units" is difficult to justify.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	The statement should be changed to "10% of new market housing and affordable housing should each also meet the wheelchair accessible standard M4(3) wheelchair user dwellings...".

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	Furthermore, Sovereign considers that the Proposed Submission West Berkshire Local Plan Review (2022 – 2039), as currently formulated, is Legally Compliant.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather	

<p>than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>DEVELOPMENT MANAGEMENT POLICIES</p> <p>The comments set out in this section are intended to assist the Council in developing an approach that is consistent with national planning policies and the tests of soundness. Some comments have been included to assist the Council in developing a series of policies that are both effective and robust. Where possible, suggested amendments have been set out in the response.</p> <p>Sovereign broadly supports the West Berkshire Local Plan Review (2022 - 2039). However, the comments set out below are intended to identify opportunities to improve the effectiveness of the proposed policies.</p> <p>As a general principle, the plan would benefit from consistent numbering, in relation to the paragraphs, policy criteria, and sub-criteria. This would assist the accessibility and the useability of the draft plan, improving the effectiveness of the document substantially.</p> <p>Policy SP18: Housing Type and Mix</p> <p>Delivery of dwellings to M4(3) standard may not be reasonably practicable in all cases.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>Sovereign considers that in preparing the emerging local plan, the Council have sufficiently complied with the Duty-to-Cooperate.</p> <p><i>3. The Duty-to-Cooperate</i></p> <p>Section 33a of the Planning and Compulsory Purchase Act (2004) ('PCPA') requires that local planning authorities should co-operate with other relevant local authorities, the County Council, prescribed bodies, and other persons, in relation to the preparation of a Local Plan. The Duty requires the Council to engage constructively, actively, and on an on-going basis, in the preparation of the Plan, insofar as it relates to a strategic matter. Strategic Matters include the sustainable development and use of land that has, or would have, a significant impact on at least two planning areas, such as the amount and distribution of housing.</p> <p>Furthermore, the NPPF confirms, at paragraph 26, that government policy comprises that the effective and ongoing working between strategic policy-making authorities and relevant bodies is integral to the production of a positively prepared and justified strategy. It goes on to confirm that, in particular, joint working should help to determine where additional infrastructure is necessary and whether development needs that cannot be met wholly within a particular authority area could be met elsewhere. As such, cooperation clearly relates to maximising the effectiveness of plan preparation.</p> <p>Demonstrated within the effective and on-going joint working undertaken by West Berkshire District Council with the other Western Berkshire HMA authorities, in particular illuminated through the preparation of the SoCG, Sovereign considers that the West Berkshire Local Plan Review is <i>positively prepared</i> and the product of an <i>effective</i> and robust process of cooperation between the authorities.</p> <p>Sovereign therefore considers that the Duty-to-Cooperate has been sufficiently demonstrated in the plan-making.</p>
<p>4. Proposed Changes</p>	<p>To provide for greater flexibility to examine planning applications on a case-by-case basis, thereby improving the effectiveness of the policy, the following amendments are recommended:</p> <p>i) Around 10% of the new market housing and a maximum of 5 units of the affordable-sector <u>homes delivered on-site</u> should also meet the wheelchair accessible standard M4(3) wheelchair user dwellings unless evidence clearly demonstrates that this would make the scheme unviable <u>or would be unfeasible to deliver</u>.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	<p>Yes</p>

5. Independent Examination	Sovereign benefit from a specific land interest within West Berkshire District, which is proposed to be allocated for residential development under the emerging Policy RSA23: Land Adjoining The Haven, Kintbury. In representing Sovereign, Boyer are well-placed to advise on the appropriateness of the land allocated for development.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>The Local Plan Review (LPR) strategy where it relates to specialist older persons accommodation has not been positively prepared, is neither justified nor effective, nor is it consistent with national policy. Policies SP18, DM1, DM4, and in particular Policy DM19 of the LPR when read as a whole have not fully taken into account the fact that the population of older people in England is growing rapidly, with the consequence that ensuring future housing supply is met on the basis of “Lifetime Homes Standards” will not of itself be either suitable or capable in meeting the accommodation requirements of various types of specialist older households.</p> <p>The need to consider specialist older persons accommodation in adjoining authorities to assess the extent to which they can meet their own requirements; considerations relating to changes in the type of care home accommodation; attrition levels seen in terms of the reasons behind the closure of care homes; viability issues which can result in substantially different characteristics relative to general housing, and lessons to be learnt from the recent Covid-19 pandemic, with consequences for the design and access to communal open space of specialist older persons accommodation; all play an important role in the need for, and hence the likely future provision of this form of housing. It is contended that these material considerations effecting specialist older persons accommodation have not been fully met in the policies in the LPR, being considered in greater detail later in these representations.</p> <p>The ONS 2019 Mid-year population estimates indicate that over the past 20 years (1998-2018) the number of residents aged 65 and over in England increased by approximately 31%; more than double the rate of growth than the total population over the same time period (15%).</p> <p>This ageing trend is expected to accelerate in that the 2018 base i.e: the ONS 2019 National Population Projections, reveal that the older population in England could increase by some 41% over the 20 year period between 2018 and 2038, meaning that by 2034, almost 1 in 4 (24%) of the population in England are expected to be aged 65 or over. The rate of growth in West Berkshire over the period 2022 to 2039 for residents aged 75 or over, is projected to increase by 64%.</p> <p>Current national policy as set out at paragraph 62 of the NPPF 2021 requires local planning authorities to consider inter alia:-</p> <p><i>“... the size, type and tenure of housing needed for different groups in the community should be assessed and reflected in planning policies (including but not limited to, those who require affordable housing, families with children, <u>older people</u>, students, people with disabilities ...”</i> (my emphasis)</p> <p>The NPPG at paragraph 001 Reference ID: 63-001-20190626 states</p> <p><i>“The need to provide housing for older people is <u>critical</u>.”</i> (underlining as per the NPPG; my emphasis)</p> <p>Government guidance concerning older persons specialist housing refers to there being a “critical need”, a term absent when describing all other forms of housing need, emphasising the importance to be attached to specialist older persons housing provision.</p> <p>The Guidance goes on to explain in paragraph 006 Reference ID: 63-006-20190626 that :-</p> <p><i>“... These policies can set out how the plan-making authority will consider proposals for the different types of housing that these groups are likely to require. They could also provide indicative figures or arrange for the number of units of specialist housing for older people needed across the plan area throughout the plan period.”</i> (my emphasis)</p> <p>Whilst paragraph 013 Reference ID: 63-013-20190626 states:-</p> <p><i>“It is up to the plan-making body to decide whether to allocate sites for specialist housing for older people. Allocating sites can provide greater certainty for developers, and encourage the provision of sites in suitable locations. This may be appropriate where there is an identified unmet need for specialist housing. The location of housing is a key consideration for older people who may be considering whether to move (including moving to more suitable forms of accommodation).”</i>(my emphasis)</p> <p>The same NPPG sets out at paragraph 010 Reference ID: 63-010-20190626 the different types of specialist housing for older people; all of which have differing consequences seen in terms of delivery; whilst the contents of paragraph 016 Reference ID: 63-016-20190626 are of relevance, highlighting the fact that:</p> <p><i>“Decision-makers should consider the location and viability of a development when assessing planning applications for specialist housing for older people... Where there is an identified unmet need for specialist housing, local authorities should take a positive approach to schemes that propose to address this need.”</i>(my emphasis)</p> <p>The West Berkshire Housing Needs Assessment Update published by Icen Projects Ltd on behalf of your Council states in paragraph 5.35</p>

"It can be seen by 2039 there is an estimated need for 1,137 additional dwellings with support or care across the whole study area. In addition, there is a need for 1,032 additional nursing and residential care bedspaces. Typically for bedspaces it is conventional to convert to dwellings using a standard multiplier (1.80 bedspaces per dwelling for older persons accommodation) and this would therefore equate to around 573 dwellings. In total, the older persons analysis therefore points towards a need for around 1,710 units over the 2021-39 period (95 per annum) – the older person need equates to some 19% of all homes needing to be for some form of specialist accommodation for older people."

These provisions are similarly reflected in the Housing Background Paper prepared by your Authority in January 2023.

I have previously referred in these representations to a proposed 64% change in the population of older persons of 75 years + between 2021 and 2039. This figure has to be examined in the context of the need for specialist housing for the elderly set out in paragraph

The LPR is to seek *"specialist accommodation"* as an integral part of the strategic housing allocations at Sandleford Park and North East Thatcham. The only specialist older persons accommodation being proposed is an Extra Care scheme on land at Stonehams Farm, Tilehurst, being the only allocated site for specialist elderly persons accommodation to 2039.

During the nine-year period commencing 2013/14 leading up to 2021/22, a total of 227 Class C2 rooms were completed, amounting to five schemes, of which 204 comprised three individual schemes in Newbury, revealing why it is considered that either further allocations should be made for specialist older persons housing, and/or the need for flexibility in the location of such specialist housing schemes in Policy DM1.

The Housing White Paper *"Fixing Our Broken Housing Market"* published by DCLG in February 2017 recognised the importance of *"offering older people a better choice of accommodation"* at the same time highlighting that *"helping older people to move at the right time and in the right way could also help their quality of life at the same time as freeing up more homes for other buyers."* It is noted that the same White Paper recognised the *"barriers to people moving out of family homes that they may have lived in for decades"* and the *"emotional attachment ... which means that where they are moving to needs to be very attractive to them and suitable for their needs over a twenty to thirty year period."* The Housing White Paper clearly expresses the Government's commitment to *"exploring these issues further and finding sustainable solutions to any problems that may come to light."*

The Government launched a Select Committee Inquiry into the issue of housing for older people in response to the House of Commons Communities and Local Government Committee (2018). The Inquiry report published in February 2018 aimed to reflect the diversity of older people in terms of their ages, individual circumstances, choices and preferences. It concluded inter alia that:

- A national strategy on housing provision for older people is needed, and should be introduced in consultation with older people and those who provide for them;
- Independent research should be commissioned on the wider housing market impact of older people moving to a smaller home that better suits their needs, to further explore frequent claims that this could be part of the solution to tackling the housing shortage;
- National planning policy should give greater encouragement to the development of housing for older people, ensuring that sites are available for a wider range of developers;
- The new standard approach to assessing housing need should explicitly address the complex and differing housing needs of older people;
- Older people should be able to choose from a wide choice of housing which can accommodate their needs and preferences, including smaller general needs housing, accessible housing, retirement homes, extra care housing and cohousing;
- Local authorities should produce strategies explaining how they intend to meet the housing needs of older people, with Local Plans identifying a target proportion of new housing to be developed for older people as well as suitable well-connected sites close to local communities; and
- Local authorities should be more receptive to private developers who wish to build housing for older people in their area, and appreciate the potential health and wellbeing benefits leading to reduced need for health and social care

Knight Frank in their 2021 Research Paper entitled *"Health Care Development Opportunities"* found that the UK health care market needs upgrading, with 71% of homes older than 20 years; at least 40% of homes having been converted from other uses and many be outdated, with 29% of beds lacking en-suite facilities. They forecast that the Covid-19 pandemic was likely to accelerate the closure of outdated homes and replace them with high quality assets. They went on to add that the Covid-19 pandemic would no doubt prompt a change in the way care homes are designed and configured, with particular emphasis placed on internal circulation, air quality and ventilation, with further focus directed towards transitional and communal space, with a view to maintaining an element of social distancing. A similar shift in preferences with greater attention is anticipated in respect to important outdoor and breakout spaces.

Levels of attrition involving the closing of care homes needs to be assessed in the future, with the average size of newly registered care homes across the country, i.e. those constructed in the last 56 years being 62 beds, contrasting with the average size of care homes closing over the same time period amounting to 29 beds.

It is also important to consider that there are a number of factors which affect the viability of developments relating to specialist housing for older people, one of the most significant being that they incorporate a significant provision of communal space and on-site facilities, in addition to individual rooms/units, and common parts evident in general need apartment blocks. As a result, the efficiency of age restrictive developments seen in terms of the floorspace of individual units (net) to the total floorspace (gross) is significantly poorer than in traditional or general needs housing. In short traditional general needs housing uses 100% in terms of net:gross efficiency, with a figure of 84% net:gross efficiency envisaged for apartments. Care homes, Extra Care facilities and sheltered living/retirement living apartments in contrast are only able to achieve between 40 and 75% net:gross efficiency.

	<p>In addition to these design considerations, there are higher construction costs, with greater requirements in terms of achieving higher accessibility requirements, comprising lifts, specially adapted bathrooms, treatment rooms, with those providing these important facilities relying on third party building contractors who are unable to secure the same economies of scale as volume housebuilders.</p> <p>To these considerations should be added slower sales, given they are directed at a specialist older persons market, with the inability to phase flatted schemes to sales rates, resulting in higher finance costs for developments.</p> <p>It is for a combination of these reasons that it is contended the LPR needs to be more proactive in delivering development to meet specialist older persons housing, which it is contended is not being met through the allocation of sites to meet these specialist housing needs. If this process is not addressed, with authorities relying on the market to being forward sites, with viability assessments at the decision-taking stage, it is considered less likely that sites will come forward for this much needed use, although this situation can be alleviated by incorporating into Policy DM1 an exception in respect of specialist older persons housing subject to a quantitative and qualitative need accompanying any such submission.</p> <p>These considerations which affect specialist older persons housing were accepted by the Inspector Harold Stephens in an appeal decision concerning land at Sonning Common (PINS Ref. No. APP/Q3115/W/20/235861), viz:-</p> <p><i>“117. Extra care housing undoubtedly operates in a very different market. Mr Garside provided detailed evidence to the inquiry how the market for land operates to the detriment of extra care operators. Extra care housing providers cannot compete with house builders or with other providers of specialist housing for older people because of the build costs, the level of the communal facilities and the additional sale costs including vacant property costs. The communal facilities must be provided before any units can be sold and sales tend to be slower. However, I accept that extra care schemes can charge a premium for the specialist accommodation provided and also benefit from an income from deferred management fees.</i></p> <p><i>1 It seems to me that these factors, all mean that age restricted developments and in particular extra care communities are less viable than traditional housing schemes. Ultimately, age restricted developers are less able to pay the same price for land as residential developers and it is much harder for age restricted developers; and in particular those seeking to deliver extra care, to secure sites for development and meet the housing needs they aim to supply. Viability is clearly a relevant factor which supports the case under paragraph 172b) of the NPPF. There is also a strong case for the appeal scheme given the lack of alternative sites in the light of Policy H9 of the SOLP.”</i></p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>There is a need in the evidence base to provide a detailed assessment of the different types of specialist housing for older people, which for various reasons cannot be successfully accommodated in adjoining authorities, in order to evaluate whether there are certain diverse links for older persons accommodation which are more likely to be met in West Berkshire. To consider housing solely from a generic basis where the form of housing is in critical need is not considered satisfactory, and more importantly, will only exacerbate the need in the future for older persons accommodation.</p>
<p>4. Proposed Changes</p>	<p>There is a need to adopt a more flexible approach towards specialist housing for older people, for which the Government confirms there is a critical need, so that emphasis can be placed on ensuring that their requirements are met, in the same way as is the case for the housing needs of travellers. Both travellers and older people comprise different groups within the community which are required to be assessed and reflected in planning policy, in accordance with paragraph 62 of the NPPF 2021.</p> <p>This means encompassing specialist housing for older people as a category which exceptionally may be provided as a form of residential development in the countryside, in accordance with Policy DM1, subject to a quantitative and qualitative need being shown. The significance of this proposed policy change is evident in appeal decisions where care proposals, both Extra Care and care homes, are being allowed in the countryside in locations not normally considered acceptable in planning terms, such as in the Metropolitan Green Belt; Area of Outstanding Natural Beauty and sites on the edges of small villages, as well as next to listed buildings and conservation areas. This is a reflection of Inspectors consistently recognising the national imperative of providing more care facilities in the light of the very clear instruction that the need is now critical. It is also the fact that a number of local authorities are failing to properly address or recognise that need.</p> <p>There is also a requirement to look at the qualitative need for specialist housing for older people, meaning an examination of the District’s current care home stock, which includes converted buildings, along with attrition rates, i.e. the loss of care home facilities. The requirement in this respect should be based on an appropriate standard room, being a single occupancy room with en-suite toilet, wash basin and flat floor shower, i.e. a wet room, the latter being particularly important to avoid the risk of elderly people tripping or falling in the shower. It also requires a shower stool or seat to be placed within easy access in the shower. The appropriate standard in this respect is that envisaged by the Care Act 2014 Section 5 paragraph 1(b).</p> <p>This requirement is now all the more persuasive following the shocking evidence of those who have passed away in care homes due to the Covid-19 pandemic. It is not difficult to see why when so many people who passed away lived in accommodation focused on sharing facilities, which, post Covid, is now completely unacceptable. The extent to which there is an appropriate standard of accommodation should dictate the need in the future for all forms of specialist older persons housing in the LPR. In addition, there is a need to carry out an assessment as set out in answer to Question 3 above.</p>

5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	N/A

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>We note the inclusion of First Homes within this updated draft policy, and understand why this has been included. It is important to note that other local planning authorities, including Bath and North East Somerset Council and Guildford Borough Council, have identified the lack of affordability of First Homes within their communities and taken steps to prioritise other affordable housing tenures. In the case of B&NES Council due to the evidence demonstrating that First Homes is not affordable and would affect delivery of other affordable tenures, it has decided not to implement the national guidance and excluded the tenure from their policies and guidance. In the case of Guildford BC the emerging local plan policy H8 incorporates flexibility to deliver alternative affordable home ownership tenures where delivery of First Homes would "lead to an adverse planning outcome".</p> <p>The Updated Housing Needs Evidence (July 2022) demonstrates that First Homes will require additional discounts above the national figure of 30% to be affordable to people in housing need in West Berkshire, and these higher discounts will also prejudice the viability of delivering affordable rented housing. The introduction of First Homes as expected by the national guidance may reduce the opportunities for mixed tenure developments to meet local housing needs, contrary to national policy.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>We ask that the Council review whether the omission of the tenure, as supported by Bath and North East Somerset Council, or flexibility, such as that incorporated by Guildford Borough Council could be built into the policy to allow for different proportions of each tenure to be delivered in response to local need, affordability, and viability. A reduction in the level of First Homes required in the policy, or across individual sites, would protect the overall level of affordable housing being delivered. Flexibility within the policy would be justified by the evidence base.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	<p>No</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	We believe that the Plan accords with the requirements of the relevant legislation.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes

Please give reasons for your answer	<p>Whilst we acknowledge that affordable housing is a requirement, we do not support the amended wording for affordable housing to be “required” on sites as this does not offer sufficient flexibility to negotiate an alternative provisions or arrangements in exceptional circumstances, as noted in the following wording of the draft policy. We therefore suggest that the policy wording is reverted to “sought by negotiation” as shown in the tracked changes version of the draft Plan.</p> <p>We do not support the requirement for affordable housing to be sought on sites of between 5 and 9 dwellings, as noted in point b in the draft policy, as this conflicts with paragraph 64 of the NPPF which states that the provision of affordable housing should not be sought for residential developments that are not major developments, other than in designated rural areas. In addition, the provision of affordable housing on such sites could become unviable for these smaller developments. We therefore suggest that point b is deleted.</p> <p>We do not support the requirement for affordable homes to be built to net zero carbon standards. This should be reflective of the building regulations requirements, and we suggest that this requirement is deleted. Please refer to our comments in respect of Policy DM4.</p> <p>Finally, whilst we support the requirement affordable homes to be appropriately integrated within developments, this can result in management issues for Registered Providers if affordable units are dispersed across the development. In our experience, it would typically be Registered Providers' preference for affordable units to be delivered in clusters for ease of management. We therefore suggest that this requirement is amended to include a maximum cluster of 15 units houses and 21 units for apartments, taking account of the typical apartment block size.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	We believe that the Plan sufficiently addresses strategic planning issues relevant to the area.
4. Proposed Changes	<p>We therefore suggest that the policy wording is reverted to “sought by negotiation” as shown in the tracked changes version of the draft Plan.</p> <p>We therefore suggest that point b is deleted.</p> <p>We do not support the requirement for affordable homes to be built to net zero carbon standards. <p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>Thank you for the opportunity to comment on the West Berkshire Council Local Plan Review 2022-2039 Proposed Submission Reg 19 draft – January 2023. McCarthy Stone is the leading provider of specialist housing for older people in the UK.</p> <p><u>Specialised housing for older people</u></p> <p>We note the new wording added to policy SP19 para 10 that allows extra care housing to be considered on a case-by-case basis with regard to affordable housing and states:</p> <p><i>'In relation to extra care housing, it is recognised that provision of affordable housing may be particularly difficult to achieve. In such circumstances, the policy will be implemented on a case-by-case basis, and the individual viability assessment will be used to demonstrate an appropriate affordable housing contribution'.</i></p> <p>However, we also note that the Viability Assessment Update, Autumn 2022, Dixon Searle (Viability Assessment), when discussing sheltered housing / retirement living advocates a similar position to extra care and states the following:</p> <p><i>'3.2.28 Overall, on this development type it may be appropriate for the Council to consider the likely frequency of such schemes and whether that justifies a particular approach. We offer these comments bearing in mind that outcomes seem likely to vary to some extent. For the Council's consideration, we suggest that if there were a little more flexibility built into the draft LPR policy wording (proposed SP19 scope as understood by DSP at the time of writing) - similar to that set to be provided for extra care housing schemes (which we often see developed on a broadly similar format) - then this may assist in respect of any potential viability issues. In our view this need not dilute too much the overall expectations / LPR approach and starting point'</i></p> <p>The NPPF now has an increased emphasis on Local Plan viability testing at Paragraph 58 and the PPG states that <i>"The role for viability assessment is primarily at the plan making stage. Viability assessment should not compromise sustainable development but should be used to ensure that policies are realistic, and that the total cumulative cost of all relevant policies will not undermine deliverability of the plan"</i> (Paragraph: 002 Reference ID: 10-002-20190509).</p>

Therefore, to ensure that the plan is realistic, deliverable, justified and consistent with national policy para 4 of policy SP19 should be amended to also include sheltered housing and retirement living.

First Homes

Para 6 of Policy SP19 identifies that 25% of affordable housing should be delivered as First Homes. However, the Local Plan should clarify that certain specialist housing schemes such as those meeting the needs of older people should be exempt from providing First Homes and Starter Homes on site. This is because specialist housing for older people is often delivered on smaller sites of up to 50 units in central locations where it would not be viable to deliver on site First Homes, Starter Homes and Discount Market Sales. In addition, it would not be appropriate to mix First Homes, Starter Homes and general Discount Market Sales in specialist housing schemes for older people which by their very nature are based around communal facilities and communal living. This would ensure the Local Plan is consistent with NPPF para 66 which provides exemptions to such schemes providing affordable home ownership.

Net zero

It is also noted that policy SP19 para 11 asks that 'Affordable homes will be built to net zero carbon standards to help meet objectives on sustainability and climate change. The affordable units will be appropriately integrated within the development'. Although the Council's commitment to meeting both its and the UK Government's target of net zero carbon emissions by 2030 is commendable, it appears that the Council is going to achieve net zero through having mandatory standards for affordable housing from adoption of the plan that go beyond government targets. However, it is our view that any requirement should be 'stepped' in line with Government targets. This is more desirable as there is considerable momentum from Government in preparing enhanced sustainability standards as it is clear the energy efficiency requirements for domestic and non-domestic buildings will increase sharply in the coming years. Aligning the Council's requirement for net zero development with those of Government would therefore be pragmatic and more achievable.

Para 11 of the policy should therefore be deleted.

Recommendation:

In order to ensure the Plan is consistent with national policy, justified and effective the following amendments should be made to Policy SP19:

Amend Policy SP19 para 10 as follows:

*In relation to extra care, **sheltered and retirement living** housing, it is recognised that provision of affordable housing may be particularly difficult to achieve. In such circumstances, the policy will be implemented on a case-by-case basis, and the individual viability assessment will be used to demonstrate an appropriate affordable housing contribution'. **Such schemes will be exempt from delivering First homes.***

Delete *Policy SP19* para 11

Affordable homes will be built to net zero carbon standards to help meet objectives on sustainability and climate change. The affordable units will be appropriately integrated within the development.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?

- * Yes
- * No

Please give reasons for your answer

4. Proposed Changes

Recommendation:

In order to ensure the Plan is consistent with national policy, justified and effective the following amendments should be made to Policy SP19:

Amend Policy SP19 para 10 as follows:

*In relation to extra care, **sheltered and retirement living** housing, it is recognised that provision of affordable housing may be particularly difficult to achieve. In such circumstances, the policy will be implemented on a case-by-case basis, and the individual viability assessment will be used to demonstrate an appropriate affordable housing contribution'. **Such schemes will be exempt from delivering First homes.***

Delete *Policy SP19* para 11

Affordable homes will be built to net zero carbon standards to help meet objectives on sustainability and climate change. The affordable units will be appropriately integrated within the development.

Please give reasons for your answer	<p>RBC welcomes the proposal to require significant levels of affordable housing on development sites, and the proportions required are broadly in line with those in the Reading Borough Local Plan. Delivering as much affordable housing within the plan area as possible will avoid placing undue burdens on neighbouring authorities.</p> <p>RBC particularly supports the proposal to seek affordable housing on sites of below 10 dwellings. As you will be aware, the Reading Borough Local Plan seeks an affordable housing contribution on all sizes of sites due to the exceptional pressures on affordability in the local area, and this will no doubt equally apply to West Berkshire. It is for WBDC to determine where the threshold for affordable housing provision should be based on local evidence, but as a general comment based on our experience, sites of 1-4 dwellings tend to have fewer viability issues in meeting policy requirements than sites of 5-9 dwellings, and WBDC may wish to consider seeking affordable housing contributions from all sizes of site. It is also worth noting that it is often very difficult to secure on-site provision below 10 dwellings due to the difficulties in finding a Registered Provider willing to take these units on, and WBDC may wish to reflect that a financial contribution on smaller sites is likely to be more achievable in most cases.</p>

Please give reasons for your answer	<i>[For full response see attached document]</i> The Policy does not accord with paragraph 64 of the NPPF which directs that affordable housing should not be sought on schemes of less than 10 dwellings if located outside of the designated rural areas. It is therefore unsound. It should be made clear within the policy text that part b) of Policy SP19 only applies to development schemes on sites within the designated rural areas such as AONBs.

<p>Please give reasons for your answer</p>	<p>The Local Plan at paragraph 6.83 sets out that there is a high need for affordable housing across the District with a net affordable and social rented housing need equivalent to 330dpa. Based on an overall housing target of the higher range at 538dpa the affordable need represents 61% of the total housing target. The affordable housing percentage being sought by the Council is 30% on previously developed land, 40% on greenfield land and 20% for developments of between 5 and 9 dwellings. This means the affordable need will not be met. Accordingly the Council should increase the overall housing target so that the delivery of the much needed affordable homes also rises.</p> <p>To summarise the above points, Gleeson Land supports the overall intentions of the Local Plan Review to deliver sustainable development for the district, the settlement hierarchy and the spatial strategy. However, it is considered that there should be a requirement for an earlier review of the Local Plan should any changes arise in the AWE Burghfield and AWE Aldermaston DEPZ's or the capabilities of the Emergency Planning Services that may change the acceptability of new residential development in areas currently covered by the DEPZ. In addition the housing target should be more clearly defined at the upper end of the given range. It should be clear throughout the whole Plan that the housing target is for 9,146 dwellings (538dpa), plus the 230 dwellings of unmet need from Reading Borough Council. This unmet need should be provided for in new site allocations now, rather than being left for a later review. Serious consideration should also be given to increasing the overall housing target further to support the delivery of more affordable homes given the very high need for such homes.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	No

Please give reasons for your answer	This policy has been amended to state that viability assessments must be publicly available. The information in viability assessments can often be commercially sensitive and therefore this amendment should be removed, or amended to say that a summary must always be made publicly available. The supporting texts states that the Council will require a review mechanism to enable the Council to reassess viability over the lifetime of the development; this requirement is not reasonable and in any event would be difficult to monitor/enforce.

Please give reasons for your answer	[For wider representation and Tables and Figures, see attached Representations on behalf of Croudace Homes] Affordable Housing The HNAU sets out a need for 330 affordable dpa. Given that the Council's overall housing requirement (which takes into account all types of housing) is 538 dpa, the requirement for affordable homes makes up approximately 60% of the overall requirement. 330 dpa over the 17-year plan period equates to a requirement for 5,610 affordable homes. Draft LPR Policy SP19 (Affordable Housing) requires affordable housing to be delivered on site for all development sites of 5-9 dwellings (20% provision) and all development sites of 10+ dwellings (30% provision for previously developed sites and 40% for greenfield sites). Assuming a 'best-case' scenario, a crude calculation confirms that these sites would theoretically yield only 2,934 affordable units, a shortfall of 2,676 against the need identified. In reality, the actual position will likely be worse, with some sites unable to deliver affordable units, for example, due to viability constraints and/or financial contributions being provided in lieu of on-site provision. Many sites will also not be required to deliver the maximum 40% affordable housing provision sought in line with draft Policy SP19.

	Croudace therefore believes there is a clear case to request the Council to increase the housing requirement, at least to ensure that a greater proportion of affordable housing needs as identified within the Council's evidence base can be met. If the Council does not seek to adjust the housing requirement accordingly, Croudace cannot consider it to be 'positively prepared'.

Please give reasons for your answer	<p>The policy sets out a variable policy reflecting the different vitality between green field development and previously developed land (PDL). In addition, the Council is also requiring sites of between 5 and 9 to provide affordable housing.</p> <p>Whilst the HBF agrees with the Council with regard the use of a variable approach we are concerned that the rate applied to PDL sites is, as noted in paragraph 3.1.16, is at the upper end of what is viable. Whilst we note the Council's comments in the Viability Assessment that only 3 sites out of the 44 that have come forward in the last 7 years have failed to meet the affordable housing requirements this did not include requirements for 10% BNG and net zero carbon emissions. These costs will place more pressure on development and in particular will affect PDL sites where existing use values are generally assumed to be higher than on green field sites. The evidence indicates that 30% affordable housing on many such sites will be unviable or marginal and as such a lower overall requirement would be ensure more sites come forward without the need for negotiation.</p> <p>If the Council do not consider a change to be necessary, it should be more encouraging of development that can't viably deliver affordable homes. Whilst we recognise that paragraph 58 states that these should only be in exceptional circumstances it is apparent from the evidence that these circumstances are not exceptional but will be relatively common. Therefore, we would suggest that the Council takes a more supportive approach in this policy to negotiation in recognition of the evidence.</p> <p>Point b in the second paragraph of the policy sets out the Council's intention to require a financial contribution for affordable housing on sites of 5 and 9 dwellings. Paragraph 6.75 indicates that the Council are aware that paragraph 64 of the NPPF only allows for contributions from such sites in designated rural areas, yet it would appear from the policy that they are requiring contributions for affordable housing from all sites delivering 5 to 9 homes regardless of where these are located. The justification for this position appears to be that as 74% of the Borough is in an AONB such an approach is considered to be</p>

	<p>reasonable. If the Council's intention is that this element of the policy is only relevant to rural areas, then this should be expressly stated in the policy.</p> <p>If it is the Council's intention that all sites of between 5 and 9 should provide 20% affordable housing, then the HBF consider this policy to be unsound. It is worth noting why the Government introduced this particular policy. The Ministerial Statement is clear that the reason for introducing this policy was to "ease the disproportionate burden of developer contributions on small scale developers". This is distinct from whether or not such development is viable in general but whether they are a disproportionate burden on a specific sector that faces differential costs that are not reflected in general viability assessments. These costs have led to a reduction in the number of small and medium (SME) sized house builders. Analysis by the HBF shows that over the last 30 years changes to the planning system and other regulatory requirements, coupled with the lack of attractive terms for project finance, have led to a long-term reduction of total SME house builder numbers by about 70% since 1988. The Government is very anxious to reverse this trend and increase the number of small businesses starting up and sustaining this activity. Improving business conditions for SME home builders is the key to long-term supply responsiveness.</p> <p>Therefore, the HBF consider it essential that the Council amend the policy to clearly state that only sites of 5 to 9 dwellings in designated rural areas are required to deliver affordable housing.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes
Please give reasons for your answer	This Policy states that 'affordable homes will be built to net zero carbon standards to help meet objectives on sustainability and climate change'. There is a risk that this is interpreted as only being net zero during the building of the property; we believe that net zero should be the standard for the whole life of the structure and suggest that this section is reworded accordingly.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer

<p>Please give reasons for your answer</p>	<p><i>[Attached Churchill Retirement Living Viability Assessment]</i></p> <p><i>Policy SP19: Affordable Housings</i> which advises that on sites of 10 dwellings or more there will be a 30% affordable housing requirement on previously developed land, and a 40% requirement on Greenfield land. .</p> <p>The wording of <i>Policy SP19</i> makes it clear that a non-policy compliant level of affordable housing will only be allowed in exceptional circumstances ‘...<i>The levels set out above represent the default position and a lower provision of affordable housing should not be sought, other than in exceptional circumstances and where fully justified by the applicant through clear evidence set out in a publicly available viability assessment.</i></p> <p><i>If a lower provision of affordable housing is sought in exceptional circumstances, a review mechanism will be required to ensure that if viability improves during the lifetime of the development project, additional affordable housing, up to the levels specified in this policy, is provided.</i></p> <p>It is clear from the wording of the policy and its justification that the Local Authority is cognisant of the increased emphasis on Local Plan viability testing in Paragraph 58 of the NPPF. Given the Council’s stance towards developer contributions and affordable housing, we find aspects of the evidence base underpinning these policies to be of concern.</p> <p>The affordable housing targets set out in <i>Policy SP19: Affordable Housing of the West Berkshire Council Local Plan Review</i> (Regulation 19) consultation are informed by the <i>West Berkshire Council – Viability Assessment Update</i> (VA) by Dixon Searle Partnership (Autumn 2022).</p> <p>We note that the VA has assessed the viability of older persons’ housing typologies, which is welcomed. In reviewing the methodology for assessing specialist older persons’ housing, we note that many of the inputs align with the methodology detailed in the Briefing Note on Viability Prepared for the Retirement Housing Group (hereafter referred to as the RHG Briefing Note) by Three Dragons, although a number do not. Our concerns are that the Viability Assessment has overplayed the viability of older persons’ housing.</p> <p>Mindful of the guidance in the PPG that is the responsibility of site owners and developers to engage in the Plan making process. Churchill Retirement Living have provided commentary and supplemental evidence on the viability assumptions used in the viability appraisals for retirement living housing typologies in the VA.</p> <p><i>[Churchill Retirement Living have provided commentary, supplemental evidence and their own viability appraisal on this policy in a separate document entitled ‘Review of Local Plan Viability Assessment Retirement Living Housing’.]</i></p> <p>Conclusions</p> <p>Churchill Retirement Living are strongly of the view that it would be more appropriate to set a nil affordable housing target for sheltered and extra care development, at the very least in urban areas. This approach accords with the guidance of the PPG which states that ‘Different (affordable housing) requirements may</p>

	<p>be set for different types or location of site or types of development' (Paragraph: 001 Reference ID: 10-001-20190509).</p> <p>The guidance in the NPPF and the PPG is that the role for viability assessment is primarily at the Plan making stage:</p> <p><i>Where up-to-date policies have set out the contributions expected from development, planning applications that comply with them should be assumed to be viable. It is up to the applicant to demonstrate whether particular circumstances justify the need for a viability assessment at the application stage. The weight to be given to a viability assessment is a matter for the decision maker, having regard to all the circumstances in the case, including whether the plan and the viability evidence underpinning it is up to date, and any change in site circumstances since the plan was brought into force (paragraph 57.)</i></p> <p>Council Members, Officers and the general public will assume that applications for sheltered or extra care housing will be able to support a policy compliant level of affordable housing. This would however be wholly at odds with the viability evidence underpinning the Local Plan.</p> <p>The requirement for affordable housing contributions from specialist older persons' housing typologies is therefore speculative rather than based on the evidence presented. The Local Plan is therefore considered to be unsound on the grounds the affordable housing targets are not justified, positively prepared or effective.</p> <p>We therefore respectfully request that a new subclause is added stating that:</p> <p><i>Specialist older persons' housing will be subject to a nil affordable housing requirement on brownfield / urban sites and a 40% affordable housing requirement on greenfield sites.</i></p> <p>To that end, we would like to draw the Council's attention to Paragraph 5.33 of Policy HP5: Provision of Affordable Housing in the emerging Fareham Borough Local Plan which advises that:</p> <p><i>5.33 ... The Viability Study concludes that affordable housing is not viable for older persons and specialist housing. Therefore, Policy HP5 does not apply to specialist housing or older persons housing.</i></p> <p>A nil affordable housing rate could facilitate a step-change in the delivery of older person's housing in the District, helping to meet the diverse housing needs of the elderly. The benefits of specialist older persons' housing extend beyond the delivery of planning obligations as these forms of development contribute to the regeneration of town centres and assist Council's by making savings on health and social care.</p>

* No	
Please give reasons for your answer	Object. The policy wording is not justified or consistent with national policy. Bloor Homes fully supports the Council's objectives for delivering affordable homes given that we are currently experiencing a housing crisis for many thousands of people across the district and the UK who cannot afford to own or live in their own home. In relation to the requirement for affordable homes to be built to net zero carbon standards, the policy should align clearly with Policy DM4.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	Affordable homes will be built <u>in accordance with the requirements of Policy DM4</u> to net zero carbon standards to help meet objectives on sustainability and climate change'. 'Affordable homes will be built to help meet objectives on sustainability and climate change'.

<p>Please give reasons for your answer</p>	<p>Sandleford Park South (SPS)</p> <p>Affordable Housing Needs</p> <p>Planning Practice Guidance paragraph 2a-024 states:</p> <p><i>“... An increase in the total housing figures included in the plan may need to be considered where it could help deliver the required number of affordable homes.”</i></p> <p>The West Berkshire Housing Needs Assessment Update (WBHNAU) shows a net annual need for 330 rented affordable homes and a net annual need for 367 affordable home ownership homes in the District. Therefore, the total affordable housing need of 697 homes per annum is in excess (130%) of the total housing provision proposed in the dWBLP.</p> <p>Despite the level of need being high, the WBHNAU considers that this would not necessarily point to any requirement for the Council to increase the Local Plan Review housing requirement above that suggested by the SM.</p> <p><i>“The link between affordable need and overall need (of all tenures) is complex and in trying to make a link it must be remembered that many of those picked up as having an affordable need are already in housing (and therefore do not generate a net additional need for a home)”</i></p> <p>The WBHNAU considers that the affordable housing need arising from newly forming households is already accounted for in the output from the demographic modelling (i.e. the Standard Method), and are therefore already included in the overall housing need figures.</p> <p>Whilst it is accepted that the relationship between affordable housing need and overall housing need is complex and that there is no simple arithmetical means of linking the two, the PPG is clear that an increase in the total housing figures included in the plan may need to be considered where it could help deliver the required number of affordable homes. Furthermore paragraph 20 of the NPPF is clear that strategic policies should make sufficient provision for affordable housing.</p> <p>The WBHNAU erroneously conflates the overall housing needs of the area with that of the need for affordable housing. Whilst it is true that a proportion of households in need of affordable housing are already accounted for in the demographic modelling of the SM and therefore it is not necessary to deliver more homes than suggested by the SM, this misses the fact that the WBHNAU identifies that there is a greater need for affordable homes than there are for all homes according to the standard method. Accordingly, even if all of the homes proposed were delivered as affordable homes there would still be a shortfall. It also misses the fact that a proportion of the housing delivered will not be affordable homes and so will not respond to the needs identified and that accordingly, it will be necessary to provide for an even greater number of homes to meet the need for affordable housing as set out in the Planning Practice Guidance.</p> <p>Donnington New Homes acknowledges that the Council may not be able to meet the affordable housing needs in full. However, the disparity between what is needed and what is planned to be delivered indicates a clear need for an uplift in the overall housing requirement to ensure a sufficient provision of affordable housing in accordance with paragraph 20 of the NPPF.</p>

	The Council acknowledges the upper target of the housing provision does not constitute a ceiling or cap to development (draft Policy SP12). An uplift in the housing provision for affordable housing needs would therefore not be at odds with the development strategy of the Council.

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
Please give reasons for your answer	<p>West Berkshire is not an affordable place to live, and the level of affordability is becoming worse – in both absolute and real terms. The median house price to residence-based earnings ratio⁷ (see ONS) has risen from 7.85 to 10.94 between 2010 and 2021 – a rise of 39% in comparison to a rise for England as a whole of 33% (to 8.92).</p> <p>Neither the policy nor the supporting text recognises the really urgent need for the delivery of more affordable housing. There is no recognition that of the failure to deliver the level of affordable homes promised in the 2012 Core Strategy and of the consequences of this failure. There is no reference to any intention to seek early delivery of affordable housing and to do so in locations close to areas of clear demand. Thus no affordable targets or requirements are set in the context of the settlement hierarchy. This is all required to ensure consistency with NPPF 11 a&b, 61-63.</p> <p>Tetlow King (TK) have produced an Affordable Housing Statement which is submitted as Appendix 7 to these representations.</p> <p>The TK statement notes the following:</p> <p>6.3 The 2022 HNA [Housing Needs Assessment] also sets out the affordable housing need for the Eastern Sub-area, identifying a total net affordable housing need of 138 affordable dwellings per annum over the 18-year period from 2021 to 2039.</p> <p>Furthermore, not only have nil affordable homes been delivered in Tilehurst Parish since 2018-19 (figure 3.5) but there is a shortfall of 83 affordable dwellings from the first year of the wider 2022 Housing Needs Assessment, meaning that overall (paragraph 6.7) “the number of affordable homes the Council will need to complete increases to 155 net affordable homes per annum for the period 2022/23 to 2026/27.”</p> <p>And indicators of housing need point towards what TK identify as ‘an affordability crisis’ across West Berkshire and in particular in the Eastern Area around Tilehurst, as (paragraph 6.9):</p> <ul style="list-style-type: none"> • Of the 651 households on the Housing Register at 31st March 2022, 175 households specified a preference for an affordable home in Tilehurst; this represents 27% of the entire housing register.

	<p>Finally, TK conclude:</p> <p>6.1 Given the recognised shortfall in affordable housing across West Berkshire and the Eastern Sub-area more specifically, the allocation of additional development sites within the Eastern-sub-area would contribute significantly towards addressing a key corporate priority of delivering more affordable homes.</p> <p>6.2 By contrast, there are opportunities to secure more affordable housing, for example additional allocations and the achievement of higher rates of affordable housing on viable development sites. These include forthcoming and deliverable sites such as Land East of Pincents Lane (TIL13).</p> <p>6.3 The importance of such allocations is demonstrated by the lack of housing allocations in the Tilehurst Civil Parish, including the availability of suitable development sites within the Eastern Area that are not restricted by constraints including the safeguarding zones for the Atomic Weapons Establishments at Aldermaston and Burghfield, or containing land (in part and full) that are in Flood Zones 2 and 3.</p> <p>Delivery of Affordable Housing in Reading BC area</p> <p>The Reading BC Annual Monitoring Report notes that in total 178 net affordable housing completions were delivered in 2021/22 (footnote 8). Paragraph 8.13 goes on to state:</p> <p>8.13 The amount of affordable housing delivered this year is significantly higher than 2019-20 (80) and 2020-21 (54), and is the highest level delivered since 2013. This is related to the progress with particular large developments where a substantial proportion of their affordable delivery has come in this year. It is expected that affordable housing delivery will continue to be relatively strong in coming years in line with high levels of overall delivery, albeit still well below the identified level of affordable housing need of 406 per year over the Local Plan period.</p> <p>As of the end of the 2021/22 financial year, there were 3,187 households on the Housing Waiting List for Reading (footnote 9). Even if no further households came on to the list in the meantime, and the 2021/22 high level of affordable housing completions were to be maintained, it would take a further 18 years – a further two decades - to clear this backlog.</p> <p>With this scale of affordable housing need in both Reading and WBC, it puts additional pressure on the wider housing market, including private rental in particular. The recognition of this need and an identification of how it is to be met in each part of the settlement hierarchy is required in the strategic policies of the plan. This would give rise to the need to increase the allocation of additional sites in the Eastern Area, adjacent to the main urban area such as that proposed at Pincents Lane site TIL13, would assist in delivering additional much-needed market and affordable housing to address these pressures.</p> <p>In these circumstances, the strategic housing policies of the plan are unsound and are failing to identify and respond to local housing needs in the location where these needs arise. More allocations are required.</p> <p>Attachments:</p> <ul style="list-style-type: none"> • Full Rep • Appendix 7 - Tetlow King report: Affordable housing representation
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>The requirement to allocate more sites in the Eastern Area would address many of these challenges to soundness. Whilst it is acknowledged that some constraints do exist, there are sites which are recognised as achievable and deliverable in the Council's evidence base supporting the LPR. Prime amongst these is site TIL13 at Pincents Lane (see overleaf). Site TIL13 has a long planning history. By common consent, the problems with the 2011 appeal scheme have been resolved and no technical obstacles exist to development of the site for a scheme of up to 165 dwellings. By the LPA's own assessment, the concerns – and the reasons for not proposing it for allocation – are entirely "political". No one would deny the validity of elected members making political choices where real choices exist, but the fact is that not allocating the site would leave the LPA without a single significant contribution to offer to meet either its own housing need in the Eastern Area or that arising from Reading, of which the Area is functionally part. The site should therefore be allocated.</p>

<p>Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>It is not clear from the LPR what the quantum of unmet need is over the Plan period, although your email of 13th January 2023 states that it is now 50,816sqm office floor space and 32,709sqm of industrial floor space. The LPR also refers to a lack of suitable sites, and that the District is heavily constrained (paras. 7.7 and 7.9).</p> <p>BFC is experiencing similar issues to West Berks and at the base date of our Local Plan had an unmet need for industrial and warehousing floorspace (former B1c, B2 and B8 uses). At the base-date of the BFLP the need was for 48,875m2 industrial/warehousing, and 19,125m2 of office floorspace (the latter of which could be met in full). However, the Inspectors requested an update on changes that had occurred since the base date of the Plan. This found that at 31st March 2022, the remaining need to 2037 for industrial/warehousing had decreased to 21,550m2 but that office floorspace needs had increased to 72,365m2. The increase in office floorspace need is due to the Borough continuing to experience the demolition or change of use of existing office buildings.</p> <p>A consequence of the content of the Inspectors' post hearings letter, is that the unmet need for industrial/warehousing increases to 36,550m2 (since the suggested Main Modification will mean that the 15,000m2 of floorspace that was to contribute to meeting needs will be removed with the deletion of the allocation at Jealott's Hill). Prior to submission of the BFLP, BFC undertook Duty to Co-operate discussions with surrounding LPAs in August 2021 asking for assistance in helping to meet its industrial unmet needs. No LPA was in a position to assist given limited land availability and existing constraints to development.</p> <p>We advised in an email in September 2022 that BFC was regrettably unable to assist with helping your unmet need. This position has not changed. Therefore in response to your formal Duty to Cooperate request for assistance received on 13th January 2023, Bracknell Forest remains unable to assist with meeting any of West Berkshire's employment land or floorspace requirements. It is noted (para. 7.9) that the Plan includes a commitment to undertake an early review on employment matters.</p> <p>In relation to retail need, an update of the evidence has not been undertaken due to the challenges which have arisen as a result of Covid and Brexit, and that a commitment has been made to undertake an early review of the Plan on this matter (para. 7.32). Given the recent changes to the use class order (and new Use Class E), a light touch review of retail needs would have been helpful to inform the LPR. (Bracknell Forest commissioned a Retail Advice Note in 2022 as part of evidence base of the BFLP, which took account of the Western Berkshire Retail and Commercial Leisure Assessment from 2016). As it is not known if there is any unmet need for retail, BFC is unable to comment on any implications at this stage.</p>

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	<p>It is considered that the plan should take into account industrial and logistics need of the in the Berkshire Functional Economic Market Area ('FEMA') and wider region. Justification for this stance is set out in our appended representation letter titled 'Grazeley I&L West Berkshire Reps Letter' which provides a brief background of the national policy legislation position and then the regional and local evidence base, and sets out how our Site at Grazeley can contribute to this regional need.</p> <p>Representation Letter:</p> <p>This letter provides representations on behalf of Crest Nicholson Partnerships and Strategic Land ('CN') to West Berkshire Council on the Proposed Submission (Regulation 19) Consultation in relation to the land at Grazeley ('the site') for industrial and logistics (I&L) development.</p> <p>The site lies immediately to the south of junction 11 of the M4 and continues to extend south, with the A33 broadly forming the eastern boundary, and the railway line defining the western boundary. In the previous</p> <p>Wokingham Regulation 18 Consultation in 2020, Grazeley Garden Town ('GGT') was identified as a preferred option for strategic residential development as a 'Garden Town' of 15,000 houses. As you will be aware subsequently to this decision, a change in legislation resulted in the redetermination and expansion of the</p>

Urgent Action Area and the Detailed Emergency Planning Zone ('DEPZ') around AWE Burghfield, leaving Grazeley Garden Town no longer achievable. As a result, CN has been assessing alternative appropriate land uses in the northern part of the site adjacent to Reading and the M4. In light of this, CN promoted the site for industrial and logistics development and submitted representations to Wokingham's Regulation 18 Consultation in January 2022. It is considered that as the site is located within a strategically important economic area, the site could deliver employment land of a scale which would benefit the wider sub region including adjacent authority areas, such as West Berkshire, in terms of job creation and economic outputs.

Development on land at Grazeley will be guided by overarching placemaking principles that ensure good quality design, mitigates the impacts of climate change and which helps build communities that are resilient to climate change and contribute to healthy living. Tackling the impacts of climate change is one of the key foundations of Crest Nicholson's business strategy, they continue to embed responsible practises throughout operations and development designs. Crest Nicholson are committed to reducing carbon emissions and waste and are constantly innovating to find ways to reduce the impact our developments have on the environment.

In January 2023, Crest Nicholson became the first UK housebuilder to have its science-based net-zero target approved by the Science Based Targets Initiative (SBTi). Crest Nicholson is committed to reaching net zero greenhouse gas emissions across the value chain by 2045 and committed to reduce waste and assessing carbon emissions associated with the delivery of development. Crest Nicholson has also received recognition for its commitment to positive placemaking and tackling climate change through a number of initiatives and awards:

- Maintained its place on the FTSE4Good Index (2022)
- Awarded a B Score in the CDP (formerly the Carbon Disclosure Project) in 2022
- Named as one of the Financial Times' European Climate Leaders in 2022
- A proud Signatory of the Business Ambition to limit global temperature rise to 1.5°C
- First UK housebuilder to have its science-based net-zero target approved by the Science Based Targets initiative in 2023

The National, Regional and Local Policy Context

National Evidence Base

The UK planning system, via the allocation of enough employment land in the right locations, is critical to facilitating the sector's growth.

The National Planning Policy Framework (NPPF) requires local planning policies to identify sites and/or establish criteria to enable anticipated employment needs to be met [Paragraph 82]. In 2019, a revision to the NPPF introduced a specific requirement for planning policies and decisions to reflect the specific locational requirements of different employment sectors including logistics. This requirement remains within the 2021 NPPF which "set out a clear economic vision and strategy which positively and proactively encourages sustainable economic growth, having regard to Local Industrial Strategies and other local policies for economic development and regeneration". The same text is carried over into the draft consultation NPPF published December 2022 at Paragraph 84. This provides a clear and positive policy context for the preparation of local plans.

Paragraph 83 goes on to explain that policies and decisions should recognise and address the specific locational requirements of particular sectors, more specifically: "Planning policies and decisions should recognise and address the specific locational requirements of different sectors. This includes making provision for clusters or networks of knowledge and data-driven, creative or high technology industries; and for storage and distribution operations at a variety of scales and in suitably accessible locations."

The specific mention of storage and distribution operations is long overdue and provides recognition of the recent growth in this sector, which underpins its strategic importance as a consideration within the plan making process. Indeed, to be one of only three sectors explicitly mentioned in the 'Building a Strong, Competitive Economy' chapter is testament to the role that logistics could play in the future economy.

The National Planning Policy Guidance (NPPG) at Paragraphs 025 [Ref ID: 2a-025-20190220], sets out that strategic policy-making authorities will need to prepare a robust evidence base to understand existing business needs, which will need to be kept under review to reflect local circumstances and market conditions.

The NPPG notes various methods as to how strategic policy making authorities can prepare and maintain evidence about business needs. Firstly, it is noted that "in gathering evidence to plan for business use, strategic policy making authorities will need to liaise closely with the business community, taking account of the Local

Industrial Strategy, to understand their current and potential future requirement" [Paragraph: 026 Reference ID: 2a-026-20190220]. During this process the NPPG sets out that authorities must consider the following:

- "the best fit functional economic market area;
- the existing stock of land for employment uses within the area;
- the recent pattern of employment land supply and loss;
- evidence of market demand – sourced from local data and market intelligence;
- wider market signals relating to economic growth, diversification and innovations; and
- any evidence of market failure" [Paragraph: 026 Reference ID: 2a-026-20190220].

Paragraph 27 of the NPPG indicates four possible methods to estimate future needs:

- 1) "Sectoral and employment forecasts and projections which take account of likely changes in skills needed (labour demand)
- 2) Demographically derived assessments of current and future local labour supply (labour supply)
- 3) Analysis based on the past take-up of employment land and property and/or future property market requirements (past take-up)

4) Consultation with relevant organisations, studies of business trends, and understanding of innovative and changing business models, particularly those which make use of online platforms to respond to consumer demand and monitoring of business, economic and employment statistics” [Paragraph: 027 Reference ID: 2a-027-20190220].NPPG, Paragraph: 031 Reference ID: 2a-031-20190722 sets out the following:

“The logistics industry plays a critical role in enabling an efficient, sustainable and effective supply of goods for consumers and businesses, as well as contributing to local employment opportunities, and has distinct locational requirements that need to be considered in formulating planning policies (separately from those relating to general industrial land).

Strategic facilities serving national or regional markets are likely to require significant amounts of land, good access to strategic transport networks, sufficient power capacity and access to appropriately skilled local labour. Where a need for such facilities may exist, strategic policy-making authorities should collaborate with other authorities, infrastructure providers and other interests to identify the scale of need across the relevant market areas. This can be informed by:

- Engagement with logistics developers and occupiers to understand the changing nature of requirements in terms of the type, size and location of facilities, including the impact of new and emerging technologies;
- Analysis of market signals, including trends in take up and the availability of logistics land and floorspace across the relevant market geographies;
- Analysis of economic forecasts to identify potential changes in demand and anticipated growth in sectors likely to occupy logistics facilities, or which require support from the sector; and
- Engagement with Local Enterprise Partnerships and review of their plans and strategies, including economic priorities within Local Industrial Strategies.
- Strategic policy-making authorities will then need to consider the most appropriate locations for meeting these identified needs (whether through the expansion of existing sites or development of new ones).”

Economic need is not as prominent as housing need in the guidance, the latter being subject to a standard methodology with a series of unambiguous steps set out to establish the minimum annual housing need for each local authority area. There is specific reference to logistics and the preamble in the Guidance on this reiterates the “critical role” that logistics plays in “... enabling an efficient, sustainable and effective supply of goods for consumers and businesses, as well as contributing to local employment opportunities ...”, however the Guidance then fails to translate this sentiment into a clear and robust approach which ensures logistics needs are met.

Regional Evidence Base

The Berkshire FEMA – 2016

Nathanial Lichfield and Partners produced a study titled the Berkshire Functional Economic Market Area (‘FEMA’) in February 2016, on behalf of the Thames Valley Berkshire Local Enterprise Partnership (‘TVBLEP’) and the six Berkshire authorities of Bracknell Forest, Reading, Slough, West Berkshire, Windsor and Maidenhead and Wokingham to investigate economic relationships, linkages and flows which characterise the sub-regional economy. The Berkshire FEMA, is comprised of three core FEMAS that represent a ‘best fit’ within local authority boundaries, the ‘Central Berkshire FEMA’, ‘Western Berkshire FEMA’ and ‘Eastern Berkshire FEMA’.

A further report was commissioned to consider the objectively assessed economic development needs of the Western Berkshire FEMA – The Economic Development Needs Assessment (EDNA) (2016).

It is noted that the site falls within the Central Berkshire FEMA and the draft Regulation 19 Plan to the area within the Western Berkshire FEMA, however as set out on page 12 “it should be recognised that the boundaries of these areas are porous given the different layers of inter-relationship that exist between each area as well as across the TVBLEP area overall. It is important to continue to recognise these relationships in Duty to Cooperate terms”.

The purpose of the EDNA studies was to identify the objectively assessed economic development needs for the authorities within each FEMA over the 2013-36 period. Land and floorspace requirements were quantified, as well as a qualitative assessment of future change for individual employment sectors and uses. It is noted that West Berkshire set out that the outputs of the EDNA (2016) study are not being relied upon for the LPU due to the more recent data provided in the Employment Land Review (‘ELR’) for West Berkshire (2022) despite it having a more robust baseline as it considers the wider FEMA sub-region.

The EDNA concludes that under the ‘labour supply’ method scenario in the Western Berkshire FEMA has a minimum industrial need of 154,650 sqm or 15.5 ha.

Local Evidence Base

Employment Land Review (ELR) West Berkshire – 2022

The ELR was undertaken in December 2022 by Stantec and Aspinall Verdi to assess the future employment land and floorspace requirements in West Berkshire, based on jobs forecasts and a specific scenario that relates to the calculation of Local Housing Need. The assessment aligns future jobs forecasts with population growth. The study considers net and gross demand, gross supply and the floorspace requirements across office and industrial uses needed to support economic growth in the borough over the plan period. ‘Office’ refers to B1(a) and B1(b), and ‘Industrial’ refers to both warehousing and industrial (B1(c), B2 and B8) uses because in practice these activities are interchangeable and routinely require/occupy the same type of space.

The ELR sets out a gross demand (sqm GIA) of 154,976 between 2022 and 2039, a total supply (sqm GIA) of 63,867 is noted thus leaving a shortfall of 91.109 sqm GIA or 23 ha across the plan period (paragraph 5.13) when utilising the labour supply method. It is considered that this requirement better reflects market trends as set in Section 3, and as such should be planned for as the minimum requirement opposed to the 15.5 ha required in the Western Berkshire FEMA 2016 report.

Draft policy SP20 'Strategic Approach to Employment Land' sets out that through the local plan review the Council will seek to facilitate the growth and forecasted change of business development over the plan period by promoting the supply of industrial space across the District to meet the identified shortfall of 23 ha based on the labour supply method within the ELR as a minimum.

Industrial and Logistics Market

Savills research indicates that the I&L sector continues to break records as investment volumes top £4.7 billion in 2020. **The sector now employs around 3.8 million people in England and represents 14% of the total economy in GVA terms, or £232 billion** (footnote: ONS (2021), Workforce Jobs by Regions and Industry – Jobs in Manufacturing, Transportation and Storage for March 2020; ONS (2021) – England, Regional Gross Value Added (Balanced by Industry – GVA for Manufacturing, Transportation and Storage in 2019 – England). Arguably the most important characteristic of the sector is its above average productivity growth estimated to be 29% between 2025-2039 compared to 18% for all other sectors.

The I&L sector is facing an era of unprecedented change. The past decade has seen the sector undergo a remarkable transformation, reshaping operating models and occupier requirements in ways that are only starting to become recognisable as an industry-wide phenomenon. Logistics uses in particular have shown strong performance for a number of years, but the Covid-19 pandemic has exacerbated existing trends with primary growth drivers including online shopping, UK freight volume and increased near-shoring and onshoring.

Combined, these growth drivers are resulting in unpreceded demand for I&L premises. Over the course of 2021 Savills Big Shed Briefing (footnote: Savills Research (2022) Big Shed Briefing (January 2022) Available at: https://www.savills.co.uk/research_articles/229130/323880-0 - the Big Shed Briefing focuses on I&L premises above 100,000 sqft) found that gross take-up had reached a new annual record of 55.11 million sq ft – 86% above the annual average. This trend of increased update has continued, with the Savills Shed Briefing (footnote Savills Research (2022) Big Shed Briefing (July 2022) Available at: https://www.savills.co.uk/research_articles/229130/330469-0 - Spotlight: Big Shed Briefing) mid-year 2022 report noting a new H1 record of 28.6 sq ft surpassing last year's total of 24.5 sq ft and exceeding the H1 annual average by 90%. The number of transactions nationally was 220, surpassing the previous record of 172 in 2020 (footnote: bid).

A detailed analysis of the I&L market is provided at Section 3 of CNs appended representation to the Regulation 18 Wokingham Borough Council consultation.

The Opportunity

As set out in CN's representation to Wokingham's Regulation 18 Consultation in January 2022 consultation, the site at Grazeley is considered optimal for delivering I&L need across the Berkshire FEMA.

A summary of the suitability of Grazeley is provided in the table below which sets out the criteria that Savills believes to be the most influential when determining the site suitability for I&L and the justification for these criteria. Subsequently, it assesses the Grazeley site against the criteria. Savills considers that the site performs well against all criteria and this is considered highly suitable for I&L.

It is noted that the existence of a DEPZ should not be a reason for assuming any development is inappropriate as the ONRs consultation processes ensures any proposed development would be judged on its own merits taking into account the details of the proposal and the effects the development would have on the on-site and off-site plans. Examples of I&L development in a DEPZ exist and include the recent outline planning permission at Blacks Lake Track Racing, Paices Hill, Aldermaston (Application No. 20/02527/OUTMAJ) for up to 15,917 sqm of flexible commercial floorspace for B8 (Storage or distribution).

Table 1 Important I&L Attributes <see appendix>

On review of the above, it is considered that Grazeley is exceptionally well placed to cater the sub-regional employment land needs because of its location on the strategic road network and public transport links to Reading and beyond.

The development of land at Grazeley will be established on a robust and strong vision, with a commitment from Crest Nicholson as a development partner, to create a high-quality, distinctive and sustainable new development with a lasting legacy. The vision for development will focus on key design principles:

- A robust, clear, and logical movement framework, based on walkable neighbourhoods, that provides direct and easy to understand routes to facilities and services is a key ingredient of a successful and sustainable place.
- Providing opportunities for healthy living, personal well-being, investing into a positive collaboration process and delivering a balance of uses to create a long-term sustainable place will be fundamental to the legacy of Grazeley.
- Understanding the site and its surroundings to create a response design will create a place embedded in its locality and place.
- Quality design is fundamental and will be delivered through excellent public spaces, a clear hierarchy of attractive and harmonious streets that are at a human scale and respect the local character.

Crest Nicholson is committed to placemaking and creating attractive communities. As such, Crest Nicholson believe that land at Grazeley should be considered positively for development.

Summary

This letter responds to the West Berkshire Local Plan Review Proposed Submission (Regulation 19) Consultation and sets out the availability of the land at Grazeley, Wokingham on behalf of CN for I&L development which could contribute towards the wider FEMAS need including that in West Berkshire.

The letter provides a brief background of the national policy legislation position and then the regional and local evidence base. The Western Berkshire FEMA (2016) indicates an industrial land need of 15.5, ha whereas the

	<p>Western Berkshire ELNA (2022) indicates a need of 23 ha across the plan period. It is the later of these figures that makes up the minimum demand figure set out in draft Policy SP20 of the Regulation 19 Plan. As set out previously CN support the use of this figure as a minimum as it is considered to be more robust due to it being based on up to date statistics reflecting the recent market trends.</p> <p>The trends of I&L are them summarised, demonstrating the probability of the sector and the positive future trends due to factors such as online shopping, Covid-19 and BREXIT. This is evidenced by the following ONS finding: the sector now employs around 3.8 million people in England and represents 14% of the total economy in GVA terms, or £232 billion [ONS Annual Accounts].</p> <p>The opportunity is then presented which explains why CN considers that the land at Grazeley the ideal location to not only help Wokingham but the wider Berkshire FEMA to meet their industrial land requirements. Due to the fact that the site poses the attributes we consider are required to produce a successful I&L site (e.g., motorway access) set out in Table 1.</p> <p>Further information regarding the proposed I&L development at Grazeley can be found within Appendix 1 'Response to Wokingham's Regulation 18 Consultation January 2022' <See attached></p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	No
<p>Please give reasons for your answer</p>	As above, it is considered that the Local Plan should address regional industrial and logistics needs. Justification for this is set out in our appended representation letter titled 'Grazeley I&L West Berkshire Reps Letter'.
<p>4. Proposed Changes</p>	It is considered that policy SP20 should be amended to reflect FEMA and regional need and dictate that need can be achieved through sites outside the West Berkshire Council authority area. Please refer to provided representation letter titled 'Grazeley I&L West Berkshire Reps Letter' for further justification.
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	Although no new Industrial land is proposed for the Parish of Aldermaston, (Policy SP-21) we are concerned that growth in our existing numerous industrial estates could lead to additional traffic on the already busy A340, which plays a key role in the evacuation route following an incident at AWE (A). APC will therefore continue its policy of Objecting to all developments that could increase HGV traffic on the A340 until our Conservation Area is bypassed. To that end, we are pleased to note that WBC has Refused planning application 22/02730/FULMAJ (expansion at Youngs Industrial Estate), stating in their Decision that "the proposal would represent an intensification of the commercial use of a site in a rural area" and that "There is insufficient information to demonstrate that the proposed development would not result in an increase in population within DEPZ. With no individual Emergency plan in place the proposal would have an adverse impact on the AWE Off-Site Emergency Plan due to distance meaning that evacuation after a period of shelter would be necessary, and in terms of recovery implications in the longer term."

3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No

<p>Please give reasons for your answer</p>	<p>With regard to your local plan consultation and further to your email request letter of 13 January 2023, which we note was also similarly sent to a number of other neighbouring local planning authorities within the counties of: Berkshire, Buckinghamshire, Hampshire, Oxfordshire and Wiltshire, this letter provides our formal response. We welcome opportunities to engage and collaborate with West Berkshire Council (WBC) on strategic planning matters, policies and cross boundary issues as relevant. We note that West Berkshire has a number of planning constraints which restricts potential site allocation options, particularly that 74% of the district is AONB.</p> <p>Our adopted Test Valley Borough Local Plan covers the period 2011 to 2029, and we are currently in the process of preparing a new Local Plan that covers the period 2020 to 2040. We undertook public consultation on our Regulation 18 (Stage 1) Draft Local Plan 2040 for Test Valley Borough earlier this year. TVBC will share information with WBC in due course on matters such as the proposed locations for housing and economic development, as we prepare our Regulation 18 (Stage 2) Plan for consultation timetabled for Quarter 3 of 2023, as relevant.</p> <p>As part of our evidence base we have the Economic, Employment and Commercial Needs (including Logistics) Study 2021, (Stantec), which was commissioned on a sub-regional basis by the Partnership for South Hampshire (PfSH) and extended to provide Borough-wide coverage of Test Valley. As this used a predominantly past trends based methodology to forecast future needs, an additional Test Valley Employment Needs Further Analysis Study 2022 (DLP) was also commissioned by the Council which is currently being finalised. The initial findings are that the economic relationship with West Berkshire is relatively weak and we are not in the same FEMA. A Test Valley Economic Assessment Study 2023 is also currently underway.</p> <p>We have considered your request regarding employment land needs, taking account of your current draft West Berkshire Local Plan Review 2022-2039 Proposed Submission (Regulation 19) Consultation and its associated evidence base and topic papers etc., as relevant. This has included specifically the content of: <i>Berkshire Functional Economic Market Study 2016</i> and the <i>West Berkshire Employment Land Review 2020</i> and <i>Addendum 2022</i>.</p> <p><i>Berkshire Functional Economic Market Study 2016</i></p> <p>This concludes that that Western Berkshire FEMA comprises West Berkshire district with the key centre of Newbury. This area is characterised by having a relatively self-contained Travel to Work Area (TTWA) and tends to operate within a westward facing commercial property market constituting a key node at the western end of the M4 corridor. Whilst there is some synergy in travel to work and property market</p>

terms between Newbury and Reading, these linkages are not considered sufficiently strong to include West Berkshire within a Central Berkshire FEMA.

The Newbury TTWA comprises the majority of West Berkshire, as well as parts of Wiltshire, Basingstoke and Deane and Test Valley. For Test Valley this is the northern most part of the Borough around Linkenholt, Vernhams Dean and Facombe which is very rural and within the AONB.

There is therefore not a strong commercial property market linkage with Test Valley and the Housing Market Area also suggests very limited overlap with Berkshire.

West Berkshire Employment Land Review 2020 and Addendum 2022.

Based upon the latest figures in the 2022 Addendum we note that there is deficit of 50,816sqm offices and 32,409sqm (9.4ha) industrial. It is not clear however whether these relate to Newbury or the edge of Reading.

The conclusions of the Addendum and considered relevant:

For offices, the overall balance is not a concern in the short term. In the medium to longer term, the gap should be filled by seeking to maximise the potential for new office provision through redevelopment schemes, of existing retail and offices uses within Newbury town centre. It could also be met through mixed use allocations to include an element of housing and employment. The floorspace requirement should be seen in the context of the whole plan period to 2039 and it be demonstrated how it could be accommodated with reasonable prospects of delivery.

For industrial, there is a pressing need to frontload the plan with a readily available pipeline of space. Therefore as much as possible of this overall need should be allocated on easily deliverable sites. There are a number of potential sites in the HELAA, but the majority of these are subject to constraints and policy considerations and none of these are in Newbury, which is an imbalance that should be addressed. If all other options fail to meet demand consideration should be given to providing new industrial floorspace as part of potential large housing allocations, albeit this would only deliver smaller and lighter units, but these are in demand, and viable in the East (Reading market area), although less so elsewhere.

Significantly, it does not recommend seeking to meet any shortfall outside of West Berkshire.

In conclusion, we are unable to assist in meeting your shortfall in employment land and floorspace. However, crucially taking account of the findings and recommendations of your evidence base we consider that in any event, for us to do so would not be an appropriate response or suitable solution in planning terms to meet your unmet employment land needs, given that we are within a different FEMA and there is a low level of economic interaction between West Berkshire and Test Valley, in both commuting/labour market terms and in the operation of the commercial land and property market. Any additional provision in Test Valley would not therefore be an appropriate alternative for your own local arising need which would otherwise have been accommodated within West Berkshire itself.

I confirm that the content of this response has been discussed with, and agreed by our Planning Portfolio Holder, Councillor Phil Bundy.

Notwithstanding this response on the specific issue of your shortfall in meeting employment land needs, we look forward to continuing our engagement on our emerging local plans. This letter should also be considered as our formal response to the West Berkshire Local Plan Review 2022-2039 Proposed Submission (Regulation 19) Consultation. We have no further comments.

<p>the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>Policy SP20 (Strategic Approach to Employment Land) Draft Policy SP20 states that through the LPR the Council will seek to facilitate the growth and forecasted change of business development over the plan period, to meet the identified shortfall (of office and industrial space).</p> <p>Supporting Paragraph 7.9 recognises that whilst the employment allocations go some way towards meeting the identified industrial requirement, there remains a shortfall. It states:</p> <p><i>“The District is heavily constrained and this has resulted in a lack of suitable available sites. Given the identified shortfall in supply the Council will commit to seek to address this matter again at the first five year review of the Local Plan”.</i></p> <p>Supporting Paragraph 7.10 states:</p> <p><i>“The ELR is clear that the industrial requirement of 91,109sqm is a minimum and therefore the regeneration of the London Road Industrial Estate (LRIE) will provide flexibility to the figures in the later part of the plan period.”.</i></p> <p>Therefore, WBC suggest that the LRIE has potential to deliver flexibility to the employment figures over the plan period.</p> <p>The ELR states that the industrial land requirement that has been identified is a minimum and given the need to address a current market shortage for industrial space there is a more pressing need to frontload the plan with a readily available pipeline of space. So, it suggests that as much as possible of this 23ha minimum should be allocated on easily deliverable sites.</p> <p>The LPR does not accord with this as it fails to:</p> <ol style="list-style-type: none"> 1 Allocate sufficient floorspace to meet the identified need in the ELR. 2 Frontload the plan with a readily available pipeline of space. <p>Paragraph 35 of the NPPF states that plans are ‘sound’ if they are positively prepared. This is defined as providing a strategy which, as a minimum, seeks to meet the area’s ‘objectively assessed needs’. Thus, the LPR cannot be found to be sound and there is a requirement to allocate additional sites through the LPR to ensure that the LPR can be adopted.</p> <p><i>Other Comments</i></p> <p>In terms of the location of business development, we support the Council’s approach to extend the DEA allocation, at Membury Estate, and Draft Policy SP20s approach to support business development in these locations.</p> <p>The policy states that an Employment and Skills Plan will be encouraged as part of major business development proposals. Further detail on what is required to address this should be set out.</p>

<p>Please give reasons for your answer</p>	<p>The supporting text to this policy notes that the plan will not be able to meet the identified employment needs in full, particularly for offices. Whilst West Berkshire is a separate Functional Economic Market Area from Reading, there would nonetheless be cross-boundary implications should a lack of provision in West Berkshire lead to pressures on adjoining areas such as Reading. However, RBC recognises that WBDC had made substantial efforts to try to identify sites for employment provision including repeated call for sites exercises and sufficient appropriate sites have not been forthcoming. RBC also recognises that the Covid-19 pandemic has likely had significant implications for working patterns and the demand for employment floorspace, particularly for offices, which will not have been reflected in the identified need. RBC is therefore satisfied with the approach proposed, which involves a supportive criteria-based policy together with a commitment to address this issue in the first five-year review of the Local Plan.</p>

4. Proposed Changes	<p>Propose adding additional wording to the supporting text to clarify the Council's aspirations for the LRIE. Additional wording highlighted in bold below. The evidence for this is contained within the Addendum (attached to this response) to the Avison Young Development Brief published in September 2022 available at https://info.westberks.gov.uk/lrie</p> <p>Later in these comments, under SP21, it is proposed to extend the London Road Industrial Estate Designated Employment Area to include the Football Ground – hence the inclusion of 'it currently' in the text of paragraph 7.10 below.</p> <p>7.10 The ELR is clear that the industrial requirement of 91,109sqm is a minimum and therefore the regeneration of the London Road Industrial Estate (LRIE) will provide flexibility to the figures in the later part of the plan period. The redevelopment and regeneration of the LRIE is a long held vision of the Council and a recent decision by the Council's Executive (June 2022) agreed a new approach for the site which focuses on job creation, attracting investment to Newbury and achieving carbon neutrality –including the creation of 7,000 sqm of employment floorspace. The site has scope, subject to overcoming other policy constraints, for regeneration and the intensification of employment uses to maximise the potential of the site, which at present is not optimum and does not provide an attractive environment for modern day use. The majority of the LRIE site falls within the London Road Industrial Estates DEA, an area designated for business uses. It is important to note that the DEA includes the majority of the Council owned LRIE and the adjoining Riverpark Industrial Estate, but it currently excludes the football ground. A key aspiration of the regeneration is to increase the type and level of employment opportunities on the site through intensification and more efficient use of brownfield land. The Council are currently preparing a comprehensive strategy for the delivery of regeneration on the LRIE site.</p>

Please give reasons for your answer	*LATE RESPONSE* Employment need We note that the West Berkshire Local Plan Review Proposed Submission consultation proposes that the Plan is unable to make provision to meet the identified office requirements over the plan period to 2039. We note that the Council has positively sought opportunities to meet the office requirement for the District by undertaking numerous Calls for Sites and pursued opportunities through the Duty to Cooperate. Further we note that West Berkshire is unable to meet its industrial land requirement due to being constrained and lack of suitable sites.

	<p>West Berkshire is not proposing to meet its identified employment needs in full at this time. We support the commitment in the Plan for West Berkshire District Council to review the provision of employment land again at the first five year review of the plan.</p> <p>Slough Borough Council is not in the same employment market area as West Berkshire. Slough is unable to meet its employment needs in full and therefore is unable to assist with West Berkshire's unmet employment needs. Any unmet employment needs from West Berkshire will potentially increase the unmet needs that will need to be accommodated and could exacerbate development pressures across the sub-region.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes	

* No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	The policy defines rules for loss of business development with reference to town/district centres or the countryside . It doesn't distinguish rural service centres like Stratfield Mortimer which are neither of these. It would appear that, as we are outside a DEA, every conversion of a shop or farm building into a house will require significant marketing evidence and we are not sure that this was intended
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes

Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.

- * Yes
- * No

Please give reasons for your answer

[See attachment 'Barton Willmore (Copas Farms) Full Rep' for full Local Plan Review representation]

We would like to express that our client is broadly supportive of the Plan, including its Vision and Objectives which clearly express a recognition of the value that sustainable business growth and the local economy has for the wider environment, culture, and social well-being of West Berkshire. That being said, our client has concerns as to whether the Plan provides a 'sound' strategy to deliver sustainable development regarding meeting its employment needs.

On this basis, we have prepared a representation form covering emerging policies SP20 and SP21 - Strategic Approach to Employment Land and Sites Allocated for Employment Land. In addition, we have prepared a representation form on emerging policy DM4 - Building Sustainable Homes and Businesses.

National and Local Policy Context

At a national policy level, the NPPF sets out in Chapter 6 (paragraph 81) that planning policies "should help to create the conditions in which businesses can invest, expand and adapt. Furthermore, it states in the same paragraph that "significant weight should be placed on the need to support economic growth and productivity, taking into account both local business needs and wider opportunities for development". In paragraph 82 b, the NPPF highlights that planning policies should "set criteria, or identify, strategic sites, for local and inward investment to match the strategy and to meet anticipated needs over the plan period".

Objective 4 of the Local Plan's Strategic Objectives, of which represent the key delivery outcomes that the Local Plan Review should achieve, states "Economy: To facilitate and support a strong, diverse and sustainable economic base across the District, including provision of employment land which provides for a range of local job opportunities". The supporting text to Policy SP20 at paragraph 7.2 further emphasises the priorities for West Berkshire with regards to the economy as set out within the Council Strategy (2019-2023) and the Council's Economic Development Strategy (2021). The Vision of the Economic Development Strategy seeks for the District to move rapidly towards a productive and resilient economy founded on the principles of "inclusive, clean growth and where everyone is given the opportunity to thrive". In this regard, our client supports West Berkshire's commitment for supporting the local economy in the District.

Identified Need and Shortfall

That being said, it is made explicitly clear within the Local Plan Review document itself, at paragraph 7.9 and the supporting evidence base that there is a shortfall in supply for both office and industrial uses. The Employment Land Review Addendum ('ELRA') (December 2022) sets out a need for 50,816sqm for office space and a minimum of 91,109sqm or 23ha of land for industrial needs. As set out in Tables 3 and 4 of the Employment Background Paper (January 2023), the Local Plan Review currently only proposes to allocate 58,400 sqm of industrial land (excluding LAM6 which already has planning permission) and 0 sqm of office land. This results in a shortfall in 32,709 sqm of industrial land and 50,816 sqm of office land as stated in paragraphs 56 and 57 of the Employment Background Paper.

With regard to office needs first, whilst paragraphs 7.9-7.12 of the ELRA conclude that the overall need is not a concern in the short-term "given that net change has been negative, gross office gains have been very modest, and developers are not promoting many sites for office use", there still remains an identified need. It is clear in paragraph 4.43 of the ELRA that the office market across West Berkshire has remained relatively robust despite the global pandemic. Moreover, in paragraph 7.11, it highlights that economic forecasts suggest that the office sector will return to growth. Currently, as stated in the Employment Background Paper (January 2023) at paragraph 33, below optimum availability/vacancy rates are resulting in a market that is not fully effective. Therefore, given the identified need and reported demand for smaller, flexible offices, referenced at paragraph 7.11 of the ELRA, any opportunities to provide this supply should be taken up now.

Turning to industrial needs, the evidence base asserts that there has been a consistently strong provision of industrial floorspace alongside strong growth in industrial jobs. As a result of the findings, the ELRA recommends that the Plan takes forward the higher past trends need figure to ensure conformity with the need to plan positively.

In addition to the strong trends in industrial floorspace provision and jobs growth, the Local Plan Review and evidence base highlight the challenges West Berkshire's faces in respect of available stock. The ELRA states in paragraph 4.54 that agent consultation indicated that "due to lack of available stock across West Berkshire most occupiers, regardless of size and sector, find it difficult to satisfy their requirements". This is further compounded at paragraph 31 of the Employment Background Paper which highlights that "industrial demand has increased since the previous assessment, while supply has continued to fall, placing further pressure on existing stock". The Employment Background Paper goes on then to highlight that there remains an acute shortage of good quality space, despite new development at Beenham and Greenham Business Parks. The ELRA expands upon this point, at paragraph 4.91, highlighting that there is particularly a shortage in supply of smaller units.

Accordingly, it is clear that there is a pressing need, in particular for industrial floorspace, in West Berkshire.

Five Year Review and Flexibility

It appears that the Council are seeking to take an approach that instead of identifying sufficient sites now, additional sites could be identified at a five-year review as referenced in paragraphs 7.7 and 7.9 of the Local Plan Review document. Related to this, paragraph 7.10 in the supporting text to emerging

	<p>policy SP20 appears to suggest that the regeneration of the London Road Industrial Estate ('LRIE') will provide flexibility to the figures in the later part of the plan period. However, in the same paragraph the Council state that due to timing of their strategy for comprehensive regeneration, the Site is not identified as a site allocation.</p> <p>Our client does not agree with the approach proposed to seek to address the supply matter at the first five-year review for three principal reasons.</p> <p>Firstly, there is a clear, and accepted, need for employment land, particularly industrial, in West Berkshire. Secondly, available sites, including Land adjacent to Beenham Industrial Estate, are promoted by a willing landowner and provide suitable options to assist in meeting this employment need now. Thirdly, due to the nature of the constraints in West Berkshire, it is unlikely that a significant amount of 'new' land will become available when the Council undertake their five-year review.</p> <p>Our client also considers that as the LRIE site is not allocated within the Plan, it cannot be considered to assist towards the employment needs within the District and reference should be removed.</p> <p>Soundness of Emerging Policies SP20 and SP21</p> <p>Considering the above, we therefore have concerns with the soundness of emerging policies SP20 and SP21 as set out below.</p> <p><u>Positively Prepared:</u> Emerging policies SP20 and SP21 have not been positively prepared as they do not seek to meet the identified employment needs, as set out within the ELRA, and therefore do not support achieving sustainable development in West Berkshire.</p> <p><u>Justified:</u> The strategy in emerging policies SP20 and SP21 does not take an appropriate strategy as it is not seeking to identify sufficient sites to meet the identified need. The reasons for doing so are not justified when considering the identified need and available sites that can contribute to this need, including our client's site.</p> <p><u>Effective:</u> Emerging policies SP20 and SP21 will not deliver enough development to meet the identified need over the plan-period. Moreover, references to additional sites (i.e. LRIE) that are not allocated should not be included as they cannot contribute to meeting need.</p> <p><u>Consistent with National Policy:</u> Emerging policies SP20 and SP21 are not consistent with seeking to meet the identified need and delivering the economic objective of achieving sustainable development.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	Yes
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Our client also considers that the supporting text in paragraph 7.10 of the Local Plan Review document regarding the London Road Industrial Estate should be deleted as the site cannot be relied upon in meeting employment needs within the District.</p> <p>7.10 The ELR is clear that the industrial requirement of 91,109sqm is a minimum and therefore the regeneration of the London Road Industrial Estate (LRIE) will provide flexibility to the figures in the later part of the plan period. The redevelopment and regeneration of the LRIE is a long held vision of the Council and a recent decision by the Council's Executive (June 2022) agreed a new approach for the site which focuses on job creation, attracting investment to Newbury and achieving carbon neutrality. The site has scope, subject to overcoming other policy constraints, for regeneration and the intensification of employment uses to maximise the potential of the site, which at present is not optimum and does not provide an attractive environment for modern day use. The majority of the LRIE site falls within the London Road Industrial Estates DEA, an area designated for business uses. It is important to note that the DEA includes the majority of the Council owned LRIE and the adjoining Riverpark Industrial Estate, but excludes the football ground. A key aspiration of the regeneration is to increase the type and level of employment opportunities on the site through intensification and more efficient use of brownfield land. The Council are currently preparing a comprehensive strategy for the delivery of regeneration on the LRIE site. Due to the timing of this strategy and the site's location within the settlement boundary of Newbury, the site has not been identified as a site allocation, however it does need to be recognised as an area of regeneration for its potential to deliver flexibility to the employment figures over the plan period.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	Yes

<p>* No</p> <p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>NCFG have concerns regarding the justification and consistency with national policy of Policy SP20, in particular the approach to the London Road Industrial Estate set out in Paragraph 7.10.</p> <p>These representations are set out in full within the enclosed report, titled "Representations in respect of West Berkshire Local Plan Review (Reg 19) Proposed Submission" prepared by DPDS Consulting Group.</p> <p>These written representations are in respect of various policies and passages of supporting text. This document summarises the reasoning for considering the proposed Local Plan to be unsound in its preparation, and a suite of modifications proposed in order to bring the Plan in line with national policy and the required tests of soundness.</p> <p>The locations of interest to these representations are the London Road Industrial Estate (LRIE) and in particular the Newbury Football Ground at Faraday Road, which are briefly discussed in Paragraph 7.10 under policy SP20 Strategic Approach to Employment Land in the Draft Local Plan. LRIE is a proposed Designated Employment Area (DEA) in the Local Plan, although it is important to note that the football ground at Faraday Road is NOT (nor never has been) a part of the DEA, nor should it be considered as a part of the LRIE itself.</p> <p>The Faraday Road football ground was relisted as an Asset of Community Value in September of 2021. This designation runs until 21/09/2026. Furthermore, there are several approved planning applications for the football ground pertaining to resumption of use of the site for community sport purposes. These include:</p> <ul style="list-style-type: none"> • 20/01966/COMIND – Renewal and expansion of the existing football pitch to form a new 3G main pitch and a smaller 3G training/practice pitch. • 20/01530/OUT – Outline permission for replacement of clubhouse and new spectator stand at Newbury Football Ground. Matters to be considered: Access and Layout • 21/07575/CERTE – Confirmation of lawful use of land as a football ground under class F2 of the Use Classes Order (Amendment 2020) • 22/02443/CERTP – Application for temporary metal container that consists of changing room and toilet facilities. <p>West Berkshire Council (WBC) have a long-standing ambition to achieve redevelopment and regeneration of the LRIE site, as evidenced by Paragraph 7.10 of Policy SP20 Strategic approach to employment land of the Local Plan. NCFG supports this overall ambition, however from WBC's perspective, it has specifically and irrationally excluded the option to redevelop the football ground as a revitalised sporting venue for the overall benefit of the community. Because of this accusations of bias and predetermination has been levelled against WBC, which is contrary to the Localism Act of 2011.</p> <p>Despite the Council's significant and long-term expenditure on consulting with respect to the LRIE, there has been no planning application submitted by the Council regarding the long-term future of the estate (including or excluding the football ground). Due to the large amounts of public funds involved, confusion arising from the Council's approach, the location of the site, and the controversy resulting from all of the above, the LRIE should have been covered in the proposed Local Plan but has largely been ignored.</p> <p><u>Soundness</u></p> <p>Paragraph 7.10 of the supporting text of Policy SP20 Strategic Approach to Employment Land states the following:-</p> <p>"7.10 The ELR is clear that the industrial requirement of 91,109sqm is a minimum and therefore the regeneration of the London Road Industrial Estate (LRIE) will provide flexibility to the figures in the later part of the plan period. The redevelopment and regeneration of the LRIE is a long held vision of the Council and a recent decision by the Council's Executive (June 2022) agreed a new approach for the site which focuses on job creation, attracting investment to Newbury and achieving carbon neutrality. The site has scope, subject to overcoming other policy constraints, for regeneration and the intensification of employment uses to maximise the potential of the site, which at present is not optimum and does not provide an attractive environment for modern day use. The majority of the LRIE site falls within the London Road Industrial Estates DEA, an area designated for business uses. It is important to note that the DEA includes the majority of the Council owned LRIE and the adjoining Riverpark Industrial Estate but excludes the football</p>

ground. A key aspiration of the regeneration is to increase the type and level of employment opportunities on the site through intensification and more efficient use of brownfield land. The Council are currently preparing a comprehensive strategy for the delivery of regeneration on the LRIE site. Due to the timing of this strategy and the site's location within the settlement boundary of Newbury, the site has not been identified as a site allocation, however it does need to be recognised as an area of regeneration for its potential to deliver flexibility to the employment figures over the plan period.”

The Council's current strategy for the regeneration of the LRIE is outlined within the London Road Industrial Estate Project Refresh report (Ref. EX4219), dated 9th June 2022. The Refresh report refocuses plans on intensifying employment use on the site, marking out the 'depot site' and the 'playing field' as two areas to be redeveloped (despite the fact that the playing field is not within the DEA boundary, as stated in paragraph 7.10 of policy SP20). It seeks to create an LRIE Supplementary Planning Document (SPD) for the redevelopment of the site, rather than for example a site specific Local Plan allocation. It also provides a timeline for delivery, estimating the adoption of the SPD by the end of 2024, with both the depot site and playing field site redeveloped for employment use by 2026.

This approach to the redevelopment of the LRIE is unsound and does not align with plan-making principles outlined in either the NPPF or the NPPG. Paragraph 35 of the NPPF outlines the key criteria that a plan needs to meet in order to be considered sound. Part d) of this paragraph states that plans should be consistent with national policy to be considered sound. The supporting text of Paragraph 7.10 in the Draft Local Plan does not provide sufficient clarity on the future of the LRIE site (or the football ground) despite the Refresh report containing a delivery strategy for the site with a timescale up to 2030. This is in conflict with NPPF Paragraph 16d) which states that plans should “contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”. The Local Plan clearly fails to meet this requirement.

In addition, Paragraph 35b) states that plans should be justified, being an appropriate strategy, which takes into account the reasonable alternatives, and based on proportionate evidence. The proposed local plan fails to justify why LRIE is only mentioned in supporting text when the Council has specific plans for the regeneration, contained within the Refresh report.

Our client would also like to raise that the redevelopment of a site the scale of LRIE, either through a proposal for the net area of the entire site or through a series of linked and phased proposals, would be subject to significant detailed EIA work. This is due to several important constraints at the site, including flood risk, traffic, biodiversity etc.

As a result, a comprehensive development-plan led policy framework would be required to set out criteria for sustainable development or redevelopment. An SPD approach would not be able to achieve this and therefore should not be considered as an alternative to a development-plan policy framework. A comprehensive development-plan led approach would in turn allow the proper assessments and procedures i.e. a SEA to be undertaken and policy criteria applied to ensure the sustainable development of the site in line with both the NPPF and the policies proposed within the Local Plan. It is worth noting that a development plan led approach does not appear to have been considered in the Refresh report.

SP20 Strategic Approach to Employment Land

NCFG objects to the approach to the LRIE given in paragraph 7.10 of the supporting text of Policy SP20, for the reasons outlined above. Paragraph 7.10 should be deleted and replaced with site specific policies for both LRIE and the Faraday Road football ground.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?
 * Yes
 * No

Yes

Please give reasons for your answer

4. Proposed Changes

The proposed changes are outlined in full within the report titled “Representations in respect of West Berkshire Local Plan Review (Reg 19) Proposed Submission” enclosed with this submission form. The proposed changes within this form also concern policies other than Policy SP20, but these have not been made the subject of additional representation forms as the changes are dependent on the content of the main representation on the policy.

In order to make the plan sound, our client proposes a suite of modifications to the Local Plan to facilitate an appropriate approach to the regeneration of LRIE which would contribute not only to achieving the Council's strategic objective of meeting employment land need, but also positive outcomes for both the LRIE and the Faraday Road football ground, and contribute to the fundamental principles of sustainable development in line with the NPPF.

London Road Site Specific Policy

Our client appreciates WBC's ambition to intensify employment uses, including maximising the use of existing sites, but wishes to ensure that any redevelopment or regeneration of LRIE is evidence based and recognises the particular constraints of the site, together with a review of the full range of alternative sites available within Designated Employment Areas in Newbury which may be more appropriate, such as the now vacant elements of the Vodafone Campus or the Turnpike Estate. As such, it is proposed that a site-specific policy be included addressing the regeneration of the LRIE site. This policy must consider the following key criteria for development at the site:

- **Flood Risk:** The majority of the site is within Flood Zone 3, meaning a high risk of flooding. Any proposals for use or change of use should be required to undertake a sequential test in accordance with Policy SP6 Flood Risk. Stormwater attenuation measures and already existing opportunities to mitigate against the effects of flooding on site or in the vicinity should be considered positively.

The failure to provide an appropriate policy specifically aimed at guiding sustainable redevelopment of LRIE means that the whole site is potentially open to piecemeal and sporadic development. The size of LRIE is such that in the context of a comprehensive or phased redevelopment it would undoubtedly constitute EIA development within the context of the EIA Regulations 2017 and therefore required a development plan i.e. site specific Local plan policy framework to set out the criteria that need to be addressed and met if sustainable redevelopment proposals are contemplated.

- **Climate Change:** Given the ongoing climate crisis, and especially the already measured and predicted effects of climate change in relation to weather & flooding, it is of paramount importance that any proposals for development or redevelopment in LRIE should satisfy the criteria of Policy SP5 Responding to Climate Change and any appropriate requirements that may be introduced by site specific Local Plan policy.
- **Biodiversity:** In line with the requirements of the Environment Act 2021, any development at LRIE should be required to demonstrate a 10% Biodiversity Net Gain, meeting the requirements of Policy SP11 Biodiversity and Geodiversity.
- **Traffic Generation:** As any intensification of employment use at the LRIE would result in increased amounts of traffic from the site, a set of criteria should be developed to ensure that the impacts of this are fully understood and mitigated against.
- Other site specific policy criteria should also be introduced to control the design, height, massing and land use mix of development or redevelopment proposals as may be appropriate.

The Policy should also include a reference to the Proposals Map or other inset map as may be appropriate which clearly shows the boundary of the LRIE site proposed for regeneration, excluding the Faraday Road football ground.

This would allow the Plan to clearly state their policy towards the regeneration of the LRIE and ensure that it is developed or redeveloped sustainably in accordance with both the NPPF and the policies outlined in the Proposed Local Plan via the application of site-specific development criteria.

We do not believe it is our client's responsibility to define the specific wording of this policy however we do believe that it is necessary and of paramount importance.

Faraday Road Football Ground Site Specific Policy

In the light of approved planning applications for the resumption of community football use at Faraday Road and the designation of the site as an ACV, the football ground is of very significant benefit to the local community. It has consistently been a strategic objective of West Berkshire Council to protect and enhance community infrastructure in Newbury, with the West Berkshire Core Strategy's Area Delivery Plan Policy 2: Newbury stating that "Existing community facilities will be protected and, where appropriate, enhanced", with this wording being carried forwards into Policy SP1 Spatial Strategy.

Furthermore, the site is partially within Flood Zone 3, and within the Impact Risk Zone of the River Kennet SSSI. On account of these significant constraints, the client also proposes that a specific policy be implemented concerning any proposals for use or change of use of the football ground at Faraday Road. The following is the suggested wording of such a policy:

"New Policy: Faraday Road Football Ground

The Faraday Road Football Ground provides significant value to Newbury as an element of green infrastructure and a community sports facility, along with opportunities to mitigate against flood risk. As such, any proposals for use or change of use at the Faraday Road football ground site must:

- 1 Acknowledging the site's importance as a key asset of open space, green infrastructure, and community value, and in line with the Council's stated strategic objectives and the objectives of Policies SP10 and DM39 to protect and/or enhance green infrastructure assets and community facilities, any proposals for development or redevelopment at the site must retain the use of the site for community sporting purposes, along with satisfying any other relevant criteria from these policies;
- 2 Undertake a site-specific Flood Risk Assessment and Sequential Test clearly demonstrating that compliance with the criteria included in Policy SP6 Flood Risk, and positively consider stormwater attenuation measures, providing equal or greater potential for flood mitigation measures than currently exist at the site;
- 3 Clearly demonstrate compliance with Policy SP11 Biodiversity and Geodiversity, having regard to any potential adverse impacts on the River Kennet SSSI;
- 4 Prepare a Transport Assessment to address any projected increase in traffic on account of the proposals and set out envisaged measures to mitigate against any impact arising as a result;
- 5 Respond positively to the challenge of climate change and be designed for climate resilience, including maximising the efficient use of sustainable technologies, resources, materials, and solar gain, in accordance with Policy SP5."

It is also suggested that the following passage be added to the pre-amble or supporting text of the policy, as part of the reasoned justification of it:

The Council recognises the Faraday Road Football Ground as a key recreational asset of considerable merit. Acknowledging this, the stadium will be retained for community sport use and NOT form part of any wider proposals for development at LRIE.

On behalf of our client, we would welcome the opportunity to discuss any changes to the proposed Local Plan with West Berkshire Council in advance of the Examination.

5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?
 * Yes
 * No

Yes

5. Independent Examination	We believe it is necessary as we are proposing significant modifications and the site which is the subject of our core representations is both important and controversial.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

2. Do you consider the Local Plan Review is sound? -	

<p>Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>Swindon Borough Council (SBC) has received a formal request under Duty to Co-operate (Section 110 of the Localism Act) to try and assist with meeting West Berkshire's unmet employment land and space requirements over the plan period. Swindon is one of a number of Local Planning Authorities which have been asked within a 60-minute 'drive time' of Newbury. This drive time area includes a very large geographical catchment and one of the reasons SBC have been asked under DtC to respond to the request.</p> <p>1.1 West Berkshire describe the shortfall as substantial and consists of: Office shortfall: 50,816sqm (requirement – allocations = shortfall) 50,816 – 0 = 50,816sqm) Industrial shortfall: 32,709sqm (requirement – allocations = shortfall) 91,109 – 58,400 =32,709sqm 23ha – 14.6ha = 8.4ha)</p> <p>1.2 The Councils of West Berkshire, Swindon Borough and Wiltshire have met on occasions prior to the drafting of the Regulation 19 consultation document and more recently during the Regulation 19 consultation period mainly on matters of evidence and employment need clarification.</p> <p>1.3 Swindon Town is located approximately 37 minutes from Newbury (28.5 miles) via the M4. SBC does not share an administrative boundary with West Berkshire although the wider Wiltshire area shares an eastern boundary (importantly AONB) with West Berkshire.</p> <p>Swindon Borough Council and Plan Making</p> <p>1.4 SBC is currently in the process of developing a new Local Plan to replace the adopted Swindon Borough Local Plan 2026. The Council updated its Local Development Scheme in December 2022 and is in the process of working towards a Regulation 18 Local Plan consultation in Autumn 2023. This work will build upon and update evidence work undertaken as part of an initial Local Plan review process, to include work upon a long-range economic growth vision / strategy, review of the Functional Economic Market Area (FEMA), town centre uses and technical work on employment land needs and supply. The development of this evidence it at an early stage.</p> <p>1.5 Swindon is recognised as a 'growth town' with strong economic ambitions but the Council needs to be clear on what its updated forecast needs are for its revised plan period and how these can be met effectively and sustainably within the Borough and importantly prior to accommodating the needs of other authorities, including West Berkshire. The final evidence base for the new Swindon Local Plan will underpin the framework for meeting local economic needs within the Borough and will also analyse strategic growth options and pressures. Fundamentally the Council is keen to maximise opportunities</p>

for people to live and work locally and sustainably with access to a diverse and high performing economic base.

West Berkshire Local Plan

1.6 The Council has reviewed the economic technical evidence with the plan including:

- *Berkshire Functional Economic Market Area Study: Lichfield Report – Feb 2016*
- *West Berkshire – Employment Land Review: Addendum: Stantec / Urba – December 2022)*
- Retail Background Paper (December 2022)

A brief review of the Newbury Town Centre Masterplan has also been undertaken.

1.7 Its is noted that while the West Berkshire Travel to Work area is relatively self-contained and based upon historic data there may be some strategic economic connections (flow of goods and labour) along the M4 corridor between larger urban conurbations. West Berkshire settlements such as Newbury are also spatially well related to Reading, Basingstoke and other South East orientated locations by road connections and proximity.

1.8 On the office market generally the evidence would indicate that the West Berkshire office market is driven by demand from smaller occupiers delivering potentially people servicing jobs in the future and this type of market can be very local or location specific. It is clear that Newbury as a major settlement has seen significant office losses driven by a number of factors including changes in permitted development rights. Although the shortfall in office provision in the short term is not considered significant due to current deflated market demand linked to recent macro-economic factors the medium / longer-term needs are potentially more significant.

1.9 It is however encouraging that the Council is taking positive steps with regard to plan policies and the Newbury Town Centre Masterplan to support regeneration and transformation. The town centre masterplan focuses specific attention on becoming a more entrepreneurial town delivering new office space and focuses particularly on delivering smaller, fit-for-purpose, flexible office space for small businesses, start-ups and those looking for occasional workspace closer to home. Meeting local office needs through a proactive policy, regeneration and investment framework is considered as proving West Berkshire with good opportunities to develop local jobs in a sustainable manner.

1.10 With regard to the overall industrial market SBC understands that some of the pressures around space demand are for more 'footloose' distribution and logistics businesses particularly within the context of firms being priced out of high value areas. It would be good to more fully understand the extent that distribution / logistic demands are specifically driven by close proximity to Reading and London markets rather than being attracted to site options further afield. Wider industrial demands will also be driven by local business needs.

1.11 SBC is supportive of West Berkshire's broad plan ambitions but the full application of strategy (including master-planning), flexible Local Plan policies and other tools may yield further positive outcomes to support local economic ambitions and reduce needs shortfalls.

1.12 On the basis of this note and the current early stage in the development of the new Swindon Local Plan with an updated evidence base, the Council is unable to assist West Berkshire Council with meeting its office and industrial shortfalls. The Council is of course happy to keep communications open under Duty to Cooperate.

4. Proposed Changes	
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	
5. Independent Examination

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable	

<p>development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	Yes
<p>Please give reasons for your answer</p>	<p>Wiltshire is located to the west of West Berkshire and shares its eastern boundary. The shared boundary is wholly within the North Wessex Downs Area of Outstanding Natural Beauty (AONB).</p> <p>As recognised in paragraph 5.14 of your 'Interim Duty to Cooperate Statement' we have been engaging with you, alongside Swindon Borough Council, about a shortfall in employment land. It is noted that your criteria for engagement is local authorities within a one hours drive of Newbury and as such you are engaging with many other local planning authorities to discuss this issue also.</p> <p>Wiltshire Council is at an advanced stage in preparing its Local Plan Review and we are moving towards our own Regulation 19 consultation later this year. In developing our plan, our focus is on ensuring that Wiltshire's needs can be met taking into consideration the constraints to development that we have in the county and the availability of land being promoted for employment use.</p> <p>Section 7 of the West Berkshire Local Plan Review relating to economic growth contains two policies - Policies SP20 'Strategic approach to employment land' and SP21 'Sites Allocated for Employment Land'. Paragraphs 7.6 and 7.9 identify shortfalls in sites to meet the local need for office and industrial land, and elsewhere evidence points to the loss of offices to other uses. In such circumstances, it will be critically important to ensure that your planning policies robustly support the retention, intensification, and regeneration of existing sites/areas, as well as encouraging and facilitating windfall sites that could come forward over the plan period. Such a strategy alongside the positive identification of employment allocations will help ensure that employment delivery can be maximised over the plan period; and that people can live and work locally.</p> <p>It is understood that your employment needs are of a local nature and as such it will be important for them to be provided locally, or in areas with settlements that are spatially well related to Newbury and other urban parts of the District. Such settlements are in the authorities in the South East, rather than to the west of the District in Wiltshire where the character of the area is largely AONB.</p> <p>For the above reasons, at this stage it is considered that Wiltshire Council is unable to assist West Berkshire Council in meeting its shortfall but will continue to engage with you as appropriate under the Duty to Cooperate.</p>

2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes

<p>Please give reasons for your answer</p>	<p>Wokingham Borough Council (WBC) notes that West Berkshire District Council's (WBDC) employment evidence identifies a need for 50,816sqm of office floorspace and a combined 91,109sqm industrial, storage and distribution floorspace over the plan period. Policy SP20 details the strategic approach to addressing economic development needs, Policy SP21 sets out a number of site allocations for industrial land, and Policy DM32 identifies Designated Employment Areas where businesses uses are to be safeguarded. No allocations are made in the Plan for additional office floorspace.</p> <p>The Plan supports the redevelopment and regeneration of existing employment sites. It therefore retains, and identifies new, employment sites which can be intensified to meet some of its identified needs. New allocations for industrial use are anticipated to provide 58,400sqm. However, this is insufficient to meet the full identified needs for industrial land, resulting in a shortfall of 32,709sqm industrial floorspace. There are no estimates provided of how much floorspace the wider policy approach might deliver, and no specific land is identified to provide for office use. As a result, the full identified office need of 50,816sqm remains unmet. WBDC has approached WBC and other duty to co-operate partners to seek assistance in meeting these needs.</p> <p>Like WBDC, WBC has commissioned a new Employment Land Needs Review, to better understand future economic needs, for both office and industrial/warehousing. The key emerging finding of the report is an increased need for industrial/warehousing floorspace across Wokingham Borough, which reflects changes in both the local and sub-regional economy. The report suggests there is no need for additional office floorspace.</p> <p>Work is ongoing to assess the availability, suitability and deliverability of land promoted for economic uses within Wokingham Borough, as part of the Housing and Economic Land Availability Assessment (HELAA), which will help to inform whether these economic needs can be met. However, given the scale of the need for new industrial/warehousing floorspace arising in Wokingham Borough and the small number of sites promoted for economic uses, at this stage WBC confirms that it is considered highly unlikely any of the unmet office or industrial needs from WBDC will be able to be accommodated. Indeed, WBC cannot guarantee meeting the need arising from Wokingham Borough.</p> <p>WBC recognise and support WBDC's ongoing recognition of the arising employment needs and the attempts to reach agreement with other authorities. WBC requests continued engagement with WBDC on this matter as part of the duty to cooperate.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>WBC notes that separate duty to co-operate discussions are ongoing between the two authorities. WBC welcomes these discussions progressing</p>
<p>4. Proposed Changes</p>	<p>N/A</p>

Please give reasons for your answer	The Royal Borough recognises that West Berkshire have identified a shortfall in office and industrial space and have committed to seek to address this matter at the first five-year review of the Local Plan. We have welcomed the opportunity to engage positively with you on this and other matters, through the Duty to Cooperate mechanism. However, I would revert to my letter, dated 24th February 2023, and reiterate that the Royal Borough is unable to assist in meeting some or all of your unmet employment land and space needs over the plan period, for the reasons detailed in that letter. In conclusion, the Royal Borough of Windsor and Maidenhead has no concerns or objections to the Regulation 19 version of the Local Plan Review.

Please give reasons for your answer	<p>It is noted that draft Policy SP20 has been updated to clarify that 'appropriate proposals for business development (offices, industrial, and storage and distribution) will be supported where they are located...On previously developed land within existing suitably located employment sites; or e. Within the countryside provided the proposal is in accordance with other relevant policies within the Plan, in particular Policy DM35.'</p> <p>The clarification regarding the contribution of development at existing employment sites or at suitable rural sites is welcomed given the importance of these sites to the local rural economy, as well as towards the District's overall employment needs set out in the Employment Land Review (Addendum 2022). This also follows the provision of paragraph 84 of the NPPF, which clearly states that planning policies should 'enable: the sustainable growth and expansion of all types of business in rural areas'.</p> <p>Given the District's overall employment needs and identified shortfall in provision, it is however also recommended that the development of suitable sites adjacent to existing employment areas is also supported within Policy SP20. This would enable the development of suitable land adjacent to Green Park (which is designated for employment use within Reading and Wokingham Boroughs) to come forward. As set out in our previous representations – at the Estate's land at Green Park, Kirtons Farm Road (ref. BUR12), the western half of the site is situated within West Berkshire and the eastern half of the site is within Wokingham and is allocated for around 20,000sqm B Class uses as part of a 'Major Development Location' and 'Core Employment Area' designation (Wokingham Managing Development Delivery Local Plan (2014) Policy SAL07). There is no substantial natural boundary across the site which</p>

	<p>clearly defines the local authority boundaries. The NPPF (paragraphs 24 and 35) encourages effective strategic planning and therefore it is critical that the site is considered in its overall context across local authority boundaries and that Policy SP20 enables the appropriate development of the site.</p> <p>Policy SP20 also continues to state that new office development outside of a town or district centre or Designated Employment Area will be required to satisfy the sequential test. The NPPF (paragraph 89) is clear however that the sequential test should not be applied to small-scale rural offices or other small-scale rural development. It is important that Policy SP20 is updated on this basis in order to ensure that suitable smallscale proposals can come forward to support the rural economy without unnecessary additional justification.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	Yes
Please give reasons for your answer	
<p>4. Proposed Changes</p>	<p>Policy SP20 as currently worded does not meet the tests of soundness set out in NPPF paragraph 35. Accordingly, the following changes are recommended in order to ensure the soundness of the Plan:</p> <p>'Appropriate proposals for business development (offices, industrial, and storage and distribution) will be supported where they are located...</p> <p><u>On a suitable site adjacent to an existing employment site:...</u></p> <p>"Proposals for new office development that are not within a town or district centre as set out in Policy SP22 or within a DEA will be required to satisfy the sequential test. <u>Proposals for small scale rural offices will not be required to satisfy the sequential test.</u>"</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
<p>5. Independent Examination</p>	<i>The Englefield Estate consider that the plan in its current version is not sound and would like the opportunity to set out how alterations could be made to the plan and its evidence base to enable it to be found sound and progress to adoption.</i>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No</p>	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	The proposal to allow office development in Designated Employment Areas is unsound. If the office market recovers there will be pressure to redevelop non-office premises as offices and this will lead to the loss of skilled, semi-skilled and unskilled manual occupations. The sentence "new office developments within Designated Employment areas (DEA) will be exempt from the sequential test in accordance with Policy SP20" will endanger the viability of town centres.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes	

* No	
Please give reasons for your answer	
4. Proposed Changes	The policy should be re-worded so as not to allow office developments in Designated Employment areas
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	To explain to the inspector why office developments in Designated Employment areas should not be allowed Sentence "new office developments within Designated Employment areas (DEA) will be exempt from the sequential test in accordance with Policy SP20" should be removed
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>Please give reasons for your answer</p>	<p>West Berkshire Local Plan Review to 2039 – Regulation 19 Proposed Submission Consultation</p> <p>We write on behalf of our client Green Park Reading No.1 LLP, which is the owner of Green Park. Green Park Reading No.1 LLP (“GPR”) is ultimately wholly owned by Mapletree Investments Pte Ltd (“Mapletree”). This response relates to the Regulation 19 Proposed Submission Consultation of the West Berkshire Local Plan Review (“the LPR”), which is open for comment until 3 March 2023. Deloitte previously responded to two Regulation 18 Consultations on behalf of GPR on 21 December 2018 and 5 February 2021.</p> <p>In writing this letter, we do so under the statutory provisions of a Regulation 19 consultation under the Town and Country Planning (Local Planning) (England) Regulations 2012.</p> <p>Background to Green Park</p> <p>Since acquiring GPR in 2016, Mapletree has been reviewing the Park’s potential, undertaking asset management and considering future opportunities. GPR is keen to support the Council in achieving sustainable development in the Borough.</p> <p>Green Park is a premier business park located in the Thames Valley area, serving the office needs of Reading, Wokingham and West Berkshire. It is situated on the border of the three local authority areas, covering a 79-hectare plot offering high quality office stock and associated amenities, located around a central body of water.</p> <p>Green Park is accessed from the A33 relief road and is located south of Reading town centre. The Park is home to a variety of office occupiers across a range of business sectors. A range of business accommodation is provided, ranging from larger corporate headquarter floorplates to smaller business start-up areas.</p> <p>The Park continues to be highly successful with ongoing interest from both global and smaller companies for office space. In 2016/17, Aukett Swanke undertook a refresh of the Fosters masterplan prepared in 1998 in order to update the development potential of the Park. Mapletree continue to look for opportunities to respond to market demand and manage the planned growth of the Park in a sustainable way. Securing an allocation for employment uses on land at 900 South Oak Way forms part of this ambition (referred to hereafter as the Site (see Figure 1 below)).</p>

[See attached map - Deloitte obo Green Park Reading No 1LLP_Figure 1]

Previous Response to Regulation 18 Draft Local Plan

On behalf of GPR, Deloitte submitted formal representations in response to the LBW Pre-Publication (Regulation 18) Draft Local Plan on 21 December 2018 and 5 February 2021. As part of the previous consultation, GPR proposed a series of changes, including the below:

- Requested that Green Park was included as a Designated Employment Area;
- Requested an emphasis on the need for the continued enhancement of sustainable transport options and infrastructure, in particular the M4 corridor, which serves Green Park;
- Requested support for Data Centres; and,
- Requested clarification be added to Policy SP 4 that although the Office for Nuclear Regulation will be consulted, it is unlikely this will restrict non-residential development in the Detailed Emergency Planning Zone (DEPZ).

Local Plan Regulation 19 Response

Policy SP20: Strategic Approach to Employment Land

Policy SP20 states that new office development outside of town or district centres and the defined Designated Employment Areas will be required to address the sequential test. GPR would like to reiterate that this creates a potential barrier to the long-term investment and sustainable growth of Green Park should it not be defined as Designated Employment Area.

The Policy also states that development proposing a loss of business development outside of a Designated Employment Area will be required to justify the loss of floorspace with marketing evidence. GPR emphasises that flexibility is needed to provide sustainable business development that will allow proven employment sites to meet the demands of the market. GPR requests that a point is added to the policy to state that subsidiary uses to existing or new business development would not face the same sequential test even if they fall outside a Designated Employment Area.

In considering the aims of the proposed policy, and as proposed previously, GPR requests that Green Park is classified as a Designated Employment Area. It is also important that the LPR does not restrict business development coming forward in suitable locations outside of Designated Employment Areas as currently defined, which as currently drafted would include Green Park. The Park’s clear success to date as a proven business park shows that business-related development in this area would be entirely appropriate and should therefore be encouraged.

GPR previously requested that Policy SP20 be updated so that a further sentence is added to prioritise office development “*in a suitable location adjacent to existing and established office or business locations.*” GPR therefore supports the updated LPR’s inclusion of “*support for redevelopment and regeneration of existing employment sites for business uses*” and requests that this addition and its overarching principle is maintained in the next draft of the LPR.

GPR considers that it is important that the LPR recognises the benefits of providing supporting subsidiary uses such as small-scale retail or hotel to business development locations. These can support the continued economic function of existing and future employment areas, allow the most efficient use of land, and support travel which is less reliant on unsustainable modes. As seen in the previous representations issued in response to the Regulation 18 consultation, GPR again requests that a supporting note is added to Policy SP20 to confirm that supporting subsidiary uses such as small-scale retail or hotel use are appropriate for new office development. The success of existing supporting uses at Green Park, such as the creche facility, demonstrate how subsidiary uses can support its position as a premier office location.

GPR previously requested that Data Centres be included as an appropriate business development. These facilities are increasingly vital in supporting the needs of companies working at the forefront of digital innovation and can respond well to otherwise constrained locations. Green Park would be a suitable location for Data Centres support the existing and future businesses in Reading and the wider Thames Valley. Whilst Data Centres have been listed as a business use in relation to the requirement for BREEAM assessments in supporting text of Policy DM4, GPR continues to request that Policy SP20 is also updated to include Data Centres as an appropriate business use.

Summary

In summary, GPR welcomes the West Berkshire LPR and the published Regulation 19 document. However, GPR requests several modifications to the LPR as set out in this letter. In particular, GPR requests that the identified Site is classified as a Designated Employment Area to reflect its existing uses and its existing allocation, and that additional guidance is given in relation to the consultation process and considerations for development located within a DEPZ.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	N/A
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is	No

<p>consistent with achieving sustainable development.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>We believe the approach is too passive. If “Positively Prepared” means working with all local stakeholders and in particular landowners, it is clear to us that certain key stakeholders could have been persuaded to resolve the issue of lack of employment sites in suitable locations.</p> <p>Newbury Town Council under a Conservative administration resolved to include development of Newbury Showground as part of its Vision under successive political administrations since 2018. The site is very convenient for the occasional events held there by the Newbury & District Agricultural Society (NDAS), aimed largely at the rural business sector.</p> <p>However this site, now largely Brownfield although located in planning terms in open countryside just inside the AONB, is much under-used. We are aware that there is significant – but not majority - support for further development within NDAS membership at present but we would expect and wish for the trend to continue towards making the Showground a hub for distribution, led by its situation at the geographic centre of the AONB but also easily accessible by the national highway network and within close reach of a varied workforce in Newbury & Thatcham We also believe it could enhance its appeal over the Plan period as a rural business hub for a wider area of North Wessex & beyond.</p> <p>It also links to the Council’s unanimous aspiration to redevelop the London Road Industrial Estate (LRIE), which is a DEA owned by the Council. Our view is that, in the short to medium term, some business occupiers at LRIE might be relocated to the Showground to enable that site to be redeveloped earlier in the Plan period than is otherwise likely. As stated in 7.7 “there is little or no viability in the [office development] market” at present, so the current range of LRIE business occupiers is likely to remain, leaving the “[un]attractive environment for modern day use” (7.10) there for the foreseeable future – as it has been for the past 20 years since the Council first realised its estate was seriously in need of redevelopment. As per 7.6: “market signals are generally not sufficient to trigger new build office development on a speculative basis”. That seems to be admitting that LRIE will not be redeveloped for purely commercial use any time soon.</p> <p>We also have concerns that by encouraging office development in DEAs (as implied in 7.7 second sentence) such as LRIE, where there are many ‘blue collar’ jobs in the motor industry, the future viability of these businesses may be endangered unless there are other employment sites within a short distance from their customer and employee base. These businesses could therefore be relocated at the Showground.</p> <p>There is currently not enough evidence that the policy is Justified or Effective. We have no confidence that LRIE will be redeveloped for commercial use within the Plan period without significant proactive intervention in the employment land market by the District Council. The Liberal Democrat Group is of the view that by allowing the re-provisioning of the football facility in Faraday Road and by implementing the consented Gateway Plaza (despite and indeed because its residential component will improve the overall financial viability of LRIE redevelopment) the Council will attract significant interest in commercial development of the rest of the site, provided some of its current occupiers can be relocated at least temporarily. This is touched on also in our response to SP12.</p> <p>We would like to see the Council reaching out to NDAS and all rural businesses through the newly formed West Berkshire Rural Business Forum, the North Wessex Downs AONB Management Board and local</p>

	<p>councils across the District with its “vast rural area that is host to a large number of small and medium sized enterprises” (7.16) and beyond and to work up a strategy that sees Newbury Showground become a hub for the North Wessex rural business community.</p> <p>This could perhaps also relieve Membury of some of the HGV traffic that currently this Council is helping to impose on minor rural roads (e.g. Ermin Street) by allocating employment sites relatively remote from where their workforce live. Membury is not sustainable and its use for employment has harmed the AONB significantly more than we believe Newbury Showground would. We know that unauthorised and uncontrolled access through Membury Services is made by vehicles on journeys generated by this employment area, because that cuts 5 miles off the journey onto the M4 at J14.</p> <p>This is a matter outside of the control of the Council as Local Highway and Planning Authority but unless it is properly legislated for and enforced, J13 in contrast involves less than 8 miles distance from the national highway network and is 12 miles nearer Newbury than Membury and immediately adjacent to the Showground. It would be far more suitable than Membury as a dedicated employment area.</p> <p>Having a major distribution centre at the Showground is likely to also reduce demand for such development at Colthrop, which would in turn reduce the number of HGVs using the A4 through Newbury & Thatcham. This would encourage greater uptake of active travel on the A4 and its feeder roads and therefore be more consistent with national policy.</p> <p>Although Newbury Showground appears to be largely greenfield land and is used for part of the year for grazing, it has substantial areas of hardstanding and several permanent buildings on it. The Newbury Racecourse site was treated as a brownfield site when it was allocated for housing and the proportion of previously developed land on both sites is similar. It also supports some existing employment. Therefore it complies with ‘d’ of policy SP20.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	Not applicable because NDAS is not one of the statutory bodies listed in the Duty to Cooperate
<p>4. Proposed Changes</p>	<p>We have no proposals to change SP20 or its supporting text, which is worthy but likely to be ineffective without changes to SP21 and the list of DEAs, as suggested below.</p> <p>In SP21, delete ESA3 (in Membury) including reference to it in 7.25 and add Newbury Showground.</p> <p>We would need supporting text adding for the Showground, based on the wording in the above section.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
<p>5. Independent Examination</p>	To explain further and provide evidence in support of the above.
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No</p>	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	N/A
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No

Please give reasons for your answer	The draft Plan has not been positively prepared, and is neither justified nor effective in respect of strategic employment provision.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	N/A
4. Proposed Changes	<p>[See attached The Fairhurst Estate map]</p> <p>Our clients own and control land situated immediately to the south east of the M4 motorway at junction 13. A site location plan of this land is included at Annex 1.</p> <p>It is considered that the land provides an opportunity for meeting some of the economic objectives of the new Plan in an appropriate and deliverable form with excellent access to the strategic highway network, and the potential for enhanced linkages into Newbury itself.</p> <p>We consider that the location should be carefully considered for employment generating uses as part of the Local Plan Review, and was put forward in or response to the Housing and Economic Land Availability Assessment (HELAA).</p> <p>The location was assessed within the HELAA (and given the site reference CHI24). We disagree with the conclusions of the site assessment, and also with the overarching approach of the draft policy approach. The policy approach fails to deliver appropriate opportunities for employment development and economic activity alike. We note that there is not one reference to logistics provision within the entire Emerging Draft West Berkshire Plan which would be most appropriately located adjacent to a key motorway and trunk road junction (M4/A34 Junction 13).</p> <p>Policy SP20 should identify the land under site reference CHI24 for strategic employment development as a Designated Employment Area to allow for the provision of new quality employment space. This could comprise a mixture of employment generating uses that would most appropriately be located adjacent to the interchange, service area and showground.</p> <p>Notwithstanding the comments within the HELAA Stage 2(B) "Assessing Suitability", the site is capable of providing access to the highway network without passing through or impacting the service area. Liasion would be required with Highways England and other stakeholders in order to achieve an appropriate solution.</p> <p>In respect of other considerations within the HELAA, Sustainable Drainage Systems could be incorporated, and as noted, there would be low risk from 24 hour per day operations which would suit many employment generating enterprises seeking to locate here. As a result of ownership, the site could deliver a net gain in biodiversity, and also any Green Infrastructure requirements.</p> <p>In respect of the landscape setting, layout principles and frameworks could frame the form of development.</p> <p>We strongly disagree with the conclusions in respect of suitability within Stage 2(b), and consider that:</p> <ul style="list-style-type: none"> • Development would be capable of being appropriate subject to establishing principles of design; • The location adjacent to a key interchange on the motorway and trunk road network means that it is ideally suited for several forms of employment generating development; and • Any concerns around highways impacts would be capable of being overcome and mitigated as appropriate. <p>We consider that the site as identified on the enclosed plan should have been properly considered for a range of employment generating uses.</p>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes

<p>Please give reasons for your answer</p>	<p><See attached report for full representation - DPDS obo TVCC_attachment_full rep_redacted></p> <p>Introduction</p> <p><u>Introduction and Background to West Berkshire Chamber of Commerce</u></p> <p>West Berkshire Chamber of Commerce (WBCC) is the British Chamber of Commerce's (BCC) accredited Chamber for the West Berkshire area. WBCC are part of the Thames Valley Chamber of Commerce Group (TVCC) which covers Heathrow and the Thames Valley corridor from West London to Swindon which collectively represents over 4,000 businesses and 5,000 active trade customers as part of its wider membership, many of whom have business interests or are represented in the West Berkshire area. TVCC is recognised as the leading voice of business representing micro to major multi-international organisations and is a centre of excellence providing international trade services and global representations committed to long term relationships with its members and providing them with relevant value-added services that assist, support and protect regional, national and international business.</p> <p>Whilst West Berkshire is located in the western end of the South East region, WBCC firmly believes that in economic terms the area is very much aligned to London and the South East, particularly the heart of the Thames Valley and including strong linkages with Oxfordshire to the north and Hampshire to the south as well as the rest of Berkshire and Buckinghamshire.</p> <p><u>WBCC's Engagement in the Development Plan Process</u></p> <p>TVCC, on behalf of WBCC, has played a key part in the Development Plan and planning process over many years at a national, regional and local level. During that time, it has submitted representations and appeared a Public Examinations throughout the Thames Valley and surrounding area. As noted in Section 1 of these representations above, WBCC's economic hinterland extends extensively not only into Swindon and Wiltshire to the west but also into Hampshire and Oxfordshire to the south and north respectively and the rest of Berkshire (Reading, Bracknell and Wokingham) to the east and further east towards London Heathrow airport. Our representations have been made in these areas as gauged appropriate to WBCC's member interests.</p> <p><u>Business Manifesto and Local WBCC Policy Priorities</u></p> <p>Attached to these representations are copies of the TVCC Business Manifesto and the WBCC Local Policy Priorities Statement which set out both the business agenda sought by the Thames Valley Chambers generally and the policy priorities for the WBCC area. These are not repeated in the representations, but we would request that they form an invaluable reference source that should be read in connection with these representations to set and establish their full context. < see attached documents - PS1578 DPDS obo TVCC_Business Manifesto 2023 and PS1578 DPDS obo TVCC_West Berks LPPS 2022 ></p> <p>Comments on Local Plan Proposed Submission</p> <p>This section sets out the Chamber's comments on the soundness of the proposed Local Plan and the proposed modifications to it.</p> <p><u>Soundness</u></p> <p>The Chamber broadly supports Policy SP20 which states that "The redevelopment and regeneration of existing employment sites for business uses will be supported", however this single line of text does not go into sufficient depth on how this will be achieved in line with NPPF policies pertaining to sustainable development. As a result, policy SP20 of the Proposed Local Plan could be considered not to be justified in accordance with the NPPF. This is exemplified by the Council's approach to the London Road Industrial Estate (LRIE), referenced in supporting paragraph 7.10 of the Local Plan which states the following:-</p>

“7.10 The ELR is clear that the industrial requirement of 91,109sqm is a minimum and therefore the regeneration of the London Road Industrial Estate (LRIE) will provide flexibility to the figures in the later part of the plan period. The redevelopment and regeneration of the LRIE is a long held vision of the Council and a recent decision by the Council’s Executive (June 2022) agreed a new approach for the site which focuses on job creation, attracting investment to Newbury and achieving carbon neutrality. The site has scope, subject to overcoming other policy constraints, for regeneration and the intensification of employment uses to maximise the potential of the site, which at present is not optimum and does not provide an attractive environment for modern day use. The majority of the LRIE site falls within the London Road Industrial Estates DEA, an area designated for business uses. It is important to note that the DEA includes the majority of the Council owned LRIE and the adjoining Riverpark Industrial Estate but excludes the football ground. A key aspiration of the regeneration is to increase the type and level of employment opportunities on the site through intensification and more efficient use of brownfield land. The Council are currently preparing a comprehensive strategy for the delivery of regeneration on the LRIE site. Due to the timing of this strategy and the site’s location within the settlement boundary of Newbury, the site has not been identified as a site allocation, however it does need to be recognised as an area of regeneration for its potential to deliver flexibility to the employment figures over the plan period.”

The Council’s current strategy for the regeneration of the LRIE is outlined within the London Road Industrial Estate Project Refresh report (Ref. EX4219), dated 9th June 2022. It seeks to create an LRIE Supplementary Planning Document (SPD) for the redevelopment of the site, rather than, for example, a site specific Local Plan allocation and accompanying Policy. It also provides a timeline for delivery, estimating the adoption of the SPD by the end of 2024, with both the depot site and playing field site redeveloped for employment use by 2026.

The reason that the policy might be considered not **justified** as it is not an appropriate strategy, and neither is it backed up by proportionate evidence. The redevelopment of a site the scale of LRIE, either comprehensively or through a series of linked and phased proposals, would be subject to significant detailed EIA work, due to several important constraints at the site, including flood risk, traffic etc. and should the site be developed in a piecemeal fashion then the appropriate strategic environmental investigation is likely not to occur and subsequent development will have to rely upon cumulative development requirements of the EIA Regulations 2027.

While this approach is consistent with national policy, the following paragraphs set out the Chamber’s recommendations to bring even further in line with national guidance and to ensure that the policy is positively and sustainably delivered.

In order to establish criteria to ensure that development or redevelopment of the site is sustainable, a comprehensive development-plan led policy framework which has been subject of Strategic Environmental Assessment (SEA) is suggested, an approach which does not appear to have been considered by West Berkshire Council. An SPD-led approach such as that proposed to be used for the LRIE site may not be able to achieve this and likely would not constitute an appropriate alternative.

Whilst LRIE is somewhat unique in the particular constraints that apply to that site, it highlights the need for the aforementioned development-plan led policy framework across the district’s principal employment areas to avoid unsustainable piecemeal development. Specific criteria-based policies for the principal employment areas should be written in a manner that encourages inward investment and provides an appropriate and positive policy context for the necessary infrastructure improvements.

We would like to see greater depth, into the policy approach, to securing – and ensuring – West Berkshire retains and identifies new employment land of sufficient quality and in locations that are attractive to investors to meet current and future needs.

In 2020 the AWE Burghfield Detailed Emergency Planning Zones (DEPZ) was extended under new REPP19 legislation. We understand there are potentially serious implications on employment land within the zone, including sites in Newbury, Theale, Aldermaston and nr Reading (Green Park). The Chamber would like to suggest that this should be seriously considered within the Local Plan and that the Council should work proactively with the AWE establishments to determine the full extent of any potential employment land impacts.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?
 * Yes
 * No

Yes

Please give reasons for your answer

4. Proposed Changes

Proposed Modifications
 In order ensure that the Local Plan is seen to be considered sound, the Chamber proposes the following modifications to facilitate an appropriate approach to development or redevelopment proposals at Designated Employment Areas across the district.
Site/Area Specific Policies
 The Chamber supports the West Berkshire Council’s aim of intensifying employment uses, along with the redevelopment and regeneration of existing employment sites for business uses. However, in order to ensure that proposals for this constitute sustainable development and are off sufficient quality to attract inward investment, the Chamber proposes that a series of positive and criteria led site-specific policies are included in the Local Plan for each

Designated Employment Area, which consider the relevant constraints and characteristics of each site. Continuing to use LRIE as an example, the following criteria would have to be included in any site-specific policies:-

- **Flood Risk:** The majority of the site is within Flood Zone 3, meaning a high risk of flooding. Any proposals for use or change of use should be required to undertake a sequential test in accordance with Policy SP6 Flood Risk. Stormwater attenuation measures and already existing opportunities to mitigate against the effects of flooding on site or in the vicinity should be considered positively. The size of LRIE is such that in the context of a comprehensive or phased redevelopment it would undoubtedly constitute EIA development within the context of the EIA Regulations 2017 and therefore requires a development plan i.e. site specific Local plan policy framework to set out the criteria that need to be addressed and met if sustainable redevelopment proposals are contemplated.
- **Climate Change:** Given the ongoing climate crisis, and especially the already measured and predicted effects of climate change in relation to weather & flooding, it is of paramount importance that any proposals for development or redevelopment in LRIE should satisfy the criteria of Policy SP5 Responding to Climate Change and any appropriate requirements that may be introduced by site specific Local Plan policy.
- **Biodiversity:** In line with the requirements of the Environment Act 2021, any development should be required to demonstrate a 10% Biodiversity Net Gain, meeting the requirements of Policy SP11 Biodiversity and Geodiversity.
- **Traffic Generation:** As any intensification of employment use at the site would result in increased amounts of traffic from the site, a set of criteria should be developed to ensure that the impacts of this are fully understood and mitigated against.
- Other site specific policy criteria should also be introduced to control the design, height, massing and land use mix of development or redevelopment proposals as may be appropriate.

These policies should clearly show the boundaries of the Designated Employment Areas with reference to the Proposals Map or other insert map as may be appropriate.

We do not believe it is the Chamber's responsibility to define the specific wording of the policies however we do believe that they would be effective in guaranteeing sustainable development and attract inward investment across West Berkshire's Designated Employment Areas.

Policy SP21 Sites Allocated for Employment Land

The Chamber supports the allocation of additional land for employment as part of this policy, and inclusion of criteria based specific allocations for these sites, in line with the latter half of the Local Policy Priority of **“Maintaining support to existing exporters and helping new businesses grow their trade activity”**, and the general objective of attracting inwards investment and regeneration in a post-Brexit economy.

SP23 Transport

The Chamber supports the application of the criteria in Policy SP23 to development which generates a transport impact, in line with the Chamber's Local Plan Priority of **“supporting appropriate local transport initiatives that strengthen confidence in travelling by public transport and lead to its sustained recovery”**. Furthermore, the policy should be referenced in any proposed site specific criteria for designated employment areas.

The proposed changes within the above representation also concern policies other than Policy SP20, but these have not been made the subject of additional representation forms as the changes are dependent on the content of the main representation on the policy.

Conclusion

These representations have outlined West Berkshire Chamber of Commerce's concerns as to the soundness of the Local Plan preparation process. The primary concern of WBCC is that the proposed policies regarding designated employment areas, in particular SP20 as exemplified by the Council's approach to LRIE, are unsound and do not go far enough to ensure that the development or redevelopment of DEAs across the district is sustainable and creates the best conditions for attracting inward investment. This is as well as the policies potentially not being appropriately justified. As they are, the policies run the risk of enabling piecemeal development at Designated Employment Areas which would result in a lower quality of land available for business use as well as potentially resulting in vital environmental investigation not being able to take place.

As such, various modifications have been proposed to ensure the soundness of the Local Plan. Most importantly, a development-plan and SEA led framework of criteria-based site specific policies for each DEA should be adopted which would guarantee that development or redevelopment is sustainable and can create the best conditions for inwards investment and regeneration. There have also been several wider minor comments and representations on other policies throughout the Local Plan.

To conclude, these representations have concluded that the Proposed Local Plan is potentially unsound and we therefore respectfully request that the sentiments of these representations be fully considered and reflected in further Modification to the submitted Local Plan.

5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?
 * Yes
 * No

Yes

5. Independent Examination	We believe it is necessary as we are proposing modifications and the content of our representations is important.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	We do not believe the plan is legally compliant in relation to its assessment of employment provision within the Sustainability Appraisal.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No

<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>The purpose of Policy SP20 is stated as setting a framework to facilitate and promote the growth and forecasted change of business development across the District over the plan period to 2039.</p> <p>The Policy sets out that "Through the LPR the Council will seek to facilitate the growth and forecasted change of business development over the plan period by promoting the supply of office and industrial space across the District to meet the identified shortfall."</p> <p>To inform the Local Plan Review (LPR) the Council undertook an Employment Land Review (ELR 2020) which was completed prior to the Covid 19 pandemic and prior to the UK exiting the EU. The Council therefore updated the ELR in 2022 using the most recent economic forecasts which take account of the major macro-economic changes which have taken place and provides up to date evidence.</p> <p>The key findings of the Employment Land Review Addendum (December 2022) are:</p> <ul style="list-style-type: none"> • A requirement of 91,109sqm or 23ha of industrial land to 2039 to meet identified needs. With 64,000sqm in the known supply, the report recommends the plan should look to accommodate a minimum of 155,000sqm of industrial floorspace to 2039 (resulting in the 91,109 sqm additional requirement). • The conclusion states that the floorspace requirement needs to be seen in the context of the whole plan period, and "Given the need to address a current market shortage for industrial space there is, unlike for offices, a more pressing need to frontload the plan with a readily available pipeline of space. So, we suggest that as much as possible of this 23ha minimum should be allocated on easily deliverable sites. No single site, devoid of major constraints has been identified through the HELAA that is capable of meeting the whole shortfall for industrial floorspace. Two sites are promoted that are generally unconstrained and cumulatively could bridge 8.2 ha of the quantitative gap. The balance to find reduces to a minimum 15 ha and a further 10 sites have been assessed as having potential for employment use subject to other policy considerations." • The report concludes that "should all other options fail to adequately meet demand, consideration should be given to providing new industrial floorspace as part of any potential large housing allocations, providing walk to work opportunities. Albeit this route would only deliver smaller and lighter units, but these are in demand, and viable in the East (Reading market area), although less so elsewhere." <p>The ELR review also states that:</p> <p>"the previous assessment identified that Theale's proximity to junction 12 of the M4 means that it is an attractive location for B8 distribution (specifically last mile servicing Reading). As supply has further tightened along the M4 corridor towards London demand for space close to motorway junctions, such as at Theale has increased since the previous assessment."</p> <p>The report states that West Berkshire has become "a viable location for largescale warehouse and distribution uses due to a dearth of availability elsewhere in the Thames Valley." There is an identified lack of available stock for last-mile distribution, with occupiers finding it difficult to satisfy their requirements.</p> <p>Panattoni wholly agree with this position.</p> <p>In addition, WBC prepared a Employment Background Paper (January 2023), which forms part of the evidence base to the draft plan. The report explains the approach taken by West Berkshire Council to employment land in the draft Plan. Sites considered for allocation to meet the requirement identified in</p>

the ELR (2022) were identified through the HELAA, which forms part of the evidence base for the Plan. The sites were then selected through the Site Selection Methodology Paper (January 2023).

The Employment Background Paper (2023) states “Since the publication of the Emerging Draft LPR in 2020 there have been a number of changes to the evidence and status of the identified sites which resulted in a review of all the HELAA sites and some changes to the sites proposed within the Regulation 19 Proposed Submission LPR.”

The updated evidence highlighted a shortfall in the supply of office floorspace over the plan period and so it was necessary for the Council to look again at the evidence and reassess all the HELAA sites promoted for employment use.

In addition, further technical evidence was gathered on the sites to assist in making an informed decision.

Based on the proposed employment land allocations in the draft Plan, there remains a shortfall of 32,709sqm of industrial land.

Panattoni Comments on Policy SP20

The NPPF is clear that planning policies should help create the conditions in which businesses can invest, expand and adapt and places significant weight on the need to support economic growth and productivity (paragraph 81).

It goes on to state at paragraph 82 that Planning policies should:

- 1 “set out a clear economic vision and strategy which positively and proactively encourages sustainable economic growth, having regard to Local Industrial Strategies and other local policies for economic development and regeneration;
- 2 set criteria, or identify strategic sites, for local and inward investment to match the In a strategy and to meet anticipated needs over the plan period;
- 3 seek to address potential barriers to investment, such as inadequate infrastructure, services or housing, or a poor environment; and
- 4 be flexible enough to accommodate needs not anticipated in the plan, allow for new and flexible working practices (such as live-work accommodation), and to enable a rapid response to changes in economic circumstances.”

The draft Local Plan Review is not considered to have been drafted to meet the policy bar set out within the NPPF for the following reasons.

It is concerning that no reference is made within the policy to the actual requirement / need for employment uses over the plan period. The ELR 2022 sets out a need for:

- 50,816sqm (minimum) of new office floorspace; and
- 91,109sqm (minimum) of new industrial floorspace.

These requirements should be enshrined in policy. Without the actual requirement identified there is no policy requirement for the employment need to be met. Without which the Policy cannot be considered to be positively prepared, effective or consistent with national policy. The policy requirement should also be treated as a minimum as set out within the evidence base.

The current shortfall in employment land should also be enshrined in Policy. This is to ensure that the policy proactively seeks to identify solutions and sets out a clear economic vision and strategy which positively and proactively encourages sustainable economic growth and clearly set out by the NPPF.

At present the policy simply does not achieve this.

This position is further exaggerated by the supporting Sustainability Appraisal (SA). The SEA/SA Regulations Schedule 2(8) requires an “assessment of reasonable alternatives” and the identification of the “reasons for selecting the alternatives tested in the light of the others available.” In *Ashdown Forest Economic Development LLP v SSCLG and Wealden DC* [2014] EWHC 406 (Admin), Mr Justice Sales held (at paragraph 97) that the plan-maker should be aware “The court will be alert to scrutinise its choices regarding reasonable alternatives to ensure that it is not seeking to avoid that obligation by saying that there are no reasonable alternatives or by improperly limiting the range of such alternatives which is identified.”

The SA has not considered the impact of not meeting employment need, nor has it considered an Option where the employment need is met in full. The only options considered at a strategic level for economic development are:

- 1 Retain separate employment and town centre policies
- 2 Combine employment and town centre policies into a single policy

These options are not relevant to the consideration as to whether employment need has been met.

Panattoni consider that the Council's approach to considering the options for employment need is fundamentally flawed. The Council does not appear to have considered any scenarios in relation to the employment needs, whether that be the impact of the shortfall and meeting or exceeding the employment need over the plan period.

Further and in relation to Policy SP20 and specifically criterion 10, which assess whether policies “support a strong, diverse and sustainable economic base which meets identified needs”, the SA finds that “the policy is likely to have a positive / significantly positive impact on economic sustainability as it seeks to support the economic base.”

It is not clear how the SA can establish that Policy SP20 will have a positive affect. The evidence base supporting the Local Plan clearly establishes that there is a shortfall against identified employment need and the SA must find that the policy has a negative affect against this criterion because it does not meet or address that shortfall. The SA is flawed in its consideration of Policy SP20.

The SA is therefore fundamentally flawed in its consideration of Policy SP20 and employment need and the legal test for the consideration of reasonable alternatives has not been met.

	<p>Paragraph 7.9 of the Local Plan sets out that “whilst these allocations go some way towards meeting the identified need there remains a shortfall. As with the office requirement the Council has positively sought opportunities to meet the industrial requirement however, the District is heavily constrained and this has resulted in a lack of suitable available sites. Given the identified shortfall in supply the Council will commit to seek to address this matter again at the first five year review of the Local Plan.”</p> <p>We do not consider that the Council have positively sought opportunities to meet the industrial requirement. The fact is the Council have deleted a previous proposed allocation, specifically land at Hoard Way, Theale, a site which is free from statutory constraints such as AONB and located adjacent to the strategic road network. It has been deleted solely on landscape grounds, which we consider</p> <p>A review to meet this shortfall is not considered necessary, for the reasons set out in these representations other available land exists which can support the Council in meeting their employment need. Specifically land at Hoard Way, Theale.</p> <p>Notwithstanding our view that at least some of the shortfall can be met through the allocation of additional sites, the mechanism for a 5-year review is not included in policy. If a review is the means by which the Council are to meet the identified shortfall this also needs to be included as a policy requirement.</p> <p>In relation to the Policy wording itself, we believe this is overly restrictive, especially in light of the identified employment shortfall.</p> <p>The adopted Development Plan under Policy CS9 (Location and Type of Business Development), Point (a), highlights that in the absence of new employment allocations being identified through the adopted Development Plan, opportunities for employment development exist where the following policy requirements are satisfied:</p> <ol style="list-style-type: none"> 1 Compatibility with uses in the areas surrounding the proposals and potential impacts on those uses; and 2 Capacity and impact on the road network and access by sustainable modes of transport 3.39 <p>Similar policy provisions are required in the draft Local Plan to provide flexibility to meet the identified employment needs and respond to the current shortfall.</p> <p>Overall, Panattoni object to policy SP20 and consider it unsound. It has not met the tests of soundness as required by paragraph 35 of the NPPF.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>

Please give reasons for your answer	<p>The Berkshire Local Plan Review (Reg 19) Proposed Submission is totally disjointed and does take a holistic view and is not based on evidence. For example, no reference is made to the current situation at the Vodafone Campus where 3 very large purpose built offices will soon be empty. The same applies to Turnpike Estate, where the old Quantel factory will soon be vacant.</p> <p>London Road Industrial Estate / Faraday Road football Ground</p> <p>Over the past 5-10 years West Berkshire Council have spent £Millions of taxpayer's monies with external consultants / property developers such as St Modwen; Strutt & Parker; Avison Young, Hemmingway design, etc. with respect to the London Road Industrial Estate</p> <p>The A339 link road into the LRIE estate was built as part of the original scheme. The original budget was £2.9 million but the actual costs was over £5.2 million, funded by WBC, Thames Valley Berkshire Local Enterprise Partnership and the Dept of Transport</p> <p>As part of the LRIE scheme WBC prematurely and unnecessarily closed the Faraday Road Football Stadium, an Asset of Community Value (that has been there since 1963, and pre-dated the LRIE). The cost of closing the ground and funding replacement facilities (that would not be needed if the football ground remained) again runs into £ millions</p> <p>In June 2022 the Council signed of a further £850k for planning and consultancy to help deliver LRIE projects as part of another scheme called the London Road Industrial Estate Project Refresh (EX4219)</p> <p>Despite the £ millions already spent the policy that WBC has adopted clearly has spectacularly failed.</p> <p>The local plan should provide the Council with the opportunity to look again at the evidence and options that would deliver the most benefits to the public for a key location that is in central Newbury. By only referring to it in one paragraph Page 84: 7.10 it has to be assumed that the planning team are deliberately trying to avoid scrutiny from external parties to the mess that has been created and the lack of any deliverables for the huge sums spent.</p> <p>The London Road Industrial Estate Project Refresh (EX4219), published in June 2022 only covers 2 sites 1) the Depot site and 2) the football ground - "the Depot site redeveloped for employment use by end of 2024" and "the playing field site redeveloped for employment use by end of 2026.</p> <p>The football ground is NOT nor ever has been part of the LRIE - it is not a Designated Employment Area. The football ground should be treated on its own merits and NOT part of a "land grab" as part of a wider LRIE development proposal. The football ground is still classified as a football ground and has approved planning permission based on this status.</p> <ul style="list-style-type: none"> • 20/01966/COMIND – Renewal and expansion of the existing football pitch to form a new 3G main pitch and a smaller 3G training/practice pitch. • 20/01530/OUT – Outline permission for replacement of clubhouse and new spectator stand at Newbury Football Ground. Matters to be considered: Access and Layout • 21/07575/CERTE – Confirmation of lawful use of land as a football ground under class F2 of the Use Classes Order (Amendment 2020) <p>As such the football ground should NOT be subsumed as a land grab for the LRIE.</p> <p>The football ground is clearly and well defined within the current West Berkshire Core Strategy (2006 - 2026) Development Plan Document which was adopted in July 2012</p> <p>The principle policies in the Core Strategy that cover the football ground are:</p> <ol style="list-style-type: none"> 1 Area Delivery Plan Policy 2 Newbury (ADPP2) 2 CS18 <p>This local plan should provide as a minimum the same level of protection / status.</p>

Please give reasons for your answer	<p>We note that the council have a long history of under-provision of employment floorspace, including offices and industrial uses. The council's most recently published evidence base documents, including the West Berkshire Employment Land Review (ELR) Addendum December 2022 and the Employment Background Paper January 2023, once again identifies a significant shortfall in provision against identified need.</p> <p>As drafted, Policy SP21 allocates four sites (ESA1; ESA2, ESA4; and ESA6) for B2/B8 industrial uses, and two sites (ESA3 and ESA5) for Egiii/B2 (office/industrial) uses. Assuming sites ESA3 and ESA5 adopt a 50%/50% split of these uses, the total quantum of new employment floorspace to be provided for across the plan period is as follows:</p> <ul style="list-style-type: none"> • B2/B8 = 63,001 sqm • Egiii = 5,800 sqm <p>This is clearly significantly below the identified need for 91,109 sqm of industrial floorspace and 50,816 sqm of office space as set out at paragraphs 7.8 and 7.4 of the Draft LPR Proposed Submission Version respectively. The LPR is also clear that these demand figures are a minimum.</p> <p>As such, and at present, it is therefore considered that the plan does not meet the government's aims as set out within the NPPF to build a strong and competitive economy, particularly Paragraph 81 which states that Planning policies and decisions should help create the conditions in which businesses can invest, expand and adapt.</p> <p>We note that our client's land at Larkwhistle Farm, Brimpton Common (ref. BRIM3) has not been identified as an allocated employment site, as promoted. The published updated Sustainability Appraisal (SA) / Strategic Environmental Assessment (SEA) November 2022, states that:</p> <p>"Overall development of the site would have a neutral impact on sustainability. There is a positive impact on economic sustainability as the site is promoted for employment uses. There are a number of unknown sustainability impacts, especially in relation to environmental sustainability as the final use of the site is unknown.</p> <p>Mitigation measures would be required to ensure no negative impacts occurred, and in many cases could result in a positive impact. There are also a number of potential negative impacts on environmental sustainability due to the rural nature of the site requiring car use to access the site, as well as the loss of a greenfield site. Mitigation measures would be required."</p> <p>The Estate object to the council's approach not to allocate this site for much needed employment land on this basis. Firstly, whilst a 'brownfield first' approach is generally supported, it is evident that the lack of available, or suitable brownfield sites means that the council has a duty to consider greenfield sites as alternatives. Secondly, the NPPF paragraph 85 is very clear that in seeking to build a strong and competitive economy, the council should recognise that sites may have to be found in locations that are not well served by public transport:</p> <p>"Planning policies and decisions should recognise that sites to meet local business and community needs in rural areas may have to be found adjacent to or beyond existing settlements, and in locations that are not well served by public transport. In these circumstances it will be important to ensure that development is sensitive to its surroundings, does not have an unacceptable impact on local roads and exploits any opportunities to make a location more sustainable (for example by improving the scope for access on foot, by cycling or by public transport). The use of previously developed land, and sites that are physically well-related to existing settlements, should be encouraged where suitable opportunities exist."</p> <p>As such, we object to the council's approach to selecting suitable sites as it is not consistent with national policy, nor does the LPR result in a positively prepared plan as it does not meet the objectively assessed needs for employment. The LPR is therefore unsound.</p> <p>Previous representations in respect of BRIM3 are appended for the Inspectors consideration (Appendix D) to highlight that this is a suitable location to accommodate new employment development. Whilst technically classified by the NPPF as a 'greenfield site', it is important to note that the site has been</p>

	<p>previously used for mineral extraction and the resultant land is of poor agricultural quality; development of this site would not, therefore, result in the loss of the best and most versatile agricultural land.</p> <p>We note that council's comments regarding opportunities to improve accessibility by foot, cycling or by public transport and wish to highlight that the Estate's adjoining land ownership means that there would likely be opportunities to facilitate pedestrian access to nearby local facilities through creating a connection to the public footpath network.</p> <p>In conclusion, The Wasing Estate have concerns over a number of the policies as drafted, and overall consider that the plan is not consistent with national planning policy, and particularly the council's strategy and approach in respect of new housing and employment development has not been fully justified. The LPR does not identify sufficient residential or employment sites to meet the district's housing and employment needs. Furthermore, as drafted a number of policies do not provide adequate flexibility and support to existing rural businesses to achieve a prosperous rural economy in West Berkshire. As a result, the Plan is not sound and should be modified to address the concerns in this letter prior to submission.</p>

Please give reasons for your answer	<i>[See attached for Appendix A]</i> Background Hope & Clay Construction Ltd are located to the north of the existing Easter Park site, which comprises a variety of employment uses including office (Class E(g)) (formerly B1), light industrial (Class B2) and warehouses (Class B8), as well as sui generis uses for vehicle repair and MOT. Prior to the development of the business park, the site, formed part of a saw mill and charcoal works. To the east of the site lies managed woodland and the Pinelands caravan park, whilst to the north, approximately 90 metres from the site are a line of residential dwellings along Padworth Common. To the north-west of the site is AWE Aldermaston, a nuclear research site. Construction of the new Hope & Clay offices and warehouse finished in 2022 following approval by the Council in September 2014 for 1907 sqm of warehouse (B8) building and associated offices (B1a) for the storage of construction machinery and plant with associated access, parking and landscaping (ref. 14/01037/COMIND). At the time of approval, the council's Economic Development Officer considered that "If Hope and Clay Ltd are able to consolidate onto one site, it is very likely that the business will be able to grow and develop further, employing more people and contributing to the local supply chain."

Despite the site's long standing and existing use as an employment site, Easter Park is located in land outside of the defined settlement boundary and is not recognised within the adopted local plan as a Protected Employment Area as listed at Appendix G of the adopted Core Strategy. Currently, the adopted policy position for development at Easter Park is set out at Policy CS9 of the Core Strategy which states that, with regard to proposals outside of defined employment areas it states proposals for business/B8 uses will be assessed against compatibility with uses in the area surrounding the proposal and capacity and impact on the road network.

The Core Strategy Paragraph 5.46 also identifies a shortfall of B8 floorspace of approximately 24,000sqm in the district and a significant shortfall of 121,000 sqm of office space.

Housing and Economic Land Availability Assessment (HELAA) February 2020

Land adjacent to Easter Park ('Land off Benyon Road, Easter Park, Tadley') has been promoted for Employment (B1, B2 and B8) uses with an identified capacity of 8,400 sqm of floorspace. The assessment of the site was first set out within the Housing and Economic Land Availability Assessment (HELAA) in February 2020 (HELAA ref. ALD6).

Consistent with the methodology, the site was not automatically excluded from the site assessment at Stage 1b despite its noted location within the inner Atomic Weapons Establishment (AWE) Aldermaston planning consultation zone, with the document noting that "*Whilst the HELAA methodology identifies notified safety zones as an automatic exclusion criteria, it also states that the impact will be assessed on merits, taking into account the type of development and the nature of the hazard. This assessment will be undertaken in stage 2 of the HELAA.*"

At Stage 2, the site's location adjacent to an existing employment (industrial) area was noted, as was the fact that this industrial estate is not a Protected Employment Area. Stage 2 concluded with: "*The proposed commercial use would have to be considered carefully with respect to management and control in an emergency due to its proximity to the AWE. Site is adjacent to an existing employment area, and so allocation would be dependent on a review of the District's employment needs through the Local Plan Review. Further information required on a number of matters, including highways and ecology, before a robust decision can be made.*" It was identified as being available, achievable and "potentially developable in part".

Local Plan Review 2020-2037 Emerging Draft December 2020

In December 2020 the council published their Local Plan Review 2020-2037 Emerging Draft, informed by a number of evidence base documents, including the HELAA (2020), the Employment Land Review (2020) the Western Berkshire Functional Economic Market Area Assessment (FEMA) (2016) and the West Berkshire Economic Development Needs Assessment (EDNA) (2016).

Draft Policy SP20 made provision for 62,00 sqm of office (Class E) floorspace and 65,000sqm of industrial, storage and distribution floorspace in the District over the plan period, seeking to address the shortage as outlined in the Employment Land Review (2020), which stated:

"We estimate that as a minimum 65,000 sq m of new floorspace should be provided for office use in the next plan... The Council should scope the next generation of policies so that, if market demand for offices strengthens, it is clear that the 65,000 sq m requirement is a minimum and policy is flexible and supportive for all forms of office development." (Paragraphs 10 and 11); and

"... Demand is also more pressing given the current market shortage, and there is a need to frontload the plan with 16 ha of easily deliverable sites. Four or possibly five potentially suitable sites are identified through the HELAA that are capable of meeting the need for industrial floorspace. All of these sites are extensions to existing employment areas, and these are in the main area of market demand in the east of the District." (Paragraph 12)

The findings of the Employment Land Review document (dated August 2020) prepared by Stantec in relation to industrial, storage and distribution floorspace also reflect earlier findings of the Berkshire Functional Economic Market Area Assessment (FEMA) and Western Berkshire Economic Development Needs Assessment (EDNA) produced in 2016. The executive summary of the EDNA concluded that: "*Demand for industrial space remains strong and very low levels of vacancy reflect a limited supply of industrial accommodation (particularly modern, good quality space). Development of new industrial space in the FEMA has been limited in recent years, with much of the existing stock relatively dated and in need of refurbishment. Local commercial property agents report that demand for industrial premises is currently outstripping supply, and an upward trend in industrial rental values in recent years has led to new speculative industrial development being just about viable within the FEMA. The key issue going forward is a lack of new land and/or space to accommodate new development.*"

Therefore it was clear that provision of additional floorspace proposed by draft Policy SP20, including through the creation of new Designated Employment Areas (DEAs) and extensions to existing DEAs, would go some way to meeting the overall demonstrated need.

Furthermore, the ELR (2020) made a series of recommendations to the council. This included to:

- Consider allocating the site for industrial uses ALD6 Land off Benyon Road, Easter Park, Tadley; and, furthermore;

Designate as (Protected Employment Areas (PEAs) Greenham Business Park, the Vodafone Campus, **Easter Park**, Langley Business Court, and the Old Mill Trading Estate. (Our emphasis added);

- It clarifies: "*The PEAs are designated for B class use, and their boundaries and role should be reviewed to achieve a balanced portfolio to meet future requirements. There is a general presumption for employment generating uses within the PEAs and against non-employment uses*"; and
- Para 4.155 of the ELR document recommends "*Easter Park – is a modern business park to the south-east of AWE Aldermaston, and comprises office, light industrial and warehousing activity. There is one small remaining parcel that has permission for warehousing. **The Park should be designated as a PEA.** Land adjoining to the northeast is promoted through the Call for Sites (ALD6*

2.1 ha), and is within an area of market attraction for employment uses, and we would support the inclusion of ALD6 within the Easter Park PEA designation.” (Our emphasis added).

As such, and following the recommendations of the EMR, Regulation 18 draft Local Plan Draft Policy SP21 ‘Sites allocated for economic development’ sought to a) classify formally Easter Park as an existing employment area by designating it as a ‘Designated Employment Area’ but also b) propose an extension of the site to achieve 8,400 sqm of new employment floorspace. The site was proposed as Site Allocation EMP3.

Draft Policy SP4 (and supporting Figure 3) identified that Easter Park in its entirety falls within the Detailed Emergency Planning Zone (DEPZ) of Atomic Weapons Establishment (AWE) Aldermaston, which are regulated by the Radiation (Emergency Preparedness and Public Information) Regulations 2019 (REPPPIR). The draft policy stated that “*In the interests of public safety, residential development in the Detailed Emergency Planning Zone (DEPZ) of AWE Aldermaston and AWE Burghfield is likely to be refused planning permission by the Council, especially when the Office for Nuclear Regulation (ONR) has advised against that development.*” It went on to state that consultation arrangements for planning applications within the DEPZ, for any new development that could lead to an increase in residential or non-residential population (thus impacting on the off-site emergency plan) will be undertaken with the Office for Nuclear Regulation (ONR).

As such it is considered that the proposed allocation of the site adjacent to Easter Park under Draft Policy SP21 was made with full regard to site’s location within the DEPZ and the Government Regulations related to Radiation Emergency Preparedness.

In support of the proposed allocation of the site for employment development in the draft Local Plan, and to address points raised in the HELAA, Hope & Clay construction submitted the following information to further demonstrate that the site is suitable for development:

- Preliminary Ecological Appraisal.
- Illustrative Masterplan.
- Transport Assessment.

The submitted Illustrative Masterplan showed how the proposed expansion of Easter Park, on land adjacent to the existing Hope & Clay site, would deliver approximately 8,245 sqm of employment floorspace (GEA) (broadly in line with the proposed allocation), made up of 3,745 sqm of class E(g) (formerly B1) floorspace; 2,160 sqm of class B2 floorspace; and 2340 sqm of class B8 floorspace, across five units, ensuring an appropriate balance between site coverage and site constraints i.e. the required restoration area/buffers/wayleave.

Representations to Local Plan Review Proposed Submission (Regulation 19) Consultation

The purpose of a Regulation 19 consultation is to ensure that the plan is legally compliant and sound. To ensure the local plan is sound, it should be:

- Positively prepared - Provides a strategy which, as a minimum, seeks to meet West Berkshire Council’s objectively assessed needs and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development.
- Justified – ensuring that the Plan provides an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – ensuring that it is deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy - Enabling the delivery of sustainable development in accordance with the policies in the National Planning Policy Framework (NPPF) and other statements of national planning policy, where relevant.

It is in light of these criteria that the Local Plan Review Proposed Submission (Regulation 19) version has been considered.

Policy SP4 ‘AWE Aldermaston and Burghfield’ / Draft Policy SP20 ‘Strategic Approach to Employment Land’ / SP21 ‘Sites Allocated for Employment Land’

Representation are made in regards to West Berkshire Council’s proposed amendments to Policy SP21 which have since removed Easter Park as a proposed Designated Employment Area, and therefore remove EMP3 Land off Benyon Road, Easter Park as a proposed Extensions to Designated Employment Area. In short, the consultation revisions to Draft Policy SP21 confirm that West Berkshire Council are no longer proposing to allocate Easter Park as designated employment site, nor are they considering its extension for additional employment floorspace.

The published updated Sustainability Appraisal (SA) / Strategic Environmental Assessment (SEA) November 2022, with regards to the site’s expansion, site ‘ALD6 Land off Benyon Road, Easter Park’, simply states that:

“The site will not be taken forward. The site is located within the AWE DEPZ and therefore, it is not considered suitable for development.”

As such, comments in respect of Draft Policy SP21 are interlinked with the council’s approach to new development within the DEPZ of Atomic Weapons Establishment (AWE) Aldermaston, as set out at Draft Policy SP4, and so the two are considered together below.

On 22 May 2019, the government introduced the new Radiation (Emergency Preparedness and Public Information) Regulations (REPPPIR) 2019 to strengthen the national emergency preparedness and response arrangements for radiological emergencies. In essence, the regulations are designed to provide a framework for dealing with a potential radiation emergency arising from sites such as AWE Aldermaston. Regulation 8 requires that the local authorities are responsible for setting Detailed Emergency Planning Zones (DEPZ) for nuclear sites where there could be a radiation emergency with off-site consequences, on the basis of the operator’s recommendations. Regulation 11 requires that the local authority must

prepare an off-site emergency plan for responding to such an emergency, within the DEPZ area. It is not disputed that the site at Easter Park is within the DEPZ of AWE Aldermaston. West Berkshire Council's website indicates that an Off-Site emergency plan is being developed in the Spring of 2023, but also states that this document is "not a public plan."

Paragraph 5.1.4 and Table 17 of the SA/SEA Environmental Report November 2022 provide the council's commentary on changes to Policy SP4 related to AWE Aldermaston (and Burghfield), including to suggest that any new development within the DEPZ will likely be refused (where previously this was limited to residential development), and state that changes "reflect new information on DEPZ and off-site emergency plans". It summarises that the changes are likely to result in negative impacts on social sustainability as the policy seeks to restrict development (residential and employment) from taking place within the DEPZ, and therefore, there will be impacts on the provision of housing, affordable housing and new employment opportunities in the area. We therefore consider this to be a fundamentally flawed approach, for reasons set out below.

In the first instance, it is important to note that the only change in circumstance to the council's assessment of the site at Easter Park has been the submission by Hope & Clay Construction Ltd of additional supporting information in respect of ecology and highways, in addition to a masterplan demonstrating how additional employment floorspace on the site can be suitably and realistically achieved.

The updated HELAA (January 2023) once again confirms (paragraph 2.22) that sites within notified safety zones (eg AWE Aldermaston) will not automatically be excluded and instead that "the impact will be assessed on merits, taking into account the type of development and the nature of the hazard. Therefore sites within notified safety zones have gone through to Stage 2 of the HELAA (site assessment) and advice from the Ministry of Defence has been fed into the site assessments." Appendix 4 of the HELAA once again concludes that that the site is available, achievable and 'potentially developable'.

Therefore, it is evident the recommendation drawn by the SA/SEA 2022 is clearly inconsistent with the conclusions of the HELAA and the HELAA methodology, and **no clear reason has been provided by the council as to why this suitable employment site is ruled out purely because of its location within the AWE Aldermaston DEPZ.**

In respect of the site's location within the DEPZ, the Regulation 18 draft Local Plan was published for consultation after the REPPiR Radiation (Emergency Preparedness and Public Information) Regulations 2019 were revised, and therefore it is reasonable to assume that the Council would have taken account of these Regulations in the preparation of that plan and in the formal allocation of Easter Park as an Designated Employment Site, and in the allocation of adjacent land for its expansion.

At the time of preparation of the Regulation 18 draft plan there had been no increase in risk at AWE Aldermaston: in the AWE Detailed Emergency Planning Zone Report dated 4 March 2020 prepared by the Council's Emergency Planner Ms Richardson for Members of West Berkshire Council it was stated in Section 3 under the heading "risk management", that "It is important to note that there are no changes in activity on the AWE sites, and there is no greater risk to the public than before this legislation was introduced." This is repeated in the conclusion at paragraph 7.1. Subsequently, a further 'declaration of no change' for AWE Aldermaston was issued in November 2022.

Nevertheless, and importantly, the Regulations and the Guidance do not preclude development within the DEPZ. They do not state anywhere that development should be prevented from coming forward just because it is in the DEPZ. On the contrary, REPPiR Regulations recognise that the population within the DEPZ will naturally change within the life of the emergency plan hence why Regulation 12 of REPPiR requires the Council to, at intervals not exceeding three years, review and revise the emergency plan. The Regulations also envisage that development will come forward within the DEPZ, and there are many passages in the Guidance which acknowledge that development will take place in the DEPZ, particularly Paragraph 250: "In order to understand if a change in the local area necessitates a redetermination [of the DEPZ], the local authority should consider developments within or adjacent to the detailed emergency planning zone taking into account their potential impact on the effectiveness of the emergency plan."

As such, it is only the Council's role to consider whether the Proposed Development can be accommodated within the off-site emergency plan, not to treat the DEPZ as an absolute constraint to development. In short, the REPPiR-19 does not support the Council's moratorium on development in the DEPZ.

In respect of the council's reference to new information regarding off-site plans, as this key piece of evidence has not been made publicly available, the approach to amending the local plan to prohibit development on this basis is unjustified. Nevertheless, Paragraph 13 of the appeal decision at Boundary Hall, Tadley in 2011 (a copy of the SoS decision is provided at Appendix A), confirms the Secretary of State's conclusion an off site plan is designed to be flexible and can be amended to accommodate the implementation of development proposals: "the Off Site Plan is designed to be flexible and extendable and that, while it is possible that the implementation of the application scheme would necessitate changes to the Plan, the evidence does not lead to the conclusion that the Plan would fail". (paragraph 13).

As such, we consider that the strategy is simply not justified or informed by the evidence, and that the council's misguided approach to the role of the REPPiR has significant repercussions to the delivery of much needed employment floorspace, and the objective of sustainable development, which includes balancing employment opportunities with providing new homes and conserving the environment. It is also considered that, given that the starting point for development should be that there is a presumption in favour of sustainable development (NPPF Paragraph 10), we do not consider that the Plan, particularly Policy SP4 (particularly in reference to development likely being refused) has been positively prepared.

The Council's approach risks undermining the long term viability of this existing and established employment site. Without recognition of its existing status, or enabling suitable opportunities for growth, the site is restricted by countryside policy; furthermore if it becomes unviable that businesses cease to operate from the site, the result will be a vacant, sterilized, previously developed site.

As stated above, the council have a long history of under-provision of employment floorspace, including offices and industrial uses. The council's most recently published evidence base documents, including the West Berkshire Employment Land Review (ELR) Addendum December 2022 and the Employment

	<p>Background Paper January 2023, once again identifies a significant shortfall in provision against identified need.</p> <p>As drafted, Policy SP21 allocates four sites (ESA1; ESA2, ESA4; and ESA6) for B2/B8 industrial uses, and two sites (ESA3 and ESA5) for Egiii/B2 (office/industrial) uses. Assuming sites ESA3 and ESA5 adopt a 50%/50% split of these uses, the total quantum of new employment floorspace to be provided for across the plan period is as follows:</p> <ul style="list-style-type: none"> • B2/B8 = 63,001 sqm • Egiii = 5,800 sqm <p>This is significantly below the identified need for 91,109 sqm of industrial floorspace and 50,816 sqm of office space as set out at paragraphs 7.8 and 7.4 of the Draft LPR Proposed Submission Version respectively. The LPR is also clear that these demand figures are a minimum. As such, and at present, it is therefore considered that the plan does not meet the government's aims as set out within the NPPF to build a strong and competitive economy, particularly Paragraph 81 which states that Planning policies and decisions should help create the conditions in which businesses can invest, expand and adapt.</p> <p>Conclusion</p> <p>In conclusion Hope & Clay Construction Ltd object to the West Berkshire Council Regulation 19 submission version of the Local Plan Review (LPR) to 2039 on the basis that it has not provided an appropriate, evidence-based strategy for development. It is considered unsound for the following reasons:</p> <ul style="list-style-type: none"> • The LPR fails to recognise and support the growth of existing employment sites including Easter Park and risks undermining their success and viability, which is inconsistent with national planning policy; • There is a significant shortfall in employment land provision and the LPR does not identify sufficient additional employment sites to meet the district's employment needs in the context of a consistent under-supply. This is inconsistent with national planning policy; • The proposed removal of Easter Park and proposed extension (site ref. ALD6 - Land off Benyon Road, Easter Park) due solely to the location of these sites within the DEPZ of AWE Aldermaston, has been done so without due regard for the remit of the REPRIR (2019) regulations and is inconsistent with the available evidence base. We consider that complete change of position is not justified by the DEPZ issues, which does not represent a moratorium on development. We consider this strategy to be unjustified and draft Policy SP4 not to have been positively prepared. <p>As a result, the Plan is not sound and should be modified to address the concerns in this letter prior to submission. We trust this Statement clearly sets out our client's position at this stage and respectively request that the above is given due consideration as part of any examination into the West Berkshire Local Plan. Our client would like the option of participating in the examination of the plan to elaborate on these matters.</p>

Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>Currently, the adopted policy position for business development is set out at Policy CS9 of the Core Strategy 2006-2026 (adopted 2012). This policy states that, with regard to proposals outside of defined protected employment areas, proposals for business/B8 uses will be assessed by the Council against the compatibility with uses in the area surrounding the proposals and the potential impacts on those uses and the capacity and impact on the road network and access by sustainable modes of transport.</p> <p>The Core Strategy at paragraph 5.46 identifies a shortfall of B1 floorspace by approximately 121,000sqm and a potential shortfall in the longer term of B8 floorspace of approximately 24,000sqm. It is noted the Council “seeks to ensure that sufficient sites are provided in the right locations to foster sustainable economic growth. This means maintaining a portfolio of sites available to meet demands for B8 in suitable location... and facilitating the growth of B1 floorspace to meet future requirements”.</p> <p>This policy seeks to make provision for business development comprising offices, industrial and storage and distribution where they are located on sites allocated for business development, on a suitable site within a settlement boundary, within a Designated Employment Area (DEA), on previously developed land within existing suitably located employment sites or within the countryside provided the proposal is in accordance with other relevant policies within the LPR.</p> <p>Paragraph 7.16 identifies that the “District has a vast rural area that is host to a large number of small and medium sized enterprises which are vital to providing job opportunities and a diverse economy. The LPR therefore seeks to support appropriate new or expanding businesses in the countryside”.</p> <p>Further, paragraph 7.20 explains that “business development within the district is dominated by small and medium sized units. Demand for such accommodation is likely to be met through smaller individual sites and within multi-occupancy employment areas. The Council will encourage the provision of small and medium sized businesses, including flexible workspace which enables businesses to start, develop and thrive in West Berkshire”.</p> <p>This appears to be a sensible approach and allows for flexibility in the delivery of employment land across the District.</p> <p>It is noted that in December 2020, the Council published their Local Plan Review 2020-2037 Emerging Draft, informed by a number of evidence base documents, including the HELAA (2020), Employment Land Review (ELR) (2020), the Western Berkshire Functional Economic Market Area Assessment (FEMA) (2016) and the West Berkshire Economic Development Needs Assessment (EDNA) (2016).</p> <p>Draft policy SP20 sought the provision of 65,000sqm of industrial, storage and distribution floorspace in the District over the plan period, to address the market shortage outlined in the ELR (2020), which identified that:</p> <p>“Demand is also more pressing given the current market shortage, and there is a need to frontload the plan with 16 ha of easily deliverable sites”.</p> <p>The findings of the ELR (2020) in relation to industrial, storage and distribution floorspace also reflect the earlier findings of the FEMA and EDNA, both produced in 2016. The executive summary of the EDNA finds that:</p> <p>“Demand for industrial space remains strong and very low levels of vacancy reflect a limited supply of industrial accommodation (particularly modern, good quality space). Development of new industrial space in the FEMA has been limited in recent years, with much of the existing stock relatively dated and in need of refurbishment. Local commercial property agents report that demand for industrial premises is currently outstripping supply and an upward trend in industrial rental values in recent years has led to new speculative industrial development being just about viable within the FEMA. The key issue going forward is a lack of new land and/or space to accommodate new development”.</p> <p>It is therefore fundamentally clear that the provision of additional floorspace proposed by draft policy SP20 would go a significant way towards meeting the overall demonstrated need. Furthermore, the ELR (August 2020) made a series of recommendations to the Council, which included:</p> <ul style="list-style-type: none"> • Over the 2020-2036 plan period, planning for a minimum 11 ha (65,000 sqm for office uses and a minimum 16 ha (62,000 sqm for industrial uses. • Consider identifying additional land and examining the potential of housing sites to secure an element of new office or industrial space. <p>The ELR at paragraph 4.64 concludes in relation to the office market that the office market is currently performing reasonably well but due to a lack of new build development there is a lack of modern purpose-built stock.</p> <p>Regarding industrial space, paragraph 4.95 confirm that there is demand from a mix of local and larger companies serving the area, as well as national occupiers.</p> <p>The ELR Addendum (December 2022) identifies at paragraph 4.30 that there is just a single office unit available in Thatcham which is not particularly attractive to modern office requirements. Demand from a mix of local and larger companies remains the same for industrial space (paragraph 4.59), with available units having fallen slightly (Table 4.22).</p> <p>Paragraph 4.76 highlights that “despite new development occurring in Thatcham... there is an acute shortage in many of the size ranges”.</p>

	<p>Appendix C (Sites' Assessment) identifies 'Land at Lower Way Farm' (HELAA ref. THA9) as being commercial and residential, being within the built up area and having 'good' prospects in terms of attractiveness to occupiers. It is considered to achieve a 'reasonable compatibility with surrounding uses' and scores reasonably overall.</p> <p>The recommendation recognises the site currently supports some small scale employment activity and has good access to the A4 and would likely be attractive for light industrial/workshop type premises/uses, but only on a small scale.</p> <p>Paragraph 7.7 of the LPR notes that there is a lack of supply of suitable sites for office development and "little to no viability in the market at present". The Council therefore seeks to promote the supply and refurbishment/upgrading of existing offices. Policy SP20 removes the requirement for office developments within Designated Employment Areas (DEAs) and promotes the redevelopment and regeneration of existing employment sites for business development.</p> <p>Paragraph 7.8 highlights that "The provision of industrial space has been consistently strong over recent years, and both trend-based projections and economic forecasts indicate growth in industrial space. The ELR 2022 therefore recommends a minimum industrial requirement of 91,109sqm or 23 ha of land to 2039 to meet identified needs".</p> <p>The main focus for the provision of industrial space is through the regeneration of the London Road Industrial Estate (LRIE) and is expected to provide flexibility to the need figures in the later part of the plan period. However, focusing industrial development primarily in one area is concerning and does not allow for other suitable and sustainably located sites to come forward which would be able to make an important contribution to meeting the identified needs of the District.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	No
Please give reasons for your answer	
4. Proposed Changes	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	No
5. Independent Examination	To ensure that the views of our client in respect of 'Land at Lower Way Farm, Thatcham' and the shortcomings identified in the Local Plan Review and its evidence base relation to the allocation of sites and land for housing and economic delivery are heard

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>Draft Policy SP21 sets out the sites allocated for employment land and identifies the approximate floorspace and use(s).</p> <p>Land West of Ramsbury Road is identified as ESA2, for 10,381sqm of B2/B8 floorspace. Supporting Paragraph 7.25 states:</p> <p><i>"The ELR outlines that to support the creation of local job opportunities in the more western rural areas, DEA boundaries could be extended at Membury Industrial Estate. Membury has seen a number of redevelopments and expansions, including outline planning permission granted for industrial use on one of the two proposed allocated sites (ESA2). The allocations sites at Membury (ESA2 and ESA3) and extending the DEA boundary will aid in addressing a local and rural demand".</i></p> <p>It is noted that the Regulation 18 version of the LPR proposed to allocate Land West of Ramsbury Road for 27,600sqm of industrial, storage and distribution uses. Thus, the Regulation 19 version of the LPR seeks to significantly reduce the amount of floorspace (and site area) allocated for employment land. To confirm, we do not agree with this approach.</p> <p>The Employment Background Paper explains that the LPR identifies a total employment land supply of 58,400sqm, across 5no. sites (footnote: MID5, LAM10, BEEN3/5, BEEN10 and PAD4). LAM6 (Land West of Ramsbury Road) is not included in the total supply of employment land as it is already counted</p>

	within the committed supply and therefore cannot be counted as an additional contribution to meeting the employment land requirement. This is the correct approach, which we do endorse.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	Walkers are promoting a site for allocation through the LPR, for industrial, storage and distribution uses (Use Class E(g)(iii), B2 and B8). The extent of the site is included in Appendix 1 <see attachment> . Land within the red line land extends to 20.9ha. The site is located to the west of Ramsbury Road, approximately 0.5km south of the M4 motorway. The site comprises: <ul style="list-style-type: none"> • Agricultural fields. • Woodland. • Landscaped strips. • Membury airfield runway (disused). • The existing premises of Walker Logistics (footnote: Walker Logistics is a family-owned business. It was founded in 1999 and predominantly comprises an e-commerce fulfilment company focusing on the picking and packing of internet orders, which are then grouped and despatched at the end of each day) In terms of the Adopted Development Plan, the site is located outside of any defined settlement boundary and is defined as 'Countryside' under Policy ADPP1 of the Core Strategy. The site is within the North Wessex Downs Area of Outstanding Natural Beauty ['AONB']. The site is bounded to the north by existing commercial and industrial buildings (Jacquet Weston Engineering and a Trinity Grain Silo and Storage Depot). To the south is agricultural fields. To the east is Ramsbury Road. A small number of individual residential properties are located further to the east and to the north east of the site. To the west is agricultural fields/woodlands. Outside of the site boundary are commercial buildings (Andy Godwin, Accident Repair Centre). It is noted that an application (Ref. 21/03083/COMIND) for 'change of use of land to Class B8' was granted on 23rd September 2022. This is for the site to the north.

Areas to the north and south of the site are designated in the Local Plan as within a 'Protected Employment Area' (Membury).

Background to Local Plan Promotion

On behalf of Walkers, Pegasus submitted to the 'Call for Sites' between December 2016 and March Subsequently, Pegasus submitted to West Berkshire Council ['WBC'] a 'Housing and Economic Land Availability Assessment (HELAA) Site Submission Form' under the Call for Sites in November 2018.

WBC published The Employment Land Review ['ELR'] in August 2020. It assessed future demand for employment floorspace, as well as existing and committed future supply. The study also identified floorspace/ land requirements to address unmet need. It stated that there is a gross demand of 62,000sqm for industrial floorspace and 16ha of new land is needed to meet future demand over the Plan period.

With regards to the current site (identified as 'LAM6'), the ELR stated at Paragraph 6.65 (emphasis added):

"A fifth site that could be suitable for industrial use is Land West of Ramsbury Road, Membury (LAM6). It is located within the western part of the District, which has generally low market attractiveness, but is immediately adjacent to the Membury industrial estate area that is fully occupied, and has experienced a number of redevelopments and expansions in the past to allow existing local businesses to grow supporting the rural economy. The continuing demand for space for local businesses is illustrated by the planning application currently under consideration for a large warehouse unit (plus D1 space) on the LAM6 site. To support the rural economy, part or all of this 6.9 ha site could be considered for allocation for employment use, albeit that the site is within the AONB designation. The site has the potential to provide the smaller units (circa 500 sq m) that the market assessment identifies are in particular short supply and that are in demand throughout the District. It is relevant to note that the 16 ha industrial requirement is a minimum to meet the need, there could therefore be merit in allocating the whole of the site."

The ELR recommended that the Council 'consider allocating 'Land West of Ramsbury Road, Membury' [LAM6] for industrial uses.

WBC published the West Berkshire Housing and Economic Land Availability Assessment in December 2020. The site [LAM6] was identified as available, achievable, and potentially developable. The supporting 'interactive map' identified the area that is 'potentially developable', as shown in Figure 1 <see attachment>.

WBC consulted on the Regulation 18 version of the LPR between December 2020 and February Draft Policy SP21 (Sites Allocated for Economic Development) included 4no. sites for allocation, including 'Land West of Ramsbury Road, Membury Industrial Estate, Lambourn Woodlands' [EMP5] for 27,600sqm of industrial, storage and distribution uses.

WBC did not update the Policies Map in support of the Regulation 18 version of the LPR. However, WBC Planning Policy Officers informed us that the possible extent of the designation is 'in line with the proposed developable area as promoted'. They attached a map; the area accords with that set out in Figure 1 <see attachment>. Please see correspondence in *Appendix 2* <see attachment>.

On behalf of Walkers, Pegasus Group submitted representations to the Regulation 18 version of the Local Plan Review in February 2021. These representations set out our support for the proposed allocation and noted that it would form a natural, high-quality extension to the protected Employment Areas in the site's vicinity.

To confirm that the intention is for the site to be allocated for industrial, storage and distribution uses.

Planning History

Outline Planning Permission (Ref. 19/02979/OUTMAJ)

In May 2021, outline planning permission (Ref. 19/02979/OUTMAJ) was granted at 'Land South of Tower Works, Lambourn Woodlands, Hungerford' [the 'outline planning permission']. This comprises part of the current site being promoted in the Emerging Local Plan. Please see **Appendix 3** <see attachment> for a Site Location Plan.

The outline planning permission was for the below description of development:

"Outline application for the erection of a new logistics warehouse building (for occupation by Walker Logistics) (Use Class B8) with ancillary office floorspace, an aircraft museum building (Use Class D1), and associated access, car parking and landscaping. Matters to be considered: Scale"

The outline planning permission provides a framework for the details of future reserved matters application(s) through the following conditions:

- Condition 3 (Indicative Plans) – This states that the layout of the site is to be in broad accordance with the Indicative Block Plan (Drawing Ref. 03100-00-C).
 - Condition 3 also states that the building shall be a maximum of 12.6m in height.
- Condition 5 (Maximum Floor Areas) – This sets out the below maximum floor areas, for different elements of the proposal:
 - Museum and military vehicle storage area – 2,180sqm.
 - Class B8 storage and distribution warehouse – 9,060sqm.
 - Ancillary office area – 1,150sqm.
 - Ancillary welfare and security area – 180sqm.

The Committee Report for Ref. 19/02979/OUTMAJ stated (own emphasis):

"In the case of consideration of this application your officers have carefully evaluated the environmental impacts of the development of the site for the proposed use against the associated economic benefits of doing so. While it is important to note that the NPPF states that major development in the AONB should only be supported in exceptional circumstances, it also states that significant weight should be afforded to the need to support economic growth and productivity. The application has identified a need

for this form of development and a shortfall of available space in the District to support it. As such, on balance officers accept the exceptional need for the development, and recommend that the application is approved."

It is clear from the Officer's Report and subsequent grant of Ref. 19/02979/OUTMAJ that the Council accepted that there was an exceptional need for additional industrial floorspace and that the proposed building's location in the AONB was not a bar to development.

Reserved Matters Application (Ref. 22/00897/RESMAJ)

An application for reserved matters ['RMA'], pursuant to the outline planning permission, was submitted and validated (Ref. 22/00897/RESMAJ) in April 2022. This was for the below description of development:

"Approval of reserved matters following Outline application for the erection of a new logistics warehouse building (for occupation by Walker Logistics) (Use Class B8) with ancillary office floorspace, an aircraft museum building (Use Class D1), and associated access, car parking and landscaping. Matters to be considered: Access, Appearance, Landscaping and Layout."

This was granted on 14 February 2023.

Council's Latest Evidence Base

WBC have published documents that form the evidence base for the LPR. Those of most relevance are summarised below.

Employment

The Council have published:

- Employment Land Review (August 2020).
- West Berkshire Employment Land Review Addendum (December 2022).

The relevant extracts of the Employment Land Review (August 2020) are summarised above.

The key findings of the West Berkshire Employment Land Review Addendum (December 2022) comprise (own emphasis):

- The (industrial) market is very tight in Hungerford, and when space does become available it is re-occupied.
- Demand for industrial space has increased since the previous assessment, while supply has continued to fall, placing further pressure on the existing stock market. Overall, there remains an acute shortage of good quality space.
- The industrial requirement is 91,000sqm (or 23ha).
- The scope for employment use (industrial) at LAM6 (land west of Ramsbury Road, Membury) has been confirmed through the 2021 planning permission.
- The industrial land requirement identified in this Addendum is a minimum.

- 1 Given the need to address a current market shortage for industrial space there is a more pressing need to frontload the plan with a readily available pipeline of space. So, we suggest that as much as possible of this 23ha minimum should be allocated on easily deliverable sites.

Landscape

The Council have published Landscape Sensitivity and Capacity Assessments ['LCA']. These seek to ascertain if development would result in harm to the natural beauty and special qualities of the AONB. The LCA of relevance to these representations comprises 'LAM6: Land West of Ramsbury Road, Membury Industrial Estate' (September 2021).

This concludes that Areas A and B (see Figure 2 <attached>) have potential for development. It concluded that the airfield runway is inappropriate for development.

Employment Background Paper

WBC published an Employment Background Paper (January 2023). This is described as *"an informal background paper that assists in the understanding of the employment evidence base and employment policies that are contained within the LPR"*.

It states (own emphasis):

- The industrial requirement to be accommodated is c. 91,000sqm and at a plot ratio of 40% coverage, this equates to a land area of 23ha. This is higher than the 62,000sqm or 16ha requirement identified in the ELR 2020.
- The evidence in the Landscape Sensitivity and Capacity Assessments (LCA) fed into the process of seeking to allocate sites. The Assessments prepared for individual sites within the North Wessex Downs AONB recommend landscape buffers to ensure development would fit with the existing pattern of the landscape as well as to bring landscape enhancements. These buffers reduce the area of the individual sites considered appropriate for development.
 - LAM6 is identified as having a site area of 6.98ha, with a developable area of 4.4ha, and a land supply of 10,381sqm.
The Council state that they are committed to a five-year review and 'is taking positive and proactive action to seek opportunities for additional employment land to come forward'.
- The Council identify a requirement for 91,109sqm of industrial floorspace (as identified in the ELR Addendum) and a supply of 58,400sqm. LAM6 is excluded from the employment land supply, as it is already counted within the committed supply.
- Thus, there is a shortfall of 32,709sqm of industrial land.

The Council state that they are committed to a five-year review and 'is taking positive and proactive action to seek opportunities for additional employment land to come forward'.

Proposed Site Allocation

The Policies Map, which displays the policies contained within the Proposed Submission (Regulation 19) LPR, allocates the site as within (see Figure 3 <see attachment>):

- AONB.
- Designated Employment Area ['DEA'] (in part).
- Employment Allocation (in part).

The extent of the DEA is shown in further detail in Map 9 in Appendix 1 of the Employment Background Paper (see Figure 4 <see attachment>).

The extent of the employment allocation is shown in further detail in the map that supports Draft Policy ESA2 (see Figure 5 <see attachment>).

Therefore, the DEA and site allocation only covers the land which benefits from outline planning permission (Ref. 19/02979/OUTMAJ), and for which reserved matters approval (Ref. 22/00897/RESMAJ) was granted on 14 February 2023. The extent of the boundary has been reduced from that assessed in the HELAA (and identified as 'deliverable') and from which WBC Planning Policy confirmed was allocated in the Regulation 18 version of the LPR (under Draft Policy EMP5); the area covered by the runway has been omitted.

Indicative Scheme

We have enclosed a drawing (22021-SK-103) [**Appendix 4 <see attached>**], which demonstrates how a scheme could be delivered on the site allocation set out in the Regulation 18 version of the LPR (i.e., the boundary which includes the airfield runway).

For completeness, the scheme includes the extant consent (Ref. 19/02979/OUTMAJ) for the new logistics warehouse building. In addition, 5no. buildings are shown to the west, along with associated car parking and access, as well as a landscape buffer further to the west. Excluding the extant consent, the scheme would deliver a total Gross External Area ['GEA'] of 21,491sqm across 17no. units (which range in size from 322sqm to 3,798sqm) for industrial, storage and distribution uses.

WBC's Employment Background Paper identifies that there is a shortfall of 32,709sqm of industrial land. Therefore, the proposed scheme would make a significant contribution in helping to address this shortfall (reducing it by 34%, to 11,218sqm).

The scheme has been informed by advice from Savills on market demand. The unit sizes shown are in demand within the regional market (of Oxford/Newbury/Swindon). There is the potential to provide for small medium enterprises within smaller units. It is therefore considered that the units proposed reflect the target audience and occupier demand. To confirm, it is not anticipated that the scheme will be occupied by Walker Logistics themselves, but it will be available to the market for other industrial, storage and/or distribution uses.

The proposed scheme would provide much-needed supply to the immediate locality. Within the smaller sub-15,000 sq ft size range, at the end of Q4 2022 according to Savills, there was one available unit within a 5-mile radius, comprising 1,504 sq ft which has subsequently been occupied.

Increasing this radius to 10 miles to include the eastern boundary of Swindon and western boundary of Newbury, there were 9 available units available at the end of Q4. There is demonstrably a considerable under-supply of small, light industrial and warehouse units, forcing many local businesses to re-locate.

It is noted that WBC have reduced the area of the site considered appropriate for development, from that assessed in the HELAA and allocated in the Regulation 18 version of the LPA, as a result of the evidence in the LCA.

A Landscape Visual Appraisal ['LVA'] has been prepared, to assess the visual and landscape impact of developing the area allocated in the Regulation 18 version of the LPR, and the potential impact of the Indicative Scheme.

This concludes:

- The site is considered to have very limited visual relationship and inter-visibility with the surrounding and adjacent areas and the wider AONB landscape.
- The site is of low visual sensitivity.
- The woodland buffer on the western edge, shown on the Indicative Scheme, would be as effective in screening views in and out as the currently present maturing woodland that marks the edge of the main north to south landing strip.
- The allocation of the (wider) site would not cause any undue harm to the visual amenity or appreciation of the AONB landscape, that cannot be mitigated against.
- The Council's published Assessment does not represent the correct landscape character baseline (as it does not consider the approved outline application Ref. 19/02979/OUTMAJ(footnote: This is a omitted scheme, in planning terms, and one which the applicant intends to be built in 2023/24.)).
- The site comprises an already transformed landscape, of the former airfield, and the hardstanding of the southern runway could be utilised as building platforms.

The LVA demonstrates that a larger site allocation would not bring any undue harm to the visual amenity or landscape character of the AONB, utilises landscape that has already been transformed and is influenced by the existing facilities nearby, and is well enclosed and integrated into the receiving landscape.

Thus, it is appropriate to allocate the whole site promoted by Walkers.

Economic Benefits

The economic benefits of allocating the site (including the former airfield) are summarised in the submitted 'Economic Benefits of proposed Expansion of Activities at Walker Logistics' Report. This concludes:

- The proposal will create economic benefits during the build phase and once it is operational.
- Allocating the airstrip at land west of Ramsbury Road could deliver a further 21,419sqm of industrial floorspace, which would bring the allocated industrial sites in the LPR almost in line with the recommended requirement of 91,109sqm in the Employment Land Review.

Conclusion

The inclusion of the site at 'Land West of Ramsbury Road, Membury Industrial Estate' as an allocated employment site is fully supported. However, the boundary of the allocation should be extended to include

	<p>the former runway. This would continue to ensure that the site allocation forms a natural, high-quality extension to the DEAs in the site's vicinity and development would result in significant socio-economic benefits. More importantly, it would help WBC to meet their identified need for industrial floorspace, which the LPR fails to do and therefore cannot be found to be sound.</p> <p>Attachments:</p> <ul style="list-style-type: none"> • Full Response (inc. 2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	The AONB in West Berkshire is under threat, and the Council needs to take steps to safeguard it. Currently the proposed development of the Membury Industrial Estate threatens residents by permitting increased traffic down the B4000; it threatens pollution levels by the increased traffic; it invites further accidents on the B4000 (there have been two in the last couple of months); it puts at risk the AONB, and makes living in this part of the area unattractive and unappealing.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	
4. Proposed Changes	WBC needs to take traffic-calming measures, such as flashing signs, chicanes, speed limits enforced by cameras, and to block the use of lorries over 7.5 tons.
5. Independent Examination - If your representation is seeking a change, do you consider it	No

necessary to participate at the examination hearing session(s)? * Yes * No	
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	Many proposals in the Review are outside or contrary to the Council's own strategic and operational Policies.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes	Yes

* No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	Some of the sites proposed for Industrial Development are against Environmental Policy, Employment Policy and are Unsustainable.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	
4. Proposed Changes	The removal of sites LAM 9 and 10 as Industrial Development Sites will make the LPR legally Compliant. They both fail to meet the Council's Sustainability Targets.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	I wish to attend the Oral Hearing as the Chairman of the Woodlanders Protection Group and on my own account. This will be to explain the basis of the challenge to the use of AONB land, 1) with no suitable and sustainable transport access! 2) with no Environmental Impact Assessment 3) with minimum benefits to the local economy and little local employment to justify the removal of AONB land. 4) with the use of non-standard and possibly illegal processes for the examination of the Environmental Impacts of any proposed developments
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the	Yes

Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters	No

<p>that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	Yes
<p>Please give reasons for your answer</p>	<p>I am particularly concerned that no Environmental Impact Assessment has been carried out on the Membury Industrial site which has expanded hugely, especially over the previous eight years.</p> <p>This has led to an intolerable increase in the traffic on this rural road network which affords no regard for the residents who live here. There is no public transport in the area, which along with a complete lack of cycle lanes, means that the impact on the traffic on the network is beyond its capacity. These roads are dangerous and further development will only increase this danger.</p> <p>The economic arguments for increasing the industrial development at Membury do not outweigh the environmental impact on the local environment. This is an ANOB, yet that does seem to be taken into consideration when driving the industrial development on. Indeed it seems to go against the Government's desire to protect these areas leading to the rural character of this area being destroyed.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>(25). Strategic policy-making authorities should collaborate to identify the relevant strategic matters which they need to address in their plans. They should also engage with their local communities and relevant bodies including Local Enterprise Partnerships, Local Nature Partnerships, the Marine Management Organisation, county councils, infrastructure providers, elected Mayors and combined authorities (in cases where Mayors or combined authorities do not have plan-making powers).</p> <p>I would suggest that the local community and local nature partnerships have not been consulted with reference to the industrial development at Membury.</p>
<p>4. Proposed Changes</p>	A full Environmental Impact Assessment needs to be carried out on the whole of the Membury Industrial Site before further development, which expands onto the ANOB, is allowed.
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	
<p>5. Independent Examination</p>	
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes</p> <p>* No</p>	
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes</p> <p>* No</p>	
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes</p> <p>* No</p>

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	Yes
Please give reasons for your answer	
<p>4. Proposed Changes</p>	<p>Propose extension of London Road Industrial Estate Designated Employment Area to cover land to the south currently comprising a playing field, a car park and open space - see area shaded in green in attached plan.</p> <p>This is in line with the Council as landowner's aspirations for the LRIE site as set out in Executive Report EX4219 approved on 9 June 2022 and supporting documents, available at https://info.westberks.gov.uk/lrie</p> <p>Propose additional paragraphs in the supporting text to align with the Council as landowner's aspirations for the LRIE site as set out in Executive Report EX4219 approved on 9 June 2022 and supporting documents, available at https://info.westberks.gov.uk/lrie:</p> <p>7.29 The London Road Industrial Estate has scope for intensification of employment use within the plan period to maximise the potential of the site. Some mixed use development may be appropriate, provided that no net loss of employment floorspace results from that development.</p> <p>7.30 The Council-owned London Road Industrial Estate (LRIE) currently has an estimated 23,000 sqm of employment space (Avison Young Development Brief 2020) occupied by 36 businesses that employ about 300 people. Following a review taking into account evolving economic drivers, market demand and the district's ambition to be carbon neutral by 2030, a revised Delivery Strategy for LRIE approved by Executive on 9/6/22 aims to increase employment floorspace on the site by at least 30%, safeguard 300 jobs and create at least 200 new jobs by 2030.</p> <p>7.31 The Council as freeholder will work with leaseholders to deliver environmental enhancements on the site including on carbon net zero, nutrient neutrality, sustainable drainage and biodiversity net gain. Further details to be set out in an LRIE Place-making Strategy which will be submitted as a Supplementary Planning Document in due course and progressed through the statutory planning process in parallel with the Local Plan Review.</p> <p>7.32 The Council as landowner is promoting alternative provision outside the LRIE to mitigate the loss of the playing field. This approach is supported by Sport England and aligns with the Council's Playing Pitch Strategy. The exact location of the alternative provision will be determined at the point at which a planning application for redevelopment of the playing field is submitted, accepting that it is for the statutory planning process to determine whether or not redevelopment of the former football ground should be permitted.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	Yes
5. Independent Examination	To represent the rationale of the proposal.
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes</p> <p>* No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes</p> <p>* No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes</p> <p>* No</p>	Yes

development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>I am writing as we are residents living in Lambourn Woodlands, and we have concerns around the proposed industrial development at Membury. This is already an extremely busy industrial site and further development will greatly affect the local community;</p> <p>causing an increase of traffic on our rural networks which are already currently overloaded with vehicles and HGV's, the increase in traffic will further impact residents with a greater degree of noise and air pollution, the increase in the pollution and the carbon footprint is contra to West Berkshire Council's policy.</p> <p>We are worried by development plans which we feel cannot be maintained, as infrastructure for travel and impact on the environment have not been assessed.</p> <p>This is an area of Outstanding Natural Beauty and the sheer proportion of developments are no way in keeping with this. These large industrial developments will have a detrimental effect on our landscape and there is a possibility that they could have harmful consequences for wildlife habitats and ancient woodlands that need to be protected. We think that the environmental and ecological ramifications need to have extremely careful consideration so that we do not to lose the rural character of this area.</p>

Please give reasons for your answer	<p>This comment is submitted by Lambourn Parish Council and Lambourn Neighbourhood Development Plan: Policy SP21: Sites allocated for Employment Land. Sites ESA2: Land west of Ramsbury Road, Membury Industrial Estate, Lambourn Woodlands. Site ESA3: Land to south of Trinity Grain, Membury Industrial Estate, Lambourn Woodlands.</p> <p>In its response to REG18, Lambourn Parish Council stated it wished to see EMP5 (now ESA2) removed from the Plan and no further expansion of the area of the DEA. ESA2 is smaller than EMP5, but ESA3 has been added. This not only adds another area to the industrial site but also increases the danger of industrial sites coalescing and changing the landscape character. <i>The Landscape Character Appraisal to Inform the Lambourn Neighbourhood Development Plan (November 2020)</i> identified Membury Airfield as a Landscape Character Area (LCA3) and included recommendations to plan, manage and protect the distinctiveness of LCA3: "The scale and planning of development at this location needs much careful consideration of any further growth to help avoid further change in character."(9.23, p.39) Furthermore,</p>

	<p>increased development of B8 use increases the number of HGVs. These “introduce noise and dust which can lead to synergistic adverse effects on character..... any proposals to increase and expand development at this location should be mindful of such in-combination effects as well as the direct effect of encroachment”. (<i>Ibid</i>)</p> <p>Policy SP2 states that the Council will consider “the impact of cumulative development” within the AONB when determining what constitutes major development. Policy DM35 states: <i>To support the rural economy, proposals for economic development in the countryside will only be permitted where they satisfy the following criteria:.....</i></p> <p><i>h. It would not generate traffic of a type or amount inappropriate for the rural roads, byways or restricted byways affected by the proposal or require improvements to these roads, byways, or restricted byways which could be detrimental to their character and use by motorised and non-motorised traffic.</i></p> <p>Parishioners are concerned that the Plan does not in fact address the cumulative impact of increasing numbers of vehicles, particularly HGVs, using local roads from Junction 14 of the M4 to reach the industrial sites via the B4000, Ermin Street and Ramsbury Road. Walking and cycling along these un-footpathed roads is dangerous, due to the amount of traffic. Residents have to drive to reach local facilities, such as a post box or the Village Hall, in safety. The rural road network in the wider Parish is affected when industrial site traffic seeks to find alternative routes e.g to the A34 or M5.</p> <p>SP21, 7.25: Membury Industrial Estate states: “extending the DEA boundary will aid in addressing a local and rural demand”. At the present time employees travel (or are bussed in) from as far afield as Reading and Swindon. The Plan does not show evidence that demand within the Parish for employment will be met by an expansion of the DEA.</p> <p>The view of LPC/LNDP remains that the Plan does not take into account reasonable alternatives to economic land in West Berkshire, evidence to support the expansion of the Lambourn Woodlands DEAs has not been supplied and the proposed expansion is neither sustainable nor environmentally sound. (Attachment - CompressedNov20LC-629 Lambourn LCA 23 031120ND-compressed.pdf)</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p><i>[See attachment 'Barton Willmore (Copas Farms) Full Rep' for full Local Plan Review representation]</i></p> <p>Proposed Allocations and Constraints</p> <p>Six employment land allocations are identified in emerging policy SP21. Accordingly, regarding the shortfall, the Local Plan Review document in paragraph 7.9 states that <i>“as with the office requirement, the Council has positively sought opportunities to meet the industrial requirement however, the district is heavily constrained, and this has resulted in a lack of suitable available sites”</i>.</p> <p>Returning to national policy briefly, the NPPF is clear in paragraph 11 that strategic policies should seek to meet anticipated needs over the plan period, unless:</p> <p>i) The application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type, or distribution of development in the plan area; or</p> <p>ii) Any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assess against the policies in this Framework taken as a whole.</p> <p>In West Berkshire this is to a large extent related to the North Wessex Downs Area of Outstanding Natural Beauty ('AONB') which under paragraph 11 (d) (i), footnote 7, of the NPPF is defined as a protected area. However, having regard to the allocations with the Submission version of the Local Plan Review, four of these sites are indeed within the AONB (ESA2, ESA3, ESA4, ESA5), two of which are located at the Beenham Industrial Area.</p> <p>Section 5.4.2 of the SA/SEA Environmental Report November 2022 considers the potential reasonable alternatives for allocation for employment uses. Critically, in Table 55, it states for Part BEEN3 & Part of BEEN5 (ESA4), BEEN10 (ESA5), LAM6 (ESA2), and LAM 10 (ESA3) that <i>“there is an overriding need for additional employment for industrial uses within the district and therefore, exceptional circumstances (NPPF Para 177) can be demonstrated regarding the allocation of the site within the AONB.”</i></p> <p>Consequently, it is unclear why further sustainable sites, such as our client’s site of land adjacent to Beenham Industrial Area, have not been included in the Plan’s proposed allocations, as we discuss in further detail below.</p> <p>Soundness of Emerging Policies SP20 and SP21</p> <p>Considering the above, we therefore have concerns with the soundness of emerging policies SP20 and SP21 as set out below.</p> <p><u>Positively Prepared:</u> Emerging policies SP20 and SP21 have not been positively prepared as they do not seek to meet the identified employment needs, as set out within the ELRA, and therefore do not support achieving sustainable development in West Berkshire.</p> <p><u>Justified:</u> The strategy in emerging policies SP20 and SP21 does not take an appropriate strategy as it is not seeking to identify sufficient sites to meet the identified need. The reasons for doing so are not justified when considering the identified need and available sites that can contribute to this need, including our client’s site.</p>

Effective: Emerging policies SP20 and SP21 will not deliver enough development to meet the identified need over the plan-period. Moreover, references to additional sites (i.e. LRIE) that are not allocated should not be included as they cannot contribute to meeting need.

Consistent with National Policy: Emerging policies SP20 and SP21 are not consistent with seeking to meet the identified need and delivering the economic objective of achieving sustainable development.

As shown on the supporting Location Plan [see attachment 'PS1148 Barton Willmore (Copas Farms) Plan 1'], our client controls land directly adjacent to the Beenham Industrial Area ('the Site'). The Beenham Industrial Area, which also contains land within our client's ownership, is identified by Policy DM32 'Designated Employment Areas' (and listed in Appendix 4 table 18) as one of the specific locations within the District area designated for business uses. Beenham Industrial Area (previously known as a 'Protected Employment Area') was designated through the West Berkshire District Local Plan 1991 - 2006 highlighting its longstanding record as an employment area.

Our client is promoting the Site through the Local Plan process for approximately 20,000 sqm of a mix of employment uses (Class E, B2 and B8) (This is a lower quantity of floorspace than promoted previously in light of the potential inclusion of landscape buffers, as illustrated on the attached 'concept' plan [see attachment "PS1148 Barton Willmore (Copas Farms) Plan 2']"). The Site is not proposed to be allocated within the proposed submission version, however, due to the circumstances outlined below and set out within our representations, in our client's opinion the Site should be identified as an additional allocation with the Local Plan.

- The Site will contribute to meeting the identified shortfall in employment land allocated through the Local Plan;
- The Site is sustainably located adjacent to the existing Beenham Industrial Area, including other sites proposed for allocation; ESA4 and ESA5;
- The Site has good sustainable connectivity connections to the A4, local bus routes (Jetblack 1), and Aldermaston Wharf rail station; and
- The Site has an opportunity to incorporate mitigation measures, including vegetation screening, to avoid any landscape and visual impact on the North Wessex Downs AONB.

For the reasons set out below, our client considers that land adjacent to Beenham Industrial Area should be included as an allocated employment site to assist the Council in meeting its employment needs:

- The Site will support delivery of the minimum employment needs identified by the ELRA through the additional provision of approx. 20,000 sqm of Class E, B2 and B8 uses within the plan period. This has been decreased from the quantity submitted previously in light of the inclusion of potential landscape buffers. This includes supporting the existing weak pipeline supply of office space and the acute shortage in available industrial units as stated in paragraphs 7.11 and 4.91 of the ELRA respectively. In particular, the Site provides an important opportunity for creating space for smaller units which are in short supply in West Berkshire across both employment types (see paragraphs 7.11 and 4.91 of the ELRA). Furthermore, whilst the Council intends to commit to revisiting the employment land supply as part of the five-year review, due to the nature of the constraints facing West Berkshire, it is unlikely that a significant amount of 'new' land will become available, and therefore sufficient supply should be identified now, such as our client's site, to ensure the Council's employment needs strategy is sound.
- The Site is located in a sustainable location adjacent to the existing Beenham Industrial Area which is proposed to be a Designated Employment Area ('DEA') and could therefore form a logical extension to the DEA. The Site can also be sustainably accessed off Grange Lane, via the A4 which provides a direct route to the large conurbations of Reading and Newbury, in addition to the M4 (Junction 12 is only approximately 4.5 miles from the Site). The A4 route also connects the Site to the Eastern Spatial Area which is proposed to continue to be important for business development as per Policy SP1 – the Spatial Strategy. Regarding other transport modes, bus stops are located within 250 metres of the Site along the A4 whereby the Jetblack 1 bus route connects Newbury to Reading via Thatcham, Woolhampton, and Theale via a twice hourly service. The Site is also less than 500 metres from Aldermaston Rail Station whereby trains run hourly providing access to Reading and As is demonstrated by the two proposed allocations at the Industrial Area (ESA4 and ESA5), the Site is evidently an appropriate location for this form of development.
- The Site is consistent with paragraph 85 of the NPPF which states that planning policies and decisions should recognise that sites to meet local business and community needs in rural areas may have to be found adjacent to or beyond existing settlements. As the Site is located within the North Wessex Downs AONB spatial area and outside of a defined settlement boundary, paragraph is relevant for our clients Site. Albeit the Site is sustainability connected to the highway network as referred to above and located adjacent to a proposed Designated Employment Area.
- Whilst the Site is located within the AONB, it is considered that sensitive mitigation measures, including generous vegetation screening within the Site could be used to limit any perceived landscape and visual impact on the AONB. A high-level concept plan is attached to this representation demonstrating how this could be achieved. As previously referred to, ESA4 and ESA5 are proposed allocations at the industrial area within the AONB providing landscape buffers and landscape enhancements to reduce their perceived impact. The Landscape Character and Sensitivity Assessments (June 2022) for our clients Site (BEEN 11 Parcel 1 and 2) suggest that there is potential to enhance the woodland character of the area (as is proposed for ESA4 and ESA5) which would also block views into the AONB and across the area to the Kennet Valley side. In our client's opinion, the Site is already well contained, particularly as a result of existing vegetation, including woodland and hedgerows along Clay Lane, and recent further tree planting by our client, limiting views beyond the Site into the AONB. On behalf of our client, we therefore contest the conclusions of the Landscape Character and Sensitivity Assessments

	<p>and consider that sensitive mitigation measures could feasibly reduce any perceived landscape and visual impacts of development at this Site.</p> <p>On the basis of the above we consider that land adjacent to Beenham Industrial Area should be included as an allocation under emerging policy SP21 to assist in reducing the shortfall in identified industrial and office space within the District as set out within the supporting evidence base to the Plan.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	Yes
Please give reasons for your answer	
<p>4. Proposed Changes</p>	<p>Additions are shown underlined, deletions by strikethrough</p> <p>Policy SP21: Site Allocated for Employment Land</p> <p>The following sites will be allocated to facilitate the growth and forecasted change of industrial land and contribute to meeting the identified office land need over the plan period.</p> <p><i>[see attachment 'Barton Willmore (Copas Farms) Full Rep' for Table 4]</i></p> <p>A specific policy (ESA7) should subsequently be included, and relevant reference made through the Local Plan where necessary.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
5. Independent Examination	To expand on points made within this representation
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No</p>	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	We do not believe the plan is legally compliant in relation to its assessment of employment provision within the Sustainability Appraisal.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	<p>Introduction</p> <p>These representations have been prepared by Turley on behalf of Panattoni in response to the West Berkshire Local Plan Review 2039 Proposed Submission (Regulation 19) Consultation (January 2023). Our client has important land interests in the Local Plan area, in particular land to the north of the A4, to the east of Theale. A copy of the Site Location Plan is provided at Appendix 1.</p> <p>These representations have been based upon the contents of the latest consultation document and its evidence base but also have had regard to all previous representations made by Panattoni to West Berkshire Council (WBC).</p> <p>Representations were submitted to the December 2020 Emerging Draft consultation. At that time the site was a draft allocation (Policy EMP6). It has since been removed in the Proposed Submission version of the Plan on the basis of landscape impact concerns raised by the Council's landscape consultant.</p> <p>The site is considered in the West Berkshire Housing and Economic Land Availability Assessment January 2023 under reference THE8.</p>

The structure of these representations is as follows:

- Context;
 - Comments on Regulation 19 Local Plan;
 - A review of land at Hoard Way, Theale in line with paragraph 67 of the NPPF;
- and
- Summary & Conclusions.

At present Panattoni object to the draft Local Plan on the basis it has an identified shortfall in the employment requirement despite suitable sites such as land at Hoard Way, Theale being suitable and available for employment development. These representations set out Panattoni's case in this regard.

Context

The National Planning Policy Framework (NPPF)

The NPPF provides the Government's overarching policy for planning.

The NPPF requires that the planning system should be genuinely plan-led. Local plans are subjected to examination in order to assess whether they are legally compliant (for example with respect to the Duty to Cooperate and Sustainability Appraisal) and sound.

Paragraph 35 of the NPPF sets out that:

"Plans are sound if they are:

- a) Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- b) Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- c) Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- d) Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework."

It is within the context of paragraph 35 of the Framework that these representations have been prepared.

A updated NPPF is currently the subject of consultation until March 2023. Transitional arrangements are set out within the consultation document at paragraph 225 noting that:

"For the purposes of the tests of soundness in paragraph 35 and the policy on renewable and low carbon energy and heat in plans in paragraph 156, these policies apply only to plans that have not reached Regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012 (pre-submission) stage, or that reach this stage within three months, of the publication of this version"

As a result, the West Berkshire Local Plan will be assessed against the provisions of the July 2021 NPPF and assessed against the tests of soundness set out above.

Policy SP21: Sites Allocated for Employment Land

Policy SP21 'Sites allocated for Employment Land' allocates six sites totalling approximately 68,781sqm of B2/B8/Egiii land.

The supporting text for the policy states the Council will seek to ensure that sufficient sites are provided in the right locations to foster sustainable economic growth. It also states that the allocated sites are focused around or near to areas of existing employment activity.

As a result of the need identified above we object to Policy SP21, as it does not identify sufficient sites to meet the employment requirement.

We consider further sites should be allocated for employment uses such as land at Hoard Way, Theale.

Land at Hoard Way, Theale - Proposed Employment Site

This part of the representations sets out an overview of Panattoni's land interest at land at Theale and the reasons why it should be allocated for employment use to help meet the need identified in the plan and its evidence base.

We consider the merits of the site below, in line with paragraph 67 of the NPPF, which underlines that local planning authorities should establish realistic assumptions about the availability, suitability and the likely economic viability of land across the District.

The Site and Surroundings

The site extends to an approximate area of 5.4ha comprising a vacant field broadly rectangular in shape with no built form or public access between the M4/Bath Road and the existing settlement of Theale (see the Site Location Plan at Appendix 1).

Power cables cross over the site and there is a pylon within the site itself.

The site is directly south-west of Junction 12 of the M4 providing strong strategic transport links. Bath Road provides access between Newbury and Reading.

The site abuts High Street to the north with a number of residential properties abutting the north-west corner of the site. Vehicular access along the High Street to the north of the site is limited by barriers, but cycle/ pedestrian access remains. This route leads to a footbridge across the M4 to Pincents Lane, Calcot.

The M4 is contiguous with the north-eastern boundary of the site save for a small inset on the northern corner which is associated with the existing Telecommunication Mast. The south-eastern corner rejoins the J12 slip road onto the M4. The A4 Bath Road that runs along the southern boundary of the site. These boundaries are screened by existing landscaping including established trees.

The western boundary aligns with Hoad Way connecting the A4 to Theale High Street. Adjacent uses comprise predominately road infrastructure (east, south and west) with a number of residential properties abutting the north-western boundary.

Within the immediate context of the site, Arlington Business Park and Theale Business Park lies to the south of the Bath Road, east and west of Waterside Drive. Arlington consists of mainly office buildings within a landscaped setting, whilst Theale Business Park comprises predominantly warehouse development with limited landscaping and increased focus on loading bays and parking associated with the distribution uses.

To the west of the site is James Butcher Drive where there are existing residential apartments accessed from Hoad Way. There is a tree belt along this boundary with well-established trees. Further west lies the centre of Theale with a range of residential, retail and commercial properties. To the north of the site there is a residential estate abutting an undeveloped field further east.

With regard to accessibility, the closest bus stops to the site are located on the High Street in Theale within 150m of the site. There are two main bus services that provide access between Reading Town Centre, Calcot, Thatcham and Newbury and run half hourly every day. The closest railway station is approximately 900m to the south-west of the site and offers services between Newbury, Reading and London Paddington.

This site is strategically located for employment led development and well positioned with the existing highways network.

The site lies partially within the Theale High Street Conservation Area and falls within Flood Zone 1 and 2. The site also falls within the AWE Outer Zone. The site is outside the existing settlement boundary of Theale which currently extends to the rear of the properties abutting the northern boundary and along the western edge of Hoad Way.

The Lower Pang Valley and Sulham Stream Biodiversity Area is located to the north of the site, on the other side of High Street. The AONB boundary is positioned to the northeast of the site and extends across the M4 to the east. It is noteworthy that the boundary of the AONB was established prior to the M4 being constructed.

The site has been subject to planning applications for employment uses:

- Application reference 20/00476 sought planning permission for 20,000sqm of commercial floorspace B1(c), B2 and B8. This was withdrawn in order to address comments received on the scheme.
- Application reference 21/02029/COMIND sought planning permission for three employment units for flexible uses within Class E (light industrial), B2 and B8.

This was withdrawn in order to address comments received on the scheme.

HELAA site assessment

The site was proposed as an emerging employment allocation (Land north of Arlington Business Park, Theale East Business Centre, Policy EMP6) in the 2020 Regulation 18 version of the Local Plan. The site was proposed to be allocated for 20,000sqm of employment floorspace.

In the Proposed Submission version, the site has been omitted as a proposed allocation. The Employment Background Paper (2023) states the reason as "removed from the LPR following landscape assessment".

The site is considered in the West Berkshire Housing and Economic Land Availability Assessment January 2023 under reference THE8. The conclusion of the suitability section notes that:

"Suitability conclusions: A Landscape Sensitivity and Capacity Assessment has concluded that if the site was developed, either in whole or in part, it would compromise the setting of Theale and its separate identity and character from Calcot. It is therefore recommended the site is not developed for employment uses."

Suitability Assessment: Unsuitable

Availability Assessment: Available

Achievability Assessment: Not assessed due to site being unsuitable"

Turley Landscape has undertaken a landscape and visual assessment (LVA) of the site and has reviewed the WBC assessment. This information was submitted, at the Council's request, to the Head of Planning Policy and Interim Head of Planning on 11th May 2022. Unfortunately, there is no reference with the Plan or the evidence base that the information has been considered in the formation of the Publication version of the Local Plan. For ease the information is submitted at Appendix 2.

It is Panattoni's position that both the Visual and Landscape Sensitivity of the site have been overstated and that the Landscape Capacity of the site is much greater than posited by the Council. The LVA sets out that the site is of Medium Visual Sensitivity, Medium/Low Landscape Sensitivity and has a Medium/High Landscape Capacity to accommodate future employment development.

Whilst the introduction of employment development on this site would result in harm to the character and appearance of the Site itself (as any employment development of green field sites would), the strong enclosure of the Site by existing roads, development and vegetation, the weak association of the site with the wider

countryside and the association with other employment sites in the local context would mean that, (subject to an appropriate design and landscape strategy) development could be accommodated with few adverse landscape or visual effects beyond the Site itself.

As a consequence, the LVA considers that the site is an appropriate site for future employment development.

The following design principles would allow for employment development on the Site whilst minimising potential landscape and visual impacts:

- Focus principal development areas in the central and western parts of the site to maintain the separate identities of Theale and Calcot

- Create a strong landscape belt along northern edge of the site to form a green corridor, provide screening of the northern edge of development and form an enhanced edge to the adjacent footpath route between Theale and the AONB;
- Retain existing perimeter hedgerow and planting belts and reinforce with additional planting;
- Integrate tree planting within and around development areas to provide screening and visual enclosure to the site, increase local biodiversity and soften the appearance of proposed buildings;
- Incorporate pedestrian and cycle routes within site layout and connect with existing network of routes in the local area;
- Soften and screen car parking and goods yard areas with tree and hedgerow planting.

The submitted proposals have incorporated the recommendations.

The site comprises an area of rough grassland adjacent to the settlement edge of Theale. Existing employment and commercial land uses are located to the south and north-east of the site and the settlement of Theale lies to the west. The site is cut off from the wider countryside (including the AONB landscape to the north and northeast) by these areas of development and by the network of roads which encloses the site on all four sides. The site currently forms an open area of undeveloped land on the edge of the settlement and has no demonstrable attributes which elevate it above the ordinary in landscape or visual terms.

It is also important to note that the Council have also proposed residential uses in the emerging Regulation 19 Local Plan on the other side of the High Street. They have been assessed through the plan-making process including landscape terms and found acceptable. It is plain that the Council consider development in the vicinity of the site is acceptable.

The removal of the Site as a proposed employment allocation was unfounded and has compounded issues in relation to employment need within the Borough.

The Opportunity

Since the most recent application (21/02029/COMIND) was withdrawn in January 2022 the proposal has been re-visited. The revised proposals have been submitted under preapplication request 22/03049/PREOPD and are currently under consideration. The scheme seeks to address the comments received from Planning and Technical Officers during the course of that application, particularly in response to concerns over the landscape sensitivity of the site.

This has resulted in a scheme which increases the landscape buffers around the edges of the site and sets back the site creating more of a landscape setting for the site. The buildings have been further set back from High Street reducing their visibility from the Theale Conservation Area.

The landscape strategy for the site looks to create a strong landscape buffer that softens the interface between the site and the adjacent village of Theale. These buffers will be utilised for the creation of a mosaic of habitats while also reinforcing the existing boundary vegetation. Internally, the landscape design will seek to create an attractive formal business park feel through the use of hedgerow, larger stature trees, close mown grass verges and ornamental planting with breakout space created for the benefit of employees and visitors to the site.

The masterplans are provided as Appendix 3 to these representations.

Site Suitability

Flood Risk and Drainage

In support of planning application 21/02029/COMIND a Flood Risk Assessment was prepared by BWB. The assessment demonstrated that the site lies within Flood Zone 2 and that modelling undertaken in the FRA with proposed mitigation embedded into the design of a scheme demonstrates that the site will lie in Flood Zone 1 post-development. SuDs features can be designed into the scheme, likely to be maintained by a management company in perpetuity.

Flood risk and drainage is not considered to represent a constraint to development of the site.

Ecology

A Preliminary Ecological Appraisal and a Preliminary Bat Roost Assessment was prepared by Middlemarch in support of application 21/02029/COMIND. This has been supplemented by a Walkover Survey to ensure the findings remain relevant.

Based on the finding of the ecological appraisals the site, ecology is not considered to represent a constraint to development.

Archaeology

A desk-based archaeological report was prepared by TVAS in support of application 21/02029/COMIND.

This demonstrated that the proposals are acceptable subject to the completion of a scheme of evaluation which can be dealt with through a future planning application and via a suitably worded planning condition.

Ground Conditions and Contamination

A Phase 1 and 2 Geo-environmental Assessment was prepared by BWB in support of planning application 21/02029/COMIND. This includes boreholes, puts and two preliminary rounds of ground gas monitoring.

The investigations confirmed that there was no visual or olfactory evidence of contamination with no identified contaminants above the health screening levels at the site. Ground gas protecting measures are not indicated to be required at the site.

Minerals

A Sand and Gravel Recovery Report was prepared by BWB, alongside the above Phase 1 and 2 survey, in support of planning application 21/02029/COMIND.

The report finds that deposits of sand and gravel exist at the site, however the deposit is likely to be economically and environmentally unviable due to:

- Limited suitable/ easily accessible resource thickness;
- High groundwater levels and saturation of the gravel deposit;
- Dewatering and stability issues, including associated costs; and
- Vehicular movements and resultant environmental impact.

On the above basis, it is considered that the deposit would be of little commercial interest in line with the Replacement Minerals Local Plan (RMLP) Saved Policy 2.

Noise

A Noise Assessment was prepared by Tetrattech in support of application 21/02029/COMIND.

It concluded that "Given the favourable results of the assessment described above and the inclusion of intrinsic mitigation as described within this assessment, no nearby businesses are expected to have unreasonable restrictions put on them as a result of the proposals. In addition, it is considered that the continued commercial/industrial use of the site will not have an adverse effect on the tranquillity of the areas and local access to areas of greater tranquillity."

Noise is therefore not a constraint to development of the site. The employment use of the site is not sensitive to the proximity of the M4.

Transport

A Transport Assessment was prepared by David Tucker Associates in support of planning application 21/02029/COMIND, following pre-application discussions with West Berkshire Highways and Highways England.

It confirmed that suitable vehicular access can be achieved onto Hoad Way, with the required visibility splays achieved.

The Transport Assessment finds that the percentage increase on any single movement will be a maximum of 5% during peak periods. This level of traffic is well within daily variation of background flow.

Assessments have been undertaken of the principle junctions around the site including the M4, which confirm they are well within their theoretical capacity.

The site is sustainably located. It is located within 150m of existing bus stops that provide half hourly services between Reading and Newbury. In addition, Theale Station is within 900m of the site with services between Newbury and London Paddington. The site is within walking distance of Theale High Street that provides a range of local services, as well as being within walking distance of residential development within Theale or Calcot to the east.

Parking and cycle parking can be provided in accordance with the relevant standards.

The proposed development will not result in an unacceptable impact on highway safety, and transport impact is therefore not considered a constraint to the allocation of the site for employment uses.

Air Quality

An Air Quality Assessment was prepared by Tetra Tech to support planning application 21/02029/COMIND.

The Assessment established that during the construction phase, site specific mitigation measures detailed within the assessment will be implemented. With these mitigation measures in place, the effects from the construction phase are not predicted to be significant.

During the operational phase, detailed dispersion modelling of traffic pollutants has been undertaken for the proposed development. The long-term (annual) assessment of the effects associated with the proposed development with respect to Nitrogen Dioxide (NO₂) is determined to be 'negligible'. With respect to PM₁₀ and PM_{2.5} exposure, the effect is determined to be 'negligible' at all identified existing sensitive receptor locations. The effect at ecological receptors is not predicted to be significant.

Summary of Site Suitability

As demonstrated above the site is wholly suitable, with no technical constraints which would impede its delivery.

Site Availability

Panattoni is Europe's largest industrial and logistics developer with a track record of delivering over 320 million sq ft of commercial floorspace globally.

Panattoni has extensive experience of delivering high quality commercial facilities including warehouses, distribution centres and logistics parks throughout the UK, as well as across Europe.

As a result they have a substantial track record in the delivery of commercial development and can mobilise quickly. The site is available immediately and the site is deliverable in the short term.

Panattoni are engaging in pre-application discussion, with an application being prepared to be submitted imminently.

The site is available and can be delivered early in the plan period to support the employment need within the WBC.

Conclusions on Land at Hoad Way, Theale

The Site is located to the east of Theale which is a Rural Service Centre for the purposes of the adopted Core Strategy and is within an area of West Berks that has strong functional relationships with Reading, reflected within the Council's emerging Local Plan and the conclusions of the West Berkshire EDNA.

The site is located within 150 metres of Theale High Street and 900m from Theale train station (serving the mainline London

to the West Country route). The site provides opportunities for local residents to gain employment within an accessible and sustainable location.

The Site is within 500m of Junction 12 of the M4 and will provide a new employment development that provides easy access to the strategic road network offering convenient access to Heathrow, London,

the West and the Midlands. This aligns with the priorities of the Thames Valley LIS in locating employment development close to motorway junctions.

This is one of the only sites within West Berkshire within such proximity to a motorway junction which is not constrained by the North Wessex Downs AONB. It should, therefore, be considered as a highly desirable location to meet the Council's employment needs and preferable to other sites within similar proximity to Junctions 13 and 14 of the M4.

The above position was recognised by West Berkshire Council through its Regulation 18 Local Plan which identified the site as a proposed allocation for employment land through emerging Policy EMP6 (Land north of Arlington Business Park, Theale East Business Centre).

The proposals will assist towards addressing the existing shortfall in industrial floorspace within not only West Berkshire but the wider Thames Valley. The proposals provide an opportunity to attract future occupiers to the District providing a range of unit sizes to support smaller to larger space requirements delivering additional business rates and employment opportunities for the District.

The draft Plan recognises that Theale will be a focus for additional housing through existing commitments and new allocations. Housing growth should be supported by economic growth, to enable residents to live close to where they work, promoting sustainable development and growth, reducing travelling. Land north of the Site is a proposed residential allocation in the draft Plan (Whitehart Meadow, Theale and Former Theale Sewage Works for 100 units and 70 units respectively).

The landscape comments in the 2023 HELAA are disputed. The site has limited landscape value due to its location adjacent the M4. The adopted residential site allocation on the east side of the M4 for 200 units is under construction, which itself is bounded to the north by employment and retail uses which bounds the M4. The site can be considered infill development

The site will contribute to the unmet employment need identified in the draft Plan and is suitably located to deliver a range of employment uses reflective of the needs identified in the employment background papers.

Summary and Conclusion

These representations have been prepared by Turley on behalf of Panattoni in respect of the West Berkshire Local Plan Review 2040 Proposed Submission (Regulation 19) Consultation (January 2023). As set out in these representations the draft Local Plan does not meet the tests of soundness as set out by paragraph 35 of the NPPF and requires modifications. Specifically, the draft Local Plan has not identified sufficient sites to meet the identified need as set out within its supporting evidence base. Additional employment sites, such as land at Hoad Way, Theale is required to be allocated before the Plan can be found sound.

We reiterate that Theale is a key rural service area in the district that is able to support employment growth to support the district's unmet employment needs, supporting the proposed residential allocations north of the site, and contribute to maintaining a thriving rural area.

Land at Hoad Way, Theale is a sustainable and deliverable site that is under single ownership. Panattoni considers there are opportunities for the site to come forward early in the Plan period to meet an identified employment need.

There are no identified technical barriers to development, as identified through the technical studies summarised in these representations and submitted in support of the previous planning applications. Panattoni look forward to working with the Council throughout the Local Plan process.

2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable	No

<p>alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>This policy seeks to allocate 20,400sqm of B2/B8 floorspace over the plan period in Thatcham, specifically on 'Land east of Colthrop Industrial Estate' (Policy ref. ESA1). Paragraph 7.24 explain that this is a 'logical extension and would aid in meeting the identified need in the Urban Area of Thatcham.</p> <p>However, we consider that by focusing all the B2/B8 floorspace over the plan period in one area, this does not allow opportunities for other sites to come forwards which would be able to offer economic benefits to Thatcham and the wider urban area of Newbury and potentially risks stifling the choice and availability of B2/B8 premises.</p> <p><i>Summary</i> The evidence base demonstrates there is demand for small and medium sized sites for employment in the District. The Council's approach to only focus development economic and business development in specific areas of the District appears short-sighted, given there is an identified need and demand for a significant amount of industrial development.</p> <p>In summary, the LPR should be allocating more sites for economic and business development over the plan period that are consistent with the broad spatial strategy, noting that there are many available sites within the HELAA which have been overlooked, including our client's site 'Land at Lower Way Farm' (HELAA ref: THA9).</p> <p>Land at Lower Way Farm, Thatcham</p> <p>5.1 In the context of the concerns raised about the vulnerability of the emerging development strategy and the obvious solution of identifying a greater yield of new homes from the sites available in the HELAA, we now discuss our client's land, which has been overlooked as a sustainable and available site for development.</p> <p>Representations were most recently submitted to the Council on 4 February 2021 in response to the West Berkshire Council Local Plan Review 2020-2037: Emerging Draft Consultation (December 2020) and in support of the land owned by our clients at Lower Way Farm, Thatcham (HELAA ref THA9). The representations set out, in detail, the suitability of the site for development.</p> <p>Following the consideration of the site in the updated HELAA (January 2023) this concluded the site is available, achievable and 'potentially developable in part', dependent on further assessment over whether circumstances exist to support the change to the settlement boundary.</p> <p>In summary, we confirm the site remains suitably located to the south of Thatcham and offers the potential for a sustainable and logical residential development of around 36 dwelling, alongside open space and planting for ecological enhancement.</p> <p>Alternatively, the site also offers the potential for a sustainable and logically located commercial development, which could build on the success of the nearby Riverside Studios employment site.</p> <p>Both options would be in line with the Council's strategy for growth and the settlement hierarchy, as outlined in Policy SP3.</p> <p>The TSG (Stage 2) Strategic Growth Study at paragraph 5.12 states that "small sites such as... Lower Way Farm... should be excluded... as they are not of sufficient scale to deliver a strategic allocation. This does not mean they are unsuitable for development, simply that they fall outside of the scope of this study".</p> <p>We do not agree with this conclusion and this conflicts with NPPF paragraph 69 which highlights the importance of small and medium sized sites in making important contributions to the housing requirement of an area. Further, there are various merits in favour of the site's development. We consider there are compelling reasons for the settlement boundary to be redrawn and the site allocated in the LPR for, preferably residential development. Whilst not exhaustive, the following reasons provide certainty as to why the site is a developable option:</p> <ul style="list-style-type: none"> • There is an identified need for a range of different sized sizes for housing in West Berkshire to meet the indicative housing requirements during the plan period. Due to its modest scale, the site

could be built out quickly in accordance with paragraph 69 of the NPPF and provide for affordable housing.

- The site is immediately adjacent to the built-up area of Thatcham, which is capable of accommodating significant levels of growth, given the range of facilities and services it currently offers and is therefore a sustainable location for development.
- The site has a good relationship with existing residential development to the north and would fit well into the existing pattern of the settlement, providing an appropriate mix of housing type and tenure.
- There are opportunities to create high quality green infrastructure which would present an attractive and distinctive setting to development.
- The site is close to local services and facilities with opportunities for walking, cycling and the use of public transport, which could positively effect sustainability.
- The site is within a Biodiversity Opportunity Area which presents an opportunity to include biodiversity enhancements and net gain for the development. The site is not subject to any other specific environmental or statutory designations, such as Green Belt, Special Protection Area (SPA), Area of Outstanding Natural Beauty (AONB), Site of Special Scientific Interest (SSSI) and is outside of the DEPZ emergency zone.
- The area of the site put forwards for development would be within Flood Zone 1 and at 'very low risk' from surface water flooding (footnote 4).

Availability of THA9

The site is considered to be available for residential or commercial development immediately. Our client's own the land outright, which is in single ownership and there are no legal issues which would prevent the timely delivery of the site for development.

Achievability of TH9

The site is considered to be 'achievable' for the reasons set out below:

- A vehicle access can be delivered via the existing access to Lower Way Farm, onto Lower Way.
- The site is vacant agricultural land – therefore, it is likely there are no significant constraints (such as contamination) which would preclude the development of the site on viability grounds.
- Our client's wish to only work with a reputable developer who is able to demonstrate a good track record for delivery.

In summary, there are no insurmountable constraints to prevent the delivery of 'Land at Lower Way Farm, Thatcham' (HELAA ref: THA9). The site is suitable, available and achievable for residential or commercial development now, which can help the Council to meet its identified housing and employment needs in a timely and sustainable manner. Accordingly, we consider the Council should review its delivery strategy and allocate our client's site for development in the LPR.

Alternatively, the site could be accommodated within a revised settlement boundary, given its modest scale. It is considered that the development of this site would relate well to the existing settlement pattern and urban/mixed use nature of the area and would clearly make a greater contribution to the built form of this area, rather than the wider countryside. Such amendments to settlement boundaries through the LPR provides an opportunity to proactively deliver small and medium-scale sites which will help to boost supply and help meet the Council's housing and employment needs targets across the plan period.

In relation to Riverside Studios (HELAA ref. THA24) the Sustainability Appraisal / Strategic Environmental Assessment (SA/SEA) (November 2022) concludes that development of the site would result in an overall neutral impact, with a positive impact on economic sustainability as the site is promoted for redevelopment of an existing employment area. No negative sustainability impacts have been identified. However, the site is not recommended for allocation as it is an existing employment use for small scale independent businesses and its allocation would not be consistent with the strategy for employment allocations set out in the LPR.

Again, we do not agree with this conclusion, given this is a successful employment site and the absence of any constraints. We consider there are compelling reasons for the site to be allocated for employment, in addition to the allocations proposed in the draft Local Plan Review and suggest the spatial area settlement boundary should be extended to include this site, with an allocation made to incorporate it.

Conclusion

Accordingly, we are of the view that's the Council should consider 'Land at Lower Way Farm, Thatcham' for allocation in the LPR. We have demonstrated the site is developable, suitable, available and achievable now. Therefore, we consider the Council has been premature in overlooking this opportunity.

The site's allocation would, in principle, be consistent with the settlement hierarchy.

Alternatively, there is also an opportunity to simply amend the settlement boundary for Thatcham as part of the Council's review to provide additional opportunities for growth to help meet the Council's housing and employment needs over the plan period.

Similarly, from an economic perspective, our client's site is ideally located to help accommodate the some of the economic needs of the District and would be able to build on the success of 'Riverside Studios' (HELAA ref. THA24) as an employment site, enabling small and medium sized businesses an opportunity to start and grow in Thatcham. Our clients own the commercial premises to the south and west of the site, known as 'Lower Way Farm Riverside Studios', which is a successful established local employment premises. As such, we consider this should be reflected in its allocation in the Local Plan Review as a site for economic development. This will safeguard the modest level of employment opportunities that the site provides.

At this stage, we consider the LPR to be unsound, but have provided our recommendations to ensure the plan is made to be more robust. We therefore trust these representations clearly set out our client's

	<p>position and respectfully request the above is given due consideration by the Council as part of the examination into the West Berkshire Local Plan Review.</p> <p>Attachment:</p> <p>Full rep (inc. appendix A - site location plan, appendix B- Indicative Site Plan, Appendix C - Local Facilities and Services Plan, Appendix D - Physical and Environmental Context Plan)</p>

<p>Please give reasons for your answer</p>	<p>Wokingham Borough Council (WBC) notes that West Berkshire District Council's (WBDC) employment evidence identifies a need for 50,816sqm of office floorspace and a combined 91,109sqm industrial, storage and distribution floorspace over the plan period. Policy SP20 details the strategic approach to addressing economic development needs, Policy SP21 sets out a number of site allocations for industrial land, and Policy DM32 identifies Designated Employment Areas where businesses uses are to be safeguarded. No allocations are made in the Plan for additional office floorspace.</p> <p>The Plan supports the redevelopment and regeneration of existing employment sites. It therefore retains, and identifies new, employment sites which can be intensified to meet some of its identified needs. New allocations for industrial use are anticipated to provide 58,400sqm. However, this is insufficient to meet the full identified needs for industrial land, resulting in a shortfall of 32,709sqm industrial floorspace. There are no estimates provided of how much floorspace the wider policy approach might deliver, and no specific land is identified to provide for office use. As a result, the full identified office need of 50,816sqm remains unmet. WBDC has approached WBC and other duty to co-operate partners to seek assistance in meeting these needs.</p> <p>Like WBDC, WBC has commissioned a new Employment Land Needs Review, to better understand future economic needs, for both office and industrial/warehousing. The key emerging finding of the report is an increased need for industrial/warehousing floorspace across Wokingham Borough, which reflects changes in both the local and sub-regional economy. The report suggests there is no need for additional office floorspace.</p> <p>Work is ongoing to assess the availability, suitability and deliverability of land promoted for economic uses within Wokingham Borough, as part of the Housing and Economic Land Availability Assessment (HELAA), which will help to inform whether these economic needs can be met. However, given the scale of the need for new industrial/warehousing floorspace arising in Wokingham Borough and the small number of sites promoted for economic uses, at this stage WBC confirms that it is considered highly unlikely any of the unmet office or industrial needs from WBDC will be able to be accommodated. Indeed, WBC cannot guarantee meeting the need arising from Wokingham Borough.</p> <p>WBC recognise and support WBDC's ongoing recognition of the arising employment needs and the attempts to reach agreement with other authorities. WBC requests continued engagement with WBDC on this matter as part of the duty to cooperate.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>WBC notes that separate duty to co-operate discussions are ongoing between the two authorities. WBC welcomes these discussions progressing</p>

<p>Please give reasons for your answer</p>	<p>We note that the council have a long history of under-provision of employment floorspace, including offices and industrial uses. The council's most recently published evidence base documents, including the West Berkshire Employment Land Review (ELR) Addendum December 2022 and the Employment Background Paper January 2023, once again identifies a significant shortfall in provision against identified need.</p> <p>As drafted, Policy SP21 allocates four sites (ESA1; ESA2, ESA4; and ESA6) for B2/B8 industrial uses, and two sites (ESA3 and ESA5) for Egjii/B2 (office/industrial) uses. Assuming sites ESA3 and ESA5 adopt a 50%/50% split of these uses, the total quantum of new employment floorspace to be provided for across the plan period is as follows:</p> <ul style="list-style-type: none"> • B2/B8 = 63,001 sqm • Egjii = 5,800 sqm <p>This is clearly significantly below the identified need for 91,109 sqm of industrial floorspace and 50,816 sqm of office space as set out at paragraphs 7.8 and 7.4 of the Draft LPR Proposed Submission Version respectively. The LPR is also clear that these demand figures are a minimum.</p> <p>As such, and at present, it is therefore considered that the plan does not meet the government's aims as set out within the NPPF to build a strong and competitive economy, particularly Paragraph 81 which states that Planning policies and decisions should help create the conditions in which businesses can invest, expand and adapt.</p> <p>We note that our client's land at Larkwhistle Farm, Brimpton Common (ref. BRIM3) has not been identified as an allocated employment site, as promoted. The published updated Sustainability Appraisal (SA) / Strategic Environmental Assessment (SEA) November 2022, states that:</p> <p>"Overall development of the site would have a neutral impact on sustainability. There is a positive impact on economic sustainability as the site is promoted for employment uses. There are a number of unknown sustainability impacts, especially in relation to environmental sustainability as the final use of the site is unknown.</p> <p>Mitigation measures would be required to ensure no negative impacts occurred, and in many cases could result in a positive impact. There are also a number of potential negative impacts on environmental sustainability due to the rural nature of the site requiring car use to access the site, as well as the loss of a greenfield site. Mitigation measures would be required."</p> <p>The Estate object to the council's approach not to allocate this site for much needed employment land on this basis. Firstly, whilst a 'brownfield first' approach is generally supported, it is evident that the lack of available, or suitable brownfield sites means that the council has a duty to consider greenfield sites as alternatives. Secondly, the NPPF paragraph 85 is very clear that in seeking to build a strong and competitive economy, the council should recognise that sites may have to be found in locations that are not well served by public transport:</p> <p>"Planning policies and decisions should recognise that sites to meet local business and community needs in rural areas may have to be found adjacent to or beyond existing settlements, and in locations that are not well served by public transport. In these circumstances it will be important to ensure that development is sensitive to its surroundings, does not have an unacceptable impact on local roads and exploits any opportunities to make a location more sustainable (for example by improving the scope for access on</p>

	<p>foot, by cycling or by public transport). The use of previously developed land, and sites that are physically well-related to existing settlements, should be encouraged where suitable opportunities exist.”</p> <p>As such, we object to the council's approach to selecting suitable sites as it is not consistent with national policy, nor does the LPR result in a positively prepared plan as it does not meet the objectively assessed needs for employment. The LPR is therefore unsound.</p> <p>Previous representations in respect of BRIM3 are appended for the Inspectors consideration (Appendix D) to highlight that this is a suitable location to accommodate new employment development. Whilst technically classified by the NPPF as a 'greenfield site', it is important to note that the site has been previously used for mineral extraction and the resultant land is of poor agricultural quality; development of this site would not, therefore, result in the loss of the best and most versatile agricultural land.</p> <p>We note that council's comments regarding opportunities to improve accessibility by foot, cycling or by public transport and wish to highlight that the Estate's adjoining land ownership means that there would likely be opportunities to facilitate pedestrian access to nearby local facilities through creating a connection to the public footpath network.</p> <p>In conclusion, The Wasing Estate have concerns over a number of the policies as drafted, and overall consider that the plan is not consistent with national planning policy, and particularly the council's strategy and approach in respect of new housing and employment development has not been fully justified. The LPR does not identify sufficient residential or employment sites to meet the district's housing and employment needs. Furthermore, as drafted a number of policies do not provide adequate flexibility and support to existing rural businesses to achieve a prosperous rural economy in West Berkshire. As a result, the Plan is not sound and should be modified to address the concerns in this letter prior to submission.</p> <p>Attachment:</p> <ul style="list-style-type: none"> Appendix 4 - Reg 18 consultation BRIM3

Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	[See attached for Appendix A] 1.0 Introduction and Background 1.1 These representations are submitted on behalf of our client, Hope & Clay Construction Ltd, in response to the West Berkshire Local Plan Review Proposed Submission (Regulation 19) Consultation.

Background

1.2 Hope & Clay Construction Ltd are located to the north of the existing Easter Park site, which comprises a variety of employment uses including office (Class E(g)) (formerly B1), light industrial (Class B2) and warehouses (Class B8), as well as sui generis uses for vehicle repair and MOT. Prior to the development of the business park, the site, formed part of a saw mill and charcoal works. To the east of the site lies managed woodland and the Pinelands caravan park, whilst to the north, approximately 90 metres from the site are a line of residential dwellings along Padworth Common. To the north-west of the site is AWE Aldermaston, a nuclear research site.

1.3 Construction of the new Hope & Clay offices and warehouse finished in 2022 following approval by the Council in September 2014 for 1907 sqm of warehouse (B8) building and associated offices (B1a) for the storage of construction machinery and plant with associated access, parking and landscaping (ref. 14/01037/COMIND). At the time of approval, the council's Economic Development Officer considered that *"If Hope and Clay Ltd are able to consolidate onto one site, it is very likely that the business will be able to grow and develop further, employing more people and contributing to the local supply chain."*

1.4 Despite the site's long standing and existing use as an employment site, Easter Park is located in land outside of the defined settlement boundary and is not recognised within the adopted local plan as a Protected Employment Area as listed at Appendix G of the adopted Core Strategy. Currently, the adopted policy position for development at Easter Park is set out at Policy CS9 of the Core Strategy which states that, with regard to proposals outside of defined employment areas it states proposals for business/B8 uses will be assessed against compatibility with uses in the area surrounding the proposal and capacity and impact on the road network.

1.5 The Core Strategy Paragraph 5.46 also identifies a shortfall of B8 floorspace of approximately 24,000sqm in the district and a significant shortfall of 121,000 sqm of office space.

Housing and Economic Land Availability Assessment (HELAA) February 2020

1.6 Land adjacent to Easter Park ('Land off Benyon Road, Easter Park, Tadley') has been promoted for Employment (B1, B2 and B8) uses with an identified capacity of 8,400 sqm of floorspace. The assessment of the site was first set out within the Housing and Economic Land Availability Assessment (HELAA) in February 2020 (HELAA ref. ALD6).

1.7 Consistent with the methodology, the site was not automatically excluded from the site assessment at Stage 1b despite its noted location within the inner Atomic Weapons Establishment (AWE) Aldermaston planning consultation zone, with the document noting that *"Whilst the HELAA methodology identifies notified safety zones as an automatic exclusion criteria, it also states that the impact will be assessed on merits, taking into account the type of development and the nature of the hazard. This assessment will be undertaken in stage 2 of the HELAA."*

1.8 At Stage 2, the site's location adjacent to an existing employment (industrial) area was noted, as was the fact that this industrial estate is not a Protected Employment Area. Stage 2 concluded with: *"The proposed commercial use would have to be considered carefully with respect to management and control in an emergency due to its proximity to the AWE. Site is adjacent to an existing employment area, and so allocation would be dependent on a review of the District's employment needs through the Local Plan Review. Further information required on a number of matters, including highways and ecology, before a robust decision can be made."* It was identified as being available, achievable and *"potentially developable in part"*.

Local Plan Review 2020-2037 Emerging Draft December 2020

1.9 In December 2020 the council published their Local Plan Review 2020-2037 Emerging Draft, informed by a number of evidence base documents, including the HELAA (2020), the Employment Land Review (2020) the Western Berkshire Functional Economic Market Area Assessment (FEMA) (2016) and the West Berkshire Economic Development Needs Assessment (EDNA) (2016).

1.10 Draft Policy SP20 made provision for 62,00 sqm of office (Class E) floorspace and 65,000sqm of industrial, storage and distribution floorspace in the District over the plan period, seeking to address the shortage as outlined in the Employment Land Review (2020), which stated:

"We estimate that as a minimum 65,000 sq m of new floorspace should be provided for office use in the next plan... The Council should scope the next generation of policies so that, if market demand for offices strengthens, it is clear that the 65,000 sq m requirement is a minimum and policy is flexible and supportive for all forms of office development." (Paragraphs 10 and 11); and

"... Demand is also more pressing given the current market shortage, and there is a need to frontload the plan with 16 ha of easily deliverable sites. Four or possibly five potentially suitable sites are identified through the HELAA that are capable of meeting the need for industrial floorspace. All of these sites are extensions to existing employment areas, and these are in the main area of market demand in the east of the District." (Paragraph 12)

1.11 The findings of the Employment Land Review document (dated August 2020) prepared by Stantec in relation to industrial, storage and distribution floorspace also reflect earlier findings of the Berkshire Functional Economic Market Area Assessment (FEMA) and Western Berkshire Economic Development Needs Assessment (EDNA) produced in 2016. The executive summary of the EDNA concluded that: *"Demand for industrial space remains strong and very low levels of vacancy reflect a limited supply of industrial accommodation (particularly modern, good quality space). Development of new industrial space in the FEMA has been limited in recent years, with much of the existing stock relatively dated and in need of refurbishment. Local commercial property agents report that demand for industrial premises is currently outstripping supply, and an upward trend in industrial rental values in recent years has led to new speculative industrial development being just about viable within the FEMA. The key issue going forward is a lack of new land and/or space to accommodate new development."*

1.12 Therefore it was clear that provision of additional floorspace proposed by draft Policy SP20, including through the creation of new Designated Employment Areas (DEAs) and extensions to existing DEAs, would go some way to meeting the overall demonstrated need.

1.13 Furthermore, the ELR (2020) made a series of recommendations to the council. This included to:

- Consider allocating the site for industrial uses ALD6 Land off Benyon Road, Easter Park, Tadley; and, furthermore;

Designate as (Protected Employment Areas (PEAs) Greenham Business Park, the Vodafone Campus, **Easter Park**, Langley Business Court, and the Old Mill Trading Estate. (Our emphasis added);

- It clarifies: *“The PEAs are designated for B class use, and their boundaries and role should be reviewed to achieve a balanced portfolio to meet future requirements. There is a general presumption for employment generating uses within the PEAs and against non-employment uses”*; and
- Para 4.155 of the ELR document recommends *“Easter Park – is a modern business park to the south-east of AWE Aldermaston, and comprises office, light industrial and warehousing activity. There is one small remaining parcel that has permission for warehousing. **The Park should be designated as a PEA.** Land adjoining to the northeast is promoted through the Call for Sites (ALD6 2.1 ha), and is within an area of market attraction for employment uses, and we would support the inclusion of ALD6 within the Easter Park PEA designation.”* (Our emphasis added).

1.14 As such, and following the recommendations of the EMR, Regulation 18 draft Local Plan Draft Policy SP21 ‘Sites allocated for economic development’ sought to a) classify formally Easter Park as an existing employment area by designating it as a ‘Designated Employment Area’ but also b) propose an extension of the site to achieve 8,400 sqm of new employment floorspace. The site was proposed as Site Allocation EMP3.

1.15 Draft Policy SP4 (and supporting Figure 3) identified that Easter Park in its entirety falls within the Detailed Emergency Planning Zone (DEPZ) of Atomic Weapons Establishment (AWE) Aldermaston, which are regulated by the Radiation (Emergency Preparedness and Public Information) Regulations 2019 (REPPPIR). The draft policy stated that *“In the interests of public safety, residential development in the Detailed Emergency Planning Zone (DEPZ) of AWE Aldermaston and AWE Burghfield is likely to be refused planning permission by the Council, especially when the Office for Nuclear Regulation (ONR) has advised against that development.”* It went on to state that consultation arrangements for planning applications within the DEPZ, for any new development that could lead to an increase in residential or non-residential population (thus impacting on the off-site emergency plan) will be undertaken with the Office for Nuclear Regulation (ONR).

1.16 As such it is considered that the proposed allocation of the site adjacent to Easter Park under Draft Policy SP21 was made with full regard to site’s location within the DEPZ and the Government Regulations related to Radiation Emergency Preparedness.

1.17 In support of the proposed allocation of the site for employment development in the draft Local Plan, and to address points raised in the HELAA, Hope & Clay construction submitted the following information to further demonstrate that the site is suitable for development:

- Preliminary Ecological Appraisal.
- Illustrative Masterplan.
- Transport Assessment.

1.18 The submitted Illustrative Masterplan showed how the proposed expansion of Easter Park, on land adjacent to the existing Hope & Clay site, would deliver approximately 8,245 sqm of employment floorspace (GEA) (broadly in line with the proposed allocation), made up of 3,745 sqm of class E(g) (formerly B1) floorspace; 2,160 sqm of class B2 floorspace; and 2340 sqm of class B8 floorspace, across five units, ensuring an appropriate balance between site coverage and site constraints i.e. the required restoration area/buffers/wayleave.

2.0 Representations to Local Plan Review Proposed Submission (Regulation 19) Consultation

2.1 The purpose of a Regulation 19 consultation is to ensure that the plan is legally compliant and sound. To ensure the local plan is sound, it should be:

- Positively prepared - Provides a strategy which, as a minimum, seeks to meet West Berkshire Council’s objectively assessed needs and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development.
- Justified – ensuring that the Plan provides an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – ensuring that it is deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy - Enabling the delivery of sustainable development in accordance with the policies in the National Planning Policy Framework (NPPF) and other statements of national planning policy, where relevant.

2.2 It is in light of these criteria that the Local Plan Review Proposed Submission (Regulation 19) version has been considered.

Policy SP4 ‘AWE Aldermaston and Burghfield’ / Draft Policy SP20 ‘Strategic Approach to Employment Land’ / SP21 ‘Sites Allocated for Employment Land’

2.3 Representation are made in regards to West Berkshire Council’s proposed amendments to Policy SP21 which have since removed Easter Park as a proposed Designated Employment Area, and therefore remove EMP3 Land off Benyon Road, Easter Park as a proposed Extensions to Designated Employment Area. In short, the consultation revisions to Draft Policy SP21 confirm that West Berkshire Council are

no longer proposing to allocate Easter Park as designated employment site, nor are they considering its extension for additional employment floorspace.

2.4 The published updated Sustainability Appraisal (SA) / Strategic Environmental Assessment (SEA) November 2022, with regards to the site's expansion, site 'ALD6 Land off Benyon Road, Easter Park', simply states that:

"The site will not be taken forward. The site is located within the AWE DEPZ and therefore, it is not considered suitable for development."

2.5 As such, comments in respect of Draft Policy SP21 are interlinked with the council's approach to new development within the DEPZ of Atomic Weapons Establishment (AWE) Aldermaston, as set out at Draft Policy SP4, and so the two are considered together below.

2.6 On 22 May 2019, the government introduced the new Radiation (Emergency Preparedness and Public Information) Regulations (REPPiR) 2019 to strengthen the national emergency preparedness and response arrangements for radiological emergencies. In essence, the regulations are designed to provide a framework for dealing with a potential radiation emergency arising from sites such as AWE Aldermaston. Regulation 8 requires that the local authorities are responsible for setting Detailed Emergency Planning Zones (DEPZ) for nuclear sites where there could be a radiation emergency with off-site consequences, on the basis of the operator's recommendations. Regulation 11 requires that the local authority must prepare an off-site emergency plan for responding to such an emergency, within the DEPZ area. It is not disputed that the site at Easter Park is within the DEPZ of AWE Aldermaston. West Berkshire Council's website indicates that an Off-Site emergency plan is being developed in the Spring of 2023, but also states that this document is "**not a public plan**."

2.7 Paragraph 5.1.4 and Table 17 of the SA/SEA Environmental Report November 2022 provide the council's commentary on changes to Policy SP4 related to AWE Aldermaston (and Burghfield), including to suggest that any new development within the DEPZ will likely be refused (where previously this was limited to residential development), and state that changes "*reflect new information on DEPZ and off-site emergency plans*". It summarises that the changes are likely to result in negative impacts on social sustainability as the policy seeks to restrict development (residential and employment) from taking place within the DEPZ, and therefore, there will be impacts on the provision of housing, affordable housing and new employment opportunities in the area. We therefore consider this to be a fundamentally flawed approach, for reasons set out below.

2.8 In the first instance, it is important to note that the only change in circumstance to the council's assessment of the site at Easter Park has been the submission by Hope & Clay Construction Ltd of additional supporting information in respect of ecology and highways, in addition to a masterplan demonstrating how additional employment floorspace on the site can be suitably and realistically achieved.

2.9 The updated HELAA (January 2023) once again confirms (paragraph 2.22) that sites within notified safety zones (eg AWE Aldermaston) will not automatically be excluded and instead that "*the impact will be assessed on merits, taking into account the type of development and the nature of the hazard. Therefore sites within notified safety zones have gone through to Stage 2 of the HELAA (site assessment) and advice from the Ministry of Defence has been fed into the site assessments.*" Appendix 4 of the HELAA once again concludes that that the site is available, achievable and 'potentially developable'.

2.10 Therefore, it is evident the recommendation drawn by the SA/SEA 2022 is clearly inconsistent with the conclusions of the HELAA and the HELAA methodology, and **no clear reason has been provided by the council as to why this suitable employment site is ruled out purely because of its location within the AWE Aldermaston DEPZ.**

2.11 In respect of the site's location within the DEPZ, the Regulation 18 draft Local Plan was published for consultation after the REPPiR Radiation (Emergency Preparedness and Public Information) Regulations 2019 were revised, and therefore it is reasonable to assume that the Council would have taken account of these Regulations in the preparation of that plan and in the formal allocation of Easter Park as an Designated Employment Site, and in the allocation of adjacent land for its expansion.

2.12 At the time of preparation of the Regulation 18 draft plan there had been no increase in risk at AWE Aldermaston: in the AWE Detailed Emergency Planning Zone Report dated 4 March 2020 prepared by the Council's Emergency Planner Ms Richardson for Members of West Berkshire Council it was stated in Section 3 under the heading "*risk management*", that "*It is important to note that there are no changes in activity on the AWE sites, and there is no greater risk to the public than before this legislation was introduced.*" This is repeated in the conclusion at paragraph 7.1. Subsequently, a further 'declaration of no change' for AWE Aldermaston was issued in November 2022.

2.13 Nevertheless, and importantly, the Regulations and the Guidance do not preclude development within the DEPZ. They do not state anywhere that development should be prevented from coming forward just because it is in the DEPZ. On the contrary, REPPiR Regulations recognise that the population within the DEPZ will naturally change within the life of the emergency plan hence why Regulation 12 of REPPiR requires the Council to, at intervals not exceeding three years, review and revise the emergency plan. The Regulations also envisage that development will come forward within the DEPZ, and there are many passages in the Guidance which acknowledge that development will take place in the DEPZ, particularly Paragraph 250: "*In order to understand if a change in the local area necessitates a redetermination [of the DEPZ], the local authority should consider developments within or adjacent to the detailed emergency planning zone taking into account their potential impact on the effectiveness of the emergency plan.*"

2.14 As such, it is only the Council's role to consider whether the Proposed Development can be accommodated within the off-site emergency plan, not to treat the DEPZ as an absolute constraint to development. In short, the REPPiR-19 does not support the Council's moratorium on development in the DEPZ.

2.15 In respect of the council's reference to new information regarding off-site plans, as this key piece of evidence has not been made publicly available, the approach to amending the local plan to prohibit development on this basis is unjustified. Nevertheless, Paragraph 13 of the appeal decision at Boundary

Hall, Tadley in 2011 (a copy of the SoS decision is provided at Appendix A), confirms the Secretary of State's conclusion an off site plan is designed to be flexible and can be amended to accommodate the implementation of development proposals: "*the Off Site Plan is designed to be flexible and extendable and that, while it is possible that the implementation of the application scheme would necessitate changes to the Plan, the evidence does not lead to the conclusion that the Plan would fail*". (paragraph 13).

2.16 As such, we consider that the strategy is simply not justified or informed by the evidence, and that the council's misguided approach to the role of the REPRIR has significant repercussions to the delivery of much needed employment floorspace, and the objective of sustainable development, which includes balancing employment opportunities with providing new homes and conserving the environment. It is also considered that, given that the starting point for development should be that there is a presumption in favour of sustainable development (NPPF Paragraph 10), we do not consider that the Plan, particularly Policy SP4 (particularly in reference to development likely being refused) has been positively prepared.

2.17 The Council's approach risks undermining the long term viability of this existing and established employment site. Without recognition of its existing status, or enabling suitable opportunities for growth, the site is restricted by countryside policy; furthermore if it becomes unviable that businesses cease to operate from the site, the result will be a vacant, sterilized, previously developed site.

2.18 As stated above, the council have a long history of under-provision of employment floorspace, including offices and industrial uses. The council's most recently published evidence base documents, including the West Berkshire Employment Land Review (ELR) Addendum December 2022 and the Employment Background Paper January 2023, once again identifies a significant shortfall in provision against identified need.

2.19 As drafted, Policy SP21 allocates four sites (ESA1; ESA2, ESA4; and ESA6) for B2/B8 industrial uses, and two sites (ESA3 and ESA5) for Egiii/B2 (office/industrial) uses. Assuming sites ESA3 and ESA5 adopt a 50%/50% split of these uses, the total quantum of new employment floorspace to be provided for across the plan period is as follows:

- B2/B8 = 63,001 sqm
- Egiii = 5,800 sqm

2.20 This is significantly below the identified need for 91,109 sqm of industrial floorspace and 50,816 sqm of office space as set out at paragraphs 7.8 and 7.4 of the Draft LPR Proposed Submission Version respectively. The LPR is also clear that these demand figures are a minimum. As such, and at present, it is therefore considered that the plan does not meet the government's aims as set out within the NPPF to build a strong and competitive economy, particularly Paragraph 81 which states that Planning policies and decisions should help create the conditions in which businesses can invest, expand and adapt.

3.0 Conclusion

3.1 In conclusion Hope & Clay Construction Ltd object to the West Berkshire Council Regulation 19 submission version of the Local Plan Review (LPR) to 2039 on the basis that it has not provided an appropriate, evidence-based strategy for development. It is considered unsound for the following reasons:

- The LPR fails to recognise and support the growth of existing employment sites including Easter Park and risks undermining their success and viability, which is inconsistent with national planning policy;
- There is a significant shortfall in employment land provision and the LPR does not identify sufficient additional employment sites to meet the district's employment needs in the context of a consistent under-supply. This is inconsistent with national planning policy;
- The proposed removal of Easter Park and proposed extension (site ref. ALD6 - Land off Benyon Road, Easter Park) due solely to the location of these sites within the DEPZ of AWE Aldermaston, has been done so without due regard for the remit of the REPRIR (2019) regulations and is inconsistent with the available evidence base. We consider that complete change of position is not justified by the DEPZ issues, which does not represent a moratorium on development. We consider this strategy to be unjustified and draft Policy SP4 not to have been positively prepared.

3.2 As a result, the Plan is not sound and should be modified to address the concerns in this letter prior to submission. We trust this Statement clearly sets out our client's position at this stage and respectively request that the above is given due consideration as part of any examination into the West Berkshire Local Plan. Our client would like the option of participating in the examination of the plan to elaborate on these matters.

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable	

development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	Our main concern is that the whole approach to the regeneration of the LRIE is unsound on account of the lack of a proper planning policy context and site-specific guidance to control the development or redevelopment of the area – the strategy is inappropriate for a development of this scale.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	In addition to a site-specific policy, it is recommended that the LRIE is added to Table 4 of Policy SP21 Sites Allocated for Employment Land.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No

Please give reasons for your answer	<p>We believe the approach is too passive. If "Positively Prepared" means working with all local stakeholders and in particular landowners, it is clear to us that certain key stakeholders could have been persuaded to resolve the issue of lack of employment sites in suitable locations.</p> <p>Newbury Town Council under a Conservative administration resolved to include development of Newbury Showground as part of its Vision under successive political administrations since 2018. The site is very convenient for the occasional events held there by the Newbury & District Agricultural Society (NDAS), aimed largely at the rural business sector.</p> <p>However this site, now largely Brownfield although located in planning terms in open countryside just inside the AONB, is much under-used. We are aware that there is significant – but not majority - support for further development within NDAS membership at present but we would expect and wish for the trend to continue towards making the Showground a hub for distribution, led by its situation at the geographic centre of the AONB but also easily accessible by the national highway network and within close reach of a varied workforce in Newbury & Thatcham We also believe it could enhance its appeal over the Plan period as a rural business hub for a wider area of North Wessex & beyond.</p> <p>It also links to the Council's unanimous aspiration to redevelop the London Road Industrial Estate (LRIE), which is a DEA owned by the Council. Our view is that, in the short to medium term, some business occupiers at LRIE might be relocated to the Showground to enable that site to be redeveloped earlier in the Plan period than is otherwise likely. As stated in 7.7 "there is little or no viability in the [office development] market" at present, so the current range of LRIE business occupiers is likely to remain,</p>

	<p>leaving the “[un]attractive environment for modern day use” (7.10) there for the foreseeable future – as it has been for the past 20 years since the Council first realised its estate was seriously in need of redevelopment. As per 7.6: “market signals are generally not sufficient to trigger new build office development on a speculative basis”. That seems to be admitting that LRIE will not be redeveloped for purely commercial use any time soon.</p> <p>We also have concerns that by encouraging office development in DEAs (as implied in 7.7 second sentence) such as LRIE, where there are many ‘blue collar’ jobs in the motor industry, the future viability of these businesses may be endangered unless there are other employment sites within a short distance from their customer and employee base. These businesses could therefore be relocated at the Showground.</p> <p>There is currently not enough evidence that the policy is Justified or Effective. We have no confidence that LRIE will be redeveloped for commercial use within the Plan period without significant proactive intervention in the employment land market by the District Council. The Liberal Democrat Group is of the view that by allowing the re-provisioning of the football facility in Faraday Road and by implementing the consented Gateway Plaza (despite and indeed because its residential component will improve the overall financial viability of LRIE redevelopment) the Council will attract significant interest in commercial development of the rest of the site, provided some of its current occupiers can be relocated at least temporarily. This is touched on also in our response to SP12.</p> <p>We would like to see the Council reaching out to NDAS and all rural businesses through the newly formed West Berkshire Rural Business Forum, the North Wessex Downs AONB Management Board and local councils across the District with its “vast rural area that is host to a large number of small and medium sized enterprises” (7.16) and beyond and to work up a strategy that sees Newbury Showground become a hub for the North Wessex rural business community.</p> <p>This could perhaps also relieve Membury of some of the HGV traffic that currently this Council is helping to impose on minor rural roads (e.g. Ermin Street) by allocating employment sites relatively remote from where their workforce live. Membury is not sustainable and its use for employment has harmed the AONB significantly more than we believe Newbury Showground would. We know that unauthorised and uncontrolled access through Membury Services is made by vehicles on journeys generated by this employment area, because that cuts 5 miles off the journey onto the M4 at J14.</p> <p>This is a matter outside of the control of the Council as Local Highway and Planning Authority but unless it is properly legislated for and enforced, J13 in contrast involves less than 8 miles distance from the national highway network and is 12 miles nearer Newbury than Membury and immediately adjacent to the Showground. It would be far more suitable than Membury as a dedicated employment area.</p> <p>Having a major distribution centre at the Showground is likely to also reduce demand for such development at Colthrop, which would in turn reduce the number of HGVs using the A4 through Newbury & Thatcham. This would encourage greater uptake of active travel on the A4 and its feeder roads and therefore be more consistent with national policy.</p> <p>Although Newbury Showground appears to be largely greenfield land and is used for part of the year for grazing, it has substantial areas of hardstanding and several permanent buildings on it. The Newbury Racecourse site was treated as a brownfield site when it was allocated for housing and the proportion of previously developed land on both sites is similar. It also supports some existing employment. Therefore it complies with ‘d’ of policy SP20.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>Not applicable because NDAS is not one of the statutory bodies listed in the Duty to Cooperate</p>
<p>4. Proposed Changes</p>	<p>We have no proposals to change SP20 or its supporting text, which is worthy but likely to be ineffective without changes to SP21 and the list of DEAs, as suggested below.</p> <p>In SP21, delete ESA3 (in Membury) including reference to it in 7.25 and add Newbury Showground.</p> <p>We would need supporting text adding for the Showground, based on the wording in the above section.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>To explain further and provide evidence in support of the above.</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	<p>Yes</p>

6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	<i>IT IS NOT CLEAR THAT ALL LEGAL REQUIREMENTS ARE MET</i>
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable	No

<p>over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p><i>FOR SPECIFIC AREAS SOME OF THESE CONDITIONS HAVE NOT BEEN MET</i></p> <p>Infrastructure Delivery Plan</p> <p>Table4</p> <p>ES 2 and ES 3 total land = 15581sq m Floorspace-Membury Total= 63581sq m for West Berks</p> <p>Therefore §25% of all the industrial floor space is in an area described by the consultants on economics and land use.</p> <p>In a supporting document, Stantec, consultants on employment and land use demand, have stated, regarding Membury, that there is weak market demand and little employment demand. All the demand and population is in the East of the WBC area. In addition they have stated that any distribution businesses should be close to Motorway junctions. Membury is 7km from a motorway junction along a series of country lanes, some undesignated.</p> <p>CI 5.92 “.it is important that employers are encouraged to recruit local people in order to boost the local economy and reduce the need to commute long distances by car.”</p> <p>There is little availability of a local workforce and many will have to drive long distances by private cars or be bussed in. Hence the Objection of some council officers on the use of Membury sites in the future, as they are unsustainable</p> <p>For example on Walkers Logistics current sites at Membury most of the workforce is bussed in from Reading and Swindon. The current proposal for LAM 6 will only make this worse.</p> <p>5.129 and 5.130 “all the development at Membury removes a healthy environmental.....”</p> <p>The generation of traffic from Membury, including significant HGV movements, has removed any leisure activities such as Walking, Cycling or Horse Riding from the local area.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p><i>ALL REFERENCES TO ADDITIONAL INDUSTRIAL DEVELOPMENT AT MEMBURY ES2 AND ES3 SHOULD BE REMOVED.</i></p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	Yes

<p>Please give reasons for your answer</p>	<p>West Berkshire Local Plan Review to 2039 – Regulation 19 Proposed Submission Consultation</p> <p>We write on behalf of our client Green Park Reading No.1 LLP, which is the owner of Green Park. Green Park Reading No.1 LLP (“GPR”) is ultimately wholly owned by Mapletree Investments Pte Ltd (“Mapletree”). This response relates to the Regulation 19 Proposed Submission Consultation of the West Berkshire Local Plan Review (“the LPR”), which is open for comment until 3 March 2023. Deloitte previously responded to two Regulation 18 Consultations on behalf of GPR on 21 December 2018 and 5 February 2021.</p> <p>In writing this letter, we do so under the statutory provisions of a Regulation 19 consultation under the Town and Country Planning (Local Planning) (England) Regulations 2012.</p> <p>Background to Green Park</p> <p>Since acquiring GPR in 2016, Mapletree has been reviewing the Park’s potential, undertaking asset management and considering future opportunities. GPR is keen to support the Council in achieving sustainable development in the Borough.</p> <p>Green Park is a premier business park located in the Thames Valley area, serving the office needs of Reading, Wokingham and West Berkshire. It is situated on the border of the three local authority areas, covering a 79-hectare plot offering high quality office stock and associated amenities, located around a central body of water.</p> <p>Green Park is accessed from the A33 relief road and is located south of Reading town centre. The Park is home to a variety of office occupiers across a range of business sectors. A range of business accommodation is provided, ranging from larger corporate headquarter floorplates to smaller business start-up areas.</p> <p>The Park continues to be highly successful with ongoing interest from both global and smaller companies for office space. In 2016/17, Aukett Swanke undertook a refresh of the Fosters masterplan prepared in 1998 in order to update the development potential of the Park. Mapletree continue to look for opportunities to respond to market demand and manage the planned growth of the Park in a sustainable way. Securing an allocation for employment uses on land at 900 South Oak Way forms part of this ambition (referred to hereafter as the Site (see Figure 1 below)).</p> <p><i>[See attached map - PS1218 Deloitte obo Green Park Reading_Figure 1]</i></p> <p>Previous Response to Regulation 18 Draft Local Plan</p> <p>On behalf of GPR, Deloitte submitted formal representations in response to the LBW Pre-Publication (Regulation 18) Draft Local Plan on 21 December 2018 and 5 February 2021. As part of the previous consultation, GPR proposed a series of changes, including the below:</p> <ul style="list-style-type: none"> • Requested that Green Park was included as a Designated Employment Area; • Requested an emphasis on the need for the continued enhancement of sustainable transport options and infrastructure, in particular the M4 corridor, which serves Green Park; • Requested support for Data Centres; and, • Requested clarification be added to Policy SP 4 that although the Office for Nuclear Regulation will be consulted, it is unlikely this will restrict non-residential development in the Detailed Emergency Planning Zone (DEPZ). <p>Local Plan Regulation 19 Response</p> <p><u>Policy SP21: Sites Allocated for Employment Land Policy</u></p> <p>SP21 identifies three sites that are well established employment areas and sets out that their importance to the local economy will be recognised by classifying them as Designated Employment Areas.</p> <p>The majority of Green Park falls within the administrative boundary of Reading Borough Council and is designated as a Core Employment Area in the adopted Reading Borough Council Local Plan. As a result, GPR consider it appropriate for the area identified above, the Site, to be classified as a Designated Employment Area to reflect its existing approved office uses. GPR reiterates its request that Policy SP21 be amended to include Green Park and for the Site to be allocated as a Designated Employment Area.</p> <p>In accordance with Paragraph 24 of the National Planning Policy Framework, which sets out the need for Local Planning Authorities to cooperate with each other on strategic matters crossing administrative boundaries, GPR considers that classifying the Site as a Designated Employment Area would provide</p>

	<p>continuity to the existing Core Employment Area which falls within the boundary of Reading Borough Council.</p> <p>The Employment Land Review (ELR) which supports the LPR identifies that a minimum of 50,816 sqm of office floor space will be required over the plan period. Classifying the Site as a Designated Employment Area will support cases where suitable office and business uses come forward for this area of Green Park and will help provide a future pipeline of employment land to meet longer term demand. This will allow for the sustainable growth of office and business space at an existing and well-established employment location. In particular, the imminent opening of Green Park Railway Station makes it a very sustainable location for a Designated Employment Area.</p> <p>Summary</p> <p>In summary, GPR welcomes the West Berkshire LPR and the published Regulation 19 document. However, GPR requests several modifications to the LPR as set out in this letter. In particular, GPR requests that the identified Site is classified as a Designated Employment Area to reflect its existing uses and its existing allocation, and that additional guidance is given in relation to the consultation process and considerations for development located within a DEPZ.</p>

Please give reasons for your answer	Newbury Town Centre Design should be innovative to encompass greater footfall along streets, with planning requirements to have many more small shops, offices, & small businesses at ground level under apartments etc., with ample car parking (& for emergency services & deliveries) at ground or underground levels. The developer's proposals are too high & dwarf the ancient (presumably listed buildings) church & town hall. Any new developments should be no higher than the base of the clock tower on the town hall.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No

<p>Please give reasons for your answer</p>	<p>Herewith our response to the Local Plan 2022-2039:</p> <p>20. SP22. "Development proposals for main town centre.....". Theale's 57.3% increase in houses would have an adverse impact on the local network. Theale High Street already has insufficient parking and most of the High Street is single vehicle width due to parked vehicles and traffic calming give way areas. The traffic does not flow through the High Street due to this and there is often congestion.</p> <p>21. SP22. The Plan states a wish to 'retain our district centre' yet the Plan would shrink Theale village centre and thus the Plan conflicts. There is also shrinking in infrastructure.</p> <p>22. SP22. "Retail uses will be encouraged....". Many of Theale's shops have been or are converting to residential in the High Street. The Plan states a need for an increase in office space yet in Theale there are many either empty or have conversions to residential. 7.4 – There has been a large shift towards hybrid working which means that less office space is required. The Plan conflicts concerning the need for expansion and evidence should be provided to substantiate the claim.</p> <p>23. Town & District Centres, 7.43. Theale has had no leisure investment and no local leisure facilities are accessible by public transport. This needs to be reflected in the Plan.</p> <p>24. 8. With regards to infrastructure, the Plan needs to state that there is an urgent requirement for an increase in medical/hospital provision as local hospitals and GP surgeries are already at capacity.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>

<p>alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	Yes
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	Yes
<p>Please give reasons for your answer</p>	<p>Regarding retail, the Plan identifies a hierarchy of centres and designates primary shopping areas. It supports development for town centre uses that contributes to vitality and viability of these centres and provides for changes of use away from retail, only in certain circumstances. The Plan also designates a number of Retail Parks to safeguard retail and leisure uses. It does not identify any specific allocations for retail floorspace.</p> <p>The Plan sets out a commitment to review retail evidence within the first 5 years of the Plan, owing to significant changes brought about by Brexit and COVID19 making it impractical to update its evidence in a meaningful way. WBDC's existing evidence from 2016 (The Western Berkshire Retail and Commercial Leisure Assessment jointly prepared with WBC, RBC, and BFBC) identified a need for 25,600sqm comparison retail floorspace in West Berkshire to 2036. This represents a significant need, and it is not clear how far this has been met, or whether the identified needs remain appropriate. WBC has embarked upon an update to retail and commercial leisure evidence as part of its own emerging Local Plan Update. Given the significant need previously identified, WBC stresses the importance of WBDC's evidence being updated as soon as possible and the Plan being reviewed as necessary to address this in the short term.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	WBC notes that separate duty to co-operate discussions are ongoing between the two authorities. WBC welcomes these discussions progressing

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather	

<p>than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	Yes
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p><See attached report for full representation - DPDS obo TVCC_attachment_full rep_redacted></p> <p><u>Policy SP22 Town and District Centres</u></p> <p>The Chamber supports the Council's goal of maintaining and enhancing the vitality and viability of West Berkshire's town and district centres, in line with the stated Local Policy Priority of "Supporting initiatives that re-imagine Newbury town centre encourage appropriate levels of investment and active town centre management that will help secure their future vitality, vibrancy, and employment opportunities".</p> <p>However, the policy is somewhat lacking in the re-imagination element of the Priority and could do more to ensure that Newbury town centre, as well as other town centres across West Berkshire, remain dynamic and can retain their retail offer and attract inward investment.</p> <p>Conclusion</p> <p>These representations have outlined West Berkshire Chamber of Commerce's concerns as to the soundness of the Local Plan preparation process. The primary concern of WBCC is that the proposed policies regarding designated employment areas, in particular SP20 as exemplified by the Council's approach to LRIE, are unsound and do not go far enough to ensure that the development or redevelopment of DEAs across the district is sustainable and creates the best conditions for attracting inward investment. This is as well as the policies potentially not being appropriately justified. As they are, the policies run the risk of enabling piecemeal development at Designated Employment Areas which would result in a lower quality of land available for business use as well as potentially resulting in vital environmental investigation not being able to take place.</p> <p>As such, various modifications have been proposed to ensure the soundness of the Local Plan. Most importantly, a development-plan and SEA led framework of criteria-based site specific policies for each DEA should be adopted which would guarantee that development or redevelopment is sustainable and can create the best conditions for inwards investment and regeneration. There have also been several wider minor comments and representations on other policies throughout the Local Plan.</p> <p>To conclude, these representations have concluded that the Proposed Local Plan is potentially unsound and we therefore respectfully request that the sentiments of these representations be fully considered and reflected in further Modification to the submitted Local Plan.</p> <p>The proposed changes within this form also concern policies other than Policy SP20, but these have not been made the subject of additional representation forms as the changes are dependent on the content of the main representation on the policy.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	Yes
<p>5. Independent Examination</p>	We believe it is necessary as we are proposing significant modifications and the content of our representations is important.

Please give reasons for your answer	<p>See attachment 'Paula Saunderson - Full LPR Rep' for full consultation response. Comments on each chapter/policy can be found at the specific consultation point.</p> <p>SP21 – TOWN & DISTRICT CENTRES Need a specific Policy for Newbury as the only MAJOR TOWN CENTRE</p> <p>THE SPATIAL AREAS Retail & Commercial Areas within the Newbury Settlement Area Within Chpt 7 there is no Strategic Policy for Retail and Commercial Space. I feel this is an omission and the subject is not adequately covered under SP22 – Town & District Centres.</p> <p>Many Retail Sites Within Newbury there are many and varied Retail & Commercial Spaces yet the only Map I can find for these is this one for the <u>Town Centre Retail Area</u> which I presume will be changed to the new Red Line under this LPR? <i>[See attachment PS843 Paula Saunderson – Newbury Town Centre Plan]</i> There is no big Out of Town Retail Area and commuting between the existing Retail Areas is common. This is mainly by Car/Van due to the nature of goods being purchased. And we don't have a Car City so residents shopping for vehicles are travelling between spread sites at either ends of Newbury. Recent Retail growth with a new LIDL Store along the <u>Clayhill A4 Corridor Retail Area</u>, and built on the Floodplains, have given rise to poor Town Planning with Flooding and smells from the Drainage. And it is obvious that the Buffer Zones for the Kennet SSSI were not considered with this site, and the state-of-the-art modern SuDS are not working. Likewise the <u>Wash Common & Greenham Retail Area</u> is growing without Policy in place. Whilst this will be closer to Sandleford housing than the Town Centre and Clayhill A4 Retail Centres there will still be journeying between the 3 Areas. Because there is no SP for Retail & Commercial under Chpt 7, Existing Retail & Commercial Areas are not mapped on the LPR Policies Map and there is no over-arching Policy for Retail & Commercial which allows a DM to be put in place for Key Retail Centres</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<ol style="list-style-type: none"> 1 Policy SP23 requires all developments that generate a transport impact comply with its policy criteria, including provision of improved opportunities for active travel and to facilitate sustainable travel particularly within, between and to main urban areas and rural service centres. 2 The policy sets a minimum residential threshold of 30 dwellings for applications to be accompanied by a Transport Statement or Assessment. However, the policy fails to specify a comparable threshold for non-residential development and therefore when the provisions of Policy SP23 would apply to new development. Accordingly, the policy is inconsistent with national planning policy, in particular paragraph 105 of the NPPF (2021). 3 In the absence of a minimum size threshold, the application of Policy SP23 would be open to interpretation by the LPA and Applicants, with potentially onerous requirements placed upon relatively modest developments. In the case of Bradfield College, a long-established co-educational college in the rural area of West Berkshire, Policy DM38 provides general policy support for its future development. However, it could prove unfeasible for the College to meet the criteria of Policy SP23 given its rural location in a settlement which lies outside the settlement hierarchy. Existing public transport services and active travel infrastructure is particularly limited and it is highly unlikely that development proposals at the College could support any meaningful enhancement of this infrastructure. 4 Strict application of this policy could thwart future proposals for growth at the College, despite its long-established and important contribution to the local economy and community infrastructure. 5 Policy thresholds for non-residential development and exceptional circumstances should be identified through the policy to clarify the applicability of the policy.
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	No comment.
<p>4. Proposed Changes</p>	For the reasons set out above, policy thresholds for non-residential development and exceptional circumstances should be identified through the policy to clarify the applicability of the policy.

* Yes * No	
Please give reasons for your answer	The emphasis in this section on a shift away from car travel should take more account of the movement towards more working from home. More importantly, the objective to reduce emissions will be achieved as much by the transition to electric vehicles, which will become progressively more cost-effective, as by abandonment of car usage. People will continue to wish to travel on short and longer journeys, and the convenience of private motoring will continue to be strongly felt. National policy strongly supports the trend to electric transmission.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	The LPR should therefore include a specific plan for the widespread availability of charging points on both private and public premises, existing as well as new. Judging solely from that part of Newbury where I live, bus travel has had only a limited effect. If it is to be better supported, a more strategic approach may be needed, with a wider range of routes. The LPR should not exclude new roads and road extensions, should those prove necessary.

Please give reasons for your answer	<p>It would appear than there is no long-term planning/vision as to where all this extra traffic will go. The recent proposals are only "tinkering at the edges", & will certainly not be effective in 13 years time in 2036.</p> <p>All the time, small developments are potentially blocking a possible eastern bypass - is this a hidden agenda strategy by the Council, or lack of foresight.</p> <p>I would respectfully suggest that URGENT thought be given at this time to start formulating a long term traffic management vision by starting with the Sandleford development, by insisting that the various developers and the Council, with central Government legislative & financial support, plan a dual carriageway link between the A339 roundabout at Newtown, along the northern side of the River Enborne, to link with the A343, with an improved access onto the A34. Co-ordinating with future DoT upgrading plans for the A34.</p> <p>On the eastern side of the Newbury/Thatcham conurbation, the bypass route be from Vodafone, north of Thatcham, Pipers Way, a new bridge over rail and river (as suggested in the NWN in october 2015 (H!!), through to Thornford road.</p>

	<p>The dangerous junction of Burys Bank Rd. out onto the hill, could be eliminated by a new link road across Crookham Common from near Partridge Gully, south of south of Thornford Park establishment, & then onto the old Thornford Rd at the top of the hill.</p> <p>I am not suggesting that this be done all at once, but the vision could be planned & implemented piecemeal as and when the opportunity arises with development applications.</p> <p>Further to my e-mail to you appertaining to "Highway Infrastructure VISION" & the Sandford development, dated 25th. November 2016, I note the Town Council has asked for observations on the future of the Town, and vision for the future.</p> <p>I therefore set out some observations regarding "parking standards on housing developments", and housing in general.</p> <p>The recent accident & road closure on the A34 south of the A339 connection (off junction 13 M4) demonstrated the vulnerability of the A339 through Newbury with the inevitable several hours of gridlock which ensued.</p> <p>Also, I have noticed the tail backs of vehicles on the Western Avenue as far back as the "Starting Gate" PH on a regular basis.</p> <p>The proximity of the Fire & Ambulance to this junction & the high traffic flows will have an increasing effect on time responses.</p> <p>It is important, in tandem with adoption of drainage infrastructures (see page 6), that highways are adopted on new developments. This facilitates Water Co's adoption procedures. These requirements should be a planning condition from outline stage, & carried forward with the appropriate legal agreements.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>

Please give reasons for your answer	<p>Development close to the boundary between West Berkshire and Reading is likely to have implications for cross-boundary transport networks, and mitigation of these impacts may also need to take place on a cross-boundary basis. This requires some recognition within the policy.</p> <p>The plan as a whole lacks reference to the provision of new strategic transport infrastructure, in particular park and ride. Policy DM42 does talk about provision of transport infrastructure, but only in the context of securing improvements from development proposals, and is in any case not strategic in nature. The</p>

	Reading Borough Local Plan identifies the A4 and A329 corridors crossing the boundary to West Berkshire as being a priority for the provision of park and ride. This will realistically require provision of park and ride sites within West Berkshire. No specific sites have been identified, but there should nonetheless be some recognition of the importance of park and ride provision in the Reading area.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	
4. Proposed Changes	<p>It is suggested that the policy be amended as follows:</p> <p><i>“Development that generates a transport impact will be required to:</i></p> <ul style="list-style-type: none"> <i>• Minimise the impact of all forms of travel on the environment, in accordance with West Berkshire’s declared Climate Emergency and Environment Strategy;</i> <i>• Improve and promote opportunities for active travel;</i> <i>• Improve travel choice and facilitate sustainable travel particularly within, between and to main urban areas and rural service centres;</i> <i>• Demonstrate good access to key services and facilities;</i> <i>• Mitigate any adverse impact on local transport networks and the strategic road network, including where those impacts would be cross-boundary; and</i> <i>• Have regard to the West Berkshire Freight Route Network and availability of lorry parking where development will need the support of these facilities.”</i> <p>An addition should be made to the policy as follows:</p> <p><i>“Provision of park and ride on the A4 and A329 corridors linking to central Reading by enhanced public transport including bus priority measures will be supported and the Council will work with Reading Borough Council to identify deliverable proposals.”</i></p>

Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	<p>There is nothing in this Local Plan about the strategic road network. The view seems to be that the roads can time and time again take another 100 houses with just another tweak to the Robin Hood roundabout. In considering additional houses, and particularly when considering additional houses on sites involving more than 1,000 houses at a time, WBC needs to actively consider the consequences for the strategic road network.</p> <p>If several thousand new houses are to be built locally, would this require some new strategic roads to take traffic away from the Robin Hood roundabout (For example, a road from the A339 Swan Roundabout to the A343 Andover Road; a road from the Andover Road to the A4/A34 interchange west of Newbury; or a road from the A34/A339 interchange north of Newbury across to north Thatcham)? These</p>

	consequences would represent major changes for the area, and need to be considered alongside the proposals for housing development, not at some later stage.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes

Please give reasons for your answer	
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
Please give reasons for your answer	<p><i>c) Comments on other LPR Draft Policies (SP1, SP5, SP23, DM42 and supporting text)</i></p> <p>In non-site-specific terms the LPR policies in respect of spatial strategy, climate change and transport considerations also raise concerns in the context of the tests of soundness. The spatial strategy, climate change policy and transport policy should equally be consistent with National Policy requirements with regard to supporting and promoting sustainable transport.</p> <p>Across the LPR there are concerns that opportunities for policies to support sustainable development and specifically to encourage modal shift (to ensure the plan is positively prepared and consistent with national policy) have not been included. This again raises issues of soundness.</p> <p>The LPR as currently drafted is not consistent with NPPF requirements in terms of meeting the challenge of climate change (paragraphs 152-154). Neither is it consistent with wider national policy</p> <p><i>d) Consideration of Tests of Soundness</i></p> <p>By reference to Response Form Question 2, and in the absence of any wording in the LPR expressly supporting the growth of rail freight provision at Theale and wider omissions in respect of the Spatial Strategy, Climate Change Policy and Transport Policies, the LPR is not considered to meet the tests of soundness for the reasons identified above and summarised below:</p> <p>- The Plan is not positively prepared – it does not respond to identified need and it does not facilitate sustainable development.</p> <p>- The Plan is not justified – The Plan is not justified since it fails to be an appropriate strategy taking into account reasonable alternatives and based on proportionate evidence. The approach of not including either policy or supporting text to identify and support the growth of rail freight at Theale is not the most appropriate strategy when considered against the reasonable alternatives. There is no clear audit trail as to why this approach has been adopted and changed from earlier stages. The Sustainability Appraisal does not appear to consider how a different approach (supporting growth) would perform. As such it is not clear that the SA has been able to robustly inform the content of the LPR. The evidence points to the</p>

	<p>need to support the growth in rail freight provision both generally and in regional/local plan terms. The sound approach (and reasonable alternative) would be to at minimum provide supporting text which supports growth at Theale and/or to otherwise have this expressed within Policy text itself.</p> <p>- The Plan is not Consistent with National Policy – the LPR is not consistent with NPPF and other relevant national policy in particular with regard to: promoting a sustainable pattern of development; meeting the challenge of climate change; supporting sustainable transport (including supporting modal shift of freight from road to rail, wherever possible, to reduce emissions from the freight sector); considering the specific locational requirements of different sectors in suitably accessible locations. The lack of consistency with National Policy is both in terms of site specific considerations of the Theale Rail-Road Transfer Site under Policy DM 43 and supporting text and more generally in respect of: Spatial Strategy Policy SP1, Climate Change Policy SP5, and Transport and Transport Infrastructure Policies SP23 and DM42.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p><i>e) Changes required to make the West Berkshire Proposed Submission (Reg 19) Local Plan Sound</i></p> <p>By reference to Response Form Question 4 changes are identified as being required to make the West Berkshire Proposed Submission Local Plan sound. Specifically, the changes are required to ensure the plan is positively prepared, justified, and consistent with National Policy.</p> <p>To address the concerns raised with regard to soundness and specifically the failure of the LPR to appropriately identify and support modal shift in the context of transshipment of freight changes are sought in the context of spatial strategy, climate change and transport policies. Additionally, in site specific terms express support for growth of the Rail-Road Transfer Site at Theale is sought. The specific changes required to make the plan 'sound' are as follows: (Changes required shown in red underlined/struck through). It is confirmed that the schedule of required changes has been jointly drafted and agreed between NR, Beftonforth and the Englefield Estate.</p> <p>Schedule of Required Changes</p> <p>(c) Policy SP23, Transport</p> <p>"Development that generates a transport impact will be required to:</p> <ul style="list-style-type: none"> - Minimise the impact of all forms of travel..... - Improve and promote opportunities for.... - Improve travel choice and facilitate sustainable.... - <u>Demonstrate that all options to secure modal shift from road to more sustainable transport means have been explored.</u> - Demonstrate good access....." <p>(d) Policy SP23 Supporting Text (new paragraph 7.50)</p> <p>"7.49 The Council has established a preferred Freight Route Network (FRN) for West Berkshire.....of their proposed development.</p> <p><u>7.50 Encouraging modal shift from road to more sustainable modes of transport in the freight sector is a key element in helping to meet local Climate Emergency target of carbon neutrality by 2030 and reducing HGV road miles. In the West Berkshire area opportunities in this context primarily comprise sustainable freight transportation by rail and expansion of or addition to existing facilities will be supported. Rail freight enables the efficient movement of goods to/from ports, quarries and distributions centres, helping reduce the need for HGVs on roads. On average rail freight trains emit around a quarter of the CO2 equivalent emissions of HGVs per tonne mile travelled. All development that generates significant HGV movements will be required to show that all practicable means have been explored to make use of rail as opposed to road for the transport of goods.</u></p> <p>7.507.51 Transport Assessments.....</p> <p>Early discussion with West Berkshire Council with regard to the representations made and suggested changes would be welcomed.</p>

* Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	<p><i>See attachment 'Paula Saunderson - Full LPR Rep' for full consultation response. Comments on each chapter/policy can be found at the specific consultation point.</i></p> <p>SP23 – TRANSPORT</p> <p>The latest Draft Local Transport Plan 2024-2039 has only just been released for Consultation on the 8th February and consultation completes on 22nd March 2023. Another late issued Document which gives Parish & Town Councils little time to incorporate feedback into their Section 19 Consultations.</p> <p>The Transport for Southeast SIP to 2050 provides little in the way of strategic improvements and the links to other major towns such as Basingstoke A339, A34 to Winchester & Oxford, A4 to Reading & Marlborough/Swindon are only scheduled for Safety upgrades. The A34 will not be upgraded to a Motorway and will continue to be a heavy freight route despite plans to move more freight to rail.</p> <p>And the increases in Distribution & Logistics employment space at Thattham Colthrop & Newbury Hambridge Lane will only lead to increases in HGVs and Vans along the A4 Corridor with inadequate radial routes out particularly to the South and West. There seems to be no attempt to look at a Distribution & Logistics Hub out near the M4 at Junction13. And the Distribution Hub being created at Membury has no Highways plan behind it and only has B roads to reach it with no improvements included in Transport Plans.</p> <p>And we need a bridge over the Railway at Thattham to facilitate commuting from Thattham to South Newbury, A339 to Basingstoke, and A34 to Winchester & Oxford without passing through Newbury.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No

Please give reasons for your answer	Object. The policy wording is not consistent with national policy or effective.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	Proposed amendment 1.

	<p>Mitigate any <u>adverse significant</u> impact on local transport networks and the strategic road network</p> <p>The amendment is proposed to be consistent with paragraph 110 (d) of the NPPF (2021). It is recognised that some adverse impacts on the road network are likely as a result of development: the NPPF is clear that it is significant impacts which require mitigation.</p> <p>Proposed amendment 2.</p> <p>The policy refers to a document 'Highway Design Guidance for Residential Developments'. To allow for updates to local design guidance, it is necessary to amend the wording. The wording should be amended to</p> <p>"Development Proposals should <u>refer to the guidance</u> set out in the Council's Highway Design Guidance for Residential Developments <u>and other relevant national guidance</u>."</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
5. Independent Examination	Yes, to explain the extent of variation from national policy, which makes the policy unsound.

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	<p>Policy SP23 (Transport) states that development that generates a transport impact will be required to (amongst others): Minimise the impact of all forms of travel on the environment, in accordance with West Berkshire's declared Climate Emergency and Environment Strategy; and improve and promote opportunities for active travel.</p> <p>At paragraph 105 the NPPF states: <i>'[...] opportunities to maximise sustainable transport solutions will vary between urban and rural areas, and this should be taken into account in both plan-making and decision-making.'</i></p> <p>As such, the NPPF recognises that both urban and rural areas face different challenges in terms of provision of transport solutions. Indeed, rural areas typically lack the offer in terms of public transport that is available in urban areas. Whilst we support the provision of a sustainable transport network, we consider that the requirements of this policy are not proportionate and fail to reflect the rural nature of much of West Berkshire District.</p> <p>SP23 as currently drafted has the potential to directly contradict and undermine Policy SP1 and the support this policy affords to the rural economy.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	N/A
4. Proposed Changes	<p>We therefore recommend that Policy SP23 is revised as detailed below to ensure soundness (additions shown <u>underlined</u> deletions shown with a strikethrough).</p> <p><u>Where appropriate</u>, development that generates a transport impact will be required to: [...]</p>

<p>1. Do you consider the Local Plan Review is legally compliant? * Yes * No</p>	
Please give reasons for your answer	
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a</p>	

<p>minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>Local Plan Modelling Methodology</p> <p>The local plan modelling undertaken by WBC is described in the West Berkshire Strategic Transport Model (WBSTM) March 2022 Report. WBSTM is a highway assignment, public transport assignment and variable demand model developed in PTV-VISUM version 17.01.</p> <p>Comment: Use of a highway assignment element alone for the Local Plan modelling will most likely generate a 'worst case' for the SRN, the modelling of highway demand alone, however, requires justification.</p> <p>The following scenarios are included:</p> <ul style="list-style-type: none"> • 2037 Reference Case • 2037 Scenario 1R2 (S1R2) • 2037 Scenario 1R2 Mitigation 1 (S1R2 Mit1) • 2037 Scenario 1R2 Mitigation 2 (S1R2 Mit2) <p>NH notes the following. Local Plan impacts are assessed against a Reference Case which assumes no growth beyond the currently adopted Local Plan, this is acknowledged to be unrealistic because additional growth is inevitable. The large North East Thatcham Site (THA20) has been modelled with two separate mitigation scenarios, a demand management reduced car trips and then an assortment of highway junction changes. The Sandleford Park development is proposed to be pushed into the New Local Plan and not included as part of the 2037 reference Case. The M4 smart motorway and J10 improvements have been included in the modelling.</p> <p>NH identified in the response to the Regulation 18 Consultation Local Plan Review and Phase 1 Transport Assessment on 03/02/21 that M4 and A34 junctions within West Berkshire are predicted to be over capacity with predicted growth. These impacts are still evident in the latest reports reviewed. No highway mitigation has been proposed on the SRN. The Infrastructure Development Plan contains the M4 Smart Motorway Scheme between J3-J12 and the following statement:</p> <p>"Whilst it is hoped that there will be some improvements made to the A34 (by National Highways) in order that it can continue to carry out its important strategic function in a safe and efficient way, it is not currently anticipated that proposed development in West Berkshire in this plan period up to 2039 will cause the need for further improvements to the Strategic Road Network."</p> <p>Comment: Once the transport impacts of the Local Plan sites are understood, the Infrastructure Delivery Plan document may need to be revisited and set out any SRN mitigation required to deliver the Local Plan development.</p>

The WBSTM Local Plan Forecasting report, March 2022, states that TRICS based trip rates have been agreed with West Berkshire and added separately to the traffic demand matrices.

Comment: These trip rates should be provided to National Highways for review. It should be considered that where flexible employment use (whether Class E, B2 / B8) is proposed that for the purpose of future year forecasting, and any subsequent individual planning applications that may arise from the Local Plan, there is an expectation that this would be modelled with a worst case scenario land use trip rate when determining potential impact on SRN.

A separate note produced by TPA Associates has been produced regarding THA20. The 2037 S1R2 MITIGATION 1 Scenario contains measures to reduce car trips to/from THA20, resulting in:

- Car demand to/from THA20 reduced by 5% for active travel measures (trips within 10km)
- Car demand to/from THA20 reduced by 20% for bus proposals (to/from Thatcham town centre and rail station).

Distribution of trips and flow by junction arm from/to the SRN for all of the future cumulative allocated sites in each scenario should be provided to NH.

Substantive Issue: Some errors have been identified in specific tables of the Local Plan Forecasting Report, March 2022 which need correcting for NH to understand the potential SRN impact:

- Table 2-19 (Final highway assignment matrices – 2037 S1R2) – the Total Vehicles at the base of table are incorrect
- Table 2-24 (Final highway assignment matrices – 2037 S1R2 Mit1) – the Total Vehicles at the base of table are incorrect
- Table 2-24 (Final highway assignment matrices – 2037 S1R2 Mit1) is the same as Table 2-19 (Final highway assignment matrices – 2037 S1R2)

Local Plan Modelling Results

Reference Case flows increase across the majority of the network compared with the base year:

- increases are greatest on strategic routes like the M4 and in the Newbury and Thatcham area where the majority of new committed developments are located
- some routes in the Newbury area experience flow reductions due to congestion at a number of junctions within Newbury and on the A339, there is notable reassignment of strategic traffic from local routes in Newbury town centre and the A339 to other alternative strategic routes like the A34

S1R2 traffic flows increase compared to the Reference Case:

- increases are on major roads such as the A34, the A339, the A4, Bury's Bank Road/Crookham Hill and the Broad Lane
- there is a consistent re-assignment of traffic in all Local Plan scenarios (compared to the Reference Case) due to town centre congestion particularly
- local roads are generally associated with small flow increase across all Local Plan scenarios
- increased flows through the corridor, as well as THA20 site traffic directly accessing the A4, are likely to cause traffic displacement onto wider routes away from the A4, through local villages like Upper Bucklebury
- demand mitigation (modelled in S1R2 Mit1) could relieve the A4 – however, highway mitigation (modelled in S1R2 Mit2) may be necessary to alleviate impacts of local rerouting around the congested A4

Substantive Issue: Flow differences only appear to be provided for S1R2 Mit2, the plots show reductions in flow on the A34 and M4, clarity is needed as to why, is Local Road network (LRN) congestion restricting flow to the SRN. NH request the flow difference data for S1R2 Mit1 and S1R2.

Summary and Next Steps

JSJV have undertaken a review of the available transport evidence base documents associated with the Regulation 19 Consultation for WBC on behalf National Highways.

JSJV have highlighted a number of areas where further information is requested, including model justification, trip rates, trip distribution, assignment matrix table errors and flow impact plot data.

JSJV request that WBC respond to the points raised in this TN before a meeting is arranged with NH and JSJV representatives to discuss the transport evidence base for the WBC Local Plan.

Given the interdependency of the SRN and the LRN, following the on-going review work of development impacts, once these are understood and agreed by JSJV, NH and WBC, any mitigation package must be in its final form and, where necessary, appropriately tested to quantify impacts on the SRN.

1. Do you consider the Local Plan Review is legally compliant?	
* Yes	
* No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.	No
* Yes	
* No	

<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>The site Promoters have commissioned Pell Frischmann to produce an analysis of the transport evidence for the LPR; the published Transport Assessment. This study is attached as Appendix 9.</p> <p>The Pell Frischmann analysis states the following:</p> <p><i>2.5.1 It is concluded that none of the strategic TA work undertaken by WBC as part of its Local Plan Review justifies the current spatial approach of continuing to load most residential development in the west of the District, e.g. around Newbury and Thatcham. It is argued that there is insufficient justification for the uneven spatial distribution of sites allocated for residential development, particularly given the capacity in the eastern part of the District and the opportunities to access to a wide range of services and infrastructure both within West Berkshire and within Reading, by sustainable transport modes.</i></p> <p><i>2.5.2 Consequently, it is considered that the spatial approach is not justified nor consistent with the NPPF. As such, it is considered that the plan is unsound from a transport and highways perspective. Moreover, it is considered that there is no good reason not to allocate more residential development in the east of the District, as from a transport and highways perspective the evidence base justifies it.</i></p> <p>In short, it can be seen that the proposed spatial pattern of development in the R19 draft LPR would reinforce unsustainable patterns of transport and travel. It would also focus more traffic on the already overloaded junction 13 whilst capacity exists at junction 12.</p> <p>Attachments:</p> <ul style="list-style-type: none"> • Full Rep • Appendix 9 - Pell Frischmann: Transport Response

1. Do you consider the Local Plan Review is legally compliant?	Yes
* Yes	
* No	
Please give reasons for your answer	N/A
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.	
* Yes	
* No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.	No
* Yes	
* No	

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>The most recent transport modelling, according to the Phase 1 Transport Assessment Dec 2020, was done based on models run before the pandemic caused major changes in travel and transport patterns. It was also only projecting forwards to 2037, whereas the Plan period has been extended to 2039. Nor does it take into account the most recent HELAA in which new sites came forward and other sites which had previously been modelled for were removed.</p> <p>Therefore the modelling needs to be re-run using the best national post-pandemic traffic data and the latest set of sites included in this draft for allocation of development, otherwise the LPA will be unable to defend those allocations during Examination and may also be unable to justify transport projects it wishes to include in the IDP and CIL/S106 funding derived from developments for their contributions to transport infrastructure.</p> <p>The lack of updated traffic modelling could also impact on Air Quality assessments.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>N/A</p>
<p>4. Proposed Changes</p>	<p>The traffic modelling needs to be redone; there are no changes to be proposed to the Plan until this happens. The change necessary is for the Plan process to be paused until the traffic modelling has been redone.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>We are unsure at this stage. If the emerging LTP involves new traffic modelling then it may have been done before the Examination of this Plan is begun.</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes * No</p>	<p>Yes</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	<p>The Local Plan Review web page on the West Berkshire Council website for the evidence base of transport assessments states:</p> <p>“Transport is one of the key considerations to be assessed as part of the Local Plan Review (LPR) process. A Strategic Transport Assessment (TA) is being undertaken to run concurrently with the LPR process to determine the potential impacts of the emerging draft LPR and to investigate possible mitigation measures to address such impacts.”</p> <p><i>(https://westberks.gov.uk/transport-assessments retrieved 26/02/2023 - copied below < see attached document PS1708 Thatcham Town Council_ Transport Assessment webpage>)</i></p> <p>Regulation 12 of The Environmental Assessment of Plans and Programmes Regulations 2004 states:</p> <p>“(1) Where an environmental assessment is required by any provision of Part 2 of these Regulations, the responsible authority shall prepare, or secure the preparation of, an environmental report in accordance with paragraphs (2) and (3) of this regulation.</p> <p>(2) The report shall identify, describe and evaluate the likely significant effects on the environment of—</p> <p>(a) implementing the plan or programme</p> <p>If the document “to determine the potential impacts of the emerging draft LPR” is “being undertaken to run concurrently with the LPR process”, then the evidence for the SA/SEA cannot have been available when the Sustainability Appraisal: Appendix 5 SA/SEA of Strategic Policies was prepared.</p> <p>The SA/SEA Summary for Transport Policy in Table 59 Appendix 5 of the SA/SEA states:</p> <p>“The policy is likely to have a positive impact on all sustainability objectives as it seeks to promote and encourage the use of sustainable modes of travel, such as walking, cycling and the use of public transport over car use. A number of indirectly positive environmental impacts have also been identified, which relate to benefits that a reduction in car use would have that are not directly related to the policy. No negative impacts have been identified as a result of this policy.”</p> <p>It describes the ‘Overall effect’ as “Positive”. There is no basis for this conclusion, as the Strategic Transport Assessment has not yet been carried out.</p> <p>The proposal for approximately 1,500 homes at North East Thatcham will increase the overall level of traffic in and around Thatcham. The West Berkshire Strategic Transport Model – Local Plan Forecasting Report concludes (paragraphs 5.4.1 and 5.4.2):</p> <p>“5.4.1 The analysis set out in this assessment indicates where small impacts may still occur as a result of Local Plan growth and the proposed mitigation; however due to network constraints it will not necessarily be feasible to mitigate all such impacts.</p> <p>5.4.2. It is important to note, however, that the Local Plan impacts have been assessed against a Reference Case which assumes no growth (beyond the current adopted Local Plan) in housing and employment within West Berkshire, which is an unrealistic situation; there will inevitably be growth across the district, and the district is committed to deliver that growth.”</p> <p>Regulation 12 requires the EA/SEA to assess the plan as a whole, not policy-by-policy. It is therefore clear that the impact of SP23 taken with SP17 in relation to transport is negative, even without taking into account the growth in housing and employment within West Berkshire that is inherent to the draft Local Plan.</p> <p>The Sustainability Appraisal of transport therefore does not comply with the requirement of Paragraph 12(2)(b) of The Environmental Assessment of Plans and Programmes Regulations 2004.</p>
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is	

<p>consistent with achieving sustainable development.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	As the sustainability appraisal is not legally compliant, the Local Plan cannot be in accordance with Paragraph 32 of NPPF.
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	N/A
<p>4. Proposed Changes</p>	The SA/SEA needs to be reviewed in relation to transport after completion of the Strategic Transport Analysis.
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	Yes
<p>5. Independent Examination</p>	<p>Thattham Town Council is the principal representative body of the community of Thattham, which is the location of only new strategic site allocation in the draft Local Plan. The suitability of this site for development is reliant on having adequate infrastructure. However, the regeneration that was promised in the current Local Plan has not materialised, and would not be delivered through the policies in the draft Local Plan. The Town Council can provide local insight to the examination about Thattham, and particularly on the substantial deficit of infrastructure in the locality. It would also be happy to elaborate on its other concerns about the current proposals for the North East Thattham Strategic Site Allocation, as described in these representations.</p> <p>The Town Council anticipates that changes necessary to the draft Local Plan in relation to site allocations are greater than could be addressed</p>

	through 'main modifications'. If, however, the Inspector is minded to consider recommending 'main modifications' to policy SP17 and related matters in other Policies, it would welcome the opportunity to provide its perspective on what modifications would be required.

Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	

<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>The Council supports the objective to mitigate the impact of planned growth on the strategic road network and to promote low emission transport choices.</p> <p>In conclusion, the Royal Borough of Windsor and Maidenhead has no concerns or objections to the Regulation 19 version of the Local Plan Review.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	
<p>5. Independent Examination</p>	
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	All as set out in detail in the Local Plan Review Documentation
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? -	No

<p>Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p><i>[See attached document for full accompanying statement - PSPconsulting obo Bectonforth Ltd REDACTED]</i></p> <p>Please refer to Section 3 and Section 4 of the accompanying statement prepared by PSP on behalf of Bectonforth Ltd – Ref PER109 Dated March 2023.</p> <p>SECTION 3 - POLICY REVIEW INCLUDING DRAFT POLICIES DM43 AND DM42</p> <p>National Planning Policy Framework (NPPF July 2021)</p> <p>The National Planning Policy Framework (NPPF) has a presumption in favour of sustainable development at its heart. Of particular relevance to the potential for growth in rail use at the Theale Railhead, Bectonforth have highlighted below particular elements of National Policy which support the Government’s intention to increase the use of rail freight to assist in achieving national decarbonisation targets and deliver net-zero.</p> <ul style="list-style-type: none"> • At NPPF paragraph 106(c), planning policies should: “identify and protect, where there is robust evidence, sites and routes which could be critical in developing infrastructure to widen transport choice and realise opportunities for large scale development;” • At NPPF paragraph 106(e) planning policies are also required to: “provide for any large scale transport facilities that need to be located in the area, and the infrastructure and wider development required to support their operation, expansion and contribution to the wider economy...” • Footnote 44 on page 31 confirms that: “Policies for large scale facilities should, where necessary, be developed through collaboration between strategic policy-making authorities and other relevant bodies. Examples of such facilities include ports, airports, interchanges for rail freight,” [our underlining]. • NPPF paragraph 83 is clear that in the context of building a strong, competitive economy: “Planning policies and decisions should recognise and address the specific locational requirement of different sectors. This includes making provision for clusters or networks of knowledge and data-driven, creative or high technology industries; and for storage and distribution operations at a variety of scales and in suitably accessible locations.” [our underlining]. • At NPPF paragraph 152 In the context of meeting the challenge of climate change, the planning system should help to: “shape places in ways that contribute to radical reductions in greenhouse gas emissions...”. • And NPPF paragraph 153 requires that: “Plans should take a proactive approach to mitigating and adapting to climate change...”. • Similarly, NPPF paragraph 154 confirms that new development should be planned in ways that: “can help reduce greenhouse gas emissions...”. <p>The consultation on the December 2022 proposed updates to the NPPF, which run to March 2023, do not propose any material change to the NPPF paragraphs quoted above.</p> <p>The Planning Practice Guidance (PPG) on Climate Change gives advice at paragraph 003 on “How the challenges of climate change can be addressed through the Local Plan”. The Guidance states that “there are many opportunities to integrate climate change mitigation and adaptation objectives into the Local Plan. Sustainability appraisal can be used to help shape appropriate strategies in line with the statutory duty on climate change and ambition in the Climate Change Act 2008.</p> <p>Examples of mitigating climate change by reducing emissions:</p> <ul style="list-style-type: none"> • Reducing the need to travel and providing for sustainable transport;” <p>Draft Policies SP1 ‘Spatial Strategy’; SP5 ‘Responding to Climate Change; and SP23 ‘Transport’</p> <p>Consistent with the above National Policy advice, Bectonforth consider that the following Draft Local Plan Policies should be amended as below:</p> <ul style="list-style-type: none"> • Draft Policy SP1 ‘Spatial Strategy’ should be extended to include opportunities to increase and expand the provision for the movement of freight by sustainable means. • Draft Policy SP5 ‘Responding to Climate Change’ listed criteria should also include an item to demonstrate how opportunities to secure the sustainable movement of freight have been maximised and secured. • Draft Policy SP23 ‘Transport’ should similarly include a requirement for development that generates a transport impact to demonstrate that all options to secure modal shift from road to more sustainable transport means have been explored. • The Supporting Text to Draft Policy SP23 should include a new paragraph encouraging modal shift for the movement of freight from road to rail.
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p>	<p>Yes</p>

* No	
Please give reasons for your answer	All as set out in detail in the Local Plan Review Documentation
4. Proposed Changes	<p>Please refer to Section 4 of the accompanying statement prepared by PSP on behalf of Beftonforth Ltd – Ref PER109 Dated March 2023.</p> <p>SECTION 4 - REQUIRED CHANGES TO MAKE THE PLAN SOUND</p> <p>With reference to Response Form Question 2, in the absence of any wording in the Regulation 19 Submission Draft Local Plan expressly supporting the growth of the Theale Railhead, and with wider omissions with respect to the Spatial Strategy, Climate Change Policy and Transport Policies, the Submission Draft Local Plan is not considered to meet the tests of Soundness for the reasons identified above and summarised below:</p> <p>The Submission Draft Local Plan is not positively prepared since it does not respond to identified need and it does not facilitate sustainable development in accordance with National and Regional Policy.</p> <p>The Submission Draft Local Plan is not justified since it fails to deliver an appropriate strategy taking into account reasonable alternatives and based on proportionate evidence. The approach of not including either policy or supporting text to identify and support the growth of rail freight at Theale is not the most appropriate strategy when considered against the reasonable alternatives.</p> <p>There is no clear audit trail as to why this approach has been adopted and changed from the adopted Development Plan and from earlier stages of the current Local Plan Review. The Sustainability Appraisal fails to consider the increased use of rail freight consistent with National and Local Policy, when the evidence points to the need to support the growth in rail freight provision. The Sound approach and reasonable alternative would be to provide supporting text which supports the growth of rail freight at Theale and to have this expressed within the Policy itself.</p> <p>The Submission Draft Local Plan is not Consistent with National Policy in particular with regard to: promoting a sustainable pattern of development; meeting the challenge of climate change; supporting sustainable transport (including supporting modal shift of freight from road to rail, wherever possible, to reduce emissions from the freight sector); considering the specific locational requirements of different sectors in suitably accessible locations. The lack of consistency with National Policy is both in terms of site-specific considerations of the Theale Rail-Road Transfer Site under Policy DM43 and supporting text and more generally in respect of: Spatial Strategy Policy SP1, Climate Change Policy SP5, and Transport and Transport Infrastructure Policies SP23 and DM42.</p> <p>Changes required to make the West Berkshire Regulation 19 Proposed Submission Draft Local Plan Sound</p> <p>With reference to Response Form Question 4 changes have been identified below which are considered necessary to make the Submission Draft Local Plan Sound. The changes are required to ensure that the Submission Draft Local Plan is positively prepared, justified, and consistent with National Policy.</p> <p>To address the concerns raised in these representations with regard to Soundness, and specifically the failure of the Submission Draft Local Plan to appropriately identify and support modal shift in the context of the movement of freight, changes are sought below with respect to spatial strategy, climate change and transport policies. Additionally, in site specific terms, express support for growth of the Rail-Road Transfer Site at Theale is sought. The specific changes required to make the plan ‘Sound’ are shown below in red underline or strike through.</p> <p>It is confirmed that the schedule of required changes set out below, has been jointly drafted and agreed between Network Rail, Beftonforth and the Englefield Estate.</p> <p>(c) Policy SP23, Transport</p> <p>“Development that generates a transport impact will be required to:</p> <ul style="list-style-type: none"> • Minimise the impact of all forms of travel..... • Improve and promote opportunities for.... • Improve travel choice and facilitate sustainable.... • <u>Demonstrate that all options to secure modal shift from road to more sustainable transport means have been explored.</u> • Demonstrate good access....” <p>(d) Policy SP23 Supporting Text (new paragraph 7.50)</p> <p>“7.49 The Council has established a preferred Freight Route Network (FRN) for West Berkshire.....of their proposed development.</p> <p><u>7.50 Encouraging modal shift from road to more sustainable modes of transport in the freight sector is a key element in helping to meet local Climate Emergency target of carbon neutrality by 2030 and reducing HGV road miles. In the West Berkshire area opportunities in this context primarily comprise sustainable freight transportation by rail and expansion of or addition to existing facilities will be supported. Rail freight enables the efficient movement of goods to/from ports, quarries and distributions centres, helping reduce the need for HGVs on roads. On average rail freight trains emit around a quarter of the CO2 equivalent emissions of HGVs per tonne mile travelled. All development that generates significant HGV movements will be required to show that all practicable means have been explored to make use of rail as opposed to road for the transport of goods.</u></p> <p><u>7.507.51</u> Transport Assessments.....”</p>

<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>To explain in detail to the Inspector, the importance of the Local Plan Review including the opportunity for the growth of rail freight at the Theale Railhead.</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No</p>	<p>Yes</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>The outlines of an infrastructure plan should be included in the LPR and not relegated to an Infrastructure Delivery Plan. Schools, colleges, GP surgeries, and hospitals are as important to the development and wellbeing of the district as housing, landscape, heritage, business, and transport.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>There should be a specific reference to primary, secondary, and tertiary education and the means to ensure their delivery</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	
<p>5. Independent Examination</p>	
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes * No</p>	
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes * No</p>	
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes * No</p>

Please give reasons for your answer	<p><u>Drainage Infrastructures</u></p> <p>Schedules (Sections) 3 (SUDS) & 42 (Sewers). Flood & Water Management Act 2010.</p> <p>You will be aware from past correspondence of my efforts to get the Government to implement the above legislation. I have now exhausted all the direct contact with departments, agencies & organisations to pressure DEFRA to ABIDE by</p> <p>Government original intentions, & the Parliamentary Scrutiny Cilee's recommendations (2017), & the Food & Rural Affairs dee. (HC1 70— Sept. 2020) conclusions; & show some "Duty of Care" to home owners. The LGA will not accept my representations as an individual, but only from one of its local authority members.</p> <p>Therefore, I am formally requesting that West Berks Council makes representations to the LGA to pressure Government to implement this legislation immediately. This will enable the mandatory adoption of SUDS &</p> <p>Sewers, & close the loophole in planning procedures, which large developers are using to the legal, financial & environmental detriment of homeowners.</p>

Bracknell-Forest Council have gone some way in their policy towards SUDS provisions on new developments. Therefore why can not WBC do likewise. G.Eaton (Dept.for Levelling-up, Hsg. &Communities) has said in correspondence that LA's & Water Co.'s should be more robust at the early planning stages to require infrastructures to be adopted.

This is not only a serious National issue, but of particular concern to the Thatcham Flood Forum. They are concerned that unregulated design, construction & future maintenance of private SUDS & sewer infrastructures on proposed developments north of the town on the rising escarpments up to Cold Ash & Bucklebury could in the future compromise & prejudice the integrity of the recent Flood Alleviation schemes being undertaken by WBC.

I have spoken informally to some Thatcham & Newbury Town Councillors, who are sympathetic to the implementation of this legislation.

There are many nuances & unintended legal, financial & environmental consequences to the delays in the Government's inaction on these issues, which have been outlined in previous correspondence. Therefore, I would be willing to discuss these issues with yourself & members.

Recent correspondence from the Dept. for Levelling Up, Housing & Communities suggest that Councils should be expected to be more robust in their policies for the provision of infrastructures including flood risk management & sewerage infrastructures.

An opportunity of the SUDS infrastructures is that they could be used as an integrated part of open space areas, developed to provide planting & biodiversity. Hence the need for such areas to be adopted & maintained by the Council.

Private Estate roads & drainage infrastructures (trends by developers).

I note the trend towards private (un-adopted roads) streets (Racecourse development, & the Taylor/Wimpey site adjacent to Vodafone Centre).

Clearly the developers are content with this, as they can build to a lower standard of design and construction. However, what happens in the future when the roads have deteriorated, and the "management" arrangement has financially collapsed. The cost will fall on unsuspecting house owners, who may say "why didn't the Council ensure adoption when the houses were constructed".

Land prices should reflect the infrastructure requirements and recovery (ex. Industrial sites) costs.

I suspect that some developers are manipulating land prices, in order to avoid the infrastructure & social/affordable housing requirements of the Council.

Brown field sites are not necessarily more expensive to build on. Land hoarding by developers should be curtailed by measures to encourage swift starts once planning permission is granted. Failure to do so should be legislated so that Council's can say, purchase from the developer at the price he paid before planning permission granted.

Why not allow Councils to purchase land. Mrs. Thatcher sold Council Houses, and it is perhaps ironical that home ownership is now lower than at her time. One reason being that replacement of Council Houses was not permitted. Then Councils were "persuaded" to sell estates to newly formed Housing Associations. Her hidden agenda (as with selling off the public utilities) was to reduce the PSBR government loans. So why is the Conservative Government now proposing to bring Housing Association loans within the PSBR?

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>

Please give reasons for your answer	Herewith our response to the Local Plan 2022-2039: 25. SP24. The entire text is very vague and needs to be made clearer. What is meant by 'adequate'? This needs more detail. The entire section is unrealistic and needs a lot more detail.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	The answer is I dont know if legally compliant as there is no option for 'don't know'. This is for an inspector to determine.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	In terms of nrastructure which is my comment re SP24, there is no detail to improve safety on residential roads containing Primary Schools such as Park Lane which would be affected adversely by significnat additional traffic movements. The Thatcham Park School has children classes from 2 YRS old and the road is already dangerous. The police fails to risk assess and provide specific mitigation policies for safer streets for Primary school areas/ zones. Sustainability includes safer development and this development creates additional risks without appropriate transparent mitigation.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	No

Please give reasons for your answer	
4. Proposed Changes	
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.	No

* Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	See attachment 'Paula Saunderson - Full LPR Rep' for full consultation response. Comments on each chapter/policy can be found at the specific consultation point. SP24 – INFRASTRUCTURE REQUIREMENTS & DELIVERY An incomplete document with no funding for Flood Alleviation Schemes for Newbury Clayhill and schemes to the North. No details on the upgrades that will be required to already failing drainage on the London Road Estates DEA and the area between the Southern banks of the River Lambourn and the A4 which nearly 200 properties at High RoFSW and sewage pollution with poo in back gardens. The figures included for 8 Football pitches at £1m each are aspirational as the first one to be delivered will require at least £3.7m of Capital Funding.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	I seek an change which is to introduce Policies and Site Allocations which are not currently in the Plan for the Sub-Area Newbury Settlement.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

Please give reasons for your answer	The ICB would welcome an opportunity to discuss being a recipient of Community Infrastructure Levy (CIL) contributions towards Primary Care developments with West Berks Council. Finally, the ICB would welcome an opportunity, as part of the Local Plan review, to revise the IDP so that a better understanding of up-to-date primary care development costs can be incorporated into subsequent section 106 Agreements, particularly if Section 106 and CIL developer contributions are replaced by the proposed "Infrastructure Levy" as part of National Government's levelling up Agenda.

<p>Please give reasons for your answer</p>	<p>[For wider representation and Tables and Figures, see attached Representations on behalf of Croudace Homes]</p> <p>Infrastructure Delivery Plan (January 2023)</p> <p>The Infrastructure Delivery Plan sets out specific strategic infrastructure requirements for West Berkshire. It outlines that in relation to North East Thatcham, a package of infrastructure improvements are to be delivered, including a £1.125m Travel Plan and £22m highways package – all to be funded by developer contributions, and presumably secured through a S106 agreement.</p> <p>Croudace considers this is likely to lead to increased delays in delivery at North East Thatcham and could potentially threaten the viability of development, which may result in lower levels of contributions ultimately being secured. Given the doubts expressed regarding the housing trajectory, Croudace calls on the Council to identify other, less constrained sites without significant infrastructure requirements to come forward to help plug the gap.</p>

<p>the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>The Infrastructure Delivery Plan (IDP) is fundamental to the successful delivery of the objectives of the Local Plan – in particular ensuring that provision of infrastructure is aligned with growth in housing. In the Local Plan, the IDP is defined in Policy SP24.</p> <p>Other representations by the Town Council have highlighted that some key items of infrastructure required for the North East Thatcham development in SP17 are missing from the IDP update of January 2023. Major current infrastructure projects such as the redevelopment of the Newbury Lido are also missing, while some of the items in the IDP are not infrastructure projects at all - for example, the last two items on 'Woodlands and Hedgerows' and 'Rights of Way and Bridleways', which appear to be part of a CIL charging schedule.</p> <p>The first 57 out of the 69 pages of the January 2023 IDP are completely superfluous to its purpose as described in paragraph 7.55 of the draft Local Plan – and most if that is cut-and-paste from the local plan.</p> <p>Paragraph 11 of NPPF states: “Plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that all plans should promote a sustainable pattern of development that seeks to ... align growth and infrastructure...”</p> <p>It is clear that the current Policy SP24 does not achieve the alignment of growth and infrastructure, because essential items of infrastructure in strategic policies for housing are not included in the IDP for the Regulation 19 Consultation.</p> <p>Paragraph 20 of NPPF states: Strategic policies should set out an overall strategy for the pattern, scale and design quality of places, and make sufficient provision for ... infrastructure for transport, telecommunications, security, waste management, water supply, wastewater [and] flood risk; community facilities (such as health, education and cultural infrastructure);</p> <p>Strategic Policy SP24 aims to deliver the sufficient provision of infrastructure through the IDP, but clearly does not at present achieve this.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	N/A
<p>4. Proposed Changes</p>	<p>Policy SP24 should define the responsibility within the Council for the maintenance of the IDP (including ensuring that it stays aligned with the pace of housing development) and the frequency with which it is reviewed.</p> <p>We suggest that the IDP would be easier to maintain and update if it is a spreadsheet (as is recommended by the Local Government Association and implemented by many Local Authorities). This would inherently remove the superfluous introduction.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
<p>5. Independent Examination</p>	<p>Thatcham Town Council is the principal representative body of the community of Thatcham, which is the location of only new strategic site allocation in the draft Local Plan. The suitability of this site for development is reliant on having adequate infrastructure. However, the regeneration that was promised in the current Local Plan has not materialised, and would not be delivered through the policies in the draft Local Plan. The Town Council can provide local insight to the examination about Thatcham, and particularly on the substantial deficit of infrastructure in the locality. It would also be happy to elaborate on its other concerns about the current proposals for the North East</p>

	<p>Thatcham Strategic Site Allocation, as described in these representations.</p> <p>The Town Council anticipates that changes necessary to the draft Local Plan in relation to site allocations are greater than could be addressed through 'main modifications'. If, however, the Inspector is minded to consider recommending 'main modifications' to policy SP17 and related matters in other Policies, it would welcome the opportunity to provide its perspective on what modifications would be required.</p>
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>*Late Response*</p> <p>The NHS, Council and other partners must work together to forecast the infrastructure and costs required to support the projected growth and development across the borough. A vital part of this is ensuring the NHS continues to receive a commensurate share of S106 and Community Infrastructure Levy (CIL) developer contributions to mitigate the impacts of growth and help deliver transformation plans.</p> <p>Paragraph 34 of The NPPF is clear that 'Plans should set out the contributions expected from development. This should include setting out... infrastructure (such as that needed for... health)'</p> <p>The significant cumulative impacts of residential developments on healthcare requirements in the area should be recognised and, given their strategic importance, health facilities should be put on a level footing with affordable housing and public transport improvements when securing and allocating S106 and CIL funds, in order to enable the delivery of vital NHS projects. It is imperative that planning policies are positively prepared, in recognition of their statutory duty to help finance improved healthcare services and facilities through effective estate management.</p> <p>We request that when setting planning obligation policies, the Council seek to address strategic as well as local priorities in planning obligations and engage the NHS in the process as early as possible.</p> <p>Within the NHS property portfolio, a number of sites are, or may become outdated and no longer suitable for modern healthcare without significant investment. In those cases, and where NHS commissioners can demonstrate that healthcare facilities are no longer required for the provision of services in that particular location, a more flexible approach for public service providers should be applied when considering a change of use to non-community uses.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	N/A
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? -	Yes

<p>Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>National policy on funding of infrastructure is currently unclear. Whilst the Liberal Democrat Party has always strongly supported using the uplift in land value from the granting of planning consent (and also from allocating land through Local Plans to a higher value land use) to fund essential infrastructure required by new developments, we also support the use of the higher 'spill-over' land value resulting from investments in infrastructure, because land values are affected (generally in an upward direction) over a wide area by improvements to infrastructure.</p> <p>None of the post-WWII methods of capturing land value for public benefit have worked adequately and it is as yet unclear whether the Levelling Up & Regeneration Bill will result in a system which is any better than CIL. It is unclear what national policy currently is and therefore local policy SP24 cannot be deemed consistent with it.</p> <p>Therefore, we believe this policy is unsound until and unless the Government's proposals are clearer.</p> <p>This is one reason why we would wish the Plan making process to pause. If there is no change to the system, then the current CIL Charging Schedule needs urgent updating.</p> <p>Appendix 1 to the IDP is seriously lacking in evidence of anything approaching a realistic cost estimate for the infrastructure projects listed as necessary for developments set out in the LDP. It is totally ineffective as it stands both for this reason and because of the lack of clarity on government policy and the effect this is having on investor confidence.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	N/A
<p>4. Proposed Changes</p>	Completion of the IDP is needed. The Plan process should be paused until the IDP is at a more advanced stage with all known projects given at least an approximate realistic estimated cost.
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	Yes
<p>5. Independent Examination</p>	<p>When the IDP has been fleshed out, we will wish to examine and probably comment on it, with the ability to question and be questioned on comments made.</p> <p>Meanwhile I have personally submitted an application to be involved in the DLUHC studies of Land Value Capture and Land Auctions, which form part of the Levelling Up Bill. I have previously been involved in research for Government on this subject and it may be appropriate to speak on this at the time of the Public Examination of this Plan.</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan</p>	Yes

Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

Please give reasons for your answer	The Policy includes a link to the Infrastructure Delivery Plan (IDP). The IDP, under 'Health Centres/Improvements to address capacity and access' states that 'no costs identified at this stage'. We are content with the work that has gone into identifying other infrastructure requirements that are required, but feel that this specific topic must be addressed as a matter of urgency.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	Furthermore, Sovereign considers that the Proposed Submission West Berkshire Local Plan Review (2022 – 2039), as currently formulated, is Legally Compliant.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	

<p>Please give reasons for your answer</p>	<p>DEVELOPMENT MANAGEMENT POLICIES</p> <p>The comments set out in this section are intended to assist the Council in developing an approach that is consistent with national planning policies and the tests of soundness. Some comments have been included to assist the Council in developing a series of policies that are both effective and robust. Where possible, suggested amendments have been set out in the response.</p> <p>Sovereign broadly supports the West Berkshire Local Plan Review (2022 - 2039). However, the comments set out below are intended to identify opportunities to improve the effectiveness of the proposed policies.</p> <p>As a general principle, the plan would benefit from consistent numbering, in relation to the paragraphs, policy criteria, and sub-criteria. This would assist the accessibility and the useability of the draft plan, improving the effectiveness of the document substantially.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>Sovereign considers that in preparing the emerging local plan, the Council have sufficiently complied with the Duty-to-Cooperate.</p> <p><i>3. The Duty-to-Cooperate</i></p> <p>Section 33a of the Planning and Compulsory Purchase Act (2004) ('PCPA') requires that local planning authorities should co-operate with other relevant local authorities, the County Council, prescribed bodies, and other persons, in relation to the preparation of a Local Plan. The Duty requires the Council to engage constructively, actively, and on an on-going basis, in the preparation of the Plan, insofar as it relates to a strategic matter. Strategic Matters include the sustainable development and use of land that has, or would have, a significant impact on at least two planning areas, such as the amount and distribution of housing.</p> <p>Furthermore, the NPPF confirms, at paragraph 26, that government policy comprises that the effective and ongoing working between strategic policy-making authorities and relevant bodies is integral to the production of a positively prepared and justified strategy. It goes on to confirm that, in particular, joint working should help to determine where additional infrastructure is necessary and whether development needs that cannot be met wholly within a particular authority area could be met elsewhere. As such, cooperation clearly relates to maximising the effectiveness of plan preparation.</p> <p>Demonstrated within the effective and on-going joint working undertaken by West Berkshire District Council with the other Western Berkshire HMA authorities, in particular illuminated through the preparation of the SoCG, Sovereign considers that the West Berkshire Local Plan Review is <i>positively prepared</i> and the product of an <i>effective</i> and robust process of cooperation between the authorities.</p> <p>Sovereign therefore considers that the Duty-to-Cooperate has been sufficiently demonstrated in the plan-making.</p>
<p>4. Proposed Changes</p>	<p>Policy SP24: Infrastructure and Delivery</p> <p>To improve the effectiveness of the policy and to avoid potential unnecessary delays in the planning process, reference should be made within the policy to the need for any contributions required to the delivery of relevant infrastructure to be consistent with the tests at Section 122 of the Community Infrastructure Levy Regulations (2010) (as amended).</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>Sovereign benefit from a specific land interest within West Berkshire District, which is proposed to be allocated for residential development under the emerging Policy RSA23: Land Adjoining The Haven, Kintbury. In representing Sovereign, Boyer are well-placed to advise on the appropriateness of the land allocated for development.</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	<p>Yes</p>

6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review

- * Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? -	Yes

<p>Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>The following site allocation policies refer to the need for desk-based assessment and, if necessary, field evaluation; however, the language used is not consistent.</p> <p>The Council may wish to review the language used across these policies to ensure it improve consistency. We do not consider this is a matter of soundness:</p> <ul style="list-style-type: none"> • RSA1: Land north of Newbury College, Monks Lane, Newbury (Site ref HSA 1) • RSA2: Land at Bath Road, Speen, Newbury (Site Ref: HSA 2) • RSA5: Land at Lower Way, Thatcham (Site Ref: THA025) • RSA10: Whitehart Meadow, Theale (Site Ref THE1) • RSA11: Former Theale Sewage Treatment Works, Theale (Site Ref THE7) • RSA12: Land adjoining Pondhouse Farm, Clayhill Road (Site Ref: HSA15) • RSA13: Land north of A4 Bath Road, Woolhampton (Site Ref MID4) • RSA14: Land adjoining Lynch Lane, Lambourn (Site Ref: HSA 19) • RSA15: Land at Newbury Road, Lambourn (Site Ref: HSA 20) <ul style="list-style-type: none"> • RSA17: Land at Chieveley Glebe, Chieveley (Site Ref: CHI23). This site does not currently require a DBA and field evaluation, if necessary, but Until this is added, we regard this allocation to be unsound, as detailed in Appendix B. • RSA18: Pirbright Institute Site, High Street, Compton (Site Ref: HSA 22) • RSA19: Land west of Spring Meadows, Great Shefford (Site Ref: GS1)(Modified if/as appropriate) • RSA20: Land off Charlotte Close, Hermitage (Site Ref: HSA 24) • RSA21: Land south east of the Old Farmhouse, Hermitage (Site Ref HSA 25) • RSA22: Land adjacent Station Road, Hermitage. This site does not currently require a DBA and field evaluation, if necessary, but should. Until this is added, we regard this allocation to be unsound, as detailed in Appendix B (The wording of a requirement for heritage impact assessment also needs to be amended in this policy, see Appendix B) • ESA1: Land east of Colthrop Industrial Estate, Thatcham (Site Ref: MID5) • ESA5: Northway Porsche, Grange Lane, Beenham (Site ref: BEEN10) • ESA6 Policy ESA6 Land adjacent to Padworth IWMF, (Site Ref: PAD4) <p>Our detailed comments on the plan's policy framework are included in Appendix A and on the proposed allocations in Appendix B. Also we provide some further comments on the Sustainability Appraisal in Appendix C.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>For all sites listed in this representation, while we support the policy requirement for desk- based archaeological assessment and, if necessary, field evaluation, the language used across the policies used is not consistent. The Council may wish to review the language used across these policies to ensure it improve consistency. We do not consider this is a matter of soundness.</p> <p>Linked with this matter:</p> <ol style="list-style-type: none"> 1 for ESA1, the phrasing implies that field evaluation will definitely be required; is that the case? 2 for ESA6, wording changes are needed to ensure the criterion is clear i.e. is the DBA required and then field evaluation, if necessary. We suspect this is simply a typo, so hopefully an easy

2. Do you consider the Local Plan Review is sound? -	No

<p>Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure.</p> <p>The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.</p> <p>Early engagement between the developers and Thames Water would be beneficial to understand:</p> <ul style="list-style-type: none"> • What drainage requirements are required on and off site • Clarity on what loading/flow from the development is anticipated • Water supply requirements on and off site <p>The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.</p> <p>To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.</p> <p>Link here > https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity</p> <p>We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.</p> <p>Water Response</p> <p>The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development.</p> <p>Waste Response</p> <p>On the information available to date we do not envisage infrastructure concerns regarding wastewater network or wastewater treatment infrastructure capability in relation to this site/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p>Additional Comments</p> <p>These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water flows being discharged to the public sewer.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	

Please give reasons for your answer	
4. Proposed Changes	Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water to determine whether a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered is required.

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>Feltham Properties Ltd has a controlling interest in this site and has previously had outline planning permission and approved reserved matters for a development of sixteen dwellings. This site was originally allocated in the Housing Sites and Allocation DPD (2017) (HSADPD). As development has not commenced as yet, it is appropriate that the allocation is rolled forward into the Local Plan Review (LPR).</p> <p>However, this area adjacent to Newbury College has evolved since the drafting and adoption of the HSADPD.</p> <p>Outline permission has been granted for the Sandleford Park major development (allocated in the Core Strategy in 2012; Policy C3) immediately to the west and south-west of this site. The boundaries of the approved scheme (application 20/01238/OUTMAJ) have varied in some respects with the allocation boundary, including in the area immediately adjacent to the RSA1 site.</p> <p>The following extracts from the West Berkshire Online Mapping compared to the extract from the approved master plan illustrate this point. The Online mapping shows the Core Strategy allocation running the full length of Monks Lane to include land immediately north of the RSA1 allocation. The approved scheme does not include this land immediately north of RSA1. This is due to landownership matters.</p> <p>The implications are that there is a left over area of land, entirely within the settlement boundary of Newbury, that is neither part of the Sandleford master plan nor the RSA1 allocation. Feltham Properties have been in pre-application consultation with the Council regarding this situation and identifying that there is merit in amending the RSA1 (formerly HSA1) allocation to include this left over land. This would represent positive planning and facilitate a more coordinated development of this part of the town.</p> <p>The revised policy could include appropriate design objectives to seek to ensure that the additional land is suitably designed such that the character of Monks Lane, with its established treelined hedge is retained in keeping with the Sandleford Park master plan.</p> <p><i>(attachment)</i></p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	

4. Proposed Changes	Modification of the RSA1 allocation boundary to include land immediately north between the existing boundary and Monks Lane. The inclusion of appropriate design criteria to respect the character of Monks Lane and the Sandlford Park development.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	Feltham Properties has a controlling interest in site RSA1 and considers the policy to be out of date.

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>The site allocations presented in this chapter have not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of each site to accommodate development. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on these sites. We have concerns and have provided this information in a separate document <see comments below></p> <p>The site is on SPZ3, secondary A superficial and bedrock aquifers.</p> <p>We would not support any additional flows to Newbury STW. Newbury STW is currently at around 98% of its dry weather flow- DWF capacity, and the development planned to drain to the STW would certainly take it over capacity. A new DWF permit would be required that ensured no deterioration of any quality elements. Newbury STW is to get a 0.1mg/l phosphorus permit limit during AMP 8. This is to meet the CSMG requirements of getting the River Kennet SSSI to good status. Before any development connecting to Newbury STW proceeds, we would need to have confidence that the additional phosphorus load would not undermine the AMP 8 objectives. 0.1mg/l is a 'stretch target' and TW would need to have confidence they would be able to meet that target with any additional loading. The Environment Act will compel water companies to reduce their phosphorous loading from STWs by 80% from a 2020 baseline. Permit limits lower than 0.25mg/l do not count towards that target so higher loads to a STW with a permit limit lower than 0.25mg/l may undermine a water companies' ability to meet the Environment Act objectives. Newbury is a high spiller, and additional developments and flows will increase frequency of spilling. Therefore, we would not support any additional flows entering - the Newbury STW, a known high spiller until significant work has been done to tackle the causes of the frequent spills. As stated in our suggested amendments and notes on Policy DM7 <PS1555>, adequate wastewater treatment infrastructure capacity resources must be available or provided to support all proposed development prior to the occupation. Due to the constraints highlighted for this site, this must be stated in the policy text for site RSA1.</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>Delivery of Proposed residential site allocations</p> <p>It is important to assess the progress and delivery of the sites identified in the LPR to meet housing requirements, in order to ensure there is sufficient certainty. This is particularly the case where allocation have been 'carried over' from the previous adopted Core Strategy. These amount to 2,652 dwellings, and represent a significant proportion of the overall housing requirement.</p> <p>Following an initial review of this progress, the table below lists those sites where there has been no progress or where progress has stalled are listed in the table below [for table in full, see attachment 'Turley (Hathor Properties) Table'], along with a review of their current planning status.</p> <p>Retained allocation from Core Strategy: Land north of Newbury College, Monks Lane, Newbury (site ref. HSA 1) This is a site allocation being carried over from the Housing Site Allocations DPD (adopted 2017) for approximately 15 dwellings.</p> <p>Planning status: The site benefits from outline permission (application reference 19/00669/OUTMAJ) for 16 dwellings dated August 2019, and reserved matters approval dated January 2021 (application reference 20/00346/RESMAJ).</p> <p>The AMR 2022 states that there is a delay in development due to a revised scheme incorporating additional land and increased number of dwellings.</p> <p>Based on the above, there remains some uncertainty regarding delivery from these existing long-standing allocations, particularly during the first five years of the LPR period.</p> <p>The LPR is clear that Newbury is the primary settlement in the District and has the greater potential to deliver sustainable development, yet it is not the primary focus for the proposed housing allocations. In order to secure a more balanced approach to delivering sustainable development across the LPR plan period, and to assist in delivery of a likely shortfall in housing in the short term, Newbury is well placed to accommodate further allocations.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p>	Yes

* Yes	
* No	
5. Independent Examination	Our position is that the site should be included as a proposed residential allocation and that the LPR does not provide enough sites to provide sufficient housing supply.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? -	No

<p>Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure.</p> <p>The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.</p> <p>Early engagement between the developers and Thames Water would be beneficial to understand:</p> <ul style="list-style-type: none"> • What drainage requirements are required on and off site • Clarity on what loading/flow from the development is anticipated • Water supply requirements on and off site <p>The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.</p> <p>To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.</p> <p>Link here > https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity</p> <p>We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.</p> <p>Water Response</p> <p>The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development.</p> <p>Waste Response</p> <p>On the information available to date we do not envisage infrastructure concerns regarding wastewater network or wastewater treatment infrastructure capability in relation to this site/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p>Additional Comments</p> <p>These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water flows being discharged to the public sewer.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	

Please give reasons for your answer	
4. Proposed Changes	Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water to determine whether a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered is required.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	As the Council will know, it has a duty under the Planning (Listed Buildings and Conservation Areas) Act 1990 to pay special attention to the desirability of preserving or enhancing the character or appearance of that area.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a	Yes

<p>minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	Yes
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	<p>As a result of the lack of Conservation Area Appraisal and insufficient heritage assessment, currently we regard RSA2 as unsound because it is not based on proportionate evidence as required by paragraph 35 of the NPPF. We advise that proportionate heritage assessment is done on RSA2 at this stage to inform this allocation.</p> <p>Though this site is carried forward from the adopted site allocations development plan document and at the time of writing a development proposal has been submitted for determination (23/00310), the site's proximity to the conservation area does not appear to be mentioned in the Sustainability Appraisal. In principle we advise more detailed assessment to inform the allocation, given its proximity to the conservation area.</p> <p>Paragraph 206 of the NPPF local planning authorities to look for opportunities for new development within Conservation Areas, and within the setting of heritage assets, to enhance or better reveal their significance.</p> <p>We envisage particular sensitivities in the south west corner of the site, with the potential to impact on the rural character of the western approach to the conservation area.</p> <p>Also, there is the opportunity for any scheme to respond positively to the local context i.e. the character of the conservation area to influence the character of the development in a positive way. For this to be realised, further evidence is needed on the relationship between this site and the conservation area.</p> <p>We note and support the proposed criterion: "Informed by an archaeological desk based assessment as a minimum and field evaluation if required to assess the historic environment potential of the site". The Council may wish to make wording on archaeological assessment more consistent across its site allocation policies, as highlighted in our cover letter.</p> <p>We note and support the proposed criterion: "Development will protect and enhance the special architectural and historic interest of the Speen Conservation Area". We encourage the preparation of a</p>

	Conservation Area Appraisal as a priority to support effective decision- making and implementation of this policy.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	
4. Proposed Changes	<u>Evidence base</u> More detailed heritage assessment to inform the allocation, which may result in amendments to the policy.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	<p>Speen Parish Council recognise that outline planning permission has been granted for this site, but remain extremely concerned about the location of the road access to the site on the A4 (Bath Road). The visibility splay is set at the absolute minimum and does not take into account several aggravating factors, including incline and nationally recognised stopping distances. We will remain opposed to the current access plan as it introduces an increase risk to life.</p>

* Yes * No	
Please give reasons for your answer	<p>The site allocations presented in this chapter have not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of each site to accommodate development. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on these sites. We have concerns and have provided this information in a separate document <see comments below></p> <p>The site is on SPZ2+3, principal, and secondary A bedrock aquifer.</p> <p>This site would require a Flood Risk Assessment which demonstrates requirements of NPPF and PPG. This is due to its size (greater than 1 hectare or confirm).</p> <p>We would not support any additional flows entering the Newbury STW - a known high spiller until significant work has been done to tackle the causes of the frequent spills. As stated in our suggested amendments and notes on Policy DM7 <PS1555>, adequate wastewater treatment infrastructure capacity resources must be available or provided to support all proposed development prior to the occupation. Due to the constraints highlighted for this site, this must be stated in the policy text for site RSA2. (Please take notes of the details provided under RSA1 <PS1828> regarding wastewater discharge constraints).</p>

<p>Please give reasons for your answer</p>	<p>This policy was formerly 'RSA4' in the Regulation 18 Consultation Document and out comments on this still remain relevant. However it is noted that in the two years since the last Local Plan Review consultation, the full planning application which was pending consideration at this time has now been granted permission. Since this time, a Section 73 application has been submitted to vary conditions relating to the plans and hard landscaping, this application is pending consideration. A further application to discharge a pre-commencement condition has been approved. It is also understood that a housebuilder, namely Cala Homes, has now acquired the site and construction is imminent. As such, it is considered that the 'proposed allocation' is in fact retrospective which does not constitute good plan-making and we would therefore request that the allocation is now removed from the Local Plan Review.</p> <p>If this allocation were to be deleted, as suggested, it will need to be replaced by an allocation of a similar size, or larger, to ensure the housing requirement is met. As highlighted in our previous representations, the approved site layout plan for land at Colely Farm provides links through to the land east of Stone Lane. It is considered that the land east of Stoney provides a logical extension to the previous allocation and is clearly located in an area which the Council considers appropriate for the development of new homes. As such, it should be considered for allocation within the Local Plan Review.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	

<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>The site allocations presented in this chapter have not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of each site to accommodate development. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on these sites. We have concerns and have provided this information in a separate document <see comments below></p> <p>The site is on SPZ3, secondary superficial aquifer, secondary A bedrock aquifer.</p> <p>We would not support any additional flows entering the Newbury STW - a known high spiller until significant work has been done to tackle the causes of the frequent spills. As stated in our suggested amendments and notes on Policy DM7 <PS1555>, adequate wastewater treatment infrastructure capacity resources must be available or provided to support all proposed development prior to the occupation. Due to the constraints highlighted for this site, this must be stated in the policy text for site RSA3. (Please take notes of the details provided under RSA1 <PS1828> regarding wastewater discharge constraints).</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	

5. Independent Examination

<p>Please give reasons for your answer</p>	<p>Delivery of Proposed residential site allocations</p> <p>It is important to assess the progress and delivery of the sites identified in the LPR to meet housing requirements, in order to ensure there is sufficient certainty. This is particularly the case where allocation have been 'carried over' from the previous adopted Core Strategy. These amount to 2,652 dwellings, and represent a significant proportion of the overall housing requirement.</p> <p>Following an initial review of this progress, the table below lists those sites where there has been no progress or where progress has stalled are listed in the table below <i>[for table in full, see attachment 'Turley (Hathor Properties) Table']</i>, along with a review of their current planning status.</p> <p>Retained allocation from Core Strategy: Land at Coley Farm, Stoney Lane, Newbury (site ref. HSA 3)</p> <p>This is a site allocation being carried over from the Housing Site Allocations DPD (adopted at 2017) for approximately 75 dwellings.</p> <p>Planning status: A full application has been approved in June 2021 (application reference 20/00604/FULEXT). A review of WBC's online application search demonstrates that several discharge of condition applications have been approved. From a review of Google maps, no development has commenced on site.</p> <p>Based on the above, there remains some uncertainty regarding delivery from these existing long-standing allocations, particularly during the first five years of the LPR period.</p> <p>The LPR is clear that Newbury is the primary settlement in the District and has the greater potential to deliver sustainable development, yet it is not the primary focus for the proposed housing allocations. In order to secure a more balanced approach to delivering sustainable development across the LPR plan period, and to assist in delivery of a likely shortfall in housing in the short term, Newbury is well placed to accommodate further allocations.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>Our position is that the site should be included as a proposed residential allocation and that the LPR does not provide enough sites to provide sufficient housing supply.</p>

6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

2. Do you consider the Local Plan Review is sound? -	No

Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.
* Yes
* No

Please give reasons for your answer

The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure.

The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.

Early engagement between the developers and Thames Water would be beneficial to understand:

- What drainage requirements are required on and off site
- Clarity on what loading/flow from the development is anticipated
- Water supply requirements on and off site

The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.

To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.

Link here > <https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity>

We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.

Water Response

The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website <https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development>.

Waste Response

The scale of development/s is likely to require upgrades to both the wastewater network and sewage treatment infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing and infrastructure phasing plan. The plan should determine the magnitude of spare capacity currently available within the network and what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The developer can request information on the network and treatment infrastructure by visiting the Thames Water website <https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development>. Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ

Additional Comments

These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water flows being discharged to the public sewer.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water to determine whether a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered is required.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No

Please give reasons for your answer	<p>The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure.</p> <p>The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.</p> <p>Early engagement between the developers and Thames Water would be beneficial to understand:</p> <ul style="list-style-type: none"> • What drainage requirements are required on and off site • Clarity on what loading/flow from the development is anticipated • Water supply requirements on and off site

The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.

To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.

Link here > <https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity>

We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.

Water Response

The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website <https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development>.

Waste Response

On the information available to date we do not envisage infrastructure concerns regarding wastewater network or wastewater treatment infrastructure capability in relation to this site/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ

Additional Comments

These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water flows being discharged to the public sewer.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters	

<p>that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>The site allocations presented in this chapter have not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of each site to accommodate development. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on these sites. We have concerns and have provided this information in a separate document <see comments below></p> <p>The site is on SPZ3, secondary A superficial and bedrock aquifers. Adjacent to historic landfill sites (Fishing Club and Lower Way)</p> <p>There is a historic landfill historic landfill next to site which means that any significant foundations or ground excavations at the site may lead to creation of a pathway for pollutants within the landfill to reach groundwater. We refer the LPA to the Environment Agency's Approach to Groundwater Protection guidance Which highlights our requirements for developments on landfill sites. Developers at any allocated sites located on a historic landfill would need to make enquiries regarding potential requirements under the Environmental Permitting Regulations 2016.</p> <p>We would not support any additional flows entering the Newbury STW - a known high spiller until significant work has been done to tackle the causes of the frequent spills. As stated in our suggested amendments and notes on Policy DM7 <PS1555>, adequate wastewater treatment infrastructure capacity resources must be available or provided to support all proposed development prior to the occupation. Due to the constraints highlighted for this site, this must be stated in the policy text for site RSA5. (Please take notes of the details provided under RSA1 <Ps1828> regarding wastewater discharge constraints).</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	
<p>5. Independent Examination</p>	
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes</p> <p>* No</p>	
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes</p> <p>* No</p>	
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes</p> <p>* No</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the	Yes

delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	We note and support the proposed criterion in each of the policies listed in this representation that relates to desk-based archaeological assessment and, if needed, field evaluation.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	
4. Proposed Changes	For all sites listed in this representation, while we support the policy requirement for desk-based archaeological assessment and, if necessary, field evaluation, the language used across the policies used is not consistent. The Council may wish to review the language used across these policies to ensure it improve consistency. We do not consider this is a matter of soundness.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	N/A
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	Full approval has been given by West Berkshire Council for 91 dwellings on this site by 18/00964/FULEXT. This has a single access from Lower Way. This approved application does not include cycle linkages through the site, despite a specific request by Thatcham Town Council. The development does not front onto Lower Way, and one property is only around 1m away from the public footpath that now runs through the site.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	N/A
4. Proposed Changes	Point (i) in Policy RSA7 (Council note - the site referred to is RSA5 in LPR) needs to be amended as follows: (i) Provision for approximately 85 <u>91</u> dwellings, with a mix of dwelling sizes and types.

	<p>(ii) The site should be accessed via Lower Way. To ensure permeability through the site, the scheme should be designed with the potential for two accesses to be provided. Pedestrian and cycle linkages will be expected through the site and linking to the surrounding area.</p> <p>(iv) It is expected that development will front onto Lower Way to enable effective integration with the existing built form and be set back from the existing public rights of way to the east and west of the site. <i>(added text is underlined; deleted text is struck through)</i></p> <p>The consequential change to the number should be made to Policy SP13.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
<p>5. Independent Examination</p>	<p>Thattham Town Council is the principal representative body of the community of Thattham, which is the location of only new strategic site allocation in the draft Local Plan. The suitability of this site for development is reliant on having adequate infrastructure. However, the regeneration that was promised in the current Local Plan has not materialised, and would not be delivered through the policies in the draft Local Plan. The Town Council can provide local insight to the examination about Thattham, and particularly on the substantial deficit of infrastructure in the locality. It would also be happy to elaborate on its other concerns about the current proposals for the North East Thattham Strategic Site Allocation, as described in these representations.</p> <p>The Town Council anticipates that changes necessary to the draft Local Plan in relation to site allocations are greater than could be addressed through 'main modifications'. If, however, the Inspector is minded to consider recommending 'main modifications' to policy SP17 and related matters in other Policies, it would welcome the opportunity to provide its perspective on what modifications would be required.</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No</p>	Yes

<p>Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure.</p> <p>The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.</p> <p>Early engagement between the developers and Thames Water would be beneficial to understand:</p> <ul style="list-style-type: none"> • What drainage requirements are required on and off site • Clarity on what loading/flow from the development is anticipated • Water supply requirements on and off site <p>The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.</p> <p>To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.</p> <p>Link here > https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity</p> <p>We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.</p> <p>Water Response</p> <p>On the information available to date we do not envisage infrastructure concerns regarding water supply network infrastructure in relation to this development/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p>Waste Response</p> <p>On the information available to date we do not envisage infrastructure concerns regarding wastewater network or wastewater treatment infrastructure capability in relation to this site/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p>Additional Comments</p> <p>These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water flows being discharged to the public sewer.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	

4. Proposed Changes	Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water to determine whether a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered is required.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	The policy provides protection for ancient woodland in line with the NPPF.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need	Yes

<p>and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	Yes
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	Yes
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	<p>The NPPF requires protection for ancient woodland.</p> <p>This site is adjacent to ancient woodland Vicarage Copse/Wood (SU65367453) PAWS 19.3 Ha.</p> <p>We support the policy wording</p> <p><i>h. The development design will provide appropriate buffers of at least 15 metres between the development and the ancient woodland. The precise buffer will be determined through detailed assessment and design when proposals are submitted for development.</i></p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	n/a
<p>4. Proposed Changes</p>	n/a

<p>Please give reasons for your answer</p>	<p>The site allocations presented in this chapter have not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of each site to accommodate development. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on these sites. We have concerns and have provided this information in a separate document <see comments below></p> <p>The site is on SPZ3, secondary A superficial and bedrock aquifers</p> <p>We assume wastewater will be discharged at the Reading STW. We have no concerns provided Thames Water are confident any additional flows will not lead to deterioration of phosphate classification. Reading STW is within DWF capacity and not a frequent spiller. The policy notes should include a requirement for developers to liaise with Thames Water to discuss wastewater drainage for the site.</p>

Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>Herewith our response to the Local Plan 2022-2039: 27. RSA8. This is on a flood plain and will have a severe impact on the surrounding area. It is also next to the M4 and will suffer from extensive air and noise pollution.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	
<p>5. Independent Examination</p>	
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes * No</p>	
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes * No</p>	
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes * No</p>

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	The Local Plan is used by developers and, as a result, development proposal are not sufficiently modified to take account of local needs and objections because the plan is not strong enough in favour of protecting neighbourhoods as per our comments.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	No
Please give reasons for your answer

Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	

<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure.</p> <p>The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.</p> <p>Early engagement between the developers and Thames Water would be beneficial to understand:</p> <ul style="list-style-type: none"> • What drainage requirements are required on and off site • Clarity on what loading/flow from the development is anticipated • Water supply requirements on and off site <p>The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.</p> <p>To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.</p> <p>Link here > https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity</p> <p>We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.</p> <p>Water Response</p> <p>On the information available to date we do not envisage infrastructure concerns regarding water supply network infrastructure in relation to this development/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email</p>

	<p>Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p>Waste Response</p> <p>The scale of development/s is likely to require upgrades to both the wastewater network and sewage treatment infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing and infrastructure phasing plan. The plan should determine the magnitude of spare capacity currently available within the network and what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The developer can request information on the network and treatment infrastructure by visiting the Thames Water website https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development. Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p>Additional Comments</p> <p>These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water flows being discharged to the public sewer.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water to determine whether a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered is required.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	<p>No</p>
<p>5. Independent Examination</p>

Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>The site allocations presented in this chapter have not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of each site to accommodate development. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on these sites. We have concerns and have provided this information in a separate document <see comments below></p> <p>The site is on SPZ3, principal bedrock aquifer</p> <p>We assume wastewater will be discharged at the Reading STW. We have no concerns provided Thames Water are confident any additional flows will not lead to deterioration of phosphate classification. Reading</p>

	STW is within DWF capacity and not a frequent spiller. The policy notes should include a requirement for developers to liaise with Thames Water to discuss wastewater drainage for the site.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No

<p>Please give reasons for your answer</p>	<p>I would also like to add on the follow reasons to object the proposed work in Theale (Plan Review 2022-19) - 40 homes on Whitehart Meadow. Whitehart Meadow is the area of land between the Woodfield Way estate and the M4 and 60 homes on the site of the old Theale sewage works. This would be off the end of Blossom Lane.</p> <p>I live very close to the proposed sites, and I am very concerned these developments would heavily impact the environmental and ecological habitats and animals that occupy these areas. There are herds of deer who regular use that area, along with the everyday British wildlife species we are so lucky to have in Theale. Also, Theale is a small countryside looking town and that is what makes the area so beautiful and appealing, building an extra 100 homes would not look good for the small town Theale currently provides and even more of a reason against it is that Theale village would not be able to cope with the increased pressures to the public services, food demands, parking spaces etc. I am very against these developments from being built and I wish the plans would be dropped and we can enjoy appreciating the greenspace and wildlife we still thankfully have. Furthermore, the ground is already a concerning flood risk zone and should be excluded from any future developments as it is not safe or stable due to ground conditions.</p> <p>The 100 homes proposed for Theale would be on top of over 440 homes on the western side of Theale that have been given planning permission but not yet built.</p> <p>The proposed extra homes for Theale will put extra pressure on local health services that are already stretched to the limit.</p> <p>Traffic from the proposed extra homes in Theale, in conjunction with that generated by the north east Thatcham site, will make local road congestion worse.</p>

* Yes * No	
Please give reasons for your answer	I am emailing to object to the proposed building of further homes in theale village. There is not the infrastructure to support this at all in terms of doctors, dentists or schooling. The roads cannot cope with the volume of traffic as it stands, let alone the increase that these proposed houses would bring. I would be very concerned that anymore homes built in theale would be damaging to the village.

<p>Please give reasons for your answer</p>	<p>I have received your recent 'intouch' leaflet where you claim to oppose inappropriate developments. Yet you are considering housing applications in several areas in Theale. Our village cannot sustain anymore housing developments.</p> <p>Roads are already congested, the doctors surgery is not big enough to take on more patients, it already takes weeks to have a face to face appointment. Theale has already been overdeveloped.</p>

The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.</p> <p>Early engagement between the developers and Thames Water would be beneficial to understand:</p> <ul style="list-style-type: none"> • What drainage requirements are required on and off site • Clarity on what loading/flow from the development is anticipated • Water supply requirements on and off site <p>The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.</p> <p>To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.</p> <p>Link here > https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity</p> <p>We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.</p> <p>Water Response</p> <p>The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development.</p> <p>Waste Response</p> <p>On the information available to date we do not envisage infrastructure concerns regarding wastewater network or wastewater treatment infrastructure capability in relation to this site/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p>Additional Comments</p> <p>These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water flows being discharged to the public sewer.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	

4. Proposed Changes	Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water to determine whether a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered is required.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need	

<p>and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to voice my concerns over the Local Plan that appears to include up to 200 extra homes being built in Theale.</p> <p>According to the plan an extra 100 houses could be built to the West of the village (policy RSA 9) and a further 100 houses to the East (policies RSA10 and RSA 11).</p> <p>This would be a notable increase in the amount of housing in Theale, and my biggest concern is that these extra homes would put significant extra pressure on local facilities, and in particular the local schools.</p> <p>I have lived in Theale for about <redacted> months, and have a <redacted> year old son. We applied for him to attend Theale Primary School when we moved here. However, we are continually told that there is no space for him due to over subscription at the school. Instead, we have to drive 5 miles each way to his old school in Ford's Farm in Calcot, meaning we are driving about 100 miles a week to take him to school and pick him back up.</p> <p>I do not see how having a further 200 families in the village is tenable, considering the likely extra number of school places that this would require. As our experience shows, there are not enough school places for even one extra family, let alone 200. I seriously doubt that the capacity of the school could be increased enough to accommodate the likely extra number of children in the village.</p> <p>I further note that the High Street already suffers from bad traffic congestion (which we have no choice but to drive through to take our son to school each day), and the increased housing would only make this significantly worse.</p> <p>Whilst I understand the need for extra housing, I would say that Theale is not a suitable place for them.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>

<p>Please give reasons for your answer</p>	<p>The text associated with this allocation should refer to the listed milestone in the north east corner. It is listed GII and the plan should commit to its conservation and ensure it is given suitable setting, preferably in policy. While the milestone may be protected as a by-product of the scheme design, this needs to be made explicit.</p> <p>Also, we note Englefield House, a Registered Park and Garden (GII) north west of the allocation. The Plan would be improved by acknowledging this nearby designated heritage asset.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	The scheme will conserve the listed milestone and enhance its setting

<p>Please give reasons for your answer</p>	<p>The site allocations presented in this chapter have not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of each site to accommodate development. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on these sites. We have concerns and have provided this information in a separate document <see comments below></p> <p>The site is on SPZ3, principal bedrock aquifer, secondary A superficial aquifer, close to historic landfill site (Ex British Rail Sites No.1-3)</p> <p>There is a historic landfill historic landfill next to site which means that any significant foundations or ground excavations at the site may lead to creation of a pathway for pollutants within the landfill to reach groundwater. We refer the LPA to the Environment Agency's Approach to Groundwater Protection guidance Which highlights our requirements for developments on landfill sites. Developers at any allocated sites located on a historic landfill would need to make enquiries regarding potential requirements under the Environmental Permitting Regulations 2016.</p> <p>We assume wastewater will be discharged at the Reading STW. We have no concerns provided Thames Water are confident any additional flows will not lead to deterioration of phosphate classification. Reading STW is within DWF capacity and not a frequent spiller. The policy notes should include a requirement for developers to liaise with Thames Water to discuss wastewater drainage for the site.</p>

<p>Please give reasons for your answer</p>	<p>Delivery of Proposed residential site allocations</p> <p>It is important to assess the progress and delivery of the sites identified in the LPR to meet housing requirements, in order to ensure there is sufficient certainty. This is particularly the case where allocation have been 'carried over' from the previous adopted Core Strategy. These amount to 2,652 dwellings, and represent a significant proportion of the overall housing requirement.</p> <p>Following an initial review of this progress, the table below lists those sites where there has been no progress or where progress has stalled are listed in the table below [for table in full, see attachment 'Turley (Hathor Properties) Table'], along with a review of their current planning status.</p> <p>Retained allocation from Core Strategy:</p> <p>Land between A340 and The Green, Theale 100 dwellings</p> <p>Planning status: Outline application 17/02904/OUTMAJ for up to 104 dwellings approved December 2020.</p> <p>No reserved matters application submitted and the outline permission will lapse imminently.</p> <p>The lack of delivery at this site has been subject to much discussion, and its ability to be brought forward continues to be subject to debate.</p> <p>Based on the above, there remains some uncertainty regarding delivery from these existing long-standing allocations, particularly during the first five years of the LPR period.</p> <p>The LPR is clear that Newbury is the primary settlement in the District and has the greater potential to deliver sustainable development, yet it is not the primary focus for the proposed housing allocations. In order to secure a more balanced approach to delivering sustainable development across the LPR plan period, and to assist in delivery of a likely shortfall in housing in the short term, Newbury is well placed to accommodate further allocations.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>Our position is that the site should be included as a proposed residential allocation and that the LPR does not provide enough sites to provide sufficient housing supply.</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No</p>	<p>Yes</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	No
<p>Please give reasons for your answer</p>	
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I would also like to add on the follow reasons to object the proposed work in Theale (Plan Review 2022-19) - 40 homes on Whitehart Meadow. Whitehart Meadow is the area of land between the Woodfield Way estate and the M4 and 60 homes on the site of the old Theale sewage works. This would be off the end of Blossom Lane.</p> <p>I live very close to the proposed sites, and I am very concerned these developments would heavily impact the environmental and ecological habitats and animals that occupy these areas. There are herds of deer who regular use that area, along with the everyday British wildlife species we are so lucky to have in Theale. Also, Theale is a small countryside looking town and that is what makes the area so beautiful and appealing, building an extra 100 homes would not look good for the small town Theale currently provides and even more of a reason against it is that Theale village would not be able to cope with the increased pressures to the public services, food demands, parking spaces etc. I am very against these developments from being built and I wish the plans would be dropped and we can enjoy appreciating the greenspace and wildlife we still thankfully have. Furthermore, the ground is already a concerning flood risk zone and should be excluded from any future developments as it is not safe or stable due to ground conditions.</p> <p>The 100 homes proposed for Theale would be on top of over 440 homes on the western side of Theale that have been given planning permission but not yet built.</p> <p>The proposed extra homes for Theale will put extra pressure on local health services that are already stretched to the limit.</p> <p>Traffic from the proposed extra homes in Theale, in conjunction with that generated by the north east Thatcham site, will make local road congestion worse.</p>

* Yes * No	
Please give reasons for your answer	<p>I'm responding to the proposed Local Plan review consultation for 2022-39.</p> <p>My name is <name redacted>, I live at <address redacted>.</p> <p>My main concern is the Theale area.</p> <p>"- 40 houses built on Whitehart Meadow - the area of land between the Woodfield Way estate and the M4.</p> <p>- 60 houses built on the site of the old sewage works, off Blossom Lane</p> <p>- 1,500 houses built on the Theale side of Thatcham."</p> <p>At least 50% of each of these if they are approved MUST be social housing. This is the biggest need in our increasingly unaffordable area. These social and maybe 5% affordable homes shouldn't just be flats either! Just because people can't afford to stay in their village doesn't mean they don't want a garden or basic things many people take for granted. It's a village, they are green and plentiful, NO PLACE for flats. My own social home is a maisonette and gives everyone outside space and a garage and is an ideal fit for the village if inspiration is needed.</p> <p>My next concerns is the doctors surgery and schools that are very over subscribed as it is. We would need them making larger & an NHS dentist in the area.</p> <p>Theale already has a bad smell of sewage outside the new Red Lion Flat development on the Englefield road/church street junction. The flats at Leonard court/Elizabeth court already have sewage issues so Theale's entire village will need its sewage waste pipes upgraded and enlarged.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	<p>Off the back of this we have already got several hundred houses coming to the village maybe they need to be the "Guinea pig" and in 5 years after they have been built a new review for Theale can take place to see if they can even cope with those?</p>

Please give reasons for your answer	I am emailing to object to the proposed building of further homes in theale village. There is not the infrastructure to support this at all in terms of doctors, dentists or schooling. The roads cannot cope with the volume of traffic as it stands, let alone the increase that these proposed houses would bring. I would be very concerned that anymore homes built in theale would be damaging to the village.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	

<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I would like to voice my opposition to the proposed land development in Theale, namely the building of 40 houses on whitehart meadow.</p> <p>I have a number of major concerns about what is being proposed, especially as it relates to Theale:</p> <ol style="list-style-type: none"> 1 The 100 homes proposed for Theale would be on top of over 440 homes on the western side of Theale that have been given planning permission but not yet built. 2 The plan is being rushed through so as to meet artificial deadlines. 3 The number of homes allocated in the plan ignores the 500 - 1000 flats likely to be built in Newbury at the London Road Industrial Estate, that the council owns, and at a re-developed Kennet Shopping Centre. 4 more homes than necessary would be built on greenfield sites like those proposed for Theale. 5 The proposed extra homes for Theale will put extra pressure on local health services that are already stretched to the limit. 6 Traffic from the proposed extra homes in Theale, in conjunction with that generated by the north east Thatcham site, will make local road congestion worse. 7 There are plenty of deers and other wildlife who live within whitehart meadow and will be killed should this development go ahead. I have picture evidence of said deer living in this area.
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it</p>	

necessary to participate at the examination hearing session(s)? * Yes * No

Please give reasons for your answer	<p>I strongly object to the proposed planning application that has been submitted in theale (whitehouse meadow and the old sewage works) as I don't believe theale can cope with it.</p> <p>Myra it will be good for the local businesses (shops / pubs etc) however I don't believe that the village can deal with this amount of building work.</p> <p>Firstly it's difficult enough to get an appointment at the local doctors surgery and if you add another 100 homes to the equation it will be near on impossible.</p> <p>Secondly I don't think the schools will be able to deal with it either.</p> <p>Thirdly the amenities in the village struggle from time to time and by adding more homes in the village then this will only get worse.</p> <p>My fourth point is that traffic in the village can be a nightmare at the best of times and by adding another 100 homes to this then the problem will only increase.</p> <p>My fifth point is that the 2 proposed sites both flood and are also homes to local wildlife.</p> <p>My sixth concern is that by building this their will be no boundaries between Theale and Calcot.</p> <p>My seventh concern is the overhead power lines that run across both proposed sites, will this be safe?</p>

<p>Please give reasons for your answer</p>	<p>Please find my objections for the proposed planning of 40 homes on whitehart meadow and 60 homes on the old Theale sewage works.</p> <ul style="list-style-type: none"> • The already very over stretched facilities in the village inc the schools , medical centre surgery , chemist, dentist, facilities for young people. • Traffic that over 500 vehicles will cause to already congested very narrow roads. inc the 400 + homes that already have planning approval. • Congestion of traffic in the high st which has parking on both sides and is gridlocked when buses are trying to get past delivery lorries. • The A4 is very busy and the amount of traffic already using it is gridlocked during the rush hour. • The extra traffic due to the building of homes in Newbury and thatcham. • The negative affect to the local environment, air pollution , green spaces and wildlife. • This would be on top of over 400 homes that already has approval and will be terrible for the small community village of Theale. • There are very little facilities for young people which will encourage them to wander around the village in groups which is very disconcerting for people walking alone.

<p>Please give reasons for your answer</p>	<p>I am writing in response to the consultation on the Local Plan. I wish to object most strongly to the two proposed development sites in Theale.</p> <p>The site at Whitehart Meadow for 40 homes is totally unsuitable – many of the houses would be underneath the electricity pylons, they would be next to the M4, and building there would remove the green space between Theale and Reading. This would also increase the amount of traffic using the mini roundabout at the eastern end of the High Street, which is already a pinch point for vehicles.</p> <p>The site at the old sewage works for 60 homes is also totally unsuitable – it could only be accessed by vehicles using Crown Lane and Blossom Lane, both of which are narrow and already congested and have narrow or non-existent pavements.</p> <p>The addition of these potential 100 homes to the 429 already planned for the Lakeside site and the land between The Green and the A340 would represent an increase in Theale's population of over 40%, completely changing the nature of the village for the worse. The current infrastructure is barely coping with the current population as it is.</p>

Please give reasons for your answer	<p>I have been alerted by my local Councillor (Alan Macro) regarding several proposals for building more new homes in Theale, to be included in the revised Local Plan.</p> <p>The proposals are as follows :-</p> <ul style="list-style-type: none"> • 40 houses built on Whitehart Meadow - the area of land between the Woodfield Way estate and the M4. • 60 houses built on the site of the former sewage works, off Blossom Lane <p>I have previously responded to object to both these proposals in recent years when they have been submitted as formal planning applications to West Berks Council.</p> <p>As a resident living close to both these sites in Theale, as previously I would also like to register my objection to these proposals being included in a revised Local Plan for Theale. Aside from the more detailed objections that were submitted previously, I would add that we have already had approval granted for many new homes to be built in the village and we should not have to suffer yet more house-building and loss of green space.</p> <p>I would be grateful if you could take the above into account when reviewing the Local Plan in the coming weeks.</p>

Please give reasons for your answer	<p>Re: Local Plan – Whitehart Meadow, Theale</p> <p>As a resident of Theale village I wish to formally register vehement objection to the proposed local plan referenced above which raises many serious concerns with respect to its impact on the village of Theale, the residents of the village, and the wider area.</p> <p>A non-exhaustive list of objections is presented as follows:</p> <p>Conservation Area</p> <p>The area, or access roads within the area, fall within a designated Conservation Area and setting, and is thus subject to protection as an area of special architectural or historic interest, the character or appearance of which it is desirable to preserve or enhance as per Section 69 of The 1990 Planning (Listed Buildings and Conservation Areas) Act and as designated under Article 50 of the Planning (NI) Order 1991.</p> <p>Conservation Areas are also notable for their biodiversity value. Protected species and habitats need to be addressed when reviewing buildings, sites and planning works. See further point on Destruction of wildlife habitat and protected species.</p>

	<p>In addition, trees in a Conservation Area are automatically protected as if a Tree Preservation Order (TPO) was in place.</p> <p>Invasion of privacy of Theale residents</p> <p>The overlook that will result from any development will pose serious privacy issues especially for the properties surrounding the proposed site. As per Article 8 of the Human Rights Act states a person has the substantive right to respect for their private and family life. In the case of Britton vs SOS the courts reappraised the purpose of the law and concluded that the protection of the countryside falls within the interests of Article 8. Private and family life therefore encompasses not only the home but also the surroundings.</p> <p>Agricultural Land Classification (ALC)</p> <p>Natural England records that the proposed site is grade 3 ALC and thus the land should protected from development under the government policies and legislation to preserve the best and most versatile (BMV) agricultural land and soils in England from significant, inappropriate or unsustainable development proposals.</p> <p>Flood Risk, Ground Stability and Drainage</p> <p>The Environment Agency designates areas of the proposed site as at RISK from surface water flooding. The eradication of natural ground absorption inherent to this proposal will heighten this risk status for Theale village and adversely affect the foundational integrity of nearby properties and subsequently elevate Home & Buildings insurance premium rates for the surrounding area.</p> <p>Destruction of wildlife habitat and protected species</p> <p>The destruction of habitation required for this development would lead to a further decline in wildlife species such as deer, rabbit, birds, bats and hedgehogs. Hedgehogs are listed as a Species of Principle Importance in England under the Natural Environment and Rural Communities (NERC) Act 2006 Section 41 making hedgehogs a material consideration for Local Planning Authorities (LPAs) during the planning process.</p> <p>Highway safety, inadequate parking and access</p> <p>Theale village is already vastly strained with traffic and parking issues; this proposal will only serve to escalate these issues and stands in direct contradiction with both government and local council policies on congestion and pollution alleviation. Parking facilities in Theale are already oversubscribed and the proposed development would lead to an increase in traffic, congestion and parking issues correlating inversely with a decrease in highway safety.</p> <p>Pylons</p> <p>The site is unsuitable as it encompasses high voltage overhead power lines.</p> <p>Noise/Air/Light/Visual Pollution</p> <p>The development will increase noise, air, light and visual pollution in Theale village both during and post-construction.</p> <p>The proposed site has not been included in either the Strategic Transport Model or the Air Quality Assessment.</p> <p>Loss of natural light</p> <p>The proposed development is in extremely close proximity to numerous residential properties that have benefited from natural space and light for over 20 years. The proposed development would contravene the fair and reasonable 'right to light' claim by residents resulting from the obscuration of a South-East solar trajectory.</p> <p>Negative alteration to the character and nature of Theale village</p> <p>The encroachment on green/brown spaces surrounding Theale and the increased development and traffic will erode the character and identity of Theale village.</p> <p>In summary any proposals to include Whitehart Meadow as a development location should be wholly refused as it stands in direct contradiction to myriad land/heritage conservation policies and would also be to the detriment of the quality, character, safety and amenity value of the area, as outlined in the points above.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable	

<p>over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I wish to strongly object to your proposals to build yet more houses in Theale, due to the following reasons:-</p> <p><u>Whitehart Meadow</u> - Proposal to build 60 houses The area is a flood risk. There are high voltage overhead power units across the area.</p> <p>More important objections:</p> <p>You have already given consent for a total of 440 houses to be built at the western side of Theale - No doubt the building company will submit requests to increase the quantity, as that appears to be the norm. Has this figure been included in your allocation for building in Theale? You mention "infrastructure". Does that mean you will build/extend Theale Medical Centre and arrange employment of more doctors and paramedics? The Medical Centre is struggling to cope with the sheer number, and every increasing number, of patients it already has, so this is an issue of great concern.</p> <p>The horrendous increase in traffic – also taking into account the houses to be built in Thatcham. The sheer volumes will surely increase congestion at the Theale roundabouts with traffic wishing to gain access to the M4.</p> <p>Lastly, Theale is a village. The residents wish it to remain a village. We do not wish to be joined up with Calcot or become a town. Theale has already taken a huge allocation of newbuild houses/flats and has, therefore, heavily committed to the need for more housing.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>

<p>Please give reasons for your answer</p>	<p>National Grid has appointed Avison Young to review and respond to local planning authority Development Plan Document consultations on its behalf. We are instructed by our client to submit the following representation with regard to the current consultation on the above document.</p> <p>About National Grid</p> <p>National Grid Electricity Transmission plc (NGET) owns and maintains the electricity transmission system in England and Wales. The energy is then distributed to the electricity distribution network operators, so it can reach homes and businesses.</p> <p>National Grid Gas plc (NGG) owns and operates the high-pressure gas transmission system across the UK. In the UK, gas leaves the transmission system and enters the UK's four gas distribution networks where pressure is reduced for public use.</p> <p>National Grid Ventures (NGV) is separate from National Grid's core regulated businesses. NGV develop, operate and invest in energy projects, technologies, and partnerships to help accelerate the development of a clean energy future for consumers across the UK, Europe and the United States.</p> <p>Proposed development sites crossed or in close proximity to National Grid assets: Following a review of the above Development Plan Document, we have identified that one or more proposed development sites are crossed or in close proximity to National Grid assets. Details of the sites affecting National Grid assets are provided below.</p> <p>RSA10 Whitehart Meadow, Theale (THE1) - Asset Description: 4YG ROUTE TWR (040 - 110): 400Kv Overhead Transmission Line Route: BRAMLEY - DIDCOT 1 (<i>see attachment for map</i>)</p> <p>Further Advice</p> <p>To help ensure the continued safe operation of existing sites and equipment and to facilitate future infrastructure investment, National Grid wishes to be involved in the preparation, alteration and review of plans and strategies which may affect their assets. Please give reasons for your answer	<i>Extract of representation relevant to consultation point</i> The Council previously assessed the site as suitable for a residential development of approximately 100 dwellings and gave it the reference number RSA16. This has subsequently changed to RSA10 and the number of dwellings has been reduced to 40 along with a reduction in identified area for the allocation.

These representations continue to support the proposed allocation with reference to the Council's evidence base and our own detailed technical work but challenge the decision for a reduction in units to 40 and the size of the allocation.

We make some additional comments regarding the capacity of the site and enclose in Appendix 2 a revised indicative masterplan which shows how, to ensure effective use of land, a residential development could be delivered, including a mix of houses of different sizes, appropriate to this sustainable location. This plan utilises the previously approved and constructed existing access road and bridge over the brook and, importantly, ensures that the separate identities of Calcot and Theale are maintained by providing a significant area of green infrastructure/public open space in accordance with the Council's draft policy for the site. Alongside this is a revised allocation plan contained in Appendix 1.

We have previously promoted the site as suitable for either residential or employment uses, given the highly sustainable location. We are flexible regarding the final numbers to be accommodated on the site subject to making effective use of land which remains a key principle of national policy. In order to achieve this the number of dwellings should be no less than 70.

We have submitted evidence to the Council through our previous representations of a successful flood map challenge which has resulted in the Environment Agency reclassifying the flood risk of the site and updating the national flood maps to reflect this information. This matter, which was an issue for a previous residential planning application at the site in 2017 has therefore been addressed.

We confirm that the site can be delivered as proposed, and the proposed developable area of the site is entirely within flood zone 1 and is therefore in a sequentially preferable location, appropriate for development.

We have had a significant quantum of technical work prepared to support a future development at the site so are able to confirm that the site can be delivered for the proposed use without technical concerns. We refer to this elsewhere in these representations.

Additionally, the site is in the ownership of a developer who is actively promoting the site for development and has already invested in the necessary technical work to inform the detailed development of the site. The Council can therefore have the necessary confidence that the site is deliverable in terms of the definition in the National Planning Policy Framework (NPPF).

We note that whilst the site at Blossom Lane is retained as an allocation (RSA11), there is an unresolved access issue which could be addressed by the consideration of an access through White Hart Meadow. We have therefore again shown this in indicative form as part of our proposal and would be pleased to discuss this further with the Council and/or the site promoter as appropriate.

OUTLINE PROPOSALS FOR THE SITE (RSA10)

The White Hart Meadow site has a long planning history, and it benefits from an extant consent for a 160 bed hotel which has had the access and bridge constructed. Site Layout Plan provided below and it should be noted this extends the development footprint north east of the overhead pylons into the proposed landscaped zone and beyond the currently proposed red line allocation.

<map given in attached Full Rep>

A planning application for up to 130 dwellings (16/03613/OUTMAJ) was refused in 2017. The only technical reason for refusal however was a flooding issue, which has been overcome. The proposed layout at that time was as follows:

<site plan given in attached Full Rep>

The Council, on preparation of the emerging plan had also previously assessed the site as suitable for a residential development of approximately 100 dwellings and given it the reference number RSA16. At the regulation 18 stage we evidenced that, to ensure effective use of land, up to 134 units could be delivered, including a mix of houses and flats of different sizes, appropriate to this sustainable location.

The illustrative layout advanced is detailed <see attached Full Rep> for ease of reference:

On 28th April however, we were informed that following the commission of a landscape assessment for the Theale sites (Sewage Treatment Works, Whitehart Meadow and land at Hoads Way) the Council has revised their position with a recommendation to contain the developable area to a smaller area than what is currently being proposed, with design parameter recommendations such as restricting the developable area to the west of the power lines, height to two storeys, extensive landscaping and tree planting, and buffer to Sulham Brook.

Taking the recommendations of the landscape assessment into account, this would reduce the site area to some 1.8ha, and development potential to approximately 42 dwellings, at a density of 30dph and 75% of the site, using the Council's Pattern Book approach. This relates to the area shaded purple only, as shown in the following plan

<plan given in full rep>

As part of the Council's evidence gathering, other responses were received by the Council stating that "The AONB Board and Natural England comment that the power lines form a 'natural' break point for defining the developable area, whilst still providing a buffer to the M4. Open space can be provided beyond the power lines and used to enhance the area. The Environment Agency require a 10m wide undeveloped buffer zone on both sides of the Sulham Brook."

CONSIDERATIONS

For the avoidance of doubt our client remains flexible regarding the final numbers to be accommodated on the site but this has to be subject to making effective use of land which remains a key principle of national policy.

The illustrative plan and revised allocation plan provided meets the criteria of draft policy RSA10 other than the proposed density, quantum of development and area for consideration.

We are of the firm view that by reducing the extent of development, as recommended by the landscape assessment, does not achieve this and as evidenced in the updated LVIA submitted, we see no reason why the south western part of the site cannot be developed when presented with an enhanced landscape plan and revised layout in this area, as the masterplan submitted will retain an open/sylvan character between Theale and Calcot, which is in line with the comments from the AONB Board and Natural England.

We have previously submitted evidence to the Council through our previous representations of a successful flood map challenge which has resulted in the Environment Agency reclassifying the flood risk of the site and updating the national flood maps to reflect this information. This matter, which was an issue for a previous residential planning application at the site in 2017 has therefore been addressed and we are more than content to retain a 10m wide undeveloped buffer zone on both sides of the Sulham Brook alongside the undeveloped buffer zone surrounding the pylons.

Using the AONB Board and Natural England's comments, that the power lines form a 'natural' break point for defining the developable area, as a starting point, the master plan provided has been revised to remove any development on the east side of the pylons with a reduction in the mass of car parking under the pylons with enhanced landscaping along the west side of the access into the site and an increased landscape buffer on the frontage of the High Street. Retaining significant expanses of semi wooded/scrub and wetland areas screening the development from the M4.

The masterplan should be seen as illustrative at this stage, however this is submitted to show how the site could be delivered for a residential development of approximately 72 dwellings in an area identified within our revised allocation plan submitted. A reduction of 62 dwelling from that previously promoted at the Regulation 18 stage and only 30 more than that recommended in the council's landscape assessment. The revised 72 dwellings scheme is shown below within a site area of 3.17 hectares amounting to a density of approximately 23 dph.

<site plan given in attached full rep>

The proposal has been informed by the technical work that has been carried out for the site, in particular the more recent Landscape and Visual Impact Assessment dated June 2022, as well as by the policies set out in the emerging Local Plan. Photomontages have been prepared and appending in Appendix 4.

View 1 is taken travelling east along the High Street; View 2 is looking back at the proposed access onto the High Street and View 3 is taken from the foot bridge which was previously identified as a view of concern.

What is evident from these views is that the development to the front of the site, as proposed in the submitted layout, will only have a very localised impact at the point of the access with medium and long-distance views being obscured by existing and proposed soft landscaping. The localised view in viewpoint 2 is also well screened with only roof top on show forming an acceptable transition to the countryside in one direction and the settlement beyond and not out of character with residential development in the area.

This reinforces, our submission that the revised masterplan conserves and enhances the special qualities of the nationally designated landscape of the adjacent North Wessex Downs AONB. In turn conserving and strengthening existing boundaries elements assisting in the retention of the of the individual identity of settlements, maintaining a sense of separation between Theale and Calcot ensuring no suburbanisation or loss of wooded character to the setting to the AONB.and providing a transition of development between the settlement and the countryside by a proposal designed around more family housing only 2 storeys in height, rather than the 3 storeys previously proposed.

This amendment provides for a continuation of the character of housing within Theale and its network of footpaths, ensuring no suburbanisation or loss of wooded character to the setting to the AONB.

In fact, the enhancement of this area to the east will provide an ideal opportunity to create a positive buffer to the nearby AONB at the same time retaining the open character of the setting of Theale and there is also the potential opportunity to consider a more comprehensive approach to development in this part of Theale alongside the semi adjacent site THE7 (to the north (and identified in Policy RSA11)). To demonstrate how this may be achievable, the landscape strategy provided identifies a possible future improved access and amenity area linking this site to THE7.

In terms of the mix of development, the illustrative masterplan shows how a mix of dwelling sizes and types could be provided on the site, including 2, 3 and 4-bed houses and 1 bed flats. This mix takes into account the location of the site and the surrounding character of the area. The mix broadly reflects the indicative need shown in table 3 of the emerging Local Plan. The policy is clear that the mix is not intended to be prescriptive.

In terms of tenure, the delivery of the site is intended to be policy complaint – the emerging policy (SP19) seeks 30% of affordable housing provision on brownfield sites of this scale. There may also be scope to provide an element of self-build and custom-build provision in accordance with emerging Local Plan policy DC17.

Parking spaces are shown on the masterplan, for both residents and visitors. The quantum of these reflects the Council's policy. Turning areas are also indicated, together with garden and amenity spaces and the linkages to the surrounding residential development. Additionally, we have included electric charging points on the plan in accordance with emerging policies DC35 and DC36.

We propose a high-quality design which is well proportioned and responsive to local vernacular. It is considered that the revised design and parameters of the site, together with the proposed landscaping, can assist in the mitigation of noise from the M4 motorway for adjoining neighbours of the site, as well as residents.

We also show the significant area of open space/green infrastructure that will be included to the east of the site to provide an improved edge to the settlement in this location and to ensure that the separate identities of Calcot and Theale are maintained. This area has the potential to provide play areas and facilities, as needed and to make a positive contribution to biodiversity net gain.

An access from the site through to the proposed allocation at Blossom Lane is shown on the masterplan, in indicative form.

TECHNICAL WORK

Our client has had a range of technical work carried out in order to inform the key parameters of the development of the site. It confirms that the site is deliverable without technical constraints.

This includes the following studies:

- Level 2 Flood Risk Assessment and Drainage Strategy prepared by Archibald Shaw.
- Transport Assessment and Workplace Travel Plan, prepared by Stuart Michael Associates
- Preliminary Noise Impact Assessment prepared by Sharps Acoustics (preliminary at this stage).
- Revised Landscape and Visual Impact Assessment and a Landscape Strategy prepared by Draffin Associates (Appendix 3)
- Ecological appraisal prepared by Richard Tofts Ecology has informed the proposal and follows on from earlier ecological work at the site which included specific protected species survey work.

The technical work will continue to be refined as the proposal progresses. We are happy to provide the work that has been carried out to date to the Council.

WEST BERKSHIRE'S ASSESSMENT AND EVIDENCE BASE

We have reviewed the Council's emerging Local Plan, evidence base, site assessment and interim Sustainability Appraisal/Strategic Environmental Assessment (SA/SEA).

We support the continued recognition of Theale as a Service Centre within the hierarchy set out within the Local Plan and support that Theale is seen as a focus for additional housing within the Eastern Area of the District. Whilst we do not object to its definition as a 'Rural Service Centre' (Policy SP3), as noted in the Regulation 18 consultation we consider that this could be appropriately simplified to 'Service Centre'. It is not accurate to describe Theale as a rural area, given its location on the edge of Reading and in very close proximity to the major roads network as well as large scale housing and employment areas.

Rural Service Centres are described in the emerging local plan as having 'reasonable accessibility'. Theale's accessibility is higher than this and could justifiably be described as 'excellent'. It may therefore be more appropriate to separate Theale out from the other 'rural' service centres which are smaller scale and less accessible and put it in a separate category of 'service centre' or 'small town'.

In terms of the detailed assessment of the site set out in the SA/SEA, the Landscape Sensitivity and Capacity Assessment for: THE1 land at Whitehart Meadow and the Council's Site HELAA we note the detail of the history of the site, including the successful flood map challenge. In some ways this information is now merely historic - all that is required is a simple reference to the fact that the developable area of the site lies within flood zone 1.

We confirm that we have had careful regard to the surrounding character of the area and the surrounding landscape and that the proposal has been informed by technical work on landscape in the form of an LVIA. The purpose of the LVIA is to identify the special characteristics of the existing landscape, to assess the likely impacts of the proposal and to consider the most appropriate mitigation measures and their residual impact to integrate the proposal with the local context.

We have addressed the points raised through the HELAA through the technical work that has been carried out to inform the proposal for the site.

With regards to viability, the proposal will provide a policy compliant quantum of affordable housing and a mix which accords with the housing need at the time of an application.

We support the recognition in the site assessment that the site is in single ownership and can come forward in the next five year period. This means that the site can make a timely contribution to housing delivery in the District.

CONCLUSION

We support the proposed allocation of White Hart Meadow for residential development but not the identified density and area of allocation.

This is a positive approach by the Council which reflects the highly sustainable location of the site. We have included an indicative masterplan (Appendix 2) as part of these representations which shows how the site can be delivered.

Whilst the site is allocated in policy RSA 10 for 'approximately' 40 dwellings, we seek flexibility with regard to the final numbers for the site to ensure that an effective use of land is achieved, at an appropriate density for the site and the surroundings. The final number is proposed to be informed by the technical work for the site of which we anticipate a density of approximately 72 dwellings on an enlarged allocation area as submitted, could be achievable whilst conforming to the criteria of emerging Poly RSA10.

Policy RSA10, as drafted, is not an appropriate strategy to maximise and make efficient use of land inconsistent with the NPPF.

The site has the benefit of being able to provide a high level of green infrastructure to provide a buffer to separate the developable area from the highways network and to ensure the separate identity of Theale is maintained.

We confirm that White Hart Meadow can be confirmed as a deliverable site and is being actively promoted by a willing developer who is committed to bringing the site forward.

<p>Please give reasons for your answer</p>	<p>Good afternoon,</p> <p>These developments are of concern to me. The extra traffic to access these will be on unsuitable roads that are already congested with on road parking and the car repair business in Theale High Street.</p> <p>Furthermore school places and the doctor surgery are already over used and unable to cope with the existing residents needs.</p> <p>Currently the parking in the High Street serves the businesses and residents well, but extra traffic will cause issues with deliveries and bus services.</p> <p>Theale village is under threat from these developments and would just become another part of the Reading sprawl. The noise from the M4 traffic will make living in these new houses unpleasant and the air quality detrimental to the residents health.</p> <p>For these reasons I object to the proposed developments.</p>

<p>Please give reasons for your answer</p>	<p>West Berkshire Council are proposing to allocate Whitehart Meadow as a site for 40 homes in its Local Plan review. This is despite the fact that there are several reasons why most or all of the site should not be built on. This is for the following reasons:</p> <ol style="list-style-type: none"> 1. Flood risk 2. High voltage overhead power lines cross the site 3. Noise and pollution from the motorway 4. The site has not been included in the Air Quality Assessment 5. The site has not been included in the Strategic Transport Model, meaning that the effect of traffic generated from the site has not been assessed. 6. Need to preserve the gap between Theale and Calcot/Tilehurst 7. Possible land contamination.

<p>Please give reasons for your answer</p>	<p>Following the news that two housing sites have been proposed for unsuitable land in Theale, I would like to register my objection to such a plan.</p> <p>Ref:</p> <p>40 houses on Whitehart Meadow</p> <p>60 homes on the site of the old sewage works, off Blossom Lane</p> <p>The land is a greenspace, and a wet area for most of the year. There is not enough infrastructure to handle this plan alongside the housing plans at the end of Theale (Lakeside).</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	
<p>5. Independent Examination</p>	
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes</p> <p>* No</p>	
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes</p> <p>* No</p>	
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes</p> <p>* No</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	I have received your recent 'intouch' leaflet where you claim to oppose inappropriate developments. Yet you are considering housing applications in several areas in Theale. Our village cannot sustain anymore housing developments.

	Roads are already congested, the doctors surgery is not big enough to take on more patients, it already takes weeks to have a face to face appointment. Theale has already been overdeveloped.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No

Please give reasons for your answer	I would like to express my concerns regarding the proposed development at Whitehart Meadow and Blossoms Lane. These green spaces provide habitat for wildlife as well as recreational areas for both children and adults to enjoy. I do understand that we do need houses built, and inevitably this will encroach on green spaces but I think that we do need to have green pockets for our children to learn in and play in, and wildlife corridors to balance the cost benefit with the nature around us that is vital for health and well-being, and the world that we need to preserve for the next generation.

* No	
Please give reasons for your answer	The Plan is unsound for the following reasons: RSA10 & RSA11 1 Flood risk to the land. 2 High voltage overhead power lines across the site. 3 Noise and pollution from the motorway. 4 No air quality assessment 5 Theale would not cope with the increased traffic. 6 Land contamination – possible for both sites 7 RSA11 -access to the site is by a single track road. 8 Developments would no longer mean Theale would have a village feel. Local medical and educational would not be able to meet the increased need
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes

Please give reasons for your answer	<p>The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure.</p> <p>The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.</p> <p>Early engagement between the developers and Thames Water would be beneficial to understand:</p> <ul style="list-style-type: none"> • What drainage requirements are required on and off site • Clarity on what loading/flow from the development is anticipated • Water supply requirements on and off site

The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.

To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.

Link here > <https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity>

We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.

Water Response

The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website <https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development>.

Waste Response

On the information available to date we do not envisage infrastructure concerns regarding wastewater network or wastewater treatment infrastructure capability in relation to this site/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ

Additional Comments

These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water flows being discharged to the public sewer.

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water to determine whether a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered is required.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>No</p>

Please give reasons for your answer	I am submitting my objection to LPR RSA10 Whitehart Meadow, Theale – 40 properties, as part of the West Berkshire Local Plan Review 2022 – 2039. I am a current resident of Woodfield Way and I object to the plans on the following grounds:

	<ul style="list-style-type: none"> - Flood risk - High voltage overhead power lines cross the site - Noise and pollution from the motorway - Possible land contamination - Need to preserve the gap between Theale and Calcot/Tilehurst - Impact on the Area of Outstanding Natural Beauty - Risk from fluvial, surface water and ground water flooding - Impact on the Theale High Street Conservation Area - Impact on surrounding housing - Impact on infrastructure and amenities - Impact on Theale's highways network

Please give reasons for your answer	<p>I would like to submit my objection to the proposed housing developments for whitehart meadow and blossom Lane in theale.</p> <p>Reasons for objection:</p> <ol style="list-style-type: none"> 1 Infrastructure. Theale currently is unable to accommodate the number of users for the GP surgery. There are no plans to expand the doctors surgery. In addition, the schools will also likely be unable to cope with the number of new families. 1 Environmental. Those sites both flood in the winter months, the run off will impact both the proposed and existing housing estates. There are many wild birds and animals in that current habitat who will be displaced. The current vegetation also provides a buffer from the noise and pollution of the m4

	<p>1 Increased traffic and people into a village which is already is small.</p> <p>1 Why would you expect people to live in homes directly under huge electricity pylons and directly next to the m4? Would you? There are more viable sites. These are not practical.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>

<p>Please give reasons for your answer</p>	<p>I live in <address redacted>.</p> <p>I am writing with deep concerns about the proposed developments of 40 and 60 new homes near my house, in the scrub land next to the M4.</p> <p>The views from the back of my property over <road redacted> have already been changed from lovely greenery to houses which now look into my back windows. Now I am worried about the impact from these new developments.</p> <p>First, the mini roundabout at the junction of the High Street and Hoad Way will have significantly more traffic, and will contribute much more noise to me - and to the old people who are residents of Elizabeth Court <comment redacted>. We already have too much traffic using the High Street on their way to the M4 and elsewhere. To the detriment of my health and wellbeing, this will cause more exhaust fumes and noise.</p> <p>Secondly, Theale Medical Centre is already in a parlous state. I won't go there any more <comment redacted>. In part this is obviously because they are under such huge strain that they simply cannot cope. It shows already. There is not an infinite stretch to the the capacity of infrastructure in our village, and it seems irresponsible of Council and builders to think of new housing if there is not commensurate responsibility to all the other needs, such as the Medical Centre, roads and schools.</p> <p>I register these points with the utmost concern for my own wellbeing and that of the village.</p> <p>I must oppose these new developments under the current circumstances.</p>

<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>A) Specific to Whitehart Meadow site (RSA10)</p> <ol style="list-style-type: none"> 1 There is flood risk to this site. In the last Local Plan, this site was put forward and rejected due to this. Nothing has changed. 2 High voltage overhead power lines cross the site. In the last Local Plan, this site was put forward and rejected due to this. Previous site proposals including hotel, housing going back some 25 years have all been rejected in relation to this concern. Nothing has changed. 3 Noise and pollution from the motorway - this site is adjacent to the M4 and junction 12. In the last Local Plan, this site was put forward and rejected due to this. Nothing has changed. What's more, there is a need to preserve a gap between Theale and Calcot/Tilehurst which Whitehart Meadow provides. 4 The site has not been included in either the Air Quality Assessment or the Strategic Transport Model, meaning that the effect of traffic generated from the site has not been assessed. This is essential, given the current bottlenecks (mini-roundabout at East end of Theale high street; Woodfield Way and no "in and out" thoroughfare around the current housing estate with all traffic being forced through one entrance to the estate) <p>B) In combination with Old Sewage Works site (RSA11)</p> <ol style="list-style-type: none"> 1 A combined total of 100 homes is proposed for Theale <i>which is in addition to</i> the over 440 homes on the western side of Theale that are yet to be built but have been granted planning permission. 2 There are artificial deadlines which we know is why this plan is being rushed through. Yet the Local Plan Core Strategy says that "If this development [350 homes at Lakeside site] goes ahead, Theale would need to undergo a period of consolidation to provide an opportunity for facilities and services to be upgraded". No justification has been given as to why this requirement, still much needed, has not been carried forward into the Local Plan Review. 3 <i>Neither</i> site has been included in either the Strategic Transport Model or the Air Quality Assessment. 4 The proposed extra homes will put extra pressure on local health services that are already stretched to the limit. 5 Traffic from these two proposed sites puts huge pressure on the two mini-roundabouts at either end of Theale High Street making local road congestion even worse.

<p>Please give reasons for your answer</p>	<p>I have been a resident of Theale for 16 enjoyable years and wish to oppose this plan. There is only one surgery in Theale, one primary school and one secondary school. Today, I have seen a noticeboard from Croudace Group announcing building on greenfield near the A4 roundabout. Planning permission is for approximately 230 homes on this site. Please stop. Theale does not need more homes! The additional cars in the village will be dangerous as the High Street is quite narrow and 'near misses' do occur.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>

Please give reasons for your answer	<p>I am writing to voice my concerns over the Local Plan that appears to include up to 200 extra homes being built in Theale.</p> <p>According to the plan an extra 100 houses could be built to the West of the village (policy RSA 9) and a further 100 houses to the East (policies RSA10 and RSA 11).</p> <p>This would be a notable increase in the amount of housing in Theale, and my biggest concern is that these extra homes would put significant extra pressure on local facilities, and in particular the local schools.</p> <p>I have lived in Theale for about <redacted> months, and have a <redacted> year old son. We applied for him to attend Theale Primary School when we moved here. However, we are continually told that there is no space for him due to over subscription at the school. Instead, we have to drive 5 miles each way to his old school in Ford's Farm in Calcot, meaning we are driving about 100 miles a week to take him to school and pick him back up.</p> <p>I do not see how having a further 200 families in the village is tenable, considering the likely extra number of school places that this would require. As our experience shows, there are not enough school places for even one extra family, let alone 200. I seriously doubt that the capacity of the school could be increased enough to accomodate the likely extra number of children in the village.</p> <p>I further note that the High Street already suffers from bad traffic congestion (which we have no choice but to drive through to take our son to school each day), and the increased housing would only make this significantly worse.</p> <p>Whilst I understand the need for extra housing, I would say that Theale is not a suitable place for them.</p>

<p>Please give reasons for your answer</p>	<p>I am submitting my objection to LPR RSA10 Whitehart Meadow, Theale – 40 properties, as part of the West Berkshire Local Plan Review 2022 – 2039.</p> <p>I am a current resident of <i><personal details removed></i> and I object to the plans on the following grounds:</p> <p><u>Your Vision:</u> 3.3 The development will negatively impact the infrastructure meaning it will not be sustainable either for the existing residents of Theale, or those who would be likely to settle in the new development if it were to be built. It will not foster community cohesion, health and wellbeing as it will blur the division of local areas between Theale and Calcot with the location of the site next to the M4, it will eliminate a natural area that people use to walk and exercise which will negatively impact the mental health of the existing residents who utilise this space.</p> <p><u>Strategic Objectives:</u> 7. Building on this site will not conserve or enhance the character or identity of the village. The village is already overpopulated, and this site would not be in keeping with the natural area where the land is located and would be detrimental to the rural feel of the village/community by becoming more brown land than green land which is already limited within this service centre.</p> <p><u>Infrastructure:</u> 4.2 The proposed development for this site is not a positive vision for the future. The impact to the village's infrastructure would be significant e.g. amenities such as the GP Surgery, Schools and high street facilities are already struggling to cope with the current population, without the additional proposed 200+ properties that are designated for Theale overall. This also contravenes the effective use of previously developed land. 4.12 The plans contravene the rural setting of Theale, as the additional development would reduce the rural space, negatively impacting the rural nature of the village. 4.19 The village does not need regenerating, as there already numerous areas of the village that have been redeveloped, as well as the growth of the commercial side of this service centre, with the upgrading of units within Arlington Business Park and the surrounding commercial areas near to the railway line. The site is also not an existing urban area which would be regarded as a more suitable location for future development. 4.20 This site does not meet the strategy's aim of making effective use of brownfield land. 4.30 Theale's infrastructure struggles to cope with key services and opportunities with the Primary school being relocated to a larger site, which reduced the open recreational green space of North Street playing fields, due to the demand on the school that the previous location could not support. There are no regular public transport links compared with other rural service centres, as the bus service is approx. every 30 minutes, with trains being the same if not marginally more frequently. Due to the location of the village and the lack of frequent public transport options, residents use their own vehicles, with most having a least 2 cars which causes an abundance of parking issues within the currently overpopulated residential areas of the village. 5.i. This development would not improve the wildlife habitat and species conservation in line with climate change. There are numerous types of wildlife living or frequenting the Whitehart Meadow, with deer and other such animals using the space from the local Englefield Estate. This is as well as red kites and other species of birds that nest and hunt in that area. 5.1 In response to climate change, if extreme weather events such as flash floods are a concern, this development would cause an issue as this area is a flood risk. The properties that run alongside the meadow already have to take flood risk into account when considering mortgages etc. and a development on this site would only increase that risk. This could make it harder for people to purchase existing homes in this area if the risk were deemed too high that it would create an issue for mortgages and making existing homes in the area depreciate in value and not viable to sell. The development would increase the number of people, properties and infrastructure at risk of flooding due to the reduction of the floodplain (section L) and would not mitigate flood risk but increase it. It would also exacerbate flooding problems on the proposal site and elsewhere as the flooding would increase in the recreational space between Whitehart Meadow and the old sewage works (RSA11 Former sewage treatment works, Theale). 5.28A The development would not fit into the life and texture of the village, nor would it be an improvement of the place. This is due to the significant impact on the infrastructure of the amenities of the village (as</p>

mentioned previously) as well as the highways infrastructure. There is already access issues at the M4 end of the High Street whereby traffic from junction 12 or any issues on the A4 cause a build-up and essentially block access to and from this end of the High Street and into the estates down Woodfield Way. This is already a significant concern with the lack of access for emergency vehicles for the residents in this area, as well as the abundance of street parking in that area where properties do not have adequate parking spaces and often narrow and limit easy access further into the estate.

5.30 The above also demonstrates how the development would contravene the practical use of the site by ensuring it is well connected, accessible, safe and easy for people to find, as it would not meet any of this criteria based on the location being at a dead end with a severe pinch point when traffic both through the High Street and on the A4/junction 12 are at its peak.

Landscape Character:

C: The development in conjunction with that planned for the old sewage works is not in context of the existing settlement. If the 2 sites were to go ahead, the developments would envelop the existing recreational space that would be left on Woodfield Way, effectively strangling the only remaining open land at the M4 side of the village. This would adversely affect the conservation (5.36) of the site in addition to being at odds with West Berkshire Council's plan of keeping the recreational space between the 2 proposed sites as a wildflower meadow to encourage wildlife habitation.

5.42 This development would not retain an actual or perceived visual break in settlements, as the residential areas of the village would populate the land up to the M4 and would not be a distinguished break between where Theale ends and the Calcot boundary starts. It would also eliminate the 'green routes' (F) used to commute or travel on foot or cycle, where residents use the meadow to walk through to access the only footpath to cross the M4.

Green infrastructure G: the development would not improve biodiversity and increase natural capital as it would displace many animals that use the meadow as their habitat, as well as obliterating West Berkshire Council's desired extension of wildlife corridors to provide habitat connectivity.

5.64 The planned development at this site does not meet the Council's commitment for strengthening local and strategic green infrastructure across the district for the benefit of the natural environment and health and wellbeing of the community. It reduces the green space and also areas for residents to exercise in and take time away from the built-up urban areas of the village.

Nationally Designated Sites:

There are suitable alternative sites with lesser impacts than proposed with the development on Whitehart Meadow. There is already a site at the end of the village at The Green/A4 junction which has planning permission for 100 units which would negate the need to build a development in restricted areas at the opposite end of the village.

5.70 The development on Whitehart Meadow would significantly reduce the buffer zone landscape feature protecting the residents from the M4 corridor. Residents along Woodfield Way and adjacent roads already experience an issue with air quality and noise from the M4. A development closer to the M4 would increase the effects experienced with black soot and dust being a common build-up in homes along Woodfield Way from the heavy motorway traffic, as well as the noise experienced from the motorway and roadworks that consistently take place at junction 12.

5.80 This development would destroy an irreplaceable habitat.

Policy SP 11

This development would not provide or retain an appropriate buffer zone between development proposals and designated sites. Both in terms of existing properties, and the planned development of the old sewage works next to Whitehart Meadow.

5.67 The development would not promote conservation, restoration and enhancement of priority habitats, ecological networks and the protection and recovery of priority species; and would not secure opportunities for a net gain for biodiversity.

6.4 Although collaborative working between West Berkshire Council, Wokingham Borough, Reading Borough and Bracknell Forest Councils can support local residents, it is having a detrimental impact to Theale with this planned development. If RBC have a shortfall of properties in their district, it should not mean that the required properties should be forced upon neighbouring areas which would lead to a detrimental impact on that area, its amenities and overall infrastructure. Theale should not have to bear the brunt of the failings of RBC's Reading Local Plan within their own district.

6.8 If no shortfall has been identified from other adjacent authorities or any of the other authorities within the Western Berkshire HMA have been identified, Theale should not be negatively affected by the developments proposed in order to satisfy the failings of other Councils, especially when there hasn't been a housing need/crisis identified in Theale specifically. This development would not serve local people and would only encourage residents to move in from surrounding areas, putting further pressure on the highways network, the limited public transport links, as well as local amenities that are already stretched beyond capacity. This would also not enhance or deepen the existing bonds in the community and could cause resentment from existing residents both in terms of the development taking place as well as towards the residents who may not be local to the area or contribute to immediate community.

6.73 This development contravenes the approach of the Council supporting the development of housing schemes that are initiated by local communities, as this site has not been initiated by local communities as an area for development that would benefit the village, landscape or community.

Town and District Centres: This develop would contravene the following principles that the development should:

- Not have an adverse impact on the safety and capacity of the local highway network; and
- Not have an adverse impact on local amenity.

As it would create both.

7.52 This development would not be supported by adequate and appropriate infrastructure. The GP Surgery is already oversubscribed and cannot cope with the current level of patients. The amenities in the High Street are not adequate for the current number of residents in Theale. The parking is restricted, there are no longer any Banks, the pharmacy constantly under performs due to the pressures of struggling to fulfil orders based on the over subscription of patients at the GP Surgery, as well as the highways network struggling due to the number of residents as well as those commuting through Theale to the larger areas of Newbury and Reading where Theale sits in between.

This development would place undue burdens on the existing infrastructure and facilities.

Environmental Nuisance and Pollution Control:

The development would create an unacceptable increase in pollution, including from light, noise, dust, vibration and/or odour. It would also cause noise or vibrations of a level which would disturb areas that are valued for their tranquillity in terms of recreation or amenity.

10.45 Where the trees have been cut down already in Whitehart Meadow, this has now exposed Woodfield Way and surrounding streets to higher levels of light and noise pollution where the natural buffer has been removed. If a development were to be built on this site, it would increase the light and noise pollution as well as being an impact on those residents who would be living closer to the M4 and pylon.

Water Framework: Woodfield Way and the surrounding roads already suffer from poor wastewater treatment and water resources. There is often Thames Water working on the water station based in Alderfield Close, as well as regularly having to work on drains etc. along Woodfield Way. During extremes of weather in the summer, the water pressure dropped so severely that residents experienced issues with pipes rattling and air blocks where the infrastructure could not cope with the hose pipe ban and reduced water pressure levels with the existing numbers of residents/properties in the village.

Policy DM 8

Trees, woodlands and hedge rows:

There does not seem to be an exceptional circumstance for the loss or deterioration of protected trees, groups of trees, woodland or important hedgerows for this development.

Residential Amenity:

The development would cause unacceptable harm to existing residential dwellings in terms of the following criteria:

- Significant loss of daylight and/or sunlight to land and buildings;
- Significant overlooking of land and buildings that results in a harmful loss of privacy;
- Development resulting in an undue sense of enclosure, overbearing impact, or a harmful loss of outlook; and
- Noise, dust, fumes and odours.

Additional Comments:

The development would create further parking issues in Theale and would negatively impact existing residents would already experience problems with the roads and highways infrastructure in Theale.

The development would also create a burden in relation to the AWE 12km consultation zone for both the Aldermaston and Burghfield sites. The additional residents that would fall within this zone as a result of the development would create an unsafe environment within an already precarious position given the locality of the AWE sites to Theale.

In summary:

- Flood risk
- High voltage overhead power lines cross the site
- Noise and pollution from the motorway
- Possible land contamination
- Need to preserve the gap between Theale and Calcot/Tilehurst
- Impact on the Area of Outstanding Natural Beauty
- Risk from fluvial, surface water and ground water flooding
- Impact on the Theale High Street Conservation Area
- Impact on surrounding housing
- Impact on infrastructure and amenities

The objections I have stated above would also apply to my objections for RSA11 Former sewage treatment works, Theale planned development.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is	

<p>consistent with achieving sustainable development.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>I am in objection to the proposed sites in Theale in the West Berkshire Local Plan Review, this being the 40 homes on Whitehart Meadow and 60 homes on the old Theale Sewage Works for the following reasons:</p> <p>The impact of additional traffic on the village. The proposed access route is a major route used by pedestrians to access the footbridge over the motorway. Additional traffic will raise risks to pedestrians, particularly school children. The high street is narrow and already ill-equipped to deal traffic. The junction is already busy due to its proximity to the motorway, business parks and the A4.</p> <p>The impact on the estates that will be adjacent to the developments – Woodfield Way, Rotherfield Close, Alderfield Close, Blossom Avenue, Blossom Lane etc, resulting in an impact on view, traffic through the local area. This is currently predominately a residential area and this development will impact on the living standards of existing residents. Blossom Lane is a narrow and very quiet road, construction traffic and eventual residents cars would cause risks to pedestrians and inconvenience to all.</p> <p>The development will reduce the protective barrier between their homes and the motorway.</p> <p>The negative impact on working standards in regard to the new development being in extremely close proximity to the overhead power lines and the motorway, leading to poor air quality, noise pollution and poor working environments.</p> <p>The environmental impact on the wildlife that currently lives in the area including deer.</p> <p>The visual impact of the structure will affect the outlook of the village on approach.</p> <p>There are already two approved areas of development in Theale (The Green and The Lakeside site) resulting in the potential building of 400+ homes. The facilities in Theale including the Medical Centre and the School are already under strain. Currently there are wait times of up to 3 weeks for a GP appointment and 45 minutes plus on the phone to try and get a duty appointment. It needs to be considered that this is before the building of the proposed 400+ homes, adding another 100 homes, plus a proposed large site of 1500 between Theale and Thatcham will add huge stress to these services and traffic to the area.</p>

3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	
5. Independent Examination

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	

<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am submitting my objection to LPR RSA10 Whitehart Meadow, Theale – 40 properties, as part of the West Berkshire Local Plan Review 2022 – 2039.</p> <p>I am a previous resident of <redacted> and I object to the plans on the following grounds:</p> <p><u>Your Vision:</u> 3.3 The development will negatively impact the infrastructure meaning it will not be sustainable either for the existing residents of Theale, or those who would be likely to settle in the new development if it were to be built. It will not foster community cohesion, health and wellbeing as it will blur the division of local areas between Theale and Calcot with the location of the site next to the M4, it will eliminate a natural area that people use to walk and exercise which will negatively impact the mental health of the existing residents who utilise this space.</p> <p><u>Strategic Objectives:</u> 7. Building on this site will not conserve or enhance the character or identity of the village. The village is already overpopulated, and this site would not be in keeping with the natural area where the land is located and would be detrimental to the rural feel of the village/community by becoming more brown land than green land which is already limited within this service centre.</p> <p><u>Infrastructure:</u> 4.2 The proposed development for this site is not a positive vision for the future. The impact to the village's infrastructure would be significant e.g. amenities such as the GP Surgery, Schools and high street facilities are already struggling to cope with the current population, without the additional proposed 200+ properties that are designated for Theale overall. This also contravenes the effective use of previously developed land.</p> <p>4.12 The plans contravene the rural setting of Theale, as the additional development would reduce the rural space, negatively impacting the rural nature of the village.</p>

4.19 The village does not need regenerating, as there already numerous areas of the village that have been redeveloped, as well as the growth of the commercial side of this service centre, with the upgrading of units within Arlington Business Park and the surrounding commercial areas near to the railway line. The site is also not an existing urban area which would be regarded as a more suitable location for future development.

4.20 This site does not meet the strategy's aim of making effective use of brownfield land.

4.30 Theale's infrastructure struggles to cope with key services and opportunities with the Primary school being relocated to a larger site, which reduced the open recreational green space of North Street playing fields, due to the demand on the school that the previous location could not support. There are no regular public transport links compared with other rural service centres, as the bus service is approx. every 30 minutes, with trains being the same if not marginally more frequently. Due to the location of the village and the lack of frequent public transport options, residents use their own vehicles, with most having a least 2 cars which causes an abundance of parking issues within the currently overpopulated residential areas of the village.

5.i. This development would not improve the wildlife habitat and species conservation in line with climate change. There are numerous types of wildlife living or frequenting the Whitehart Meadow, with deer and other such animals using the space from the local Englefield Estate. This is as well as red kites and other species of birds that nest and hunt in that area.

5.1 In response to climate change, if extreme weather events such as flash floods are a concern, this development would cause an issue as this area is a flood risk. The properties that run alongside the meadow already have to take flood risk into account when considering mortgages etc. and a development on this site would only increase that risk. This could make it harder for people to purchase existing homes in this area if the risk were deemed too high that it would create an issue for mortgages and making existing homes in the area depreciate in value and not viable to sell.

- 1 The development would increase the number of people, properties and infrastructure at risk of flooding due to the reduction of the floodplain (section L) and would not mitigate flood risk but increase it. It would also exacerbate flooding problems on the proposal site and elsewhere as the flooding would increase in the recreational space between Whitehart Meadow and the old sewage works (RSA11 Former sewage treatment works, Theale).

5.28A The development would not fit into the life and texture of the village, nor would it be an improvement of the place. This is due to the significant impact on the infrastructure of the amenities of the village (as mentioned previously) as well as the highways infrastructure. There is already access issues at the M4 end of the High Street whereby traffic from junction 12 or any issues on the A4 cause a build-up and essentially block access to and from this end of the High Street and into the estates down Woodfield Way. This is already a significant concern with the lack of access for emergency vehicles for the residents in this area, as well as the abundance of street parking in that area where properties do not have adequate parking spaces and often narrow and limit easy access further into the estate.

5.30 The above also demonstrates how the development would contravene the practical use of the site by ensuring it is well connected, accessible, safe and easy for people to find, as it would not meet any of this criteria based on the location being at a dead end with a severe pinch point when traffic both through the High Street and on the A4/junction 12 are at its peak.

Landscape Character:

C: The development in conjunction with that planned for the old sewage works is not in context of the existing settlement. If the 2 sites were to go ahead, the developments would envelop the existing recreational space that would be left on Woodfield Way, effectively strangling the only remaining open land at the M4 side of the village. This would adversely affect the conservation (5.36) of the site in addition to being at odds with West Berkshire Council's plan of keeping the recreational space between the 2 proposed sites as a wildflower meadow to encourage wildlife habitation.

5.42 This development would not retain an actual or perceived visual break in settlements, as the residential areas of the village would populate the land up to the M4 and would not be a distinguished break between where Theale ends and the Calcot boundary starts. It would also eliminate the 'green routes' (F) used to commute or travel on foot or cycle, where residents use the meadow to walk through to access the only footpath to cross the M4.

Green infrastructure G: the development would not improve biodiversity and increase natural capital as it would displace many animals that use the meadow as their habitat, as well as obliterating West Berkshire Council's desired extension of wildlife corridors to provide habitat connectivity.

5.64 The planned development at this site does not meet the Council's commitment for strengthening local and strategic green infrastructure across the district for the benefit of the natural environment and

health and wellbeing of the community. It reduces the green space and also areas for residents to exercise in and take time away from the built-up urban areas of the village.

Nationally Designated Sites:

There are suitable alternative sites with lesser impacts than proposed with the development on Whitehart Meadow. There is already a site at the end of the village at The Green/A4 junction which has planning permission for 100 units which would negate the need to build a development in restricted areas at the opposite end of the village.

5.70 The development on Whitehart Meadow would significantly reduce the buffer zone landscape feature protecting the residents from the M4 corridor. Residents along Woodfield Way and adjacent roads already experience an issue with air quality and noise from the M4. A development closer to the M4 would increase the effects experienced with black soot and dust being a common build-up in homes along Woodfield Way from the heavy motorway traffic, as well as the noise experienced from the motorway and roadworks that consistently take place at junction 12.

5.80 This development would destroy an irreplaceable habitat.

Policy SP 11

This development would not provide or retain an appropriate buffer zone between development proposals and designated sites. Both in terms of existing properties, and the planned development of the old sewage works next to Whitehart Meadow.

5.67 The development would not promote conservation, restoration and enhancement of priority habitats, ecological networks and the protection and recovery of priority species; and would not secure opportunities for a net gain for biodiversity.

6.4 Although collaborative working between West Berkshire Council, Wokingham Borough, Reading Borough and Bracknell Forest Councils can support local residents, it is having a detrimental impact to Theale with this planned development. If RBC have a shortfall of properties in their district, it should not mean that the required properties should be forced upon neighbouring areas which would lead to a detrimental impact on that area, its amenities and overall infrastructure. Theale should not have to bear the brunt of the failings of RBC's Reading Local Plan within their own district.

6.8 If no shortfall has been identified from other adjacent authorities or any of the other authorities within the Western Berkshire HMA have been identified, Theale should not be negatively affected by the developments proposed in order to satisfy the failings of other Councils, especially when there hasn't been a housing need/crisis identified in Theale specifically. This development would not serve local people and would only encourage residents to move in from surrounding areas, putting further pressure on the highways network, the limited public transport links, as well as local amenities that are already stretched beyond capacity. This would also not enhance or deepen the existing bonds in the community and could cause resentment from existing residents both in terms of the development taking place as well as towards the residents who may not be local to the area or contribute to immediate community.

6.73 This development contravenes the approach of the Council supporting the development of housing schemes that are initiated by local communities, as this site has not been initiated by local communities as an area for development that would benefit the village, landscape or community.

Town and District Centres: This develop would contravene the following principles that the development should:

- Not have an adverse impact on the safety and capacity of the local highway network; and
- Not have an adverse impact on local amenity.

As it would create both.

7.52 This development would not be supported by adequate and appropriate infrastructure. The GP Surgery is already oversubscribed and cannot cope with the current level of patients. The amenities in the High Street are not adequate for the current number of residents in Theale. The parking is restricted, there are no longer any Banks, the pharmacy constantly under performs due to the pressures of struggling to fulfil orders based on the over subscription of patients at the GP Surgery, as well as the highways network struggling due to the number of residents as well as those commuting through Theale to the larger areas of Newbury and Reading where Theale sits in between.

This development would place undue burdens on the existing infrastructure and facilities.

Environmental Nuisance and Pollution Control:

The development would create an unacceptable increase in pollution, including from light, noise, dust, vibration and/or odour. It would also cause noise or vibrations of a level which would disturb areas that are valued for their tranquillity in terms of recreation or amenity.

10.45 Where the trees have been cut down already in Whitehart Meadow, this has now exposed Woodfield Way and surrounding streets to higher levels of light and noise pollution where the natural buffer has been removed. If a development were to be built on this site, it would increase the light and noise pollution as well as being an impact on those residents who would be living closer to the M4 and pylon.

Water Framework: Woodfield Way and the surrounding roads already suffer from poor wastewater treatment and water resources. There is often Thames Water working on the water station based in Alderfield Close, as well as regularly having to work on drains etc. along Woodfield Way. During extremes of weather in the summer, the water pressure dropped so severely that residents experienced issues with pipes rattling and air blocks where the infrastructure could not cope with the hose pipe ban and reduced water pressure levels with the existing numbers of residents/properties in the village.

Policy DM 8

Trees, woodlands and hedge rows:

There does not seem to be an exceptional circumstance for the loss or deterioration of protected trees, groups of trees, woodland or important hedgerows for this development.

Residential Amenity:

The development would cause unacceptable harm to existing residential dwellings in terms of the following criteria:

- Significant loss of daylight and/or sunlight to land and buildings;
- Significant overlooking of land and buildings that results in a harmful loss of privacy;
- Development resulting in an undue sense of enclosure, overbearing impact, or a harmful loss of outlook; and
- Noise, dust, fumes and odours.

Additional Comments:

The development would create further parking issues in Theale and would negatively impact existing residents would already experience problems with the roads and highways infrastructure in Theale.

The development would also create a burden in relation to the AWE 12km consultation zone for both the Aldermaston and Burghfield sites. The additional residents that would fall within this zone as a result of the development would create an unsafe environment within an already precarious position given the locality of the AWE sites to Theale.

In summary:

- Flood risk
- High voltage overhead power lines cross the site
- Noise and pollution from the motorway
- Possible land contamination
- Need to preserve the gap between Theale and Calcot/Tilehurst
- Impact on the Area of Outstanding Natural Beauty
- Risk from fluvial, surface water and ground water flooding
- Impact on the Theale High Street Conservation Area
- Impact on surrounding housing
- Impact on infrastructure and amenities

The objections I have stated above would also apply to my objections for RSA11 Former sewage treatment works, Theale planned development.

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I would like to object to planning on whitehart meadows and theale sewage works for the following reasons: Whitehart Meadows: More than anything over populating the village that is on it's knees already with trying to get doctors appointments and the new built school cannot take much more.this area suffers flooding, overhead power lines and a lot of wildlife live here. Adding to the traffic won't help either. Over all there is already planning given to 400 odd houses in theale and on top of that windfall sites . This village is struggling to cope as it is and to add anymore would cripple it. I have not seen any plans to make the surgery bigger for the planning already permitted. This village will be ruined and no one will want to live here if its expanded from a lovely village to an ugly town that cannot cope.</p>

<p>delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>We are writing to you regarding the proposed plan to build 60 homes on the Old Sewage works in Theale - RSA11 and to build 40 homes on Whitehart Meadow - immediately next to the Old Sewage Works.</p> <p>We live on <redacted> and are very concerned regarding access to this number of properties via this road. The road already struggles with the number of vehicles using it, given it is essential a single carriageway due to the parking. Similarly the pathways are thin and sometimes disappear entirely, making it unsuitable for greater numbers of people to try and walk down. Access to the centre of the village from Blossom Lane involves a complex junction with a mini-roundabout which is often used incorrectly, and the road surface through the high street, and the far end of Blossom Lane leading to Englefield Road both suffer from road damage, leading to dangerous pot holes. If these roads were to be used increasingly we'd need to see a better level of upkeep and substantial changes to the roads i.e. making them wider, which isn't possible given the need for parking.</p> <p>The actual site proposed seems highly unsuitable for major development given the proximity to the M4, which cause issues of air and noise pollution. Plus there is the presence of multiple pylons, which seems highly unsafe - how would the presence of these be mitigated for people's safety, particularly children? The area is also currently an undeveloped site. It's full of wildlife, and we can't understand how it would be deemed ok to destroy this. We recently also learned the area is potentially contaminated due to the previous use of the site for sewage works. Again, this seems unsafe and that it would require undue workarounds to make sure foundations could be built. Finally, the area proposed is known as a high risk area for flooding. Given the increased likelihood of flooding when you take away trees and add in tarmac and other non-soluble surfaces, the likelihood of flooding is only going to get worse. Last year we experienced intense rainfall which caused areas of Blossom Lane to flood.</p> <p>Crucially there doesn't seem to be any plan for how Theale will be able to serve this level of new people. The medical centre has struggled over the winter and the pharmacy often has long queues. Similarly, has the influx of people been considered for the local schools and other services. At the moment there would be no access for buses to serve the new development, making it a lengthy walk for anyone wanting to use it. Given the issues regarding the pavements this would be totally unsuitable, particularly for people with additional needs such as wheelchair users and people with prams/pushchairs.</p> <p>Lastly, it's important to remember that Theale is a village, which is currently managing to retain a village community and spirit. To build 100 new homes on these sites would bring such a high number of people all at once, it seems a major threat. Making Theale just another suburb of Reading rather than the village all of the current residents enjoy and love.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the	Yes

delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	We note and support the proposed criterion in each of the policies listed in this representation that relates to desk-based archaeological assessment and, if needed, field evaluation.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	
4. Proposed Changes	For all sites listed in this representation, while we support the policy requirement for desk-based archaeological assessment and, if necessary, field evaluation, the language used across the policies used is not consistent. The Council may wish to review the language used across these policies to ensure it improve consistency. We do not consider this is a matter of soundness.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination

Please give reasons for your answer	<p>The site allocations presented in this chapter have not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of each site to accommodate development. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on these sites. We have concerns and have provided this information in a separate document <see comments below></p> <p>This site is partly in Flood Zone 2. Main river along site boundary. The site is on secondary A superficial and principal bedrock aquifer</p> <p>We support the limitation of development to Flood Zone 1 on this site as this is in line with the sequential approach to development.</p> <p>The Sulham brook which runs along the site is a main river and a headwater and is home to Brown Trout and Bullhead that makes it more ecologically important, therefore apart from the provision of a 10m buffer, an ecological assessment should be provided and approved before planning permission is granted. This should be included in the policy wording.</p> <p>We assume wastewater will be discharged at the Reading STW. We have no concerns provided Thames Water are confident any additional flows will not lead to deterioration of phosphate classification. Reading STW is within DWF capacity and not a frequent spiller. The policy notes should include a requirement for developers to liaise with Thames Water to discuss wastewater drainage for the site.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	

<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>Section 4.35 of the Core Strategy contained the following statement: "The Lakeside development has planning permission to provide 350 homes in a range of different sizes and types, which would become a well-integrated part of the Theale community. If this development goes ahead, Theale would need to undergo a period of consolidation to provide an opportunity for facilities and services to be upgraded". Housing construction on this development has not yet commenced, although Outline permission has been granted for up to 325 homes and Reserved Matters permission has been granted for part of the site. In addition, outline permission has been granted for 104 homes on the adjacent site between The Green and the A340 (LPR site RSA9). These two sites will increase the number of homes in Theale by almost 25% when built out.</p> <p>Therefore, that statement is still valid and no justification has been given for not carrying that section forward to the LPR.</p> <p>Theale still needs that "period of consolidation".</p> <p>This site is important to the setting of Theale and to its maintenance as a separate settlement. Any development on this site would erode Theale's separation from Calcot and Tilehurst, contrary to the requirement in policy SP1 that "the individual identities of the separate settlements within this [Eastern Spatial] area will be maintained"</p> <p>The site is bounded by the M4 motorway and the elevated A4. Thus, residents on the site would be subject to significant noise and air pollution. The latter is exacerbated in the morning peak because the M4 eastbound frequently slows to a crawl or standstill past this site. This worsens air pollution because:</p> <ul style="list-style-type: none"> • The density of vehicles increases as they close up, producing more pollution in a given length of road • Vehicle engines produce more pollution when idling or running slowly • The pollution does not disperse so widely because it is not dispersed by moving traffic. <p>High voltage power lines cross the site. In addition to visual intrusion and danger of electrocution (e.g. from climbing ladders or scaffolding or from flying kites), scientific research shows that they generate ozone and nitrogen oxide air pollution (increased by 13% and 30% over normal levels according to paper "Emissions of</p>

	<p>pollutants and air quality in the area of influence of high voltage overhead electrical lines" by Cociorva Danut, Mihaela Andreea Mitiu and Natalia Raischi: <Hyperlink removed - see attachment> would add to the pollution to residents on the site caused by traffic on the M4 and Theale Bypass</p> <p>The site suffers from groundwater flood risk and much of it is in flood zone 2</p> <p>High groundwater levels (25cm blow ground level according to the Drainage Officer's comment in the HELAA) preclude infiltration as a SUDS solution.</p> <p>The site is the source of the Sulham Brook and the high peat content of its soil attenuates surface water run-off into the brook. Any development of the site would significantly reduce this attenuation and increase the flood risk downstream (the brook flooded part of Pangbourne in 2007).</p> <p>Traffic generated from housing on the site would contend with the traffic from the congested High Street at the Hoard Way Junction and with that on the busy A4, particularly in the morning peak. This would add to congestion in the High Street, at the Hoard Way/A4 roundabout and at M4 J12. It would also exacerbate traffic problems elsewhere in the highway network in Theale as described in the comments on Policy SP14</p> <p>The use identified in the HELAA is "Employment uses (B2/B8)". Residential use is therefore contrary to policy SP1 of this plan which states that "allocations will be related to the role and function of settlements and the development opportunities identified through the HELAA".</p> <p>The reasons for removing this site from the Housing Site Allocations DPD are still valid: The site was assessed in the 2013 Strategic Housing Land Availability Assessment (HELAA site ref was THE002) as 'potentially developable'. The site was subsequently assessed in more detail during the preparation of the Housing Site Allocations Development Plan Document, whereby the site was not recommended for allocation due to the location of the site adjacent to the M4 (and resultant noise and air quality issues), and the location of a pylon in the centre of the site.</p> <p>In addition, the Environment Agency strongly recommended that the site was not allocated due to majority of it being in Flood Zone 2. A sequential test would have been required to allocate the site in the Housing Site Allocations Development Plan Document. Other suitable sites with a lower risk of flooding were not available in Theale and across the district, so the Council would have been unable to carry out the sequential test.</p> <p>The site is not included in the West Berkshire Strategic Traffic Model, meaning that the model is not accurate and that the effect of traffic generated from this site has not been assessed.</p> <p>The site is not included in the Air Quality Assessment, meaning that the Assessment is not accurate</p> <p>The subsoil has a high peat content. Peat is a major store of carbon. Excavation of the soil would therefore release CO2 into the atmosphere and exacerbate climate change. This would be contrary to policy SP5 of this LPR</p> <p>This site is very close to the A4 and M4 Junction 12. This means that many journeys will be by private car, which makes the site not sustainable</p> <p>Site RSA10 is missing from the table [Air Quality Report Table 8-13] SA/SEA App 7, 9b, 5b</p> <p>9 (b) The proposal would NOT sustainably manage flood risk as the loss of attenuation of surface water entering the Sulham Brook caused by removal of peat subsoil during construction will increase flood risk to properties downstream</p> <p>3 (a) The policy would NOT improve access to education, health and other services as local healthcare and primary education services are already over subscribed</p> <p>5(b) The proposal would NOT conserve and enhance the character of the landscape as it would:</p> <ul style="list-style-type: none"> • Change the setting of Theale from a green field to a housing estate • Erode the gap between Theale and Calcot/Tilehurst
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>This site should be removed from the LPR</p> <p>Site RSA10 should be included in the Transport Modelling</p> <p>Site RSA10 should be included in the Air Quality Assessment and the table</p> <p>The effects of the policy objectives should be changed from positive to negative.</p> <p>The cumulative impact of the policy should be changed to negative</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>To explain to the inspector why the Core Strategy policy should be carried forward and implemented</p> <p>To explain why the site should have been included in the Transport Model</p>

	<p>To explain why it is important for the site to be included in the Air Quality Assessment</p> <p>To explain why development of this site would be unsustainable</p> <p>To explain why the sustainability impact of the policy is negative</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes</p> <p>* No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes</p> <p>* No</p>	Yes

2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am emailing to object to the proposed building of further homes in theale village. There is not the infrastructure to support this at all in terms of doctors, dentists or schooling. The roads cannot cope with the volume of traffic as it stands, let alone the increase that these proposed houses would bring.</p> <p>I would be very concerned that anymore homes built in theale would be damaging to the village.</p>

Please give reasons for your answer	<p>I would also like to add on the follow reasons to object the proposed work in Theale (Plan Review 2022-19) - 40 homes on Whitehart Meadow. Whitehart Meadow is the area of land between the Woodfield Way estate and the M4 and 60 homes on the site of the old Theale sewage works. This would be off the end of Blossom Lane.</p> <p>I live very close to the proposed sites, and I am very concerned these developments would heavily impact the environmental and ecological habitats and animals that occupy these areas. There are herds of deer who regular use that area, along with the everyday British wildlife species we are so lucky to have</p>

	<p>in Theale. Also, Theale is a small countryside looking town and that is what makes the area so beautiful and appealing, building an extra 100 homes would not look good for the small town Theale currently provides and even more of a reason against it is that Theale village would not be able to cope with the increased pressures to the public services, food demands, parking spaces etc. I am very against these developments from being built and I wish the plans would be dropped and we can enjoy appreciating the greenspace and wildlife we still thankfully have. Furthermore, the ground is already a concerning flood risk zone and should be excluded from any future developments as it is not safe or stable due to ground conditions.</p> <p>The 100 homes proposed for Theale would be on top of over 440 homes on the western side of Theale that have been given planning permission but not yet built.</p> <p>The proposed extra homes for Theale will put extra pressure on local health services that are already stretched to the limit.</p> <p>Traffic from the proposed extra homes in Theale, in conjunction with that generated by the north east Thatcham site, will make local road congestion worse.</p>

<p>Please give reasons for your answer</p>	<p>I'm responding to the proposed Local Plan review consultation for 2022-39. My name is <name redacted>, I live at <address redacted>. My main concern is the Theale area. "- 40 houses built on Whitehart Meadow - the area of land between the Woodfield Way estate and the M4. - 60 houses built on the site of the old sewage works, off Blossom Lane - 1,500 houses built on the Theale side of Thatcham." At least 50% of each of these if they are approved MUST be social housing. This is the biggest need in our increasingly unaffordable area. These social and maybe 5% affordable homes shouldn't just be flats either! Just because people can't afford to stay in their village doesn't mean they don't want a garden or basic things many people take for granted. It's a village, they are green and plentiful, NO PLACE for flats. My own social home is a maisonette and gives everyone outside space and a garage and is an ideal fit for the village if inspiration is needed. My next concerns is the doctors surgery and schools that are very over subscribed as it is. We would need them making larger & an NHS dentist in the area. Theale already has a bad smell of sewage outside the new Red Lion Flat development on the Englefield road/church street junction. The flats at Leonard court/Elizabeth court already have sewage issues so Theale's entire village will need its sewage waste pipes upgraded and enlarged.</p>

3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	Off the back of this we have already got several hundred houses coming to the village maybe they need to be the "Guinea pig" and in 5 years after they have been built a new review for Theale can take place to see if they can even cope with those?
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No

<p>Please give reasons for your answer</p>	<p>I am writing in opposition of the planned development in Northeast Thatcham.</p> <p>As a resident of Chapel Row, I am extremely concerned about the increase in the volume of traffic that would be generated along the Avenue and down Hatch lane, with commuters seeking ways to the A4 and onwards.</p> <p>The traffic is already heavy in this area.</p> <p>The traffic is generating a situation where children are walking to their school buses, with no street paths or streetlights, so walking in the road with their torches. Combining this with an increase of commuters rushing to work in their cars. Is a very clear accident waiting to happen. Which will result in a child being seriously injured or killed.</p> <p>The proposed extra houses would see more commuters seeking a route to the A4 via Hatch Lane, and thus increasing the probably of this accident happening.</p> <p>For this reason, I don't think the council should support this development.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>

<p>Please give reasons for your answer</p>	<p>I strongly object to the proposed planning application that has been submitted in theale (whitehouse meadow and the old sewage works) as I don't believe theale can cope with it.</p> <p>Myra it will be good for the local businesses (shops / pubs etc) however I don't believe that the village can deal with this amount of building work.</p> <p>Firstly it's difficult enough to get an appointment at the local doctors surgery and if you add another 100 homes to the equation it will be near on impossible.</p> <p>Secondly I don't think the schools will be able to deal with it either.</p> <p>Thirdly the amenities in the village struggle from time to time and by adding more homes in the village then this will only get worse.</p> <p>My fourth point is that traffic in the village can be a nightmare at the best of times and by adding another 100 homes to this then the problem will only increase.</p> <p>My fifth point is that the 2 proposed sites both flood and are also homes to local wildlife.</p> <p>My sixth concern is that by building this there will be no boundaries between Theale and Calcot.</p> <p>My seventh concern is the overhead power lines that run across both proposed sites, will this be safe?</p>

<p>Please give reasons for your answer</p>	<p>Please find my objections for the proposed planning of 40 homes on whitehart meadow and 60 homes on the old Theale sewage works.</p> <ul style="list-style-type: none"> • The already very over stretched facilities in the village inc the schools , medical centre surgery , chemist, dentist, facilities for young people. • Traffic that over 500 vehicles will cause to already congested very narrow roads. inc the 400 + homes that already have planning approval. • Congestion of traffic in the high st which has parking on both sides and is gridlocked when buses are trying to get past delivery lorries. • The A4 is very busy and the amount of traffic already using it is gridlocked during the rush hour. • The extra traffic due to the building of homes in Newbury and thatcham. • The negative affect to the local environment, air pollution , green spaces and wildlife. • This would be on top of over 400 homes that already has approval and will be terrible for the small community village of Theale. • There are very little facilities for young people which will encourage them to wander around the village in groups which is very disconcerting for people walking alone.

1. Do you consider the Local Plan Review is legally compliant?	
* Yes	
* No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.	
* Yes	
* No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.	No
* Yes	
* No	

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>Re: Local Plan – RSA11 Old Sewage Works, Theale</p> <p>As a resident of Theale village I wish to formally register vehement objection to the proposed local plan referenced above which raises many serious concerns with respect to its impact on the village of Theale, the residents of the village, and the wider area.</p> <p>A non-exhaustive list of objections is presented as follows:</p> <p>Conservation Area The area, or access roads within the area, fall within a designated Conservation Area and setting, and is thus subject to protection as an area of special architectural or historic interest, the character or appearance of which it is desirable to preserve or enhance as per Section 69 of The 1990 Planning (Listed Buildings and Conservation Areas) Act and as designated under Article 50 of the Planning (NI) Order 1991.</p> <p>Conservation Areas are also notable for their biodiversity value. Protected species and habitats need to be addressed when reviewing buildings, sites and planning works. See further point on Destruction of wildlife habitat and protected species.</p> <p>In addition, trees in a Conservation Area are automatically protected as if a Tree Preservation Order (TPO) was in place.</p> <p>Invasion of privacy of Theale residents The overlook that will result from any development will pose serious privacy issues especially for the properties surrounding the proposed site. As per Article 8 of the Human Rights Act states a person has the substantive right to respect for their private and family life. In the case of Britton vs SOS the courts reappraised the purpose of the law and concluded that the protection of the countryside falls within the interests of Article 8. Private and family life therefore encompasses not only the home but also the surroundings.</p> <p>Agricultural Land Classification (ALC) Natural England records that the proposed site is grade 3 ALC and thus the land should protected from development under the government policies and legislation to preserve the best and most versatile (BMV) agricultural land and soils in England from significant, inappropriate or unsustainable development proposals.</p> <p>Flood Risk, Ground Stability and Drainage The Environment Agency designates areas of the proposed site as at RISK from surface water flooding. The eradication of natural ground absorption inherent to this proposal will heighten this risk status for Theale village and adversely affect the foundational integrity of nearby properties and subsequently elevate Home & Buildings insurance premium rates for the surrounding area.</p> <p>Destruction of wildlife habitat and protected species The destruction of habitation required for this development would lead to a further decline in wildlife species such as deer, rabbit, birds, bats and hedgehogs. Hedgehogs are listed as a Species of Principle Importance in England under the Natural Environment and Rural Communities (NERC) Act 2006 Section 41 making hedgehogs a material consideration for Local Planning Authorities (LPAs) during the planning process.</p> <p>Highway safety, inadequate parking and access Theale village is already vastly strained with traffic and parking issues; this proposal will only serve to escalate these issues and stands in direct contradiction with both government and local council policies on congestion and pollution alleviation. Parking facilities in Theale are already oversubscribed and the proposed development would lead to an increase in traffic, congestion and parking issues correlating inversely with a decrease in highway safety.</p> <p>Pylons The site is unsuitable as it encompasses high voltage overhead power lines.</p> <p>Contamination The site is unsuitable as it is contaminated from its prior use processing sewage.</p> <p>Noise/Air/Light/Visual Pollution The development will increase noise, air, light and visual pollution in Theale village both during and post-construction.</p> <p>The proposed site has not been included in either the Strategic Transport Model or the Air Quality Assessment.</p> <p>Loss of natural light</p>

	<p>The proposed development is in extremely close proximity to numerous residential properties that have benefited from natural space and light for over 20 years. The proposed development would contravene the fair and reasonable 'right to light' claim by residents resulting from the obscuration of a South-East solar trajectory.</p> <p>Negative alteration to the character and nature of Theale village</p> <p>The encroachment on green/brown spaces surrounding Theale and the increased development and traffic will erode the character and identity of Theale village.</p> <p>In summary any proposals to include RSA11 as a development location should be wholly refused as it stands in direct contradiction to myriad land/heritage conservation policies and would also be to the detriment of the quality, character, safety and amenity value of the area, as outlined in the points above.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>

Please give reasons for your answer	<p>I have been alerted by my local Councillor (Alan Macro) regarding several proposals for building more new homes in Theale, to be included in the revised Local Plan.</p> <p>The proposals are as follows :-</p> <ul style="list-style-type: none"> • 40 houses built on Whitehart Meadow - the area of land between the Woodfield Way estate and the M4. • 60 houses built on the site of the former sewage works, off Blossom Lane <p>I have previously responded to object to both these proposals in recent years when they have been submitted as formal planning applications to West Berks Council.</p> <p>As a resident living close to both these sites in Theale, as previously I would also like to register my objection to these proposals being included in a revised Local Plan for Theale. Aside from the more detailed objections that were submitted previously, I would add that we have already had approval granted for many new homes to be built in the village and we should not have to suffer yet more house-building and loss of green space.</p> <p>I would be grateful if you could take the above into account when reviewing the Local Plan in the coming weeks.</p>

<p>Please give reasons for your answer</p>	<p>I am writing in response to the consultation on the Local Plan. I wish to object most strongly to the two proposed development sites in Theale.</p> <p>The site at Whitehart Meadow for 40 homes is totally unsuitable – many of the houses would be underneath the electricity pylons, they would be next to the M4, and building there would remove the green space between Theale and Reading. This would also increase the amount of traffic using the mini roundabout at the eastern end of the High Street, which is already a pinch point for vehicles.</p> <p>The site at the old sewage works for 60 homes is also totally unsuitable – it could only be accessed by vehicles using Crown Lane and Blossom Lane, both of which are narrow and already congested and have narrow or non-existent pavements.</p> <p>The addition of these potential 100 homes to the 429 already planned for the Lakeside site and the land between The Green and the A340 would represent an increase in Theale's population of over 40%, completely changing the nature of the village for the worse. The current infrastructure is barely coping with the current population as it is.</p>

<p>Please give reasons for your answer</p>	<p>I wish to strongly object to your proposals to build yet more houses in Theale, due to the following reasons:-</p> <p><u>The Old Sewage Works</u> – Proposal to build 40 houses</p> <p>Access to the houses would have to be investigated, the current access is definitely not suitable.</p> <p>More important objections:</p> <p>You have already given consent for a total of 440 houses to be built at the western side of Theale - No doubt the building company will submit requests to increase the quantity, as that appears to be the norm. Has this figure been included in your allocation for building in Theale? You mention "infrastructure".</p> <p>Does that mean you will build/extend Theale Medical Centre and arrange employment of more doctors and paramedics?</p> <p>The Medical Centre is struggling to cope with the sheer number, and every increasing number, of patients it already has, so this is an issue of great concern.</p> <p>The horrendous increase in traffic – also taking into account the houses to be built in Thatcham. The sheer volumes will surely increase congestion at the Theale roundabouts with traffic wishing to gain access to the M4.</p> <p>Lastly, Theale is a village. The residents wish it to remain a village. We do not wish to be joined up with Calcot or become a town. Theale has already taken a huge allocation of newbuild houses/flats and has, therefore, heavily committed to the need for more housing.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>

<p>Please give reasons for your answer</p>	<p>I have received your recent 'intouch' leaflet where you claim to oppose inappropriate developments. Yet you are considering housing applications in several areas in Theale. Our village cannot sustain anymore housing developments.</p> <p>Roads are already congested, the doctors surgery is not big enough to take on more patients, it already takes weeks to have a face to face appointment. Theale has already been overdeveloped.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>

development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	Frankly it's ridiculous that this is even allowed to be considered - these areas of green space are known and evidenced habitats for local deer, rabbits, foxes and other other wildlife. We are meant to be protecting green space, not destroying it. This simply cannot be allowed to go ahead

Please give reasons for your answer	<p>To who it may Concern</p> <p>We have lived in There for 22 years and you have been trying to build on Whitehart Meadow for all this time as well ass the Sewage Works nearby.</p> <p>Again we would stress that the infrastructure on the village - i.e. roads, services, doctors' surgery would be greatly affected. We always thought you could not build houses under pylons.</p> <p>We strongly object to all these houses going up which will affect our nice village.</p>

<p>Please give reasons for your answer</p>	<p>Herewith our response to the Local Plan 2022-2039:</p> <p>31. RSA11 P. 'Desk based' is not adequate and a survey should be carried out.</p> <p>32. RSA11. Access into Blossom Lane is not suitable. Crown Lane already has issues with traffic often single file as two vehicles cannot pass due to the narrow access. It will also not be safe for pedestrians due to the narrowness of the road.</p> <p>33. RSA11. The sewerage works were removed from the last Local Plan as they were rejected as a suitable site so this should be removed from the Plan, no changes to access the site have been made since the last plan.</p> <p>34. RSA11. The water main is not mentioned and needs to be.</p> <p>35. RSA11. Sulham Brook. This is a main river and a 10m buffer will not be sufficient. It should be a minimum of 30m. We object to this section as it is an increased flood risk.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable	

<p>alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>We fully support the allocation of the former Theale STW for residential development as per our previous representations.</p> <p>However, the site area has been reduced from the previous Dec 2020 draft allocation for Policy RSA 17 which included the open space to the east as per plans below:</p> <p><i>[See attachment PS1102 Thames Water – Site Area Plans_RSA11]</i></p> <p>It is understood that the current allocation is based on the developable area, which has been informed by the landscape sensitivity and capacity assessment the council had undertaken for the site. However, the landscape assessment does also highlight that the land beyond the pylons, within the ‘undevelopable areas’, could be used to design and create a positive buffer to the adjacent AONB, and retaining the open character. So, officers have agreed that open space/landscaping/BNG could go beyond the pylons, and can be shown on any future planning application. We consider that this should be made clear in the policy text.</p> <p>In November 2022 we submitted the following documents in support of the draft allocation (we have not resubmitted here but please let us know if this would be helpful):</p> <ul style="list-style-type: none"> • Former Theale Sewage Treatment Works Vision Document, November 2022, prepared by Carter Jonas <i>[see attachment PS1102 Thames Water - Vision_RSA11 Doc]</i>; • Former Theale Sewage Treatment Works Concept Plan, J0059808_002, prepared by Carter Jonas <i>[see attachment PS1102 Thames Water - Concept Plan_RSA11]</i>; • Former Theale Sewage Treatment Works Illustrative Masterplan, No. J0059808_V2_003, prepared by Carter Jonas <i>[see attachment PS1102 Thames Water - Illustrative Masterplan_RSA11]</i>; • Former Theale Sewage Treatment Works Biodiversity Net Gain Report <i>[see attachment PS1102 Thames Water - Biodiversity Net Gain Report_RSA11]</i> and Biodiversity Calculator, November 2022, prepared by ADAS <i>[see attachment PS1102 Thames Water - BNG Calculator_RSA11]</i>. <p><i>[A covering letter was also submitted and this is attached - see 'PS1102 Thames Water Letter 11 Nov 2022_RSA11']</i></p> <p>The Vision Document demonstrates the key considerations for a residential development at the site and includes the additional landscape buffers around the site edges resulting from the Council's commissioned Landscape Sensitivity and Capacity Assessment in September 2021.</p> <p>The Vision Document and the Illustrative Masterplan confirm that, having regard to the site considerations, the site can readily deliver 62 dwellings. This represents a relatively low density and appropriate character, having regard to the site's location and context. The development would provide a range of dwelling sizes and affordable housing in accordance with the Local Plan requirements.</p> <p>Further, a Biodiversity Net Gain (BNG) Report has been prepared which considers the potential for development at the site to deliver at least 10% BNG, as required by the emerging Local Plan Review. The strategy confirms that a BNG of at least 10% can be delivered on site, based on the illustrative scheme provided. The calculations confirm that the following is achievable:</p>

	<ul style="list-style-type: none"> • A 12.7% net gain for habitat units; • 5% net gain for hedgerow units; • A 58.1% net gain for river units.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	Amend Policy RSA 11 b. as follows: i. Development will not extend beyond the north-east of the High Voltage Power Lines. The area beyond is not to be developed contrary to the Landscape and Sensitivity and Landscape Assessment' to be undeveloped, to retain the open character between Theale and Calcot, within the AONB. This area can be used to provide open space and biodiversity improvements required in association with the residential development.....
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	To fully respond to any issues raised as landowner

Please give reasons for your answer	Proposed vehicular access to the site is not suitable: Observation clearly shows that local car ownership levels in Blossom Lane and Chestnut Close are at least two cars per household. An additional 60 homes will be another 120 cars. (Planning policy DN44 requires 2 or more parking spaces). Most of which will exit and enter each day, with couples both needing to work and young children taken to nursery/school, plus delivery vans. The proposed access is where 6 houses of Chestnut Close have cars parked in the road on one side and a narrow footpath the other. This stretch is currently heavily used by adults and children, walking and cycling to school from Woodfield way. Along with commuters to Ikea / Sainsburys, plus is a popular route for dog walkers. The road access into the continuation of Blossom lane has narrow/no pavement on one side and cars parked across the pavement on the other. To exit Theale these cars then need to negotiate the cars parked along one side of either Crown Lane or Blossom Avenue. Soil contamination: Thames Water / Kennet Properties have said in the past that the land is contaminated with heavy metals and underground gas chambers, from it's previous use, such that it is not fit for animal grazing, so cannot, be fit for human habitation. Wild life:

	<p>The site is currently home to wild deer, hedge hogs and other animals.</p> <p>Infrastructure: The current infrastructure of doctor's surgery is struggling to cope with the current population of Theale before the current sites in Theale with planning permission have even been built.</p>

<p>Please give reasons for your answer</p>	<p>Good afternoon,</p> <p>These developments are of concern to me. The extra traffic to access these will be on unsuitable roads that are already congested with on road parking and the car repair business in Theale High Street.</p> <p>Furthermore school places and the doctor surgery are already over used and unable to cope with the existing residents needs.</p> <p>Currently the parking in the High Street serves the businesses and residents well, but extra traffic will cause issues with deliveries and bus services.</p> <p>Theale village is under threat from these developments and would just become another part of the Reading sprawl. The noise from the M4 traffic will make living in these new houses unpleasant and the air quality detrimental to the residents health.</p> <p>For these reasons I object to the proposed developments.</p>

<p>Please give reasons for your answer</p>	<p>The site of the old Theale sewage works off Blossom Lane is being proposed by West Berkshire Council as a site for 60 homes in its Local Plan review. They have labelled the site "RSA11". There are several reasons why this site is not suitable for housing:</p> <ol style="list-style-type: none"> 1. Flood risk 2. High voltage overhead power lines cross the site 3. The site has not been included in the Air Quality Assessment 4. Noise and pollution from the motorway 5. The site is contaminated from its past use a sewage works 6. The site has not been included in the Strategic Transport Model, meaning that the effect of traffic generated from the site has not been assessed. 7. Need to preserve the gap between Theale and Calcot/Tilehurst

Please give reasons for your answer	Following the news that two housing sites have been proposed for unsuitable land in Theale, I would like to register my objection to such a plan. Ref: 40 houses on Whitehart Meadow 60 homes on the site of the old sewage works, off Blossom Lane The land is a greenspace, and a wet area for most of the year. There is not enough infrastructure to handle this plan alongside the housing plans at the end of Theale (Lakeside).

Please give reasons for your answer	I would like to express my concerns regarding the proposed development at Whitehart Meadow and Blossoms Lane. These green spaces provide habitat for wildlife as well as recreational areas for both children and adults to enjoy. I do understand that we do need houses built, and inevitably this will encroach on green spaces but I think that we do need to have green pockets for our children to learn in and play in, and wildlife corridors to balance the cost benefit with the nature around us that is vital for health and well-being, and the world that we need to preserve for the next generation.

Please give reasons for your answer	<p>I live in <address redacted>.</p> <p>I am writing with deep concerns about the proposed developments of 40 and 60 new homes near my house, in the scrub land next to the M4.</p> <p>The views from the back of my property over <road redacted> have already been changed from lovely greenery to houses which now look into my back windows. Now I am worried about the impact from these new developments.</p> <p>First, the mini roundabout at the junction of the High Street and Hoard Way will have significantly more traffic, and will contribute much more noise to me - and to the old people who are residents of Elizabeth Court <comment redacted>. We already have too much traffic using the High Street on their way to the M4 and elsewhere. To the detriment of my health and wellbeing, this will cause more exhaust fumes and noise.</p> <p>Secondly, Theale Medical Centre is already in a parlous state. I won't go there any more <comment redacted>. In part this is obviously because they are under such huge strain that they simply cannot cope. It shows already. There is not an infinite stretch to the the capacity of infrastructure in our village, and it seems irresponsible of Council and builders to think of new housing if there is not commensurate responsibility to all the other needs, such as the Medical Centre, roads and schools.</p> <p>I register these points with the utmost concern for my own wellbeing and that of the village.</p> <p>I must oppose these new developments under the current circumstances.</p>

3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No

<p>Please give reasons for your answer</p>	<p>I have been a resident of Theale for 16 enjoyable years and wish to oppose this plan. There is only one surgery in Theale, one primary school and one secondary school. Today, I have seen a noticeboard from Croudace Group announcing building on greenfield near the A4 roundabout. Planning permission is for approximately 230 homes on this site. Please stop. Theale does not need more homes! The additional cars in the village will be dangerous as the High Street is quite narrow and 'near misses' do occur.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Please stop. Theale does not need more homes!</p>

2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>I am writing to voice my concerns over the Local Plan that appears to include up to 200 extra homes being built in Theale.</p> <p>According to the plan an extra 100 houses could be built to the West of the village (policy RSA 9) and a further 100 houses to the East (policies RSA10 and RSA 11).</p> <p>This would be a notable increase in the amount of housing in Theale, and my biggest concern is that these extra homes would put significant extra pressure on local facilities, and in particular the local schools.</p> <p>I have lived in Theale for about <redacted> months, and have a <redacted> year old son. We applied for him to attend Theale Primary School when we moved here. However, we are continually told that there is no space for him due to over subscription at the school. Instead, we have to drive 5 miles each way to his old school in Ford's Farm in Calcot, meaning we are driving about 100 miles a week to take him to school and pick him back up.</p> <p>I do not see how having a further 200 families in the village is tenable, considering the likely extra number of school places that this would require. As our experience shows, there are not enough school places for even one extra family, let alone 200. I seriously doubt that the capacity of the school could be increased enough to accomodate the likely extra number of children in the village.</p> <p>I further note that the High Street already suffers from bad traffic congestion (which we have no choice but to drive through to take our son to school each day), and the increased housing would only make this significantly worse.</p> <p>Whilst I understand the need for extra housing, I would say that Theale is not a suitable place for them.</p>

Please give reasons for your answer	The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure.

The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.

Early engagement between the developers and Thames Water would be beneficial to understand:

- What drainage requirements are required on and off site
- Clarity on what loading/flow from the development is anticipated
- Water supply requirements on and off site

The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.

To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.

Link here > <https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity>

We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.

Water Response

The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website <https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development>.

Waste Response

On the information available to date we do not envisage infrastructure concerns regarding wastewater network or wastewater treatment infrastructure capability in relation to this site/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ

Additional Comments

These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water flows being discharged to the public sewer.

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water to determine whether a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered is required.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p>	<p>No</p>

* Yes	
* No	
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination

1. Do you consider the Local Plan Review is legally compliant?	
* Yes	
* No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.	
* Yes	
* No	

<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>Observation clearly shows that local car ownership levels in Blossom Lane and Chestnut Close are at least two cars per household. An additional 60 homes = a minimum 120 cars. Crown Lane and Blossom Lane are currently single file traffic, taking it in turn to give way to oncoming traffic. Any heavier usage would result in gridlock.</p> <p>Due to the lack of pavement in Crown Lane and Blossom Lane, wheelchair and disability scooter users, prams, pushchairs, children cycling to school, pedestrians and equestrians are all currently forced onto the road to compete with oncoming traffic. Heavier traffic would be even more hazardous to vulnerable road users than at present.</p> <p>Blossom Lane at the proposed access point to Whitehart Meadow is not wide enough to accommodate two lanes of traffic. Any traffic flow at this point would cut off egress and access to numbers 41, 43, 37 and 39 Blossom Lane. Utilities vehicles and the emergency services would be unable to attend when necessary.</p> <p>Thames Water and Kennet Properties confirm that the land is contaminated with heavy metals and underground gas chambers, such that it is not fit even for animal grazing. It cannot, therefore, be fit for human habitation.</p> <p>The current infrastructure will not support an increased population. e.g. the primary school is now full and it currently takes four weeks to get a telephone appointment at the doctor's surgery.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? -	No

<p>Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>Section 4.35 of the Core Strategy contained the following statement: "The Lakeside development has planning permission to provide 350 homes in a range of different sizes and types, which would become a well-integrated part of the Theale community. If this development goes ahead, Theale would need to undergo a period of consolidation to provide an opportunity for facilities and services to be upgraded". Housing construction on this development has not yet commenced, although Outline permission has been granted for up to 325 homes and Reserved Matters permission has been granted for part of the site.</p> <p>In addition, outline permission has been granted for 104 homes on the adjacent site between The Green and the A340 (LPR site RSA9). These two sites will increase the number of homes in Theale by almost 25% when built out.</p> <p>Therefore, that statement is still valid and no justification has been given for not carrying that section forward to the LPR. Theale still needs that "period of consolidation".</p> <p>The site is close to the M4 motorway and thus subject to noise and air pollution. The latter is exacerbated in the morning peak because the M4 eastbound frequently slows to a crawl or standstill past this site. This worsens air pollution because:</p> <ul style="list-style-type: none"> • The density of vehicles increases as they close up, producing more pollution in a given length of road • Vehicle engines produce more pollution when idling or running slowly • The pollution does not disperse so widely because it is not dispersed by moving traffic. <p>High voltage power lines run past the site. In addition to visual intrusion and danger of electrocution (e.g. from climbing ladders or scaffolding or from flying kites), scientific research shows that they generate ozone and nitrogen oxide air pollution (increased by 13% and 30% over normal levels according to paper "Emissions of pollutants and air quality in the area of influence of high voltage overhead electrical lines" by Cociorva Danut, Mihaela Andreea Mitu and Natalia Raischi: <hyperlink removed - see attachment> This would add to the pollution caused to the site's residents by traffic on the M4.</p> <p>The site is severely contaminated from its history as a sewage works (until the mid-1980s) and as a depot for the old Bradfield Rural District Council. It is also rumoured to have been used as a waste site by the RDC. The cost of de-contamination could make the provision of affordable housing on the site unviable, and perhaps make development of the site unviable.</p> <p>A large proportion of the site is in flood zone 2. The site also is at risk from surface water and groundwater flooding (please see relevant section in the HELAA). This significantly reduces the extent of deliverable land and the latter makes SUDS problematic.</p> <p>The access to the site would be from the single-track end of Blossom Lane. Blossom Lane is very narrow in places and also has narrow footways. The footway on its southern side (that most likely to be used by pedestrians from the site) is not continuous, meaning that pedestrians would either have to walk in the road or cross it twice giving road safety concerns.</p> <p>The majority of pedestrians walking to the western end of Theale High would walk along Blossom Lane and Crown Lane. Crown Lane's footways are extremely narrow, only 60cm in places, meaning that pedestrians would have to step off footways to pass each other. There is no footway at all on the west side of Crown Lane at its southern end.</p> <p>The combination of increased pedestrian traffic and narrow and missing footways means increased numbers of pedestrians walking in, and crossing, the road. This, in combination with increased vehicle movements caused by the development would pose serious road safety dangers.</p> <p>The majority of traffic accessing the site would use Crown Lane*. It would impose another 41 to 44 movements in the am peak and 34 to 41 in the pm peak on this road**. This would cause the following problems:</p> <ul style="list-style-type: none"> • The lane is effectively single-track because its eastern side is a parking bay reserved for residents. • Opposing vehicles could cause gridlock. • Contention with traffic on the convoluted junction with the High Street would increase tailbacks on Crown Lane. • It would add to congestion on the High Street and at the Station Road mini roundabout. <p>10 to 14 vehicles accessing the site would use the Play Platt/Englefield Road junction in both peaks*.</p>

	<p>This would exacerbate the existing delays of 40 seconds in the am peak at this junction. It would also exacerbate traffic problems elsewhere in the highway network in Theale as described in the comments on Policy SP14</p> <p>* Traffic movement information from the traffic assessment in the planning statement for planning application 16/02850/OUTMAJ, 88 homes at Former Sewage Treatment Works Theale, adjusted for 60 homes</p> <p>The reasons that the site was not allocated in the Housing Site Allocations DPD are still valid:</p> <p>“When the preferred options version of the Housing Site Allocations Development Plan Document was consulted upon, significant concern was raised regarding access to the site, with limited scope for improvements to be made without acquiring third party land. Further technical work was carried out following preferred options, in particular landscape assessment work indicated that the site would be suitable for development subject to various mitigation measures, including a buffer to separate the site from the existing village. As a result, the site was not considered to be well related to the existing settlement and could result in a negative impact in terms of impact on the character of the built environment.</p> <p>At the submission stage, the site was not recommended for allocation.”</p> <p>The site is not included in the West Berkshire Strategic Traffic Model, meaning that the model is not accurate and that the effect of traffic generated from this site has not been assessed.</p> <p>The site is not included in the Air Quality Assessment, meaning that the Assessment is not accurate Site is missing from the table [Air Quality report table 8 - 13]</p> <p>The subsoil on the site is made up of peat (when the adjacent part of the Woodfield Way estate was built, peat to a depth of approximately two metres was excavated).</p> <p>Peat is a very good store of carbon. This carbon would be released as CO2</p> <p>This site is close to the A4 and M4 Junction 12. This means that many journeys will be by private car, which is unsustainable</p> <p><u>SA/SEA App 7 9b</u></p> <p><i>9 (a) The policy would NOT reduce West Berkshire’s contribution to greenhouse gas emissions as excavation of the deep peat subsoil would release carbon dioxide into the atmosphere</i></p> <p><i>9 (c) The policy would NOT reduce flood risk as removal of peat subsoil during construction will reduce attenuation of surface water entering the Sulham Broo, increasing flood risk to properties downstream</i></p> <p><i>3(a) The policy would NOT improve access to education, health and otherservices as health and primary education services in Theale are already over-subscribed</i></p> <p><i>5(b) The policy would NOT conserve and enhance the character of the landscape because it will replace a green area with a housing estate and negatively affect the setting of Theale as viewed from the M4</i></p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>The site should be removed from the LPR</p> <p>The site should be included in the Transport model and any necessary mitigations carried out</p> <p>The site should be included in the Air Quality Assessment and the table [8-13]</p> <p>The effect of the policy on these sustainability objectives should be changed from positive. The cumulative impact of the policy should be changed to negative.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>To explain why this section of the core strategy is still valid</p> <p>To explain the problems caused by high voltage power lines close to homes</p> <p>To explain the effect on pedestrians in Theale</p> <p>To describe how the local subsoil is made up of a peat to a deep level</p> <p>To explain why the policy is not sustainable</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes</p>	<p>Yes</p>

* No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>*LATE RESPONSE*</p> <p>I wish to raise issues regarding the proposal by West Berkshire Council to allocate Old Sewage Works (off Blossom Lane) in its Local Plan review.</p> <p>A) Specific to Old Sewage Works site (RSA11)</p> <ol style="list-style-type: none"> 1 There is flood risk to this site and high voltage overhead power lines cross the site. 2 It's close proximity means that, in addition to noise, pollution from the motorway needs to be investigated and the site has not been included in the Air Quality Assessment. 3 The site is contaminated from its previous use as a sewage works. 4 The site has not been included in the Strategic Transport Model, meaning that the effect of traffic generated from the site has not been assessed. Blossom Lane is currently one lane road to two houses at its northernmost point. Blossom Lane links to Crown Lane (congested with parking bays on one side meaning that is a single lane road for most of its length) and then to the mini-roundabout on the West side of Theale High Street. The effect of 40 houses built on Old Sewage Works needs to be carefully assessed before any consideration as to the suitability of this site. <p>B) In combination with Whitehart Meadow site (RSA10)</p> <ol style="list-style-type: none"> 1 A combined total of 100 homes is proposed for Theale <i>which is in addition to</i> the over 440 homes on the western side of Theale that are yet to be built but have been granted planning permission. 2 There are artificial deadlines which we know is why this plan is being rushed through. Yet the Local Plan Core Strategy says that "If this development [350 homes at Lakeside site] goes ahead, Theale would need to undergo a period of consolidation to provide an opportunity for facilities and services to be upgraded". No justification has been given as to why this requirement, still much needed, has not been carried forward into the Local Plan Review. 3 <i>Neither</i> site has been included in either the Strategic Transport Model or the Air Quality Assessment. 4 The proposed extra homes will put extra pressure on local health services that are already stretched to the limit. 5 Traffic from these two proposed sites puts huge pressure on the two mini-roundabouts at either end of Theale High Street making local road congestion even worse. <p>Thanks in advance for your consideration.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>

2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable	

<p>alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>I would like to object to planning on whitehart meadow and theale sewage works for the following reasons:</p> <p>Sewage works:</p> <p>Unsuitable access it's way to narrow and would be made more dangerous for chilling already using this area to walk to school. Again wildlife and countryside. The land is also flood area and contaminated.</p> <p>Over all there is already planning given to 400 odd houses in theale and on top of that windfall sites . This village is struggling to cope as it is and to add anymore would cripple it. I have not seen any plans to make the surgery bigger for the planning already permitted. This village will be ruined and no one will want to live here if its expanded from a lovely village to an ugly town that cannot cope.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	
<p>5. Independent Examination</p>	
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes</p> <p>* No</p>	
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes</p> <p>* No</p>	
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes</p> <p>* No</p>

<p>Please give reasons for your answer</p>	<p>We are writing to you regarding the proposed plan to build 60 homes on the Old Sewage works in Theale - RSA11 and to build 40 homes on Whitehart Meadow - immediately next to the Old Sewage Works.</p> <p>We live on <redacted> and are very concerned regarding access to this number of properties via this road. The road already struggles with the number of vehicles using it, given it is essential a single carriageway due to the parking. Similarly the pathways are thin and sometimes disappear entirely, making it unsuitable for greater numbers of people to try and walk down. Access to the centre of the village from Blossom Lane involves a complex junction with a mini-roundabout which is often used incorrectly, and the road surface through the high street, and the far end of Blossom Lane leading to Englefield Road both suffer from road damage, leading to dangerous pot holes. If these roads were to be used increasingly we'd need to see a better level of upkeep and substantial changes to the roads i.e. making them wider, which isn't possible given the need for parking.</p> <p>The actual site proposed seems highly unsuitable for major development given the proximity to the M4, which cause issues of air and noise pollution. Plus there is the presence of multiple pylons, which seems highly unsafe - how would the presence of these be mitigated for people's safety, particularly children? The area is also currently an undeveloped site. It's full of wildlife, and we can't understand how it would be deemed ok to destroy this. We recently also learned the area is potentially contaminated due to the previous use of the site for sewage works. Again, this seems unsafe and that it would require undue workarounds to make sure foundations could be built. Finally, the area proposed is known as a high risk area for flooding. Given the increased likelihood of flooding when you take away trees and add in tarmac and other non-soluble surfaces, the likelihood of flooding is only going to get worse. Last year we experienced intense rainfall which caused areas of Blossom Lane to flood.</p> <p>Crucially there doesn't seem to be any plan for how Theale will be able to serve this level of new people. The medical centre has struggled over the winter and the pharmacy often has long queues. Similarly, has the influx of people been considered for the local schools and other services. At the moment there would be no access for buses to serve the new development, making it a lengthy walk for anyone wanting to use it. Given the issues regarding the pavements this would be totally unsuitable, particularly for people with additional needs such as wheelchair users and people with prams/pushchairs.</p> <p>Lastly, it's important to remember that Theale is a village, which is currently managing to retain a village community and spirit. To build 100 new homes on these sites would bring such a high number of people all at once, it seems a major threat. Making Theale just another suburb of Reading rather than the village all of the current residents enjoy and love.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy:	

<p>the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>The site allocations presented in this chapter have not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of each site to accommodate development. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on these sites. We have concerns and have provided this information in a separate document <see comments below></p> <p>The site is Partly Flood Zone 2 and is approx. 20m from main river. The site is on secondary A superficial and principal bedrock aquifer</p> <p>The Sulham brook which is located some distance from the site is a main river and a headwater and is home to Brown Trout and Bullhead that makes it more ecologically important, therefore apart from the provision of a 10m buffer, an ecological assessment should be provided and approved before planning permission is granted. This should be included in the policy.</p> <p>We assume wastewater will be discharged at the Reading STW. We have no concerns provided Thames Water are confident any additional flows will not lead to deterioration of phosphate classification. Reading STW is within DWF capacity and not a frequent spiller. The policy notes should include a requirement for developers to liaise with Thames Water to discuss wastewater drainage for the site.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes
Please give reasons for your answer	We note and support the proposed criterion in each of the policies listed in this representation that relates to desk-based archaeological assessment and, if needed, field evaluation.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes

Please give reasons for your answer	
4. Proposed Changes	For all sites listed in this representation, while we support the policy requirement for desk-based archaeological assessment and, if necessary, field evaluation, the language used across the policies used is not consistent. The Council may wish to review the language used across these policies to ensure it improve consistency. We do not consider this is a matter of soundness.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am in objection to the proposed sites in Theale in the West Berkshire Local Plan Review, this being the 40 homes on Whitehart Meadow and 60 homes on the old Theale Sewage Works for the following reasons:</p> <p>The impact of additional traffic on the village. The proposed access route is a major route used by pedestrians to access the footbridge over the motorway. Additional traffic will raise risks to pedestrians, particularly school children. The high street is narrow and already ill-equipped to deal traffic. The junction is already busy due to its proximity to the motorway, business parks and the A4.</p> <p>The impact on the estates that will be adjacent to the developments – Woodfield Way, Rotherfield Close, Alderfield Close, Blossom Avenue, Blossom Lane etc, resulting in an impact on view, traffic through the local area. This is currently predominately a residential area and this development will impact on the living standards of existing residents. Blossom Lane is a narrow and very quiet road, construction traffic and eventual residents cars would cause risks to pedestrians and inconvenience to all.</p> <p>The development will reduce the protective barrier between their homes and the motorway.</p> <p>The negative impact on working standards in regard to the new development being in extremely close proximity to the overhead power lines and the motorway, leading to poor air quality, noise pollution and poor working environments.</p> <p>The environmental impact on the wildlife that currently lives in the area including deer.</p> <p>The visual impact of the structure will affect the outlook of the village on approach.</p> <p>There are already two approved areas of development in Theale (The Green and The Lakeside site) resulting in the potential building of 400+ homes. The facilities in Theale including the Medical Centre and the School are already under strain. Currently there are wait times of up to 3 weeks for a GP</p>

	<p>appointment and 45 minutes plus on the phone to try and get a duty appointment. It needs to be considered that this is before the building of the proposed 400+ homes, adding another 100 homes, plus a proposed large site of 1500 between Theale and Thatcham will add huge stress to these services and traffic to the area.</p>

<p>Please give reasons for your answer</p>	<p>Our client has an agreement with the landowners of the site, known as 'Land to the rear of The Hollies' in the District, which currently forms part of an allocated site for approximately 60 dwellings under Policy HSA16 in the adopted Housing Site Allocations Development Plan Document (HSADPD) (May 2017).</p> <p>It is understood the 'emerging draft' Local Plan Review (LPR) no longer seeks to carry this allocation forward. This is despite part of the allocated site having already been built out and now occupied by residents. The Council say this is because the site now falls within the extended Detailed Emergency Planning Zone (DEPZ) of AWE Burghfield. The DEPZ was extended as a result of the updated Radiation (Emergency Preparedness and Public Information) Regulations (REPPPIR) 2019.</p> <p>Our client does not support the removal of this allocated site from the Development Plan. Our client is keen to work collaboratively with the Council to secure the development of the remaining part of this currently allocated site. These representations therefore focus on responding to the removal of the allocated site from the LPR and the changes proposed to Policy SP4 in relation to AWE Aldermaston and AWE Burghfield.</p> <p>These representations also seek to respond to the Council's development strategy (including Policies SP1 and SP3, SP12 and SP14) and decision-making in relation to an effective 'moratorium' on new development within Burghfield Common, despite the village remaining as a 'Rural Service Settlement', which offers 'development potential appropriate to the character and function of the settlement', according to the proposed Spatial Strategy.</p> <p>These representations also discuss Policy RSA12, which seeks the provision of approximately 100 dwellings within Burghfield Common1, within the extended DEPZ.</p> <p>In order to consider whether a Local Plan is sound, reference needs to be made to the National Planning Policy Framework (NPPF) (July 2021) paragraph 35. This identifies that a sound Plan is:</p> <ol style="list-style-type: none"> 1 a) Positively Prepared– 'providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development'; b) Justified– 'an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence'; c) Effective – 'deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground'; and d) Consistent with National Policy – 'enabling the delivery of sustainable development in accordance with the policies in this Framework'. <p>It is in light of these criteria that the LPR (Regulation 19) version has been considered. We find the de-allocation of site HSA16 is not consistent with the Council's approach to its development strategy and the settlement hierarchy. In addition, its approach towards a 'moratorium' on further development within the parish of Burghfield Common is flawed.</p> <p>Notwithstanding the very clear and unreasonable inconsistency in the Council's decision making between HSA15 and HSA16, Policy RSA12 is to be carried forward as an allocated site within the LPR despite Burghfield Common now being within the extended DEPZ. That site has apparently been accommodated as part of the Emergency Plan. This does clearly demonstrate that the Emergency Plan can be made to be adaptable should the Council wish to make it in order to accommodate additional development. The Emergency Plan even states at paragraph 1.6 that "<i>West Berkshire District Council will ensure the plan is updated in accordance with:</i></p> <ol style="list-style-type: none"> 1 c) <i>following any organisational or progress changes</i> 2 d) <i>on at least a 3 yearly basis a full formal review will be undertaken</i>". <p>Given the most recent Emergency Plan was in place from June 2022, Reserved Matters at the Pondhouse Farm site were granted in July 2022 and that the formal review date of the Emergency Plan is scheduled for 2022/2023, it is entirely feasible that our client's site allocation for the remaining 32 dwellings can be accommodated within an updated version of the Emergency Plan.</p> <p>As previously discussed, the Council have failed to provide clear justification over why having outline planning permission on an allocated site in the HSADPD 2017 (Policy HSA14) can be accommodated within an Emergency Plan, where the DEPZ was only extended post-2019 and reserved matters for that site was not then approved until July 2022, whilst provisions in the Emergency Plan for an adjacent allocated site, which had only been partially approved at the time the DEPZ was extended, cannot be made. This appears illogical and subject to personal views influencing proceedings rather than due process, and in terms of plan making is clearly unsound.</p> <p>Our client's site has since been removed from Policy SP14, despite being included in the Regulation 18 version of the draft Plan. Policy RSA16 has also been removed from the draft Plan. This results in the plan failing to be justified given the lack of any evidence provided to support the removal of the site.</p> <p>Paragraph 6.33 identifies that "<i>if in the future the DEPZ is reviewed and the emergency planning arrangements are amended, then future reviews of the Local Plan will consider whether strategic allocations in this area would be suitable</i>", suggesting that contrary to the Pre-application Advice received,</p>

	<p>there is no 'moratorium' on development, particularly as Policy SP3 still seeks to promote housing and economic development within Burghfield Common.</p> <p>Referring back to the REPP19 Regulations, these clearly expect there to be changes over the life of an Emergency Plan, such that the Plan will need to be updated at least every three years. There is therefore no sound reason why the Council's Emergency Plan cannot be updated to accommodate the remaining 32 dwellings on the allocated site, or that an arbitrary 'line', based on personal judgement alone, needed to be drawn to exclude half of an allocated site in an adopted Development Plan. That personal decision should not support the removal of this site from the LPR.</p> <p>We therefore consider the Council has not properly reviewed or justified its approach towards development within the DEPZ of the AWE sites, particularly in relation to the provision of housing around AWE Burghfield and that there is confusion over the spatial strategy in relation to development within Burghfield Common.</p> <p>We consider there are fundamental inconsistencies in the way in which other applications for development have been determined in the area, as an allocated site should hold the same weight as a site with planning permission having regard to the definition of deliverable in the Framework. In order to overcome our objections to this regulation 19 LPR, the Council should reinstate the allocation of the site in the Local Plan and update the Emergency Plan to accommodate it.</p> <p>Conclusion</p> <p>These representations have been prepared by Pro Vision on behalf of our client, T A Fisher & Sons, in response to West Berkshire Council's consultation on its Local Plan Review 2022-2039 (Regulation 19) (January 2023).</p> <p>Our client has an agreement with the landowners of the site known as 'Land to the rear of The Hollies' in the District, which currently forms part of allocated site 'HSA16', in the adopted HSADPD (May 2017).</p> <p>We note the allocation for the site is no longer included within the 'emerging draft' LPR, as the site falls within the extended Detailed Emergency Planning Zone (DEPZ) of AWE Burghfield, despite there being a remainder of 32 units still to be delivered.</p> <p>Our client does not support the removal of this allocated site from the LPR.</p> <p>These representations have therefore focused on responding to the unjustified removal of the allocated site from the LPR and the changes proposed to Policy SP4 in relation to AWE Aldermaston and AWE Burghfield as well as the development strategy and spatial hierarchy proposed by the LPR.</p> <p>In particular, we consider the remaining number of dwellings should be carried forwards in the LPR as the development of the western part of the allocated site can be achieved and is deliverable now. We contend that the Emergency Plan can be updated to accommodate the delivery of 32 units without impacting adversely on the operation of AWE Burghfield, public safety or the functioning of the Emergency Plan. The LPR as currently drafted is unsound, as it is not justified, not consistent with the Framework and not positively prepared.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>No</p>

2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes	

<p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure.</p> <p>The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.</p> <p>Early engagement between the developers and Thames Water would be beneficial to understand:</p> <ul style="list-style-type: none"> • What drainage requirements are required on and off site • Clarity on what loading/flow from the development is anticipated • Water supply requirements on and off site <p>The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.</p> <p>To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.</p> <p>Link here > https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity</p> <p>We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.</p> <p>Water Response</p> <p>The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development.</p> <p>Waste Response</p> <p>On the information available to date we do not envisage infrastructure concerns regarding wastewater network or wastewater treatment infrastructure capability in relation to this site/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p>Additional Comments</p> <p>These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water flows being discharged to the public sewer.</p>

3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water to determine whether a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered is required.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	
Event Name	Proposed Submission (Reg 19) West Berkshire Local Plan Review 2022-2039
Bookmark	The Woodland Trust
Consultee Full Name	Ms Bridget Fox
Consultee Organisation	The Woodland Trust
Agent Full Name	
Agent Organisation	
Comment ID	PS857
Chapter / Policy / Appendix Number	Policy RSA 12
Chapter / Policy / Appendix Title	Land adjoining Pondhouse Farm, Clayhill Road, Burghfield Common (Site Ref: HSA15)
Order	105
Submission Type * E-Mail * Letter * Other * SMS * Web * Unknown	E-Mail
Response Date	03/03/2023 00:23:00
