1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>I am writing this letter to raise my concerns and objection to the proposed development of NE Thatcham due to the the local area.</p> <p>Environment</p> <p>I am concerned that a development of this size and scale in a single location would have a number of negative environmental impacts.</p> <p>Flooding : a development of this size with the proposed amount of hard surfaces, would inevitably increase the amount of runoff and cause flooding.</p> <p>Nutrient pollution : I am concerned that a development of this size would have an impact on the River Kennet by increasing the amount of runoff by the additional Rainwater runoff, and by the additional</p> <p>Sewage created by the increased population. It have been reported in a number of occasions that river kennet is already struggling. local sewage works have on a number of occasions been overwhelmed and this development is very likely to significantly increase the amount of sewage. I understand that the river kennet in this area is not a Special Areas of Conservation, however, it is a Chalk stream and therefore has a high level of protection from significant developments.</p>

	<p>Traffic</p> <p>As a local resident and commuter to a local business, I am regularly stuck in traffic queues heading into Thatcham through Bath Road / Pipers Way roundabout, I believe that this many houses in a single location given the local infrastructure causes traffic and inevitably cause an increase in traffic pollution and a reduction in air quality.</p> <p>I am also concerned that this traffic would inevitably push traffic onto the smaller single-track roads around the local pavements and offer little protection to pedestrians given the expect increase in traffic and likelihood of frustrated drivers on the excess traffic.</p> <p>I am concerned that West Berkshire council have appear to change their position on developments of this nature have a smaller proposal for amongst other reasons the following : <i>“The council also said that Siege Cross would erode the surrounding rural settlements, while producing clear and demonstrable harm to the landscape</i></p> <p><i>Having read the West Berkshire Council proposal I do not believe that it is ‘Sound’ and is little more than a sales pitch without assessing all the local options</i></p>

Please give reasons for your answer	<p>I wish to register my objection to the proposed development on the following basis that it is unsound for the following</p> <ol style="list-style-type: none"> 1 The proposed development is in an area of OSNB 2 The traffic movement on a mean average of 2000 properties based on 1.5 cars per household doing two journeys per day creating additional poor air quality. 3 The additional traffic movement via Upper Bucklebury and Chapel Row would significantly increase in what are busy roads. 4 The current NHS provision is inadequate with no agreed additional provision 5 Dental practises are unable to currently offer a 100% service to existing residence. 6 The current public transport is of poor quality and could not cope with additional pressure 7 Brown field sites should be the default option not green belt with the loss of habitat from wild animal birds etc. 8 The provision of this development has taken no impact on the common at Bucklebury which has ground nesting birds being pushed to the ever decreasing borders of mankinds expansion, with the addition of circa 8000 additional residents. 9 The proposed development makes no mention of road update improvements to cope. 10 The current school provision is already under pressure <p>Conclusion, WBC needs to listen to it's current residence in these situation and the impact on there quality of life, rather than what we want. If we don't care what you think. You are not our masters ! and need to stop thinking that you can do what you like without regard for the community. We need a true democracy (Although I sometimes wonder) so therefore you need to listen to what is being said to you!</p>

<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>On the North East Thatcham plan for a very large housing estate, my particular objections are:</p> <p>There will be increased traffic through Upper Bucklebury and Chapel Row and a problem at the junction on the Pangbourn road proposed a new roundabout on the narrow Harts Hill road to allow traffic in and out of the northern end of the development on Harts Hill; this will cause additional congestion on the A4. Cold Ash will see a large flow of traffic going towards Chiseldon which is a narrow and many do not have pavements; cycling would not be safe.</p> <p>There is insufficient capacity at Kennet school (oversubscribed) and no other plan has been made. School provision in the area and facilities on such a gradient have not been costed.</p> <p>On Wildlife: Bucklebury common would be subjected to an increased number of visitors and the delicate ecosystem would be damaged. There is no evidence of or any strategy for increased biodiversity. A "country park" mentioned in the plan does not meet the criteria. The three small areas inside the settlement boundary are not of any proper environmental value, some "wildflower meadows", nightjars or great crested newts.</p> <p>The strategic gap between Thatcham and Bucklebury; Upper Bucklebury will lose its identity when Thatcham and Bucklebury developer in Cold Ash has just been refused permission for this reason.</p> <p>Medical provision: additional GP surgeries are not part of the NHS strategy for the future. No local surgeries have the space for a surgery of 450 square metres as suggested.</p> <p>Number of houses: Initially 2500 houses were to be built in total, 1250 in the plan period. This has now been increased to 3000. Any mitigation of the impact of the development should be largely completed before sales however what normally happens is that poverty and delays this work until the site is largely complete. The developer will wish to utilise the area originally designated for 1000 after this LPR plan period finishes.</p>

<p>Please give reasons for your answer</p>	<p>I am writing to you to submit by objection to the proposed development of 1500-2000 houses in NE Thatcham. I have lived in the area for nearly 5 years. I moved to the area making a significant personal investment in the area so that my family could enjoy a good environment, green spaces and support the local community. The mental health of my family and specifically my young children, since COVID, has been improved due to the green spaces and wildlife of the area.</p> <p>Wildlife particularly roam freely in our garden and local area (Deer, Pheasants, Hares, many birds, foxes, badgers etc).</p> <p>I believe this proposal and planning application to be unsound based on the below points.</p> <p>Transport</p> <p>The increased traffic that would result as a direct impact of the proposed development, will significantly negatively impact the area. The road exit at the north of the proposed site onto Harts Hill will exit in one direction towards Upper Bucklebury and then split onto Chapel Row. These roads are country roads and wholly inadequate currently, never mind with a considerable and increasing volume of traffic that will come with the development. This is Unsafe. There is already unacceptable level of traffic accidents. The transport and planning committee has shared no modelling results for the Harts Hill Road exit - Why Not? There are drawings for all other areas.</p> <p>This will also have a negative impact on the ability to Walk, cycle in the area. Cars travel too fast and the roads are narrow and unsuitable for a higher volume of cars providing a safe environment for walkers and cyclists.</p> <p>HealthCare</p> <p>The massively overstretched NHS GP and also community and Acute facilities is well documented. The proposal submitted to the integrated care board but no details or insight was shared about what exactly this would look like. Whether the proposal would be considered fit for purpose for the community and how this has been shared and discussed with the local health board. The details of these discussions - where can the recommendations and conclusions be seen in the proposed plan? It is of great concern that the details are not available from WBC or the developer. The demographic of the community affected here desperately need access to health care now and in the future. As per the figures available from NHS digital, it is highly unlikely that any additional GP practices will be provided. It is shocking that no local GP surgery has been approached by WBC or the developers to discuss the proposal and plan. The local GP practices are massively overstretched. Approximately 27,800 patients which equates to just under 2000 patients per GP practice. The number of homes being built and introduction of more young families to the area this continues to grow. It is not sustainable. The local GP practices who are currently unable to meet the demand and patients having to travel often large distances to get their GP appointments.</p> <p>Environment</p> <p>1 Collateral damage to the Bucklebury Plateau Biodiversity Opportunity area and its ancient woodland and heathland.</p>

	<p>2 Siting a major greenfield development in the broader landscape setting of the North Wessex Downs AONB the open countryside by local communities</p> <p>3 Casuing detrimental impacts to legally protected wildlife known to be present on the sites.</p> <p>From a review of the documentation on SP17 there is nothing to support the claim that there will be a positive impact on the environment. In fact the opposite is true. Nor is there evidence of documentation to support the Sustainability Charter or its existence. There seem to be no proven plans on how the development will provide green spaces which will mean increasing stress on these fragile eco systems. Where is the evidence to support the claims that there will be an overall positive impact on the environment?</p> <p>Education</p> <p>There is no clearly defined plan on how education will be provided to the increased population and the existing residential population. There are approximately 4000 new homes and approximately 4000 new school places needed based on 2 kids per household, where are the additional schools provided? Clearly if any new schools were to be built that has additional impact on traffic and other local resources. There are already schools that are oversubscribed today without the increased burden. There was no current predictive future modelling to anticipate the additional future resources required.</p> <p>WBC has a duty of care to provide education needs are met across all school years - this is not defined in the LPR.</p> <p>In addition, there is a need to provide school fields on flat ground and from the proposed area the only suitable area is the proposed area. There is a clear air quality issue for the young children using it. This has not been met - where is the evidence for funding or suitable land?</p> <p>Based on the above points, I would like to register my objection to the LPR Regulation 19 objection.</p>

Please give reasons for your answer	Previous comments were not made on this allocation. Whilst it is appreciated that this allocation is strategic, it is very provision of this site has reduced from 2,500 dwellings to 1,500 dwellings. It is unclear why this has happened – was fully assessed as part of the Regulation 18 consultation document.

	Such a dramatic reduction in housing provision highlights that there is a need for further, less complex, small-medium Local Plan.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	

<p>Please give reasons for your answer</p>	
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>. Transport</p> <p>Roads: the roads around this area of Thattham are already extremely busy, and this number of houses will massive the evening rush hour, traffic regularly queues from the eastern side of Woolhampton to Thattham, which will become commuters is increased. The building of these proposed houses will lead to an increase in traffic through the surround Bucklebury and Cold Ash - in the case of Cold Ash traffic will increase on the roads past St Marks and St Finian's so impassable during school drop off and pick up times, so an increase of traffic would have catastrophic effects. The roads maintained, so an increase in traffic would result in a further degradation of the road surfaces.</p> <p>Rail travel: there are already insufficient parking spaces at Thattham station and a further increase in the number of cars being parked in residential areas in Thattham which has road safety implications.</p> <p>1 Healthcare</p> <p>To the best of my knowledge all the local surgeries are full so it's unclear where the new residents would go. I realise that but given the challenge in recruiting/retaining GPs I have low confidence that this would actually happen. The negative impact at the West Berks Hospital would also be significant. I would like to see the Health Impact Assessment for the proposed development.</p> <p>1 Environment</p> <p>I am at a loss to understand why WBC would think it acceptable to develop a greenfield site when there are many brownfield sites developed first, e.g. Kennet Centre. Parts of the site have been subject to flooding previously and it's not clear that plans given to the unintended impact in terms of water management. The construction of so many houses will inevitably impact the surrounding area, and to suggest that the overall environmental impact is either neutral or positive is highly misleading.</p> <p>1 Education</p>

	<p>There is no information on how early years education would be accessed. Primary education is already a challenge having to travel miles to get to their designated primary school. It's again unclear about how primary education would be funded - money to the developer would not be acceptable - and clearly schools need to be built and established before the high school/secondary education, I feel the contents of the plan are unsound. It is believed that the numbers of secondary age children required to necessitate a new secondary school being built, but it is unclear where the secondary age children are coming from - also result in a reduction in choice for secondary age children in the surrounding villages who can currently choose between several Schools - as presumably these children would all have to go to the Downs.</p> <p>1 Sports fields - with that many people living in close proximity to each other, it will be important to create a sports field - not clear where that would be as it usually requires flat ground which is in short supply in the proposed area of the site.</p>

Please give reasons for your answer	<p>I have taken a considerable amount of time to read through the Proposed Local Plan and the remarks below superfluous housing development to which I object as I find it unsound.</p> <p>Although we all understand the necessity for new housing it needs to be a considered approach and take into account the impact on the environment within the local area. This is why I strongly disagree with the proposed allocation of 1,500 - 2500 dwellings (actually 1,500) for the North East Thatcham development.</p> <ol style="list-style-type: none"> 1 There is absolutely no evidence to support WBC claims that SP17 will have a positive impact on the environment. This is a claim. There is no habitat survey or environmental study on the biodiversity. How can a council report there is no study or evidence-based survey on the existing or background study? This fact alone makes the environmental impact statement fit for purpose. As part of the objections to SP.17 Bucklebury Parish Council complied a biodiversity study of the site. It would cause a significant loss of habitat and identified may endangered species, seven of which are on the red list. Evidence of bat activity, badgers, Western Roe Deer, fox in the adjacent woodland and hedgerows to the site. The council support fresh water shrimp and other important creatures including Newts. Why was this not picked up during the consultation that WBC had to prepare their report? 2 The existing hedgerows in particular are vitally important as green infrastructure and wildlife corridors that attract biodiversity. The plan identifies this in Paragraph 179 of the framework but there is not strategy detailed as to how these are to be saved. 3 The council supposedly supports the creating of strategic gaps and keeping village identity and the proposal . The plan does not identify how these actual and perceived visual breaks remain important for the continued retention of the existing settlement.

If this is fact then why is the current proposal contra to this policy. It is important to keep the strategic gap between T also relevant to the other developments for example at Benham Hill otherwise the entire of this area become one mo completely loses the character of individual settlements.

- 1 The original Thatcham Growth Plan issued by WBC had provision for two Country Parks. This has been subse to undefined "community parks". The LPR actually states to facilitate connection to the AONB. As I am privileg Common Stewardship Scheme and the Chair of the Bucklebury Commoners Association, I confirm that we hav proposal and its potential impact.

We can confirm that the increase footfall during and after Covid 19 and a very negative effect on the biodiversity of B putting pressure on a number of endangered species, including Woodcock. We are working very hard to preserve, m heathland in the AONB. This area is very special, sensitive habitat and a refuge for Adders (Common Viper), Stonech Nightjars are of which are under threat. The Common is private land but the landlord grants access to the general pub There are no mitigating parameters within the SP.17 to prevent a very negative biodiversity imbalance. There is a rea x 4 and trails bike traffic will also increase.

- 1 The visual impact on the AONB will be enormous, especially when viewed from Greenham or the higher grou Reading through the report there is some confusion and ambiguity on which levels are consider acceptable. M actually exceeds the 100 m contour especially around Harts Hill and towards Long Grove Copse. We have bee that the development will all be below 100 m. This is false. It will be imposing for the existing residents and be actually looked at this vista will have noted the Henwick Driving range and this is noted at being at 90 m. The n be at this level and above – highly, highly visible. We raised this question during Regulation 18 and the respons the developer's masterplan. To avoid this issue is just unacceptable and again raises the question of soundnes
- 2 Thinking of the precedent that it sets, it is interesting to note that the Planning Inspectorate dismissed an appe the North West Downs Area of Outstanding Natural Beauty as it would have had a significant impact on the ANO green gap which makes a significant contribution to the rural setting.. and cause irreversible harm to the intrins was made on 26 dwellings imagine the impact of 1,500 -2,500 and the subsequent infrastructure required.
- 3 Traffic – I raised a number of questions under Regulation 18 on the matter of the increased traffic and its effect The answer cited is naïve. "Highway works and active travel routes would assist in directing residents to using Harts Hill Road, and using an enhanced cycling and walking network to travel, including to Thatcham train stat

I cannot believe WBC officers actually think that drivers will turn left into congestion if they wish to go East/West for the to join the A34 north/south.

This is just unrealistic and any proposal should be supported by detailed modelling. Traffic going north will transit up through Cold Ash putting enormous pressure on struggling system. The area of Burdens Heath (Bucklebury) will be s this is an existing 30 mph zone, traffic leaves the village anywhere between 40-60 mph (we have the data).

Those drivers going west for the A4 and M4 will just drive straight through the parishes of Bucklebury, Bradfield and congestion at the dangerous Theale crossroads which is an accident blackspot. The general public are in love with th persuaded onto public transport. I formerly invite any WBC officer to come and discuss this matter in person using the and the enhanced cycling/walking network.

- 1 The local plan also identifies an aviation pipeline on the south of the site and a gas pipeline at the north. Both o size of the potential development and create problems with easement. There is no detail on how developers ar especially access into the SP.17 site from the south.
- 2 The Harts Hill Road is a notoriously dangerous stretch of windy road (We recently had three accidents in one new access route into the site from this road is profoundly unsound

10. Foul Water

Current Synopsis

Thatcham, Newbury and the surrounding district is served by Thames Water's Sewage Treatment Works (STW) in L is fed by two sewers (Dia. 18" and Dia 15") running from Faraday Road to Lower Way that are in poor repair and ove the combined flow of sewage and surface water from the older areas of Newbury as many of the properties have con pumping main that runs from Turnpike, serving that area with a pumping station at Benham Hill. Another sewer runs fr Road, Thatcham is gravity fed from all the current estates in the north development of Thatcham and the town centre

This facility also has to accommodate all the smaller village septic tank systems, tinkered into Lower Way, and comm

Currently there are 600 new houses being constructed near Vodaphone, 167 new flats at Boundary Road (Ex-Sterlin the Tesco Supermarket (Retail Park), and 100 houses with planning approval in Lower Way. In total 1,024 properties development (say, an additional $1024 \times 300 = 307,200$ litres/day). The current NE Thatcham20 proposal (SP17) add (minimum), (i.e. $1,500 \times 300 = 450,000$ litres per day).

The current system at Lower Way has a maximum intake capacity of about 600 litres/second. If the input figure is in exo occurs, the combined flow is fed into two overflow tanks. The regulated input is fed into Fermentation Settling Tanks (with percolating filter. If these are over capacity, or if the overflow tanks are full, the untreated effluent is delivered dir

Regulation 19

There is no mention of how the infrastructure is going to be improved with regards to this foul water requirement. The litres per person per day; assuming an average of two persons/household, adds an additional 450,000 litres/day from that has to be treated at Lower Way. This does not take into account any surface water that might have been connect buildings and amenities, or any other necessary infrastructure and, more importantly, the above additional input from r excludes the additional 1,100 dwellings built recently at The Race Course (330,000 litres/day).

The TSW at Lower Way, has reached its design capacity, and apart from the sites listed above will also be required to sites designated: RSA1 to RSA7, RSA 9, RSA17 and RSA 22.

Without the necessary infrastructure the proposed housing development in NE Thatcham, SP17, is ill- considered and ur damage (as the Biological Oxygen Demand (BOD) and Chemical Oxygen Demand (COD) on the outflow will certain earth it is very apparent that there is very little room for further expansion on the site. There may be room for an add only act as additional attenuation and not mitigate the risk of pollution into the Kennet.

If this outdated plant cannot cope with the increase in flow, then the operators have no option other than to increase levels at the outlet into the River Kennet.

This will exceed the permitted percentile limit set by the Environment Agency (EA).

This completely contradicts the Water Framework Directive cited in Regulation 19, for the improvement, restoration and protection of water bodies. Please note that much of the drinking water supply for Reading comes from this source and is abstracted at Fobney, STW and the proposed developments. The similar treatment facilities at Kintbury and Hungerford also discharge into the Kennet during peak flow period.

West Berkshire Council has identified the requirement, it is mentioned in 5.63 of the Infrastructure Development Plan. 5.63 The Study indicates that “new homes require the provision of clean water, safe disposal of wastewater and protection of large numbers of new homes in certain 35 locations may result in the capacity of existing available infrastructure to be exceeded, which could potentially cause service failures to water and wastewater customers, adverse impacts to the environment, or health and safety issues, and wastewater assets being passed on to the bill payers.”

Conclusion

If the problems above have been clearly identified by WBC, surely no planned development should be considered until a full investigation is carried out and a solution prepared. The existing sewers and infrastructure feeding Lower Way are real matters for the council to consider, the method of repairing or replacing this Victorian system, short of excavating the A4, one of the main arterial roads, which is a massive task to be carried out.

There is absolutely no doubt that the existing infrastructures is failing. The evidence of extreme infiltration identified in the LPR is clear evidence that the pipework has lost its integrity. Recently an old section failed on the junction to Hambridge Road which was investigated by the Environment Agency but it will have resulted in surface and groundwater pollution.

The LPR touches only briefly on the subject of Sewage Treatment In Section DC.6 para e: “suitable land and access is required for the collection and treatment of water resources and wastewater, flood defences and drainage infrastructure”. There is no detail. Potable water bill payers and local councils need this information.

The Infrastructure Development Plan Control Policies states:

10.45 Developers will need to demonstrate that existing, planned and/or committed infrastructure is sufficient to accommodate the proposed developments. This includes demonstrating that there is adequate water supply, surface water drainage, foul drainage and on and off site to service the development. Necessary improvements to sewerage water treatment infrastructure will be required from service providers and companies and need to be completed prior to occupation of the development. This is to ensure that such infrastructure is sufficient to meet the impacts on the environment such as sewage flooding of residential and commercial property and pollution of land and water.

In some circumstances this may make it necessary for developers to arrange for appropriate studies to ascertain whether the proposed development will lead to the overloading of existing local infrastructure. Where there is a capacity problem in the local network developers should be required to otherwise fund local infrastructure improvements.

If this directive is adopted and implemented by West Berks Council (WBC), any planning developments should not be approved until the information is submitted by developers and approved by WBC. This is a key clause and should be fully implemented. If the sewerage system is not improved and augmented it is impossible for developers to comply with WBC Policy DC.6.

The Local Plan Review does not mention any improvements to the existing sewage network or planning provision for the current proposal unsound.

1 Potable Water

Currently the water for Thatcham and the environs is extracted at Bishops Green and Speen. Sarah Bentley, CEO of Thames Water has stated that the current requirement per person per day is 150 litres. The increasing demand for potable water is having a significant impact in both the Kennet and Pang River valleys. The River Pang that runs through the villages of Bucklebury and the surrounding area completely ran dry again this year as a result of the reduced level of the aquifer.

In the past there are accounts of the river not running (1838 - Environs of Newbury), but this was during the first half of the year; a couple of months; and again briefly during the drought of 1976. In 2022 the river did not run for a considerable time for the first time in the very wet period in the autumn the river was still bone dry in

November and not really flowing until 9th December 2022. This devastating impact on the environment and the biodiversity at Compton and neighbouring extraction points and is in complete contradiction to the Water Framework Directive that requires that there are no suggested mitigation measures as this the sole responsibility of Thames Water.

The infrastructure plan, in sections 5.65 & 5.66, also points out this is a major problem:

5.65 Thames Water (TW) are responsible for supplying West Berkshire with water. The council identifies West Berks Council is under stress, in common with the rest of the South East. It comments that the more stringent water efficiency target for new developments under Building Regulations is justified, however West Berkshire Council may want to consider going further than the current target for larger strategic developments.

5.66 The WBC states that growth plans defined in Water Resource Management Plans (WRMPs) are broadly in line with the requirements of West Berkshire Council. “The WRMP does not predict a supply-demand deficit, except in peak or drought conditions over the WRMP planning period to improve resilience”.

This is an unsound judgment for foreseeing no predicted supply demand deficit, we are experiencing predicted extreme weather conditions, hose pipe ban enforcement for many weeks in the summer of 2022 which was lifted only on 22nd November, 2022. The infrastructure in Bucklebury and adjacent parishes is old and in poor condition and suffers from numerous bursts and leaks.

<for photos see attachment>

1 Flooding

UKCIP predicts a reduction in the overall annual rainfall but more frequent and intensive storms. The heavy storms in the winter of 2022 caused flooding that can occur off the hills surrounding Thatcham. The severity of storms will increase in nature and frequency.

Global warming will increase the amount of rainfall through as an increase in temperature, increases the moisture capacity of the air. To a psychrometric chart can make the calculation, for example, at 25°C with a RH (relative humidity) 60% the amount of moisture in the air is 10.5 g/m³. An increase of temperature to 30°C increases the amount of moisture to 13.5 g/m³ (12.5% increase in the air moisture capacity).

If SUDS and attenuation measures reduce the immediate impact the collective storm water this total flow will all come into the Kennet. SP.17 proposes 1500-

2500 dwellings plus garage, outbuildings, hard standings, car parking, pavements, roads or any infrastructure works such as roads, warehousing development etc. Even if this attenuation is mitigated locally, the problem is just shifted further downstream. This is irresponsible and in breach of current environmental protection policies.

	<p>Conclusion</p> <p>The area of SP.17 is bisected by the ephemeral water courses which is such a dominant geological and natural feature. The document actually states "There is a risk of surface water flooding within the site along the natural drainage routes based on evidence. The document however fails to identify the underlying rock strata of Reading Beds clays which predominates and provides evidence that who has carried out the standard percolation test on this material will substantiate.</p> <p>Already West Berks Council have spent a substantial amount of money in flood defences to protect the town but the road network penetrates these defences. The water will simply find the path of least resistance.</p> <p>Policy CS 16 states:</p> <p>Development will only be permitted if it can be demonstrated that:</p> <ul style="list-style-type: none"> • Through the sequential test and exception test (where required), it is demonstrated that the benefits of the development outweigh the risk of flooding. • It would not have an impact on the capacity of an area to store floodwater. • It would not have a detrimental impact on the flow of fluvial flood water, surface water or obstruct the run-off of groundwater. • Appropriate measures required to manage any flood risk can be implemented. • Provision is made for the long-term maintenance and management of any flood protection and or mitigation measures. • Safe access and exit from the site can be provided for routine and emergency access under both frequent and infrequent flooding. <p>It is unclear who will retain the overall design responsibility for the flood alleviation systems and their essential maintenance. We have identified and set the above parameters their proposal of building 1500-2500 dwellings, warehouses, roads and other buildings. The proposal contains no detail on how these vitally important measures are to be costed, implemented, maintained and managed.</p>

Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	The plan is unsound, rushed and not been subject to sufficient public or regulatory body consultation. Transportation: The local plan calls for a massive increase in the number of homes as part of the new town being proposed for north of Reading. This will all have cars that will need to leave the new town to travel to places of employment (Reading, Newbury, London etc). WBC have been very late in publishing their plans but funnelling a percentage of traffic to the country lanes of Harts Hill road and the surrounding area. In the document there are no studies or models to demonstrate the impact of this increased traffic or any drawings for the roads. In proposing this increase in traffic to the country roads of Upper Bucklebury, WBC are in direct conflict to their state of the art Environmental Assessment to increase safety and reduce accidents- how can increasing traffic volumes result in increased safety?

	<p>Consultation with ONR:</p> <p>Reading the local plan review WBC clearly have failed to consult with the ONR, as they should have as the developer of 12KM of AWE Aldermaston. In SP4, there are lots of words but nothing to say that WBC have done anything more than what is required (the comments are cut and paste from the ONR).</p> <p>Clearly there is a massive impact to the population profile and rather than read a website, I would have expected WBC to have consulted with the community. This clearly reinforces that WBC have rushed LPR 19 and not consulted with one statutory body, how many other statutory bodies have been consulted with? I believe that this lack of consultation demonstrates that WBC have rushed this consultation and have not taken the time to do the bear minimum.</p> <p>Consultation with Public:</p> <p>Between LPR 18 and LPR 19 WBC held no public consultation sessions, demonstrating that they are "hell bent" on their own agenda rather than discuss the proposed plans in public meetings creating a plan that is universally acceptable to the community. This has continued during LPR19 consultation period.</p> <p>The only consultation has been WBC publishing a 10,000 page document and expect the public to digest this and respond. WBC would have prepared public meetings, with summary plans, displays and community engagement.</p> <p>I believe that WBC haven't taken this plan to the community as they know it is unsound and would not stand up to public scrutiny. WBC have done the bear minimum.</p> <p>Environment:</p> <p>West Berkshire has a vast and varied environment with an ANOB contained within. The proposal's within LPR 19 include a new town north east of Thatcham, right up to the ANOB and this will have a negative impact on the local environment.</p> <p>The addition of 4000+ people, all wanting to enjoy the natural open spaces of Berkshire will have a negative impact on the local environment with increases use of the footpaths and woods. In the plan is a vague plan to have "country parks". These parks are difficult to create because of the contours of the land and will be to the developers advantage. Hence this plan is being led by the developer's environmental commitments.</p> <p>In SP 17 there is no evidence to ensure that this new town will have a neutral impact on the local environment, in fact it is clear that this new town will have a negative impact.</p> <p>Timing:</p> <p>WBC released LPR 18 consultation during Christmas 2020, at a time when the county was in lock down and this was not the best time to release LPR 19. WBC have always stated that they want to be a plan led authority, which is laudable, however they have not been a plan led authority in previous years. In December 2022 Michael Gove announced a major change to the volumes of housing that local authorities can build, yet WBC pushed forward with LPR 19.</p> <p>This reinforces my view that this plan is unsound and needs some serious rework to convert it into a sound and deliverable plan. It is my view that WBC should STOP this plan now and use the time to develop a sound plan during 2023 based on the new housing volumes.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>

<p>development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>Reason for objection:</p> <p>The plan is unsound, rushed, takes no account of the needs of the local population and has not been subject to sufficient consultation.</p> <p>Transport:</p> <p>The local plan includes a massive increase in the number of houses as part of the new town being proposed for the area. These houses will all have cars and will all need to drive out of Thatcham to places of employment including London, Reading and other areas. Opportunities are limited within Thatcham. WBC have suggested that this extra traffic would be funnelled towards the junction of the A4 and the A33. At times of the day is already at a standstill due to traffic volumes. Due to the rushed nature of the document the junction of the A4 and the A33 mentioned, this junction will funnel additional traffic towards upper Bucklebury and Cold ash. WBC in their own Strategic Environmental Assessment (SEA) state their objective to be to increase safety and reduce accidents, how can funneling large numbers of additional vehicles (including vehicles trying to avoid the A4), which have many roads without pavements be safer? This will also have the effect of local people being able to walk or cycle due to increased traffic, the complete opposite of objective 4 of WBC's SEA.</p> <p>Healthcare:</p> <p>Thousands of new houses will mean many thousands of people moving into the area, these people will all need access to healthcare. The planned development proposes a new primary healthcare facility, but with NO DETAIL of who will pay for the building and the development this will happen. At the moment it is difficult to obtain an appointment with a GP, unless there is a number of people to cope with the numbers of new residents its going to become almost impossible. This needs to be planned BEFORE the development that does not seem likely.</p> <p>Local dentists are also at, or near to capacity (The WBC endorsed Thatcham vision 2016 showed that 40% of Thatcham residents have a local dentist) The plan has no details of where the new residents of all these houses are expected to find a dentist. In my opinion the plan is unsound as it does not take into account the basic medical needs of the new population.</p> <p>Schools:</p> <p>My comments with regard to schools provision is broadly similar to those for healthcare. The local schools are already at capacity and the number of additional school places that will be provided by this development and at what point they will become available have not been planned for. All that has been suggested is a sum of money and no detail of whether this will be adequate to meet the needs before the families move in then they will either be forced to drive long distances to find an available school (adding to the traffic) or the already resident families will be forced to do the same. This cannot be regarded as sound planning.</p> <p>Environment:</p> <p>When protection of the environment is coming more to the forefront, the idea that building thousands of houses on the edge of the ANOB is totally unsound. With food prices increasing it is shocking that a local council will even consider a development of this scale. The estimated 4000+ extra residents will have easy access to the ANOB, the plan even states that there is the intention to build towards the ANOB. This cannot be sustainable and without doubt will have a negative impact on the local environment. There are no "country parks" there. The local plan (SP17) even concludes that this new town will have a negative impact. The mitigation of this by "country parks" is a joke, these are just areas where it is hard to build because of the shape of the land, it has nothing to do with either useable green spaces for the residents or to increase (or even maintain) biodiversity. This is just a box ticking exercise with no consideration for the environment.</p> <p>In conclusion this plan is unsound because WBC have not thought through the delivery of healthcare, dentists or schools and there is no consideration for local residents in terms of the increased traffic flow through the villages and no protection for the environment.</p> <p>Finally, in December 2022 Michael Gove announced a major change to the volumes of housing that local councils are required to provide. The plan has not taken this into account and has ploughed on regardless.</p> <p>The whole plan needs to be reconsidered putting the needs of local residents before the profits of the developers.</p>

1. Do you consider the Local Plan Review is legally compliant?	
* Yes	
* No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.	
* Yes	
* No	

<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>1 I am objecting to the plan as so much of it is seriously unsound and it would have a massively detrimental effect on the local area. The extra traffic, extra load on the health services and extra stress on bucklebury common are just a few of the things that will affect the locals.</p> <p>I would therefore urge refusal.</p> <p>1 The written ministerial statement by Michael Gove (6th December 2022) indicates that the housing numbers are not to be exceeded. The Inspectorate should no longer override sensible local decision-making, which is sensitive to and reflects local circumstances. The question of how many words is any of this development needed at all?</p> <p>1 The document talks about how the environment, both human and natural, will be improved or if not improved through the actions taken by the developers. The plan shows no evidence of any surveys to provide baseline conditions or indicators, nor does it explain exactly how the environment would be improved and what they would do to "mitigate" any destruction. This makes this important section of the plan unsound.</p> <p>1 Building a major Greenfield development in the north Wessex downs AONB will forever affect the enjoyment of the area for local communities. There will be a detrimental impact to legally protected wildlife known to be present on the site, not to mention the loss of use of existing areas such as Bucklebury common. This again shows that the plan is unsound in its analysis, reasoning and conclusions.</p> <p>1 I understand that before any development of this size is undertaken, there should be sufficient capacity in the sewerage system to handle the waste produced. I have seen no mention of analysis or funding for the expansion of the sewerage system to be completed before any building starts, surely that is another reason why the plan is unsound. With the current sewerage system no additional housing should be built.</p> <p>1 The plan is unsound where traffic considerations are concerned. There is no plan or funding for a bridge over the river. There are plans for exits from the estate onto a number of roads including Harts hill. This will produce a large increase in traffic on cold ash and Upper Bucklebury. There are comments in the plan that "modelling suggests" that all this will not cause any problems. It shows no modelling detail or results.</p> <p>1 There is no mention in the plan of building low energy, sustainable houses. Simply that the 2500 houses have been built. There is no indication as to exactly what the design of the housing would be Surely any council, in this current climate, should be required to make a massive change to the environment in the Thatcham area and as such, I feel that this makes the plan unsound in its analysis, reasoning and conclusions.</p> <p>1 The development is so far away from Thatcham station and Thatcham town centre that cars will be necessary. The plan does not mention a section on safe and sustainable transport and the strategic environmental assessment which accompanies the plan does not "promote and maximise opportunities for all forms of safe and sustainable transport". With probably 1500 extra cars the plan does not comply with the safe and sustainable transport objective. Another example of an unsound part of the plan.</p> <p>1 As a local resident for over 40 years, I feel that the building of 1500 houses so close to Upper Bucklebury will have a detrimental effect on the area detrimentally and forever for me, my household and anyone living in this very special area.</p>

	<p>1 There is no health impact assessment in accordance with guidelines from public health England, and no obvious surgeries. This makes the plan unsound and would also mean that none of the possible 1500 + residents would be available from the three local over-subscribed surgeries.</p> <p>1 The plan for secondary school provision is unsound with no timing or funding, no analysis of possible pupil numbers and location of any school.</p> <p>1 This is still essentially a plan for 2500 houses. The developers have simply reduced the headline numbers to make development the same. It would then be a comparatively easy matter to build the other 1000 houses in the future. There is no concession at all.</p> <p>I hope I have shown in the above examples that this unsound plan should be rejected. The West Berkshire housing requirement based on recent government figures of housing requirement and this will probably show that there is no need at all for this plan.</p>

Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	I object to the proposed development plans for North East Thatcham. The plan is flawed in so many ways, but a few of the most egregious features are: General Infrastructure. The plan for increased housing has been prioritised over the need to provide a supporting infrastructure for the population. The planning ethos appears to be, that if the houses are built, then the infrastructure will follow. Past experience shows this is not the case. Roads. The effect on roads in the surrounding villages and AONB due to numbers of vehicle movements will be an increase. The roads through the villages are already strained and dangerous for pedestrian and cycle traffic at peak times. The increase in traffic, which is inevitable, will be the cause of harm to pedestrians and cyclists. This danger to life includes primary aged children on the roads. Green Spaces. The token "green spaces" are an insult to communities that have chosen to make their lives in a rural area. They are no more than car parks. Also, the designation criteria do not appear comply with guidelines as set out in the National Planning Policy Framework.

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I would like to object to the proposal to build 1500-2500 homes in NE Thatcham. This plan is unsound for the following reasons:</p> <p>1. Increased Traffic on Harts Hill, in Bucklebury and Cold Ash</p> <p>Drivers will inevitably look for quicker and shorter routes avoiding congestion on main roads and this will lead them to the hamlets as well as Cold Ash. Indeed WBC predicts "some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury". Broad Lane, Burdens Heath and The Ridge are already busy during peak times. There are no pavements on the latter two roads, just a concrete walk along the edge of the road. The area around St Finians School is particularly dangerous with parents parking on the road and cars waiting to turn into the school. Broad Lane has chicanes which do slow down traffic but will cause major delays. This will mean drivers will look for alternative routes and will drive down Little Lane, Fanny's Lane and The Slade. These lanes are quiet lanes where horses, walkers and cyclists will be present. They are single lane with passing places. Increased traffic will have a direct impact on the environment, damage verges and generally detract from the aim of quiet lanes which is to provide a safe environment for cyclists.</p> <p>Harts Hill itself, where traffic will exit the site, is narrow and bendy. There are no pavements and two large vehicles can't pass. It's very dangerous and it's very likely that a serious accident will occur here. It's particularly dangerous for cyclists. It's impossible to pass a cyclist without going onto the other side of the road and there are so many bends in the road that it's not sufficient to do so safely.</p> <p>2. Damage to the Environment in an AONB</p> <p>The sheer volume of people living next to an AONB will inevitably lead to an increased footfall on Bucklebury Common. This will reduce the biodiversity of the ancient woods and heathlands. It will detrimentally affect the wildlife, such as ground nesting birds, Nightjars, Barn Owls, Adders and Slow Worms to name a few rare species. The planned 'Community Parks' in the new development are unspecific and appear not to have any substance. It seems unlikely that people living in this new development will have enough room to exercise, walk their dogs and enjoy the outdoors within the AONB.</p> <p>3. Lack of provision of doctors, dentists and schools West Berks has a duty to provide these and yet no provision has been made. GPs and dentists are already oversubscribed. Bucklebury school children will be unable to attend Kennet School which is the nearest school given to residents of the new estate which will be closer to Kennet.</p>

<p>Please give reasons for your answer</p>	<p>I am writing to object to the proposed housing development to the NE of Thatcham.</p> <p>The development is not sound.</p> <p>The loss of an area of Green Space on this scale would adversely effect an AONB. It would destroy the local environment. A variety of animals and plants depend.</p> <p>A significant increase in population (and therefore traffic) will have an adverse effect on the infrastructure of the area. The surrounding rural villages cannot cope with more traffic. It would have a detrimental impact on already badly maintained roads making them more dangerous.</p> <p>WBC need to revise their thinking on this matter in the light of a statement by Michael Gove at the end of 2022 that planning is ADVISORY not MANDATORY. Other potential development sites which would not have such a destructive effect on the environment should be under consideration.</p>

<p>Please give reasons for your answer</p>	<p>I am writing to express my objection to this development because of the following reasons Potential 2500+ more cars, increased air pollution, congestion on A4 and A340, rat runs through the local villages of Upper Bucklebury, Chapel Row, Bradfield, and congestion already at Thatcham station train barriers.</p> <p>The negative impact on local GP practices where it is already difficult to get appointments. Adding thousands of new houses will have a negative impact on the local population.</p> <p>The negative impact on the overstretched education system particularly secondary schools with schools already over capacity.</p> <p>The lack investigation into the Colthrop site where a bridge could be built moving a lot of houses away from the AONB.</p> <p>There would be no defined gap between Thatcham and Upper Bucklebury with Upper Bucklebury becoming a part of the built up area.</p> <p>The fragile eco system of the proposed area also needs to be protected and needs to be left as countryside to protect the area from the fight against climate change.</p> <p>The central government has removed the legal requirements for specific housing numbers to be met by councils, the good to understand why WBC is continuing to force through this huge development? What are the other external factors that are driving the council to build between 1,500 and 2,500 houses in this area where roads, public transport, GPs and schools are already crowded? The removal of the legal requirement makes it a great opportunity to pause and produce a properly put together, more sensible for this area</p>

<p>Please give reasons for your answer</p>	
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>Further to my e-mail of 5 February 2021, I am writing to object to the proposed development of up to 2500 houses as I am not satisfied with the Council's response to my objections and I am objecting to the plan as I find it unsound. My main reason for objection is the</p> <p><u>Removal of community boundary between Thatcham and Bucklebury</u></p> <p>The land north of Floral Way currently provides a strategic gap between Thatcham and Bucklebury. This proposal undermines the value of maintaining a strategic gap to separate communities by virtually eliminating it and would visually and socially break the link between the two villages.</p> <p>It is acknowledged that should the site be developed, there will be a reduction in the physical separation between Thatcham and Bucklebury. I do not believe the assurances that a landscape led development would, in reality, retain and protect the character of the individual settlements. It would be of lasting and irreversible detriment to the identity and community within which we live in because of its identity as a village community and the surrounding countryside.</p> <p><u>Traffic</u></p> <p>A development of the scale proposed would lead to a significant increase in traffic, which has not been adequately considered. It is an assumption that the bulk of traffic would use the A4, accessed via Floral Way; the A4 is already commonly over capacity and significant congestion which is harmful on the environment, and new residents would look to other routes. These routes are rural Parish villages, particularly for access to the A34 and M4, on rural single-carriageway roads with blind corners and not well-suited to coping with the additional volume of traffic:</p> <ul style="list-style-type: none"> • The increased traffic will negatively impact many surrounding villages including Upper Bucklebury, Cold Ash, and Bradfield • The current roads will not be sufficient to support this increased level of traffic • These roads already suffer with concerning levels of speeding (recent Parish Council SIPS deployment has confirmed the figures) and the proposal would exacerbate this issue further • The increased traffic will be a safety concern for local residents, particularly children whilst walking to and from school • The houses located on Harts Hill Road and Burdens Heath in Upper Bucklebury, and The Ridge in Cold Ash, will be impacted. Increased traffic along these roads will make it significantly more dangerous for pedestrians in these areas in particular • The increased volume of traffic will impact the quality of life for the residents of the villages mentioned through increased noise and air pollution <p>It is acknowledged that there will be delays at junctions and the highway network on the A4 corridor and adjoining links. The development, including some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. It was also noted that the transport models do show significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of up to 10 minutes to the 2036 Core Forecast (without development). It should be noted that Upper Bucklebury and Chapel Row already experience delays in flow when there is congestion on the A4.</p> <p>It has since become apparent there is a plan for an exit at the north of the site onto Harts Hill road which will significantly impact Cold Ash, Upper Bucklebury and Chapel Row. I do not believe the Council's Transport Assessment has properly considered the traffic and there is not enough evidence to show proper modelling has been undertaken to consider all of the potential impacts of the site onto Harts Hill road. I therefore do not have confidence the mitigation measures and improvements to the local transport networks.</p> <p>There is also not enough evidence to back up the Council's assertions that the plans will reduce accidents and improve the opportunities for walking, cycling and use of public transport.</p> <p><u>Inadequate Supporting Infrastructure for Scale of Development</u></p> <p>A development of the scale proposed would have significant knock-on impacts to local infrastructure, a number of which have been considered.</p> <ul style="list-style-type: none"> • The proposal does not consider the increase in healthcare services required to support +25% housing increase • The proposal does not consider the strain of a likely increased demand on Thatcham Train Station. Parking facilities are already insufficient to cope with current demand and there would need to be a significant increase in the provision to cope with increased demand • The road infrastructure in a number of common commuting directions from the development are not sufficient, in particular the A4. This has already been experienced at the rail level crossing when travelling south <p>The Council noted my concern regarding infrastructure and stated that a development which does not provide adequate infrastructure will not be supported.</p> <p>It is evident that the Council and the developers have neither arranged a relevant Health Impact Assessment, nor have they been having appropriately liaised with local health care agencies or providers. I therefore do not have confidence the increased demand has been properly assessed and this will place extreme pressure on our existing healthcare services.</p>

Since raising my initial objections, it has also become clear that there is no clearly defined plan within the Local Plan for education from nursery, early years, through infant to secondary education, which the Council is obliged to meet. This is our existing education provision.

AONB

The proposed development is adjoining the Bucklebury Common and AONB and it would have a long-lasting negative impact on the area. There would also be a significant detriment in the loss of the open aspect of the local neighbourhood and loss of the green space. The close proximity of the development to the Bucklebury Common and AONB will have an impact directly and indirectly on visitors:

- The Common is protected because of its flora, fauna and situation and its special habitats are home to rare and ancient woodlands. I doubt that such a close, high-density development, will have a negative impact on this area and wildlife
- The plants in and bounding the AONB would suffer and the Common would be put under pressure from additional traffic
- The AONB is already suffering habitat damage from walkers, cyclists and motorised vehicles and the additional damage to this struggling environment
- The area already suffers from significant waste issues, that needs the support of local village volunteers to remove the waste on days to keep under control

There is no evidence to support the claims that SP17 will have a positive effect on the environment. The Local Plan Sustainability Charter to establish how policy requirements will be achieved and that the Charter will be informed by other policies on ecology. It is unclear that these strategy documents exist or, if they do, they have not been made available for public consultation.

SP17 has no clearly defined plan for providing adequate green space and protecting biodiversity. As stated previously, the plan would increase the numbers to the AONB and the Common and this will exacerbate the damage to this struggling environment. In fact, the plan has the intent for SP17 to drive additional traffic (people and cars) into the AONB. However, the management vision for Bucklebury Common is focussed on not increasing the human pressure on the habitat they are working to conserve.

There is not enough evidence to suggest the Council has made serious attempts to investigate, analyse and systemically assess the sustainability consequences that such a large, concentrated development site would bring. It would be of lasting and significant impact on the Common with devastating effects on the flora, fauna and wildlife in these areas which is something we as a family value. One of the main reasons for choosing this area to live in.

Pollution

The proposed development would generate pollution in the form of extraneous light which would drive local wildlife out of the area and also affect local Bucklebury residents by spoiling their night sky. Furthermore, the scale of the proposed development would increase pollution from carbon emissions and those associated with increased population density.

Whilst the Council has highlighted various policies that are intended to address concerns relating to pollution, it goes without saying that there will inevitably be a detrimental effect on residents. For example, it has been acknowledged that traffic flow and congestion on the roads will lead to increased pollution from carbon emissions at a time when the public at large is being urged to reduce its carbon footprint.

Additional Point

The Council should await the outcome of the National Planning Policy Framework consultation that closes on 2 March 2023. The emphasis in the consultation on considering the character of an area when assessing how much housing can be accommodated is pertinent in this case. The Council should pause the current plan on the basis that a lower housing requirement could be adopted for the area currently being planned for and produce a revised plan in line with the updated planning guidance when this comes out.

1. Do you consider the Local Plan Review is legally compliant? * Yes	

* No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>With reference to the above, I am writing to strongly object to the proposed development as I find it fundamentally un</p> <p>On 6.12.22, Michael Gove (Secretary of State for Levelling Up, Housing and Communities) released a Written Ministerial Statement on the Standard Method for calculating the housing requirement for a local authority (and which has been used by West Berkshire Council as part of the plan), should now be an advisory starting point and not mandatory. The resulting ongoing consultation has a far greater opportunity to pause the plan making to await the outcome of the consultation with its updated planning guidance.</p> <p>The land north of Floral Way has maintained the gap between Thatcham and Bucklebury thus ensuring a rural environment for the benefit of overall wellbeing. The proposal all but eliminates the separation and will visually and socially break natural communities and well established planning norms which have been consistently applied in the recent past. It is incomprehensible that</p> <p>The proposed development abuts Bucklebury Common and the North Wessex Downs AONB. This development will have a significant impact on these special environs. Bucklebury Common is protected because of its flora, fauna and its situation. It contains numerous habitats that are known to be home to legally protected wildlife. The plants in and bounding the AONB will suffer and be under pressure from additional visitors. The AONB is already witnessing habitat damage from walkers, cyclists and motorists and this will inevitably increase with the proposed development adjacent to it.</p> <p>There is no evidence in the background documentation provided by West Berkshire Council to support claims that the development will benefit the environment. In fact, it is much more likely that it will have a significantly negative impact. The plan's own Sustainability Statement will have a negative impact on environmental sustainability - 'The site is a greenfield site and therefore, would result in a loss of environmental sustainability which would be mitigated.' Nowhere in the plan is any detail given on what those mitigation measures would</p>

	<p>to undefined 'community parks'. In addition, the plan states its intent to provide a green infrastructure network to 'take to 'facilitate connection to the AONB', which will inevitably lead to increasing human pressure on the fragile ecosystem.</p> <p>In addition, the proposed development on a sloping site with associated runoff from concrete and tarmacadamed paving contribute to a greater risk of potential future flooding events along the river valley (A4/Bath Road and Thatcham).</p> <p>Overall, the focus of the SP17 policy is to build as many houses as possible in a small area of the countryside, with investigate, analyse and systematically address any potential consequences.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
Please give reasons for your answer	
4. Proposed Changes	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	
5. Independent Examination

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
Please give reasons for your answer	<p>I have limited knowledge of planning laws, and the huge amount of information available on LPR Regulation 19 is compelling arguments promoting the benefits of this development unsound. I am lodging my objection on the grounds of the impact on me, my children, my community and the local environment.</p> <p>AONB and the destruction of wildlife</p> <p>This development would be a massive over-development of the countryside and would destroy the beauty of the area for dog-walkers, quadbike/scrambler riders, dog fouling and litter. The increase in cars driving and parking on the Commons would have a huge detrimental effect on the area...not to mention the destruction of the wildlife.</p> <p>Contrary to WBC claims in Regulation 19, there is every reason to believe that this development will have a significant impact on the environment.</p> <p>Traffic</p> <p>This will have a significant impact on traffic in the area, especially on the routes in and around Thatcham and over the top of the hills, increasing the traffic through all of the surrounding villages of Upper Bucklebury, Cold Ash, Chapel Row, Bradfield Southend etc.</p> <p>With the plan to have an exit at the north of the development site onto Harts Hill Road and a roundabout on Harts Hill Road, the risk of accidents on an already dangerous road and also lead to congestion on the A4. I'm also not sure what the new road is for?</p> <p>WBC say that there is likely to be a positive impact on road safety (as safe travel will be critical to the design of the site) but in this case, this can be the case.</p> <p>Medical Practices</p>

	<p>Although there are proposals for a new GP Surgery, a development of this size should have a Health Impact Assessment. The development's design has considered the impact on the health and well-being of existing and new communities. done.</p> <p>Also, it doesn't appear that WBC/developers can convincingly evidence that they've liaised with the local health care and can cope with the extra burden of these new houses.</p> <p>Schooling: There doesn't appear to be a clear detailed plan for the provision of nursery or early years education. For secondary education, Kennet School is already oversubscribed. If the development goes ahead, children from the area will be limited in getting into Kennet School. Children from Upper Bucklebury will be limited to going to the Downs.</p> <p>Although the LPR provides for a new secondary school being built, it's not clear where it will be located, or the number of places. It's not clear if the proposed funding is sufficient to meet this cost or the timing of this funding.</p> <p>General While I understand the need for more housing, WBC and the developers appear to want to build as many houses as possible. I am concerned of the consequences that a development of this scale will have on the health and education services, traffic and environment area.</p>

Please give reasons for your answer	<p>Executive Summary</p> <p>Cold Ash Parish Council (CAPC) has made the following submissions in response to the West Berkshire Council (WBC) Regulation 19 (Reg 19) Consultation. The representations build on CAPC's objections to the regulation 18 *reg 18) version of Local Plan Review contains numerous significant flaws that cannot be fixed before the document is adopted.</p> <p>We specifically address the proposed THAT20 development for North East Thatcham, initially for 2500 homes and land on CAPC and our residents. We expressed our opposition to this development in 2021, arguing that the proposed number of homes was significantly reduced, and that the infrastructure to support any such development needed to be significantly improved. If this point is adequately addressed in LPR Reg 19, we have the same principal objections but build on them here.</p> <p>The proposed THA20 development appears to have been chosen in response to the constraints of potential development of a balanced review of options. Concerns have been raised about the lack of consideration for necessary infrastructure surrounding villages and transportation networks. Furthermore, the impact on Cold Ash Parish's quality of life and community is a serious concern. Cold Ash Parish Council strongly urges West Berkshire Council to reconsider and scale back the development. If the development is approved, there are serious concerns about its long-term viability and impact on Cold Ash Parish.</p>

This submission includes specially commissioned report data outlining the key reasons why we believe THAT20's traffic impacts have not been correctly considered and therefore flawed. It also emphasises previously argued objection points, but with new and different positions.

Given these flaws, our previous objections, the additional points in this submission, and the strength of feeling locally about the proposed development of THAT20, we conclude that the Local Plan Review and its accompanying evidence base should be either withdrawn, reworked and / or significantly reduced in housing numbers.

Cold Ash Parish Regulation 18 Feedback 2021

CAPC provided a formal response to WBC Reg18 Local Plan consultation dated 4th February 2021. A full copy of the response is available at the following URL address:

<https://coldashpc.org.uk/the-council/planning/west-berkshire-local-plan-review-to-2037/>

In summary our CAPC response highlighted the following key areas of comment and objection to the proposed LP:

- The proposed THA20 development is in response to constraints placed on potential development areas, such as flood zones, AONB, and other restrictions in AWE and flood zones.
- Development has been chosen in response to limiting development in the AONB, without regard for necessary infrastructure improvements surrounding villages and transportation networks.
- To address transportation and travel issues, significant infrastructure improvements and mitigation would be required.
- Quality of life issues will need to be addressed in this large-scale development. Historically, similar developments have resulted in isolation and quality of life.
- The impact on Cold Ash Parish could result in the loss of iconic views, increased traffic, noise, pollution, and strain on local services.
- Parish Council urges WBC to scale back strategic development and more evenly distribute housing.
- Serious concerns about the development's long-term viability if its size is not reduced.
- Current traffic through the parish is already high, and WBC traffic model growth is expected to have a significant impact.
- Concerns about long-term mitigation without destroying the character of settlements, as well as firm evidence, that the development will not be delivered.
- A limited road network with only 22% having pavements, and residents who are subjected to noise and air pollution.
- Concerns that promised facilities in the policy may not be delivered, and request for policy wording change from "will be delivered" to "will be delivered".

Extraordinary West Berks Council Meeting concerning Reg 19 Local Plan

CAPC agrees with and supports the WBC councillors' proposals for consideration at the extraordinary meeting of WBC on 12th February 2022. CAPC agrees that the following omissions and ambiguities clearly necessitates that the Council should undertake a new Regulation 19 Consultation in the future once these issues have been rectified.

<https://decisionmaking.westberks.gov.uk/ielistDocuments.aspx?Cld=116&Mld=7300&Ver=4>

- The housing numbers for northeast Thatcham were stated to the Council as a reduction from 2500 dwellings to 1500. The Consultation only envisaged 1250 dwellings to be built, which has now increased to 1500. The number of homes should therefore be increased to the original 2500 when the Plan is reviewed after 5 years or in the next plan period.
- The update of the Housing and Economic Land Availability Assessment (HELAA) includes a large number of sites that have been rejected. Councillors could not have been aware of this when they approved the Plan.
- The Air Quality Assessment is based on the Local Plan Review (LPR) running to 2037, not 2039, which affects the end of the LPR period and the resultant traffic pollution.
- The Council has not complied with its legal duty to cooperate with Berkshire West Clinical Commissioning Group for the surgery promised for northeast Thatcham.
- The Council has not consulted properly with Thames Water over the time needed for provision of water and foul services. We do not know if the houses for northeast Thatcham are deliverable in SP17 in the plan period.
- The Settlement Boundary background paper shows the Thatcham settlement boundary already extended to the east of the village, yet the plan now refers to a minimum of 1500 houses. This could be read that 2500 dwellings are still within the extended boundary.
- The new provision for secondary schools in northeast Thatcham is not consistent with Council guidelines for the number of schools.
- The Infrastructure Delivery Plan (IDP) has omitted any costs for a new secondary school in northeast Thatcham.
- The Secretary of State's Written Statement of 6th December 2022 should be taken into account by the Council to maintain a 5-year housing supply for Local Authorities with up-to-date Local Plans, removed top-down housing targets, and transition period for LAs in the final stages of preparing Local Plans.

The following sections detail current feedback, data and the points of objection raised by CAPC within the LP specific to Cold Ash by the Proposed THAT20 development.

Traffic & Transportation

Key Traffic & Transportation Objections to THAT20 (SP17) in the Local Plan

Following a thorough examination of the transportation evidence base (See Appendix A Study conducted by SW Traffic Modelling Ltd, 2023), serious concerns have been raised about the dependability of the modelling outputs. The WBSTM is a broad-area model used to guide strategic decisions about the district's future growth, with a focus on key traffic corridors. According to the evidence, there are serious concerns about the model's ability to accurately forecast impacts at the local level, including within Cold Ash parish.

- Despite the widely varying levels of growth and variable mitigation assumptions built into each test, there are very high predicted traffic flows for each of the model scenarios, as noted in Section 3 of our study. A key finding from the modelling is that the model is expected to result in traffic flow reductions in many areas of Cold Ash parish, with only minor increases elsewhere. Given the proximity in the Local Plan and the proximity of the THA20 site, this appears to be a highly improbable conclusion, casting doubt on the model's ability to accurately forecast impacts at the local level. The most recent Local Plan Forecasting Report recognises that modelling is an iterative and ongoing process. Further work is needed to fully understand and improve the model's functionality in the Cold Ash area, as well as possibly in other areas.
- THA20 consideration includes bespoke trip generation rates that are significantly lower than the default trip rates. The principle of using bespoke rates is not unreasonable, the methodology used in this case, as described in Section 2.4.2, underestimates the likely trip generation. In addition, additional trip discounts have been applied to account for public transport and cycling modes of transportation. Although it is a minor change, the predicted reduction is based on unsubstantiated aspirational mitigation measures that may not be implemented.
- Furthermore, as mentioned in paragraph 2.4.2 of our study, the traffic modelling currently does not include the impact of the proposed development on the District Council's target of 5,510. There is a 759-unit housing shortage. According to the Local Plan, the target is required to meet the District Council's target of 5,510. There is a 759-unit housing shortage. According to the Local Plan, the target is required to meet the District Council's target of 5,510.

portion of this shortfall (325 dwellings) may need to be provided on Cold Ash sites CA12, CA16, and CA17. This has a significant impact on the parish's road network, but it is not currently accounted for in the modelling.

Given the above, it is believed that the WBSTM outputs do not accurately reflect the changes in traffic flows that are expected and their significant impact on the parish. Thus, we conclude that the current evidence base does not provide a solid basis for the traffic impacts of Local Plan growth.

Please see Appendix A for the Full detailed Traffic assessment study of the Transport Evidence Base contained in the conclusions. <see attachment>

Spatial Issues

We object to the THAT20 proposed development on the grounds that it would significantly impact spatial and coalescence of the emerging Neighbourhood Development Plan (NDP). We believe that a scaled down solution or further work is needed to be addressed properly.

Why? We state in our emerging NDP CAP 1 Policy (Reg14 underway) that Development shall 'preserve or enhance the rural character of the area, including the setting of the North Wessex Downs AONB' In addition 'Such development must not individually or collectively result in the loss of or visual coalescence and loss of separate identity of the individual settlements in the parish (Cold Ash or Ashmole) and from each other'

We have significant concerns that such a large development would run against these policies and eventually not allow the parish to remain rural. For other local parishes these spatial policies would also be broken completely.

The strategic gap between Bucklebury and Thatcham is an extremely important one. Bucklebury is a rural parish with a rural setting. Thatcham is an urban town. Floral Way is the important boundary between them, and it should not be breached, otherwise the rural setting will be lost. The Bucklebury Vision states that local residents highly value the rural nature of the area in which they live and which they wish to pass on to future generations to enjoy.

All policies point to the requirement that these settlements should be distinctly separate and maintain their own defined rural setting. The requirement for separate settlements is made even more important if the remote nature of the AONB is to be protected in accordance with the NDP.

Unfortunately, the development at North East Thatcham would destroy this important feeling of separateness, with the housing estate with the rural setting of Upper Bucklebury. Although there is a "country park" strip between them, this is ineffective in maintaining the gap between the settlements. As Upper Bucklebury is lost into Thatcham, so too is the rural setting.

Further we believe that the development would put significant pressure on our proposed 'buffer zones' to maintain our parish separation.

The rural 'buffer zone', which has been identified by the community as the areas where development would most likely be avoided, is the character of the villages. Hence development should be avoided in this buffer zone, but any development that significantly reduces the green space buffers between any of the settlements will not be supported by policy CAP1.

We state in our emerging NDP (CAP 1.3) that '*In determining development proposals substantial weight will be given to the need to protect brownfield land within the settlement boundaries for either homes and/or other identified needs, or to support appropriate employment, provided that the land is not despoiled, degraded, derelict, contaminated or unstable land.*'

We feel that this has not been adequately considered in the LP and additional work is required to explore the potential of brownfield sites. CPRE (The Countryside Charity) Berkshire is encouraging members to take part in a public consultation on West Berkshire housing distribution. The organisation is advocating for a review of the current situation of brownfield sites rather than sacrificing countryside or overburdening local villages with development. According to CPRE, there are brownfield sites in Berkshire that could accommodate over 21,000 houses, with West Berkshire alone having 53 such sites. CAPC supports this view as stated in our Cap 1.3.

Education

The education plan presented in the Local Plan Review is inadequate and requires additional work before it can be considered coherent, is contradictory and incomplete, and fails to meet West Berkshire Council's obligation to provide education for all children.

The provision for education in the Local Plan Review is not clearly defined, with no end-to-end plan presented. As a result, the obligation to provide educational facilities for children is breached, rendering the plan for a large new housing development unworkable.

The lack of effective or justified education provision across the various proposed developments makes estimating the impact of the development on education impossible. The placement of a secondary school in the North East Thatcham development under policy SP17 would result in increased traffic throughout the Thatcham area, which has not been adequately considered in the LPR's traffic plans and modelling.

Furthermore, the provision for primary school education is ambiguous and contradictory, with no data or evidence on the impact of the development on 'primary school entry' requirements. While the LPR proposes that £12 million will be sourced from the SP17 developers to fund primary school education, no recent data to assess whether this funding would be sufficient to deliver the required education provision.

Secondary Education Concerns:

- Policy SP17 in the Regulation 18 emerging draft Local Plan (2020) stated the expectation of a new 8FE secondary school
- Policy SP17 of the Regulation 19 consultation reduced the provision to only land for secondary provision
- Thatcham Strategic Growth Study indicates that planned strategic development at a 6-8FE secondary level is not viable
- The provision of land sufficient for a 2.5FE Secondary School is below the minimum viable size for a Secondary School
- West Berkshire Council School Places Plan 2010 states that a 6FE secondary school will be considered as a minimum for new housing developments
- Department for Education's 'A guide to new mainstream free school revenue funding 2022 to 2023 (June 2022)' states that a secondary school should have a minimum of 4 forms of entry of 30 pupils (total of 120)
- Provision in SP17 for "Secondary provision - Land to meet the impact of the development" is inconsistent with the current policy for secondary education and would not receive funding from Government
- Kennet School and Trinity School are currently at full capacity, and there is no capacity in these schools to serve the needs of the pupils of the proposed development
- The Infrastructure Delivery Plan of January 2023 only has a figure of £5,027,613, which cannot be the cost of a secondary school. The policy is silent on how the building costs for a secondary school would be funded.

The situation for Bucklebury and Cold Ash secondary school students is unclear, with no details on the location of the secondary school, the provision of education, and thus no way of assessing its suitability, deliverability, or achievability. With a 40% reduction in the LPR (2022 to 2039) to 1500 houses, a secondary school simply cannot be sustainable or deliverable in this location, as stated in the Strategic Growth Study.

	<p>Furthermore, the Thatcham Growth Study noted that the education provision was based on WBDC data on pupil yield and the use of 11-year-old data insufficient. Although the LPR now states that land will be provided for development, the remains unsound for the following reasons:</p> <ul style="list-style-type: none"> • There is no convincing evidence of the number of students the school will serve. • It is unclear where a school would be located within the proposed development. • The number of Form Entries is not specified, but anything less than a 6FE school is considered unsustainable. • There is no evidence that the proposed funding is sufficient to meet the Council's obligations to provide education and that the responsibilities for funding are unclear and have not been adequately costed in the viability appraisals. <p>West Berkshire Council is required to make arrangements for adequate school provision, but the LPR does not define what will be met across all school years. As a result, it is clear that the education plan presented in the Local Plan Review cannot be fully considered, and the inspector should reject it in its current form.</p> <p>Healthcare</p> <p>CAPC is concerned about the provision for Healthcare in the LP and its potential knock on to that provided to existing facilities. The proposed GP surgery should have been evaluated for viability as part of Policy SP17's Sustainability Appraisal. The sustainability issue in the Sustainability Appraisal, but the single sentence in Appendix 5 is insufficient and appears to not take into account the specific proposals in Policy SP17. As a result, the Sustainability Appraisal is not legally compliant.</p> <p>Given the expanding range of NHS healthcare services provided through primary care, we are concerned about the impact of the metre GP Surgery in North East Thatcham under Policy SP17. We also question the lack of any discussions between the healthcare groups about the size and impact of the proposed surgery, and propose that a Health Impact Assessment be carried out on the facility's size in the draft Local Plan to avoid potential risks.</p> <p>For Appendix A see attachment.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	No Health Impact Assesment was available
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	<ul style="list-style-type: none"> • Burdwood surgery is currently full and could not take on the development patients as it stands • Appropriate additional health care provision must be present in the proposal for it to proceed • Burdwood Surgery could relocate in a new facility in the development • Burdwood Surgery proposal encompasses a thirty year health care planning horizon

	<p>Burdwood Surgery is one of the three local General Practice providers affected by the planned development of 1,500 Thatcham planning consultation.</p> <p>Burdwood Surgery is a three partner PMS primary care practice serving a population of 10,250 patients in the locality of good and a Patient Survey satisfaction level of 92%. The surgery is currently operating at 91% room occupancy with utilisation of 80% which is already limiting the ability to bring in new staff to create new patient capacity. The surgery has since its original build and now fully occupies its footprint. Surgery additional patient facing resources and services a space.</p> <p>The Burdwood site limits the integrated health and social care working potential of the Surgery for its population. The ageing population and the NHS policy shift to more care being delivered through General Practice settings mean constraints at the practice, care capacity and care quality are likely to be under extreme pressure, even without population growth. To solve this is a new site on which to relocate Burdwood Surgery. We would not support a Burdwood satellite site on the new site as a satellite site is not economically feasible, nor in line with NHS best practice. The existing Burdwood team plus additional staff would relocate to the new facility. The existing facility would be sold and or exchanged for the new facility as part of the completion of the new site. A new site would facilitate space for an enlarged team which would fit with the policy direction for more preventative care. Over the last ten years Burdwood Surgery has had to move towards only housing it's directly employed staff; this is to ensure we then do not have the same access to the allied professionals for their wider care. The shortage of space has been prevented by remote working, including remote consultations, but this leads to sub optimal surgery resource deployment. Further expansion of remote working would not be in line with best medical practice and would also likely make Burdwood Surgery a target for pressure based on rates of consultation done 'in person'.</p> <p>We have considered alternative approaches that have been suggested to us, such as moving most of our non-clinical staff to a consultation space. We strongly disagree with this idea as we do not believe that our clinicians can function optimally without the relationships we have with our support team. We believe the high patient satisfaction we have, is in large part due to the existing facility.</p> <p>The new facility would be modelled on the existing ethos of the Burdwood Surgery namely, doctor led with an aim for a practice we would be happy for our own families to be treated at. Based on the above the new facility would be approximately 1200m2 potentially across two floors as this works successfully currently and the enhanced footprint would meet future demand. The consideration also encompasses current undelivered services not offered at the practice due to space constraints such as dependency, Citizen's Advice, mental health clinics, physiotherapy and group consultations. The new facility would be built to Kennet PCN. The new surgery would successfully model and conform to the integrated health care structure and direction of the Oxfordshire and West Berkshire Integrated Care Partnership Strategic Priorities December 2022. The facility would also be designed to meet Practice zero emissions goal protocols consistent with the North East Thatcham Development Plan.</p> <p>In short, at Burdwood Surgery, we believe we are already at or beyond our patient capacity (especially when considering the needs of our patient group as they age). The practice was designed for 7000 patients using the standards of around 40 years ago when the standards of what they are now. We do not have the ability to safely take on more patients from a new housing development or a new site, or a guarantee that the new people arriving would not come under our care. In our opinion, to not do either would be a patient safety and quality of care locally.</p> <p>Accordingly, Burdwood Surgery believes for the above reasons the plan to be unsound in relation to SP17, the development. Burdwood Surgery thus requests either an assurance that none of the residents from the new development will be in the Burdwood Surgery catchment area or a new surgery is provided of circa 1200 m2.</p>

<p>Please give reasons for your answer</p>	<p>I hereby wish to formally oppose West Berkshire council's plan to build 2500 houses in the proposed are of North Ea reasons:</p> <p>The increase in traffic will be quite considerable. This will in turn increase pollution and road safety also quite consid</p> <p>Bucklebury Parish council have commissioned a traffic study, undertaken by 'Yes Engineering'. From this study it app</p> <p>WBC are unreliable and not robust. No assessment has been made of the routes most likely to be affected by an inc</p> <p>the moment there is only 1 car in every household meaning that there will be an extra 2500 cars on the road. Consid</p> <p>road from the proposed site coming out on Harts Hill Road this will mean an enormous amount of extra traffic going thro</p> <p>and beyond I have lived in Upper Bucklebury for almost 20 years and in that time there has already been an great in</p> <p>This is of course with all the associated pollution not to mention safety issues!! I am aware that WBC are only menti</p> <p>are all aware that this will inevitably rise to the original number of 2500 houses!</p> <p>I understand that there will also be a car park built on Harts Hill Road as well as a new roundabout to allow traffic in</p> <p>development. This will add greatly to congestion on the already very busy A4 and roads coming off the A4. I am spec</p> <p>congestion that builds up because of inadequate measures taken with regards to railway crossing when trains pass</p> <p>I fail to see how WBC can claim that the increase in housing and therefore people will have a positive impact on roa</p> <p>talking about Harts Hill Road. I note that there are no modelling results for that so how did WBC come to this conclu</p> <p>Tying in with the increase of traffic is the consequential damage to the Common due to increase of footfall which will</p> <p>of national importance. A Greenfield development abutting an AONB where WBC has not given any up to date evidenc</p> <p>impact and overall biodiversity gain.</p> <p>The country park that is mentioned in the plan is to my mind nothing like the 3 small isolated areas inside the propose</p> <p>park has a meaningful environmental value which the 3 small areas in the plan most definitely cannot live up to!</p> <p>Then of course there is the increase of people in the area. These extra people will need to be looked after in terms o</p> <p>instance. This will place untold pressure on the already very stretched services that the existing GP, dental practises</p> <p>as schools are able to provide.</p> <p>I note that there is mention of a new primary healthcare facility to be built but there is no detail or insight onto the str</p> <p>does not appear to be fit for purpose health impact assessment in accordance with current guidelines from Public hea</p> <p>to be any mention of any discussions with health service providers with regards to impact on primary health care se</p> <p>that WBC should have done and if they have they should provide details of these discussions. I am sure that WBC is</p> <p>new GP practices are commissioned by NHS England even if they consider there to be a patient demand for health</p> <p>WBC seems hell bent on building as many houses as possible in a small area of countryside whilst making unsubsta</p> <p>the human and natural environment will be improved. There does not seem to be any evidence of any attempt to ana</p> <p>consequences of the plans WBC have put forward thereby failing to consider the impact this will have not only on the</p> <p>and natural, but also on the human and natural environment if the plans go ahead. I don't think it needs spelling out tha</p> <p>all round!!</p> <p>The overall thrust of the SP17 policy is clearly to build as many houses as possible in a small area of countryside, wh</p> <p>how the environment – human and natural – will be improved or, if not, mitigated. Despite all the money spent on co</p> <p>plans and justify the 'growth' requirement, there is no evidence of any serious attempt to investigate, analyse and systema</p> <p>Everything will be all right because their own unsubstantiated policies say it will be.</p> <p>I therefore am against the go ahead of the plans to build 2500 new homes on the proposed site. There are more suitab</p> <p>2500 houses do not have to be squeezed on a piece of land completely unsuitable for this.</p>

<p>Please give reasons for your answer</p>	<p>Being a Thatcham born resident, I wish to offer my opinion on the Local Plan and the associated Regulation 19 cons...</p> <p>There appears to be very little justification for the proposed devastation of the countryside to the north of Floral Way of Bucklebury. This is a beautiful area of our countryside, home to a vast amount of wildlife and enjoyed by many people using the footpaths through glorious open farmland.</p> <p>The plan describes building an extremely large number of new homes (1500 – 2500) on this beautiful landscape with no explanation of how this amount of people could live in and use the facilities in Thatcham or how the necessary infras...</p> <p>Thatcham has a population of around 26,000, living around a soulless former village, which has grown in excess of 100 years. The residents currently struggle to get a GP appointment, cannot easily get a prescription made and queue in traffic. The schools, particularly Kennet are at bursting point, the doctors surgeries are unable to cope with the number of patients and provision. There could be up to 3500 to 4000 new residents on the proposed site, many with children, cars, and in need of services and them and provide all essential services needed to live in the area.</p> <p>A proportion of the houses would be 'affordable', but what does that mean in reality? Social housing or the likely share of the houses by the developers.</p> <p>The plan suggests that a new secondary school would be built in the north to serve the new housing, but with no income or funding figure out of thin air. There is a similar projection for a new primary school. I recall when Dunstan Park estate was built there was space for a primary school, which subsequently was used for further housing.</p> <p>There is no area of level ground within the development site. Excavating an area for playing fields and sports facilities seems the only option, but where would the primary school go? Presumably on the same site? The pollution from the site is a threat to health of children or those using the area for recreation and sport.</p> <p>The creation of a new health centre for the use of the new households is not a decision of the local authority or the health authority, but part of a larger strategy to provide these services by the health authority. Where will they find doctors, dentists, nurses and staff to work in these settings when they can't appoint these staff now, due largely to cuts in the NHS?</p> <p>Such a large development would put strain on other local services, namely the ambulance and fire service, along with the police and its former Police Station several years ago. It is unlikely that Thatcham's current sewage works in Lower Way could cope. Can Thames Water cope with the additional water supply? There are housing sites in Thatcham, both in Lower Way and Hill putting even more burden on these essential services.</p> <p>Surely it would be better to offer plans to improve the current situation, both in the short and long term, for those living in this 'town'. Thatcham needs these things now, before even considering any further development. There is no competition for services by Newbury to those in Thatcham.</p>

	<p>The document states the “social infrastructure has not kept pace with housing growth”. This is true and I can see no the current decline taking place in Thatcham as businesses and shops close. For example, the bowling alley sits dead for young people to do, would it not be better to invest in their future rather than just bring far more young people to the town?</p> <p>The plan states “the growth has been accompanied by infrastructure growth in transport” but this is not seen in reality. The station with no facilities and two small car parks. It is not fit for purpose. After decades, the lack of a bridge at the level in the room’, causing delays and preventing traffic from moving easily to the south. There are buses, but these are few and far between. Thatcham is a town full of cars, yet the plan would bring thousands of additional vehicles to the overloaded road system. Bucklebury have become rat runs enabling traffic to get to schools and places of work on route to Reading. Hundreds of cars on the traffic levels to an amount that would damage the rural nature of the district, polluting the area of outstanding natural beauty. Yet the assessment says that policies are likely to have a positive impact on road safety as that safe travel will be encouraged. This could be achieved.</p> <p>In 3.1, there is mention of an exit from the north of the housing site onto Harts Hill Road, encouraging the traffic to use this route and without a pavement. Those using this route, cycling and walking to and from Bucklebury are encouraged to cross across fields for their safety. We need safe travel now.</p> <p>West Berkshire council predicts some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. I am aware that a number of properties in Harts Hill Road are unable to even drive onto the road from their homes, with the edge of a field to find a better exit with increased visibility. There appears to be no valid assessment relating to the impact of this on the greater area of West Berkshire.</p> <p>There is promise of a ‘community park’, whatever that may be, which is likely to have a detrimental impact on wildlife, and the loss of green fields.</p> <p>Improve what we have already and enhance the lives of the existing Thatcham residents instead of bringing new homes to the edge of the district. It is needed throughout the district, look at brown field sites, not the destruction of the green fields that people value.</p> <p>I find this plan totally unsound without any insight or forethought.</p>

Please give reasons for your answer

Please find below my objections to the Local Plan Review & North East Thatcham SP1 to the current consultation (Reg 19).

I believe that the Local Plan Review is fundamentally defective in providing the required evidence to back up the claims it makes as to the suitability and positive impacts of this development. Indeed, I am in no doubt that the unsound and vague nature of many of the positive reasoning are due to the lack of sufficient evidence having been found to date to do so once the development progresses. The Local Plan & this development as it stands has a highly negative impact on myself and others in existing local communities and users.

Additionally, given the recent announcement that housing numbers should now be a target and not mandatory and be sensitive to and reflect local constraints and concerns, the Local Plan should be updated through without sufficient impact assessment and missing the opportunity to gain this evidence and revise its plan with updated planning guidance and assessment on suitability of housing numbers.

Most notably:

1 Environment

- I have grave concerns on the environmental sustainability impact and foreseeable impact to the wildlife (including legally protected wildlife), local communities, Bucklebury Plateau Biodiversity Opportunity Area, the North West Common, myself as a dog walker in the Common, AONB and living on Long Grove (a key asset) due to the development to the Common).
- I have not found any strategy documents setting out how the biodiversity net gain target and impact on environmental sustainability will be achieved. In fact, the LP states that the net gain impact and provides no sound measures to mitigate this but states it will be achieved through measures that then they should already be available and documented in the LP. It also says that the development will have a positive sustainability impact without any evidence as to how this is achieved through measures. Assessments (especially for 1500 houses and also for 2500), questionable soundness of the environmental sustainability acknowledged. It does not come across as well thought out risk mitigation plans.
- There is no sound basis shown in this LPR as to how the community parks (is this a field, bench & swing set) and significant country parks at least implying wildlife may still frequent) will be sufficient green space for 2500 (with) given the development is significant reducing current greenfield area. The area and views will also be lost and horizon view and no longer a valley view from the top of the proposed development and only views of houses (current views of green space) which will have a negative impact on the sense of space, wellbeing derived from the area not to mention the poor impacted wildlife who will be displaced onto roads, losing nesting and hunting grounds. This will be reduced including of protected species.
- Traffic will also increase into the AONB which is a conflict with focus on limiting pressure on the fragile ecology.
- No evidence of consultation between WBC and Thames Water that water provision and waste drainage network capacity for the volume of housing proposed.

2 Traffic/transport

- There is no Modelling provided that shows that there will be no problems caused to local village roads and the volume of traffic, in particular coming via a newly entered exit on Harts Hill Road and car park, the obvious impact on schooling. The position that this will be limited is unsound as an exit here will principally lead to traffic going to Ash and Chapel Row on top of that already diverting from A4 to go this way too making a 'rat run' through villages.
- The increased traffic in villages will have a direct negative impact on those currently living there.

3 Housing volumes & Government directive

- The recent Secretary of State's statements concerning housing supply, targets and transition periods for the period to have been considered.
- The settlement boundary line for Thatcham shows the same line as for 2500 houses so does not align to the Developers and WBC plan to guarantee a country park larger to take up the space released and given the settlement boundary rather than maximum then it is obvious it is actually still 2500 dwellings which must be considered in the plan period.
- Additionally, the LPR Regulation 19 wording positions the LP as delivering a reduction from 2500 dwellings in the plan period (presumably to appear more positive) whilst in reality the reg 18 consultation envisaged 1250 dwellings. The studies are still based on 2500 so is actually increasing the provision for this LP period and maintaining the 2500. This is close to misrepresentation.
- There is still insufficient evidence of appropriate assessment with supporting evidence to back up rejection of the brownfield. The HELAA has been updated with additional rejected sites now at the end of the process rather than at the start of the process so allowing for adequate impact analyses.

4 Safety

	<ul style="list-style-type: none"> • There is no evidence that this development will provide a positive impact to Upper Bucklebury. It will negatively impact the area like myself. • Harts Hill Road and parts of current housing areas have no footpaths or cycle paths and hence the increased level of risk of accidents – no studies have been offered by WBC or the Developers to show this would have a significant positive impact purported in WBC assessment. A number of current public footpaths through the area through areas with dwellings and negatively impact the enjoyment and safety of local walkers, dog walkers and children. • Having an exit on Harts Hill Road will be risky to users of the road given the bending nature of the road and is not easily seen from distance. We see no evidence presented to show the contrary. • There will be an increased cost to us living on Long Grove as we pay to maintain the bridleway as the Council is used by cars alone and provides no modelling to alleviate our concerns that the obvious increased footfall in places where people who already come up from Thatcham area will not increase/deepen the pot-holes and thus our cost, frequent maintenance. • Additionally, there is no evidence submitted to counter the perceived increased risk to property and personal safety due to potential anti-social behaviour on Long Grove/Upper Bucklebury as people travel to and from the public house. This impacts the mental health of residents, many who are aged. Also, the impact on potential anti-social behaviour is increased due to the proposed car park. I see no supporting evidence that the policy and any future site design is likely to reduce the risk to safety – this, if at all feasible which is highly unlikely, would in any event require significant business case to justify when the time comes. <p>5 Education</p> <ul style="list-style-type: none"> • There is an inconsistency in the education level proposed between the primary school provision of 2.5 forms of entry and secondary school provision and to the WBC policy of 4 forms of entry, thus that proposed is not of minimum standard and is unsound. • It is not clear in the LPR that the provision to provide sports fields can be met, there is no evidence for funding for sports fields. The LPR assumes that the sports fields will also be playing fields then the provision of playing fields must be met. If fields are not provided or accessibility guaranteed. • Details are incomplete and contradictory and provide no guarantee that the proposed funding by Developers for the proposed schooling and, as there is no timing or site committed, that it will even be provided for the initial period. We know that the already stretched current facilities will not be over-subscribed impacting school age children living in Upper Bucklebury from Bucklebury will be disadvantaged in obtaining places at Kennet School if the policy of those living near the school. • No detailed modelling has been provided to calculate the demographics and potential future demand for schooling. The proposed schooling set out cannot be accurately assessed. <p>6 Health facilities – GP & dental</p> <ul style="list-style-type: none"> • There is no evidence of the required level of consultation and cooperation between WBC and Berkshire WSP with respect to the GP surgery size proposed. Detail is lacking on any multi agency/service provider discussions. Details of those having been taken place into account in planning the proposed facility, the timing, the sufficiency of the business case for existing practices to site branch facilities on the SP17 plan (or provide increased low income housing elsewhere), or that wellbeing and health of existing communities are not unacceptably impacted, and together with the Impact Assessment / modelling of thousands of increased patient numbers on GP and dental practices. • For existing communities, it is already difficult and lengthy waits to obtain face to face GP appointments particularly in winter. We have not been able to secure NHS dental care in the locality. • The LPR now runs to 2039 so all assessments must run to that period not to 2037. The air quality assessment period of coverage which will directly impact the traffic level forecasts and pollution calculations.

2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters	

<p>that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to register my objection to the proposed Thatcham NE development as I find the plan unsound. I am detailing below my reasons for my objection.</p> <p>Transport</p> <p>The amount of extra traffic generated by this huge development will have a disastrous effect on Upper Bucklebury of through the village is already used as a cut through and it has already been acknowledged traffic displacement will u It will also generate more traffic on the A4. It would appear a new car park is planned on Harts Hill but will surely add dangerous road.</p> <p>I understand the objective is to promote safe and sustainable transport but would question how this assessment has</p> <p>Healthcare</p> <p>It would appear no engagement has took place between the consortium and local health practices. The current prac The same applies to dental practices in Thatcham who are unable to provide care for the current population. I would Assessment has been carried out for the proposed development.</p> <p>Environment</p> <p>How can it be acceptable to build 1500 houses on what is a valuable green field site that will cause damage to legall that 4000 people will be concentrated on the development site. Their is no provision for adequate green space and thi areas such as Bucklebury common.</p> <p>This can only result on irreparable damage on fragile ecosystems</p> <p>Education</p> <p>There are no plans in the LPR for provision for Nursery or Early Years education</p> <p>The LPR is inconsistent on the provision of secondary schooling. It would seem a secondary school is not sustainab the number of houses. This will only put extreme pressure on the existing schools i.e Kennet and Downs.</p> <p>Finally has Thames Water been consulted to ensure that there is adequate provision for water and foul water drainag</p> <p>I am prepared to appear at the public enquiry if invited</p>

1. Do you consider the Local Plan Review is legally compliant?	
* Yes	
* No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.	
* Yes	
* No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.	
* Yes	
* No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by	

<p>the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I wish to strongly oppose the proposed north-east Thatcham housing development (SP17) on the basis that the plan reasons:</p> <p>1 <u>Timing of the Local Plan Review Consultation</u></p> <p>Following Michael Gove's statement on 6th December 2022, the consultation version of the National Policy Planning not mandatory. Updated guidance comes later this year and therefore many Local Authorities have chosen to pause housing level may be possible and so preserve our green fields. Why did WBC not choose this option? There would to do so.</p> <p>1 <u>Education</u></p> <p>There are no details for the provision of Nursery and Preschool education. There is no site proposed and no assessment. Primary school provision is based upon out-of-date costs and, importantly, does not specify when during the plan period to be built. There is no estimate of pupil numbers or the number or size of any schools.</p> <p>The Development Plan states that NE Thatcham development is not sufficient to fill and sustain a 6-8 FE secondary school out of date (2011). There is no detail of the land's location, so it is not possible to assess its suitability as an educational site. There is no indication that any of the schools would be built before the housing.</p> <p>The only flat land available for any school sports fields is directly beside the A4, as the development site is on a hillside. Locating any new outdoor child sports facility beside busy main roads because of pollution and traffic fumes. I can find no sports field provision.</p> <p>The NE Thatcham is likely to result in the Kennet School being oversubscribed. This may mean that children completing Year 6 at Kennet School will need to travel 9 miles to Downs School in Compton rather than 1-2 miles to the Kennet School.</p> <p>The arrangements made for nursery, preschool and primary and secondary schools are unsound.</p> <p>1 <u>Environment</u></p> <p>There is a real and obvious impact upon wildlife in ribbon development. Firstly, by destroying wildlife corridors provided between Bucklebury Common and the River Kennet. Secondly, by surrounding the various ancient woods, Harts Hill, Blacklands Woods and Ouzel Wood, the fauna will disappear as the green fields surrounding the woods disappear. In addition, on nearby Bucklebury Common and the North Wessex Downs Area of Outstanding Natural Beauty (AONB).</p> <p>I could find no evidence that SP17 will have a positive impact on the environment. There are no strategy documents to refer to. For information, I note that in a recent planning application to extend the completion date for gravel extraction at Hartley, an area of small ponds is being set aside that will increase biodiversity. This land is owned by the Wasing Estate who are planning to plant trees. Is this relevant to achieving biodiversity net gain? If so, why is it not mentioned within any plan documents? Why the lack of trees?</p> <p>I can find no record of individual plant or animal species in any of the WBC council and Stantec documentation. There are no records of the landscape, and records of the grading of agricultural farmland, hedgerows, and woodland. How is it possible not to conduct a wildlife survey of bats, badgers, dormice, great crested newts, or orchids? For example, there are at least six old farms in the area that have pipistrelle bats with implications for the construction of adjacent housing.</p> <p>1 <u>Healthcare</u></p> <p>The proposal for a healthcare facility within the NE Thatcham Development appears not to take account of local health needs. It is unrealistic or to have involved adequate liaison with healthcare providers and agencies in West Berkshire.</p> <p>There has been no published relevant Health Impact Assessment (HIA) demanded by Public Health England guidance. There has been no engagement between the NE Thatcham Development Consortium and the local GP surgeries whose practice areas are affected. This has been cursory.</p> <p>A new GP practice would not be permitted to be set up in Thatcham with current NHS England prioritisation guidance. A new practice for a modern-day GP surgery. The three existing GP practices would not establish a branch surgery because of the resource difficulties in administration, IT links, staff working across sites it would impact on their financial viability.</p> <p>Local pharmacies and dental practices are already struggling. The Lloyds pharmacy in the Kingsland Centre has reached capacity and staffing problems. 40% of Thatcham residents must travel outside the town for dental services. There is a shortfall for this shortfall. Local GP practices are at or beyond capacity – the Burdwood surgery had to close its doors to all patients in December as a force majeure because of unmanageable demand.</p> <p>There is no evidence that WBC or the developers have involved Berkshire West Integrated Care Partnership in offering services at the proposed development site, say 1,500 to 2,000 sq m that would involve the relocation of an existing practice.</p> <p>In summary, the 450 sq m site suggested is too small to be viable, and there seems to have been inadequate consultation so the proposal is unsound.</p> <p>1 <u>Transport</u></p> <p>The plan for an exit at the north of the site onto Harts Hill Road will have a significant impact on traffic load and road safety. Ash, Chapel Row and Bradfield Southend. Most cars have traffic SatNavs that will quickly redirect them away from a site each morning and evening. There is no allowance for traffic calming measures, pavements, or a change in speed limit. The road has frequent bends, ice patches in winter and witnesses multiple accidents, some fatal.</p>

	<p>The inclusion and siting of a car park on Harts Hill Road will result in yet more traffic as well as night-time anti-social behaviour. Because the whole NE Thatcham Development site is a ribbon development at a distance from Reading, Newbury and other nearby towns, it will be overwhelmingly by car. Public transport only accounts for an exceedingly small fraction of commuting to work and is further away than from most parts of Thatcham and the bicycle stand at Thatcham station is always underutilised.</p> <p>1 <u>Concerns about Process</u></p> <p>There have always been alternatives to the proposed NE Thatcham Development. For example, restricting the site to residential use (as recommended by the technicality by the Planning Inspector in 2015) and adding Henwick Park (acknowledged by WBC to have been overlooked in the current plan) and multiple village sites (there are 60 villages in West Berkshire, many of which have a village house, village shop, post office, bus service or church). I suspect that WBC have taken the easy option of agreeing to the proposed development.</p> <p>The Thatcham Strategic Growth Study was commissioned by WBC and contracted to David Lock Associates and Stantec. A Freedom of Information (FOI) request from a parishioner in 2021 established that £100,000 was, in turn, paid to WBC by the Development Corporation, A2Dominium, Donnington New Homes, and Ptarmigan. WBC acknowledged that they had not previously acknowledged this information. There is an obvious conflict of interest. I have since spoken to a Stantec professional who confirmed my suspicion that they had not previously acknowledged this information but only 'all things being equal', 'he who pays the piper'. How was the decision made to allow a back payment? Why is this information in the public domain?</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	I object to the WBC LPR Regulation 19 proposal as it is unsound and, on a number of levels, directly impacts me. Education - lack of relevant infrastructure for a 6FE facility The provision of any education infrastructure is either unclear or contradictory. There is no complete description of p to sixth form.. The plan is unsound. Where is there no research on the impact of traffic levels during term time? No definition for the structure of the Nursery education plan The detail on Primary schooling appears to have no basis on research, therefore how can any plan or budget be dev The development will adversely affect secondary school education choice in Bucklebury. Currently children can opt f there is oversubscription to a school those closest are given priority. This will effectively mean that Bucklebury pupils to The Downs.

My family have lived here since the 60's. I am concerned that our choice of secondary school will be severely constrained. The strain on schooling may have a negative impact on the QUALITY of education provision to my family and others.

The planning for provision of a secondary school appears to be a mess and is therefore unsound

There is no modelling on pupil numbers

The location for the school has not been identified

Any school with less than 6 Form Entries is NOT sustainable

Funding is not clear on whether or how the council's obligations can be met

The chronology of funding provision is not clear

West Berks Council is an Education authority and has a duty to make arrangements for suitable school provision. The requirement. The provision of sports fields by WBC and the proposed development has NOT been met. There has been no funding OR suitable locations.

Sportsfield Provision -

Where is the flat ground for the sports fields? The proposed development area is on the side of a ridge. How does this affect playing fields?

Where is the funding for the fields as the developer has retracted their offer on the secondary school?

Transport - Unsound modelling, planning and evaluation

The scale of the development will introduce a large number of new vehicles to the roads. The planned exit to the North will result in large quantities of vehicles onto small village roads. Where is the modelling on traffic impact? The impact on safety, pollution and noise is immense.

The Transport Assessment says at paragraph 3.26 : 'The access arrangements for the northern end of the NET site will be provided (with right turn lanes where appropriate) on both Floral Way and Harts Hill Road. Where is the modelling for this proposed access?

Why has a new car park been planned for Harts Hill? What is the rationale and who is it supposed to serve? Was there any consideration of carpooling behaviour?

The Sustainability Appraisal Objective 4 / Strategic Environmental Assessment includes the statement: "To promote all forms of safe and sustainable transport." The Council assessment is "The policy is likely to have a Positive Impact on transport." How can this be so when we know that there will be a large increase in traffic volume? What are the traffic calming policies?

Another Council Transport Assessment states: The policy is likely to have a significant impact on walking, cycling and public transport. The plan should be designed with these in mind. Looking at the plans I see little evidence to support the assessment. How is this to be achieved and attained? It looks like fine words, but once again no policy or planning.

Healthcare - no strategic planning or matching proposals to the plan therefore the plan is unsound on this matter

Healthcare in the area is already on its knees. I have long waits for hospital and GP appointments. For example blood tests. Adding 1500 dwellings to the area is almost beyond belief in terms of medical support. Where is the healthcare provision in the future?

There is no realistic chance of a new surgery being established in Thatcham, The proposed 450 sq m. surgery cannot be a standalone operation and too expensive to be a satellite office. Even the satellite office would be unable to cope with the planned development. The development appears to believe that existing surgeries can take the new patients. This is not a realistic engagement with health providers PRIOR to the plan being completed.

Dental Care planning is as poor as the general health items above.

Personal Note: One of my sons is at present UNABLE to register with a dentist. How can dentists deal with the proposed increase in population? Why has there been no dialogue with the local dental practices?

There will be a significant NEGATIVE impact on the environment. There is no evidence of serious investigation into the impact of the proposed development.

The proposal claims a positive impact on the environment. How can that be?

Massive pressure on the Bucklebury Plateau Biodiversity Opportunity Area through increased traffic and a 4000 increase in population.

A development crammed right up against the North Wessex Downs AONB is obviously going to have a damaging effect on the AONB. There will be a loss of major areas of adjoining open countryside. The North Wessex AONB was not envisaged as an island of green space.

Legally protected wildlife is known to be present on the site. Minor areas of grassland will not mitigate the impact of the development on the AONB for new residents.

The LPR's own Sustainability Appraisal accepts that SP17 will have a negative impact on environmental sustainability. The plan states by SP17, to have new routes into the AONB.

Water and sanitation

The Thames Water infrastructure is at its limit serving the existing community. Where is the planning to provide for the proposed increase in population?

	<p>Where is the modelling on water and sanitation usage and the impact on sewerage, river water quality and drinking</p> <p>Alternative development sites</p> <p>Where is the evidence that existing brownfield sites will not meet the requirements?</p> <p>In conclusion, the Regulation 19 Proposal has a massive lack of planning, clarity, funding and explanation and is the</p> <p>I am happy to become involved in the discussions on the proposal should the council wish to involve me.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
Please give reasons for your answer	<p>My name is <redacted>. I am a resident of Bucklebury Village and live within the Bucklebury Conservations area.</p> <p>I object to the Local Plan review proposal to build between 1500 and 2500 houses to the North East of Thatcham. W housing will be required in West Berkshire during the review period and beyond, I believe that there are elements of that will damage quality-of-life for both the current and future population of the area.</p> <p>I also believe that The Plan has a strong potential to do lasting damage to the rich natural environment that we enjoy to for future generations.</p> <p>The following objections reflect my perceptions of how the Plan will impact me as an individual and the wider commu</p> <p>Transport</p> <p>This large development of homes, many of which will have multiple car ownership, will significantly increase the num numbers of car journeys made each day.</p>

While it may be anticipated that the vast majority of additional journeys will be accommodated, though not without the main A4 road, The Plan will inevitably increase the volume of traffic on the network of (country) roads to the North and South of the area. These roads:

East West:

- Cold Ash to Chapel Row
- Hermitage to Chapel Row
- Bucklebury Village to Frilsham
- Chapel Row to Bradfield Southend
- Hermitage to Yattendon

North South, including but not limited to:

- Fanny's Lane
- Briff Lane
- Pease Hill and others

These roads and wider the network of lanes in the Pang valley are already under stress. Increased traffic volumes, in addition to the appearance of inadequate maintenance have created hazardous and unsightly highways.

The hazards include:

- Verge erosion that has extend the carriageway beyond the limit of the metalled surface which in turn has created dangerous conditions for cars can or may be forced to drive.
- Significant pot holes and ruts in the road surface. This creates a particular hazard for cyclists that chose to ride in the area.

The proposed development will increase traffic volumes, exacerbate the deterioration of the road system, increase the noise and reduce the aesthetic qualities of the AONB in which they are located

A previous Local Transport Plan (WBC 940, by Adams Hendry) indicates that the "Highways and Transport Environment" is responsible for delivering a sustainable transport system. Whether this goal is being met in the Pang Valley is questionable. The proposed development is almost certain to exacerbate problems with attainment.

Additional objections related to transport:

- Any increase in east bound traffic will lead to congestion and to an increase in the already, hazardous conditions which exist at the south east corner of the Englefield Estate
- The potential for increased congestion and pollution at the Thatcham railway crossing. Inevitably, this may increase the traffic at Brimpton and addition strain on routes to the A339 road to Basingstoke.
- The apparent nature and extent of the proposed development will make short car journeys a necessity to access schools and leisure activities. Again, more pollution and congestion.

Healthcare

I am registered at the <redacted> and have previously been registered at both the <redacted> and <redacted> practices. The <redacted> practice appear to be stretched and enquiries to a peer group suggests that this is also true of the Thatcham practice.

I am not clear how the measures in the proposed plan will deal with the Healthcare needs of the increased population and a GP practice falls considerably short of what I would consider to be a joined up solution for a community of this size.

Even on the basic offer in the Plan, the difficulty in creating a new GP practice appears to have been underestimated. The existing practices will be stressed further.

The same concerns exist in the context of dental care. I use private dental care because there appears to be a shortage of dentists. I'm told that new arrivals in the area have to travel further afield to receive dental care. There is little in the proposed plan to suggest that adequate provision will be made.

Education

At present, children in Bucklebury have options both at primary and secondary level. The proposed Plan does not mention that additional schools will be provided for an increased population and my fear is that existing schools will become unreasonably crowded for both parents and children. I object to either of these eventualities.

The Environment

I live in the AONB and within the boundary of the Bucklebury Conservation Area. I believe that both should serve an

- A near pristine amenity for the enjoyment and well-being of people in the area
- A means of protecting and maintaining diversity in flora and fauna
- A way of preserving and sustaining landscape and important rural activities.

I have no wish and there can be no mechanism to restrict access to these areas but a development of this scale, with a provision for leisure and social activity, on the edge of the protected area will inevitably lead to degradation and loss

The importance of Bucklebury Common should not be underestimated. The work that is being done to preserve its status is important and the siting of a development on the scale of that which is proposed is certain to impair and devalue it. A recent Conservation area notes potential harm to the public and natural realms. These include:

- Degradation of grass verges
- Degradation of the surface and the edges of the metalled road
- Damage to and shrinkage of the grassed/planted traffic island in the centre Bucklebury village.
- On street car parking.
- Loss of flora and fauna due to the attrition of specific species and attrition in the spaces in which flora and fauna can thrive
- Loss through unsustainable levels of footfall.

Bucklebury Village attracts and welcomes visitors that come:

- To appreciate the environment that is the Conservation Area and surrounding countryside.
- To access the junior football coaching that takes place on the playing field.
- To use the Victory Room which hosts clubs, classes and a other appropriate activities

These amenities are used in a manner and with a frequency that sustains their fabric and respects the needs of village

I believe that the proposed development, as specified, is light on support for social and physical activities and if that is the case on Bucklebury Village, on the Conservation area and on the surrounding countryside will be excessive and damaging

General Comment

Previous Structure Plans have spread necessary development across multiple locations. The approach appears to have

However, the development of what is effectively a new settlement without a centre, where the amenity is missing or inadequate (e.g. health, education, social and shopping) is a concerning prospect. One that will have a negative impact both on the current residents and on the new comers and one to which I object.

I am happy to discuss these comments in the context of this review should that be a requirement

<p>Please give reasons for your answer</p>	<p>I object to Policy SP 17 in this plan, the proposed North-East Thatcham Development, on the following grounds.</p> <p>EFFECT ON THE ENVIRONMENT</p> <p>I do not accept WBC's claim that there would be a "net biodiversity gain" and I believe the basis for that claim is unconvincing and lacks meaningful evidence. The small areas of "community park" and "greenway" proposed for the development's boundaries are not sufficient to offset the loss of deer and foxes, hares and badgers and owls. I have seen artificial creations like this beside housing estates and they do not support the same varieties of wildlife. It seems ridiculous even to suggest that building houses over an area of farmland and woodland will do anything to improve the range and varieties of wildlife in that area.</p> <p>EFFECT ON THE BUCKLEBURY COMMON AONB</p> <p>WBC has a legal obligation to "conserve and enhance" Areas of Outstanding Natural Beauty, but its SP17 Plan proposes to do so alongside a small AONB which local volunteers are struggling to maintain and restore following the impact of the crowds during the 2020 COVID lockdown. Even the responsible walkers and cyclists had an adverse effect, the increased numbers of people and ground-nesting birds and inevitably trampling on more plants. The irresponsible ones also trampled new paths, left behind dog excrement. The population of the proposed NE Thatcham Development would bring back all of the damage to the AONB, as a permanent thing. SP17 does not even acknowledge this inevitable and unpreventable consequence.</p> <p>The new population would clearly use the lanes across the Common as a "rat-run", adding to the large numbers already in the proposal's Transport Assessment, any assessment of the likely impact of this, or any plan to limit or prevent it, is already causing harm to the AONB's wildlife.</p> <p>So I think the SP17 proposal is unsound and contrary to WBC's legal obligations regarding AONBs.</p> <p>EFFECT ON HEALTHCARE</p> <p>The local surgeries are overloaded and struggling to cope with current patient numbers. If the SP17 development were to proceed, more would be needed but only a very small one is proposed and I can see no evidence or reassurance that the NHS could cope. This makes the proposal unsound.</p> <p>EFFECT ON ME</p> <p>I have a >personal details redacted<. I moved to Upper Bucklebury ten years ago, needing for genuine reasons of health and peace of mind of noise and building in the urban area in which I lived previously, but still remaining not too far away from my children and grandchildren. The peace and quiet of this village has helped my condition, being able to enjoy my garden and the calm of the surrounding countryside. I have a total of 46 different bird species in my garden, the most recent being a tawny owl who visits regularly. The quiet and peace when I am able to visit it.</p> <p>For the reasons given above, the creation of the SP17 development would clearly increase the numbers of vehicles, through the village, making it a busier and noisier place, while the increased numbers of pedestrians, cyclists, off-road motor vehicles and the Common would reduce the diversity and volume of its wildlife. I would find myself no longer living in the calm and peace that has benefitted me these past ten years and I would find less enjoyment in watching the wildlife in my garden, because the noise and traffic would be too much for me.</p> <p>My medical condition, coupled with my advancing years, means that I am also very worried over the impact that the development would have on healthcare services.</p> <p>I strongly believe that the North-East Thatcham Development plan, if permitted to proceed, would do great harm to the AONB and in its surrounding areas, while also diminishing the quality of life for many of the area's residents.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	

<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>I am lodging my objection to the LPR (Regulation 19) as I find the proposal to be unsound.</p> <p>I have no knowledge of planning laws, and the huge amount of information available on LPR Regulation 19 is completely overwhelming. I find many of WBCs arguments promoting the benefits of this development unsound. I am lodging my objection on the grounds that the development will have on me, my children, my community and the local environment.</p> <p>Traffic: This will have a significant impact on traffic in the area, especially on the routes in and around Thatcham and will increase the traffic through all of the surrounding villages of Upper Bucklebury, Cold Ash, Chapel Row, Bradfield South and Thatcham. With the plan to have an exit at the north of the development site onto Harts Hill Road and a roundabout on Harts Hill Road, this will lead to an increase of accidents on an already dangerous road and also lead to congestion on the A4. I'm also not sure what the new road is for?</p> <p>WBC say that there is likely to be a positive impact on road safety (as safe travel will be critical to the design of the site) but I think this can be the case.</p> <p>Schooling: There doesn't appear to be a clear detailed plan for the provision of nursery or early years education. For secondary education, Kennet School is already oversubscribed. If the development goes ahead, children from the development will be limited in getting into Kennet School. Children from Upper Bucklebury will be limited to going to the Downs.</p> <p>Although the LPR provides for a new secondary school being built, it's not clear where it will be located, or the number of places, or how clear if the proposed funding is sufficient to meet this cost or the timing of this funding.</p> <p>AONB and the destruction of wildlife: This development would be a massive over-development of the countryside in the area. There would be an increase in dog-walkers, quadbike/scrambler riders, dog fouling and litter. The increase in dog-walkers and dog fouling etc. would have a huge detrimental effect on the area...not to mention the destruction of wildlife.</p> <p>Contrary to WBC claims in Regulation 19, there is every reason to believe that this development will have a significant impact on the local environment.</p> <p>Medical Practices: Although there are proposals for a new GP Surgery, a development of this size should have a Health Impact Assessment carried out to assess how the development's design has considered the impact on the health and well-being of existing and future residents. It appears to have been done.</p> <p>Also, it doesn't appear that WBC/developers can convincingly evidence that they've liaised with the local health care providers to ensure they can cope with the extra burden of these new houses.</p>

	While I understand the need for more housing, WBC and the developers appear to want to build as many houses as possible of the consequences that a development of this scale will have on the health and education services, traffic and environment area.

<p>Please give reasons for your answer</p>	
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>Transport Massive increase of traffic on all our roads Roads already in a dreadful state of repair Increase in traffic through the villages especially Bucklebury, Cold Ash and Bradfield No pavements, street lighting Increased perils to pedestrians, cyclists and horse riders More wild life road kill - deer, muntjac, pheasant The Common Road from Upper Bucklebury to Chapel Row is particularly fast and The Avenue has had a large number of accidents Healthcare Local GP surgeries already overstretched. Where will the new ones be sited? I trust not using more greenfield sites A Hospital would need to be built as Reading and Basingstoke are overloaded. Where would that be sited? Dental Surgeries, again already full to the brim. No discussion with any of the above have been instigated Only 3 small pharmacies in Thatcham that cannot cope with demand now Promises have been made with previous developments that this would be addressed but nothing has ever been done Utilities After years of correspondence and complaints to Thames Water we have at last got a reliable Pumping Station so water comes out. However, this has brought on another problem of old and weak pipes resulting in numerous pipe bursts, supplies. Thames Water are overstretched allowing leakages to carry on for hours (sometimes days) and then just cover Elastoplast on the pipe which is never permanent. A development of this size would negate any benefit we have gained Sewerage Needs updating as the present stations are old and inefficient and will not cope with the development. Any leakage will pollution Environment The surrounding area has a wide, diverse and important range of flora and fauna which will be lost forever As the population grows we need more greenfield sites for farming to feed us, not taking them away What is the point of have protective status, i.e. SSSI's and AONB's, if they can be overruled and ignored when it suits</p>

	<p>The increased footprint over Bucklebury Common and the surrounding areas will damage the balance of wildlife. It will affect walkers and horse riders who need to avoid the now very dangerous, busy local roads</p> <p>Education Schools already oversubscribed so will need to build more. Where? Greenfield sites again? Promises have been made with previous developments that this would be addressed but nothing has ever been done. No research or plans have been made to fulfil the Council's duty to make arrangements for suitable school provision.</p> <p>Local Amenities Where will residents of the development shop? Thatcham only has 3 small supermarkets and the rest of the units are hair dressers Where will these people park? Leisure Facilities Very restricted and no plans to address this</p> <p>In conclusion this beautiful area where I have lived for over 60 years is gradually becoming a concrete jungle with no quality of life or nature. The countryside, flora and fauna are being eroded with thousands of houses and flats being built. Promises made to update this and upgrade that, build schools etc but NEVER have any of these promises been fulfilled. The area is being destroyed by increase of use especially with anti-social behaviour, motorbikes, 4-wheel vehicles who have already damaged the Common and people who have no idea of the Countryside Code, resulting in loss of livestock to farmers and damage to the land. It breaks my heart to see this lovely area destroyed and I take my life in my hands whilst walking or horse riding. I don't want these houses built.</p> <p>No one has made any attempt to address the problems of health and education and certainly have made no attempt to consider what this development will make on the area.</p> <p>There is also the statement in December by Michael Gove that the housing number should now be an advisory starting point. So, please will you listen to the voice of the people and reject this proposed development.</p>

Please give reasons for your answer	With reference to the above, I am writing to strongly object to the proposed development as I find it fundamentally un On 6.12.22, Michael Gove (Secretary of State for Levelling Up, Housing and Communities) released a Written Ministerial Statement on the Standard Method for calculating the housing requirement for a local authority (and which has been used by West Berkshire Council for the plan), should now be an advisory starting point and not mandatory. The resulting ongoing consultation has a f

	<p>an area when assessing how much housing can be accommodated. Unlike a number of other Local Authorities, West Berkshire Council has the opportunity to pause the plan making to await the outcome of the consultation with its updated planning guidance.</p> <p>The land north of Floral Way has maintained the gap between Thatcham and Bucklebury thus ensuring a rural environment and overall wellbeing. The proposal all but eliminates the separation and will visually and socially break natural communities and well established planning norms which have been consistently applied in the recent past. It is incomprehensible that this is the case.</p> <p>The proposed development abuts Bucklebury Common and the North Wessex Downs AONB. This development will have a negative impact on these special environs. Bucklebury Common is protected because of its flora, fauna and its situation. It contains rich habitats that are known to be home to legally protected wildlife. The plants in and bounding the AONB will suffer and be under pressure from additional visitors. The AONB is already witnessing habitat damage from walkers, cyclists and motorists and this will inevitably increase with the proposed development adjacent to it.</p> <p>There is no evidence in the background documentation provided by West Berkshire Council to support claims that the development will be in the environment. In fact, it is much more likely that it will have a significantly negative impact. The plan's own Sustainability Statement will have a negative impact on environmental sustainability - 'The site is a greenfield site and therefore, would result in a loss of sustainability which would be mitigated.' Nowhere in the plan is any detail given on what those mitigation measures would be or how they would be implemented to undefined 'community parks'. In addition, the plan states its intent to provide a green infrastructure network to 'take account of the AONB' to 'facilitate connection to the AONB', which will inevitably lead to increasing human pressure on the fragile ecosystem.</p> <p>In addition, the proposed development on a sloping site with associated runoff from concrete and tarmac paved areas will contribute to a greater risk of potential future flooding events along the river valley (A4/Bath Road and Thatcham).</p> <p>Overall, the focus of the SP17 policy is to build as many houses as possible in a small area of the countryside, with little regard to investigate, analyse and systematically address any potential consequences.</p>

Please give reasons for your answer	I strongly object to the Thatcham NE Development as currently proposed because it is unsound for many reasons, some of which are given below.

	<p>The scale of the proposed development is far too large and poorly thought through in terms of its negative impact on the rural environment, on protection of the Area of Outstanding Natural Beauty and the ecological value of that area, and traffic issues.</p> <p>APPEARANCE Blocky and visual in the extreme given the relief of the landscape. Utterly discordant. Not well thought through.</p> <p>PROTECTION OF THE AREA OF OUTSTANDING NATURAL BEAUTY AND ITS ECOLOGICAL VALUE The West Berkshire Council LPR states the intent of SP 17 is for more people to take advantage of the landscape. This is crass and misguided given the fragility of the ecosystems involved and the even before proposed further development. Mitigation by way of dedicated green areas, so called, is flimsy and casual. Not well thought through.</p> <p>HEALTHCARE There appears to be no evaluation and consideration of potential issues arising from the development proposals by the Development Consortium and local general medical practices. It makes no financial, organisational or geographic sense to set up branch surgeries. There is no detail available covering strategic healthcare planning. Not well thought through.</p> <p>EDUCATION The provision for primary and secondary education is not clearly defined in the Local Plan Review. This breaches the duty to provide education facilities. The proposed development exacerbates this inadequacy. Moreover there is no evidence that school funding is sufficient to provide education following any increase in pupil numbers. Not well thought through.</p> <p>TRAFFIC ISSUES The proposed development will see a greater volume of traffic using rural roads that were not designed with that in mind. It will transform roads currently given Quiet Lane Status, particularly so in the Upper Bucklebury area. It cannot be maintained that the proposed development will have a positive impact on road safety beyond the site perimeter. Where are the details for the north of the site onto Harts Hill? Not well thought through.</p>

Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.
 * Yes
 * No

Please give reasons for your answer

The following are all valid reasons for my objections.

Roads - negative impact via a massive increase in cars and car journeys from the proposed new development

There is a lack of modelling or plan for the traffic that will be generated from the development and pushed onto Harts Hill i.e. through Upper Bucklebury, Cold Ash, Chapel Row and Bradfield Southend. The route through Upper Bucklebury and the M4 (J12 & J13) and Reading. Improving a few junctions on the already busy A4 will not solve this. There will be a negative impact on the area. Negative impact on the environment.

Speeding is already a huge issue in our local villages, and particularly on the road that runs from Harts Hill through Southend to Common Hill. Nothing is shown in the plan help prevent this issue or help control the dangerous speeding. This is a Negative impact on local villages. Negative impact on environment due to an increase in the extra pollution from litter dumped out of car windows. I regularly carry out litter picking on the main roads through Upper Bucklebury and Southend. Negative impact on road safety, both for road users and pedestrians. There will also be a negative impact on many more road kills (foxes, Deirdre, squirrels, pheasants, et cetera et cetera).

The junction where Union Road meets Common Hill, and where Common Hill then meets the A340 can not cope with the extra road traffic. This will be made much worse by the extra road traffic if the new houses are built and this route via Reading and the M4. Negative impact on road users. Negative impact on environment.

The final stretch of Union road where it meets Common Hill is not suited for additional vehicles. It is already narrow and needs improvement. Negative impact on road users. Negative impact on road safety. Negative impact on environment.

There appears to be little concern for other environmental impacts additional cars will cause - eg traffic noise, increased air pollution, racing on the straight roads through the common for example. Negative impact on residents in local area. Negative impact on environment.

There appears to have been very little thought on how to provide public transport so that not using a car is a sensible option. Negative impact on environment, local population. Negative impact on the environment.

What is the car park on Harts Hill for if use of Harts Hill is going to be dissuaded? Negative impact on local population. Negative impact on road safety as cars use country roads rather than A4. Negative impact on environment.

I understand the SEA states the development will have a positive impact on walking, cycling and public transport. This is how. Really seems that someone is just dreaming up some of these so called positive impact statements without any substance. Significant improvement in public transport is needed to stop creation of driving "rat runs". Negative impact on local population. Negative impact on environment.

The roads around Thatcham station and the train barriers can hardly cope at present. The traffic queues are already long. There will be a marked increase in the pollution from road traffic on the cars are stopped at the barriers. There is insufficient capacity to cope with the increase in People using the trains. I don't believe the residents of the new development will be walking to the station. They will be using the cars to drive to the station and hunting for car park spaces.

Healthcare - negative impact

It is already hard to get timely GP appointment in this area of West Berks. Adding thousands of additional people to the area will make the situation worse. Relying on current GPs in Chappel Row and Thatcham and local villages will not work. It will also put more pressure on the A4 to get to proposed GP surgeries i.e. to Chapel Row. Negative impact on local population.

Proposal for GP surgery to be built isn't clear. Eg funding, finding suitable qualified medical team doesn't appear to have been considered. GPS, which surely would be the first step? Negative impact on local population.

How long would it take to get the surgery built, staffed with qualified medical people and running? Acknowledged it is a long time. GP surgery. Surely needs to be open before housing is completed. Negative impact on local population.

This new development will rely on GP surgeries with a high elderly demographic, with higher reliance on healthcare. This will have a hugely detrimental effect on current users. Negative impact on local population.

Environmental - negative impact

- obviously this development will have a huge detrimental impact on the local environment and ecology simply by paving over a large part of the countryside. Negative impact on environment, ecology, the aonb, local countryside, local native and protected species, climate change.

With the open land covered over by the new build, There will be less space for the rainwater to soak into the ground. This will lead to increased runoff downhill, and more water being drained towards the Kennett and Avon Canal.

- there will be significant protected species that will be negatively impacted regardless of measures put in place. Negative impact on local population.
 - no evidence presented that it will have a positive impact, as appears to be stated in the proposal.

To replace the existing countryside with man made country parks is an expensive way to fight nature. This appears to be a way to leave it as countryside. Negative impact on local environment and ecology.

- how will the country parks improve ecology and biodiversity? Negative impact on local ecology.
 - the development should make an ecological improvement to the area, this plan doesn't clearly show any benefit. Negative impact on local environment and environment.

- a development of this size on a greenfield site will have a negative impact on national efforts to prevent climate change and against climate change.

	<p>- a development of this size on a greenfield site will have a negative impact on local efforts to prevent climate change climate change.</p> <p>Education - negative impact The local schools are already over subscribed. There is also a lack of suitable well qualified new teaching staff. Neg population.</p> <p>Legal requirement - Inconsistent with current central govt guidance - central government has removed the legal requirements for specific housing numbers to be met by councils, these a to understand why WBC is continuing to force through this huge development? What are the other external factors m build between 1,500 and 2,500 houses in this area where roads, public transport, GPs and schools are already crea - the removal of the legal requirement makes it a great opportunity to pause and produce a properly put together, mod sensible for this area.</p> <p>Character of the local area - this development will effectively make Upper Bucklebury part of Thatcham, eroding Upper Bucklebury village's unio potential to open up further developments that erode the countryside that defines and spearates the various towns an another. Ensuring villages remain just that, villages, is an important part of this part of West Berkshire. This proposa the character of the ara and on the local population.</p>

Please give reasons for your answer	The health authorities have not been consulted in preparing this plan. The relevant water company has also not been
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	The proposal does not take account of the revised targets announced by Michael Gove in December.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	No

Please give reasons for your answer	Neither the water supplier nor the local health authority have been involved in preparatio of this plan.
4. Proposed Changes	<ol style="list-style-type: none"> 1. The numbers of houses being built should be reconsidered in light of revised guidance 2. Thames Water need to be consulted and to produce plans to manage the water and sewage needs 3. The relevant local health bodies should e consulted with over the viability of health provision in the plan, 4. The plans for education facilities should be reconsidered in light of the government's advice and that of West Berk 5. A thorough ecological assessment should be completed before outline planning is granted 6. The transport plan needs to be more realistic and consistent with the council's own estimates.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	I am able to state the case in more detail
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>Please give reasons for your answer</p>	
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am a resident of Bucklebury Village. I wish to object to the plan to build 1500 to 2500 houses to the North East of Thatcham. My objections are: 1. This large development is equivalent to a new settlement not an addition to the existing town of Thatcham. 2. In a settlement of this size all entry and exit movements will be by car. Without a centre and without adequate amenities, residents will have to "go somewhere" to shop and to access services (schools, medical care, dentists and recreational amenities). This will add to congestion and pollution and will be detrimental to the countryside and to the general environment. 3. There will be direct access from this development to country roads which are currently in poor condition with potholes and poor surfaces, reflecting inadequate maintenance by West Berks Council, and which will deteriorate further with increased traffic volumes. 4. More cars and more traffic movements will increase the congestion that already occurs at the Thatcham level crossing, the Brimpton railway bridge and on all other roads in the area. 5. The proposed plan is not specific in its description of the amenities (Healthcare, schools, shops and an adequate range of recreational facilities) that will be provided to support this new settlement. Without adequate provision existing amenities in the area will be further stretched.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	

Please give reasons for your answer

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need	

<p>and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I would like to object to NE Development on the following issues:</p> <p>Increased Traffic.</p> <p>The fact that traffic from the new development will exit at the North of the site onto Harts Hill Road. This means this traffic will be routed through Bucklebury, splitting between Cold Ash and Upper Bucklebury and Chapel Row.</p> <p>In fact you are aware of this "some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury"WB area, there will be some serious accidents. It will be a default route if traffic is heavy on the A4 to Reading, making it a dangerous route to Bucklebury. Presently it can be dangerous to join Harts Hill Road, this volume of traffic will make the task almost impossible for cyclists and walking route and this will no doubt cause some accidents if this development goes ahead. This cannot be considered as a safe route.</p> <p>Access and Junctions.</p> <p>The transport assessment shows no modelling results for Harts Hill Road, why is this?</p> <p>Car Parks</p> <p>Any new proposed car parks on Harts Hill Road will add traffic to the area, and could result in night time anti-social behaviour.</p> <p>Accidents and Road Safety</p> <p>Any development of this size will NO doubt increase traffic and as a consequence have a dangerous impact on walking routes.</p> <p>Healthcare.</p> <p>A huge development this size will mean the occupants of the houses will need access to Doctors Surgeries, all 3 practices are currently stretched with approximately 2000 patients per GP. This will be the case for the residents having to access already over capacity practices. There is no provision for a viable primary care medical facility.</p> <p>Environment</p> <p>Damage to Bucklebury Plateau Biodiversity Area, in particular the Common.</p> <p>This development is a Major Greenfield development of North Wessex Downs AOB. Presently there are wild deer and other wildlife on the development will rob them of their habitat and cause more collisions with wildlife on the roads with the new increase in traffic.</p> <p>There is NO evidence this development will have a positive impact in fact quite the contrary there will be a significant negative impact on the environment.</p> <p>Opinion.</p> <p>To target a greenfield site is extremely shortsighted and taken as the easy option but the impact would be enormous.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	

Please give reasons for your answer	
4. Proposed Changes	In my opinion the development should be targeted on a "Brownfield site", an area already developed that would benefit e.g Colthrop area.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need	No

<p>and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>With regards to soundness, the small Town of Thatcham does not 'need' additional 2500 homes. The Local Authority needs to be doubled in size without appropriate provision of services. Such a development is not sustainable as the new homes will drive vehicles to do shopping, access services and ferry young children about. Upgrading a road to a dual carriageway and the existing Town allowing for a cycle way does not mean many residents will use a bicycle to go shopping!</p> <p>With regards to soundness, the Local Authority has not properly assessed that the Town needs to be doubled in size to provide all services required to sustain it. The plan is not deliverable over the plan period as there cannot be reliable assurance that all phases will be sold allowing for the next phase to be built. The Primary schools would need to be built before the housing will need to be retail zone allowing for Aldi / Lidl within the development to make it sustainable. There is no such zoning in the town which will be driving through the town and Floaral Way to Newbury where there are low cost shopping options as there are no shops in the East thus exacerbating the air pollution issues that already exist. This is therefore NOT sustainable development!</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>A previous engagement event hosted by the Authority's external consultant took place where the host effectively asked residents to be located where without considering what the adverse impacts there will be on local residents. The planned development of a significant and excessive number of homes exclude any mitigation for enhanced traffic flows in all surrounding residential areas which has a pre-school and no safe crossing points and there are no specific 'improvements' specified / detailed for the Proposed 'park' within the development is far from most of the Town which means most will have to drive to access it. Where are the specific improvements to all the poor quality play areas / parks and other areas of land?</p>

Please give reasons for your answer	<p>I wish to object to the above scheme [email subject] for the following reasons.</p> <p>The development between Bucklebury Common , it's villages , and Thatcham would have a significant negative impact on an AONB and the people living there now and in the future.</p> <p>TRANSPORT</p> <p>The plan to put an exit on the north side on to Harts Hill would send traffic towards Upper Bucklebury and Chapel Road congested and potentially dangerous . There have been no modelling results for this exit and the second exit on to F...</p> <p>A new car park has been proposed off Harts Hill .This entrance will add even more danger to drivers using Harts Hill at time antisocial behaviour already experienced in the car parks on the Common.</p> <p>The Safe Travel and Road Safety design detail has not been clearly demonstrated. Similarly the positive impact for the public transport claimed in the council assessment has not been proven.</p> <p>HEALTHCARE</p> <p>Neither the Council nor the developers appear to have arranged or published a Health Impact Assessment to the proposal. Because of the UK general shortage of GPs identified by the NHS Berkshire West Commissioning Group there is no practice being established in Thatcham or West Berkshire in the foreseeable future. Existing practices in the area are at service levels.</p> <p>There has been no approach by the WBC or the developers to any local GP practice to discuss an appropriate branch and manpower. The objective to improve access to the health service component of community infrastructure with a view to has not been met.</p> <p>ENVIRONMENT</p> <p>There will be collateral damage to the Bucklebury Plateau Biodiversity Area and it's ancient woodlands and heaths, and the impact on the landscape by local communities.</p> <p>A major greenfield development in the broader landscape setting of the North Wessex Downs AONB will forever impact on the landscape by local communities.</p> <p>The development will cause detrimental impacts to legally protected wildlife known to be present on the site. The vag... will not be sufficient mitigation.</p> <p>There is no evidence to support claims that SP17 will have a positive impact on the environment. There is every reason to believe a significantly negative impact.</p> <p>Since SP17 has no proven plans for providing adequate green space and protecting biodiversity, there be spill over on to other areas.Indeed the LPR states it's intent for SP17to drive additional traffic (people and cars) into the AONB. The man... Common is explicitly focused on NOT increasing human pressure on the fragile ecosystems they are working to rest...</p>

	<p>The overall thrust of the SP17 policy is to build as many houses as possible in a small area of countryside, while making the environment - human and natural - will be improved or mitigated.</p> <p>EDUCATION</p> <p>The provision for education from Nursery , Early Years, through Infant to Secondary education into clearly defined with is no coherent end to end plan : this breaches the Council's obligations to provide education facilities for children. With large new housing development cannot proceed.</p>

<p>Please give reasons for your answer</p>	<p>WBC LPR Regulation 19 Objection</p> <p>As a resident of Thatcham I am writing to lodge my objection to Thatcham North East Development based on the negative impacts this will cause as the proposals are unsound. Firstly as a resident next to Pipers Way we have already seen increased traffic due to the railway crossing. With the addition of a minimum of 1500 houses and the congestion on the A4 it will cause more traffic along Pipers Way and surrounding roads such as Falmouth Way which could become a rat run to skip any congestion on A4 from Pipers Way and the traffic calming down Falmouth Way will become a dangerous chicane.</p> <p>The proposed traffic management is insufficiently and irresponsibly considered and will adversely affect road safety by channelling additional volumes through Falmouth Way and occasionally Agricola Way.</p> <p>Rather than increase opportunities for walking cycling these the proposals will have an adverse affect on current levels based on increased traffic and congestion. The council has failed to demonstrate how these increased opportunities will be created across all residents in the local area.</p> <p>Secondly I would like to raise objection in relation to the impact this development will have on local environment. Wildlife wandering in the fields across from Colthrop Industrial Estate cross the already busy road- additional traffic will create further loss of wildlife. I also frequently use the footpaths as do others from Thatcham which lead up to Bucklebury the loss of the beautiful countryside on our doorstep will be diminished and will in fact turn Thatcham into an overdeveloped area and could turn into sprawling housing like Didcot.</p> <p>The local area infrastructure is already at risk from flooding, The additional demands for water and sewerage as well as rain water run off onto the A4 will cause significant detriment to the local area.</p> <p>The Council's support of this development is expedient and ill considered from lack of sufficient consideration of health care provision in line with current guidance from Public Health England. The current level of resources are already over stretched in terms of GP provision and Dentistry and the council and developers have demonstrated insufficient engagement with the integrated health bodies to reassure a genuine concern for the wellbeing of the additional new residents. The proposals in relation to education and school places are also inconsistent and vague and the developers suggested solutions to education requirements are platitudes to ensure approval.</p> <p>Please listen to local residents and reject this development which is over scales, poorly planned and detrimental to those in the surrounding areas.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to object to the proposed plan to build 1500-2500 Houses in NE Thatcham as I find the plan unsound and impact on me.</p> <p>The proposed development of 1500-2500 Houses will have a significant health impact and should include a fit for purpose Health Impact Assessment (HIA) in accordance with the guidance from Public Health England. There has been no discussion with health services or on primary health care providers. There are insufficient GPs within the practices supporting Thatcham today, NHS Berkshire Group (CCG) confirms that Thatcham is in an area with the worst shortage of doctors in the country, with doctors ap... arrange let alone adding another 1500-2500 families. The plan offers no new GP practice, and it is unlikely that NHS practice. The additional homes will stretch the few facilities we have in Thatcham impacting me, my family and fellow... of WBC or the developers having arranged or conducted a relevant HIA or demonstrated any liaison with local health... GP practice facility will not solve the problem on its own - there needs to be funding for sufficient GPs to support the a... proposed development which does not seem to be addressed or catered for within the plan.</p> <p>It's not just doctors there is a significant lack of dentists in Thatcham, so much so I have had to register as an NHS p... - the proposed development will add increased pressure on already over-stretched dental practices.</p> <p>The Development provides no details of support for Nursery / Early Years, Primary or Secondary education. The plan... numbers and the likely impact on existing schools at Nursery / Early Years, Primary or Secondary and the Local Plan... define the provision of education and WBC has a duty to make suitable and effective school provision. Additionally its... classrooms/schools (the plan is unclear) there is the need to fund the teachers and staff to provide the necessary ec... payment but a sustained financial pressure that will be placed on WBC.</p>

	<p>The objective of WBC and NE Thatcham Development Consortium is to provide sports fields has not been met and there is no suitable location. The topography of the proposed development is a south facing slope, providing natural drainage for the site and therefore there is no suitable area in which to locate sports fields within the proposed development and there is no suitable area in Thatcham.</p> <p>The development will increase traffic and pollution in NE Thatcham, the Thatcham rail crossing, a known choke point with traffic likely to back up to the A4, a main road between Newbury, Thatcham and Reading. This development will increase traffic through the neighbouring villages.</p> <p>The proposed development takes up valuable green space on the edge of Thatcham, removing the opportunity to extend the green space in Thatcham. The proposed development removes significant green space, hedgerows habitat for birds and wildlife (back garden) and light pollution for the woods which the new development will border.</p> <p>There has been significant investment in flood prevention in NE Thatcham, including at Harts Hill - the proposed development will result in no natural drainage through the proposed development increasing the likelihood of flooding. There is a risk of water from the fields near Harts Hill onto the road, which will increase as a result of the proposed development.</p> <p>It is for these reasons, outlined above that I am objecting to the proposed development of 1500-2500 homes in NE Thatcham.</p>

Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	I am writing to object to the above plan as I feel it is unsound. My husband and I have lived in Chapel Row since the beginning of 1979 (nearly 44 years). In that time we have raised our children, made friends and acquaintances and become very much part of village life. We have been extremely happy here and plan to spend the rest of our lives here.

	<p>Over the past five years or so, traffic in the village has seen a big increase, especially when there are problems on the village roads do not have paths and street lighting. Drivers do not always take notice of the speed limits through the common. With the proposed plan to build at least a further 1500 houses in the North East of Thatcham, we foresee a plans for possible speed restrictions or calming measures proposed. We can see the potential for serious accidents</p> <p>We use the footpaths and byways on Bucklebury Common regularly for walking and exercising the family dogs, (especially) However, over the last few years this has become increasingly spoiled by people driving their quad bikes, motorbikes not intended for this purpose. Also fly tipping is on the increase. Allowing more people access will undoubtedly result a significant impact on walking, cycling, horse-riding. It will also impact on the wildlife in the area.</p> <p>The plan will have a big impact on education in the area, especially secondary education, and NHS doctors, and dentists There appears to be no serious attempt to investigate and address the consequences of building such a large number of brownfield sites around that would be more suitable and less impactful.</p>

Please give reasons for your answer	<p>I would like to object to the plan to build new houses in North East Thatcham under the Regulation 19 consultation process.</p> <p>My objection focuses on the negative impact that this development would have on me personally, the locality, the environment and the economy. I am also concerned that there are components of the plan that are unsound.</p> <p>I have grouped my objects in themes:</p> <p>The Environment</p> <p>I have 3 main areas of concern:</p> <ol style="list-style-type: none"> 1 The damage to the Bucklebury Plateau Biodiversity Opportunity Area and its ancient woodlands and heaths, in

- 2 Siting a major greenfield development in the broader landscape setting of the North Wessex Downs AONB the open countryside by local communities.
- 3 Causing detrimental impacts to legally protected wildlife known to be present on the site but assuming that sufficient mitigation will be taken after development e.g., through the vague promise of a 'community park'.

Taken together, and after a review of the background documentation provided by WBC in support of the draft LPR, I have no evidence to support claims that SP17 will have a positive impact on the environment. In fact, there is every reason to expect a negative impact. For example, the WBC states in the LPR that a Sustainability Charter is required to establish how 'positive' impacts (including the legally required biodiversity net gains and the anticipated overall positive impact on environmental sustainability) will be 'informed by' various strategy documents (including one on ecology). Yet, the strategy documents either were not made available for the Regulation 19 consultation.

With an estimate that at least 4,000 people will be concentrated in the development site and will need access to green space for their wellbeing, I do not believe that the claimed provisions for green space will satisfy this demand on site. The original Thatcham proposal for two 'country parks' spaced across the top of the slope, inside the Biodiversity Opportunity Area, claiming to provide biodiversity enhancement over its current land use. No details were provided about how they would be formed and the information about the preparation of the parks, how they will be managed and funded to deliver that stated biodiversity enhancement looks as though the country parks have been downgraded to an undefined category of 'community parks' which only WBC has given to protecting the natural environment and public enjoyment of it.

Since SP17 has no proven plans for providing adequate green space and protecting biodiversity, there will inevitably be a negative impact on adjacent areas. The LPR also states its intent for SP17 to drive additional traffic (people and cars) into the AONB. 'It is intended that a network which will 'take advantage of the landscape' to 'facilitate connection to the AONB and include leisure routes across the landscape'. The management vision for Bucklebury Common is explicitly focused on **not increasing** human pressure on the fragile landscape to restore and nurture.

In fact, the LPR's own Sustainability Appraisal accepts that SP17 will have a **negative** impact on environmental sustainability and therefore, would result in a negative impact on environmental sustainability which would need to be mitigated by whatever whatsoever on any such mitigation plans. This is not acceptable. However, the very same Sustainability Appraisal suggests that the development is likely to have an overall positive impact on sustainability – largely by absurdly ignoring the environmental consequences and the benefits that are highly questionable. The overall thrust of the SP17 policy is clearly to build as many houses as possible while making empty promises about how the environment – human and natural – will be improved or, if not, mitigated. The consultants to prepare the housing plans and justify the 'growth' requirement, there is no evidence of any serious attempt to systematically address the consequences. Do you want me to assume that everything will be all right because your consultants say that it will be? I am afraid I cannot do that.

Transport

There is no doubt that building so many houses will increase the amount of traffic using the roads, especially in the surrounding area.

The immediate links into Floral Way and Harts Hill means that the construction traffic from, or to, the site will adversely affect Chapel Row. Two very small villages and Cold Ash, which is already busy with traffic at peak times of the day. In all these areas, the roads are inadequate even with current traffic flow; they do not have pavements and therefore have the potential for serious deterioration. In the terrible condition of the roads, the increased noise and pollution, it will be disastrous for the villages and the people living there. The conclusion can also be applied to the increase in traffic once the development has been built. Research has shown that for every 1.24 cars. With an estimate that at least 4,000 people living on this site, this is a considerable increase in traffic is a significant increase.

The Sustainability Appraisal and Strategic Environmental Assessment which accompanies the Local Plan consultation for Thatcham East Thatcham against key Sustainability Objectives. Objective 4 aims to promote and maximise opportunities for all forms of transport. The Council Assessment concluded that the policy is likely to have a positive impact on road safety as 'safe and secure' of the site. Where is the evidence of this? How can an increase in all forms of traffic, walking and cycling journeys co-exist with a sustainable traffic environment?

The Transport Assessment says in paragraph 3.26 : 'The access arrangements for the northern end of the NET site (with right turn lanes where appropriate) on both Floral Way and Harts Hill Road. Results from the modelling suggest that the current situation is inadequate. However, the document shows no modelling results for this. There are drawings for all the other proposed junctions but no drawings for this. Why is this not available? I also understand that there are drawings showing a new car park on Harts Hill. This will be a significant part of what is already a dangerous road and may also promote the night-time antisocial behaviour all too apparent in the area.'

Education

West Berkshire Council, as an education authority, has a duty to plan for suitable school provision. How this obligation is met over the next 10 years is not defined or evidenced in the LPR.

The provision for education from Nursery, Early Years, through Infant to Secondary education is not clearly defined in the LPR. There is no coherent end-to-end plan: this therefore breaches the Council's obligations to provide education facilities for all children. The Plan for a large new housing development is untenable. The lack of a coherent Plan on Schools Provision across the area also means that it is impossible to estimate the subsequent impact on traffic. The siting of a secondary school to the south of the site, a significant increase in traffic across the whole Thatcham area and are not considered in the traffic plans and modelled in the School Provision.

There are no details in the LPR of the provision for Nursery or Early Years education. Policy SP17 NE Thatcham States that 'the site will provide Early Years provision'. The provision for Primary school education is unclear and contradictory on the planned numbers of schools or Form Entry requirements. The LPR proposes that the sum of £12 million be contributed to primary education. However, with no recent data available (the only data referenced is from 2011), it is impossible to determine if this does not state the timing of this funding or school place provision. Clearly, schools need to be available before houses are built.

The current situation for secondary school students from Bucklebury is that they have a choice of either The Downs or Kennet schools. Both are in the catchment area for both. Where schools are oversubscribed those children who live nearer to the school are prioritised. That children from the proposed NE Thatcham development would be able to opt for Kennet and those from Bucklebury for The Downs. The LPR is inconsistent, incomplete and contradictory on the provision of secondary schooling in and around Thatcham. This is a contradiction to the supporting documentation. It proposes that the sum of £15 million be contributed by the developer. However, there are no details of the location of the land to be provided and hence no possibility of assessing its suitability.

The Thatcham NE development plan 2020, produced by David Locke Associates and Stantec on behalf of WBC, proposes a new secondary school, half-funded by developer contribution. Government guidelines are that Secondary Schools with less than 6FE are not sustainable. However, the Development Plan states that the NE Thatcham development (which proposed 2,500 houses), is not sufficient to justify a new secondary school. The provision of a new secondary school in North East Thatcham is an essential part of enabling growth in the town. The funding proposed is not sufficient on its own to fill a 6-8 FE secondary school.

Secondary schools need to be of sufficient scale to make them sustainable and able to provide suitable facilities for the catchment area. It is not feasible for a new school to be smaller than 6FE. With an apparent 40% reduction in the housing allocation in the 2020 Development Plan, a secondary school simply cannot be sustainable in this location. Earlier, in this same Thatcham NE Development Plan, the education provision exercise was based on WBDC data on pupil yield from a study in 2011. Clearly, the use of 11-year olds as a proxy for secondary school demand and early years educational demand across the town and has not attempted to predict the long-term capacities of existing schools. The Development Plan states that 'this study has not engaged in a detailed demographic prediction and modelling exercise'. Policy SP17, states that land (but not the Secondary school itself) will be provided for the development.

In summary, the plan for secondary school provision is 'unsound'. There is no satisfactory evidence of the number of Form Entries, the location of a school is not clear. The number of Form Entries is not defined, and anything less than a 6FE school is not sustainable. The funding is not clear and there is no evidence that the proposed funding is sufficient to meet the Council's obligations.

Sports Fields Provision

The LPR talks of the provision of sports fields. This raises two issues not answered in the LPR:

- 1 Sports fields require flat ground. The only flat area of ground in the proposed site is that which is closest to the road, the most traffic and pollution.
- 2 There is no funding earmarked for these facilities.

I am not clear if the school playing fields would also be available as Sports Fields. If the school itself is not viable, the playing fields will not materialise. Additionally, many schools are reluctant to open their playing fields to the public due to safeguarding and liability. WBC and the North-East Thatcham Development Consortium to provide sports fields has not been met as they have not provided a suitable location.

Healthcare

It appears that WBC and the developers have neither arranged a relevant HIA nor provided evidence of having approached care agencies or providers. They are proposing a healthcare site that is unsuitable for NHS primary care and therefore unable to mitigate the burden that 1,500+ new houses will make on a local NHS struggling to cope.

The North-East Thatcham development plan (SP17) proposes a 450 sq m primary healthcare facility with the suggestion that it be referred to the Buckinghamshire, Oxfordshire and Berkshire West Integrated Care Board or other such appropriate body. However, there is no detail or insight into strategic healthcare planning. Proposals for a major development that is likely to have a significant impact on the local health and wellbeing, size and location, should be accompanied by a fit for purpose Health Impact Assessment (HIA) in accordance with the requirements of the Health and Safety Executive and Health England. The HIA should include reference to how the proposals for development have been discussed with health and wellbeing partners and impacts on primary health care services. The development proposals should demonstrate how the conclusions of the HIA will be reflected in the design of the scheme because an unacceptable impact on the health and wellbeing of existing or new communities would be unacceptable.

It is of concern that neither WBC nor the developers appear to have arranged or published a prospective HIA specific to the Thatcham development. Tackling health and wellbeing requires a multi-agency approach. The Berkshire West Health and Wellbeing Strategy 2021-2030 has been developed by the Reading, West Berkshire and Wokingham Health and Wellbeing Boards together with the Berkshire West Integrated Care Partnership. Developers are encouraged to engage with the healthcare providers at the earliest opportunity to understand the care requirements associated with new development. It is of concern that there appears to have been **no direct engagement** with healthcare providers. Thatcham Development Consortium and local general practices. Few new GP practices are commissioned by NHS England in the area. There is to be patient demand for improved services. NHS Digital figures of patients registered in the NHS Berkshire West Clinical Commissioning Group (CCG) confirm there is an even worse shortage of GPs in other areas of the country. There is therefore no realistic prospect of a new GP practice being established in Thatcham or West Berkshire in the foreseeable future.

GP practices look to create efficiencies and economies of scale to make general practice more financially sustainable. It would make no financial sense to extend the range of services and primary healthcare professionals available on a single site. It would make no financial sense to extend the range of services and primary healthcare professionals available on a single site.

	<p>sense for an existing local GP practice to set up a branch surgery on the proposed new development because of the ac and staffing costs and encumbrance working across two sites. There has been no approach by WBC or the developo discuss an appropriate site, floor-space, or location to which one or more practices could relocate. An enlarged prima might be better located close to the middle of Thatcham to improve access and minimise traffic as the proposed NE Th to the centre of the population. Local practices did not have input with the inadequate 450 sq. m floor size proposal v the SP17 Policy of December 2022, Appendix D. The proposed North-East Thatcham development site is covered b of Thatcham Medical Practice (west of Harts Hill Road), Burdwood Surgery (east of Harts Hill Road) and Chapel Ro understanding is that all three practices are already overstretched. The two Thatcham doctors' surgeries run indepen combined lists include approximately 27,800 patients that equates to just under 2,000 patients per GP. Newly registe developments tend to make a greater demand on GP services because there are more young children, a higher mater family support and there is initially a higher housing turnover. One permanent and repeated temporary pharmacy clo exacerbated pressure on primary care locally. Thatcham dental practices are unable to provide dental care for the w minority of patients needing to travel further afield for NHS and private dental care.</p> <p>Thatcham Vision, endorsed by WBC in 2016, confirmed only 60% of residents were registered at a Thatcham dentis doctor outside Thatcham). There is no evidence provided that either WBC or the developers have approached any lo potential impact of increased workload resulting from additional housing.</p> <p>Reviewing the scant healthcare recommendations within the Thatcham Strategic Growth Study (David Lock and Ass Present, paragraph 4.10 states: 'A dialogue with the relevant healthcare and education agencies should be establish process to address concerns that social infrastructure may not be provided.' The Stage 3: Thatcham Future report publ no further detail except the outcome of a community representatives' workshop, that the existing GP facilities are at health centre. The objective of WBC and the North-East Thatcham Development Consortium to improve access to th community infrastructure has not been met as they have not provided evidence for the provision of a viable primary</p> <p>Finally, On 6th December 2022, Michael Gove (Secretary of State for Levelling Up, Housing and Communities) releas detailing that the housing numbers should now be an advisory starting point and not mandatory. The statement wen Inspectorate should no longer override sensible local decision making, which is sensitive to and reflects local constr</p> <p>The NPPF consultation was launched just prior to Christmas 2022 and will run until 2nd March 2023. The Consultati that the standard method for calculating the housing requirement (as used by West Berkshire for the regulation 19 ve not mandatory and should only be the starting point for local plan. There is a particular focus within the consultation N of an area when assessing how much housing can be accommodated. On the back of this announcement, several L plan making process whilst they await the outcome of the consultation on the basis that a lower housing requiremen than the one currently being planned for. I feel that the council should take the opportunity, as others have, to pause forward a revised plan in line with updated planning guidance when this comes in later in 2023.</p>

2. Do you consider the Local Plan Review is sound? -	No

Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.

- * Yes
- * No

Please give reasons for your answer

I object to this proposal as I find it unsound for the reasons detailed herein.

3.1.1 TRANSPORT

I live in Upper Bucklebury - with the proposal for the new development this will increase traffic through the village causing the wellbeing of the residence and local wildlife. The main road going from Upper Bucklebury to Chapel Row (Broad Lane) is the common land and consequently a lot of local wildlife are in danger from the current traffic, increasing the flow of traffic through the village making the increase in traffic a risk to pedestrians and children who have to attend the local school. Although there are two width restrictions either end of the village an increase in traffic will only make the roads between the two even more unsafe than currently due to the increase in traffic.

As it stands currently there are no footpaths or road crossings between the common land either side of Broad Lane, and the roads between the two are even more unsafe than currently due to the increase in traffic.

Whilst the development is taking place the amount of large plant & vehicles being delivered to and from the site will increase around the neighbouring villages and access roads with the roads also becoming covered in excess mud from the site.

The proposed plan for an exit at the north of the site onto Harts Hill Road (and only became apparent in Phase 2 Traffic Assessment 2021). WBC predicts 'some DISPLACEMENT of A4 traffic onto wider **RURAL** routes such as Upper Bucklebury ...'

I ALSO DRAW YOUR ATTENTION TO THE COUNCIL'S REFUSAL FOR AN ACCESS ROAD CONNECTING FIVE MILE CROSSING AND ST GABRIELS FARM at Cold Ash (near Thatcham) THAT HAS BEEN REFUSED BECAUSE IT WOULD HAVE AN 'ADVERSE IMPACT'. This argument applies in this case too and I object to the proposed plan and demand that this is equally applied to Upper Bucklebury.

3.1.2 Access and junctions

There is no modelling plan results (despite saying these will not cause a problem) for the new priority junctions for bus stops - this is unsound

3.1.3 Car Parks

A proposed new CAR PARK on Harts Hill would encourage even MORE traffic to this dangerous road (I refer you to the report on that stretch of the road in the recent cold spell - despite the council gritting the road it remained impassable for several days - this car park? How is anti social behaviour and night time 'racing' of cars through the common road going to be quelled? meeting site?

3.1.4 Safe and Sustainable Transport

More transport will increase the risk to residence wellbeing and add pollution to the area. How do the council possibly have a Positive impact on road safety and travel, walking, cycling and public transport when the impact on Upper Bucklebury is **OPPOSITE as cited above.**

3.2 Healthcare

The NE Thatcham Development plan proposes a Primary Healthcare facility which the likelihood of funding being approved for this be a guarantee and if so is the facility for residence of the proposed site only or for the surrounding villages. Currently a GP takes weeks, so if there is no healthcare facility the impact on local GP's and the waiting time for an appointment will be significant. any proposal for a dental surgery on the site as this will also have the same impact on local dental surgeries and be a significant impact.

3.3 Environmental Impact

Upper Bucklebury consists of ancient woodlands, heaths and an historic and beautiful common (Bucklebury Plateau) with habitat for important vegetation and animal life.

Placing a major green field development in the broader landscape setting of the North Wessex Downs AONB would cause a significant impact on wildlife known to be present on this site.

THERE IS NO EVIDENCE TO SUPPORT CLAIMS THAT SP17 WILL HAVE A POSITIVE IMPACT ON THE ENVIRONMENT. IT IS EVIDENT THAT IT WOULD HAVE A SIGNIFICANTLY NEGATIVE IMPACT.

Of note the strategy documents required for the Sustainability charter (if they exist) have not been made public for the region and this proposal is unsound.

The updated SP17 text makes note of two 'community parks' that were initially put forward as 'country parks'. This demonstrates a lack of commitment to protecting the natural environment and peoples' enjoyment thereof.

As SP17 does not provide proven plans for providing adequate green space within the development nor demonstrate how to protect and delicate biodiversity, there will inevitably be spill over of people visiting the common areas locally and causing wildlife damage which is in polar opposition to the management vision for Bucklebury Common which is explicitly focused on NOT increasing the number of ecosystems that they work hard to restore and nurture. **The LPRs sustainability Appraisal accepts that SP17 will have a significant impact on environmental sustainability. This would be irreparable thus is unsound and unacceptable.**

3.4 Education

There is no clear plan showing provision for education from nursery through to secondary education which renders the current conceived housing plan untenable.

	<p>The proposed development would have significant impact on secondary school provision for children in Upper Buckle only one school catchment (near Compton) with no provision of a paid for school bus which would prove prohibitive and not been considered in the plan.</p> <p>There is no evidence of the number of pupils a proposed new secondary school would have to cater for.</p> <p>The location of the school is not clear</p> <p>There is no clear plan of the funding nor that such funding is sufficient to meet the councils obligations to provide education.</p> <p>None of this is clearly defined nor evidenced in the LPR thus making it unsound.</p> <p>IN ADDITION</p> <p>The water and sewerage systems in this locality are often overwhelmed with Thames Water frequently having to attenuate even more worryingly currently having to pump effluent into the local river nearby. Additional housing (and certainly the associated infrastructure) in such circumstances is simply not tenable.</p> <p>The Secretary of State for Levelling up, Housing and Communities issued a statement on 6th December 2022 stating that Local Plan Reviews are NOT mandatory and that THE PLANNING INSPECTORATE SHOULD NO LONGER OVERRIDE SENSIBLE LOCAL PLANNING WHICH IS SENSITIVE TO AND REFLECTS LOCAL CONTRAINTS AND CONCERNS.</p> <p>I urge WBC to do as other local councils have and PAUSE the planning process in order to bring forward a revised plan in line with the updated planning guidance.</p>

Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	I wish to register my objection to the proposed new 'Thatcham NE Development' as I find it unsound. Transport <ul style="list-style-type: none"> Reviewing the comments by Bucklebury residents submitted at Regulation 18 about North East Thatcham, a re through the villages. We sought assurances and were led to understand by WBC planners that traffic from the

Way and the A4. This is true but what they 'forgot' to mention was a plan for an exit at the north of the site onto the A4. This is apparent on Friday, 6th January when the Transport assessment was published: Phase_2_Transport_Assessment. **is serious for us because traffic from, or to, the site is only going to go in one direction from this exit – where it will split between the traffic going through Cold Ash and the traffic through Upper Bucklebury**

- I understand there are access arrangements for the northern end of the NET site proposes new priority junctions (where appropriate) on both Floral Way and Harts Hill Road. Results from the modelling suggest that these will not cause any significant impacts (document has no modelling results for this. There are drawings for all the other proposed junctions but none for the new junctions)
- There are drawings showing a new car park on Harts Hill. The purpose is a mystery but will surely add more traffic to an already a dangerous road and may also promote the night-time antisocial behaviour all too apparent in the car park

Healthcare

- The NE Thatcham development plan (SP17) proposes a 450 sq m primary healthcare facility with the suggestion that it be referred to the Buckinghamshire, Oxfordshire and Berkshire West Integrated Care Board or other such appropriate body. **bereft of detail or insight into strategic healthcare planning!**
- It is of concern that neither WBC nor the developers, as public and private stakeholders respectively, appear to have undertaken any prospective HIA specific to the proposed North-East Thatcham development.
- Tackling health and wellbeing requires a multi-agency approach. The Berkshire West Health and Wellbeing Strategy has been developed by the Reading, West Berkshire and Wokingham Health and Wellbeing Boards together with the Berkshire West Health Partnership. **I have a concern that there appears to have been no direct engagement between the North-East Thatcham Consortium and local general practices.**

Environment

I have a concern on three main areas:

- Collateral damage to the Bucklebury Plateau Biodiversity Opportunity Area, and its ancient woodlands and heathland. This is a Common.
- Siting a major greenfield development in the broader landscape setting of the North Wessex Downs AONB that is valued for the open countryside by local communities.
- Causing detrimental impacts to legally protected wildlife known to be present on the site but assuming that sufficient measures will be taken after development e.g. through the vague promise of a 'community park'
- Taken together, and after a thorough professional review of the background documentation provided by WBC in support of the plan, I concluded that there is no evidence to support claims that SP17 will have a positive impact on the environment. **reason to believe it will have a significantly negative impact.**
- I understand it has been estimated that at least 4,000 people will be concentrated in the development site. The plan does not provide green space for recreation and general wellbeing. We do not believe that the claimed provisions for green space are sufficient. The original Thatcham Growth Plan had a vague proposal for two 'country parks' spaced across the top of the site. The Biodiversity Opportunity Area, claiming the potential for significant biodiversity enhancement over its current land use
- In the updated SP17 text, the country parks have been downgraded to undefined 'community parks' which only offer a limited benefit. WBC has given to protecting the natural environment and public enjoyment of it.

Education

Information has been provided by WBC regarding education, however I find the plan for secondary school provision is inadequate.

- There is no satisfactory evidence of the number of pupils the school is to cater for;
- The location of a school(s) is not clear;
- The number of Form Entries is not defined, but it is noted that anything less than a 6FE school is unsustainable;
- The timing of the funding is not clear; and
- There is no evidence that the proposed funding is sufficient to meet the Council's obligations to provide education for all children in the area.

West Berkshire Council, as an education authority, has a duty to make arrangements for suitable school provision. Funding for secondary education across all school years is not defined or evidenced in the LPR.

Miscellaneous

The Regulation 18 Consultation stated that only 1250 dwellings would be built in the plan period, and this I understand is a maximum. The 15000 number is stated as both a minimum and an approximate number and supporting studies are still based on the assumption that this could increase to the original 2,500 when the plan is reviewed after 5 years or in the next plan period.

There is no evidence WBC has consulted properly with Thames Water over the time needed for provisions of water and sewerage for the proposed new dwellings.

The Secretary of State's Written Statement of 6Th December 2022, which removed the need to maintain a 5-year housing strategy, and the decision to update Local Plans, removed the top-down housing targets (particularly for Local Authorities with constraints like AONBs) and a transition period for LS's in final stages of preparing Local Plans and this statement should be taken into account by all Local Authorities.

In conclusion- because of the concerns I have raised, the Reg 19 PPR Submission in its entirety should be considered as inadequate.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?

<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>During the [personal information redacted] I have lived in Upper Bucklebury I have seen house numbers increase with services which support the area. The additional housing has already placed more pressure on the existing inadequate and utility service provision. However, that growth is insignificant compared to the proposed NE Thatcham development sufficiently thought through and is totally unsound.</p> <p>I strongly oppose the NE Thatcham development on the following grounds:</p> <p>1. Traffic:</p> <p>In the years that I have lived [personal information redacted] the traffic volumes have increased significantly. It travels at speed limit, along a stretch of road where there is no pavement or street lighting, making it unsafe for pedestrians and greatly increase the volume of traffic including along Harts Hill Road, which is a particularly unsafe and windy stretch with frequent accidents. Increased traffic volumes will pose yet further threat to the safety of pedestrians, cyclists and motorbikes. There has been no modelling for the proposed junction on Harts Hill Road presumably because any such junction would be inherently unsafe. It is quite strange to see a proposed car park on Harts Hill. I really don't understand why one would be needed and to perform a traffic assessment to work that out.</p> <p>The Council's assessment that the development will reduce accidents and improve safety as well as increase opportunities for public transport (which is pretty much non-existent in Upper Bucklebury) is totally ludicrous and without any basis or evidence. The opposite is likely to be true given the current problems with traffic volumes, which would be dramatically worsened.</p> <p>2. Healthcare:</p> <p>The NHS is in crisis and unable to provide adequate primary care to those already living in the area. The development will increase the need for health care and there is no coherent plan as to how and where the health care needs of those living on the proposed development will have their primary care needs met. In turn there will be increased pressures on hospital services which are similarly under pressure. The prospect of a new GP practice being established and no financially viable prospect of one of the existing GP practices closing. Dental practices will be similarly unable to provide for the needs of those on the development. There is no evidence that the development is considered with local health care agencies or providers.</p> <p>3. Environment:</p> <p>The site is a greenfield site and would therefore have an extremely detrimental impact on environmental sustainability. This negative impact on the environment will be managed and mitigated, if indeed that is remotely possible. There is no space on the development site. This development will simply increase traffic (people and vehicles) to Bucklebury Common, the fragile ecosystem of the Common requires. It presents a threat to legally protected wildlife on the site and in the area.</p> <p>4. Education:</p> <p>Education for the children that would live in the development does not appear to have been addressed. How does the development have an obligation to provide suitable education facilities for these children? The current schools in the area are mostly in a poor state of repair and facilities lacking. As a parent of school age children I am constantly being asked to provide transport to a local authority school system which is struggling with the lack of funding. I fail to see how creating further schools</p>

	<p>make a difference. It is clear that there isn't a proper plan for secondary school provision. The number of pupils to be financial viability of a school unlikely. There is no indication of where the school would be located or indeed when it v seems there isn't adequate funding.</p> <p>It is clear that there has been no consideration given to the infrastructure necessary to support such a development extremely detrimental impact that the development will have on the local environment and the lives of those living lo</p> <p>Please keep me updated on the status of this development proposal.</p>

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>We are writing to express concerns about the Local Plan Review. We believe that the Local Plan Review is being undertaken in an illegal way and represents a poor use of council resources. One of us would be prepared to appear at any enquiry.</p> <p>The proposed submission (Reg 19) local plan review document is the outcome of an unsound process of consultation in 2020 before the revisions to the protected zones around Burghfield and Aldermaston. The proposal to site 2500 houses (1500 houses) appeared after the previous round of consultations closed. It is therefore an unsound submission and does not comply with section 110 of the Localism Act.</p> <p>The document presents a new build of 1500 houses throughout as though that were an upper limit. We would suggest that the words at least 1500 houses. The aim of the North East Thatcham development is for 2500 houses as revealed by the words at least 1500 houses. The need for this number of houses is based on outdated guidance from Central government. Following Michael Gove's level of housing need is described as advisory and not a requirement.</p> <p>Inappropriate consultation process</p> <p>All public bodies have a duty to make public consultations available to all interested parties. This includes making reasonable adjustments for parties who may have problems with complex language or reading. Implicitly the consultation should not be restricted to online only. Restricting the consultation to online only means that those parties who do not use the internet or have disabilities relating to language are excluded. It is our view that the online only form of the consultation (the proposals have not been subject to any form of public consultation) has excluded poorer and less able members of the community. The council could have protected themselves against these points by making easy to read versions of the documents available on request.</p> <p>Inadequate evidence</p> <p>1. Water</p> <p>We have not found evidence that the council has considered the water run off issues identified in several objections submitted to the council and Natural England. In this connection We note that it is not the council that is ensuring the water supply capacity. Instead it is the water companies.</p>

Instead the statement refers to the “developers are aware of requirement for upgrades to the water supply network a case of other developments in the District the water supply and water treatment were required before the developme

2. Transport
The transport modelling is incomplete. There is no evidence that can be examined on the traffic flows due to the exis
Harts Hill Road and Floral Way. We also note that the estimated additional delays on the A4 and Floral Way of an ex
contribute to degradation in air quality along these roads.
There is no evidence to suggest that this development is sustainable in terms of a detailed public transport plan. The p
far from Thatcham Station and will promote car travel along the A4 corridor in particular.
There will also be an increased traffic density on the roads around Bucklebury which will endanger the lives of cyclist
and traffic cannot manoeuvre easily around cyclists or indeed horse riders. Most of the roads have no pavements an
danger to pedestrians.
In connection with the Highways Assessment there is no mention of a railway bridge to replace the level crossing at

<p>Please give reasons for your answer</p>	<p>WBC LPR Regulation 19 Objection</p> <p>I am writing to object to the proposed development to the proposal to build 1500-2500 Houses in NE Thatcham because it will have a negative impact on Upper Bucklebury and the surrounding area.</p> <p>1. Transport</p> <p>I am concerned about the extra traffic this will generate through Upper Bucklebury and the additional congestion on the road. I understand that despite assurances that this will have a 'positive impact on road safety' I understand that there is a risk of the site onto Harts Hill. This is of great concern because traffic to and from the site is only going to go in one direction through Bucklebury. In addition WBC predicts 'some displacement of A4 traffic into wider rural routes such as Upper Bucklebury and Upper Bucklebury are narrow and already busy and it is my genuine concern that extra traffic will result in a serious increase in traffic on Upper Bucklebury to Chapel Row is a long straight road which allows people to drive legally up to 60 miles per hour, making it dangerous to cross at the junction of Carbinswood Lane and Pease Hill.</p> <p>2. Healthcare</p> <p>The proposed development will put enormous strain on our existing GP practices. There appears to have been no discussion with the North East Thatcham Development Consortium and general practices. In the present climate of GP shortages and the fact that GP practices are commissioned by NHS England, and I think it is fair to say there is therefore no realistic prospect of a new GP practice in Thatcham or West Berkshire in the foreseeable future. As far as I am aware, there has been no approach by WBC to a GP practice to discuss opening a new practice. The existing practices are already overstretched and I fear that the arrival of new patients will make a huge demand on our already stretched local GP services.</p> <p>Environment</p> <p>I understand that approximately 4000 people will be living on the development site. These people will need access to green space since SP17 has no proven plans for providing adequate green space and protecting biodiversity which will inevitably impact on the adjacent green areas. You are no doubt aware that management of Bucklebury Common is explicitly focused on not disturbing the fragile ecosystems. In addition, despite the Sustainability Appraisal accepting that SP17 will have a negative impact on the environment there is no detail whatsoever of any mitigation measures.</p> <p>In light of the above I feel that the council should take the opportunity to stop this planned development as it is both a significant and negative impact on the local area. I am prepared to appear at the public enquiry if invited.</p>

<p>Please give reasons for your answer</p>	<p>I am writing to raise my concerns and ultimate objection to the proposed housing development of 1500+ houses in M consideration, whilst I do not disagree that new homes are needed, I do feel strongly that the proposals as they stand Chapel Row for the past 26 years and prior to that as resident in Thatcham for 11 years, I have watched the town an</p> <p>The roads have become so much busier, and in Chapel Row, I already note too many motorists speeding and many there people are often walking on the roads, perhaps with young children and dogs etc. The new plans not only on Hill Road. The additional traffic being pushed through Upper Bucklebury and along The Avenue will be significant an an unacceptable impact on The Common. It is already apparent that the roads are not geared to increased traffic as on the A4 and traffic diverts. There is no street lighting and it is already a challenge and dangerous when larger vehi have also noted that a car park is planned on Harts Hill - why? Does the development not have enough parking for t in previous developments that parking for each house, driveways and garages has been limited, a naive belief that if p have cars perhaps? Drive round the streets now - they are littered with cars. What is the purpose of this proposed ca can't park? I am concerned that it may become a meeting point and another location to encourage anti-social behav occurs in some locations on the Common.</p> <p>We really must, collectively, protect our local environment and that means very, very carefully looking at various opti must consider the true impact of the development on the local ecology. Is there a publically accessible document on development? I have not been able to find one. A proper assessment of the additional hosuing, and potential additi be properly assessed to protect what we have for all over many many more years.</p> <p>I recall being able to get a Drs appointment at my local surgery, both in Thatcham and Chapel Row, in a reasonable ti houses have been built in the surrounding areas it became difficult for people to register with their nearest GP so the new patients. People should be able to register with a GP without great difficulty and be able to access appointments timeframe, but unfortunately the latter is no longer the case. This new development is only going to make this worse, new GP surgery is not going to happen any time soon and I have been unable to see a HIA specifically associated v therefore have no confidence in any statements advising me that 'all will be well'.</p> <p>In conclusion, I feel compelled to object to this development, I feel the plans are unsound and more consideration is to local concerns. Pause and think carefully - is this not the right thing to do in light of new planning guidance that is</p>

Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on	

cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.
 * Yes
 * No

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.
 * Yes
 * No

Please give reasons for your answer

I would like to object to the plan to build new houses in North East Thatcham under the Regulation 19 consultation process.

My objection focuses on the negative impact that this development would have on me personally, the locality, the environment and the wider community. I am also concerned that there are components of the plan that are unsound.

I have grouped my objects in themes:

The Environment

I have 3 main areas of concern:

- 1 The damage to the Bucklebury Plateau Biodiversity Opportunity Area and its ancient woodlands and heaths, in particular the open countryside by local communities.
- 2 Siting a major greenfield development in the broader landscape setting of the North Wessex Downs AONB and its surrounding countryside.
- 3 Causing detrimental impacts to legally protected wildlife known to be present on the site but assuming that sufficient measures will be taken after development e.g., through the vague promise of a 'community park'.

Taken together, and after a review of the background documentation provided by WBC in support of the draft LPR, I have no evidence to support claims that SP17 will have a positive impact on the environment. In fact, there is every reason to believe that it will have a negative impact. For example, the WBC states in the LPR that a Sustainability Charter is required to establish how 'positive impacts' will be achieved (including the legally required biodiversity net gains and the anticipated overall positive impact on environmental sustainability). The Charter 'will be informed by' various strategy documents (including one on ecology). Yet, the strategy documents either do not exist or are not made available for the Regulation 19 consultation.

With an estimate that at least 4,000 people will be concentrated in the development site and will need access to green space for their wellbeing, I do not believe that the claimed provisions for green space will satisfy this demand on site. The original Thatcham proposal for two 'country parks' spaced across the top of the slope, inside the Biodiversity Opportunity Area, claiming to provide biodiversity enhancement over its current land use. No details were provided about how they would be formed and the information about the preparation of the parks, how they will be managed and funded to deliver that stated biodiversity enhancement looks as though the country parks have been downgraded to an undefined category of 'community parks' which only provides a veneer of WBC's commitment to protecting the natural environment and public enjoyment of it.

Since SP17 has no proven plans for providing adequate green space and protecting biodiversity, there will inevitably be a negative impact on adjacent areas. The LPR also states its intent for SP17 to drive additional traffic (people and cars) into the AONB. 'It is intended that a new network which will 'take advantage of the landscape' to 'facilitate connection to the AONB and include leisure routes across the landscape'. The management vision for Bucklebury Common is explicitly focused on **not increasing** human pressure on the fragile landscape to restore and nurture.

In fact, the LPR's own Sustainability Appraisal accepts that SP17 will have a **negative** impact on environmental sustainability on the site and therefore, would result in a negative impact on environmental sustainability which would need to be mitigated by whatever whatsoever on any such mitigation plans. This is not acceptable. However, the very same Sustainability Appraisal suggests that SP17 is likely to have an overall positive impact on sustainability – largely by absurdly ignoring the environmental consequences and the benefits that are highly questionable. The overall thrust of the SP17 policy is clearly to build as many houses as possible while making empty promises about how the environment – human and natural – will be improved or, if not, mitigated. It asks consultants to prepare the housing plans and justify the 'growth' requirement, there is no evidence of any serious attempt to systematically address the consequences. Do you want me to assume that everything will be all right because your consultants say that it will be? I am afraid I cannot do that.

Transport

There is no doubt that building so many houses will increase the amount of traffic using the roads, especially in the surrounding area.

The immediate links into Floral Way and Harts Hill means that the construction traffic from, or to, the site will adversely affect Chapel Row. Two very small villages and Cold Ash, which is already busy with traffic at peak times of the day. In all these areas, the roads are inadequate even with current traffic flow; they do not have pavements and therefore have the potential for serious safety issues.

terrible condition of the roads, the increased noise and pollution, it will be disastrous for the villages and the people. The conclusion can also be applied to the increase in traffic once the development has been built. Research has shown that 1.24 cars. With an estimate that at least 4,000 people living on this site, this is a considerable increase in traffic is a

The Sustainability Appraisal and Strategic Environmental Assessment which accompanies the Local Plan consultation for East Thatcham against key Sustainability Objectives. Objective 4 aims to promote and maximise opportunities for all transport. The Council Assessment concluded that the policy is likely to have a positive impact on road safety as 'safe' of the site. Where is the evidence of this? How can an increase in all forms of traffic, walking and cycling journeys co-exist in a sustainable traffic environment?

The Transport Assessment says in paragraph 3.26 : 'The access arrangements for the northern end of the NET site (with right turn lanes where appropriate) on both Floral Way and Harts Hill Road. Results from the modelling suggest that However, the document shows no modelling results for this. There are drawings for all the other proposed junctions but Why is this not available? I also understand that there are drawings showing a new car park on Harts Hill. This will be part of what is already a dangerous road and may also promote the night-time antisocial behaviour all too apparent

Education

West Berkshire Council, as an education authority, has a duty to plan for suitable school provision. How this obligation over 10 years is not defined or evidenced in the LPR.

The provision for education from Nursery, Early Years, through Infant to Secondary education is not clearly defined within the Plan. There is no coherent end-to-end plan: this therefore breaches the Council's obligations to provide education facilities for the Plan for a large new housing development is untenable. The lack of a coherent Plan on Schools Provision across the town also means that it is impossible to estimate the subsequent impact on traffic. The siting of a secondary school to the north of the site is a significant increase in traffic across the whole Thatcham area and are not considered in the traffic plans and model for School Provision.

There are no details in the LPR of the provision for Nursery or Early Years education. Policy SP17 NE Thatcham Strategic Planning states that 'the site will provide Early Years provision'. The provision for Primary school education is unclear and contradictory on the planned numbers of schools or Form Entry requirements. The LPR proposes that the sum of £12 million be contributed to primary education. However, with no recent data available (the only data referenced is from 2011), it is impossible to verify. It does not state the timing of this funding or school place provision. Clearly, schools need to be available before housing

The current situation for secondary school students from Bucklebury is that they have a choice of either The Downs or Kennet are in the catchment area for both. Where schools are oversubscribed those children who live nearer to the school are prioritised that children from the proposed NE Thatcham development would be able to opt for Kennet and those from Bucklebury would go to Downs. The LPR is inconsistent, incomplete and contradictory on the provision of secondary schooling in and around the town a contradiction to the supporting documentation. It proposes that the sum of £15 million be contributed by the developer but there are no details of the location of the land to be provided and hence no possibility of assessing its suitability.

The Thatcham NE development plan 2020, produced by David Locke Associates and Stantec on behalf of WBC, proposes a new secondary school, half-funded by developer contribution. Government guidelines are that Secondary Schools with less than 6FE. However, the Development Plan states that the NE Thatcham development (which proposed 2,500 houses), is not sufficient. The provision of a new secondary school in North East Thatcham is an essential part of enabling growth in the town and the proposed is not sufficient on its own to fill a 6-8 FE secondary school.

Secondary schools need to be of sufficient scale to make them sustainable and able to provide suitable facilities for the town. It is not feasible for a new school to be smaller than 6FE. With an apparent 40% reduction in the housing allocation in the 2020 Plan, 200 houses, a secondary school simply cannot be sustainable in this location. Earlier, in this same Thatcham NE Development Plan, the education provision exercise was based on WBDC data on pupil yield from a study in 2011. Clearly, the use of 11-year-olds. The Development Plan states that 'this study has not engaged in a detailed demographic prediction and modelling exercise for 11- and early years educational demand across the town and has not attempted to predict the long-term capacities of existing schools to 2039, Policy SP17, states that land (but not the Secondary school itself) will be provided for the development.

In summary, the plan for secondary school provision is 'unsound'. There is no satisfactory evidence of the number of Form Entries. The location of a school is not clear. The number of Form Entries is not defined, and anything less than a 6FE school. The funding is not clear and there is no evidence that the proposed funding is sufficient to meet the Council's obligations.

Sports Fields Provision

The LPR talks of the provision of sports fields. This raises two issues not answered in the LPR:

- 1 Sports fields require flat ground. The only flat area of ground in the proposed site is that which is closest to the town, the most traffic and pollution.
- 2 There is no funding earmarked for these facilities.

I am not clear if the school playing fields would also be available as Sports Fields. If the school itself is not viable, the playing fields will not materialise. Additionally, many schools are reluctant to open their playing fields to the public due to safeguarding and liability. WBC and the North-East Thatcham Development Consortium to provide sports fields has not been met as they have not identified a suitable location.

Healthcare

It appears that WBC and the developers have neither arranged a relevant HIA nor provided evidence of having approached care agencies or providers. They are proposing a healthcare site that is unsuitable for NHS primary care and therefore mitigate the burden that 1,500+ new houses will make on a local NHS struggling to cope.

The North-East Thatcham development plan (SP17) proposes a 450 sq m primary healthcare facility with the suggestion to the Buckinghamshire, Oxfordshire and Berkshire West Integrated Care Board or other such appropriate body. However, there is no detail or insight into strategic healthcare planning. Proposals for a major development that is likely to have a significant size and location, should be accompanied by a fit for purpose Health Impact Assessment (HIA) in accordance with the guidance from Health England. The HIA should include reference to how the proposals for development have been discussed with healthcare providers and the impacts on primary health care services. The development proposals should demonstrate how the conclusions of the HIA will inform the design of the scheme because an unacceptable impact on the health and wellbeing of existing or new communities would be unacceptable.

It is of concern that neither WBC nor the developers appear to have arranged or published a prospective HIA specific to the Thatcham development. Tackling health and wellbeing requires a multi-agency approach. The Berkshire West Health and Wellbeing Strategy 2021-2030 has been developed by the Reading, West Berkshire and Wokingham Health and Wellbeing Boards together with the Berkshire West Integrated Care Partnership. Developers are encouraged to engage with the healthcare providers at the earliest opportunity to understand care requirements associated with new development. It is of concern that there appears to have been **no direct engagement** with the Thatcham Development Consortium and local general practices. Few new GP practices are commissioned by NHS England and there is therefore no realistic prospect of patient demand for improved services. NHS Digital figures of patients registered in the NHS Berkshire West Clinical Commissioning Group (CCG) confirm there is an even worse shortage of GPs in other areas of the country. There is therefore no realistic prospect of a new practice established in Thatcham or West Berkshire in the foreseeable future.

GP practices look to create efficiencies and economies of scale to make general practice more financially sustainable and to extend the range of services and primary healthcare professionals available on a single site. It would make no financial sense for an existing local GP practice to set up a branch surgery on the proposed new development because of the additional staffing costs and encumbrance working across two sites. There has been no approach by WBC or the developers to discuss an appropriate site, floor-space, or location to which one or more practices could relocate. An enlarged primary care site might be better located close to the middle of Thatcham to improve access and minimise traffic as the proposed NE Thatcham site is to the centre of the population. Local practices did not have input with the inadequate 450 sq. m floor size proposal within the SP17 Policy of December 2022, Appendix D. The proposed North-East Thatcham development site is covered by the existing Thatcham Medical Practice (west of Harts Hill Road), Burdwood Surgery (east of Harts Hill Road) and Chapel Row Surgery. The understanding is that all three practices are already overstretched. The two Thatcham doctors' surgeries run independent lists include approximately 27,800 patients that equates to just under 2,000 patients per GP. Newly registered patients tend to make a greater demand on GP services because there are more young children, a higher proportion of patients with family support and there is initially a higher housing turnover. One permanent and repeated temporary pharmacy closure has exacerbated pressure on primary care locally. Thatcham dental practices are unable to provide dental care for the small minority of patients needing to travel further afield for NHS and private dental care.

Thatcham Vision, endorsed by WBC in 2016, confirmed only 60% of residents were registered at a Thatcham dentist (the remainder at a dentist outside Thatcham). There is no evidence provided that either WBC or the developers have approached any local dentist to assess the potential impact of increased workload resulting from additional housing.

Reviewing the scant healthcare recommendations within the Thatcham Strategic Growth Study (David Lock and Associates, 2016), Present, paragraph 4.10 states: 'A dialogue with the relevant healthcare and education agencies should be established as part of the process to address concerns that social infrastructure may not be provided.' The Stage 3: Thatcham Future report published in 2016 provides no further detail except the outcome of a community representatives' workshop, that the existing GP facilities are at capacity and a new health centre. The objective of WBC and the North-East Thatcham Development Consortium to improve access to the community infrastructure has not been met as they have not provided evidence for the provision of a viable primary care site.

Finally, On 6th December 2022, Michael Gove (Secretary of State for Levelling Up, Housing and Communities) released a statement detailing that the housing numbers should now be an advisory starting point and not mandatory. The statement went on to state that the Inspectorate should no longer override sensible local decision making, which is sensitive to and reflects local constraints.

The NPPF consultation was launched just prior to Christmas 2022 and will run until 2nd March 2023. The Consultation states that the standard method for calculating the housing requirement (as used by West Berkshire for the regulation 19 version of the Local Plan) is not mandatory and should only be the starting point for local plan. There is a particular focus within the consultation on the need to pause the Local Plan making process in an area when assessing how much housing can be accommodated. On the back of this announcement, several Local Plan making processes have paused whilst they await the outcome of the consultation on the basis that a lower housing requirement is likely than the one currently being planned for. I feel that the council should take the opportunity, as others have, to pause the Local Plan making process forward a revised plan in line with updated planning guidance when this comes in later in 2023.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?

- * Yes
- * No

Please give reasons for your answer

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	<p>The online form is difficult to follow with many links that make it difficult to understand the structure of the document terms of legal compliance, under the letter of the law I am not qualified to judge, even asking this question of West B and any response there were supplied would not be valid evidence because most residents including myself are not have the necessary knowledge or skills to decide.</p> <p>In terms of the spirit of the law I believe the consultation is not compliant. Carrying out a consultation implies access to an expert(s) and the consultees to enable the latter to make an informed decision. The information supplied should be understandable by the consultees and not in technical jargon.</p> <p>This consultation fails in several areas:</p> <ul style="list-style-type: none"> A huge amount of information has been provided, but is difficult to interpret and to make overall sense of. It's not clear the structure of the consultation and when the council form is accessed is suddenly refers to lots of other documents which I do not do. They will probably give and not submit a response. There is too much complicated information

	<ul style="list-style-type: none"> • Mainly available online – no access for people who are computer illiterate or do not have suitable hardware to access the documents. If people work they cannot access the documents in the council offices if they work full time, they cannot fully understand all the documents. • The policy map is illegible on a standard computer screen. It is far too small to be of use and the legend included is difficult to understand and couldn't readily find out what it means. • Many residents do not even know that this consultation is taking place. Emails were sent out to people on the council without electronic devices would not be notified. It has been in the local paper but not everyone reads that either. It is circulated by a number of dedicated people who have leafleted houses in their area. • This is an important plan setting policy for the next 15 years and I believe that a genuine consultation process should involve the provision of a summary leaflet to every property in the district setting out the basic details of the plan that the public was consulted on. There should also have been a public exhibition put on during the full length of the consultation period in several locations to give the public an opportunity to view the details. Staffed by council officers it would have allowed questions and concerns to be raised and answered to be provided to the council. The provision of large scale map would be a critical part of the exhibition so the effort put in to the plan is established, rather than just each individual proposal. <p>The council may be complying with legal requirements but it clearly doesn't care a bit about genuinely consulting with the public.</p>
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>Once again, the question is written for experts to complete and expecting resident to read and understand the National Planning Policy Framework as well as the local plan, is unrealistic so I can't say that the plan is sound because I don't know.</p> <p>From information from Michael Gove MP in his role as Secretary of State for Levelling Up, Housing and Communities it is clear that the plan is not sound. He has indicated his preference for Brownfield sites, which is not presently the case, and he has delayed some of the matters that will affect the preparation of Local Plans. If that is so then the West Berks Plan does not conform to that policy. The matters that have been suggested by developers are noticeably absent from this plan. In particular the redevelopment of the Faraday Colthrop industrial area which included a major infrastructure improvement, a bridge over the railway and rivers in Thatcham to solve traffic issues of the level crossing.</p> <p>Many local authorities have delayed their local plan preparation until this information has been released, surely this is the case in Berkshire because of the potential impact on the lives of all West Berkshire residents.</p> <p>As a resident of Thatcham I have particular concerns about this policy</p>

	<ul style="list-style-type: none"> • This is a proposed greenfield site development. I believe the government is favouring brownfield sites. Why has not been included – surely this meets the requirements of the plan, especially when it includes a proposal for a to remove the Thatcham level crossing and its associated traffic issues. • Thatcham cannot cope with any more housing without major infrastructure improvements, which I cannot find. Public transport is poor. There is little parking at the railway station and no improvements indicated. People take 20 minutes to come back into Thatcham from Woolhampton at 5.30pm, it can only get worse. • From previous experience, proposals for consultation are never reflected in subsequent planning applications v oppose them as happened with the proposed development to the east of Floral Way at the A4 junction. Access infrastructure improvements didn't materialise and it would have negatively affected nearby properties. What is the Thatcham NE development • Areas of semi-ancient woodland are at risk from the development of the site. The green break between Thatcham virtually removed. • What is the point of proposing green spaces when the development is just taking away green spaces and public • The present road infrastructure is poorly maintained and not being repaired by the Council – how will it cope with traffic? • There is no proposal for a second secondary school, I understand that Kennet School is at capacity • What provision has been made for new employment opportunities in the area which could reduce the need for parking in Newbury have been converted to housing which could have been short sited – home working may not last for • How was the decision made to include Thatcham NE in the plan when it doesn't appear to meet planning requirements excluded which probably did. It will have a detrimental effect on the environment and the general well-being of <p>In summary I feel that this process does not provide a suitable consultation process to the residents of West Berkshire decisions regarding the Local Plan Review. The process should be delayed to wait for further guidance from the Government consultation to be carried out.</p>

Please give reasons for your answer	I have tried to register my objection via the online portal but I'm afraid that I found it too confusing. I strongly object to the proposed plan to expand to the north east of Thatcham for the following reasons. I am willing required. 1 Transport

The area around the east & north of Thatcham is already very often heavy with traffic & traffic jams, (causing pollution & traffic).

I believe that the "Traffic Survey" carried out for the plan was done during the Covid Lockdown & is therefore unsound & corrupt!

Adding more houses to the area would increase the traffic & pollution, with increased volume & danger along Harts Road.

1 Access & Junctions

The transport assessment proposes new "priority junctions" but gives no details of where, how many, or how these would be created. Modelling results at all, even though, again these would have been created during the Covid pandemic.

1 Car Parks

I do not understand the need for car parks, unless it is to provide a location for anti social behaviour of an evening. The plan surely acknowledges an increase in car use?

1 Safe & sustainable Transport

The plan will increase the use of private vehicles on already crowded small roads. This will have a detrimental effect on the area, dangerous to walk or cycle in & around the area.

5 Healthcare

The population of Thatcham is already very high for the number of General Practice Doctors & especially dentists. There is no appointment at both. Putting more houses in the area without having completed a Health Impact Assessment does not seem to be no plans, (just words) for increasing the infrastructure to both GP surgeries & dentists. Thus increasing the problem in the area.

6 Environment

Most mornings I see some deer & muntjac, the occasional fox, kestrels, red kites & buzzards from my house. The plan will remove a couple of the trees which will be felled by this development. I have, in the past seen a snake, (not sure if was an adder) & a crested newt, in the proposed area. Also, most evenings during the warmer months, bats are flying around the area. If the development goes ahead as suggested. There are also a number of beehives at the rear of my property. If this plan goes ahead, they will no longer have anywhere to forage.

7 Water

At the moment Thames Water often end up releasing untreated waste water, (including raw sewage) into the River Kennet. This is due to the waste water treatment plant being overwhelmed with the amount of rain water being disposed of by the area. There are another 1500 - 2500 homes added to this & acres more tarmac & concrete, then it is obvious that the amount of water to be disposed of will increase & therefore Thames Water will have to release more & even more often.

The whole of this proposed development is a "green field" site & the impact on the environment will be devastating. There is no evidence (in words, no evidence) that it will have a positive impact on sustainability. Again, I would suggest, disingenuous, (possibly illegal) to suggest otherwise.

It appears that the main motivator for this development seems to be financial. Plans for a development on Siege Cross were approved of years ago, apparently due to "urbanisation" of the area & lack of infrastructure & yet this plan, (incorporating the same site) was approved without regard to the previous decision?

The "gap" between Newbury & Thatcham is already only one field / width of the A4 wide & by increasing the size of the development is being proposed, we are going to end up with another urban sprawl, similar to Slough. A massive conurbation in the area.

I also believe that there are some suitable "Brown Field" sites, such as Colthrop, which developers have suggested for a road bridge to assist with the level crossing. I have been told that this was turned down by the council as "Drivers would be waiting at the crossing". I do not understand this logic?

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?

- * Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into	

<p>account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p><u>WBC LPR Regulation 19 Objection</u></p> <p>I am writing to object to the proposed development to the proposal to build 1500-2500 Houses in NE Thatcham because it will have a negative impact on Upper Bucklebury and the surrounding area.</p> <p>1 Transport</p> <p>I am concerned about the extra traffic this will generate through Upper Bucklebury and the additional congestion on the road. I understand that despite assurances that this will have a 'positive impact on road safety' I understand that there will be a displacement of traffic from the site onto Harts Hill. This is of great concern because traffic to and from the site is only going to go in one direction. Upper Bucklebury are narrow and already busy and it is my genuine concern that extra traffic will result in a serious safety issue. Upper Bucklebury to Chapel Row is a long straight road which allows people to drive legally up to 60 miles per hour, making it dangerous to cross at the junction of Carbinswood Lane and Pease Hill.</p> <p>1 Healthcare</p> <p>The proposed development will put enormous strain on our existing GP practices. There appears to have been no discussion with the North East Thatcham Development Consortium and general practices. In the present climate of GP shortages and the fact that GP practices are commissioned by NHS England, and I think it is fair to say there is therefore no realistic prospect of a new GP practice in Thatcham or West Berkshire in the foreseeable future. As far as I am aware, there has been no approach by WBC to any GP practice to discuss opening a new practice. The existing practices are already overstretched and I fear that the additional patients will make a huge demand on our already stretched local GP services.</p> <p>Environment</p> <p>I understand that approximately 4000 people will be living on the development site. These people will need access to green space and that since SP17 has no proven plans for providing adequate green space and protecting biodiversity which will inevitably result in the loss of visiting adjacent green areas. You are no doubt aware that management of Bucklebury Common is explicitly focused on the fragile ecosystems. In addition, despite the Sustainability Appraisal accepting that SP17 will have a negative impact on the environment there is no detail whatsoever of any mitigation measures.</p> <p>In light of the above I feel that the council should take the opportunity to stop this planned development as it is both unsound and has a negative impact on the local area. I am prepared to appear at the public enquiry if invited.</p>

<p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I wish to state my objections to the above plan, with specific reference to Policy SP 17, the proposed North-East Thatcham site, so via this email as I was disappointed to find that the Council's web tool for this task is overly complex, unhelpfully inflexible and difficult to use in relation to the submission of comments by ordinary citizens.</p> <p>THE ENVIRONMENT</p> <p>Placing a housing estate over an area of countryside spells doom for many species of plants and creatures in that area. A "net biodiversity gain" is surely ridiculous and I challenge West Berkshire Council (WBC) to substantiate that claim. The impact of housing developments.</p> <p>Within the area in question, which I walk regularly with my dog, I see hares, foxes, badger spoor and numerous species of insects and meadow plants for which I am too ignorant to know the names. The small areas of "country park"/"community park" that WBC boundary would <u>not</u> contain this diversity. As evidence to support that assertion, I look to the "green" areas in place of modern housing estates, with which I am also familiar as a walker, e.g. the land between the southern developments north/north-east at the sides of the Harts Hill Road between Floral Way and the A4. I invite WBC to commission a wildlife survey that it will reveal massive quantities of litter, but very little wildlife. That is the sad reality of a small green area alongside a housing estate.</p> <p>In this regard, I believe that the SP17 proposal is unsound but also that it contravenes the spirit, and quite possibly some provisions of the Environment Act.</p> <p>THE AONB, BUCKLEBURY COMMON</p> <p>This Government's 2019 manifesto included a pledge to deliver "the most ambitious environmental programme of an ever Conservative Government". The Environment Act was headlined as "a world-leading programme for nature recovery". Yet WBC proposes a vast housing estate on a protected and fragile Area of Outstanding Natural Beauty, Bucklebury Common, with all the inevitable negative impact that would result.</p> <p>A taste of that impact was seen during the 2020 COVID lockdown, which greatly increased the numbers seeking out the open woodland and open common ground, along the footpaths and bridleways, and the many informal paths that weave across the landscape. The impact of a dramatically increased footfall was everywhere visible. New sections of paths were trampled through the thick grasses of original path churned to a quagmire by the volume of feet and wheels. Informal paths, previously nothing more than narrow tracks, were swathed. Plants were trampled, occasional/seasonal water courses disrupted and diverted, ground-nesting birds displaced, and numbers of deer and other mammals noticeably fewer. And a large increase in litter offered danger to those creatures that did still survive. New spaces were created at the sides of lanes, crushing verges, shrubs and saplings.</p> <p>The building of <u>any</u> houses on the NE Thatcham site would undeniably increase the volume of road traffic using the "rat-run". There is nothing in the proposal's Transport Assessment to suggest any measures to limit or prevent this, nor any assessment of likely impact in this regard. The volume of traffic on these lanes is already unacceptable in terms of its impact on the environment.</p> <p>Inherent in a new housing development of any size, there would also be an increase in levels of artificial light at night. WBC attempts to mitigate this, and with consequent negative impact on nocturnal species of mammals and birds.</p> <p>WBC has a legal obligation to "conserve and enhance" AONB's in its domain but instead it plans a development which would result in a massive further increase in the recreational use of Bucklebury Common AONB, and thus in the human impact upon it. This is unsound and not legally compliant.</p> <p>HUMAN SAFETY</p> <p>The volume of traffic cutting through the lanes on Bucklebury Common is a hazard to human safety too. Those same lanes used by walkers and cyclists but are mostly narrow, winding and devoid of either pavements or streetlights. Increased traffic flow would be a significant hazard to human safety.</p>

the likelihood, of injury or death in road accidents. This would fly in the face of both national initiatives and WBC's own for "zero" such events.

And quite how WBC supports its claim that this development would "have a positive impact on road safety" is unimagineable to the Council itself as no genuine evidence is offered to support that statement. It is clearly nonsense as a forecast that WBC is guilty of a gross misrepresentation of the truth in this matter.

SEWERAGE

I witnessed a detailed report, given at a meeting in December 2022 in the Upper Bucklebury Memorial Hall, which dealt with the main sewerage infrastructure in terms that implied it is very close to maximum capacity, or perhaps already exceeding it. It was WBC's Executive Director responsible for planning. He (Mr Owens) raised no argument with the facts and statistics, nor do I see anything in the SP17 proposal to reassure me that any action is intended to address this apparent infrastructure problem. It makes the SP17 proposal unsound.

MEDICAL SERVICES

Publicly available statistics, coupled with patient experience, confirm that the area's general practice surgeries are overwhelmed with their current patient numbers. In the event that the SP17 development were to go forward at any size, if there were no new facility then medical services to the local population would surely collapse, to the very serious detriment of all residents.

And yet I see no promise of this, and no Health Impact Assessment, in the development proposal. The same must be true of other services, which are likewise confirmed as inadequate in this area. WBC must surely have a moral obligation, if not a legal one, in a situation arising. As it stands, the implications of SP17 for medical services in the wider Thatcham area render the proposal unsound.

NATIONAL FOOD SECURITY

The countryside over which this development is proposed is currently to a large extent farmland, seemingly quite fertile and with nothing to go by. The deletion of such land is clearly at odds with central government's rather wider view – the implications as highlighted by the supply-chain events of the past few years and most especially the war in Ukraine. The Government's aim for our country "a healthy and sustainable domestic food supply-chain" (PPS to Environment Minister, 4 October 2022) and the need to be blind to all this?

CONCLUSION

I consider the NE Thatcham Housing Development Plan SP17 to be fundamentally flawed, disturbingly unsound and the reasons given above, and I would willingly attend a public enquiry on the matter.

Please give reasons for your answer	<p>The traffic in Upper Bucklebury has grown massively in the last ten years and this proposal will make it intolerable, particularly on the main road. 1500 houses means possibly 3000 more cars and a proportion of them will use Harts Hill and Brookley Road, the A4. The noise and pollution will be unacceptable. Cycling or walking on Harts Hill is not safe at present and this proposal will cause environmental damage and damage to health.</p> <p>It is not clear that you have given any consideration to infrastructure.</p> <p>Last summer we had water shortages and this will only be exacerbated with possibly 5000 more people all needing water and surface water drainage? Have you consulted with Thames Water?</p> <p>The proposal to build partly on usable agricultural land which may be needed in the future does not make sense. One is not convinced that the WBC have given adequate consideration to alternative brownfield sites.</p> <p>I am concerned about the effect on healthcare in the area, which already is vastly overstretched. The burden of an additional surgery will be insupportable for our current doctor's surgeries. Again, what consultation has taken place?</p>

Please give reasons for your answer	I am objecting to the above as unsound for the following reasons. HEALTHCARE PROVISION A development of the proposed size will have a massive impact on our health services in this area. There is a huge shortage of GPs in this country so there is no realistic prospect for this area of a new GP practice. Added to this the knock on affect to other services the impact would be an unmitigated disaster. SCHOOL PROVISION There seems to be no clear decision within LPR for Nursery or Early Years. It also seems the provision of Primary schools is unclear and contradictory together with unsound details of Secondary Education ie evidence of pupil numbers for so

	<p>funding timings etc. The council has a duty to suitable school provisions and how this is met across all school years in addition sports field provision needs addressing for North East Thatcham.</p> <p>INFRASTRUCTURE</p> <p>There are grave concerns what impact these additional properties will have on the existing roads system around pa</p>

Please give reasons for your answer	This feels like the least creative way of solving the housing shortage. We are facing a climate emergency yet the only solution is to build on green land. Within Newbury and around Thatcham town centre is a huge amount of poorly designed brownfield, former empty office space and ugly low quality housing. This is the land which needs to be developed. It would mean that people can walk to amenities or jump on the train without using a car. It would improve the look and feel of Newbury and Thatcham by bringing in more people to the area. It would be economical. it would be environmentally friendly and it would require creative, architecturally interesting housing of the variety of housing needed. By contrast your plan simply involves building bland, mass produced houses on land which is currently used as farm land or land used by local people for leisure. This land enhances the quality of life of people living here and provides a variety of wildlife. It separates villages from each other and villages from towns. Such development here will destroy the very reason people want to live here. And let's talk about the infrastructure. In addition to these houses there will need to be facilities, all on this lovely, natural greenfield land. People will be drawn away from the town centres in Newbury and Thatcham (with their empty shops and charity shops, the neglected Kennet centre and shabby sports centre) when we should be encouraging activity in the centre. And the traffic! The level crossing in Thatcham already causes long tailbacks at peak times. The roads coming off the Robin Hood roundabout. To cope with this number of new families coming from the outskirts of the town will either massively increase traffic (and pollution) or require the widening of roads and the building of more roads through the beautiful countryside. At some point we have to stop doing this. When you watch the news and see the climate destroying the world do you consider that these decisions are part of that problem? Do you think that, somehow, this is OK as long as it's not from our cardboard? We need much, much cleverer solutions. We need to have as little impact on the environment as possible. To say these projects are carbon neutral but you cannot have an influx of so many new families, build on greenfield land in parts of the area that then require them to drive to get to amenities and claim there is no impact on the environment is a little bit of your conscience?

- * No

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.

- * Yes
- * No

Please give reasons for your answer

I wish to register my objection to the proposed new 'Thatcham NE Development' as I find it unsound.

Transport

- Reviewing the comments by Bucklebury residents submitted at Regulation 18 about North East Thatcham, a road through the villages. We sought assurances and were led to understand by WBC planners that traffic from the Floral Way and the A4. This is true but what they 'forgot' to mention was a plan for an exit at the north of the site onto the A4, which was apparent on Friday, 6th January when the Transport assessment was published: Phase_2_Transport_Assessment. **This is serious for us because traffic from, or to, the site is only going to go in one direction from this exit – where it will split between the traffic going through Cold Ash and the traffic through Upper Bucklebury**
- I understand there are access arrangements for the northern end of the NET site proposes new priority junctions (where appropriate) on both Floral Way and Harts Hill Road. Results from the modelling suggest that these will not cause any issues. The document has no modelling results for this. There are drawings for all the other proposed junctions but none for the new ones.
- There are drawings showing a new car park on Harts Hill. The purpose is a mystery but will surely add more traffic to already a dangerous road and may also promote the night-time antisocial behaviour all too apparent in the car park.

Healthcare

- The NE Thatcham development plan (SP17) proposes a 450 sq m primary healthcare facility with the suggestion to refer to the Buckinghamshire, Oxfordshire and Berkshire West Integrated Care Board or other such appropriate body. **I am bereft of detail or insight into strategic healthcare planning!**
- It is of concern that neither WBC nor the developers, as public and private stakeholders respectively, appear to have conducted a prospective HIA specific to the proposed North-East Thatcham development.
- Tackling health and wellbeing requires a multi-agency approach. The Berkshire West Health and Wellbeing Strategy has been developed by the Reading, West Berkshire and Wokingham Health and Wellbeing Boards together with the Berkshire West Partnership. **I have a concern that there appears to have been no direct engagement between the North-East Thatcham Consortium and local general practices.**

Environment

I have a concern on three main areas:

- Collateral damage to the Bucklebury Plateau Biodiversity Opportunity Area, and its ancient woodlands and heathland Common.
- Siting a major greenfield development in the broader landscape setting of the North Wessex Downs AONB that will impact on the open countryside by local communities.
- Causing detrimental impacts to legally protected wildlife known to be present on the site but assuming that sufficient mitigation will be taken after development e.g. through the vague promise of a 'community park'
- Taken together, and after a thorough professional review of the background documentation provided by WBC in support of the plan, I have concluded that there is no evidence to support claims that SP17 will have a positive impact on the environment. **My reason to believe it will have a significantly negative impact.**
- I understand it has been estimated that at least 4,000 people will be concentrated in the development site. The plan does not provide green space for recreation and general wellbeing. We do not believe that the claimed provisions for green space will be sufficient. The original Thatcham Growth Plan had a vague proposal for two 'country parks' spaced across the top of the Opportunity Area, claiming the potential for significant biodiversity enhancement over its current land use
- In the updated SP17 text, the country parks have been downgraded to undefined 'community parks' which only provide a limited benefit. WBC has given to protecting the natural environment and public enjoyment of it.

Education

Information has been provided by WBC regarding education, however I find the plan for secondary school provision is unsound.

- There is no satisfactory evidence of the number of pupils the school is to cater for;
- The location of a school(s) is not clear;
- The number of Form Entries is not defined, but it is noted that anything less than a 6FE school is unsustainable;
- The timing of the funding is not clear; and
- There is no evidence that the proposed funding is sufficient to meet the Council's obligations to provide education for all children in West Berkshire Council, as an education authority, has a duty to make arrangements for suitable school provision. Funding for secondary education across all school years is not defined or evidenced in the LPR.

Miscellaneous

	<p>The Regulation 18 Consultation stated that only 1250 dwellings would be built in the plan period, and this I understand is based on the 15000 number. The 15000 number is stated as both a minimum and an approximate number and supporting studies are still based on the assumption that this could increase to the original 2,500 when the plan is reviewed after 5 years or in the next plan period.</p> <p>There is no evidence WBC has consulted properly with Thames Water over the time needed for provisions of water and sewerage for the proposed new dwellings.</p> <p>The Secretary of State's Written Statement of 6Th December 2022, which removed the need to maintain a 5-year housing target to update Local Plans, removed the top-down housing targets (particularly for Local Authorities with constraints like AONBs) and a transition period for LS's in final stages of preparing Local Plans and this statement should be taken into account by the Regulator.</p> <p>In conclusion- because of the concerns I have raised, the Reg 19 PPR Submission in its entirety should be considered for a full review.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	I have lived at [personal information redacted], but this latest development between 1500 to 2500 houses to be built [redacted] is like adding another town to the already encroached area and feel it is totally unsustainable. I am writing in to object to say No to Thatcham NE Development as the plans presented as I find them unsound, for - Increased traffic flow - this is already over stretched especially getting onto Foxglove Way especially in the morning existing estate, and during schools runs, this new development will only exhaust the situation even further, as there are others. - Healthcare - Thatcham Healthcare Service is already well over stretched, not being able to get a Doctor's appointment see strategic healthcare planning within this newly proposed development. - Impact on the Environment – Building on Greenfield sites which are classed as “Natural outstanding Beauty” and are legally protected wildlife. - Where is WBC plans for reducing pollutant gases on the carbon footprint, supporting this development will surely m

<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>The plan has taken absolutely no account of alternative sites, in particular alternative brownfield sites in Thatcham which would destroy an AONB.</p> <p>Bucklebury Says No has identified a number of serious environmental threats posed by the proposed Thatcham site (SP17). These include:</p> <ol style="list-style-type: none"> 1 Collateral damage to the Bucklebury Plateau Biodiversity Opportunity Area (*see map at end) [<i>map not included</i>] and heaths, in particular the Common; 2 Siting a major greenfield development in the broader landscape setting of the North Wessex Downs AONB of the open countryside by local communities; 3 Causing detrimental impacts to legally protected wildlife known to be present on the site but assuming that can be taken after development e.g. through the vague promise of a 'community park'. <p>Taken together, and after a thorough professional review of the background documentation provided by WBC in support, we concluded that there is no evidence to support claims that SP17 will have a positive impact on the environment or any reason to believe it will have a significantly negative impact.</p> <p>For example, the WBC states in the LPR that a Sustainability Charter is required to establish how '<i>policy requirements</i>' the legally required biodiversity net gains and the anticipated overall positive impact on environmental sustainability) <i>be informed by</i> various strategy documents (including one on ecology). Yet, the strategy documents either do not or are not publicly available for the Regulation 19 consultation.</p> <p>We estimate that at least 4,000 people will be concentrated in the development site. They of course must have access to and general wellbeing. We do not believe that the claimed provisions for green space will satisfy this demand on site. The Plan had a vague proposal for two 'country parks' spaced across the top of the slope, inside the Biodiversity Opportunity Area for significant biodiversity enhancement over its current land use. No details were provided about how they would be delivered, showed the complete lack of preparation for such country parks, not least that they should be merged, and properly managed that stated biodiversity enhancement. Now, in the updated SP17 text, the country parks have been downgraded to uncared for only proves how little commitment WBC has given to protecting the natural environment and public enjoyment of it.</p> <p>Since SP17 has no proven plans for providing adequate green space and protecting biodiversity, there will be increased pressure on visiting adjacent areas.</p> <p>Indeed, the LPR states its intent for SP17 to drive additional traffic (people and cars) into the AONB. It provides a green space will '<i>take advantage of the landscape</i>' to '<i>facilitate connection to the AONB, and include leisure routes accessible to a wide range of users</i>'. Meanwhile, the management vision for Bucklebury Common is explicitly focused on <u>not</u> increasing human pressure on the site working to restore and nurture.</p>

	<p>In fact, the LPR's own Sustainability Appraisal accepts that SP17 will have a <u>negative</u> impact on environment greenfield site and therefore, would result in a negative impact on environmental sustainability which would need to be whatsoever on any such mitigation measures: the assumption is simply that they will somehow be found during the p</p> <p>However, the very same Sustainability Appraisal suggests that the SP17 policy is likely to have an overall po – largely by absurdly ignoring the environmental consequences in favour of social and economic benefits that are an other articles herein) <i>[articles not included]</i>.</p> <p>The overall thrust of the SP17 policy is clearly to build as many houses as possible in a small area of countryside, wh how the environment – human and natural – will be improved or, if not, mitigated. Despite all the money spent on co plans and justify the 'growth' requirement, there is no evidence of any serious attempt to investigate, analyse an consequences. Everything will be all right because their own unsubstantiated policies say it will be.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	No
<p>Please give reasons for your answer</p>	WBC have only taken account of information provided by the developers on one site. The developers have not been brownfield areas
<p>4. Proposed Changes</p>	There should be a proper assessment of alternative brownfield sites in the local area.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	A plan paid for in part by the developers themselves means the premiss is flawed at its origin. The outcome is determined by a non defunct government directive on a 5 year housing plan that is now no longer required.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	There is a poorly thought out document that fails to recognise the detrimental effect on public health, an AONB and cope with its traffic levels, the Thatcham railway crossing is prime example of where the infrastructure cannot support unclear whether it is 1500 houses, 2500 houses or any number in between. The strategy is now not in line with government review.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	No
Please give reasons for your answer	Thames water has not been properly engaged on this project.

1. Do you consider the Local Plan Review is legally compliant?	
* Yes	
* No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.	
* Yes	
* No	

<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am objecting to the plan as I find it unsound.</p> <p>Transport - Harts Hill is the direct route to Upper Bucklebury, Chapel Row and Bradfield and is a very busy road esp afternoon as people go to/from work and children to/from school. There is no footpath and the road is dangerous esp. Latterly the lorries from the gravel pits often take up more than half the road, another hazard. How is it possible to increase, not to mention site traffic, with all the extra pollution it would bring.</p> <p>Access - there are no plans to indicate the location of new priority junctions and what is the purpose of a car park? Traffic antisocial behaviour causing much distress to those living in the vicinity.</p> <p>Healthcare - when did you last try to make a face to face appointment to see a Doctor? Surgeries and dentists in the area are at full capacity both of which would collapse under the huge influx of patients. Consultation with local healthcare providers either by the developers or the WBC. This issue must be addressed.</p> <p>Environment - The site of the proposed development borders AONB and would have a very detrimental affect on the various times during the year there are sightings of deer, foxes, red kites, bats, a huge array of bird varieties and the like. What will happen to these creatures? There are no plans to provide adequate green space and protecting biodiversity. This further add to traffic congestion, especially on Harts Hill.</p> <p>I have seen no solution put forward to combat the problem of water drainage off the hill. After heavy and prolonged rain Floral Way is saturated and not suitable for building on. The issue would be exacerbated by building roads, houses and the like. The water to go so flooding would be inevitable in some areas.</p> <p>In conclusion, based on the objections above, I am of the opinion that the proposed development is ill conceived, unworkable and a disadvantage to everyone.</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I wish to formally object to the proposed Thatcham North East Housing Development as I believe that the approved plan is unsound for the following reasons:</p> <p>Healthcare</p> <p>As I understand it, only vague references have been made towards the provision of infrastructure to support such a development, such as medical services, etc.</p> <p>On the subject of healthcare, a 450 sq/m primary healthcare facility with the suggestion that a GP surgery be offered to the development was presented to the Integrated Care Board but the document contains no details into strategic healthcare planning. A development of this scale requires a fit for purpose Health Impact Assessment (HIA) according to current guidelines from Public Health England. The current HIA is overstretched so obviously there would be serious negative impact on both existing and new residents. The only reason a HIA is that the inevitable conclusion would be an acceptably high negative impact on existing and new communities and such a development should not be permitted. Again, the proposals for this development are fundamentally unsound as any required documentation has been deliberately ignored. None of the local GP practices have been consulted and none would be prepared to take the development as a branch surgery on economic/practical grounds.</p> <p>The same argument applies to the provision of dental services in the Thatcham area.</p> <p>Transport</p> <p>There would be serious traffic management issues with the major trunk route of the A4 (single carriageway and currently used for the majority of the traffic). The plan includes an exit from the development onto Harts Hill Road, a single track road serving the village of Upper Bucklebury. With the inevitable congestion caused along the A4, this will lead to much of the traffic seeking an alternative route through the unlit villages eastwards through Upper Bucklebury, Chapel Row and Bradfield Southend. Potentially, much of the traffic will be heading in a westerly direction towards the Bradfield College area. Any traffic heading in a westerly direction would inevitably make its way through Cold Ash Road junction 13, passing by the schools of St Finian's Catholic Primary School and Downe House School. The current proposals are unsound and unsafe to the point of being dangerous. Furthermore, WBC claim that modelling suggests that these new roads will solve the problems. However, they not produced any modelling results to this effect. For some reason WBC have also failed to consider the impact on the Hill junction. This again would seem to be unsound as scant thought appears to have been applied.</p> <p>Environmental</p> <p>The land that it is being considered for development is currently on a green field site and is prime agricultural land. As a result of the development to become more self-sufficient in our foodstuff production and less reliant on imported goods. Furthermore, the land at the development (a Common) and such a large development would have a huge detrimental effect on such a fragile and diverse eco-system. A full environmental consideration has been given to the negative impact on this valuable resource.</p> <p>Much of this land also lies in the Kennet river valley which at present floods regularly down stream – a situation which is a significant problem for the neighbouring communities.</p> <p>I do not believe that WBC has given serious consideration to brown field sites that are currently available for development.</p> <p>Education</p> <p>WBC as an Education Authority has a duty to make arrangements for suitable school provision. How this obligation will be met is not defined or evidenced in the LPR. It is therefore clear that the plan for secondary school provision is unsound for the following reasons:</p> <ol style="list-style-type: none"> 1. There is no satisfactory evidence of the number of pupils the school is to cater for. 2. The location of the school is not clear. 3. The number of Form Entries is not defined but it is noted that anything less than a 6FE school is unsustainable. 4. The timing of the funding is not clear. 5. There is no evidence that the proposed funding is sufficient to meet the Council's obligations to provide education for the number of pupils the school is to cater for. <p>Timing of the LPR Consultation</p> <p>At the outset, one of the reasons given for this development was to fulfil WBC's obligation to meet certain Government obligations. One of the reasons to use this particular area was that there was nowhere else suitable due to the high percentage of AONB and nuclear fall out.</p>

At the time, it was acknowledged that the siting was far from ideal. Since the latest announcements from Michael Gov (Up, Housing and Communities) a Written Ministerial Statement was released setting out forthcoming amendments to the Framework (NPPF).

The Statement set out the following (inter alia):

I will retain a method for calculating local housing need figures, but consult on changes. I do believe that the plan-making process should start with a number. This number should, however, be an advisory starting point, a guide that is not mandatory. It will be used in consultation with their communities, to determine how many homes can actually be built, taking into account what should be protected, such as the precious Green Belt or national parks, the character of an area, or heritage assets. It will also be up to them to increase housing if they wish.

My changes will instruct the Planning Inspectorate that they should no longer override sensible local decision making based on local constraints and concerns. Overall this amounts to a rebalancing of the relationship between local councils and the Government to give local communities a greater say in what is built in their neighbourhood.

Obviously none of this has been taken into consideration. Local communities have been totally ignored. The precious Green Belt, the AONB will be severely impacted. The fact that the site was not ideal at the outset and the mandatory requirements for it is unsound to go ahead and develop on an unsatisfactory site.

Furthermore, the information available to support the current consultation (Reg 19) being undertaken on the Local Plan is riddled with factual inaccuracies.

The housing numbers for northeast Thatcham – positioned in Reg 19 as a reduction from 2500 dwellings to 1500 - is a minimum and an approximate number and the supporting studies are still based on an eventual size of 2500 dwellings. Consultation envisaged that only 1250 dwellings would be built in the plan period, and this has increased to 1500. The number of sites that have been added since the last update, and which have been rejected. The WBC process is the process not the end.

The Air Quality Assessment that is part of the consultation documents is based on the LPR running to 2037, not to 2025, which affects the traffic levels forecast for the end of the LPR period and the resultant traffic pollution.

There is no evidence WBC has complied with its legal duty to cooperate with Berkshire West Clinical Commissioning Group (WBC) GP surgery promised for north east Thatcham.

There is no evidence that WBC has consulted properly with Thames Water over the time needed for provision of water supply to the houses for north east Thatcham are deliverable in SP17 in the plan period.

The Settlement Boundary background paper shows the Thatcham settlement boundary already extended to the line of the 2500 houses, yet the plan now refers to a minimum of 1500 houses – this could be read that 2500 dwellings is still suitable within the extended boundary.

The new provision for secondary schools in north east Thatcham is not consistent with WBC guidelines for the minimum viable size for a secondary school. If the primary provision is 2.5 Forms of Entry, then so presumably is the secondary provision to meet the impact policy 2013 states that the minimum viable size for a secondary school is 4 Forms of Entry.

The Secretary of State's Written Statement of 6th December 2022, which removed the need to maintain a 5-year housing target with up-to-date Local Plans, removed top-down housing targets (particularly for Local Authorities with constraints like the Green Belt) and a transition period for LAs in the final stages of preparing Local Plans and this statement should be taken into account. Because of these points, and many more, the Reg 19 LPR Submission in its entirety should be considered as unsound.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?
 * Yes
 * No

Please give reasons for your answer

4. Proposed Changes

5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?
 * Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.	

* Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>I hereby object to the above plan as I find it unsound in a number of important regards:</p> <ul style="list-style-type: none"> • The plan for a car park near and junction exiting onto Harts Hill Road is ill-considered. It will increase traffic onto an unpaved area with no pavements and no road lighting. The sharp bend on this road is already dangerous; oncoming traffic is frequently travelling over the centre line. This road is also regularly in a dreadful state of repair and road markings are often virtually non-existent here for serious accidents to occur. • The plan is likely to see a significant increase in traffic through Upper Bucklebury towards Chapel Row and Southdown. Stretches of road across Bucklebury Common are again unrestricted, unlit, have no pavements and are very poorly maintained. Groups of deer often run from the common across the road without warning and cause accidents. I have personally been hit by the front bumper of my car. • The plan needs to better consider the provision of suitable medical and dentistry facilities. At the Chapel Row surgery, the premises have been extended but at times there is still a need for people to park on the grass opposite (along the Avenue). This is a problem that is likely to get worse if the plan is approved. • The plan will, because of the number of proposed houses and therefore people and cars involved, inevitably place additional pressure on the important and fragile ecosystems on Bucklebury Common and the wider AONB. These should not be sacrificed for short-term and economic benefits. • What provision is to be made for shopping locally? There is already an insufficiency of supermarket shopping in the area (the relatively small Waitrose) with inadequate parking facilities. There will inevitably be a significant increase in traffic from the need to access Pinchington Lane (Newbury) shops via the Greenham Common Road - with associated local congestion and noise. This is true for both Newbury and Calcot. None of this is good news for the area where the roads are already in an atrocious state.

Please give reasons for your answer	<p>This is to confirm my objection to this development which has been ill thought through.</p> <p>Whilst not in an AONB the sheer scale in number of the proposed dwellings would have a detrimental effect on the AONB in the wrong place, being too close to Bucklebury and Midgham.</p> <p>If there have to be a certain number of homes built in West Berks, and even that is highly debatable, Colthrop would be a better option. Issues could be over-come, but any site that is already partially brownfield, rather than green fields, would be a better option.</p> <p>In conclusion there are too many homes and they are in the wrong place. This must seem obvious even to anyone who has visited the area.</p>

Please give reasons for your answer	<p>The LPR is not positively prepared and would not achieve the goal of sustainable development for WBC and the w</p> <p>The LPR is not justified. Many of the grounds for assessment of impacts and benefits lack credibility and is not based on alternatives have not been adequately explored and there is no basis to demonstrate that the allocation of North East Th</p> <p>strategy for WBC.</p> <p>The LPR is not effective. There is no evidence that the development of 1,500 homes at North East Thatcham is del</p> <p>The LPR is not consistent with national policy. In many instances the allocation for development of North East Th</p> <p>directly conflict with national policy, particularly in relation to landscape character and impact upon the AONB.</p> <p>My Objections are:-</p> <p>Education</p> <p>The Local Plan Review (LPR) is scant on detail for provision though Nursery to Secondary education. It breaches th</p> <p>education facilities for children. Without this how can such a large housing development be contemplated?</p> <p>The LPR proposes a sum of £12million to be contributed by the developers for Primary Education. With no current d</p> <p>a reasonable number. It does not refer to timing of such development, which would need to be in place before familie</p> <p>Current Secondary school place allocation is driven by distance from the school. Such a density close to the oversubs</p> <p>places to families from the surrounding rural villages and removing any choice.</p> <p>The plan for secondary school provision is unsound:</p> <p>No satisfactory evidence of the number of pupils the school is to cater for.</p>

	<p>No clearly defined location for a proposed school.</p> <p>Number of Form Entries in not defined , so how can it be declared that a new school will be developed , when at least to be viable?</p> <p>The timing and amount of funding is unclear as to whether it is sufficient?</p> <p>Transport</p> <p>The WBC accepts that there will be 'some displacement of A4 traffic onto wider rural areas such as Upper Bucklebury Assessment Report July 2021 shows an exit onto Harts Hill. Traffic exiting here will most certainly continue on the rural roads Cold Ash & Chapel Row and is in addition to 'some displacement'.</p> <p>The new residents in the development will be commuting to Reading and Newbury so soon the Chapel Row – Cold Ash is a choice. This is a rural road with existing accident blackspots, with little pedestrian provision.</p> <p>The Transport Assessment proposes priority junctions at each exit from the site, but show no modelling evidence, and no drawings.</p> <p>Safe and Sustainable Transport</p> <p>The Strategic Environmental Assessment (SEA) , Objective 4 is "To promote and maximise opportunities for all forms of transport. Increasing traffic onto the surrounding rural roads is counter to Objective 4.</p> <p>Public Transport to the rural villages will not be supported by the development as the desirable routing would be by e</p> <p>Healthcare.</p> <p>Given the size of the proposed development, why is there no Health Impact Assessment (HIA)? How does the proposed development fit into the existing provision? It is my understanding that it is unlikely that an existing GP practice would entertain the proposed development. Consequently, the demand will spill over into already overcrowded GP practices.</p> <p>Environment</p> <p>I can find no evidence in the WBC submission to support the claims that the development will have positive impact on the environment. The Appraisal accepts that the development will have a negative impact on environmental sustainability, declaring this would be the case if no such measures are provided.</p> <p>I would estimate an additional 4,000 people will be looking to have access to green space for recreation and well being 'green parks' which have no accepted definition and can hardly be interpreted as taking access to green space seriously.</p> <p>The natural focus of the 4,000 inhabitants will be the Ancient and protected woodlands adjacent to the site, counter to the fragile ecosystems of Bucklebury Common.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>

Please give reasons for your answer

These representations conclude that given the sites close proximity to the proposed residential development on Policy SP17 site allocation, it is considered that firstly the Site should be included within the site allocation boundary of Policy SP17 and secondly it should be included as a biodiversity net gain and/or strategic alternative natural greenspace for the wider allocation. If required, it is considered that the Site could also be hosted on the Site.

Introduction to the Site

As explained above, our clients own the Site named land to the north east of Floral Way, Thatcham. This has been in the ownership of our clients for many years, with the Site previously being part of a wider ownership which has reduced as parts of the Site have been sold.

The Site is a square shaped parcel of land to the east of Thatcham which comprises of a telephone mast and number of trees. The Site is also subject to two Tree Preservation Orders (TPOs) on the Site itself, however the Site is designated as ancient woodland (The Plantation) to both ancient woodland and TPOs. The Site has an existing and established highway access from Floral Way. The Site is also designated as a Local Wildlife Site (SU56J01).

The Site is adjacent to the settlement of Thatcham, which is identified as an Urban Area in the settlement hierarchy. The Site is adjacent to a wide range of services and are to be the focus for the majority of development. The western site boundary adjoins the settlement of Thatcham.

There is one record of planning history on site, this relates to the approval for the erection of a 15m high lattice tower and antenna (00/00388/TELE42) in August 2000. The Site has not formed part of an allocation in a Local Plan previously.

Housing and Economic Land Availability Assessment (HELAA) analysis for the Site

The Local Plan Review is supported by a number of evidence base documents. The HELAA is a key evidence document. The latest HELAA was published in January 2023, ahead of the Local Plan Review consultation. The Site has been included in the HELAA as THA22: Land to the north east of Floral Way, Thatcham and was added as a new site in the most recent HELAA.

The HELAA notes that the Site is adjacent to the settlement boundary, its existing use is described as a telephone mast and woodland amenity as part of the North East Thatcham development. It is described as greenfield land with a site area of 0.65 ha.

The Site was shown to have very few constraints within the HELAA, however, it is ancient woodland. Furthermore, the Site is adjacent to a wide range of services and are to be the focus for the majority of development. The Site has the lowest probability of flooding. Given the woodland constraint, it is considered that the site could be suitable for residential development.

<Specific comments on other policies are logged in the relevant place>

The inclusion of Policy SP17 (North East Thatcham Strategic Site) is welcomed within the Regulation 19 Plan. In terms of the emphasis on green infrastructure and biodiversity net gain within the policy is supported. However, it is considered that the Site adjacent to the site on the western boundary, should be included within the site allocation boundary of Policy SP17.

It is considered that the Site was not suitably assessed for allocation through the emerging Local Plan as it had not been included in the Council prior to 2018.

The evidence base supporting the Policy SP17 site allocation is based upon the Thatcham Strategic Growth Study three part study undertaken between 2019-2020, prior to the site being submitted to the Council.

Stage 2 of the Thatcham Strategic Growth Study assesses the HELAA submissions to determine the sites which may be included in the Local Plan. It can be noted that the Site has been excluded from this study, as shown in figure 1, as it was not known to the Council at the time of the study. In the most recent HELAA published in January 2023. In line with paragraph 35a) of the NPPF in which lists the tests that sites must be tested against, it is considered that criterion b) has not been satisfactorily met. <Fig 1 in attachment>.

Suitable uses for the site

As outlined above, it is considered that the Site was not considered through the Thatcham Strategic Growth Study as it was not known to the Council prior to 2022.

The masterplan for the site as outlined in the third stage of the Thatcham Strategic Growth Study shows the area adjacent to our client's site as residential, as shown in Fig 2. It is important to note that the area south of our client's site (and which is included within the site allocation boundary) also has a number of trees which are over 5 years and therefore are in a comparable position to our clients site. <Fig 2 in attachment>.

The HELAA concludes that the Site is suitable, available, achievable and potentially developable. In addition, it states that the Site is suitable for residential development. The site currently comprises of woodland'. The site currently comprises of woodland'.

The HELAA concludes that the Site is suitable, available, achievable and potentially developable. In addition, it states that the Site is suitable for residential development. The site currently comprises of woodland'.

The HELAA concludes that the Site is suitable, available, achievable and potentially developable. In addition, it states that the Site is suitable for residential development. The site currently comprises of woodland'.

National Planning Policy Framework paragraph 32 requires 'Local plans and spatial development strategies should be prepared in conjunction with a sustainability appraisal that meets the relevant legal requirements. This should demonstrate how the plans meet the economic, social and environmental objectives (including opportunities for net gains).'

The National Planning Policy Framework 2021 para 174 (d) requires 'planning policies and decisions should contribute to the protection and enhancement of the local environment by minimising impacts on and providing net gains for biodiversity'. Paragraph 179 b) also requires that planning policies and decisions should 'promote the conservation, restoration and enhancement of priority habitats and species; and identify and pursue opportunities for securing measurable net gains for biodiversity'.

The National Planning Policy Framework 2021 para 174 (d) requires 'planning policies and decisions should contribute to the protection and enhancement of the local environment by minimising impacts on and providing net gains for biodiversity'. Paragraph 179 b) also requires that planning policies and decisions should 'promote the conservation, restoration and enhancement of priority habitats and species; and identify and pursue opportunities for securing measurable net gains for biodiversity'.

The National Planning Policy Framework 2021 para 174 (d) requires 'planning policies and decisions should contribute to the protection and enhancement of the local environment by minimising impacts on and providing net gains for biodiversity'. Paragraph 179 b) also requires that planning policies and decisions should 'promote the conservation, restoration and enhancement of priority habitats and species; and identify and pursue opportunities for securing measurable net gains for biodiversity'.

The Environment Act 2021 introduces a requirement for developments to provide a minimum of 10% biodiversity net gain. This requirement is emerging which when in place will make this a statutory requirement in law, and therefore required for all developments. The Government have recently confirmed (on 21 Feb 2023) through their consultation response to the consultation on Biodiversity Net Gain Regulations that the 10% requirement will come into force in November 2023, and Summer 2024 for smaller sites. Fig 3 shows opportunities for biodiversity net gain as taken from the Thatcham Strategic Growth Study. <Fig 3 in attachment> .

The Environment Act 2021 introduces a requirement for developments to provide a minimum of 10% biodiversity net gain. 1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	

<p>Please give reasons for your answer</p>	<p>I am writing to object to the above plan as I feel it is unsound.</p> <p>My wife and I have lived in Chapel Row since the beginning of 1979 (nearly 44 years). In that time we have raised a family and acquaintances and become very much part of village life.</p> <p>We have been extremely happy here and plan to spend the rest of our lives here.</p> <p>Over the past five years or so, traffic in the village has seen a big increase, especially when there are problems on the village roads do not have paths and street lighting. Drivers do not always take notice of the speed limits through the common. With the proposed plan to build at least a further 1500 houses in the North East of Thatcham, we foresee a need for plans for possible speed restrictions or calming measures proposed. We can see the potential for serious accidents.</p> <p>We use the footpaths and byways on Bucklebury Common regularly for walking and exercising the family dogs, (especially in winter). However, over the last few years this has become increasingly spoiled by people driving their quad bikes, motorbikes etc. not intended for this purpose. Also fly tipping is on the increase. Allowing more people access will undoubtedly result in a significant impact on walking, cycling, horse-riding. It will also impact on the wildlife in the area.</p> <p>The plan will have a big impact on education in the area, especially secondary education, and NHS doctors, and dentists. There appears to be no serious attempt to investigate and address the consequences of building such a large number of brownfield sites around that would be more suitable and less impactful.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>

<p>Please give reasons for your answer</p>	<p>I am objecting to the West Berkshire plan on the basis of over-development in the area.</p> <p>Plenty of new housing has already been built and it will fall within the AONB. The current roads will not be able to handle already extremely busy especially in the Bucklebury area which is already struggling to cope with the existing traffic. That beautiful part of the area and set a precedent for further development. Plenty of new housing has already been built and was understood to be the boundary to ensure no new housing would be built past there and up the hill.</p> <p>Also it would place considerable strain on the current infrastructure (roads etc).</p> <p>For the reasons above I strongly object to the plan.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	<p>The 2021 Environment Act states that by the end of 2023, all new developments in England are meant to be providing net gains. This means that, before any development begins, there is a legal requirement for WBC to submit a biodiversity net gain statement and proposed biodiversity values of the sites.</p> <p>The SP17 Northeast Thatcham site has a much higher biodiversity value than the WBC might appreciate with ponds and meadows immediately on its perimeter. But there no firm plans within the LPR to retain, protect or monitor these local biodiversity meadow buffer zones around the development or within the site.</p> <p>Once built on, this greenfield land will be removed for perpetuity, and the next generation would not thank us for that. In addition to the issue of legal non-compliance, the soundness of the LPR is questionable for reasons given below.</p>
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable	No

<p>alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>The LPR is unsound because: ENVIRONMENT.</p> <ol style="list-style-type: none"> Given the UK is one of the least biodiverse countries in Europe, there is no plan within the LPR as to how a 10% (requirement) will be achieved. There is no probability of a biodiversity net gain because SP17 is a greenfield site. The LPR is inconsistent with national policy (NPPF, section 15, page 50) for 'protecting and enhancing landscapes 'recognising the intrinsic character and beauty of the countryside'. There is no reference within the LPR for an Ecological/Biodiversity plan to include wildlife corridors and buffer zones and prevent collateral damage to woodland. There is no reference within the LPR for a 'Net Zero Carbon' report detailing carbon and methane emissions during concrete, steel, and tarmac manufacture, and construction vehicle emissions). These are likely to constitute hundreds of CO2-equivalent emissions and there is no plan to offset these either through tree-planting or a carbon offset levy on (are doing). The LPR is inconsistent with WBC's own Core Strategy (2006 - 2026) to 'maximise the use of brownfield land and Lord Deben (Chairman of the UK Independent Committee on Climate Change, and former Conservative Party Chancellor) that 'planning laws should assert that every decision should be made with climate and sustainability in mind'. The LPR does not address climate and/or sustainability. Why can't West Berkshire be a Climate and Sustainability Leader rather than bowing to political to meet housing quotas? Bucklebury Common is a fragile woodland and heathland infrastructure. Siting 1,500 homes in the immediate vicinity of 'community park' would cause significant degradation to the wildlife population and significantly increase the risk of wildfires in the hot summers (there were two brush fires on the Common in 2022). Significant biodiversity loss, habitat fragmentation, and loss of local carbon sinks (meadows, wetlands and woodland) will occur through construction with collateral damage occurring in and around the site. There is no plan in the LPR to monitor and mitigate this. No reasonable alternatives for the site have been presented: the SP 17 Policy has not shown that it has considered alternatives that are beneficial to the community and less onerous for biodiversity and the environment such as modest-sized wind farms. Why can't West Berkshire be a 'Climate Leader'? There is no discussion in the LPR detailing how it would limit further residential and industrial sprawl along the A4. Further urban sprawl is part of the plan. The development will raise surface runoff into the Kennet River valley which will increase flooding risk along the river. <p><Photos in attachment></p> <p>NEWBURY TOWN CENTRE REGENERATION</p> <p>12. In my view, West Berkshire Council should be stimulating residential growth within Newbury town centre to mitigate the impact of the current time the Kennet Centre near the original Debenhams (rather than the more recent Parkway site) is empty and should be reinvigorated with high quality apartments with roof gardens and courtyards to attract people to live in that part of the town. Is the southern end of Northbrook Street? Otherwise, Newbury town centre will begin to fail. Locating 1,500 families in the use of Newbury amenities.</p> <p>TRAFFIC AND POLLUTION.</p> <p>13. There is no plan for how the additional traffic (the heavy vehicle traffic during construction and 4,000 cars per day) will be managed through the villages of Bucklebury and The Ridge, Cold Ash. In fact, there is no detail in the LPR on the duration of construction, how many vehicles will be involved, where the access will roads be, and how construction will be monitored and controlled to limit the impact.</p> <p>14. To counteract the increased traffic and vehicle pollution on the A4, Floral Way and Harts Hill Road, and in line with the Council's Emissions strategy, WBC needs to issue a plan for the use of Zero Emission Vehicles on the site.</p> <p>HEALTHCARE</p> <p>15. No substantive discussion is included in the LPR to indicate that thought has been given to the impact on Chapeau when a significant proportion of 4,000 new patients are enrolled. Furthermore, a new healthcare facility is mentioned in the LPR, when it will be operational, nor how it will be staffed given a shortage of medical professionals in the area.</p>

	<p>EDUCATION.</p> <p>16. There is no reference in the LPR as to how increased nursery, primary and secondary education will be provided education facilities will need to be built and where? (attachment)</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>The Duty to Cooperate places a legal duty on WBC to engage actively and regularly with the community with respect to planning. It remains to be seen how, going forward, the WBC will act on view and recommendations from those who oppose the LPR SP17 Policy. Hopefully recommendations will be acted upon and there will be opportunities for Bucklebury and Thattham communities rather than WBC ignoring the views of the communities in favour of pressure for local housing quotas.</p>
<p>4. Proposed Changes</p>	<ol style="list-style-type: none"> 1. The LPR needs to incorporate a Biodiversity Net Gain Plan and Environmental Impact Assessment (EIA) to measure biodiversity values of the sites and prove that there will be a biodiversity net gain which must then be monitored. 2. It seems there is little likelihood of a demonstrable biodiversity net gain because SP17 is a greenfield site. Building an AONB would be severely detrimental for existing and future communities, animals, and plants in the county and district. More likely there will be a significant biodiversity loss in an area already under threat. This needs to be addressed. 3. There needs to be an Ecological/Biodiversity plan within the LPR to include 500 metre wildlife corridors and green infrastructure (between the edge of the site and the development; and throughout the site). 4. WBC needs to issue a 'Net Zero Carbon' report detailing all emissions during construction, carbon generated through operation, and mitigation and offset. 5. This LPR is inconsistent with the NPPF on protecting landscapes, biodiversity and soils; recognising the intrinsic value of the countryside; providing net gains for biodiversity; establishing resilient ecological networks; improving air and water quality. The LPR is inconsistent with WBC's own Core Strategy (2006 - 2026) because the SP17 Thattham NE development is a greenfield, not brownfield site. 6. West Berks Council in its SP17 Thattham NE development proposal has given virtually no thought to climate and carbon emissions. This needs to be addressed. 7. WBC needs to generate a report, in conjunction with Royal Berkshire Fire and Rescue Service, assessing the fire risk and access to Bucklebury Common (which is tinder-dry in Summer and prone to woodland fire), and how this will be mitigated. 8. Account needs to be taken of the loss of local carbon sinks through the destruction of the soils, meadows, wetlands and trees in the SP17 area. This need to be addressed in the EIA and a mitigation plan put in place. 9. a) WBC needs to demonstrate that it has considered alternative uses for the SP17 land which are more ecologically sustainable to the community and biodiversity. For example, did they consider a modest-sized wind, solar farm or rewilded countryside? b). Further, it needs to show that brownfield sites within the town centre (such as the Kennet Centre and the old Debenham) will be used for additional accommodation with the intent of helping to regenerate the southern part of town Newbury. 10. The WBC needs to generate a report detailing how it would plan to prevent further urban sprawl along the A4 towards the town centre. 11. A drainage plan needs to be generated to show how the additional surface runoff generated on the flanks of a hillside will be managed on the A4 and Floral Way. 12. More consideration and lateral thinking needs to be demonstrated by WBC in considering sites for 'green urban' development. For example, the southern part of Newbury town centre. 13. There is no plan for how the additional traffic (the heavy vehicle traffic during construction and an estimated 4,000 extra vehicles per day) will be routed through the villages of Bucklebury and The Ridge, Cold Ash. More detail is required on the duration of construction, the number of construction vehicles involved, where the access roads will be, and how construction will be monitored and controlled. 14. To counteract the increased traffic and vehicle pollution on the A4 and Harts Hill Road, and in line with the Government's strategy, WBC needs to issue a plan for the use of Zero Emission Vehicles on the site. 15. A Healthcare Impact Assessment needs to be generated to assess the impact on Chapel Row and Thattham surgery if 4,000 new patients are enrolled; and how and where a new healthcare facility will be installed, operational and staffed. 16. A Pre-Secondary and Secondary Education Plan needs to be produced to cover items such as: number of expected pupils, the timing of funding, staffing, breadth of curriculum, facilities, traffic impacts etc.

<p>over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I wish to register my strong objections to these proposals.</p> <p>The plan to build between 1500 and 2500 houses on farmland below my property here will have a seriously detrimental impact on my neighbours here. There will be a huge impact on the wildlife and quiet darkness which is currently enjoyed here. Furthermore, 2500 cars on the local area will be huge resulting in significantly increased congestion with a very negative environmental impact, an extra burden on local schools, GP surgeries and all services.</p> <p>It makes no sense that West Berkshire Council (WBC) are still pushing forward with these plans when the Government has made changes to the national planning system whereby central government will no longer set mandatory targets for housebuilding. Gove (Secretary of State for Levelling Up, Housing and Communities) released a Written Ministerial Statement setting out the new approach to the National Planning Policy Framework (NPPF)</p> <p><i>It will be up to local authorities, working with their communities, to determine how many homes can actually be built, and how green belts be protected in each area - be that our precious Green Belt or national parks, the character of an area, or heritage assets.</i></p> <p>As the new proposed Local Plan, which includes the North East Thatcham new town (that is in effect what it is) has been approved, the rules, it is now fundamentally unsound. Several Local Authorities have paused their plans whilst they await the outcome of the new national planning policy on the basis that a lower housing requirement could be applicable to the plans than the one currently in place. I feel that WBC should take the opportunity, as others have, to pause the plan making and to bring forward a revised plan in line with the guidance when this comes in later in 2023. Instead, WBC have sought to push through the new Local Plan quickly, without regard to the new national policy. This failure to respond to a very significant change in national policy renders the current plans fundamentally unsound.</p> <p>WBC have further made the irrational decision to continue to use the government housebuilding estimates from 2014 with no revisions to those projections, specifically in 2016, which lowered the requirement. Yet WBC has chosen to ignore the new national policy and the LPR unsound.</p> <p>There are serious questions about why WBC has been pushing plans for the NE Thatcham site using just one developer. The developer funded a report for WBC on the plans which, to no surprise, gave full support. It is at best irregular and poor practice for a report to be funded by a developer with a vested interest. The report should not play any part in the consideration of the plans. In its place there should be a further and truly independent report.</p> <p>There are further serious questions why WBC refused to engage with other developers, namely Croudace, who have been working with Colthrop which is much better suited to development and has the added advantage that Croudace would fund and build the development. This would be highly beneficial in easing the delays and congestion at the level crossing at Thatcham. Yet WBC have chosen to ignore this and are out of hand. That suggests unsound practice.</p> <p>The farmland around our properties here at <personal details> are owned by Wasing Estate and they have been shown to be productive for many years with a variety of crops. With the increased focus on UK food security, it makes no sense to build on productive farmland. WBC has recently reiterated that future developments must be prioritised on brownfield sites.</p> <p>If the farmland is built on there will be a significant detrimental environmental impact as it is current home to a great many species of animals. WBC have been woefully inadequate in their consideration of this impact.</p> <p>On the broader issue of development, the Newbury/Thatcham area has already been impacted by a huge increase in housing. This is a very large and continuing development at Newbury racecourse, the Donnington Heights development, the new retirement homes at Thatcham, the development on Bowling Green Road. There are many other examples. This part of West Berkshire is already overdeveloped and the proposal to just place 1500/2500 on farmland is totally lacking in merit.</p> <p>There are serious questions about why WBC think the NE Thatcham site is suitable. In recent years they rejected the development at Siege Cross, which forms part of the current NE Thatcham plans, with thorough and substantive reasons for their rejection. Yet they then forcefully supporting development on the site they rejected. WBC need to explain how they have come to do so.</p>

WBC have failed to undertake an adequate flood assessment for the NE Thatcham site, which is just as much at risk, parts of Thatcham where substantial works have been undertaken. The plans put forward by the developer are woefully inadequate and have been rejected outright. The highly flawed report for WBC, as I have pointed out funded by the developer, is cast in doubt.

If the NE Thatcham plan is approved, it will create unsustainable pressures on health services in the area which are already at capacity. The developers appear to have neither arranged a relevant HIA nor provided evidence of having appropriately liaised with GPs or providers. They are proposing a healthcare site that is unsuitable for NHS primary care and so have not made provision for 1,500 or more new houses will make on a local NHS struggling to cope. The objective of WBC and the North-East Thatcham plan to improve access to the health service component of community infrastructure has not been met as they have not provided for a viable primary care medical facility. WBC failures in this aspect represent a fundamental flaw and any plans could be overturned if a comprehensive review is undertaken.

Schools in the local area are already at capacity yet there are no substantive proposals in the current plan for how this need for school places is met. There is an unspecific mention of a new secondary school but no indication of where it would be located. If the developer to fund such a school, the flawed report merely suggests a 50% contribution. WBC, as an education authority, has a duty to make arrangements for suitable school provision. How this obligation will be met across all school years is not defined or even mentioned in the LPR unsound.

I have mentioned previously the issue of traffic and the NE Thatcham plans currently proposed include a new access to the site which is already coping with a far higher traffic flow than it can reasonably do so. The road is narrow and twisting and already at capacity. A new access on Harts Hill Road would create a significant accident risk.

The plans for NE Thatcham also include a vague mention of a "country park", with no indication of what that actually means. The open countryside, with relevant footpaths, there is no logical argument for a country park. This seems to have come from the lead developer A2Dominion, who show no understanding of the value and importance of unspoilt countryside.

WBC have also failed in their basic duty to check on the integrity of any developer. A brief look at the Facebook page for A2Dominion, which gives voice to owners and renters of A2Dominion properties, will quickly make anyone aware of the serious financial problems of A2Dominion responsibly and it is clear that they cannot be trusted to fulfil any commitments they promise.

The loss of such a large greenfield site, which is currently a significant amenity for local people cannot be overstated. The loss would be immense, not only on the wildlife and loss of habitat but also putting pressure on a wide surrounding area. If the plans were to proceed, they would mean perhaps 5000 people, 2500 cars being on developed land which is currently farmland. The Sustainability Appraisal accepts that SP17 will have a negative impact on environmental sustainability: 'The site is a greenfield site which will result in a negative impact on environmental sustainability which would need to be mitigated.' But there is no detail on what mitigation measures: the assumption is simply that they will somehow be found during the planning application process. This makes the proposals unsound.

[Below comments added in follow up email 01/03/2023 16:16]

Further to my submission below I have just been informed that Bucklebury Parish Council commissioned a Traffic Study by Yes Engineering. The conclusions are

- The trips rates used by WBC are unreliable and not robust.
- The trip distribution is unrealistic (all evidence suggests traffic will be diverted from the A4).
- The mitigation measures are improbable at best.
- The location of site means car-borne travel will dominate.
- Highway network in the vicinity of Thatcham Northeast is already over capacity.
- No assessment has been made of the routes most likely to be affected by an increase in traffic.
- Increase in traffic through Bucklebury will pose highway safety issues.

These conclusions are further evidence that WBCs plans are flawed and unsound

2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes	

<p>* No</p> <p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>I have lived in Upper Bucklebury since [personal information redacted] and I object strongly to the proposed Local Plan (set out below) and that it will have an irreversible negative impact on quality of life.</p> <p>Transport</p> <p>Access to/from the development will be via the A4 which is already gridlocked at peak times with traffic backing up along the A4 to Reading or the M4/A34 will inevitably seek an alternative route up Harts Hill through Upper Bucklebury. Harts Hill has caused numerous accidents over the years and is especially dangerous in winter, even when gritted. The development through Upper Bucklebury and pose an increased risk to villagers walking their children to school in the morning or in the evening on no pavement along Burden's Heath, which cars will use to head towards Cold Ash and Junction 13 of the M4.</p> <p>Healthcare</p> <p>The healthcare proposals contain only wishful thinking with no detail and an absence of consultation with existing medical practices. There have been no Health Impact Assessment. NHS England has commissioned few new GP practices, so the burden will be placed on already overstretched. Bucklebury is fortunate to have a well-managed medical practice but it was stretched during the provision of repeat prescriptions and other services. An excess of potential new patients will have a severe negative impact on service to its current list.</p> <p>Environment</p> <p>The Plan will have a severe negative impact on the footpaths and woodland in the proximity of the development. With the development and is traversed by means of a narrow footpath, with few visitors encountered on each walk. The development will increase footfall, widen the path and change the character of the area. Bucklebury Common similarly has many narrow paths and the flora and fauna. The development will result in a significant increase in pollution – light, noise and emissions – all of which will have a negative impact on the environment.</p> <p>Strategic gap</p> <p>Upper Bucklebury retains its separate identity from Thatcham solely because of the green strategic gap north of the A4 and distinct boundary between the two urban areas. If the North East Thatcham development proceeds Upper Bucklebury will merge with Thatcham and will itself become North East Thatcham. The rural nature of Upper Bucklebury will be destroyed.</p> <p>Education</p> <p>The Thatcham NE Development Plan, funded by the developers, was based on West Berkshire District Council data and is therefore out of date. The same plan also notes that the proposed development is not sufficient on its own to meet Government guidelines state that secondary schools with less than 6FE are not sustainable. The developer funding the development, construction, and has no impact on the substantial running costs of the school. Much of the site is sloping and there is no sports field, unless it is close to the A4.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes	

<p>* No</p> <p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I object to the above proposed development for the following reasons.</p> <p>1 INFRASTRUCTURE The proposal is a gross overdevelopment in a town that has suffered too many large developments that have the ability to provide and maintain the associated infrastructures. The maintainance of our roads and paths is suffering due to my wife's mobility scooter dangerous to use. Rubbish piles up on our hedges and on our verges and it takes us too long to clear rates, having to carry out rubbish collection.</p> <p>Another large development of this size and density will add to an increasingly underfunded and undermanaged infrastructure.</p> <p>1 EDUCATION. Assuming an increase in the town population of at least 7500 of which 2000 could be of school age, the existing schools will be overwhelmed. There are proposals for new schools in the development, which will probably not be sufficient. A high number of required staff could ever be found. Therefore the development is untenable on this area alone.</p> <p>1 HEALTH The same arguments apply. There are already insufficient GP Practices and it is unthinkable what an increase in population will have. We already cannot get appointments or even prescriptions fulfilled due to pharmacies under staffed and unable to dispense medication from the Thatcham Medical Centre. However this requires queuing outside and as we are in our 80s it is difficult at any time let alone in winter conditions so requires many trips to Boots at the Newbury Retail Park. Not good for the elderly. Similarly it is already impossible to get NHS dental treatment in the town. We have the hospital at West Berks but it is noticeable how much more difficult over recent years it has become to park let alone get appointments. With 7500+ people have on general hospital appointments let alone A and E. Again the development is not sustainable.</p> <p>1 HIGHWAYS. A development of this magnitude could conservatively add eventually 5000 plus cars to an already congested area already difficult to get onto Floral Way at certain times. Most will use Harts Hill, as many now do, to cut through the town to avoid the heavily trafficked A4 which will make life for people living on that route unbearable. Parking, already difficult, and this will affect businesses in the town of Thatcham. It will also mean more unmaintained paths and roads becoming unusable. I suggest a walk along Harts Hill Road from Floral Way to London Road and Floral Way from Harts Hill to London Road. Rubbish piling up in the hedges. Whilst I appreciate the lack of social conscience by some of our residents is the problem, the actions of residents over a relatively short period of time will exacerbate this serious anti social problem.</p> <p>1 CONCLUSION This proposed development is overwhelming, impracticable, untenable and unwanted. It is my opinion that if it is ever in construction including major housing developments nationally, that promises made regarding highways schemes will never be met. Further more the housing density, supported by planning, ever increases which improves the density of housing. We are now required to find room an increasing number of refuse containers but the ever higher housing density demands more of dedicated areas per plot for the storage of these. A small point but this leads to an ever untidy and cramped environment. I once insisted on a certain number of parking places relating to bedrooms on a plot but is now happy for people to have more bedrooms resulting in more vehicles parking in roads and usually on paths making the use of mobility scooters a struggle. For up to 2500 houses, the equivalent to building Hungerford attached to Thatcham, is totally unacceptable and will further strain our already overstretched infrastructure and increased social pressures which will undoubtedly result in higher density housing. The mentioning the loss and damage to our delightful countryside and loss of much needed agricultural land will be a major and protracted building programme. There is also the undoubted pressures and disruption to existing businesses required to provide more home grown produce.</p>

<p>Please give reasons for your answer</p>	<p>The LPR does not explain how the necessary educational requirements will be met. It is unsound because there is no what funding the required schools will be built. It states that a secondary school won't be viable but the proposal will schools to cope.</p> <p>The LPR is illegal and unsound because it does not provide the strategy documents to support its Sustainability Char how it will mitigate the ecological damage from building in a greenfield site.</p> <p>The plan is unsound because it doesn't explain how increased traffic on Harts Hill Road will be handled. It is already so totally unsuitable for walking, cycling or more cars.</p>

<p>Please give reasons for your answer</p>	<p>I am emailing my objection to the Thatcham NE Development. While I understand the need for more housing I cannot see how the development in Thatcham as the current infrastructure in Thatcham as is cannot provide and cope with this amount, new housing.</p> <p>If further development is to occur then the council will need to include in the planning: healthcare, a doctor's surgery, a GP surgery to be able to cope with demand as our current doctors are already struggling. Dentistry, as getting nhs dentist appointments. Schools. Primary schools need more funding and spaces to accommodate this further growth and not only that but the secondary school as Kenet and Trinity are both already very heavily/over subscribed. Drainage and sewerage also will be an issue in terms of the sewerage works which is struggling already with all the housing currently in Thatcham.</p> <p>For all these reasons I object to the development.</p>

<p>Please give reasons for your answer</p>	<p>To West Berkshire Council,</p> <p>As a resident of Thatcham for 30 years, I'm writing to raise my concerns over the proposed development of NE Thatcham being built from Cox's Lane to almost Lawrence's Lane and spreading up the beautiful countryside to Upper Bucklebury building a town the size of Hungerford on the edge of our Town!</p> <p>There are so many reasons why this development is WRONG and SHOULD NOT be approved!</p> <p><u>Infrastructure</u></p> <p>Schools, Doctors, Chemists, shopping facilities, parking in the town, and sports facilities can't even cope at the moment, busy, especially in the mornings, you can queue down Floral Way to get to the A4 way past the Mill House now! Today's traffic conditions as we are still living from post covid effects where more people are working from home, as we return to be traveling into the office, increasing traffic congestion to a level that's unsustainable. Parking at the train station is full and the queue caused by the level crossing is currently too long, with new housing you won't even be able to reach the station! How are all these issues going to be resolved, I see no plans in place to help with any of these.</p> <p><u>Environmental</u></p> <p>We live in a place of outstanding natural beauty and we love where we live. Our family love walking our dog in the fields that are to be built. These footpaths are used by so many people and the views are outstanding, this will all be ruined by the new buildings. Beautiful walks are good for people's physical and mental health. There is so much wildlife that depends on this open space being destroyed and would have an adverse effect on the AONB which WBC is required to protect! Building these houses will cause Thatcham Flooding again, surely this must be a concern for the council. Other issues will be increased light, noise, and traffic.</p> <p>It has amazed us that WBC has broken its own processes by not inviting others to tender for developing the NE Thatcham. The developer basically write the plan. It is wrong on so many levels and leaves us feeling that WBC does not care about the community.</p>

	<p>in Newbury and Thatcham all our lives! Is money from developers more important?? We are also troubled that other available that may reduce WBC's reliance on Thatcham North East to achieve a workable Local Plan are not being o to see a report on Newbury Today claiming there are flaws in the Local Plan has been strangely been removed?? W</p> <p>If these plans go ahead, we will strongly consider moving from the area, for many years we have been Conservative vote to another party that is more interested in their residents than receiving money from developers!</p>

<p>Please give reasons for your answer</p>	<p>Following the West Berkshire Council's publication of the Local Plan Review 2022-2039 Proposed Submission, I wish to object to all development sites noted under the Harts Hill Farm area(s) as I believe the plan to be unsound. Information is either that development is in breach of many policies outlined within the NPPF and WBC's own documentation. The proposed development will have a negative impact on the open countryside it will replace, the neighbouring AONB, ancient woodlands, and Bucklebury congested highway network and increase the risk of minor and fatal accidents in the process.</p> <p>I therefore object on the following items:</p> <p>Settlement Boundary</p> <p>Thattham Settlement Boundary follows Floral Way from the A4 north towards Lawrence Lane. Land to the north-east of the Settlement Boundary. West Berkshire Local Plan Review to 2036 – Regulation 18 Consultation, Policy 18 in the Countryside stated, “a presumption in favour of development and redevelopment within settlement boundaries and no development outside of settlement boundaries”.</p> <p>Local Plan Review 2020-2037 states that;</p> <ul style="list-style-type: none"> - Policy SP 1 “Opportunities will be taken to maintain and enhance the identity of Thattham separate to that of Newbury settlements.” - Policy SP 1 “The villages in the surrounding area will retain their existing role and separate identity, with settlement boundaries clearly defined and DC1 ensuring that physical separation is maintained.” - 5.42 “The separate and distinctive identity of these individual settlements helps to define communities and is an important feature of West Berkshire... Much of the pressure for development is around the edges of settlements, which can physically merge into one conurbation. An increase in activity which has an urbanising effect. Despite this, a key feature of even the larger settlements is the retention of breaks remain important for the continued retention of the existing settlement form, pattern and character.” <p>By extending the Settlement Boundary north towards Upper Bucklebury, the development will not only put undue pressure on the Ancient Woodland, but clearly contradict the council's statement made within the Regulation 18 Consultation document and numerous policies stated within the LPR. Any development north of Thattham will physically and geographically merge into one conurbation.</p> <p>The LPA's Housing Site Allocations – Newbury and Thattham Spatial Area, Table 2, Site Options Considered and Rejected. Hill states that the site was rejected based on “rural character, site separated from built form by Floral Way, potential for solar panel potential” and “overhead power lines”.</p> <p>As stated in Thattham Strategic Growth document instructed by the Local Authority provided by David Lock Associates, “development is affected by the surrounding relief. Apart from a small amount of development towards Henwick Park, the site remained in the valley bottom... The only submitted sites affected by relief constraints are located to the north of the site, to the north-east of Thattham”. Due to the site's topography, any proposed development will appear overbearing to existing buildings and Mews in both scale, mass, and bulk. Any development sited on higher ground would have direct views into existing buildings.</p> <p>The Strategic Growth document further mentions that the, “land at Harts Hill Farm... are closer to the AONB boundary than Thattham, and are more constrained for development in terms of topography, landscape sensitivity and ecology.”</p> <p>Thattham's Strategic Growth Study by David Lock Associates and Stantec for West Berkshire Council states that Thattham has previously received 2 major planning applications that were both, “refused ultimately for being outside of Local Plan settlement boundaries”. Both applications were further refused by the Secretary of State.</p> <p>I therefore believe that North East Thattham is of poor siting with regard to any proposed development, causing detriment to the importance of ancient woodland, Bucklebury Plateau and AONB, alongside the segregation from Thattham's built form. Any development to the north-east of Thattham will contradict the outlined policy noted above regarding separation between</p>

development will adversely amalgamate Thatcham, Bucklebury and Cold Ash. Were the LPA to amend the Settlement development areas, this amendment would solely be to facilitate the proposed development, undermining the intrinsic value of the area and its own policy.

Countryside, Greenfield and Brownfield Sites

Required under The Town and Country Planning (Brownfield Land Register) Regulations 2017, publicly available data from the Council Brownfield Land Register (Part 1)_2022 update states that, when published, there were 79 brownfield sites with a net dwelling total of 3,592 houses across a total of 59.87 hectares. Further, as published by MHCLG, West Berkshire Council has 1,000 empty homes. The NPPF also promotes the use of brownfield sites prior to any development within open countryside.

Thatcham's Strategic Growth Study for West Berkshire Council stated that, "Thatcham's attractiveness as a place to live is defined by the quality surrounding countryside". It goes on to state, "it is important to note that Thatcham has few examples of hills and the urban grain and pattern of the immediate surroundings is unlikely to achieve a positive result". The Strategic Growth Study was prepared and obtained by West Berkshire Council though it appears the proposed development's siting is a brazen contradiction of the above, either being ignored or disregarded by the WBC LPR.

Section 4.2 of the West Berkshire Local Plan Review 2022-2039 states, "The NPPF promotes the effective use of land, encourages higher densities in urban areas of high housing demand and refers to the need to release land for development".

The NPPF also states under paragraph 119 that planning policies should promote an effective use of land, "while safeguarding the environment". Under paragraph 120 the NPPF states that policies should, "give substantial weight to the value of using land for settlements for homes and other identified needs, and support appropriate opportunities to remediate despoiled, degraded or unstable land".

The North East Thatcham development site is outside the settlement boundary, rural, within open countryside and is therefore disagree that the site could ever follow the existing grain of Thatcham built form, does not promote effective use of land or improve the environment.

Although the LPR mentions it will mitigate against any environmental impact, most Local Authorities do not have sufficient resources to protect the biodiversity of an already thriving natural habitat, one that benefits from mature hedgerows, ancient woodlands, ponds, streams to name but a few, I'd argue that the development would never be able to meet any biodiversity net gain target.

Further, the proposed site makes no attempt to utilise the Local Authority's existing empty and brownfield stock which is in excess of the numbers proposed within the WBC LPR and already have infrastructure. More appropriate sites are therefore available.

The Masterplan Concept also failed to depict the location of an existing Public Right of Way, walked frequently by Thatcham residents. A footpath may be redirected under a Public Path Diversion Order governed by requirements set out in Section 119 of the Planning Act 2008 that any built form or diversion of this public footpath would be detrimental to public enjoyment, distance and views.

Transport

The A4 is a major road connection between Reading and Newbury, with connections to the M4 at J12 and J13 respectively. According to the 2011 Census, Thatcham Strategic Growth Study, Stage 1 Report, Table 8 stated that 79% of people travelling to Thatcham use a car, with large delivery lorries frequently travelling to and from Harrods and Forterra development on the Estate. This, in addition to through traffic means that the A4 is an extremely busy highway.

West Berkshire Council's Local Plan Review Transport Assessment Report Phase 1, Table 5.3 outlined traffic forecasts for the site close to the new development. An assumption can only be made that the data was obtained around the time that the report was prepared, COVID pandemic, as the information disclosed is a misrepresentation of reality. The forecast and scenario table with the report provides a disingenuous representation of pre-COVID congestion issues in addition to the table being void of eastbound traffic on Floral Way and Bath Road – Floral Way. During peak times, vehicles along Floral Way attempting to travel east bound on the A4 are delayed for far greater than 50+ seconds, with instances of congestion, not caused by accidents, exceeding 15-minute delays at the site road roundabout. The development will link to Floral Way and the A4, roads that are already exceeding capacity.

The Highway Strategy states that traffic will be directed towards the A4, relieving the 'rat run' of traffic through Cold Ash. Historically during high congestion, Harts Hill road becomes the main thoroughfare for many vehicles avoiding the A4. The development locates an exit at the north of the site leading directly onto Harts Hill road. The Transport Assessment for the northern end of the NET site proposes new priority junctions on both Floral Way and Harts Hill road... Results of the assessment state "these will not cause problems". However, the document has no modelling results for this junction. Due to Harts Hill Road being a highway, with high embankments and hedgerows, it is a fast and already dangerous road, especially for cyclists and pedestrians. An increase in traffic onto Harts Hill road will not only directly affect the existing residents in The Spinney and Farmhouse in Upper Bucklebury due to heightened numbers of commuters using the network of rural roads as a thoroughfare. The road for young families such as myself, as a dangerous, over congested road will become even more dangerous.

Statista Data 2017/18 states that on average there are 1.4 cars per household, therefore a development of 2,500 homes would result in an increase of circa. 3,500 cars on an already overloaded local road network. Where West Berkshire's Parking Standards are applied, the number of cars would be greatly over the estimated figure of 3,500 cars noted above.

The Strategic Environmental Assessment (SEA) notes under SA Objective 4 that any development should, "promote and encourage all forms of safe and sustainable travel". Thatcham Strategic Growth Study also indicated that, "walking, cycling and other active modes of transport are natural choices for getting around", though this contradicts Stage 1 Report Table 8, noted above; reports also show that walking and cycling are not the primary modes of transport in West Berkshire therefore the statement is not accurate. Noted within West Berkshire Council's Local Plan Review 2022-2039, "The area has significant employment provision and Newbury provides many of the major services, including retail and leisure facilities. Movement between the two towns and transport linkages, by rail and road are vital." This further contradicts the Strategic Environmental Assessment, although the Colthrop Industrial Estate will be within walking distance of any proposed development, the 'thriving' employment with the majority of any new development commuting to a place of work, typically and as stated in the SEA.

To improve the safety of the roads, additional traffic lights will need to be introduced of safe means of crossing. This will result in further congestion on the roads, especially during work commuting, school drop off and pick up times.

The Thatcham train line is a major connection between Newbury and Reading, towards the south-west and London. The line is frequently used for freight trains, and with only a level crossing this is already a major cause for congestion through the area. The location of the Thatcham train line is a major connection between Newbury and Reading, towards the south-west and London.

also frequently used for freight trains, and with only a level crossing this is already a major cause for congestion through the location to introduce a bridge at Thatcham station therefore an excessive increase in vehicles will only further antagonise the situation. The proposal also identified a new bus route to run immediately behind the properties of Farmhouse Mews. The garage was designed and covenanted to be a sympathetic transition between residential built form and agricultural land beyond, and the benefit from post and rail low level fences. Were a new road and bus route proposed, all privacy and security to the garage would be significantly compromised. This covenant also highlights the Local Authority's previous understanding of the setting, and thus the proposed development is a further contradiction to their reasoning and views.

Flooding

Tributaries to the River Kennet, flowing south through Thatcham, have historically increased surface water run-off to the river banks to burst, flooding extensive areas of residential and agricultural land to both the north and south of the river. Surface Water map B2 drafted from 2018 data, denotes localised 1 in 30 year flooding along all tributary streams, especially those of Farmhouse Mews and The Spinney. Although measures have been implemented by means of the Flood Prevention Scheme to Dunston Park, existing agricultural land between Floral Way and Park Farm are periodically water-logged.

The properties along Farmhouse Mews that border the fields to the north, <personal details removed>, were constructed with a field boundary to try and prevent run-off from the fields entering the curtilage. Gardens however frequently become soggy, showing signs of significant water retention.

Although any new development would benefit from Sustainable Drainage Systems (SuDS), these systems only lower the risk of water storage or diverting to lower risk areas. Where partial percolation of surface water delays the immediate impact of periods of rainfall will overwhelm the systems. Drainage systems must either discharge into local waterways or into the ground, causing flash floods to happen more frequently, systems will not be able to discharge due to waterways being at full capacity (caused by prolonged rainfall), ultimately causing flooding.

There is no mention within the LPR or publicly available evidence to support that the previously implemented flood prevention measures at Farmhouse Mews would have the capacity to cope with the increased number of houses and surface water. Thames Water have indicated they cannot accommodate the increase in both surface water and foul drainage.

The LPR notes under 5.27 that green roofs and permeable surfaces should be used though in principle, neither are they always effective. Seldom is the case that 'permeable paving' is porous itself, rather the joints are left permeable therefore the surface is still impermeable.

An extensive increase in hardstanding generated by any new development, the discharge of surface water will only increase the volume, putting the properties along the northern boundary of Floral Way at severe risk of flooding. Flood History data for the area within the Thatcham area had internal flooding, source of which was surface water.

Education

The provision for education from Nursery, Early Years, through Infant to Secondary education is not clearly defined within the LPR, in breach of the Council's obligations to provide education facilities for children. This lacking of information causes further congestion of vehicles and traffic on the highways, with a fair assumption being that many households will have to commute to schools already in existence having insufficient capacity to cope with the huge spike in population.

There are no details within the LPR of any provisions for Nursery or Early Years education. Nursery places are seldomly accepting new attendees favouring full time children over that of part time due to high demand. A new development at Farmhouse Mews has already stretched educational system to breaking point. As the LPR does not outline how these measures will be mitigated, that they won't, leaving parents with the dilemma of work or care. No nursery and school spaces for children will ultimately be created, especially single parents, turning to benefits to mitigate the situation.

The provision for Primary school and Secondary school education is also unclear and contradictory. Developer contentions within the LPR, £12M for Primary and £15M for Secondary, though no recent data has been referenced to justify these figures. Farmhouse Mews being landlocked within a residential estate, it has no ability to further expand. 4.83 notes, "The study has not engaged in a prediction and modelling exercise to determine future primary and early years educational demand across the town, or the long-term capacities of existing schools". The LPR therefore sets no locations for any school, no timing for funding, no indication if the funding is suffice for the requirements, no parameters as to what the schools must abide; fundamentally West Berkshire Council have not evidenced their obligation as an educational authority how arrangements for suitable schooling provisions will be made.

"Fulfilling Community Objectives"

The Thatcham Strategic Growth Study Phase 3 report by David Lock Associates stated within its Summary of Findings that the new development in north-east Thatcham has been developed building on principles established at a community representation stage. These representatives are and what their links are to the area, it is hard to believe such a large-scale development is being undertaken. The Thatcham Town Council Liberal Democrat representative, Cllr David Lister, is strongly against the development as many within the Thatcham community are also strongly against it. Residents have started to voice their objections. The development's consultation period was launched just before Christmas 2019 but was short, therefore many residents were unaware of the consultation or the development itself taking place. With such a short time period, it allowed little time to review the documentation drafted and respond with any objections prior to the consultation period. Residents were not given adequate time to respond to the proposal and object accordingly, therefore it is imagined that any representation of the thoughts of the residents.

Size, Density and Tenure

Stated within the Local Plan Review 2020 -2037 under Policy SP18, "residential development will contribute to the delivery of a mix of dwelling tenures, types and sizes to meet the existing and future housing needs". Also stated within the LPR under Policy SP18 Table 3, the size in highest demand for market value properties is 2-bedroom at 40-45%, with affordable housing also in high demand at 35-40%. The plan also mentions that there should be a broad mix of future dwelling sizes for both market and affordable housing. It is seldom the case with recent developments within the local area. Reed Gardens in Woolhampton for example has delivered affordable houses, though only 2 of those properties being 2-bedroom, the highest in demand, with the remainder being 3-bedroom. Additionally, recent developments within Settlement Boundary could have increased density without negative impact on the environment. As such, had recent developments delivered properties of a size to meet those highest in demand, and/or provided a mix appropriate for its location within Settlement Boundary, the requirement for new housing may be fewer than the 1,500 units.

	<p>The 2011 ONS Census states that there were 10,241 dwellings in Thatcham. The number of new units proposed at the site would mean an increase to Thatcham of nearly 25%, an excessive number that neither the infrastructure or surrounding roads can support. Tull Way for example consists of only 75 properties however exceptionally low density when compared to the site's area.</p> <p>I, along with many other residents of Thatcham object to the extent of the North East Thatcham Development, specifically Hill Road and Harts Hill Farm area. Resulting from a huge increase in traffic numbers I worry for the safety of children. This further increases the number of cars on the roads, increasing traffic, pollution, noise, and accidents. A development in this area would destroy ancient woodland and open countryside regardless of mitigations.</p> <p>I therefore hope that West Berkshire Council reconsider the proposed Housing Site Allocations and look to locate them in an appropriate, brownfield or within Settlement Boundary area, not within open countryside.</p>

Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>As a local resident, likely to be very severely affected, I strongly OBJECT to this plan on the following grounds:</p> <ol style="list-style-type: none"> 1. Principle - were permission to be granted the number of dwellings proposed will lead to an intolerable burden on the area. There have been a number of infill developments to the north of Thatcham over the years, as well as to many other villages including Hampstead Norreys etc. Where will this all end? As a general principle it would be better to redevelop former industrial areas within the current boundaries. The proposed site is also on the edge of an AONB and close to various SSIs - again highly questionable. 2. Roads - many of the current roads in the area are either very narrow or very restricted B roads - and are already carrying an intended volume. (A4, Cold Ash, Pang Valley etc) This will place new burdens of danger and emissions on the existing roads. 3. Environment - it is undoubtedly the case that the development will completely destroy greenfield sites and their associated biodiversity. There is no proper mitigation plan, nor any proper offset plan. The plan is flawed in every way in this area and offers no net benefit. Given the inevitable road traffic volumes there seems to be only cursory lip service paid to increased CO2 emissions. The development for development is an attractive one and should not be carved up. Period. 4. Services - this development and the pressure on the provision of services in the area. Most notably schools, surgeries, hospitals etc. How will this increased population already paying the price of the extra homes built near Thatcham and Newbury over the past 15 years that haven't had the benefit of will exacerbate the parlous roads capacity in the valley (see above). 5. Precedent - if this is approved where next? Expect the next swathe of construction. Conclusion This plan is not fit for purpose. Too many houses are proposed, in the wrong places, causing damage, with too little support. <p>Given the current demand for new housing a more profitable approach in every way would be the redevelopment of the area. There are a number of well managed examples in the area - specifically along the A4 and along the railway line to Reading. This plan will cause irreparable damage and fundamentally wreck West Berkshires remaining rural areas and the lives of those who live there.</p>

<p>Please give reasons for your answer</p>	<ol style="list-style-type: none"> 1 Kennet School is already over subscribed and local NHS doctor and dentist provision already past capacity. Unlike provision, a Primary School and Dr and Dentist provision is built BEFORE the houses go up, the local provision of 2 Concern of increased traffic on Harts Hill Road. I travel to Winchester regularly and its increasingly difficult to get noticed that more cars are using Dunston Park south as a 'rat run' to avoid the snarl up at the Sony roundabout waiting to happen as children living in Dunston Park walk to attend the Kennet School. With cars parked on verges risk is potentially high. One only needs to look at Cold Ash Hill which is now more or less joined to Thatcham at the bottom of the hill by The Regency Hotel. Traffic taking children to St. Mary's and/or to St. Finian's, the Pre-school traffic cutting through the village to get onto the motorway by avoiding Newbury, make this a strong reason NOT to build Hill as unlike Cold Ash Hill which is straight, Harts Hill is very windy and often I meet oil delivery lorries, refuse causing dangerous conditions. 3 With access to the proposed new estate on Harts Hill, more and more traffic will use the back road through Up and thus the M4 with all the potential extra traffic and risks that entails.

Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? -	No

<p>Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>1. The written ministerial statement by Michael Gove (6th December 2022) indicates that the housing numbers are not justified. The Inspectorate should no longer override sensible local decision-making, which is sensitive to and reflects local constraints. It is not clear if any of this development is needed at all?</p> <p>I would therefore urge refusal.</p> <p>2. I am objecting to the plan as so much of it is seriously unsound and it would have a massively detrimental effect on the health services and extra stress on bucklebury common are just a few of the things that would affect the area.</p> <ol style="list-style-type: none"> 1. The document talks about how the environment, both human and natural, will be improved or if not improved through the actions taken by the developers. The plan shows no evidence of any surveys to provide baseline conditions or indicators to explain exactly how the environment would be improved and what they would do to "mitigate" any destruction. This makes this important section of the plan unsound. 4. Building a major Greenfield development in the north Wessex downs AONB will forever affect the enjoyment of the area for local communities. There will be a detrimental impact to legally protected wildlife known to be present on the site, not to mention the use of existing areas such as Bucklebury common. This again shows that the plan is unsound in its analysis, reasoning and conclusions. 5. I understand that before any development of this size is undertaken, there should be sufficient capacity in the sewerage system to handle the waste produced. I have seen no mention of analysis or funding for the expansion of the sewerage system to be completed before any building starts, surely that is another reason why the plan is unsound. With the current sewerage system no additional housing should be built. 6. The plan is unsound where traffic considerations are concerned. There is no plan or funding for a bridge over the river. There are plans for exits from the estate onto a number of roads including Harts hill. This will produce a large increase in traffic on cold ash and Upper Bucklebury. There are comments in the plan that "modelling suggests" that all this will not be modelled. It shows no modelling detail or results. 7. There is no mention in the plan of building low energy, sustainable houses. Simply that the 2500 houses have to be built. There is no indication as to exactly what the design of the housing would be. Surely any council, in this current climate, should be making a massive change to the environment in the Thatcham area and as such, I feel that this makes the plan unsound. 8. The development is so far away from Thatcham station and Thatcham town centre that cars will be necessary. This is not promoted in the section on safe and sustainable transport and the strategic environmental assessment which accompanies the plan. It does not promote and maximise opportunities for all forms of safe and sustainable transport". With probably 1500 extra cars this does not comply with the safe and sustainable transport objective. Another example of an unsound part of the plan. 9. As a local resident for over 40 years, I feel that the building of 1500 houses so close to Upper Bucklebury will have a detrimental and forever for me, my household and anyone living in this very special area. 10. There is no health impact assessment in accordance with guidelines from public health England, and no objective assessment of the need for surgeries. This makes the plan unsound and would also mean that none of the possible 1500 + residents would have access to a surgery available from the three local over-subscribed surgeries. 11. The plan for secondary school provision is unsound with no timing or funding, no analysis of possible pupil numbers and no location of any school. 12. This is still essentially a plan for 2500 houses. The developers have simply reduced the headline numbers for the development the same. It would then be a comparatively easy matter to build the other 1000 houses in the future. There is no concession at all. <p>I hope I have shown in the above examples that this unsound plan should be rejected. The West Berkshire housing strategy is based on recent government figures of housing requirement and this will probably show that there is no need for more housing at all.</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I would like to object on the above substantial and inappropriate oversized development of this area and set out my reasons below.</p> <p>The application provides no evidence or modelling of the impact this development will have on the local highways infrastructure. The Assessment report dated July 2021, but this report shows no modelling results with regard to increased road usage and congestion in all directions and specifically the roads through Thatcham, Cold Ash, Upper Bucklebury, Harts Hill road and the A33. There are no details in this area are minor roads (without footpaths) and would not be able to cope with the increased traffic demand and potential for accidents. The plan includes a car park on Harts Hill Road why is this necessary?</p> <p>There has been no Health Impact Assessment document produced. The local health authorities have to be brought in to deal with large scale development and increased population. This development increases and impacts the provision of health services. The application must show how such provision will be provided and by whom it will be provided. There are too few GP surgeries in RBH as the nearest hospital how will it cope with future demand in the area, the likelihood of new surgeries or a new hospital?</p> <p>Education provision for all stages of education has not been clearly defined in the Local Plan Review. What data does the Council agree on such matters if there is no planning for it? Provision for Education is a priority before any development. There are no details about location of land or how much the developer is prepared to contribute to building new schools. This all leads to congestion again no modelling.</p> <p>This development abuts the area of ANOB an area recognised as an exceptional landscape whose distinctive character is being safeguarded in the national interest. There are no significant reports attached to this plan devoted to what impact this development will have on wildlife, flora and fauna. The local LPR Sustainability Appraisal accepts this will have a negative impact on sustainable development. Has any thought been given to the impact on the common and village of Upper Bucklebury as people investigate green spaces?</p> <p>Where is there provision to build new facilities for providing water and drainage. Will our rivers run dry or be polluted and how do we cope with the extra capacity required.</p> <p>This proposal is so full of holes it should never have been placed before the Council to start with.</p> <p>This plan apparently is meant to enhance and benefit the local area. I see no such benefit to this development as it will require health provisions, education and services all which have a detrimental impact on the local community with neither new schools, dentist, chemists, food shops, facilities or roads being included. This will set a precedent for further development along the A33 linking Thatcham to Theale and every village in between.</p>

	The general overall picture for development does not take into account the existing developments in the area and has site(s) that could be better suited for development rather than green field sites.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	

<p>Please give reasons for your answer</p>	
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I write to object to the notion of building 1500-2500 houses in NE Thatcham which is in the final phase of West Berks.</p> <p>I can understand the pressure on the council to provide new homes in the locality but there are numerous reasons that the press and by parish council as to why concentrating this many houses in a single area will detrimentally affect the ways.</p> <p>We have no confidence that the outcomes from this proposed development of increased strain on local services for doctors and secondary schools, care homes etc have been properly considered.</p> <p>In addition the increased traffic this will create with the new home owners short-cutting through local villages along dropped-verged single track roads not only changing the physical state of these villages but also the mental health of the inhabitants. There is also the well documented change this will make to local pasture, woodland etc and the negative consequences.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>On the subject of transport and the rising awareness of the climate emergency, we are being persuaded to get out of the area. Would it not make more sense to keep developments small say 50 to 100 houses but look at where these can be near the station? Also more brown-field sites and the switch to residential of more and more office spaces as they become redundant should be considered.</p>

	As said, I do appreciate more homes need to be built but more, smaller developments spread across West Berkshire on exiting public services than one huge development with a rapid influx of say 4000 new residents.

<p>Please give reasons for your answer</p>	<p>I wish to object to this proposal on the following grounds:</p> <p>There seems to be inadequate provision for schooling for early years, primary and secondary education. The transport establishments is already inadequate as there is no bus service and parents are currently having to source and fund their own transport. There is no bus service from the villages north of this proposed development which means there will be increased car use. The hill is a dangerous road, winding, narrow without any footpaths and has witnessed many accidents over the years.</p> <p>There is inadequate provision for increased demand for medical services. The impact of increased traffic on the local area and outstanding natural beauty will be damaging to the environment.</p> <p>This development will increase the traffic flow through the villages north of the development, upper Bucklebury, Chipping Winton which already have problems with heavy and speeding traffic. Traffic calming measures would have to be introduced.</p> <p>I hope these issues will be taken into serious consideration when considering this application and that a decision will be made in favour of the applicant.</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I object to the plan to build 1500 - 2500 houses in NE Thatcham</p> <p>The plan to build so many houses will have a huge impact on Thatcham and the surrounding villages that will unbalance what has already seen a great many houses built in the last few years. In my opinion a better way to comply with the increase in housing is to have smaller developments around the villages and towns so that specific houses can be built to suit the needs of the local area and the impact.</p> <p>The increase in traffic will be detrimental to the environment and I have concerns about the safety of more traffic on the roads around Harts Hill that leads off from the planned development.</p> <p>There is already a great deal of traffic around the railway level crossing in Thatcham, increase in cars will cause more congestion and impact on healthcare provision, education provision and dental care is already at struggling full capacity. The current plans for the new water pump do not seem to show full liaison with providers or make provision that coincides with the increase in housing plans. It seems to be done with the stages of building plans.</p> <p>Flooding has been an issue in the past how will the building of more houses impact that problem? The plans for flood defence do not allow for further expansion.</p> <p>In our village there have been problems for many years concerning cuts in water supply will that be effected by the plans for the new water pump?</p> <p>We are surrounded by an area of AONB how will wildlife and the environment be affected by thousands of more people moving into the area and activities?</p> <p>It seems to me that the plans that have been put forward lack full liaison and future planning with health and education and do not have full unbiased assessments of the impact of the increase in traffic and the impact the plans will have on the environment.</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>I am objecting to the plan relating to the Thatcham NE Development as I believe that there are components of this plan that are as follows.</p> <p>INCREASED TRAFFIC The plan will result in a significant increase in traffic through Bucklebury and the surrounding villages. The plan includes a new road onto Harts Hill. This traffic will go towards Upper Bucklebury, splitting either towards Cold Ash or through Upper Bucklebury. Many of the roads in these areas lack pavements and are used by numerous pedestrians, dog walkers, cyclists and horse riders. This will result in a significant increase in traffic thus increasing the potential for serious accidents.</p> <p>SAFE AND SUSTAINABLE TRANSPORT I understand that the WBC state the policy is likely to have a positive impact on road safety as safe travel will be encouraged. This will result in an increase in opportunities for walking and cycling.</p> <p>However, the aforementioned significant increase in traffic in the Upper Bucklebury area will clearly increase the risk of accidents on these roads. These are roads that our family use regularly for these pursuits, many without pavements. This will certainly reduce the safety of our local roads for these activities. How the WBC can state this will have a significant positive impact in this area is beyond me.</p> <p>HEALTHCARE I am concerned about the impact +1500 homes in this area will have on our already overloaded healthcare services. This will result in significantly increased waiting times at our local surgery for Doctors appointments, blood tests etc.</p> <p>I understand that WBC and the developers are proposing a new healthcare site to be built for this area. However, the WBC has not provided a purpose Healthcare Impact Assessment, nor provided evidence of having liaised appropriately with local healthcare providers.</p> <p>In essence, the objective of WBC and the developers to improve access to the health service component of the community is not being met as they have failed to provide evidence for the provision of the required primary care medical facility. The impact of this is significant.</p> <p>ENVIRONMENT I have major concerns regarding the impact that building so many new houses in this small area of countryside will have on the environment. I understand that the Bucklebury Parish Council have reviewed the background documentation provided by the WBC and the BPC has concluded that there is no evidence to support claims that SP17 will have a positive impact on the environment. It will have a significantly negative impact.</p> <p>We live in a beautiful area. I am concerned that the impact of the proposed 1500 houses (potentially 2500 houses in total) will have on the issues to our environment with potential collateral damage to Bucklebury Common due to significantly increased footfall and the loss of legally protected wildlife.</p> <p>The LPR's own Sustainability Appraisal accepts that SP17 will have a negative impact on environmental sustainability. This impact is to be mitigated, no details have been provided regarding how this would be carried out.</p> <p>It is obvious that the policy is to build as many houses as possible in a small area of countryside, on a cost effective basis. There is no regard regarding mitigation of the impact on the local environment.</p> <p>INACCESSIBILITY OF DOCUMENTS The volume and complexity of documentation that one is expected to review when considering points to raise is overwhelming for any person to deal with. Having spoken to numerous people in our community, many of them have stated that it is too complex to read. Consequently, they won't be taking part in this process.</p> <p>A true consultation should involve two way communication open to everyone. In my opinion, the WBC is failing in its duty to consult on this. One wonders if this is deliberate in order to reduce the number of objections to this Proposal?</p> <p>In conclusion, I object to the proposed Thatcham NE Development for the aforementioned reasons. I believe that the proposed 1500 houses in an area of countryside that is not suitable, resulting in a significantly adverse impact on the local community and the quality of our lives.</p> <p>The plan has various flaws, ambiguities and is full of unsubstantiated policies. Consequently it should be rejected.</p>

Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	

<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I would like to put forward my objections to the proposal to build 1500-2500 houses in NE Thatcham in the Regulation</p> <p>My main concerns include the following:</p> <p>Bucklebury common is a beautiful, unique space. I walk my dog every day in Upper Bucklebury and the increase in having a negative impact on the area. The negative impact of 1500 to 2500 to the Bucklebury Plateau Biodiversity O woodlands, heath and in particular the common is unimaginable. There will be detrimental impacts to legally protect the area and the siting of a major greenfield development in the North Wessex Downs AONB that will forever be cha countryside to built up suburbia. Everyone needs greenspace but the estimated number of 4,000 people can not be for two 'country parks'. Even this has been downgraded to undefined 'community parks' which shows little commitment environment. This will cause the inevitable overspill of people visiting adjacent areas.</p> <p>Already our village roads are struggling with traffic. The extra traffic that will be funnelled to Cold Ash and Upper Buck Harts Hill will cause serious potential of accidents due to the narrow roads and no pavements. The Sustainability Ap Assessment has an objective of 'To promote and maximise opportunities for all forms of safe and sustainable transp was given as 'To reduce Accidents and Improve Safety' The council assessments of 'The policy is likely to have a P safe travel will be critical to the design of the site'. The other objective being 'To increase opportunities for walking, cy The Council Assessment of 'Significant Positive Impact'. How can this be? Already I have stopped cycling on the lo traffic, and pot holes. There are few pavements for walking and the public transport is virtually non-existent!!</p> <p>The three doctor surgeries that cover the proposed area are already overstretched. In my experience, it is not poss appointment at Chapel Row for at least 3-4 weeks from the time of phoning. There appears to be no Health Impact A specific to the proposal of the North East development. There appears to be no evidence of WBC or the developers health care agencies or providers. There has not been evidence for the provision of a viable primary care medical fa</p> <p>With regard to Educational needs for the development, it appears there are no details in the LPR for Nursery or early school education is unclear and contradictory. There is no recent data available so it is not possible to assess if the sufficient. The plan for secondary school provision is also unsound. There is no evidence of the number of pupils the of a school is not clear. The number of Form Entries is not defined but it is noted that anything less than 6FE schoo not clear and there is no evidence that the proposed funding is sufficient to meet the Council's obligations to provide suitable school provision is not defined or evidenced in the LPR.</p> <p>There is so much that makes this LPR unsound. I believe that the council should pause the plan making to bring forv updated planning guidance when this comes in later in 2023.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>

<p>Please give reasons for your answer</p>	<p>Objection and request an Inspector looks at the as the LPR planned development for Thatcham North East for 1,500 SP17 suggests the proposal will likely have a positive impact on sustainability which I call in to question how.</p> <p>The appraisals Below are my objections.</p> <p>My objections are</p> <ol style="list-style-type: none"> 1. Traffic and Transport. The proposal states it wishes to divert traffic to the wider rural roads. Clearly you need to vis destroyed by wider commercial vehicles. Surely the preservation of rural highways for all who have their rights to use car and lorry use will ultimately lead to serious damage to wildlife and human life. How can increased traffic be comp pedestrians, horses, cyclists. As a user of two of these modes of transport the risk of bodily damage will be increased to take responsibility? The risk of additional accidents and reduced safety has not been suitably considered. I invite to walk Harts Hill Road to fully understand the dynamics which will be impacted. 2. The recent food shortages and the global transportation of food has not been considered in this plan. The south fa leads the site to be ideal for food production. Global food production and the environmental impact of large transportatio in when there are other brown field sites already available where the soil for agricultural purposes has already been in this land is lost for food production it can never be returned. This is incredibly short sighted of the council to consider when alternatives exist. 3. West Berkshire has jewel in its crown- Bucklebury Common (AONB) and the council should be preserving the habita Are the council aware that Night Jars can be seen and heard on the common and this is only one species that will lik additional users of the common. Subsequently the Nightjar is protected under Annex 1 of the EU 'Birds' Directive (Dir birds79/409/EEC). The loss of such rare birds should be a major concern and hence think a large scale housing dev 4,000-6,000 people will put these and other species at risk. These birds and other species are under huge pressure protecting. Building houses permanently change the world and what a legacy for the council to have on their consci 4. Community identification exists due to a 'strategic gap' or a 'rural landscape', identifying a boundary. Where infilling oc of additional houses it degrades society from its individuality in to an homogenous society. This lacks diversity and a which has been created over centuries and should be preserved. Leaving communities unlinked maintains their integ having their own identity. 5. Thatcham train station is likely to be the destination for many commuters for work and leisure. The distance would walk and building nearer to a major hub like a train station should be a West Berks priority. There has been mention of and please consider the larger picture on how vehicles are fuelled. Electric vehicles need battery storage currently th global impact of lithium has major concerns so building as near as possible to rail transport links should be a priority if a person has to use their own transport to travel 1-2 miles then they will ignore public transport like a railway. Anoth rail users park at the station without major transport issues which already exist at Thatcham station. <p>As stakeholders of the regional environment and human well being we need West Berks to have a far better long ter green field sites. The long term consequences will be viewed in the future as very poor decision making by the curre</p>

2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is	

<p>consistent with achieving sustainable development.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>I wish to object to the proposed Thatcham NE Development for the following reasons:</p> <ul style="list-style-type: none"> • Loss of a substantial piece of prime "green belt" land which currently separates Thatcham from the village of Upper Clatford, potential impact on the local wildlife, environment and ecosystem. • Concerns regarding the impact on already stretched water supply capabilities. Thames Water themselves have consulted stating that "Substantial water shortages face the whole of the South East of England". • The area of the development currently offers the capability to buffer heavy rainfall. Rainwater run-off already causes flooding in the Kennet Valley area, and if this development goes ahead this problem will only get worse! • Once the development is completed there will be a large rise in vehicle movements on the A4, Floral Way, Hartley Way, as most home occupants have one or more vehicles. These extra vehicle movements will create additional environmental impacts. • There are no clear provisions in the plans for additional health centres, dental practices, or schools in the locality of the development. The local current services and schools are already heavily used and will not be able to easily cope with the increase in demand from the development. • The proposed development will increase my driving journey time along the A4 towards Newbury from the East of Thatcham. Extra vehicles that will be exiting and entering the Development. These extra vehicles will be creating additional environmental impacts. • I believe that West Berkshire Council Planners should look at brown field sites wherever possible rather than u... developments such as this. <p>Please take these comments into your deliberations relating to this proposed Thatcham NE Development.</p>

Please give reasons for your answer	<p>On 6th December 2022 Mr Michael Gove Secretary of State for Levelling up, Housing & Communities suggested housing as advisory and not mandatory as previously directed.</p> <p>I also consider further large scale housing developments in the South East of UK wont assist the “levelling up” for the area. West Berkshire has had a massive increase in population over the past 50 years and one the last big developments at Dunstan Park has added more services in the area. The Two practices in Thatcham closed their new patient registrations and this meant that Chapel Down took in a lot more patients from Thatcham itself.</p> <p>Thankfully we had a new surgery built in 1992 but in 2004 a new extension with 4 more consulting rooms was added. We had added shortly after. We also took on another GP to cover the increasing population.</p> <p>In the plan I note there is provision for a new primary care centre, but nationally the NHS is around 40,000 nurses, a far below the recommended staffing level. I also believe that there is already a shortage of GPs in West Berkshire and so recruitment is increasingly difficult.</p> <p>I note all the proposed routes for walkers/cyclists, and as a regular cyclist myself, I am pleased to see the plans in this regard.</p> <p>However the main vehicle routes for north south from Thatcham, apart from congesting the A4 at the Robin hood Roundabout are totally inadequate.</p> <p>Going south, without going on A4 to Newbury, past Thatcham train station has been a bottle neck for years. Going north again without going to the A4 in Newbury means vehicles travel up through Cold Ash where due to “traffic calming” measures there is a grid lock at busy times.</p> <p>Finally I am concerned about the loss of habitat to wildlife and for example I often cycle up the bridleway near Colthrop where the sky larks is one of the few places I can enjoy listening to these precious birds.</p>

Please give reasons for your answer	<p>I wish to formally object to this planning application on the basis that the surrounding infrastructure, amenities and facilities are stretched to capacity due to huge development. Having lived in the area 15 years and worked in the health sector locally for the last 12 it is just a matter of time before the local services and surgeries are over stretched, don't suggest building a GP practice, there isn't the GP's available to staff it! Just look at the current situation in the next few years.</p> <p>Dental surgeries locally unable to take on new NHS patients, not enough dentists.</p> <p>Schools over stretched.</p> <p>Traffic levels in and around Newbury already at pre-bypass levels.</p> <p>Queues of traffic at busy times A4 and level crossing.</p> <p>Local grassroots football clubs already struggle to find space to train and play matches, how many extra kids do you think can be accommodated in the area?</p> <p>This is a very inappropriate planning application with no thought for the landscape. The area between Thatcham and Newbury is a beautiful space.</p> <p>The list of objections goes on.</p> <p>I cannot fathom how this could be deemed appropriate.</p>

Please give reasons for your answer	<p>The LPR is not positively prepared and would not achieve the goal of sustainable development for West Berkshire and</p> <ul style="list-style-type: none"> • The LPR is not justified. Many of the grounds for assessment of impacts and benefits lack credibility and is not justified. Reasonable alternatives have not been adequately explored and there is no basis to demonstrate that the allocation of land represents an appropriate strategy for WBC. • The LPR is not effective. There is no evidence that the development of 1,500 homes at North East Thatcham is achievable within the plan period. • The LPR is not consistent with national policy. In many instances the allocation for development of North East Thatcham directly conflict with national policy, particularly in relation to landscape character and impact upon the AONB. The impact of development under policy 5P17 through the sustainability appraisal is fatally flawed and is not a matter that can be corrected through modifications to the plan. The process for selection of North East Thatcham as a development site is flawed. <p>In addition all aspects of the plan where greenfield sites are used have a negative impact on the locations itself and the environment. It is extremely disappointing that this Plan has been produced in such an unprofessional way.</p> <p>Healthcare</p> <p>The North-East Thatcham development plan (SP17) proposes a 450 sq m primary healthcare facility with the suggestion to refer to the Buckinghamshire, Oxfordshire and Berkshire West Integrated Care Board or other such appropriate body. However, there is no detail or insight into strategic healthcare planning.</p> <p>Proposals for a major development that is likely to have a significant health impact in relation to its size and location, require a Health Impact Assessment (HIA) in accordance with the current guidance from Public Health England. The proposals to how the proposals for development have been discussed with health service providers regarding impacts on primary care. All development proposals should demonstrate how the conclusions of the HIA have been considered in the design of the development. The impact on the health and wellbeing of existing or new communities will not be permitted. It is of concern that neither Wokingham and private stakeholders respectively, appear to have arranged or published a prospective HIA specific to the proposed development.</p> <p>Tackling health and wellbeing requires a multi-agency approach. The Berkshire West Health and Wellbeing Strategy was developed by the Reading, West Berkshire and Wokingham Health and Wellbeing Boards together with the Berkshire West Health and Wellbeing Board. Developers are encouraged to engage with the healthcare providers at the earliest opportunity in order to determine the impact associated with new development. It is of concern that there appears to have been no direct engagement between the North East Thatcham Consortium and local general practices.</p> <p>Few new GP practices are commissioned by NHS England, even where they consider there to be patient demand for new practices. Figures of patients registered in the NHS Berkshire West Clinical Commissioning Group (CCG) confirm there is an ever increasing number of areas of the country. There is therefore no realistic prospect of a new GP practice being established in Thatcham or the future.</p> <p>GP practices look to create efficiencies and economies of scale to make general practice more financially sustainable. It would extend the range of services and primary healthcare professionals available on a single site. It would make no financial sense for an existing local GP practice to set up a branch surgery on the proposed new development because of the additional costs and staffing costs and encumbrance working across two sites.</p> <p>There has been no approach by WBC or the developers to any local GP practice to discuss an appropriate site, floor space or more practices could relocate. An enlarged primary healthcare site is required and might be better located close to the Thatcham to improve access and minimise traffic as the proposed NE Thatcham development is peripheral to the centre of Thatcham. It is likely to be supported by Thatcham</p> <p>Town Council but has not been suggested in the sustainability appraisal of site options. Local practices did not have a 3000 sq m floor size proposal which they only discovered with the 5P17 Policy of December 2022, Appendix D.</p> <p>The proposed North-East Thatcham development site is covered by the existing practice boundaries of Thatcham Mill Surgery (Mill Road), Burdwood Surgery (east of Harts Hill Road) and Chapel Row surgery (the whole area). All three practices are currently run by Thatcham doctors' surgeries run independently of each other, and their combined lists include approximately 27,800 patients per GP. Newly registered patients moving into housing developments tend to make a greater demand on primary care. There are more young children, a higher maternity workload, less local extended family support and there is initially a higher demand for services and repeated temporary pharmacy closures in Thatcham have further exacerbated pressure on primary care locally.</p> <p>Thatcham dental practices are unable to provide dental care for the whole population with a significant minority of patients referred for NHS and private dental care.</p> <p>Thatcham Vision, endorsed by WBC in 2016, confirmed only 60% of residents were registered at a Thatcham dentist (or a dentist outside Thatcham). There is no evidence provided that either WBC or the developers have approached any local dentist to assess the potential impact of increased workload resulting from additional housing.</p> <p>Reviewing the scanty healthcare recommendations within the Thatcham Strategic Growth Study (David Lock and Associates, 2016) Present, paragraph 4.10 states: 'A dialogue with the relevant healthcare and education agencies should be established to address concerns that social infrastructure may not be provided.' The Stage 3: Thatcham Future report published in 2016 provides no further detail except the outcome of a community representatives' workshop, that the existing GP facilities are at the heart of the health centre.</p> <p>Conclusion:</p>

WBC and the developers appear to have neither arranged a relevant HIA nor provided evidence of having appropriate agencies or providers. They are proposing a healthcare site that is unsuitable for NHS primary care and so have not borne the burden that 1,500 or more new houses will make on a local NHS struggling to cope.

The objective of WBC and the North-East Thatcham Development Consortium to improve access to the health service infrastructure has not been met as they have not provided evidence for the provision of a viable primary care medical centre.

Transport

1 Increased Traffic

Reviewing the comments by Bucklebury residents submitted at Regulation 18 about North East Thatcham, a recurring theme was the impact on the villages. We sought assurances and were led to understand by WBC planners that traffic from the development would be routed to the A4. This is true but what they 'forgot' to mention was a plan for an exit at the north of the site onto Harts Hill. This only came to light in January when the Transport assessment was published: Phase 2 Transport Assessment Report July 2021.pdf(westthatcham.gov.uk) because traffic from, or to, the site is only going to go in one direction from this exit —towards Upper Bucklebury via the road going through Cold Ash and the traffic through Upper Bucklebury and Chapel Row.

The proposed development will funnel traffic from the development and, WBC predicts, - 'some displacement of A4 traffic to the A4 as Upper Bucklebury'. This would be where the roads are inadequate, without pavements and have the potential for accidents. However, the document has no modelling results for this. There are drawings for all the other proposed junctions but not for this one?

2 Access and junctions

The Transport Assessment says at paragraph 3.26 'The access arrangements for the northern end of the NET site proposed are to be provided (with right turn lanes where appropriate) on both Floral Way and Hans Hill Road. Results from the modelling suggest that these arrangements will be sufficient to meet the needs of the development. However, the document has no modelling results for this. There are drawings for all the other proposed junctions but not for this one?'

3 Car Parks

We have also seen drawings showing a new car park on Harts Hill. The purpose is a mystery but will surely add more traffic to an already a dangerous road and may also promote the night-time antisocial behaviour all too apparent in the car park area.

4 Safe and Sustainable Transport

The Sustainability Appraisal (SA) | Strategic Environmental Assessment (SEA) which accompanies the Local Plan covers the development of North East Thatcham against key Sustainability Objectives.

Objective 4 is — To promote and maximise opportunities for all forms of safe and sustainable transport. The SEA makes the following points:

- 'To Reduce Accidents and Improve Safety' Council Assessment - The policy is likely to have a Positive impact on safety. This will be critical to the design of the site.
- 'To increase opportunities for walking, cycling and use of public transport' Council Assessment — Significant Positive impact. - The policy is likely to have a significant impact on walking, cycling and public transport as the development will provide facilities to encourage these modes of transport.

Education

1 Schools Provision

The provision for education from Nursery, Early Years, through Infant to Secondary education is not clearly defined within the Plan. There is no coherent end-to-end plan: this therefore breaches the Council's obligations to provide education facilities for the Plan for a large new housing development is untenable.

The lack of a coherent Plan on Schools Provision across the various proposed developments also means that it is impossible to assess the impact on traffic. The siting of a secondary school to the NE of Thatcham would result in a significant increase in traffic in the area, not considered in the traffic plans and models in the LPR.

Pre-secondary School Provision:

There are no details in the LPR of the provision for Nursery or Early Years education. Policy SP17 NE Thatcham Strategic Environmental Assessment states that 'the site will provide Early Years provision'.

The provision for Primary school education is unclear and contradictory. There is no data or evidence on the planned primary school requirements. The LPR proposes that the sum of £12 million be contributed by the developers to primary education. However, as the land is not available (the only data referenced is from 2011), it is impossible to assess if this is sufficient. It also does not state the location of the provision. Clearly, schools need to be available before houses are built.

Secondary Education Provision:

The current situation for secondary school students from Bucklebury is that they have a choice of either The Downs or Kennet schools. Both are in the catchment area for both.

Where schools are oversubscribed those children who live nearer to the school are given precedence. This means that those from Thatcham development would be able to opt for Kennet and those from Bucklebury would then be limited to The Downs.

The LPR is inconsistent incomplete and contradictory on the provision of secondary schooling in and around Thatcham. The Supporting documentation. It proposes that the sum of £15 million be contributed by the developers to Secondary Education. However, the location of the land to be provided and hence no possibility of assessing its suitability.

Please see the link below to The Thatcham NE Development Plan 2020 (part of the LPR *supporting documentation):

The Thatcham NE development plan 2020, produced by David Locke Associates and Stantec on behalf of WBC, proposes a new (6-8FE Entry) secondary school, half-funded by developer contribution.

Government guidelines are that Secondary Schools with less than a 6FE are not sustainable.

However, the Development Plan states that the NE Thatcham development (which proposed 2,500 houses), is not sustainable. Specifically

5.18 Provision of a new secondary school in North East Thatcham is an essential part of enabling growth in the town. The proposed provision is not sufficient on its own to fill a 6- 8FE secondary school.

5.19 Secondary schools need to be of sufficient scale to make them sustainable and able to provide suitable facilities. It is not considered feasible for a new school to be smaller than 6FE.

With an apparent 40% reduction in the housing allocation in the 2023 LPR (2022 to 2039) to 1500 houses, a second sustainable in this location.

Earlier in this same Thatcham NE Development Plan it was noted that the education provision exercise was based on a study in 2011. Clearly the use of 11 year old data is inadequate. The Development Plan states:

4.83 This study has not engaged in a detailed demographic prediction and modelling exercise to determine future primary demand across the town, and has not attempted to predict the long-term capacities of existing schools. Inevitably education in more detail as any development comes forward.

The LPR Review to 2039, Policy 5P17, now states that land (but not the Secondary school itself) will be provided for

In summary, it is therefore clear that the plan for secondary school provision is 'unsound':

- there is no satisfactory evidence of the number of pupils the school is to cater for;
- the location of a school is not clear;
- the number of Form Entries is not defined, but it is noted that anything less than a 6FE school is unsustainable;
- the timing of the funding is not clear; and
- there is no evidence that the proposed funding is sufficient to meet the Council's obligations to provide education.

Conclusion on Schooling:

West Berkshire Council, as an education authority, has a duty to make arrangements for suitable school provision. Funding across all school years is not defined or evidenced in the LPR.

2 Sports Fields Provision

The LPR talks of the provision of sports fields. This raises two issues not answered in the LPR:

- Sports fields require flat ground. The only flat area of ground in the proposed site is that which is closest to the road, the most traffic fumes.
- There is no funding earmarked for these facilities.

Although unclear, the LPR appears to assume that the school playing fields would also be available as Sports Fields. If not, then the playing fields will not materialise. Additionally, many schools are reluctant to open their playing fields to the public for other concerns.

The objective of WBC and the North-East Thatcham Development Consortium to provide sports fields has not been supported. There is no evidence for funding or for a suitable location.

Environmental Issues

There are a number of serious environmental threats posed by the proposed Thatcham North East strategic development:

- 1 Collateral damage to the Bucklebury Plateau Biodiversity Opportunity Area (*see map at end) and its ancient woodland, the Common;
- 2 Siting a major greenfield development in the broader landscape setting of the North Wessex Downs AONB that will be valued by the open countryside by local communities;
- 3 Causing detrimental impacts to legally protected wildlife known to be present on the site, whilst erroneously assuming that measures can be taken after development e.g. through the vague promise of a 'community park'.

Taken together, and after a thorough professional review of the background documentation provided by WBC in support of SP17, there is no evidence to support claims that SP17 will have a positive impact on the environment. By contrast, there is evidence to suggest it will have a significantly negative impact.

For example, the WBC states in the LPR that a Sustainability Charter is required to establish how 'policy requirements for legally required biodiversity net gains and the anticipated overall positive impact on environmental sustainability). It is not informed by' various strategy documents (including one on ecology). Yet, the strategy documents either do not exist or are not available for the Regulation 19 consultation.

At least 4,000 people will be concentrated in the development site. They of course must have access to green space for recreation. The claimed provisions for green space cannot satisfy this demand on site. The original Thatcham Growth Plan had 'country parks' spaced across the top of the slope, inside the Biodiversity Opportunity Area, claiming the potential for significant enhancement of its current land use. No details were provided about how they would be formed. The feasibility study by Bucklebury Partnership, a lack of preparation for such country parks, not least that they should be merged, and properly managed and funded for their enhancement. Now, in the updated 5P17 text the country parks have been downgraded to undefined 'community parks'. The WBC commitment WOC has given to protecting the natural environment and public enjoyment of it.

Since SP17 has no proven plans for providing adequate green space and protecting biodiversity, there will inevitably be impacts on adjacent areas. Indeed, the LPR states its intent for 5P17 to drive additional traffic (people and cars) into the AONB. The proposed network which will 'take advantage of the landscape' to facilitate connection to the AONB, and include leisure routes through the AONB. Meanwhile, the management vision for Bucklebury Common is explicitly focused on not increasing human pressure on the site, working to restore and nurture.

In fact, the LPR's own Sustainability Appraisal accepts that 5P17 will have a negative impact on environmental sustainability at the site and therefore, would result in a negative impact on environmental sustainability which would need to be mitigated. There are no details on any such mitigation measures: the assumption is simply that they will somehow be found during the planning application process.

However, the very same Sustainability Appraisal suggests that the 5P17 policy is likely to have an overall positive impact on the environment (by absurdly ignoring the environmental consequences in favour of social and economic benefits that are anyway high on the list herein).

The overall thrust of the SP17 policy is clearly to build as many houses as possible in a small area of countryside, without regard to how the environment — human and natural — will be improved or, if not, mitigated. Despite all the money spent on consultation plans and justify the 'growth' requirement, there is no evidence of any serious attempt to investigate, analyse and systematise the impacts.

Everything will be all right because their own unsubstantiated policies say it will be.

<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I object to this planning application. There aren't enough schools, doctors, road infrastructure for the amount of houses and surrounding areas.</p> <p>Also we are very lucky to have an area of natural beauty filled with wild animals and plants. This area cannot be used for other sites are other sites around that are not areas of beauty and have access to major roads. More homework is needed on this.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>There are other sites around that are not areas of beauty and have access to major roads. More homework is needed on this.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	
<p>5. Independent Examination</p>	
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes</p>	

* No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No

<p>Please give reasons for your answer</p>	<p>I would like to voice my concern and objection to the proposed development of 1,500 - 2,500 houses along the A4 as there are parts of the plan that are not sound, and the result would have a negative impact on the area's infrastructure.</p> <p>ENVIRONMENTAL IMPACT</p> <ul style="list-style-type: none"> - the planned area of developments is stunningly beautiful and is home to a wide and diverse wildlife population, and strategic policy states that it will focus on the environment but I can't see any evidence that SP17 will have anything to do with the environment. The site is a greenfield site and would result in a negative impact on the environment which would need details of how this would be. - Within the LPR it states that a sustainability charter is required to show how biodiversity net gains are to be achieved in the strategic documents. Do they exist. - Insufficient green space has been included in the proposal for a development of this size. The original Thatcham green space of two country parks across the top slopes inside the Biodiversity area claiming potential for for significant biodiversity net gains. Bucklebury parish councils feasibility study showed lack of preparation for country parks. In the updated LPR the green spaces have been downgraded to undefined community parks. Where is the responsibility that we have to protecting the natural environment in the new development will naturally want to explore the area. Our environment needs to be protected from any increase in traffic and addressed. <p>The vision for the management of Bucklebury Common focuses on not increasing human pressures and to restore a natural environment.</p> <p>INFRASTRUCTURE</p> <ul style="list-style-type: none"> - There does not appear to be clear plans for the provision for schooling for a development of this size just a vague promise of provision but not when this is going to be provided. Is this to be provided before housing is built? - As a resident of Upper Bucklebury we are in the catchment of both The Downs School and Kennet School. However, school children in Upper Bucklebury would be limited to the Downs which is substantially further away. The latest LPR proposes a secondary school by the developers to secondary education . What does this mean and where would it be situated? Would it mean yet another school and destroyed? - There has been insufficient research into healthcare facilities which will be required with the increased population and it is difficult to arrange a doctors appointment and I fear what affect the increased in housing will make. The North- East Thatcham development proposes a primary healthcare facility and suggests that a GP surgery is offered to Buckinghamshire , Oxfordshire and West integrated Care Board. However, there is no evidence that a fit for purpose Health Impact Assessment has been conducted for the proposed North East Thatcham development in accordance with the current guidance from Public Health England. - My family currently travel to Reading for the dentist. Thatcham dental practices are overstretched and are unable to take more patients. <p>TRAFFIC</p> <p>Traffic in Thatcham and the surrounding area's will be adversely affected. I am particularly concerned about the increase in traffic into Upper Bucklebury and the surrounding villages. The proposed exit to the north end of development on to Harts Hill Farm will increase traffic into Upper Bucklebury where the roads are inadequate for the increased traffic and many roads do not have pavements. This increases the risk of serious accidents in an area where there are substantial numbers of walkers and cyclists.</p> <p>I am deeply saddened that the local planning review is to destroy such a beautiful area of the countryside. We would have liked to think that we should be able to look further into developing brownfield sites and to preserve our countryside for generations to enjoy.</p> <p>In conclusion I would like to register my objection to these plans. The impact on Upper Bucklebury will be extremely negative. Upper Bucklebury is a peaceful village whose inhabitants value to beauty and tranquility of the surrounding countryside. I find it difficult to believe increasing Thatcham to this extent would not negatively change the nature of the town, surrounding villages</p>

<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to raise my strong objection to the proposal of developing land for housing on the farmland between Upton and Floral Way.</p> <p>West Berks Council has increasing opportunities to redevelop existing and emerging brownfield sites to accommodate housing, considering destroying yet more greenfield sites in the beautiful Thames Valley.</p> <p>Out of town business parks and retail parks built in the late 1990's early 2000's in the Newbury and Thatcham area, and Pinchington Lane Retail Park, has resulted in the slow demise of Newbury and Thatcham town centres due to loss of jobs and office workers.</p> <p>More recently, advances in technology has enabled people to shop and work from home and as a result, towns are becoming increasingly less attractive.</p> <p>Now with the recent occurrence of a global pandemic, and the requirement for home working and internet shopping, out of town business parks and retail parks in Newbury, Thatcham and Reading are increasingly becoming vacant spaces.</p> <p>These brownfield sites have a lot of infrastructure already in place and can be revived, improved, enhanced and developed.</p> <p>As well as benefiting nature and its biodiversity, our green spaces are proving invaluable for more people than ever before, providing pleasant experiences to clear our minds and breathe fresh air.</p> <p>In my opinion, it is poor foresight to develop greenfield sites when brownfield sites are increasingly becoming underutilised.</p> <p>Planning departments are at the forefront of enabling change and making the right decisions for the future, allowing greenfield sites to encroach on the beautiful countryside is not the right decision for the future of the country or the planet.</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing in response to the above plan, particularly as it effects North Thatcham.</p> <p>Traffic from proposed new housing in North Thatcham</p> <p>With the proposed housing while I see the A4 is supposed to take a lot of the increase in traffic I would expect the 50% increase in traffic to the south the Level crossing traffic would increase with no mitigation (Bridge?). To the North would see increase to Upper Bucklebury which I feel is not designed for the increase, and would become a rat run.</p> <p>Also, Harts Hill Road (which shows on the plan to have car park for some reason) is not suitable for increase traffic, particularly on the twisting hill which is a problem now. Also, it has no pedestrian walkway if some of the children from this estate were to walk to school in Upper Bucklebury. At present it is dangerous to walk up or down this hill, particularly in the dark.</p> <p>Healthcare & Dental Practices</p> <p>All 3 GP Surgeries are overstretched and there appears to have not been by WBC or the developers to any approach to accommodate the 3-4,000 extra people.</p> <p>The Thatcham dental practises are unable to provide for the present population. Has WBC or the Developers approached any other dental practices?</p> <p>Environment</p> <p>Bucklebury Common is a wonderful place, but has risks with additional major housing on its doorstep of being damaged. This risk can be mitigated. Indeed, the management vision for the Common is explicitly focused on not increasing human pressure on the Common. The two 'County Parks' quoted we now note in SP17 have been downgraded to 'Community Parks, whatever this means. How the 4000 residents will have outdoor space to roam without effecting Bucklebury Common.</p> <p>Education</p> <p>While I have no children of school age, I am concerned that secondary school choice may reduce. At present children from The Downs as they are in the catchment.</p> <p>Where schools are oversubscribed those children who live nearer get priority. This would affect children wishing to go to school (from Upper Bucklebury as I can see no concrete evidence that an additional school is to be build or the increase in school places.)</p>

<p>Please give reasons for your answer</p>	<p>Having followed the proposed development of Siege Cross over many years, I am very puzzled as to why, having opposed it in 2015, that WBC are suggesting that it would be appropriate for 3 times that (likely 5 times that in the end).</p> <p>All their 2015 objections are no less valid today.</p> <p>I have lived locally since 1995, over the years, I've seen flooding increase dramatically, particularly on the A4 at Colthrop. It has been done to alleviate it. I can't see that paving farmland and building houses on it will help that situation one iota.</p> <p>The proposals for schools are ludicrous, as are those for GPs. Thatcham Medical Practice is unable to fully staff its surgery, a phone appointment took 3.5 weeks. The only way to see a doctor within a sensible timescale would be to lie about your symptoms, prepared to do.</p> <p>At peak times, it is nigh on impossible to turn right onto Floral Way so traffic ends up turning left and on to Harts Hill, causing extra traffic from the development. This will inevitably lead to more rat-running through Upper Bucklebury and Chapel Road, causing gridlock. Everyone knows that this development will involve an enormous number of extra car journeys, it is naive to think that many will use public transport, walk or cycle. The majority of houses on Dunstan Park have at least 2 cars, this development will mean many may have more as children remain in their family homes for longer due to the extreme costs of independent living. There will be a prospective increase of over 6000 Other people have mentioned the green gap, the AONB, the organic farmland that is being lost at the points.</p> <p>Why is more attention not being given to the proposed development at Colthrop, this will avoid further congestion at Colthrop brownfield land?</p> <p>Thames Water have stated that there will need to be infrastructure improvements for this to go ahead. They are already planning this as this is an area which needs close scrutiny too.</p> <p>I am a firm objector to this scheme in its current form.</p>

<p>Please give reasons for your answer</p>	<p>Key that the delivery of the allocation is led by a masterplan, this should be set by the LPA and not a developer. The an SPD and then clearly sets the guidelines, building height, lighting staryegy, highway layout and landscaping to enured watering down the policy.</p> <p>A country park would not promote access to the AONB but attract dog walkers into a sensitive landscape character are which has the potential to be a conflict. The skyline as outlined in the Sensitivity assessment is the most sensitive to c to enhance the skyline and the ladscape character, it therefore needs to be a local asset which enhances the setting of and maintance of this is essential if the LPA want to enhcance and conserve the AONB and its special qualities.</p>

Please give reasons for your answer	I would like to object to the proposal to build 2500 homes in NW Thatcham for the following reasons: <ol style="list-style-type: none"> 1 This volume of houses would lead to them overdevelopment of Thatcham and mean that the town will more or Upper Bucklebury. 2 The extra traffic will cause many problems such as <ul style="list-style-type: none"> • increased volume using the level crossing in Thatcham which already causes long traffic jams

	<ul style="list-style-type: none"> Harts Hill is a narrow and winding road which is barely wide enough for two large vehicles to pass. There are already cars and cyclists already take their lives in their hands when they cycle up or down it. The idea of so much more traffic is horrifying. the roads in the vicinity are not well maintained and pot holes often appear over winter and in wet periods. It's a bit of a mess up with the repairs at the moment and this would be worse with increased volumes of traffic <ol style="list-style-type: none"> Bucklebury Common and the surrounding areas are home to a wide diversity of wildlife much of which is on the edge of extinction. Species for example tawny owls, bats, slow worms, tree pipits and night jays. If these houses are built it will lead to the destruction of much of the habitat and biodiversity of the area which is more or less adjacent to the site and the destruction of much of the habitat and biodiversity of the area There is no provision for doctors' or dentist surgeries. It's already very difficult to get a doctor's appointment and in our area. How will the 5000 (minimum) people get medical and dental treatment?

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	I believe legal requirements have been complied with.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	<p>Community:- The Development Plan (SP17) proposes a new primary healthcare facility, however there does not appear to be a Health Impact Assessment (HIA), without which the impact on existing communities and suitability for a new development is unclear and likely to be negative.</p> <p>The proposed plan for secondary education defined in SP17 is unsound. There is no evidence to estimate the number of pupils the school is to serve, no evidence the proposed funding is sufficient to meet the Council's obligation to provide education for all children of the school, no definition for the number of Form Entries and no clarity on timeframe for funding.</p> <p>Green Infrastructure:- SP17 provides no evidence that the development will have a positive impact on the environment. The proposed development to Bucklebury Plateau Biodiversity Opportunity Area within the North Wessex Downs AONB, which includes Ancient Woodland, does not allow for adequate protection of these areas and no evidence has been provided to suggest otherwise, contrary to national planning policy.</p> <p>Transport:- The Sustainability Proposal (SA) and Strategic Environmental Assessment (SEA) at the proposed Thatcham development are likely to have a positive impact on road safety and to increase opportunities for walking, cycling and public transport. A detailed assessment has been provided. Specific details of plan and proposals should be provided to accurately assess this.</p> <p>Sustainability:- SP17 states a Sustainability Charter is required which will be informed by strategy documents which have not been produced. Further there are no proven plans for providing adequate green space or protecting or improving existing green space. The Appraisal contradicts itself by accepting that SP17 will have a negative impact on environmental sustainability, whilst also claiming an overall positive impact on sustainability. Much greater clarity is required and more detailed comprehensive assessments are needed to properly assess the impact of the proposed development on the environment and sustainability.</p>

3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	
4. Proposed Changes	Proper detailed assessments of impact to environment, completion of HIA, full assessment of educational needs and better proposals to ensure protection of protected habitats and green space.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>Please give reasons for your answer</p>	<p>*Late Response*</p> <p>Thatcham Medical Practice Consultation Submission.</p> <p>Thatcham Medical Practice is one of three local practices affected by the planned development of 1500 residential units affected by the proposed development of 85 dwellings on land at lower way. Site Ref :THA025.</p> <p>Thatcham Medical Practice currently has 18,632 registered patients. We provide medical care for patients who reside over the past 5 years have employed additional allied health professionals and nursing staff to meet the increasingly patient population. 3 in 8 of our patients have a least one long term condition and 10% are aged 75 years or over. As a result of the need for more 'accessible' clinical rooms.</p> <p>We wish to continue to register all patients who move into our practice boundaries, however the predicted increase in new housing developments would not be manageable in the absence of further premises development.</p> <p>The draft policy indicates 450 sq m of GP surgery is to be offered to the Buckinghamshire, Oxfordshire and Berkshire Health Care Trust or other such body. This would be the equivalent of a Satellite Site or Hub, which we wouldn't support. It would not be fit for purpose and be unable to meet GMS contract requirements and associated standards of healthcare.</p> <p>If the appropriate funding was made available, we could extensively restructure our internal building to create more a footprint of our current premises. This would accommodate patients, within our practice boundary, who move into the new building. This investment would include putting in a lift to the 1st floor to create 4 additional clinical rooms.</p> <p>Whilst we support proposed plans for a new surgery to be relocated within the NE Thatcham Development site, in the absence of the healthcare provision for patients at Thatcham Medical Practice would be severely compromised.</p>

<p>Please give reasons for your answer</p>	<p>2. North East Thattham Strategic Site Allocation</p> <p>Policy SP17 North East Thattham Strategic Site Allocation looks to provide an urban extension at Thattham. The rail traffic travelling into or from Thattham southwards will travel over Thattham level crossing.</p> <p>Thattham level crossing is a public highway crossing with manually controlled barriers (locally monitored by CCTV), and freight trains per day crossing, 9234 vehicles and 162 pedestrians or cyclists (figures recorded in Aug 2019). The barriers at this crossing are down more than ½ of the time, as such traffic backs up and more often, than not, vehicles can cross. This is identified in the Thattham Strategic Growth Study (TSGS) at para 2.19 which states that...</p> <p><i>2.19 There is a level crossing at Thattham on Chamberhouse Mill Lane/Station Road which is a constraint for north-south traffic often forming in peak periods on both sides of the railway. These queues sometimes do not clear before the barriers close next train.</i></p> <p>Network Rail often received complaints in this regard. The only solution to this would be an alternative crossing such as a bridge. Unfortunately, the TSGS has concluded that providing a bridge would encourage increases in traffic which would be not the case that the provision of an additional 1,500 dwellings would be the cause for the increase the traffic, which would exacerbate the level crossing thus exacerbating the queuing situation?</p> <p>An urban extension to Thattham will increase traffic, queues will become longer, more complaints will be made, and more crossing will occur.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>As stated in our previous comments on this plan, a viability assessment should be undertaken which includes a level crossing to ensure that this development would be able to provide the required infrastructure to mitigate the impact of the level crossing</p> <p>Changes to SP17 should include Mitigation of the development's impacts on the highways network with improvements to the level crossing where they are needed and delivery of new access points for all forms of movement and transport to be agreed with the planning authority.</p> <p>We believe that without an alternative for vehicles using the Thattham level crossing the development proposed for Policy DM42, g. which requires new development to improve the safety and operational capacity of the local road network will be unviable.</p>

<p>Please give reasons for your answer</p>	<p>We continue to strongly object to the proposal to build a revised number of 1500 homes in NE Thatcham (THA20). Firstly, you highlight a revision has been made to THA20 reducing the number of homes to be built from 2,500 to 1,500 in the statement. In the previous consultation under REG18, the proposal was to build 1,250 homes in the first plan period and 250 homes. In addition to this, the site area for THA20 has not changed. Why is that? It demonstrates that WBC has a number of objections to this site and has not used the time between receiving the REG18 responses and opening the REG18 detailed plan and design for the site. Notwithstanding this comment, we object to the whole proposed site under THA20. You have responded in part to our objections raised in relation to the REG18 consultation. Sadly, most of the responses have not been answered under each heading.</p> <p>Grazeley</p> <p>We do not think you have adequately answered our concerns over the removal of the garden town site at Grazeley. The site is in the local plan. Not only that, the plan doesn't address the proximity of the THA20 site to AWE and Burghfield.</p> <p>Housing allocation</p> <p>Your response to my points on housing allocation was answered thus</p> <p><i>In relation to housing requirement for the District, the local housing need (LHN) is calculated according to the government's methodology which has been revised since the onset of the pandemic, but has not changed for West Berkshire (other than a small increase in the LHN due to slightly changed housing affordability ratios published in March 2022).</i></p> <p><i>Para 61 of the 2021 NPPF states: To determine the minimum number of homes needed, strategic policies should be based on a housing need assessment, conducted using the standard methodology in national planning guidance – unless exceptional circumstances exist which also reflects current and future demographic trends and market signals. The Council does not consider there are any exceptional circumstances which justify an alternative approach and the available evidence does not support any reduction of the local housing need below the minimum number of homes needed.</i></p> <p><i>The calculation of housing need does not take account of any of the potential sources of supply. That is a separate consideration. A range requirement has been expressed as a range in order to allow for flexibility and ensure that the minimum LHN is met. The range has been proposed to allow for approximately 5% additional homes. The use of a range helps the Council meet the objectives of the NPPF but also ensures that the Council is not assessed for the Housing Delivery Test against substantially higher numbers of homes than the standard methodology.</i></p> <p>Since this response was written, On 6 December 2022, Michael Gove, Secretary for Levelling Up, Housing and Communities issued a ministerial statement which set out to end the obligation on local authorities to maintain a rolling five-year supply of homes. The LHN figures are up-to-date. WBC has a local plan to 2026 and whilst understanding the new rules have not been finalised, why are you not addressing some of the current consultations before proceeding with the LPR and in particular with this plan for THA20 which received a large number of objections? The outcome of the Government consultation could easily provide the opportunity for WBC to address these concerns and maybe others within the LPR.</p> <p>Strategic Gap</p> <p>You failed to answer this point at all.</p> <p>The Strategic gap between Thatcham and Upper Bucklebury will be all but removed. Floral Way was meant to be the new road in Thatcham and this should be maintained.</p> <p>The land in north Thatcham rises gently towards the ridge along Burdens Heath and Cold Ash towards the boundary with the AONB. The gap from the urban area of North Thatcham to the AONB must be maintained. Council planners have made much of this</p>

plans for applications within THA20 in the past and yet choose to ignore what they have previously written within this proposed development is within 600m of the AONB. This development will have a major adverse impact on the AONB

Traffic

Again, your response is wholly inadequate.

In relation to the matters raised in regards to transportation, the Phase 1 Transport Assessment (TA) report identified of the highway network identified as being potentially problematic by the end of the plan period. Having said that, there would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation the significant impacts along the A4 and Floral Way resulting in potential delays per vehicle of an extra 32 – 62% when compared (without development).

However, a development of this nature would not be expected to go ahead without mitigation measures and improvements to the highway networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate traffic as a result of the development. The modelling outputs focus on the impacts for

both morning and evening peaks. It should be noted that it is not just changes to the highway network that will form mitigation to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be included in the transport plan.

I repeat, we have lived in this area for over 40 years and there have been no improvements to the road network in the area other than to build the Floral Way Road and the road from the A4 to the station for Seige Cross. They have provided the Floral Way developments but absolutely no improvements to the A4.

You talk about mitigation measures, what are they? When we moved to Newbury 40 years ago we used to turn off the A4 to drive through Upper Bucklebury to get to Reading and the M4 in the morning. Since that time, the houses referred to in the mitigation measures in the villages apart from a bit of traffic calming and no improvements to the A4 anywhere along the M4 or Reading. Another 1,500 homes will generate at least that number of traffic movements per day and you admit that the Floral Way and the A4; it doesn't take a genius to work out where the traffic will go to avoid the pinch points.

“The package should better accommodate the expected increase in traffic as a result of the development”.

Should? What isn't the plan being developed so it WILL?

“Other measures to reduce vehicles journeys from the development in favour of more sustainable travel and lifestyle choices will be included in the overall transport plan”. What are these measures?

There is absolutely nothing in this plan to support that statement. Firstly, the location of parts of THA20 are not in a pinch point. How does someone get from the far reaches of the proposed development to say, Thatcham Station or the town? If you have to cross the A4, this would cause more stoppages on the A4 and exacerbate the issues at the junctions. There is no sustainable movement of people.

Bucklebury Common

You woefully underestimate the impact on Bucklebury Common and your response again is wholly inadequate.

In relation to the concerns on the potential impact on Bucklebury Common, the development would involve a significant loss of open space which would be expected to serve the new population (and benefit the existing population). In relation to wildlife impact, a baseline assessment has been undertaken by the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Assessment (HELAA), one of the LPR evidence documents.

This development will conservatively be occupied by 4,000 or so people. The area's identified as open space will not be open space. Bucklebury Common on your doorstep, where do you think the majority of the people will go? The AONB should be given the same status as the National Park. Where is the thought process in your plan to achieve this? The plan is all but removing any protection of the common. It shows a complete disregard of the environmental and ecological issues that the proposed development will have. I am sure as I know others have a will point out the issues in great detail which we wholly support.

Alternative Sites

The continued dismissal of the Colthrop site is not sustainable. The Council talks about mitigation measures for THA20 but is being considered to positively assess the Colthrop site? This site is far more sustainable in its proximity to Thatcham and would deliver the required bridge over the railway to alleviate access to the A339 and the South. That could also give easier access to Greenham Common for the residents.

One of the best proposals I've heard during this whole process is to use the Kennet School and Francis Bailey school site. A purpose-built school and leisure complex to the North of the A4. This could have so many advantages if thought through properly and will not and never deliver.

Summary

We strongly object to the proposal for the above reasons but what depresses us even more about this part of the LPR is the lack of thought and ambition in the plan to deliver a long term strategic plan for Newbury, Thatcham, the Villages and the regeneration strategy for Thatcham town centre to encourage people not to get into their cars and drive to Reading or to make the area sustainable with easy access to transport hubs? We live in a changing world where the requirements will be very different from what we've known in the past. Global warming will mean 100-year events will happen far more frequently about what will be required by our children and their children. This plan takes us to 2039; we need to start to rethinking the plan is yet another opportunity lost.

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>I am not sure I am qualified to answer this question and why it is posed to a member of the public as it may dissuade a response. As there is no, Don't know, I have answered No. A Planning Inspector should be the person to make this judgement.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring	

<p>areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>I wish to exercise my right as a parishioner to object to this proposal and understand that my comments will contribute to the LPR process which seeks to determine whether West Berkshire's LPR is sound and legally compliant.</p> <p>The proposed development of 1500 homes in NE Thatcham has "been identified as the best location in West Berkshire."</p> <p>It is difficult to accept, on the basis of what has been presented, why this is the case.</p> <p>Its primary purpose appears to be to resolve West Berkshire's strategic housing needs not to address Thatcham's housing needs. The availability of land promoted by four landowners appears to have been the significant factor in the choice of this site. The impact on the environment and landscape has been minimised, somehow to be mitigated but without sufficient evidence.</p> <p>There seems to have been a reluctance to pursue other potential development sites, Brownfield sites when these are available, and a generation of land and utilise existing traffic access points.</p> <p>It seems to be a flawed plan determined to utilise a Greenfield site with a severe negative impact on the local environment.</p> <p>Overall it does not appear to meet the tests of soundness.</p> <p>Infrastructure</p> <p>The new development does not have to make good existing deficiencies, no additional funding is secured to enable the new development. Resident's lives will not be improved. All services will be under more strain.</p> <p>Education</p> <p>There is already pressure on Secondary schools, the Kennet is already oversubscribed. The current site cannot accommodate a new Secondary school. Provision for a new Secondary school within the site will not meet WB's 2013 policy for minimum viable size.</p> <p>Health</p> <p>There is pressure on all services, GP surgeries and accompanying health care resources, dental practices and pharmacies. The new Primary Care facility is not accompanied with a Health Impact Assessment and there is little evidence that the proposal will improve health.</p> <p>It lacks evidence that local general practices have been engaged in considering its size and scale or that the Berkshire Health Group has been involved. It does not seem that WB has complied with its legal duty to engage.</p> <p>It is questionable as to whether a new practice could be established at all.</p>

Transport

Clearly the proposed development will lead to increased traffic and further congestion.

.Floral Way ,with its feeder roads from the estate leading into it ,was agreed in the 1990s by the estate's developer t when the new estate was agreed.

There is insufficient evidence to demonstrate that Floral Way can cope with additional traffic from the SP 17 proposal the inevitable increase in traffic directed towards it ? No evidence that it can. Traffic modelling is not good enough.

New access points on Floral Way and Harts Hill will only compound the problem . The results of modelling have not t

The creation of a new car park north of Floral Way on Harts Hill Road can only add to the problem.

It is difficult to equate the proposal with a reduction in traffic ,particularly towards the villages .The predicted displacement is difficult to equate with the policy to "promote and maximise opportunities for all forms of safe and sustainable trans

Harts Hill Road is narrow with difficult contours for motorists, cyclists and the few pedestrians who use it .It has various bends and attempt to restrict the speeding down its lower slope. This road will see an increase in traffic and pose a

Information about Transport has been difficult to access with new priority junctions only apparent in January.

The LPR states it wishes to "reduce accidents and improve safety " .This seems contradictory.

It is impossible to see how the proposal will have a positive impact.

There is no provision for increased car parking at the station . The proposal may seek to endorse WB policy of reducing forms of transport there will inevitably be increased demand resulting from the development.

Landscape ,Ecology re Policy SP17

The scale of the proposed development will have a negative impact on the landscape and effectively urbanise the area measures.

The siting of this major greenfield development will destroy the landscape, the sense of space and countryside.It will skyline.

The Landscape Character Assessment identified key characteristics as valued qualities.

Including the varied landcover mosaic and important habitats and It's very rural character.

It recognised that the development so close to the ANOB boundary on upper valley slopes would be difficult to mitigate

Siting it so close to an ANOB with no up to date evidence nor a strategy for positive impact and overall diversity gain is required to protect the ANOB and will fail to do so.It conflicts with National Policy in relation to landscape character

There will be inevitable collateral damage to the Common, ancient woodlands and Heath.The damage is irreversible established hedgerows are not protected.

There is no evidence to support the claim that it will have a positive effect on the environment.

The Sustainability Charter requirements are not met,

There is no evidence that strategy documents including one on ecology have been made available publicly.

There is no evidence that the site provides enough green space or that the proposed Community Parks will enhance meaningful environmental value or that leisure routes won't harm the ecology,

It enables damage and harm to the Bucklebury Plateau Biodiversity Area . It poses risk to legally protected wildlife.

The Landscape Sensibility and Capacity study raised awareness of the adverse effects on landscape character and long term obstruction of views .

Ecology

The plan has been made with insufficient work on the ecology of the site.There has been no adequate ecological survey based on old surveys has been used.

Local work has identified the rich and varied wildlife present on the site but this has been minimised. Loss of habitat sources No feasibility study to inform proposal.

There has been insufficient reference to wildlife corridors between the ANOB and other areas.

There is insufficient work on how much damage promoting visitors to these areas will bring. The Increased footfall on t to the ecosystems. This is in conflict with WB's Vision.

Insufficient evidence on effects of increase on air, noise, and light pollution.

No studies presented which deal with implications of site disturbance.

Lack of strategic gapSP 17

Loss of current strategic gap between Thatcham and Bucklebury.

WB planning policy was once to preserve the gap and maintain separation between communities.

	<p>The value of maintaining a strategic gap seems to have been underplayed to justify this development. The urbanisation of Thatcham and Bucklebury. WB values the mix of rural villages, this would be put at risk</p> <p>WB policy recognises the importance of maintaining community identity as a significant factor in community well being. Well being is an element of WB policy that should be taken into account.</p> <p>Climate changes flood risks</p> <p>No evidence that a net zero carbon development would be viable or has been costed. Not in keeping with WB policy. Impact on flood alleviation scheme not properly considered.</p> <p>Loss of greenland on the slopes and its effect on surface water run off underplayed.</p> <p>No evidence that the proposers have sought to ensure WB's policy that there should be no adverse impact on the w</p> <p>The proposed development</p> <p>Why Thatcham?</p> <p>Thatcham has already had more than its fair share of large scale developments.</p> <p>A last minute decision to find an alternative site for a strategic development.</p> <p>Demonstrated by much of the evidence and supporting information being out of date or missing.</p> <p>The government 's position changed in December 2022 and housing requirement numbers are now advisory not mandatory. HELAA identified brownfield sites suitable for housing ,a more equitable and sustainable solution.WB need not continue</p>

<p>Please give reasons for your answer</p>	<p>CPRE Berkshire has over 400 members and supporters</p> <p><i>Introduction:</i> The Campaign to Protect Rural England (CPRE, the countryside charity), Berkshire Branch welcomes the Draft West Berkshire Local Plan. We would like to express our appreciation of the documentation that has been provided for the accessibility of the supporting information.</p> <p><i>CPRE concerns:</i></p> <ol style="list-style-type: none"> 1. We remain concerned however about the introduction of further housing some of the land allocations and would be concerned concerning air quality impact both on the new areas for development and on nearby areas of important landscape and countryside. 2. The main purpose of this response however is to express our great concern regarding the appearance of a major development which is proposed to be allocated for mixed use settlement in North East Thattham, (the Floral Way) which we believe is contrary to national planning policy and certain to cause disruption and unredeemable harm to what is currently an especially a high quality rural landscape. 3. Similarly the land adjoining The Haven, Kintbury (Site Ref: KIN6) in which 20 dwellings are proposed, will cause a significant impact on the AONB countryside, increase car fumes and cause traffic congestion in a small village location. The road network is a narrow and entrance used by neighbouring villages of Combe and Inkpen, which also serves the industrial estate located in the village. 4. The two areas above are part of the AONB/green field area. where landscape is "managed to conserve and enhance the natural beauty with its designation". 5. CPRE believes that genuine housing needs in West Berkshire can more than adequately be met by regenerating brownfield land, rather than sacrificing countryside in and around the AONB or by swamping local villages with excessive development. A reduction in the housing numbers currently imposed on West Berkshire as they are no longer binding but are merely a reflection of government policy announced by Housing Secretary, Michael Gove. West Berkshire has 53 brownfield sites totalling 1,200 dwellings. A rough estimate would allow building of 2837 homes without the need to build on any farmland or countryside, and without any impact on the rural environment, especially the AONB. 6. Many of WBC old list of 25 approved development sites have now been built on and it would be helpful if years of this could be used for housing. <p><i>Additional comments:</i></p> <ol style="list-style-type: none"> 1. The draft plan proposes a large strategic development area NE of Thattham now for 1500 dwellings to 2039, although in the longer term. It would run uphill to the AONB and be a source of light pollution. This has brought strong opposition from the village of its landscape and traffic impacts. Given the recent statement by minister Gove that where there are significant impacts on the countryside could reduce their housing numbers: WBC should pursue this and reduce the numbers of housing.. 2. There are sites along the A4 valley which would be better for housing rather than commercial use. One report mentioned some 170 homes in the Siege Cross/Colthrop area with a bridge crossing the railway and canal, something Thattham would support. Government funding should be available to implement this. 3. The uses of the area by the A329 into Newbury and along the A4 have been debated for a long time. It could be a good idea for a mixed development with some small blocks of flats for local workers. 4. Proposals for a large distribution centre east of Thattham was reported in Newbury News some months ago and since the end of 2 Feb to WBC asking about its location received no reply. It would be bad environmentally with a lot of large lorries on the poor roads through Thattham and through Aldermaston village. Policy SP8 recommends that larger distribution sites B8 should be near motorway junctions. Again, this would be a bad idea. <p><i>Conclusion:</i> CPRE Berkshire believe that the two specific sites mentioned above, included in the draft Local Plan, are contrary to the countryside; are unsustainable due to poor infrastructure; and cause unnecessary destruction of the landscape and countryside.</p>

Please give reasons for your answer

I write to object to the above Plan in relation to policy SP17 relating to North East Thatcham.

The allocation of this site was identified at the earlier Regulation 18 stage of Plan making, that proposal was for a large allocation of land for a new GP surgery, which was then reduced in the proposed new Local Plan and then continuing after into the Plan beyond. The allocation has since been reduced to a much smaller scale, solely the Council's response to the need to set out a longer-term vision for such a scale of allocations. The Council's response to set a longer-term vision for the site (and Thatcham) which in itself is a fairly damning indictment of the Council's lack of a clear and ineffective planning policy approach.

The Council have significantly re-thought the allocation and reduced its scale resulting in a very different Plan from that which was proposed. The Council have completely failed to consider alternative sites or areas of growth on the back of this rethink, despite the fact that the Council have a clear approach. It is disappointing that alternative sites in Thatcham have had no serious consideration (either in combination with other sites) and instead the Council have continued with what appears to be rather an unambitious and a flawed amendment to the current policy.

The result of this approach is a very disappointing policy for the local population of Thatcham that lacks ambition and does not provide any certainty this will be a development that meets the needs of existing and new residents. It is not positive that the Council have extended the town and it does not address deficiencies in services and amenities which are required by new residents. The following are not covered adequately by the policy as drafted and would request that these limitations are addressed in the policy wording:

- 1 Reference to quality of design and building beautiful - this is not adequately addressed and should be a key consideration in the development;
- 2 Commitment to the allocation delivering and not simply 'offering' land for a new GP surgery. There is a clear need for a solution to delivery this is a significant flaw of the policy as drafted. The allocation should be on the basis of a provision for healthcare, or failing that the delivery of an off-site redevelopment of the existing GP practice in Thatcham. Thatcham and lack of space capacity this isn't a "nice to have" item it is essential to have a workable solution to such a need not addressing that positively;
- 3 The provision of key worker housing (rather than simply affordable housing) to house our future health care, police and other services is a requirement of policy for this site;
- 4 There is inadequate justification as to the scale of countryside being used for this allocation, as this seems to be the result of smaller proposals for 1,500 dwellings (Reg 19) as the previous much larger proposals. This cannot be right and is not supported by the evidence base. Such an approach is unsound and the Council need to re-define a smaller site area, or define undeveloped land to address this point.
- 5 There are inadequate proposals to address healthy living and sporting provision in Thatcham. This provision is a key requirement for growth needs to improve the offering substantially in the policy requirements;
- 6 There appears to be no understanding of how viable the policy is to deliver. The policy for net zero and the high performance buildings need to be viable or provided with flexibility to ensure the other infrastructure needs (and not "nice to haves") are not compromised and through lack of viability;
- 7 The requirement for housing to be energy efficient is welcome but the Council should seek to deliver this through the use of Passivhaus rather than leave elements less well defined;
- 8 Public open space and the availability of this from both new and existing residents should be better covered in the policy;
- 9 Given the Reg 18 allocation was for a much larger site and the planning authority have only moved away from that allocation, the changes to Central Government policy (rather than a local re-think or reconsideration of the availability or appropriateness) is extremely poor planning not to consider how this allocation would not be expanded in future Plan periods, as unduly restrictive and considered and planned for now to ensure it isn't frustrated;
- 10 The policy appears to be protecting the central barns on the site for heritage purposes (which is supported and laudable for future use. Ironically, Thatcham has already suffered from similar poor planning by the Council on a barn centrally located in the town a decade or more (now converted to a house). The policy needs to positively set out the use of these buildings to serve the existing one;
- 11 Electric Vehicle Charging for new residents and to serve the wider town should be addressed in the policy;

	If this is considered to be the right location for this scale of growth and the red line of the allocation were corrected the comprehensive approach to this very significant allocation. It appears the Council are entirely out of their depth in doing needs significant re-drafting to achieve what the Council perhaps aspire to and much more importantly what the people

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>I find the plan unsound for a number of reasons. These reasons are listed below.</p> <ol style="list-style-type: none"> 1 TRANSPORT. 2 Increased traffic. <p>I am very concerned about the amount of increased traffic that the development will bring to not only Upper Bucklebury such as Cold Ash. In particular I am extremely concerned about the plan for an exit at the north of the development with no modelling results for this junction in the Transport Assessment and no drawings either. Considering there are dra junctions, I find it very worrying that the proposed junction on Harts Hill Road does not appear to have been researched. Harts Hill Road will be able to confirm, this road is completely inadequate for larger amounts of traffic, has no pavement, and has had serious accidents, as can be confirmed just from earlier this year with large numbers of cars having trouble on the road to be called out to at least one accident due to the road conditions.</p> <ol style="list-style-type: none"> 1 Safe and sustainable transport. <p>I question the Council Assessment that states '<i>the policy is likely to have a positive impact on road safety as safe transport routes to the site.</i>' Considering WBC also predicts that there will be '<i>some displacement of A4 traffic onto wider rural routes such as the A4300</i>' I can see how both statements can be true when the rural route leading to Upper Bucklebury is already inadequate and unsafe as stated above.</p> <p>I also question the council statement that '<i>the policy is likely to have a significant impact on walking, cycling and public transport should be designed with these in mind.</i>' Firstly, the popular and scenic walking route over the fields between Upper Bucklebury and Harts Hill Road will be replaced with houses, and I do not see this as a positive change. Secondly, the increased traffic on Harts Hill Road is dangerous for cyclists, and it is already dangerous to the point where I would not cycle along it myself, or let my child cycle. I am expecting my oldest child to start attending Kennet School in September, it would be an extremely convenient option for her to travel from school, especially as sustainability is something that is important to me, however there is absolutely no way that she can travel to her to cycle on Harts Hill Road as it is already too dangerous, narrow and busy for cyclists to feel safe. Thirdly, as public transport in Upper Bucklebury, we need to travel to Thatcham in order to be able to use it, so it is unclear to me how this large increase in the local public transport service under yet more pressure and also make it more difficult for residents of Upper Bucklebury due to increased traffic on Harts Hill Road – will be a positive thing.</p> <ol style="list-style-type: none"> 1 Primary school and nursery provision.

	<p>1</p> <p>There are no details in the LPR for the provision of nursery, early years and primary education. There is no data or information on the number of schools or form entry requirements, and with the only referenced data being 12 years old, I fail to see how this can be used to inform the LPR.</p> <p>1 Secondary education provision.</p> <p>Currently, many children from Bucklebury attend Kennet School (our nearest catchment school), which is oversubscribed. Children who live nearer to the school are given precedence, this would mean that children from the proposed NE Thatcham Development would have to travel further to Kennet School, although Kennet would be very unlikely to be able to accommodate all of them. Children from Bucklebury would have to travel further to Kennet School as they are only in a secondary catchment area for, and secondly is a 45 minute bus ride away compared to the very short distance to Kennet School.</p> <p>It is clear that already there are not enough secondary school places in Thatcham and therefore a secondary school would be a matter of necessity for this proposed development. However, there are no details of the land to be provided. In addition, it is clear that the NE Thatcham Development is not sufficient to fill a 6 Form Entry secondary school on its own, so it is unclear how the development at all, and the plan is therefore not even considering the effect this would have on the children already living in the surrounding area. Children of this development would be unable to attend their local school. Obviously it goes without saying, that forcing children to travel further away, will both contribute to the increased traffic issues and will be extremely detrimental to sustainability objectives.</p> <p>1 Sports fields.</p> <p>The LPR mentions providing sports fields, however these need to be on flat ground of which the only suitable area is the area around the school in the area with the most traffic fumes (see my earlier point regarding transport, for info on increased traffic). There are no details for these facilities, and the LPR also seems to assume that the school playing fields (assuming the school is even viable) can be used for use as sports fields. It is highly unlikely that this would be the case, as schools would not be able to allow public access to their playing fields for reasons among many others.</p> <p>1</p> <p>1 It is extremely concerning that the LPR fully states its intent to purposely direct extra traffic straight into the area of the AONB ('...displacement of A4 traffic onto wider rural routes such as Upper Bucklebury'). It is clear that the proposed development is so close to the AONB and which currently provides a home to legally protected wildlife, will have a huge detrimental impact on the area and public enjoyment of it.</p> <p>2 A request for an access road for just five new homes in Cold Ash has recently been refused by the council due to the 'adverse impact' this would cause. The same argument also applies for this development, only on a much larger scale. The impact of this development, with its adverse suburbanising impact, than situating thousands of new homes on greenfield land just a mile from the AONB.</p>

Please give reasons for your answer	<p>I object to the plan as proposed.</p> <p>There has been inadequate assessment of its impact on the environment: it is greenfield when brownfield sites are available for poor reasons. This needs to be reviewed particularly in the light of recent Government advice.</p> <p>No consideration has been made for the effect on the flora and fauna (including humans) neither on this area nor the area subject to flooding (who remembers 2007?). Also the increased light and noise pollution associated with a further 5000 houses.</p> <p>Educational and medical provisions are already stretched in this area and no effective attempt has been made to plan for what is not for the future. Grandly it is stated that there will be new schools and health provision but where is the money? Where will the skilled manpower come from?</p> <p>The original plan suggested that all the extra traffic would exit onto A4, but now an exit onto Harts Hill Road is proposed. Harts Hill road is unable to cope with the present volume of traffic and fast driving. It is already a dangerous road particularly in winter.</p> <p>This proposal is poorly thought out and lacks precision.</p> <p>It is true that some housing is needed, but where, how and with what services needs to be represented.</p> <p>I am happy to elaborate on any of these points</p>

Please give reasons for your answer	<p>I am writing to voice my concern and objection to the proposed development of approx. 2500 home in North- East T...</p> <p>be unsound.</p> <p>The effects of this proposal are devastating for the town of Thatcham, and I imagine there will be plenty of objections from... are principally focussed on the village of Upper Bucklebury and the adverse impact on our community.</p> <p>It is impossible to overestimate the negative impact this development will have on Upper Bucklebury. Whichever way y... creeping up the hill, Upper Bucklebury will all but merge with Thatcham, separated only by a small copse at the end... good thing for the identity of our village and for the peace, tranquillity, and security of our community.</p> <p>I understand the need for development and accept that we must build more homes, but I question the need to build a... irrespective of current targets. It seems a totally disproportionate allocation in-an area where so little of the land is de... plains. The plans would have been in place well before the Covid pandemic, so would it not be sensible to review the... nature of our demographics and working patterns since then? If the plan was to house commuters to London, who k... or be required to, work in London (or in any office) in the post-Covid world? If the work pattern continues to favour a</p>

then who will choose to come and live in such an expensive area? Also, with the birth rate dropping and local primary schools closing, will we see half empty classrooms in the proposed new school(s)? It will be more likely that the schools will be empty. If, however, these new houses were purchased by keen commuters and assuming people returned to office work in Luton, Thatcham train station will cope with the hundreds of extra cars that would need to be parked there. Not everyone will need a car, but the facilities there would just not be adequate.

Transport

It was interesting to hear in an initial presentation last year of the estimated 12% increase in traffic heading up Harts Hill. This is already significant on such a dangerous hill, but unfortunately is probably an overly conservative estimate. It will be worse. Congestion on the A4 and Floral Way (already congested at peak times) leads to more Rat Run traffic through our village. For environmental and noise concerns, many parents will be concerned for the safety of their children in the village especially at the school.

The addition of an exit from the new development on to Harts Hill in the new plan will only exacerbate the problem of traffic heading up Harts Hill to access the A34 or M4 westbound via Cold Ash or through Upper Bucklebury, Chapel Row and the M4. This latter route will also cause serious congestion at peak times at the junction with the A340 at Theale.

Harts Hill is already a dangerous road without pavements, and I believe the increase in traffic on this road will just be a disaster.

The plan to build a car park halfway up Harts Hill is also a cause for concern. Apart from not being sure of its purpose, it will be a prime location for intimidating gatherings and antisocial behaviour.

Healthcare

There are serious concerns over healthcare provision to accompany the new development. Although there is a (small) health centre facility provided for in the plan, it is my understanding that a development proposal of the size of this one should have had a Health Impact Assessment (HIA) in place outlining how the details of the proposal have been discussed with the health service providers. Only a few discussions would support the proposal, but it is of grave concern that we have no evidence that either the developer or the council has organised an HIA.

To compound this concern, since the NHS are struggling to recruit new GPs and are not opening many new practices, it is unlikely to get a new GP practice in Thatcham at all and the current provision would not be able to cope with the huge increase in demand that would bring. Thatcham Health Centre, Burdwood and Chapel Row are already bursting at the seams.

Neither local GP practices nor local dental practices appear to have been consulted on the potential impact of the development and as a result only woefully inadequate and unrealistic provision has been made in the plan.

Environment

The inevitable increase of visitors to our village/parish and Bucklebury Common can only have a detrimental effect on the ancient woodlands, meadows and wildlife that need to be protected. Bucklebury Parish Council say on their website: "Loss of ancient woodlands as a result of inappropriate management are one of the most damaging threats facing rare species in Berkshire. These woodlands wherever possible and appropriate advice sought on managing them to conserve the natural diversity of life and to halt the loss of not only in Berkshire but also in the UK."

If this development were to go ahead, these precious woodlands and rare habitats would almost certainly be under threat. The increase in the visitor numbers - our woodlands would be a short hop for the residents of the new development compared to the surrounding area they could walk (or drive!!) to.

We can see no evidence that the new plans provide for adequate green spaces or for the protection of biodiversity. With so many people housed in the new development needing access to green spaces, there can only be a negative impact as the development encroaches on Bucklebury Common and the adjacent AONB.

I was bemused by the proposal of a 'Country Park' in the original plan (now interestingly changed to 'Community Park'). In reality, it is a steep bit of land that would be too difficult and expensive to build on, so it is conveniently turned into a 'Park'. It would be interesting to know what this park would look like. Steep slopes do not really lend themselves to intensive use. There is no evidence of budget allocated to maintain it long term. All discussions around the proposed park and its protection have been ignored.

Education

New educational establishments seem to be part of the plan but the details on this are insufficient and contradictory. There are plans for education facilities for all children in West Berkshire, but there is no detail on how they will do this with the addition of thousands of children housed in the new development.

It appears that the developers will provide a sum of money toward building a new primary school, but the timing of this is unclear (or whether they will provide sufficient funding). Unless it is built first, there is the risk they will not be built at all. The new houses will necessarily have already found a school solution for their children.

Similarly for secondary school provision. A contribution by the developers may be insufficient and it is unclear what this would be (given no details on proposed location so there is no assessment on the impact on traffic). If government guidelines stating that a 6-form entry are unsustainable, we would be looking at a new school with at least a GFE. However, we appear to have no idea of pupils that the school would need to cater for, so the number of form entries is not stipulated in the plan. Interestingly, a development of 2,500 houses would not provide enough pupils to fill a 6-8 FE school suggesting a smaller school would be smaller than a 6FE school is unfeasible. Unsound again.

Conclusion

In summary, I would like to register my objection to these plans in the strongest terms. The impact on the village of Upper Bucklebury with increased traffic, a steady flow of visitors seeping in and the consequential damage to the local environment, the village will change forever and not for the better. These issues, together with the lack of evidence that adequate provision of facilities has been incorporated in the proposal make the Local Plan completely unsound in my view.

I would urge WBC to reconsider the whole plan, given that housing allocations previously set are now only advisory. Instead of building 2,500 homes, so alternative, smaller sites can be sought for a reduced number of new homes. Please follow the lead of other developers who have paused their plans based on previous housing allocations and work on a revised plan later in the year based on realistic assumptions. This could mean a vastly reduced number of new houses.

<p>Please give reasons for your answer</p>	

<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I write to you regarding the above review. I am strongly objecting against the proposed plan based on the issues highlighted below.</p> <p>Transport</p> <ul style="list-style-type: none"> • The area is about to be swamped by traffic that cannot be handled by current infrastructure not to mention the impact on the local ecosystem. • There is a plan for an exit at the north site onto Harts Hill. This will push traffic toward Upper Bucklebury, and beyond. The infrastructure cannot take this and neither can wildlife. This would have a major impact on the local environment. • The Transport Assessment talks about new priority junctions, but modelling suggests there won't be problems, and no improvements in modelling results at all for Harts Hill. • Parking will be an issue too. A car park is being shown on Harts Hill, this is close to the common which again carries a high risk to people and people. • Roads safety will become an issue due to busier roads affecting cycling, running, riding which will all become more difficult. <p>Healthcare and Infrastructure</p> <ul style="list-style-type: none"> • There is no detailed healthcare planning in the document, there is no detailed talk of a new GP or dental practice being provided by WBC or the developers to any local GP practice to understand how stretched they already are. • Local GP practices like Thatcham, Burdwood and Chapel Row are already all full. • There doesn't seem to be any provisions to look after people in this proposed development. <p>Environment</p> <ul style="list-style-type: none"> • It is hard to believe Council would want to allow for 1,500 houses on agricultural land right next to an area of outstanding natural beauty. • There is a huge danger to the Bucklebury Plateau Biodiversity Opportunity Area including its woodlands and wetlands. • There is a huge promise of a community park sounds both suburban and ill thought. • The WBC states in the LPR that a Sustainability Charter is required, yet no strategy docs have been submitted to show legally required biodiversity net gains. • There is no provision for recreation or green space for another 4,000 people coming. Plan mentions a vague community park. Instead people are going to flood into the AOB, Bucklebury, Chapel Row, Yattendon. • The LPR's own Sustainability Appraisal has some very sad news, and revelation, even it concedes that SP17 is a greenfield site. Why is environmental sustainability so why building on a greenfield site?

	<p>Education</p> <ul style="list-style-type: none"> • No coherent plan has been put forward, no details of nursery or early years. • Primary school education is contradictory in terms of planned numbers, secondary schools are already oversubscribed that is being suggested however cannot be filled, as government guidelines are that such schools with less than 100 pupils should be closed. • There is no funding earmarked for school facilities sports ground etc. <p>I strongly believe WBC should pause/stop this plan and instead wait for an updated planning guidance that is coming.</p>

Please give reasons for your answer	<p>It is my view that the planned development of >1500 new homes as part of the NE Thatcham development is not sound particularly for the reasons below. I also highlight that many of these objections were raised by the council itself when W blocked the building of 500 homes in 2015...</p> <p>Traffic and access: there is already a high volume of traffic along the A4 between Reading and Newbury, including does not adequately address access/ traffic volumes. It would still rely on access from the A4 or Harts Hill Rd. In addition the A4 access routes will lead to a material increase in traffic through the villages in the adjacent AONB, inc. Upper...</p> <p>Healthcare facilities: there is already substantial pressure on healthcare provision in West Berkshire, as there is already one new GP surgery but given the number of new residents and the extent to which existing services are oversubscribed.</p> <p>Access to education: Similarly the planned expansion will put substantial pressure on secondary schools in the area which are over-subscribed.</p> <p>Environmental damage: in addition to the removal of fields and hedgerows there will be consequential damage to Bucklebury resulting in increasing damage to an ecosystem of national importance</p> <p>The planned 'green spaces' for the new development are small within the scheme's size, and will provide no meaningful benefit.</p> <p>Lack of a gap between Thatcham and Upper Bucklebury – Thatcham and Upper Bucklebury will effectively merge together resulting in encroachment of Thatcham towards the AONB border and the village.</p> <p>I highlight that many similar objections were raised by West Berkshire Council itself in blocking the development of 500 new homes development - in 2015.</p> <p>At that time <i>the Council argued</i> that the proposed 2015 development would:</p>

	<ul style="list-style-type: none"> Urbanise the key areas of sensitivity [...] including: the lower slopes of an important ridge line; Big Gully, a local area and long views across the Kennet Valley; the lack of development with scattered farmsteads and minor rural historic settlement at Siege Cross Farm. Detract from the enjoyment of the character and appearance of the AONB in views from the escarpment south of the ridge line. Erode the identity of Thatcham as being separate to that of the surrounding rural settlements. Fail to conserve the historic landscape setting and rural context of Siege Cross Farm.

Please give reasons for your answer	<p>This letter is an OBJECTION to the LPR, particularly those aspects related to SP17. The writer finds the LP proposed set out below. I am prepared to appear and make addition submissions to the Planning Inspectorate if asked.</p> <p>I live in <address redacted> and the main impact of the proposed development will be an unwanted increase in traffic through Chapel Row and along The Avenue. This route will be the 'rat-run' to Theale, Reading and the M4 east-bound.</p> <p>WBC accept 'some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury' and by extension C effect on residents. The roads are not wide, and the wider road network completely unsuited to commuter traffic.</p> <p>Throughout the Reg 18 period and in public meetings between Bucklebury Parish Council and WBC planners' assured ingress and egress would be to and from the A4 and Floral Way. However, hidden within the evidence pack offered a is referenced. There are no drawings of its position or topography. This late addition, lacking any analysis, demonstration and consultation with the communities affected. This additional junction is both a danger and will have a significant o It is dangerous because Harts Hill is narrow, winding and the junction's position is shielded by a blind bend in the do</p> <p>The addition of 1500 or more houses will result in more car movements. There are no identified employment opportunities few within walking distance. Additional commuter traffic is inevitable.</p> <p>The A4 is already gridlocked at peak times and residents will seek to avoid jams. The junction with Harts Hill provides tested show that traffic from the site for the A34 and M4 west will route via Cold Ash and that for Theale, Reading and Bucklebury, Chapel Row and Bradfield South End. This is an antithesis of WBC's assertion that the A4 will be the pri</p>

	<p>Traffic through the villages, Upper Bucklebury and Cold Ash will increase – this is acknowledged by WBC – but no me The roads are without pavements, narrow and used by children to walk to school or to the school bus. Horses use th and to bridleways. The feeder lanes to this village route are designated “quiet lanes” traffic will inevitably also oversp route,s The increase in traffic will inevitably lead to disruption and accidents on all the lanes.</p> <p>That no credible account of traffic is included in the evidence demonstrates unsoundness.</p> <p>The choice of Thatcham Northeast for development of 1500 or 2500 homes is a poor choice. The LPR is unsound, un in a cooperative way. It fails to reflect the needs of the community and the lack of insight into the effects of additional example.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>I fervently object to the above proposed development.</p> <p>It is going to use greenfield land when we have many brownfield sites available that could be developed instead. Once greenfield is lost as forever.</p> <p>There is no independent environmental study of the existing flora and fauna of the proposed site. It is said that there is no offence to disturb or damage badgers habitations, a prison sentence is mandatory (Protection of Badgers Act 1992) for agriculture, forestry and drainage purposes.</p> <p>These fields act as a sump to protect the buildings lower down in the valley. This reduces any flooding to the south of the hill. If built upon not only will those buildings be flooded but also those further down the hill. Harts Hill Road will become a watercourse.</p> <p>The junction of the A4 and Harts Hill Road is well formed with pavements and traffic lights up to the roundabout on Floral Way. Floral Way becomes a country lane. Further up the hill there are tall hedges with mature overhanging trees, the road twists as a narrow lane for challenging driving with no provision for pedestrians at all but used by both cyclists and pedestrians and E scooters on the pavement, consistent with being a country lane.</p> <p>The original plans showed that the estate would empty onto the A4 and Floral Way without involving Upper Bucklebury. The current version mentions an access point on Harts Hill Road to the new buildings.</p>

	<p>I have lived in Upper Bucklebury for <redacted> years and the pollution has increased markedly. There are more vehicles despite the traffic calming measures which are not always honoured by lorries and farm machinery, especially at harvest time. This will increase if there are more houses with attendant cars.</p> <p>Upper Bucklebury has no street lighting which benefits nocturnal animals, but makes the road through the village, Broadlands and cyclists; any increase in traffic will exacerbate this.</p> <p>The plan overall is poorly conceived. There are small parking areas, random recreational areas and newly planted 'wild' areas which are an oxymoron. Ancient woodland is precious and should never be altered as there is so little of it.</p> <p>There is inadequate infrastructure to support the existing population of Thatcham without adding more houses.</p>

Please give reasons for your answer	I am of the opinion that the basis for the amount of development in general has been set on out of date information desire to balance the development between the north and the south of the country. Added to this the Thatcham area of the West Berks development over the last 50 years, when compared to the rest of West Berks. The proposed Thatcham lost greenfield division between Thatcham and Bucklebury, when there is a considerable amount of Brownfield sites

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.	

* Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>I am objecting to the Thatcham NE development plan because it is unsound. I am a student at Kennet school which children should go to my school while a new school is built. There is no information about where this school will be or pupils for it to exist.</p> <p>I am driven to school and the traffic is bad in our village and in Thatcham. This will get much worse once the houses an exit at Hart's Hill.</p> <p>It's been great to go to school near my home and have school friends that live near me but the development may mean in my village will have to go to The Downs if our catchment is changed.</p> <p>I often walk on the fields that will built on on and on Bucklebury Common. The plan will not conserve the environment because houses will be built on it on lots more people will be walking on the Common.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No

<p>Please give reasons for your answer</p>	<p>I would like to register my objections to the proposed building of between 1500/2500 houses on the North East of Th Regulation 19 Objection. >Name, address, email and telephone no. redacted< I am against the development because of the environmental impact it will have on Bucklebury Common as well as th Bucklebury Common has many legally protected species including ground nesting birds. Even a proportion of the po their dogs who will come onto the common will cause significant disturbance and damage as happened during Covi The green sites on the proposed development will not satisfy the demand for green space by all the inhabitants of the p by yourselves with the complete lack of strategy documents. The flagrant carelessness displayed in the consultation document for the environment are at best vague and at worst a Council supposedly working for the people are prepared to accept this destruction of their local environment. Leading on from this there is the dramatic increase in traffic which will inevitably pass up Harts Hill, onto Broad Lane the surrounding small 'quiet' lanes. Cycling or walking is already hazardous in these lanes and will become impossib is inevitable. The consultation document actually admits this increase. From reading the local newspapers there is already sewage being dumped into the Kennet and Avon canal suggesti water and sewage systems are overloaded. Unless there is a huge investment by Thames Water to address this ther issue which must be given urgent consideration. There is insufficient infrastructure such as Surgeries and Schooling – already overstretched areas. The whole plan is unsound and based on something paid for by developers who have nothing but financial gain in m Leveling Up Housing and Communities has had the sense to back down on the number of houses needing to be bui Indeed the Government has recently said that green field development can be reconsidered. There seems to have b to consider alternative brown field sites. It does seem to me there are many flaws in the proposed plan of this unnecessary development and I do hope that t</p>

Please give reasons for your answer	<p>The LPR is not positively prepared and would not achieve the goal of sustainable development for WBC and the wider area.</p> <p>The LPR is not justified. Many of the grounds for assessment of impacts and benefits lack credibility and is not based on credible evidence. The alternatives have not been adequately explored and there is no basis to demonstrate that the allocation of North East Thatcham is the best strategy for WBC.</p> <p>The LPR is not effective. There is no evidence that the development of 1,500 homes at North East Thatcham is deliverable over the plan period.</p> <p>The LPR is not consistent with national policy. In many instances the allocation for development of North East Thatcham directly conflict with national policy, particularly in relation to landscape character and impact upon the AONB.</p> <p>My Objections are:-</p>

	<p>Transport</p> <p>The WBC accepts that there will be 'some displacement of A4 traffic onto wider rural areas such as Upper Bucklebury Assessment Report July 2021 shows an exit onto Harts Hill. Traffic exiting here will most certainly continue on the rural roads Cold Ash & Chapel Row and is in addition to 'some displacement'.</p> <p>The new residents in the development will be commuting to Reading and Newbury so soon the Chapel Row – Cold Ash is a choice. This is a rural road with existing accident blackspots, with little pedestrian provision, and passing a number of farms.</p> <p>The Transport Assessment proposes priority junctions at each exit from the site, but show no modelling evidence, and no drawings.</p> <p>Safe and Sustainable Transport</p> <p>The Strategic Environmental Assessment (SEA) , Objective 4 is "To promote and maximise opportunities for all forms of transport. Increasing traffic onto the surrounding rural roads is counter to Objective 4.</p> <p>Public Transport to the rural villages will not be supported by the development as the desirable routing would be by rail.</p> <p>Healthcare.</p> <p>Given the size of the proposed development, why is there no Health Impact Assessment (HIA)? How does the proposed development fit into the existing provision? It is my understanding that it is unlikely that an existing GP practice would entertain the proposed development. Consequently, the demand will spill over into already overcrowded GP practices.</p> <p>Environment</p> <p>I can find no evidence in the WBC submission to support the claims that the development will have positive impact on the environment. The Appraisal accepts that the development will have a negative impact on environmental sustainability, declaring this would be the case if no such measures are provided.</p> <p>I would estimate an additional 4,000 people will be looking to have access to green space for recreation and well being 'green parks' which have no accepted definition and can hardly be interpreted as taking access to green space seriously.</p> <p>The natural focus of the 4,000 inhabitants will be the Ancient and protected woodlands adjacent to the site, counter to the fragile ecosystems of Bucklebury Common.</p>

Please give reasons for your answer	As a resident of Upper Bucklebury since 1998 I object strongly to the proposed Local Plan. I believe it to be unsound and will have an irreversible negative impact on the quality of life.

	<p>Transport</p> <p>Access to/from the development will be via the A4 which is already gridlocked at peak times with traffic backing up along to Reading or the M4/A34 will inevitably seek an alternative route up Harts Hill through Upper Bucklebury. Harts Hill has caused numerous accidents over the years and is especially dangerous in winter, even when gritted. The development through Upper Bucklebury and pose an increased risk to villagers walking their children to school in the morning or on no pavement along Burden's Heath, which cars will use to head towards Cold Ash and Junction 13 of the M4.</p> <p>Healthcare</p> <p>The healthcare proposals contain only wishful thinking with no detail and an absence of consultation with existing medical services. There have been no Health Impact Assessment. NHS England has commissioned few new GP practices, so the burden on existing ones is already overstretched. Bucklebury is fortunate to have a well-managed medical practice but it was stretched during the provision of repeat prescriptions and other services. An excess of new potential new patients will have a severe impact on its ability to service its current list.</p> <p>Environment</p> <p>The Plan will have a severe negative impact on the footpaths and woodland in the proximity of the development. Within the development and is traversed by means of a narrow footpath, with few visitors encountered on each walk. The development will increase footfall, widen the path and change the character of the area. Bucklebury Common similarly has many narrow paths, the flora and fauna. The development will result in a significant increase in pollution – light, noise and emissions – all of which will have a negative impact on the environment.</p> <p>Strategic gap</p> <p>Upper Bucklebury retains its separate identity from Thatcham solely because of the green strategic gap north of the village and distinct boundary between the two urban areas. If the North East Thatcham development proceeds Upper Bucklebury will merge with Thatcham and will itself become North East Thatcham. The rural nature of Upper Bucklebury will be destroyed.</p> <p>Education</p> <p>The Thatcham NE Development Plan, funded by the developers, was based on West Berkshire District Council data and is therefore out of date. The same plan also notes that the proposed development is not sufficient on its own to meet Government guidelines state that secondary schools with less than 6FE are not sustainable. The developer funding construction, and has no impact on the substantial running costs of the school. Much of the site is sloping and there is no sports field, unless it is close to the A4.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	The policy as worded does not provide sufficient protection for the adjacent ancient woodland as required by the NP
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? -	No

<p>Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>The site is adjacent to the following areas of ancient woodland which require protection in line with the NPPF but there is no provision for this in the policy.</p> <ul style="list-style-type: none"> - The plantation (SU52056829) ASNW 2.92 Ha - Hartshill Copse (SU52706889) ASNW 22.82 Ha - Unnamed (SU53236822) ASNW 1.08 Ha - Unnamed (SU53346802) PAWS 2.01 Ha - Long Grove Copse (SU53646771) ASNW 18.02 Ha - Blacklands Copse (SU54216798) PAWS 27.63 Ha <p>We therefore propose amended wording to include requirement for appropriate buffers for adjacent ancient woodland</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>n/a</p>
<p>4. Proposed Changes</p>	<p>In order to comply with the NPPF requirement to protect ancient woodland and in line with draft LP Policy DM15, we propose to amend the wording of the Ecology Strategy to read:</p> <p><i>An Ecology Strategy which will set out:</i></p> <ul style="list-style-type: none"> <i>a Biodiversity Net Gain Strategy to show how net gain will be achieved including through habitat restoration and linking of habitats;</i> <i>how priority habitats and ecological features will be protected and enhanced;</i> <i>the creation of new ecological features; and a site-wide management plan.</i> <p>To read:</p> <p><i>An Ecology Strategy which will set out:</i></p> <ul style="list-style-type: none"> <i>a Biodiversity Net Gain Strategy to show how net gain will be achieved including through habitat restoration and linking of habitats, including appropriate buffers for the site (in line with policy DM15);</i> <i>the creation of new ecological features; and</i> <i>a site-wide management plan.</i>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	<p>No</p>
<p>5. Independent Examination</p>	<p>n/a</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes * No</p>	<p>Yes</p>

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the	

<p>delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>I would like to add my voice as an objection to the planned massive housing building project sited in greenbelt land near Thatcham.</p> <p>I am very concerned that this plan is full of issues that will drastically and detrimentally affect the residents of both Thatcham and the surrounding villages like Cold Ash, Ashmore Green and Bucklebury. I believe there is clear evidence that the number of houses and the increase in traffic movements will overwhelm existing roads, schools and medical provisions of doctors and dentists. I am also very concerned that the greenbelt has been down played and this increase in housing will impact detrimentally on many species including protected cranes and badgers.</p> <p>It is clear from the plans and other information including government guidance that various thresholds will not be met for schools or dentists to be build; even if they could be staffed, which is doubtful given the current issues within those industries. The schools in the Thatcham area are at or above capacity and are situated in places which cannot be expended to account for such a large project. Thatcham has recently lost one pharmacy and another is closed more than it is open, it has no bank and limited shops. Residents are forced to take to their cars to get even the most basic services. Without the services to look after such a large project the whole project becomes unviable.</p> <p>As for roads, this number of houses, are sited in such a way to funnel huge amounts of traffic north to the M4 / A34. The roads are small and rural, barely capable of taking current traffic levels and are not suitable for widening or expansions. An increase in noise, fume and light pollution to the doorsteps of the many rural residents. The alternative, is shunting traffic out on to the surrounding roads. Many junctions are clogged at rush-hours or through sites were regular accidents happen. Wider, an increase in traffic will exacerbate the major issues around the Thatcham Level Crossing; which is totally unfit for purpose and causes massive attendant frustrations, delays and pollution.</p> <p>Finally, building such a large project on greenbelt land is against all sense, when we should be preserving our greenbelt. The environmental impact is woefully short of properly assessing the current landscape and its value to both the economy and the wealth of wildlife that calls it home. No amount of landscaping between houses or vague comments on the provision of green spaces will make up the total loss of many areas of farmland, hedges, trees and green spaces. While not in the AONB, it is well known that the greenbelt is the urban sprawl and the protected areas, as well as clear demarcations between Thatcham and many outlying villages. It is both the wildlife who use it and the very feel of the environment in this part of West Berkshire. Further, Thatcham has a long history in the past, much work has been done to protect the Kennet Vale from a repeat. There seems to be little concern in the plan that many new houses will have on the ability of those flood protections to cope. Nor do the plans take any note of the many trees on the hillside which are currently 'managed' by the expanses of green absorbent land which would be lost under concrete.</p> <p>In conclusion the whole plan is over sized, poorly presented and planned and I cannot find one positive thing to comment on. I object to this expansion of Thatcham.</p>

Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>I wish to register my objection to the proposed new 'Thatcham NE Development' as I find it unsound.</p> <p>Transport</p> <ul style="list-style-type: none"> Reviewing the comments by Bucklebury residents submitted at Regulation 18 about North East Thatcham, a road through the villages. We sought assurances and were led to understand by WBC planners that traffic from the Way and the A4. This is true but what they 'forgot' to mention was a plan for an exit at the north of the site onto the A4, apparent on Friday, 6th January when the Transport assessment was published: Phase_2_Transport_Assessment. is serious for us because traffic from, or to, the site is only going to go in one direction from this exit – where it will split between the traffic going through Cold Ash and the traffic through Upper Bucklebury I understand there are access arrangements for the northern end of the NET site proposes new priority junctions (where appropriate) on both Floral Way and Harts Hill Road. Results from the modelling suggest that these will not cause any issues. The document has no modelling results for this. There are drawings for all the other proposed junctions but none for the new junctions. There are drawings showing a new car park on Harts Hill. The purpose is a mystery but will surely add more traffic to already a dangerous road and may also promote the night-time antisocial behaviour all too apparent in the car park. <p>Healthcare</p>

- The NE Thatcham development plan (SP17) proposes a 450 sq m primary healthcare facility with the suggestion to the Buckinghamshire, Oxfordshire and Berkshire West Integrated Care Board or other such appropriate body **bereft of detail or insight into strategic healthcare planning!**
- It is of concern that neither WBC nor the developers, as public and private stakeholders respectively, appear to have undertaken a prospective HIA specific to the proposed North-East Thatcham development.
- Tackling health and wellbeing requires a multi-agency approach. The Berkshire West Health and Wellbeing Strategic Partnership has been developed by the Reading, West Berkshire and Wokingham Health and Wellbeing Boards together with the Wokingham Health and Wellbeing Partnership. **I have a concern that there appears to have been no direct engagement between the North-East Thatcham Consortium and local general practices.**

Environment

I have a concern on three main areas:

- Collateral damage to the Bucklebury Plateau Biodiversity Opportunity Area, and its ancient woodlands and heathland Common.
- Siting a major greenfield development in the broader landscape setting of the North Wessex Downs AONB that will impact on the open countryside by local communities.
- Causing detrimental impacts to legally protected wildlife known to be present on the site but assuming that sufficient mitigation will be taken after development e.g. through the vague promise of a 'community park'
- Taken together, and after a thorough professional review of the background documentation provided by WBC in 2019, I have concluded that there is no evidence to support claims that SP17 will have a positive impact on the environment. **I have a reason to believe it will have a significantly negative impact.**
- I understand it has been estimated that at least 4,000 people will be concentrated in the development site. This will reduce the green space for recreation and general wellbeing. We do not believe that the claimed provisions for green space will be sufficient. The original Thatcham Growth Plan had a vague proposal for two 'country parks' spaced across the top of the Bucklebury Plateau Biodiversity Opportunity Area, claiming the potential for significant biodiversity enhancement over its current land use
- In the updated SP17 text, the country parks have been downgraded to undefined 'community parks' which only offer a limited benefit. WBC has given up protecting the natural environment and public enjoyment of it.

Education

Information has been provided by WBC regarding education, however I find the plan for secondary school provision is unclear.

- There is no satisfactory evidence of the number of pupils the school is to cater for;
- The location of a school(s) is not clear;
- The number of Form Entries is not defined, but it is noted that anything less than a 6FE school is unsustainable;
- The timing of the funding is not clear; and
- There is no evidence that the proposed funding is sufficient to meet the Council's obligations to provide education for all children in West Berkshire Council, as an education authority, has a duty to make arrangements for suitable school provision. Funding for secondary education across all school years is not defined or evidenced in the LPR.

Miscellaneous

The Regulation 18 Consultation stated that only 1250 dwellings would be built in the plan period, and this I understand is a maximum. The 15000 number is stated as both a minimum and an approximate number and supporting studies are still based on the assumption that this could increase to the original 2,500 when the plan is reviewed after 5 years or in the next plan period.

There is no evidence WBC has consulted properly with Thames Water over the time needed for provisions of water and sewerage for the proposed new dwellings.

The Secretary of State's Written Statement of 6th December 2022, which removed the need to maintain a 5-year housing strategy, and to update Local Plans, removed the top-down housing targets (particularly for Local Authorities with constraints like AONBs) and a transition period for LS's in final stages of preparing Local Plans and this statement should be taken into account by the Council.

In conclusion- because of the concerns I have raised, the Reg 19 PPR Submission in its entirety should be considered as non-compliant.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?

Please give reasons for your answer

I am writing to object to this plan as a local resident who is impacted by the flawed nature of the plan and proposals.

First off, I live in the village of Upper Bucklebury. This plan directly and negatively impacts the traffic flow through the village walk to the local school as well as older children walking to the bus stops for their secondary school buses. This poses a significant safety threat, but also the current road infrastructure of the village is not viable to sustain the increased traffic at the exit at the north site on Harts Hill. Traffic to and from this site will be funnelled towards Upper Bucklebury. The road increased traffic will not only further deteriorate the quality of the road but poses increased safety risk due to volume of traffic on the village under significant burden and be of detriment to local residents.

The plan also details drawings of a new car park on Harts Hill which is unclear in its purpose. The logic behind this plan will add more traffic to an already busy road and may also encourage anti-social behaviour at night-time which will put local residents as putting local police under unnecessary burden.

Lastly on traffic impacts, the council has come back to the SEA and indicated 'the policy is likely to have a Positive impact on walking, cycling and public transport will be critical to the design of the site.' and 'The policy is likely to have a significant impact on walking, cycling and public transport should be designed with these in mind.' There is no substance to these statements. They do not adequately demonstrate how they will actually take effect. There is no clear evidence to support these statements and as such they must be considered unrealistic at worst.

Next; Healthcare. Concerningly, there is a lack of planning and care for this subject in the plan. There is no clear evidence of a Health Impact Assessment (HIA) specific to the proposed NE Thatcham development has been arranged or published by WBC or the developers. There is no recorded direct engagement between the NE Thatcham Development Consortium and local general practices (local GPs) or logistics around this.

The NHS Berkshire West Clinical Commissioning Group confirms there is a worse shortage of GPs in other parts of the country than that there is no real prospect of a new GP practice being established in Thatcham or West Berkshire as a result of this plan. This is a priority vs other areas in the country with greater need and demand. Any indication in the plan therefore around establishing a new GP practice is misleading, unrealistic and purely lip-service. The true viability has not been fully considered.

There has also been limited provision to mitigate the impact of increased patients to both local GP surgeries (three in total) and practices. The three GP surgeries (Thatcham Medical Practice, Chapel Row and Burdwood Surgery) are already over capacity for the population. Adding 1500 new houses and patients into that is therefore unfeasible.

Next; the environment. There are a number of challenges with regards to the environment for this plan which indicate a negative impact. There is concern over the damage to the Bucklebury Plateau Biodiversity Opportunity Area and particularly the Common. The plan does not support the claims that SP17 will have a positive impact on the environment - there is reason to believe the impact will be negative damage to the local biodiversity and the Common. A Sustainability Charter is required but there is no evidence that this will be published publicly.

With the development proposal and an estimate of 4000 additional people concentrated on one site the detailed proposals for parks are at risk of not being appropriate for the volume of people. There is no indication of management of parks or details of what they will look like. The initial proposed country parks have also now been downgraded to 'community parks.' The plan therefore does not provide green space and steps to protect biodiversity as well as lacking any mitigation of impact of footfall on nearby countryside.

The Sustainability Appraisal from the Local Plan Review accepts that SP17 will have a negative impact on environmental sustainability on a greenfield site and therefore would result in a negative impact on environmental sustainability which would need to be addressed in detail around plans to mitigate this; only the need to do so. The same Appraisal then contradicts this by indicating that the plan will support sustainability through not taking into consideration the impacts on the environment (impact on biodiversity, impact on protected species and legally protected wildlife) and outweighing any impacts with a perceived social and economic benefit impact.

Finally; Education. This is an area particularly important to me as a resident as I have a young son and another baby on the way. In the Local Plan Review, the provision of Nursery, Early Years, Primary and Secondary education is not clearly outlined. There are no details of how this will be provided. There is unclear information shared around Primary Education with no evidence or insight to support any view of plan for this. There is also no clear provision for Secondary Education. There is no evidence or insight to support any view of plan for this. There is unclear information shared around Primary Education with no evidence or insight to support any view of plan for this.

For Secondary education, there are no details of the location of the land to be provided or suitability of this; just a suggestion to contribute to secondary education (without associated detailed timescales). There is not a number of Form Entries or details of the number of pupils the school would cater for. There is also no clear provision or funding for adequate Sports Facilities. The only available land being adjacent to the A4 with all its traffic and fumes. The provision of Secondary schooling is currently provided by the two catchment secondary schools are The Downs School or Kennet. Where the schools are oversubscribed, children are prioritised. The NE Thatcham children would therefore be prioritised for Kennet, removing the choice in this scenario. The proposal is therefore detrimental to our children and the future children of Upper Bucklebury.

	In conclusion, as a local resident I am extremely concerned about this plan due to the lack of detail, clarity and believ on myself and my family both now and in the future. Given my above objections, I find this plan to be lacking in robu

<p>Please give reasons for your answer</p>	<p>At the time of writing I am currently <i>[personal information removed]</i> and have lived in Bucklebury my whole life. I have been given the opportunity to grow up in such a beautiful area, and feel passionate that others in the future can experience the beauty that I will always associate with my time here. I feel that with the current research available, it demonstrates that it would not enhance the experience of young people in the future, but instead negatively impact the local area and the generations.</p> <p>The benefits of time spent outside have been widely reported in recent years, including improved cognitive function, sleep (Jimenez et al, 2021). The local area is a popular area for walking - something that I noticed increased during the pandemic supported by research (Bailey et al, 2022). Many people travel from local areas such as Thatcham up to Bucklebury to enjoy the Outstanding Natural Beauty (ONB) which is something that should be encouraged, but in a responsible way.</p> <p>As an owner of two dogs, the local common is used at least once a day for walking. There is a very friendly sense of community as they pass and the opportunity to meet with family faces. However, especially during the pandemic I have noticed that in people led to a large number of out of control dogs which posed a danger to other users of the woods and wildlife which is uncommon (Horse and Hound, 2022), and there have been multiple occasions where I have experienced potential danger from dog riding in the woods including dogs jumping up in front of us and aggressively running behind. Dog walking has also had a negative impact on wildlife (Lett, 2007). This is not to say that responsible dog walking should be banned, but the proposed plan that more people would lead to increasing numbers of dogs and walkers in this area wanting larger areas than “community parks” that this will not have negative impacts. The increase in litter in the local area has also been a regular point of discussion that can be worsened by more people.</p> <p>The vague mention of “community parks” as a plan to combat this is disproportionate to the amount of damage that will be caused. The plans focus on replacing the damage caused, but by the time the project has been completed the wildlife living in the area will have been displaced - including protected species such as the nightjars that breed on Bucklebury Common. Limiting numbers of people due to a sudden threat such as this development can also lead to a reduction in genetic diversity, leaving the species more vulnerable to reductions if an infectious disease becomes spread on a local level as they are unable to adapt to environmental pressures.</p> <p>The main problem is that the plan involves building in a green field area which provides a habitat for wildlife and some of the best use. These areas should be protected for future generations and brownfield sites are associated with having less of a negative impact.</p> <p>References:</p> <p>Bailey, D., Wells, A., Desai, K., and Kass, L. 1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	We do not demur from the view of TTC in respect of the following issues and will not repeat their reasoning:- <ul style="list-style-type: none"> • Status of the Thatcham Strategic Growth Study. • Deficit of Social Infrastructure for Thatcham.

	<ul style="list-style-type: none"> • Lack of Provision of secondary education and primary healthcare. • “Interim” Duty to Cooperate Statement. • Scoring system used in the Sustainability Appraisal: Appendix 5 SA/SEA of Strategic Policies for SP17 draws on evidence that does not appear to justify many of the ‘scores’ allocated, which seem to be ‘hoped-for’ scores not justified. There has been insufficient “appraisal” so far: not enough to justify such a large site being allocated such a large requirement. • Lack of clarity about why and how the size of the site was arrived at, both with respect to the numbers in the employment size in the longer term. It appears that this number does not seem to be evidenced and then efforts have been made to reduce the number as a result of local political pressure. • Deliverability of 1500 homes within the Plan period, based on experience with a similarly large site (Sandleford) supposed to start within 4 years of the site’s allocation (2012) but which is unlikely to deliver any units until 2020. • Availability of water supply and treatment, which links to deliverability. NET and Sandleford both require a major Lower Way treatment works and the foul sewer network leading to it. • Landscape Capacity Assessment. • Lack of definition of settlement boundary. • Inadequate and contradictory information on highways and traffic. • Use of “will” where “must” is strongly preferred (see elsewhere in the draft Local Plan, as explained by us in our evidence).
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	We agree with TTC that, for a variety of reasons under the tests for Soundness, SP17 fails on many issues as described (under Legally Compliant). We do not intend to repeat their argument, but on the basis that we agree with them, our sites within settlements or adjacent to them – including other sites within Thatcham that could between them deliver the same number as NET is currently allocated within the Plan period to 2039.
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	As stated by Thatcham Town Council, on Healthcare there is lack of evidence that the primary healthcare authorities are not working together. Also the Duty to Cooperate Statement doesn’t convince us that National Highways, Thames Water, or Natural England are not working together.

	the submission premature in our view and this Council should not have agreed to authorise officers to submit Reg19 to authorities had responded.
4. Proposed Changes	Please refer to proposals by Thatcham Town Council, which we support in full.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	We need to explain why we think the provision for infrastructure funding is so inadequate for NET. We hope that the relevant authorities will have supplied responses to the LPA by the time the Examination begins. Although we are largely led by the more detailed analysis done by Thatcham Town Council, this Group expects to have (independent) advice and resources than Thatcham Town Council.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>Please give reasons for your answer</p>	<p><u>Re: WBC LPR Regulation 19 Objection</u></p> <p>I feel obliged to make it known that I strongly object to the proposed North East Thatcham development of 1500 - 2500 homes. The local infrastructure will simply not cope well with such an outrageously large development and Thatcham town will struggle to absorb the extra demand that would be forced upon it.</p> <p>This is an horrendous proposal by WBC and a disgrace that WBC feel they can make such life changing alterations to the town without the concerns of the local people who live, work and enjoy it in its current form which is why we live here!</p> <p><u>Rail</u></p> <p>Thatcham railway station does not have enough capacity for parking to cope with the increase in commuter demand. The proposed development will create huge problems with access and egress.</p> <p><u>Countryside</u></p> <p>Destroying the beauty of the surrounding countryside and wildlife habitats, not to mention the pleasure locals get from the area would be outrageous! This beautiful area would be lost forever!</p> <p><u>Ground Water</u></p> <p>The local area has a history of serious flooding and while there have been improvements in the form of controlled grassland, this will all be compromised by such an obscenely large development.</p> <p><u>Potable Water</u></p> <p>The supply of potable water to the Bucklebury and Upper Woolhampton communities has been a huge problem in recent years. Upgrades inconsistencies still exist in the fluctuating water pressures.</p> <p>Can Thames Water even accommodate such a huge increase in demand on its water supply? The current pumping station is struggling with keeping up with demand!</p> <p><u>Sewerage Treatment</u></p> <p>The huge increase in sewage from such a large development will present the water authorities with a substantial head of steam for a new sewage treatment plan.</p> <p><u>Roads</u></p> <p>Harts Hill Road, North of Floral way, is not a road suitable for the expected increase in traffic with its many bends and narrow lanes. Travel along this section of road treacherous and dangerous particularly for pedestrians and cyclists. Further, there are no parking spaces on Harts Hill? Why?</p> <p>There will be an increase in traffic using Broad Lane between Upper Bucklebury and Chapel Row, currently a very narrow lane to avoid the A4.</p> <p>The increase in demand will also have serious consequences for Cox's Lane, Pease Hill, Carbinswood Lane, School Lane, Hill, Cod's Hill, Hatch Lane, Back Lane and all the narrow lanes around Upper Bucklebury all of which will become "no-go" zones.</p> <p>The development will also promote reckless abuse of the common on both sides of Broad Lane which are continuously used by reckless 4 x 4 drivers.</p> <p>The council are clearly unable to address the maintenance of the surrounding roads which are in poor condition and are being developed on a daily basis and this problem will become significantly worse!</p> <p><u>Pavements</u></p> <p>There are no adequate pavements or street lights on Harts Hill Road or Broad Lane in the direction of Cold Ash. With the proposed development this will present significant danger to pedestrians and cyclists.</p> <p><u>Public Footpaths</u></p> <p>There are footpaths that cross the proposed development which currently present pleasant walks, this will all be lost. The proposed housing estate will definitely not be a pleasant experience and most certainly will not have the same appeal!</p> <p><u>Schools, Nursery, Dentists and GP Surgeries</u></p> <p>There is currently no capacity for increasing the volume of children into schools or patients into Dental or GP surgeries.</p>

	<p>Wildlife</p> <p>What can be said about this other than devastating!</p> <p>It will be a very sad day if this beautiful countryside were lost to this outrageously large development and a fatal blow</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	
<p>5. Independent Examination</p>	
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes</p> <p>* No</p>

<p>1. Do you consider the Local Plan Review is legally compliant? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to present my objection to the Proposed Submission (Reg 19) West Berkshire Local Plan Review 2022-2036, specifically the Thatcham North-East development of at least 1500 homes on greenfield land, stressing that the plan is unsound and requires further consideration in its current form.</p> <p>I have been a resident of Upper Bucklebury for 17 years. I have objections that extend across many aspects of the plan. The focus of my assessment and submission focuses on the devastating environmental impact that policy SP17 will have on the area. My claims of a positive environmental impact have no basis in fact.</p> <p>Here are my main points of objection:</p> <p>(1) Transport: The LPR itself states there will be an increase in traffic "onto wider rural routes such as Upper Bucklebury". In congestion on the A4, it is a matter of near certainty that motorists heading east and seeking to avoid delays will avoid the A4 and head north to these rural areas, along with the increase in traffic heading north. This view is further supported by a traffic study conducted by West Berkshire Council which not only found West Berkshire Council's trip rates to be unreliable, but that the distribution of traffic is skewed towards the north, suggesting that the bulk of traffic will indeed seek to move away from the A4, not join it. In the LPR, there is a proposal for a new road which will undoubtedly increase the volume of traffic heading north still further - however, there is no modelling by West Berkshire Council on the evidence base - this is unacceptable in the public consultation.</p> <p>(2) Healthcare: Local health services (principally GP surgeries and dentists) are already under extreme pressure, with many services being closed or care outside the area. There is no evidence in the plan that provision of a new GP surgery or dental facilities will be provided. No local healthcare providers were consulted in the preparation of the plan.</p> <p>(3) Environment: This is where the bulk of my focus has been, trying to understand the plan as it relates to the natural environment. I will find (below) a significant and detailed assessment of the background documentation provided by WBC in support of the plan. My assessment shows that there is no evidence to support claims that SP17 will have a positive impact on the environment, both in the AONB and the surrounding area.</p>

By contrast, there is every reason (with supporting evidence) to believe it will have a significantly negative impact. R... environmental study' for further information:

Detailed environmental study

- Over 4000 people are being encouraged into the AONB

The LPR states its intent for SP17 to drive additional traffic (people and cars) into the AONB. It provides a green infrastructure 'advantage of the landscape' to 'facilitate connection to the AONB, and include leisure routes accessible to all users.'

Given the housing plan, this means over 4000 people

The management vision for Bucklebury Common (see below) is explicitly focused on not increasing human pressure. People are working to restore and nurture.

Species on the Common are already known to have been impacted by existing visitors, including cyclists, dog walkers and horse riders.

KEY POINT: SP17 provides a green infrastructure policy that is in direct opposition to the goals of the management plan for the management of Bucklebury Common.

- Development which is likely to have any adverse impact on the notified features of a nationally designated site [e.g. a Scheduled Monument] is not permitted.

The LPR states various reasons in which such development may be permitted (policy SP11, p45), including that 'all such developments have been proposed and secured through the development process'

KEY POINT: No mitigation measures have been provided as part of the LPR for SP17.

- Development proposals affecting sites of local importance should always seek to contribute to their favourable management. The LPR states (p46):

• Where a proposal is likely to result in harm to sites of local importance (including habitats or species of principal importance) that meet the criteria for designation as a Local Wildlife Site or designation as a Local Geological Site), developers will be required to follow the following sequential approach:

- Firstly, seek an alternative site in the District with a lesser impact than that proposed
- Secondly, if the first is not possible, demonstrate mitigation measures can be taken on site
- Thirdly, and as a last resort, seek appropriate compensation measures, on site wherever possible and off site where necessary for long term management and maintenance.

The land immediately adjacent to the proposed development area for SP17 contains 41 Local Wildlife Sites and is also a Biodiversity Opportunity Area

- This is the land that the LPR intends to attract over 4000 people to visit through its green infrastructure

• This should be enough reason to feel the need to 'seek an alternative site' or 'demonstrate mitigation measures can be taken on site'

- KEY POINT: There are no mitigation measures described anywhere in the LPR and supporting documents – how is it possible for this to occur without the evidence to consider?

- There is no Sustainability Charter establishing how LPR requirements will be achieved

The LPR states that a Sustainability Charter is required to establish how 'policy requirements will be achieved' (including biodiversity net gains and the anticipated overall positive impact on environmental sustainability).

It states that this charter 'will be informed by' various strategy documents (including one on ecology)

KEY POINT: These strategy documents do not exist.

- The LPR's own Sustainability Appraisal states that SP17 will have a negative impact on environmental sustainability. The Sustainability Appraisal (SA) document which contains the assessment of the SP17 site and makes claims of positive impact.

• The site is a greenfield site and therefore, would result in a negative impact on environmental sustainability which is not offset.

- KEY POINT: There is no detail provided on any mitigation measures.

• The same SA document states that the [SP17] policy is likely to have an overall positive impact on sustainability

The SA states that there is a 'high likelihood' of an overall positive impact on sustainability

The full appraisal for this is to be found in Appendix 5

- KEY POINT:

This is contradictory and confusing...

There is no evidence to be found in Appendix 5, merely the unhelpful inference that it will be positive because the policy is 'likely to have a significantly positive impact on biodiversity as it sets out more detail, but as an example: 'The policy is likely to have a significantly positive impact on biodiversity as it sets out more detail for the development'. And that's all it has to say on the subject.)

- The SA document also states both a 'neutral impact' and an 'unknown impact'

The SA states that 'overall development of the site is likely to have a neutral impact on all elements of sustainability'

- Sorry – we thought we were being promised an 'overall positive impact on sustainability' (even though there's no evidence to support this)

The SA states that there would be an 'unknown impact on environmental sustainability in relation to impacts on air, water and noise, but that 'measures would be able to deliver an overall neutral impact'

- KEY POINT:

This is even more confusing...

Appendix 5 (where the full appraisal is to be found) simply states that for each one (air, noise, soil, and water) the SA states that there is a 'neutral impact' on them. And, again, that's all it has to say on the subject – it's hard to believe that building 1500+ houses will have no impact on soil or air quality, especially when you are comparing it to a green field. Once again, the claims are spurious and unsupported.

- There is no masterplan for SP17

LPR (para 6.63) states: 'Further detailed work will be required to develop a coherent masterplan or development framework for the site forward, which will be produced in collaboration with the community and other stakeholders.'

- KEY POINT: The public consultation is underway now. The absence of detail relating to environmental matters around the site is just one more example.

- An Ecological Assessment is required in advance of obtaining planning permission for the development.

The LPR states (para 5.87):

- 'To demonstrate that development proposals have met the requirements of Policy SP11 [Biodiversity and geodiversity] by an appropriate ecological impact assessment (EiA) where this is relevant to the type of development proposed and the nature of the site and geodiversity interests.'

- 'The assessment should be proportionate to the scale and impact of the development...'

In the case of SP17, limited studies have been carried out by West Berkshire Council relating to the environment:

- 2018 Biodiversity Site Assessment (desk study) – see later for a comment on the quality of data

• Landscape assessment – this provides a limited view of the character of the landscape, and no information on the quality of the landscape.

- KEY POINT: There has been no ecological assessment.

• Biodiversity Net Gain (BNG) is a legal requirement

The LPR states (p46):

- 'All proposals should demonstrate a minimum biodiversity net gain of 10% via a Biodiversity Net Gain Plan using the accounting metric developed by Natural England and provide details of the long-term maintenance and management delivered on site in the first instance, or through biodiversity offsetting where appropriate.'
 - It also states that 'Major developments in particular must include measures to deliver biodiversity gains'
 - It states: 'Where there is a reasonable likelihood that a protected or priority species may be present and affected by surveys will need to be undertaken to provide the evidence needed to allow a determination to be made and license appropriate compensation measures should be provided where development would disadvantage the conservation of the site.'
 - And finally: 'To achieve net gain, a development must have a higher biodiversity unit score after development than before.'
- The data being used to establish the presence of species is out of date:
- In 2020, Bucklebury Parish sought environmental records for the 41 LWSs impacted by SP17:
 - 80% of surveys were conducted more than 15 years ago
 - 50% were more than 20 years old
 - 44% were over 30 years old
 - Bucklebury Parish appointed ecologists to conduct an independent study of the impacted area:
 - The findings from a single day walk on public access routes indicated that the site had a much higher biodiversity value than previously thought including the presence of seven species of threatened breeding birds and one threatened migratory species, several ancient woodlands, and a network of hedges, old trees and gullies serve as important corridors linking up different habitats within and beyond the site boundaries. The findings imply that a full study will show the required mitigation measures and BNG will be far more complex for the site than currently envisaged by the planners.
 - KEY POINTS:
 - This one study has provided more information about the site than has been presented in the whole of the LPR and the area has a higher biodiversity value than previously thought
 - Protected species are present and will be impacted – no detail on mitigation measures has been presented
 - Critical habitat network features are under threat from the development and will severely impact distribution of key species

SP17 Environmental Objections – Additional Detail

Damage to Bucklebury Common

As it relates to Bucklebury Common, specifically, consider the following:

- Bucklebury Common is one of the largest Commons in Southern England, containing the largest heathland in the South East. It includes the historic Avenue of Oaks at Chapel Row, notable ancient woodlands, and other important habitats. It is a part of the Bucklebury Plateau Biodiversity Opportunity area, and as such is considered to include 'important and rare habitats, one of the country's most important adder communities, and numerous other protected animals and plants.'
- Management of the Common is entering a new phase and has presented its vision for the enrichment and on-going management of this rare and precious environment. The management team for the Common includes Natural England, BBOWT, NWD AONB and along with members of the local community and ecological consultants.
- At a presentation of the vision to the broader community, it was acknowledged that the Common is an open area, and requires very careful management to protect it. It is a key part of the Bucklebury vision for the Common not to increase the number of people, but to place emphasis firmly on providing nature with a chance to restore itself and thrive, both in terms of the diversity and abundance of species.
- By contrast, the WBDC LPR is exclusively a human-centric plan whose green infrastructure is principally provided to encourage people to visit the AONB, and therefore the Common, causing disturbance to wildlife and adding an additional burden on the landowner through litter, fires and parking.
- Based on the housing mix described in the LPR, the proposed development represents an additional 4000+ people living near the AONB, which includes the irreplaceable habitats found in Bucklebury Common, with its ancient woodlands and heathland, ponds. The Common is already struggling to balance accessibility and leisure usage with the needs of the environment, with cyclists and dog walkers particularly impacting ground-nesting birds, notably woodcock, and other wildlife.

Greenfield Development in an AONB Setting

During the last public consultation, there was a significant number of objections based on the development's potential impact on the AONB. Berks responded to these objections by stating:

- 'In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council is clear that development should be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) which takes account of the context within which any proposed development would need to conform. The LCA notes that whilst there is no statutory AONB on the site and the AONB it does lie close to it and concludes that the site does form part of the setting of the AONB. The LCA will be added to the council's evidence base to inform the proposed allocation.'

The updated version of the proposed allocation policy in the next published version of the LPR will set out that a landscape and visual impact assessment (LVIA) is undertaken for the site which will need to comply with the LCA. The LVIA will inform the final capacity, development and management of the site.

With any application that would come forward on this site, the developers would be expected to submit a 'masterplan' accompanied by accompanying explanatory text, to provide details in relation to matters such as the parameters of the site, height parameters and other details.

KEY POINTS:

The development is in the setting of the North Wessex Downs (NWD) AONB. A landscape and visual impact assessment (LVIA) 'will be undertaken' – once again, there is vital information missing from the public consultation.

There is an expectation of a Masterplan – again, this does not exist.

It is our belief that the absence of any such detail at this stage displays an unacceptable level of complacency and is in breach of SP17, rendering the plan unsound.

The National Planning Policy Framework (NPPF - para 176) states:

- 'Great weight should be given to conserving and enhancing landscape and scenic beauty in National Parks, the Broads and Areas of Outstanding Natural Beauty which have the highest status of protection in relation to these issues'
- 'development within their setting should be sensitively located and designed to avoid or minimise adverse impacts on the setting'

KEY POINT: Development needs to minimise adverse impacts on the AONB

The North Wessex Downs AONB statement on development in the setting of the AONB states that 'examples of adverse impacts on the North Wessex Downs AONB include:

- development which would have a significant visual impact on views in or out of the AONB
- breaking the skyline, particularly when this is associated with developments that have a vertical emphasis and / or prominent rooflines (e.g. blades for example)
- loss of tranquility through the introduction or increase of lighting, noise, or traffic movement or other environmental impacts
- associations and historic relationships
- introduction of abrupt change of landscape character

- loss of biodiversity, particularly of habitats or species of importance to the AONB
 - loss of features of historic and natural landscape interest, particularly if these are contiguous with the AONB;
 - change of use of land such that to cause harm to landscape character
 - development individually or cumulatively giving rise to significantly increased traffic flows to and from the AONB, resulting in erosion of the character of rural roads and lanes
 - Increase in air and water pollution.'
- KEY POINT: There is no evidence to suggest most of these adverse impacts would not happen – particularly loss of landscape character, and increased flow of traffic.
- NWD AONB did not oppose SP17 at Reg 18 stage, but they did express concerns, stating (p1092 in the Consultation Statement LPR Dec 2022 v2):
 - 'However, we would feel more comfortable if the parameters of the site and green open space were set in a masterplan that merely requests that the development positively respond.'
- KEY POINT: As noted throughout this document, there is no detail and certainly no masterplan.
- The previous plan for SP17 included an allocation of 2500 homes in the planning period. In the 'Consultation Statement LPR Dec 2022 v2', it states (p1091):
 - 'In response to the large number of objections to this site covering a range of issues important to local people, but particularly the impact of the proposal and the impact on local infrastructure, the Council has taken the decision to reduce the number of homes to allocate it for 1500 dwellings for delivery over the plan period.'
 - Despite this, the settlement boundary remains in the same place as the 2500 proposal. The consultation statement states: 'The settlement boundary is currently drawn around the whole of the proposed allocated site at North East Thatcham whilst the plan will be expected to deliver 'a network of green infrastructure which will include a new community park linking Thatcham and North East Thatcham.'
 - It further states: 'As a strategic level study the LCA assessed the site as a single tract of landscape and so whilst there is a variability of landscape capacity within the site boundary and that this is a constraint that should inform design, it is not possible to set any tighter. As the LPR progresses and more detailed work is done on the sensitivity and capacity of different parts of the site, development the boundary will be amended accordingly.'
- KEY POINTS:
- The settlement boundary line has not been redrawn despite a reduction in housing number
- The stated reason for this is that the LCA does not contain sufficient detail to allow them to see the area as anything other than a landscape'.
- Until further landscape studies are carried out, it is impossible to know where anything will be sited based on the current plan. This level of detail, supposedly enough for the public to make its decision on whether to object or accept this proposal.
- Regarding the reduction from 2500 homes to 1500 within the planning period, there is no detail as to why 1500 homes was chosen over the original proposal of 2500. The Sustainability Appraisal / Strategic Environment Assessment (SA / SAE) sheds some light on what led behind the decision:
 - '[The option to develop 2500 homes] was originally to be taken forward and was included in the Reg 18 consultation statement. The number of new homes and community infrastructure to support these homes and the wider Thatcham community through the plan period is considered too high, and politically a reduced number on the site is considered to be more acceptable. The option will not be taken forward.'
- KEY POINTS:
- Despite acknowledging elsewhere the high level of environmental concerns expressed by the community, the decision to reduce the number of homes is based on political reasons.
- Once again, there is no evidence to suggest that 1500 homes is any more acceptable, in this case, from an environmental perspective than 2500 homes
- Until detailed assessments are carried out, documenting the existing environmental context and the measures that can be taken, the public is unable to make a decision in favour of this proposal.
- As mentioned previously, the detailed assessment concluding that SP17 provides positive impact on environmental sustainability is in Appendix 5 of the SA / SAE. The circular logic contained in this Appendix is perhaps the most confusing and profound in the entire SP17 proposal. It can be summarised as something like, it is positive because we've said it needs to be positive.
 - Appendix 5 contains a table which lists all the LPR policies, including SP17, and assesses how negative, neutral or positive each one is in delivering against key objectives. Here are some of the important ones relating to environment:
- Objective 5: Ensure that the character and distinctiveness of the natural, built and historic environment is conserved
- Sub-objective 5a: To conserve and enhance the biodiversity and geodiversity of West Berkshire:
 - Response: The policy is likely to have a significantly positive impact on biodiversity as it sets out specific ecological measures to protect protected species and is adjacent to the fragile ecosystems of the AONB, and introducing over 4000 people into its immediate vicinity.
 - KEY POINT: There is no evidence anywhere to support this claim – how can building at least 1500 homes on greenfield sites have a positive impact'?
 - Sub-objective 5b: To conserve and enhance the character of the landscape
 - Response: 'The policy is likely to have a positive impact on landscape character as consideration of the landscape character is a key objective of the plan.'
 - KEY POINT: Much the same as above – greenfield versus housing estate? Neither common sense nor WBC evidence supports the claim that it is positive - for a document of this significance to state that it will be both disturbing and insulting, and further informs the public that it is not.
- Overall response to objective 5:
- 'The policy is likely to have a significantly positive impact on environmental sustainability as it seeks to conserve and enhance the character of the natural, built and historic environment.'
 - KEY POINT: There is no evidence to suggest it will have a 'significantly positive impact', and a lot of evidence to suggest otherwise.
- Objective (6): To protect and improve air, water and soil quality, and minimize noise levels throughout West Berkshire
- The sub-objectives for this objective relate to each part in turn – here, the author of this assessment shows some concern that the development is unlikely to impact air quality / noise levels / soil quality / water quality'
 - KEY POINT: The idea that the development of 1500+ homes is 'unlikely' to impact noise levels or soil quality is also not supported by a 1500-home housing estate.
 - Not only does the 'Local Plan Review Evidence Base' webpage contain insufficient information to support a public consultation, but the evidence provided relating to environmental matters is unhelpful and out of date.
 - The evidence base contains two sections relating to the environment:
 - Landscape – providing landscape character and its sensitivity to future development:
 - Landscape Character Assessments
 - Natural Environment - Information on ecology, biodiversity and nature conservation:
 - Link to Nature Conservation (not specific to SP17, but useful context about local environmental management)

	<ul style="list-style-type: none"> • A desktop study carried out by the Thames Valley Environmental Records Centre (TVERC) in 2018 • A link to further information on biodiversity areas in south-east England • Landscape <ul style="list-style-type: none"> This contains a link to a 2021 study on the North-East Thatcham site. • The study, carried out on behalf of David Lock Associates, states the following constraints: <ul style="list-style-type: none"> • The site has largely been assessed from publicly accessible viewpoints including the local road network, public rights of way and other publicly owned land. • Site photographs included in this study are representative of key views of the site. This does not represent a complete survey and no views can be gained. • Views from the surrounding countryside or urban areas have been assessed by noting intervisibility from within or on the site. This does not include an assessment of the potential zone of visual influence of any development on the site. • Study fieldwork was undertaken in late Spring / Summer, with deciduous vegetation in full leaf. • Assumptions have been made in relation to land use type, building height and form, to advise this sensitivity study. • place in preparing the Study. • KEY POINTS: <ul style="list-style-type: none"> No private land was accessed for the assessment The study was conducted in full vegetation, limiting visibility of the landscape (which was already limited by inability to access some areas) • Natural Environment <ul style="list-style-type: none"> The 2018 TVERC study ('BIODIVERSITY SITE ASSESSMENT FOR WEST BERKSHIRE LOCAL PLAN') found all sites to be of low (medium risk of adverse effects on biodiversity) or Amber (medium risk of adverse impacts) It states: 'We recommend appropriate survey work based on the results of the assessment for each site.' Nearly 5 years after the study was carried out, this has still not been done. Furthermore, the data used for the desk study will have been similar to the data obtained to support Bucklebury Park and its adjacent Local Wildlife Sites: <ul style="list-style-type: none"> • 80% of surveys were conducted more than 15 years ago • 50% were more than 20 years old • 44% were over 30 years old The survey states: <ul style="list-style-type: none"> • 'Up to date ecological surveys are needed to establish current site conditions and the presence of any protected species, sites or habitats are present on the proposed development site, avoidance and mitigation measures must be implemented to achieve the lowest impact scores, as the most suitable for future development, are good targets for future survey work. Development should be subject to ecological survey and implementation of appropriate mitigation where practical. Any development that would affect a Local Wildlife Site should be subject to Natural England to be first consulted.' • 'Sites that have a high opportunities score should be prioritised for the improvement of biodiversity, habitat connectivity and the creation of nearby Local Wildlife Sites.' • KEY POINTS: <ul style="list-style-type: none"> • Further work is required. • This was a desk study - an Amber site can easily be more appropriately identified as a Red site once the site is accessed. <p>As stated above, and with all these points as evidence, I urge you to withdraw the SP17 policy - it is unsound, poorly evidenced and does not reflect given recent Government comments about housing numbers needing to be flexible and must 'reflect local circumstances'.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by	

<p>the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I have set out my objections to this development below (WBC LPR Regulation 19 Objection - SP17). These are categorised as follows:</p> <p><u>OBJECTIONS TO THE NORTH EAST THATCHAM DEVELOPMENT</u></p> <p><u>1. Historical Concerns</u></p> <p>The proposed development is in close proximity to known archaeological sites :</p> <ol style="list-style-type: none"> a) the Iron Age community at the top of Harts Hill and Cold Ash ridge b) Romano British sites which are likely within this area. Silchester is a major Roman site with extensive local links with the surrounding area c) the medieval farms and communities of Newbury Castle and Reading Abbey which extended throughout this area d) the civil war battle fields of Newbury and skirmishes from Thatcham and neighbouring ridgelines <p>It does not detail the archaeological mitigation strategy and methodology to be employed for archaeological monitoring of the development. The proposal is wholly inadequate and does not set out how the site will be investigated for historic features and what would be taken in the event a site was found.</p> <p><u>2. Sites of Special Scientific Interest</u></p> <p>The proximity to sites of special scientific interest. I know that Big Gully near Upper Harts Hill farm until recently was designated as a site of special scientific interest. Whilst SSSI's as a designation has lapsed the reason for this designation has not. Any and all development near these sites the flora and fauna are not disrupted. Building work inevitably involves pollution and therefore must not be allowed (Traffic, light, noise and people [both building works and then residing in the building]). This also applies to all the gully's that cross the Kennet these are the only natural corridors that allow wildlife to migrate safely.</p> <ol style="list-style-type: none"> a. There is nothing in the plans which set out how these gully's are to be protected to ensure that the flora and fauna are not disrupted. <p><u>3. Proximity to an Area Of Outstanding Natural Beauty (AONB)</u></p> <p>Like world heritage sites AONBs do not have a hard edge there is a blurring between what is the natural boundary and what is not. To the South of Upper Bucklebury are clear examples of where the natural boundary lie and the natural ecological succession extends considerably into the adjoining fields. The natural boundary of the AONB should be considered rather than the hard edge of the AONB.</p> <ol style="list-style-type: none"> a. This development is urbanisation of the countryside and therefore should not be in close proximity of the AONB. The development that would constitute urbanisation within 1 kilometre of an AONB. <p>(Many County Councils have clear guidelines for developers on what is allowed within an AONB and then within 1 kilometre. I cannot find any such guidelines on the West Berks Council website.)</p> <p><u>4. Urbanisation of the Countryside</u></p> <p>The scale of this development makes it unequivocally urbanisation. Roads and houses will be built on open countryside. This is in breach of Government and West Berks own guidelines – indeed they recently refused a development near Cold Ash on just this basis. This development is being supported by the local council as it clearly is urbanisation of the countryside and should be refused.</p> <p><u>5. Nature Under Pressure</u></p> <p>Bucklebury Common and the adjoining woods of Hartshill Copse, Burdens Heath Plantation, Blacklands Copse, Long Copse, Big Gully, Kents Down Gully, Ouzel Gully the intervening fields and the openland abutting the woods are a haven of nature in the South of England. They are the environment of rare and common species – I personally have seen rare bats, birds and insects. The area is a haven of native mammals enjoying the tranquillity of life without human interference here. (I am sadly no expert on flora and fauna but an ornithologist and have some knowledge of mammals). In the summer sky larks nest and fly above the fields surrounding the area. I have seen Roe deer stags bask in the sun in the fields beside Blacklands and the does, fawns and stags feed in the fields adjoining all these woods. Nightingales sing in the evenings in Long Grove Copse and Night Jars reside nearby on the banks of the Midgham and Cold Ash woods. In winter there are significant migrant bird populations moving through the area including Starlings as well as rarer birds such as Goshawks. This is an extraordinary environment that needs protecting from people and being relatively unknown and going below the radar of more famous nature reserves.</p> <p>The absence of people is key to its continued success and the pressure this development will place on this vulnerability.</p> <ol style="list-style-type: none"> a. The proposed development will destroy the natural corridors across the Kennet Valley and a proper protection plan should be drawn up. b. The number of people residing in the development will inevitably lead to the environment being used for leisure activities for walks leading across the spaces and woods disrupting the natural balance and ecology. These are natural spaces and a human park is not a space created by nature but one for humans to enjoy. The plan clearly thinks they are one and the same. A proper mitigation plan which excludes humans from these spaces needs to be drawn up.

	<p>c. To ensure that the natural balance of the area is maintained any development needs to be at least a kilometre away from woods.</p> <p>6. Social Concerns</p> <p>Thatcham today has significant social issues (unusually high for the South of England) adding significant housing to additional social infrastructure is difficult to understand. If education, health (medical and dental) are inadequate today. Education, nursery, pre-school, primary and secondary appear to have been largely overlooked as there are no social education provision seem inadequate for the population. The proposal also no longer includes provision for a social also no provision for additional police, social service and medical staff.</p> <p>a. These are clearly costs of the development but are not included here.</p> <p>b. The traffic disruption will mean that Thatcham retail economy is severely impacted as West Berkshire shoppers go</p> <p>7. Personal Concerns</p> <p>I am also concerned that as a resident of Upper Bucklebury that this development will disrupt our lives significantly.</p> <p>a. The amount of traffic going through Upper Bucklebury will increase considerably and our own journeys to Thatcham - what plans are there to ensure that this cannot happen?</p> <p>b. The disruption to journeys to Thatcham and Newbury will be severely disrupted whilst building work is on going (a access to hospitals for us as well as retail opportunities. How will this development ensure that access is not disrupted</p> <p>c. The value of property in Upper Bucklebury will be impaired by the proximity of this development. What reparations and WBC to me?</p> <p>d. My own walks and rides will be severely impacted as I will no longer be able to watch the wildlife in the fields adjacent development. How am I</p> <p>I hope these points are clear but if anything is unclear please do not hesitate to contact me.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>

Please give reasons for your answer	I am objecting to the plan as I find it unsound <ul style="list-style-type: none"> I have lived and worked in the Newbury area all my life <i>[personal information removed]</i>

- The proposal to build 1500- 2500 -houses (4000 additional people estimated) in NE Thatcham has the potential of having a negative impact on my life and that of my family who also live in the Newbury area.
- This proposal is not positive for the environment and potentially will cause further environmental issues to this area in some time.
- The following areas are my main concerns :-
 - Currently I understand Thames water are allowing raw sewage at peak times to flow into our water ways I believe this will affect residents (4000 estimated) will only increase the burden on the current water treatment facilities. I feel very sorry for them they need cleaning up rather than making them worse.
 - Now that I am a pensioner my health becomes more prominent . 13 years ago when we moved to Upper Bucklebury and myself had to move from Thatcham health centre to Chapel Row Surgery because THC didn't have enough space in the area. Whilst I have been very happy with the chapel Row surgery and they do provide a first class service but it is stretched. I am concerned this plan will cause a significant decline in the level of service provided at time of need. It is also noted that whilst they provide an excellent prescription service there is a lack of chemists in the area outside Thatcham Health centre.
 - I often take and pick up my grandchildren from schools in Newbury. in the morning recently traffic congestion was bad I believe this situation will deteriorate under this plan.
 - Increased traffic congestion along the A4 will increase traffic through villages and minor roads causing safety issues for pedestrians and horses.
 - The local infrastructure is not geared for this increase in houses and residents and I do not believe there is enough to meet the additional needs of residents in terms of doctors surgeries, schooling, chemists, sports facilities etc.
 - The area proposed is an area of outstanding natural beauty enriched with all species of wildlife that I have been enjoying for many years.
 - Newbury town centre is sadly in decline with shops closing down and leaving the area I believe a factor is the increase in traffic this development will improve the town centre with further traffic congestion it is likely to cause less people to visit and the area will get worse.
 - The scale and location of this development is disproportionate for the area it will be an overburden to existing services and segregation of Upper Bucklebury and its identity as a village with a significant increase in traffic

For the above concerns with no evidence of these concerns being unfounded I find this plan unsound

<p>Please give reasons for your answer</p>	<p>I have been a resident of Thatcham and Upper Bucklebury continuously for over 50 years. I strongly object to the TH because I believe it to be unsound, for the following reasons.</p> <ul style="list-style-type: none"> • Healthcare provision - current GP and Dental surgeries are already full. There is no provision for expansion of cur New housing will manifestly increase demand. As an older resident, I am concerned we would experience even m in my later years. • Environment - hugely important. This is a rural, farming community. Crops grown here feed the people; the land s for that very reason alone. More housing built on these nutrition-producing fields will intrinsically decrease yield community to feed the nation. • Transport - because of the very significant increase in volumes of cars etc., any development must not allow v with all the roads in our part of the village, our lane in Upper Bucklebury is narrow, rural and has no pavement increased traffic funnelled through via access from Harts Hill. Any upgrading of the roads/lanes would downgrad 'Safe travel' would only be achieved by destroying the countryside around. • Education - more housing equals more school places needed. However, numbers of Pupils are crucial. Exactly built, it's not clear. Funding - is this sufficient to provide the legally obliged level of education the government d • Leisure activities in a rural area - walking, running, riding, bird watching, flora & fauna observation and immers the inevitable creep of urbanisation progresses up the hill to Upper Bucklebury and the other villages. • I therefore ask that the council allows opportunity to consider the government's updated planning guidance, to

<p>Please give reasons for your answer</p>	<p>I wish to comment on the above and the proposed large housing development in Thatcham towards Upper Bucklebury.</p> <p><u>Traffic increase:</u> Living in Chapel Row I am particularly concerned that this proposed scheme is well over the top in terms of a large increase in traffic through Upper Bucklebury, Chapel Row and Bradfield Southend. Harts Hill Road is a twisty road around Upper Bucklebury/Chapel Row/Bradfield etc. These roads are already busy and the road network and junctions are not suited to what will inevitably be a big increase in traffic. Heaven forbid if the development is allowed to proceed, as by the urbanisation of what is currently a special rural area of "outstanding natural beauty" and it's not unreasonable to propose a number of new or enlarged road junctions, pavements or even heaven forbid street lights. We have in the area something of a rural idyll and to place such a large development on our doorstep will inevitably change what is essentially a pleasant rural area, and a creeping spread of the concrete jungle.</p> <p><u>Healthcare:</u> The surgery at Chapel Row would seem to be already incredibly busy and fully stretched and would struggle to cope generally in the area are already incapable of taking on what would be a large additional burden of potential patients. There has been no meaningful consideration of the impact that such a large development would have on the existing healthcare. It is very poor planning for the future and a prescription for major problems in healthcare in the area which is already at full capacity.</p> <p>The news in the last few days regarding Bicester council scrapping plans for a super surgery only goes to emphasise the need for a considerable increase in housing in their area it has apparently not been possible to negotiate NHS funding and will have a negative impact on the local hospitals in that area. I suspect the RBH and other hospitals in this our area are already fully stretched, and this Thatcham development will be a healthcare car crash waiting to happen.</p> <p><u>Environment:</u> Whilst it is appreciated that an increase in the housing stock is needed throughout the country, it is so close to expansion so close to so many rural communities and an AOB. The AOB will not be an AOB if there is a persistent and increasing pressure which inevitably have a deleterious effect on the local environment and wildlife. We must surely do what we can to protect our wildlife in general which is already under pressure.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the	

<p>delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>I am objecting to the plan to build 1500-2500 houses in NE Thatcham as I find it unsound and it will have a negative impact on the health of the community.</p> <p>The proposal for a major development is likely to have a significant health impact due to its size and location. It should have a purpose Health Impact Assessment (HIA) in accordance with the Public Health England current guidance. Neither V&A nor the Council have arranged or published a prospective HIA for the NE Thatcham development regarding impacts on primary health care.</p> <p>There are few new GP practices commissioned by NHS England even in areas where there is a demand for improved primary care. The prospect of a new GP practice being established in Thatcham or West Berkshire in the future due to there being shortages of GPs in the country. Due to a lack of GPs and nurses, I believe staffing a new practice would also present a problem. There are currently 12 weeks for an appointment at my practice. Adding up to 2500 houses will only increase this waiting time. The objective of the health service component of the community has not been met as WBC and NETDC have not provided evidence for a new primary care medical facility.</p> <p>There is also a shortage of dental practices, and I have had to register with a practice in Newbury. The proposed development will reduce the number of existing practices.</p> <p>The provision for education is not clearly defined within the LPR. There is no coherent end-to-end plan, therefore the Council is unable to provide educational facilities for children, leaving the plan for a large housing development untenable.</p> <p>There are no details in the plan for the provision of Nursery/Early Years education and the provision is unclear and of poor quality age education, with no planned numbers of schools or entry requirements.</p> <p>The plan for secondary education is unsound as there is no satisfactory evidence of the number of pupils the schools can accommodate, unclear, no clear timing of the funding and no evidence that the proposed funding is sufficient to meet the Council's duties. It is known that universities are struggling to recruit applicants for teaching degrees which will have a long term effect on the education system. The Council has a duty to make arrangements for suitable school provision and how this is to be achieved is not evidenced in the plan.</p> <p>No evidence is provided for a suitable location or evidence of funding to provide sports pitches. In a world where we have indoor sport and away from digital gadgets, this kind of provision is paramount.</p> <p>The proposed development will have a detrimental effect on traffic and pollution in Thatcham due to a high increase in new houses. The roads are already congested and the Thatcham railway crossing has significant issues of congestion, noise and fumes. Building up to 2500 homes will exacerbate these problems with traffic likely to reach the A4 between Newbury and Thatcham will force traffic onto the smaller roads through the local villages.</p> <p>The development would take up valuable green space on the brink of Thatcham, denying the community of exploring the area of Thatcham. It will impact the local wildlife by removing a huge area of green space, hedgerows which provides habitats for many species. It will increase pollution as well as increasing light pollution for the woods that the proposed development borders.</p> <p>Over recent years there has been a substantial amount of investment in flood prevention, including Harts Hill. The development will result in no natural drainage and therefore increasing the likelihood of flooding. Floral Way already has a long history of flooding periods of rain and this will only increase with a large development.</p> <p>It is for the these above reasons (amongst many others) that I object to the unsound proposed development of 1500-2500 houses in NE Thatcham.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	
<p>5. Independent Examination</p>	

6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable	

<p>alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to object to this proposal as I believe it is unsound, that it will have a negative impact to the environment and potential road safety implications.</p> <p>We outline our objections below.</p> <p>Environment (AONB SP1 & SP 2) – the proposed development abuts Bucklebury Common and the North Wessex Downs AONB. The proposed new developments will be drawn to the Common and will significantly increase the pressures already evidenced by the existing and existing wildlife. Parking on and around the Common is already exceeding capacity, with verges being used during peak times. The development is relatively close, not all residents will walk/cycle to the Common they are more likely to drive. The open spaces proposed in the development areas will not be big enough or as appealing as the Common land within the AONB.</p> <p>The response that "<i>The development would involve a significant amount of open space which would be expected to be used for sustainable development (and benefit the existing population)</i>" does not address the concern that an existing mature and diverse Common green area within a housing development for dog walkers, cyclists, off-roaders, etc.</p> <p>Wildlife (SP11) - the impact on local eco systems and wildlife will be significant. Whilst plans identify mitigating actions for sustainable development it is quite clear that this development of farmland and natural open habitat will destroy areas of wildlife. The open spaces proposed in the development areas will not be enough either for the wildlife or the residents. The development is inevitable, will also impact wildlife on Bucklebury Common and the AONB.</p> <p>The response that "<i>In regards to impact on the North Wessex Downs Area of Outstanding Natural Beauty, the Council has stated that the development on the site will be landscape-led and has undertaken a Landscape Sensitivity and Capacity Assessment (LCA) for the AONB and which will provide the context within which any proposed development would need to conform. The LCA concludes that there is no strong inter[1]visibility between the site and the AONB it does lie close to it and concludes that the site is not visible from the AONB. The LCA will be published as part of the council's evidence base to inform the proposed allocation of the AONB.</i>" does not address the impact of bulldozing existing mature farmland, building and laying tarmac.</p> <p>Being "<i>landscape-led</i>" is a not a sound argument when you've squashed all the wildlife and the songbird, bee and butterfly and return in a 2-3 generation when we're being asked to protect our Countryside for future generations.</p> <p>Traffic (SP17, SP22) - Thatcham is already a bottleneck for traffic flowing through the town on the A4 between Newbury and Reading. A new road network with the proposed traffic calming, traffic lights and roundabouts, the impact of on the flow of traffic above will have a knock-on detrimental effect on the local roads and quiet lanes in Bucklebury as the additional cars a day will create chaos in and around Thatcham and the associated A4 area. The local lanes and roads which are designed with layout for only local traffic will be used as short cuts through to Reading, Newbury and the M4 to avoid the A4 congestion. We note the proximity of the proposed developments to Thatcham Railway Station. The ability to get to the station at peak times is a concern. While we appreciate the plan places an emphasis on sustainable travel there is no requirement for residents to complete their journeys on pedestrian routes may be included and built by the developers but in poor weather, the dark winter months and for commuters with their cars and further impact on the already congested road network.</p> <p>There was no response to our Objection and we have subsequently found out that there is a plan for an undisclosed road onto Harts Hill which connects Upper Bucklebury, Cold Ash and Bradfield indirectly to Thatcham.</p>

They also provide access to the M4 at Chieveley and Theale and act as a "rat run".

Cold Ash has no footpaths and a School where cars regularly park in the road and children are offloaded - this is unsafe. There are small Villages on B-roads which are in poor repair and are lined by Schools i.e. Cold Ash, Upper Bucklebury, Bradfield

Flood Risk (SP6) - Recent flood alleviation works to the North of Thatcham have been put in place to protect houses in the areas most severely affected by the 2007 flooding event. The events will only increase. Whilst there are proposals for surface water down into the valley (SUDS) they are not designed to support the heavy volume of water from such a development. In extreme weather events which it is recognised will only increase in frequency and intensity, SUDS will simply release the flood management scheme adding pressure on it and increasing the risk of Thatcham flooding again.

The response that **"In regards to concerns raised in relation to the risk of flooding, new flood alleviation measures are being developed. There is a current planning application (as of 1st February 2022) for a basin on the corner of Floral Way, part of Thatcham's flood alleviation strategy. Flood attenuation schemes are included in the IDP."** This all sounds good but they are tested who knows if they will work. Thatcham flooded in 2007 largely because of the relatively small development on significantly larger and on higher steeper ground.

Pollution – the development will generate significant levels of light pollution again impacting on wildlife and the ecology of these natural pleasures away from the area. Notwithstanding the effect for local residents on their night sky.

Pollution - the volume of homes and associated transport requirements will generate increased pollution from carbon dioxide associated with population density. The clean air experienced on the Common and the AONB currently will be a thing of the past.

The response given does not address our concerns, the street lighting you can control is one aspect, Domestic lighting (in the season) are beyond your control. Cars and central heating fumes are also beyond your control.

Rail - While Thatcham railway station is within a reasonable distance of the proposed sites there is no capacity for additional parking. There is no reference to any consideration around improving the infrastructure networks around the railway station. The creaking system will be overwhelmed and fail. The trains currently stopping at Thatcham are governed by the length of the platform. Additional trains will require a further platform extension and will require the level crossing to be closed for longer periods.

Our Rail concern is not addressed in the response however the issue of increased traffic is recognised **"TA report a concern has been raised that the proposed development would be delays at junctions and the highway network on the A4 corridor and adjoining links as a result of the increased traffic. Some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury. For instance, without mitigation measures used do show significant impacts along the A4 and Floral Way"** - it's impact is recognised but not adequately addressed.

"Concern regarding infrastructure provision is noted. Development which does not provide adequate and timely infrastructure is not supported. An Infrastructure Delivery Plan (IDP) has been produced to support the LPR, and as part of the IDP work has been taken place with infrastructure providers. The IDP is a 'living document' and will be updated regularly updated in consultation with providers"

Medical - Medical services in Thatcham Bucklebury Cold Ash Chapel Row and Bradfield Southend are already under strain. New services are included in the proposed scheme (GP surgery) however there is no obligation for these services to be provided. The need for more housing of the housing. Indeed, we believe these will wait until the demand reaches a specified level. In the intervening period existing surgeries and services already at capacity. We wonder how and when the NHS will be engaged on these proposals. The influx of thousands of families who will expect schools GPs and hospitals to take care of them.

Our concerns have not been addressed.

The provision of medical services is not within the gift of the Developers, only the NHS and ultimately the Department of Health can control the funding for GP Practices and Dentists. These are over-subscribed in Thatcham and the surrounding districts. There aren't the Doctors, Dentists or Healthcare Professional to staff them. Don't build a future problem for existing residents that will present itself.

Observations

These still stand, Thatcham remains a small town that has little or no investment over the years.

By granting permission for this development the local authority is again devolving its responsibilities by placing the burden of infrastructure onto others. Before West Berkshire Council considers further development in Thatcham it should first consider its commitment to invest in the area. Without this WBC will continue to face strong opposition to applications that seek to develop significantly while anticipating the infrastructure and investment will be made by others in their own timeframes.

	<p>The response to our earlier submission does not reassure me, quite the contrary.</p> <p>The new undisclosed northern access from the development to Harts Hill and Upper Bucklebury giving cars access to avoid the congested A4 fills me with dread...</p> <p>We are opposing the North East Thatcham Development Proposal THA20.</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I wish Objection to the proposal to build 1500 – 2500 additional homes on the proposed site to the North East of Thatcham</p> <p>The grounds for objection are as follows -</p> <p>1) Environment based objections</p> <ul style="list-style-type: none"> • on the area of outstanding natural beauty both visually but also from noise, and pollution • a loss of green space • impact upon trees and will result in loss of mature trees, • impact on local wildlife and the biodiversity of the Bucklebury Plateau. <ul style="list-style-type: none"> • There will be a negative impact upon – • In time when food security is of paramount concern the use of valuable farmland for housing flies in the face of • There will be a potential coalescence of Thatcham and upper bucklebury with the strategic gap being lost or reduced • Quality of environment will be diminished, and pollution will be increased • In times of global warming the carbon footprint of this development will be enormous, from all the traffic, the many cars travelling to the site, and the digging up of the ground, this development will add to global warming. • The loss of the grass land, hedges, trees, which are a huge carbon sink will be lost and carbon will be released into the atmosphere contributing to global warming <p>2) Community based objections</p> <ul style="list-style-type: none"> • The community benefits of the scheme have not been fully explored and any suggested benefits are not sufficient • Whilst local facilities such as Doctors Surgery may well be provided these will not be staffed as the current GPs are overworked and under strain on health facilities • There will be additional strain on police facilities and policing in the area and no plan for this has been detailed • There will be additional strain on additional strain on dental facilities in the area and no plan for this has been detailed

	<ul style="list-style-type: none"> • There will be an impact on local safety especially with the increase in traffic using the harts hill/common road t • There will be significant noise during construction, • There will be an increase in light pollution in the area affecting the wildlife and local people • There will be an additional strain ton power supply and no real plan has been detailed on how to deal with this • The development will have a detrimental impact upon drainage capacity and no detail has been provided ton h <p>off will be dealt with,</p> <p>3) Traffic based objections</p> <ul style="list-style-type: none"> • There will be an increase in volumes of local traffic generated by this development, even if as the documents s (a minimum!) this will mean at least 3000 additional car, journeys each day (assuming one car per house hold rural area have 2 cars), if the volume of houses are at the higher estimate of 2500 homes built this will mean a journeys a day (2500 homes with 2 cars each doing 2 journeys each day) this will result in unacceptable impac and at peak times in particular. • There are no retail provisions proposed, creating additional traffic to travel off-site to a shop. • There is a significant risk of vehicles being backed up, with queues already at Thatcham Train Station backing additional passengers could exacerbate this. A bridge is required before homes are built. • Traffic in Floral Way at peak hours can already result in 15–20-minute delay with frequent queues from roads in Way • The A4 is not designed to take the volumes of traffic it currently does, and therefore cannot cope with additional t • No matter what WBC/developer say the common road through Upper Bucklebury, and Bradfield Southend will exacerbated by the traffic backing up on the A4 and drivers seeking an alternative route through the villages on n of traffic. • There is not enough local employment for future occupiers of this development, and which will require people v work locations adding to traffic problems <p>4) Flooding based objections</p> <ul style="list-style-type: none"> • The Risk of local flooding remains very high and will have local and strategic implications. The new developme upon local greenfield drainage rates which will impact on potential future flood events on existing housing "dow water catchment • The technical aspects of the scheme have a number of real shortcomings which, if implemented, will still mean for the existing homes and proposed homes. . • Flooding risks and the Thatcham Flood Forum of 2014 indicated that Thatcham should be 'ruled out' for large s water emergence; • The flood event of 2007 affected over 1000 houses, with a volume of water coming from the north of Thatcham not coping with the volume of water. More houses in this location will add pressure to that siphon <p>5) General objections</p> <ul style="list-style-type: none"> • The planning process as this is being manipulated by Developer to their own advantage and the council are co to manipulate this process. By the very fact that the developer has paid in excess of £100,000 for the planning adopted lock stock and barrel is clearly bias towards the developer. • I would also question whether the above is lawful and WBC should produce evidence that says this approach i • The councils planners are being lazy allowing this plan to be proposed, there are numerous sites especially br around west Berkshire that if allowed for development would spread the development across many areas and communities and the environment.
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>

Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by	

<p>the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I write because I believe the LPR Regulation 19 is unsound, I document my reasons to maintain that it is not "Justified".</p> <p>1 West Berkshire Council has a 'Duty to Co-operate'.</p> <p>This surely means that local parishes and adjacent landowners should be consulted, or at least informed when such matters are considered. Since approximately 800 metres of our boundary abuts the proposed new development, I would have expected the officers of West Berkshire Council to have contacted us.</p> <p><i>[personal information removed]</i> The western boundary of our land is a stream which abuts the eastern boundary of the proposed Development.</p> <p>This stream feeds into the River Kennet, one of the few remaining chalk streams in southern England.</p> <p>The farm consists of land to the west of Cox's Lane and land to the east of Cox's Lane extending along Birds Lane to the east.</p> <p>We have lived here for 29 years during which time we have revitalised the soil following years of arable mis-use. We have removed pesticides and chemicals, replaced arable fields with wild flower meadows, planted several kilometres of new hedgerows, properly spaced and maintained hedgerows and planted new woodland. We are recognised for this care by being a farm under the Higher Level Stewardship scheme.</p> <p>Our careful management of this land has resulted in a considerable increase in its biodiversity.</p> <p>1 Impact on Ecology and Biodiversity</p> <p>Even though it is our land that is most at risk of damage to its biodiversity, no one from WBC Planning Department has ever visited to assess the presence of flora and fauna on the land abutting the development. I understand that the data used to justify the proposed biodiversity of the proposed site and its immediate surroundings is in most cases more than 15 years old and almost certainly out of date. This means that no account has been taken of the increased biodiversity we have established whilst <i>[personal information removed]</i> the land has been under our stewardship. It is obvious that any development on the sloping land to the east of our stream will have a negative impact on the flora and fauna nurtured during our tenure. Any mitigation WBC might propose can do nothing to protect these vulnerable species. To suggest that the development will have a positive impact on the environment is just nonsense.</p> <p>This LPR subsumes part of Midgham Parish on its Eastern boundary. No consultation has taken place regarding the impact on the Settlement Boundary.</p> <p>The negative environmental impact of the proposed development is clearly of most concern to my husband and I as our land is adjacent to the development. I list below further reasons for my objection to this proposal.</p> <ul style="list-style-type: none"> * Other proposals, some on brownfield sites, have not been given proper consideration. Particularly the Croudace proposals to replace the level crossing. The traffic jams caused by the level crossing increase year on year and a bridge would be a much better solution. * Consultation documents provided in favour of this development were paid for by the developers. * Insufficient consideration of the development's impact on the local landscape and the AONB. * Disregard for the need of "Defined Gaps" between Thatcham and surrounding villages. * The number of houses to be built has been reduced from 2,500 to 1,500 and yet there has been no reduction in the overall impact on the environment. * No consideration has been given to the likely increase of traffic on Cox's Lane which will become a "rat run" up to the development. * WBC has provided an oversupply of houses in recent years and yet it has chosen to ignore Michael Gove's statement that councils should be likely to reduce the overall housing requirements for councils. Many councils have chosen to pause the progress of new housing. Has WBC not done the same? * No consultation has taken place with local GP practices regarding the increase in need from an extra 4000 people moving to the area. * An earlier planning permission for a development at Siege Cross was refused. What has changed. * Why is the LPR not being reconsidered by the full council prior to the final submission to The Secretary of State? <p>I do hope that my real concerns over the unsuitability of this proposal will be seriously considered and that a complete ban on new building on farmland, will be forthcoming.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am objecting to the plan as I find it unsound</p> <ul style="list-style-type: none"> • I have lived and worked in the Newbury area all my life <i>[personal information removed]</i> • This proposal is not positive for the environment and potentially will cause further environmental issues to this some time. • The following areas are my main concerns :- • Currently I understand Thames water are allowing raw sewage at peak times to flow into our water ways I believe residents (4000 estimated) will only increase the burden on the current water treatment facilities. I feel very sorry they need cleaning up rather than making them worse. • Now that I am a pensioner my health becomes more prominent . 13 years ago when we moved to Upper Bucklebury and myself had to move from Thatcham health centre to Chapel Row Surgery because THC didn't have enough space in the area. Whilst I have been very happy with the chapel Row surgery and they do provide a first class service which is stretched. I am concerned this plan will cause a significant decline in the level of service provided at time of need. It is also noted that whilst they provide an excellent prescription service there is a lack of chemists in the area outside Thatcham Health centre. • I often travel from Upper Bucklebury to Greenham common to help my son with his business and if I travel by bus to cross the Thatcham railway crossing, increased traffic using this route will cause even longer delays. This is a concern. • I use a bicycle to go from Upper Bucklebury to Greenham when I can, but the cycle lanes are either non-existent or poorly maintained, increased traffic on this route will make my journey less safe if not dangerous. • I often take and pick up my grandchildren from schools in Newbury. in the morning recently traffic congestion on the A4 is so bad I believe this situation will deteriorate under this plan. • Increased traffic congestion along the A4 will increase traffic through villages and minor roads causing safety concerns for pedestrians and horses.

	<ul style="list-style-type: none"> • The local infrastructure is not geared for this increase in houses and residents and I do not believe there is to meet the additional needs of residents in terms of doctors surgeries, schooling, chemists, sports facilities • The area proposed is an area of outstanding natural beauty enriched with all species of wildlife that I have b • Newbury town centre is sadly in decline with shops closing down and leaving the area I believe a factor is or this development will improve the town centre with further traffic congestion it is likely to cause less people to worse. • The scale and location of this development is disproportionate for the area it will be an overburden to existing segregation of Upper Bucklebury and its identity as a village with a significant increase in traffic <p>For the above concerns with no evidence of these concerns being unfounded I find this plan unsound</p>

Please give reasons for your answer	<p>I am writing to object to the Proposed WBC Regulation 19 Local Plan Review (LPR) 2022-2039, specifically the NE TH it is unsound and lacking in supporting evidence. You state on your home page for the LPR under Support Evidence by a robust evidence base' but I do not think there is sufficient robust evidence to prove that the plan is sound. I have referred back to my previous objection under the Regulation 18 consultation and I am convinced that the response is flawed and lacking in evidence:</p> <p>1. In response to my objections on the environmental impact, WBC's response was that 'a baseline assessment of the Thames Valley Environmental Research Centre (TVERC) and is referred to in the Housing and Economic Land Availability of the LPR evidence documents.' This TVERC report was undertaken in 2018 and has not been updated since. The report stated that: 'Up to date ecological surveys are needed to establish current site conditions and the presence of any protected species, sites or habitats are present on the proposed development site, avoidance and mitigation measures</p>

And WBC's response stated that: 'The updated version of the proposed allocation policy will require that any application strategy which will set out how priority habitats and ecological features will be protected and enhanced.' Yet despite the need for further ecological work and mitigation measures being required, there are no mitigation measures or evidence.

2. The WBC response to my objection about the biodiversity net gain stated 'that prior to the commencement of a development must be submitted to the relevant planning authority for approval.' The LPR states: 'Where there is a reasonable likelihood that species may be present and affected by a proposal, comprehensive surveys will need to be undertaken to provide the information necessary for determination to be made and licenses to be sought where necessary. Appropriate compensation measures should be put in place to avoid or would disadvantage the conservation of a priority species.' Bucklebury Parish Council undertook their own independent surveys and evidence of threatened birds and animals. There is no evident plan in the LPR to compensate for the biodiversity loss in the surrounding parks, on which there are no details apart from that it will link to Thatcham to the AONB. HELAA concluded that there are 'high risk of adverse nature conservation impacts' with 'areas of ancient woodland and grassland adjacent to the site.'

The LPR goes against the Defra's biodiversity 2020 strategy which states: 'The mission for this strategy, for the next decade, is to protect, restore, and improve nature, support healthy well-functioning ecosystems and establish coherent ecological networks, with more and better green and blue infrastructure for wildlife and people.'

3. The response to my objections about significant increase in traffic through Upper Bucklebury and the surrounding area is that 'a development of this nature would not be expected to go ahead without mitigation measures and improvements to the surrounding networks as addressed in the IDP and informed by updated transport modelling. The package should better accommodate the increased traffic as a result of the development.' The Phase 2 Transport Assessment Report 2021 does not clearly evidence this. It states in its executive summary that 'further details and analysis of the impact and suitability of such measures, including the impact on trip rates, will be considered in the next phase of the assessment.' We are therefore being asked to consult on yet another assessment with no evidence. The Transport Assessment Report does confirm that no improvements would have the effect of diverting traffic off the A4 onto unsuitable local routes, such as that from Upper Bucklebury through to Cold Ash but there is very little evidence to support this. As a resident of Upper Bucklebury, I am very concerned about the inevitable increase in traffic through the village and the impact on the village with this.

4. In response to my objection that the new development would lead to a huge increase in light pollution and that we would have to live in a village to escape from the significant pollutants that living in a town creates, WBC's response included a commitment to a lighting strategy in the next version of the proposed allocation policy in the next published version of the LPR also requires the submission of a lighting strategy. However, find this lighting strategy in the LPR evidence base.

The LPR and its inadequacy of a 'robust evidence base' is highlighted perfectly by Appendix 5 of the Sustainability Appraisal. It states that the effects of the SA objectives. The conclusions of this document seem to be based on absolutely nothing. As an example, the SA for SP17 provides a positive impact on environmental sustainability and is unlikely to impact on air quality, noise levels, and climate change. There is no justification for this. The SA report itself states that the 'overall development of this site is likely to give a net positive impact on sustainability' and that 'while there is an unknown impact on environmental sustainability in relation to impacts on air quality, the proposed mitigation measures would be able to deliver an overall neutral impact.' No information is provided on the mitigation measures. The SP17 policy states that 'the development of the site will be supported by a Sustainability Charter which will establish a framework for how the development can be achieved' and then lists several strategies including energy, integrated water supply, ecology, lighting, biodiversity, and climate change. How can the SA conclude therefore that there will be a positive impact? What is this conclusion based on given that there is no evidence in the documents?

In the overall summary of SP17 in the SA, it states (rating a high likelihood) that 'The policy is likely to have an overall positive impact on sustainability yet in the same section states: 'The site is a greenfield site and therefore, would result in a negative impact on environmental sustainability that need to be mitigated.' Again, as with so much in this plan, no mitigation measures are in evidence.

Finally, it is my understanding that when WBC initially developed the LPR, there was a requirement to build a specific evidence base. In December 2022, Michael Gove stated that housing numbers would no longer be mandatory so I would recommend that the development plan which is so lacking in evidence to make it sound and justified. This will allow time to understand the impact of development on greenfield land, which itself contains protected species (according to the recent Bucklebury Parish Council study). The loss of the ecosystems of the AONB is not a sensible option and will actually have a negative impact on the surrounding infrastructure and environment.

Please give reasons for your answer

I would like to formally register my OBJECTION to WBC LPR Regulation 19, the proposed development of 150 Thattham, as I find it completely unsound for the following reasons:

1. It will dramatically reduce the greenbelt between Thattham and Upper Bucklebury.
2. The rural nature of this area would be completely lost with Upper Bucklebury becoming part of Thattham.
3. It would be a massive over development of our beautiful countryside in an area which consists of rolling hills and if large scale are approved there will not be any open rural areas left for future generations to enjoy.
4. The proposed land is not particularly suitable for development as it is very hilly land and has had issues as a flood plain.
5. The view that Thattham is best placed to take a development of this size in this location is misplaced, un-proven and unrealistic.
6. According to the Transport Assessment paragraph 3.26, 'The access arrangements for the Northern end of the Newbury junctions on both Floral Way and Harts Hill Road. Results from the modelling suggest that these will not cause problems'. I am unsure as to why this has been stated. Please can you share these with me? How can increased traffic on an already dangerous and busy road (without the development), be seen as not causing a problem?
7. I am also aware that there are drawings showing a new car park on Harts Hill. This again will increase traffic to an already busy road which is highly likely to promote anti-social behaviour, illegal activities, fly tipping and littering which we see regularly on Bucklebury Hill.
8. In terms of 'reducing accidents and improving safety' your assessment has concluded that 'the policy is likely to have a significant positive impact on walking, cycling and public transport'. Also regarding 'increasing opportunities for walking, cycling and public transport' your assessment concluded 'the policy is likely to have a significant positive impact on walking, cycling and public transport'. I wholeheartedly disagree with both of these assessments and I have concerns with the way the roads are designed with these in mind. Please can you provide me with the evidence and conclusions for both these assessments? Also, it's not just about the roads but the surrounding areas, villages and community which exist today and have done for years. What assessment has been done for these with the increased traffic?
9. Further to the above, this development will have a significant impact on traffic levels and the associated pollution to be increasing:
 - a. Traffic and speeding through Upper Bucklebury, which is already a significant and serious concern, especially as this road to the Primary School.
 - b. Traffic from Thattham through Upper Bucklebury to Chapel Row on roads which are not designed for large traffic volumes.
 - c. Increased traffic through ALL the surrounding villages in general, especially as there is a plan for an exit at the Newbury which will significantly increase traffic towards Upper Bucklebury, Chapel Row, Bradfield, Cold Ash and Hermitage. WBC has stated 'the policy is likely to have a significant positive impact on walking, cycling and public transport' and 'the policy is likely to have a significant positive impact on walking, cycling and public transport'. This is a total understatement and completely neglected especially as the roads are already inadequate, have no pavements and are extremely dangerous with speeding traffic. Accidents is already high and this proposed housing development and exit will mean this is inevitable.
 - d. Traffic on the route into Thattham and Newbury. These roads approaching the station are already heavily congested and any minor traffic disruption will cause significant delays.
10. This level additional of housing will inevitably have an adverse impact on local facilities, schooling, medical and other services which are overstretched.
11. Regarding healthcare, there is a significant lack of detail around strategic healthcare planning and the NE Thattham Development Consortium are aware, neither WBC or the developers have arranged or published a prospective Health Impact Assessment for this development. There is no engagement between the North-East Thattham Development Consortium and local general practises. Why hasn't a new GP site being available will result in the three existing practises in the area being overstretched even further? The fact that not provided evidence for the provision of a viable primary care medical facility. To add to this Thattham Dental Practice providing dental care for the local population, this will also get worse with the proposed development.
12. Regarding the environment, there will be damage to the Bucklebury Plateau Biodiversity Opportunity Area and the surrounding countryside which is the common. This development will also destroy the enjoyment of the local countryside by local communities in terms of the Downs AONB and will cause negative impact to legally protected wildlife. There is no evidence to support claims that the development will have a positive impact on the environment but instead it will have a significant and serious negative impact on the overall natural vegetation and sustainability. Environmental sustainability is defined as: 'the ability to maintain an ecological balance and conserve natural resources to support the wellbeing of current and future generations'. I am honest to say that WBC is not protecting the sustainability of our precious environment. In addition, as far as I am aware there is no assessment to analyse and address the negative environmental consequences. Why not?
13. Regarding education, within the Local Plan Review the provision for Nursery, Early Years, Infant and Secondary school education has been clearly defined. The provision for Primary and Secondary school education is unclear and contradictory. WBC has a duty to make arrangements for suitable school provision. How this obligation will be met across all school years has not been defined in the LPR. The plan for the schools needs to take priority and should be confirmed before any housing development is approved. It is likely that houses will be built and no additional school provision will be provided, leading to oversubscribed schools and long waiting lists for places.

for our children. The LPR talks of provision of school fields however no evidence for funding or a suitable location (a space and air polluted A4 does not suffice as suitable) has been identified by the WBC or NE Thatcham Development Committee.

14. The development will significantly increase the noise and light pollution to the Bucklebury residents. There are no other options.

15. There is no evidence that this development will enhance Thatcham town centre (or the area in general).

16. It is not likely to attract new businesses to the area or create or significantly increase employment.

17. The local shop and pub are unlikely to benefit. The local shop is under significant threat as the new development will take its place.

18. There is now particular focus within the Consultation National Planning Policy Framework on taking into account the impact of housing on the environment, assessing how much housing can be accommodated. As a result of this, several local authorities have paused their plans to await the outcome of the consultation on the basis that a *lower housing requirement could be applicable to the plans planned for*. Although I am completely against the NE Thatcham housing development, I would ask that WBC should consider (and if possible have), to hold on the plan and present a revised plan in line with the updated planning guidance when this comes in.

To conclude, this development is unnecessary, inappropriate, and ill-conceived and should be rejected.

Please do not take the opportunity to live and play in our beautiful countryside away from our families today and future generations. Let the Thatcham housing development go ahead.

Photo 1: Please protect our countryside and views like this.

[See attached photo]

Observations

1. Why is WBC not writing to all residents to make them aware of this development and encourage/seek comments from a wider audience as possible?
2. Up to now I was under the impression that WBC was committed to keep a substantial greenbelt between Thatcham and Bucklebury. Consideration of this approval now certainly seems to totally contradict this stated commitment.
3. Finally, why is WBC are now considering this development when a previous application was rejected by the secretaries?

I am prepared to appear at the public enquiry, if invited.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?
 * Yes
 * No

Please give reasons for your answer

<p>delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>In response to the West Berkshire Local Plan Review Proposed Submission (Regulation 19) Consultation, I want to strongest terms. I find the plan itself unsound and unsustainable on many grounds.</p> <ol style="list-style-type: none"> 1 The proposed location of such a large greenfield development is completely inappropriate to the needs of either residents. <ul style="list-style-type: none"> - The proposed development will forever remove this vital biodiverse environment from the enjoyment of both the residents. - There appears to be no mechanisms to protect the existing (particularly legally protected) wildlife and ancient adjacent areas (eg. Bucklebury Common) which also depend on that site as part of the local biodiversity. - The claim in SP17 that this proposal would have a positive impact on the environment is incredulous and brings disrepute to those preparing the whole document. - Creating "County Parks", which appear to already have been downgraded to "community parks", is no credible way to protect a biodiverse environment and certainly no justification for eradicating an existing ancient and biodiverse environment. Community parks would not have the same long-term protection and could themselves be consumed by housing in future. The current proposals would be insufficient to prevent increased load on the existing green spaces, causing further load on an already overburdened surrounding area, undermining the current efforts to support and restore the existing ecosystems around Bucklebury Common. - When walking through and around Bucklebury Common, it is not uncommon to find people riding motorised vehicles on roads and restricted byways (and other areas). These spoil the enjoyment of the area, but worst have a detrimental effect on the environment. These can also be heard at night, cause disturbance to those living around Bucklebury Common. Increasing traffic will cause this problem to grow. WBC appears unable to enforce the current regulations with the current population. The plan to increase the local population significantly without first demonstrating the ability to protect the existing environment is a proposal to ensure that this can be scaled. - The effect of climate-changing pressures can be seen when walking around the local woodland in terms of an increase in tree deaths due to water stresses. Increasing the local population will inevitably add further pressure on this already stressed ecosystem. This has not been considered within the proposal. 2 The roads in the surrounding area and particularly in and between the local villages are entirely inadequate for the proposed development. It is not credible to consider adding further traffic: <ul style="list-style-type: none"> - Any increase in the volume of traffic would require a significant upgrade of the local roads and the proposed development would require a large volume of increased traffic. Such an upgrade is (rightly) not proposed, but if it were, it would be completely at odds with the existing environment as a stated goal. This appears to be a self-contradictory aspect to this plan. - Some of the local roads have been designated as "quiet roads". These are currently overused by traffic. Adding more traffic will further. The plan contains no means to mitigate this problem. - Many of the roads through the local villages (many on the obvious "rat run" routes) do not contain pavements to help to avoid traffic. This will lead to serious accidents and "near misses" (particularly at dawn/dusk/night and during the winter months). One of our neighbours children was forced into a ditch due to passing traffic and the traffic is already much worse than it has been. - There has already been a steady increase in the traffic through the villages over the last few years. It is no longer possible to have windows open (in hot summers) on our road in Upper Bucklebury as drivers start using the road outside of our road at 5:30am. This will only get significantly worse with such a large increase in population. As there are no alternative routes (or, if affected), this traffic will further increase and affect the quality of life of the residents on ours and similar roads. - The increase in traffic will prevent recreational road users (cycling and walking) from an enjoyable and safe experience. This will prevent people from using the more green mode of transport (cycling) to reverting to their cars for safety purposes. This is contrary to the plan and local policies to move people away from using cars where possible. 3. The provisions for healthcare have not been adequately addressed: <ul style="list-style-type: none"> - It can currently take us up to 3 weeks to get a routine appointment with our doctor. Several years ago this was within a week. The plan does not address adequately the impact of a large number of people further increasing the load on the local healthcare system. The plan to build new health centres and/or extending existing ones does not address the underlying problem that these cannot be funded. The plan has not been understood and acknowledged in the plan, thereby casting doubt on the competence in this area of the plan.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters	

<p>that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to object to the proposal to build 1500-2500 houses in NE Thatcham because I find the plan unsound.</p> <p>I object to the plan because the plan for secondary school provision is unsound. I have young children and I am concerned that a secondary school there will not be space/ provision for them in local schools because the first set of houses could be built but not built. It's also not clear how many pupils the new school is to cater for, where it will be located, the number of year 6th form (which I believe it will need). I can't see the evidence that West Berkshire Council education authority has made for secondary school provision for the children that are likely to live in this estate or the families that remain in other parts of Thatcham built.</p> <p>I am also concerned with how the health care services will cope with the increased demand. I haven't seen evidence of a health care assessment, and I'm concerned that Thatcham's two primary healthcare centres are already overloaded, it's significant that the number of appointments now than it was in 2019, how are they going to cope? Again, with a young family this is of great concern as access to adequate health care services when they're needed.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>

Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.
* Yes
* No

Please give reasons for your answer

I have the following comments on the WBS LPR document:

Healthcare

The North-East Thatcham development plan (SP17) proposes a 450 sq m primary healthcare facility with the suggestion to the Buckinghamshire, Oxfordshire and Berkshire West Integrated Care Board or other such appropriate body. However, **of detail or insight** into strategic healthcare planning.

Few new GP practices are commissioned by NHS England, even where they consider there to be patient demand. Digital figures of patients registered in the NHS Berkshire West Clinical Commissioning Group (CCG) confirm there is no demand in other areas of the country. There is therefore **no realistic prospect of a new GP practice being established** in the foreseeable future.

It currently takes at least 2 weeks to get a non-emergency appointment at the Thatcham medical practice, yet you are proposing a new surgery with no concrete proposal as to how a new GP surgery may or most likely wont be established.

Five of the 10 lowest performing surgeries for percentages for same-day appointments came from this district. They are: Burdwood Surgery, with 27.1 per cent; **Burdwood Surgery**, with 28.8 per cent; Lambourn Surgery, with 29.5 per cent; Chapel Row Surgery, with 30.9 per cent; **Health Centre**, with 31.9 per cent.

Thatcham dental practices are unable to provide dental care for the whole population with a significant minority of patients having to travel out of area for NHS and private dental care. Thatcham Vision, endorsed by WBC in 2016, confirmed only 60% of resident population have access to a dentist (with 17.5% registered with a doctor outside Thatcham). There is no evidence provided that either WBC or the Council have considered any local dental practices regarding the potential impact of increased workload resulting from additional housing.

Thatcham Town Regeneration

As you state in the plan, Thatcham town center and facilities badly need regeneration, only after that is complete, should you consider housing.

Transport

Traffic on the local roads is already overwhelming at peak times, with queues on Floral Way every morning, the A4 is already congested and traffic will divert down country lanes which are unfit for the volume.

Since Covid, significantly fewer trains to/from Thatcham have been running. Given the lack of co-ordination around the railway, this will drive many more people onto the road.

Schools Provision Overview

The provision for education from Nursery, Early Years, through Infant to Secondary education is **not clearly defined** in the LPR. There is no coherent end-to-end plan: this therefore breaches the Council's obligations to provide education for all children. Without such provision, the Plan for a large new housing development is untenable.

The lack of a coherent Plan on Schools Provision across the various proposed developments also means that it is impossible to predict the impact on traffic. The siting of a secondary school to the NE of Thatcham would result in a significant increase in traffic in the area, not considered in the traffic plans and models in the LPR.

Unless the infrastructure (Schools, GP's, Shops etc) are built and functional in the first phase of the development the plan is untenable. The School for instance has a capacity of 1881 and an actual number of pupils of 1860, so they wont be in a position to take any more.

Flooding

Whilst there have clearly been extra measures built into the latest plans with the Wetlands Park, they have built over the wetlands which normally soak up the rain. I doubt very much the small wetland areas proposed would provide any safety net for those who live in the area. We can look forward to a repeat of the 2007 floods.

It is disappointing to see something that has clearly cost the tax payer a significant amount of money be so poorly thought through. At a keypoint about how the Thatcham area can support this sort of growth, the plan should be put on hold.

As usual the plan is there to meet unfounded targets regardless of the cost to the existing residents.

<p>Please give reasons for your answer</p>	<p>I would like to formally register my objection to WBC LPR Regulation 19, the proposed development of 1500 to 2500 as I find it completely unsound for the following reasons:</p> <ol style="list-style-type: none"> 1 It would be a massive over development of our beautiful countryside in an area which consists of rolling hills and if this scale are approved there will not be any open rural areas left for future generations to enjoy. 1 The proposed land is not particularly suitable for development as it is very hilly land and has had issues as a fl 1 It will dramatically reduce the greenbelt between Thatcham and Upper Bucklebury. 1 The rural nature of this area would be completely lost with Upper Bucklebury becoming part of Thatcham. 1 The view that Thatcham is best placed to take a development of this size in this location is misplaced, un-prov 1 According to the Transport Assessment paragraph 3.26, <i>'The access arrangements for the Northern end of the junctions on both Floral Way and Harts Hill Road. Results from the modelling suggest that these will not cause</i> modelling results for this, so I am unsure as to why this has been stated. Please can you share these with me? traffic and pollution on an already dangerous and busy road (without the development), be seen as not causing 1 I am also aware that there are drawings showing a new car park on Harts Hill. This again will increase traffic to and is highly likely to promote anti-social behaviour, illegal activities, fly tipping and littering which we see regu 1 In terms of <i>'reducing accidents and improving safety'</i> your assessment has concluded that <i>'the policy is likely to safety as safe travel will be critical to the design of the site'</i>. Also regarding <i>'increasing opportunities for walking,</i> your assessment concluded <i>'the policy is likely to have a significant positive impact on walking, cycling and pu</i>

should be designed with these in mind'. I wholeheartedly disagree with both of these assessments, and I have such as 'likely'. Please can you provide me with the evidence and conclusions for both these assessments? Also more importantly about the surrounding areas, villages and community which exist today and have done for years done to assure road safety for these with the increased traffic?

- 1 Further to the above, this development will have a significant impact on traffic levels and the associated pollution increasing:
 - 1 Traffic and speeding through Upper Bucklebury, which is already a significant and serious concern, especially walk along this road to the Primary School.
 - 1 Traffic from Thatcham through Upper Bucklebury to Chapel Row on roads which are not designed for large trucks.
 - 2 Increased traffic through ALL the surrounding villages in general, especially as there is a plan for an exit at the end of the road. This will significantly increase traffic towards Upper Bucklebury, Chapel Row, Bradfield, Cold Ash and Hermitage. *displacement of A4 traffic onto wider rural routes such as Upper Bucklebury*. This is a total understatement and a threat to road safety, especially as the roads are already inadequate, have no pavements and are extremely dangerous. The potential for serious/fatal accidents is already high and this proposed housing development and exit will mean a significant increase in the number of accidents.
 - 3 Traffic on the route into Thatcham and Newbury. These roads approaching the station are already heavily congested. Any event of any minor traffic disruption.
- 1 This level additional of housing will inevitably have an adverse impact on local facilities, schooling, medical and will be overstretched.
- 1 Regarding healthcare, there is a significant lack of detail around strategic healthcare planning and the NE Thatcham Consortium are aware, neither WBC or the developers have arranged or published a prospective Health Impact Assessment for the development. Also been no engagement between the North-East Thatcham Development Consortium and local general practices. The likelihood of a new GP site being available will result in the three existing practices in the area being overwhelmed. As the developers have not provided evidence for the provision of a viable primary care medical facility. To add to this the developers are already unable to provide dental care for the local population, this will also get worse with the proposed development.
- 1 Regarding the environment, there will be damage to the Bucklebury Plateau Biodiversity Opportunity Area and the common. This development will also destroy the enjoyment of the local countryside by local communities in the area. The Downs AONB and will cause negative impact to legally protected wildlife. There is no evidence to support claims that the development will have a positive impact on the environment but instead it will have a significant and serious negative impact on protected wildlife, natural vegetation and sustainability. Environmental sustainability is defined as: *'the ability to meet the needs of in our planet's natural environment and conserve natural resources to support the wellbeing of current and future generations'*. I am shocked and disappointed that WBC is not protecting the sustainability of our precious environment. In addition to this a significant attempt to investigate, analyse and address the negative environmental consequences. Why not?
- 1 Regarding education, within the Local Plan Review the provision for Nursery, Early Years, Infant and Secondary schools has been clearly defined. The provision for Primary and Secondary school education is unclear and contradictory. WBC has a duty to make provide suitable schooling options. How this obligation will be met across all school years has not been stated in the LPR. The plan for the schools needs to take priority and should be confirmed before any housing development is approved. If not done it is likely that houses will be built and no additional school provision will be provided, leading to oversubscribed schools and ineffective education for our children. The LPR talks of provision of school fields however no evidence for funding for school fields (the field near the busy, congested and air polluted A4 does not suffice as suitable) has been identified by the WBC Development Consortium.
- 1 The development will significantly increase the noise and light pollution to the Bucklebury residents. There are no measures in place to mitigate this.
- 1 There is no evidence that this development will enhance Thatcham town centre (or the area in general).
- 1 It is not likely to attract new businesses to the area or create or significantly increase employment.
- 1 The local shop and pub are unlikely to benefit. The local shop is under significant threat as the new development will take away the parking space for the shop and pub.
- 1 There is now particular focus within the Consultation National Planning Policy Framework on considering the change in the way how much housing can be accommodated. As a result of this, several local authorities have paused their plans for housing development on the outcome of the consultation on the basis that a *lower housing requirement could be applicable to the plans currently planned for*. Although I am completely against the NE Thatcham housing development, I would ask that WBC (and other local authorities have), to hold on the plan and present a revised plan in line with the updated planning guidance when it is published.

To conclude, this development is unnecessary, inappropriate, and ill-conceived and should be rejected.

Please do not take the opportunity to live and play in our beautiful countryside away from our families today and future generations. Let the Thatcham housing development go ahead.

Observations

- 1 Why is WBC not writing to all residents to make them aware of this development and encourage/seek comment from the local audience as possible?

	<p>1 Up to now I was under the impression that WBC was committed to keep a substantial greenbelt between Thatcham and the M3. The consideration of this approval now certainly seems to totally contradict this stated commitment.</p> <p>1 Finally, why is WBC are now considering this development when a previous application was rejected by the se</p>

<p>1. Do you consider the Local Plan Review is legally compliant? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>General</p> <p>This Local Plan(LP) bears all the hallmarks of being a rushed and ill-considered piece of work. With the unexpected had to search around for an alternative large scale development and alighted on SP17-1500 houses in NE Thatcham varied shortcomings in this option it has been pursued on the basis of flawed logic, lack of supporting evidence and u</p> <p>There was an opportunity when WBC was unexpectedly required to produce a 30 year vision as part of the LP process and could have provided the opportunity for a reset. This opportunity was not grasped probably due to senior staff tu department of the Council.</p> <p>Housing Numbers</p> <p>The LP says 9146 new houses are needed in the plan period. This is based a 9yr old ONS Housing Projection and a Central Government will be publishing new advisory housing targets based on the 2021 Census which will provide a Furthermore WBC has over-achieved in its housing delivery in the current plan period but no allowance has been made. Many other councils have chosen to put a hold on their LPs until Central Government planning policy on housing nu likelihood is that fewer houses will be needed up to 2039 but WBC have decided to plough on regardless and impose Thatcham(SP17) many of which could well not be needed.</p> <p>On the basis of the foregoing rationale the LP is unsound.</p> <p>Strategic Gap</p> <p>The LP has reviewed and endorsed strategic gaps between settlements in a number of parts of West Berks save the Thatcham. The site selection background paper in Regulation 18 (not included at Regulation 19) said that only the h</p>

than the whole of West Berks would be considered. WBC expressed concern a development of 36 houses south of strategic gap between Newbury and Thatcham. However, the proposal to develop 1500 homes in North East Thatcham between the communities is accepted by WBC as having very few negative impacts. WBC's logic behind protecting gap has not been carried across to the North East Thatcham development.

In like vein, WBC in 2015/16 opposed the Siege Cross development saying it would erode the landscape between U amongst several other opposing comments. However, when the Siege Cross 500 home proposal has been incorporated into the North East Thatcham development impacting the setting of the AONB, WBC provide no evidence to contradict their evidence and are silent about harm to the AONB and the impact of the development on the landscape character and historic environment.

Health

The Local Plan is unlawful in that there is no evidence a Health Impact Assessment was carried out nor any consultation with developers or WBC with the Integrated Care Board. This is a mandatory requirement.

Education

Whilst details on early years and primary provision in support of SP17 are thin, those on secondary education lack substance. WBC determined that a 2500 home development was insufficient to fill a 6-8 FE. With the reduction to 1500 houses, no account has been taken of Government guidance that secondary schools with less than 6 FE are not sustainable or do not exist. The LP will now only provide the land for the secondary school. Where will the funding for a secondary school now come from? Education provision in support of SP17 in the LP is unsound.

Environment

The impact of SP17 on the environment will be devastating. It will have an adverse effect on legally protected wildlife and greenfield site when possible brownfield sites have been ignored. SP17 will also do damage to Bucklebury Common and the experience of visitors upsetting the balance between human presence and environmental needs.

The LP does not contain a preliminary ecological assessment although this is a statutory requirement.

Sustainability Appraisal

The LP says a Sustainability Charter is needed to demonstrate how the legally required biodiversity net gains will be achieved. There is no Regulation 19 of any supporting documentation to inform this Charter. The SA in the LP makes completely unsubstantiated claims about the sustainability of SP17. The positive or neutral claims about the impact of SP17 are not supported by any evidence and are misleading.

The SA does not meet relevant legal requirements in that it does not give full consideration to environmental effects and cumulative impacts. Furthermore the SA, as it is required to do, makes no attempt to consider and compare reasonable alternative sites for houses spread along Floral Way and the A4.

Transport

The NPPF says transport issues should be considered at the earliest stage of development proposals. It is therefore surprising that no consideration has been given to transport in the Regulation 19 document. The LP admits there will be displacement of traffic through the village resulting from SP17. Para 3.42 of the Phase 2 report says there will be a significant increase in traffic on the local road network in Upper Bucklebury, resulting from SP17.

Recent analysis of am and pm peak traffic has shown that the quickest route to Reading is via Harts Hill Rd and Colindale. The proposed development at NE Thatcham is built. That can only exacerbate the situation. The idea proposed in the LP of other modes of transport does not stand up because of the steep topography of the site and the distance of the SP17 from the station.

The bottom line is that SP17 would generate significant additional car journeys many of which would find a way through the village. The LP takes no account of the resultant highway safety issues.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?
 * Yes
 * No

Please give reasons for your answer

4. Proposed Changes

5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?
 * Yes
 * No

5. Independent Examination

6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination
 * Yes

* No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to register my objection to the West Berkshire Council's Local Plan Review – specifically the SP17 North the following reasons:</p> <ol style="list-style-type: none"> 1. WBC has failed to properly engagement with its residents across the County. A lack of provision for a physical ex the internet has meant that a sector of the community without access to the internet have not been properly engage contrary to policies on inclusivity. 2. WBC has stated that the reason for the SP17 strategic allocation is, in part, due to the limitation on building in the Reference their Local Plan email on 24.2: <i>“To meet West Berkshire's housing needs, a larger strategic development of 1,500 homes in north-east Thatcham is necessary housing and supporting infrastructure. Given West Berkshire's restrictions in available development lan such as the 'Area of Outstanding Natural Beauty'), this location has been identified as the best location for this ty intention of the policy is to provide 1,500 homes on this site.”</i> Given that the Secretary of State, on 6th December 2022, changed the housing allocation numbers from mandatory transition period for LPRs that are inflight it beggars belief that WBC are still pushing ahead with a plan that includes an to make due to AONB restrictions. WBC is therefore acting recklessly and against its principles of unbiased decision 3. Appendix 4 – Assessment of site HELAA. In the Stage 2b suitability tab of this spreadsheet for THA20 (SP17) it is s Grade 3 agricultural land (some grade 2) yet it has not been validated if this is grade 3a or 3b land. Given that Agricu “best and move versatile” and therefore should not be developed, how is it possible that the correct grade of this land Additionally, the report by David Lock Associates – Landscape Sensitivity & Capacity Study for Land NE of Thatcham <i>Soils are classified as ‘Slowly permeable seasonally wet slightly acid but base-rich loamy and clayey soils’ for the ma and ‘Loamy and clayey floodplain soils with naturally high groundwater’ for the southern section of the parcel of land NSRI/Cranfield Soil and Agrifood Institute website).</i> These soils contribute to a predominantly arable landscape The evidence states that SP17 is most likely on Best & Most Versatile (BMV) agricultural land and the David Lock rep valued. Government guidelines deter development on this type of valuable agricultural land. 4. Appendix 4 – Assessment of site HELAA. For THA20 the Stage 2b suitability tab of this spreadsheet classes the su Unknown”. How is it possible that the major allocation for the WBC LPR comprises sites where even by its own asses to be unsuitable. 5. The Sustainability Environmental Assessment states that SP17 will reduce accidents and improve safety. There is a plan however what we do know is that there will be an increase in traffic on country roads. Country roads tend to be na visibility and you're as likely to encounter a horse-rider, cyclist, walker or tractor as you are a car. Deliberately increa reckless act that is exactly the opposite of “reducing accidents and improving safety”. 6. The increase in traffic on the A4 – which is already unable to handle the amount of traffic at peak times – will incre direct conflict to WBC declaring a climate emergency. When WBC declared a climate emergency it stated that it wou reducing carbon emissions within its scope of control (ref: environment Strategy 2020-20300). WBC is responsible fo on the A4 idling due to congestion will only increase carbon emissions. 7. With the location of SP17, there is little or no provision for public transport within walking distance. It is naive to be this cluster will do anything other than dramatically increase the number of car journeys in the county further increas 8. SP17 includes provision for a healthcare facility. There is no detail on this, indeed WBC have failed to engage with that a development of this size fully caters for the needs of future residents. It's not just doctors, it's also dental practi This lack of detail is concerning as it shows that WBC has not done an appropriate level of due diligence and is not in needs of its residents are properly catered for. Without detailed information it is reasonable to be sceptical of any dev Practices that cover the SP17 area are already over-stretched. Of even more concern is that the Thatcham Strategic states that ‘A dialogue with the relevant healthcare and education agencies should be established early in the maste concerns that social infrastructure may not be provided.’ This is akin to closing the door after the horse has bolted an the horse would bolt. Without a properly thought-out and financed provision for all the healthcare needs that this dev leave its residents in a poor state with insufficient healthcare provision. 9. WBC has a duty to make arrangements for suitable school provision. The Thatcham NE Development plan propos secondary school which would be half funded by the developers. This development plan then goes onto state that th its own is insufficient to fill a 6-8 form entry school. Given that the allocation has reduced from 2500 to 1500 it is incor could now be sustained at this site as government guidelines are that secondary schools with less than 6 form entry the data used in the development plan was from a study from 2011. It's fair to say that a lot has happened in the last example of the WBC not doing its due diligence.

10. The LPR provides no information on provision for Nursery or Early Years education. Indeed with the data being unjustified as to whether WBC actually know what schools provision there should be. How can decisions be made on old and out of date information.

11. Finally with regards to schools, there is no provision for sports fields – which clearly require flat land. There is no – with an ongoing initiative to ensure that our children have access to green space and spend time outside it is a concern important enough to be included in the LPR. This again points to lack to completeness in the documentation and details.

12. In my regulation 18 response I submitted concerns about the loss of identity for Upper Bucklebury echoing WBC's refusal of the Siege Cross Proposal. WBC did not answer these concerns in their reg18 response to me. They also did not consider there to be no loss of identity if SP17 was allowed to proceed yet for a much smaller development (which would be a loss of identity. This gives grave concern as to the reason and underpinning logic and data being applied with WBC seemingly able to change their minds at will. My regulation 18 submitted concerns were as follows:

1. Loss of identity of Upper Bucklebury.
As a resident of Upper Bucklebury this concerns me greatly. The proposed development would end up incredibly close to the village and reduce if not remove the rural aspect of this village. The Bucklebury Vision and Plan detail that a strong greenbelt should surround Bucklebury and Thatcham. These documents were approved by WBC. Additionally, the Siege Cross proposal was refused on these concerns. The reason WBC gave for refusal included: (taken from the WBC Decision notice to refuse outline planning application) 3 (c) The proposed development would result in harm to the character and identity of Thatcham and erode the open landscape of Upper Bucklebury.

3 (d) The development would have an adverse impact on the distinctive local landscape character and appearance of the village which contributes to the setting of the AONB the boundary of which runs some 575 metres to the north of the site.

It is extremely concerning that WBC now considers this loss of identity acceptable. I.e.: recommendation from Site Allocations 2016 on a scale of development that could take place on THA20, it is considered that there should be no further allocations in the area, particularly as development of both north east and north Thatcham would result in the loss of the separate identities of the villages which would harm the setting of the AONB settlement pattern

In haste to find a single convenient solution it seems that it is acceptable that villages should lose their separate identities. Why does this stop? Why not merge all villages and towns together and be done with it? Such a narrow-minded attitude is unacceptable.

13. The Sustainability Appraisal / Strategic Environmental Assessment report makes positive statements in its justification of the site or proof. In fact whilst it makes justifications because of purported new educational and community infrastructure, WBC has not been delivered.

Page 1085 of the *Consultation Statement for the Proposed Submission LPR Dec 2022 v2* document states:
...this option may not deliver all of the education provision originally envisaged on the site, or the additional improvements envisaged within Thatcham.

How can the SA/SEA provide a positive assessment based on infrastructure that will never materialise?

14. As this site allocation is in the setting of the AONB it will have a great negative impact on it. The LPR states that the site is a network that will facilitate connection to the AONB. With a proposed development size of 1500 houses this will mean that the site will be encouraged onto the AONB – onto Bucklebury Common. Bucklebury Common is an important Local Wildlife Site in Southern England. It already suffers from overuse and has a fragile ecosystem. Further pressure on the Common will harm the ecosystem here. There is no evidence citing any mitigation for this despite the Bucklebury Common being in AONB and the requirements around its safeguarding.

In summary, there are a number of areas where it is shown that the WBC LPR is based off old, inaccurate or incomplete information. There are a number of areas where the LPR is contradicted – either in its supporting information or in contrast to previous WBC statements. I have been given the opportunity to pause this process and review the LPR (statement made by the Secretary of State on 12th Dec 2022) even knowing such issues as stated above exist. All this evidence shows that the SP17 allocation is unsound and must be removed.

2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters	

<p>that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>Whilst I recognise the need for increased housing and the Government's requirements on local authorities to meet our development proposals on the following grounds.</p> <p>Challenge the Need</p> <p>The reduction in available land to develop has been reduced recently by the 30% increase in the areas of the DEPZ's and I would urge WBC to challenge Central Government on the housing allocation.</p> <p>Impact on the AONB</p> <p>The proposal will close the gap between Thattham and the AONB. This is contrary to the statements within WBC's own Downs AONB Landscape Character Assessment (2002)', Policy SP8.</p> <p>Should this unacceptable proposal go ahead, against better judgement, then it should be made a Pre-commencement to create the 'country park' buffer zone (ie set boundaries, tree planting, hedgerows etc.) be established and protected before commencing. No consideration should be given to a Section 73 application to vary the Conditions or overturning the development should be limited to being below 95M above OD which is again in accordance with the above-mentioned WBC shows development up to 125 metres above OD, which would have a serious impact on the visual amenity in close proximity. Inappropriate over-development should be allowed to go ahead, a large proportion of the CIL monies should be spent on a buffer zone, however a 'Country park' – this has a specific accepted definition which is not met in this Plan. The three proposed settlement boundary have no meaningful environmental value or commitment to exclude subsequent development.</p> <p>The pie chart which shows the amount of open space is misleading in that it indicates 50% open space but looking at the case and must be also relying on the private garden areas and probably school playing fields as well. This is misleading and is not going to be available for public use.</p> <p>Traffic</p> <p>The traffic study included within the document is woefully inadequate and clearly based on inaccurate data and is a gross overestimate. Up to 5000 more cars (2 car spaces per household as required by WBC planning policy). This will lead to excessive parking and ratruns through villages. There will be further congestion and waiting times at Thattham level crossing and even worse on the wrong side of the level crossing.</p> <p>The junction with the A340, Theale to Tidmarsh Road, near Englefield Estate is already highly congested and dangerous, worse by the increased number of cars.</p> <p>The proposed mini roundabout to serve the development on Harts Hill Road will become seriously congested at peak times. The Mill Public House is fitted with the proposed traffic lights. This will cause tailbacks further up Harts Hill on the south side, inevitably lead to rear-end shunts.</p> <p>Increased traffic through Upper Bucklebury and other villages</p> <p>Non-Sustainable Location (Traffic)</p> <p>The distance of the proposed development from Thattham Station and the central amenities in Thattham will necessitate a need for parking. Parking in central Thattham is already inadequate (as recognised by Thattham Town Council).</p> <p>Pressure on Existing Facilities</p> <p>Number of houses now "at least 1,500" – From an initial site assessment of 2,500 of which 1,250 were to be built in 2036, the fact increased to 1,500 houses because the Plan extends to 2039 rather than 2036 (as originally proposed).</p> <p>The development will place excessive pressure on existing doctor and dentist surgeries, primary and secondary schools and capacity as the new facilities proposed will not be constructed in advance of the housing.</p> <p>Ecology</p> <p>The Pang Valley is a unique, precious and special environment and one of only 200 chalk-fed rivers in the world. There is a huge loss of green field and open space which will lead to an increasing urbanisation of the area. This will impact on the AONB in terms of increased traffic and light pollution, pedestrian footfall, littering, illegal use of off road vehicles on the River Pang, all with the inevitable detrimental effect on local wildlife and their habitats and the special character of the area. Consequential damage to the Common – increased footfall; increasing damage to an ecosystem of national importance. Greenfield development abutting an AONB with no up-to-date evidence nor strategy for positive impact and overall benefit. Lack of strategic gap between Thattham and Bucklebury – Thattham and Upper Bucklebury will effectively merge and lose their identity.</p> <p>Surface Water Run-off and Flooding</p> <p>There is no question that the proposed development will have a massive impact on the flood risk to Thattham.</p> <p>Utilities Infra-Structure</p> <p>The existing water, gas and electrical supplies and foul and surface water drainage systems are already stretched to capacity and would create unacceptable pressure leading to system failures.</p>

	I would strongly urge WBC to reconsider this potential development in light of these important considerations and the opinion against these proposals.

<p>Please give reasons for your answer</p>	<p>I am writing to WBC to object to <i>WBC LPR Regulation 19</i> which proposes a development of 1500-2500 houses NE of Thatcham.</p> <ul style="list-style-type: none"> WBC itself objected to the much smaller Siege Cross development in 2015/16 raising concerns about visual impact and proximity to the AONB. Why then given Siege Cross is a subset of this now much larger proposal are there no objections? Lack of detailed and concrete plans for infrastructure for such a large development: <ul style="list-style-type: none"> Provision for medical facilities lack detail, and no Health Impact Analysis has been undertaken. Nothing in the plans for Nursery education provision, Primary provision is vague, and Secondary school location identified. Funding is unclear and out of date data is used to assess pupil numbers. The obvious environment impact of so many houses in one area are skated over, with vague and unsubstantiated claims in the hope of deflecting from the very real impact this will have on the wildlife, green spaces, buffer between villages, and the increased traffic and footfall and hence impact on the AONB/Bucklebury Common. The road traffic analysis is optimistic and the case of the Cold Ash and Upper Bucklebury non-existent. Again, these will have major impact on traffic across Thatcham, particularly the A4 and will greatly increase traffic on the village route into Reading via Upper Bucklebury, Cold Ash, Chapel Row and Bradfield. The village routes experience congestion today, and a 1500-2500 housing development will make this worse. This will severely impact the quality of life (in Thatcham) and create safety concerns via increasing traffic volumes on unsuitable village/country roads. The size of the development has been spun by WBC as a reduction from 2500 to 1500 whereas it is in fact an increase from 1250 in the Reg 18 Consultation to 1500 in this Reg 19 Consultation. Reg 19 is now silent on the number of houses in the plan period whilst it is very clear the area referred to is the same geographical size as that in Reg 18 which stands to be deliberately misleading messaging from WBC from Reg 18 to Reg 19. The overall impression is that the WBC is, no matter what, committed to this large scale development NE of Thatcham in its case to fit a pre-determined conclusion. This is reinforced by the seeming lack of proper assessments, consultations in each of the thorough responses from Thatcham Town Council, Cold Ash Parish Council and Bucklebury Parish Council. There has to be concerns that much of WBC's case is based upon the Thatcham Strategic Growth Study that was commissioned to stand to profit from the allocation of this specific site. The study did not consider alternative sites, has not been adopted nor has it been adopted by WBC. Also WBC is stubbornly proceeding with the Reg 19 Consultation even though national policy is changing after the election of Michael Gove, and with an ongoing consultation on amendments to the NPPF – other local authorities have passed up these changes are clear. WBC has not, which does not make sense. WBC has also overdelivered on required houses in the past few years. So this and the NPPF consultation at national level requirement for such a large development has to be questioned. There are also numerous additional concerns about this development: <p>I have read the responses to Reg 19 from Thatcham Town Council, Bucklebury Parish Council, and Cold Ash Parish Council and highlight the flaws in WBC's proposal, particularly that WBC has not made the proper and required assessments.</p> <p>As a resident of Upper Bucklebury the impact on local infrastructure (esp schooling and medical provision), to the countryside and Bucklebury Common are of great concern. In addition, the increased traffic through the village would be terrible and would change the life in the village and in the other villages on the route in Reading.</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>In response to the West Berkshire Local Plan Review Proposed Submission (Regulation 19) Consultation, I want to strongest terms. I find the plan itself unsound and unsustainable on many grounds.</p> <p>1. The proposed location of such a large greenfield development is completely inappropriate to the needs of either the residents.</p> <ul style="list-style-type: none"> • The proposed development will forever remove this vital biodiverse environment from the enjoyment of both the residents. • There appears to be no mechanisms to protect the existing (particularly legally protected) wildlife and ancient woodlands (eg. Bucklebury Common) which also depend on that site as part of the local biodiversity. • The claim in SP17 that this proposal would have a positive impact on the environment is incredulous and brings those preparing the whole document. • Creating “County Parks”, which appear to already have been downgraded to “community parks”, is no credible way to protect a biodiverse environment and certainly no justification for eradicating an existing ancient and biodiverse environment. Community parks would not have the same long-term protection and could themselves be consumed by housing in future. This would be insufficient to prevent increased load on the existing green spaces, causing further load on an already overburdened surrounding area, undermining the current efforts to support and restore the existing ecosystems around Bucklebury Common. • When walking through and around Bucklebury Common, it is not uncommon to find people riding motorised vehicles and restricted byways (and other areas). These spoil the enjoyment of the area, but worst have a detrimental effect on the environment. These can also be heard at night, cause disturbance to those living around Bucklebury Common. Increasing traffic will cause this problem to grow. WBC appears unable to enforce the current regulations with the current population. It is not possible to increase the local population significantly without first demonstrating the ability to protect the existing environment. The proposals to ensure that this can be scaled. • The effect of climate-changing pressures can be seen when walking around the local woodland in terms of animals suffering due to water stresses. Increasing the local population and inevitable further pressure on this already struggling environment. This has not been considered within the proposal. <p>2. The roads in the surrounding area and particularly in and between the local villages are entirely inadequate for the amount of traffic to consider adding further traffic:</p> <ul style="list-style-type: none"> • Any increase in the volume of traffic would require a significant upgrade of the local roads and the proposed development would require a large volume of increased traffic. Such an upgrade is (rightly) not proposed, but if it were, it would be completely at odds with the existing environment as a stated goal. This appears to be a self-contradictory aspect to this plan. • Some of the local roads have been designated as “quiet roads”. These are currently overused by traffic. Adding more traffic will further. The plan contains no means to mitigate this problem. • Many of the roads through the local villages (many on the obvious “rat run” paths) do not contain pavements or adequate drainage. This will lead to serious accidents and “near misses” (particularly at dawn/dusk/night and during the winter). One of our neighbours children was forced into a ditch due to passing traffic and the traffic is already much worse. • There has already been a steady increase in the traffic through the villages over the last few years. It is no longer possible to have windows open (in hot summers) on our road in Upper Bucklebury as drivers start using the road outside of our 5:30am. This will only get significantly worse with such a large increase in population. As there are no alternative roads (or affected), this traffic will further increase and affect the quality of life of the residents on ours and similar roads.

	<ul style="list-style-type: none"> The increase in traffic will prevent recreational road users (cycling and walking) from an enjoyable and safe experience. People are being encouraged to use their cars for safety purposes. This is not in line with local policies to move people away from using cars where possible. <p>3. The provisions for healthcare have not been adequately addressed:</p> <ul style="list-style-type: none"> It can currently take us up to 3 weeks to get a routine appointment with our doctor. Several years ago this was not the case. The plan does not address adequately the impact of a large number of people further increasing the load on the local health services. The provision of one or more new health centres and/or extending existing ones does not address the underlying problem that the health problem has not been understood and acknowledged in the plan, thereby casting doubt on the competence in

Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>As a Bucklebury Parish Councillor I fully support the objection submitted on behalf of the council and concur with the reasons outlined in BPC's submission. However I feel the need to add my personal objections to the plan which are on Upper Bucklebury and have an enormous impact on my wellbeing and that of others including my elderly neighbours since the 1960s.</p> <p>The negative impact of the proposed housing would change Upper Bucklebury from being a small rural village to being a village. I chose to live in Thatcham when I bought my house in January 1988. Thatcham has transport links, shops and cheap housing. Upper Bucklebury is a rural village with dark skies and access from my property to a wood where I regularly see deer, badgers, interesting plants and a short walk to Bucklebury Common with its wonderful biodiversity. I take enormous pleasure on a warm evening sitting on the porch watching the stars which are very visible because of Bucklebury's dark skies policy, listening to the call of a nightjar, watching bats and owls. My grandchildren feel it is a treat to sleep in my house because they hear 'the Wise Old Owl'.</p> <p>Having so many new houses a very short distance from the bottom of Blacklands Copse will cause light pollution so the stars and night sky will be lost. That number of people living so close to Blacklands and Bucklebury Common will have a serious negative effect on the endangered species which will vanish. Now in my 70s, I will find this very hard to deal with so my wellbeing is at risk. Yes, I know I have built up a network of local friends and neighbours in the thirty five years I have lived here. I have invested in the area in knowing the area well to walk for my physical and mental fitness.</p>

	<p>The extra traffic coming up Harts Hill, through the village and along the Common has not been thought through. Harts Hill is already too busy and dangerous when driving up and coming across a cyclist just round a bend and a lorry or a bus on a frequent accidents already and the proposed number of houses will make this a death-trap. The village of Upper Bucklebury and elderly residents crossing to the shop or church and children walking to Bucklebury Primary School are already suffering from that the development would produce.</p> <p>Upper Bucklebury children have historically gone to Kennet School until recently when The Downs in Compton increased. Some parents who can afford the expensive bus fare or who are lucky enough to have time to transport their children to be educated at The Downs. Were the new development to take place, in the early days before a new school would be opened, houses would take up the Kennet places as geographically they would live closer than Upper Bucklebury pupils. Were we to become the allocated school for Upper Bucklebury rather than the school of choice, WBC would have an empty school. This is something I know WBC would not want to do because I was one of the group who set up Bucklebury Community School. Bucklebury pupils to and from Kennet when the bus passes were removed.</p> <p>Building so close to Upper Bucklebury would produce so much more footfall in the village and on the footpaths and in the shop to the area around Colthrop Manor is the Spar shop in Upper Bucklebury. That would encourage much increased use of Long Grove Copse which would be seriously detrimental to the ecosystems in the area. The path is a muddy footpath with increased usage. The track on the housed part of Longrove is maintained by the residents and increased use would be and massively increased costs.</p> <p>These are some of the reasons I oppose the plan. I have no problem with a smaller number of houses being built in the area but the current strategic gap is very important to me. Without it the effect on the biodiversity and ecosystems, and the way of life, would have a catastrophic effect on my mental health and wellbeing and that of many other longstanding residents.</p>

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	I have been a resident of Upper Bucklebury my entire life - since 2001 - I strongly object to the proposed Local Plan. reasons set out below and that it will have an irreversible negative impact on the quality of life in the area. Transport

	<p>Access to/from the development will be via the A4 which is already gridlocked at peak times with traffic backing up along to Reading or the M4/A34 will inevitably seek an alternative route up Harts Hill through Upper Bucklebury. Harts Hill has caused numerous accidents over the years and is especially dangerous in winter, even when gritted. The development through Upper Bucklebury and pose an increased risk to villagers walking their children to school in the morning or on no pavement along Burden's Heath, which cars will use to head towards Cold Ash and Junction 13 of the M4.</p> <p>Healthcare</p> <p>The healthcare proposals contain only wishful thinking with no detail and an absence of consultation with existing medical practices. There have been no Health Impact Assessments. NHS England has commissioned few new GP practices, so the burden on existing practices is already overstretched. Bucklebury is fortunate to have a well-managed medical practice but it was stretched during the provision of repeat prescriptions and other services. An excess of new potential new patients will have a severe impact on the ability to service its current list.</p> <p>Environment</p> <p>The Plan will have a severe negative impact on the footpaths and woodland in the proximity of the development. Within the development and is traversed by means of a narrow footpath, with few visitors encountered on each walk. The development will increase footfall, widen the path and change the character of the area. Bucklebury Common similarly has many narrow paths, the flora and fauna. The development will result in a significant increase in pollution – light, noise and emissions – all of which will have a negative impact on the environment.</p> <p>Strategic gap</p> <p>Upper Bucklebury retains its separate identity from Thatcham solely because of the green strategic gap north of the village and distinct boundary between the two urban areas. If the North East Thatcham development proceeds Upper Bucklebury will merge with Thatcham and will itself become North East Thatcham. The rural nature of Upper Bucklebury will be destroyed.</p> <p>Education</p> <p>The Thatcham NE Development Plan, funded by the developers, was based on West Berkshire District Council data and is therefore out of date. The same plan also notes that the proposed development is not sufficient on its own to justify a new school. Government guidelines state that secondary schools with less than 6FE are not sustainable. The developer funding the construction, and has no impact on the substantial running costs of the school. Much of the site is sloping and there is no sports field, unless it is close to the A4.</p>

<p>development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to object to the proposed Thatcham NE Development on the grounds that it is unsound and will have a p myself and the surrounding environment.</p> <p>Whilst I am fully aware of the the pressure on WBC in terms of the need to increase housing stock, the proposed dev of fundamental ways:</p> <p>1. Transport impact</p> <p>The development would create an intolerable increase in the level of traffic using roads that are already fully congested A4, particularly to the eastern side of Thatcham would inevitably become gridlocked further. This will impact profoundly but also create increased pressure on alternative routes. The road through Upper Bucklebury already has in place m increased traffic volumes. The Development would force even more traffic onto this road which is self evidently not de impact all residents in the village. The impact of the additional traffic on Harts Hill Road would be catastrophic particu development on that road. The inevitable bottlenecks created would mean access to and from Thatcham and Newbu would be seriously impacted.</p> <p>Furthermore, the development would place intolerable strain on the roads and parking nearby Thatcham Railway Sta users of that station from the development would drive and park.</p> <p>Building the proposed development would cripple an already overstrained local transport infrastructure.</p> <p>2. Environmental impact</p> <p>It is undeniable that the development will clearly destroy a large green field site which in itself will have a tremendously n area. Whilst it is acknowledged that the development will not directly be built in areas of specific protection etc. the very to these areas (eg.natural woodland) would inevitably mean that these areas would be extremely adversely affected numbers of people, particularly children, would gravitate to these protected areas and sadly, there are innumerable p destroy their beauty and underlying habitats. This should not, indeed cannot, be allowed to happen.</p> <p>Building a development of the scale proposed and at the site earmarked is criminal in ecological terms.</p> <p>3. Local infrastructure</p> <p>Key facilities in Thatcham and the surrounding areas are already at breaking point. In particular, existing schools, do will simply not be able to cope with the large population increase. Trying to squeeze the proverbial quart into a pint p affect the whole population. In terms of Thatcham itself, the village simply cannot handle the additional number and a community and in particular outlying areas such as Upper Bucklebury.</p> <p>Quite simply, a development of this scale is unsustainable in its current location. Alternative solutions should be soug</p>

2. Do you consider the Local Plan Review is sound? -	

<p>Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>Objection as follows</p> <ol style="list-style-type: none"> 1 I am objecting to the plan as so much of it is seriously unsound and it would have a massively detrimental effect as well as extra stress on Buckkebury common environment, flora and fauna. 2 The statement by Michael Gove (6th December 2022) indicates that the housing numbers are now advisory and should no longer override sensible local decision-making. 3 The plan shows no evidence of any surveys to provide baseline conditions or indeed to provide definitive proposals. The environment would be improved and what they would do to "mitigate" any destruction of environmental features. The plan is unsound. 4 Building a major Greenfield development in the north Wessex downs AONB will forever affect the enjoyment of the area for local communities. There will be a detrimental impact to legally protected wildlife known to be present on the site, not to mention the use of existing areas such as Bucklebury common. This again shows that the plan is unsound in its analysis, reasoning and conclusions. 5 Before any development of this size is undertaken, there should be sufficient capacity in the local foul water processing facilities. Any development of this size will produce a significant amount of foul water. I have seen no mention of analysis or funding for the expansion of the sewage processing facilities. As soon as any building starts, surely that is another reason why the plan is unsound. 6 The plan is unsound where traffic considerations are concerned. There is no plan or funding for a bridge over the river for example. 7 The development is so far away from Thatcham station and Thatcham town centre that many extra cars will be required to access an unsound part of the plan. 8 As a local resident for over 40 years, I feel that the building of 1500 houses so close to Upper Bucklebury will be detrimental and forever for me, my household and anyone living in this very special area. 9 The plan for secondary school provision is unsound with no timing or funding, no analysis of possible pupil numbers and no location of any school. 10 This is still essentially a plan for 2500 houses. The developers have simply reduced the headline numbers to make the development the same. It would then be a comparatively easy matter to build the other 1000 houses in the future. This is no concession at all. <p>I hope I have shown in the above examples that this unsound plan should be rejected.</p>

2. Do you consider the Local Plan Review is sound? -	

<p>Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>I am objecting to the Thatcham NE Development.</p> <p>The proposal is fundamentally unsound in many areas, I would like to object on t</p> <p>Impact on legally protected wildlife</p> <p>We know these to exist in the area directly next to the development as well as in the surrounding area. We have local knowledge and experience and the studies that have been undertaken:</p> <ul style="list-style-type: none"> Great crested newt Badgers Nightjars Slow worms Variety of Bats <p>The proposed development would put them under significant threat. There are no suitable mitigation measures. There now does not even appear to be a country park. There is no direct benefit to the area which would be enhanced. This shows WBC lack of commitment to protect the natural environment.</p> <p>WBC states that sustainability charter is required to establish how policy requirements are met. The legally required biodiversity net gain and environmental sustainability are not covered in any of the documents either these do not exist or they have not been made publicly available.</p> <p>There has been no evidence of any serious attempt by WBC to investigate, analyse or mitigate the environmental consequences of the development, and any policies that are referenced are not relevant.</p> <p>Additional cars and people will be entering AONB which will have a detrimental impact on what WBC are doing to protect, conserve and enhance the natural beauty, in fact the road will be directed into the AONB instead of away from it.</p> <p>Increased Traffic</p> <p>As WBC predict that there will be some displacement of A4 traffic onto wider rural roads in the area of Bucklebury there is no evidence that this has been fully considered. We along Bucklebury Road down the road with no pavement and down Broad Lane with 2 primary school age children living on it is dangerous as cars do not adhere to the 30mph limit. Broad Lane is also very busy with no pavements (some very narrow due to over grown hedges) the cars pass as such it is frightening.</p> <p>The studies conducted by WBC so far do not agree with an independent study by an independent consultant who found that: the trip rates used by WBC are unreliable and not robust, the trip distances are too long, the mitigation measures are improbable at best, the location of the site means cars will be able to dominate, the highway network in the vicinity of Thatcham Northeast is already congested and there has been no assessment made of the routes most likely to be affected by an increase in traffic.</p> <p>We strongly fear for our safety and feel it's only a matter of time before there is a serious accident. Increased traffic with no mitigation is putting lives at risk and completely at odds with the council's commitment to Accidents and Improve safety.</p> <p>Education</p> <p>There is not a clearly defined planned schools provision. This breaches the council's commitment to education facilities thus making the development untenable. Our children currently attend a Primary School with a view to carrying on their education at Kennet. There is inconsistent and contradictory information on the provision of secondary schools in and around the area. It is unlikely that any secondary school provision will be provided.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Local Plan Review Consultation</p>

	<p>With the announcement by Michael Gove on the 6th of December 2022 that housing numbers should be an advisory may Local Authorities are choosing to pause their planning an await the outcome of the consultation and potentially WBC should do the same.</p> <p>HEELA has shown more more options for development, yet this has not been revisited since the start of the process</p> <p>In 2015 the plan for 500 houses was rejected at ministerial level. This proposal is triple (or more) of the proposal. It is surveys that are full of holes, and potential legally questionable. Some studies, such as the environment and biodiver carried our or have not been made available to the pubic. Thames water have not even been consulted.</p> <p>The whole proposal is a disgrace, if allowed to go ahead will cause huge negative impact on the area and local supp</p>

<p>1. Do you consider the Local Plan Review is legally compliant?</p> <p>* Yes</p> <p>* No</p>	
Please give reasons for your answer	

<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to object to the Thatcham North East Development, it is very unsound on so many factors. I will deal with the following factors:</p> <p>Healthcare:</p> <p>All 3 practices locally are already overstretched. I believe that my surgery (Chapel Row) would struggle to take any more patients. The fact that the local surgeries are closing is also a problem. It takes about 2 weeks to get an appointment – what will happen if this huge development opens? The Plan proposes a 450sqm primary health care facility – there is no detail about this. On this point for a development of this size a Health Impact Assessment (HIA) should accompany it to demonstrate how the conclusion of the HIA have been considered in the development. It appears that neither West Berkshire Council or the developers as public/private stakeholders have arranged or published a HIA for the North East Thatcham Development.</p> <p>New housing will put an immense strain (young children/ maternity ect...) on an already stretched facilities.</p> <p>Dentists:</p> <p>My points above also reflect the position relating to dentists.</p> <p>Schools:</p> <p>The plan states that the site will provide Nursery & early year provision but this is not clearly defined. How can a site of this size be provided?</p> <p>The plan for a secondary school is unsound as there is no evidence of numbers, the location is not clear, or the number of places is unclear. A 2 form (4 form entry is required for sustainability) the current infrastructure can't support the current plan.</p> <p>Sports field provision – school fields require flat ground – the only area will be near to the A4 dual carriageway – a very noisy area with a lot of fumes. If the school is not viable, the playing fields will not materialise.</p> <p>Traffic:</p> <p>We are led to understand that traffic from the development would link to floral way and the A4. The Transport Assessment mentions an exit north of the site on to Harks Hill – traffic to and from the site only going towards Bucklebury.</p> <p>A few things to mention here – Harts Hill is a very narrow, bendy road, with blind corners, it is already a very dangerous road with a lot of serious accidents. There is no pavement facility or few room to provide this. It is extremely dangerous – especially in winter with water running down it. Traffic coming from the exit towards Upper Bucklebury is taking more traffic onto a single lane road. The 'rat runs' from the A4. It is already busy and an accident waiting to happen, more traffic I feel will have devastating consequences.</p>

	<p>There is also mention of a car park on harts Hill – there is no sight of this on Plan. This will add to the dangers and anti-social behaviour. The traffic is already very busy. I travel from Upper Bucklebury into Newbury for work. It is very worrying at the traffic calming chicane & this will be made so much worse with the new development – and more scope for walk to school – again I am very worried it is already an accident waiting to happen – more traffic will severely increase and will be increasing pollution.</p> <p>Water supply / sewage disposal:</p> <p>We already experience water issues, both with our homes and water on the roads. I just feel that the infrastructure is not up to the development. The amount of standing water outside Peaches stores by the crossing/ chicane has been frightening.</p> <p>Environment:</p> <p>It is very worrying that a number of serious threats to the environment have been identified. It will cause a detriment to the wildlife. It will forever damage the countryside, ancient woodland and heaths. The proposal for 2 'country parks' is very worrying.</p> <p>Conclusion:</p> <p>In conclusion I think that the plan is wholly unsound. WBC have broken their own processes for not inviting others to comment. The developer has written the plan.</p> <p>Communities have not been consulted and clear plans have not been produced. It all looks to be inadequate.</p> <p>The pressure that it will put on local doctors, schools, roads, the environment are unacceptable.</p> <p>Again I object to this development and feel that it is wholly unsound, and I hope that common sense will prevail.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>

Please give reasons for your answer	I wish to object to the Regulation 19 Consultation relating to the traffic implications for Chapel Row and most particularly The Avenue is a rural road with common land on each side. I note that it is expected that there will be a significant increase in traffic as a result of the development and I don't believe the impact on Chapel Row and The Avenue have been taken into account.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	On the basis of lack of 'Practical' sustainability I dont believe the North East Thatcham development is legal.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need	

<p>and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	<p>The local area already struggles with maintaining adequate Health & dental care for the residents. With what's being capacity accommodate the additional residents and are there the doctors & nurses available to support these facilities medical staff!</p> <p>Plus there's specific educational needs, where all current schools are full to capacity, with class sizes already bulging. accommodate all the additional children and are the teachers available to be employed within these facilities?</p> <p>Then there is the road infrastructure, which chokes already with the volume of traffic and noise this creates, along w Floral Way is already a race-track, with this development will exacerbate this issue further.</p> <p>Removal of wooded areas will also reduce the ability to migrate the carbon dioxide to oxygen process, therefore air</p> <p>To summarise - this development is a non-starter for Thatcham - it will NOT benefit the town and any expansion will the area.</p> <p>I understand additional housing is required within the West Berks area. However and specifically, the Thatcham deve will place an excessive strain on local resources that makes the proposal unsustainable.</p> <p>It this proposal can be condensed to a reduced scale then this may be more palatable, allowing for organic growth w copious other sites that may accommodate such grand scale developments.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>

2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into	

<p>account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>I write to object to the plan as I found the following areas unsound and not evidence-based</p> <p>3.1 Transport</p> <p>3.1.1 Increased Traffic</p> <p>WBC planners advised that traffic from the development would link to Floray Way, which they forgot to mention and on January when the Transport Assessment was published that there is a plan for an exit at the north of the site onto Harts Hill as the traffic will obviously go in the direction of Upper Bucklebury to bypass the A4 congested traffic. I live in the village of Upper Bucklebury and the increase in traffic (which doesn't have to be a lot of cars) will make Broad Lane a rat race and dangerous to school and all residents.</p> <p>The transport Assessment says in paragraph 3.26 'The access arrangements for the northern end of the NET site are proposed along both Floral Way and Harts Hill road. Results from the modeling suggest that these will not cause problems' The do not seem to be a problem for this so how can this be legal?</p> <p>3.3 Environment</p> <p>Siting a major greenfield development in a landscape setting of the North Wessex Downs AONB will have a major impact on the area and more importantly have a detrimental impact on local wildlife.</p> <p>WBC states in the LPR that Sustainability Charter is required to show how the policy requirements will be achieved. In their documents, they have not been publicly available for the Regulation 19 Consultation, this must be illegal! The Sustainability Charter and the SP17 policy is likely to have an overall positive impact on sustainability but this seems to be ignoring the environmental impact on the social and economic benefits.</p> <p>I am a resident of <personal details> Upper Bucklebury, and have enjoyed this tranquil area I am deeply upset that that Thatcham into Upper Bucklebury and we will lose our village identity.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>

<p>Please give reasons for your answer</p>	<p>Please accept this email as a clear objection to the plans due to their unsound nature.</p> <p>I have lived in Upper Bucklebury for <redacted> years and find the blatant disregard for community and the natural environment results in my support of WBC to be no longer evident.</p> <p>I moved to the area with a newborn child (and have since welcomed <redacted> new members of the family in <redacted> Thatcham and specifically Upper Bucklebury for the natural environment, the protection of the AONB area, and the views afforded to me. The blatant disregard of our local biodiversity, even with the proposed inclusion of a community park causing the loss and natural habitats of so many local wildlife, and cause irreparable damage to our prized local environment.</p> <p>As a parent of a school aged child (and <redacted> due to attend local schools in the future) the lack of consideration for me, there is no wider remit to support the already over subscribed Kennet school (which is our only option for high school) a coherent end-to-end plan within the LPR at all. Within this plan WBC are breaching your own obligations to provide education from EYFS to secondary education.</p> <p>I am also concerned about the lack of consideration for traffic and infrastructure across the whole of NE Thatcham and surrounding communities that access services within the area. The increased traffic through our small villages as people seek quality of life in already congested A4, and this can only be a danger to our local village, and the general public, especially our young children walking to village to school, endangering them to the risks of high traffic volumes and pollution.</p> <p>I object wholeheartedly to this planned development and stand with my community as we fight to retain our green spaces, infrastructure and support for our community as a whole.</p>

<p>Please give reasons for your answer</p>	<p>OBJECTING to plan SP17 as it is unsound due to the following reasons and negative impacts:</p> <ul style="list-style-type: none"> - As someone that has a keen interest in the invertebrates as well as amphibian wildlife in the area I have concerns over the impact on endangered animals. Not only the wild flowers and trees that will be destroyed hence ruining food webs for hundreds of species and relationships all the way from an Ant to a barn owl. There are species such as the great crested newt that call these areas their home that with the increase in development will interrupt these habitats and brings more pollution to the area that could harm them. - I am a keen explorer of the area and the fact that there will be increased traffic and hence noise, light and air pollution in an area of natural beauty. What are the measures to make this development eco friendly and how will you be sensitive to the needs of the area? more influx to the area will cause such disruption. - the schools, Drs, dentists and other local infrastructure is not made to support such a large development. Without further investment how do you expect them to cope. - you are building on a green site, why cant you build on areas of previous building or updating existing housing why are you building on areas that are suffering already. - The road network is already at capacity therefore then adding more cars to the mix will not help as well as the large increase in traffic to cyclists as well as other walkers in the area <p>Please carefully consider these points and their negative impact on us and the local environment.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>

<p>Please give reasons for your answer</p>	<p>As a resident of Upper Bucklebury I am writing to lodge my objection to Thatcham North East Development based on the negative impacts this will cause as the proposals are illogical. Firstly as a resident on <personal details>, we have already seen increased traffic in the 13 years we have lived next to the traffic calming which results in poor behaviours from drivers who do not obey the priority and constantly hoot at each other at all hours of the day as they speed to slip through ahead oncoming cars. With the addition of a minimum of 1500 houses and the congestion on the A4 Upper Bucklebury will become a rat run to the motorway and the traffic calming will become a dangerous chicane. Additionally, the volume of traffic will mean it becomes dangerous to turn in and out of our driveway.</p> <p>The proposed traffic management is insufficiently and irresponsibly considered and will adversely affect road safety by channelling additional volumes through Harts Hill to Upper Bucklebury. The proposed feed on to Harts Hill will fundamentally change our rural village into a main carriageway similar to the A4. I had hoped to understand the traffic modelling for this junction but it does not appear to have been completed by West Berkshire. Additionally as a family of cyclists we already have to take great care on Harts Hill this additional traffic will create a much more dangerous environment for us, pedestrians in the village and local riders.</p> <p>Rather than increase opportunities for walking cycling these the proposals will have an adverse affect on current levels based on increased traffic and congestion. The council has failed to demonstrate how these increased opportunities will be created across all residents in the local area. Second,ly I would like to raise objection in relation to the impact this development will have on local environment. Wildlife wandering on the common frequently cross the already busy road- additional traffic will create further loss of wildlife. Increase use of the common based on inadequate provision of green space on the proposed sites will have a detrimental impact on ground nesting birds on the common will be impacted by increased traffic speeding through the common.</p> <p>The local area infrastructure is already at risk from flooding as demonstrated in recent months at the bottom of Harts Hill, water pressure is inadequate despite work completed for a new pumping station resulting in 2 burst water mains this winter alone on Broad Lane. The additional demands for water and sewerage as well as rain water run off onto the A4 will cause significant detriment to the local area.</p> <p>The Council's support of this development is expedient and ill-considered from lack of sufficient consideration of health care provision in line with current guidance from Public Health England. The current level of resources are already over stretched in terms of GP provision and Dentistry and the council and developers have demonstrated insufficient engagement with the integrated health bodies to reassure a genuine concern for the wellbeing of the additional new residents. The proposals in relation to education and school places are also inconsistent and vague and the developers suggested solutions to education requirements are platitudes to ensure approval. Please listen to local residents and reject this development which is over scales, poorly planned and detrimental to those in the surrounding areas.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>

LATE RESPONSE

I would like to formally register my OBJECTION to WBC LPR Regulation 19, the proposed development of 150 Thattham, as I find it completely unsound for the following reasons:

- 1 It will dramatically reduce the greenbelt between Thattham and Upper Bucklebury.
- 2 The rural nature of this area would be completely lost with Upper Bucklebury becoming part of Thattham.
- 3 It would be a massive over development of our beautiful countryside in an area which consists of rolling hills and farmland. If large scale are approved there will not be any open rural areas left for future generations to enjoy.
- 4 The proposed land is not particularly suitable for development as it is very hilly land and has had issues as a flood plain.
- 5 The view that Thattham is best placed to take a development of this size in this location is misplaced, un-proven and unrealistic.
- 6 According to the Transport Assessment paragraph 3.26, *'The access arrangements for the Northern end of the NE Thattham junctions on both Floral Way and Harts Hill Road. Results from the modelling suggest that these will not cause problems for this so I am unsure as to why this has been stated. Please can you share these with me? How can increased traffic on an already dangerous and busy road (without the development), be seen as not causing a problem?'*
- 7 I am also aware that there are drawings showing a new car park on Harts Hill. This again will increase traffic to an area which is highly likely to promote anti-social behaviour, illegal activities, fly tipping and littering which we see regularly on Bucklebury Hill.
- 8 In terms of *'reducing accidents and improving safety'* your assessment has concluded that *'the policy is likely to have a significant positive impact on walking, cycling and public transport as safe travel will be critical to the design of the site'*. Also regarding *'increasing opportunities for walking, cycling and public transport as safe travel will be critical to the design of the site'* your assessment concluded *'the policy is likely to have a significant positive impact on walking, cycling and public transport as safe travel will be critical to the design of the site'*. I wholeheartedly disagree with both of these assessments and I have concerns with the way the assessment was designed with these in mind'. Please can you provide me with the evidence and conclusions for both these assessments? Also, it's not just about the impact on the surrounding areas, villages and community which exist today and have done for years. What assessment has been done to ensure these with the increased traffic?
- 9 Further to the above, this development will have a significant impact on traffic levels and the associated pollution that will be increasing:
 - Traffic and speeding through Upper Bucklebury, which is already a significant and serious concern, especially along this road to the Primary School.
 - Traffic from Thattham through Upper Bucklebury to Chapel Row on roads which are not designed for large traffic volumes.
 - Increased traffic through ALL the surrounding villages in general, especially as there is a plan for an exit at the top of the village. This will significantly increase traffic towards Upper Bucklebury, Chapel Row, Bradfield, Cold Ash and Hermitage. *'displacement of A4 traffic onto wider rural routes such as Upper Bucklebury'*. This is a total understatement and a significant danger for road safety, especially as the roads are already inadequate, have no pavements and are extremely dangerous. The potential for serious/fatal accidents is already high and this proposed housing development and exit will mean a significant increase in traffic on these roads.
 - Traffic on the route into Thattham and Newbury. These roads approaching the station are already heavily congested and a minor event of any minor traffic disruption will cause significant delays.
- 10 This level additional of housing will inevitably have an adverse impact on local facilities, schooling, medical and welfare services which are overstretched.
- 11 Regarding healthcare, there is a significant lack of detail around strategic healthcare planning and the NE Thattham Development Consortium are aware, neither WBC or the developers have arranged or published a prospective Health Impact Assessment for this development. No engagement between the North-East Thattham Development Consortium and local general practises. Why hasn't a new GP site being available will result in the three existing practises in the area being overstretched even further? The fact that no evidence for the provision of a viable primary care medical facility. To add to this Thattham Dental Practice is providing dental care for the local population, this will also get worse with the proposed development.
- 12 Regarding the environment, there will be damage to the Bucklebury Plateau Biodiversity Opportunity Area and the surrounding landscape which is the common. This development will also destroy the enjoyment of the local countryside by local communities in terms of the Downs AONB and will cause negative impact to legally protected wildlife. There is no evidence to support claims that the development will have a positive impact on the environment but instead it will have a significant and serious negative impact on the overall sustainability of the area. Environmental sustainability is defined as: *'the ability to maintain an ecological balance and conserve natural resources to support the wellbeing of current and future generations'*. I am honest to say that WBC is not protecting the sustainability of our precious environment. In addition, as far as I am aware there is no evidence to analyse and address the negative environmental consequences. Why not?
- 13 Regarding education, within the Local Plan Review the provision for Nursery, Early Years, Infant and Secondary education is not clearly defined. The provision for Primary and Secondary school education is unclear and contradictory. WBC has a duty to make arrangements for suitable school provision. How this obligation will be met across all school years has not been defined in the LPR. The plan for the schools needs to take priority and should be confirmed before any housing development is approved. It is highly likely that houses will be built and no additional school provision will be provided, leading to oversubscribed schools and a significant impact for our children. The LPR talks of provision of school fields however no evidence for funding or a suitable location (a sports field on a steep and air polluted A4 does not suffice as suitable) has been identified by the WBC or NE Thattham Development Consortium.
- 14 The development will significantly increase the noise and light pollution to the Bucklebury residents. There are no measures in place to mitigate this.
- 15 There is no evidence that this development will enhance Thattham town centre (or the area in general).
- 16 It is not likely to attract new businesses to the area or create or significantly increase employment.
- 17 The local shop and pub are unlikely to benefit. The local shop is under significant threat as the new development will reduce the number of customers.
- 18 There is now particular focus within the Consultation National Planning Policy Framework on taking into account the impact of housing on the environment. As a result of this, several local authorities have paused their

	<p>await the outcome of the consultation on the basis that a <i>lower housing requirement could be applicable to the plans planned for</i>. Although I am completely against the NE Thatcham housing development, I would ask that WBC should (have), to hold on the plan and present a revised plan in line with the updated planning guidance when this comes in.</p> <p>To conclude, this development is unnecessary, inappropriate, and ill-conceived and should be rejected.</p> <p>Please do not take the opportunity to live and play in our beautiful countryside away from our families today and future generations. The Thatcham housing development go ahead.</p>

<p>Please give reasons for your answer</p>	<p>We are objecting to the North East Thatcham Development as, in our opinion, it has not been well thought through and is not in the interests of the community.</p> <p>We have lived in Upper Bucklebury for 25 years and all three of our children have attended the Kennet School and I am concerned about the overdevelopment of Thatcham for a number of years. The High Street is limited in what it offers and such that trips into Newbury/Reading are required if a person wishes to undertake anything other than food shopping. This causes congestion and pollution through increased road traffic. The catchment area for the Kennet is shrinking which is forcing people to travel further for their education. So the current proposed expansion of Thatcham will only compound the existing problems.</p> <p>Our objection can be summarised as follows:</p> <p>Environment</p> <ul style="list-style-type: none"> - The plans originally referred to two 'country parks' being contained within the Bucklebury Plateau Biodiversity Opportunity Area, but that this has been downgraded to community parks only. This is not consistent with protecting Bucklebury's ancient woodlands and rich biodiversity of the land encompassed by the proposed development. Promoting biodiversity requires resources and a downgrade reflects the lack of these basic requirements. - We also understand that the development is going to be located in the Wessex Downs AONB which will render it less suitable for nature. - Upper Bucklebury is likely to lose its independence and identity and therefore damage the community from siting the development, closing the gap between village and town. - The common is to be preserved and protected – we already have fly-tipping, burnt out cars and motor vehicles not to mention a substantial increase in the population is likely to worsen the negative effects of anti-social behaviour. <p>Transport</p> <ul style="list-style-type: none"> - An extra 4,000 people will generate a substantial increase in car ownership and travel. - The railway station is already challenged – the level crossing already impedes traffic flow and the A4 will become further congested.

	<p>- Of greater concern is the increased flow of traffic through Upper Bucklebury. Harts Hill Road is a narrow road with vehicles travelling the road that are too wide for the lanes. The development will have a negative impact on traffic flow and safety of pedestrians in the village. There is also the risk of creating 'rat runs' to avoid traffic on the A4 for drivers wishing to avoid the village.</p> <p>Education and Healthcare</p> <p>- As mentioned in our opening the Kennet School catchment area is already shrinking and will have a direct impact on children and their ability to access the closest schools.</p> <p>- Our understanding is that the increase in the number of children in the estate is unlikely to be sufficient to make a net gain, are these children to go?</p> <p>- Our understanding is that existing medical infrastructure (dentists and surgeries) is already under pressure. It is not possible to establish a new surgery for the extra people, so where are 4,000 people to go?</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>

Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	Please find following my objections to the Thatcham NE Development Traffic Problems Without the council stating the potential locations of any additional primary healthcare and dental Care facilities or parking spaces, it is impossible for them to evidence the likely flow of additional traffic from this development in any direction. This must be taken into the existing road infrastructure assessed as necessary to accommodate it before this development is considered. I live in Midgham, which is accessed either end from via Cox's Lane or Church Hill. Both roads are barely adequate for the traffic. Cox's Lane is single track for most of its length, and the latter single track at certain points with passing places. These roads are already congested on the A4: Last year due to an accident on the A4 the entire length of Cox's Lane, Birds Lane and Church Hill were closed to find alternatives routes around the road blockage. These roads are already experiencing more traffic from new builds along the A4 and more locals new to the area especially with cars, on their bikes and walking dogs. It's almost impossible to make any journey now along Coxs Lane without encountering one driver or another having to reverse back to one of the few limited passing places. I use this road to collect my daughter to school, my journey now takes longer and raises the risk of a collision for every journey! These roads are heavily used by cyclists, horse riders, people and dog walkers accessing public byways and footpaths. It is unconscionable for any increase in traffic along Coxs Lane, Birds Lane or Church Hill without an unacceptable risk of injury to me, other humans and animals. I'd like to see modelling that shows there will be no increase in traffic along these roads impacting on their current use for recreation, leisure and sustainable commuting by bike by the local community. When I try to exit either Coxs Lane, or Church Hill to turn right to travel towards Thatcham, I have to wait for up to 5 minutes to find a safe gap in the traffic. And the risk of a collision is high because there is a constant stream of drivers using the road between Newbury and beyond. This road simply can't safely accommodate any increase in traffic.

When travelling to Thatcham, I use Hart Hill and Floral Way. Harts Hill has several dangerous blind bends and a steep dip in icy conditions. Floral Way is heavily congested during rush hour traffic. It would be good to see the traffic modelling and in particular any safety assessment done on the risk to other road users of having junctions on these roads? I am going to encourage safe and sustainable commuting: riding a bike down Harts Hills will be even more perilous? How will this development have a positive impact on walking, cycling and public transport? I note the proposal for a car park on Harts Hill. For what purpose? I'd like to see the council's traffic modelling at the various bottle necks in the area during peak traffic to see what the impact will be at different times of the day (all modes), safety & emissions from this development?

Environment

I note the plan makes reference to providing green space and playing fields for the new households, but again no details. If schools will open their playing fields to the general public is not feasible due to H&S, safeguarding, maintenance issues. If these are not provided, new households will gravitate to other green spaces in the area, increasing traffic in areas around the flora and fauna. There are already a high number of deer, badger and kites struck by traffic on the roads around Thatcham. I fear this will increase with more traffic flowing through our local roads.

We need a thorough impact assessment to be done on the impact the NE Development plan will have on local flora and fauna. I and other walkers will also lose access to the popular footpaths from Coxs Lane leading to Colthrop and Upper Bucklebury. We will be able to access these areas safely on foot with our animals without these footpaths? This development will limit my access to the countryside I currently enjoy and will impair my ability to enjoy it as a local citizen. I'd like to better understand how the council will support the local community for what it will lose in footpath access to areas we currently enjoy?

Primary & dental care

I am registered at Chapel Row surgery. The medical facility is stretched to capacity with long waits to see GPs in particular. The surgery operates reduced hours due to demand and recruitment problems - what plans have been created for additional primary care facilities to meet the needs of these additional households? Not a generic statement that the needs will be met, but something more substantial. What facilities will be, the size, feasibility of resourcing them and so on. For example, if local facilities struggle to resource themselves, how can we overcome with any new practices?

House price devaluation/other options

Many home owners here have paid a premium to live on the doorstep of an AONB: to benefit from the peace & quiet, and to open countryside. What consideration has the council given to changing the character of this local area and the impact on our properties?

There are thousands of individual building plots sites which could spread the load of this proposed housing development across the county for new housing development within the country without degrading the rural landscape.

The council must surely have access to a register of potential individual building plot sites within the county that it can use to identify developments in greenbelt areas as part of its due diligence? Will this be shared?

This should form part of the consultation documentation.

Consultation

I find this entire "consultation" to have been discriminatory. I'd like the council to evidence that fact that they have done everything possible to get local residents like us informed, engaged and able to contribute before this plan goes any further. I think the council has who've gone over and beyond to explain things to us in a way we can understand as best they can. Something our local council has not.

May I also ask why the exit onto Hart Road at the proposed North of the site was only revealed to the local community at the last minute, the fact, and the impact this will have displacing traffic through Cold Ash, Bucklebury & Chapel Road (rural roads) would have been known to residents to get involved.... had they known.

These facts, the inaccessibility of the planning documents and the late disclosure of key facts makes this application

Please give reasons for your answer	I am a resident of West Berkshire, and have been living in the parish of Bucklebury for the last 21 years. I am writing to the revised LPR, specifically under policy SP17, the NE Thatcham housing development. This plan is <u>unsound</u> and paused.

I wrote to you in January 2022, under the Regulation 18 Consultation. I am deeply disappointed that my objections and others in the parish, have not been taken into account in any meaningful way in the development of the revised LPR. WBC has made much of the 'reduction' in the number of houses in the Plan since Regulation 18. However, the number is now "at least 1,500". From an initial site assessment of 2,500, of which 1,250 were to be built in the Plan period, to 1,500 houses because the Plan extends to 2039 rather than 2036, as originally proposed. The boundary for the development suggests that more houses will be planned for later on.

As noted in my previous objection under Regulation 18, this plan removes the strategic gap between Thatcham and Upper Bucklebury will effectively merge and Upper Bucklebury will lose its rural identity. This removal of the strategic gap affects other villages in this area of West Berkshire.

There are also questions around the selection of North East Thatcham, which ignored the Thatcham Vision and omitted a green field site instead of the numerous brown field sites which are available. The latter are more sustainable and affordable for housing. I am also astonished that the clear impacts of climate change, exacerbated by building on green field sites, were not given consideration.

1 Objection to the revised LPR on the basis that it is unsound

As WBC is aware, a consultation is currently taking place for proposed changes to the National Planning Policy Framework. The tests are set out in paragraph 35 of the NPPF. This states that plans are 'sound' if they are:

Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs in co-operation with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so as part of sustainable development;

Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;

Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters, rather than deferred, as evidenced by the statement of common ground;

Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this plan and national planning policy, where relevant.

The LPR is unsound and fails against each of the above tests in many areas of the plan:

It is **not positively prepared** and would not achieve the goal of sustainable development for WBC and the wider Thatcham area.

It is **not justified**. Many of the grounds for assessment of impacts and benefits lack credibility and it is not based on a realistic assessment of alternatives have not been adequately explored and there is no basis to demonstrate that the allocation of North East Thatcham is a strategy for WBC.

It is **not effective**. There is no evidence that the development of 1,500 homes at North East Thatcham is deliverable over the plan period.

It is **not consistent with national policy**. In many instances the allocation for development of North East Thatcham conflicts with national policy, particularly in relation to landscape character and impact upon the AONB. The process for development under policy SP17 through the sustainability appraisal is fatally flawed and is not a matter which can be easily corrected to the plan. The process for selection of North East Thatcham as a development site is severely flawed and lacks evidence.

2 Specific objections

2.1 Process and timings on the Local Plan Review Consultation

On 6th December, the Secretary of State for Levelling Up, Housing and Communities released a Written Ministerial Statement on amendments to the NPPF.

He stated specifically (inter alia) that 'local authorities, working with their communities, should determine how many homes to plan for, taking into account what should be protected in each area - be that our precious Green Belt or national parks, the character of an area ... Also that 'the Planning Inspectorate should no longer override sensible local decision making, which is sensitive to local needs and concerns'.

The NPPF consultation was launched just prior to Christmas 2022 and will run until 2nd March, 2023. The Consultation states that the Standard Method for calculating the housing requirement (as used by West Berkshire for the regulation 19 version) is **mandatory** and should only be the starting point for local plan. There is a particular focus within the consultation NPPF on character of an area when assessing how much housing can be accommodated.

Since this announcement, several Local Authorities have paused their plan-making process whilst they await the outcome. On this basis, it is unacceptable that West Berkshire are continuing to consult on the current version of the local plan and are not bringing the final version of the plan to be brought back to them for approval before it is submitted to the Planning Inspectorate.

We feel that the council should take the opportunity, as other councils have, to **pause the plan**. The LPR is not ready to be submitted until councillors are satisfied that it passes the statutory requirements of Section 20 of the Planning and Compulsory Purchase Act 2004.

2.2 Impact on Traffic and Transport

A recurring theme from Bucklebury residents at Regulation 18 was that of **increased traffic** through the villages. We were led to understand by WBC planners that traffic from the development would link to Floral Way and the A4. It is apparent on 6th January (WBC Phase 2 Transport Assessment Report, July 2021) there was also **a plan for an exit from Harts Hill**. Traffic from, or to, the site therefore will only go in one direction from this exit – **towards Upper Bucklebury** and traffic going through Cold Ash and the traffic through Upper Bucklebury and Chapel Row.

The proposed development will funnel traffic from the proposed development and, **WBC predicts**, - '**some displacement of rural routes such as Upper Bucklebury**'. This would be where the roads are inadequate, without pavements and are prone to accidents. See also below on 'increasing opportunities for walking and cycling'.

Paragraph 3.26 of the Transport Assessment reports states: '*The **access arrangements** for the northern end of the **junctions** (with right turn lanes where appropriate) on both Floral Way and **Harts Hill Road**. Results from the model cause problems*'. However, the document has **no** modelling results for this. There are drawings for all the other proposed junctions on Harts Hill one, which begs the question – why not?

We have also seen drawings showing **a new car park on Harts Hill**. The purpose is entirely unclear but will certainly be a part of what is already a dangerous road, on a gradient and with several blind corners, and may also promote the need for a car park too apparent in the car parks on the Common.

In the light of the above, Objective 4 in The Sustainability Appraisal (SA) / Strategic Environmental Assessment (SEA) provides opportunities for all forms of safe and sustainable transport' would certainly fail to be achieved.

The SEA makes the following assessments:

- '**To Reduce Accidents and Improve Safety**'

WBC Assessment - The policy is likely to have a Positive Impact on road safety as safe travel will be critical to the success of the development.

- 'To increase opportunities for walking, cycling and use of public transport'

WBC Assessment – Significant **Positive Impact**

WBC Commentary - *The policy is likely to have a significant impact on walking, cycling and public transport as the design of the development takes these in mind.*

WBC states that sending traffic up a hill already notorious for accidents, onto 'wider' rural routes (no pavements and no cycle lanes) and cycling will be encouraged, will have a positive impact on road safety.

It is hard to see how WBC assessments and commentary on road safety can be taken seriously.

Finally, BPC recently commissioned a **Traffic Study** which was undertaken by YES Engineering.

The headline conclusions of the Study are:

- The trips rates used by WBC are **unreliable and not robust**.
- The trip distribution is unrealistic (all evidence suggests traffic will be diverted from the A4).
- The mitigation measures are improbable at best.
- The location of site means car-borne travel will dominate.
- Highway network in the vicinity of Thatcham Northeast is already over capacity.
- No assessment has been made of the routes most likely to be affected by an increase in traffic.
- Increase in traffic through Bucklebury will pose highway safety issues.

WBC's responses to the SA/SEA Objective 4 would appear to be based on no substantial or current evidence.

2.3 Healthcare Provision

The North-East Thatcham development plan (SP17) proposes a 450 sq m primary healthcare facility with the suggestion to refer to the Buckinghamshire, Oxfordshire and Berkshire West Integrated Care Board or other such appropriate body. However, there is **no detail or insight** into strategic healthcare planning.

Proposals for a major development that is likely to have a significant health impact in relation to its size and location, should be subject to a **Health Impact Assessment (HIA)** in accordance with the current guidance from Public Health England. However, it is unclear how the proposals for development have been discussed with health service providers regarding impacts on primary care. All development proposals should demonstrate how the conclusions of the HIA have been considered in the design of the development. The impact on the health and wellbeing of existing or new communities will not be permitted. It is of concern that **neither** the public and private stakeholders respectively, **appear to have arranged or published a prospective HIA specific to the Thatcham development.**

Tackling health and wellbeing requires a **multi-agency approach**. The Berkshire West Health and Wellbeing Strategy has been developed by the Reading, West Berkshire and Wokingham Health and Wellbeing Boards together with the Berkshire Partnership. Developers are encouraged to engage with the healthcare providers at the earliest opportunity in order to meet the requirements associated with new development. It is of concern that **there appears to have been no direct engagement with the Berkshire West Healthcare Consortium and local general practices.**

Few new GP practices are commissioned by NHS England, even where they consider there to be patient demand. Digital figures of patients registered in the NHS Berkshire West Clinical Commissioning Group (CCG) confirm there is a shortage of GPs in other areas of the country. There is therefore **no realistic prospect of a new GP practice being established in the area in the foreseeable future.**

GP practices look to create efficiencies and economies of scale to make general practice more financially sustainable. It would be possible to extend the range of services and primary healthcare professionals available on a single site. It would make **no financial sense for an existing local GP practice to set up a branch surgery** on the proposed new development because of the additional costs and staffing costs and encumbrance working across two sites.

There has been **no approach by WBC or the developers to any local GP practice to discuss an appropriate site for a new practice** which one or more practices could relocate. An enlarged primary healthcare site is required and might be better located in the centre of the development to improve access and minimise traffic as the proposed NE Thatcham development is peripheral to the centre of the development. The site to be supported by Thatcham Town Council but has not been suggested in the sustainability appraisal of site options. The site was identified with the inadequate 450 sq m floor size proposal which they only discovered with the SP17 Policy of December 2021. The proposed North-East Thatcham development site is covered by the existing practice boundaries of Thatcham Medical Centre (Harts Hill Road), Burdwood Surgery (east of Harts Hill Road) and Chapel Row surgery (the whole area). **All three practices are run by two Thatcham doctors' surgeries** run independently of each other, and their combined lists include approximately 2700 patients under 2,000 patients per GP. Newly registered patients moving into housing developments tend to make a greater demand on primary care as there are more young children, a higher maternity workload, less local extended family support and there is initially a high demand for permanent and repeated temporary pharmacy closures in Thatcham have further exacerbated pressure on primary care. **Thatcham dental practices** are unable to provide dental care for the whole population with a significant minority of patients having to travel afield for NHS and private dental care. Thatcham Vision, endorsed by WBC in 2016, confirmed only 60% of residents have access to a dentist (with 17.5% registered with a doctor outside Thatcham). There is no evidence provided that either WBC or the developers have consulted any local dental practices regarding the potential impact of increased workload resulting from additional housing. Reviewing the scanty healthcare recommendations within the Thatcham Strategic Growth Study (David Lock and Associates 2016), paragraph 4.10 states: 'A dialogue with the relevant healthcare and education agencies should be established to address concerns that social infrastructure may not be provided.' The Stage 3: Thatcham Future report published in 2016.

no further detail except the outcome of a community representatives' workshop, that the existing GP facilities are at health centre.

WBC and the developers appear to have neither arranged a relevant HIA nor provided evidence of having any health care agencies or providers. They are proposing a healthcare site that is unsuitable for NHS primary care and to mitigate the burden that 1,500 or more new houses will make on a local NHS struggling to cope.

The objective of WBC and the North-East Thatcham Development Consortium to improve access to the health service infrastructure has not been met as they have **not provided evidence for the provision of a viable primary care centre**.

2.4 Environmental Issues

BPC and parishioners have identified a number of **serious environmental threats** posed by the proposed Thatcham development site (SP17). These include:

- 1 Collateral damage to the Bucklebury Plateau Biodiversity Opportunity Area (*see map below) and its ancient woodland the Common;
- 2 Siting a major greenfield development in the broader landscape setting of the North Wessex Downs AONB and the open countryside by local communities;
- 3 Causing detrimental impacts to legally protected wildlife known to be present on the site but assuming that sufficient mitigation will be taken after development e.g. through the vague promise of a 'community park'.

Taken together, and after a thorough professional review of the background documentation provided by WBC in support of the development, the conclusion is that **there is no evidence to support claims that SP17 will have a positive impact on the environment or any other reason to believe it will have a significantly negative impact.**

For example, the WBC states in the LPR that a Sustainability Charter is required to establish how 'policy requirements for legally required biodiversity net gains and the anticipated overall positive impact on environmental sustainability). It is *informed by* various strategy documents (including one on ecology). Yet, the strategy documents either do not exist or are not available for the Regulation 19 consultation.

We (BPC) estimate that at least 4,000 people will be concentrated in the development site. They of course must have access to recreation and general wellbeing. We do not believe that the claimed provisions for green space will satisfy this demand. The Growth Plan had a vague proposal for two 'country parks' spaced across the top of the slope, inside the Biodiversity Opportunity Area, with potential for significant biodiversity enhancement over its current land use. No details were provided about how they would be delivered. The study showed the complete lack of preparation for such country parks, not least that they should be merged, and provided to deliver that stated biodiversity enhancement. Now, in the updated SP17 text, the country parks have been downgraded to 'country parks' which demonstrates how little commitment WBC has given to protecting the natural environment and public enjoyment.

Since SP17 has no proven plans for providing adequate green space and protecting biodiversity, there will inevitably be impacts on adjacent areas.

Indeed, the LPR states its intent for SP17 to drive additional traffic (people and cars) into the AONB. It provides a growth plan which will 'take advantage of the landscape' to 'facilitate connection to the AONB, and include leisure routes accessible to the public'.

Meanwhile, the management vision for Bucklebury Common is explicitly focused on not increasing human pressure on the site, working to restore and nurture.

In fact, the LPR's own Sustainability Appraisal accepts that SP17 will have a negative impact on environmental sustainability on the site and therefore, would result in a negative impact on environmental sustainability which would need to be mitigated. There are no details on any such mitigation measures: the assumption is simply that they will somehow be found during the planning application process.

However, the very same Sustainability Appraisal suggests that the SP17 policy is likely to have an overall positive impact on the environment, absurdly ignoring the environmental consequences in favour of social and economic benefits that are anyway highly unlikely to be realised.

As noted already in my response, it is hard to see how such documents can be taken seriously when contradictory information is offered.

The overall thrust of the SP17 policy is clearly to build as many houses as possible in a small area of countryside, with the hope that the environment – human and natural – will be improved or, if not, mitigated. Despite all the money spent on consultation and plans and justify the 'growth' requirement, there is no evidence of any serious attempt to investigate, analyse and systemically assess the impact. Everything will be all right because WBC's own unsubstantiated policies say it will be.

<Map attachment here: PS961 Allison Butcher Map Attachment>

2.5 Schools Provision

The provision for education from Nursery, Early Years, through Infant to Secondary education is **not clearly defined** in the LPR. The lack of a coherent Plan on Schools Provision across the various proposed developments also means that it is difficult to assess the subsequent impact on traffic. The siting of a secondary school to the NE of Thatcham would result in a significant increase in traffic in the Thatcham area, not considered in the traffic plans and models in the LPR.

There are **no details** in the LPR of the provision for **Nursery or Early Years** education. Policy SP17 NE Thatcham Development states that 'the site will provide Early Years provision'.

The provision for **Primary** school education is **unclear and contradictory**. There is no data or evidence on the plan for primary school entry requirements. The LPR proposes that the sum of £12 million be contributed by the developers to primary education. No data available (the only data referenced is from 2011), it is impossible to assess if this is sufficient. It also does not state how many school place provision. Clearly, schools need to be available before houses are built.

The LPR is **inconsistent, incomplete and contradictory** on the provision of **secondary schooling** in and around Thatcham, in contradiction to the supporting documentation in the Thatcham Strategic Study 2020. It proposes that the sum of £12 million be contributed by developers to Secondary Education. There are **no details of the location of the land** to be provided and hence no possibility of assessing the impact.

The Thatcham NE development plan 2020, produced by David Locke Associates and Stantec on behalf of WBC, proposes a new (Form Entry) secondary school, half-funded by developer contribution. **Government guidelines are that Secondary schools are not sustainable.** However, the Development Plan states that the **NE Thatcham development** (which proposes a new secondary school) is **sufficient to fill a 6–8 FE school**: Specifically :-

5.18 Provision of a new secondary school in North East Thatcham is an essential part of enabling growth in the town. The proposed site proposed is not sufficient on its own to fill a 6-8FE secondary school.

5.19 Secondary schools need to be of sufficient scale to make them sustainable and able to provide suitable facilities. It is not considered feasible for a new school to be smaller than 6FE.

With an alleged 40% 'reduction' in the housing allocation in the 2023 LPR (2022 to 2039) to 1500 houses, a secondary school is not sustainable in this location.

Again, WBC's own documentation contradicts itself.

Earlier in this same Thatcham NE Development Plan it was noted that the education provision exercise was based on a **study in 2011**. Clearly the use of 11 year old data is inadequate. The Development Plan states:

4.83 This study has not engaged in a detailed demographic prediction and modelling exercise to determine future population demand across the town, and has not attempted to predict the long-term capacities of existing schools. Inevitably education provision will be considered in more detail as any development comes forward.

The LPR Review to 2039, Policy SP17, now states that land (but not the Secondary school itself) will be provided for a secondary school.

In summary:

- there is no satisfactory evidence of the number of pupils the school is to cater for;
- the location of a school is not clear;
- the number of Form Entries is not defined, but it is noted that anything less than a 6FE school is unsustainable;
- the timing of the funding is not clear; and
- there is no evidence that the proposed funding is sufficient to meet the Council's obligations to provide education for all children.

West Berkshire Council, as an education authority, has a duty to make arrangements for suitable school provision across all school years. This duty is **not defined or evidenced in the LPR.**

2.6 Sports Fields Provision

The LPR talks of the provision of sports fields. This raises two issues not answered in the LPR:

- Sports fields require flat ground. The only flat area of ground in the proposed site is that which is closest to the road, the most traffic fumes.
- There is no funding earmarked for these facilities.

Although unclear, the LPR appears to assume that the school playing fields would also be available as Sports Fields. If not, then the playing fields will not materialise. Additionally, many schools are reluctant to open their playing fields to the public due to other concerns.

The objective of WBC and the North-East Thatcham Development Consortium to provide **sports fields has not been evidenced for funding or for a suitable location.**

3 Conclusions

The LPR is unsound. It fails against each of the existing tests of soundness as set out in paragraph 35 of the current National Planning Policy Framework (NPPF).

WBC should **pause the plan**. The LPR is not ready for examination and should not be submitted until councillors are satisfied with the statutory requirements of Section 20 of the Planning and Compulsory Purchase Act 2004.

Bucklebury Parish Council has submitted its Representations (Regulation 19) to WBC this week. I have paid close attention to this comprehensive response as it has been drafted, and I wish to endorse the objections, comments and arguments.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I strongly object to the above plans which are unsound for, amongst many others, the following reasons:</p> <p>You and we have already - from previous developments - experienced the increased environmental and financial cost to protect ourselves and others on the other side of the A4. We can all only guess at the level of destruction that would be required to appear just a few people actually care.</p> <p>After so many environmental mistakes and continuing international strife during our lifetime, surely most of us have a duty to our generations to find ways of protecting our remaining beautiful land here.</p> <p>Few have commuted by bike for as long, often or much as me, both here and in central London. And I have, for at least 10 years, a journey from Thatcham heading east is the stretch of road on which my bike and I already have the highest probability of being killed or seriously injured you to try it at various times to see how dangerous it is. Yet more development will just shorten the odds for me and others to believe a cycle lane were feasible for that stretch, but I find it hard to imagine a solution that could properly safeguard the area (reducing heavy traffic.)</p> <p>The wildlife and bucolic attention around this development seem to be derisory. Thatcham may be the oldest (and one of the oldest) continuously inhabited places in Britain. Misguided developments have already taken place (and some of poorest infrastructure developments. It is hard not to conclude that the proposers' thoughtless actions have messed up massively already there; people might not complain about our making it even worse.</p> <p>I could go on but I trust you agree with my strong belief that the application should be refused. We can all pretend that we can make huge differences to the future of our world. But I hope you agree that that is wrong and just a poor excuse.</p> <p>I am happy to appear at the public enquiry if invited.</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am objecting to the plan to build up to 2,500 homes as I believe it to be unsound and will have an extremely negative impact on the environment.</p> <p>As a resident of 40 years in Upper Bucklebury, I have noticed natural, minimal infill development and a couple of very nice village's character. This has inevitably added traffic movements locally, however this is minuscule compared to proposed development on green field land in a designated Area of Outstanding Natural Beauty in the North Wessex Downs.</p> <p>The traffic movements would vastly increase, bringing more vehicles up Harts Hill Road and through the village. This would impact on the cycle path at all or pavement for pedestrians until it reaches Upper Bucklebury. At the Eastern end, Cox's Lane is a narrow road with many passing places.</p> <p>The area is home to legally protected wildlife which would be displaced. Building on agricultural green fields used for agriculture cannot be advisable.</p> <p>The settlement of Thatcham will merge into one long development and our village will lose its identity if this plan goes ahead. More vehicles for work, school and leisure the roads will become more congested. The A4 is already clogged at peak times. Bucklebury will become a rat run.</p> <p>The NHS does not have a policy of creating new GP surgeries as part of its strategy. Current patient lists at existing surgeries are full. The addition of several thousand more patients will break the NHS locally, putting patients even more at risk of not receiving care.</p> <p>Bucklebury Common has an ecosystem which is important, nationally and risks increased footfall and resulting damage to the common.</p> <p>What is the purpose of the car park proposed on Harts Hill Road? Car parks in Bucklebury are already used for anti-social behaviour. A new car park will provide another location for this illegal activity.</p> <p>While all these extra people will need access to green space, creating a 'country park' is not to the benefit of the existing village. Further development.</p> <p>Please reconsider.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather	

<p>than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>I wish to object to WBC LPR Regulation 19 Plan Policy SP17 for the following reasons:-</p> <p>1. Traffic</p> <p>I'm concerned that the volume of traffic through Upper Bucklebury will increase significantly as a consequence of the development.</p> <p>Traffic from the new development will inevitably use the route through Upper Bucklebury as an alternative to using the main road, particularly if there is an exit at the north of the development onto Harts Hill road.</p> <p>There is also in the plan a proposed car park off Harts Hill road which will add to the problems of a road which is already subject to a high volume of traffic.</p> <p>2. Consequential Damage to Bucklebury Common</p> <p>With the number of additional people who would be within easy reach and access of Bucklebury Common it would lead to the degradation of the habitat of the common and lead to unsustainable damage to an important eco system of national importance.</p> <p>3. Environment</p> <p>This is a development of "green" land which has a high elevation and abuts an AONB which would have an adverse effect on the area and biodiversity.</p> <p>4. Pressure on Medical and Complementary Services</p> <p>The medical and complementary services in the area only just cope at the moment so with the proposed development and the increase in people requiring these services it would inevitably lead to a significant deterioration, more specific detail of additional services is available on request.</p> <p>5. Lack of Strategic Gap between Thatcham and Upper Bucklebury</p> <p>The development will significantly decrease the green gap between Thatcham and Upper Bucklebury and could set a precedent in the future resulting in Upper Bucklebury becoming part of Thatcham.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes	No

<p>* No</p> <p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>Traffic</p> <p>Given the number of homes proposed (although this seems unclear as to what the maximum number will be), even if equate to thousands of daily trips on the local road network, which is already busy. This does not include daily deliveries. The A4 through Thatcham is congested at peak times, and there are already large queues in and out of Thatcham village.</p> <p>The homes are located in such a location that to access Thatcham's amenities, schools and doctors for example, people are more likely to walk than walking or cycling along the A4. The council have assessed a "Significant Positive Impact" with "The policy is likely to have a significant positive impact on walking, cycling and public transport as the development should be designed with these in mind." Having worked on other schemes it is quite clear that despite putting in token footpaths and cycle paths, the development is effectively separated from the A4, and people will drive almost everywhere. Despite what studies may demonstrate, they never account for the reality of how to see how hard it is to park in Thatcham Broadway for example, to see how everybody drives to Thatcham's shops and services.</p> <p>The proposed junction on Harts Hill Road is particularly concerning. This will encourage people to travel up a narrow road, Upper Bucklebury in order to use unsuitable lanes for their journeys. Living in The Slade, I am very concerned that people will then turn left onto Broad Lane to travel towards Cold Ash and the A34 at Chieveley, or use very narrow lanes such as Broad Lane to head towards Yattendon and other villages. These lanes are Bucklebury Quiet Lanes, and are used by walkers and cyclists. They are very narrow, often in poor condition and not suitable for an increased number of car journeys, let alone vans and trucks.</p> <p>The junction between Harts Hill Road and Broad Lane is accessed by driving past two car repair businesses and is used by delivery vans due to parked cars. The junctions from The Slade and particularly Holly Lane are difficult with limited visibility, and a speed limit will be dangerous.</p> <p>I cannot see how increasing the number of car journeys by a poorly developed scheme is consistent with West Berkshire's aim of net zero emergency or being on a journey to net zero. This scheme shows no progression from the housing developments developed in the area where large numbers of houses were simply built in a field.</p> <p>The Sustainability Appraisal (SA) / Strategic Environmental Assessment (SEA) which accompanies the Local Plan covers the area of North East Thatcham against key Sustainability Objectives. Objective 4 is – To promote and maximise opportunities for sustainable transport. The SEA makes the following assessments:</p> <p>'To Reduce Accidents and Improve Safety'</p> <p>Council Assessment - The policy is likely to have a Positive Impact on road safety as safe travel will be critical to the success of the development.</p> <p>How can increasing number of vehicle trips on the same roads improve safety can reduce accidents? This is nonsense.</p> <p>'To increase opportunities for walking, cycling and use of public transport'</p> <p>Council Assessment – Significant Positive Impact</p> <p>Council Commentary - The policy is likely to have a significant impact on walking, cycling and public transport as the development will be designed with these in mind.</p> <p>Any study can show what you want it to show, but as discussed above, the location of the site will not have this positive impact be challenged.</p> <p>Healthcare</p> <p>Having lived previously in Thatcham and having family there, I am aware how oversubscribed and busy the dentist, GPs and other services. My son was recently taken ill and we were told to go the West Berkshire Community Hospital; however, we were told that a child specialist was available. We therefore had to drive to Basingstoke A&E.</p> <p>One can only conclude that the current healthcare provision is at best stretched, and therefore given that this proposal contains no details on the provision of primary health care, the proposal is flawed and cannot be considered to be commensurate to place an additional burden on existing healthcare providers, and to reduce the quality of care available to existing residents.</p> <p>Environment</p> <p>Firstly, it beggars belief that the proposal even considers siting so many homes on a hillside in front of the North West Hill. The view will be lost forever.</p> <p>Losing greenspace and farmland to this development flies in the face of current thinking on sustainability and sensitivity. It is an attempt to tick the box of providing a few thousand new homes, whatever the environmental cost. House building is a major contributor throughout the process and supply chain, and is a major contributor to carbon emissions. How does this align with our</p>

	<p>and targeting net-zero? Given the proposal only proposes “community parks”, this hardly represents an effort to mitigate habitats which will be caused by this development.</p> <p>In The Slade and Bucklebury Common, the impact of visitors is felt in numerous ways including (but not limited to):</p> <ul style="list-style-type: none"> • Littering; • Setting fires (accidental and otherwise); • Dogs out of control disturbing ground nesting birds or attacking deer (I have witnessed this myself); • Dog fouling; • Car parking on verges; • Walking off public rights of way; • Trespassing on private property; • Illegal off-roading by vehicles. <p>The management vision for Bucklebury Common is explicitly focused on not increasing human pressure on the fragile environment to restore and nurture.</p> <p>By placing these new homes closer to Bucklebury Common than the existing residential areas of Thatcham will only given no proposals have been made to provide recreational areas that can be used without destroying fragile environment.</p> <p>The development will only have a negative impact on the local environment, and in no way is it shown to be sustainable for the local landscape. This proposal should therefore be disregarded and a proper solution for housing in West Berkshire should be better thinking than building thousands of homes on green space.</p> <p>In fact, the LPR’s own Sustainability Appraisal accepts that SP17 will have a <u>negative</u> impact on environment on a greenfield site and therefore, would result in a negative impact on environmental sustainability which would need to be mitigated by whatever whatsoever on any such mitigation measures: the assumption is simply that they will somehow be found during the process.</p> <p>However, the very same Sustainability Appraisal suggests that the SP17 policy is likely to have an overall positive impact –this does not make sense.</p> <p>Education</p> <p>The provision for education from Nursery, Early Years, through Infant to Secondary education is not clearly defined within the LPR. There is no coherent end-to-end plan: this therefore breaches the Council’s obligations to provide education for all children. Having young children currently at primary school age or below, I am extremely disturbed that the proposal does not state what provision will be provided.</p> <p>We are in the Kennet and Downs schools catchments, but closer to Kennet. Should these homes be built without any other new development will take preference to children from Bucklebury for places at Kennet due to distance. This leaves children who are far from Downs, there is a chance we then end up with no place and our children could end up having to go anywhere else.</p> <p>There is also no resolution as to the issue of school playing fields. As the site is on hillsides, the only flat area would not be acceptable due to traffic emissions.</p> <p>Therefore this proposal is flawed as it does not demonstrate how school and playing provision will be made.</p> <p>Timing of the Review</p> <p>The NPPF consultation was launched just prior to Christmas 2022 and will run until 2nd March, 2023. The Consultation states that the Standard Method for calculating the housing requirement (as used by West Berkshire for the regulation 19 version) is mandatory and should only be the starting point for local plan. There is a particular focus within the consultation NPPF on the character of an area when assessing how much housing can be accommodated.</p> <p>Therefore the numbers need to be reassessed.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>Their own conclusion states: ".1 For many topic areas the Western Berkshire Councils Statement of Common Ground (WBCSoCG) is still a valid and relevant document. West Berkshire Council considers that it can meet its own local housing need. However for employment uses there is still some work that needs completing before we submit the plan and it is hoped that a statement of common ground on the topic. Although not discussed in detail in this paper the input from and coordinated work with the intention to enter into a statement of common ground with them before the LPR is submitted to the Secretary of State. Their work with the council has covered responding formally to Regulation 19 and blue infrastructure as well as the recently important nutrient neutrality and Habitats Regulations Assessments"</p>
<p>4. Proposed Changes</p>	<p>The LPR is unsound in many areas and the following need to be addressed:</p> <ul style="list-style-type: none"> • Traffic/transport - proof that the development will positively improve walking, cycling and public transport, and improve air quality. • Healthcare - the proposal needs to demonstrate the real strategy for delivering appropriate healthcare for the town. • Education - the proposal needs to demonstrate how education will be provided. • Environment - the Sustainability Appraisal needs to be consistent on impact of sustainability, and demonstrate how it will be mitigated.
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>No</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable	

<p>alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I write to object to the plan. I find it to be unsound for the following reasons:</p> <p>Environment I have lived in Upper Bucklebury for 35 years. This is within a designated Area of Outstanding Natural Beauty. I believe proposed for a large part of the development will be destroyed for ever and that there will be detrimental impacts to p seem to be any evidence of a positive impact on wildlife nor proven plans for providing adequate green space and protecting biodiversity. The two "country now been downgraded to "community parks". There appears to be no evidence of any sound attempt to investigate, analyse of such a development.</p> <p>Transport There appears to be a plan for an exit road at the north of the site onto Harts Hill Road. This is a challenging road, e are no modelling results for this proposed junction. It would appear that some of the displacement of A4 traffic will, the Bucklebury. The roads into, out of, and within the village are mainly unsuitable for large volumes of traffic and this increase in tra consider this to be a major risk of danger and could lead to loss of life. The council assessment of the proposal is a significant positive impact on reduction of accidents and safety. Flow is</p> <p>Healthcare There appears to be very' little detail into strategic healthcare planning; neither WBC nor the developers, appear to h prospective HIA specific to the proposed North-East Thatcham development. It seems that there is no direct engage Consortium and local general practices. When considering how new GP practices are commissioned by NHS England. alongside the fact that it would appear to or geographic sense for an existing GP practice in the area to set up a branch surgery, it seems unlikely that approp in a timely fashion, if at all. Surely this complicated and essential provision cannot be left until the development is ap Dental practices in Thatcham are under severe pressure to provide care for existing residents. Pharmacies in the are provide an adequate service. WBC and the developers appear to have neither arranged a relevant HIA nor provided liaised with local health care agencies or providers.</p> <p>Education Provision for education for the whole age-range is not clearly defined. Secondary school provision appears unsound of pupils; location of a school; the timing of necessary funding: the provision of necessary funding. The development plan states that the development is not sufficient to fill a 6-8 FE school. It would to be smaller than 6FE. Bucklebury children would probably no longer have a choice between the Kennet School and the Downs School for There are no details in the LPR of the provision for Nursery or Earls' Years. The provision for Primary education is un how can this proposal go forward without significantly increased information, research and assurance of the necessa In summary, it appears that, in order to meet an arbitrary' target for new development an easy option has been propo area only.</p>

Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.	

* Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>I would like to object to the Thatcham NE Development as currently proposed.</p> <p>I have thought carefully about whether it is appropriate to object to such a development. In general, I believe in the UK country to meet the UK's housing need. I also think that the edge of Thatcham is probably a good place for modest, proportionate development.</p> <p>However, having studied the plans <u>I don't believe that the current proposal is modest or proportionate or well considered</u>.</p> <p>Once complete, the development would increase Thatcham's population by nearly 20%. This seems to me to be totally unnecessary to meet the organic population growth of Thatcham and surrounding areas.</p> <p>Additionally it appears that there has been very limited detailed planning to address the large increase in demand for roads and green space. This will inevitably affect the provision of these already stretched essential services.</p> <p>To repeat, I'm not against new development around Thatcham, however only if it is significantly scaled down from the current proposal.</p>

<p>Please give reasons for your answer</p>	<p>I am writing to object to the proposed plan for the Thatcham NE development.</p> <p>As a local resident, my wife and I frequently enjoy walking in the lovely areas surrounding Bucklebury. We are very concerned that the proposed development would destroy the area of countryside and the beautiful environment to the south of Upper Bucklebury. We often walk from Long Grove across to Midgham through the fields and nearby woodland with lovely views across the hills. These views would be destroyed and would result in paths through a giant housing estate.</p> <p>It is completely inappropriate for there to be such a large development adjacent to ancient woodland and areas of Ancient Woodland. The proposed development would significantly infill the area between Thatcham and Bucklebury, reducing the separation between the two villages. This would have a significant impact on the local biodiversity around our village. The size of this proposed development is not appropriate.</p> <p>I am very concerned about the impact on local traffic. Harts Hill road already carries excessive traffic, and this proposed development would add more pressure on Harts Hill road and add to delays at the junctions with Floral Way and the A4, and the enormous delays caused by the frequent occurrence at Thatcham railway level crossing.</p> <p>I am also concerned about the extra pressure this proposed development would place on our local doctor and dentist surgeries. The facilities contained within the development proposal are unsound and unsatisfactory.</p> <p>I strongly object to this major greenfield development proposal.</p>

<p>Please give reasons for your answer</p>	<p>As a long term resident of <redacted> Bucklebury, I am very concerned about the negative impact the Proposed Development have on our village and many other small surrounding communities in this area.</p> <p>We are fortunate to have lived in this AONB which is enjoyed by,not only residents of the area,but also many visitors. 1500 -2500 new homes on the edge of this AONB, with a subsequent population of thousands, will change the area to a busy congested suburbia.</p> <p>For a start, the increased traffic along our narrow, hedged lanes with few footpaths is just not possible without compensation and lanes are used by many cyclists and ramblers not just from our area, The local wildlife will also be impacted trying to conserve our World</p> <p>Also we have enough trouble making appointments at our overstretched GP surgeries and hospitals now, let alone with The NHS suffers already trying to cope along with other medical centres such as dentists etc</p> <p>Educating these inevitable extra children from the new development is also a worry, not only finding room for them in but how to cope with the extra traffic at certain times of the day .</p> <p>From what I understand several of the above concerns I have mentioned have not been thoroughly examined and as a result – why such a huge development in such an unsuitable area ? I f we don't protect and preserve our small West Berkshire villages will be lost forever for future generations.</p> <p>After all, a Government Statement recently detailed that the housing number should now be advisory and not mandatory that planning should no longer override sensible local decision making, which is sensitive to and reflects local restrictions. I trust that you will take my objections in to consideration ,as they represent the thoughts of many local residents that</p>

<p>Please give reasons for your answer</p>	<p>I wish to object to the proposed build of 1,500 to 2,500 houses on North East Thatcham. This is because the component would have a negative impact on me for the following reasons:-</p> <ul style="list-style-type: none"> - Healthcare - there does not appear to have been a Health Impact Assessment and there does not appear to be an additional GP practice or NHS dental practice. It is currently very difficult to get a GP or Dental appointment without a town. - Traffic congestion - frequently traffic on Floral Way and the A4 is heavy particularly in the mornings at rush hour. As schools are built, one can only assume absolute gridlock at peak times, and an increasing the risk to children travelling to and from schools. - Sports Field Provision - there has been no evidence provided for the funding or for a suitable location. - Education - The provision for secondary school places is unclear and unsatisfactory. Secondary school places with are limited.

Please give reasons for your answer	Please accept this email as a clear objection to the plans due to their unsound nature. I have lived in Upper Bucklebury for <redacted> years and find the blatant disregard for community and the natural e results in my support of WBC to be no longer evident. I moved to the area for the natural environment, the protection of the AONB area, and the wonderful green spaces tha disregard of our local biodiversity, this development cannot begin to consider that their suggestions can return the wide of so many local wildlife, and this will cause irreparable damage to our prized local environment. Another of my concerns is the lack of consideration for healthcare, whilst the plan proposes a new GP surgery, there viability of this, and with the shortage of GPs in current practices there is little prospect that a new surgery would op populations to the already over stretched service available in the area. This is also the case with Dentists in the area this within the plans.

	<p>The increased traffic through our small villages as people seek quicker and alternative routes to an already congested to our local village, and the general public, especially our young children who walk through the village to school, end traffic volumes and pollution.</p> <p>This new development would effectively mean that Bucklebury school students (who live in the village) are going to be (if oversubscribed, which would be the case with this increase in houses) as the new development would be closer, students are going to need to find considerable monies to pay for transport to Downs school, and miss out on continuing that have been through primary school with just because we live in Upper Bucklebury and are therefore further away development.</p> <p>I object wholeheartedly to this planned development and stand with my community as we fight to retain our green spa infrastructure and support for our community as a whole.</p>

<p>Please give reasons for your answer</p>	<p>In addition, the process around this Regulation 19 Objection is extremely complex and overwhelming for myself, a resident and I know that it will reduce the number of objections you will actually receive. I do know that a number of my friends are unlikely to be submitting an objection due to this user-unfriendly process.</p> <p>I object to the Proposed Plan:</p> <p>The plan hasn't been agreed according to Local Policy such as the Cross-Party Agreement. There is not enough information missing so we can't have a fully formed opinion.</p> <p>For me, my concern is the environment, pollution and traffic. The Proposed Plan does not take into account independent recommendation, including current Government Policy.</p> <p>Housing allocation was reduced to 1500 but there's no cap on this allocation and also there's no plan adjustment from 1500 to 2500.</p> <p>The Government state that Housing targets used by councils are no longer binding on them. Council's no longer have an advisory not mandatory. There's a wider need to look at what the community needs across West Berks rather than focus on Thatcham & Newbury.</p> <p>There hasn't been any ecological work. Where is the update-to-date Environmental Study to assess the impact on biodiversity requirement. The area is rich in wildlife such as insects, breeding birds, bats, badgers, newts etc. The woodland is of high quality and is being desecrated. The plan would destroy mature hedgerows, gullies and pond dynamics. WWF England say "<i>England is the most biodiverse in the UK and is suffering a chronic loss of wildlife...</i>" this should be a high priority to address.</p> <p>What evidence is there on the impact of building 1500-2500 houses on the plan?</p> <p>How can you build houses on greenfield land without understanding the impact?</p> <p>No defined gap between Thatcham and Upper Bucklebury. Strategic gaps between towns and villages such as the one between Thatcham and Upper Bucklebury has not been reaffirmed in Reg 19 thus allowing urban creep up Harts Hill.</p> <p>The Office of Nuclear Rep said "<i>No</i>" to this Plan because it is close by to the Nuclear Plant at Aldermaston that has restrictions on development.</p> <p>The Plan is right on the border of the Berkshire Downs AONB that contravenes regulations. The Plan puts the AONB at risk of damage.</p>

	<p>There's no feasible study for a country park, but why create one when we have this already that you want to destroy? and appearance of the area which is historic and a natural landscape.</p> <p>Light, noise and traffic will be extremely harmful to people and the ecology.</p> <p>Climate Change predicts more extreme weather including rain. Thatcham is in a valley, a natural flood plain so there surrounding higher farmland. Will the newly built Flood Alleviation Scheme on Floral Way be able to cope?</p> <p>"Brownfield first" should be preference over Greenfield however lots of brownfield sites have been excluded from the Lock Associates, an independent town planning, urban design and master planning consultancy based in Milton Keynes at a lot more and came to a different conclusion regarding new housing. Why is this being ignored? The Country-side enough brownfield sites in West Berks to build 21,000 homes!</p> <p>The demand on the current Water & Sewage infrastructure is already stretched, Excess flows into the River Kennet. not cope with the additional houses. What are the plans to upgraded ahead of any new builds and will this be included?</p> <p>There is a need for more agricultural land so it should be a priority to not destroy anymore.</p> <p>There is no up-to-date Traffic Study.</p> <p>There is a Colthrop proposed plan that includes the estimated £20-35m to build a bridge over Thatcham railway line. the HELAA technical analysis.</p> <p>Concern over Rat Runs while the works is being done. The proposed development will funnel traffic from the development displacement of A4 traffic onto wider rural routes such as Upper Bucklebury '. This would be where the roads are in have the potential for serious accidents.</p> <p>The Proposed Plan is rushed and hasn't been clearly thought through and there are better plans to consider.</p> <p>Please please take a realistic view on what is actually the best approach to building more homes that is inclusive to A their futures...</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	No
<p>Please give reasons for your answer</p>	The plan hasn't been agreed according to Local Policy such as the Cross-Party Agreement. There is not enough information is missing so we can't have a fully formed opinion
<p>4. Proposed Changes</p>

* No	

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to object to the proposed Thatcham NE Development on the grounds that it is unsound and will have a negative impact on myself and the surrounding environment.</p> <p>Whilst I am fully aware of the the pressure on WBC in terms of the need to increase housing stock, the proposed development is not sound in a number of fundamental ways:</p> <p>1 Transport impact</p> <p>The development would create an intolerable increase in the level of traffic using roads that are already fully congested. The A4, particularly to the eastern side of Thatcham would inevitably become gridlocked further. This will impact profoundly on the village but also create increased pressure on alternative routes. The road through Upper Bucklebury already has in place major increased traffic volumes. The Development would force even more traffic onto this road which is self evidently not desirable for the impact all residents in the village. The impact of the additional traffic on Harts Hill Road would be catastrophic particularly in terms of development on that road. The inevitable bottlenecks created would mean access to and from Thatcham and Newbury would be seriously impacted.</p> <p>Furthermore, the development would place intolerable strain on the roads and parking nearby Thatcham Railway Station. The users of that station from the development would drive and park.</p> <p>Building the proposed development would cripple an already overstrained local transport infrastructure.</p> <p>1 Environmental impact</p> <p>It is undeniable that the development will clearly destroy a large green field site which in itself will have a tremendously negative impact on the area. Whilst it is acknowledged that the development will not directly be built in areas of specific protection etc. the very nature of the development to these areas (eg.natural woodland) would inevitably mean that these areas would be extremely adversely affected. Large numbers of people, particularly children, would gravitate to these protected areas and sadly, there are innumerable people who would destroy their beauty and underlying habitats. This should not, indeed cannot, be allowed to happen.</p> <p>Building a development of the scale proposed and at the site earmarked is criminal in ecological terms.</p> <p>1 Local infrastructure</p> <p>Key facilities in Thatcham and the surrounding areas are already at breaking point. In particular, existing schools, do not have the capacity and will simply not be able to cope with the large population increase. Trying to squeeze the proverbial quart into a pint pot will affect the whole population. In terms of Thatcham itself, the village simply cannot handle the additional number and a significant increase in anti-social behaviour and in particular outlying areas such as Upper Bucklebury which I strongly believe will become a victim of the development and anti-social behaviour.</p> <p>Quite simply, a development of this scale is unsustainable in its current location. Alternative solutions should be sought.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.	

* Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>I would like to register my objection to the proposed development of 1500 to 2000 homes in NE Thatcham. My objection follows:</p> <p>Healthcare provision: existing services in Thatcham and local villages are already badly over stretched. A GP appointment notice and in recent years the service has deteriorated such that email and phone based consultancy has become the norm. I who needs a regular blood test I frequently run into issues where one part of the NHS tells me I need a test within days. Berks Community hospital is non-existent for weeks. I understand the plans propose a new 450 square foot primary care centre which is woefully inadequate for size of development in question</p> <p>Transport: I heard an argument has been made in favour of the development saying that the local roads have capacity to handle the development; I disagree; there are a number of points where we suffer major traffic build ups on a daily basis. There is already heavy traffic from Thatcham into Newbury. There are long tailbacks and delays each day from the level crossing at Thatcham station to the junction of Floral Way and the A4 to name but 3. Whenever there is the slightest disruption to traffic, be it roadworks or a traffic accident the system fails. The A4 around Thatcham is notorious as a traffic problem hotspot. To add the traffic generated by 1,500 new homes and construction traffic involved in the development phase will, based on the current plans, create carnage on a daily basis and impact retail businesses in and around Thatcham as people avoid the area where possible.</p>

Please give reasons for your answer

I am objecting to the above plan because it is unsound on numerous grounds.

1 Transport

1.1 Increase in traffic to Upper Bucklebury

The planned exit on the northern end of the site onto Hart's Hill Road will lead traffic from the extra 4,000 residents and then on to the Ridge going east through the village and west, past our house towards Cold Ash. The Ridge, which is a narrow road, is run for motorists in a hurry. It is already hazardous working to maintain the soakaway and hedges at the front of the road. The extra proposed traffic will unthinkably increase the hazard to life and limb. This end of the village has no pavements and the potholes not only pose an unacceptable degree of risk to me and my husband walking into the village to shop or post letters, but also to our neighbours, the schoolchildren walking home past our house, and the disabled child in a wheelchair and his parents.

This aspect of the plan is unsound.

1.2 Access and junctions

Why is there no drawing for the new priority junction on Hart's Hill Road? Without this how can any of us know whether the plan will have a right to know the thinking behind your otherwise empty assurances.

This aspect of the plan may well be unsound.

1.3 Car Park

Drawings show a new car park, on Harts Hill Road. Why is this needed? HHR is a narrow road with steep banks, limited visibility and to this will be dangerous, and who will police it to prevent the dumping, littering and other antisocial behaviour experienced on the common?

This aspect of the plan is unsound.

1.4 Safe and Sustainable Transport

WBC's assessments (SEA) says the plan will reduce accidents and improve safety. Based on my previous observations, more traffic to an already heavily trafficked village will do exactly the opposite.

WBC also maintains that the plan will have a significant positive impact on walking, cycling and public transport. Not only will it be buying a bicycle to compete with rat run drivers on the Ridge with another 4,000 people's cars on the local roads, but I spend every Sunday taking local circular walks from home, averaging 10 to 15 miles: this is our primary source of exercise. If this is allowed to go forward most of these walks will be eradicated by building over them, and the extra traffic emissions will be a disaster. No one enjoys road walking: we moved to this house in this area largely because of nature. We meet many local people on these walks with children and dogs, who will also bitterly feel this loss. So how can the plan be said to have a positive effect on walking?

This aspect of the plan is unsound.

1 Healthcare

Reading the comments of other local people I have grave doubts that the provision of extra services such as health centres will be through. Who will service all these new people? Our local surgery at Chapel Row is already fully stretched. For example, we have to go to Newbury rather than a local dentist. Where will new facilities go? Where will the funding come from? Staff are already stretched and there is a shortage of doctors and nurses. Who will run them and where will the extra workers come from?

This aspect of the plan is unsound.

1 Environment

Far from having a positive effect on the environment, the plan, if implemented, will do exactly the opposite.

3.1 Local people are concerned about damage to the Bucklebury Plateau Biodiversity Opportunity Area, the common and the heaths. 'Lowland heaths' are highly endangered environments and the UK has the greatest proportion of those that are left. We are cherishing these environments and their unique biodiversity.

3.2 This is an Area of Outstanding Natural Beauty: a major reason we moved here over 20 years ago. Siting a major development will permanently damage the countryside and spoil its enjoyment by those who live here. It will change the whole quality of the area.

3.3 The plan would negatively affect legal protected wildlife, not to mention wildlife in general, on site and in the large surrounding area. Mitigating its loss has been worked out. Having volunteered for the local wildlife trust for over 10 years, subscribing to its 8 day courses on related subjects, I am extremely sceptical of promises of mitigation of this loss. How exactly are you going to mitigate the destruction of so much prime habitat? Vague references to some sort of park are not a plan for mitigation. Not one iota of the plan is for improvement of the environment.

It is well known that carbon sequestration by the land depends on its biodiversity and the integrity of the complex wetland. To house some 4000 people here not only destroys natural assets in the area built upon but also fragments the large area. Fragmentation leads to loss of biodiversity (both non-protected and protected species). It also releases carbon previously stored in the ground. This can be quantified. Carbon release into the atmosphere is bad for both nature and people. How exactly is this going to be mitigated?

Vague promises of two 'community parks' or even the originally promised 'country parks' do not remotely constitute a plan for mitigation. Complex ecosystems provide benefits that some grassland and some newly planted trees do not. Where are the details of the plan going to fund their creation and maintenance? I believe concrete plans would expose the futility of the exercise as merely sticking plaster to a gaping wound.

Where is the Sustainability Charter to show how net gains of biodiversity and environmental sustainability will be realised? It is a requirement, so where is it?

The plan negatively affects local people's enjoyment of nature and the wellbeing that comes from it. Many more people will be able to enjoy nature. We personally as regular local walkers (5-18 miles each Sunday) will lose roughly half of our usual walks, and the air quality will be used. Extra traffic reduces air quality both on these walks and also in our home.

Does anyone really expect us to believe that building this number of houses in an area of natural beauty will both provide a better quality of life for their new owners as well as improved access to nature for those already living in the area? This is pure wishful thinking. The wider common and environs will damage nature, not conserve it.

WBC's assertions that the countryside will be improved by this plan are just that: assertions. So far, these assertions are empty.

For all these reasons, the parts of the plan dedicated to improving the environment are totally, utterly unsound.

1 Education

4.1 Where is the evidence for the number of new students to be accommodated in the area? Where are they to be housed?

4.2 Where is any new school to be situated?

4.3 Will it be a 6FE school?

4.4 What about the timing of the funding?

	<p>4.5 Where will the playing grounds for the new schools be found?</p> <p>4.6 Will the amount of the funding be at all adequate to meet WBC's educational obligations?</p> <p>Lack of full details in the LPR renders this aspect of the plan unsound.</p> <p>1 Other</p> <p>5.1 Timing</p> <p>On 6 December, Michael Gove (SOS for Housing and Communities) released a Written Material Statement that should not now be mandatory but advisory. It said the Planning Inspectorate should no longer override sensible decision-making that is sensitive to local concerns and that reflects local constraints and concerns.</p> <p>I understand from a communication from Bucklebury Says No that the timing of the NPPF consultation means that the housing requirement will be advisory only, and that the character of the area should be an important factor in deciding whether to be accommodated. They say that several local authorities have paused their housing plan process awaiting the outcome of a lower housing requirement might apply.</p> <p>I wholly agree that WBC should take the opportunity, as have other councils, to pause the planning process until the year comes in later in the year, so that any housing development will reflect the character of our village and of the outstar countryside in which it stands.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>

Please give reasons for your answer	<p>I am extremely concerned with the lack of proper research that has gone into the Thatcham NE development , the p created by this housing scheme will 'disperse' onto surrounding roads, not the main A4.</p> <p>When was a survey last carried out on the volume of traffic using Harts Hill Road and on through the village of Upp Common? I have lived her for over 20 years and the volume of traffic has increased and also the size of the vehicles. on the A4 as the amount of traffic using this 'rat run' increases massively and your proposals will have a huge impact along this road.</p> <p>I did not see anywhere a decent ecological survey, which should have looked at the impact on the wildlife in the suggest countryside?</p> <p>I know from experience that West berks planning office don't listen, so I realise that this will be swept aside like my planning office to do its job, <address redacted> is 1.5 meters higher than it should have been , <address redacted> of tons of clay from his back garden all over the common.</p>

	If you allow this proposal to go ahead it will be another example of 'money talking' and ignoring the general public, v by your lack of consideration for people's well being.

<p>Please give reasons for your answer</p>	<p>I am writing to lodge my objection to the above proposal given the size of the development and its impact on the village surrounding area.</p> <p>Of particular concern is the impact this proposed development will have on the environment. The northern boundary AONB which includes areas of ancient woodland and common land that would be adversely affected by the increase in traffic. During the recent pandemic and lockdown, the village was subjected to significant evidence of trespassing and problems and I fear that this would increase if this development goes ahead. The spectacular views across The Kennet Valley will be lost forever by this development.</p> <p>A second, but equally important, problem will be that of the increase in traffic. The road through Upper Bucklebury and the villages are already subjected to motorists using them as a means of avoiding the A4 and accessing the A34 and M4. If this development is approved particularly the plan for an exit at the north of the site onto Harts Hill Road. Traffic leaving the site going to go in the direction of Upper Bucklebury where it will split between traffic going through Cold Ash and traffic going through Chapel Row. The roads through these villages are ill suited to additional traffic: they are rural, single carriageway roads with narrow footpaths, which would constitute a serious safety hazard given the anticipated increase in traffic. The impact of noise from the additional traffic will be significant.</p> <p>When Floral Way was constructed it was meant to constitute an important boundary between Thatcham and Upper Bucklebury. It is a break that strategic gap and result in the loss of the village's identity as a rural community. Bucklebury Vision set out a plan to protect the landscape and the visual quality of the area should be maintained. This proposed development seriously undermines this vision.</p> <p>What will future generations think of us if we desecrate this greenfield site with all the ramifications that it will have on the landscape? The system is meant to protect rural environments and the increasing awareness of the importance of such areas in the landscape is even more important that these valuable sites are not destroyed. Once under bricks and concrete they will be lost forever.</p>

<p>Please give reasons for your answer</p>	<p>As a resident [personal information removed] Harts Hill Road, I believe there are many unsound issues in the proposed new homes in NE Thatcham and believe such a development would have a serious negative impact on myself and on the area. As shown on the map my home will be engulfed and Thatcham and Upper Bucklebury will be one urban soulless sprawl with no shops, dentists, schools, anything resembling a means to serve the community seem non-existent in these plans. I have to travel a long way for an appointment, and I have never been able to find a dentist nearby. Thatcham itself has no banks since NatWest and Lloyds Bank Pharmacy has closed, the car park for local shoppers is costly and small. We are only able to have recycling and rubbish collection. Building another 2500 homes can surely only be more challenging for the Council.</p> <p>The proposed development will have a hugely negative impact on what is currently a rare agricultural landscape in an area which is inappropriate in the current climate to diminish agricultural and farming land which has for decades been actively used for grazing sheep. The farmland the proposed development will destroy is home to much wildlife, deer, pheasants, fox, and birds, many of which are flying after many absent years. The woodland is a natural resource and in light of the advent of the Queens Canopy Project will be destroyed. These fields and woods give accessible footpaths to nature for residents and visitors to enjoy and they are also important for encouraging and supporting local farmers so they don't have to sell up to developers to survive, to increase the amount of land and diminish agricultural spaces.</p> <p>Harts Hill Road is a steep narrow road and the drive into my home means a sharp right turn on the hill, across on a road with a limited view around the bend. The speed limit has been adjusted over the years to encourage lower speeds, but there are still accidents on this dangerous corner with particularly drivers cutting through from the busy A4 and taking little notice of the speed limit. The hill road for pedestrians and walkers including children are often risking their lives walking in the road. Cyclists too are not all cyclists expert enough to make it up the hill, causing tailbacks of traffic, including heavy goods traffic. Harts Hill Road is a busy road and such a huge development and the extreme numbers would make this a more dangerous road, and the proposed development of 1500-2500 new properties would have a hugely negative impact on safety, access and pollution.</p> <p>The building of 1500-2500 new homes would take many years. The everyday lives of current residents would be severely disrupted by the upheaval and disruption caused by such proposed building works. Noise, pollution, inconvenient road closures, water supply issues would all have a negative impact on the environment and the daily lives of current residents.</p> <p>I write as a local resident, in objection to the proposed development, in what I believe is the majority view, and trust that the Council will make a decision to deny planning permission for such an unpopular development and which would have such a detrimental impact on the local area.</p>

<p>Please give reasons for your answer</p>	<p>I would like to strongly object to the proposed extension of Thatcham.</p> <p>I feel there are large components of the plan which are completely unsound.</p> <p>I also feel the negative impact of this development would be huge. There is already a huge amount of congestion on t not to mention the pressure on other local facilities, examples being the hospitals in Reading and Basingstoke, and m problem worse.</p> <p>I feel it is very important to keep Upper Bucklebury and other villages surrounding Thatcham separated from the urba their rural character and protect the quality of life enjoyed by their residents.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>

- * Yes
- * No

Please give reasons for your answer

I am writing to object to the planned development in northeast Thatcham as I find this unsound. As a long term resident of Thatcham, I am concerned about this development for a variety of reasons:

Healthcare

GP Surgeries in Thatcham are already oversubscribed and it can take 3 -4 weeks to get a routine appointment. The 150 new houses will put a huge strain on the GP surgeries yet there does not seem to be an evidenced plan on how these issues will be addressed.

The North-East Thatcham development plan (SP17) proposes a 450 sq m primary healthcare facility with the suggestion that it be referred to the Buckinghamshire, Oxfordshire and Berkshire West Integrated Care Board or other such appropriate body. However, no details have been put into strategic healthcare planning.

NHS England rarely commissions new GP practices even where they consider there to be patient demand for improvement. Data from the 2016/17 survey of patients registered in the NHS Berkshire West Clinical Commissioning Group (CCG) confirm there is an even worse situation in other parts of the country. There is therefore no realistic prospect of a new GP practice being established in Thatcham or West Berkshire.

Five of the 10 lowest performing surgeries for percentages for same-day appointments came from this district. Both The Burdwood Surgery and Thatcham Health Centre are in this group.

Thatcham dental practices are unable to provide dental care for the whole population with a significant minority of patients waiting for NHS and private dental care. Thatcham Vision, endorsed by WBC in 2016, confirmed only 60% of residents have access to a dentist (with 17.5% registered with a doctor outside Thatcham). There is no evidence provided that either WBC or the local dental practices are considering the potential impact of increased workload resulting from additional housing.

Thatcham Town Regeneration

As you state in the plan, Thatcham town center and facilities badly need regeneration, only after that is complete, should the development proceed.

Transport

Traffic on the local roads is already overwhelming at peak times, with queues on Floral Way every morning, the A4 is congested and traffic will divert down country lanes which are unfit for the volume.

Since Covid, significantly fewer trains to/from Thatcham have been running. Given the lack of coordination around the railway, this will drive many more people onto the roads that are already struggling to cope.

Schools Provision Overview

The building of 1500 houses will obviously vastly increase the number of children in Thatcham yet the provision for education from through Infant to Secondary education is not clearly defined within the Local Plan Review (LPR). There is no coherent plan that breaches the Council's obligations to provide education facilities for children. Without this provision, the Plan for a large development is untenable.

The lack of a coherent Plan on Schools Provision across the various proposed developments also means that it is impossible to predict the impact on traffic. The siting of a secondary school to the NE of Thatcham would result in a significant increase in traffic in the area, not considered in the traffic plans and models in the LPR.

	<p>Unless the infrastructure (Schools, GP's, Shops etc) are built and functional in the first phase of the development the School for instance has a capacity of 1881 and an actual number of pupils of 1860, so they won't be in a position to</p> <p>Flooding</p> <p>Whilst there have clearly been extra measures built into the latest plans with the Wetlands Park, they have built over normally soak up the rain. I doubt very much the small wetland areas proposed would provide any safety net for those we can look forward to a repeat of the 2007 floods.</p> <p>It is hard to see how the Thatcham area can support a development of this size without a huge detrimental effect on I hope you take my concerns into account when considering this proposal.</p>

Please give reasons for your answer	<p>I have considered all the information available concerning the proposed Thatcham NE development and believe that it is unsound. I object to the proposal on the following grounds.</p> <p>Pollution</p> <p>Apart from the ongoing pollution once the vast housing estate has been built, there will be massive pollution, particularly from the entire build, subjecting residents to major health issues already well documented.</p> <p>In addition, there will be massive noise pollution for years, and light pollution affecting the AONB next to the site, with impacts on animals such as owls and bats.</p> <p>Increased Traffic and Road Safety</p>

The proposal to put a priority junction on Harts Hill Road to release traffic from the site will vastly increase traffic on a country lane into the villages of Cold Ash, Upper Bucklebury, Chapel Row and Bradfield Southend, creating a 'rat run' road already has very poor visibility and without a footpath is already dangerous to those without transport who walk

Bearing in mind that households these days often have at least two cars the proposed 1500 -2500 new homes would increase the number of cars exiting the site onto the A4 and Harts Hill by a considerable amount. At peak times roads are already heavily congested and would struggle to cope with the proposed increase. As locals will know, if you need to get to the railway line at Thatcham to get to and from work the tail back of cars waiting for the barriers to open is often so long that you are down again before everyone has got across. Any increase in traffic would be a nightmare for everyone concerned.

Healthcare

Local GP surgeries and dentists are already overrun. The development plan makes mention of a (wholly inadequate) provision with the assumption that third party providers will open up shop there. But with GPs these days pooling resources to survive, there is no incentive to open a small satellite surgery. The outcome will be even more pressure on existing services, and anyone who has had an appointment these days will tell you that will become a nightmare. In addition, getting a dentist appointment in the area is a nightmare. The proposed development is going to do nothing to improve this.

Services

There seems to be an assumption that third parties will line up to fill in the gaps in your plans, in addition to healthcare providers. Thames Water will provide water and waste services, and various electricity companies will magic up enough to power the new homes and electric cars which will be encouraged by government policy over the next few years.

Thames water have only recently increased the pumping capacity to supply Bucklebury and the surrounding villages. They have had issues with water supply. Building a vast number of houses up the hill will surely put immense pressure on the system.

In addition to the objections above, the housing market is facing a perfect storm of events conspiring to cause a slump in new houses a risky business. The increase in lending rates and uncertainty about the future are driving this. One builder has to build only 8,000 houses nationally this year, compared to almost 15,000 last year. This trend is likely to result in a glut of houses en masse, with developers staging their work over a number of years, consigning us all to incessant disruption for years to come.

This proposal would have a very negative impact on everyone living in the wider vicinity, the Area of Outstanding Natural Beauty. It will take so much joy to so many, the wildlife that inhabits the area and the reason we all live here. There are large expanses of land to use them.

Please give reasons for your answer	I strongly object to the new housing development plans for the below reasons: <ul style="list-style-type: none"> • Significant damage to the Common • Pressure on medical & complementary services including GP surgeries and schools. Kennet is already over so more pressure. • Thatcham and Upper Bucklebury will effectively merge and Upper Bucklebury will lose its identity. This would be a fantastic community and a beautiful and peaceful place to grow up in nature. This would change and ruin this so • Increased traffic through Upper Bucklebury. <p>The negatives hugely outweigh the pros in this case, and I hope the council reconsiders.</p>

Please give reasons for your answer	I wish to object to the scale of this oversized development plan on environmental grounds. I walk daily in Blacklands Copse with its marked improvement in biodiversity, since the recent woodland regeneration at Bucklebury across the Common, where I regularly encounter a variety of wildlife, including deer (Roe and Muntjac), but this would be severely impacted by inevitable increase in traffic and as a consequence, air pollution. Obviously, this pollution would impact on the village population and could cause severe health problems.

	I, particularly find the lack of infrastructure planning and vague proposals (country parks) in these key areas very un

<p>Please give reasons for your answer</p>	<p>*LATE RESPONSE*</p> <p>As a resident of <Address Redacted> I would like to share my objections to the Thatcham North East Development need for increased housing in West Berkshire and government targets, the chosen site for such a large project appears components of the plan are unsound. I am strongly against the proposals and believe that they should be reconsidered.</p> <p>Thatcham already has a high flood risk, with alleviation systems being created. This risk would predictably increase systems in the proposed site area and the movement of ground, alongside the residential streets. The natural landscape ANOB around the proposed site, would definitely be negatively affected by the project. Reduction of green space shows wellbeing, physical opportunities and natural ecosystems.</p> <p>Noise, light and air pollution would increase. Traffic congestion through Thatcham on the A4 and on the route to the particularly at peak times, and especially when there are difficulties on the M4. It is difficult to see how this could be need this increased volume of traffic, more roundabouts, widened carriageways and daily disruption. There would be of life of present Thatcham residents.</p> <p>Demands for services such as dentists, GPs and pharmacies would be unprecedented. The present situation is already budgets is increasing. Any proposed influx in residents would raise concerns regarding the proposal of only one sector.</p> <p>It has previously been agreed that the land between Floral Way and Bucklebury provides a natural gap, creating a connection. The elevation of the land suggests the possibility of three residential areas that would loom over the rest of Thatcham than part of a connected town. The sheer size of the proposal would undermine the present town. Thatcham already has use and needs a different focus to improve its infrastructure, such as developing the high street and sports facilities. housing here? What other possible sites are there in West Berkshire that would not create the same negative impact?</p> <p>As already stated, I am strongly opposed to the proposals and hope that you listen carefully to the voice of the residents surrounding villages. I urge you to rethink and stop these plans.</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>I have read the representations made by Bucklebury Parish Council and agree with their objections to the Regulation 19 version of the LPR.</p> <p>There are clearly significant flaws in Regulation 19 version of the LPR. West Berkshire District Council (WBC) should not submit this document for examination.</p> <p>I have referred to some, but not all, of these flaws below:</p> <p>Timing of Consultation</p> <p>The Housing Delivery Test results published in January 2022 show that West Berkshire Council (WBC) provided 117% of the housing need in the preceding three years. Closer examination shows a more significant oversupply in the last year. This could mean that developments such as North East Thattham are unnecessary.</p> <p>The LPR is based on outdated ONS projections and a flawed methodology for deriving the appropriate housing target for a plan-led system where the amount of housing which must be planned for within any local plan is likely to be significantly higher than the figure in the LPR.</p> <p>Other local authorities have chosen to pause further progress on local plans until recent changes to planning policy are fully understood. This is at odds with WBC's approach.</p> <p>The LPR is not ready for examination, which contravenes Section 20 b) of the Planning and Compulsory Purchase Act 2004.</p> <p>Site Selection Process</p> <p>There is little evidence of a rigorous process being undertaken in the Site Selection Methodology Paper. Thattham T was not adequately consulted.</p> <p>The LPR contains very limited information regarding AWE Aldermaston and AWE Burghfield. There is a lack of consultation with AWE Aldermaston and AWE Burghfield and they were not adequately consulted and considered the impact of AWE Aldermaston and AWE Burghfield in the preparation of the LPR.</p> <p>The Site Selection Background Paper (Reg18 SSBP) refers to Site THA9 and raises concerns that this development would fill a strategic gap between Thattham and Newbury. The same concerns are not expressed in relation to Site THA20 (2,500 dwellings) development. This makes no sense. The analysis is inconsistent. The strategic gap is of fundamental importance between the village (i.e. Thattham and Upper Bucklebury)</p> <p>The proposed development would destroy the separate identity of each settlement and jeopardise the remote nature of the settlements.</p>

The proposal is at odds with WBC's own objections to the Siege Cross plans in 2015/16 (500 houses) - 15/00296/OU. WBC's own expert in that case was categorical in the assessment of the damage that Siege Cross would cause to the local environment. This was repeated throughout WBC's vigorous opposition to the site. Siege Cross now forms part of the THA20 proposal, which is 10 times the size and much closer to the AONB. The potential damage would be significantly greater.

There are also flaws in the Thatcham Growth Study (TGS), particularly in relation to the in the site selection process.

Sustainability Appraisal

BPC has prepared an analysis against the Sustainability Appraisal (SA) objectives (Appendix 2 of it's representation). The conclusions are not based on any accurate or available evidence. An accurate or reasonable assessment leads to the conclusion that the site fails all SA objectives. WBC's approach to the assessment and scoring of the site against the SA objectives is severely flawed.

North East Thatcham Strategic Allocation

Master planning is yet to take place and there is no vision for how the homes will be accommodated on the site, especially as its access is compromised by the pipeline.

There is no detail on the infrastructure or other facilities. The infrastructure has not been costed adequately and therefore the site is deliverable.

The school provision has not been costed within the viability appraisal and therefore the deliverability of this element is uncertain.

There are no details or costings provided for the proposed 1,200 sq m community indoor facility

It is unclear how the proposed outdoor formal and informal sports pitches will be provided when most of the site is occupied by the pipeline.

Given the gradient and level change across the site, it is not considered that a comprehensive network of cycle paths can be delivered.

Links and access to the AONB are being encouraged without consideration of the sensitivity of the common and wild areas.

The evidence base for trip rates and trip distribution is highly flawed and mitigation measures will not be successful.

The highway network in the vicinity of North East Thatcham is already over capacity and development of this scale would breach the threshold set out in paragraph 111 of the NPPF.

It is highly unlikely that the dwellings will be brought forward as net zero carbon and no allowance has been made for the additional energy required for the site.

It is unclear how any development on this site would deliver a 'net gain' for Thatcham Town in terms of drainage and flood risk within the viability report for the site.

Given the highly sensitive location of the site it is illogical that a Landscape and Visual Impact Assessment has not been undertaken for the proposed allocation.

Consideration of heritage impact should have been undertaken as part of the site selection process and subsequently. It is not considered appropriate that this is left to later stages of the planning application process.

Given the significant ambiguity over the position of the impact of the oil pipeline it is unclear whether the site would be developable as set out in the glossary of the NPPF. Given that WBC are acutely aware of these constraints it is illogical that no assessment has been undertaken.

Landscape and Character Impact

There is no evidence to support claims that SP17 will have a positive impact on the environment. By contrast, there is evidence to suggest that it will have a significantly negative impact.

The North Wessex Downs AONB statement on development in the setting of the AONB states that

'examples of adverse impacts on the setting of the North Wessex Downs AONB include: development which would harm the views in or out of the AONB breaking the skyline, particularly when this is associated with developments that have a visual impact (chimneys, plumes or blades for example) loss of tranquillity through the introduction or increase of lighting, noise, or other environmental impact like dust, vibration, spatial associations and historic relationships introduction of abrupt change in land use, loss of biodiversity, particularly of habitats or species of importance to the AONB loss of features of historic and natural landscape which are contiguous with the AONB; change of use of land such that to cause harm to landscape character development which would give rise to significantly increased traffic flows to and from the AONB, resulting in loss of tranquillity and erosion of the character of the AONB. Increase in air and water pollution'

The development of North East Thatcham would give rise to all of these adverse impacts to some degree or another.

The Landscape Character Assessment is now more than 20 years old so can be considered as up-to-date in accordance with the NPPF.

The Thatcham Strategic Growth Study (TSGS) offers little assessment of the damage the proposed THA20 site would cause to the AONB, acknowledging that the AONB partnership has objected to it, and that there is "little intervisibility between the two if any proposals." This does not adequately assess the effect the development would have on the AONB.

WBC is aware of the negative impact on the AONB. The Site Selection Background Paper December 2020 Table 8.2 shows that in developing THA20 WBC is accepting that the separate identity of Bucklebury would be lost and there would be defining the site as a viable site.

The proposal would have a direct and irretrievable negative impact on the AONB. WBC are charged to protect the AONB and the positioning of THA20 as a viable site.

The AONB board has objected to the concept of a country park in close proximity to the AONB, as it will encourage development (which has the potential to cause further harm to the wider areas).

Ecology and Biodiversity Impact

The proposed site is in the setting of the AONB and, as such, the development of the land would not protect nor enhance the biodiversity of the AONB.

The development of this site would have a significant impact on the character and beauty of Thatcham and Bucklebury.

There is no evidence that the impact of the development on biodiversity or the provision of net gains for biodiversity has been assessed. Instead, this is being left to the application stage. This is considered too late and runs contrary to the approach set out in the NPPF.

There is no evidence of the impact of the site insofar as it may contribute to, put at unacceptable risk or adversely affect the environment through air, water or noise pollution or land instability. This appears to contravene the NPPF approach, which says that development should help to improve local environmental conditions such as air and water quality, taking into account relevant information and plans.

WBC has not embedded biodiversity as part of its plan and has instead chosen to leave this to the application stage. WBC has not planned for biodiversity and geodiversity in line with the Planning Practice Guidance, specifically paragraph 8-010-20190721, Revision date: 21 07 2019.

It is a key part of the Bucklebury vision for the Common not to increase the number of visitors, but to place the emphasis on a chance to restore itself and thrive, both in terms of the diversity and abundance of its fragile ecosystem. Based on the LPR, the proposed development represents an additional 4000+ people being actively encouraged into the AONB, via the habitats found in Bucklebury Common, with its ancient woodlands and heaths, pastures, greens and historic ponds. The plan aims to balance accessibility and leisure usage with the needs of the environment, with increased usage from cyclists and ground-nesting birds, notably woodcock, and other wildlife.

The land immediately adjacent to the proposed development area for SP17 contains 41 Local Wildlife Sites and is part of a Biodiversity Opportunity Area.

The data being used to establish the presence of species is out of date. In 2020, Bucklebury Parish sought environmental impact assessment for SP17:

- 80% of surveys were conducted more than 15 years ago
- 50% were more than 20 years old
- 44% were over 30 years old

BPC has appointed ecologists to conduct an independent study of the impacted area. The findings from a single day survey indicated that the site had a much higher biodiversity value than previously appreciated, including the presence of several bird species and one threatened migratory species, several bat species and abundant badger setts. The hedges, old trees and corridors linking up different habitats within and beyond the site boundaries. These initial findings imply that a full study of the site and measures and BNG will be far more complex for the development than was anticipated by the planners. This one study provides more information about the site than has been presented in the whole of the LPR and its available evidence base. The area has a much higher biodiversity value than assessed by WBC.

Protected species are present across the site and would be impacted. No detail on mitigation measures has been provided. Network features are under threat from the development and will severely impact distribution of key species.

Highway Impact

YES Engineering Group Limited was appointed by Bucklebury Parish Council to review the transport related evidence. The review indicates there would be delays and congestion occurring around key junctions along the A4 corridor, with through traffic on the routes.

Journey time analysis was carried out and assessed the most desirable routes for those travelling east (towards Reading). It was demonstrated that the quickest route in each direction is via Harts Hill Road or via Cold Ash Lane rather than the A4. The impact on these routes has not been assessed and this is a fundamental flaw within the modelling assessment.

The selection of North East Thatcham for significant development is fundamentally wrong as traffic will need to divert onto non-highway based mitigation measures are almost impossible to achieve due to its location/topography.

Development at North East Thatcham is likely to cause displacement onto wider routes away from the A4, through local roads in Bucklebury. The WBC Phase 1 Transport Assessment describes these routes as undesirable and, critically, the impact of any of the evidence presented in support of the emerging local plan. Additionally, there are fundamental flaws within the assessment.

In summary:

- The trip rates set out by WBC are unreliable and not robust.
- The trip distribution is unrealistic (all evidence suggests traffic will be diverted from the A4).
- The proposed mitigation measures suggested by WBC are improbable at best.
- The location of site means car traffic will dominate the area.
- The Highway network in the vicinity of THA20 is already over capacity.
- No assessment has been made of the routes most likely to be affected by an increase in traffic. Increase in traffic to Bucklebury will pose highway safety issues.

Heritage Impact

WBC does not appear to have taken into account the setting or significance of Colthrop Manor as a designated heritage asset in East Thatcham or considered the impact of the development or the way in which the capacity of the site would be affected.

Infrastructure and Services

There are significant failings with the LPR on whether the provision of infrastructure associated with the development under policy SP17 is viable or deliverable.

The North-East Thatcham development plan (SP17) proposes a 450 sq m primary healthcare facility with the suggestion to refer to the Buckinghamshire, Oxfordshire and Berkshire West Integrated Care Board or other such appropriate body. However, there is no detail or insight into strategic healthcare planning.

Few new GP practices are commissioned by NHS England, even where they consider there to be patient demand for them. Figures of patients registered in the NHS Berkshire West Clinical Commissioning Group (CCG) confirm there is an ever-increasing demand in areas of the country. There is therefore no realistic prospect of a new GP practice being established in Thatcham or the surrounding area in the future. There has been no approach by WBC or the developers to any local GP practice to discuss an appropriate site for one or more practices could relocate. All three existing practices are already overstretched.

Thatcham dental practices are unable to provide dental care for the whole population with a significant minority of patients having to travel afield for NHS and private dental care. Thatcham Vision, endorsed by WBC in 2016, confirmed only 60% of residents have access to a dentist (with 17.5% registered with a doctor outside Thatcham). There is no evidence provided that either WBC or the developers have consulted any local dental practices regarding the potential impact of increased workload resulting from additional housing.

The provision for education from Nursery, Early Years, through Infant to Secondary education is not clearly defined within the LPR.

There is no coherent end-to-end plan, which appears to breach the obligations of WBC to provide education facilities for its residents.

The lack of effective or justified education provision across the various proposed developments also means it is impossible to predict the impact on traffic.

The location of a secondary school in the North East Thatcham development under policy SP17 would inevitably result in increased traffic across the whole Thatcham area and this has not been adequately considered in the traffic plans and modelling in the LPR.

	<p>There are no details in the LPR of the provision for Nursery or Early Years education. SP17 merely states that the site</p> <p>The provision for primary school education is unclear and contradictory. There is no data or evidence on the planned requirements. The LPR proposes that the sum of £12 million will be sourced from the developers of SP17 to fund the</p> <p>However, with no recent data available (the only data referenced is from 2011), it is impossible to assess if this funding will ensure the delivery of the required education provision.</p> <p>The plan for secondary school provision is unsound for the following reasons:</p> <ul style="list-style-type: none"> • There is no satisfactory evidence of the number of pupils the school is to cater for • The location of a school within the proposed development is not clear • The number of Form Entries is not defined, but it is noted that anything less than a 6FE school is unsustainable. • The timing and responsibility for the funding is not clear and has not been adequately costed in the viability appraisal. • There is no evidence that the proposed funding is sufficient to meet the Council's obligations to provide education. <p>Climate Change and Flood Risk</p> <p>The Sustainability Appraisal is ambiguous in relation to flood risk. It states that the development at North East Thatcham will have a positive impact but there is also a '?' place in the assessment box.</p> <p>The justification for the assessment given by WBC states that the policy requires consideration of SuDS that could reduce flood risk, but there is no other reference made to flood risk. The policy does include requirements for GI, ecology and sustainability which may all have a positive impact on flood risk.</p> <p>It is not considered that this is a credible assessment, and the question mark demonstrates that WBC are unsure of the assessment. It is not considered that the LPR is justified, effective or consistent with national policy and is unsound on this basis alone.</p> <p>Water Supply and Foul Drainage</p> <p>Flood risk is a significant threat to Thatcham, and lack of evidence to suggest this has been adequately considered.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>Consultation and Duty to Co-operate</p> <p>WBC announced the Regulation 19 consultation on 20th January 2023. Interested parties were then notified that the website would be unavailable on 21st and 22nd January due to planned maintenance of the website. It was unclear when the review of the LPR evidence could not begin until 23rd January 2023. This effectively shortened the consultation period to the required 6-week period.</p> <p>WBC did not properly consult Bucklebury Parish Council (BPC) in the first instance when carrying out the Settlements Review and their representations.</p>
<p>4. Proposed Changes</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	

Please give reasons for your answer	<p>I would like to raise the following objections for the Thatcham NE Development,</p> <p>The traffic will be increased in an area that is already struggling to cope with traffic volumes. The proposed exit on to up through Upper Bucklebury village as the A4 is already extremely busy.</p> <p>No Health Impact Assessment has been published on the proposed NE Thatcham Development. There is no evidence that 1500 to 2500 new houses will be dealt with by the already local struggling NHS.</p> <p>There has been no evidence to suggest a serious attempt to evaluate the consequences on Bucklebury common AOC. Approximately 4000 people on the development site, the common and its legally protected wildlife must be considered. Concerns are coming regarding the proposed two country parks. It seems these have already been downgraded to community parks.</p>

Please give reasons for your answer	<p>I am writing to object to the planning application for 1500 - 2500 in NE Thatcham.</p> <p>My objections are based on the facts that components of this Plan that are completely unsound.</p> <p>1) Traffic will be greatly increased through the villages and completely unable to be handled by the exit roads. Access inadequate on already dangerous and busy roads.2) Education provision for all years is not clearly defined in the L coherent end to end plan to achieve education provision for this large new housing development and the Plan is untenable</p> <p>3) The document gives no detail or insight into strategic healthcare planning for the new development. WBC and the relevant HIA or provided evidence of having appropriately liaised with local health care agencies or providers. There is no evidence to provide medical and dental facilities for the proposed 1500- 2500 new houses.</p> <p>4) With regard to the environment there is no evidence to support claims that SP17 will have a positive impact on the environment. I believe it will have a significantly negative impact. The policy looks to build as many houses as possible in small areas. No attempt has been made to investigate and address the consequences.</p> <p>I therefore strongly object to the proposed development on the grounds that is unsound.</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am objecting to the NE Thatcham development on the basis that the plan is unsound in the following areas:</p> <ol style="list-style-type: none"> 1. Transport: There will be increased traffic both in Thatcham and in Upper Bucklebury where I live. I think this has been a major issue. The plan for an exit site on Harts Hill will increase traffic congestion. This impacts me negatively as I now drive my council school bus has been cancelled. I regularly pass pedestrians on Harts Hill and the junction where there is already a safety concerns on this road. There are no modelling results for this junction. Why is this? The council assessment is based on walking, cycling and public transport use but our bus route in Upper Bucklebury has been cut and this proposal will increase concerns so I would be even less likely to use this road walking or cycling. In addition, crossing the Thatcham level crossing will damage plants, threaten ground nesting birds such as nightjars and fragmented habitats of reptiles such as adders regularly and it is beautiful countryside that will be destroyed forever. 2. There is no detail of healthcare provision for those living in the new houses. The local surgeries in the area are already at capacity and me negatively as further pressure will mean appointments at Chapel Row surgery will be even less available. 3. It will have a significant negative impact from an environmental point of view. Damaging heathland and woodland and a major greenfield development in the broader area of the North Wessex Downs ANOB and it will have a detrimental impact on the environment. The original country park has now been downgraded to a community park and there is no evidence that it will have a positive impact as claimed and no significant analyses of the consequences to the environment of the plan. The heath is a fragile environment will damage plants, threaten ground nesting birds such as nightjars and fragmented habitats of reptiles such as adders regularly and it is beautiful countryside that will be destroyed forever. 4. There is no coherent plan for school provision. My children currently attend Kennet school which is full! Where are the new houses going to go to school? Or will the proposed secondary school be built before the houses. Unlikely given a local school is established. To this end I cannot see how the impact on traffic can be assessed accurately. Traffic around Kennet school on the school day is already very congested. Another school will significantly add to traffic at these times. The number of children at an additional secondary school may not be feasible but where else would these children go? I predict one of the consequences of the plan in Upper Bucklebury will no longer be in catchment for Kennet school which is just down the road but they will have to travel a long route and have friends living far away. This plan would have a negative impact with additional traffic on school runs, more congestion and less connection with Thatcham if children in our village can only go to The Downs. <p>Several Local Authorities have put their plan making on hold given changes so that planning inspectorate will no longer approve decisions so why are West Berkshire not taking this approach given the strong objections to such a large development on health provision, school provision, traffic numbers and environmental impact?</p>

3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No

<p>Please give reasons for your answer</p>	<p>I am writing to object to the WBC proposal to build a development of many houses around NE Thatcham as I find it u</p> <p>I live in Upper Bucklebury on the main road >exact location of property redacted/personal details>.</p> <p>Apart from being horrified at the idea of so many houses being built on an area of unspoilt peace and beauty, absolu</p> <p>have found components of the plan which are unsound and the effect of this development will have a severely negat</p> <p>The most obviously negative effect on Upper Bucklebury will be the increased flow of traffic that will inevitably occur. already very busy and has become much busier since the development of houses at the bottom of Harts Hill.</p> <p>The increased volume of traffic from the proposed exit at the north of the site onto Harts Hill, is very a serious conce</p> <p>inadequate for a huge volume of traffic and, as it is already, dangerous for walking and cycling, so with an increase in</p> <p>new development even although the site may possibly have 'safe travel' within itself , the roads funnelling in and out</p> <p>pollution both in respects of light and air. There is also a proposed car park on Harts Hill-car park for what and why?</p> <p>traffic pressure on the road.</p> <p>I would like to understand where 'safe and sustainable transport' fits into the design of this development.-'to increase</p> <p>public transport' How?</p> <p>Healthcare:</p> <p>The Northeast Thatcham development plan SP17 proposes a 450 m² primary healthcare facility with a suggestion th</p> <p>Buckinghamshire Oxfordshire Berkshire West integrated care board other such appropriate body. This document is a</p> <p>strategic health care planning. However neither WBC nor the developers, as public and private stakeholders respect</p> <p>published a prospective HIA (health impact assessment) to the proposed Northeast touch of development. All propo</p> <p>is obviously likely to have a significant health impact in relation to its size and location should be accompanied by a</p> <p>with the current guidance for public-health England. The HIA should include reference to how the proposals for devel</p> <p>health service providers regarding impacts on primary healthcare services. Development proposal should demonstra</p> <p>have been considered in the design of the scheme because an unacceptable impact of health and well-being of exis</p> <p>permitted.</p>

A multi – agency approach is required for tackling health and well-being. The Berkshire West Health and Wellbeing s has been developed by the Reading West Berkshire and Wokingham Health and Wellbeing boards together with the partnership. Developers are encouraged to engage with the healthcare providers at the earliest opportunity in order requirements associated with a new development. It is a great concern that there appears to have been no direct en Thatcham development consortium and local general practices.

There are 3 over stretched GP surgeries which at present cover the area of the proposed NE Thatcham developmen each other their combined lists include about 27,800 patients which really means just under 2000 patients per GP. C moving into a housing developments tend to make a greater demand on GP services. This is because there are mor maternity care. Pharmacy closes in Thatcham have put further pressure on healthcare practices.

There has been no approach by WBC all the developers to any local GP practice to discuss an appropriate site, floo or more practice could relocate in the event of the housing development being built. An enlarged primary healthcare s located close to the middle of Thatcham to improve access and minimise traffic as the proposed NE Thatcham devel of the population. This would be likely to be supported by Thatcham town council but has not been suggested in the options. Local practices did not have an input with inadequate 450 m² floor side proposal which they only discovered 2022, appendix D.

In respect of Health Care-Proposals for a major development that is likely to have a significant health being impact i should be accompanied by a fit for purpose health impact assessment in accordance with the current guidance from should include reference to how the proposals for development have been discussed with health service providers n healthcare services. The development proposal should demonstrate how the conclusions of the HIA having been co scheme because an unacceptable impact on the wealth health and well-being of existing new communities will not t neither WBC nor the developers as public and private stakeholders respectively appear to have arranged or publishe the proposed north-eastern development.

The three GP practices -which would cover the North East Thatcham development site already overstretched. These practice, West of Harts Hill Road, Burdwood Surgery east of Harts Hill Road and Chapel Row surgery.

Thatcham doctor's Surgery are run independently of each other in the combined list includes around 27,800 patients GP. Newly registered patient moving to make a greater demand on GP services, therefore how will this development WBC and the developers have not made provision to mitigate the new burden of 1,500 or more houses-They have n provision of a viable primary care medical facility.

Dental Practices:

There is no evidence provided that either West Berkshire council or the developers have approached any local denta impact of increased workload resulting from additional housing. As it is now Thatcham dental practice are unable to population with a with some patients needing to travel further afield for NHS and private dental care.

Schools provision.

Provision for education for nursery earlier through infant secondary education is not clearly defined within the local plan end to end plan: this therefore breaches the councils obligations to provide education facilities for children. Without th housing development is to untenable.

The lack of a coherent plan on schools provision across the various proposed developments also means that it is impo impact on traffic. The sighting of a secondary school to the north-east of touching would result in significant increase in area, not considered in the traffic plans and models in the LPR.

Policy SP1 7NE Thatcham strategic site allocation states that the site will provide early years provision – what are th

I cannot see any clear vision for proper funding or School Place provision -schools need to be available before houses incomplete and contradictory on the provision of secondary school in and around Thatcham. The latest LPR is in cor documentation. It proposes that the sum of 15 million be contributed by the developers to secondary education. The the land to be provided and hence no possibility of assessing at suitability.

It is clear that the plan for secondary school provision is unsound:

There is no such a satisfactory evidence of the number of pupils the school is to cater for, the location of school is no is not defined but it is noted to anything less than 6FE school is unsustainable, the timing of the funding is not clear proposed funding is sufficient to meet the Council's obligations to provide education.

Environment

The green spaces surrounding Thatcham and the local villages, Upper Bucklebury, Midham , Cold Ash, harbour a bi ever if built over by thousands of houses. This area is home to hares, buzzards, kites, Stone Chats, Nightingales, Th bush crickets, slow worms, Meadow grasshoppers, Woodlarks, Dark bush crickets. Adders, all manner of protected faun not annihilation. The Nightjars fly to Bucklebury every June from Africa and mate undisturbed on the commons in Bu that with a huge development of houses which create both noise and light pollution, not to mention the footfall on th thousands? Are we to lose this precious bird because other less sensitive sites won't be found?

The LPR's Sustainability Appraisal accepts that SP17 will, by building on a greenfield site inevitably have a negative imp but there is no detail on any mitigation for this impact. There are plans for community parks-but whatever these are, biodiversity, with the additional 1000s in footfall, noise, litter, light pollution, dog walkers, cats ...the negative impact i

To Conclude:

	<p>Siting a major greenfield development in this area of biodiverse treasure will cause irredeemable damage to the environment. The biodiversity will be lost forever.</p> <p>Are you really willing to destroy this fantastically beautiful piece of nature-depriving future generations of their right to enjoy it?</p> <p>The poet John Clare was writing in the early 19th century, when 4 million brown hares lived in Britain. Today, there are only a few left. 'dance, play a loiter still'- but only just. Like all British mammals, the Brown hare has been hit hard by habitat loss. I leave you with a poem which I hope will make you hesitate in the plans of destroying the habitat by passing the plans for the NE Development.</p> <p>Hares at Play</p> <p>The birds are gone to bed, the cows are still, And sheep lie panting on each old mole-hill; And underneath the willow a-resting, lies the fallow plough.</p> <p>The timid hares throw daylight fears away On the lane's road to dust and dance and play, Then dabble in the grain bushes, and fall from the barley's beard; Then out they sturt again and round the hill Like happy thoughts dance, squat and loiter.</p> <p>John Clare</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	I am objecting to the plan as it is materially unsound, unsound to the point I cannot quite believe there is even a con why this is so materially unsound are as follows: Transport Our house on the Avenue is on the border of this project in an area of Outstanding Natural Beauty, teeming with wild swamped by traffic which will upset the delicate ecosystem. The planners have carefully omitted the fact that there is a plan for an exit at the north site onto Harts Hill which is th was only made apparent as late as 6th Jan when the Transport Assessment was published. The traffic is going towa spread into Chapel Row and beyond. The infrastructure cannot take this. The wildlife cannot take this. There will be n is a dereliction of duty to the countryside.

The Transport Assessment talks about new priority junctions, but modelling suggests there won't be problems, and yet results at all for Harts Hill! Unsound.

Where on earth are all the cars being parked, again a car park is being shown on Harts Hill, this is close to the coming new influx of walkers and people.

The roads will become busier, cycling, running, riding will all become more dangerous.

Healthcare and Infrastructure

Again whoever came up with the location of Thatcham was mad. There is no detailed healthcare planning in the document. If a new GP practice, there has been no approach by WBC or the developers to any local GP practice to understand their needs they have. Thatcham, Burdwood and Chapel Row are all full. What on earth do these planners think they are going to do with the proposed development.

Dental practices are also overrun, I know that trying to find a hygienist for a practice is almost impossible speaking to the council at Stage 2 and 3 of the report on this project, scant detail is given more than a 2020 acknowledgement that GP facilities are too light on detail and ill thought this piece of the planning has been shown. This is very dangerous for any new residential services are near breaking already.

Environment

I alluded to the fact we live in an AOB. I cannot believe that the Council wants to slap 1,500 houses on agricultural land at danger to both the Bucklebury Plateau Biodiversity Opportunity Area including its woodlands and wildlife. Some vague proposals sounds both suburban and ill thought.

It is farcical to validate any claim that this planning will have a positive impact on the environment. Quite the contrary it is about to destroy one of the ancient areas of biodiversity and fauna west of Reading. You would be slowly asphaltting the countryside and joining Newbury, polluting the countryside from Junction 10 all the way to 13 of the M4.

The WBC states in the LPR that a Sustainability Charter is required. Legally required biodiversity net gains are needed to be submitted or been made publicly available. This is unsound and flimsy as the rest of this shallow planning piece.

Where on earth are another 4,000 people going to seek green space and recreation? A vague country park? Where are they going to go into the AOB, Bucklebury, Chapel Row, Yattendon. The areas will be wrecked. In the SP17 the developers couldn't even provide a country park, and they were demoted to community park which sounds like a merry go round, some swings and a slide for the developers.

The LPR's own Sustainability Appraisal has some very sad news, and revelation, even it concedes that SP17 will have a negative impact on sustainability. Why on earth are you building on a greenfield site? Shameful. Unsound. Please stop this.

Education

The lack of thought and capacity mirrors the healthcare concerns. No coherent plan has been put forward, no details of school education is contradictory in terms of planned numbers, secondary schools are already oversubscribed, the new schools suggested however cannot be filled, as government guidelines are that such schools with less than a 6FE are not sustainable. There is no funding earmarked for school facilities sports ground etc.

Conclusion

WBC should pause the plan making. They should wait for updated planning guidance that is coming later this year. It is not to progress for the time being. Frankly most people find this development more to do with greedy developers and land speculation than thought of consequence to the local communities and this beautiful land.

Please give reasons for your answer	<p>I am writing to object for the following reasons:</p> <ul style="list-style-type: none"> • Traffic – increased traffic through Upper Bucklebury and other villages; WBC propose a new roundabout on Harts Hill of the northern end of the development, and a car park, also on Harts Hill; additional congestion on the A4 • Pressure on secondary schools – Kennet is already over-subscribed; accommodation for additional secondary schools specifically stated • Consequential damage to the Common – increased footfall; increasing damage to an ecosystem of national importance • Environment – Greenfield development abutting an AONB with no up-to-date evidence nor strategy for positive environmental gain • Pressure on medical & complementary services – additional GP surgeries are not part of NHS strategy for the region • A 'Country park' – this has a specific accepted definition which is not met in this Plan. The three small, isolated settlements have no meaningful environmental value or commitment to exclude subsequent development • Lack of strategic gap between Thatcham and Bucklebury – Thatcham and Upper Bucklebury will effectively merge and lose its identity • Number of houses now “at least 1,500” – From an initial site assessment of 2,500 of which 1,250 were to be built, the number has in fact increased to 1,500 houses because the Plan extends to 2039 rather than 2036 (as originally proposed)

Please give reasons for your answer	<p>I have grown up in Upper Bucklebury and am deeply saddened to hear of the possible change in not just a landscape but a way of life. The impact of this will be incredibly wide-felt, not just on the community but on the entire surrounding area.</p> <p>Squeezing resources doesn't work. Increasing pressure on Kennet where I went to school will impact its ability to provide a standard that enriches young peoples lives. Beyond this, GP surgeries, supplies and primary schools which are all being further pushed. You will responsible for making the decision that leads to a decrease in the quality of health, education and the environment. The common is special. Historically and naturally. You risk damaging a place of national importance and personal memories. You're affecting the future generations and living ones. In the years that follow, think about who benefits from this? I don't. I appreciate the difficulties that lie ahead but equally the need for maintaining green space more now than ever as we live in an environment this plan poses.</p> <p>I can only ask that you reconsider to think of others around you and the importance of community in an ever-increasingly isolated world. Don't forget you supported this decision that will profoundly impact the lives of those in Upper Bucklebury and beyond.</p> <p>The plan is unsound and should be discounted.</p>

Please give reasons for your answer	I am writing to object to the LPR Regulation 19, in particular NE Thatcham development, as it is unsound and unrealistic. I don't see how this plan will not have a massive detrimental effect on the environment as well as safety and education. As a student of [personal information redacted] School, I don't understand how there will be enough school places for all the children as Kennet already has loads of pupils. Additionally, as a new driver, it is a scary thought for me that there will be such a large increase in traffic. Particularly on Harts Hill which is already a very dangerous road. I don't see any evidence in the plan of measures to reduce an increase in traffic, and therefore find it unsound. There will be a massive impact on our local environment with habitats being destroyed and more people causing more pollution. The proposed 'parks' will be in any way as biodiverse and green as the current ancient woodlands and heaths and your promise that it will be. Not only is this terrible for the environment, but will also have a negative effect on mental and physical health and clearly not thought through.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements	

<p>with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I object to the proposal to build up to 2,500 homes on the greenfield area now known as the proposed Thatcham NV</p> <p>Transport</p> <p>Thatcham's infrastructure in the area will not be able to cope (the A4, Floral Way, Level Crossing), and public transport unlikely to impact on the usage of cars in what is largely a rural area where cars enable one to get from A to B easily.</p> <p>The site of the proposed exit on Harts Hill is not clear from the plans and there is no modelling on the use of this exit.</p> <p>Much of the using the Harts Hill exit will travel through Upper Bucklebury towards Cold Ash via Burdens Heath. In both directions (with no pavements in some areas) and going past Primary Schools (Bucklebury Primary and St Finian's) which is likely to result in the lack of provision for parent parking at drop off at St Finian's resulting in the need to overtake with little site of view.</p> <p>The increased traffic will also inevitably negatively impact Area of Outstanding Natural Beauty and footfall on Bucklebury.</p> <p>The Plan does nothing to explain how the infrastructure will cope, advise how safety in the areas stated will be addressed in the villages which is adjoins.</p> <p>Environment</p> <p>The development is on greenfield site which cannot be positive for the environment. rather than developed land and is home to a variety of wildlife and protected woodland. The development will result in additional traffic driving through the area which will be detrimental to the fragile ecosystems. I understand the focus of Bucklebury Common is focused on not increasing human pressure on the common, but with the homes so near the common which I am unable to see any way of mitigating.</p> <p>The proposed plan is unsound and needs further consideration and ultimately withdrawal. While I appreciate the need for housing the site is unsuitable. Smaller developments in multiple locations would seem more suitable to prevent transport and environment concentrated area.</p> <p>Healthcare</p> <p>The local healthcare facilities are already overstretched without further footfall from new residents. Given the financial constraints by GP practices nationally our area is highly unlikely to be allocated another site. I understand that the local practices are struggling with the impact on their services which confirms that there is no evidence to support sufficient resourcing and therefore no facilities for residents (existing or new).</p> <p>Please reconsider and withdraw the plan.</p>

<p>Please give reasons for your answer</p>	<p>I wish to object strongly to the proposal to build 1500 - 2500 houses on the north east of Thatcham for the following</p> <ol style="list-style-type: none"> 1 The proposal will severely damage the environment of the delicate ecostructure of Bucklebury Common. It will have a negative effect on the site of the proposed development. Your reasoning of providing green spaces is unsound. The LPR accepts the development will have a negative impact on environmental sustainability. 1 The increase in traffic will cause safety issues for the residents of Upper Bucklebury and the surrounding lanes and the inevitable increase in population will produce. It will be particularly detrimental to the school and the School. 1 There are already sewage leakage issues into the Kennet and Avon canal. No thought or provision has been given for the extra sewage from the 2500 extra homes. 1 The existing educational establishments are already vastly oversubscribed. In order to provide continued education and development from outset, there needs to be a school built first. 1 Healthcare facilities again are already up to capacity. Where will the medical help come from if residents cannot access the prospect of a new surgery being taken on by an existing practice. Indeed there hasn't been any consultation on what sort of healthcare will be available. Existing residents already have a long wait to see a GP. 1 There are other brownfield sites which should be considered first for development before spoiling these beautiful green crops as is demonstrated by the current vegetable shortage. <p>How the Council who are meant to represent and work for the good of the district can contemplate a consultation of this nature is beyond belief.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>

<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am objecting to this plan for 2,500 houses proposed for NE Thatcham.</p> <p>It is already hard to speak to a doctor in Thatcham, let alone make an appointment.</p> <p>It is impossible to book in with a NHS dentist, even private practices are full.</p> <p>We do not have a main emergency hospital close to Thatcham which already causes problems and therefore it is ridiculous to propose extra houses. Resources would be stretched even more with 2,500 new houses. This would have an impact on Reading hospitals and would also affect the number of ambulances and crew needed. This could cause people not being able to get to hospital could cause fatalities.</p> <p>The Air- ambulance facilities would also be stretched and could cause fatalities.</p> <p>The schools are bursting with waiting lists for people that live close by and want their children to go to the local schools.</p> <p>The roads are already extremely busy especially at rush hour & school drop-off and pick-up. More cars on the road will make it worse.</p> <p>There are already many small developments popping up and spoiling the look of Thatcham and this large development will bring in the extra cars in and out.</p> <p>This would have an adverse effect on wildlife.</p> <p>I feel that this development will affect everyone living in Thatcham and surrounding areas and it is ridiculous that this development in Thatcham will not be a nice to live and bring up a family and house prices will slump if local people move away which is not designed to be a big town!</p>

<p>Please give reasons for your answer</p>	<p>I am writing to object to the planned NE Thattham Development.</p> <p>I believe the plan is not thought through with little or no mitigation to the impact it will have on the infrastructure of TH villages.</p> <p>The location of the site means that there is going to be a massive increase in car traffic with no improvements to the roads struggling with the current traffic volumes.</p> <p>The A4 through Thattham is already a bottleneck, Floral Way has queues in the mornings and the extra traffic through will increase safety issues. I don't see any assessment has been made of the routes most likely to be affected by the increased plan to improve the roads or mitigate the problems that will be caused.</p> <p>There does not seem to be any suitable plan to manage the increased school population with current schools already at their best unclear and unsatisfactory with no details for nursery and early years education for example.</p> <p>There doesn't seem to be any realistic plans to cope with the increased demand for Doctors and dentists.</p> <p>There is also the damage to environment with the increased risk of flooding, damage to ancient woodlands, reduction in green space in Thattham and Bucklebury and siting this development next to an AONB. There seems to be no plan for adequate open spaces forcing people to travel to other locations increasing traffic further and the subsequent damage to the AONB through increased traffic.</p> <p>I fully understand the need for more housing. I am of the opinion that allowing such a large development with little or no mitigation and improvements to infrastructure and environment is a matter of complete neglect to the people and environment of the area and goes against many aims of the council and the government's own policies.</p>

<p>Please give reasons for your answer</p>	<p>I've tried going to the consultation web page but it is horrendously designed and clearly intended to discourage ordinary people from participating. I remember the floods of 2007, trying to drive home after work with both the roads coming down from Cold Ash turn north of Thatcham would increase the likelihood of that being repeated. I walked up Lawrence's Lane a few days ago and the side of the lane was flooded and this after a dryer than normal February.</p> <p>Apart from this, there is also the question of services. Traffic on Floral Way is already a nightmare and the bus services are being cut from Thatcham. In the 26 years I've lived here, I've noticed that the bus services have been steadily reduced and mostly cut. This will pretty much add 5000 extra cars and the roads can't cope with the current level of traffic.</p> <p>Also it's pretty much impossible to get a doctor's appointment, again there aren't enough to cover what we have now. It is supposed to have been expanded over the last 10 years to match its current population which hasn't happened. This is what happens.</p>

Please give reasons for your answer	<p>I am the owner of <address redacted>, a farm that immediately abuts approximately 800 meters of the eastern boundary of the NE Development ('the Proposal').</p> <p>Inevitably, as a Midgham resident, my submission is Midgham-focussed, but I believe that many of my points are relevant to the Proposal, namely Thatcham, Bucklebury and Cold Ash.</p> <p>It is my proposition that the Proposal contains fundamental elements that are flawed, insufficient, and intrinsically unsound. WBC is under a statutory obligation to carry out adequate consultation with all concerned/relevant parties, on schemes of particular enormity and complexity of this Proposal.</p> <p>It is my assertion that WBC has not carried out meaningful and/or timely consultation with, amongst others, key parties to the Proposal, namely, Midgham Parish Council, the residents of Midgham, and the property owners immediately adjacent to the P</p>

been no public forums or debates organised by WBC to inform the above parties specifically of the nature, raison d'être of the Proposal.

For example, I, as one directly affected by this Proposal, have not been contacted at all by anyone publicising or justifying it. So, they would have elicited the significant fact that I own the land and the stream that lies on the eastern margin of the site. I have spent 29 years of time and expense in creating a wild life corridor in this area, close to the North Wessex Downs Area of Outstanding Natural Beauty, as well as further along the course of the stream and the adjacent land, also owned by me. Suffice it to say, I will be adversely prejudiced by this hard-won situation.

WBC's Proposal now calls for 1500 homes on a site initially proposed (in 2020) for 2500 homes, and is located NE of the site, on agricultural land, currently in agricultural production, situated immediately adjacent to the AONB. In the current Proposal, the reduction is reflected in a reduced development site size, so it is not improbable that the original proposal of a 2500 homes development would have followed its course.

The absence of any authoritative and detailed Environmental Impact Study to support this Proposal is astonishing; but the 'likely impacts on the environment' are appallingly vague, misleading and totally unsubstantiated. In fact, this Proposal will have a negative impact on the local environment and highly detrimental effects on the existing (and currently protected) wildlife. A population of approximately 4000 people, with all their attendant life support systems and facilities, will necessarily damage beyond repair the current well-established and abundant eco systems and bio-diversity.

There is no justification for this unplanned and delinquent devastation of the virgin countryside, when other more appropriate sites are available. WBC is ignoring other potentially very significant impacts that a development of this magnitude will have on the locale, all of which will affect Midgham.

For example, Traffic. 1500 homes, at the outset, will involve at least an additional 1500 vehicles (cars and vans) utilising the existing road systems which, at best, are barely coping with current traffic volumes and will, at worst, create further major traffic problems. The road that has deteriorated significantly since I have lived here (for 29 years), and is now used as a 'rat-run' from Bucklebury to the A4, has branches that have been hugely eroded, fences and hedges that have been badly damaged (releasing cattle, potentially onto the road), and tree branches knocked down by vehicles that should be prohibited from using what is, essentially, a farm track. So walkers and motorists are all much more substantially at risk NOW. What it will be like when any new development outlined in the Proposal is added to the volumes of traffic onto the Lane, via Bucklebury or the A4, is difficult to conjecture, other than that it will inevitably be even worse.

The WBC Phase 2 Transport Assessment Report July 2021 asserts that the policy is likely to have a 'Positive Impact on the Environment'. This is critical to the design of the site'. This is simply unsubstantiated and unachievable nonsense, as other privately commissioned reports have averred.

And, Education. Existing School facilities are already over-stretched and failing, and any exponential growth in pupil numbers from local housing development, will necessitate pupils being transported into neighbouring towns (assuming their facilities are not affected by traffic problems). The Proposal makes no reference to a detailed study of the impact that a population of the size envisaged will have on existing local education resources, nor does it offer concrete solutions to cope with the required growth in education.

The LPR, which accommodates the entirety of the Proposal, is inconsistent, incomplete and contradictory in its consistency with primary or secondary education provision.

And, Healthcare. I understand that WBC has not consulted with the existing local healthcare provision facilities, including other special Health service providers. These are already severely overstretched, evidenced by 3 to 5 week waiting times for specialist appointments available at all. The 450 sq m primary healthcare facility proposed, barely touches the surface of the demands of an increased population of 4000, and is a typical WBC unsubstantiated effort to legitimise an ill-considered answer to a serious issue.

Finally, I have to question WBC's continued vigorous promotion of this Proposal, in the face of salient criticism from the public. WBC proposition is certainly predicated on insufficient and unsubstantiated evidence. Whilst the core requirement for a development is it is essential to reflect that any such requirement must be accurately measured against scientific and professional requirements, of suitable site locations, of size of individual developments, of character and quality of construction methodology, of requirements, of likely impacts on the environment and vital eco-systems, and on actual need, as opposed to profit.

All of the current reaction to this Proposal points to a need to thoroughly revisit the core elements of the Proposal, including the massive New Town (the size of Hungerford), its location on virgin agricultural land, the absence of any authoritative support for Health provision, Policing, other Infrastructure such as drainage, telecoms, water, electricity and gas, impact on the local environment and the effect such a Proposal would have on the lives and well-being of existing local residents.

I strongly recommend a 'back to the drawing board' policy on this Proposal and, indeed of the whole LPR proposition. The current policy is clearly to build as many houses as possible in an area of virgin countryside, the proposition being supported by insufficient evidence, which itself ignores the pragmatic probability of the consequential damage to the environment, both human and natural. A proposition of this magnitude is so poorly researched and presented and which proffers the message that everything is possible, unsubstantiated policies aver that it will be.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?
 * Yes
 * No

No

Please give reasons for your answer

WBC is under a statutory obligation to carry out adequate consultation with all concerned/relevant parties, on schemes of particular enormity and complexity of this Proposal.

It is my assertion that WBC has not carried out meaningful and/or timely consultation with, amongst others, Midgham Parish Council, the residents of Midgham, and the property owners immediately adjacent to the site. For example, there have been no public forums or debates organised by WBC to inform the above parties specifically of the nature, raison d'être and/or consequential impacts of the Proposal.

For example, I, as one directly affected by this Proposal, have not been contacted at all by anyone publicising or justifying it. So, they would have elicited the significant fact that I own the land and the stream that lies on the eastern margin of the site. I have spent 29 years of time and expense in creating a wild life corridor in this area, close to the North Wessex Downs Area of Outstanding Natural Beauty,

	as well as further along the course of the stream and the adjacent land, also owned by me. Suffice it to say, I will not to adversely prejudice this hard-won situation.

<p>Please give reasons for your answer</p>	<p>I am writing to object to the plans for 2500 houses in North East Thatcham</p> <p>The infrastructure is already creaking in Thatcham. Roads are in an awful state, Doctors appointments are hard to come by, the school is terribly overcrowded despite its Ofsted rating.</p> <p>To introduce 2500 homes with all the associated vehicle movements would be a disaster. There seems to be no appropriate railway which may mitigate some of the issue. It seems that the existing residents of Thatcham will suffer poor air quality if the proceeds.</p> <p>Flooding is also an issue. My home was flooded in 2007. Concreting over the northern run off would seem rash, where it is not in my house again.</p> <p>The area being considered is a beautiful buffer between the town of Thatcham and Upper Bucklebury. Is it worth ruining a beautiful area, concerns are forefront, it seems West Berks Council are willing to sacrifice forever, a beautiful area, for extra money payments</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.	

<p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I wish to strongly object to these plans on the grounds that the plan is in my view unsound and will result in a massive impact on the surrounding area should these plans be passed.</p> <p>As a resident of Upper Bucklebury for 39 years I am appalled at what will become of the local area should the Thatcham development be implemented.</p> <p>This plan is ill thought out with the West Berks Council opting to take the easy option and dump several year's worth of development in the area without any regard for anything else than trying to satisfy government mandatory house building targets which are set to drop as of January 2023.</p> <p>No accurate up to date data is available such as traffic data, educational data etc.</p> <p>No consideration has been given to the local biodiversity and major questions exist over supplies of various utilities.</p> <p>The following will help to explain my objection :-</p> <p>Road & Transport</p> <p>A Safe and Sustainable Transport system must be a major priority in any development plan and I do not believe this is the case. Rather than reducing accidents and improving safety my opinion is that the plan will do the very opposite.</p> <p>I have not been able to find any recent traffic flow census data.</p> <p>I understand that a traffic census was taken for and supplied to WBC by the development company involved with the Thatcham development. However, this data will have been completely flawed as it was carried out during the Covid 19 lockdown period when traffic would have not presented a true accurate picture of traffic at that time if Covid was not present and travel not restricted.</p> <p>I also understand that WBC are not intending to carry out any new census and will use the flawed and out of date data currently available attempting to carry out their own census at their own cost.</p> <p>Unfortunately data is not yet available.</p> <p>Why such important data relevant to a major development has been left to a local parish council only leads me to conclude that accurate data to be used that may have a negative result on the development plan.</p> <p>Until accurate data can be produced then no one is in a position to forecast the impact of the proposed development on the local roads.</p> <p>The local roads around Thatcham and its closest villages are already very congested during the busy times of the day, particularly after the school day and the evening rush hour.</p> <p>As Thatcham has grown over the years, the road system that supports the area has not kept up with the increase in population and has resulted in traffic congestion on both the major route A4 Bath Road as well as minor roads supporting the villages such as Ash, Chapel Row, Midgham, Crookham and Woolhampton to name a few.</p> <p>The A4 Bath Road has become more congested as the local population has continually grown with many large developments in the Thatcham area and that will continue to grow with the many additional developments already in the WBC building programme.</p> <p>Traffic is using the small roads & lanes through the villages as "rat runs" more and more to avoid the congestion on the A4 Bath Road. This is very apparent with the volume of traffic now passing through Upper Bucklebury.</p> <p>The proposed development will only increase this traffic causing serious potential problems for the village populations such as Upper Bucklebury etc.</p> <p>It should also be noted that some of the roads through the villages are not in the best condition.</p> <p>Unless a huge amount of work is carried out to upgrade the road system there will never be a safe route to complete the traffic flows around the local area.</p> <p>Thatcham has a major traffic restriction that is caused by the railway crossing at Thatcham station.</p> <p>For years it has been well known and recognised that the level crossing causes huge traffic congestion and delays on the main London to West of England routes. I have personally seen the traffic queued north up Farnborough Road almost reaching the A4 Bath Road and south of the crossing towards up Crookham Hill towards Thomford Park Hospital.</p> <p>Often at busy times the queue isn't able to clear before the next train causes the crossing to close again.</p> <p>For the last 40 years or more there has been discussions on building a bridge to rectify this problem but nothing has been done. The Americans with Greenham Common and Kennet Heath development are a few examples.</p>

The addition of 2500 houses very close to Pipers Way will only add to major congestion in the area.

Looking at the NE development plan there is only one major road that borders development area which is the A4 Bath Road.

The other roads that surround the proposed development area are Harts Hill Road, Floral Way, Cox's Lane and Lawrences Lane. None of these roads are suitable to support any increase in traffic.

Also Floral Way and Bath Road are the only roads that have pavements and street lights.

As mentioned above A4 Bath Road is very busy during several periods of the day. 2500 houses adding its traffic to the existing traffic will add to the congestion. I suspect that this will result in more traffic opting to use alternative "rat runs" through the various lanes and roads.

Harts Hill Road is a very dangerous road with a history of road traffic accidents including fatal accidents. The road is very narrow and as water run off from the fields next to it.

Most of the accidents are not reported and never recorded as drivers recover their vehicles without help from the authorities. This is not a true record of accidents.

The road is a narrow road that has slowly been widened by erosion of the banks over the years from increased traffic, heavy goods vehicles (HGV's); or by design to accommodate larger vehicles.

This can be seen as additional drains have been installed to the nearside of the existing original drains to enable water to flow away as the original drains are now within the road.

Whenever a cycle uses Harts Hill Road, the traffic can only follow at the speed of the cycle due to the width of the road and the narrow road which restricts safe overtaking of the cycle. This is a big problem going north as the road is going up hill and traffic is heavy.

Harts Hill also lacks a pavement and street lights and pedestrians that walk this road are in serious danger.

Floral Way connects Harts Hill Road to the A4 as well as Lawrences Lane and Cold Ash Hill.

Although this is a good road it would only feed traffic to the next bottle neck.

Lawrences Lane is a single track road which now has restricted access and if improved would only provide a route to the village of Thatcham.

Cox's Lane is again a single track road from the A4 to Upper Bucklebury and Midgham and no more than a track.

All the roads mentioned would require major upgrades and improvements to support the development plan but would also impact on the adjoining villages which will then become bottlenecks to the traffic flow.

Educational Facilities

The current schools and other educational services are in the main totally full and for the development plan that has been proposed, more must be made available to support such a plan.

There is no clear evidence of sufficient proposed funding to meet the councils obligation to provide education.

The current plan appears to be suspect with the plan being based on old out of date data.

No information on funding for either the current Kennet School or a new Kennet School seems to be available.

The same can be said about details of a proposed new Kennet school such as location etc.

In fact no clear plan exists regarding local schools to support this development or to enhance existing schools to support the increase in pupil numbers .

The rumours are that a new replacement Kennet School could be built on the Development site and the existing Kennet School would be used to help fund this new build.

This should it happen will of course increase the pressure on whatever school provision are to be provided due to the increase in pupil numbers beyond the development plan as well as additional pupil numbers.

If a new replacement school was to be provided then this would result in most of the Kennet School pupils having to travel to the new school several times a day. Therefore a safe method of crossing the A4 would have to be provided.

Sports fields will have to be provided should a new school be built.

None of the development site is a flat site with the land rising towards the north and towards the east. The flattest land is the A4 which will be exposed to the most traffic pollution.

No funding appears to be made for the addition of sports fields.

Upper Bucklebury is currently in the catchment area for Kennet Secondary School as well as The Downs School in Compton.

Most local children attend the Kennet School due to its close location and ease of access.

If the development goes ahead then our local children will be excluded from Kennet and will have to travel to Compton. The children of the NE development will take priority as they will be closer to the Kennet School.

My understanding is that Kennet is at 100% capacity and that the Downs School is over subscribed. This will then leave our children having to travel even further distance outside its current catchment area.

Primary Schools will also be impacted as will Early Years provision.

I am not sure what if any plans have been made to address education support for these groups.

Utilities

Power

Can the current provider of electrical power (SSE?) be able to supply the additional requirements of the proposed development?

I ask this question as planning was submitted to WBC in 2017, Application Ref 1701012/FUL, to allow gas fuelled generation units to be located in Upper Bucklebury.

From memory these units were to be used as emergency power units should the National Grid be unable to maintain the supply.

This application was withdrawn during the planning phase but it does suggest that there was and maybe still is a question over the reliability of the local electrical supply.

Water & Sewage

Can Thames Water cope with the additional load for both clean water and sewage?
 With an estimation of somewhere around 4,000 people living within the development plan area a substantial increase in water disposal will be required.
 The residents of Upper Bucklebury suffered for years with unreliable water supply which was eventually resolved with the replacement of the bottom of Harts Hill Road and replacement water supply pipes.
 Will this development add additional load to this pumping station or will specific measures be applied to protect the pumping station at Chapel Row and area?
 Can the sewage treatment works on Lower Way Thatcham take the additional load from yet another large development?

Flood Prevention

Upper Bucklebury is approximately 134 meters above sea level and the A4 Bath road 70 meters.
 Will any flood prevention measures be required to protect the proposed development as well as the area to the south?
 The reason for this question is that during periods of heavy rain fall a tremendous amount of water runs down the lane. So much water that that areas of land towards the lower end actually heave upwards and form a sort of mushroom shape up to 30cms high. It is possible to stand on these mushrooms and jump up and down and it feels like jumping on a water balloon. These mushrooms eventually disappear after a day or two.
 The water will still be required to go somewhere but where if the land is covered in houses and hard surfaces.
 Storm drains could guide it away from houses but it will still need to be managed carefully to prevent a torrent cascading down the lane.

Medical Services

GP Surgeries

The current development plan appears to have little detail or plans for providing Medical Services other than a possible extension. From my experience I know just how difficult it is to get an appointment at my GP Surgery at Thatcham Medical Centre. This is why I use the GP Surgery at Chapel Row and the GP Surgery at Burdwood in Thatcham.
 Our local GP Surgeries are under tremendous pressure from both patient numbers and staff shortages. I know from experience just how difficult it is to recruit medical staff such as doctors, nurses etc., to this area.
 As Thatcham has continued to grow over the years the local surgeries have had to take measures and move patients to other areas. New patients that are moving in to their catchment area. With up to another 2500 houses additional Healthcare Facilities are needed.
 Any plan must meet the local demand as laid down by the Healthcare Agencies which doesn't appear to have happened.

Dental Practices

Dental Practices are in the same position as the GP Surgeries.
 Trying to register as a patient on either an NHS or Private Dental Practice is difficult due to the practices being at full capacity.
 The development plan seems to have ignored Dental Practices completely.

Environment

This proposed development is entirely on a Greenfield Site that is currently on agricultural land spread over 3 farms.
 Why is WBC trying to build on agricultural greenfield sites when other brownfield sites are available such as Colthrop Farm?
 Surely with all the pressure on using brownfield sites before building on greenfield sites it makes no sense not to use brownfield sites in Berkshire.

The proposed site is within the North Wessex Downs Area of Outstanding Natural Beauty (AONB).
 This AONB is home to many rare and endangered species that are legally protected, and as such this area should be protected. Any development should not be carried out that will result directly in habitat destruction that is currently supporting these endangered species.
 The development plan does not have any strategy documents to support the protection of this landscape.
 The value of the area for wildlife and potential effects on biodiversity appear not to have been properly assessed with the development.
 With no adequate green spaces being provided within the development plan other than a vague proposal for two corridors it is clear that WBC has at best very little commitment to recreation requirements of the residents as well as protecting the biodiversity.
 Without any real plans for green spaces, parks or other recreational areas it can be expected that residents of the development will be unable to use areas such as Bucklebury Common for recreational purposes bringing additional traffic etc., as well as increased disturbance to the common areas.
 No funding provisions are mentioned in the plan for green spaces.

Please give reasons for your answer	I object to this proposed development. Here are my key concerns: 1. With this scale of development increased traffic pressure is inevitable. With the proposed exit on to Harts Hill a pro Burdens Heath to Cold Ash/Hermitage and the M4 and via Upper Bucklebury to Chapel Row. These roads are wholly in with encouraging the use of safe walking and cycling. 2. Harts Hill is a notoriously bad road with frequent accidents. Funnelling more traffic in this direction is dangerous. 3. I understand that more houses are needed. However, the scale of this development is wholly out of reasonable pr amenities to cope. It merely continues with further residential development in the Thatcham areas which lacks a viab encourages and enables green travel within local communities and a viable local economy. It appears that WBC are without insightful thought as to how to create viable and environmentally sustainable local communities. 4. Thatcham has been blighted by high volumes of HGVs from the Colthrope site which was a fundamental strategic of Thatcham residents for decades. NET development only intensifies the out of balance nature of such large develo 5. Please ban HGVs accessing major truck routes via Thatcham; they should be routed east to the M4. 6. I would like to challenge WBC statement that "The policy is likely to have a significant impact on walking, cycling a WBC arrive at this unsubstantiated conclusion? 7. I would like to challenge WBC on the detailed plan that will result in enhanced heath care facilities for a significant WBC assumptions are unsubstantiated and not evidence based and joined up with other healthcare agencies. 8. NHS dental provision in Thatcham is wholly inadequate today. WBC have not addressed how this issue will be address 9. The proposed NET development will cause harm to the Bucklebury Plateau Biodiversity Opportunity Area; how co this scale and impact. This is not acceptable. 10. This is a greenfield development within a landscape setting of the NWD AONB. The enjoyment and protection of development of this scale. I challenge WBC to provide evidence to support the claim that this development will have a p 11. WBC proposal of 'country parks' normally means glorified dog toilets. This is no real amenity at all; only of limited place to avoid for everyone else. 12. The provision for all educational ages is not thought through or substantiated. Over the past 3 years 14% of early the UK. WBC can not simply ignore the wider policy issues and provision of early years facilities and impact on local to work opportunities. 13. The children of Bucklebury should continue to have a choice of secondary school and not be shoehorned toward no sense.

<p>Please give reasons for your answer</p>	<p>Being a local resident with a young family the impact of this development is huge. There is no clearly defined provision for educational institutions at all ages. There are no details of the provision for nursery or early years. As is the case with the current situation it is contradictory. The current situation is that the schools local to us are already oversubscribed and therefore this will be flat, which the only area for this is located next to the A4. This is not an appropriate area to have a play area for children. They will also be a substantial increase to the traffic which is going through upper Bucklebury, and it will be used as a car park already.</p> <p>Hartsville is already a very dangerous road with no pavement down to the town. The exit that I put to come onto this road is the cause of a serious accident as they are not being properly done with pavements installed.</p> <p>What is the purpose of the car park on the map?</p> <p>That also appears to have been no liaison with local health authorities as to how provisions for this massive increase in population will be met for. The plans that are currently in place will again mean GP surgeries and dentists which are already oversubscribed will be in place as an infrastructure in these plans. The impact on all residents that already live around this area is that of people moving into the area all those already resident and the provision of basic facilities has not been provided for.</p> <p>There is also no regard for the environment whatsoever with cramming over 4000 houses into a smaller space as proposed.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>

<p>Please give reasons for your answer</p>	<p>I would like to formally register my objection to WBC LPR Regulation 19, the proposed development of 1500 to 2500 for the following reasons:</p> <ul style="list-style-type: none"> - It will dramatically reduce the greenbelt between Thatcham and Upper Bucklebury. - The rural nature of this area would be completely lost with Upper Bucklebury becoming part of Thatcham. - It would be a massive over development of our beautiful countryside in an area which consists of rolling hills and farmland. If large scale are approved there will not be any open rural areas left for future generations to enjoy. - The proposed land is not particularly suitable for development as it is very hilly land and has had issues as a flood plain. - The view that Thatcham is best placed to take a development of this size in this location is misplaced, un-proven and unrealistic. - According to the Transport Assessment paragraph 3.26, <i>'The access arrangements for the Northern end of the NET station on both Floral Way and Harts Hill Road. Results from the modelling suggest that these will not cause problems'</i>. I can't see how this so I am unsure as to why this has been stated. Please can you share these with me? How can increased speed on an already dangerous and busy road (without the development), be seen as not causing a problem? - There are drawings showing a new car park on Harts Hill. This again will increase traffic to an already very dangerous road and promote anti-social behaviour, illegal activities, fly tipping and littering which is regularly seen on Bucklebury common. - In terms of <i>'reducing accidents and improving safety'</i> your assessment has concluded that <i>'the policy is likely to have a significant positive impact on walking, cycling and public transport as safe travel will be critical to the design of the site'</i>. Also regarding <i>'increasing opportunities for walking, cycling and public transport'</i> your assessment concluded <i>'the policy is likely to have a significant positive impact on walking, cycling and public transport designed with these in mind'</i>. I wholeheartedly disagree with both of these assessments and I have concerns with the way they have been assessed. Please can you provide me with the evidence and conclusions for both these assessments? Also, it's not just about the development but the surrounding areas, villages and community which exist today and have done for years. What assessment has been done for these with the increased traffic? <p>Further to the above, this development will have a significant impact on traffic levels and the associated pollution through the area increasing:</p> <ul style="list-style-type: none"> - Traffic and speeding through Upper Bucklebury, which is already a significant and serious concern, especially as we have many people who walk along this road to the Primary School. - Traffic from Thatcham through Upper Bucklebury to Chapel Row on roads which are not designed for large traffic volumes. - Increased traffic through ALL the surrounding villages in general, especially as there is a plan for an exit at the North-East Thatcham Development. This will significantly increase traffic towards Upper Bucklebury, Chapel Row, Bradfield, Cold Ash and Hermitage. WBC has stated <i>'the exit will be of A4 traffic onto wider rural routes such as Upper Bucklebury'</i>. This is a total understatement and completely neglected. The roads especially as the roads are already inadequate, have no pavements and are extremely dangerous with speeding traffic. The number of accidents is already high and this proposed housing development and exit will mean this is inevitable. <p>This level additional of housing will inevitably have an adverse impact on local facilities, schooling, medical and welfare services which are overstretched.</p> <p>Healthcare</p> <p>There is a significant lack of detail around strategic healthcare planning and the NE Thatcham development. As far as I am aware developers have arranged or published a prospective Health Impact Assessment for this development. There has also been no Health Impact Assessment for the North-East Thatcham Development Consortium and local general practises. Why hasn't this taken place? The current level of services available will result in the three existing practises in the area being overstretched even further. WBC and the development should be responsible for the provision of a viable primary care medical facility. To add to this Thatcham Dental Practises are already unable to meet the needs of the local population, this will also get worse with the proposed development.</p> <p>Environment</p>

There will be damage to the Bucklebury Plateau Biodiversity Opportunity Area and the historic woodlands, especially will also destroy the enjoyment of the local countryside by local communities in terms of the broader North Wessex Downs impact to legally protected wildlife. There is no evidence to support claims that the NE housing development will have a positive impact but instead it will have a significant and serious negative impact on the overall environment, protected wildlife, natural resources and biodiversity. Environmental sustainability is defined as: *'the ability to maintain an ecological balance in our planet's natural environment and its resources to support the wellbeing of current and future generations'*. I am honestly quite shocked and disappointed that the sustainability of our precious environment. In addition, as far as I am aware there is no significant attempt to investigate or mitigate any negative environmental consequences. Why not?

Education

within the Local Plan Review the provision for Nursery, Early Years, Infant and Secondary education and funding has not been clearly defined. The provision for Primary and Secondary school education is unclear and contradictory. WBC, as an education authority, has a legal obligation to provide for suitable school provision. How this obligation will be met across all school years has not been defined or evidenced. School needs to take priority and should be confirmed before any housing development is agreed. Unless this is done, no additional school provision will be provided, leading to oversubscribed schools and crowded, ineffective educational facilities. Talks of provision of school fields however no evidence for funding or a suitable location (a sports field near the busy road does not suffice as suitable) has been identified by the WBC or NE Thatcham Development Consortium.

Further items to highlight:

- The development will significantly increase the noise and light pollution to the Bucklebury residents. There are no measures in place to mitigate this.
- There is no evidence that this development will enhance Thatcham town centre (or the area in general).
- It is not likely to attract new businesses to the area or create or significantly increase employment.
- The local shop and pub are unlikely to benefit. The local shop is under significant threat as the new development is planned to be built on the site of the shop.

There is now particular focus within the Consultation National Planning Policy Framework on taking into account the character of the area and how much housing can be accommodated. As a result of this, several local authorities have paused their plan making process pending the outcome of the consultation on the basis that a *lower housing requirement could be applicable to the plans than the current requirement*. Although I am completely against the NE Thatcham housing development, I would ask that WBC should take the opportunity on the plan and present a revised plan in line with the updated planning guidance when this comes in later in 2023.

To conclude, this development is unnecessary, inappropriate, and ill-conceived and should be rejected.

Please do not take the opportunity to live and play in our beautiful countryside away from our families today and future generations. Let the Thatcham housing development go ahead.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.	

* Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>Please find below my objections to the Local Plan Review as I find the plan and associated information presented to be focussed on the development of the area known as NE Thatcham, and relate to how the proposed development will affect Bucklebury. I am happy to speak at a public inquiry if invited.</p> <ol style="list-style-type: none"> 1. Development site and location <ol style="list-style-type: none"> a. The proposed NE Thatcham development concentrates the majority of planned housing across West Berkshire on the common interest of our region. It will do nothing to support viability of the many villages. b. The proposed site will create the biggest single housing development site ever in West Berkshire. The resulting estate is unsound as it does not stipulate how the necessary infrastructure for a new town the size of Hungerford will be provided. c. The proposed site is outside the settlement boundary of Thatcham on rural, high quality agricultural land. The site is unsound. d. The site represents creeping urbanisation, coming within one field width of the village of Upper Bucklebury (AONB) causing air pollution, light pollution and water pollution in the streams between the development and these two villages. Light pollution in Upper Bucklebury, which is a naturally dark place, with no street lights. e. Being situated on the side of a hill, this large development will be visible from a wide area of the Kennet valley. The development to screen it is unsound. f. The site is in the Outer zone for AWE. This is not mentioned in the updated plan, which is unsound. 2. Services and Infrastructure <ol style="list-style-type: none"> a. Water supply. The water supply for Upper Bucklebury and Chapel Row is pumped up Harts Hill Road. We regularly have had four complete losses of supply in the last two months due to leaks under Harts Hill Road and Common Road. Increased demand, and increased traffic volumes on Harts Hill Road will cause more disruption to water supply. b. Flooding. The land in question is a natural soakaway for the town of Thatcham. The Flooding report does not consider the impact from the development, and is therefore unsound. c. Air quality. The schools in Thatcham are near the A4 which is an Air Quality Monitoring zone. Increased traffic will increase A4, and increase particulate pollution. d. Healthcare. The council has not published a health impact assessment. There is already severe strain on dentist, GP and Thatcham and the Bucklebury villages. The local GP practices have not been approached. This is a major risk to exist if development goes ahead. e. Such a large development should include sports facilities for the new residents. These are not included in the plan. 3. Travel. <ol style="list-style-type: none"> a. The statement that the development will improve sustainable travel in the area is unsound. b. The statement that the development will have a positive impact on road safety is untrue for the reasons given below. c. The A4. This road is narrow in Thatcham and regularly becomes congested, particularly when traffic is diverted from the A4 to HGVs. When this happens many cars use Harts Hill Road/Common Road/The Avenue as a rat run diversion. This will get worse as it goes ahead. d. Many children have to cross the A4 to get to school. They are at risk of traffic accidents. This will increase if an additional road is added to the NE Thatcham development. e. Schools. The plan does not state how the new children will be educated from the age of 3 to 18. There is already a shortage of places in Thatcham. More children travelling to Theale and Newbury for schooling will increase traffic on the A4. f. The statements about active travel are unsound. With a housing estate built on a hill, residents are unlikely to choose to walk or cycle. g. Traffic volume study dates from 2015. Transport needs and preferences have changed a lot since then. h. The development is a long walk from Thatcham Station. Residents are most likely to use cars to get there. i. The level crossing. This is a bottleneck which is closed for up to 40 minutes in an hour. 2,500 more homes (probably 1,000) will make the bottleneck worse. j. Harts Hill Road. This is a narrow, winding lane on a steep hill. It is not suitable for walking and cycling, and local residents use it for this purpose. The traffic plan reveals that the new estate will have a back entrance onto Harts Hill Road, which will signpost onto this dangerous lane, causing even more accidents than currently. Through traffic from Harts Hill Road travelling NE towards Thatcham will increase traffic on the many small lanes, and through the villages as there is no two-lane route. k. Drawings show a car park on Harts Hill Road. This will create an additional hazard on this very dangerous, narrow road. l. The back entrance onto Harts Hill Road is likely to cause significant extra traffic on Common Road and The Avenue as well as due to traffic speeding across the common. There are regular accidents where vehicles hit wildlife such as deer, rabbits and badgers. m. Danger to cyclists. Cyclists regularly use both Common Road/The Avenue and the bridle paths across the proposed site to get down to Colthrop. These bridleways will be removed, leaving no safe cycle routes from Bucklebury to Thatcham. Cyclists are at risk of acar accidents. n. Danger to walkers. As quiet rural villages, Upper Bucklebury and Chapel Row have limited footpaths and no street lighting. The NE Thatcham development will increase the number of pedestrians hit by cars in our villages. o. There is no mention of improvements to local bus services for the new development. 4. Environment <ol style="list-style-type: none"> a. The proposed NE Thatcham site abuts the AONB, yet the plan does not include an environmental assessment of the site. This is unsound. b. The site will remove ancient hedgerows holding hundreds of years of biodiversity. This is contrary to the vague statement in the plan about biodiversity. c. The ancient woodland south of Upper Bucklebury will be fully encircled by the development site, removing a valuable asset and loss of biodiversity. d. The two 'country parks' included in the previous plan have been removed. There will be nowhere for the residents to go for a walk. e. Bucklebury Parish Council commissioned an Environmental Audit of the proposed site. This states that legally protected sites on the proposed site and will be harmed by the development.

	f. Light pollution will particularly harm the rare, ground nesting birds and Owls resident on Bucklebury Common. g. The Common volunteers are working hard to protect the rare heathland environment of Bucklebury Common. This the increased traffic and dogwalking caused by the spill-over of people visiting the Common.

<p>Please give reasons for your answer</p>	
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to object to this plan as a local resident who is impacted by the flawed nature of the plan and proposals</p> <p>First off, I live in the village of Upper Bucklebury. This plan directly and negatively impacts the traffic flow through the village particularly concerned for the safety of the children in the village who walk to and from Bucklenury Primary School and walk to the bus stops for their secondary school buses. Not only will increased traffic pose a significant safety threat, but the village is not viable to sustain the increased traffic directed this way through the exit at the north site on Harts Hill will be funnelled towards Upper Bucklebury. The road quality is already poor and increased traffic will not only further deteriorate the road but poses increased safety risk due to volume. This funnelling of traffic will put the village under significant burden and Alongside this the increased traffic will also bring an increase in pollution as a greater density of traffic will inevitably result in idling on Harts Hill and throughout the village. This too will have an impact on children and families walking to and from school transports during peak traffic times.</p> <p>The plan also details drawings of a new car park on Harts Hill which is unclear in its purpose. The logic behind this proposal will add more traffic to an already busy road and may also encourage anti-social behaviour at night-time which will put local police under unnecessary burden.</p> <p>Lastly on traffic impacts, the council has come back to the SEA and indicated 'the policy is likely to have a Positive impact on walking, cycling and public transport' and 'The policy is likely to have a significant impact on walking, cycling and public transport should be designed with these in mind.' There is no substance to these statements. They do not adequately demonstrate any actual effect. There is no clear evidence to support these statements and as such they must be considered null and at worst.</p> <p>Next; Healthcare. Concerningly, there is a lack of planning and care for this subject in the plan. There is no clear evidence that a HIA specific to the proposed NE Thatcham development has been arranged or published by WBC or the developers</p>

recorded direct engagement between the NE Thatcham Development Consortium and local general practices (local logistics around this.

The NHS Berkshire West Clinical Commissioning Group confirms there is a worse shortage of GPs in other parts of that there is no real prospect of a new GP practice being established in Thatcham or West Berkshire as a result of this priority vs other areas in the country with greater need and demand. Any indication in the plan therefore around esta misleading, unrealistic and purely lip-service. The true viability has not been fully considered.

There has also been limited provision to mitigate the impact of increased patients to both local GP surgeries (three in practices. The three GP surgeries (Thatcham Medical Practice, Chapel Row and Burdwood Surgery) are already over population. Adding 1500 new houses and patients into that is therefore unfeasible.

Next; the environment. There are a number of challenges with regards to the environment for this plan which indicate There is concern over the damage to the Bucklebury Plateau Biodiversity Opportunity Area and particularly the Common support the claims that SP17 will have a positive impact on the environment - there is reason to believe the impact will damage to the local biodiversity and the Common. A Sustainability Charter is required but there is no evidence that this publicly.

With the development proposal and an estimate of 4000 additional people concentrated on one site the detailed proposals are at risk of not being appropriate for the volume of people. There is no indication of management of parks or details look like. The initial proposed country parks have also now been downgraded to 'community parks.' The plan therefore green space and steps to protect biodiversity as well as lacking any mitigation of impact of footfall on nearby countryside.

The Sustainability Appraisal from the Local Plan Review accepts that SP17 will have a negative impact on environment greenfield site and therefore would result in a negative impact on environmental sustainability which would need to be detail around plans to mitigate this; only the need to do so. The same Appraisal then contradicts this by indication of sustainability through not taking into consideration the impacts on the environment (impact on biodiversity, impact on legally protected wildlife) and outweighing any impacts with a perceived social and economic benefit impact.

Finally; Education. This is an area particularly important to me as a resident as I have a young son and another baby Headteacher at a local primary school and know the impact on schools that new developments have. Within the Local Nursery, Early Years, Primary and Secondary education is not clearly outlined. There are no details for Nursery or Early information shared around Primary Education with no evidence or insight to support any view of planned numbers. I was a teacher and team leader for the Early Years and Key Stage One teams at Francis Baily Primary School. The school oversubscribed and situated in a building which was no longer fit for the size classes that it was being forced to take to put huge pressure on both Bucklebury Primary School and Francis Baily and I sincerely believe that the education be put at risk as a result of further developing housing as proposed.

For Secondary education, there are no details of the location of the land to be provided or suitability of this; just a suggestion to contribute to secondary education (without associated detailed timescales). There is not a number of Form Entries of the number of pupils the school would cater for. There is also no clear provision or funding for adequate Sports Facilities the only available land being adjacent to the A4 with all its traffic and fumes. The provision of Secondary schooling in the two catchment secondary schools are The Downs School or Kennet. Where the schools are oversubscribed, children prioritised. The NE Thatcham children would therefore be prioritised for Kennet, removing the choice in this scenario proposal is therefore detrimental to our children and the future children of Upper Bucklebury.

In conclusion, as a local resident and professional in the care of children in West Berkshire, I am extremely concerned of detail or clarity and believe this will have an adverse impact on myself and my family both now and in the future. I believe this plan to be lacking in robustness and feasibility.

<p>Please give reasons for your answer</p>	<p>Having been a resident here for over 50 years I wish to strongly object to the Thatcham NE Development Regulation 1 it to be UNSOUND.</p> <p>1) The precious eco structure of Bucklebury Common will be severely damaged and the proposed development will have a negative effect with light pollution on the dark skies. The reasoning given to providing green spaces is unsound. The LPR acceptance of a negative impact on environmental sustainability in its own appraisal.</p> <p>2) Over the years the increase in traffic has caused speeding and safety issues for residents of Upper Bucklebury, and the problem even further.</p> <p>3) The infrastructure from the water board has been a problem for years causing our water to be cut off on many occasions.</p> <p>4) All the local schools are oversubscribed and therefore need to be built ready for continued education of our children.</p> <p>5) Doctors surgeries, Dentist and Hospitals are all struggling and have not been consulted how they will manage with the new residents. Will the new residents be able to register and receive the health care they need, there needs to be radical change to the current system.</p> <p>6) Other brownfield sites should be considered first, before spoiling our beautiful green Arable fields that we need to grow our own food. We need to need to import and rely on other countries and their problems thus causing us shortages.</p> <p>Lastly how the Council who are meant to represent and work for the good of the community can contemplate a consultation with developers is disgusting and mind boggling!!!!</p>

<p>Please give reasons for your answer</p>	<p>I am writing to make my objections to the Thatcham NE Development.</p> <p>I believe there are areas of concern to which due care and diligence have not been applied.</p> <p>There is great concern for the inadequate infra structure of the whole area. It barely meets the needs for local residents and schools and medical practices without very convincing research and background ring alarm bells. You cannot sit a surgery & Dentists without having consulted the NHS already and bringing them on board with permission already given being displayed here and a bit of a gung ho attitude just to rail road these plans through.</p> <p>The roads cannot contain all the traffic that said houses will incur and the top of Harts Hill Road will be a major black spot.</p> <p>Why can't this large complex be broken down into smaller clusters and built across a wider area that is Brown Field?</p> <p>This all feels like a hastily drawn up and ill thought out plan at the behest of the developers and landowners. It would be inadequate.</p> <p>I sincerely hope you will reconsider these plans and the comments that you will have received from the general public.</p> <p>Please do not build on this Green Field Site.</p>

<p>the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I live in Bucklebury and want to let you know how this development will affect local residents. Initially, I didn't think we had assumed the traffic would be directed towards the A4 or along the bypass towards Newbury. However, this is not the information provided it will have a significant affect on the lives of all residents in Bucklebury, Chapel Row, Midgham, and the natural environment.</p> <p>I am OBJECTING to the Thatcham NE Housing Development Plan for the following reasons;</p> <p>Greenfield Site</p> <p>My main objection is that this is a greenfield site. New research from the CPRE says in rural West Berkshire, there are 46,544 hectares of greenfield land, totalling 46.54 hectares, which it is claimed would allow building of 2,837 new homes without the need to build on any other land.</p> <p>When the housing numbers are no longer mandatory, and when there is already considerable potential for new homes in the area, it is clearly wrong for local councils in our county to be offering up vast swathes of countryside to developers, especially in areas of high landscape value such as AONB [Area of Outstanding Natural Beauty]," said Greg Wilkinson, chairman of CPRE Berkshire.</p> <p>The site of a former paper mill and farm in Colthrop has been proposed by developers as an alternative housing strategy. The overwhelming response from the public was very positive. A new road bridge over the railway and improved infrastructure would be a considerable improvement.</p> <p>The railway level crossing at Thatcham Station causes huge queues of traffic either side of the railway backing up towards the station. The increased traffic created by the development, the queues will just be longer, especially during the rush hour. This is a major source of pollution from exhausts and tyres.</p> <p>Traffic Increase</p> <p>As mentioned above one of the main objections is the increase in traffic movements as a result of the new development. Two access roads from the estate, one leading directly on to Harts Hill Road, will mean a huge amount of additional traffic on the roads of Bucklebury, Chapel Row and Bradfield to get to the main road giving access to A4 (Reading), M4 (east and west) and the A33 (west). As well as taking this direct route, traffic will use smaller lanes from this road down to the A4, travelling south towards the station through Cold Ash to travel north. The roads are narrow country lanes with many bends and no footpaths. The condition of the roads is at the least, with many potholes as water running/settling along the edge of the roads freezes and then causes the tarmac to crack. The villages are very quiet with little through traffic. The main route from Harts Hill Road consists of several acute bends. On this route, there are no pavements. Increased traffic will cause accidents with pedestrians, cyclists and horses. There are already accidents in this area and sadly, even with the current level of traffic several accidents involving cars and horses occur.</p> <p>Directing traffic along this road will only add to pressure on existing accident blackspots. Ie where Common Hill meets the A4 and the junction of Back Lane and dual carriageway of A4.</p> <p>There is no alternative to car travel. The regular but infrequent buses through the villages, having been totally stopped by the development, area, if you need to get somewhere you need a car. Very few people living in these areas use other alternatives to the car.</p> <p>GP Surgery</p> <p>Our local GP surgery in Chapel Row is already struggling to recruit and retain staff, combined with the increased population from the new houses. It is impossible to get an appointment unless you phone in the morning and if you are lucky enough to get a slot, you see a GP. If the surgery is forced to accept more patients it will negatively affect the existing patients and cause further delays. Injuries (Thatcham) and A&E.</p> <p>Bucklebury Common</p> <p>The plan mentions a 'Country Park' – this has a specific accepted definition which is not met in this Plan. The three proposed settlement boundary have no meaningful environmental value or commitment to exclude subsequent development. They do not provide adequate green space within the development itself and not rely on a link to the area of AONB to provide its green space.</p> <p>Bucklebury Common should be protected from increased footfall which will have an adverse effect upon the Common's diverse ecosystem that is nationally important. This consists of the famous Avenue of Oaks at Chapel Row, ancient woodlands and some of the largest areas of heathland in Berkshire.</p> <p>The Common has a rich variety of flora and fauna. Conservation of important habitats is undertaken by the Estate through its collaboration with various voluntary organisations. <i>The Bucklebury Heathland Group continues to work to restore the Common to once an extensive of heather and gorse, offering sanctuary to many birds and much wildlife.</i></p> <p>Already there are problems with anti-social behaviour such as groups of motorbike riders on the Common and 'dogger' dogs along the Common.</p>

	<p>The local environment will be changed forever in a negative way. This is Greenfield development abutting an AONB strategy for positive impact and overall biodiversity gain.</p> <p>I strongly urge you to reject this development and look at alternative sites that will not destroy this beautiful area for</p>

<p>1. Do you consider the Local Plan Review is legally compliant?</p>	

<p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to raise my objections against the Thatcham NE proposed housing development. There are many reasons why this development is unsuitable for this large development, which I will highlight below. I moved to this area 10-years ago as the area had a lot of green spaces. But the position of this new development, which is the size of a new village will affect a lot of the wildlife in the area. The increased traffic, increased footfall and increase in the number of dogs using the greenspaces will all negatively affect the wildlife and the quality of life of my other concerns.</p> <p>Currently in rush hour the traffic along Floral Way queues in the morning to join the A4. Then queues along the A4 to join the M4 along Pipers Way can be stuck there for 20-30 mins if 2 or 3 trains come along at the same time. An additional 1500 cars will exacerbate the current traffic issues in this area. This queueing traffic will create more air pollution, with the number of engines idling.</p> <p>The proposed development is going to add 1000s more cars to the roads in this area. The traffic in this area can only handle so much and people will start to look at alternative routes "rat-runs" to get to their chosen location. The small country lanes that run through a lot of this traffic would divert. These roads are small and are not suitable for high volumes of traffic. The potential level of traffic through Bucklebury would dramatically change this part of the village. The narrow country lanes through Bucklebury do not have the capacity to handle this traffic and will cause a risk to the walkers, cyclists, horse riders that use these lanes. Increasing the risk of serious accidents.</p> <p>The plan for an exit from the development onto Harts Hill will be pushing more traffic up through Bucklebury, and Coombe Hill. The roads or pavements to deal with this additional traffic. Harts Hill is a busy road, with a sharp bend on it, having junctions and traffic issues.</p>

	<p>The proposed development is on the edge of Area of Outstanding Natural Beauty (AONB), the increased light levels on the dark skies of the AONB. The views from the AONB will be dramatically affected.</p> <p>The plan talks about “A new community park linking Thatcham to the North Wessex Downs AONB”. These links connect the nationally important heathlands in the AONB, and the nationally scarce ground nesting birds that reside there. The dogs on the heathlands during Covid lockdown were significant. There will be a bigger increase in usage of these areas and the disturbance caused could lead to us losing the Nightjars that currently reside there.</p> <p>The management vision for Bucklebury Common, which has recently been developed a part of a Countryside Stewardship scheme, it's focused on not increasing pressure on the fragile ecosystem of the Commons. It's aim is to restore and nurture the heathlands. So, the proposed development so close to these heathlands is at direct odds with the management and protection of the heathlands.</p> <p>I have quite often seen hedgehogs crossing the road at Floral Way in the evening, going to and from the area where the fields and hedgerows are vital to the survival of hedgehogs, whose numbers are already in decline due to habitat loss. Hedgehogs are a mammal at risk of extinction. The loss of this important piece of their habitat would affect their numbers locally. Also, the increased traffic would also increase the number of hedgehog casualties on Floral Way.</p> <p>No evidence has been provided to show how this proposed development can have a positive impact on the environment. It has a damaging impact on the environment, and there appears to have been no recent ecological surveys to show the value of the heathlands. If no recent ecological surveys in place, they cannot have put in place any plans for mitigation for the species on this site. The appraisal accepts that SP17 will have a negative impact on the environmental sustainability of the area. The proposed development on this site so it will result in a negative impact on the environmental sustainability, and there are no signs of the plans to mitigate this.</p> <p>There doesn't appear to be a Health Impact Assessment included in the plans for this large development. So there has not been any having been discussed with the various healthcare agencies. The 3 doctors' surgeries that are responsible for this project are already overstretched and the plans for the development do not have any detail on how additional doctor capacity is being provided. It seems to have been a lack of any communication with the local care providers to work out how the additional capacity for dental practices are in a similar position of being oversubscribed locally.</p> <p>In December 2022 Michael Gove, Secretary of State for Levelling Up, Housing and Communities released a statement that the Planning Inspectorate should now be an advisory starting point and not mandatory. The statement also said that the Planning Inspectorate should not be a local decision making, which is sensitive to and reflects local constraints and concerns. Several local authorities have paused their planning process to await the outcome of the consultation, on the basis that a lower housing requirement would mean a council should pause their plans and put in place a revised plan in line with the updated planning guidance when it is released.</p> <p>I am sure there must be more suitable brown field sites locally, which would have a much less negative affect on the wildlife. Where better provision for schools, healthcare and schools can be made.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.	

<p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I would like to express my concerns regarding the new housing development proposed for North of Thatcham.</p> <p>NOISE AND LIGHT POLLUTION: With increased building over several years the sustained inconvenience and noise hinder everyday work and pleasure to many people in Upper Bucklebury. My concern is that WBC/Developers have Residents of Upper Bucklebury and Bradfield Southend have a "No-Street light" Policy but My concern is that for light-pollution could have serious negative effects if this is not addressed.</p> <p>ENVIRONMENT: Biodiversity in the Bucklebury Plateau is an essential amenity which WBC has a legal duty to protect on the Wessex Downs. It is not sound policy if a lack of investigation or analysis of the overall effects of major developments in or near an AONB site are ignored.</p> <p>TRAFFIC: Harts Hill is a major road to Upper Bucklebury, Bucklebury, and Chapel Row which is unlit, therefore is a dangerous road often resulting in accidents as demonstrated during the severe frosts we recently experienced. My issue near Harts Hill will cause severe disruption to all of Harts Hill and all along the Common towards Bradfield Southend Thatcham. Repeated road disruption along Harts Hill by the Waterboard has had significantly negative effects. I believe plan for this area in Harts Hill.</p> <p>INFRASTRUCTURE: MEDICAL/DENTAL CAREIn this area North of Thatcham, Dental Practises are few and GP surgeries with the existing population. Without a clear plan for persuading medical and nursing staff to move to West Berkshire surgeries are up to their population limit; therefore any increase might break the system with medical staff leaving the area that WBC has not recognised this negative problem of increased workload on current GP's and the lack of NHS Dentists.</p> <p>INFRASTRUCTURE: SERVICES: Many companies are currently experiencing under-staffing and subsequently cover waste collections, road/hedge maintenance, sports provision and maintenance of such facilities etc. With increased housing have a negative impact.</p> <p>INFRASTRUCTURE: EDUCATION: Though I do not know details of the current provision of Infant and Junior schools, housing often brings young families with needs of health care and schooling. My concern is that there will be more pressure on all services with negative effects.</p> <p>Overall, I find that the WBC Local Plan Regulation lacking in several areas which therefore could have major negative effects.</p>

Please give reasons for your answer	<p>I understand the recommendation that the SP17 site be considered for large scale development was as a result of WBC's expenditure of £100K on a HELAA study. Other sites were rejected including one part brownfield site where the developers were rejected by the railway. This would alleviate a long running concern for the residents of Thatcham and Bucklebury over long delays in the development. Even by the LP's limited analysis will get much worse if SP17 went ahead.</p> <p>When a 500 home development was proposed for Siege Cross in 2015/6 WBC in its objection said there had been a conflict with national and local policies. WBC considered the site to be a valued landscape in which the development would cause significant harm. However some 7 years later SP17, a development with 3 times the number of homes in the same area, is not considered to be a problem.</p> <p>The Sustainability Appraisal in the LP states SP17 will have no negative impact on sustainability. This opinion is not supported by the SA is unsound.</p> <p>I have concerns about the impact of SP17 on the environment, Bucklebury Common and the setting of the AONB. The required biodiversity net gain has been seriously considered as part of SP17. The impact on biodiversity of SP17 appears to be significant.</p> <p>SP17 would see much more traffic turning onto Harts Hill Rd particularly when traffic on Floral Way and the A4 is backed up. Harts Hill will encourage more traffic. The location of SP17 will mean car borne travel will dominate. There is no assessment of the increase in Upper Bucklebury which will pose highway safety issues. In addition an oil pipeline running along the South of the site could well restrict the number of exits forcing more traffic to use the Harts Hill exit.</p> <p>Overall I think SP17 was put forward in a hurry without due consideration when the Grazeley option fell through. It is a greenfield site, not sustainable and lacking in adequate medical and education provision. There is also not nearly enough public transport and infrastructure support. It is unsound and should be withdrawn or at least amended significantly.</p>

Please give reasons for your answer	<p>I object to the Thatcham NE development on grounds of:</p> <p>Road safety</p> <p>The proposed entry from the development to Harts Hill Road will increase traffic on an already unsafe country lane in Bucklebury, Chapel Row and Bradfield Southend, creating a 'rat run' for traffic avoiding the A4. People from Upper Bucklebury often walk down Harts Hill Road to Thatcham and any increase in traffic will endanger lives.</p> <p>Pollution</p> <p>Apart from the ongoing pollution once the vast housing estate has been built, there will be massive pollution, particularly from the entire build, subjecting residents to major health issues already well documented.</p> <p>In addition, there will be massive noise pollution for years, and light pollution affecting the AONB next to the site, with impacts on animals such as owls and bats.</p> <p>Healthcare</p>

	<p>Local GP surgeries and dentists are already overrun. The development plan makes mention of a (wholly inadequate) with the assumption that third party providers will open up shop there. But with GPs these days pooling resources to incentivise to open a small satellite surgery. The outcome will be even more pressure on existing services, and anyone appointment these days will tell you that will become a nightmare.</p> <p>Services</p> <p>There seems to an assumption that third parties will line up to fill in the gaps in your plans, in addition to healthcare providers will provide water and waste services, and various electricity companies will magic up enough to power the extra homes encouraged by government policy over the next few years.</p> <p>In addition to the objections above, the housing market is facing a perfect storm of events conspiring to cause a slump in business. The increase in lending rates and uncertainty about the future are driving this. One builder expects to build 15,000 a year, compared to almost 15,000 last year. This trend is likely to result in a delay in building houses en masse, with a number of years, consigning us all to incessant disruption for years to come.</p> <p>Having read much of your proposals, this is an ill-considered plan, with reports seemingly written to accommodate the consultation, with for example health authorities, has not even been conducted.</p> <p>Local governments are happy to shout about their commitment to conservation and the environment, but West Berkshire is not by proposing such a development on a greenfield site right next to an AONB. This proposal is unsound and I urge you to focus development on existing brownfield sites only.</p>

Please give reasons for your answer	I write to object to the plan. I find it to be unsound for the following reasons: Environment I have lived in Upper Bucklebury for 35 years. This is within a designated Area of Outstanding Natural Beauty. I believe that the open countryside proposed for a large part of the development will be detrimental impacts to protected wildlife. There does not seem to be any evidence of a positive impact on wild

adequate green space and protecting biodiversity. The two “country parks” proposed in the plans have now been done. There appears to be no evidence of any sound attempt to investigate, analyse and address the consequences of such

Transport

There appears to be a plan for an exit road at the north of the site onto Harts Hill Road. This is a challenging road, even under ideal conditions. There are no modelling results for this proposed junction, the displacement of A4 traffic will, therefore, be directed towards Upper Bucklebury. The roads into, out of, and within the village are mainly unsuitable for large volumes of traffic and this increase in traffic is considered to be a major risk of danger and could lead to loss of life. The council assessment of the proposal is a reduction of accidents and safety. How is this proven?

Healthcare

There appears to be very little detail into strategic healthcare planning; neither WBC nor the developers, appear to have any prospective 1-hA specific to the proposed North-East Thatcham development. It seems that there is no direct engagement with the Health Consortium and local general practices. When considering how new GP practices are commissioned by NI-IS England, alongside the fact that it would appear to be of little or geographic sense for an existing GP practice in the area to set up a branch surgery, it seems unlikely that appropriate provision will be made in a timely fashion, if at all. Surely this complicated and essential provision cannot be left until the development is approved. Dental practices in Thatcham are under severe pressure to provide care for existing residents. Pharmacies in the area are unable to provide an adequate service. WBC and the developers appear to have neither arranged a relevant 1-hA nor provided evidence of having appropriate agencies or providers.

Education

Provision for education for the whole age-range is not clearly defined. Secondary school provision appears unsound in respect of anticipated number of pupils; location of a school; the timing of provision of necessary funding. The development plan states that the development is not sufficient to fill a 6-8 FE school, a new school to be smaller than 6FE. Bucklebury children would probably no longer have a choice between the Kennet School and the Downs School for their secondary education. There are no details in the LPR of the provision for Nursery or Early Years. The provision for Primary education is unclear. How can this proposal go forward without significantly increased information, research and assurance of the necessity for such provision? In summary, it appears that, in order to meet an arbitrary target for new development, an easy option has been proposed for the area only.

Please give reasons for your answer	<p>I would first like to say that after Dunstan Park was developed it was said there would be no development on the north to prove this unfortunately. Then Peter Simmonds the farmer sold his house and yard which was developed which is <personal information removed></p> <p>The proposal site for the development of 1500+ houses is totally unsuitable for the following reasons.</p> <p>1 Transport</p> <p>These day we are not talking about one car per household. Where I live in <personal details> most properties have five. When my late wife and I moved here in 1964 Harts Hill and <illegible> Lane was already a rat run and we have since then. A North exit from the site would cause caos at peak times. Obvious choice to go to Pangbourne and Reading refuges for pedestrians.</p> <p>1 Education</p> <p>The scools in the area have been extended so many tims to accommodate past development. Playgrounds are not b provision in the area for new schools. I don't think so.</p> <p>1 Health</p> <p>Same as education. The surgeries in the area are bursting at the seams. It is difficult to obtain a phone call let alone a Dentist are in the same situation.</p> <p>The whole thing will end in tears. More cars more pollution more environmental problems more accidents. Why do we We don't. Central Government dictates the number and councils don't resist.</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>OBJECTING to plan SP17 as it is unsound due to the following reasons and negative impacts:</p> <ul style="list-style-type: none"> - My wife and I are keen cyclists and the increased traffic on local roads will make our commute and leisure cycling more difficult. - Whilst the development itself may be designed for safe and sustainable transport, the existing road network around the development does not support safe and sustainable transport for the existing wider community. - We currently use the Chapel Row GP surgery, which is already at capacity. The addition of these houses in the immediate vicinity will put further significant pressure on our first line health care for doctor appointments and dental care. - We both enjoy walking and cycling in the countryside and woodland in our local area. This countryside supports several ancient woodlands and heathlands. Increased population and noise due to this development will put further significant pressure on these areas. For example failing to protect endangered species, such as the Nightjar or Cuckoo. <p>Please carefully consider these points and their negative impact on us and the local environment.</p>

Please give reasons for your answer	I wish to raise my objection to the proposed development in NE Thatcham outlined in the Local Plan Review. There are components of the plan that are clearly unsound and the development will have a hugely negative impact on residents of Bucklebury Parish, where we live in the following ways.

	<p>1 Increased traffic in and around Upper Bucklebury, Chapel Row and other parts of the parish. The flow of traffic on the Common is already fast and dangerous making it unsafe for walkers, cyclists and wildlife.</p> <p>1 Negative impact on the environment. The collateral damage to the Common will be huge as there is no proper plan for the development. This will result in an overspill of people and traffic into the adjacent areas of the AONB. The Common is a rich and fragile ecosystem.</p> <p>1 Negative impact on healthcare provision for existing residents as the local GP practices are already overstretched and will not be able to cope with the necessary influx of new residents.</p> <p>1 There is no clearly defined plan for the provision of schools. The data used in the plan is based on 12 year old data which is oversubscribed.</p> <p>The WBC should be focussed on representing it's existing residents and the preservation of it's existing environment and not the loss of greenfield sites to the detriment of many and benefit of a few.</p> <p>To me this development is nothing more than urban sprawl and the destruction of the boundary between a rural village and a town.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>

Please give reasons for your answer	I object to the Thatcham North East Housing Development plan. The plan is to build an excessive number of new houses on an area that can not support it. The plan would have huge detrimental consequences for the natural environment and current residents of the area.

	<p>Thatcham has already experienced rapid growth and is a very large area of houses without the supporting infrastructure. This has led to congestion on the A4 and at the railway crossing at Thatcham station. The large volume of slow moving traffic at bus stops has led to poor air quality. This development would dramatically increase this issue and residents of the new development would be locked in their development due to congested roads.</p> <p>The plan would see a very large increase in traffic through Upper Bucklebury on Harts Hill Road. This road is already dangerous and there have been a number of recent accidents.</p> <p>My two children travel from Upper Bucklebury to Kennet School in Thatcham, and have to use the road for cycling on a daily basis due to fast moving traffic on a narrow road and no foot pavements out of Upper Bucklebury. The plans would dramatically increase the addition of heavy vehicles during construction it would pose a real risk to all children who have to make the trip to school.</p> <p>The plan does not include enough provision for new services to support new residents where local services are already in place. The plan does not definitively include a new secondary school which would be absolutely required. Kennet School is already full and residents will find themselves having to travel outside the area for second school provision, which would in turn increase the time when we are battling climate change.</p> <p>The development site is green fields and will involve the destruction of wild areas. There are other much better suited sites that will not destroy wildlife habitat.</p> <p>Any development should be much smaller scale in smaller areas, using brown field areas or redeveloping industrial areas.</p> <p>The development will essentially border the Area of Outstanding Natural Beauty, this will lead to a large increase of traffic in a delicate area of countryside.</p> <p>This will directly reduce the quality of life of residents of both Upper Bucklebury and Thatcham who use the area for walking and cycling areas.</p>

Please give reasons for your answer	I am writing to object to the proposal for 1500 houses at the NE Thatcham Development. Please forgive me if I am not but I have no experience in planning. My objections are:

Pet ownership. 27% of the UK population own a dog. As this is a national average, I would expect the number of dogs to be higher. It is inevitable that a large proportion of the new residents of the north east Thatcham development will be dog owners. Dogs are common. Assuming dogs are walked twice a day, we are looking at 810 walks a day. This would have a colossal impact on the local environment, plants, to name but a few. Dogs, as wonderful as they are, are not quiet wildlife loving animals.

Public transport in Thatcham is poor, therefore the majority of the 1500 households will have a minimum of one car, and the increase in traffic around will be detrimental to this quiet residential area.

There is very limited parking at the Bucklebury common, so it is likely that cars will be parked on narrow roads where they are not intended. There are no footpaths so this would also cause a danger to pedestrians.

Many of the roads around Bucklebury are designed 'quiet roads'. There must be very good reasons why these were designated as such. It is a contradiction that an area where the council consider quiet roads are a good idea, for planning to be considered for a development, and the Berkshire Council enforce these 'quiet status'?

The roads around Bucklebury, Cold Ash, Chapel Row and Beecham (as well as the smaller villages) are not suitable for a development of 1500 homes will generate. Many of the roads are suitable for single file traffic only. Many of the roads do not have footpaths.

The train crossing in Thatcham is already severely congested at many times of the day, particularly in rush hour. The development (most likely more than this as many households will have more than one car) will have a considerable impact on the local road network in the station area, which is already very poor at busy times of day. Queues already build up in all directions and this situation considerably worse.

This scale of this development is out of keeping with the local area. Bucklebury is a relatively small village. The impact of Bucklebury will irreversibly change the intrinsic nature of this village.

We currently have an energy crisis and food costs are rising. It seems illogical to be looking to build on green fields. Green fields, agricultural land, there are many other uses that would be appropriate. I would like reassurance that West Berks Council will not allow for use of this land.

It appears that there is not jobs available for an additional 1500 people (or 3000, assuming two adults will be working) in the area. Will it be suitable?

In summary, I strongly object - a development of 1500 homes is out of proportion for this area and should not go ahead.

As a final point- I note that Catesby Estates which is promoting the scheme for north east Thatcham says "This sustainable development provides a unique opportunity to deliver a sensitively designed energy efficient residential scheme" There is nothing wrong with a development of 1500 homes on the edge of a small village. I am shocked that West Berkshire Council has allowed a business to make such a claim. I request that this statement is removed. In addition, there is no explanation for what is sustainable about the development. The development is used inappropriately and should not be allowed by West Berkshire Council. I am extremely concerned that West Berkshire Council is acting on its behalf to make unsubstantiated claims. <https://www.catesbyestates.co.uk/land/land-to-the-north-east-of-thatcham/>

Please give reasons for your answer	<p>As a resident of Upper Bucklebury, I am disappointed to hear of the proposal to build up to 2,500 homes on the site adjacent to Floral Way and Harts Hill. I object to the proposed plan on the the basis that it is unsound and note t</p> <p>Transport</p> <p>The A4 and Floral Way are already contested at peak times, together with long tail backs to the level crossing. Thato struggles at peak times to cope, without the addition of further homes and therefore additional traffic, at least one ca which will join already contested routes and increase pollution.</p> <p>I note that there is a proposal for an exit to the site on Harts Hill, but the location of this is unclear. There appears to use of this exit and the impact, or drawings to highlight the location. Harts Hill is steep and bendy, and the recent col ice patches. Pedestrians and cyclists use the road as there is no pavement. The addition of further traffic will increas</p> <p>Furthermore, it is highly likely that much of the traffic exiting from Harts Hill will go on to travel through Upper Buckle towards Cold Ash. In both cases, going past Primary Schools (Bucklebury Primary and St Finian's) where children a will lead to safety concerns. It is already very dangers passing St Finian's School at school drop off and pick up times overtaking parked traffic. The increased traffic will also impact on the nature of these lovely villages which are on the Natural Beauty.</p> <p>The Plan does nothing to explain how the infrastructure will cope, advise how safety in the areas stated will be addre villages which is adjoins.</p> <p>Environment</p> <p>The development is on greenfield site rather than developed land and is adjacent to Bucklebury common, home to a woodland. Due to the traffic concerns highlighted above, there will undoubtedly be additional traffic driving though the natural beauty increasing noise and pollution.</p> <p>There will also inevitably be an increase in footfall on the common which will be detrimental to the fragile ecosystem. Bucklebury Common is focused on not increasing human pressure on the common, but with the homes so near this is I am unable to see any way of mitigating.</p> <p>Healthcare</p> <p>All residents should be able to obtain access healthcare facilities, however, these are already overstretched in the ar not been consulted. The Plan therefore does not provide comfort or evidence to confirm that adequate provision will</p>

Please give reasons for your answer	I object to the proposed development to build 1500-2500 houses in NE Thatcham for a number of reasons 1. Volume This is excessively large amount of houses that the local infrastructure cannot support – can the number be reduced 2. Traffic This could be anywhere between 1500 and 5000 extra cars on the roads in the area. We are particularly strongly ag on Harts Hill road. This is a country road and would encourage many cars to use it as a rat run to bypass the A4 which number of cars passing through Upper Bucklebury/Chapel Row/Bradfield Southend 3. GP's/Dentists Where are the GP's and dentists to support all these people – we already experience delays of many weeks to get a 4. Education Where will the children of these houses seek their education, more importantly existing residents in areas more distant to have their selections restricted or unavailable 5. Environment We live in an AONB which could be badly affected by the volume of people seeking recreational activities locally This development may provide many houses but I see little or no planning to deal with the local infrastructure to cater We already had the extensive development of Dunstan park and WBC is now back for another tranche of housing just somewhere else.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes	

* No	
Please give reasons for your answer	<p>I write in respect of the proposed development to the NE of Thatcham. I live in Stanford Dingley where I am a parish council member. I have contributed to our village design statement and expressed our collective desire that the rural character of the Pang Valley and adjacent areas be preserved and protected from urbanisation.</p> <ul style="list-style-type: none"> • This proposed development would crawl up the southwest facing slopes of the common either side of Harts Hill, a challenging busy narrow road. To my knowledge there has been at least one fatal accident, as well as regular accidents over the years. The possibility of 2,500 extra households disgorging cars, cyclists and pedestrians onto that road is not something we should be considering. The village communities of Stanford Dingley, Bradfield, Upper and Lower Bucklebury all use Harts Hill and Newbury. It is already busy and sometimes very busy. Please do not make that worse. • Secondly Cox's Lane is a charming narrow winding byway that I cycle on a fairly regular basis. The quietude and beauty of the area for recreational cycling and a picturesque link between Bucklebury Common and the Kennet & Avon Canal towards Newbury, equestrians and walkers along Cox's Lane. The proposed development would irrevocably change its precious character. • There is much talk nowadays of preserving and enhancing the natural environment. The south facing slopes of the common, this development would occupy, are favoured by the sun (each 10% of upward slope towards the sun doubles the amount of light) and are special habitats that warm quicker in the spring and remain more sheltered in the winter. This encourages a rich flora and animal than does a north facing slope. Please don't destroy this precious habitat. • Not only is it precious but it is a beautiful green lung. One can look down towards Siege Cross Farm from Cox's Lane, which mitigates the urban sprawl and the hideous industrial estate. Even from Hart's Hill and Upper Bucklebury there are views of the Downs and the Kennet Valley unalloyed by urbanisation in the foreground. Please don't spoil these views. • Lastly, I'm led to believe that other sites are available, south of the A4, which could provide a much needed croft or farm east of Thatcham. That would be a clever option because the Thatcham railway level crossing is a nightmare to cross. <p>To sum up I object to the proposed development and my wife (Mrs SHA Logan) would like to associate herself with the objection.</p>

Please give reasons for your answer	I would like you to note my objection to the proposed Thatcham NE development. <ol style="list-style-type: none"> 1 The increased volume of traffic will put a further strain on the already congested A4 Bath Road forcing more cars "rat run" to avoid the A4. 2 Bucklebury Common is an AONB with a delicate eco structure and home to much wildlife. It can barely support alone with a further 2500 homes on its door step.

	<p>3 I have not seen a health care impact assessment, our current GP's and dentists can barely cope without adding lists.</p> <p>4 It feels to me that Westberks Council are trying to meet government new homes requirements without giving enough thought to the required and ecological impact it will have.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>

<p>1. Do you consider the Local Plan Review is legally compliant?</p>	

<p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to object to the Local Plan under consultation insofar as it includes a proposal to build 1,500 house in N</p> <p>I object to the plan as I find it unsound.</p> <p>1. Thatcham has already been the subject of a disproportionate level of planning compared with other equivalent small town as it existed in the early 1980s is barely recognisable today and the sense from the local plan is that this easy fix to meet planning targets with little or no regard to the impact this development will have on the surrounding areas or the safety of the communities.</p> <p>2 It really is disappointing that those elected to serve West Berkshire are doing so little to protect our landscape and ill-thought out Local Plan which will permanently negatively impact the community and disfigure the countryside.</p> <p>3 When history judges the decisions made by those constituting West Berkshire Council today, a decision to implement be looked back on as a major mistake and misjudgement by those individuals involved.</p> <p>4 I cannot see how the Local Plan's proposal to build such an enormous volume of buildings has even begun to consider the development will have on the environment and the communities. Once what we have is lost it will be lost forever. The damage that the Local Plan will cause. Ancient woodlands will be decimated, countryside enjoyed by local communities and wildlife will be sacrificed. And all to meet unnecessary and inflated home building targets when a more creative additional housing needed by the communities could and should be achieved on a basis which shares the impact of Berkshire.</p>

	<p>5 Looking at the disproportionate and unsustainable effect the 1,500 houses will have on local amenities it is surprising out for consultation. Every single resident in Thatcham and the surrounding area, my family included, will permanently</p> <ul style="list-style-type: none"> • worse transport • worse air quality and more pollution • worse healthcare • worse education services <p>Those making this decision should consider very carefully the permanent damage the proposal to build 1,500 homes in the Local Plan will cause and the dreadful legacy this will leave for current and future generations who choose West Berkshire.</p> <p>The Local Plan should not be adopted.</p>

Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>Please find below my concerns and objection to the Regulation 19 consultation regarding the proposed development. I appreciate the need to invest in new housing, there are various elements to the plan that are clearly unsound and do not have the risks mitigated. This will undoubtedly lead to negative consequences for both existing and any new residents in terms of local infrastructure and environment.</p> <p>Traffic and Transport:</p> <p>Firstly, regarding transport and traffic. This area already struggles with traffic issues. We are on a main through route junction at Theale, and the A4 is already stretched by the current traffic, with rural routes through Upper Bucklebury taking some of this strain. The addition of up to 2500 additional houses at the NE Thatcham site, specifically the proposed road will vastly increase this road traffic with the risk of accidents, pedestrian injuries and wildlife collisions all increasing. We already have problems with speeding and road maintenance (significant potholes regularly causing damage to vehicles) and the increased traffic burden will only make this worse. Villages such as Upper Bucklebury, Bradfield Southend and Colton are also centres located on these main through routes, some of which have little/no pavements, which raises significant concerns for safety as well as the air quality risks. There are also risks to car users on these rural routes, in the form of large wildlife (Deer) which are common numbers in the woodland surrounding our villages. These do significant damage to a car and its occupants when hit.</p>

The plans also propose a new car park on Harts Hill Road. This road is already a high-risk area for accidents, with speed bumps and year-round large potholes, any additional traffic will worsen this risk to new and existing residents alike. Furthermore, the noise and behaviour in the carparks located on the common, loud music playing, recreational drug abuse etc and further carparks.

I note the comments that you feel the development will 'increase the opportunities for walking, cycling and use of public transport'. As a confident cyclist I already chose not to cycle down Harts Hill road due to the risks outlined above. An increase in road traffic in the village will only decrease the safety of cyclists. Furthermore the proposed development will obstruct (even if only partially) a **beautiful and safe** walking route from Upper Bucklebury into Thatcham via Colthrop farm that I regularly use. This will force further road use rather than reducing it. The plans mention improving public transport, we currently have a bus that goes through the village 3 times a day with very limited stops. As a result the usage is low as it is impractical. By whom are the improvements funded? What will this mean for residents? This information has not been provided and vague statements cannot be relied upon for mitigation. The roads in these small villages are simply not suitable for large vehicles and keeping the roads quiet and safe in the way that our 'Bucklebury quiet lanes' currently are, has got to be a priority for encouraging sustainable travel.

Infrastructure:

Secondly, considering healthcare provision for new residents; whilst the plan proposes a primary care facility will be in place, there is no evidence that any strategic healthcare planning has been considered. As a Doctor working in the NHS I am all too aware of the staffing and funding of healthcare, and is incredibly rare for NHS England to create a brand new healthcare facility without the amalgamation/extension/expansion of existing practices. Any expansion or relocation of existing services would have to be considered. Whilst large 'Super Practices' are perhaps suitable in towns/cities, in our rural setting this would inevitably lead to a situation where those who need it most are unable to access healthcare due to physical distance and poor public transport. The surgery at Thatcham is covering a large number of patients whose health and wellbeing cannot be compromised by the addition of 2500 new homes. Neither can we expect our already overstretched GP colleagues to simply 'cope' with these thousands of additional patients, likely be young families requiring maternity care, childhood vaccinations etc. There is no evidence that local practices have been considered in these plans. This development simply cannot go ahead without the **guarantee of an adequately sized and staffed facility** to avoid unacceptable risks to existing residents, new residents and the current healthcare staff.

I have similar concerns regarding the provision for educational facilities/spaces for this new development. The plan states that 'will be provided' but gives no detail on how, where, when and funded by whom. This applies to both nursery/early years and school places. The document states that £12million will be provided for primary education, however this appears to be for the year 2011 and again doesn't provide any details on when, where and how this educational requirement will be met.

Regarding secondary education, the development plan states that the size of the NE Thatcham development is insufficient for a secondary school as it does not meet the size requirement set out by the government that schools need to be a certain size to ensure facilities/sustainability. This will result in the existing schools needing to take on new pupils. It is not uncommon for schools to have to take on families with children in different schools, having to travel out of area for schooling or even move to facilitate schooling. The plan does not provide as to how the existing secondary schools will be able to cope with the additional students. No evidence of a plan to expand or to whether expansion is possible at their location, nor whether staffing will be adequate to allow for these additional students.

Educational provision needs to be robustly planned and established before any building work could take place as residents would be moving in immediately on moving in. Therefore I have significant concerns that this planning is inadequate in this regard, and that the statement 'will be provided' is insufficient.

Environment/wildlife:

The importance of living sustainably and minimising our impact as a species on the environment has never been more important than in the shadow of a worldwide pandemic and are hit by increasingly common extreme weather events, it is essential that our human activity must be done sensitively and in an environmentally sound way.

The building of 2500 homes on what is currently an area of farmland and ancient woodlands will result in around 4000 additional people on the area. This increase in human burden, especially as the plans state the intent to encourage links from the new development via this area 'accessible to all users' (ie including road traffic) completely contradicts the current management vision of the ecosystem that exists on Bucklebury common. The threat that this puts on legally protected wildlife, ancient woodlands and the recreation currently available for recreation is undeniable. The Parish currently work so hard to protect, nurture and restore the common as a haven for wildlife. This will be extinguished should this development go ahead, turning a unique and rural village into a residential area of Thatcham.

The plans do not show how adequate green and biodiverse spaces will be incorporated into the site itself therefore it is unlikely that residents would choose to visit and enjoy the common and area surrounding the site. It is clear that WBC does not value the common as the original proposal for two 'country parks' in the initial Thatcham growth plan has now been downgraded into a village green. There is clear evidence that the legally protected wildlife within the area will be adequately conserved. There are unsubstantiated claims that risks can be mitigated, but the LPR's own sustainability appraisal states that it will have a negative impact on sustainability simply because of the size of the site! This does not consider all the other negative impacts an additional 4000 people would have on the local ecology.

There is **no evidence** in these plans that the development will benefit the environment, with **clear evidence** that simply building 2500 homes will result in a negative impact on environmental sustainability.

Please accept this letter as my strong objection to the NE Thatcham development on the grounds that the impact of the development on infrastructure (particularly **healthcare** and **education**) and the **environment** (both ecological and quality of life for existing residents) has **simply not been adequately considered nor risks mitigated**. The size of this development is completely disproportionate to the only negative impacts on the local community and area.

1. Do you consider the Local Plan Review is legally compliant?	
* Yes	
* No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan	

<p>provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>*LATE RESPONSE*</p> <p>I am writing to object to the proposals for new housing development in the North East Thatcham area.</p> <p>I have been a resident of Upper Bucklebury for the last 21 years and was attracted to the area because it was a quiet village with Outstanding Natural Beauty (Wessex Downs.) Over the years small but necessary areas of development have made the village more accessible but also have been to its detriment. I cannot begin to imagine how much of a detriment to current and future residents this will be.</p> <p>1. The quiet village of Upper Bucklebury would become a rat run for traffic. It is already used as a rat run to avoid traffic but 2500 extra households would result in excessively high volumes of traffic through the village which would be damaging to the natural environment and the wildlife here, as the road runs across Bucklebury Common it would be damaging to the natural environment and the wildlife here, roads here are currently inadequate for the volume of traffic we have already, and the walking route along Harts Hill to the village. More traffic will worsen this.</p> <p>2. The schools provision in the plan is not only inadequate for the size of the proposed development, it will be significantly reduced for those who currently reside in the area, breaching the Council's obligations to provide education for all children. Kennet School families who currently live a little further away but are still in catchment (ie Bucklebury children) will be forced to travel further to school.</p> <p>3. Bucklebury Common and parts of the surrounding area is an area of great biodiversity but is also a fragile habitat. The proposed development will cause immeasurable damage to the Common, from traffic, footfall, light pollution, and reduction of green space which will be detrimental to the environment. I can think of no way that the proposed development could do anything other than be a very bad thing for the environment. The proposed development has only very vague and poorly defined plans for leisure spaces and playing fields means that the village here will be overwhelmed.</p> <p>4. The proposals for healthcare - doctors surgeries and dentists - is inadequate. The existing surgeries and dentists' services and provisions being made are not sufficient to support another 2500 homes.</p> <p>Overall, the plan is unsound, and is not a sustainable one. My letter here is brief and not as eloquent as many you will receive, but I say very much as strong as those others who have written to you in greater detail.</p>

<p>Please give reasons for your answer</p>	<p>On the North East Thatcham plan for a very large housing estate, my particular objections are:</p> <p>There will be increased traffic through Upper Bucklebury and Chapel Row and a problem at the junction on the Pangb proposed a new roundabout on the narrow Harts Hill road to allow traffic in and out of the northern end of the develop Harts Hill; this will cause additional congestion on the A4. Cold Ash will see a large flow of traffic going towards Chie narrow and many do not have pavements; cycling would not be safe.</p> <p>There is insufficient capacity at Kennet school (oversubscribed) and no other plan has been made. School provision and facilities on such a gradient have not been costed.</p> <p>On Wildlife: Bucklebury common would be subjected to an increased number of visitors and the delicate ecosystem v There is no evidence of or any strategy for increased biodiversity. A "country park" mentioned in the plan does not n the three small areas inside the settlement boundary are not of any proper environmental value, some "wildflower m nightjars or great crested newts.</p> <p>The strategic gap between Thatcham and Bucklebury; Upper Bucklebury will lose its identity when Thatcham and Bu developer in Cold Ash has just been refused permission for this reason.</p> <p>Medical provision: additional GP surgeries are not part of the NHS strategy for the future. No local surgeries have th surgery of 450 square metres as suggested.</p> <p>Number of houses: Initially 2500 houses were to be built in total, 1250 in the plan period. This has now been increa Any mitigation of the impact of the development should be largely completed before sales however what normally hap poverty and delays this work until the site is largely complete. The developer will wish to utilise the area originally de 1000 after this LPR plan period finishes.</p>

Please give reasons for your answer	It will dramatically reduce the greenbelt between Thatcham and surrounding villages therefore losing the rural nature over development of our beautiful countryside in an area which consists of rolling hills and farmland. If development will not be any open rural areas left for future generations to enjoy. The proposed land is not particularly suitable for development as it is very hilly land and has had issues as a flood p Significantly increased traffic and pollution through the surrounding villages. Many of the small local roads through t safety concern as they are very busy at peak times and many don't have pavements and street lights. Hermitage Ro as a cut through to the M4 with the traffic calming islands causing long queues of traffic at peak times blocking entry and causing drivers to take unnecessary risks to speed through them. This development will exacerbate the traffic p the road safety concerns.

	<p>This level of additional housing will inevitably have an adverse impact on local facilities, schooling, medical and welfare services. The area is already overstretched. From speaking to local GPs I understand they have been already been told that the development will result in a large increase in numbers as no new medical facilities will be created. This seems highly presumptuous to be confirming the development going ahead at this stage before all of the objections have been received, read and considered. Since moving to the area, it has been difficult to access NHS dental care. Most local practices will take on new NHS patients but continuing staff shortages already exist. Waiting for appointments and high chances of cancellations. These services cannot appropriately support any increase in the number of residents.</p> <p>Please do not take away the opportunity (for our families today and future generations) to live and play in our beautiful village. We would like Thatcham housing development go ahead.</p>

Please give reasons for your answer	<p>We wish to formally register feedback to the proposed local plan on the following basis:</p> <ol style="list-style-type: none"> 1. The proposed development has no regard for infrastructure or the subsequent impact that a development of this size will have on the surrounding villages, transportation links or residents. Significant changes to the infrastructure would be required to 'mitigate' impact to the development. From major rail network which will need to support commuter connections. Nothing in the local area, including the A4 is suitable to manage this. With only a small % of roads even having payments (Cold Ash 22%) there is a practical safety concern. 2. The environmental impact to residents in the surrounding area will result in an increase of traffic, noise, pollution. The surrounding area and the surrounding villages is an important one. Thatcham is an urban town and the surrounding rural parishes with their own identities to keep their identities. As residents in the Cold Ash Parish we are keen to protect this for future generations. 3. Further evidence is required to clearly understand the true impact of a plan of this size will have on the surrounding area. The proposed housing number but at reduced numbers. Clarity around its impact is neither fully worked through or clearly defined. 4. There are continual changes to what is being proposed. 2500 dwellings, then 1250, then 1500, then potentially 2500 over the plan period. The required planning diligence, assessments, impact studies and processes must reflect a true picture of the development. 5. Facilities and services being proposed are not confirmed. The ability to support a development of this size must be based on confirmed commitments. Who will be paying for the ongoing support of these. 6. Healthcare, schooling, leisure facilities are all under extreme pressure. <p>- Reference. Policy SP17, in the Regulation 18 of the emerging draft local plan, stated expectation of an new 8FE service.</p>

	<ul style="list-style-type: none"> - Policy SP17 of the Regulation 19 Consultation then reduced this to provision to only land. - The Thatcham Strategic growth study indicated that planned strategic development at 6-8FE is likely necessary to - The size of land specified is below the minimum viable size for a secondary school. - Trinity and Kennet are currently at capacity. - The infrastructure Delivery plan of Jan 2024 only has figure of 5,027,613 which is not sufficient to fund a secondary - The Thatcham Growth study noted that education provision was based on WBDC data from a 2011 study. This is i <p>decisions on, which leads to a conclusion that there are significant areas of detail insufficiently assessed or adequat</p>

Please give reasons for your answer	<ul style="list-style-type: none"> Increased traffic - The plan to have an exit and a carpark off of Hart hills seems dangerous on a already hazardous road. The road becomes dangerous during winter months and tends to have damaged due to frequent levels of traffic using it. The plan will make this worse, i don't understand how the WBC feels this is a safe option. destruction of wildlife habitat - It goes without saying that any development on green land is going to damage a lot of our wildlife. Any development would result in severe negative impact to all animal species. Education - i have strong concerns about the plan to provide an early years provision within the development. this will lead to the end of small rural Early Years settings. The Early Years sector is already in crisis and needs support. Large organisations, such as nurseries that are more likely to be what WBC are describing when they say 'Early Years' rarely deliver high quality education and have a historic statistic of having high turn-over of staff/leadership. We need to encourage settings and encouraging investment as smaller setting deliver the high quality and continuity that the young children need.

<p>Please give reasons for your answer</p>	<p>I am OBJECTING to the Thatcham NE Housing Development Plan for the following reasons;</p> <p>The information provided by the council regarding this development is in the form of a lengthy document which is not user friendly. Thankfully, our Parish Council has waded through a considerable amount of pages to help us understand the implications of this development.</p> <p>From the work undertaken by Bucklebury Parish Council on residents' behalf it is evident that the information provided in the Local Plan is vague using out-dated information ie the data used regarding the biodiversity of Bucklebury Common in 2018. 80% of surveys were conducted more than 15 years ago, 50% 20 years ago and 44% 30 years ago.</p> <p>Another example is that of the proposed 450 sq m primary healthcare facility with the suggestion that a GP Surgery be located on the site of Oxfordshire and Berkshire West Integrated Care Board or other such appropriate body. However, the Local Plan Review does not provide insight into strategic healthcare planning.</p> <p>I live in Bucklebury and want to let you know how this development will affect local residents. Initially, I didn't think we had assumed the traffic would be directed towards the A4 or along the bypass towards Newbury. However, this is not the information provided it will have a significant affect on the lives of all residents in Bucklebury, Chapel Row, Midgham, and the natural environment.</p> <p>Greenfield Site</p> <p>My main objection is that this is a greenfield site. New research from the CPRE says in rural West Berkshire, there are 1,000 hectares totalling 46.54 hectares, which it is claimed would allow building of 2,837 new homes without the need to build on agricultural land.</p> <p>When the housing numbers are no longer mandatory, and when there is already considerable potential for new homes in rural areas, it is clearly wrong for local councils in our county to be offering up vast swathes of countryside to developers, especially in areas of special landscapes such as AONB [Area of Outstanding Natural Beauty]," said Greg Wilkinson, chairman of CPRE Berkshire.</p> <p>The site of a former paper mill and farm in Colthrop has been proposed by developers as an alternative housing strategy. The overwhelming response from the public was very positive. A new road bridge over the railway and improved infrastructure would be considered considerably.</p> <p>The railway level crossing at Thatcham Station causes huge queues of traffic either side of the railway backing up to the station. The increased traffic created by the development, the queues will just be longer, especially during the rush hour. This will cause an increase of pollution from exhausts and tyres.</p> <p>Traffic Increase</p> <p>As mentioned above one of the main objections is the increase in traffic movements as a result of the new development. Two access roads from the estate, one leading directly on to Harts Hill Road, will mean a huge amount of additional traffic from the estate of Bucklebury, Chapel Row and Bradfield to get to the main road giving access to A4 (Reading), M4 (east and west) and the M3.</p> <p>As well as taking this direct route, traffic will use smaller lanes from this road down to the A4, travelling south towards the station through Cold Ash to travel north. The roads are narrow country lanes with many bends and no footpaths. The condition of the roads is at the least, with many potholes as water running/settling along the edge of the roads freezes and then causes the tarmac to crack.</p>

The villages are very quiet with little through traffic. The main route from Harts Hill Road consists of several acute bends. On this route, there are no pavements. Increased traffic will cause accidents with pedestrians, cyclists and horses. There are several accidents in this area and sadly, even with the current level of traffic several accidents involving cars and horses occur.

Directing traffic along this road will only add to pressure on existing accident blackspots. I.e. where Common Hill meets the junction of Back Lane and dual carriageway of A4.

There is no alternative to car travel. The regular but infrequent buses through the villages, having been totally stopped in this area, if you need to get somewhere you need a car. Very few people living in these areas use other alternatives to the car.

GP Surgery

Our local GP surgery in Chapel Row is already struggling to recruit and retain staff, combined with the increased population and new houses. It is impossible to get an appointment unless you phone in the morning and if you are lucky enough to get through to see a GP. If the surgery is forced to accept more patients it will negatively affect the existing patients and cause further delays. Injuries (Thatcham) and A&E.

Bucklebury Common

The plan mentions a 'Country Park' – this has a specific accepted definition which is not met in this Plan. The three proposed settlement boundary have no meaningful environmental value or commitment to exclude subsequent development. They do not provide adequate green space within the development itself and not rely on a link to the area of AONB to provide its value.

Bucklebury Common should be protected from increased footfall which will have an adverse effect upon the Common's diverse ecosystem that is nationally important. This consists of the famous Avenue of Oaks at Chapel Row, ancient woodland and one of the largest areas of heathland in Berkshire.

The Common has a rich variety of flora and fauna. Conservation of important habitats is undertaken by the Estate through its collaboration with various voluntary organisations. *The Bucklebury Heathland Group continues to work to restore the Common to once an extensive of heather and gorse, offering sanctuary to many birds and much wildlife.*

Already there are problems with anti-social behaviour such as groups of motorbike riders on the Common and 'doggerel' along the Common.

The local environment will be changed forever in a negative way. This is Greenfield development abutting an AONB. There is no strategy for positive impact and overall biodiversity gain.

I strongly urge you to reject this development and look at alternative sites that will not destroy this beautiful area for the future.

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>I object to the North-East Thatcham development plan (SP17) with its proposal to build 1500 to 2500 houses in NE Thatcham as part of West Berkshire Council's Local Plan Review for the following reasons:</p> <p>Housing development should be focused on brownfield sites and those within urbanised areas wherever possible, not greenfield sites. The impact on the AONB, environment, the common, biodiversity, wildlife and local amenities of this development would be significant.</p> <p>The development would effectively join the distinct settlements of Thatcham and Upper Bucklebury.</p> <p>The development would also have a huge negative impact on the already overstretched provision of infrastructure and services (hospitals, GP surgeries, dental practices, pharmacies), education, public transport. These services are already stretched and cause anxiety and stress for those trying to use them. The roads through Upper Bucklebury would not be able to accommodate the increased traffic from West Berkshire Council. They would no longer be safe for non-motorised users, such as horse riders, walkers and cyclists, and the closure of rural roads.</p> <p>In 2007 Thatcham suffered very badly from pluvial flooding. All the proposed urbanisation of the suggested allocated sites would exacerbate the existing development at Thatcham, which will only exacerbate the existing flood risk situation.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	I object to this plan on the basis that the infrastructure, particularly Harts Hill Road, is inadequate to deal with the increased traffic that would inevitably create. Not only is it inadequate but also dangerous, as the recent cold weather proved. This road is not only of a poor nature to nature of the road but also down to the continued water leaks from archaic piping. In addition there is already no safe

	using the stretch from The Mill House mini roundabout to the top of the hill at Upper Bucklebury. Potentially, with 2500 cars trying to find their way to A34 or M4. As the A4/A339 through Thatcham and Newbury down around the Har (especially at school run and other oak times) becomes overloaded they will inevitably use Harts Hill Road, Burdens down Red Shute Hill and on past Hillier's Garden Centre to reach the A34/M4. In doing this the likelihood of serious/fatal accidents and pedestrians (including secondary school children) who I often see walking this road, will be substantially increased. Knowing these very real and obvious increased risks, those approving would be culpable to any loss of life.

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<ul style="list-style-type: none"> • By virtue of its scale, proximity and high visibility from several approaches to the AONB and the wider landscape, the proposed extension will have a significant harmful effect upon the setting, sense of remoteness, tranquility and character of the North Wessex Downs AONB, contrary to Policy SP2 of the WBLPR and Paragraph 172 of the NPPF. • The allocation is located on land forming part of the LCA WH4: Cold Ash Woodland and Heathland Mosaic Landscape, the West Berkshire Landscape Character Assessment and includes land within the designated AONB. Accordingly, the scale proposed will result in the unacceptable loss of land which is of high landscape value in its own right, contrary to Policy SP8 of the WBLPR and Paragraph 170 of the NPPF. • Paragraphs 1.26 and 2.24 of the Thatcham Growth Study (Stage 3) states that an objective of the Study is to avoid coalescence of settlements. However, the proposed development will significantly reduce the physical and perceptual separation between Thatcham and Upper Bucklebury and an unacceptable loss of separate identity, contrary to the objectives of the Study, the West Berkshire Landscape Character Assessment, WBLPR Policies SP2 and SP8 and Paragraph 172 of the NPPF. • The requirement for a network of green infrastructure linking Thatcham to the plateau and the AONB will result in additional pressures on the environmental, economic and social fabric of the AONB, its communities and rural way of life, contrary to the NPPF. • The proposed development will have an unacceptable impact on extensive areas of ancient woodland which adjoin the AONB, contrary to Policy SP11, Dc4 and DC14 and Paragraphs 170 and 175 of the NPPF. • The strategic site allocations at Sandlesford and North East Thatcham are expected to deliver approx. 1,250 dwellings, nearly 50% of the total supply of dwellings to be delivered on all allocated sites over the plan period (4,670 dwellings). Given the long lead-in times and the deliverability of both sites, I believe there is an undue reliance on them. This has considered the Councils ability to meet the housing needs of the area and maintain a 5 year housing supply over the plan period. These sites are a significant component of the urban focus of the Spatial Strategy and are major contributors to the clear imbalance between rural and urban areas which is not justified by evidence and will have unacceptable consequences for the AONB, particularly with regard to maintaining vibrant and balanced communities.

<p>Please give reasons for your answer</p>	<p>I write to formally object to the North East Thatcham (NETD) housing development which has been approved by West Berkshire Council.</p> <p>I run a design and build construction company, building new homes in West London. I am unable to comprehend how a housing development can be proposed on a site between North East Thatcham and Upper Bucklebury.</p> <p>I have lived in Upper Bucklebury for 30 years and proposed scheme <u>will</u> destroy the protected AONB countryside to the north of the village boarder with. I have set out my reasoning for the above statement below;</p> <ul style="list-style-type: none"> • The A4 is already over congested at peak times and this will worsen traffic levels. How do cars sat backlogged on the single carriageway into Thatcham correspond with WBCs green policy for reducing emissions? • In turn more road users will cut through villages such as Upper Bucklebury & Chapel Rowe. These roads are not designed for the demand nor the speed at which motorists drive through villages with elderly care homes & young pedestrians. • The additional roundabout proposed on Harts hill as well as the carpark is not suitable for to this connection since it will increase in levels of traffic. • Road infrastructure is unsuitable to support traffic from an additional 1500 homes. Based on NETDs location, the impact on local highways. • I was a student at Kennet school and understand student numbers have continued to increase to 30+ students per class. Schools overall performance has suffered. This is not effective learning. Where do 1500 homes send children & how will this be overloading the teaching system? We do not have the local school infrastructure for this size of development. • Medical practices cannot support this number of additional residents in the area. Building a new practice on the edge of the village in 2036? Where will all the 1500 homes worth of residents be looked after prior to this? • There is no legitimate positive impact for the NETD presented in the design access statement. It offers a housing development placed in entirely the wrong location within WBC. Greenfield sites between Thatcham and Newbury would offer a more suitable additional housing as well as transport routes & the local amenities support the increase in population. • Sustainable drainage systems (SuDS) which are outlined in the plan will require enormous attenuation systems. These fields offer vital storage of storm water which otherwise runs off to Thatcham. I was at Kennet school in 2012 down Stoney Lane. Schemes such as this, regardless of permeable external and attenuation systems will destroy the landscape. The likelihood of the 1:100 year flooding, which is becoming evermore occurent with recent extreme weather. I have seen the developments of 9 homes - 1500 homes in this location is not suitable. <p>West Berkshires local plan notes; <i>'without a local plan, building new things in our community won't be done in a way that we get it right and work with you to shape West Berkshire until 2039'</i>. The aforementioned list would speak somewhat to these statements.</p> <p>This proposal benefits developers pockets & a housing quota for WBC, without the care or diligence to review the application for the benefits developers pockets. It must be reconsidered and properly reviewed. This should never have been approved.</p> <p>Please protect our home and reconsider the decision on this application.</p>

<p>Please give reasons for your answer</p>	<p>*LATE RESPONSE*</p> <p>Please accept this communication as my objection to the Thatcham NE Development plan, to on the basis that it is unsound and see my reasons below:-</p> <p>A Bucklebury resident for over twenty five years, I have grown to love the surrounding woodlands. I am very fortunate to have access to it. I am greatly concerned that this beautiful area can only be enjoyed environmentally by the building of so many houses close by. Many thousands more people will move to the area, and will want to take advantage of the landscape. It is highly likely that the increase in housing will have a detrimental effect on the legally protected wildlife. This is in direct contrast with the management plan on the Common, focused on restoring and nurturing the ecosystems found around here. There is pollution, noise and other anti-social behaviour around us, which inevitably comes with an increase in population. This is detrimental to the rural environment.</p> <p>We are personally making efforts to educate our children to care for the countryside around us. We are also involved in Common Clearance or sticking to established paths on the Common during nesting season. We expect WBC to plan and act responsibly, from an environmental perspective, on our behalf.</p> <p>I understand that SP17 should have a positive impact on the environment with regard to the provision of new or community parks, but there's little information available on how these will be managed to protect the environment. I do hope that they will be managed.</p> <p>I also have concerns around the potential increase in traffic through Upper Bucklebury. The plan will naturally send more traffic up into the village, for those heading towards the M4 for junction 10. For the sake of all our children, we would not wish to see more traffic coming through.</p> <p>The element of the plan regarding Secondary Education Provision is very concerning. Bucklebury has a choice between the Downs School and Kennet School. Mine attend Kennet. With an additional 1000 children in the area Kennet would easily become oversubscribed in which case Bucklebury children could not get a place at Kennet School. The provision of a new Secondary School does not appear to be a priority. There is no information on when and where a new school would/could be built. In the interim there will be increased travel to The Downs School, which is quite a distance away. My understanding is that the basic strategy is dating back to 2011 and much more work needs to be done to understand the educational needs of the area and move forward.</p>

	<p>Finally, I am concerned about the timing on the Local Plan review consultation, following Mich 6th December 2022 which included amongst other things a focus on taking into account the assessing how much housing can be accommodated. This most certainly applies here. Surely the on planning, due to come in later this year must be used for the Local Plan.</p> <p>It is vital that we plan responsibly, and recognise that the decisions taken now affect generatio</p>

Please give reasons for your answer	<p>As a resident of Upper Bucklebury since 1998 I object strongly to the proposed Local Plan. I b the reason set out below and will have an irreversible negative impact on the quality of life.</p> <p>Transport</p> <p>Access to/from the development will be via the A4 which is already gridlocked at peak times along Floral Way. Motorists commuting to Reading or the M4/A34 will inevitably seek an alte through Upper Bucklebury. Harts Hill has a number of sharp bends which have caused nume years and is especially dangerous in winter, even when gritted. The development will greatly Upper Bucklebury and pose an increased risk to villagers walking their children to school in t Peach's Stores. There is no pavement along Burden's Heath, which cars will use to head tow 13 of the M4.</p> <p>Healthcare</p>

The healthcare proposals contain only wishful thinking with no detail and an absence of concrete medical practices. There appears to have been no Health Impact Assessment. NHS England has closed GP practices, so the burden will fall on existing practices that are already overstretched. Bucklebury is a well-managed medical practice but it was stretched during the covid outbreak with delays in prescriptions and other services. An excess of new potential new patients will have a severe negative impact on the practice's ability to service its current list.

Environment

The Plan will have a severe negative impact on the footpaths and woodland in the proximity of Wimble's Wood lies on the edge of the development and is traversed by means of a narrow path encountered on each walk. The development will inevitably greatly increase footfall, widening the character of the area. Bucklebury Common similarly has many narrow paths which do not improve. The development will result in a significant increase in pollution – light, noise and emissions having a negative impact on the environment.

Strategic gap

Upper Bucklebury retains its separate identity from Thatcham solely because of the green street A4/Floral Way, providing a clear and distinct boundary between the two urban areas. If the development proceeds Upper Bucklebury will be irrevocably joined with Thatcham and will lose its identity. The rural nature of Upper Bucklebury will be destroyed.

Education

The Thatcham NE Development Plan, funded by the developers, was based on West Berkshire pupil yield from a study in 2011 and is therefore out of date. The same plan also notes that the site is not sufficient on its own to fill a 6-8 FE secondary school. Government guidelines state that less than 6FE are not sustainable. The developer funding does not cover the total cost of construction on the substantial running costs of the school. Much of the site is sloping and therefore unsuitable for a sports field, unless it is close to the A4.

Please give reasons for your answer	<p>I am writing to lodge my strong objection to this ill proposed development.</p> <p>This would have a significant and an irreversible negative impact on the existing communities, infrastructure and wild spaces.</p> <p>The planned infrastructure to support such a large development is not sufficient, and will put pressure on the police, roads and transport services, not to mention the water and waste services. I don't believe there has been sufficient impact assessment for the approval of such a development and the plan does not address, to an acceptable level, the additional demand on the existing infrastructure.</p> <p>Adding new schools does not address all the other infrastructure needs. I have not seen plans for a new train station nor how this additional load will be managed on an already high risk water and waste network. We have seen recent developments in Thatcham for doctor surgeries, with a move to transfer patients to the Chapel Row surgery making it impossible now.</p> <p>Building such a development of this size near an AONB and many other surrounding areas that are at risk of flooding will have a detrimental impact to the AONB and there is a flagrant disregard on conserving and enhancing the natural beauty of the area by providing easy access to roads going through Chapel Row village. This road is not designed to take this level of proposed traffic on roads with no footpaths. Currently Chapel Row caters for cyclist and horse riders; a quiet and idyllic village that you are destroying.</p> <p>You might meet your goal of introducing houses to hit your target of 9,775 homes for 2037 but in doing so you will be losing control for years to come.</p> <p>In recent years local objections to developments in the area have evidently been ignored, such as building on the Thatcham site too late to carry out more in-depth impact analysis and course correct, I implore you to do so.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	

Please give reasons for your answer	We are writing to object to the above vast ! planning for houses on proposed site We feel this would impact on, schools, medical facility's traffic ,vast areas of natural habitat. It would change the whole enviroment
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I wish to object to the plan as I find it unsound for the following reasons: 1. Increased traffic – I have lived on Harts Hill Road for more than 45 years during which time the road outside my house has changed from 'rat run'. Traffic from the A4 and Thatcham travels round dangerous bends and pathway gate at well beyond the legal limit. If the proposal to build 1500-2500 houses in NE Thatcham is allowed another 3000 vehicles could be parking along the road. There are no footpaths or street lights on Harts Hill Road and pedestrians are in great danger going to the village school hall. 2. Strategic gap between settlement – The proposed building of 1500-2500 houses in NE Thatcham could close what is the official strategic gap between Thatcham and Upper Bucklebury. Thatcham is a few hundred yards. This gap also includes a designated area of Outstanding National Beauty which must be maintained. 3. Lack of Services – Education: Schools in Thatcham and Upper Bucklebury will be unable to accommodate a large intake of pupils resulting in overcrowding. Health Doctors, dentists, opticians & chemists and all their supporting services are fully stretched with the current population. Thatcham development would be unsustainable. For the above reasons any development in NE Thatcham should be refused by the Government Planning Inspectorate.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>

<p>Please give reasons for your answer</p>	<p>I write to object most strongly about the proposed housing development along the A4 and up Harts Hill on the following reasons:</p> <p>The size of the proposed development would detrimental to the local area for the following reasons:</p> <ol style="list-style-type: none"> 1. Traffic congestion on the A4. 2. Consequent rat-running through the villages of Upper Bucklebury, Chapel Row, and Southend Bradfield, already a problem. 3. Lack of schooling and doctors' surgeries to cope with the extra population. 4. Destruction of the Common which increases every year, due to users not adhering to the rules. The increased population makes it more difficult and impact the wildlife.

<p>Please give reasons for your answer</p>	<p>I AM OBJECTING TO THIS PLAN</p> <p>Having lived and worked in Bucklebury since 1974 I feel the need to help protect this fragile part of the environment. Digging up chunks of countryside and destroying wildlife habitat as well as trees and hedgerows etc despite everything is ludicrous. Just because money is involved this can go ahead it seems. Vaguely saying there will be countryside enough when so much will be destroyed.</p> <p>Traffic that building this small town will generate on an already clogged up system on the A4 will be horrendous not people who will live there who lets face it will be gridlocked in. The roads in the surrounding villages which people v development goes ahead are mostly single track country roads with wild life walkers and cyclists and horse riders be using them to avoid the A4</p> <p>A Car Park on the top of Harts Hill Really . Has anybody from planning driven up and down there it will ba an accid</p> <p>Since I first came to live here traffic has increased and there are pot holes in the road all over because of it. The co now so goodness knows what the extra traffic will do.</p> <p>Water and Sewage its all so vague. Its almost lets build and see how that goes along with extra pressure on GPs S pollution and noise there won't be any wildlife left to enjoy.</p> <p>Its not a case of not in my back yard houses have to be built but our environment is equally important and I feel that enough pressure as it is and I think this is being bulldozed ahead with disregard to the effect it will have on the people Newbury included. I wonder how many of the people pushing this forward live in this area and if it will affect them in it seems.</p> <p>I don't know if anybody will read the emails and protests that have been sent in. I would hope so. But if this propos of Berkshire will be lost forever which will be a shame.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>

Please give reasons for your answer	<p>I am writing to you to say that I object to the plan most vociferously and find it unsound.</p> <p>I am totally against extending Thatcham over more green fields when it has swallowed up too many already.</p> <p>Once again houses are planned to be built with empty promises of better infrastructure.</p> <p>The plan will lead to increased traffic through the villages and I object to the remodelling of Hart's Hill Road to accommodate the disruption it will cause to people who use the road every day.from Bucklebury.</p> <p>Another 1500 houses for an already overcrowded area of West Berkshire is completely the wrong thing to do within the area.</p> <p>More houses and a possible 4000 people will need doctors, schools and shops which haven't been properly planned for. The water and sewage systems in an already over stretched area. No proper account has been considered of the environmental impact of this development will do.</p>

	It is time to pause the plan and wait for updated planning guidance as it is not mandatory now to build X number of sensitive to and reflect local constraints and concerns.

<p>Please give reasons for your answer</p>	<p>The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the supply/wastewater infrastructure.</p> <p>The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific assessments on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the development. Detailed modelling may be required to refine the requirements.</p> <p>Early engagement between the developers and Thames Water would be beneficial to understand:</p> <ul style="list-style-type: none"> • What drainage requirements are required on and off site • Clarity on what loading/flow from the development is anticipated • Water supply requirements on and off site <p>The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for the infrastructure to be delivered, plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water to build up a detailed picture what is being built where, get confidence of when that development is going to start and what the requirements will be.</p> <p>To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what will be needed to serve the development where and when.</p> <p>Link here > https://www.thameswater.co.uk/</p>

[developers/larger-scale-developments/](#)

[planning-your-development/water-and-wastewater-capacity](#)

We recommend developers attach the information we provide to their planning applications so that the Council and Thames Water's water and waste matters for the development are being addressed.

Water Response

The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. The Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The Developer should ensure what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s. Failure to do so will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order that infrastructure upgrades are delivered ahead of the occupation of development. The developer can request information on network infrastructure by visiting the Thames Water website <https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development>.

Waste Response

The scale of development/s is likely to require upgrades to both the wastewater network and sewage treatment infrastructure. The Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. The plan should determine the magnitude of spare capacity currently available within the network and what phasing of development does not outpace delivery of essential network upgrades to accommodate future development/s. Failure to do so will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order that infrastructure upgrades are delivered ahead of the occupation of development. The developer can request information on network infrastructure by visiting the Thames Water website <https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development> either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge Drive, Rickmansworth, Hertfordshire, WD3 9SQ

Additional Comments

These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water to the public sewer.

If this site in total is to produce 2500 homes, our comments remain the same.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water at a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered.

Objection to West Berkshire Council Local Plan Review 2022-2039 Regulation 19 Consultation

I wish to register my ongoing objection to the proposals set out in the West Berkshire Council (WBC) Local Plan Review Draft (LPR). I consider that the approach taken by WBC in the preparation of the LPR is flawed, is in conflict with key Planning Policy Framework (NPPF), and as such, there are elements of the Plan that are unsound.

This submission follows on from my objections made to the previous draft of the LPR in February 2021. This raised a particular opposed Policy SP17 and the proposed development of the North Eastern Thatcham (NET).

Of great concern is the fact that my previous objection was not acknowledged in the WBC Consultation Statement (WBC CS) by my husband, >Personal Details Redacted< and his objection was acknowledged and given the reference lpr2035, although it is not listed in the WBCCS and the response provided by WBC is wholly inadequate as it fails to address appropriately, therefore I ask that my previous objections be acknowledged, and as it remains valid, I request that it is considered as set out below.

I have set out my further objections under the following headings:

- 1 Need for the Development;
- 2 Environmental Impacts;
- 3 Transport Impacts; and
- 4 Socio Economic Impacts.

Need for the Development

WBC has proposed revision of the number of homes for the NET development to approximately 1500 in the Plan period, a reduction from 2500 when in effect it is an increase in the Plan period from the previously stated 1250. The 1500 number is an approximate number and the supporting studies are still based on an eventual size of 2500 dwellings. The number has not changed and if there is a 40% reduction in housing numbers, I would expect that there should be commensurate reduction in allocation. It follows that the implication is that the remaining 1000 homes will come forward in the next Plan period. This is unacceptable.

LPR Policy SP1 suggests that *Thatcham will be a focus for regeneration, for new housing and for improved provision of services*. Investment in the centre of Thatcham is welcomed, but initiatives that have the support of the Town Council should be based on *that A new urban extension to the northeast of the town will provide a new residential neighbourhood with supporting services in accordance with Policy SP17*. There is no evidence provided that this urban extension will have any benefit for the town, but detract from the centre if new facilities are delivered within the SP17 development as proposed. SP1 continues that *to maintain and enhance the identity of Thatcham separate to that of Newbury and its surrounding rural settlements in a way that SP17 directly contradicts this ambition, with outward sprawl detracting from the town centre and generating unsustainable growth. The greatest detriment will be the effective merging of Thatcham with Upper Bucklebury destroying the character of both*

As I set out in my previous objection, I consider WBC should revisit its assessment of housing need. There are a significant number of sites that should be prioritised for development as opposed to the entirely greenfield development at NET. The allowance for housing is on its own admission very cautious and this should be higher, further removing the need for the NET allocation. The updated Land Availability Assessment (HELAA), published in January 2023, includes a large number of sites that have been identified which have been discounted. This does not provide a robust basis for the assessment of the housing need that underpins the LPR.

Paragraph 35 of the emerging draft of the NPPF states that Local Plans are 'sound' if they are Positively prepared – that is, they – at a minimum, seeks to meet the area's objectively assessed needs so far as possible, taking into account the policies in the NPPF. In particular reference is made to Paragraph 61 which states that the outcome of the standard method is an advisory housing requirement for the area... There may be exceptional circumstances relating to the particular characteristics of the area which justify an alternative approach to assessing housing need.

In December 2022, the Secretary of State (SoS) issued a Written Statement that effectively removed the need to maintain up-to-date Local Plans, removed top-down housing targets (particularly for Local Authorities with up-to-date Local Plans) and gave a two-year transition period for LAs in the final stages of preparing Local Plans. A number of other Local Authorities have been asked to revisit their Local Plans. WBC should do the same to allow time for it to review the LPR thoroughly and arrive at a sound and less damaging set of proposals.

Environmental Impacts

As I highlighted in my previous objection, if delivered, even in a reduced form, the proposed SP17 allocation would pose significant environmental threats which include:

- Permanent damage to the Bucklebury Plateau Biodiversity Opportunity Area and its ancient woodlands which are of Common; and
- Developing on a large swathe of farmland and green space that will have a damaging effect on the broadland and the Wessex Downs AONB that will forever ruin the open countryside for the local communities; and
- Causing harmful impacts to legally protected wildlife known to be present on the site without appropriate mitigation.

WBC has clearly paid insufficient attention to these environmental impacts. Its suggestion that the provision of SAP17 and the provision of a community park will have a positive impact is clearly flawed. The reality is that SP17 will have a significant negative impact on the environment.

The LPR that a Sustainability Charter is required to establish how 'policy requirements will be achieved' (including the anticipated overall positive impact on environmental sustainability). WBC maintains that the Charter will be developed in strategy documents (including one on ecology). However, the strategy documents either do not exist or have not been made public for the Regulation 19 consultation.

Even at a capacity of 1500 homes the population of the new SP17 development would be around 4,000 people. This space needs which are unlikely to be provided for on site alone with the vague reference to a 'community park'. As those living there and those visiting them will inevitably be spill-over into adjacent areas.

The LPR acknowledges this stating that the intent for SP17 is to focus people into the AONB by suggesting that it will create a network which will *'take advantage of the landscape'* to *'facilitate connection to the AONB, and include leisure routes'* in direct contradiction with the management vision for Bucklebury Common which is explicitly focused on not increasing the number of ecosystems they are working to restore and nurture.

WBC's Sustainability Appraisal for the LPR accepts that SP17 will have a negative impact on environmental sustainability and therefore, would result in a negative impact on environmental sustainability which would need to be mitigated. However, it does not state what this mitigation might be, and it is simply unacceptable to leave this to chance in the hands of the developers.

For the reasons outlined above, I consider that the LPR is in direct conflict with the NPPF and Paragraph 117 that state that planning decisions should contribute to and enhance the natural environment.

Transport Impacts

The NPPF at Paragraph 104 states that transport issues should be considered from the earliest stages of plan making and that: *'the potential impacts of development on transport networks can be addressed'*. In preparing the LPR, I consider that WBC has failed to meet this key requirement of the NPPF.

As I referred to in my previous objection the proposals included within Policy SP17 will generate significant amounts of traffic, particularly the case for vehicle movements on to the local highway network, including the narrow road that passes through Upper Bucklebury. WBC suggest that traffic from the NET development will be directed to the A4, it also acknowledges that there will be significant impacts on surrounding lower order roads such as Broad Lane passing through Upper Bucklebury. With a new population of circa 4,000 people, at least that number of new car movements on the road network and to suggest that this will not be the case in this local area is unrealistic. If this is the case, there will be the inevitable additional traffic created by those visiting or servicing the development.

The inclusion of the new junction proposed on Harts Hill linking the new development is a clear demonstration that it is not being diverted in that direction and onto a road that passes through Upper Bucklebury that is simply inappropriate for this level of traffic. The road is inadequate, without pavements and has the potential for serious accidents. Significant disruption from an increase in traffic, additional queuing through the village, which in turn will inevitably cause increases in air pollution, which will directly impact the quality of life of Upper Bucklebury.

I consider that the air quality assessment prepared by WBC fails to address this. Furthermore, the document is not up to date, it is based on the LPR running to 2037, not to 2039. This affects the traffic levels forecast for the end of the LPR period and the impact on the environment.

WBC's high level Transport Assessment that underpins the LPR states (Paragraph 3.26) that the modelling undertaken for the Harts Hill Road *suggests it will not cause problems*. However, these modelling results are not provided nor are any details of the assessment. The lack of certainty here is very worrying, so too is the lack of any detailed assessment of the significant impacts that the development will have on the road network and the lives of the existing residents of Upper Bucklebury.

The Sustainability Appraisal (SA) / Strategic Environmental Assessment (SEA) which accompanies the LPR Plan contains a number of policies that are intended to address the impacts of SP17 against key Sustainability Objectives. Objective 4 is to *promote and maximise opportunities for all forms of safe and sustainable travel*. WBC concludes that the policy is likely to have a *Positive Impact on road safety as safe travel*. This assessment is flawed as the introduction of great volumes of additional traffic onto unsuitable local roads will have a significantly adverse impact on the quality of life of Upper Bucklebury.

The possible siting of a secondary school in the proposed NET development would result in a significant increase in traffic in the area. This has not been considered in the traffic plans and models in the LPR.

In addition to the challenges faced through Villages like Upper Bucklebury, there will inevitably be further congestion at the key junctions in the area. A major bottle neck currently is the crossing at Thatcham train station. There is nothing in the LPR that seeks to address this and so the proposed development of at least 1500 new homes and the significant additional traffic will exacerbate the problem.

WBC's failure to address this is a major failing and demonstrates its lack of understanding of the issues facing the residents of the surrounding Villages such as Upper Bucklebury which it would be aware of if it had engaged constructively with existing residents. It is an ill-conceived, unsustainable, and damaging proposal though through the form of Policy SP17.

Socio-economic impacts

Healthcare provision

The Policy SP17 proposes a 450 sqm primary healthcare facility but there is no clear proposal for how this will be integrated into the existing healthcare network. A major development such as that proposed by SP17 is likely to have a significant impact on the local community from the outset be informed by a detailed Health Impact Assessment (HIA) in accordance with the current guidance.

HIA should include detail how the proposals for development have been discussed with health service providers regarding care services and the development proposals should demonstrate how the conclusions of the HIA have been considered to ensure it can be appropriately accommodated and to ensure that an unacceptable impact on the health and wellbeing will not be permitted. I am not aware that such an HIA exists and the absence of such a key document is a key failing.

The proposed NET development is covered by three existing medical practice boundaries, Thatcham Medical Practice, Row surgery. All three practices are already overstretched. The two Thatcham doctors' surgeries run independently and lists include approximately 27,800 patients that equates to just under 2,000 patients per GP. New residents of NET will create demand on GP services that the existing practices could not cope with. NHS England commissions few new GP practices there to be patient demand for improved services. There is a chronic shortage of shortage of GPs nationally and locally by the NHS Berkshire West Clinical Commissioning Group (CCG) that this position is even worse here than in other areas.

Now more than ever, GP practices need to create efficiencies and economies of scale to make general practice more sustainable, increase access and extend the range of services and primary healthcare professionals available on a single site. It would make no sense or geographic sense for an existing local GP practice to set up a branch surgery on the proposed new development associated with such a move.

It is also likely to be unviable for one of the existing GP practices to relocate even to an expanded practice in NET. This would displace the surgery away from its existing patients creating greater travel demands. It is therefore highly unlikely to be established or operated sustainably as part of the NET development.

A further healthcare issue is that the existing dental practices in Thatcham are unable to provide care for the whole population of patients needing to travel further afield for NHS and private dental care. Thatcham Vision, endorsed by WBC in 2016, stated that 17.5% of patients were registered at a Thatcham dentist (with 17.5% registered with a doctor outside Thatcham). There is no evidence on local dental practices regarding the potential impact of increased patient numbers resulting from additional housing.

The proposal to include 450 sqm primary health facility within Policy SP17 appears to simply be a mathematical exercise of critical importance. The failure to prepare an appropriate HIA nor consult appropriately with the existing community in the area is a fundamental failing of the LPR and the proposed Policy SP17. The impact an additional 4000 plus new patients on the area has simply not been appropriately considered or mitigated for against a backdrop of an already struggling NHS.

Schools Provision

The NPPF (Paragraph 97) states that *'it is important that a sufficient choice of school places is available to meet the needs of communities.'* It is therefore incumbent on WBC to comply with these requirements of the NPPF.

However, the provision for education from Nursery, Early Years, through Infant to Secondary education is not clearly set out in a coherent plan for how the children from the NET development will be educated. Without this provision, the provision of 4000 new residents to the area is both untenable and fails to comply with the requirements of the NPPF.

There are no details in the LPR of the provision for Nursery or Early Years education. Policy SP17 merely states that 'the provision for primary school education is also unclear and contradictory and there is no information provided on school entry requirements. Draft Policy SP17 suggests that a 2.5 FE primary school on site and sports infrastructure will be provided, but the only obligation on the developer is to provide the land and the build costs, which is some way from providing a school. The reality is that there is likely to be a significant funding gap which must question the deliverability of the proposal. Needs to be in place before a development is occupied and there is no evidence that this will be the case.

The LPR is again unclear, and contradictory on the provision of secondary schooling. Draft Policy SP17 suggests that the land to meet the impact of the development, but that the nature and cost of the mitigation will be informed by a feasibility study at applicants' expense, and prepared in collaboration with the Council and local stakeholders. There are no details of the study and hence no possibility of assessing its suitability. By leaving the confirmation of actual requirement for the provision of secondary schooling to a feasibility study in due course, WBC is failing in its duty to ensure that sufficient school places exist. This is a fundamental failing.

SP17 refers to the provision of sports fields within the NET development, but there is no obligation for this to be provided. The location of the facilities is not identified, and no funding is earmarked for the delivery of the facilities. The existing sports facilities in the area are limited and availability for local teams is limited. The introduction of an additional 4000 plus new residents will compound this issue. The school playing fields could also be available as public sports field but, not only is this questionable because of safety issues, it is the case that the secondary school is unlikely to be delivered and as such the playing fields will not be used.

Conclusion

For the reasons outlined above and as set out in my previous objection, I am opposed to several of the policies and proposals in Policy SP17 and the proposed NET development. I consider aspects of the LPR to conflict with the NPPF and as such I would like to take the opportunity afforded to it by the SoS to pause the LPR process and to review its approach.

I reserve the right to follow up on these objections should further information become available, and I wish to have the opportunity of a public inquiry that might be held to consider the LPR. In the meantime, I would be grateful if these objections could be taken into account and I would be informed of any further progress with the LPR.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?

* Yes * No	
Please give reasons for your answer	
4. Proposed Changes	As I set out in my previous objection, I consider WBC should revisit its assessment of housing need. There are a significant number of sites that should be prioritised for development as opposed to the entirely greenfield development at NET. The allowance for brownfield sites in the current admission is very cautious and this should be higher, further removing the need for the NET allocation. The updated Land Availability Assessment (HELAA), published in January 2023, includes a large number of sites that have been discounted which have been discounted. This does not provide a robust basis for the assessment of the housing need that underpins the current admission.

Proposed New Allocations

The LPR proposes to allocate nine new sites for residential development to bring forward an estimated 1,720 units. Land for 80 units upon adoption of two respective Neighbourhood Plans.

North East Thattham Strategic Site (Policy SP17)

The largest of the proposed draft allocations is 'North East Thattham', identified to deliver 1,500 units across the plan period. Whilst Croudace generally supports the direction of a large amount of growth to Thattham, it does have ongoing concerns over the viability and developability of North East Thattham. On this basis, the Council should allocate smaller, unconstrained sites within the plan period without requiring much in the way of supporting infrastructure.

However, should the draft allocation at North East Thattham ultimately remain, Croudace considers that there is still a need to allocate additional sites around Thattham to alleviate some of the pressures on supply arising from elsewhere in the plan period. Sustainable sites such as Henwick Park, which are well placed in the short-term, and do not require any large scale infrastructure interventions to ensure delivery, are very well placed in the short-term, which is directly adjacent to the settlement boundary.

North East Thattham – Spatial Matters

Despite acknowledging that Thattham is a focus for strategic growth, the Council proposes to allocate one single site at North East Thattham which is identified for an urban extension to deliver approximately 1,500 dwellings across the plan period. Draft Policy SP17 requires the site to be delivered comprehensively along with key infrastructure including community uses, green infrastructure and transport infrastructure to meet standards of sustainability.

By way of context, the Regulation 18 stage LPR identified North East Thattham for the delivery of 2,500 dwellings across the plan period. As such, there has been a theoretical reduction of 1,000 dwellings. However, Croudace notes that the proposed allocation at North East Thattham (as shown on the draft Proposals Map and on page 65 of the LPR) has not been amended accordingly to match the reduction. Croudace considers that, as currently drawn, the amended settlement boundary for Thattham will also extend in a similar manner.

As such, Croudace objects to the extension of the settlement boundary in such a manner and considers that this could impact on the viability of the site brought forward at North East Thattham which is far in excess of the number of dwellings envisaged to be allocated to the site does deliver.

North East Thattham – Deliverability

Policy SP17 outlines the expectation that all 1,500 dwellings proposed to be allocated at North East Thattham will be delivered within the first five years of the plan period. The Council's Housing Trajectory (within the Housing Background Paper) illustrates that North East Thattham is not a 'deliverable' site in the first five years of the plan period. As such, it can be concluded not to be a 'deliverable' site in the first five years of the plan period. national policy.

Assuming that it is capable of being considered a 'developable' site, it is instead slated to deliver 150 units from a site in the first year of the plan period (8 of the LPR) and then in every subsequent year until 2038/39 (i.e. Year 17).

Croudace considers it unrealistic for the site to deliver 150 units in its first year given significant preliminary and enabling work, including key infrastructure, before construction of houses can begin. Whilst there is no indication as to how 150 units a year will be delivered (e.g. multiple sales outlets etc.), Croudace considers that the trajectory should be redrafted to show more realistic delivery rates for supporting items of key infrastructure.

Large strategic sites, including those allocated by the Council's Core Strategy at Sandleford Park, can often take many years to deliver dwellings and subsequently thereafter due to complex infrastructure requirements and delays with land assembly.

The Lichfields document 'From Start to Finish' (February 2020) suggests at figure 4 that for sites of 2,000+ dwellings the average build out rate for validation of first outline planning application to completions on site is 8.4 years. After that, the average build out rate for completions on site is 181 dpa.

Therefore, to achieve the delivery of 1,500 dwellings as assumed within the plan period, an outline planning application should be submitted in Spring 2022, allowing first completions in 2029/30. Clearly, an outline planning application has not been submitted and the trajectory set out by the Council is unlikely to be achievable. As such, the Council should take a precautionary approach and consider smaller scale allocations such as at Henwick Park.

For example, according to the 5YHLS Statement (November 2022), Sandleford Park has failed to deliver any completions within the first five years of the plan period. Core Strategy in 2012. Sandleford Park East was granted outline planning permission on appeal in May 2022 but no outline planning application has yet been submitted, while Sandleford Park West is subject to a longstanding outline planning application which remains outstanding since 2018. The Council has correctly not counted any units arising from Sandleford Park West in its 5YHLS up to 2028/29.

In common with the Sandleford Park site, draft Policy SP17 requires a 'comprehensive' form of development (i.e. a site which is developed in a way that ensures that the "provision of all infrastructure, services, open space and facilities will be timely and co-ordinated". Given the scale of the site, a scheme of this size, the Council may require a Supplementary Planning Document to guide development, thus adding to the time and cost of delivery whilst such a document is drafted.

Given the delays experienced with the comparable allocation at Sandleford Park, Croudace is concerned that the Council's strategy to deliver a combined 70% of the LPR's total allocations (and one large strategic site to deliver 80% of the LPR's new allocations) is not a 'justified' or 'effective' strategy. To the contrary, it is a high-risk strategy.

Croudace considers that the delivery issues at Sandleford Park clearly demonstrates the types of challenges that can be encountered on such a large scale. This should respectfully serve as a warning to the Council that a variety of allocations are required to meet the plan period.

The inability of North East Thattham to yield housing completions within the first seven years of the plan period has a significant impact on housing land supply for the Council, soon after plan adoption. Clearly therefore, the LPR should be allocating a range of smaller scale sites to provide greater flexibility and certainty. NPPF paragraph 68 is clear that planning policies should identify a sufficient number of sites and that authorities should identify a supply of specific, deliverable sites for years one to five of the plan period.

Paragraph 73 of the NPPF refers to the potential benefits of larger scale development but requires authorities to take account of the risks of lower rates of delivery, given the lead-in times for large scale sites.

	<p>If allocated for development, the Land at Henwick Park is a deliverable site which could deliver dwellings within the first five years of the plan period, as we demonstrate earlier within these representations.</p> <p><u>North East Thatcham – Affordable Housing</u></p> <p>Draft Policy SP17 expects North East Thatcham to deliver 40% affordable housing, potentially equating to 600 units of development. However, given it is unlikely to deliver housing until Year 8 of the plan period (i.e. 2029/30), this will also mean a significant proportion of vital affordable housing.</p> <p>Thatcham, as a result of its period of 'consolidation', has suffered from a lack of affordable housing in recent years and a meaningful delivery of affordable housing early in the plan period.</p> <p>The site at Henwick Park would deliver at least a policy compliant level of affordable housing (40%) and as set out a significant proportion of affordable units could be delivered within the first five years of the plan.</p>

Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>I refer to the Local Plan Review to 2039 referred to in your e-mail to constituents received on 20 January 2023. In paragraph SP17 for the North East Thatcham Strategic Site proposing at least an additional 1500 homes.</p> <p>In recent weeks it has been widely reported that the number of houses to be built to 2039 had been reduced from 2500 as referred to above has the overall development area remaining unchanged from the December 2020 draft. This therefore Council has an intention at a later date to further increase the housing numbers on this site.</p> <p>However in view of the Secretary of State for Levelling UP, Housing and Communities statement on 6th December 2022 by Councils should now be considered as an advisory starting point and not mandatory one wonders why WBC is preventing Local Authorities have put theirs on hold until updated guidance is provided.</p> <p>Additionally WBC rejected plans for 500 homes at Seige Cross (now incorporated into the current scheme) in 2015 at Thatcham and erode the landscape between Thatcham and Upper Bucklebury and also detract from the landscape and also create clear and demonstrable damage to education provision in Thatcham. It is inconceivable that WBC should not have at least three times the size in the same locality.</p> <p>Notwithstanding the above I wish to register my objection to the current plan for the following reasons .</p>

- 1 Increased burden of traffic
- 2 Negative impact on the local environment
- 3 Negative impact on local healthcare
- 4 Negative impact on Education
- 5 Overload of statutory services

1 Traffic

Traffic on the surrounding road network is already heavy during peak periods and Harts Hill is regularly used as a route. Congestion regularly occurs on the A4. Long traffic queues regularly build up at the Harts Hill Road/Floral Way and Floral Way/A4 junction. The proposed development will further increase traffic congestion on the A4 through Thatcham towards Newbury and Reading. Traffic will also increase over the Thatcham railway crossing where vehicles now can regularly wait up to 20mins in order to cross the railway during trains.

The WBC transport assessment paragraph 3.31 states that the development will cause additional queuing at the railway gates open. However at rush hour the queues do not completely clear during trains so this modelling is clearly unsound. The proposed development on a brownfield site at Colthrop which includes a bridge over the railway has been discounted without comment in paragraph 4.20 stating that the Spatial Strategy seeks to make use of brownfield land.

It is also understood that a road junction to this development is proposed onto Harts Hill Road, paragraph 3.11 of the Transport Assessment Report, but there is no concept design included as to how this will be achieved. This junction will inevitably encourage rural routes via Harts Hill Road as opposed to the main trunk roads which will significantly increase the vehicular movements through the villages of Upper Bucklebury, Southend Bradfield and Cold Ash. Particular concerns must be raised regarding the road from Heath to Cold Ash, a road along which is little more than a country lane with no footpaths. This road is wholly unsuitable for heavy traffic and will cause additional safety fears for parents whose pupils attend St Finians Primary School.

SP17 suggests that these new junctions will not cause traffic problems but no modelling has been provided to prove this.

Harts Hill Road can be particularly hazardous during winter months with icy conditions despite salting by the Council and a significant increase in vehicle movements as a result of this proposed development.

Additionally the proposal for a potential car park located on the most dangerous part of Harts Hill Road due to a series of bends could cause a serious hazard with the potential for serious injury and no proposals have been provided to mitigate this.

2 Environment

The site is known to contain several protected species, bats, newts, badgers and ponds with breeding dragonflies and butterflies. The development would have a positive impact on the environment and will achieve the legal requirement for biodiversity net gains. However the assessment provides no evidence on how this will be achieved and also no evidence that a base line on which the 10% net gains required by the Environment Act can be measured. The site is a green field site and therefore there is every reason to believe that this development will have a negative impact on the environment. SP17 makes the assumption that this negative impact can be mitigated during the development.

The indicative site plan for the site indicates two significant features.

- 1 Community Park open space
- 2 Potential car park off Harts Hill.

The Country Parks are located at the top of the slope nearest to the settlement boundary of Upper Bucklebury which the assessment states that it is intended to provide a network of green infrastructure which will include a new strategic community park with greenways to facilitate connection to the AONB including leisure routes accessible to all users. This takes no account of Upper Bucklebury Common which focuses on not increasing pressure on the fragile ecosystems that they are trying to restore.

The proposal to incorporate a car park on Harts Hill Road close to the settlement boundary of Upper Bucklebury will be in close proximity to the community park and together with the proposed leisure routes would inevitably encourage a significant increase in footfall causing irreversible damage. This car park could also attract fly tipping which is already an issue in other car parking areas.

West Berks Council planning has always previously maintained strategic gaps between communities and Floral Way between Thatcham and Upper Bucklebury. Any breach of that gap has been a reason to previously refuse planning permission. The proposed development virtually eliminates that strategic gap but will effectively destroy the unique character of Upper Bucklebury that the Council has designated as a conservation area.

3 Healthcare

The area surrounding of this proposed development is served by three G.P. practices. Thatcham Medical Centre (TMC) and Thatcham Road Surgery all of which are over subscribed with existing patients finding it more and more difficult to obtain suitable appointments. The two Thatcham surgeries, TMC and Burdwood have an average of over 2000 patients per G.P.

It is anticipated that this development will have a population of 4000 - 5000 people and SP17 states that a 450sqm GP surgery would be wholly inadequate as a stand alone practice assuming GP's could be found as the health care service quicker than new ones can be recruited.

In addition to the SP17 development WBC have already approved the building of a further 91 homes within the catchment area further increasing the number of potential patients by an estimated 300-400.

There are also serious problems in obtaining dental care as there are no NHS dentists in the Thatcham area accepting private patients. Patients have to travel further afield even to find a private dentist. There is no provision made in SP17 for additional dental services.

This is wholly unsustainable and shows that the proposals for providing additional healthcare to support these new developments are not viable.

4 Education

Early Years

There is no information in either SP17 or the West Berks strategic growth study concerning early years education. A development with 40% affordable housing it is likely that there will be significant demand for nursery and infant schooling. The Growth Study indicates that the nearest primary school, Francis Bailey, is already working above its design capacity of 570 pupils. A new school will need to be constructed before any housing are occupied.

Secondary Education

Thatcham secondary schools are also operating at approaching or exceeding their design capacity and the proposed new secondary school catchment area of Kennet School in Stoney Lane for which the latest available data shows that it is currently at capacity. SP17 states that land will be provided to meet the impact of the development with the nature and cost of the land of feasibility study, however the Local Plan Review provides no information as to where such a school will be located. The plan provides with 50% of the funding provided by the developers. Para. 5.22 of the Strategic growth plan states any new school will be a future expansion but 5.19 states that a new secondary school is not considered feasible if small than 6FE. This is the case for the proposed school.

Pupils in Upper Bucklebury live in the catchment area of Kennet School (2miles) and The Downs school in Compton. Kennet School is oversubscribed then those living nearer the school will be given preference. Pupils living on the new development will be at Kennet over those from Upper Bucklebury leaving them restricted to The Downs which is 7 miles farther away. It is noted that The Downs has already more pupils attending than its design capacity. (see latest data from 'Get-Information-schools.se

SP17 gives no indication when new schools will be built but it would not be economic to provide additional school places. A new school will be required. The West Berks strategic growth study 5.18 - 5.22 provides no indication as to how additional school places can be provided. A new school can become economically viable and therefore the study must be considered incomplete and unsound.

Services

Drainage Systems

Foul Drainage

A development of this magnitude will put significant pressure on the existing foul drainage system. 1500 homes will be added and with the average foul discharge per person per day being about 150litres, this would represent a minimum of 60000 litres per day.

The West Berks Water Cycle Study final report dated September 2021 states that Chieveley, Hungerford and Newbury were predicted to or were exceeding their flow permit and that further developments in these catchments could lead to significant environmental damage.

It is the Newbury treatment works in Lower Way, Thatcham that will be serving this proposed development but there is already a significant load in the Newbury area confirmed which will cause even additional load totalling another 1000+ homes.

Thames Water have already had issues with the current sewage system on the A4 with discharges into the river Kennet. The existing foul drainage systems do not have the capacity to accept future loading without major upgrades. This is confirmed in the report para 5.3.1 showing the network on red alert and reporting that any upgrade would take 12-24 months to complete.

It is clear from the Local Plan Review paragraph 10.71 that no discussions have been held with Thames Water to ensure that the demand for water treatment will be achieved even though additional housing beyond the NE Thatcham Site has already been approved.

Storm Drainage

The proposed 170 hectare site is currently farmland sloping towards Floral Way and the A4 and as such this land does not contribute much of this water helping to prevent the overloading of existing storm drainage systems. The Thatcham Flood Alleviation Scheme lies to the South and West of this site and therefore unlikely to fall within the catchment area of the majority of the Newbury area.

the storm waters generated by this scheme, from building roofs, roads and hardstanding gulleys etc will need to be connected to the sewer system.

With the effects of global warming, the rainfall in the Thatcham area has been recorded as significantly increased in recent years and this can only increase further in the coming years and yet when the existing drainage systems were designed many years ago the current change in climate would not have been contemplated. The quantity of additional rainwater from this development will serve to surcharge the existing system to such an extent so as to significantly reduce the benefits of the recently completed system and therefore existing pipework may well need to be upgraded.

In older parts of Newbury storm and foul waters are combined which feed into the Lower Way sewage works but with the proposed development to put even greater pressure on the treatment works and the increasing likelihood of polluting discharges into the local watercourse.

It is inevitable that the drainage infrastructure will need be upgraded prior to any development being occupied, this will cause significant disruption to the people of Thatcham and surrounding areas for many months. Once again the consequences of the proposals have not been properly thought through and mitigated and therefore the proposals have been shown to be unsound.

Water

-
The West Berkshire Water Cycle Study Phase 2 final report dated September 2021 states that West Berkshire is experiencing an increase in water demand due to growth can cause the hydraulic capacity of the existing supply infrastructure to be exceeded to manifest itself as low water pressure at peak times it is also stated that the Water Resource Management Plans are required to be updated in line with plans by WBC.

It is not accurate to say that there is no predicted supply deficit as with our summers becoming hotter and drier due to climate change for river extraction due to lowering of the water table requiring the increasing possibilities of hosepipe bans. It is a fact that there were several weeks during 2022 as a result of over extraction of water as a means of preserving supply.

Upper Bucklebury relies on potable water supplies being pumped from the pumping station at the bottom of Harts Hill and the proposed NE Thatcham Development and it is of great concern that as additional housing become occupied there will be a significant impact to the village.

Electricity

-
The Scottish and Southern Electricity Networks Engineering Justification Paper states that the Thatcham Bulk Supply Point (BSP) Bramley BSP and predicts that by 2027 there will be an anticipated increase in peak demand in Thatcham of 40.9MW.

It also states that in the event of an outage and the need to restore power within 3hours network capacity for demand at the minimum demand at Thatcham and therefore network reinforcement is required.

SP17 makes no mention of anticipated electrical demand or whether consultations have been held with the statutory bodies and supplies will not be compromised.

Upper Bucklebury's water supply is heavily dependant on security of power feeding the Harts Hill Road pumping station and that a significant increase in demands of the Thatcham network will cause outage issues for the residents of the Village.

In Conclusion

-
In view of my comments above I therefore wish to register my strongest objection to the proposals by West Berks Council for a minimum of 1500 homes at NE Thatcham

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?

<p>Please give reasons for your answer</p>	<p>I wish to object to the proposed development to build 1500-2500 new homes in NE Thatcham. I have lived on the outskirts of this development for 21 years and my family, neighbours and local villagers have all h and beautiful wildlife around us. We have been privileged and know and respect the land around us. This developme an adverse impact: including traffic, wildlife, flood risk, lack of amenities for things such as healthcare and schooling. In the time we have lived here have faced one flood and flood risks on more than one occasion the flooding was due the area of proposed development. Ditches and drains on the A4 have been maintained once in the 21 years we hav immediate reaction to the floods in 2007. We fear that this development will just exacerbate the flood risk problem or We believe that the development has not looked at the impact on the wildlife of the area, including Badgers, Hares, f and insects.</p> <p>It seems that the availability of Health Care has not been considered nor has the supply of spaces for both secondar residence of the development been taken into consideration.</p> <p>Traffic in the 21 years of living here has become a problem in just leaving and entering our home just off the A4 durin amount of traffic but also the speed at which the traffic is allowed to travel. In recent years the back up of traffic enter The Coach and Horses on the A4 and possibly further on some days. What will this development create in terms of t back lanes which already are used as rat runs to major roads. One big area of backlog being the railway crossing at area of major problem during the peak times weekdays.</p> <p>None of these issues seem to have been accounted for.</p> <p>In addition, where is the development of environmentally sound houses with greener energy sources in this day and developments that include green energy stations such as wind turbines, solar and ground or air source heating and qu Too many developments are going up built to substandard quality - could we see some greener approaches to hous Thankyou for your time to consider our objection to what we believe is an unsound development.</p>

<p>Please give reasons for your answer</p>	<p>I write to object to the WBC proposal for 1500 new houses around Newbury Thatcham. I live in Upper Bucklebury, and beauty on the edge of an AONB. The development, if built, will have a severely negative effect on the natural environment. The proposal is unsound.</p> <p>Traffic: The road running through Upper Bucklebury is already very busy and has become much busier since the development of Harts Hill. The increased volume of traffic from the proposed exit at the north of the site onto Harts Hill, is very a serious concern. The road is inadequate for a huge volume of traffic and, as it is already, dangerous for walking and cycling, so with an increase in traffic from new development even though the site may possibly have 'safe travel' within itself, the roads funnelling in and out will cause pollution both in respects of light and air. There is also a proposed car park on Harts Hill, something that can only cause further disturbance to the road as well as further disturbance for wildlife due to dog walkers and others coming into the area.</p> <p>Healthcare: The Northeast Thatcham development plan SP17 is bereft of detail or insight into the strategic health care planning. As public and private stakeholders respectively, appear to have arranged or published a prospective Health Impact Assessment on the northeast side of the development. All proposals for a major development that is obviously likely to have a significant impact on the area and location should be accompanied by a fit for purpose HIA in accordance with the current guidance for public-health impact assessment. Reference to how the proposals for development have been discussed with health service providers regarding impact assessment. Development proposal should demonstrate how the conclusion of the HIA have been considered in the design of the development. The impact of health and well-being of existing new communities will not be permitted.</p> <p>A multi – agency approach is required for tackling health and well-being. The Berkshire West Health and Wellbeing Strategy has been developed by the Reading West Berkshire and Wokingham Health and Wellbeing boards together with the local authority in partnership. Developers are encouraged to engage with the healthcare providers at the earliest opportunity in order to address the requirements associated with a new development. It is a great concern that there appears to have been no direct engagement with the Thatcham development consortium and local general practices.</p> <p>There are 3 over stretched GP surgeries which at present cover the area of the proposed NE Thatcham development. Each of their combined lists include about 27,800 patients which really means just under 2000 patients per GP. As more people moving into a housing developments tend to make a greater demand on GP services. This is because there are more people requiring maternity care. Pharmacy closes in Thatcham have put further pressure on healthcare practices.</p> <p>There has been no approach by WBC all the developers to any local GP practice to discuss an appropriate site, floor space or more practice could relocate in the event of the housing development being built. An enlarged primary healthcare service located close to the middle of Thatcham to improve access and minimise traffic as the proposed NE Thatcham development serves the needs of the population. This would be likely to be supported by Thatcham town council but has not been suggested in the development options. Local practices did not have an input with inadequate 450 m² floor side proposal which they only discovered in 2022, appendix D.</p> <p>In respect of Health Care-Proposals for a major development that is likely to have a significant health being impact in the area should be accompanied by a fit for purpose health impact assessment in accordance with the current guidance from the Department of Health. Reference to how the proposals for development have been discussed with health service providers regarding healthcare services. The development proposal should demonstrate how the conclusions of the HIA having been considered in the design of the development because an unacceptable impact on the wealth health and well-being of existing new communities will not be permitted. WBC nor the developers as public and private stakeholders respectively appear to have arranged or published by the proposed north-eastern development.</p> <p>The three GP practices -which would cover the North East Thatcham development site already overstretched. These are the West of Harts Hill Road, Burdwood Surgery east of Harts Hill Road and Chapel Row surgery.</p> <p>Thatcham doctor's Surgery are run independently of each other in the combined list includes around 27,800 patients per GP. Newly registered patient moving to make a greater demand on GP services, therefore how will this development be managed?</p> <p>WBC and the developers have not made provision to mitigate the new burden of 1,500 or more houses-They have not made provision of a viable primary care medical facility.</p> <p>Dental care: There is no evidence provided that either West Berkshire council or the developers have approached any local dental practices regarding the impact of increased workload resulting from additional housing. As it is now Thatcham dental practices are unable to cope with the population.</p> <p>Schools provision: Provision for education for nursery through infant secondary education is not clearly defined within the local plan. The end to end plan: this therefore breaches the councils obligations to provide education facilities for children. Without this provision housing development is untenable.</p>

	<p>The lack of a coherent plan on schools provision across the various proposed developments also means that it is impacted on traffic. The sighting of a secondary school to the north-east of touching would result in significant increase in area, not considered in the traffic plans and models in the LPR.</p> <p>Policy SP1 7NE Thatcham strategic site allocation states that the site will provide early years provision – what are the implications?</p> <p>I cannot see any clear vision for proper funding or School Place provision -schools need to be available before houses are built, incomplete and contradictory on the provision of secondary school in and around Thatcham. The latest LPR is in contradiction with the documentation. It proposes that the sum of 15 million be contributed by the developers to secondary education. The cost of the land to be provided and hence no possibility of assessing at suitability.</p> <p>It is clear that the plan for secondary school provision is unsound:</p> <p>There is no such a satisfactory evidence of the number of pupils the school is to cater for, the location of school is not defined but it is noted to anything less than 6FE school is unsustainable, the timing of the funding is not clear and the proposed funding is sufficient to meet the Council's obligations to provide education.</p> <p>Environment:</p> <p>The green spaces surrounding Thatcham and the local villages, Upper Bucklebury, Midham, Cold Ash, contain a bio-diverse area if built over by thousands of houses. This area is home to hares, buzzards, kites, stonechats, nightingales, thrushes, nightingales, slow worms, meadow grasshoppers, woodlarks, dark bush-crickets, adders and all manner of protected fauna - all species at risk of annihilation. The nightjars fly to Bucklebury Common every June from Africa and mate undisturbed in the local fields. Many species, for one, will be under threat.</p> <p>The LPR's Sustainability Appraisal accepts that SP17 will, by building on a greenfield site inevitably have a negative impact but there is no detail on any mitigation for this impact. There are plans for community parks but they won't be safe havens for additional 1000s in footfall, noise, litter, light pollution, dog walkers, cats ...the negative impact is endless and permanent.</p> <p>To Conclude:</p> <p>Siting a major greenfield development in this area of biodiverse treasure will cause irredeemable damage to the environment. The biodiversity will be lost forever.</p> <p>This proposed development must not be allowed to go ahead.</p>

Please give reasons for your answer	I live in Midgham, currently a lovely, quiet rural spot, which the current plan has suggested should have 20 of its acres. This is so inappropriate and makes a mockery of the plans suggestion that 'outside of settlement boundaries, land where development will be more restricted.'

	<p>The suggested development of 1500 on the northeast of Thatcham, and the west of Midgham, is still wholly inappropriate despite the changes to the original plan. It abuts Cox's lane, which is a single track road leading into Midgham which through Midgham unnecessarily, thereby helping to retain it's rural character. Already yards of hedgerow have been removed and someone doesn't think a consultation process is necessary. Are we to be led to believe that Cox's lane won't be ripped up and that will result from this development better access? Midgham will be unrecognisable if this is the case.</p> <p>Previously, there had been suggestions of an alternative development south of the railway station in Thatcham. This would have included an awaited bridge over the railway, and also on the grounds that it would increase traffic on the roads in what West Berkshire Council only presume no one making these decisions lives in Thatcham. The queues through the town waiting for the railway to cross that route remains the most sensible to get from Thatcham to Basingstoke. This road is far less rural, and far more a road.</p> <p>Any large scale development of Thatcham necessitates an update of Thatcham's services, and yet this plan is found to be in large swathes of the day, and at all hours if the M4 is shut. Thatcham has previously been highlighted for needing further attention before any new major developments are made, and yet this plan ignores existing Thatcham entirely.</p> <p>I understand the need to build new houses but the doggedness with which West Berkshire Council are pursuing this plan and the reasonable argument is concerning.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	Regarding the above plan, I would like to lodge my objection to this wholly unsound development for the following reasons: 1. Provision of healthcare Currently, all GP surgeries in the Thatcham and Bucklebury Parish areas are heavily oversubscribed and there appears to be no plan to address this within the proposal. You are risking the long term health and well-being of all existing local and potential future residents in the developed plan. 2. Education The lack of planning for healthcare provision mirrors that of education. There are no clear plans for the provision of primary schools to meet the obvious future demand that comes with an additional 2500 homes. The existing schools are already oversubscribed and this will simply exacerbate the current poor education choices provided to parents by West Berkshire Council.

	<p>3. Environment</p> <p>The proposed development will be enormously damaging to the environment and in your own LPR you accept that S on the environmental sustainability. You accept that this will potentially need to be mitigated but provide no clear plan. Given that WBC declared a climate emergency in July 2019, this development would appear to be significantly at odds with aims.</p> <p>Vague references to 'community parks' within the proposal do not provide any reassurance that there won't be mass existing AONB.</p> <p>4. Transport</p> <p>The existing road network in and around Thatcham and Upper Bucklebury is wholly insufficient to cope with the mass result from so many new homes. The council's previous failures at mitigating road and car usage in the Dunstan Park and the same mistakes will be repeated here with a totally inappropriate and unsafe level of traffic through Harts Hill. In the SP17 plan, the council's assessment is that the development will have a positive impact on the opportunities for transport. There is absolutely no evidence of this whatsoever. Glib statements along the lines of 'the development sh mind' do not result in actual action being taken. Where are the cycle paths segregated from the road network? Where routes? Like the rest of the local area, the car will inevitably represent the only reasonable and safe way to travel and emissions as well as make existing poor pedestrian provision even more unsafe.</p> <p>In general terms, I do not understand how an enormous development such as this can be recommended by WBC when available.</p>

Please give reasons for your answer	<p>With regard to the above application I am deeply against it and object strongly to it as I find it completely unsound.</p> <p>The impact on the environment with such increased levels of traffic will be hugely detrimental, as will so many extra of such an increase of traffic on the A4, which is already seriously busy.</p> <p>It will also cause greater problems with the various roads accessing the A4 in the immediate area, which already face With greater queues, which again will effect the environment badly.</p> <p>Regarding healthcare all local practices are overstretched, there is a shortage of people applying to work in healthcare burden on the local practices which are already struggling.</p>

	<p>There appears to be no evidence to support claims that SP17 will have a positive effect on the environment. Neither can we investigate and analyse the severe consequences of building so many houses on a greenfield site. It will affect the local environment and we are so lucky to enjoy. Lapwings are one example, their numbers are now increasing but with the proposed building and all the proposed upheaval will drive them out of the area.</p> <p>The provision for extra schools to meet the anticipated demand is too vague and the amount of funding inadequate.</p> <p>Consequently I believe that WBC should halt proceedings.</p>

Please give reasons for your answer	<p>I am sending this email message to register my objection to the proposed Thatcham NE Development.</p> <p>My reasons for doing so are as follows:</p> <p>- I have lived to Chapel Row for over 30 years and through traffic has increased massively during this time. The scale will lead to a further huge increase which is unsustainable on our rural road network. There are few pavements and walls ever more dangerous.</p> <p>- Our local surgery is already working beyond capacity and this development has no substantive proposals to deal with additional population.</p> <p>Please take my objections into consideration in your further decision making on this proposal.</p>

<p>Please give reasons for your answer</p>	<p>I am opposed to the proposal to build 1500 - 2000 houses in North East Thattham. The development is much too large for the area. It will be situated on the edge of an Area of Outstanding Natural Beauty to the north side of the A4. The A4 is a narrow and historically difficult to cross so it follows that almost all the extra traffic and footfall is likely to occur on the north side of the A4. There has already been considerable development around Thattham which has been absorbed into the country environment but the surrounding countryside and ANOB.</p> <p>The infrastructure, including schools and hospitals, is currently overstretched therefore the large increase in numbers of the local amenities. We have virtually no public transport so the increase in traffic, with every house having at least one car, will clog the already crowded country roads.</p> <p>Car park facilities are almost non-existent and the proposals will yet again draw all the traffic and footfall to the north of the site with an exit to the north of the site onto Harts Hill, pushing yet more traffic into the countryside and adjoining ANOB.</p> <p>This is a rural area and proud of it and this development is totally inappropriate and far far too big.</p>

Please give reasons for your answer	The delivery of housing at NE Thatcham faces an even longer timescale to delivery than Sandleford Park. A strategic planning application was submitted by the landowners in February 2022. Following adoption of the LPR, an outline application would have to be submitted, considered and determined. This would be the case as at Sandleford Park in relation to reserved matters application(s); discharge of pre-commencement conditions and other matters. One national study (Footnote 6 - Sutton Coldfield Green Belt sites phase 2 report 2014) found that the average period from validation of first planning application to delivery of first homes is nine years. This study also quoted which would suggest a period of 7.7 years from validation of first planning application to delivery of first homes. Given these factors, it seems inconceivable that the allocation at NE Thatcham could be delivered within the timescale of the prudent allocation, based on the national studies quoted, would be 1,000 units within the plan period, which could be delivered within the plan period.

Please give reasons for your answer

With this letter I am voicing my concerns and objections to the proposed development of approx. 2500 home in Northampton. I plan to be unsound, not carefully thought out and potentially detrimental to Thatcham and all the surrounding villages. This area is already 'full' from the point of view of traffic, amenities, schools, healthcare provision. It is also an area that is rural in Berkshire, because for the time being, that is what it is. It would appear that is not to last. 'Rural' suggests looking after the environment and biodiversity of the area, none of which seems to have been taken into account with this very large development. It is a town, with the population of Hungerford into an area much smaller than Hungerford with none of the space, amenities and greenery. It is a rural area, rid of some very important countryside at a time when we are supposed to be protecting our natural world. Very strange.

I do totally understand the need for development and the requirement for more housing throughout the country, but I do not think that as many as 2500 in Thatcham, especially as it has been seen that we no longer need to meet the numbers set by the Government. But actually this is not in Thatcham at all, it is to the North East - almost like a separate town and the people living there are not in the town at all, most of them would be taking a car to drive there and park...well, where would they all park? So, the planning meetings who said that Thatcham was in need of regeneration and improvement has clearly not looked closely at the area. It seems to be an allocation out of all proportion in an area where so much of the land is taken up by AONB and flood plain. What are they for? The people wouldn't be a part of Thatcham and would need their cars to get anyway, maybe the houses are intended for commuters. Covid, the pattern of working has changed, and there are not so many people requiring to commute to London. Why are they purchasing houses in what was considered 'Commuter belt' at 'Commuter belt' prices, when they can choose to live so close to home. Should the number of houses not be reviewed in this very changed world? Also, with the birth rate dropping and the population of all classes in some year groups, will we see half empty classrooms in the proposed new school(s)? And when this is completed, how many can be built? Thus not fulfilling the promise made by the Property Developers.

I really believe that the effects of this proposal are devastating for the town of Thatcham. I can only see this as destruction and improving it. But I am also very concerned from the point of view of the villages to the North of this development. The development will have on the roads, education, environment, healthcare and general quality of life. I imagine many of the people concerned about the same aspects from their point of view. It affects everyone. Looking from the aspect of the villages, the negative impact this development will have on Upper Bucklebury. Whichever way you look at it, with the development of Upper Bucklebury will all but merge with Thatcham, separated only by a small copse at the end of Long Grove, and there will be a road to, from and through the village. This cannot be a good thing for the identity of our village and for the peace, tranquillity and beauty of all the reasons that people choose to come and live in a village.

There are so many sides to my concerns that it is hard to know where to start and this would be a document of many pages. I will mention them all, so I will concentrate on the main ones of traffic, environment and amenities. All amenities will be affected, but especially education and healthcare.

Traffic

I live in Upper Bucklebury and work in Thatcham. As I drive out of my road in Upper Bucklebury, it can take me a while to get out of the traffic, especially if there is an issue with a water leak, or roadworks or other disruption on Harts Hill - this is a choice. I can go along the Ridge towards Cold Ash, where I get caught up in a long stream of cars filtering one by one. I can then wait at the junction at Cold Ash for a space in the stream of cars; or I can go down Harts Hill where I get caught up in a stream of cars that slows down the stream of traffic or I get held up due to a water leak or yet another accident- one frosty day there were several accidents in the morning; my other choice is to wind through the narrow country roads and drive down the single track in Cox's Lane where I can allow other vehicles to pass. Now, I am wondering how this picture will look if we add potentially over 1,000 vehicles to the road. That is a conservative estimation, because with 2,500 houses, there could easily be 5,000 vehicles and if the M4 or A4300 or Floral Way has works on it, many of those vehicles will be taking those routes. What a nightmare and how dangerous. When Harts Hill was closed for several weeks, the impatience caused and the dangerous driving in the country roads resulted in a number of accidents. This same story could be written by anyone living in Cold Ash, Upper Bucklebury, Chapel Row, Southend Bradfield, etc.

Apart from getting to work, I am also wondering about the effect of so many more vehicles at the level crossing in Thatcham. I will wait in a long line of traffic for upwards of 15 minutes at a time, so time as long as 25 minutes. And if these houses are built, how will the existing station car park, station and level crossing cope with that large influx of cars?

Environment

The inevitable increase of visitors to our village/parish and Bucklebury Common can only have a detrimental effect on the environment. The ancient woodlands, ancient hay meadows, heathland and wildlife need to be protected. Bucklebury Parish Council says that habitat change as a result of inappropriate management are one of the most damaging threats facing rare species. These habitats should be safeguarded wherever possible and appropriate advice sought on managing them to conserve the natural environment. The extinction of species diversity not only in Berkshire but also in the UK."

If this development were to go ahead, these precious woodlands and rare habitats would almost certainly be under threat. The increase in the visitor numbers - our woodlands would be a short hop for the residents of the new development compared to the surrounding area they would be walking or driving to.

We can see no evidence that the new plans provide for adequate green spaces or for the protection of biodiversity. With so many people housed in the new development needing access to green spaces, there can only be a negative impact as the development takes away the Common and the adjacent AONB.

Also, talk of creating a Country Park, which I see has been changed to Community Park, in the strip at the top of the development. It does not make sense, as there is already very good countryside there from the woods next to Upper Bucklebury to the A4, and a lot of wildlife exists and has existed for hundreds of years. Also, what is a Community Park? Suitably vague I guess. Nothing will be done to it, the developers simply realise that it is too steep to build on. I have no faith at all that they have any regard for the countryside they are destroying.

Amenities - healthcare and education

The issues of Healthcare can never be underestimated, especially now when our NHS struggles to keep up with the demand. It is hard to offer the service required to keep the population healthy and safe. I see there is a small primary healthcare facility in Thatcham.

	<p>my understanding that a development proposal of the size of this one should have a Health Impact Assessment (HIA) of the proposal have been discussed with the health service providers. It is concerning that we have no evidence that Berkshire Council have organised an HIA. Also, since the NHS are struggling to recruit new GPs throughout the county, new practices anywhere, it is unlikely we will get a new GP practice in Thatcham at all and the current provision would be a huge increase in population this new development would bring. Thatcham Health Centre, Burdwood and Chapel Row would be people unable to get appointments for, at times, many weeks. There is not a local A and E, so this would add at a minimum travel on the local roads to the hospitals in Reading, Basingstoke or Oxford.</p> <p>Neither local GP practices nor local dental practices appear to have been consulted on the potential impact of the development and as a result only inadequate and unrealistic provision has been made in the plan. New educational establishments and the details on this are insufficient and contradictory. WBC has an obligation to provide education facilities for all children and there is no detail on how they will do this with the addition of an undetermined number of new children housed in the new development.</p> <p>It appears that the developers will provide a sum of money towards building a new primary school, but the timing of this is unclear or even if there is funding for it. Unless it is built first, there is the risk they will not be built at all since anyone who has children necessarily have already found a solution for their children in the existing schools.</p> <p>Similarly for secondary school provision. A contribution by the developers may be insufficient and it is unclear what they have given no details on proposed location so there is no assessment on the impact on traffic). If government guidelines state that a 6-form entry are unsustainable, we would be looking at a new school with at least a 6FE. However, we appear to have a school of pupils that the school would need to cater for, so the number of form entries is not stipulated in the plan. Interestingly, that a development of 2,500 houses would not provide enough pupils to fill a 6-8 FE school suggesting a smaller school than a 6FE school is unfeasible. This clearly has not been thought through enough.</p> <p>To Conclude</p> <p>To conclude, I would like to register my very strong objection to these plans. The Impact on the countryside, the town of Upper Bucklebury and indeed all the villages North of Thatcham will be immeasurable. With increased traffic, a steady increase in the consequential damage to the local environment, the character of the countryside and the peaceful villages will change. There is no going back if this is allowed, and I am certain there will be many regrets when all the above issues prove themselves. These issues, together with the lack of evidence that adequate provision of educational and healthcare facilities has been made make the Local Plan completely unsound in my view.</p> <p>As Government housing allocations are now only advisory and no longer an obligation, I would urge WBC to reconsider what you would be actually creating in reality rather than just on paper. There is no longer a requirement to build 2,500 houses. Sites can be sought for a reduced number of new homes, with a lower Impact on any one community. Please follow the lead of all around the country, who have wisely paused their plans based on previous housing allocations, and work on a revision in line with new planning guidance that could mean a vastly reduced number of new houses.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	<p><i>For avoidance of doubt I do not think the LPR is legally compliant as:</i></p> <p>Key documents and assessments have not been shared in a timely fashion within the locality.</p> <ul style="list-style-type: none"> • HIA not conducted. • Environmental documents missing. • Education breach of WBC obligations. <p>Example of this include:</p> <p>Health care</p> <p>WBC and developers do not appear to have arranged a relevant Health Impact Assessment in accordance with the current requirements (e.g. the HIA should reference how the proposal of the development has been discussed with the health services on primary health care services) nor have they evidenced having liaised with the appropriately with the local health care agencies. There has been no approach by WBC or the developers to any local GP practice to discuss site / floor space proposals. Local GP practices had no input into the proposed 450 sqm floor size proposal which was only discovered with the SP17 Policy. Accessing GPs is critical to everyone, however all three local practices are already overstretched. Furthermore one pharmacy closures in Thatcham have further worsened the pressure on the local primary health care. Therefore not having a pharmacy with an already overstretched (and diminishing service) will deny people their rights.</p> <p>Environment</p> <p>WBC notes in the LPR that a "Sustainability Charter is required" to establish how "policy requirements will be achieved (e.g. biodiversity net gains and anticipated overall positive impact on the environment sustainability). These documents do not appear to be publicly available for the Reg 19 consultation. Furthermore I believe the Charter "will be informed by" various strategies (e.g. biodiversity ecology) but again this is not available. This omission, along with what has been shared with WBC of the biodiversity strategy, is a notable and significant omission.</p> <p>What is concerning is the "double speak" used in the planning documents to give the impression that there will be mitigation measures – however there is no evidence of any serious attempt to investigate, catalogue what is actually present within the biodiversity and provide good clear remediation plans. WBC seems to be vague with an "all will be OK" which at this stage in the consultation is insufficient despite the feedback from throughout the consultation process where concern over the habitat, environment and biodiversity has been consistently highlighted.</p> <p>Education</p> <p>The provisions for education from Nursery, Early years through infant to Secondary education is NOT clearly defined in the LPR of WBC obligations on this item. Whilst there is a vague comment in SP17 that "the site will provide Early Years provision" in detail. I will further expand the point on education later in my feedback.</p>
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is	

<p>consistent with achieving sustainable development.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>In response to the wider LPR the set-up of the document was quite confusing and not straightforward to put down the all of my thoughts on a section that will be over looked, therefore I am also sending this to you to ensure my comments on LPR. My comments are as follows:</p> <p>Transport:</p> <p>a) Growing Traffic</p> <p>Comments I shared at the Regulation 18 stage about the plan highlighted the increasing amount of traffic through the WBC planners that the traffic from the proposed development would link to "Floral Way" and the "A4". However WBC exit at the north of the site onto Harts Hill. This only became clear on 6th Jan when the Transport assessment was published. Harts Hill is a steep road with not pedestrian walk way - however pedestrians still, on occasions, walk up the hill to the village and Harts Hill, as highlighted in my prior response, is dug up (WBC have records of the frequency of this over the last few years due to the COVID years due to a lower likelihood of infrastructure work being undertaken then) due to infrastructure challenges. There is no recognition by WBC about the suitability of Harts Hill road nor the impact it will create in Upper Bucklebury with the village and wider villages. WBC acknowledge that "some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury is clearly visible that the roads are not adequate, often without pavements (like Harts Hill), without street lighting (as it is not) result in serious accidents occurring with an increase in usage. In addition to the likelihood of accidents this in itself is a safety issue. The Environmental Assessment which proudly notes "to Reduce Accidents and Improve Safety" (see below point d).</p> <p>Response from Reg 18 question WBC noted "...the TA (Transport Assessment) report also acknowledges that there is a need to improve the highway network on the A4 corridor and adjoining links as a result of the THA20 development including some displacement of traffic onto rural routes such as Upper Bucklebury". This assessment, it must have been done without the impact of the now "new" plans using old reports to justify why there is little cause for concern however as highlighted plans have been changed at the Reg 18 comment made is just as valid now as it was then, in fact more so as the revision in the plan have not been shared.</p> <p>1 b) Access and Junctions</p> <p>The Transport Assessment says in para 3.26 "The access arrangements for the northern end of the NET site proposed (including turn lanes where appropriate) on both Floral way and Harts Hill. Results from modelling suggest that these will not conflict with the surrounding rural routes around this modelling nor the results from the modelling has been shared (or I certainly cannot find this). Whilst there are no drawings - so far I have not been able to find ones for this very important junction on to Harts Hill. As the "plan for an exit onto Harts Hill in 2023 this lack of information (and not being able to view it) is disappointing. I would ask that the planning officer and the Transport Assessment explores why these materials were not shared in good time.</p> <p>1 c) Car Parks</p> <p>Surprisingly drawings are showing a new car park on Harts Hill. The purpose of this car park is a mystery as WBC has not shared any of the drawings above in my points, a car park would add additional pressure onto a rural, unlit road - keeping in mind that this is the only road in the area. The local concern is that there is already levels of antisocial behaviour on the Common car parks and this unexplains this further.</p>

1 d) Strategic Environmental Assessment (SEA)

The SEA which was shared with the local plan notes in Objective 4 "To promote and maximise opportunities for all for transport." The SEA makes the following assessment: "To reduce accidents and improve safety" - Council assessments a Positive Impact on road safety as safe travel will be critical to the design of the site". Firstly and as highlighted above steep hill without pavements - safety will not be improved but will be reduced and impaired. With the new exit noted traffic will clearly increase on it meaning that there will not reduce accidents. In addition the SEA proudly notes "To increase cycling and use of public transport". The council assessment of this is that this is significantly positive impact! Their claim to have a significant impact on walking, cycling and public transport as the development should be designed with the School Buses from Upper Bucklebury to the local school, Kennet meaning a reduction in public transport - so their track. Furthermore it is not articulated how these lofty ambitions will be achieved in the materials that have been shared as words are easy to note and so too lofty ambitions – however without the specific details being shared on this, it seems has been undertaken or if it has it has not been shared with the public. In addition it is recognised that the locality is for walkers - however by building over what is currently walked over and by increasing traffic on the surround roads with (cars and walkers) this is in direct contradiction to these proud statements in the SEA.

Environment

As part of my Reg18 feedback, which has not been suitably addressed by the plan (as I will outline below) nor the feedback would again highlight:

There is no evidence to support the claims that SP17 will have a positive impact on the environment. I would put simply (farmed or otherwise) and developing it cannot result in a positive impact for the environment. In contrast and with common sense to believe it will have a very negative impact on the environment. I would question, how logically, can digging up the land (such as newts and red listed birds) can be positive; how can laying housing or road foundations into the land be good for creatures live in along with local plants; how can having thousands of people living in an area where bats, badgers, and other creatures unconstrained be an improvement for their environment? Any comments to the contrary is not being truthful.

It is nonsense to suggest (and I am quoting to response given by WBC to initial response to the plan) that 'a network of green infrastructure' include a new community park linking Thatcham to the AONB will help on this.' All of these animals and insects and plants will grow and go where ever they need to and are not constrained by an "a network of green infrastructure". Furthermore the claim is meaningless as there is no clear definition as to what this network actually is or comprises of, nor specifically which elements of infrastructure. I would simply ask – can a bat – which is present in these locales use this? Can a Red Kite? How about the rarer plants occur naturally in this area? If WBC has not undertaken a clear assessment and shared the outcomes of these questions using this "green infrastructure" as answer to these types of questions. As noted below – WBC demonstrates a lack of concern on this critical item and are not able to articulate how they will successfully mitigate this factor.

The original plan had "Two Country Parks" spaced across the slope inside the Biodiversity area. However NO details of how these "Country Parks" would be formed. In the updated SP17 text these "Country parks" have been what seems to be replaced by "community parks". This lack of details and specificity only highlights how little WBC considers this area and protect the public enjoyment of it (which in turn they highlight they will do). As SP17 has no proven plans for providing suitable and sustainable biodiversity of this area there will be inevitable "spill over of people" into the adjacent areas (which are AONB). Again this nor the impact of it with a development of this size and scale except to extolling the virtue of providing a somewhat artificial network which will "take advantage of the landscape" to "facilitate connection to the AONB, and include leisure routes across the existing habitat to lay vaguely termed "green infrastructure" would not aid the environment – and if it did the increase in pressure on the fragile ecosystem they are working to restore.

Education

As well as vagaries on the Early years provisions on education, the provision for Primary is also unclear. There is no clear number of schools or Form entry requirements. The LPR proposes the sum of £12m be contributed by the developer but it is impossible to assess if this is sufficient or not. The LPR does not state when it will make this funding available or how WBC has not highlighted the planning timelines for those schools to be able to accommodate new pupils. The LPR is also unclear. Currently the two local schools in catchment is Kennet and Downs, both which are oversubscribed. As this development would mean that Bucklebury school children would be penalised. Kennet school has not had any notable building or expansion in some considerable time (my two children attend or attend the school). The LPR proposes £15m to be contributed by the developer that another school will be built there are no details around the location of land to be provided and hence there is no possibility of this. Furthermore there is no evidence on how the £15m has been developed and whether the long term viability of the funding be paid in a single step, if it is to be paid in multiple years will it remain at £15m or increase (notable impact on this funding which have been in place at high rates before and after the LPR was drawn up?). This will result in insufficient spending on children. Furthermore the LPR references a report by David Locke Associates and Stantec on behalf of WBC and proposes a 6FE (6 year entry years) school half funded by the developer contribution. This could mean that the oversubscribed secondary schools receive not any funding - however they would logically be picking up those children outside of the 6FE years, if it was not an option. I believe Government guidelines on this is that secondary schools with less than a 6FE are not sustainable. HOWEVER the claim that this new development is not sufficient to fill a 6-8 FE school "5.18....the scale of growth proposed is not sufficient to fill a 6FE school" and "5.19.....it is not considered feasible for a new school to be smaller than 6FE." BUT with the apparent 40% increase in the 2023 LPR (to 1500 from 2500) a secondary school is likely not sustainable in this location - however the plans refer to this item. In the development plan it was noted that the education provision exercise was based upon WBC data on pupils aged 12 years old and totally out of date). This means costing assumptions will be incorrect. To name matters worse the developer has not engaged in a detailed demographic prediction and modelling exercise to determine future primary and early years provision in the town and has not attempted to predict the long term capacities of existing schools. " This seems to be a concern that these plans even more so if figures with developers are already noted in the planning application of £12m / £15m! V

without knowing:

- 1 a) how many pupils need to be catered for,
- 2 b) where the new school would be located,
- 3 c) the number of form entries needed,
- 4 d) timing of funding (and if it is inflation protected?) and
- 5 e) if the amount of money being proposed is really sufficient in the first place.

WBC, as an education authority, has a duty to make adequate arrangements for suitable and sustainable school provision across all school years if it has not been defined clearly; evidenced correctly or costed reasonably using up to date figures in the LPR.

	<p>Identity</p> <p>The LPR makes no reference or minimal acknowledgement of the identity of the local villages that will be impacted on Bucklebury.</p> <p>The development of this size from Thatcham up the slopes to Upper Bucklebury will clearly impact the village and v of West Berkshire is one of the last rural areas with historic ties to old traditions. A development of this size and nature and the rural identity of the area will be removed. This has not been addressed in the Plans. Interestingly WBC or lo as reasons to dismiss planning applications – so if this is so important why is there no or minimal reference to this in</p> <p>In summary the Reg 19 has omissions in it, used out of date data; has not included relevant documentations (with a noted); has ignored the impact of transportation on the area and the impact of this even though updating their plan with / exit); not highlighting in detail how health services will be delivered except to note that a 450 sqm facility would be p been published or is accessible; ignoring the impact on Health services in the area of such a large development; hav who have consistently highlighted the rich biodiversity of the area (WBC nor developer, as noted, has not studied th would adequately deal with the protected birds and species present, only to comment in general and unsubstantiated te network” without any back up research, cataloguing or solutioning taken place); nor considered the impacts on the A take place in the LPR; nor using up to date data on education and therefore leading one to assume incorrect assumpt proposed figures and costings nor even paused in the consideration of the plan in light of what the Secretary of Stat that local constraints and concerns should be noted (nb the local council – Bucklebury is opposed to the development). and the amount of gaps and omissions – it is not clear on how this proposal can be justified to proceed and as such</p>

Please give reasons for your answer	<p>In response to the West Berkshire Council's Local Plan Review 2022-2039 Proposed Submission, I wish to register my concerns over the sites noted under the Harts Hill Farm area(s) as I believe the plan to be unsound. Information is either lacking or contains a breach of many policies outlined within the NPPF and WBC's own documentation.</p> <p>There are many items I object to including the negative impact to our countryside and the neighbouring AONB, the impact on the Harts Hill area. The road is already a busy route with cars ignoring the 40mph speed limit. Increasing the traffic is due to many cars from our road to cars along Harts Hill Road, I fear for the safety of my young family. There is not the infrastructure to cope with the current amount and the reporting carried out for wait times along Floral Way is not representative of the reality of people waiting at the point I would like to go into more detail is the Healthcare provision.</p>

I object on the following item:

Healthcare

SP17, the North-East Thatcham development plan proposes a 450sqm primary healthcare facility however there is no strategic planning. It appears that neither WBC or the developers have arranged or published a Health Impact Assessment for a major development. Health and wellbeing facilities are developed using a multi-agency approach but there appears to be no discussion between the North-East Thatcham Development Consortium and local practices.

NHS England commission very few new GP practices, even if they consider there to be patient demand. There is also a shortage of qualified GPs, in 2021/2022 there was a shortage of 4200 full time GPs, this is projected to rise to 6700 shortfall in 2023/24 which could be as much as 8800. Therefore there is no realistic prospect of a new GP practice being established in the foreseeable future.

It would also make no financial, organisational or geographical sense for an existing local GP practice to set up a branch at this development.

<Redacted> is currently registered to Chapel Row Surgery in Chapel Row. This isn't even in our town and the only way to get there is by the car as it is over 3 miles away. Any houses built between <Redacted> and Upper Bucklebury will also be registered to Chapel Row for accessing the surgery if you have no transport. Chapel Row already have over 8500 people registered to them with waiting times for appointments have increased over the years and their dispensary is no longer available to us as we live with the town centre. Thatcham town centre. These are also lacking as many dispensaries are now closing down putting even more pressure on the Boots dispensary. I recently had to wait nearly 90 minutes in a queue at the Boots dispensary on Brownsfield Road to collect a prescription.

There has been no discussion between WBC or the developers with any local GP Practice to see if any could relocate to this site is required and surely would be better located centrally to improve access and minimise traffic to surrounding areas.

WBC have proposed a healthcare site is required but have not provided any evidence of having liaised with the appropriate authorities or relevant HIA. They have not provided any evidence of how this health facility would be provided.

The 2011 ONS Census states that there were 10,241 dwellings in Thatcham. The number of new units proposed at the site would mean an increase to Thatcham of nearly 25%, an excessive number that neither the infrastructure or surrounding roads can support. Tull Way for example consists of only 75 properties however exceptionally low density when compared to the site's area.

We, along with many other residents of Thatcham object to the extent of the north east Thatcham Development, specifically the Hill Road and Harts Hill Farm area. We hope that you will reconsider the proposed Housing Site Allocations and look for a more appropriate, brownfield or within Settlement Boundary area, not within open countryside.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?
 * Yes
 * No

Please give reasons for your answer

4. Proposed Changes

5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?

2. Do you consider the Local Plan Review is sound? -	

<p>Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to object to the planning for 2,500 houses in N E Thatcham on the grounds that the plan is fundamentally flawed. The reasons are listed below:</p> <p>Traffic – I believe there will be increased traffic through Upper Bucklebury and surrounding villages at busy times of the day during the morning ‘rush hour’ – with an additional number of cars from the new site people will be finding other routes. The wait at the level crossing can take 20 minutes at the present time – additional traffic heading south will only increase. The development plan – on a brown field site – included a bridge over the railway, which seems to me to be far more suitable.</p> <p>Schools – Kennet school in Thatcham is already over-subscribed. Will there be a new school on this site and will it be occupied (should this plan go through). The same applies to primary schools.</p> <p>Doctor – There will be additional pressure on all medical practices in the area – additional GP surgeries are not part of the plan.</p> <p>Environment – The area is a green field site – abutting an AONB with no evidence nor strategy for positive impact. In fact, in my opinion, it will be detrimental. There is likely to be damage to Bucklebury Common with increased footfall and the loss of the ecosystem of national importance. The three small, isolated areas inside the proposed settlement boundary have no planning or commitment to exclude subsequent development and, surely, cannot be described as ‘Country Parks’. There will be no green belt in Thatcham and Bucklebury and they will effectively merge and Upper Bucklebury will lose its identity.</p> <p>I find it hard to comprehend how the planning department passed this application.</p>

<p>Please give reasons for your answer</p>	<p>I am writing this email to raise my objection to the proposed development between Thatcham and Upper Bucklebury conceived without a logical approach to the impact to the local countryside or the local residents and more important up with no local knowledge or experience at all. Please find my objections listed below</p> <p>- Traffic</p> <p>The roads in this area already suffer at peak times and there isn't the structure in place to cope with an increase in v Shaw and Aldermaston Wharf roundabouts on the A4 you will see that they are already working beyond their capabilities pedestrians cannot be ignored and the fatalities will no doubt increase. The road layout above Thatcham will not cope road to Cold Ash and the through Upper Bucklebury coming to mind</p> <p>- Healthcare</p> <p>The existing healthcare system will not cope with the new development and there hasn't been any contact with any regards to opening a new surgery. The minor injuries unit is already too busy and with the nearest hospital being Re trying to help an huge local population, it makes no sense to build all these homes with no plans in place to increase</p> <p>- Countryside</p> <p>It is an obvious objection, but the loss of so much countryside will have huge effect on the local area and inhabitants. moved to or stayed in this area is the AONB and the footpaths that meander across the fields. This will all be lost. Th tipping and this will only be exacerbated. Add to this the litter that will be left on the roads and in the lay-bys and you hazard that was not there before.</p> <p>- Schools</p> <p>In relation to secondary schools, about which I know more, there is only the Kennet and The Downs, these are both and with the location of the development this will upset the balance with regards to catchment areas of schools. Som decade or so ahead with regards to where to live and which schools to send their children to.</p> <p>I hope that all of my points are then on board and that this ill-fated and terribly organised plan will not go ahead,</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	It fails to discharge the duty to cooperate by not consulting Thames Water regarding the time needed for the provision of the proposed housing. The settlement boundary is also incorrectly drawn.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes	No

* No	
<p>Please give reasons for your answer</p>	<p><i><Extract of Full Representation relevant to consultation point - for full representation see attachment></i></p> <p>The Plan does not take into account other reasonable alternatives such as Colthrop Village. The allocation is not sufficient provision to ensure delivery. The Plan is not the most sustainable option and this is inconsistent with the NPPF. Please see the submission document.</p> <p>There are serious flaws in the North East Thatcham proposal. These are set out in a Committee report being considered at the Committee meeting on the 2nd March 2023. The main flaws are as follows:</p> <ul style="list-style-type: none"> • The number of dwellings being reduced from 2,500 to 1,500 is not correct. The 1,500 number is now stated as potential for 2,500 units; • large number of sites that have been referred to the Council have not been considered by Members at their meeting when they resolved to make this Reg 19 Submission; • The air quality assessment is flawed in that it has the wrong end date; • The Council has not properly consulted with Thames Water; • The settlement boundary for Thatcham is incorrect; • The provision for secondary schools is not consistent with Council policy; • The IDP has not taken account of the cost of a secondary school. <p>These flaws render the Reg 19 document unsound and could not be supported by an Inspector at Examination.</p> <p>THE NEED FOR MORE SCHOOLS</p> <p>The key reasons West Berkshire appear to be supporting a strategy of major growth at North East Thatcham is the need for more homes, the argument being that smaller more distributed sites around the town would not be of a scale to deliver such a major growth. The problem with this justification is that school places are needed now, with the demographics of the area showing a decline over the local plan period. The proposed secondary school will not be needed to accommodate the growth in homes as growth happens. The general forecast over the plan period shows a decline in the school age population and, on average a decline in population trend has an impact on education planning. Within the Newbury and Thatcham Spatial Area (for Education) this trend follows through with secondary education numbers expected to 'peak' in 2021/22 (i.e now) when assessing the Local Plan period up to 2037. When looking at projections for secondary need at the end of the Local Plan Period, the shortfall in secondary spaces is significant as more homes are being built. Based upon the existing secondary schools (plus the expanded school) and assuming a shortfall of 216 secondary school places across the area. This shortfall would not support the building of a new secondary school to accommodate this would need to be found through the expansion of existing schools in the catchment. The assertion that North East Thatcham is the only way to deliver essential educational infrastructure is therefore misleading. Should a Secondary school be viable it would need to be at least a 5 form entry. This would equate to approximately 300 places, more than planned at North East Thatcham. To conclude, neither the North East Thatcham proposals or the Colthrop Village alternative would trigger the need for more schools, especially within the Local Plan period. To justify such high levels of growth at North East Thatcham on this premise is not sustainable.</p> <p>TRAFFIC MOVEMENT</p> <p>The new development will have an increase on traffic wherever it is located. However, an important planning consideration must be to identify strategies that can potentially reduce traffic impact – specifically within areas that are identified as sensitive to air quality issues caused by traffic such as the Air Quality Management Area on the A4 from Harts Hill Road to the Epsom Road. The Consortium do not consider that West Berkshire Council has given enough consideration to achieving modal shift away from cars to reduce impact in its consideration of the strategy for North East Thatcham. The Colthrop Village Consortium have carried out a comparison of the North East Thatcham proposal with its alternative strategy, using the same assumptions as set out by the Council's own technical work. The conclusions show that considerably more traffic will travel along the A4 corridor from North East Thatcham with the alternative generated by our alternative strategy. This is because our strategy will distribute traffic more widely on the network of roads to the north and south of the town. In reviewing this work we have NOT reduced our traffic assumptions to take into account the Colthrop Village to the Thatcham train station, but in reality we would assume that walking to the station would provide an attractive alternative and as such our traffic impact is likely to be lower. It is also important to note that the above relates to similar levels of development growth in the Local Plan Period. Our alternative proposal will continue beyond the Local Plan period to add traffic from an additional 1,500 dwellings onto the network of roads.</p> <p>CONCLUSION</p> <p>This Regulation 19 submission demonstrates that the Colthrop Village proposal can meet a substantial amount of the need for homes over the plan period on a sustainable site. The proposed North-East Thatcham site in the Regulation 19 document is far less sustainable than the Colthrop Village site. Therefore the Colthrop Village site should be the preferred option. There is no doubt that other sites will be coming forward in the Reg 19 process that will make up the shortfall of approx. 550 units throughout the Plan period, e.g. the Henwick Park proposal. The North East Thatcham proposal is seriously flawed in several respects as set out in the Extraordinary Committee report. Therefore it cannot go forward for Examination. The whole Reg 19 procedure should be paused and a fresh Reg 19 submission with the flaws in the current document and properly examines all options including Colthrop Village, the subject of this consultation.</p> <p><i><Proposals relating to Colthrop Village logged as an Omission Site ID: PS1394></i></p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>The allocation in Policy SP17 does not adequately deal with the need for water and foul sewerage, education and health services. Please see the attached Reg 19 submission document.</p>
<p>4. Proposed Changes</p>	<p>We propose the deletion of the SP17 allocation and the allocation of Colthrop Village as a more sustainable alternative to the SP17 allocation in the current document.</p>

5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	In order to present the Colthrop Village effectively to the Examination.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>Please give reasons for your answer</p>	<p>I am writing to object to the proposed Local Plan for the development of up to 2,500 houses in North-East Thatcham grounds –</p> <ul style="list-style-type: none"> • In 2015 the WBC made a strong case against the development at Siege Cross, stating the potential devastating impact on the local environment and the Area of Outstanding Natural Beauty. Specific reasons included the loss of landscape identity, the urbanisation of key areas of landscape, the failure to conserve the historic and rural landscape of the AONB, and the overall character of the AONB. All these points are still valid and are even more important as the proposed development would further erode the overall character of the AONB. • Increased traffic through Thatcham, Upper Bucklebury, Midgham and Cold Ash • Greater flood risk to Thatcham • Increased light, air and noise pollution • Significant pressure on local services and amenities, which are already stretched <p>I hope that those making this decision will think about the context of the decision. This will impact many generations and the local environment forever. While I am aware of the need for more housing, adding more in this area – and going ahead with the proposed development – is short-sighted and will create an appalling legacy for the Council.</p> <p>The Local Plan should not be adopted.</p>

Please give reasons for your answer

I wish to raise my objection yet again to the proposed plan for development in NE Thatcham outlined in the Local Plan. The plan is unsound and lacks the proper evidence/analysis required to support such a large scale development and I am amazed that it has proceeded on this course despite the overwhelming objection from its local residents, who live and work in this community, and the government detailing that housing numbers would now be an advisory starting point and not mandatory. I urge the council to do what other Local authorities have done and pause its plan making process.

The proposed development will negatively affect me and my family as well as all the residents of Bucklebury parish, in the following ways:

- **Increased traffic towards Upper Bucklebury** – following the publication of the Transport Assessment on January 15th, 2018, there will be significant displacement of traffic from the A4 and Floral way due to the nature of the exit from the north of the village. In your own words “*there will be some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury*”. The roads are inadequate for safe and sustainable transport such as walking and cycling. As someone who cycles to work with children, I already find the flow of traffic particularly fast, dangerous and unsafe for children, particularly between the village and Row, where the traffic is very fast and there are no pavements or street lighting. Adding to the flow of traffic on the A4, the roads coming off these routes can hardly be described as “Safe” transport.
- **Increased littering, fly tipping and anti-social behaviour** along Harts Hill Road and into the village and AONB. Harts Hill will surely only increase such activity. I have personally already been involved in confronting intoxicated drivers in the middle of the road on Harts Hill, nearly causing an accident with moving vehicles, having been up to no good myself, lying by the side of the road unconscious. Can the council explain how the addition of such a car park will serve the community?
 - Please can you show your reasoning and analysis that serves to support your assessment that the “*Policy 10 on road safety as safe travel will be critical to the design of the site*”?
 - Please can you show your reasoning and analysis that serves to support your assessment will have a significant impact on cycling and public transport as the development should be designed with these in mind”?
- I have to question both of these assessments and how you arrived at this proposal as significantly positive outcomes for the community.
- **There will be a Negative Impact on healthcare provision for existing residents.** The NE Thatcham Development is a primary healthcare facility but is woefully light on detail on this matter. A development of this size and scale should have a purpose Health Impact Assessment, but I have been made aware that no such assessment has been arranged or commissioned by developers. There has been no approach by WBC or the developers to any local GP practise to discuss an approach to how such a branch GP surgery could be staffed, funded and administered. The reality is that existing GP practise in the area is underfunded. You are proposing a healthcare site that is unsuitable for NHS primary care and have not made provision for that 1500+ new houses and families will make on a local NHS struggling to cope. As a local resident, I find this lack of analysis and detailed analysis deeply disturbing and would request that you provide proper evidence for the provision of healthcare.
- **There will be a negative impact on the environment for existing residents and wildlife.** The collateral damage to the biodiversity opportunity area and its ancient woodlands and heaths will be irreversible. So claims made that the development will protect the environment are clearly fabricated given the lack of evidence provided to support these claims. Your own LPA Statement accepts that SP17 will have a negative impact on environmental sustainability. “*The site is a greenfield site and the development will have a negative impact on the environmental sustainability which would need to be mitigated.*” As there appears to be no provision for and protecting biodiversity in the plan, there will inevitably be a spill over of people and traffic into adjacent areas, causing pressure on the fragile eco system. Go figure!
- **Finally, there is no clearly defined plan for the provision of schools** within the local plan review. As a father of two children and soon into to be secondary education, this is very worrying. I also noted that the data used in the Thatcham Development is on data from a study in 2011. Again, the basis for this recommendation using 12 year old data continues to support a development that is unsound and based on poor quality data. WBC, as an education authority has a duty to provide suitable and sufficient provision for schools. No evidence in the LPR this has been clearly defined, evidenced or thought through properly. Again, this is evidence that the plan is not considered/realistic provision for sports fields which require large amounts of flat land and have no funding all

	It would be nice to think my local council was more focussed on representing its existing residents and preserving its developing every last square inch of green field sites and natural surroundings, to the detriment of many and the final much the new residents of such a development will thank you when their kids can't get places in schools, access GF and spend their lives stuck in traffic in around Thatcham and Newbury along with the rest of us, becoming increasing and villages have turned into just one more urban sprawl.

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>1 <u>General</u>:</p> <p>It is now acknowledged that we humans are systematically destroying our planet, and you still carry on building just to be 'sustainable' and growth by definition is NOT sustainable! Thatcham has been growing consistently for the last the fastest growing town in the whole of the EU. The latest development assured us that Floral Way was the limit of that was then it appears. Now, that limit is irrelevant and can be ignored.</p> <p>I recognise that we need homes. Any building is seriously detrimental to our planet for a myriad of well known reasons. The damage are pitiful to the point of being farcical.</p> <p>If you're serious about mitigating the harm done to the environment by developments such as this then the roofs of the houses should be green, grass, or wild flowers, or solar panels. And the houses would all be built on rain catchment tanks. And many other far better options.</p> <p>I'm not convinced that we need as many houses as you say and firmly believe that the whole project is driven by:-</p> <ol style="list-style-type: none"> 1 Landowners wanting to capitalise on their assets. 2 Developers wanting to do what they do - make a profit. 3 The above lobbying government to support their aims. <p>But, we do need housing. So, all brown field sites must be exhausted before any agricultural land is built upon. "Poor" this site, is "poor" because it has been over used and abused for centuries, even millennia, in particular the last half century. Over time if nature is allowed to take it's course. Building houses in the same old way is quite the worst thing to do. A better way is to build houses in a way that is sustainable and does not harm the environment.</p> <p>We must use ALL brownfield sites and then scatter a small number of houses among the existing villages.</p> <p>Your Policy SP 5 para (a) states:-</p> <p>"a. To withstand predictable effects from climate change for its expected lifetime:"</p> <p>Is this referring to the lifetime of the plan? The lifetime of the development, or the lifetime of the planet?</p>

	<p>Clearly we must consider the latter and the answer is blatantly obvious. It can NEVER withstand the devastating effects of a major thoroughfare feeding 60%-75% of traffic for this site through Upper Bucklebury. Southbound via Floral Way which is already clogged at peak times. Traffic bound North, East and West will come up Harts Hill Road inundate a small village with massive, heavy traffic movement that would devastate this rural village.</p> <p>You claim that the plans you have for the road will make it safer than it currently is. This is blatantly absurd. Did you know that the plans include a large hedgerow and 10-15 meters of earth banking on the east side of the road? This means a large hedgerow and 10-15 meters of earth banking on the east side of the road for pedestrians/cyclists on Harts Hill Road. How could anything be safer than that?</p> <p>1 <u>Harts Hill Road</u></p> <p>1 <u>Infrastructure:</u></p> <p>Schools, dentists and doctor's surgeries are currently stretched to their limits and beyond. It's good to know that it is essential that current infrastructure in these areas is adequate before any housing is built. This means building surge capacity for houses.</p> <p>These plans are unsound because they make no allowance for the time it takes to undertake the multiple, complex projects that are required before building surgeries.</p> <p>These plans are unsound because they make no allowance for primary and secondary schools when the first children are born in further pressure on our already over-subscribed schools.</p> <p>1 <u>Safe and Sustainable Transport:</u></p> <p>Really? And just how is this achieved? It appears the plans just say that 'it will be' Safe and Sustainable with no justification.</p> <p>1 <u>Bucklebury Common Vision</u></p> <p>Currently has a project to control, not restrict, access to the common, a very special local area that hopes to improve a diverse environment. This is an AONB and any development within the vicinity will have serious consequences for the mass of houses well within an area of influence and at 2.2 or 2.4 people per dwelling could potentially put 5000-7000 people within distance of this unspoilt environment.</p> <p>This makes the Thatcham NE Development wholly unsound.</p>

* Yes * No	
Please give reasons for your answer	<p>The proposal to allocate a 1,500 homes strategic housing allocation at NE Thatcham risks "putting all eggs in one basket" such as have been experienced with the strategic allocation at Sandford.</p> <p><i>Para 6.58</i> The statement "the new revised settlement boundary will be defined following the studies and work identified in the previous stage" leaves an unacceptably large degree of uncertainty. It would also make it difficult to resist planning applications for dwellings on the site past the 1,500 specified in this LPR.</p> <p>The proposed site is some distance from the town centre and the railway station. This means that journeys are much longer for private cars. This site is not therefore sustainable</p> <p>This proposed strategic housing allocation would adversely affect Theale as it would greatly increase the level of traffic. More vehicles would head east along the A4 to Reading and to the M4. This would lead to increased, unacceptable, congestion in Theale, particularly with the A340, Hoad Way/ Waterside Drive, and at M4 Junction 12. There are already significant delays emerging from Waterside Drive onto the A4 in the evening peak (TomTom mobile phone derived data for April 1-4 2021)</p> <p><i>Air Quality Assessment</i></p> <p>The Air Quality Assessment has not been revised to take account of the change in the number of dwellings in the plan period stage to 1,500</p> <p><i>Transport Model</i></p> <p><i>The West Berkshire Transport Model has not been revised to take account of the change in the number of dwellings in the plan period Reg18 stage to 1,500</i></p> <p><i>Site population is based on the existing population of Thatcham from the 2011 census, which is 11 years out of date</i></p> <p><i>Section [app C section 2.6] states: "TRICS selection data includes: Land Use Class: 03 Residential" whereas Policy SP10 states:</i></p> <ul style="list-style-type: none"> • <i>Local centres providing local retail facilities and small-scale employment for community use (approximately 1,100 sq. metres Class E and F2);</i> • <i>450 sq. metres GP Surgery to be offered to the Buckinghamshire, Oxfordshire and Berkshire West Integrated Care Board or other such appropriate body;</i> • <i>Early years provision;</i> • <i>A 2.5 FE primary school on site and sports infrastructure requirements of the school, land to be provided and build costs to be met by the applicant;</i> • <i>Secondary provision - Land to meet the impact of the development. The nature and cost of the mitigation will be informed by a feasibility study, undertaken at the applicants expense and prepared in collaboration with the Council and local stakeholders;</i> • <i>1,200 sq m community indoor facility to be used for sport and community uses with a variety of room sizes (current uses will generate significant extra traffic, which will not be included in the TRICS modelling because of the policy SA/SEA App entries 3a & 5 5b</i> <p>The policy will NOT improve access to education, health and other services as the education services it would provide are not on site</p> <p>The policy will NOT have a positive impact on landscape character as it will cause green fields to be built on</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	<p>The allocation should be significantly reduced or removed.</p> <p>The new settlement boundary should be drawn for the site in this LPR.</p> <p>The Air Quality Assessment should be revised to take account of the change in the number of dwellings in the plan period</p> <p>The Transport Model should be revised to take account of the change in the number of dwellings in the plan period from 1,500 to 1,000</p> <p>Transport Model should be re-run with population based on the 2021 census and required mitigations reviewed</p> <p>The transport model needs to be revised to include traffic generation from these land uses and any necessary extra capacity</p> <p>The effects of the policies on SA Objectives should be changed from positive to negative and the sustainability of the plan should be reviewed</p>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable	No

<p>over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>The main thrust of my representations are made against the tests of soundness as set out in paragraph 35 of the NPPF. For the reasons set out within my letter I consider that the plan is unsound and fails against each of the tests as set out in paragraph 35 of the framework in numerous areas of the plan. The failings against the tests of soundness are set out in each of the subsequent sections of my letter.</p> <ul style="list-style-type: none"> • The LPR is not positively prepared and would not achieve the goal of sustainable development for WBC and the wider Thatcham area. • The LPR is not justified. Many of the grounds for assessment of impacts and benefits lack credibility and is not based on available evidence. Reasonable alternatives have not been adequately explored and there is no basis to demonstrate that the allocation of North East Thatcham represents an appropriate strategy for WBC. • The LPR is not effective. There is no evidence that the development of 1,500 homes at North East Thatcham is deliverable within the plan period. • The LPR is not consistent with national policy. In many instances the allocation for development of North East Thatcham under policy SP17 would directly conflict with national policy, particularly in relation to landscape character and impact upon the AONB. • The process of assessing the impact of development under policy SP17 through the sustainability appraisal is fatally flawed and is not a matter which can be easily remedied through modifications to the plan. • The process for selection of North East Thatcham as a development site is severely flawed and lacks evidence <p>The information available to support the current consultation (Reg 19) being undertaken on the Local Plan has several major flaws.</p> <p>These include:</p> <ul style="list-style-type: none"> • The housing numbers for northeast Thatcham – positioned in Reg 19 as a reduction from 2500 dwellings to 1500 - is not correct. The Regulation 18 Consultation envisaged that only 1250 dwellings would be built in the plan period, and this has increased to 1500. The 1500 number is stated as both a minimum and an approximate number and the supporting studies are still based on an eventual size of 2500 dwellings. The number of homes proposed for this site could therefore be increased to the original 2,500 when the Plan is reviewed after 5 years or in the next plan period. • The update of the Housing and Economic Land Availability Assessment (HELAA), which was published only on 20th January 2023, includes a large number of sites that have been added since the last update, and which have been rejected. The WBC process is that the HELAA is at the start of the process not the end. • The Air Quality Assessment that is part of the consultation documents is based on the LPR running to 2037, not to 2039 which it now should do. This affects the traffic levels forecast for the end of the LPR period and the resultant traffic pollution. • There is no evidence WBC has complied with its legal duty to cooperate with Berkshire West Clinical Commissioning Group concerning the size of the GP surgery promised for north east Thatcham. • There is no evidence that WBC has consulted properly with Thames Water over the time needed for provision of water and foul drainage, and therefore it does not know if the houses for north east Thatcham are deliverable in SP17 in the plan period. • The Settlement Boundary background paper shows the Thatcham settlement boundary already extended to the line needed for the original 2500 houses, yet the plan now refers to a minimum of 1500 houses – this could be read that 2500 dwellings is still suitable and can be developed within the extended boundary. • The new provision for secondary schools in north east Thatcham is not consistent with WBC guidelines for the minimum viable size of a secondary school. If the primary provision is 2.5 Forms of Entry, then so presumably is the secondary provision to meet the impact of the development. A Council policy 2013 states that the minimum viable size for a secondary school is 4 Forms of Entry. • The Secretary of State's Written Statement of 6th December 2022, which removed the need to maintain a 5-year housing supply for Local Authorities with up-to-date Local

Plans, removed top-down housing targets (particularly for Local Authorities with constraints like AONBs etc.) and gave a two-year transition period for LAs in the final stages of preparing Local Plans and this statement should be taken into account by WBC.

Site Selection Process

- Lack of evidence on methodology to select North East Thattham.
- Obviously made following decision to no longer allocate the garden village at Grazeley. Lack of reference to this.
- Selection of Site at North East Thattham would lead to development in the countryside and important Strategic Gap between Thattham and Bucklebury would be lost.
- WBC resisted previous application for development at Siege Cross. Lack of consistency to approach here.

Sustainability Appraisal

- Lack of justification for conclusions to the Sustainability Appraisal on impacts from development.
- Lack of any consideration of reasonable alternatives to development on other sites.

Because of these points, and many more, the Reg 19 LPR Submission in its entirety should be considered as unsound.

The site will be masterplanned and delivered as a whole to achieve a comprehensive development. It is highly surprising that Masterplanning is yet to take place for the site and that there is no vision for how the homes will be accommodated on the site. The provision of all infrastructure, services, open space and facilities will be timely and co-ordinated. The Thattham Strategic Growth Study provides guiding principles for the delivery of the site therefore proposals will demonstrate that these guiding principles have been positively responded to. There is no detail on the infrastructure or other facilities. It is also clear from the viability work undertaken that the infrastructure has not been costed adequately and there is no available evidence that the site is deliverable.

Specific Objection: Traffic

Bucklebury Parish Council commissioned a Traffic Study and this was undertaken by Yes Engineering. The Headline Conclusions of the Study are:

- The trips rates used by WBC are unreliable and not robust.
- The trip distribution is unrealistic (all evidence suggests traffic will be diverted from the A4).
- The mitigation measures are improbable at best.
- The location of site means car-borne travel will dominate.
- Significant impact on highway network.
- Unsustainable location with limited alternatives to car use.
- Likely to lead to rat running through the village to access M4.
- Highway network in the vicinity of Thattham Northeast is already over capacity.
- No assessment has been made of the routes most likely to be affected by an increase in traffic.
- Increase in traffic through Bucklebury will pose highway safety issues.
- SID studies have shown most of the Upper Bucklebury main routes are already above the ACPO action levels for speeding

Specific Objection: Infrastructure

Thames Water have raised capacity concerns regarding this proposed Thattham development.

Specific Objection: Heritage Impact

- The allocation at North East Thattham surrounds the Grade II listed Colthrop Manor.
- There is no evidence that the WBC has taken into account the setting or significance of Colthrop Manor as a designated heritage asset in the allocation of North East Thattham nor has WBC considered the impact of the development or the way in which the capacity of the site would be affected by it.
- A Mineral Resource Assessment (MRA). A Historic Environment Strategy to demonstrate how the listed buildings in the area will be conserved and how the impact of the development on their settings has been considered. Consideration of heritage impact should have been undertaken as part of the site selection process and subsequent assessment of site capacity. It is not considered appropriate that this is left to later stages of the planning application process. A Construction and Operations Management Plan (COMP) shall accompany any planning application on the site. The COMP shall safeguard the oil pipeline from operational works, including the provision of an appropriate buffer. The Oil Pipeline is shown in figure 39 of the Thattham Growth Study and runs along the entirety of the southern boundary and there is reference to a 6m easement either side. Assuming that this also includes a restriction on building roads then this could lead to significant impediments to the implementation of any development on the site.

Specific Objection: Climate Change and Flood Risk

- The proposal allocates two bullet points to “Net Zero Carbon Development” and again is woefully inadequate in this area. There is no evidence that a net zero carbon development would be viable or has been costed as part of the viability appraisal produced for the site.
- Flood risk is a significant threat to Thatcham, and lack of evidence to suggest this has been adequately considered. The recent severe Thatcham flood started well above the site and were already a river at the top level of the development on Harts Hill Road from my own personal experience of the event.
- It is unclear how any development on this site would deliver a ‘net gain’ for Thatcham Town in terms of drainage and there is no allowance for this within the viability report for the site.

Specific Objection: Environmental Issues

Bucklebury Says No has identified a number of serious environmental threats posed by the proposed Thatcham North-East strategic development site (SP17). These include:

1. Collateral damage to the Bucklebury Plateau Biodiversity Opportunity Area and its ancient woodlands and heaths, in particular the Common;
2. Siting a major greenfield development in the broader landscape setting of the North Wessex Downs AONB that will forever impair enjoyment of the open countryside by local communities;
3. Causing detrimental impacts to legally protected wildlife known to be present on the site but assuming that sufficient mitigation measures can be taken after development e.g. through the vague promise of a ‘community park’.

Taken together, and after a thorough professional review of the background documentation provided by WBC in support of the draft LPR, I conclude that there is no evidence to support claims that SP17 will have a positive impact on the environment. By contrast, there is every reason to believe it will have a significantly negative impact.

For example, the WBC states in the LPR that a Sustainability Charter is required to establish how ‘policy requirements will be achieved’ (including the legally required biodiversity net gains and the anticipated overall positive impact on environmental sustainability). It maintains that the Charter ‘will be informed by’ various strategy documents (including one on ecology). Yet, the strategy documents either do not exist or have not been made publicly available for the Regulation 19 consultation.

Green Infrastructure The site will provide a comprehensive green infrastructure network which will take advantage of the landscape features of value within and around the site. This network will comprise: A new community park linking Thatcham to the North Wessex Downs AONB; Greenways which connect through the site to the park, facilitate connection to the AONB, and include leisure routes accessible to all users; It is unclear why links to the AONB are being encouraged as part of the proposed allocation. Given the sensitivity of the common and the wider AONB then impact through an increase in access should not be encouraged. This is expanded on within further sections of these representations.

They estimate that at least 4,000 people will be concentrated in the development site. They of course must have access to green space for recreation and general wellbeing. I do not believe that the claimed provisions for green space will satisfy this demand on site. The original Thatcham Growth Plan had a vague proposal for two ‘country parks’ spaced across the top of the slope, inside the Biodiversity Opportunity Area, claiming the potential for significant biodiversity enhancement over its current land use. No details were provided about how they would be formed. Our own feasibility study showed the complete lack of preparation for such country parks, not least that they should be merged, and properly managed and funded to deliver that stated biodiversity enhancement. Now, in the updated SP17 text, the country parks have been downgraded to undefined ‘community parks’ which only proves how little commitment WBC has given to protecting the natural environment and public enjoyment of it.

Since SP17 has no proven plans for providing adequate green space and protecting biodiversity, there will inevitably be spill-over of people visiting adjacent areas.

Indeed, the LPR states its intent for SP17 to drive additional traffic (people and cars) into the AONB. It provides a green infrastructure network which will ‘take advantage of the landscape’ to ‘facilitate connection to the AONB, and include leisure routes accessible to all users.’

Meanwhile, the management vision for Bucklebury Common is explicitly focused on not increasing human pressure on the fragile ecosystems they are working to restore and nurture.

In fact, the LPR’s own Sustainability Appraisal accepts that SP17 will have a negative impact on environmental sustainability: ‘The site is a greenfield site and therefore, would result in a negative impact on environmental sustainability which would need to be mitigated.’ But there is no detail whatsoever on any such mitigation measures: the assumption is simply that they will somehow be found during the planning application process.

However, the very same Sustainability Appraisal suggests that the SP17 policy is likely to have an overall positive impact on sustainability – largely by absurdly ignoring the environmental consequences in favour of social and economic benefits that are anyway highly questionable (see other articles herein).

The overall thrust of the SP17 policy is clearly to build as many houses as possible in a small area of countryside, while making empty promises about how the environment – human and natural – will be improved or, if not, mitigated. Despite all the money spent on consultants to prepare the housing plans and justify the ‘growth’ requirement, there is no evidence of any serious attempt to investigate, analyse and systematically address the consequences. Everything will be all right because their own unsubstantiated policies say it will be.

Specific Objection: Ecology / Biodiversity Impact

- Significant impact on ecology / biodiversity as a lack of proposed allocation.
- The land immediately adjacent to the proposed development area for SP17 contains 41 Local Wildlife Sites and is part of the Bucklebury Plateau Biodiversity Opportunity Area.
- The data being used to establish the presence of species is out of date. In 2020, Bucklebury Parish sought environmental records for the 41 LWSs impacted by SP17:
 - 80% of surveys were conducted more than 15 years ago
 - 50% were more than 20 years old
 - 44% were over 30 years old
- BPC has appointed ecologists to conduct an independent study of the impacted area. The findings from a single day walk on public access routes indicated that the site had a much higher biodiversity value than previously appreciated, including the presence of seven species of threatened breeding birds and one threatened migratory species, several bat species and abundant badger setts. The hedges, old trees and gullies served as important corridors linking up different habitats within and beyond the site boundaries. These initial findings imply that a full study will show the required mitigation measures and BNG will be far more complex for the development than was anticipated by the planners.
- This one study has provided more information about the site than has been presented in the whole the LPR and its available evidence base. The area has a much higher biodiversity value than assessed by WBC.
- Protected species are present across the site and will be impacted. No detail on mitigation measures has been presented by WBC. Critical habitat network features are under threat from the development and will severely impact distribution of key species.

Specific Objection: Landscape and Character Impact

- Significant impact to character of landscape – not adequately assessed by WBC
- Development would have significant impact on AONB and is in the direct setting.
- Development would lead to increase in visitors to the common.
- The proposed country park is inadequate and lacks justification.
- A Lighting Strategy which will include consideration of dark skies, particularly in relation to the nearby North Wessex Downs AONB, and measures to mitigate the impact on biodiversity. It is clear from the wording of this section of the allocation policy that WBC accept that the site is within the setting of the AONB and that there will be an element of harm (in respect of lighting) which requires mitigation. This position conflicts the position in the Sustainability Appraisal which assesses the impact as being neutral in this respect. It is considered that the harm to the AONB extends to a far greater impact than just lighting and is a severe failing in the conclusions of the Sustainability Appraisal.
- A Landscape and Visual Impact Assessment (LVIA) in accordance with the Landscape Institute Guidelines for Landscape and Visual Impact Assessment 3rd ed. 2013. This will inform the final capacity, development, design and layout of the site and requirements for green infrastructure and the provision of public open space. The LVIA will be informed by the Landscape Sensitivity Assessment (2021) of the site. Given the highly sensitive location of the site it is highly surprising that an LVIA has not already been carried out for the proposed allocation.

Specific Objections: Schools Provision

The provision for education from Nursery, Early Years, through Infant to Secondary education is not clearly defined within the Local Plan Review (LPR). There is no coherent end-to-end plan: this therefore breaches the Council's obligations to provide education facilities for children. Without this provision, the Plan for a large new housing development is untenable.

The lack of a coherent Plan on Schools Provision across the various proposed developments also means that it is impossible to estimate the subsequent impact on traffic. The siting of a secondary school to the NE of Thatcham would result in a significant increase in traffic across the whole Thatcham area, not considered in the traffic plans and models in the LPR.

Pre-secondary School Provision:

There are no details in the LPR of the provision for Nursery or Early Years education. Policy SP17 NE Thatcham Strategic Site Allocation, merely states that 'the site will provide Early Years provision'.

The provision for Primary school education is unclear and contradictory. There is no data or evidence on the planned numbers of schools or Form Entry requirements. The LPR proposes that the sum of £12 million be contributed by the developers to primary education. However, with no recent data available (the only data referenced is from 2011), it is impossible to assess if this is sufficient. It also does not state the timing of this funding or school place provision. Clearly, schools need to be available before houses are built.

Secondary Education Provision:

The current situation for secondary school students from Bucklebury is that they have a choice of either The Downs School or Kennet School as they are in the catchment area for both.

Where schools are oversubscribed those children who live nearer to the school are given precedence. This means that children from the proposed NE Thatcham development would be able to opt for Kennet and those from Bucklebury would then be limited to The Downs.

The LPR is inconsistent, incomplete and contradictory on the provision of secondary schooling in and around Thatcham. It proposes that the sum of £15 million be contributed by the developers to Secondary Education. There are no details of the location of the land to be provided and hence no possibility of assessing its suitability.

The Thatcham NE development plan 2020, produced by David Locke Associates and Stantec on behalf of WBC, proposes funding for a 6-8FE (Form Entry) secondary school, half-funded by developer contribution.

Government guidelines are that Secondary Schools with less than a 6FE are not sustainable.

However, the Development Plan states that the NE Thatcham development (which proposed 2,500 houses), is not sufficient to fill a 6–8 FE school:

Specifically

- 5.18 Provision of a new secondary school in North East Thatcham is an essential part of enabling growth in the town. However, the scale of growth proposed is not sufficient on its own to fill a 6-8FE secondary school.
- 5.19 Secondary schools need to be of sufficient scale to make them sustainable and able to provide suitable facilities for their students, so it is not considered feasible for a new school to be smaller than 6FE.
- With an apparent 40% reduction in the housing allocation in the 2023 LPR (2022 to 2039) to 1500 houses, a secondary school simply cannot be sustainable in this location.
- Earlier in this same Thatcham NE Development Plan it was noted that the education provision exercise was based on WBDC data on pupil yield from a study in 2011. Clearly the use of 11 year old data is inadequate. The Development Plan states:
- 4.83 This study has not engaged in a detailed demographic prediction and modelling exercise to determine future primary and early years educational demand across the town, and has not attempted to predict the long-term capacities of existing schools. Inevitably educational provision will be examined in more detail as any development comes forward.
- The LPR Review to 2039, Policy SP17, now states that land (but not the Secondary school itself) will be provided for the development.

In summary, it is therefore clear that the plan for secondary school provision is 'unsound' :

- there is no satisfactory evidence of the number of pupils the school is to cater for;
- the location of a school is not clear;
- the number of Form Entries is not defined, but it is noted that anything less than a 6FE school is unsustainable;
- the timing of the funding is not clear; and
- there is no evidence that the proposed funding is sufficient to meet the Council's obligations to provide education.

Conclusion on Schooling :

West Berkshire Council, as an education authority, has a duty to make arrangements for suitable school provision. How this obligation will be met across all school years is not defined or evidenced in the LPR.

Specific Objections: Sports Fields Provision

The LPR talks of the provision of sports fields. This raises two issues not answered in the LPR:

- Sports fields require flat ground. The only flat area of ground in the proposed site is that which is closest to the A4 and therefore in an area with the most traffic fumes.
- There is no funding earmarked for these facilities.

Although unclear, the LPR appears to assume that the school playing fields would also be available as Sports Fields. If the school itself is not viable, then the playing fields will not materialise. Additionally, many schools are reluctant to open their playing fields to the public due to safeguarding and other concerns.

Outdoor formal and informal sports pitches and areas to meet the identified need of the development; Open space to meet the needs of the development in accordance with Policy DM41; Given that most of the site is on a gradient it is unclear how formal or informal sports provision will be brought forward on the site.

The objective of WBC and the North-East Thatcham Development Consortium to provide sports fields has not been met as they have not provided evidence for funding or for a suitable location.

Specific Objections: Healthcare provision

The North-East Thatcham development plan (SP17) proposes a 450 sq m primary healthcare facility with the suggestion that a GP Surgery be offered to the Buckinghamshire, Oxfordshire and Berkshire West Integrated Care Board or other such appropriate body. However, the document is bereft of detail or insight into strategic healthcare planning.

- Proposals for a major development that is likely to have a significant health impact in relation to its size and location, should be accompanied by a fit for purpose Health Impact Assessment (HIA) in accordance with the current guidance from Public Health England. The HIA should include reference to how the proposals for development have been discussed with health service providers regarding impacts on primary health care services. The development proposals should demonstrate how the conclusions of the HIA have been considered in the design of the scheme because an unacceptable impact on the health and wellbeing of existing or new communities will not be permitted. It is of concern that neither WBC nor the developers, as public and private stakeholders respectively, appear to have arranged or published a prospective HIA specific to the proposed North-East

Thatcham development.

- Tackling health and wellbeing requires a multi-agency approach. The Berkshire West Health and Wellbeing Strategy 2017-2020 2021-2030, has been developed by the Reading, West Berkshire and Wokingham Health and Wellbeing Boards together with the Berkshire West Integrated Care Partnership. Developers are encouraged to engage with the healthcare providers at the earliest opportunity in order to determine the health care requirements associated with new development. It is of concern that there appears to have been no direct engagement between the North-East Thatcham Development Consortium and local general practices.
- Few new GP practices are commissioned by NHS England, even where they consider there to be patient demand for improved services. NHS Digital figures of patients registered in the NHS Berkshire West Clinical Commissioning Group (CCG) confirm there is an even worse shortage of GPs in other areas of the country. There is therefore no realistic prospect of a new GP practice being established in Thatcham or West Berkshire in the foreseeable future.
- GP practices look to create efficiencies and economies of scale to make general practice more financially sustainable and to increase access and extend the range of services and primary healthcare professionals available on a single site. It would make no financial, organisational or geographic sense for an existing local GP practice to set up a branch surgery on the proposed new development because of the additional administrative, computing and staffing costs and encumbrance working across two sites.
- There has been no approach by WBC or the developers to any local GP practice to discuss an appropriate site, floor-space or location to which one or more practices could relocate. An enlarged primary healthcare site is required and might be better located close to the middle of Thatcham to improve access and minimise traffic as the proposed NE Thatcham development is peripheral to the centre of the population. This would be likely to be supported by Thatcham Town Council but has not been suggested in the sustainability appraisal of site options. Local practices did not have input with the inadequate 450 sq m floor size proposal which they only discovered with the SP17 Policy of December 2022, Appendix D.
- The proposed North-East Thatcham development site is covered by the existing practice boundaries of Thatcham Medical Practice (west of Harts Hill Road), Burdwood Surgery (east of Harts Hill Road) and Chapel Row surgery (the whole area). All three practices are already overstretched. The two Thatcham doctors' surgeries run independently of each other, and their combined lists include approximately 27,800 patients that equates to just under 2,000 patients per GP. Newly registered patients moving into housing developments tend to make a greater demand on GP services because there are more young children, a higher maternity workload, less local extended family support and there is initially a higher housing turnover. One permanent and repeated temporary pharmacy closures in Thatcham have further exacerbated pressure on primary care locally.
- Thatcham dental practices are unable to provide dental care for the whole population with a significant minority of patients needing to travel further afield for NHS and private dental care. Thatcham Vision, endorsed by WBC in 2016, confirmed only 60% of residents were registered at a Thatcham dentist (with 17.5% registered with a doctor outside Thatcham). There is no evidence provided that either WBC or the developers have approached any local dental practices regarding the potential impact of increased workload resulting from additional housing.
- Reviewing the scanty healthcare recommendations within the Thatcham Strategic Growth Study (David Lock and Associates) - Stage 2: Thatcham Present, paragraph 4.10 states: 'A dialogue with the relevant healthcare and education agencies should be established early in the master planning process to address concerns that social infrastructure may not be provided.' The Stage 3: Thatcham Future report published in September 2020 includes no further detail except the outcome of a community representatives' workshop, that the existing GP facilities are at capacity and suggesting a new health centre.

Conclusion:

WBC and the developers appear to have neither arranged a relevant HIA nor provided evidence of having appropriately liaised with local health care agencies or providers. They are proposing a healthcare site that is unsuitable for NHS primary care and so have not made provision to mitigate the burden that 1,500 or more new houses will make on a local NHS struggling to cope. The objective of WBC and the North-East Thatcham Development Consortium to improve access to the health service component of community infrastructure has not been met as they have not provided evidence for the provision of a viable primary care medical facility.

I trust that my comments are considered and that the proposed Thatcham NE Development in the LP is considered unsound.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?

- * Yes
- * No

No

Please give reasons for your answer

Consultation and Duty to Co-operate

- Lack of evidence that WBC have complied with duty to consult with local residents and take representations into account.

4. Proposed Changes	
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where	

<p>practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>Transport</p> <p>Additional housing will increase traffic on roads around Thatcham, Upper Bucklebury, routes into Newbury, Reading and Basingstoke (using the level crossing). 1,500 houses will bring upwards of 3,500/4,000 new residents into the area. There will be around 1,300 for single car families and 2,000 extra vehicles for 2 car families (not taking into account teenagers and young people) a heavy extra burden on our already busy roads. I realise that the public is being asked to consider other ways of travel and public transport, but this is not a totally practical mode of transport for all. The inevitable increase in traffic through Upper Bucklebury on the village and safety issues especially regarding the local school. Harts Hill is a dangerous road and increased traffic will be so. Cycle routes along the A4 are not used to the extent that perhaps the Council thought they would be and I believe a lot of money has been spent unnecessarily here. I doubt that anyone, unless really fit would want to cycle up Harts Hill and back down. If an average of additional 2,000 car journeys are made from this development, then the increase in traffic movement is going to be excessive for the area. Increased traffic wanting to use the Thatcham level crossing, Basingstoke and the Newbury retail park will create even more congestion in that area. No consideration has been given to alternative sites, ie Colthrop with a new bridge over the railway line and canal.</p> <p>Local Services</p> <p>No consideration has been given to the increased pressure on Schools, Dentist and Doctors surgeries. We are all struggling with appointments for Dentists and Doctors, which was proven recently when Thatcham Health Centre and the Burdwood Health Centre had no new doctors or dentist accommodation will be built until building is well underway/or finished so excessive pressure on Schools and schooling will suffer badly with this increase in numbers of pupils. As quoted in the residents newsletter "The plan as to how the necessary supporting infrastructure will be achieved to accommodate the increased local population is not even adequate for the present population."</p> <p>Car Park on Harts Hill</p> <p>Why is an access and car park proposed on Harts Hill? What purpose does it serve? This will only encourage more cars and is definitely not suitable for heavy traffic especially when approaching Upper Bucklebury.</p> <p>The car park could encourage night time antisocial behaviour which is apparent in various car parks on Bucklebury and in the Alternative Sites/General</p> <p>How much consideration has been given to alternative sites, for example Colthrop and looking at potential brown field sites over a wider area but still achieving the same number of additional housing and making the local supply of supporting infrastructure with the recent pandemic and high numbers of the employees working from home, the council could also look at converting into residential properties without having to build on vast acreage of countryside. This could also encourage our town to grow again. Vodafone have recently downsized their HQ from seven buildings to four by virtue of people working from home.</p> <p>Within the past ten years an application for 700 houses was put before the council at the bottom of Harts Hill adjacent to the railway line. The council refused this application, although I understand it went to appeal but nothing happened. Why is WBC now giving its approval for an increased numbers of housing?</p> <p>There is also a proposed development at Sandford, which I believe was approved but where nothing has happened and developers cannot seem to agree on access why can this not be resolved and progressed?</p> <p>Countryside and Wildlife</p> <p>Building 1,500 (at least) residential properties abutting an AONB will have detrimental affect on the current wildlife. It will be towards Upper Bucklebury and beyond, and no doubt there will be more wildlife killed on the roads with the increase in traffic.</p>

	<p>range. Is the council going to have full audit of what wildlife is within the area so that any rare or low numbers of flora or any potential building commences?</p> <p>Flooding</p> <p>Has any account been taken into consideration about flooding if this development goes ahead? Harts Hill to Upper E see that in recent years with higher and heavier rainfall that these residential properties will be liable to flooding as wa The current flood alleviation schemes are nowhere near Harts Hill so these sites will not have any beneficial help.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>

<p>1. Do you consider the Local Plan Review is legally compliant? * Yes * No</p>	
<p>Please give reasons for your answer</p>	N/A
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>Appendix 2 of the draft Local Plan defines Settlement Boundaries as follows: "They identify the main built up area of a settlement and is considered acceptable in principle, subject to other policy considerations."</p> <p>This definition creates a presumption in favour of development unless this would conflict with policies within the Local Plan. The area for housing will in any case need to be reduced from what was envisaged in the Strategic Growth Study, in line with the densities defined in the West Berkshire Density Pattern Book. The settlement boundary needs to reflect this.</p> <p>Appendix 2 states that "Boundaries will exclude: Recreational or amenity open space which extends into the countryside in form and nature. This includes designated Local Green Space." The map on page 65 shows three areas of "Local Green Space" adjacent to the 'site boundary'. These are clearly 'recreational or amenity open space' – so must be outside the settlement boundary. There is no supporting evidence to support their location and size – so their position on the map must be considered incorrect.</p> <p>Paragraph 6.58 of the draft Local Plan states: "The new revised settlement boundary will be defined following the settlement boundary policy at the application stage."</p> <p>The 'red line' boundary map of the map on page 65 of the draft Local Plan is described as the "North East Thatcham settlement boundary" of site THA20. However, this same boundary has been incorrectly transferred to the Policies Map and shown in map 1. The settlement boundary on the Boundary Review paper as the settlement boundary.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	

Please give reasons for your answer	N/A
4. Proposed Changes	<p>The term “settlement boundary” is not used in legislation or Government guidance on planning. There is therefore no mention of a settlement boundary in a Local Plan to fall within a settlement boundary. It is clearly premature to specify any new settlement plan, and in any case, this is not the purpose of the draft Local Plan.</p> <p>The map on page 65 of the draft Local Plan provides a way forward, because it shows the boundary of the site, rather than the settlement boundary. (i) Paragraph 6.58 needs to be modified as follows: “The new revised settlement boundary will be defined <u>within the ‘Neighbourhood Plan’ in the accompanying map,</u> following the studies and work identified in the policy for a development of at most approximately 100 dwellings at the application stage. <u>The settlement boundary will exclude any country park or public open space on the edge of the development.</u> (added text is underlined)</p> <p>(ii) The settlement boundary on the Policies Map needs to be restored to its current position – along Bath Road and Floral Way. Paragraph 6.58 of the draft Local Plan.</p> <p>(iii) A revision of the document ‘Settlement Boundary Review (SBR) December 2022’ needs to be published, in which the settlement boundary is shown to show the settlement boundary in its current position – along Bath Road and Floral Way.</p>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	<p>Thattham Town Council is the principal representative body of the community in thattham, and is the location of only new strategic site allocation in the draft Local Plan. The development for development is reliant on having adequate infrastructure. However, the residential development promised in the current Local Plan has not materialised, and would not be delivered if the policies in the draft Local Plan. The Town Council can provide local insight to the development in Thattham, and particularly on the substantial deficit of infrastructure in the local area. I am happy to elaborate on its other concerns about the current proposals for the Strategic Site Allocation, as described in these representations.</p> <p>The Town Council anticipates that changes necessary to the draft Local Plan in relation to the allocations are greater than could be addressed through ‘main modifications’. If the Council is minded to consider recommending ‘main modifications’ to policy SP17 and related Policies, it would welcome the opportunity to provide its perspective on what is required.</p>

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	The emerging draft Local Plan (December 2020) stated at paragraphs 6.12 and 6.13: “... assuming that 1,000 homes are deliverable at Sandlford Park by 2037 (with the remaining 500 in the next plan period.” “This includes the strategic allocation at North West Thatcham for up to 2,500 homes where delivery of at least 1,250 homes is expected over the plan period.” (at that time, the expected plan period was 17 years from 2020 to 2037)

	<p>The Local Plan Submission draft (January 2023) states at paragraph 6.22: “additional housing supply on newly allocated sites ... includes the strategic allocation at North West Thatcham for u period.” (at this time, the expected plan period is 17 years from 2022 to 2039).</p> <p>No justification is provided for the increase from 1,250 to 1,500 in the number of dwellings anticipated to be delivered. The proposals for North East Thatcham are less well developed in 2023 than the proposals for Sandford Park were, and only 1000 of the 1,500 dwellings at Sandford Park could be delivered in the plan period.</p> <p>Policy SP17 expects that numerous Charters, Strategies and Plans will need to be prepared – and approved by Wes before development can commence. None of these were mentioned in the Regulation 18. The preparation of these documents is a significant constraint on the rate of housing delivery.</p> <p><u>The constraints of water supply and treatment on the rate of housing delivery</u></p> <p>The increase in the number of dwellings from 1,250 to 1,500 proposed for the 17 year plan period and the delay in the plan period will increase the rate of increase in demand for water supply and water treatment, compared to SP17 at Regulation 18. In 2018, Thames water said that “the scale of development/s in this catchment is likely to require upgrades of both the water supply and treatment works”.</p> <p>The West Berkshire Water Cycle Study – Phase 2 recommended that West Berkshire Council “Consider the need for additional infrastructure when selecting sites for allocation in the Local Plan Review” and “consider the available Waste water Treatment Works capacity for development going to the same WwTW. Otherwise, the rate of housing delivery might be constrained by the delivery of additional infrastructure upgrades.</p> <p>Paragraph 5.38 of the Duty to Cooperate Statement (January 2023) is only a very superficial comment that does not address the issue is being addressed.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	N/A
4. Proposed Changes	West Berkshire Council either needs to provide evidence of the deliverability of 1,500 dwellings at North East Thatcham or reduce this housing allocation to what is deliverable (the assessment in the HELAA relied on the opinion of the site promoter).
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	<p>Thatcham Town Council is the principal representative body of the community in the area. The location of the Strategic Site Allocation is the location of only new strategic site allocation in the draft Local Plan. The need for development is reliant on having adequate infrastructure. However, the infrastructure promised in the current Local Plan has not materialised, and would not be delivered by the policies in the draft Local Plan. The Town Council can provide local insight to the examination of the draft Local Plan, and particularly on the substantial deficit of infrastructure in the local area. The Town Council is happy to elaborate on its other concerns about the current proposals for the Strategic Site Allocation, as described in these representations.</p> <p>The Town Council anticipates that changes necessary to the draft Local Plan in relation to the Strategic Site Allocation are greater than could be addressed through ‘main modifications’. If the Council is minded to consider recommending ‘main modifications’ to policy SP17 and related policies, it would welcome the opportunity to provide its perspective on what changes are required.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	The viability of the provision of Secondary Education should have been considered as part of the Sustainability Appraisal. Education and skills is identified in the Sustainability Appraisal as a 'Key sustainability issue' under the social category 5 is clearly not an adequate assessment, and appears to have been written without any consideration of the specific impact of the policy. "The policy is likely to have a positive impact on accessibility community services and facilities, including education provision and other services/facilities". The Sustainability Appraisal is clearly not legally compliant, because it does not appraise for Policy SP17 what has been done for sustainability.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based	No

<p>on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>Policy SP17 in the Regulation 18 emerging draft Local Plan (2020) stated: “Development of the site will be expected to deliver: A new secondary school (8FE) and the sports infrastructure required to support it.” However, in Policy SP17 of the Regulation 19 consultation, this has been reduced to: “The site will provide: Secondary provision - Land to meet the impact of the development. The nature and cost of the provision will be determined by a feasibility study, undertaken at the applicants expense and prepared in collaboration with the Council and local stakeholders.” The Thatcham Strategic Growth Study states: “Although the development would only generate sufficient pupils for a 4FE secondary school, any development in the town would generate secondary capacity. When secondary education is looked at in the context of Newbury and Thatcham catchments a secondary school is likely to be necessary. Planned strategic development at this scale is the only approach that is likely to provide for a secondary school for the town, without which any growth would cause issues in provision.” If a development of 2,500 dwellings would ‘generate’ sufficient pupils for a 4FE secondary school, then a development of 1,250 dwellings would generate sufficient pupils for 2.5FE. Therefore the statement in the Regulation 19 Policy SP17 is equivalent to providing for a 2.5FE Secondary School. This is below the minimum viable size for a Secondary School. The West Berkshire Council School Places Plan 2010 states (paragraph 1.24): “In respect of major new housing developments and where the indicated pupil numbers warrant, the Council’s policy is to provide a secondary school large enough to yield viable secondary school, a six form entry secondary school will be considered as a minimum number of forms to create surplus places” This is provided as Attachment 5, and is available online at: (retrieved 20/02/2022) <See attached document PS1682 Thatcham Town Council Attachment 5_School Places Plan 2010> The Department for Education’s ‘A guide to new mainstream free school revenue funding 2022 to 2023 (June 2022)’ states: “The department will need assurance that free schools are on-course to be financially viable on opening. In order to ensure a balanced curriculum, there is a presumption that ... secondary provision (years 7 to 11) have a minimum of 4 forms entry. Financial plans are not expected to be based on fewer pupil numbers unless otherwise agreed with the department.” This is provided as Attachment 6 (see attached document - PS1682 Thatcham Town Council Attachment 6_DfE School Places Plan 2022 to 2023) online at: https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/1081008/A_guide_to_new_mainstream_free_school_revenue_funding_2022_to_2023.pdf The provision in SP17 for “Secondary provision - Land to meet the impact of the development” cannot lead to the provision of a secondary school. It is inconsistent with West Berkshire Council’s own policy for secondary education, and would not receive funding. The Town Council notes Policy SP17 also states that “proposals will demonstrate that these guiding principles [of the NPPF] have been positively responded to, and that this states that “a 6-8FE secondary is likely to be necessary”. The two provisions are contradictory. Thatcham is served by two secondary schools: Kennet School for the east of the town and Trinity School in Newbury. The Council understands that both schools are currently at full capacity, and Trinity School may in addition need to accept pupils from the proposed development that is currently under construction. The site of Kennet School is constrained, and incapable of expansion. There is no provision to serve the expected number of secondary pupils of the proposed development. The Strategic Growth Study estimated the provision of a secondary school would cost £26.4 million, which forms part of the Infrastructure Delivery Plan of October 2021 for secondary education places (including both NE Thatcham and Newbury). The Infrastructure Delivery Plan of January 2023 only has a figure of £5,027,613. This cannot be the cost of a new secondary school, as the cost of provision for secondary pupils from non-strategic sites. The Infrastructure Delivery Plan is therefore inconsistent with the Council’s policy is silent on how the building costs for a secondary school would be funded. Policy SP17 therefore does not meet the requirements of Paragraph 95 of NPPF. Policy SP17 is therefore completely unsound in relation to provision of secondary education.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	N/A

<p>4. Proposed Changes</p>	<p>It is clear that the SP17 development will not create a sufficient number of secondary pupils to support a viable secondary development. West Berkshire Council therefore needs to review the provision of secondary education in the light of construction in the Newbury and Thatcham area and those proposed in the draft Local Plan. A key element of this review is to work with the Academy Trusts for the two local secondary schools.</p> <p>The Department for Education has published guidance on “Securing developer contributions for education (November 2019) advice on ‘Safeguarding land for schools’. Paragraph 23 is especially relevant to the development of a Local Plan:</p> <p>“You may wish to safeguard additional land when new schools within development sites are being planned, to allow for the reconfiguration of schools to create a single site. ‘Future-proofing’ can sometimes be achieved informally through space adjacent to a school site. Where there is a forecast need for new school places that is not linked exclusively to a development plan can allocate specific areas of land for new schools or school expansion, and safeguard specific parcels of land for education use. Safeguarded land within larger site allocations can be made available for purchase by the local authority at a later timescale, after which the land may be developed for other uses.”</p> <p>This could be achieved through the addition to the Policies Map of a specific category of “Land Safeguarded for Education” area for a viable secondary school. As the catchment area of this school is likely to include parts of Thatcham, and particularly the optimum location for this is likely to be at the western end of the development.</p> <p>This guidance is provided as Attachment 7 (<i>See attached document - PS1682 Thatcham Town Council_Attachment 7_Contributions for Education</i>), and is available online at:</p> <p>https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/909908/Developer_Contributions_Guidance_update_Nov2019.pdf</p> <p>To make the Local Plan Review sound, it must include the provisions for a viable secondary school. The specific nature of the review on the outcome of the review called for above, which forms part of the required scope of the Sustainability Appraisal.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>Thatcham Town Council is the principal representative body of the community in the area. The location of the Strategic Site Allocation is the location of only new strategic site allocation in the draft Local Plan. The development for development is reliant on having adequate infrastructure. However, the requirements promised in the current Local Plan has not materialised, and would not be delivered under the policies in the draft Local Plan. The Town Council can provide local insight to the review of the draft Local Plan, Thatcham, and particularly on the substantial deficit of infrastructure in the local area. We are happy to elaborate on its other concerns about the current proposals for the Strategic Site Allocation, as described in these representations.</p> <p>The Town Council anticipates that changes necessary to the draft Local Plan in relation to site allocations are greater than could be addressed through ‘main modifications’. If the review is minded to consider recommending ‘main modifications’ to policy SP17 and related Policies, it would welcome the opportunity to provide its perspective on what is required.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	<p>Regulation 12 of The Environmental Assessment of Plans and Programmes Regulations 2004 states:</p> <p>“(1) Where an environmental assessment is required by any provision of Part 2 of these Regulations, the responsible person shall prepare, and submit to the authority, a report containing the following information:—</p> <p>(2) The report shall identify, describe and evaluate the likely significant effects on the environment of—</p> <p>(a) implementing the plan or programme; and</p> <p>(b) reasonable alternatives taking into account the objectives and the geographical scope of the plan or programme.</p> <p>The SA/SEA Environmental Report states:</p> <p>“The Core Strategy had a focus on Newbury and Thatcham, with two strategic sites allocated in Newbury and smaller sites in Thatcham. This mix of strategic and smaller sites across the district worked well for the Core Strategy by providing a range of sites for different types of developments across the plan period. As a result a similar mix of sites is considered to be appropriate for the LPR with strategic sites in Newbury and Thatcham and smaller sites in Thatcham.</p> <p>Regulation 12 requires the identification, description and evaluation of ‘reasonable alternatives’. If an approach works well it does not follow that it is the best approach for the following plan period – and it is certainly does not follow that there are no other alternatives.</p> <p>It is incorrect for the SA/SEA to assert that the approach in the current Local Plan has ‘worked well’ by providing ‘natural alternatives’ across the plan period. This is certainly not the case for the Sandleford Strategic Site Allocation. Policy CS3 of the current Local Plan states:</p> <p>“Within the area identified at Sandleford Park, a sustainable and high quality mixed use development will be delivered in accordance with the following parameters:</p> <p>Phased delivery of up to 2,000 dwellings, of which at least 40% will be affordable and with an emphasis on family housing; and</p> <p>planned to be delivered by 2026;”</p> <p>However, as the SA/SEA explains (pages 35-37): “no work has started at the site at Sandleford, with outline planning permission for the site only granted (on appeal) in May 2022.” The site has been re-allocated “as a single site for up to 1500 dwellings on the site allowed for better consideration of the constraints on the site (Ancient woodland, drainage, land ownership) for adequate and appropriate mitigation measures to be put in place.”</p> <p>The SA/SEA states (page 25, below the table):</p> <p>“Following the decision that the spatial strategy should focus on Thatcham, strategic site options were considered, based on the February 2020 HELAA.”</p> <p>Therefore, ‘reasonable alternatives’ that are not around Thatcham were not considered. This decision was also based on the fact that the town of Thatcham would have sufficient infrastructure to support this development, either at the time of the decision or through the delivery of Sandleford Park. The lack of infrastructure in Thatcham is addressed by other representations of the Town Council.</p> <p>The Sustainability Appraisal / Strategic Environmental Assessment (SA/SEA) for Policy SP1 cannot be legally compliant as it has not complied with the requirement to identify, describe and evaluate reasonable alternatives to the proposed policy. The lack of infrastructure in Thatcham and the delay in delivery of Sandleford Park in the current plan period (described in paragraphs 6.44 – 6.46 of the draft Local Plan) and the delay in delivery of dwellings from 2,000 to 1,500, suggest that the proposed policy for North East Thatcham is not even the best alternative.</p>
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is	

<p>consistent with achieving sustainable development.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>As explain in Section 1 above, the draft Local Plan explicitly states that no alternatives have been considered. The expected number of houses at the Sandleford Strategic Site Allocation to deliver the expected number of houses suggests that relying on two strategic sites) is not even the best approach.</p> <p>As the sustainability appraisal is not legally compliant, the Local Plan cannot be in accordance with Paragraph 32 of the NPPF.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	N/A
<p>4. Proposed Changes</p>	A new Sustainability Appraisal / Strategic Environmental Assessment (SA/SEA) needs to be undertaken, which could inform the decisions relating to strategic sites and proposed approach of Policy SP1.
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	Yes
<p>5. Independent Examination</p>	<p>Thatcham Town Council is the principal representative body of the community of Thatcham, which is the location of the site allocated in the draft Local Plan. The suitability of this site for development is reliant on having adequate infrastructure. However, the infrastructure promised in the current Local Plan has not materialised, and would not be delivered through the policies in the draft Local Plan. We would like to provide local insight to the examination about Thatcham, and particularly on the substantial deficit of infrastructure in the area. We would like to elaborate on its other concerns about the current proposals for the North East Thatcham Strategic Site Allocation, as set out in our representation. The Town Council anticipates that changes necessary to the draft Local Plan in relation to site allocations are greater than 'main modifications'. If, however, the Inspector is minded to consider recommending 'main modifications' to policy SP1, we would welcome the opportunity to provide its perspective on what modifications would be required.</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>Nature there would be a huge impact on legally protected wildlife. Great crested newts, badgers, nightjars, slow worm area, development would put them under significant threat. There are no sufficient mitigation measures or evidence promise of a country park is not a replacement for countryside. We now see that there is no country park but only in direction of how biodiversity would be enhanced. This shows WBC lack of commitment to protect the natural environment.</p> <p>Additional cars and people will be entering the AONB which will have a detrimental impact, there is no clarity on what WBC will do to protect and enhance the natural beauty, in fact it seems traffic will be directed into the AONB instead of away from it.</p> <p>Traffic –</p> <p>As WBC predict that there will be some displacement of A4 traffic onto wider rural routes such as upper Bucklebury has not been fully considered. We live down <redacted>, walking down the road with no pavement and down Broad Lane which is already dangerous. We strongly fear for our safety and feel it's only a matter of time before there is a serious accident can be hair raising during school pick up and drop off times. Our preferred method to get to school is walking, however the risks that will only be worse with increased traffic through the village.</p> <p>The studies conducted by WBC so far do not agree with an independent study by Yes Engineering. This found that; the studies are unreliable and not robust, the trip distribution is unrealistic, the mitigation measures are improbable at best, the local travel will dominate. The highway network in the vicinity of Thatcham Northeast is already over capacity and there are the routes most likely to be affected by an increase in traffic.</p> <p>Education –</p> <p>There is not a clearly defined planned schools provision. This breaches the councils obligation to provide education for all is untenable. Our children currently go to Bucklebury Primary School with a view to carrying on their education at Kennet and contradictory information on the provision of secondary schools in and around Thatcham. It seems unlikely that a provision is provided.</p> <p>Identity-</p> <p>There is simply not enough space between the proposed development and Upper Bucklebury. There should be clear boundaries would be lost with this development and Upper Bucklebury will become part of the Newbury/ Thatcham conurbation. I strongly urge you to reconsider the plans, reduce development or find alternative sites that are more suitable and in</p>

Objection to West Berkshire Council Local Plan Review 2022-2039 Regulation 19 Consultation

I wish to register my ongoing objection to the proposals set out in the West Berkshire Council (WBC) Local Plan Review Draft (LPR). I consider that the approach taken by WBC in the preparation of the LPR is flawed, conflicts with key requirements of the National Planning Policy Framework (NPPF), and as such, there are elements of the Plan that are unsound.

This submission follows on from my objections made to the previous draft of the LPR in February 2021. This raised a particular objection to Policy SP17 and the proposed development of the North Eastern Thatcham (NET).

My previous objection is acknowledged in the WBC Consultation Statement and given the reference lpr2035. However, the response provided by WBC is wholly inadequate as it fails to address appropriately the objections made. The objections remain valid, and I request that they are considered alongside the further points I raise below.

I have set out my further objections under the following headings:

1. Need for the Development;
2. Environmental Impacts;
3. Transport Impacts; and
4. Socio Economic Impacts.

Need for the Development

WBC has proposed revision of the number of homes for the NET development to approximately 1500 in the Plan period, a reduction from 2500 when in effect it is an increase in the Plan period from the previously stated 1250. The 1500 number is an approximate number and the supporting studies are still based on an eventual size of 2500 dwellings. The number has not changed and if there is a 40% reduction in housing numbers, I would expect that there should be commensurate reduction in allocation. It follows that the implication is that the remaining 1000 homes will come forward in the next Plan period. This is a significant reduction.

LPR Policy SP1 suggests that *Thatcham will be a focus for regeneration, for new housing and for improved provision of services*. Investment in the centre of Thatcham is welcomed, but initiatives that have the support of the Town Council should be in accordance with Policy SP17. There is no evidence provided that this urban extension will have any benefit for the town centre or detract from the centre if new facilities are delivered within the SP17 development as proposed. SP1 continues that *maintain and enhance the identity of Thatcham separate to that of Newbury and its surrounding rural settlements in accordance with Policy SP17*. This directly contradicts this ambition, with outward sprawl detracting from the town centre and generating unsustainable development. The greatest detriment will be the effective merging of Thatcham with Upper Bucklebury destroying the character of both.

As I set out in my previous objection, I consider WBC should revisit its assessment of housing need. There are a significant number of sites that should be prioritised for development as opposed to the entirely greenfield development at NET. The allowance for development is very cautious and this should be higher, further removing the need for the NET allocation. The updated Land Availability Assessment (HELAA), published in January 2023, includes a large number of sites that have been discounted which have been discounted. This does not provide a robust basis for the assessment of the housing need that underpins the LPR.

Paragraph 35 of the emerging draft of the NPPF states that Local Plans are ‘sound’ if they are Positively prepared – minimum, seeks to meet the area’s objectively assessed needs so far as possible, taking into account the policies in the NPPF. Particular reference is made to Paragraph 61 which states that the outcome of the standard method is an advisory statement on housing requirement for the area... There may be exceptional circumstances relating to the particular characteristics of the area which justify an alternative approach to assessing housing need.

In December 2022, the Secretary of State (SoS) issued a Written Statement that effectively removed the need to maintain up-to-date Local Plans, removed top-down housing targets (particularly for Local Authorities with a housing need) and gave a two-year transition period for LAs in the final stages of preparing Local Plans. A number of other Local Authorities have revisited their Local Plans. WBC should do the same to allow time for it to review the LPR thoroughly and arrive at a sound and less damaging set of proposals.

Environmental Impacts

As I highlighted in my previous objection, if delivered, even in a reduced form, the proposed SP17 allocation would pose significant environmental threats which include:

- Permanent damage to the Bucklebury Plateau Biodiversity Opportunity Area and its ancient woodlands and heaths
- Developing on a large swathe of farmland and green space that will have a damaging effect on the broader landscape
- Ruining Downs AONB that will forever ruin the open countryside for the local communities; and
- Causing harmful impacts to legally protected wildlife known to be present on the site without appropriate mitigation

WBC has clearly paid insufficient attention to these environmental impacts. Its suggestion that the provision of SAP17 and the provision of a community park will have a positive impact is clearly flawed. The reality is that SP17 will have

The LPR that a Sustainability Charter is required to establish how *'policy requirements will be achieved'* (including the gains and the anticipated overall positive impact on environmental sustainability). WBC maintains that the Charter 'will be included in the strategy documents (including one on ecology). However, the strategy documents either do not exist or have not been made public since the 2019 consultation.

Even at a capacity of 1500 homes the population of the new SP17 development would be around 4,000 people. This development space needs which are unlikely to be provided for on-site alone with the vague reference to a 'community park'. As such, those visiting them will inevitably be spill-over into adjacent areas.

The LPR acknowledges this stating that the intent for SP17 is to focus people into the AONB by suggesting that it will be a network which will *'take advantage of the landscape'* to *'facilitate connection to the AONB and include leisure routes'*. This is a direct contradiction with the management vision for Bucklebury Common which is explicitly focused on not increasing the number of ecosystems they are working to restore and nurture.

WBC's Sustainability Appraisal for the LPR accepts that SP17 will have a negative impact on environmental sustainability and therefore, would result in a negative impact on environmental sustainability which would need to be mitigated. However, it does not state what this mitigation might be, and it is simply unacceptable to leave this to chance in the hands of the developers.

For the reasons outlined above, I consider that the LPR is in direct conflict with the NPPF and paragraph 117 that strategic decisions should contribute to and enhance the natural environment.

Transport Impacts

The NPPF at Paragraph 104 states that transport issues should be considered from the earliest stages of plan making and that: *'the potential impacts of development on transport networks can be addressed'*. In preparing the LPR, I consider that WBC failed to meet this key requirement of the NPPF.

As I referred to in my previous objection the proposals included within Policy SP17 will generate significant amounts of traffic. This is particularly the case for vehicle movements on to the local highway network, including the narrow road that passes through Upper Bucklebury. WBC suggest that traffic from the NET development will be directed to the A4, it also acknowledges that there will be an impact on surrounding lower order roads such as Broad Lane passing through Upper Bucklebury. With a new population of circa 4,000 people, at least that number of new car movements on the road network and to suggest that this will not be the case in this local area is unrealistic. Of this, there will be the inevitable additional traffic created by those visiting or servicing the development.

The inclusion of the new junction proposed on Harts Hill linking the new development is a clear demonstration that it is not to be diverted in that direction and onto a road that passes through Upper Bucklebury that is simply inappropriate for this development. This road is inadequate, without pavements and has the potential for serious accidents. Significant disruption from an increased number of additional queuing through the village, which in turn will inevitably cause increases in air pollution, which will directly impact on the quality of life of Upper Bucklebury.

I consider that the air quality assessment prepared by WBC fails to address this. Furthermore, the document is now out of date as the LPR running to 2037, not to 2039. This affects the traffic levels forecast for the end of the LPR period and the results of WBC's high level Transport Assessment that underpins the LPR states (Paragraph 3.26) that the modelling undertaken for Harts Hill Road *suggests it will not cause problems*. However, these modelling results are not provided nor are any details of the assessment. The lack of certainty here is very worrying, so too is the lack of any detailed assessment of the significant impacts that the development will have on the road network and the lives of the existing residents of Upper Bucklebury.

The Sustainability Appraisal (SA) / Strategic Environmental Assessment (SEA) which accompanies the LPR Plan covers the impact of Policy SP17 against key Sustainability Objectives. Objective 4 is to *promote and maximise opportunities for all forms of safe and sustainable travel*. WBC concludes that the policy is likely to have a *Positive Impact on road safety as safe travel*. This assessment is fundamentally flawed as the *introduction of great volumes of additional traffic onto unsuitable local roads will have a significantly adverse impact on road safety in Upper Bucklebury*.

The possible siting of a secondary school in the proposed NET development would result in a significant increase in traffic in the area. This has not been considered in the traffic plans and models in the LPR.

In addition to the challenges faced through Villages like Upper Bucklebury, there will inevitably be further congestion at the key junctions in the area. A major bottle neck currently is the crossing at Thatcham train station. There is nothing in the LPR that seeks to address this and so the proposed development of at least 1500 new homes and the significant additional traffic will exacerbate the problem.

WBC's failure to address this is a major failing and demonstrates its lack of understanding of the issues facing the residents of surrounding Villages such as Upper Bucklebury which it would be aware of if it had engaged constructively with existing residents. This is such an ill-conceived, unsustainable, and damaging proposal though through the form of Policy SP17.

Socio-economic impacts

Healthcare provision

The Policy SP17 proposes a 450 sqm primary healthcare facility but there is no clear proposal for how this will be delivered into the existing healthcare network. A major development such as that proposed by SP17 is likely to have a significant impact on the existing healthcare network. It should from the outset be informed by a detailed Health Impact Assessment (HIA) in accordance with the current guidance. A HIA should include detail how the proposals for development have been discussed with health service providers regarding primary care services and the development proposals should demonstrate how the conclusions of the HIA have been considered to ensure it can be appropriately accommodated and to ensure that an unacceptable impact on the health and wellbeing of the community will not be permitted. I am not aware that such an HIA exists and the absence of such a key document is a key failing of the proposal.

The proposed NET development is covered by three existing medical practice boundaries, Thatcham Medical Practice, Thatcham Row surgery. All three practices are already overstretched. The two Thatcham doctors' surgeries run independently and their patient lists include approximately 27,800 patients that equates to just under 2,000 patients per GP. New residents of NET will place additional demand on GP services that the existing practices could not cope with. NHS England commissions few new GP practices, even in areas of high patient demand for improved services. There is a chronic shortage of shortage of GPs nationally and I understand from my experience with the NHS Berkshire West Clinical Commissioning Group (CCG) that this position is even worse here than in other areas.

Now more than ever, GP practices need to create efficiencies and economies of scale to make general practice more sustainable. It is not in the interests of the community to increase access and extend the range of services and primary healthcare professionals available on a single site. It would be in the best interests of the community for an existing local GP practice to set up a branch surgery on the proposed new development rather than the associated with such a move.

It is also likely to be unviable for one of the existing GP practices to relocate even to an expanded practice in NET. It would displace the surgery away from its existing patients creating greater travel demands. It is therefore highly unlikely that such a practice would be established or operated sustainably as part of the NET development.

A further healthcare issue is that the existing dental practices in Thatcham are unable to provide care for the whole population of patients needing to travel further afield for NHS and private dental care. Thatcham Vision, endorsed by WBC in 2016

	<p>were registered at a Thattham dentist (with 17.5% registered with a doctor outside Thattham). There is no evidence on local dental practices regarding the potential impact of increased patient numbers resulting from additional housing. The proposal to include 450 sqm primary health facility within Policy SP17 appears to simply be a mathematical exercise of critical importance. The failure to prepare an appropriate HIA nor consult appropriately with the exiting community is a fundamental failing of the LPR and the proposed Policy SP17. The impact an additional 4000 plus new patients has simply not been appropriately considered or mitigated for against a backdrop of an already struggling NHS service.</p> <p>Schools Provision</p> <p>The NPPF (Paragraph 97) states that <i>'it is important that a sufficient choice of school places is available to meet the needs of communities.'</i> It is therefore incumbent on WBC to comply with these requirements of the NPPF. However, the provision for education from Nursery, Early Years, through Infant to Secondary education is not clearly set out. There is no coherent plan set out for how the children from the NET development will be educated. Without this provision, the provision of 4000 new residents to the area is both untenable and fails to comply with the requirements of the NPPF. There are no details in the LPR of the provision for Nursery or Early Years education. Policy SP17 merely states that 'the provision for primary school education is also unclear and contradictory and there is no information on the provision of school entry requirements. Draft Policy SP17 suggests that a 2.5 FE primary school on site and sports infrastructure to be provided, but the only obligation on the developer is to provide the land and the build costs, which is some way of meeting the need for a school. The reality is that there is likely to be a significant funding gap which must question the deliverability of the project. The needs to be in place before a development is occupied and there is no evidence that this will be the case.</p> <p>The LPR is again unclear, and contradictory on the provision of secondary schooling. Draft Policy SP17 suggests that the land to meet the impact of the development, but that the nature and cost of the mitigation will be informed by a feasibility study of applicants' expense, and prepared in collaboration with the Council and local stakeholders. There are no details of the cost and hence no possibility of assessing its suitability. By leaving the confirmation of actual requirement for the provision of secondary schooling in due course, WBC is failing in its duty to ensure that sufficient school places exist. This is a fundamental requirement of the NPPF. Policy SP17 refers to the provision of sports fields within the NET development, but there is no obligation for this to be provided. The location is not identified, and no funding is earmarked for the delivery of the facilities. The existing sports facilities in the area are limited and availability for local teams is limited. The introduction of an additional 4000 plus new residents will compound this issue. The school playing fields could also be available as public sports field but, not only is this questionable because of safety and group issues, it is the case that the secondary school is unlikely to be delivered and as such the playing fields will not be available.</p> <p>Conclusion</p> <p>For the reasons outlined above and as set out in my previous objection, I am opposed to several of the policies and particularly Policy SP17 and the proposed NET development. I consider aspects of the LPR to conflict with the NPPF and as such I would like to take the opportunity afforded to it by the SoS to pause the LPR process and to review its approach.</p> <p>I reserve the right to follow up on these objections should further information become available, and I wish to have the opportunity of a public inquiry that might be held to consider the LPR. In the meantime, I would be grateful if these objections could be taken into account and I am informed of any further progress with the LPR.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>As I set out in my previous objection, I consider WBC should revisit its assessment of housing need. There are a number of sites that should be prioritised for development as opposed to the entirely greenfield development at NET. The allowance for residential development is very cautious and this should be higher, further removing the need for the NET allocation. The updated Land Availability Assessment (HELA), published in January 2023, includes a large number of sites that have been identified which have been discounted. This does not provide a robust basis for the assessment of the housing need that underpins the LPR.</p>
