2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes
Please give reasons for your answer	The NPPF requires protection for ancient woodland. We support the policy wording <i>k. Retain existing woodland on the site and provide an appropriate buffer of at least 15 metres between the development and the areas of ancient woodland. The precise buffer will be determined through detailed assessment and design when proposals are submitted for development;</i> However, we note that the map on p110 suggests that the ancient woodland is further from the red line site boundary than is recorded on the Ancient Woodland Inventory (Defra Magic Maps) where the ancient woodland is directly adjacent. This should be corrected in the final version of the Local Plan.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	n/a
4. Proposed Changes	<i>[See attached Woodland Trust Map]</i> We request that an accurate map of the adjacent ancient woodland be provided to accompany the policy. A screenshot of the relevant layer of Defra Magic Maps is given below.
5. Independent Examination - If your representation is seeking a change, do you consider it	No

necessary to participate at the examination hearing session(s)? * Yes * No	
5. Independent Examination	n/a
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>Please give reasons for your answer</p>	As per comments made in relation to SP14, AWE object to the re-allocation of land adjoining Pondhouse Farm, Clayhill Road. Despite this allocation being within the current local plan, due to the redefining of the DEPZ during the plan period, this allocation for 100 residential units would now be in direct contravention of SP4 as the site is located within the Burghfield DEPZ; in applying policy SP4 the allocation is "likely to be refused planning permission..... especially when the ONR and/or MOD have advised against the development and/or object".

Please give reasons for your answer	<p>The site allocations presented in this chapter have not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of each site to accommodate development. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on these sites. We have concerns and have provided this information in a separate document <see comments below></p> <p>The site is on SPZ3, secondary A superficial and bedrock aquifer</p> <p>The policy requires an ecological impact assessment and the avoidance of the adverse impacts on protected habitats/species. It will be useful to require a protected species survey as well.</p> <p>This is a large development compared to the size of the receiving Burghfield STW. Burghfield is a high spiller, mostly due to Ground Water infiltration. We would not support a large development within this catchment as it will lead to higher frequency of spills. Burghfield STW does not have a permitted phosphorus discharge value now.</p>

	There are options to tighten permit limits at Burghfield to mitigate the impact of the development. We are happy to discuss these options with West Berkshire Council.

<p>Please give reasons for your answer</p>	<p>I object to the West Berkshire Local Plan Review 2022-2039 proposed submission as it is unsound, due to the following reasons:</p> <p>West Berkshire Council needs to understand that this is a rural county, not a built up conurbation. This is how the A4 will end up if Policy RSA13: Land north of A4 Bath Road, Woolhampton (Site Ref MID4); Policy SP17 HSA17 RSA13 North East Thatcham Strategic Site Allocation and Policy RSA9 Land between A340 and The Green, Theale (Site Ref: HSA 14) are allowed to go ahead. Being a rural council, and due to the landscape, West Berkshire is never going to be a rich council due to the number of inhabitants. But it must remember that each and every one of its inhabitants is entitled to a decent quality of life, easy and acceptable access to work; home; food provision; activities in the open air; decent healthcare provision for both health and dentistry; and schooling for all ages, and in my view this plan does not support that.</p> <p>Why is West Berkshire Council not insisting on all the new properties being built with solar and wind power as from now, as well as any other long term eco building practices. You do not need to wait for the Government's target date before taking action. Brownfield sites should be used first and not just built to make up government target numbers. Woolhampton is a rural village and not part of a town, and should never be part of any aim to build along the A4 from Bristol to London, so there are no green fields visible.</p> <p><u>Policy RSA13: Land north of A4 Bath Road, Woolhampton (Site Ref MID4)</u> The plan for these 16 houses has been rejected already and has been refused on appeal. This should be dropped from the plan.</p> <p>Transport:</p> <p>The current roads in West Berkshire are no longer fit for current capacity and purpose. Adding all these homes in both Policy RSA13: Land north of A4 Bath Road, Woolhampton (Site Ref MID4) and Policy SP17 HSA17 RSA13 North East Thatcham Strategic Site Allocation, would have a catastrophic and detrimental impact to Woolhampton and other villages along the A4. As it is, it takes long enough to get onto the A4 from Woolhampton Hill when the traffic is clear (taken over 20 minutes before), and not just at peak times, when you can wait much longer.</p> <p>We all know the car is and will remain king as this is a rural place and all transport options are not going to be available. Safety is a priority, and I do not think this has been achieved in this plan. I believe that any traffic trip rates used by West Berkshire Council are unreliable - who takes traffic readings at 09.30 on a school day and calls it peak time? What proper assessments have been made of the routes that are most likely to be affected by the increase in traffic?</p> <p><u>Policy RSA13: Land north of A4 Bath Road, Woolhampton (Site Ref MID4)</u> looks like it will go straight onto the A4 - this will add another junction within a few feet of New Road Hill and the entrance to the</p>

	<p>Village Hall and the houses there. So far there does not seem to be a proper solution to enable traffic to access these properties and then how they move properly through the village.</p> <p>Water, Waste Water and Sewage:</p> <p><u>Policy RSA13: Land north of A4 Bath Road, Woolhampton (Site Ref MID4)</u>, 16 houses to add to the already overburdened Waste Water Treatment Works in Woolhampton. Site Ref MID4 is located in the Parish of Midgham, the sewage and water come from the Parish of Woolhampton, there is no impact on the Parish of Midgham of these buildings. So far there seems to be no solution to this issue.</p> <p>Environmental Impacts:</p> <p><u>Policy RSA13: Land north of A4 Bath Road, Woolhampton (Site Ref MID4)</u> has an ancient woodland next to it. The Planning document says there will be a buffer of at least 15 metres between this and the development. How is this implemented? And will the same buffer be applied between Mariners Lodge and the development, to allow access for wildlife to New Road Hill?</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	I would be surprised if this was illegal. But I do not dare navigate to the guidance note, because getting to this page was too difficult to navigate away from
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	RSA 13 Has been, at least, once, to my knowledge refused. Access: It's a dangerous location-a bad accident has only recently happened where they are proposing to junction the A4. Drainage: I understand it is questionable. We have had bad floods in the village caused by water cascading down the hill. Untouched countryside: Is this genuinely the right place? Have genuine attempts been made to find more appropriate locations? Capacity: the village's infrastructure is too small to accommodate yet more housing. Pollution and visual intrusion: a virgin field becomes a place of urbanisation. It's going to be an eyesore for me, living opposite.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes	Yes

* No	
Please give reasons for your answer	Again I'm not leaving this page, but I would hope and expect and hope the local authority is following correct procedure
4. Proposed Changes	
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	I know I'm not the only one objecting to this, and more eloquent people can speak for me
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>Consideration has not been given to previous objections and been included regardless.</p> <p>I wish to strongly object to the inclusion of the development of 16 dwellings on land at the junction between Bath Road and New Road Hill, Midgham, Berkshire in the West Berkshire Local Plan Review 2022-2039</p> <p>I am staggered that once again I am writing to object to this application for development, having been rejected in May 2022 after a thorough discussion within the planning council. Having read the design statement, it is clear that nothing has changed and so therefore why is it even being attempted for another application within the local plan? I assume the council who rejected it and those members of the public who objected to the development last time would eventually give up. Well this is absolutely not the case and the reasons for rejection last time are just as relevant this time around as well as three additional points namely a serious road traffic accident at the proposed entrance in December 2022, significant ice across the road on the hill running alongside the development site in recent cold weather and the significantly sized development (1500 plus) along the A4 on the edge of Thatcham. This also doesn't reflect the biodiversity loss on the site...</p> <p>The appeal document (statement of case), describes the proposed site as having a low probability of flooding. This may be so, but I do not believe consideration has been taken into how this development would affect the likelihood of flooding on other residents of the village. Currently, following a downpour, rain water runs down New Road Hill and across the A4 into already filled drains. This in turn causes flooding around the hall/children's park area to the south of the proposed development. During the past 12 months, the volume of water caused significant flooding as seen in the photos I have attached. <i>[document attached]</i> This is an annual occurrence. As I live <i>[personal information removed]</i> just north of the village hall, the thought of a large development and the subsequent increase of water that will inevitably run off to the existing properties is of great concern. I have included photographs to emphasise this concern.</p> <p>One of the other points that appears not to have been given enough thought is the issue of increased traffic. The appeal document states the new development would help reduce vehicle speeds into the village; there is no evidence to suggest this would happen. However, there would certainly be an increase in the number of cars using the A4 in an already busy stretch of the road; a busy stretch that would have to cope with an increase of traffic having to access the development via the only entrance to it, on the A4. <i>[personal information removed]</i>, I see on a daily basis the volume of traffic and can foresee the dangers involved in adding the complication of an access point, with cars waiting to turn right and causing a build up of traffic turning left into the development. This is made all the more difficult with the entrance to the village hall opposite the junction. Currently, at peak times, it can take a wait of up to five minutes to turn right from the village hall, which will only be made more treacherous with an increase in vehicles using the junction. At the end of the design statement, the first reason given for choosing the location/site</p>

	<p>was that it provided the safest single point of access. This is simply ludicrous. Anyone who lives along this stretch of the A4 are well aware of how busy the road has become and to increase the number of cars entering and exiting this access point will only add to the perils of this stretch of road.</p> <p>The appeal document lists the current infrastructure in the village of Woolhampton as satisfactory for the development of 16 new dwellings. I would strongly disagree. The infrastructure might be acceptable for the village as it is currently, but considering there are many new dwellings built at the east end of the village, the facilities simply cannot support further development on top of that which is already taking place. For example, the primary school is at maximum capacity and would need significant investment and new buildings in order to offer places to a greater number of children. I wonder if West Berks council have considered an expensive extension to the local primary school into their decision on this application? With the inevitable extra children the development at the east end of the village will create, there simply are not the places locally for primary aged children. Also access to the primary school is an issue. The design statement states that the school is within walking distance; unfortunately, villagers cannot walk to the school because of the lack of a footpath up the hill. The appeal document continually states inaccuracies such as this one, which casts doubts on the credibility of the statement of case.</p> <p>One of the key reasons why I object to this development is the inevitable change that it will make on the landscape character of the village, especially considering the substantial new development currently taking place at the east end of the village. The appeal document says that West Berkshire Council overstated this argument when refusing the original planning application. In my opinion, the landscape character of a village is at its very heart and essential to preserve the rural nature of Woolhampton for all the residents. In my view, little regard has been taken into considering conservation issues, including protected species, and in reading the statement of case it appears the appellant/developers have completed very little since the original application to address this fundamental issue. If planning was refused first time round due to, amongst other reasons, landscape character and conservation issues, if the points have not been addressed or anything changed, then surely the original decision must stand. The transition between countryside and built-up area has not been successfully secured and I believe the proposed dwellings will significantly alter the setting of Woolhampton in a negative way. Has the appeal document provided evidence that the development won't have a detrimental effect on wildlife? Have surveys for bats and dormice been completed? I see an application that has very little regard for any of these things that local villagers feel strongly about.</p> <p>In conclusion, West Berkshire Council viewed that the proposed development is not on land identified as suitable for new residential development and the reasons above are just a few of the issues which mean that in my opinion, they were correct in their decision to originally refuse this planning application. I hope they stay strong and resolute when dealing with this unwanted application with the West Berkshire Local Plan 2022-2039.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	No
<p>Please give reasons for your answer</p>	No guidance provided.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	Whilst legally the review may have ticked the required legal boxes, as a resident it has not only been hard to access this representation form, the fact that this local plan review is taking place has not been advertised widely. The consultation process has been poor and this could have easily been missed, and indeed I am sure it has been missed by many residents who will be affected by housing development in their area. With regards to RSA13, this is a repeated pattern of poor consultation of residents. In addition the house allocation information was published after the plan which is the wrong way round.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	1. It has not been positively prepared as the consultation has been poor (again). 2. I don't believe it has been justified as with regards to RSA 13, it does not seem to have taken into account other significant development in the village where a large number of houses have been recently built having a massive impact on the local infrastructures - this is not sustainable way forward. 3. There is no evidence that there has been a cross boundary approach: RSA13 is in the parish of Midgham (literally on the boundary with Woolhampton); the recent large development is in Woolhampton only 3-400 metres further down the road so development impacting an area is not be considered holistically. 4. For the above reason I don't believe his is consistent with national policy
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	No
Please give reasons for your answer	I do not see how it can be cooperative because as residents, the information on this review has not been forthcoming. The consultation process was poorly advertised, and as this is not the first time this has happened, it seems that this is a deliberate policy. In addition, this process of representation is not straightforward to complete and take part in - again, not being inclusive and trying to work with the communities affected. There needs to be thorough consultation with the local communities and not just a box ticking approach to get things pushed through as quickly as possible; due process also has to be completed which I don't believe is the case because the plan should have been created following the house allocation.
4. Proposed Changes	There needs to be thorough consultation with the local communities and not just a box ticking approach to get things pushed through as quickly as possible; due process also has to be completed which I don't believe is the case because the plan should have been created following the house allocation.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

Please give reasons for your answer	The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure.

The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.

Early engagement between the developers and Thames Water would be beneficial to understand:

- What drainage requirements are required on and off site
- Clarity on what loading/flow from the development is anticipated
- Water supply requirements on and off site

The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.

To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.

Link here > <https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity>

We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.

Water Response

On the information available to date we do not envisage infrastructure concerns regarding water supply network infrastructure in relation to this development/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ

Waste Response

On the information available to date we do not envisage infrastructure concerns regarding wastewater network or wastewater treatment infrastructure capability in relation to this site/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ

Additional Comments

These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water flows being discharged to the public sewer.

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water to determine whether a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered is required.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>No</p>
<p>5. Independent Examination</p>

<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>As a resident of Rowlands Copse on New Road Hill I strongly object to the inclusion of RSA 13 in the local plan. Planning applications for this site have already been rejected twice. To put it in the Local Plan so it can get through the back door is not acceptable. It will put additional pressure on the amenities of the village and cause damage to wildlife, their habitats and the local, rural character of the village.</p> <p>Wildlife and rural character of the village:</p> <p>The village lies just to the south of the North Wessex Downs AONB, as such the natural and rural character of the landscape is an important feature. The urban creep locally is already very evident with Reed Gardens to the east of the village adding over 30 properties. To the west in Thatcham, multiple developments are underway or proposed, blurring and diminishing the important green spaces between our villages and towns.</p> <p>This proposed development is immediately adjacent to Great Mounts Copse, an ancient woodland and priority habitat. The grassland and hedges of the development site are important habitats in their own right and a vital buffer to the woodland and providing connectivity for wildlife to move across the landscape. The hedges may well be retained and the woodland buffered in the new development but the disturbance, initially from construction and then in perpetuity from light, noise, pets and people living their lives in the new development cannot be ignored. The area will inevitably become poorer for wildlife.</p> <p>New Road Hill does not have street lighting and beautiful views of the night sky can be enjoyed. The additional lighting of 16 new properties packed into the plot of land will cause additional light pollution. Additional lighting, however sensitive, will impact on invertebrates such as moths and other night-flying insects as well as foraging bats and owls.</p> <p>The field as it currently is, also retains rain water and reduces the speed of run off from the hills to the north, into the River Kennet, a Site of Special Scientific Interest. Natural retention and slowing of water is the best way to prevent flooding of property lower in the valley. The additional drainage and waste from the development will increase pressure on the sewerage network and the works on Station Road. Again additional weather risk to the River Kennet SSSI. During recent cold weather the run-off from existing roads onto the A4 already caused dangerous icy patches. More hard standing from this development will further exacerbate this.</p> <p>Road Junction and Parking:</p> <p>The proposal to have another road junction onto the A4 a mere 50m west of the New Road Hill junction is adding complexity and risk to an already difficult road junction. As someone who regularly turns right out of New Road Hill I know how difficult this can be at rush hour. The speed limit change means judging pulling out onto the A4 is difficult. This will be even harder for cars turning out of a new junction further west. The addition of more cars turning out of a new junction to the west combined with those vehicles already joining the A4 from both New Road Hill and Woolhampton Hill will make accidents that much more likely. This was exemplified by a recent accident with a vehicle joining the A4 from the village hall car park south of the A4, almost directly opposite the proposed location of the new junction.</p> <p>I also take my young children south across the A4 to the play park using the traffic island just west of New Road Hill. This crossing is difficult to use already and will become more dangerous to pedestrians like my family and other families living on New Road Hill.</p> <p>Parking locally is also an issue with multiple cars regularly parking next to the sub station on the west side of New Road Hill where it joins the A4. These are cars of residents on New Road Hill and the Bath Road who simply have no other option. Will the development remove this opportunity to park? If so, the inevitable result will be more cars parking in increasingly dangerous and inconvenient locations. The development and resulting increase in cars within the village will exacerbate the parking issues further. During the development, will construction workers be provided with parking or will parking on New Road Hill increase further?</p>

	<p>Local School:</p> <p>The application makes little reference to the capacity of local schools. The Woolhampton CE Primary School was oversubscribed last year and with the Reed Garden development completed this situation will only become worse.</p> <p>We moved to this area 7 years ago to start a family in a village surrounded by beautiful countryside. The developments we have seen in the village are slowly chipping away at the beauty of the area and putting additional pressures on infrastructure and amenities that are already stretched beyond capacity in many cases.</p>

<p>1. Do you consider the Local Plan Review is legally compliant? * Yes * No</p>	
Please give reasons for your answer	

<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>Despite significant objections, a petition containing 118 signatures, 39 formal responses and much visible opposition, it seems that we once more have to resist this proposal.</p> <p>Woolhampton cannot, and should not, be subject to yet another new build development, it is incredibly disappointing to see the open green space at the foot of New Road Hill, Midgham being included in the local plan for the development of 16 dwellings.</p> <p>Please refer to my previous significant objection dated 26/01/2021 against planning application 20/03028/OUTMAJ for my steadfastly unchanged views on the proposal, and I urge you to listen to the community whom you are here to represent.</p> <p>It is ridiculous that for now the fourth time we need to submit our reasons as to why this plot is not suitable, but I will add two more to the content of my previous submittal:</p> <p>During January 2023, during a prolonged period of significant cold weather, the brow of the New Road Hill 100 yards up from the A4 was completely covered in an ice sheet which remained there for over a week. It was insanely dangerous, and occurs every time there is a long cold spell. This is caused by water runoff from the field concerned during the day which freezes overnight. To build on this field would make an already dangerous problem significantly worse, with far more runoff due to less drainage.</p> <p>I joined the planning committee call on zoom for 20/03028/OUTMAJ - in, I believe May 2022 - as the public representative for the village, and I believe stated our case with the strength it deserved. During this call I made a comment that the section of A4 between Woolhampton Hill and the exit from the village to the west "is treacherous". I was not taken seriously, and was even mocked by one of the committee members for using that term, which although I took offence to at the time, I did not rise to.</p>

	<p>I refer you to an incident reported in the local press on 10th December 2022 which happened within yards of where the proposed access road is to the new site. Car do not simply drive into lamposts on a straight road. This crash was a direct result of the situation in this exact location, where the slip lanes are too narrow, the already existing junctions very close together, and the exit from a 30mph zone to national speed limit tempts far too many drivers to accelerate to unacceptably high speeds far too early despite the dangers.</p> <p>It is, as I stated at the time, and in my previous formal objection, a treacherous piece of road.</p> <p><i>Weblink inserted:</i> https://www.newburytoday.co.uk/news/update-crash-shuts-a4-9288865/</p> <p>There is NO support for this build in the local area, and MUCH opposition. Please remove this site from the local plan and listen to your residents.</p> <p>Do something constructive with this land instead. Develop it as a green leisure space, a solar field for a community power project, perhaps.</p> <p>We don't need more houses, and have received nothing in return as residents from the local government for those we have already absorbed.</p>

Please give reasons for your answer	<p>I am writing to object about the Local plan and specifically policy RSA13 / Land north of A4 Bath Road, Woolhampton (Site Ref MID4)</p> <p>This site has previously been refused for development by WBC (Application reference 20/03028/OUTMAJ) , being unsuitable for residential development and outside the defined settlement boundary.</p> <p>Also advising a satisfactory conclusion could not be found to overcome the above.</p> <p>Nothing has changed and this proposed development site should finally be removed from the list of potential development sites.</p> <p>I wish to repeat a number of strong objections that I have in relation to the proposed development of greenfield space, at the western edge of Woolhampton village, application reference as above.</p> <p>As a close neighbour of the site of the proposed development, I am of the view that this will have a severe negative impact on the village and its inhabitants, detracting from their standard of living, and enjoyment of residing in Woolhampton.</p> <p>1/ Visual impact on village / character of the area. This paddock / open space forms part of the defined rural landscape on approach to the village from the West, creating clear definition between the village</p>

and open countryside. To develop / expand housing on this site will certainly detract from the small village feel currently enjoyed.

2/ Greenfield site / Wildlife. My understanding is that this is a greenfield site, which borders ancient woodland, to develop this site can only have a negative impact on the local wildlife and their habitat, regardless of any mitigating efforts put in place by the developers. Surely it would be better to develop a brownfield site locally, within a defined settlement boundary, where these issues would not be encountered.

3/ Overdevelopment. Woolhampton is a small village and would think most of the residents like it this way, that is why they live here. We currently have the new Reed Gardens development of 34 properties, (mainly 3 & 4 bedroom homes) along with new housing by Midgham station This will roughly equate to 150 more people in the village, a massive increase considering the village has less than 1000 inhabitants. To then add another 16 dwellings, roughly 50 more people added to the 150 above, is just not wanted, viable, or sustainable. It will have a large negative impact on local facilities and amenities.

4/ Noise and light pollution. There will be a significant increase in noise and light pollution both during any development and after completion. New Road Hill does not have street lights, and a lot of people prefer it like that for it's rural feel + it's much better for stargazing. Any development from a rural paddock will increase noise and light pollution, regardless of any mitigating action taken by developers, which will impact existing local residents. Sure this will not be good for the local wildlife in the paddock / adjoining woodland, and local area either.

5/ Parking issues. There are already parking issues with not enough parking spaces for existing Woolhampton residents. This is even more evident when friends and families are visiting. Locals who reside along the Bath Road and New Road Hill have been forced to park on the corner of the Bath Road and New Road Hill junction due to the lack of parking. (by the sub station) I have seen up to 8 vehicles parked there, and would have concerns if this space was no longer available, that people would be forced to park somewhere less safe and cause obstruction to others(pedestrians and road users).

6/ There is a plan to develop a significant site in Thatcham (SP16 & 17) of 3000 new houses, less than 2 miles away, which will more than cover requirements for any new housing in the immediate area.

In conclusion, I believe that this development is neither needed or wanted. I would be grateful if the council would take these objections into consideration, I will be happy to provide any further information should you have any questions.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the	Yes

delivery of sustainable development in accordance with the policies of the NPPF.
 * Yes
 * No

Please give reasons for your answer

Introduction

We refer to the above consultation event and respond on behalf of our client, JPP Land Ltd. Our client's interests relate to land located north of Bath Road, Woolhampton. The site has a significant planning history, including its previous identification as a preferred allocation within the Draft Housing Site Allocations Local Plan (preferred option 15 – site ref WOOL001). This draft allocation indicated that the 0.83ha site could accommodate approximately 20 dwellings.

It is acknowledged that within the Draft Submission Local Plan, our client's land is included as a proposed allocation for approximately 16 dwellings (site ref RSA13) in policies SP14 and RSA13. We concur with the Council that the site is suitable for allocation, as assessed in Appendix 7 of the Sustainability Appraisal/Strategic Environmental Assessment alongside the Council's Housing and Economic Land Availability Assessment (HELAA) (December 2023).

The suitability of the site for residential development is further demonstrated by the technical evidence that was submitted to the Council as the planning application for 16 dwellings on the site (ref 20/03028/OUTMAJ). Whilst the application was refused by the Council on 21st September 2022, this was not on the basis on any technical reasons, rather this was due to the lack of a legal agreement alongside its current location outside of (but adjoining the settlement boundary). These are both factors which can readily be addressed, especially as through the Draft Submission Local Plan, the site is proposed for inclusion in the settlement boundary of Woolhampton.

Therefore, we reconfirm that the 0.83ha site is suitable for housing development comprising between 16 and 20 dwellings in a sustainable location as an extension to the settlement of Woolhampton. We consequently endorse its inclusion as an allocation in policy RSA13, subject to the response outlined in this statement.

The site is an available, suitable and deliverable site, with no constraints to bringing the land forward for development at an early stage during the emerging plan period. This is supported by the Technical evidence which accompanied the recent planning application (LPA ref 20/03028/OUTMAJ). This therefore further supports the inclusion of the site as an allocation within the draft plan, subject to the response below.

National Planning Policy Framework (NPPF) and the Tests of Soundness

The NPPF (July 2021) sets out the principal components to be included in local plans. Paragraph 35 requires that in order to be "sound" a Development Plan Document ('DPD') should be positively prepared, justified, effective and consistent with national policy.

In order to be justified the DPD must be founded upon a proportionate evidence base and represent an appropriate strategy when considered against the reasonable alternatives.

Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the Statement of Common Ground.

The positive preparation test requires plans to as a minimum, seeks to meet the area's objectively assessed needs and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical.

For the reasons set out in these submissions there are a number of potential matters that need to be addressed in future iterations of the emerging Plan. These are outlined following the relevant questions and supporting information within the consultation document.

Further matters - Comments on draft Policy RSA13 regarding the allocation of land north of Bath Road, Woolhampton

The draft policy indicates that the site is proposed to be allocated for a residential development comprising approximately 16 dwellings. On behalf of our clients, an outline application for the erection of 16 dwellings was submitted to the authority on 21st December 2020 and validated on 5th January 2021 (LPA ref 20/03028/OUTMAJ). This application was refused by the Council on 21st September 2022 for the following two reasons [see attachment 'PS1542 Decision Notice_RSA13' for decision notice]:

1. The proposed development is not on land identified as suitable for residential development. The application site is located outside of a defined settlement boundary, below the district settlement hierarchy, where there is a presumption against residential development. The site is not land that has been allocated for residential development. The proposed development is not for rural exception housing, to accommodate rural workers, or limited infill within a closely knit cluster of 10 or more dwellings. As such the proposed development is contrary to Policy C1 of the Housing Site Allocations DPD 2006-2026, the Council's strategy for locating new homes in Policies ADPP1, ADPP6 and CS1 of the West Berkshire Core Strategy 2006-2026, and the National Planning Policy Framework.

2. The application fails to provide a planning obligation to secure:

(a) on-site provision of 40% affordable housing, without which the proposal fails to comply with the National Planning Policy Framework, Policy CS6 of the West Berkshire Core Strategy 2006-2026, and the Planning Obligations SPD; and

(b) the provision, transfer (with commuted sum for maintenance) and governance of on-site public open space, without which the proposal fails to comply with the National Planning Policy Framework, Policy CS18 of the West Berkshire Core Strategy 2006-2026, Policies RL.1, RL.2 and

RL.3 of the West Berkshire District Local Plan 1991-2006 (Saved Policies 2007), and the Planning Obligations SPD.

The first reason is clearly addressed by the Draft Submission Local Plan which confirms its inclusion within the defined settlement boundary for Woolhampton alongside its identification as an allocation for approximately 16 dwellings through policy RSA13. The second reason for refusal can also be readily resolved through the preparation and agreement of a legal agreement, especially as when application 20/03028/OUTMAJ had been reported to committee, it was recommended for approval as all technical matters had been resolved. Whilst Councillors resolved to refuse the application as the site was not within a settlement, as explained this is resolved through the Draft Submission Local Plan.

Application 20/03028/OUTMAJ followed an earlier outline application (19/01942/OUTMAJ) for 16 dwellings on the site which was also refused by the authority on 23rd January 2020. The earlier application was determined by the authority before it agreed the Regulation 18 version of the Plan [*Footnote 1: Draft Local Plan Review December 2020, consulted upon from 11 December 2020 until 5 February 2021*] which included the site as a draft allocation (then policy RSA20, now policy RSA13). The most recent application was submitted during the Council's consultation on the earlier Draft Local Plan which ended in February 2021.

The technical information submitted with the current application confirms that development of the site could proceed with mitigation to address any potential impacts upon the adjoining Local Wildlife Site. The inclusion of a 15m buffer along the site's western boundary ensures development of the site also safeguards the ancient woodland which is the designated Local Wildlife Site. This is shown on the illustrative layout submitted with the application.

The Council's determination of application 20/03028/OUTMAJ confirms The Council's determination of the earlier application together with the technical information submitted with the current scheme highlight those matters which are most likely to be relevant for inclusion in a policy for the development of the site.

In contrast, the assessment of the site for the Local Plan (through the most recent Housing and Economic Land Availability Assessment (HELAA) (January 2023) does not fully take account of the information submitted for the application, which as confirmed in the determination of the proposal (LPA ref 20/03028/OUTMAJ) confirmed that there were no technical matters limiting development of the site.

The technical information submitted with the current application confirms that development of the site could proceed with mitigation to address any potential impacts upon the adjoining Local Wildlife Site. The inclusion of a 15m buffer along the site's western boundary ensures development of the site also safeguards the ancient woodland which is the designated Local Wildlife Site. This is shown on the illustrative layout submitted with the application [*see page 5 of attachment 'PS1542 Woolf Bond (JPP Land) RSA13 LPR Rep'*].

A review of the Council's appraisal of the land north of Bath Road, Woolhampton (MID4) within the January 2023 version of the HELAA is summarised below.

Stages 1a and 1b of the HELAA summarise the identification of the site and whether it is subject to an automatic exclusion. It is agreed that it is appropriate for site MID4 to be considered further within the HELAA.

Stage 2a includes consideration of "Development Potential". This notes that the site adjoins ancient woodland for which a buffer would be required and that it lies adjacent to an existing settlement boundary. The illustrative layout for 16 dwellings includes a buffer to the Ancient Woodland which lies to the west of the site. The Planning Committee Report on the most recent application (paragraph 6.79) [*see attachment 'PS1542 Woolf Bond (JPP Land) Committee Report_RSA13'*] confirmed:

An adequate buffer will be retained and protected to the adjacent woodland.

Therefore the matters within the "Development Potential" analysis can readily be resolved. This is illustrated by the Council's acceptance of the technical information for the earlier application alongside the proposed revision to the settlement boundary for Woolhampton associated with its allocation.

Stage 2b. This involves an assessment of suitability. Its overall conclusions are:

An ancient woodland (Great Mounts Copse) is immediately adjacent to site, suitability of site depends on appropriate avoidance and mitigation measures. Further ecological studies required.

Further landscape assessment required.

High risk of adverse nature conservation impacts.

Although these are noted, the Council accepted through the most recent planning application that these were all matters which could readily be addressed and not undermine its suitability.

Under availability within step 2c, this was accepted.

The achievability of the site (Step 2d) was also accepted.

The overall conclusion within the HELAA for the site (Step 2e - Deliverability) was that it was "potentially developable". The conclusions were:

The site is available (in single ownership and there is an option agreement with a developer) and achievable as there are no known market, legal, cost, ownership fragmentation or delivery issues.

An ancient woodland (Great Mounts Copse) is immediately adjacent to site, suitability of site depends on appropriate avoidance and mitigation measures. A buffer will be required between the ancient woodland and development.

There are a number of factors which would need to be investigated further to confirm that the site is developable - further landscape assessment required, and high risk of adverse nature conservation impacts and further ecological studies required.

Whether the site is considered developable is also dependent on further assessment through the plan-making process, in relation to whether circumstances exist to support the change to the settlement boundary.

The technical matters detailed above were all satisfactorily resolved and confirmed through the Council's determination of the most recent application (20/03028/OUTMAJ). As noted, there were only two reasons for refusing the application, the first being its location outside of a settlement boundary. Through the Draft Local Plan, this is amended and therefore the Council's analysis of the site through the HELAA together with the applications confirm the suitability of the site.

The annexe to this statement provides further details of the response to the HELAA appraisal of the site, having regard to the information submitted with application 20/0028/OUTMAJ, which was accepted by the authority.

The Sustainability Appraisal (SA)/ Strategic Environmental Assessment (SEA) for the site (within appendix 8b (page 50)) concludes:

The site is likely to have an overall neutral impact on sustainability. Positive sustainability impacts are identified in relation to social sustainability as the site would help to meet local housing needs as well as being close to local services and facilities accessible by walking and cycling, with opportunities for public transport close by. Potential negative sustainability impacts have been identified in relation to environmental sustainability as the site is close to a number of ecological designations. A number of unknown sustainability impacts have also been identified. Many of these may be able to be mitigated but further would be needed to determine what would be required.

Whilst negative impacts are identified on environmental sustainability, these relate to matters which were highlighted as issues within the HELAA (Ancient Woodland, ecology). As noted, these were all resolved and accepted by the Council in determining the earlier application.

The other evidence prepared by the Council is summarised in the conclusions of the HELAA and SA/SEA and this therefore confirms its suitability. The draft policy concerning development of the site (RSA13) therefore broadly reflects the conclusions of these documents. The draft policy is proposed to read:

The site, as shown on the indicative map, will be required to be developed in accordance with the following parameters:

- a. The provision of approximately 16 dwellings in a scheme that provides a mix of dwelling types appropriate to the local area;**
- b. Access to the site will be provided from A4 Bath Road;**
- c. Main internal walking and cycle routes for the site will be provided and will be linked to existing routes including the Public Rights of Way network; and**
- d. The development design and layout will be further informed by a full detailed Landscape and Visual Impact Assessment (LVIA);**
- e. The scheme will be informed by an Ecological Impact Assessment (EcIA). F. Appropriate avoidance and mitigation measures will need to be implemented, to ensure any designated sites and/or protected habitats and/or species are not adversely affected;**
- f. An integrated water supply and drainage strategy will be provided in advance of development to ensure the provision of adequate and appropriate infrastructure for water supply and waste water, both on and off site. Development will be occupied in line with this strategy;**
- g. Measures will be included to improve accessibility by, and encourage use of, non-car transport modes. These measures will be set out in a Travel Information Pack;**
- h. Provide an appropriate buffer of at least 15 metres between the development and ancient woodland. The precise buffer will be determined through detailed assessment and design when proposals are submitted for development;**
- i. A desk-based assessment to better understand archaeological potential and survival will be required. Subject to the results of the assessment, a field evaluation may be required;**
- j. An odour assessment will be required due to the nearby location of the Woolhampton Waste Water Treatment Works;**
- k. Part of the site is underlain by aggregate mineral deposits and a Minerals Resource Assessment will be required; and**
- l. A Construction and Operations Management Plan (COMP) will accompany any planning application on the site. The COMP will safeguard the oil pipeline from operational works, including the provision of an appropriate buffer.**

The only matter referenced in the policy which does not directly stem from the sites evaluation in the HELAA and SA/SEA is clause j. It is noted that this is derived from the conclusions of the Water Cycle Phase 2 – Outline Study (September 2021), primarily section 7. This states with respect to “odour assessments”:

7.1 Introduction

Where new developments encroach upon an existing Wastewater Treatment Works (WwTW), odour from that site may become a cause for nuisance and complaints from residents. Managing odour at WwTWs can add considerable capital and operational costs, particularly when retro fitted to existing WwTWs. National Planning Policy Guidance recommends that plan-makers consider whether new development is appropriate near to sites used (or proposed) for water and wastewater infrastructure, due to the risk of odour nuisance. Phase 1 highlighted six sites that may be risk of nuisance odour, no new sites were identified in Phase 2. For completeness the sites identified in Phase 1 are listed below.

7.2 Results

Table 7.1 identifies the six sites within West Berkshire which fall within 800m of WwTW. The 800m buffer does not take into account the size of the works, the treatment processes present or the condition of the WwTW which can all affect the magnitude of the odour. Where there is already urban area closer to the treatment works than the proposed site, the nature of odour on the new site is likely to be known and reported so these sites represent are lower risk. There are no proposed sites which are closer to the WwTW than existing urban areas. Sites that are given an amber assessment will not necessarily experience nuisance odour but should undergo an odour assessment as part of the planning process.

The appraisal then lists the 6 sites where odour assessments should be considered. One of these is MID4 as confirmed in the table below (copy of Table 7.1 from the Phase 2 Study) [see page 9 of attachment 'PS1542 Woolf Bond (JPP Land) RSA13 LPR Rep'].

Alongside a lack of consideration of wind direction, there is also no explanation with respect to the reasons why 800m is the relevant distance from an existing treatment works for determining potential odour issues.

Taking account of these factors, it is not considered that this element of the policy is justified, as the evidence base is flawed. Either all the allocations associated with the sites listed in Table 7.1 of the Phase 2 Study should be subject to the requirement to provide an odour assessment or non should be.

To reflect the approach of the Plan for the Lower Way, Thatcham site allocated in policy RSA5 and listed in Table 7.1, clause j of policy RSA13 should therefore be omitted.

The annex to this statement explains the reasons why heritage and minerals assessments are not required within the policy.

The inclusion of our client's land north of the Bath Road in Woolhampton as envisaged by draft Policy RSA13, whilst assisting in the enhancement or maintenance of the vitality of rural communities as required by the NPPF (paragraph 78), will also contribute towards the minimum of 10% of housing allocations to meet the district's overall housing need on a site of less than 1ha, as required by paragraph 69.

The overall conclusions of the Phase 2 Study in paragraph 7.3 regarding Odour was:

Six sites across West Berkshire are close enough to a WwTW for there to be a risk of nuisance odour. If these sites were to be allocated in the Local Plan Review, and odour assessment is recommended as part of the planning process, funded by developers. The remaining sites have been given a rating of green. (my emphasis)

Although the table indicated that 6 sites were identified for consideration of odour assessments, the detailed sites schedule which accompanied the Phase 2 document only lists our clients site at Woolhampton as necessitating an odour assessment. This is notwithstanding the inclusion of the site on land at Lower Way Farm, Thatcham (THA9) as a housing allocation through policy RSA9 of the Local Plan. The table above confirms that this site should also be subject to the obligation to provide an odour assessment.

Since it is not the closest of the six sites to the treatment works and more importantly, is unlikely to be affected since the prevailing wind direction is from the south-west, ensuring any odour releases are blown away from the site north of Bath Road. The prevailing wind direction is illustrated by the wind rose for RAF Benson which confirms the prevalence of wind from the south-west [Footnote 2: The site in Thatcham included as an allocation is closer] and more importantly, is unlikely to be affected since the prevailing wind direction is from the south-west, ensuring any odour releases are blown away from the site north of Bath Road. The prevailing wind direction is illustrated by the wind rose for RAF Benson which confirms the prevalence of wind from the south-west [Footnote 3:RAF Benson lies approximately 25km NNE of Woolhampton].

RAF Benson meteorological station wind rose (2019). [See page 10 of attachment 'PS1542 Woolf Bond (JPP Land) RSA13 LPR Rep'].

Alongside a lack of consideration of wind direction, there is also no explanation with respect to the reasons why 800m is the relevant distance from an existing treatment works for determining potential odour issues.

Taking account of these factors, it is not considered that this element of the policy is justified, as the evidence base is flawed. Either all the allocations associated with the sites listed in Table 7.1 of the Phase 2 Study should be subject to the requirement to provide an odour assessment or non should be.

To reflect the approach of the Plan for the Lower Way, Thatcham site allocated in policy RSA5 and listed in Table 7.1, clause j of policy RSA13 should therefore be omitted.

The annex to this statement explains the reasons why heritage and minerals assessments are not required within the policy.

The inclusion of our client's land north of the Bath Road in Woolhampton as envisaged by draft Policy RSA13, whilst assisting in the enhancement or maintenance of the vitality of rural communities as required by the NPPF (paragraph 78), will also contribute towards the minimum of 10% of housing allocations to meet the district's overall housing need on a site of less than 1ha, as required by paragraph 69.

Representation

The approach of policy RSA13 is therefore unsound as it is not justified. This especially relates to criteria i to k of the policy.

Conclusion

Whilst we concur with the Council's inclusion of our client's land north of Bath Road, Woolhampton as an allocation for around 16 dwellings in policies SP14 and RSA13, for the reasons outlined in the statement, the Local Plan as draft is currently unsound. We therefore object to the Local Plan.

The objection to the plan can readily be resolved through the omission of criteria i to k of policy RSA13 for the reasons outlined.

Summary

We welcome the opportunity to open up dialogue with the Council in order to further proposals and the formulation of the detailed policy requirements associated with the allocation of our client's land as currently envisaged in policies SP14 and RSA13.

Annex detailing response to HELAA assessment

1. Development potential.

The first section of the HELAA deals with development potential. The Assessment highlights site specific issues which could affect capacity as relating to the ancient woodland and the need for a buffer. The illustrative scheme within application 20/03028/OUTMAJ includes such a buffer, consistent with Natural England guidelines, with a depth of 15 m. In withdrawing reason for refusal 3 in connection with the previous application, the Council now confirms that the site can be developed without harm to the ancient woodland.

The Assessment assumes a density of 30 dwellings per hectare and an estimated development potential of 20 dwellings. This contrasts to the more sensitive and agreed lower density of 19.4 dwellings per hectare and the 16 dwellings proposed.

2. Suitability

Under relevant planning history, the HELAA references the two earlier applications, as noted in the statement.

It also records the site being assessed as "potentially developable" in the 2013 strategic housing land availability assessment as recorded above. The Council's assessment notes that:

"During the site selection work for the Housing Site Allocations Development Plan Document, the site was recommended as an option for allocation in the Housing Site Allocations (HSA) DPD because it was well connected to existing settlement, close to local services and facilities.

At preferred options the Parish Council commented that development of the site would extend the village westwards. Concern was also raised over additional traffic movement on to New Road Hill. The Parish Council stated a preference for WOOL006 to be allocated for development."

Application 20/03028/OUTMAJ did not include an access onto New Road Hill. Whilst the proposal would "extend the village westwards", the alternative site was extending the settlement eastwards. There is no distinguishing difference between the principle of such an extension. In any event, the proposal is contained by a mature woodland block which screens and encloses the site from the more open and wider landscape further to the west. In this sense the suggested extension of the village is not out into the wider open countryside but up to a very well established and contained landscape feature. The relationship of the scheme to this landscape feature is also respected.

In respect of location (settlement hierarchy, relationship to settlement boundary) the HELAA Assessment notes that the site is adjacent to the settlement of Woolhampton, an identified Service Village that has a more limited range of services and "some limited development potential". The reference to the settlement having a limited range of services fails to acknowledge the significant, higher order, railway station within Woolhampton. The Assessment records that the site adjoins the settlement boundary on the northern and eastern sides. The A4 Bath Road together with a community facility, car park, allotments and some frontage dwellings lie to the south and south east.

The HELAA Assessment confirms that development on the site would not result in harm to the AONB.

In respect of highways and access, the Assessment confirms the position in respect of the planning applications that there are no objections to the proposed means of access off the Bath Road, no significant impact is expected in respect of local highway capacity, and Highways England has advised that individually, the site would be unlikely to materially impact on the operation of the strategic road network.

In respect of flooding, the Assessment confirms that the site lies within flood zone 1 with a low probability of flooding.

No issues are raised in relation to surface water, ground water flood risk and the Council's drainage officer confirms that the site is suitable for development.

The Assessment confirms that the site is not defined as public open space and that there is no requirement for additional public open space provision over and above development plan policy requirements.

The Assessment confirms that the site has not been identified as Local Green Space which reinforces the point that the site is not significant in townscape terms.

In respect of agricultural land, the site is classified as non-agricultural land. This is hardly surprising given the well contained nature of the site, and its divorced nature from the more open and usable countryside further to the west, all of which point to the site being of limited use other than paddock land on the settlement edge.

The Assessment under the heading air quality, pollution and contamination refers to the location of the site adjacent to the A4, with possible Nitrogen Dioxide and Particulate Matter from construction and operational impacts, and possible contamination and high risk of noise and vibration problems to future residents from the A4. It is relevant to note that no such objections were raised in relation to the planning application in respect of these matters. Furthermore, the site allocated and under construction at the eastern end of the village shares a similar frontage relationship onto the Bath Road. These are not therefore considered determinative issues.

In respect of potential adverse nature conservation impacts, the Thames Valley Environmental Research Centre highlights the site lying within 500m of priority habitats, ancient woodland, European protected species, priority species, statutory sites, SSSI Impact Risk Zone and local wildlife sites.

The Berkshire, Bucks and Oxon wildlife Trust highlight a number of potential impacts to these interests in the absence of any avoidance or mitigation measures. The planning application includes appropriate avoidance and mitigation measures such that the only outstanding nature conservation impacts relate

to bats and dormice surveys. The surveys submitted to the Council as part of the planning application 20/03028/OUTMAJ confirm that these do not present a constraint to the development of the site in the manner proposed. The Council's withdrawal of reason for refusal 3 to an earlier application confirms this too.

The 15m buffer zone also confirms appropriate avoidance and mitigation to the nearby ancient woodland. In respect of whether development would be appropriate in the context of existing settlement form, pattern and character of the landscape, a generic passage from the West Berkshire Landscape Character Assessment (2019) is set out in the HELAA. This could apply to any edge of settlement field thereby precluding any form of development at the edge of a sustainable settlement within the identified settlement hierarchy.

The site-specific comment does recognise the fact that there is existing residential development to the east and north of the site. It records: "Western boundary of the site nearby open countryside is well screened by mature trees. Further landscape assessment required". This does not rule out the development having regard to this consideration. "Further landscape assessment required" comes in the form of the application Landscape and Visual Impact Addendum report that accompanies this Statement.

The Assessment confirms no harm to or loss of significance to any designated heritage assets.

In terms of designated heritage assets, a desk-based archaeological assessment together with some possible fieldwork techniques may be necessary. However, the determination of the earlier application has not identified any such interest. The Planning Statement (paragraph 4.41) [*see attachment 'PS1542 Woolf Bond (JPP Land) RSA13 Rep'*] also notes that whilst heritage has been identified as a potential matter to be reviewed, this was not identified in the Council's earlier determination of applications 19/01942/OUTMAJ and 20/03028/OUTMAJ.

In terms of minerals and waste, it is noted that the site lies within an existing and proposed mineral safeguarding area. As the Planning Statement which accompanied application 20/03028/OUTMAJ confirms (paragraph 4.41):

The site could not reasonably be quarried in a standalone respect due to its limited area and the need to ensure appropriate buffers to the residential properties, oil pipeline and ancient woodland within or adjoining the site. However, should any minerals be observed on site during construction, these can be sent to a local processor rather than sent to landfill [*Footnote 4: It is understood that quarries within West Berkshire can accept such limited quantities of minerals for processing.*]. Again, this could be dealt with by condition. Consequently, mineral extraction is therefore not a constraint for the site.

This flexibility should be acknowledged within any policy although as explained above, this is not considered to be a relevant factor for the determination of the earlier application.

The suitability conclusions refer to the need for appropriate avoidance and mitigation measures in respect of the ancient woodland, the potential high risk of adverse nature conservation impacts. These have now been addressed as confirmed in the recent ecological survey report and Council's withdrawal of reason for refusal 3 to the earlier application. The only outstanding matter therefore relates to a further landscape assessment. This as noted was provided with application 20/03028/OUTMAJ and considered acceptable to the Council. Therefore as demonstrated by the application, the scheme and consequently the site is acceptable in landscape character terms.

The Assessment confirms that all other sites at the edge of Woolhampton are unsuitable, leaving the application site as the only suitable site at this sustainable Service Village, which the HELAA confirms is suitable and capable of accommodating additional development. To not support additional meaningful development at Woolhampton, bearing in mind the level of existing transport infrastructure (in particular the railway station), would not be sustainable.

3 and 4. Availability and Achievability

The HELAA confirms that the site is immediately available and achievable with no new issues constraining the development of the site. This representation and the current planning application reaffirm this matter.

5. Deliverability

Within this section of the HELAA the Assessment confirms that the site is available, achievable, potentially developable in part owing to a buffer required joining the ancient woodland on the western site boundary, with suitability unknown due to the outstanding nature conservation surveys and landscape assessment, both of which are now addressed through this application.

Concluding remarks on 2023 HELAA

Overall, the Council's most recent Assessment highlights the suitability of the site even for a higher level of development than that proposed through the application 20/03028/OUTMAJ. The lower number of dwellings proposed allowed for the appropriate identified mitigation and avoidance measures to be incorporated, in particular in relation to the ancient woodland buffer. The outstanding nature conservation constraints are now resolved through the recent season sensitive bat and dormice surveys, whilst the submitted Landscape and Visual Impact Assessment Addendum to the current application addresses landscape impact. That said, the acknowledgement of the well contained nature of the site confirms the landscape and visual impact is limited. Moreover, the planning officer's report on the earlier application confirms that "the presence of housing would be conspicuous in public views, albeit localised and filtered (to varying degrees) but would inevitably be an intrinsic change to the character of the area (the site) in this location".

There can be no doubt that with virtually every greenfield site the presence of housing would be conspicuous in public views, but in this case, it is acknowledged that these would be "localised and filtered". Furthermore, the change from a greenfield site to a housing development, albeit set within a settled and mature landscape, would bring about a change, however, the degree of change in this case is limited, as well as that change being well related to existing built form seen in the same context of the

	<p>site. This too reduces further the extent of change and impact to a level that is judged by the applicants to be acceptable.</p> <p>It is clear that the Council's determination of applications 19/01942/OUTMAJ and 20/03028/OUTMAJ has reviewed the various factors which would need to be addressed to enable residential development of the allocation to proceed.</p> <p>Although the HELAA and SA/SEA have listed other issues, it is evident that planning application 20/03028/OUTMAJ (including the material submitted with it) have addressed these. Council's provisional identification of heritage, minerals and odour as potential factors for development of the site should consequently not be incorporated into the specific expectations of the authority within the policy of the draft Submission Local Plan.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	
4. Proposed Changes	To resolve the objection to policy RSA13, we advocate that criteria i to k of the policy are omitted.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	To clarify the adjustments to policy RSA13 of the Local Plan
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>I have no access to a printer so unable to print form but please accept this as objection for the development of the land at the bottom of New Road Hill, Woolhampton.</p> <p>I object due to the increase amount of traffic in and out onto the main A4 and the dangers this will incur, particularly in the winter weather. Woolhampton is a beautiful village and we are constantly losing green land to more houses. Our school is small and can not accommodate all these houses.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	
5. Independent Examination - If your representation is seeking a	

change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No

Please give reasons for your answer	The site allocations presented in this chapter have not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of each site to accommodate development. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on these sites. We have concerns and have provided this information in a separate document <see comments below> The site is on SPZ3

Please give reasons for your answer	We note and support the proposed criterion in each of the policies listed in this representation that relates to desk-based archaeological assessment and, if needed, field evaluation.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	
4. Proposed Changes	For all sites listed in this representation, while we support the policy requirement for desk-based archaeological assessment and, if necessary, field evaluation, the language used across the policies used is not consistent. The Council may wish to review the language used across these policies to ensure it improve consistency. We do not consider this is a matter of soundness.

Please give reasons for your answer	The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure. The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments

on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.

Early engagement between the developers and Thames Water would be beneficial to understand:

- What drainage requirements are required on and off site
- Clarity on what loading/flow from the development is anticipated
- Water supply requirements on and off site

The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.

To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.

Link here > <https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity>

We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.

Water Response

The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website <https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development>.

Waste Response

On the information available to date we do not envisage infrastructure concerns regarding wastewater network or wastewater treatment infrastructure capability in relation to this site/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ

Additional Comments

These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water flows being discharged to the public sewer.

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water to determine whether a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered is required.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>No</p>

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>Objection</p> <p><u>(Emerging) Policy HSA 20 (formerly RSA 19 Site LAM005) (Reg 19 site RSA14) Lynch Lane, Lambourn</u></p> <p>Our Clients have made representations elsewhere that the housing provision in the Plan is inadequate and extra sites should be included, in particular our Client's Site formerly known as "Land between Folly Road, Rockfel Road and Stork House Drive (SHLAA site reference LAM007)".</p> <p>However if the Council considers that extra sites are not required then LAM007 should be included instead of sites HSA 19 or more particularly HSA 20 in the Draft LPR document.</p> <p>RSA 22/HSA19 has the disadvantage of being a very large site for the village to accommodate. The capacity of the site has risen arbitrarily since the 2014 Preferred Options document and yet the constraints have increased. The Draft LPR introduces new constraints about nutrient neutrality etc. The site lies alongside an SSI/SAC and part of the site is liable to flooding from the River Lambourn which flows along the northern boundary. No work was carried out on a number of aspects including archaeology before its previous allocation. It appears that the site capacity has arbitrarily increased by 4 units from 56 in the 2014 document to 60 in the adopted document and the LPR notwithstanding that the LPR now reduces the developable area, merely so that, together with site RSA23/HSA20, it tried to compensate for the unjustified omission in this version of the Plan of site LAM007 which was previously included.</p> <p>The Summary of Lambourn Sites previously noted the negative points in relation to environmental sustainability and flooding. The need for a buffer zone and the inability to develop within the flood zone appear to reduce the size and capacity of the site and not to increase it as was previously suggested (from 56 to 60) in the adopted DPD. The LPR now omits a developable area, the implication being that this has decreased.</p> <p>When the site was proposed in the adopted Plan the Parish Council within their response included the following key points:-</p> <p><i>"Environment -the site is within the AONB. The site is immediately adjacent to the River Lambourn, the corridor of which is a Site of Special Scientific Interest.</i></p> <p><i>Housing and the Community – Lambourn needs a period of consolidation to adjust to the social impact resulting from recent rapid growth.</i></p> <p><i>Industry – impact on the racehorse industry– safety of horses and riders will be affected by increased traffic generation</i></p> <p><i>Archaeology – Lambourn formed part of the parkland of Lambourn Place, and the site is believed to be a site of a Saxon palace. Any development would destroy this.</i></p> <p><i>Roads – roads are narrow, with blind bends and dangerous junctions. Inadequate footpaths and the roads are busy. Any increase in traffic will be detrimental to the safety of the road users".</i></p> <p>These matters have not been satisfactorily addressed.</p> <p>The Lambourn Site Assessments document, in its summary notes that "the Parish Council had various concerns about this site, as does the local community". Indeed this was the least favoured site for development by the residents responding to the survey.</p> <p>Since being selected for the last Local Plan and accepted by the Inspector in April 2017 the site has not come forward.</p> <p>No applications have been made for its development.</p>

	It does not appear to be genuinely available and should now be omitted from the emerging Draft LPR. <i>The Plan's approach to the selection of sites is not justified.</i>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	No
Please give reasons for your answer	Please see other submissions on this specific point <See Rep: ID1170>
4. Proposed Changes	The Draft LPR's approach to the selection of sites is not justified. Land adj. Lynch Lane has not come forward for development since its inclusion in the former Plan in April 2017. Further the detailed examination of Policy RSA22 now HSA19 means that it may not be delivered in future either or may only delivered with reduced capacity and area. Our Clients would prefer that Site RSA22/HSA19 is now omitted. Failing this its capacity should be significantly reduced. However if there is a need for additional housing then our Client's site formerly LAM007 Land off Rockfell/Folly Road should be included as a site to ensure that the Local Plan Review is both sound and effective.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	We do not consider the LPR is sound and would like to participate in the examination.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>Please give reasons for your answer</p>	<p>Thakeham notes that this site was allocated in the 2017 Site Allocations Plan where the policy states "This site is expected to delivery early and to contribute immediately to the supply of land needed to demonstrate a five year housing land supply". Despite this, the site has not commenced, and successive Annual Monitoring Reports fail to give any justification. As stated elsewhere in these representations, the Council should not just allow these allocations to roll forward unless there is a reasonable prospect of them being delivered, or at least supporting them with additional allocations should they continue to prove undeliverable, with sites that are demonstrably available, suitable and deliverable, such as the Site at Wantage Road, Lambourn.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes	Yes

* No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes
Please give reasons for your answer	We note and support the proposed criterion in each of the policies listed in this representation that relates to desk-based archaeological assessment and, if needed, field evaluation.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	
4. Proposed Changes	For all sites listed in this representation, while we support the policy requirement for desk-based archaeological assessment and, if necessary, field evaluation, the language used across the policies used is not consistent. The Council may wish to review the language used across these policies to ensure it improve consistency. We do not consider this is a matter of soundness.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>Please give reasons for your answer</p>	<p>Delivery of Proposed residential site allocations</p> <p>It is important to assess the progress and delivery of the sites identified in the LPR to meet housing requirements, in order to ensure there is sufficient certainty. This is particularly the case where allocation have been 'carried over' from the previous adopted Core Strategy. These amount to 2,652 dwellings, and represent a significant proportion of the overall housing requirement.</p> <p>Following an initial review of this progress, the table below lists those sites where there has been no progress or where progress has stalled are listed in the table below <i>[for table in full, see attachment 'Turley (Hathor Properties) Table']</i>, along with a review of their current planning status.</p> <p>Retained allocation from Core Strategy: Land adjoining Lynch Lane, Lambourn. 60 dwellings</p> <p>Planning status: No planning application submitted at the current time.</p> <p>Based on the above, there remains some uncertainty regarding delivery from these existing long-standing allocations, particularly during the first five years of the LPR period.</p> <p>The LPR is clear that Newbury is the primary settlement in the District and has the greater potential to deliver sustainable development, yet it is not the primary focus for the proposed housing allocations. In order to secure a more balanced approach to delivering sustainable development across the LPR plan period, and to assist in delivery of a likely shortfall in housing in the short term, Newbury is well placed to accommodate further allocations.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>Our position is that the site should be included as a proposed residential allocation and that the LPR does not provide enough sites to provide sufficient housing supply.</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No</p>	<p>Yes</p>

Please give reasons for your answer	<p>The site allocations presented in this chapter have not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of each site to accommodate development. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on these sites. We have concerns and have provided this information in a separate document <see comments below></p> <p>The site is partly Flood Zone 2+3. River Lambourn SAC and SSSI approx 25m from site. Principal bedrock aquifer and secondary aquifer</p>

	<p>Developments connecting to East Shefford STW may be problematic. The River Lambourn SAC is an area of nutrient neutrality meaning any additional loads from the STW would need to be offset elsewhere in the catchment. Natural England will be better placed to advise on the specifics of this. East Shefford STW has a 0.1mg/l stretch target for P. East Shefford is an exceptionally high spilling site, mostly due to Ground Water infiltration. We would not support additional flows to this site until work has been done to reduce the frequency of storm overflows. As with Newbury or any site with stretch targets for Phosphorous, any additional loading may impact their ability to meet the environment act objectives.</p> <p>As stated in our suggested amendments and notes on Policy DM7, adequate wastewater treatment infrastructure capacity resources must be available or provided to support all proposed development prior to the occupation. Due to the constraints highlighted for this site, this must be stated in the policy text for site RSA14.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes	No

<p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>Objection.</p> <p><u>Policy Site Ref HSA 20/(Emerging Policy)RSA 23. Now site RSA15 Formerly LAM015 Newbury Road Lambourn</u></p> <p>Site HSA 20/RSA 23 should be deleted and replaced by our Clients previously preferred Option Site "Land between Folly Road, Rockfel Road and Stork House Drive" (SHLAA site reference LAM007). Site HSA 20/RSA 23 has not commenced development since being allocated in April 2017. Indeed planning permission was refused that year because:-</p> <p>"1. Notwithstanding the fact that the application forms part of the HSADPD 2017 as adopted, the applicant has failed to enter into a s106 planning obligation to achieve an appropriate contribution, for affordable housing of £400,000, in accord with policy CS6 in the West Berkshire Core Strategy 2006 to 2026. It is thus contrary to policies GS1 and HSA20 in the HSADPD of 2017 and policy CS6 as identified and the advice in the NPPF".</p> <p>Please see application17/00825/FULD and the refusal notice dated 19th October 2017.</p> <p>A further application has been made to develop the site for eight houses (20/00972) which has been approved but apparently is not going ahead as a further application has been made (22/00277) for only five units - but that remains undetermined..</p> <p>In the 2017 application the Parish Council and Natural England objected because of the visual impact on the landscape. There was no information on flooding and archaeology and there were highways problems with bin storage, the need to move a bus stop and the lack of a foot path across the entire site frontage. No affordable housing was provided.</p> <p>This fact and the abandonment of the scheme for eight houses rather suggests that the site is not practical or economic to develop.</p> <p>Application ref.20/00972/FULMAJ was amended from 10 to 8 dwellings which exceeded the Local Plan density.</p> <p>The principal problem with the development is stated to be the effect on the wider landscape character of the area, in particular against the underlying objective to conserve and enhance the landscape character of the AONB. The proposed development due to its high density of dwellings is thought to form a hard settlement edge, which will be out of character with the adjacent settlement edge characterised by a low density of development in mature gardens. The proposals are currently considered to result in an adverse effect on the wider landscape character of the AONB.</p> <p>Policy HSA20/RSA 23 is a very small, inflexible site and makes little contribution to housing supply (five dwellings). It appears to have been included (and the notional capacity of HAS 19/RSA 22 increased) merely so that our Clients site LAM007, previously included as being acceptable, could be excluded.</p> <p>Policy HAS 20/RSA 23 (or LAM015) was not examined in the West Berks Landscape Sensitivity Assessment by Kirkham Landscape Planning.</p> <p>The reference to the site in The Lambourn Site Assessment was both cursory and inadequate.</p> <p>The Parish Council were not consulted (apparently it appears neither were statutory consultees).</p> <p>HAS 20/RSA 23 scored poorly when compared against the criteria in the settlement boundary review. It was accepted that it forms an extension of the existing settlement boundary.</p> <p>HAS 20/RSA 23 was selected at a late stage and has no identifiable feature to create its northern boundary. There is no landscaped boundary. It is on a ridge and can be described as an open area on the edge of the settlement seen at the entrance to the village. It also lies close to the Medieval Village of Bockhampton.</p> <p>Policy HAS 20/RSA 23 should be deleted and our Client's site formerly LAM007 "Land between Folly Road, Rockfel Road and Stork House Drive" (SHLAA site reference LAM007) should replace it.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>Please see other submissions on this specific point <See Rep: ID1170></p>
<p>4. Proposed Changes</p>	<p>Site HAS 20/RSA 23 should be omitted. It did not go through the rigorous consultation process or selection procedure applied to other sites such as our Client's LAM007. Its impact on the landscape was never adequately assessed. It is further from services than LAM007 and has a number of other disadvantages. It is not practical or available for development currently.</p> <p>The inclusion of HAS 20/RSA 23 would undermine the Plan and would mean that it is both unsound and ineffective</p>

5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	We do not consider the LPR is sound and would like to participate in the examination.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure.</p> <p>The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.</p> <p>Early engagement between the developers and Thames Water would be beneficial to understand:</p> <ul style="list-style-type: none"> • What drainage requirements are required on and off site • Clarity on what loading/flow from the development is anticipated • Water supply requirements on and off site <p>The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.</p> <p>To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.</p> <p>Link here > https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity</p> <p>We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.</p> <p>Water Response</p>

	<p>On the information available to date we do not envisage infrastructure concerns regarding water supply network infrastructure in relation to this development/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p>Waste Response</p> <p>On the information available to date we do not envisage infrastructure concerns regarding wastewater network or wastewater treatment infrastructure capability in relation to this site/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p>Additional Comments</p> <p>These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water flows being discharged to the public sewer.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water to determine whether a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered is required.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? -	No

<p>Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure.</p> <p>The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.</p> <p>Early engagement between the developers and Thames Water would be beneficial to understand:</p> <ul style="list-style-type: none"> • What drainage requirements are required on and off site • Clarity on what loading/flow from the development is anticipated • Water supply requirements on and off site <p>The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.</p> <p>To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.</p> <p>Link here > https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity</p> <p>We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.</p> <p>Water Response</p> <p>On the information available to date we do not envisage infrastructure concerns regarding water supply network infrastructure in relation to this development/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p>Waste Response</p> <p>On the information available to date we do not envisage infrastructure concerns regarding wastewater network or wastewater treatment infrastructure capability in relation to this site/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p>Additional Comments</p> <p>These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water flows being discharged to the public sewer.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	

4. Proposed Changes	Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water to determine whether a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered is required.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No

<p>Please give reasons for your answer</p>	<p>In summary, Rivar, in principle, support the allocation of the 'Land north of Southend Road, Bradfield Southend' for residential development. However, there are concerns with some of the criteria.</p> <p>Land north of Southend Road, Bradfield Southend</p> <p>Pro Vision is instructed by Rivar Ltd to submit representations in response to the West Berkshire Council ('the Council') Regulation 19 Consultation on the proposed submission version of the Local Plan Review (LPR) to 2039, herein after referred to as the 'the Plan'.</p> <p>Background</p> <p>Specifically, this representation is made in relation to our client's interest at Bradfield Southend and 'Land north of Southend Road'. We have previously submitted this site to the Council as part of the 'Call for Sites (CfS)' exercise and is identified in the Council's Housing and Economic Land Availability Assessment (HELAA) as site ref: BRAD5. The whole site (c. 2.24ha) was promoted for residential development of approximately 30 dwellings and the HELAA concludes that the site is 'potentially deliverable in part'.</p> <p>Policy SP15 of the Plan identifies part of the 'Land north of Southend Road, Bradfield Southend' as a site allocation for approximately 20 dwellings. A site-specific Policy is included at Policy RSA16.</p> <p>Rivar, in principle, support the allocation of the 'Land north of Southend Road, Bradfield Southend' for residential development in Policies SP15 and RSA16. We also support the increase in the capacity of the site to around 20 dwellings which is considered more appropriate given the site context and anticipated developable area.</p> <p>However, we have concerns regarding some of the specific criteria and wording in the site allocation Policy RSA16.</p> <p>Conclusion</p> <p>The site is suitable, available, and achievable for around 20 new homes, in a timely and sustainable manner. It is considered that the site is a developable option for the following reasons:</p> <p>a) There is a need to identify a range of scale of sites for housing in West Berkshire to meet the indicative housing requirements during the plan period. Due to its scale, the Site can be built out quickly in accordance with paragraph 69 of the Framework.</p> <p>b) Bradfield Southend is identified as a 'service village' in the settlement hierarchy and, therefore, a suitable location for reasonable additional growth.</p> <p>c) The site would adjoin the existing built-up area and is considered an appropriate extension to Bradfield Southend and in-keeping with the direction of growth in accordance with recently approved developments.</p>

	<p>d) Residential development in this location would be in keeping with the surrounding area and would not unduly compromise the purposes of the AONB.</p> <p>e) The provision of additional tree planting provides an opportunity to provide a robust boundary to the settlement and provide landscape and ecological enhancements.</p> <p>f) Further opportunity to deliver new areas of green infrastructure and the creation of areas of green amenity/open space, including biodiversity benefits.</p> <p>g) The site is located in Flood Zone 1 (i.e. low probability of flooding) and a sustainable drainage system would be provided.</p> <p>h) The development of the site will assist in supporting local facilities and other business services in the village through an uplift in population and their associated increase in local expenditure.</p> <p>i) The site is in close proximity to key local facilities and services available. Future residents would therefore benefit from these existing services.</p> <p>j) A vehicular access can be delivered along the existing commercial roadway via Southend Road.</p> <p>k) The scale of development proposed is capable of delivering housing in line with local objectives, such as need for affordable housing.</p> <p>l) The site is greenfield - therefore it is likely that there are no significant constraints (such as contamination) which would preclude development of the site on viability grounds.</p> <p>m) The site is available for a residential development immediately. The development land is within single ownership and Rivar has agreed to purchase the land. Rivar enjoys a reputation for building high quality homes in desirable locations throughout central southern England and is based in Newbury. In recent years, Rivar has delivered a range of sized housing schemes across West Berkshire.</p> <p>n) Furthermore, as far as we are aware, there are no factors which would prevent this site coming forward for residential development.</p> <p>Rivar would be willing to enter into a Statement of Common Ground with the Council to support the site's allocation at the examination stage. The proposed amendments to the criteria could be dealt with through minor modifications.</p> <p>We trust this Statement clearly sets out our client's position at this stage and respectively request that the above is given due consideration as part of the West Berkshire Local Plan Review.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p><i>Site-specific criteria</i></p> <p>A number of the criteria simply require information to be submitted with any planning application (i.e. criteria b. c. d. e. g. h.) or require consideration of other policies in the Development Plan.</p> <p>For ease and clarity, these could be removed as the criteria are covered by other relevant policies in the Plan and by local validation list requirements. The criteria could instead focus on the key matters that will shape development of the site.</p> <p><i>Criteria f - A substantial tree belt will be provided along the northern boundary, linking to the existing tree belt to the north of the site, on the eastern boundary and with new planting on land at Stretton Close;</i></p> <p>Rivar support the principle of the criterion and to create a strong defensible boundary to this part of the village. However, the site allocation boundary (i.e. red line) as shown on the accompanying plan (pg 118 of the Plan) does not extend to the existing northern tree belt. As such, this could potentially lead to uncertainty for decision-makers.</p> <p>As a result, the red line/site allocation boundary should be extended up to the existing northern tree belt to assist, particularly as it forms part of the objective of the policy and site allocation. See Site Location Plan appended to this letter for the suggested revised red line [see attachment 'PS1534 Pro Vision (Rivar) RSA16 Site Location Plan'].</p> <p>A Landscape Opportunities and Constraints Assessment prepared by Enderby Associates was submitted to the Council in June 2021 following discussions on the draft allocation – see enclosed [see attachment 'PS1534 Pro Vision (Rivar) RSA16 Landscape Study']. An extract of the landscape plan is included below to assist. This demonstrates how this criteria can be achieved with a substantial linked tree belt/landscape buffer to the north of the site allocation boundary</p> <p>Figure 1. Extract of Opportunities and Constraints Landscape Plan [see attachment 'PS1534 Pro Vision (Rivar) RSA16 Landscape Plan']</p> <p>Criteria i - Main internal walking and cycle routes for the site will be provided and will be linked to existing routes;</p> <p>Whilst Rivar support the principle of improving pedestrian and cycling connectivity with the village, it is not clear what the Council is trying to achieve with this criteria in this case. This criteria fails to consider the site and village context and the relatively modest proposed scale and rural character of development.</p> <p>Accordingly, the criteria should be re-worded to 'improved pedestrian and cycle access will be provided including connections to local routes where feasible'.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it</p>	<p>Yes</p>

necessary to participate at the examination hearing session(s)? * Yes * No	
5. Independent Examination	We wish to appear at the examination to present our evidence and technical information to support these representations

<p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>The site allocations presented in this chapter have not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of each site to accommodate development. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on these sites. We have concerns and have provided this information in a separate document <see comments below></p> <p>The site is on SPZ2+3, secondary A superficial aquifer</p> <p>We assume wastewater will be discharged at the Reading STW. We have no concerns provided Thames Water are confident any additional flows will not lead to deterioration of phosphate classification. Reading STW is within DWF capacity and not a frequent spiller. The policy notes should include a requirement for developers to liaise with Thames Water to discuss wastewater drainage for the site.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	NA
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>Positively Prepared The plan has not been positively prepared as the allocation RSA17 does not accommodate the need for a new burial ground at Chieveley. Indeed, the allocation of this site entirely for housing will remove the last available suitable site within the village for a burial ground requirement as set out in the adopted parish plan (2011). This requirement is confirmed in the evidence base of Sustainability Appraisal (SA). The objection to Reg 18 plan from the Parish Council confirmed that part of the site was required for a burial ground. The need for a burial site was restated at the Chieveley Parish Council meeting on 14/02/23. Whilst this social need was identified it was not considered in the Sustainability Appraisal informing the local plan when considering the social sustainability of the site. The complete lack of commentary on this would suggest this issue has not been considered and the plan has not been positively prepared with the impact on the community considered at all, despite the previous objection from the Parish Council and my clients. This is unacceptable.</p> <p>Furthermore, the sequential test in Strategic Flood Risk Assessment on flooding considered both residential and burial ground uses with a note that this was promoted by the developer. The sequential test went on to allocate the site for housing development, but the policy in the Regulation 19 version does not include the burial ground. Given the developer was proposing this, and the Parish Council supported this use the plan has not positively reflected the developers/ Parish requirements. Given a change of use application would be required for the burial ground an allocation in the local plan would protect and secure this for the community and create a positive policy securing social sustainability.</p> <p>Justified The plan is not justified by evidence. The allocation of RSA17 entirely for housing is the wrong strategy for this settlement. It would not be sustainable to deny the provision of a new burial ground in the village, it would require funerals (for those residents who choose burial) to be conducted outside the village which forces bereaved families to have to travel by car to other settlements with burial grounds or could force residents to choose cremation for their loved ones as burial will be denied the residents if this development proceeds as currently set out in the plan.</p> <p>The Sustainability Appraisal (SA) suggests that the allocation will not impact on the vitality of the village, however, there is no reference to provision of burial facilities and the need to protect sites for this which are limited due to groundwater issues. Allocation of RSA17 for housing only is not a reasonable alternative, when part of the site is required as a burial ground. The SA states "<i>Positive sustainability impacts are identified in relation to social sustainability</i>" given the loss of a potential burial ground this statement is not true. Social sustainability will be damaged if a burial site cannot be located within the village.</p> <p>The multiple access points shown on the plan accompanying the policy will destroy the frontage ancient hedgerow. The policy is not justified by evidence to show that visibility splays on multiple accesses will not destroy the hedgerow, especially given the bend in the road. Natural England and AONB unit said: "<i>The strong rural character of East Lane should be conserved via retention and reinforcement of the hedgerow if possible. Building height will be important.</i>"</p> <p>Caveat (b) of the policy requires the visibility splays of 2.4 x 43 m. The policy map shows 5 access arrows. If each one of those five access arrows has a visibility splay to the above standard there will be no frontage hedge left. In addition the western most arrow would require visibility over my client's land, so is not acceptable, as it is not available, and the development cannot be achieved as shown on the plan.</p> <p>In addition, the policy at point (c) requires a footway fronting the site. This would remove the entire frontage hedge to achieve such a footway. This policy caveat is not justified by evidence that this will not destroy the frontage hedge.</p> <p>Consistent with National Policy Policy RSA17 is inconsistent with NPPF 73. This requires that planning policies should ensure that new homes can be provided in extensions to existing villages where they are well located and supported by the necessary infrastructure and facilities. Caveat a) to this national policy requires the council to consider opportunities presented for planned investment in infrastructure. The policy does not identify the well-established and planned requirement by the community for infrastructure of a burial ground to serve the wider community. The 2011 Chieveley Parish Plan (a document produced with significant community input) identified significant community support for a new burial ground in the Parish, <u>over a thousand residents</u> who responded, supported the proposal.</p> <p>Likewise, Policy are RSA17 is inconsistent with NPPF 84d). This requires that Planning Policies should support a prosperous rural economy by enabling the development of community facilities. The lack of a policy for the burial ground, and an allocation for housing on the only site suitable for a burial ground is contrary to this policy.</p> <p>Policy RSA17 is inconsistent with section 11 of the NPPF, which seeks to make effective use of land. Paragraph 119 requires that Planning Policy is so promote an affective piece of land in meeting the need for homes and safeguarding and improving the environment and ensuring safe and healthy living conditions. The site shape and frontage would support well over twenty dwellings. An allocation of 15 units is not making effective use of land of this site of 1ha+. NPPF124 b), at 15dph this is below an</p>

	<p>acceptable density and does not optimise use of the site. The housing site needs to be reduced in size by allocation of the northern section as a burial ground as shown on the attached alternative plan.</p> <p>The policy RSA17 is not consistent with National Policy as set out in National Planning Policy Framework (NPPF) the Council's own evidence confirms that the site will have a negative landscape impact on the AONB, as set out in the SA. This is inconsistent with NPPF 176 which requires great weight to conserve and enhance landscape and scenic beauty in the AONB.</p> <p>Policy RSA17 is not consistent with National Policy in NPPF176 as access to the site as proposed multiple access points (item b in the policy) and as shown on the policy map would result in the almost entire loss of the frontage ancient, banked hedge on East Lane to achieve visibility and the footpath described at (c), this would harm the natural beauty of the AONB. In addition, it is not consistent with NPPF180 as the effect of the policy would destroy an ancient hedgerow creating significant harm to biodiversity if the site were developed as shown on the policy map and described in the policy text.</p> <p>Policy RSA17 is not consistent with NPPF 195. The development of the site could harm the settings of three listed buildings namely Old House, Tudor Cottage and Coombe House. It would also impact the setting of the Chieveley conservation area. This is confirmed in the Council's own evidence in the SA which states: "<i>Development has the potential to result in harm to the listed Old House and the setting of Tudor Cottage and Coombe House</i>". The policy wording "(g) development, design and layout will be further informed by heritage impact assessment". The allocation of the whole site for residential development, given potential harm to heritage is not justified. Given advice in the SA as there has been no assessment of impact on heritage assets, more protection is required for the heritage assets as set out in the alternative policy wording.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>No comment</p>
<p>4. Proposed Changes</p>	<p>See 'PS96 Attachment - Alternative Plan'</p> <p>An alternative policy is required to overcome the tests of soundness.</p> <p>The new policy wording should be as follows:</p> <p>Land at Chieveley Glebe, Chieveley (site Ref CHI23) The site showing on the map is proposed to be allocated for a community burial ground (for circa 200 burial plots) and for residential development of up to 15 dwellings. The site will be accessed from a single point of access which will serve both the proposed dwellings and burial-ground which will have a small informal carpark to accommodate 10 cars that could also serve overspill from the Downland General Practice. 15 dwellings will be located to the east of the site and will front East Lane but will be served by a single slip-road to protect the integrity of the ancient hedge and trees along the frontage, which will be retained. The large Sycamore to the west of the site will be retained. A footway will be located inside the hedge boundary. Significant screening in the form of a new biodiversity corridor to the north of the site shall be planted to protect long views and the settings of the adjacent listed buildings, this screen planting shall be between 6 - 10 m in depth along entire rear boundary of the site and will provide an area for biodiversity net gain. Dwellings will be single storey to protect long views on this ridge site to protect the natural beauty of the AONB.</p> <p>The following parameters will apply:</p> <ul style="list-style-type: none"> a) Single point of access from East Lane with a- visibility splay of 2m x 43m to a slip road to serve the whole development. b) A footway will be located inside the site behind the existing hedge c) Additional pedestrian access points may be made to East Lane where the existing trees and hedge is not compromised d) Traffic calming pinch point with/ crossing point installed on East Lane to connect new footway from the site with existing path to the west of site (south of East Lane) e) Sustainable Travel measures will be set out in a travel pack f) The detailed design will be informed by an LVIA g) The scheme will be informed by an ECIA h) The scheme will be informed by a Heritage Impact Assessment i) The site will need to demonstrate nutrient neutrality j) The development will need to deal adequately with both surface and foul water k) A noise survey would be required as part of a planning application <p>The attached diagram (or similar) should replace the current policy map to ensure that the development solution achieves the right balance of uses on the site, achieves strategic landscape mitigation and visual containment to the north, and achieves protection of the frontage hedge.</p> <p>Furthermore, the plan shows how the setting of the Old House (Grade II listed building) will be protected by additional planting on the west of the site and retention of the 100year + Sycamore.</p> <p>The alternative plan shows how access will be achieved by a single point serving a slip way to protect the ancient hedge. A footway adjacent</p> <p>This alternative plan would support a sound policy for the site, as the current plan and policy wording have not planned positively for the settlement and would not achieve a well-designed place so would</p>

	not be consistent with NPPF 127, as the plan does not set out a clear vision for the site and has not included the community requirements for the design policy on this site as expressed both by local residents and the Parish Council.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	The oral examination will allow my clients to explain why the policy is unsound as presently drafted and explain how the policy is not compliant with national policy. The examination will allow my clients to present the sound alternative policy that meets the proper definition of sustainable development and meets the requirements of the NPPF where local communities influence development outcomes to make them more acceptable.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan	No

<p>provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<ol style="list-style-type: none"> 1 The suggestion of 5 separate access points, two of which are on a relatively narrow bend in East Lane, and close to where vehicles currently park by the surgery, is a very poor idea. I assume each access would service at least 3 of the proposed maximum of 15 dwellings? 2 A single access opposite the entrance to Hazeldene (the 2nd proposed access from the west end of the proposed development site) provided with an enlarged road area with roundabout would provide the safest road/traffic access. The road should then extend back and behind all accepted developments along the northern boundary of the site (as similarly was done with properties accessed at Hazeldene (away from Est Lane itself). 3 The number of dwellings (detached/semi-detached/terrace, bungalows not specified in plan?) seems too many for the area. This is especially so if to be a single row and intended to match other existing properties along the north and mostly south side along East Lane. 4 The proposals suggest a footway fronting the site linking to an existing footway to the west of the site. This is on the opposite side of the road and would require a pedestrian crossing for safety (not mentioned). 5 How is it proposed to encourage non-car transport modes given we have almost no public transport, and main roads to nearby towns are hardly safe for bicycle modes of transport? 6 The proposals states that the "site will be required to be developed in accordance with the following parameters". These include a wide range of assessments which the document says will inform the development. Surely no approvals can be granted for such a development until such assessments have been made, detailed site plans brought forward, etc. As written it implies that some level of approval for a development at the site can be granted without detailed assessments and investigations beforehand. We have little faith in the value or adoption of some of likely assessment requirements given the past situation at the current local showground site where two restrictive covenants issued with planning approval were very quickly ignored/changed or just forgotten! 7 A pedestrian walkway/pavement is desperately needed all along East Lane, and with increased traffic rarely keeping to the current 30 mph speed limit – it should be 20 MPH and with speed bumps in the road. The increased traffic associated with the proposed development (could amount to at least 25-30 extra vehicles just with the development) coupled with existing traffic using the Downland practice facilities, as well as through traffic to/from Chieveley centre and beyond makes these road improvements essential. 8 Access onto to the old Oxford Rad from East Lane (east end) is poor (bad sighting) especially as speeds often exceed the newly introduced 50MPH limit along the old Oxford Road. There will be

	<p>a serious accident at this junction one day, with many vehicles turning into East Lane from the north and south, and others trying to access onto Oxford Road.</p> <p>9 How does the proposed development tie in with a proposed burial site on the land?</p> <p>0 Car parking would need to be available for the burial site.</p> <p>1 A public pathway from the development area directly to the recreational ground would be a major benefit to the increased population in East Lane.</p> <p>2 Adequate hedging and tree planting should be considered.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>1 A single access opposite the entrance to Hazeldene (the 2nd proposed access from the west end of the proposed development site) provided with an enlarged road area with roundabout would provide the safest road/traffic access. The road should then extend back and behind all accepted developments along the northern boundary of the site (as similarly was done with properties accessed at Hazeldene (away from Est Lane itself).</p> <p>2 The proposals suggest a footway fronting the site linking to an existing footway to the west of the site. This is on the opposite side of the road and would require a pedestrian crossing for safety (not mentioned).</p> <p>3 A pedestrian walkway/pavement is desperately needed all along East Lane, and with increased traffic rarely keeping to the current 30 mph speed limit – it should be 20 MPH and with speed bumps in the road. The increased traffic associated with the proposed development (could amount to at least 25-30 extra vehicles just with the development) coupled with existing traffic using the Downland practice facilities, as well as through traffic to/from Chieveley centre and beyond makes these road improvements essential.</p> <p>4 Car parking would need to be available for the burial site.</p> <p>5 Adequate hedging and tree planting should be considered.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	I do not believe that the paln corrcrectly applies the considerations set out in the AONB designation
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>This note is with respect to the plan to zone the Glebe land in East Lane Chieveley for housing. East Lane is completely unsuitable for such development and the adjustments required to make this proposal viable will destroy the existing character of the lane and seriously impact the nature of the existing settlement.</p> <p>The house in which I currently live was built by my grandparents and my family have long-standing associations with Chieveley. The village used to feel part of the wider downland landscape and in only a few strides from the high-street you would be able to see the fields and agricultural land surrounding</p>

	<p>the settlement. Gradually, over the years, there has been a creeping infill. I am sure that individually, at the time, these areas of development seemed entirely rational and justifiable but the result has been that nearly all of those views have now gone. This section of East Lane is the last remaining place where you can still do this. The result is that Chieveley is losing its character as a downland village and is becoming, in essence, an urban environment. I do not believe that this can have been the intention of the AONB designation nor do I believe that the small advantage to the village of having these few extra houses can justify the loss incurred by allowing this development to take place.</p> <p><i>(attachment - previous planning response)</i></p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>I do not believe that the area identified is appropriate for the proposed development. I do not believe that this proposal can be made viable. If it is considered that further dwellings are required in Chieveley alternatives will need to be considered.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>No</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	See below
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>In my view the proposal is not in line with recent trends. The road is a country lane with green fields and hedgerows. These hedges are over 60 years old and are regarded as ancient hedges, therefore irreplaceable and should not be removed.</p> <p>The trees date back to at least the 1800s and according to The Woodland Trust should be regarded as veteran trees and accordingly come under Planning Policy 9 Biodiversity and Geological conservation which requires Local Authorities to avoid loss of aged and veteran trees under the Rural communities Act 2006.</p> <p>The root system of these trees should be protected and no parking or access should be allowed 12 times the trunk diameter as this could cause compaction to the root system.</p> <p>Also the road is not wide enough to cope with this increase in traffic. The proposal states that measures will be included to improve use of non car transport but without a good public transport system I fail to see that this could be accomplished at the present time or in the near future.</p> <p>It is also a problem getting a doctors appointment and also I know first hand that it is not always possible to get children into the primary school. I therefore cannot see how this proposal would be an advantage to anyone.</p> <p>I feel we should all be trying to keep the areas of outstanding natural beauty intact for future generations.</p>

	Chieveley is a lovely village but now has few leafy lanes left. I therefore feel strongly we should keep our beautiful places sacrosanct. I do not feel that this development is in accordance with the AONB designation.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	I do not consider that the proposal to set aside the Glebe land in Chieveley for housing is appropriate given the AONB designation or that it is, in fact, a viable proposal given the unsuitable nature of the site.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>Please give reasons for your answer</p>	<p>The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure.</p> <p>The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.</p> <p>Early engagement between the developers and Thames Water would be beneficial to understand:</p> <ul style="list-style-type: none"> • What drainage requirements are required on and off site • Clarity on what loading/flow from the development is anticipated • Water supply requirements on and off site <p>The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.</p>

	<p>To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.</p> <p>Link here > https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity</p> <p>We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.</p> <p>Water Response</p> <p>On the information available to date we do not envisage infrastructure concerns regarding water supply network infrastructure in relation to this development/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p>Waste Response</p> <p>On the information available to date we do not envisage infrastructure concerns regarding wastewater network or wastewater treatment infrastructure capability in relation to this site/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p>Additional Comments</p> <p>These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water flows being discharged to the public sewer.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water to determine whether a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered is required.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>No</p>
<p>5. Independent Examination</p>

<p>development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>I am emailing you in response to the consultation with regards the site allocated for residential development in Chieveley on Glebe Land, East Lane for 15 dwellings. I have tried to respond via your online portal but found it hard to navigate so I am emailing you instead.</p> <p>One of the reason I moved to East Lane was that it was not overlooked and has views of the fields at both the front and rear giving me the privacy I was looking for. My privacy will be compromised as I will be overlooked by many of the proposed properties. This would also impact my visual amenity in this area of outstanding natural beauty. There are also ancient hedgerows beside this land and the road on East Lane which is used by many birds as observed by myself some birds nesting in this stretch of hedgerow. Looking at the plans for the 15 dwellings this hedgerow will be removed in 5 areas to allow access to the dwellings which will destroy most of the ancient hedgerow and will have a negative effect on many of the birds that nest in the hedgerow.</p> <p>For a small village I feel the traffic on East lane is already excessive due to people who live outside the village using the Downland Doctors Surgery. More houses will increase the road traffic and as I haven't seen any plans for the buildings I would wonder if the driveways for these new buildings will have adequate parking for the owners vehicles so that they would not be using East Lane to park on, causing safety issues and a general nuisance.</p> <p>East lane suffers from surface water when it rains and this also causes large areas of water to form in my driveway even though my drive is gravel. The proposed land is also much higher than that of the level of the road and I feel that if this development goes ahead the rain water that is already being dispersed in the field will be vastly reduced causing more surface water on the road and will ultimately find its way in my boundary causing me problems which I will have to resolve</p> <p>On the West Berkshire council website a Landscape Charter Assessment was undertaken by Kirkham Landscape planning ltd and The Terra Firma Consultancy Ltd for development on this site in 2011. https://info.westberks.gov.uk/lca In the report it states</p> <p>Impact on Key Visual Characteristics.</p> <ol style="list-style-type: none"> 1. Localised impact on views to the countryside from the village 2. Loss of the open countryside setting of the village 3. Development would be prominent in views from the road and countryside to the north. <p>Impact on key settlement characteristics</p> <ol style="list-style-type: none"> 1. Development of this whole site would be out of keeping with existing settlement pattern, which is characterised by small estates, with houses closely associated with the main roads <p>In the report it also states that Development on this site would result in harm to the natural beauty of this area of outstanding natural beauty and that this site as a whole should not be pursued as a SHLAA site. It would not be possible to repeat the linear pattern of the rest of Chieveley without developing along the rural road to the east, which would harm the countryside setting on the east side of the village</p> <p>In the response to the west Berkshire Landscape Sensitivity Assessment dated March 2011 all the observations were agreed with and it was considered inappropriate for development and should not be pursued as a SHLAA Site.</p> <p>In another document it states that building on this land (CH1011) will have an impact on the open countryside landscape character from a development on this site which would be significant. There would also be a loss of grade 2 agricultural land. It also states that the development of this site would result in harm to the natural beauty of ANOB. Also in this document it list many other sites in chieveley that are developable which should be considered.</p> <p>As this proposed site has already been assessed previously and the conclusion was that it should not even be considered for development then I would like to know why it is being proposed for development now.</p> <p>With regards the building of these 15 dwellings there will be a significant disruption to this small village due to the delivery of building supplies the removal of waste and also the works taking place. East Lane as I had previously stated is a busy road due to the downland doctors surgery, this build would have an impact on their patients visiting this surgery</p> <p>There will also be a considerable amount of dust and noise due to this build which will impact local residents as well as wildlife. There will also be an impact to the nights sky with regards sky glow for the new dwellings this could also have an impact of night time wildlife as bats are know to be in the area as witnessed by myself. I believe there is also a tree preservation order on the proposed site which would be a habitat for many species of wildlife which must also be considered.</p> <p>I trust you will consider my comments with regards this development and look forward to your response.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where	

<p>practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>Firstly, disappointed that West Berkshire Council have progressed this site without actioning the local community feedback and needs outlined in the Chieveley Parish Plan nor the local concerns and information shared. A few to mention; burial ground, protect the old hedgerow and trees, road safety in lane and junctions with the High Street and Oxford Road, flooding and parking issues.</p> <p>RSA17 (RSA26) Previously CHI23</p> <p>Originally the whole field and a burial ground with access from Oxford Road was put forward by the Diocese but was dismissed at HELAA early stages (CHI023) but then at some point became 'change to proposed use' classification but only for the current site area now proposed. No mentioned of a burial ground included which was pointed out in the consultation December 2020- February 2021.</p> <p>Burial Ground</p> <p>Chieveley Parish Plan, endorsed by West Berkshire Council, identified that 57% of residents wanted a burial ground as it was recognised that St Mary's Church Burial Ground was running out of space. The land proposed in RSA17 (RSA26) was felt to be the best location for a burial ground. The burial ground could be accessible through the site and run along behind the Old Vicarage on the west side of the site.</p> <p>A historical plan drawn up by the Diocese in 1994 for the whole field shows one access off East Lane [see attachment 'PS1180 Tracy Snook 1994 Plan']. Something positive to consider here.</p> <p>4 accesses are excessive and should be avoided due to sightlines that will be required involving the destruction of an old hedgerow and established trees and how it will impact on the Doctor Surgery parking and street scene. Also means a footway fronting the site (c) will not be required which is unnecessary urbanisation in a rural village as people can cross the road to the south side by the Doctors Surgery which has a footway on the south side and links to the centre of the village and PROWs.</p> <p>The site land sits higher than the lane and houses opposite.</p> <p>Using a percentage of this site for a burial ground will affect the West Berkshire Council parameter for the provision of 15 dwellings (a).</p> <p>Chieveley did a Housing Needs Survey which captured the local housing need and should be used to guide on the housing mix for this site.</p> <p>PROW</p> <p>In the Parish Plan 82% valued the PROWS.</p> <p>The Diocese 1994 historical plan showed a new footpath through the proposed site and across the Diocese land to the Recreational Centre land to improve the community infrastructure links and to other PROWs in the area. A great idea and supports the WBC Infrastructure Development Plan by improving links. This should be included more specifically as a local parameter rather than lost under the generic (d) parameter for the village.</p> <p>Essential that this site does not close off PROW infrastructure improvements for the village for its future growth. As custodians of the village for future generations we have to consider the impact of what happens now for the future growth of the village.</p>

	<p>It will be essential to help form links to the Recreational land for the new housing and villagers using CHIE/2/2 & CHIE/4/1 and East Lane to get to community facilities and should be specified in the parameters [see attachment 'PS1180 Tracy Snook PRoW Plan'].</p> <p>The Diocese clearly thought to offer PROW infrastructure improvements and a burial ground back in 1994 and with the recent original call for site consultation process. This should positively be encouraged in discussions with the landowner and safeguarded by including it in the WBC site parameters.</p> <p>In summary</p> <p>A percentage of this site should be zoned and classified as a burial ground to be transferred to the Parish Council. A burial ground accessible through the site and zoned along behind the Old Vicarage on the west side of the site.</p> <p>Access to be limited to one main access to serve the new housing and burial ground.</p> <p>A housing mix using the Housing Needs Survey.</p> <p>A new PROW created through the site and across to the Chieveley Recreational Centre to improve off road connectivity between community facilities for the villagers and to accommodate future village growth for future generations beyond 2039.</p> <p>It is good that a village has an element of new development and growth as it is healthy. It has to be done in a careful measured way to meet the community's needs as it grows.</p> <p>Please can West Berkshire Council give more weight to the Parish Plan to support community goals through Local Plan Reviews.</p> <p>(attachments)</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	I have been reviewing the plan for this site and just wanted to raise a couple of points that concern me about it for you to consider: <ul style="list-style-type: none"> The full stretch of the boundary that is by the road in East Lane is currently established hedgerows, grass verges and some trees which are habitats and natural corridors for the local wildlife – including different species of birds and insects, this should be protected.

	<ul style="list-style-type: none"> • Currently there are five access points on the plans, one opposite the doctors surgery car park entrance and two on the corner. These in particular concern me from a road safety point of view (for other car users and pedestrians) and the number of entrances concerns me from the point of view of trying to maintain as much of the hedgerow as possible. • It mentions a footway fronting the site, which I don't see is possible alongside the road as there doesn't seem to be enough space for one alongside the hedgerow as it is quite a narrow road anyway. • This is already a busy road with the doctors being along it (and it gets even busier when the other main road through the village is closed and traffic is diverted). People park outside the doctors on the road throughout the day as there is not enough room in the car park, or to visit the pharmacy. Putting more houses down this road will increase the amount of traffic that goes down this road and neighbouring roads, which can already be quite dangerous to walk along and sometimes drive along. I personally walk along this road with my two small children to do the school and nursery run every day (one of the perks of living in a village) and it can already be a scary experience. The idea of increasing the number of cars does concern me from a road safety aspect for the pedestrians who use it on a daily basis and for other car users.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	As the Council will know, it has a duty under the Planning (Listed Buildings and Conservation Areas) Act 1990 to pay special attention to the desirability of preserving or enhancing the character or appearance of that area.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes
Please give reasons for your answer	As a result of the lack of Conservation Area Appraisal and insufficient heritage assessment, currently we regard RSA17 as unsound because it is not based on proportionate evidence as required by paragraph 35 of the NPPF. We advise that proportionate heritage assessment is done on RSA17 at this stage to inform this allocation. We note the proposed criterion: "The development design and layout will be further informed by a Heritage Impact Assessment;" Leaving aside the redundancy of the word "further", we assert that the evidence base for this allocation is currently insufficient. Chieveley conservation area does not currently have a conservation area appraisal. We advised in our letter of 5 February 2021 that a conservation area appraisal is needed as part of the plan-making process (i.e. prior to allocation), to inform development on this site. Our letter of 5 Feb recommended as a minimum that heritage impact assessment (HIA) is needed to inform the allocation. HIA would enable further consideration of the relationship between the site and nearby heritage assets, inform the approach to

	<p>hedgerows (identified in the HELAA site assessment) and check some of the details in the HELAA, which states that Tudor Cottage and Coombe House are listed.</p> <p>The Sustainability Appraisal in Appendix 8b also notes that "The site is likely to have a negative impact on heritage assets as the site is adjacent to the conservation area with a number of listed buildings" and that "Survey work would be required and mitigation measures may be required."</p> <p>Also, we note the HELAA site assessment recommends that some archaeological work to be undertaken, but this is not included in the criteria. We suggest it is added.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	Yes
Please give reasons for your answer	
<p>4. Proposed Changes</p>	<p><u>Evidence base</u> More detailed heritage assessment to inform the allocation, which may result in amendments to the policy</p> <p><u>Policy RSA17</u> Proposed additional text:</p> <p><u>The scheme will be informed by an archaeological desk based assessment as a minimum and field evaluation if required to assess the historic environment potential of the site</u></p>

Please give reasons for your answer	<p>Ref: CH123</p> <p>We are writing to you to object to the above reference.</p> <p>We are the owners of <personal details removed> which sits opposite the land in question. Our family have lived in this dwelling for 75 years and have enjoyed the pleasant country outlook at the front and rear of our house.</p> <p>We have the following concerns if the proposed development was to be actioned:</p>

	<ul style="list-style-type: none"> The potential destruction of the mature hedgerow and trees along East Lane. The ancient hedgerows and trees provide a vital habitat for wildlife and contribute significantly to our outlook and the character of the surrounding area, which will be a significant loss for us and the community. East Lane is already a high traffic zone mainly due to the positioning of surgery. Having additional houses will only add to this equalling in additional pollution from noise, vibration, light and exhaust emissions. It is not safe or practical to have multiple driveway access points onto East Lane due to the sharp bend and height of traffic activity. If a development was approved, we would like to suggest that a road entrance be considered opposite Hazeldene that could also serve access to the potential burial ground and additional parking for the surgery. This single access point could serve all while also preserving the ancient hedgerow, trees and most importantly the character. Light pollution from the proposed development will affect the intrinsically dark landscape of the countryside. Although social housing must be considered, we recommend that dwellings be located in 'like for like' manner, with ideal placement being towards Hazeldene. We feel it is crucial to protect East lane and open space for generations to come and strongly urge you to consider all the points above.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>The site allocations presented in this chapter have not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of each site to accommodate development. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on these sites. We have concerns and have provided this information in a separate document <see comments below></p> <p>The site is on SPZ3, secondary A and principal bedrock aquifers</p> <p>This site would require a Flood Risk Assessment which demonstrates requirements of NPPF and PPG. This is due to its size (greater than 1 hectare). This requirement should be included in the list of requirements for assessing and developing the site.</p> <p>Developments connecting to Chieveley STW may be problematic as it discharges into The River Lambourn SAC which is an area of nutrient neutrality meaning any additional loads from the STW would need to be offset elsewhere in the catchment. Natural England will be better placed to advise on the specifics of this. Mitigation of additional load will need to be secured before any development can proceed.</p> <p>As stated in our suggested amendments and notes on Policy DM7, adequate wastewater treatment infrastructure capacity resources must be available or provided to support all proposed development prior to the occupation. Due to the constraints highlighted for this site, this must be stated in the policy text for site RSA17.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>

<p>Please give reasons for your answer</p>	<p>Chieveley Parish Council broadly supports a number of aspects of the Proposed Submission Local Plan including the overall vision and strategic objectives of the plan, policies supporting the conservation and enhancement of the AONB, the settlement hierarchy, and the need for some development in villages such as Chieveley where it is acceptable in terms of visual impact in the AONB to support local needs. The Parish Council also considers that, of the sites potentially developable at present, Land at Chieveley Glebe, Chieveley identified at Policy RSA17 is most likely to be acceptable. It also supports several criteria listed at RSA17 points (a) to (i). That said, Chieveley Parish Council agrees with the Council and its landscape assessment that the larger area of land at RSA 26, which was previously shown in the December 2020 document and the HELAA, should not be developed.</p> <p>Chieveley Parish Council still does not agree, however, that the strategy is appropriate with regard to a number of aspects of the Policy RSA17 Land at Chieveley Glebe, Chieveley allocation.</p> <p>The specific objections which lead the Parish Council to conclude that, as it stands, Policy RSA17 is not justified are set out below.</p> <p>Having regard to these objections the Parish Council believes the allocation is not in accordance with the following policies of the NPPF:</p> <ul style="list-style-type: none"> • NPPF para 126 – there are specific design aspects arising from this allocation and it is not clear how these are to be resolved and/or tested. • NPPF para 127 to 130 – despite these aspects having been raised previously, the vision, expectations and assurances for this site still lack clarity in the context of these sections of the NPPF. • NPPF para 93 and 96 - <i>To provide the social, recreational and cultural facilities and services the community needs, planning policies and decisions should ... plan positively for the provision ... of community facilities ... and other local services to enhance the sustainability of communities and residential environments.</i> The opportunity exists here to provide a much-needed community facility in the form of a burial ground, although there appears to be support for this by the community and promoter, it is not provided for in the supporting text of the policy. • NPPF para 100 - <i>Planning policies ... should protect and enhance public rights of way and access, including taking opportunities to provide better facilities for users, for example by adding links to existing rights of way networks ...</i> This opportunity is also currently being missed. As described further below, the means of achieving the required footpath improvements along the frontage of the site are unclear and a unique opportunity for much needed enhancement to connectivity with the recreation ground which had been proposed by the promoter of this site previously, with a similar scheme, has been overlooked entirely. <p><u>The size of the allocation and number of dwellings</u></p>

No site area is specified in the Proposed Submission LP document, but the December 2020 Emerging draft stated for the same site: *The site has a developable area of approximately 1.1ha, which is acceptable in landscape terms...*

The HELAA January 2023 - Figure 3.2: Density by location (Source: West Berkshire Density Pattern Book, 2019) gives indicative densities of Rural AONB – 15dph; Edge of Village/Settlement AONB – 20dph. These give a development potential of between 16 and 22 dwellings depending on whether classed as rural or edge of village. It is most certainly not 'within village'.

Chieveley Parish Council has regard to many concerns raised about development in this location because of existing traffic problems at the medical practice opposite and elsewhere in the village including near the shop and at the west end of Graces Lane. Access from East Lane to the High Street and to the Oxford Road also have poor sight lines.

Other issues associated with the site concern access to the proposed dwellings, footpaths, and access to a proposed burial ground. Further extension to the site is also unacceptable in landscape terms.

Concerns about development density and traffic specific to this allocation have been raised in several representations made on the December 2020 draft and to the Parish Council since January 2023.

Having regard to the traffic issues; limitations imposed by site accesses; other access requirements (e.g., burial ground and PROWS); the rural nature of the site; and the existing character of the East Lane, Chieveley Parish Council believes the upper limit of 'up to 15 dwellings to be delivered at a low density in keeping with the surrounding area' at RSA17(a) is justified and must be adhered to. We remain concerned that this will be eroded, and the explanatory text must remain on this point.

Access to the site and hedgerows

It is still not clear how satisfactory accesses to the site will be achieved onto East Lane even if '*accesses may need to serve more than one dwelling*'. It appears inevitable that multiple accesses with sight lines will remove large parts of the mature hedgerow with mature trees fronting East Lane. A better thought-out access arrangement should be prepared to ensure the site is deliverable and acceptable. Alternative access arrangements need proper assessment, including a possible single access point.

Wider Transport and Traffic Issues

In the Council's responses to previous representations contained in the Proposed Submission LPR 2022-2039 Consultation Statement (Dec 2022), WBC responds to wider transport concerns with: *The Local Highway Authority have advised that they have no concerns regarding the provision of 15 dwellings with regards to traffic impact.*

Chieveley Parish Council is aware of many concerns about the acceptability of existing traffic conditions in the village, particularly problems at the Surgery and on the High Street near the shop and at the west end of Graces Lane. Access from East Lane to the High Street and to the Oxford Road also have poor sight lines.

Public Rights of Way

With regard to item (c), we agree that a footway must be provided on East Lane with this development but it difficult to see how this can be provided '*fronting the site*' (RSA17 (c)) without removing the existing hedgerow fronting the site. More detail of footpath improvement on East Lane should be provided.

Secondly, we believe that PROW improvements are required with this scheme, on land with the same control, to provide the footpath to the recreation ground that was previously proposed for this site as shown on the attached plan.

(See - PS1459 Chieveley Parish Council - attachment)

Burial Ground

Chieveley Parish Council welcomes the confirmation by the Diocese of Oxford that it is willing to provide land for a burial ground: lpr1940 Diocese of Oxford (Mr David Mason - 1272813). This is a significant commitment from the Diocese and is relevant to this Local Plan and allocation RSA17 because (i) it is a unique opportunity to provide a community facility and meet a local need and (ii) the possibility of providing the burial ground in this location is entirely dependent on access from East Lane which should be planned within this allocation.

However, in the document 'Consultation Statement for the Proposed Submission West Berkshire Local Plan Review 2022-2039 December 2022 (the Consultation Statement)', West Berkshire Council suggests an entirely different concept for the burial ground scheme and its access to that supported within the community. At page 2747 and 2748 of the Consultation Statement, West Berkshire Council says that access would need to be from Oxford Road. In the opinion of Chieveley Parish Council, that's unjustified and unreasonable. If East Lane can service the medical practice, existing dwellings, and allocation RSA17, it seems illogical to suggest it cannot also service a small burial ground extension requiring very few traffic movements, which would be entirely out of peak hours of traffic movement.

The reason for this being the preferred site for a burial ground is that land in the area of RSA17 on this part of the Glebe Land is one of the few sites within easy walking distance of St Mary's Church, Chieveley.

To take access to this land from Oxford Road as proposed by WBC would be seemingly absurd, both in terms of access and movement and visual impact.

The Regulation 18 response lpr 1940 which is repeated in full in the Consultation Statement relates to RSA17 and is not conditional on access from Oxford Road.

	<p>Therefore, Chieveley Parish Council continues to object strongly to the allocation as conceived by West Berkshire Council, with access to a burial ground extension from Oxford Road. The access needs to be from East Lane and that needs to be incorporated in the RSA17 allocation.</p> <p><u>Social Housing</u></p> <p>At least 40% of the proposed dwellings must be affordable housing, including housing for key workers, in accordance with other policies in this plan.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Problems at the medical practice in particular; and elsewhere in the village near the shop, at the west end of Graces Lane. Access from Est Lane to the High Street and to the Oxford Road also have poor sight lines.</p> <p>b. Alternative access arrangements to the site must be evaluated to provide a satisfactory solution that is also acceptable in terms of biodiversity, PROWs and access to a new burial ground. A transport assessment should also consider the wider traffic and transport issues including existing traffic issues at the medical practice, on the High Street and Graces Lane, and visibility issues at the junctions of East Lane with the High Street and Oxford Road.</p> <p>c. What is currently stated about 'a footway fronting the site' appears likely to further impact the existing hedgerow. We do not believe this allocation can be justified or in accordance with the NPPF without some better understanding of how this will be achieved.</p> <p>j. At least 40% of the proposed dwellings must be affordable housing, including housing for key workers, in accordance with other policies in this plan.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>This is an important allocation for the community of Chieveley and the Parish Council should be able to make these points and explain why they are relevant to the Plan.</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No</p>	<p>Yes</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	It is impossible to comment as the council is neither Legally Qualified nor an expert in LPR Legal Compliance
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? -	Yes

<p>Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>The council disagrees with the definition of "Positively Prepared".</p> <p>Plans which are both complex and cross representational boundaries are inherently difficult to deliver and hence "Ineffective"</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>Poor evidence of inclusion of NDPs or co-operation with local communities.</p>
<p>4. Proposed Changes</p>	<p>Paragraph 2 needs the following addition in order to ensure the Compton Neighbourhood Development Plan is taken into account with regards to development on this site:</p> <p>The site, as shown on the indicative map, is to be comprehensively redeveloped delivering a residential led mixed-use scheme with a mix of employment floorspace, green infrastructure and community uses in accordance with the adopted SPD, and, more recently, the adopted Compton Neighbourhood Development Plan (NDP) (adopted 2022).</p> <p>Point e needs the following addition, in order to remove potential ambiguity that may be used to limit necessary highway improvements on the High Street:</p> <p>e. The existing access from the High Street will form the main access to the development with potential for a minor access from Churn Road. The rural character of Churn Road and Hockham Road will be retained and highway improvements should therefore be limited on these two roads;</p> <p>Point g: Concerns were raised that the distance to walk to The Ilsleys Primary School from the Institute site is too significant for primary age children and should not, therefore, be included in this policy. CPC, therefore, requests removal of the final sentence "If feasible, access for residents to Compton Primary School and/or The Ilsleys Primary School should be provided;".</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	<p>No</p>
<p>5. Independent Examination</p>	
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes</p> <p>* No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes</p> <p>* No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes</p> <p>* No</p>	<p>Yes</p>

Please give reasons for your answer	The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure.

The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.

Early engagement between the developers and Thames Water would be beneficial to understand:

- What drainage requirements are required on and off site
- Clarity on what loading/flow from the development is anticipated
- Water supply requirements on and off site

The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.

To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.

Link here > <https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity>

We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.

Water Response

The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website <https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development>.

Waste Response

On the information available to date we do not envisage infrastructure concerns regarding wastewater network or wastewater treatment infrastructure capability in relation to this site/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ

Additional Comments

PFC Calc for proposed development advises Low to No Risk. Pipe Capacity Calc = 7.6 % based on connection to 150mm dia FW Sewer located in Churn Road. GM 14/02/2023

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water to determine whether a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered is required.</p>

1. Do you consider the Local Plan Review is legally compliant?	Yes
* Yes	
* No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.	Yes
* Yes	
* No	
2. Do you consider the Local Plan Review is sound? -	Yes

<p>Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	Yes
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	Yes
<p>Please give reasons for your answer</p>	<p>We note and support the proposed criterion: "An archaeological desk based assessment will be required as a minimum and field evaluation if necessary to assess the historic environment potential of the site". The Council may wish to make wording on archaeological assessment more consistent across its site allocation policies, as highlighted in our cover letter.</p> <p>While we welcome reference to special architectural and historic interest of the Compton Conservation Area, the wording is currently ambiguous, with a lack of clarity about what "It" refers to, and we advise reference to "conserve and enhance", rather than "take into account" which is weaker than required by legislation.</p> <p>We encourage the preparation of a CA Appraisal as a priority to support effective decision- making and implementation of this policy. Meanwhile, we note the existing Supplementary Planning Document that provides guidance on redevelopment of this site, including (based on our limited review) content on the significance of the conservation area.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	Yes
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p><u>The scheme</u> It will also <u>conserve and enhance</u> explain how the special architectural and historic interest of the Compton Conservation Area and <u>protect</u> its setting has been taken into account...</p>

Please give reasons for your answer	<p>The site allocations presented in this chapter have not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of each site to accommodate development. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on these sites. We have concerns and have provided this information in a separate document <see comments below></p> <p>The site is partly Flood Zone 2+3 and there is a main river approx 20m from site. The site is on Source Protection Location on site. SPZ1, principal bedrock aquifer, secondary A superficial aquifer, historic landfill site to NW of site (Churn Road)</p> <p>Under point k (i.e., the list of requirements to manage flood risk on site) we request adding the following: iii) 'detailed computer modelling of the river Pang which runs to the south of the site will be required to</p>

	<p>inform development proposals, including the latest Climate Change Allowances.' (Note that the Environment Agency does not currently hold detailed modelling of the Pang in this location).</p> <p>Please refer to the Environment Agency's Approach to Groundwater Protection guidance for the types of development proposals that we would object to within a Principal Aquifer.</p> <p>Compton STW is a high spiller, so this issue needs to be addressed before connecting more flows to the works. Additional flows will lead to an increased instance of storm overflows. Development will lead to a deterioration in Phosphorous so a new permit will be required to prevent this from happening. Mitigation of additional load will need to be secured before any development can proceed. This wastewater drainage constraints should be highlighted for this site and stated in the policy text for site RSA18.</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	The plan in no way takes in consideration what current residents want or need in their locality. Evidence of potential flooding has been found, but because the flooding isn't on the actual sites it's ignored, impact on surrounding housing hasn't been considered
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	I don't think the plans for great shefford have considered the impact on spring meadows fully, there are sections with footpath and no surplus road width to allow them, the roads are barely two car width wide. It hasn't it been considered that the parking is already difficult and there will be at least 30 more cars travelling through the street. 15 houses is too many. Flooding is a major issue In the village the plan identifies that the planned area is at risk of flooding, but it doesn't appear that the current housing flooding risk has been assessed, it's also been identified that there will be too much pressure on the sewage works in east shefford.
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	<p>Policy RSA 19 (Site Ref: GS1): Development of the proposed allocation site would be contrary to the provisions of the Habitat Regulations 2017 (as amended) as it would provide an adverse effect on the integrity of the River Lambourn SAC through the cumulative impact of sewage pollution. The site will require connection to the existing sewage network, which is failing and has been subject to substantial work from Thames Water in the last 15 years and this work has been documented through the Lambourn Valley Flood Forum.</p> <p>The system cannot cope with existing use during periods of high ground water and is surcharging into the riverine environment. Thames Water has been trying to line the system to stop ingress of ground water, but this is not a sealed system. This proposal would add to the significant adverse impact on the River Lambourn SAC. The proposal to upgrade the East Shefford Sewage Treatment Works and the new flood alleviation scheme will not resolve the specific issue of ground water infiltration, and therefore capacity and pollution in the foul network. The ongoing mitigation works has been considered at recent Lambourn Valley Flood Forum meetings. Continuing impacts of the failing sewage network on the valley and the River Lambourn SAC are likely to be made worse by development here. This applies even with phasing considered in the draft policy. This policy should be thoroughly reviewed by relevant parties and through a Habitat Regulations Assessment of the Local Plan. The mitigation will not be deliverable in a system that has such ground water issues and therefore the plan will fail the integrity tests of the Habitat Regulations and will have to consider over-riding public interest and alternatives. It should fail both these tests given the parameters of the allocation.</p>
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.	No

* Yes * No	
Please give reasons for your answer	<p>The draft Policy RSA 19 (Site Ref: GS1) has not had regard to significant local concerns. Pollution and flooding are discussed above in relation to the River Lambourn SAC, but also affect the village - people at the lower end of the village have sewage surcharging into their gardens during high infiltration periods. The allocation will add to this for the reasons outlined above with regard to the River Lambourn.</p> <p>Surface water issues are mentioned and that certain areas of the site should be avoided in relation to development. The village suffered significantly in the flash floods of 2007 (see also the Council's own report from 2007). The proposed allocation site is c2m above the existing dwellings in the village. Altering the landform in this location will exacerbate potential for future flash floods to existing residents. Relying on a developer's surface water strategy is not appropriate given the hydrology and topography of the site, and surrounding sensitive receptors. The Council needs to fully address this at this stage if they are going to forward this allocation. Infiltration or storage in underground containers is not appropriate in areas of high groundwater.</p> <p>The proposal does not address adequately the potential landscape and visual impacts. It is left to a future LVIA. This needs to be addressed now at this stage as it is likely to have a significant impact on the AONB. The site is 2m higher than elsewhere in the village, can be seen from the surrounds, and unless it can commit to no street lighting will further impact on the dark sky environment.</p> <p>The site is not sustainable, and wording to the effect of encouraging non-car modes of transport is not appropriate in a village that has very limited public transport, which is being reduced rather than encouraged, and with limited other services. The existing housing estate has insufficient parking, which will be cut down to a number of existing residents, by provision of a new footway at the end of Spring Meadows. Where are existing residents going to park? The Spring Meadows development was also at a time of Council policy to 'encourage non-car transport modes', the result is that the housing has insufficient off-road parking and people struggle to park on the narrow road.</p> <p>The draft allocation refers to ecology and protection of boundary vegetation. The landowner has removed woody vegetation over the years, with scrub loss around the school boundary. They have recently unilaterally taken to add a new site entrance to Spring Meadows, which was objected to through the Council's enforcement team. This may have had adverse impacts on site ecology, please refer to my comments on this from 2022.</p> <p>There is no reference to safeguarding of the sensitivities of the school boundary. There is no consideration of construction and additional traffic on a narrow road where the school pick up occurs.</p> <p>This allocation has many negative impacts on the village, and they are not outweighed by the positive ones, it should therefore be removed.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	Remove Policy RSA 19 (Site Ref: GS1)
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No

<p>development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to express my concern, and objections for the proposed development extending beyond Spring Meadows (RSA19 Site Ref: GS1), Great Shefford, RG177EN.</p> <p>I fail to see the proposed site suitable because of the following:</p> <ol style="list-style-type: none"> 1 Access via a small heavily congested residential road. Local residence of Spring Meadows and those who use the road to drop off and collect their children who attend the local primary school, have to park on Spring Meadows and adjoining roads due to limitations in residential parking spaces allocated to each of the properties on the road. 2 With a history of flooding in the very nearby area, the access can be isolated due to flooding (which it has been multiple times in the recent past). 3 The proposed location is on the foot of a hill side which is victim to a rain run off, and will impact the ground absorbing capabilities. Leading to long term problems, and increasing future flood risks. 4 The proposed site is on higher ground than existing immediate neighbouring houses and will be a violation of privacy, with potential new houses looking straight into existing gardens and bedroom windows. 5 Great Shefford boasts the finest natural wild life I've ever witnessed, the wild bird life is possibly the most varied I've ever known, and we are so fortunate to have many different species of bats all over this particular area. 6 Whilst the development would be taking place, safety would also be a huge concern as there is currently not suitable parking on Spring Meadows and with large construction traffic the local housing would be more challenging to access for emergency services, (there is regularly ambulances assisting vulnerable residents). Is there an option to look into other temporary access options for construction vehicles and machinery? Such as a new road or temporary road through the adjoining fields that are currently owned by the same landowner? As this would dramatically ease concerns, risks, and stress for the residents <Personal details removed> living right on the boundary of the proposed development.

Please give reasons for your answer	The governing board would like to highlight 3 areas of concern which would have to be addressed in order to make any development on the site acceptable:

	<p>Safeguarding - The south west boundary is immediately adjacent to the school playing fields, and so boundary treatment should be considered to ensure the safeguarding of children on the site.</p> <p>Vehicle access and pedestrian safety - Any development on the site will need to consider and mitigate the impact of the additional vehicle movements on Spring Meadows, particularly during school drop off and collection.</p> <p>Infrastructure funding - Any development on the site should provide a suitable contribution under CIL or Section 106 towards school infrastructure to mitigate the impact of additional families with school-aged children moving into the new homes.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>

<p>Please give reasons for your answer</p>	<p>*LATE RESPONSE*</p> <p>On the previous plan, it was not recommended for allocation. What is different this time around?</p> <p>There is large ground water, even now the garden is saturated from the recent rains.</p> <p>The land that is being suggested for allocation of 15 houses is raised and much higher than that of the houses that border it by some few good metres.</p> <p>This will cause huge oversight and privacy issues, as well as all the houses that lie on the boundary an unattractive outlook.</p> <p>Privacy is lost, as well as garden views. No one wants a house looking down on another house.</p> <p>The suggested access via Spring Meadows is also of concern. 15 houses average of 30 additional cars using the road as access, that already has cars parked on the road and is school access.</p> <p>This should be re-addressed. Not to mention the change in land level, which I repeat is multiple metres from current Spring meadows to the land that is being allocated.</p>

The landscape regardless of any planted boundaries will be affected, as these dwellings will sit so high in the skyline and the lie of the land in comparison to the rest of Spring Meadows.

Flood alleviation works are proposed for the village, but when and what effect this will have is not yet determined. Many flood alleviations schemes have been put in that do not have the desired effect.

Ground water run-off from the chalk hills, in this area of settlement on Spring Meadows will undoubtedly be affected by further housing on the land being allocated.
Much consideration and investigation need to be put into this.

Will the land be excavated to bring it down to the level of the other houses? If not, surely house cannot be built literally 'on top' of other houses, to look down into the gardens.
Their ground floor will be level with the top floor or above of the existing houses that lie on the boundary.

Things to note and things that will certainly need addressing:

- 1 Ground Level
- 2 Ground Water
- 3 Water Run Off
- 4 Existing dwellings privacy
- 5 Existing road use
- 6 Effect of the proposed dwellings on the flooding on Wantage Road (further hard standing and water run off downhill to the Wantage Road)

I refer you back to the previous Local Plan, with all the comments made by residents and professionals, and that the previous Local Plan did not approve for allocation.

It is not understood how this can change in 5 years to now make this site viable for development. This email is to object to the decision that the site is recommended for allocation as per the Local Plan to 2039.

To make reference to my statement please see here: Page 51, and I highlight here in a snippet. It must be explained how this has changed since May 2017:
See attachment: PS1021 Alex Bell Attachment 1

Also, please see here previous comments and reasons for the site NOT being allocated, how has this changed?
http://decisionmaking.westberks.gov.uk/documents/s43709/4f.%20Appendix%20F%20SA_SEA%20Report.pdf
See attachment: PS1021 Alex Bell Attachment 2

Also, in same document I refer to pages 1348 to 1356 inclusive. And again,, the result shows:
See attachment: PS1021 Alex Bell attachment 3

I have seen no justification for why this reasoning has changed. This 2nd email is further to show my objection to the site being suitable for 15 dwellings.

Previously, it should be noted that Great Shefford Parish Council agrees that the area of land at RSA 28 which is shown edged red on the inset plan for this site should not be developed.
Please review Great Shefford Parish Council
(lpr1855), Consultation_Statement_-_Proposed_Submission_LPR_Dec_2022_v2.pdf (westberks.gov.uk)

Please give reasons for your answer	The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure.

The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.

Early engagement between the developers and Thames Water would be beneficial to understand:

- What drainage requirements are required on and off site
- Clarity on what loading/flow from the development is anticipated
- Water supply requirements on and off site

The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.

To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.

Link here > <https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity>

We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.

Water Response

On the information available to date we do not envisage infrastructure concerns regarding water supply network infrastructure in relation to this development/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ

Waste Response

On the information available to date we do not envisage infrastructure concerns regarding wastewater network or wastewater treatment infrastructure capability in relation to this site/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ

Additional Comments

These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water flows being discharged to the public sewer.

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water to determine whether a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered is required.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>No</p>
<p>5. Independent Examination</p>	

6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable	

<p>alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>The site allocations presented in this chapter have not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of each site to accommodate development. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on these sites. We have concerns and have provided this information in a separate document <see comments below></p> <p>The site is on principal bedrock aquifer and secondary aquifer</p> <p>Developments connecting to East Shefford STW may be problematic. The River Lambourn SAC is an area of nutrient neutrality meaning any additional loads from the STW would need to be offset elsewhere in the catchment. Natural England will be better placed to advise on the specifics of this. East Shefford STW has a 0.1mg/l stretch target for P. East Shefford is an exceptionally high spilling site, mostly due to Ground Water infiltration. We would not support additional flows to this site until work has been done to reduce the frequency of storm overflows. As with Newbury or any site with stretch targets for Phosphorous, any additional loading may impact their ability to meet the environment act objectives.</p> <p>As stated in our suggested amendments and notes on Policy DM7, adequate wastewater treatment infrastructure capacity resources must be available or provided to support all proposed development prior to the occupation. Due to the constraints highlighted for this site, this must be stated in the policy text for site RSA19.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>

1. Do you consider the Local Plan Review is legally compliant?	Yes
* Yes	
* No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.	Yes
* Yes	
* No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.	Yes
* Yes	
* No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.	Yes

* Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes
Please give reasons for your answer	We note and support the proposed criterion in each of the policies listed in this representation that relates to desk-based archaeological assessment and, if needed, field evaluation.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	
4. Proposed Changes	For all sites listed in this representation, while we support the policy requirement for desk-based archaeological assessment and, if necessary, field evaluation, the language used across the policies used is not consistent. The Council may wish to review the language used across these policies to ensure it improve consistency. We do not consider this is a matter of soundness.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>The Hermitage Neighbourhood Plan Group wishes to OBJECT to the proposed Submission Version of the West Berkshire Local Plan Review (WBLPR). In respect of the strategy and site allocations for Hermitage, the plan is not sound for the following reasons:</p> <ol style="list-style-type: none"> 1 It is not justified because it has not been based on proportionate evidence. 2 It is not consistent with national policy because it does not demonstrate that it will enable the delivery of sustainable development. <p>The WBLPR proposes the allocation of three sites:</p> <ol style="list-style-type: none"> 1 1 RSA20 – Land off Charlotte Close – for approximately 15 dwellings 2 RSA21 – Land to the south east of the Old Farmhouse – for approximately 10 dwellings 3 RSA22 – Land adjacent to Station Road – for approximately 34 dwellings. <p>These three sites are intended to deliver approximately 59 dwellings over the plan period. The Regulation 18 version of the WBLPR required approximately 45 dwellings for Hermitage, therefore the proposed submission version represents an uplift in the requirement of 14 dwellings. Moreover, sites RSA20 and RSA21 both now have planning permission for a total of 12 dwellings more than the figure in the WBLPR (an additional 1 dwelling on RSA20 and 11 more dwellings on RSA21). So, at Regulation 18 stage, Hermitage was required to deliver approximately 45 dwellings and now, taking into account site allocations that have already entered the planning pipeline, that figure has risen to 76 dwellings. The Hermitage Neighbourhood Plan Steering Group is not aware of any evidence that has been submitted to assess the cumulative impact of this additional development on the village.</p> <p>Whilst this level of growth may be lower in absolute terms than many other settlements, Hermitage sits in a very sensitive location, being within the North Wessex Downs AONB. The overall scale of growth proposed for the settlements in this area is substantially lower than either the Eastern Area or Newbury and Thatcham, which reflects this sensitivity. However, it appears that in the case of Hermitage at least, the strategy of limiting growth in this part of the district is not being properly observed by a combination of the scales of growth proposed on WBLPR site allocations and development management decision-making on individual planning applications in respect of two of these site allocations.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>

<p>delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure.</p> <p>The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.</p> <p>Early engagement between the developers and Thames Water would be beneficial to understand:</p> <ul style="list-style-type: none"> • What drainage requirements are required on and off site • Clarity on what loading/flow from the development is anticipated • Water supply requirements on and off site <p>The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.</p> <p>To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.</p> <p>Link here > https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity</p> <p>We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.</p> <p>Water Response</p> <p>On the information available to date we do not envisage infrastructure concerns regarding water supply network infrastructure in relation to this development/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p>Waste Response</p> <p>On the information available to date we do not envisage infrastructure concerns regarding wastewater network or wastewater treatment infrastructure capability in relation to this site/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p>Additional Comments</p> <p>These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water flows being discharged to the public sewer.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water to determine whether a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered is required.</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>The site allocations presented in this chapter have not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of each site to accommodate development. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on these sites. We have concerns and have provided this information in a separate document <see comments below></p> <p>The site is on SPZ3, secondary A bedrock aquifer and secondary aquifer</p> <p>We encourage the requirement for the development scheme to include opportunities to open up the culvert and contribute to biodiversity net gain</p> <p>Developments connecting to Chieveley STW may be problematic as it discharges into The River Lambourn SAC which is an area of nutrient neutrality meaning any additional loads from the STW would need to be offset elsewhere in the catchment. Natural England will be better placed to advise on the specifics of this. Mitigation of additional load will need to be secured before any development can proceed.</p> <p>As stated in our suggested amendments and notes on Policy DM7 <PS1555>, adequate wastewater treatment infrastructure capacity resources must be available or provided to support all proposed development prior to the occupation. Due to the constraints highlighted for this site, this must be stated in the policy text for site RSA20.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. 1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	In respect of the allocation of this site only. We have made concerns on behalf of the same client in respect of the spatial strategy, housing requirement and housing delivery. Our support for the continued allocation of this site does not reflect support for the plan as a whole.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>Our client owns land in the District that has been allocated for development in the draft Local Plan. This relates to Land to the South East of the Old Farmhouse, Hermitage, which is proposed for allocation in Policy RSA21 for approximately 10 dwellings. This carries forward the allocation of the site for development from the adopted Housing Site Allocations Development Plan Document (DPD) (May 2017), as set out in Policy HSA25.</p> <p>Our client supports the proposed allocation of the site and is keen to continue working collaboratively with the Council to secure its sustainable development pursuant to the Outline Planning Permission for 21 dwellings which has already been achieved.</p> <p>As outlined above, Policy RSA21 of the draft Local Plan allocates land owned by our client to the South East of the Old Farmhouse, Hermitage, for approximately 10 dwellings. This carries forward the allocation of the site for development from the adopted Housing Site Allocations Development Plan Document (DPD) (May 2017), as set out in Policy HSA25.</p> <p>The site's recent planning history is summarised below.</p> <p>Outline planning permission was granted on 20 November 2018 (ref. 17/03290/OUTMAJ) for the following development: "Outline application for demolition of farmyard buildings, retention of The Old Farmhouse and the erection of up to 21 new dwellings, improved vehicular access off Newbury Road, car parking, public open space and landscaping. Matters to be considered – Access"</p> <p>On 15 July 2020, the Council refused an application under Section 73 of the Town and Country Planning Act 1990 (as amended) "to vary Condition 4 (approved plans) of previously approved application 17/03290/OUTMAJ to amend the parameter plan" (ref. 19/02993/OUTMAJ). A subsequent appeal was allowed under ref: APP/W03040/W/20/3258901.</p> <p>The reserved matters application is currently pending consideration (ref. 21/02923/RESMAJ).</p> <p>Our client is pleased to note some amendments made to the policy in relation to our representations on the Regulation 18 version of the draft Local Plan; we therefore support this policy.</p> <p>We would however suggest that the Policy wording be updated to reflect that the site does benefit from an implementable Planning Permission for 21 dwellings. This includes land within the existing Settlement as well as that covered by RSA21. It would we feel be more transparent to refer to this extant permission.</p> <p>Conclusion</p> <p>These representations have been prepared by Pro Vision on behalf of our client T A Fisher & Sons in response to West Berkshire Council's consultation on its Local Plan Review 2022-2039: Proposed submission.</p> <p>Our client owns land in the District that has been allocated for development in the draft Local Plan. This relates to Land to the south east of the Old Farmhouse, Hermitage, which is proposed for allocation in Policy RSA21 for approximately 10 dwellings. This carries forward the allocation of the site for development from the adopted Housing Site Allocations Development Plan Document (DPD) (May 2017), as set out in Policy HSA25.</p> <p>Our client supports the proposed allocation of the site and is keen to continue working collaboratively with the Council to secure its sustainable development.</p>

Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? -	

<p>Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure.</p> <p>The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.</p> <p>Early engagement between the developers and Thames Water would be beneficial to understand:</p> <ul style="list-style-type: none"> • What drainage requirements are required on and off site • Clarity on what loading/flow from the development is anticipated • Water supply requirements on and off site <p>The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.</p> <p>To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.</p> <p>Link here > https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity</p> <p>We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.</p> <p>Water Response</p> <p>On the information available to date we do not envisage infrastructure concerns regarding water supply network infrastructure in relation to this development/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p>Waste Response</p> <p>On the information available to date we do not envisage infrastructure concerns regarding wastewater network or wastewater treatment infrastructure capability in relation to this site/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p>Additional Comments</p>

	These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water flows being discharged to the public sewer.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water to determine whether a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered is required.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No

Please give reasons for your answer	<p>The site allocations presented in this chapter have not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of each site to accommodate development. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on these sites. We have concerns and have provided this information in a separate document <see comments below></p> <p>The site is on SPZ3, secondary A bedrock aquifer and secondary aquifer</p> <p>We encourage the requirement for the development scheme to include opportunities to open up the culvert and contribute to biodiversity net gain</p> <p>Developments connecting to Chieveley STW may be problematic as it discharges into The River Lambourn SAC which is an area of nutrient neutrality meaning any additional loads from the STW would need to be offset elsewhere in the catchment. Natural England will be better placed to advise on the specifics of this. Mitigation of additional load will need to be secured before any development can proceed.</p> <p>As stated in our suggested amendments and notes on Policy DM7 <PS1555>, adequate wastewater treatment infrastructure capacity resources must be available or provided to support all proposed development prior to the occupation. Due to the constraints highlighted for this site, this must be stated in the policy text for site RSA21.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	As stated in our suggested amendments and notes on Policy DM7 <PS1555>, adequate wastewater treatment infrastructure capacity resources must be available or provided to support all proposed development prior to the occupation. Due to the constraints highlighted for this site, this must be stated in the policy text for site RSA20.

<p>Please give reasons for your answer</p>	<p>The Hermitage Neighbourhood Plan Group wishes to OBJECT to the proposed Submission Version of the West Berkshire Local Plan Review (WBLPR). In respect of the strategy and site allocations for Hermitage, the plan is not sound for the following reasons:</p> <ol style="list-style-type: none"> 1 It is not justified because it has not been based on proportionate evidence. 2 It is not consistent with national policy because it does not demonstrate that it will enable the delivery of sustainable development. <p>The WBLPR proposes the allocation of three sites:</p> <ol style="list-style-type: none"> 1 1 RSA20 – Land off Charlotte Close – for approximately 15 dwellings 2 RSA21 – Land to the south east of the Old Farmhouse – for approximately 10 dwellings 3 RSA22 – Land adjacent to Station Road – for approximately 34 dwellings. <p>These three sites are intended to deliver approximately 59 dwellings over the plan period. The Regulation 18 version of the WBLPR required approximately 45 dwellings for Hermitage, therefore the proposed submission version represents an uplift in the requirement of 14 dwellings. Moreover, sites RSA20 and RSA21 both now have planning permission for a total of 12 dwellings more than the figure in the WBLPR (an additional 1 dwelling on RSA20 and 11 more dwellings on RSA21). So, at Regulation 18 stage, Hermitage was required to deliver approximately 45 dwellings and now, taking into account site allocations that have already entered the planning pipeline, that figure has risen to 76 dwellings. The Hermitage Neighbourhood Plan Steering Group is not aware of any evidence that has been submitted to assess the cumulative impact of this additional development on the village.</p> <p>Whilst this level of growth may be lower in absolute terms than many other settlements, Hermitage sits in a very sensitive location, being within the North Wessex Downs AONB. The overall scale of growth proposed for the settlements in this area is substantially lower than either the Eastern Area or Newbury and Thatcham, which reflects this sensitivity. However, it appears that in the case of Hermitage at least, the strategy of limiting growth in this part of the district is not being properly observed by a combination of the scales of growth proposed on WBLPR site allocations and development management decision-making on individual planning applications in respect of two of these site allocations.</p> <p>The main difference between the Regulation 18 and Submission Versions of the WBLPR is the allocation of RSA22 – land adjacent to Station Road – for 34 dwellings. Whilst the Hermitage Neighbourhood Plan Group does not object to the principle of allocating this site, it has significant concerns that the evidence gathered through the Housing and Economic Land Availability Assessment (HELAA) process has not been used to inform Policy RSA22.</p> <p>Under the assessment of suitability (Stage 2b), the HELAA cites the Landscape Sensitivity and Capacity Assessment 2022. This concludes that development across the whole site would have a significant impact on key landscape characteristic and valued features of this area of the AONB and would not be appropriate. It goes on to say that development across part of the site could be considered further, subject to the retention of boundary vegetation and the careful consideration of a central open area which could have the character of a village green. It clearly recommends that development should be contained as indicated in the map below: <for map see attachment></p> <p>The map shows a significantly reduced area suitable for development than is shown in the WBLPR for RSA22. The purpose of this reduced area for development is to prevent the otherwise unacceptable landscape impact of development. The Assessment – supported by the map - goes on to say that development would be subject to the following requirements:</p> <ol style="list-style-type: none"> 1 Set back from the existing regenerated treed railway line, with additional tree planting along this boundary to further reduce the visual effect of the development on the landscape to the south 2 Set back from Station Road to retain the rural character and the setting of the mature roadside trees. <p>Whilst the wording of Policy RSA22 states that development will be in accordance with the Landscape Sensitivity and Capacity Assessment 2022 and specifically identifies these requirements, the indicative plan supporting Policy RSA22 does not provide the appropriate guidance, suggesting that development could come close to the boundaries with the railway line and Station Road. In order for Policy RSA22 to be effective, it is necessary that the indicative plan is amended to be consistent with the plan shown in the Landscape Sensitivity and Capacity Assessment 2022 (and in these representations). This will make clear the extent of landscape buffers required to ensure the landscape impact is acceptable.</p> <p>In this regard, the location of the site within the North Wessex AONB must be recognised. Paragraph 174 of the NPPF requires that planning policies contribute to and enhance the natural and local environment by 'protecting and enhancing valued landscapes'. Moreover, paragraph 176 states that 'great weight should be given to conserving and enhancing landscape and scenic beauty' in the AONB. Furthermore it states that, 'the scale and extent of development within all these designated areas should be limited, while development within their setting should be sensitively located and designed to avoid or minimise adverse impacts on the designated areas.' The proposed Policy RSA22 does not provide the necessary clarity to ensure development achieves this, therefore it is not consistent with national policy.</p> <p>A further reason that the Hermitage Neighbourhood Plan Steering Group is particularly concerned that Policy RSA22 and the accompanying indicative plan is clear and unambiguous is because no evidence has been submitted by the site promoter to demonstrate that the site is viable based on an allocation of</p>

	<p>approximately 34 dwellings. Policy RSA22 rightly requires a significant level of secondary works in order to ensure that development reflects the sensitive landscape setting in which the site sits. If the developer is unable to deliver a scheme for approximately 34 dwellings and instead requires a scale of development that is significantly in excess of this to ensure development is brought forward, then the site should not be allocated. In considering sites for allocation, it must be demonstrated that they are available, suitable and achievable. Planning Practice Guidance states, 'A site is considered achievable for development where there is a reasonable prospect that the particular type of development will be developed on the site at a particular point in time. This is essentially a judgement about the economic viability of a site, and the capacity of the developer to complete and let or sell the development over a certain period.' (Paragraph: 020 Reference ID: 3-020-20190722). Without evidence of the scale of development proposed in the policy being viable, Policy RSA22 is unsound because it has not been justified.</p>

Please give reasons for your answer	<p>We have reviewed the document and find it to be generally of a high standard; however, we have some significant concerns regarding the proposals in relation to the Hermitage parish.</p> <p>You will have received a response from the Hermitage Neighbourhood Development Plan Steering Group. HPC strongly supports all the points in that response regarding RSA22 Land Adjacent to Station Rd Hermitage, so will not repeat them for brevity. Other aspects of RSA22 that we strongly object to are:</p> <ul style="list-style-type: none"> • The lack of parking provision for Holy Trinity Church. Parking additional to the residential requirements should be provided for this venue to reduce the risks associated with parking on Marlston Road and Lipscombe Close. This would need pedestrian access; we would hope that would be part a cycle route from that Marlston to Station Road to reduce cycle traffic on the B4009. • Lack of landscaping behind the rear gardens off Lipscombe Close. Planting is needed to ensure the privacy of existing residents and provide a soft feel to the area consistent with the general village ambience and the proposed Neighbourhood Development Plan.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? -	No

Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.

- * Yes
- * No

Please give reasons for your answer

1.1 This representation is made on behalf of Mr F Baker and Mr P White, the joint owners of Land adjacent to Station Road, Hermitage ("the site"), the extent of which is shown on the Land Ownership and Availability Plan at Appendix 1.

1.2 It follows previous submissions and representations to earlier stages of the West Berkshire Local Plan Review 2022-2039 ("LPR") preparation made on behalf of the Executors to the Neville Baker Estate, since when the estate has been settled and the land transferred to the current joint owners.

1 General

2.1 We confirm our support in principle for the allocation of the site for new housing development under Policy RSA22.

2.2 In general terms, we consider the allocation meets the tests of soundness set out in Paragraph 35 of the NPPF, to be applied in a proportionate way to non-strategic policies, taking account of whether they are consistent with strategic policies SP1 to SP24 of the LPR (NPPF Para 36).

2.3 We note that the allocation is the result of detailed site assessment and selection by the Council, as set out in the West Berkshire HELAA (January 2023) ("HELAA") and other LPR evidence base documents, which establish that the site is deliverable in part i.e. within years 6-10 of the LPR (NPPF Para 68).

2.4 Specifically in relation to site suitability, the land is situated within the North Wessex Downs Area of Outstanding Natural Beauty ("the AONB"), where Paragraph 176 of the NPPF requires great weight to be given to conserving and enhancing landscape and scenic beauty. This weight is reflected in Policy SP2 of the LPR, which states that the North Wessex Downs AONB spatial area "will have appropriate and sustainable growth that conserves and enhances its special landscape qualities". Accordingly, to be consistent with national and LPR strategic policy, it is essential in our view that allocated sites in the AONB have been subjected to robust assessment of the capacity of the site and local landscape to accommodate development in a manner which conserves and enhances its special qualities.

2.5 Such an assessment has been undertaken by the Council in the form of its Landscape Sensitivity and Capacity Assessment for: HER4 – Land north of Station Road, Hermitage (May 2022) ("LSCA") which concludes that, subject to a number of requirements, part of the site has the capacity to accommodate development in a manner which conserves and enhances the special landscape qualities of the AONB. We agree with that conclusion in broad terms, since it is consistent with the findings of our own Landscape Capacity Assessment (December 2020) which was submitted to the Council and, on that basis, we believe that the suitability of the site in landscape terms has been established based on robust evidence.

2.6 However, we believe that read in conjunction, the text of Policy RSA22 and the Indicative Map do not represent the best and most appropriate strategy for achieving sustainable development in accordance with the policies of the NPPF, based on proportionate evidence. We also consider that there is a reasonable alternative strategy which, whilst complying with the written requirements of the LSCA and Policy RSA22 aimed at conserving and enhancing the AONB (save for the requirement to contain development as indicated in Figure 2 of the LSCA), will make more effective use of the site in a way which is more successful in achieving social and other environmental objectives; specifically in relation to flood risk, public open space and recreational opportunities, and optimising the use of the site for housing.

1 Other Matters

3.1 In addition to the substantive policy matters raised in relation to Policy RSA22, we take this opportunity to draw attention to two other matters which we feel it is appropriate to raise at Regulation 19 Stage, so that they can be addressed and resolved before the LPR proceeds to formal adoption.

1 a) The northern boundary of the Policy RSA22 site

3.2 The northern boundary of the site as shown on the Indicative Map is incorrect and needs to be amended. Since the northern boundary forms the south eastern boundary of the RSA21 site, this also needs to be changed.

3.3 The reason for this is because Condition 4 of outline planning permission 19/02993/OUTMAJ for the development of up to 21 dwellings on the Old Farmhouse Site (which includes the RSA 21 site) requires the development to be carried out in accordance with the approved Parameters Plan (Appendix 2 to these representations), which shows that the landscape buffer running along the south eastern boundary extends beyond the application site boundary (and the boundary shown on the RSA21 Indicative Map) to include land within the RSA22 site as shown on the RSA22 Indicative Map. The reserved matters application 21/02923/RESMAJ submitted pursuant to the outline permission shows the same arrangement (Appendix 3).

3.4 In terms of land ownership, the Executors sold most of the Old Farmhouse/RSA21 site to the developer TA Fisher & Sons in 2019, but ownership of part of the RSA21 site adjacent to Lipscomb Close was retained for future access to the RSA22 site in exchange for the right to plant the landscape buffer on the retained land (refer to the HM Land Registry Form TP1 at Appendix 4 for details).

3.5 For these reasons, the land to be used as a landscape buffer to screen the RSA21 site is not available for development of the RSA22 site (except for access, over part) as required by Paragraph 68 of the NPPF. The correct boundary between the two sites is shown by the red line on the Land Ownership and Availability Plan at Appendix 1 and so the Indicative Maps for Policies RSA21 and RSA22 need to be changed accordingly.

3.6 The rest of these representations assume that the change to the northern boundary of the RSA22 site will be made.

1 b) Soundness of the Policy RSA22 Indicative Map

3.7 Even if no other changes to the Policy RSA22 Indicative Map are made as a result of these representations, there are major ambiguities between the parameters set out in parts b. and d. of Policy RSA22 and the Indicative Map. Specifically in relation to part d., these parameters have been taken “verbatim” from the LSCA and we assume it is essential from the Council’s point of view that they are met in full so that the special landscape qualities of the AONB are conserved and enhanced. Furthermore, they all have a spatial dimension and clearly form part of the development to which Policy RSA22 relates. Therefore, they should all be clearly defined on the Indicative Map to confirm their location and extent and included in the gross site area (as shown by the red line site boundary) of the RSA22 site.

3.8 As currently drawn, only the location and extent of the open space to the north of the site and the developable area are identified and included within the red line site boundary/gross site area shown on the Indicative Map. In relation to the Policy RSA22 parameters for development to;

- take opportunities to make walking and cycling links part of a Hermitage to Newbury off road path (part b.);
- be set back from the existing treed railway line with additional planting along this boundary (part d. i.); and
- be set back from Station Road to retain the rural character and the setting of the mature roadside trees (part d. iv.)

none of these parameters are defined on the Indicative Map and the land to which parts b. and d. i. aren’t included in the red line boundary/gross site area at all.

3.9 Whilst we do not agree with the way these parameters (“requirements”) are indicated in Figure 2 of the LSCA, at least they are all defined in Figure 2 in terms of their location and extent and are all included in the red line site boundary/gross site area. Therefore, whilst the text of Policy RSA22 repeats the written requirements of the LSCA verbatim, the “selective” approach adopted by the Council to the inclusion or exclusion of these parameters on the Indicative Map is inexplicable.

3.10 Based on these ambiguities and omissions from the Indicative Map, it will not be possible for a decision maker, an applicant or the general public to establish with any certainty what area of land Policy RSA22 applies to as a whole; or the location and extent of the land to which individual policy parameters are intended to apply (NPPF Para 16 d)). As Paragraph 8.2 of the LPR confirms, the area shown on the Indicative Map should be the gross site area and, as a basic principle, all land to which the policy relates should be included within the area and any policy requirement which has a spatial dimension should have its location and extent defined. In drawing indicative maps, plan makers should ask themselves whether it addresses the questions of “what, where and how?” (Basingstoke and Deane Local Plan 2011-2029 Inspectors guidance to the Borough Council on the preparation of inductive maps). Applying this basic principle, the Indicative Map for Policy RSA22 is not consistent with Paragraph 8.2.

3.11 The situation also casts doubt on how effective Policy RSA22 will be in terms of ensuring the delivery of outcomes (the parameters of Policy RSA22) by the use of planning conditions or obligations (NPPF Para 35 c)).

3.12 Accordingly, to be considered sound (irrespective of the other changes proposed by these representations), we believe that the red line boundary/gross site area shown on the Policy RSA22 Indicative Map must include, and define by reference to the Legend, the following areas:

- 1 a) the disused track running between 1 Marlston Road and the existing treed railway line, to include land for a potential walking and cycling route as part of the Hermitage to Newbury off road path.
- 2 b) land adjacent to the existing treed railway line to provide additional planting along the boundary.
- 3 c) the set back from Station Road.
- 4 **Making an Effective Use of Land**

4.1 To reflect the great weight given to conserving and enhancing landscape and scenic beauty in the AONB, the Council has undertaken an LSCA of the RSA22 site to establish whether it has the landscape capacity to accommodate development and, if so, on what basis. The LSCA concludes that the wider landscape and the landscape within the site has capacity to accommodate development on part of the site, provided it is restricted to that part of the site shown on Figure 2 and accords with a number of requirements.

4.2 Policy RSA22 includes these written requirements in full as “parameters” which development will be required to meet and the Indicative Map identifies those parts of the site which Figure 2 shows as open space and land with potential for development (the developable area).

4.3 We agree with the written conclusions of the LSCA (save for the requirement to contain development as indicated in Figure 2) and the inclusion of the LSCA’s written requirements in the text of Policy RSA22. However, we do not agree that development should be contained as indicated on Figure 2 or with the way the public open space and developable area are shown on the Indicative Map, because to do so would not achieve the most effective use of land in a way which achieves other social and environmental objectives, whilst conserving and enhancing the landscape and scenic beauty of the AONB (NPPF Paragraphs 8, 16 a), 35 d), 119, 120 a) and b), 125 and 176; and PPG Paragraph 021 Reference ID: 3-021-20190722).

4.4 In addition, it is our view that in seeking to comply with Paragraph 176 of the NPPF, the Council has simply accepted the conclusions and requirements of the LSCA in relation to the public open space and developable area as shown on Figure 2 and the Policy RSA22 Indicative Map, without giving due consideration to any reasonable alternative strategies which would conserve and enhance the landscape and scenic beauty of the AONB and, at the same time, take account of other constraints and opportunities at site level to deliver other social and environmental objectives, thereby achieving a more effective use

of land (NPPF Paragraphs 8, 16 a), 35 b), 119, 120 a) and b), 125 and 176; and PPG Paragraph 021 Reference ID: 3-021-20190722).

4.5 In support of our view, we note that Policy RSA22 provides for the development of approximately 34 dwellings within the developable area shown on the Indicative Map. Attached at Appendix 5 to these representations is a 1:1250 scale (at A2) version of the Indicative Map, which confirms that the developable area of the site is 2.53 hectares. A development of 34 dwellings on a site area of 2.53 hectares will achieve a density of 13.44 dwellings per hectare (dph).

4.6 To give an indication of how “efficient” this density is, the guidance for undertaking high level assessments of potential housing sites set out in the West Berkshire Density Pattern Book (September 2019) (WBDPB) indicates that an appropriate density for medium size sites (between 1 and 5 hectares) on the edge of a settlements in the AONB is 20 dph. The guidance takes account of the site’s location on the edge of a settlement in the AONB and, according to Paragraph 2.81, a density of 20 dph “fits with the prevailing character of many settlements in the AONB, but still seeks to make an efficient use of land”. A density of 13.44 dph even falls below the WBDPB guidance density of 15 dph for isolated sites in the AONB countryside, unrelated to settlements.

4.7 Based on this comparison alone, developing the RSA22 site at a density of 13.44 dph cannot be regarded as an efficient use of land.

4.8 However, interrogation of Stage 2a) of the HELAA confirms that in calculating the estimated development potential of the site, a density of 20 dph has been applied by the Council and it should also be noted that in determining the landscape capacity of the RSA22 site to accommodate development, the LSCA also applied the WBDPB density of 20 dph (Paragraph 1.21 of the LSCA Methodology Statement).

4.9 It therefore appears that in allocating the site for approximately 34 dwellings, the Council has not sought intentionally to restrict development to a density of 13.44 dwellings and so the figure of 34 dwellings must be the result of other decisions made by the Council at site assessment/selection stage.

4.10 Further interrogation of the HELAA and other evidence base documents indicates that the reason for the low level of housing proposed in Policy RSA22 and the resulting low density figure is that by accepting the recommendation of the LSCA to contain development to the developable area as indicated in Figure 2 (except that the Indicative Map does not include the requirement to set development back from Station Road) without considering other constraints and alternative strategies to overcome them, the Council has had to discount land within the developable area to take account of two constraints, the effect of which is to significantly reduce the capacity of the site to accommodate development. The two constraints are identified at Stage 2a) of the HELAA as “site specific issues which could affect capacity” and are:

- Landscape capacity (0.4 hectares)
- Surface water flooding on part of the site (0.4 hectares)

4.11 The effect of simply discounting land from the developable area to overcome these constraints is to reduce the “effective” developable area of the site from 2.52 hectares to 1.72 hectares, which at an appropriate density of 20 dph reduces the development potential of the site from approximately 50 dwellings to approximately 34 dwellings, as provided for by Policy RSA22.

4.12 In our view, the arbitrary approach to overcoming constraints taken by the Council at site assessment/selection stage practically rules out the prospect of development coming forward which makes better use of the potential of the site to deliver housing, not least because restricting the amount of development to approximately 34 dwellings and restricting development to the developable area shown on the Indicative Map effectively rules out the possibility of overcoming the constraints by way of a different spatial arrangement and/or the possibility that the constrained land can contribute positively to development in a way that increases the number of dwellings it will deliver.

4.13 Further, since the arbitrary discounting of 0.8 hectares from the developable area of the site represents a loss of development potential of up approximately 16 dwellings (at 20 dph), we do not believe that the effect of excluding the constrained land from calculating the development potential of the site will be negated by inclusion of the word “approximately” in the text of Policy RSA22. This is because, at application stage, the Council is unlikely accept a material departure from the Indicative Map and is likely to regard anything greater than a 10% increase in the number of dwellings (plus 3 dwellings) as “approximating” to 34 dwellings.

4.14 Taking the above matters into account, a Proposed Indicative Map is attached at Appendix 6 to these representations. In our view, it represents a reasonable alternative strategy which complies with the written requirements of part d. of Policy RSA22 and the LSCA (save for the requirement to contain development as indicated in Figure 2) to conserve and enhance the landscape and scenic beauty of the AONB but, in addition, takes account of the other constraints and opportunities which exist at site level to achieves a more effective and efficient use of the site, with the potential to deliver approximately 47 dwellings at a density of 20 dph on a developable area of 2.35 hectares.

1 Optimising the Use of Land for Housing in the AONB

5.1 Underpinning our concerns regarding the effective use of the site for housing, Paragraph 125 of the NPPF makes it clear that where there is an existing or anticipated shortage of land for housing to meet identified housing needs, it is “especially important that planning policies and decisions.....ensure that development makes optimal use of the potential of each site”. Sub paragraph a) of Paragraph 125 goes on to say that “plans should contain clear policies to optimise the use of land in their area and meet as much of the identified need for housing as possible, This will be tested robustly at examination.....”.

5.2 Whilst Paragraph 119 is mainly about densities and the efficient use of land, it is clear from the phrase “make optimal use of the potential of each site” that it applies equally to how much land within a site could be developed (the developable area) and how other land within a site is utilised to enable the full potential of a site to be realised, whilst safeguarding and improving the environment and ensuring safe and healthy living conditions (NPPF Paragraph 119).

5.3 Against this background, we do not believe the social objective of meeting as much of the identified housing needs of an area by making optimal use of land for housing is inconsistent with the environmental objectives of the NPPF and, in particular, the great weight given by Paragraph 176 to conserving and enhancing the landscape and scenic beauty of the AONB. On the contrary, it seems clear that in the AONB, the application of a highly restrictive policy means that there is a finite supply of land for housing and given the need for allocated housing sites to be available, suitable and achievable, there will inevitably be a shortage of housing land in the AONB to meet the identified housing needs of the AONB spatial area at the point of need.

5.4 In these circumstances, it is apparent that provided development conserves and enhances the AONB, optimising the use of allocated housing sites in the AONB and Paragraph 176 are mutually supportive, not least because optimising the use of allocated housing sites reduces the pressure to develop less suitable sites elsewhere in the AONB. Accordingly, we believe that the use of allocated housing sites in the AONB should be optimised and that this is especially important because of the role new housing in the AONB will play in supporting local communities, services and facilities.

5.5 The Council will not openly admit to there being an existing or anticipated shortage of housing land in the AONB to meet local housing needs, although we believe the position is acknowledged implicitly by Policy SP2, which refers to the AONB as having “*appropriate and sustainable development*” rather than giving a specific housing requirement for the AONB for the plan period, against which the housing delivery/supply situation would be clear.

5.6 Further, at Section 5.1.1 of the SA/SEA Environmental Report (November 2022), the Council confirms that under the adopted West Berkshire Core Strategy (2006-2026) (CS) only 19% of all housing being built in the district is located within the AONB; and in concluding the CS was sound, the CS Inspector made it clear that “*A much greater focus on urban areas would undermine the vitality of rural settlements, particularly larger settlements such as Hungerford and provision to meet at least some local housing needs in these settlements*”. Against this background, Table 11 of the SA/SEA Environmental Report confirms that a (housing distribution) strategy which has a reduced focus on the AONB is to be taken forward in the LPR and acknowledges that “*the strategy will require development elsewhere in the district, which could mean that sites less suitable for development are required to meet local housing need.*”

5.7 In this context, the West Berkshire Housing Needs Assessment Update (July 2022) describes the housing need situation in the district as “*clear and acute*”. However, the position is particularly bad in the AONB spatial area, where the estimated need for affordable and social housing is 152 dwellings per annum (dpa), which accounts for 46% of the districts total need for 330 dpa (2021 base date), even though the number of people living in the AONB is only about 30% of the total population of the district.

5.8 This acute situation is only set to get worse as a result of the reduced focus of development on the AONB over the LPR plan period. The AONB housing site allocations under Policy SP15 of the LPR will deliver approximately 414 new dwellings over the period 2022-2039, at an average annual rate of 24 dpa. Of these, a maximum of 166 dwellings will be affordable or social housing (based on 40%), delivered at an average annual rate of 10 dwellings, compared to the estimated need in the AONB for 152 dpa. Put another way, the total number of affordable and social homes to be delivered in the AONB over the 17-year plan period is only enough to meet just over one year’s housing needs.

5.9 Whilst we accept that some affordable and social housing may come forward over the LPR plan period on sites in the AONB which are granted permission under LPR Policy DM17 (Rural Exception Sites), we do not expect these sites to make a significant contribution towards meeting local housing needs in the AONB, because they are required to be small-scale and will still need to overcome the “high bar” set by Paragraph 176 of the NPPF. Therefore, since the AONB housing sites allocated under Policy SP15 are likely to be the primary source of affordable and social housing to meet the local housing needs of the AONB, it is all the more important that optimal use is made of their potential.

5.10 The importance of optimising the use of land for housing in the AONB spatial area applies equally at individual settlement level. The executive summary of the Hermitage Housing Needs Study (May 2021) (HNS) attached at Appendix 7 identifies the need for additional market housing of all types and the need for 24 additional affordable homes over the 5-year period from 2021. In giving reasons for this, the HNS confirms that:

- There is virtually no supply of affordable home ownership housing in the Parish.
- There has been no additional affordable housing of any type built in the Parish in recent years.
- About half of existing households in housing need want to stay in the Parish.
- Nearly 90% of newly forming households plan to leave the Parish.

5.11 Against this backdrop of local housing need, it is relevant to note that the RSA20, RSA21 and RSA22 sites represent the only suitable housing sites in Hermitage remaining to be developed within the LPR plan period and beyond. There are no sizeable sites within the settlement boundary which could come forward for housing development and no other sites on the edge of the settlement can be developed without extending the settlement beyond its current outer limits and encroaching into the open countryside. Only one other site on the edge of Hermitage was assessed in the HELAA as “potentially suitable” at Stage 2b) (the HER5 site), but following a landscape sensitivity and capacity assessment, it was rejected because of the harm it would cause to the AONB in terms of encroachment, coalescence and visual impact.

5.12 For these reasons, we believe that subject to meeting the written requirements of part d. of Policy RSA22 and the LSCA (save for the requirement to contain development as indicated in Figure 2) to conserve and enhance the landscape and scenic beauty of the AONB and overcoming landscape capacity and surface water flood risk constraints, it is important that the potential of the RSA22 site for housing is optimised and that this matter is subject to robust assessment at examination stage.

1 The set back from Station Road

6.1 The LSCA recommends that development on the site should be set back from Station Road to retain the character and the setting of the mature roadside trees. This requirement has been included in the

text of Policy RSA22 (part d. iv.) but, for some unaccountable reason, is not shown on the Indicative Map, in such a way that it reduces the developable area of the site.

6.2 However, interrogation of Stage 2a) of the HELAA leads us to believe that the “landscape capacity” constraint, which is identified as a “*site specific issue which could affect capacity*” and the set back from Station Road are one and the same. So, in calculating the estimated development potential of the site, the Council has had to discount part of the developable area shown on the Indicative Map to take account of the set back from Station Road. This is reflected in the fact that whilst the developable area of the site shown on the Indicative Map is 2.53 hectares, the developable area identified at Stage 2a) of the HELAA is 2.1 hectares (-0.43 hectares). It is therefore apparent that the Council has discounted 0.43 hectares from the developable area to take account of the set back and this is reflected in the Stage 2a) estimated development potential of the site of 42 dwellings (2.53 hectares at 20 dph = 50 dwellings, less 0.43 hectares at 20 dph = @42 dwellings).

6.3 The set back shown on Figure 2 of the LSCA extends along Station Road for a length of 100 metres which, given the discount of 0.43 hectares applied by the Council, suggests that the Council requires development to be set back 40 metres from the inner edge of Station Road. Whilst we agree with the set back requirement, we do not agree that development needs to be set back 40 metres wide from Station Road to meet the stated landscape objectives of Policy RSA22 d. iv., with the result that it unnecessarily reduces the development potential of the site by up to 8 dwellings.

6.4 Considering this matter further, we would suggest that the width of the set back assumed for the purposes of discounting land from the developable area and estimating development potential has been arrived at in error. In this regard, we note that the set back shown on Figure 2 of the LSCA (identified as a landscape buffer in the Legend) appears to be 30-40 metres wide and that it extends right up to the boundary with properties on Hermitage Green, such that Station Road and the intervening verge are included within it.

6.5 In contrast, the developable area shown on the Indicative Map only extends up to the inner edge of Station Road. Therefore, if a 30-40 metre wide set back/landscape buffer has been assumed by the Council for the purposes of discounting land from the developable area and estimating development potential; and has been measured from the inner edge of Station Road, it has reduced the developable area/development potential of the site far more than is necessary or intended to achieve the landscape objectives of Policy RSA22 d. iv.

6.6 Assuming that an error has been made at Stage 2a) of the HELAA and that the set back/landscape buffer required is broadly as shown on Figure 2 of the LSCA, we consider that the most appropriate way to achieve the landscape objective of retaining the rural character and the setting of the mature roadside trees is to create a dense tree-lined native species hedgerow along the inner edge of Station Road, not least because such a feature is characteristic of the Hermitage Wooded Commons/Cold Ash Woodland and Heathland Mosaic landscape character areas in which the site is located. This would require a set back of not more than 15 metres from the inner edge of Station Road, which will be more than sufficient to provide effective screening of the development and will afford maximum protection to the root systems of the mature roadside trees (BS5837: 2012 Trees in Relation to Design, Demolition and Construction establishes a national limit on the radius of tree protection areas of 15 metres, irrespective of tree size).

6.7 If accepted, the 15 metre set back/landscape buffer should be indicated on the Indicative Map as shown on the Proposed Indicative Map at Appendix 6. This will reduce the developable area of the site by 0.16 hectares to 2.37 Hectares which, at 20 dph, reduces the development potential of the site from approximately 50 dwellings to approximately 47 dwellings.

1 Surface Water Flood Risk

7.1 Stage 2b) of the HELAA identifies that the updated DEFRA/Environment Agency Surface Water Flood Map (Appendix 8) shows two low risk flood paths running across the RSA22 site as shown on the Indicative Map, which converge at the centre to create two medium and high risk pooling areas.

7.2 Stage 2a) identifies that 3% of the site is at risk of surface water flooding in the 1 in 30 year event, 5% in the 1 in 100 year event and 17% in the 1 in 1,000 year event. The HELAA also identifies a further area of high risk flooding along the disused track leading to Marlston Road, concluding that surface water flood risk covers about 20% of the site (albeit the further area of high risk flooding lies outside of the gross site area shown on the Indicative Map).

7.3 At Stage 2c) (Deliverability), the HELAA concludes that those parts of the site subject to surface water flood risk would be unsuitable and development would need to be avoided in these areas. This conclusion is reflected in the Sequential Test Report (January 2023), which states “*A small part of the site (19%) is at risk of flooding and using the sequential approach development could be accommodated outside of this area.*”

7.4 The Stage 2a) HELAA assessment had already discounted 0.43 hectares from the developable area of the site to take account of the set back from Station Road, resulting in an “effective” developable area of 2.1 hectares and an estimated development potential of 42 dwellings (Paragraph 6.3 above). The eventual allocation of the RSA22 site is for approximately 34 dwellings, so it can be deduced that during the site assessment/selection process the amount of land discounted from the developable area to avoid development on land at risk of surface water flooding is 0.4 hectares ((42 – 34) divided by 20 dph). This represents a loss of development potential of 8 dwellings.

7.5 An area of 0.4 hectares corresponds to about 20% of the effective developable area of 2.1 hectares ((2.1 divided by 100) x 20dph = 0.43 hectares). Therefore, it is apparent that the Council has adopted an “absolute avoidance” approach to surface water flood risk at site assessment/selection stage rather than a sequential approach; and so regardless of the level of risk involved, 100% of the land at surface water flood risk within the developable area has been discounted, to arrive at the Policy RSA22 allocation of approximately 34 dwellings. No consideration has been given to the fact that the areas of medium and high risk within the developable area account for no more than 10% of the total area at risk of flooding; that areas at low risk can contribute to the effective use of land by accommodating less vulnerable

elements of the development; or that wider sustainable development objectives should be taken into account.

7.6 We do not consider this approach and the resulting allocation of approximately 34 dwellings is justified because it stems from the Council simply accepting the written recommendations of the LSCA in relation to the public open space and developable area shown on Figure 2, without giving due consideration to reasonable alternatives in the form of a different spatial arrangement which meets the written requirements of Policy RSA22 d. and the LSCA (save for the requirement to contain development as indicated in Figure 2) and, at the same time, overcomes the surface water flood risk constraint and makes more effective use of the site for housing.

7.7 In addition, we do not consider the approach followed by the Council to be consistent with NPPF Paragraphs 159, 161 and 163 in relation to how the sequential approach to flood risk should be applied to plan-making or the sequential approach set out in the West Berkshire Strategic Flood Risk Assessment (November 2022) (WBSFRA). In particular, NPPF Paragraph 163 states that *"If it is not possible for development to be located in areas with a lower risk of flooding (taking into account wider sustainable development objectives), the exception test may have to be applied"*. This statement makes it clear that reasonable ("possible") alternatives to overcoming surface water flood risk should be considered at site assessment/selection stage and if such alternative(s) fail to locate development in areas with a lower risk of flooding, the exception test may need to be applied. Against this policy background, we regard it as unfortunate that the Council has adopted an "absolute avoidance" approach rather than consider reasonable alternatives which take wider sustainable development objectives (the effective use of land) into account.

7.8 In considering reasonable alternatives, Paragraph 159 of the NPPF states that inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at highest risk. Accordingly, Paragraph 161 requires all plans to apply a sequential, risk-based approach to the location of development, *"...so as to avoid where possible, flood risk to people and property"*. They should do this, and manage any residual risk, by adopting a number of measures, including:

- 1 a) applying the Sequential Test and then, if necessary, the exception test.
- 2 c) using opportunities provided by new development and improvements in green and other infrastructure to reduce the causes and impacts of flooding (making as much use as possible of natural flood management techniques as part of an integrated approach to flood risk management).

7.9 Planning Policy Guidance Paragraph:023 Reference ID: 7-023-20220825 states that the aim of the sequential approach is to ensure that areas at little or no risk of flooding from any source are developed in preference to areas of higher risk and NPPF Paragraph 162 confirms that the aim of the sequential test is to steer development to areas at least risk of flooding from any source (our emphasis).

7.10 In addition to following the sequential approach, Paragraph: 004 Reference ID: 7-004-20220825 of the PPG advises that avoidance of flood risk in plan and decision making can be achieved by the following:

- Substituting lower vulnerability uses for higher vulnerability uses.
- Within sites, using site layout to locate the most vulnerable aspects of development in areas of least flood risk, unless there are overriding reasons to prefer a different location.

7.11 Based on the above considerations, the Site Analysis Plan at Appendix 9 shows how a sequential, risk-based approach has been used to inform the alternative spatial arrangement between public open space and the developable area shown on the Proposed Indicative Map at Appendix 6. It demonstrates how the spatial arrangement:

- Avoids development in areas of medium and high risk surface water flooding, by excluding the land from the developable area and incorporating it into the public open space (a water compatible use).
- Locates dwelling houses (a more vulnerable use) in areas at no or low risk.

7.12 In addition, the illustrative masterplan at Appendix 10 shows how, within the developable area, site layout can be used to locate the least vulnerable elements of the development (roads, pedestrian/cycle links, amenity space, rear gardens) in areas of low risk. Further, since the roads and pedestrian/cycle links follow the path of the flood flows, they can be designed to channel the flow of water during a surface water flood event.

7.13 The inclusion of the medium and high risk areas of the site as well as about 50% of areas at low risk within the public open space shown on the Proposed Indicative Map means that only about 0.2 hectares of the developable area is at low risk of surface water flooding. Even if the area at low risk of flooding is discounted from the developable area of 2.37 hectares (allowing for the exclusion of the set back from Station Road of 0.16 hectares referred to in Section 6 above), this leaves an "effective" developable area of 2.35 hectares, which at an appropriate density of 20 dph, results in a development potential of 47 dwellings.

7.14 Section 5.3.1 of the WBSFRA confirms that for the purposes of Level 1 Strategic Flood Risk Assessment, a site is at low risk if less than 10% is at risk of surface water flooding in the 1 in 1,000-year event. Based on the Proposed Indicative Map, the 0.2 hectares of land within the developable area at low risk of surface water flooding represents 8.5% of the developable area. Accordingly, as Figure 5-2 of the WBSFRA confirms, the sequential test is passed.

8 Spatial Arrangement of the Public Open Space and Developable Area

8.1 As previously stated, we do not consider the spatial arrangement between the public open space and the developable area shown on the Policy RSA22 Indicative Map to be an effective use of land and whilst we believe the spatial arrangement shown on the Proposed Indicative Map will achieve a more effective use of land for housing and public open space which will deliver other sustainability benefits, we recognise that in accordance with Paragraph 176 of the NPPF and Policy SP2 of the LPR, it is necessary to demonstrate that the alternative arrangement is at least as effective in meeting the written requirements of Policy RSA22 d. and the LSCA (save for the requirement to contain development as indicated in Figure 2).

8.2 The public open space (POS) shown on the Indicative Map has an area of 1.28 hectares (1.15 hectares taking account of the change required to the northern site boundary identified in Section 3 above), which is substantially larger than the 0.27 – 0.38 hectares required under LPR Policy DM40 in accordance with the NPFA standard of 3-4.3 hectares per thousand population.

8.3 We do not object to this level of provision since it will make a significant contribution to the recreational and visual amenities of the settlement. More importantly however, we agree with the LSCA that containing development to part of the site and providing a substantial public open space is necessary to conserve and enhance the landscape and scenic beauty of the AONB because; it will retain existing public views across the RSA22 site to the wooded skylines of Grimsbury Wood to the south and Roebuck Wood to the north; and by creating new public views of these skylines from within the site, it will enhance the visual links between the settlement and wider landscape.

8.4 However, we note that the POS shown on Figure 2 of the LSCA and the Policy RSA22 Indicative Map has an elongated form which extends across the entire length of the northern boundary of the RSA22 site. We do not consider this to be an effective use of land so we believe it is relevant to consider whether the alternative spatial arrangement between the POS and developable area shown on the Proposed Indicative Map would also be effective in retaining and enhancing visual links to Grimsbury Wood and Roebuck Wood.

8.5 Interrogation of the LSCA identifies the following existing and potential visual links which require consideration:

The public view across the site of Roebuck Wood from a short section of the public highway on Station Road, adjacent to the junction with Hermitage Green (LSCA viewpoint photo's 4 and 5).

- The public view across the site of Grimsbury Wood from Charlotte Close (LSCA viewpoint photo's 6 and 7).
- Potential visual link across the site to Grimsbury Wood from the RSA20 site (post development).
- Potential visual link across the site to Grimsbury Wood from the RSA21 site (post development).
- Potential visual links to Roebuck Wood and Grimsbury Wood from the RSA22 public open space (post development).

8.6 At Appendix 11 is an assessment of how development of the RSA22 site would impact upon the existing view across the site to Roebuck Wood from the public viewpoint on Station Road. In short, it demonstrates that provided development does not extend beyond the line of sight from the viewpoint out to the edge of Roebuck Wood, the visual link will be retained. The line of sight has been added to the Site Analysis Plan at Appendix 8 to demonstrate how the spatial arrangement shown on the Proposed Indicative Map optimises the development potential of the site, whilst at the same time retaining the public view of Roebuck Wood from Station Road (and overcoming surface flood risk constraints).

8.7 The existing visual link from Charlotte Close to Grimsbury Wood shown on LSCA viewpoint photo's 6 and 7 is of a wooded horizon viewed above and between the trees on the south eastern boundary of the RSA20 site, which it shares with the RSA22 site. The views between and over the boundary trees continue across the RSA22 site and the spatial arrangement between the POS and developable area shown on the Indicative Map is intended to allow for this. However, the POS shown on the Proposed Indicative Map is broader at this point and the developable area is set further back from the RSA20/RSA22 boundary, such that it is even more likely to achieve the retention of the visual link to Grimsbury Wood

8.8 Development of the RSA20 site has the potential to create new public views across the RSA22 site to Grimsbury Wood and, in this regard, LPR Policy RSA20 g.iii. requires the development to maintain the views through and over the built form to the woodland beyond. However, the soft landscaping plans approved under full planning permission for the erection of 16 dwellings on the RSA20 site (ref 20/00912/FULEXT) show new tree and hedgerow planting along the boundary, with the new trees being located to infill the gaps between the existing boundary trees. This new boundary planting within the RSA20 site is likely to weaken the visual link from the site to Grimsbury Wood but, for the reasons stated above, the spatial arrangement between the POS and developable area shown on the Proposed Indicative Map is more likely to retain whatever visual link remains.

8.9 Development of the RSA21 site has the potential to create new public views across the RSA22 site to Grimsbury Wood. The spatial arrangement shown on the Indicate Map shows development set back from the boundary with the RSA21 site for its entire length to allow for this, whereas the arrangement shown on the Proposed Indicative Map shows development extending up to the boundary with the RSA21 site for part of its length. This suggests it will be less effective in creating new visual links from the RSA21site to Grimsbury Wood.

8.10 However, this simple comparison does not take account of the landscape buffer which will be planted along the boundary of the two sites in advance of any development on the RSA21 site taking place. This is a requirement of LPR Policy RSA21 and is in accordance with Condition 5 of outline permission 19/02993/OUTMAJ, which has been part-discharged by the approval of a detailed landscape buffer plan (ref 20/02413/COND2).

8.11 Condition 5 requires that the landscape buffer is planted as woodland edge and hedgerow and includes large native trees and woodland edge mix, including oak and wild cherry. The reason given for Condition 5 is to ensure the landscape buffer provides a good level of screening...given the high sensitivity of the surrounding AONB open countryside. Accordingly, the approved landscape buffer plan shows a mix of woodland edge and hedgerow planting, including 34 native trees (as replicated on the Landscape Strategy Plan at Appendix 3). Taking account of the significant screening effect the landscape buffer will have, we believe that development of the RSA21 site will provide only a limited opportunity to enhance the AONB by creating a new visual link from the RSA21 site, across the RSA22 site, to Grimsbury Wood. Therefore, we do not believe it is necessary to contain development on the RSA22 site as indicated in Figure 2 of the LSCA and shown on the Policy RSA22 Indicative Map, especially given the wider sustainability objectives an alternative spatial arrangement can achieve.

8.12 The inclusion of a substantial public open space within the RSA22 site will create new public views of Grimsbury Wood and Roebuck Wood which will enhance visual links from the settlement to the wooded skylines of the surrounding AONB. The area of the POS shown on the Proposed Indicative Map (1.17 hectares) is slightly larger than the POS shown on the Policy RSA22 Indicative Map (1.15 hectares, allowing for the change to the northern boundary) and so is likely to be just as effective in creating new public views of Grimsbury Wood to the south and Roebuck Wood to the north.

8.13 Based on the above assessment, we believe the spatial arrangement shown on the Proposed Indicative Map will be just as effective in retaining and enhancing visual links from the settlement to the wooded skylines of Grimsbury Wood and Roebuck Wood.

8.14 We also note that the LSCA and Policy RSA22 d. include a requirement for development to *“be set adjacent to the rear gardens of Lipscomb Close to avoid an open edge to the rear gardens”* because the open edge detracts from the appearance of the site. However, the POS shown on the Indicative Map extends right up to the boundary with Lipscomb Close, so part of the open edge will remain visible and the adjacency of the POS to the open edge Close could adversely affect the privacy and amenities of the residents. Therefore, by extending the developable area up to the northern boundary of the RSA22 site, the spatial arrangement shown on the Proposed Indicative Map will be more effective in meeting the requirement of Policy RSA22 d. v.

8.15 In addition to retaining and enhancing visual links with the wooded skylines and avoiding the open edge to the Lipscomb Close boundary, the LSCA recommends that should development on part of the site be taken forward, this would require *“careful consideration of a central open space, which could have the character of a village green.”* We are strongly of the view that such consideration should be given to this matter at plan making stage and not left to application stage, not least because it may be difficult at application stage to secure planning permission for a development which represents a material change to the parameters shown on an Indicative Map in an adopted local plan.

8.16 We also believe the LSCA proposes careful consideration is given because it is itself uncertain of the role and function of the space within the settlement or the site itself. On the one hand, the LSCA refers to it as a central open space, which acknowledges that the space will occupy a central location within the built form of the settlement following the development of the RSA20, RSA21 and RSA22 sites; and given its central position, it could act as a focal point for the surrounding built form and bringing the community together, in keeping with the role and character of a “traditional” village green. We agree with this approach, not least because it will help to integrate the new housing on the RSA22 site as well as the existing housing on Hermitage Green into the physical and social fabric of the community.

8.17 On the other hand, the recommendations of the LSCA state that the development on the RSA22 site *“should be contained as indicated in Figure 2”* and, by reference to the Legend, Figure 2 identifies the central open space as a “landscape buffer”. Such references suggest that the new housing on the RSA22 site will somehow be harmful to or incompatible with the rest of the settlement and needs to be kept separate or apart from it, which would explain the elongated form of the POS and why it extends the entire length of the site’s northern boundary. In our view, this has the effect of segregating the new housing from the rest of the settlement (in much the same way as Hermitage Green is isolated today) and is the exact opposite of what the POS should be achieving in wider place shaping terms (NPPF Paragraphs 126 and 130; the National Design Guide; and Policy SP7 and Paragraph 5.30 f. of the LPR).

8.18 To illustrate this point, the masterplan at Appendix 10 shows how the alternative spatial arrangement of the public open space and developable area on the Proposed Indicative Map will achieve a more cohesive and legible arrangement of built form and open space, which brings the new housing on the RSA20, RSA21 and RSA22 sites together around a central open space that has the character of a village green. In turn, the open space forms a centrepiece to the new housing that will frame and overlook it. As Paragraph 5.28 of the LPR states (para-phrasing the Building Better, Building Beautiful Commission) *“...new development should be designed to fit in to the life and texture of the place where it occurs and should also aim to be an improvement of that place.”*

8.19 On the basis of the above, we conclude that the elongated form and extent of the POS shown on the Indicative Map is potentially harmful in terms of segregating the new housing from the rest of the settlement. Nor will it make the most of the opportunity presented by the requirement for a central open space to provide a focal point for the settlement and integrate the new housing in to the physical and social fabric of the community. These objectives will be better served by the spatial arrangement of the POS and developable area shown on the Proposed Indicative Map.

8.20 In giving careful consideration to the POS it is also relevant to consider Policy DM40 of the LPR and supporting text, which set out the factors to be taken into account in relation to the provision of high quality public open space. These include:

- Location, size, condition and nature of the land.
- Attractiveness, interest, multifunctionality, inclusivity and safety of the design, layout and Facilities.
- Suitability of the site for an appropriate range of recreational activities, both formal and informal.
- Contribution to achieving biodiversity net gains.

8.21 Taking these factors into account, we believe that the potential of the POS shown on the Indicative Map to achieve a high quality public open space is restricted by its elongated form. Whilst it is 255 metres wide and has a maximum depth of 78 metres at its centre, this quickly tapers off to a depth of 27 metres on the Lipscomb Close boundary (allowing for the adjustment to the northern boundary) and 14 metres on the Station Road boundary. These dimensions restrict the potential to accommodate a wide range of recreational activities and, in particular, the narrowness of the space adjacent to Lipscomb Close will limit its recreational use and peaceful enjoyment.

8.22 In addition, by excluding an area of surface water pooling and a flow path from the POS, the spatial arrangement shown on the Indicative Map will not fulfil its potential to perform a range of functions and

achieve multiple benefits by contributing towards flood risk avoidance and management and achieving net biodiversity gains through the creation of new wetland habitats (NPPF Paragraph 120 a) and b).

8.23 In contrast, the area of POS shown on the Proposed Indicative Map is of a similar size (1.17 hectares), which is substantially larger than the 0.37-0.53 hectares required by LPR Policy DM40 for a development of 47 dwellings. However, it has a far more regular shape, with a width of between 115 and 160 metres and a depth of 85 metres. This provides the opportunity to deliver a higher quality POS, because it can accommodate a wider range of formal and informal recreational activities (especially organised/team sports) and achieve a greater sense of tranquility and quiet enjoyment of the space.

8.24 In addition, the proposed area of POS includes a larger area of land at risk of surface water flooding, so it has greater potential to contribute towards flood risk avoidance and management and achieving net biodiversity gains through the creation of wetland habitats. In turn, the creation of new wetland habitats has the potential to contribute towards, the mitigation of nutrient pollution (LPR Policies DM6 and RSA22 h. refer).

8.25 For the above reasons, we believe that the area of POS shown on the Proposed Indicative Map has the potential to deliver a higher quality public open space than the POS shown on the Indicative Map, and will deliver the wider objectives sought by Paragraphs 98 and 120 a) and b) of the NPPF and Policies SP7 and DM40 of the LPR.

8.26 For the above reasons, we believe that compared with the spatial arrangement shown in Figure 2 of the LSCA and on the Policy RSA22 Indicative Map, the arrangement of the POS and developable area shown on the Proposed Indicative Map at Appendix 6 is better able to meet the written requirements of the LSCA and Policy RSA d. (save for the requirement to contain development as indicated in Figure 2) aimed at conserving and enhancing the AONB whilst achieving other sustainable development objectives, including optimising the use of the site for housing.

1 Highway Access

9.1 We agree that highway access to the site can be provided off Station Road as stated in Policy RSA22 b. and shown on the Indicative Map.

9.2 However, the Council's highway team has raised concerns about the impact of additional traffic on the B4009 Newbury Road/Priors Court Road/Station Road roundabout and to address these concerns, Policy RSA22 c. requires a Transport Assessment to be undertaken at application stage.

9.3 Reliance on Station Road to accommodate all development traffic means 100% of vehicle trips will pass through the roundabout junction and so there will be limited flexibility to address any highway capacity or safety concerns in relation to the roundabout junction that may arise at application stage. So, in our view, Policy RSA22 and the Indicative Map should identify additional access options which would help to reduce the potential highways impact on the roundabout by allowing at least some of the development traffic to disperse via the local highway network without having to use the roundabout junction. This will provide flexibility at application stage to overcome any highway capacity or safety concerns in relation to the roundabout junction that may be identified through transport assessment and increases the prospects of the development being delivered. An additional access could serve just part of the development on the RSA22 site, or the internal road layout within the site could be designed to connect the additional access to the access off Station Road, which would give all development traffic the option of avoiding the roundabout junction altogether. We believe this approach is consistent with Paragraph 104 of the NPPF.

9.4 In this regard, there are two additional access options which we consider to be available, suitable and achievable. These are shown on the Proposed Indicative Map at Appendix 6 and are as follows:

- 1 a) Off B4009 Newbury Road
- 2 b) Off Lipscomb Close

Availability

9.5 Both access options pass through the Old Farmhouse/RSA21 site, which is largely owned by the housebuilder TA Fisher and Sons (Fishers) and is currently the subject of a reserved matters application (ref 21/02923/RESMAJ) submitted pursuant to outline permission 19/02993/OUTMAJ. The outline permission was granted subject to a condition approving the details of a priority junction on Newbury Road to access the site and the reserved matters application includes details of a 5.5-metre-wide access road with footways extending up to the landscape buffer adjacent to the RSA22 site.

9.6 Fishers freehold interest in the Old Farmhouse/RSA21 site was acquired in 2019 and the HM Land Registry Form TP1 (Appendix 4) which documents the terms of the conveyance includes binding legal covenants upon Fishers and rights of access in favour of the current joint owners of the RSA22 site to extend the RSA21 site access road across the landscape buffer and allow for its use in connection with residential development on the RSA22 site. Accordingly, access to the RSA22 site from Newbury Road, via the Old Farmhouse/RSA21 site, is available.

9.7 The conveyance of the Old Farmhouse/RSA21 site documented in the HM Land Registry Form TP1 did not include the parcel of land within the RSA21 site which extends from the boundary with the RSA22 site to the adopted highway on Lipscomb Close (Appendix 4). This land remains in the joint ownership of the RSA22 site owners and is available for the formation of an access road from Lipscomb Close to serve development on the RSA22 site. LPR Policy RSA21 provides for access to be taken from Lipscomb Close to serve development on the RSA21 site but, in accordance with outline permission 19/02993/OUTMAJ and the binding covenants documented in the HM Land Registry Form TP1, development on the RSA21 site will be accessed from Newbury Road only and so the access from Lipscomb Close to serve development on the RSA21 site is not required.

9.8 Accordingly, there are no planning, ownership or legal constraints which would affect the availability of the two additional access options to serve development on the RSA22 site.

Suitability

9.9 The Council has already accepted that access off Newbury Road is suitable to serve a development of up to 21 dwellings on the Old Farmhouse/RSA21 site (Policy RSA21 and outline permission 19/02993/OUTMAJ refer) and the priority junction/site access road proposed as part of the reserved matters application 21/02923/RESMAJ have the capacity to serve a significantly larger number of dwellings than this.

9.10 As confirmed by Policy RSA21 and the Indicative Map, the Council has already accepted in principle that access off Lipscomb Close is suitable to serve a development on the RSA21 site of approximately 10 dwellings and there can be no highway or planning reason why this would not also apply to the access serving development on the RSA22 site. Such an arrangement is shown on the masterplan at Appendix 10.

Achievability

9.11 We believe that both additional access options are achievable. The RSA22 site is identified in the HELAA as being “potentially developable in part”, which means the Council considers there is a reasonable prospect that development of the site would be delivered within years 6-10 of the LPR plan period and given the need prior mitigation of nutrient pollution and essential network upgrades at the Chieveley Sewage Treatment Plant (Policy RSA22 h. and i.), this timeframe seems realistic. In this context, the development of the RSA21 site is at an advanced (reserved matters) planning stage and Fishers have confirmed to the Council that it is their intention to complete development by 2025/26.

9.12 We are not aware of any factors which would affect the economic viability of developing the RSA21 site or Fishers capacity to complete the development at the point they envisage.

9.13 For all the above reasons, we consider that the identification of additional access options is both desirable and deliverable. Therefore, we propose that Policy RSA22 b. is amended refer to access being provided by Station Road and either Newbury Road or Charlotte Close and the Indicative Map is amended to show the additional points of access.

9.14 To avoid ambiguity, reference in Policy RSA21 to access being provided by Lipscomb Close should be deleted and the Indicative Map amended accordingly.

1 Walking and Cycling Links

10.1 Policy RSA22 b. requires walking and cycling links to the RSA20 and RSA21 sites. Whilst such a link (or links) to the RSA21 site can be delivered because of the legal covenants and rights in favour of the joint owners of the RSA22 site documented in the HM Land Registry Form TP1, a link to the proposed footpath/cycleway on the RSA20 site cannot be delivered because the land required to achieve this is not owned or controlled by the local highway authority or the RSA22 site joint owners

10.2 However, we believe it would be possible to provide a walking and cycling link from the RSA22 site to the existing pedestrian/cycle link running parallel to the adopted section of Station Road, as shown on the plans at Appendices 6 and 10. Accordingly, we propose that the reference in Policy RSA22 b. to a walking and cycling link to allocation RSA20 (Charlotte Close) is removed and replaced by reference to a link to Station Road; and that the Indicative Map is amended accordingly.

10.3 With regard to the reference in Policy RSA22 b. to “*taking opportunities to make these linkages part of a Hermitage to Newbury off road path*”, we believe it is important to read this in conjunction with Paragraph 12.98 of the LPR, which states:

“Specifically, this could include opportunities to replace that part of the former Didcot, Newbury and Southampton railway line to provide between Hermitage and Hampstead Norreys, a route for both leisure and potentially commuter use, incorporating existing minor roads and bridleways as a walking, cycling and pedestrian route” (aka Eling Way)

10.4 Taken together, these statements reflect the Council’s long-term ambition to deliver a continuous off road recreational/commuter route from Newbury, via Hermitage, to Hampstead Norreys.

10.5 The development of the RSA22 site represents a significant opportunity to deliver a critical section of this route from Eling Way (which currently terminates at Marlston Road), along the disused track which runs between 1 Marlston Road and the disused railway line and across the site, to connect with the Newbury to Hermitage off road path along Station Road and/or via the proposed pedestrian/cycle link running across the RSA20 and RSA21 sites (see the plans at Appendices 6 and 10).

10.6 In our view, this is a far superior option to the one currently being considered by the Council, which involves an on road section along Marlston Road and Lipscomb Close, which we consider to be unsafe.

10.7 However, the LPR Policy RSA22 Indicative Map does not make provision for this. Therefore, to provide clarity and secure delivery of this section of the route, we propose that the Indicative Map is changed to include all of the land required within the RSA22 site boundary to deliver the link, plus a “walk and cycle link” notation along the disused track.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?
 * Yes
 * No

Yes

Please give reasons for your answer

4. Proposed Changes

Proposed changes to the text of Policy RSA22

Policy RSA22 a.

Proposed change: Delete the words “*approximately 34 dwellings*” and replace with “*approximately 47 dwellings*”.

Reasons: The change is required to ensure that Policy RSA22 is:

- 1 b) Justified i.e. it is the most appropriate strategy for achieving sustainable development on the RSA22 site, taking into account the reasonable alternatives, based on proportionate evidence.
- 2 d) Consistent with national policy i.e. it will enable the delivery of sustainable development which makes a more effective use of land for housing and achieves other social and environmental objectives in accordance with the policies of the Framework and other statements of national planning policy (as listed in Paragraph 4.3 of these representations) .

Policy RSA22 b. (change 1 of 2)

Proposed change: After “Station Road,” add the words “and either Newbury Road or Lipscomb Close”.

Reasons: The change is required to ensure that Policy RSA22 is:

b) Justified i.e. it is an appropriate strategy taking into account the reasonable concerns of the local highway authority regarding the potential impact of development traffic on the B4009 Newbury Road/Priors Court Road/Station Road roundabout junction.

- 1 c) Effective i.e. it allows some flexibility at application stage to overcome the potential impact of additional traffic on the B4009 Newbury Road/Priors Court Road/Station Road roundabout, to enable the delivery of development on the RSA22 site within the plan period.
- 2 d) Consistent with national policy i.e. it addresses the potential impact of developing the RSA22 site on the local transport network, in accordance with Paragraph 104 of the NPPF.

Policy RSA22 b. (change 2 of 2)

Proposed change: Delete the words “to the allocations RSA20 (Charlotte Close) and RSA21 (Old Farmhouse).” and replace with “to Station Road and the RSA21 (Old Farmhouse) allocation”.

Reasons: The change is required to ensure that Policy RSA22 is:

- 1 b) Justified i.e. it is an appropriate strategy for providing walking and cycling links given that the link to the RSA20 (Charlotte Close) allocation is not achievable.
- c) Effective i.e. it is deliverable over the plan period.

Proposed changes to the Policy RSA22 Indicative Map (as shown on the Proposed Indicative Map at Appendix 6)

The “red line” site boundary and gross site area (change 1 of 2)

Proposed change: The northern boundary of the RSA22 site needs to be amended to reflect the availability of land for development.

Reasons: The change is required to ensure that Policy RSA22 is:

- 1 c) Effective i.e. it does not include any land which is not available for development of the RSA22 site, such that development proposals including the land would not be deliverable.
- 2 d) Consistent with national policy i.e. it ensures that Policy RSA22 is unambiguous, so it is evident to all parties what land is available for inclusion in development proposals.

The “red line” site and gross site area (change 2 of 2)

Proposed change: The south eastern boundary of the site needs to be changed to include within the red line and gross site area all of the land to which the parameters of Policy RSA22 relate, specifically land which is required to meet the provisions of Policy RSA22 b. in relation to the Hermitage to Newbury (and Hermitage to Hampstead Norreys) off road path; and land which is required to meet the provisions of Policy RSA22 d. iii. In relation to additional boundary planting.

Reasons: The changes are required to ensure Policy RSA22 is:

- 1 c) Effective i.e. inclusion of all of the land to which Policy RSA22 relates will ensure that development of the RSA22 site will be in accordance with the provisions of the Policy and is deliverable within the plan period.
- 2 d) Consistent with national policy i.e. the changes will ensure that Policy RSA22 is consistent with Paragraph 16 of the NPPF, specifically that it is aspirational but deliverable (b)) and is clearly written and unambiguous (d)), so that the area of land to which Policy RSA22 relates is evident to all parties.

Spatial representation of Policy RSA22 parameters

Proposed changes: The Indicative Map needs to be changed to indicate, by reference to the Legend, the location (and extent, as appropriate) of land to which the parameters of Policy RSA22 apply, in accordance with the proposed changes to the text of Policy RSA22 set out above and the Proposed Indicative Map at Appendix 6 of these representations.

The changes are:

- 1 i) Inclusion of two additional “access” symbols to indicate the proposed additional access points off Newbury Road and Lipscomb Close (Policy RSA22 b.).
- 2 ii) Re-positioning of the “walk and cycle link” symbol indicating the link to the RSA20 (Charlotte Close) allocation to indicate a link to Station Road (Policy RSA22 b.).

iii) Inclusion of a new “walk and cycle link” symbol to indicate an additional link via the disused track to Marlston Road/Eling Way (Policy RSA22 b.)

- 1 iv) Changes to the location and extent of the central open space (Policy RSA22 d. ii.).
- 2 v) Inclusion of a new “landscape buffer” symbol in the Legend and indicating as “landscape buffer” the additional planting along the south eastern boundary (Policy RSA22 d. iii.) and the set back from Station Road (Policy RSA22 d. iv.).

Reasons: The changes are required to ensure Policy RSA22 is:

b) Justified i.e. it is the most appropriate strategy for achieving a sustainable development of approximately 47 dwellings on the RSA22 site, taking into account reasonable alternatives, based on proportionate evidence.

	<p>1 c) Effective i.e. the changes ensure that development of the RSA22 site will be in accordance with the parameters of Policy RSA22 and is deliverable within the plan period.</p> <p>d) Consistent with national policy i.e. the changes will ensure that, taken together, Policy RSA22 and the Indicative Map are consistent with Paragraph 16 of the NPPF, in that they have been prepared with the objective of contributing to the achievement of sustainable development (a)); are aspirational but deliverable (b)); and are clearly written and unambiguous, such that the locations and areas of land to which the parameters of Policy RSA22 a., b. and d. relate are evident to all parties.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
<p>5. Independent Examination</p>	<p>The main issue raised in this representation is the importance of optimising the use of the RSA22 site for housing in circumstances where there is an existing and anticipated shortage of suitable housing land to meet the identified housing needs of the AONB spatial area.</p> <p>Paragraph 125 of the NPPF is unique in terms of national planning policy in that it requires this issue to <i>"be tested robustly at examination."</i> Since the issue has been raised on behalf of the joint site owners and they are uniquely placed to assist in a robust examination, it is especially important that they are allowed to participate in the oral stage of the examination.</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No</p>	Yes

<p>1. Do you consider the Local Plan Review is legally compliant? * Yes</p>	Yes

* No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	We note the proposed criterion: "A Heritage Impact Assessment will be required due to the presence of non-designated heritage assets." This statement does not fully align with the HELAA site assessment. Assessment should also consider the site's relationship with a nearby Scheduled Monument (Grimsbury Castle) – a point that is not mentioned in the Sustainability Appraisal for the site. As a result, the wording of this requirement for heritage impact assessment will need to be amended, in discussion with the Council's heritage advisers. We suggest revised wording for consideration. Furthermore, we are unclear on the rationale for not undertaking a DBA and if needed field evaluation on this site, given the ridge and furrow system identified on the HER. To align with the NPPF, wording needs to be added on a requirement for archaeological assessment.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	
4. Proposed Changes	A Heritage Impact Assessment will be required due to the presence of non-designated heritage assets and the nearby Scheduled Monument (Grimsbury Castle) The development will be informed by a desk-based archaeological assessment followed by field evaluation if necessary;
5. Independent Examination - If your representation is seeking a	No

change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No

2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.	

* Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>The site allocations presented in this chapter have not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of each site to accommodate development. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on these sites. We have concerns and have provided this information in a separate document <see comments below></p> <p>The site is on SPZ3, secondary A bedrock aquifer</p> <p>Developments connecting to Chieveley STW may be problematic as it discharges into The River Lambourn SAC which is an area of nutrient neutrality meaning any additional loads from the STW would need to be offset elsewhere in the catchment. Natural England will be better placed to advise on the specifics of this. Mitigation of additional load will need to be secured before any development can proceed.</p> <p>As stated in our suggested amendments and notes on Policy DM7 <PS1555>, adequate wastewater treatment infrastructure capacity resources must be available or provided to support all proposed development prior to the occupation. Due to the constraints highlighted for this site, this must be stated in the policy text for site RSA22.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	As stated in our suggested amendments and notes on Policy DM7 <PS1555>, adequate wastewater treatment infrastructure capacity resources must be available or provided to support all proposed development prior to the occupation. Due to the constraints highlighted for this site, this must be stated in the policy text for site RSA20.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	You should not be building on fields in an area of outstanding natural beauty.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>You should not be building on fields in an area of outstanding natural beauty.</p> <p>You should be looking for alternatives that involve redeveloping vacant sites elsewhere, not untouched land.</p> <p>The road you propose to join to off the haven is narrow and all houses on the haven park cars on the street. There is therefore only normally space for one lane of traffic, twenty more houses will exacerbate the traffic and parking issues. Children play on the street and we don't need more traffic on it!</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>You are not cooperating at all. You dismiss objections from local people and seem to be doing nothing other than making things worse for existing residents on the haven and in Kintbury.</p>
<p>4. Proposed Changes</p>	<p>Do not build on this site at all.</p> <p>It is an undeveloped field in an area of outstanding natural beauty. I frequently see multiple types of deer, bats, birds of prey (including barn owls), frogs and toads. I hope the new survey is sufficient to put you off building here. I think it shouldn't be allowed whether you find newts or not though, simply on the basis of the other wildlife.</p> <p>I don't see any allocation in your plan to improve matters regarding traffic in the village, or infrastructure or facilities improvement.</p> <p>The access on the haven is inadequate for additional housing and for construction vehicles. This concern was completely dismissed in your original response to comments, but should be addressed. How can you expect to get construction vehicles up a narrow road that constantly has on street parked cars and children playing? What will you do to ensure building works don't impact nearby residents? I work from home, looking out over the field every day.</p> <p>You also have provided no provision to the detrimental affect this will have on current residents of the haven in the long term. We look out on fields, and our houses are not overlooked at present. Building here, on land that is higher than the haven, will impact our light levels and privacy.</p> <p>There are other alternative sites in the village with better access. The number of houses you are planning to build here is negligible compared to the rest of the plan. Go put them somewhere else.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	<p>No</p>
<p>5. Independent Examination</p>	
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes * No</p>	<p>Yes</p>

<p>Please give reasons for your answer</p>	<p>CPRE Berkshire has over 400 members and supporters</p> <p><i>Introduction:</i> The Campaign to Protect Rural England (CPRE, the countryside charity), Berkshire Branch welcomes the opportunity to comment on the Draft West Berkshire Local Plan. We would like to express our appreciation of the documentation that has been provided, in particular the clarity and accessibility of the supporting information.</p> <p><i>CPRE concerns:</i></p> <ol style="list-style-type: none"> 1. We remain concerned however about the introduction of further housing some of the land allocations and would the Council to provide more evidence concerning air quality impact both on the new areas for development and on nearby areas of important landscape and wildlife interest. 2. The main purpose of this response however is to express our great concern regarding the appearance of a major new site adjacent to the AONB, which is proposed to be allocated for mixed use settlement in North East Thatcham, (the Floral Way) which we believe is unnecessary, contrary to national planning policy and certain to cause disruption and unredeemable harm to what is currently an especially attractive and unspoilt rural area. 3. Similarly the land adjoining The Haven, Kintbury (Site Ref: KIN6) in which 20 dwellings are proposed, will cause overcrowding in an village area of AONB countryside, increase car fumes and cause traffic congestion in a small village location. The road network is already overcrowded with the exit and entrance used by neighbouring villages of Combe and Inkpen, which also serves the industrial estate located in Inkpen with overly large haulage vehicles. 4. The two areas above are part of the AONB/green field area. where landscape is “managed to conserve and enhance its natural beauty in accordance with its designation”. 5. CPRE believes that genuine housing needs in West Berkshire can more than adequately be met by regenerating brownfield (previously developed) land, rather than sacrificing countryside in and around the AONB or by swamping local villages with excessive development. There can be a significant reduction in the housing numbers currently imposed on West Berkshire as they are no longer binding but are merely ‘advisory’, due to a recent change of government policy announced by Housing Secretary, Michael Gove. West Berkshire has 53 brownfield sites totalling 46.54 hectares, which at a rough estimate would allow building of 2837 homes without the need to build on any farmland or countryside, and without damaging the impact on the rural environment, especially the AONB. 6. Many of WBC old list of 25 approved development sites have now been built on and it would be helpful if years of completion were given. <p><i>Additional comments:</i></p> <ol style="list-style-type: none"> 1. The draft plan proposes a large strategic development area NE of Thatcham now for 1500 dwellings to 2039, although part of a plan for some 2500 in the longer term. It would run uphill to the AONB and be a source of light pollution. This has brought strong opposition from Upper Bucklebury because of its landscape and traffic impacts. Given the recent statement by minister Gove that where there are significant impacts on the landscape Councils could reduce their housing numbers: WBC should pursue this and reduce the numbers of housing.. 2. There are sites along the A4 valley which would be better for housing rather than commercial use. One report mentioned developers proposal for some 170 homes in the Siege Cross/Colthrop area with a bridge crossing the railway and canal, something Thatcham badly needs, which we strongly support. Government funding should be available to implement this. 3. The uses of the area by the A329 into Newbury and along the A4 have been debated for a long time. It could be an appropriate brownfield area for mixed development with some small blocks of flats for local workers. 4. Proposals for a large distribution centre east of Thatcham was reported in Newbury News some months ago and supported by a councillor. An email of 2 Feb to WBC asking about its location received no reply. It would be bad environmentally with a lot of large lorries coming from A339 Newbury along the poor roads through Thatcham and through Aldermaston village. Policy SP8 recommends that larger distribution sites B8 should be near motorway junctions. Again, this would be a better site for some housing. <p><i>Conclusion:</i> CPRE Berkshire believe that the two specific sites mentioned above, included in the draft Local Plan, are significantly damaging to the countryside; are unsustainable due to poor infrastructure; and cause unnecessary destruction of the landscape and green fields.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is	

<p>consistent with achieving sustainable development.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure.</p> <p>The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.</p> <p>Early engagement between the developers and Thames Water would be beneficial to understand:</p> <ul style="list-style-type: none"> • What drainage requirements are required on and off site • Clarity on what loading/flow from the development is anticipated • Water supply requirements on and off site <p>The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.</p> <p>To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.</p> <p>Link here > https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity</p> <p>We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.</p> <p>Water Response</p>

	<p>On the information available to date we do not envisage infrastructure concerns regarding water supply network infrastructure in relation to this development/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p>Waste Response</p> <p>On the information available to date we do not envisage infrastructure concerns regarding wastewater network or wastewater treatment infrastructure capability in relation to this site/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p>Additional Comments</p> <p>These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water flows being discharged to the public sewer.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water to determine whether a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered is required.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>No</p>
<p>5. Independent Examination</p>	
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	Originally two areas in Kintbury were considered as possible developable sites KIN6 and KIN3, see the enclosed map, with KIN3 as the preferred area for a small developable part for about 20 houses. The change proposed in the Local Plan Submission from KIN3 to KIN6 as the preferred site is wrong for the following reasons: All construction traffic will of necessity access the KIN6 site via a residential area where there is considerable on road car parking. This would not be the case if KIN3 is adopted as the preferred site. If KIN6 is adopted, construction traffic will pass through the centre of Kintbury village via the cross road in the village centre enroute to the A4 and Holt road to Newbury and beyond. This would not be the case for the KIN3 site.

	<p>KIN 6 site is adjacent to the sports ground and so will suffer from noise and light pollution when football matches are being played after dark.</p> <p>There will be a loss of garages in the KIN6 site to enable access to the site. This is not the case for KIN3. The KIN3 site can be as large or small as the requirement for housing changes, the site dimensions will easily accommodate 100 units or alternatively a solar array to ensure a greener construction. The main grid transmission line runs 100mtrs from the KIN3 site on the same landowners property.</p> <p>Access to the doctors surgery, the local school and the train station is also marginally better from the KIN3 site.</p> <p>Buses pass the KIN3 site daily. (see attachment)</p>

Please give reasons for your answer	<p>The site allocations presented in this chapter have not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of each site to accommodate development. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on these sites. We have concerns and have provided this information in a separate document <see comments below></p> <p>The site is on SPZ3, secondary A and principal bedrock aquifers</p> <p>This site would require a Flood Risk Assessment which demonstrates requirements of NPPF and PPG. This is due to its size (greater than 1 hectare. WBDC Confirm?). This requirement should be included in the list of requirements for assessing and developing the site.</p> <p>Kintbury STW is a high spilling site, so actions to address this are required.</p> <p>Development will lead to a deterioration in Phosphorous so a new and tighter permit will be required to prevent this from happening. Mitigation of additional load will need to be secured before any development can proceed. Due to the constraints highlighted for this site, this must be stated in the policy text for site RSA23.</p>

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>EXECUTIVE SUMMARY</p> <p>Boyer has been appointed by Sovereign Housing Association ('Sovereign'), to act on their behalf in respect of the ongoing promotion of the Land adjoining The Haven, Kintbury, for residential development. Boyer have prepared these representations on behalf of Sovereign, in response to the 'Regulation 19' consultation relating to the Proposed Submission West Berkshire Local Plan Review (2022 – 2039).</p> <p>The purpose of these representations is to assist the Council in formulating and refining an approach that is both consistent with national planning policy and the tests of soundness. To this end, general support is provided to the spatial strategy set out in the West Berkshire Local Plan Review (2022 – 2039), to the Council's conduct of the plan-making process in relation to the Duty-to-Cooperate, and specifically for the allocation of Land Adjoining The Haven, Kintbury, for residential development.</p> <p>The Proposed Submission West Berkshire Local Plan (2022 – 2039) ('emerging local plan') proposes to allocate a series of sites to, as a minimum, meet the identified housing needs within the district. Despite the constrained nature of the district, the plan identifies a robust selection of sites that are capable of delivering residential development appropriate to accommodate sustainable growth to meet the minimum local housing need of the area.</p> <p>Sovereign supports this approach, recognising that the Council's commitment to accommodate the identified minimum Local Housing Need ('LHN') figure within the district is paramount.</p> <p>The Council's identification of sufficient developable land to deliver approximately 5% additional homes above the minimum identified need is also supported. Sovereign considers that this 5% 'headroom' provides for a flexible and robust quantum of housing supply to fully ensure that the identified housing needs of the district are met.</p> <p>Furthermore, the identified headroom in the housing supply could usefully accommodate a proportion of the unmet need that is likely to arise from Reading, as part of the Western Berkshire Housing Market Area ('HMA'). Sovereign supports the Council in seeking to accommodate a reasonable proportion of this unmet need and recommends that the Council seek to maximise the delivery of new homes on the</p>

proposed site allocations to assist in delivering this aim. Such an approach would support housing delivery in the wider region in accordance with the Government's commitment to significantly boost the supply of housing, ensuring minimum housing needs are met.

In seeking to deliver the amount of new homes required in the district, the Council have identified an appropriate spatial strategy. The emerging local plan recognises that there is limited further growth potential at the district's most sustainable settlements; namely, Newbury and Thatcham, alongside the Eastern Urban Area, whilst maximising the available land within the relevant site allocations. Sovereign supports the Council's identification of a spatial strategy which directs development to available land within the next most sustainable locations as appropriate, in accordance with the settlement hierarchy.

The otherwise relatively unconstrained nature of the North Wessex Downs Area of Outstanding Natural Beauty ('AONB'), in combination with the presence of a series of sustainable medium and smaller-sized Service Villages, provides that the North Wessex Downs AONB Spatial Area (as identified in proposed Policy SP1) remains appropriate to accommodate a reasonable proportion of the district's identified housing needs.

To maintain the longer-term vitality of the district's Service Villages, such as Kintbury, it is imperative that the Council supports the sustainable growth of these areas, supporting the viability of local services and amenities, alongside delivering much-needed affordable housing in rural areas. To this end, Sovereign supports the identification of specific site allocations within these villages, which provide opportunities for modest sustainable growth whilst conserving and enhancing the special landscape qualities of the AONB.

Sovereign therefore supports the identification of Land Adjoining The Haven, Kintbury ('the site') as being suitable for allocation within the emerging local plan, through proposed Policies SP15: 'Sites allocated for residential development in North Wessex Downs AONB' and RSA23: 'Land adjoining The Haven, Kintbury'. Kintbury comprises a relatively unconstrained settlement that can accommodate sustainable growth during the plan period. The site is well-positioned to make a reasonable contribution to meeting the district's development needs.

The site is in a sustainable location, within practical walking and cycling distance of the range of services and facilities provided in the village, benefitting from good access to nearby main settlements including Newbury (by bus and rail), Reading, and London Paddington (by rail). There are not considered to be any significant constraints to the development of the site, which could provide at the very least a minimum of 20 high-quality new homes.

Sovereign is able to confirm that the site is available for development now, offers a suitable location for residential development, and is achievable with a realistic prospect that housing can be delivered on-site within the first five years of the proposed plan period. Consequently, the site should be considered favourably in relation to planning practice guidance and its proposed allocation within the emerging West Berkshire Local Plan is supported.

Furthermore, Sovereign considers that the Proposed Submission West Berkshire Local Plan Review (2022 – 2039), as currently formulated, is Legally Compliant and is capable of being found Sound following independent Examination. Sovereign considers that in preparing the emerging local plan, the Council have sufficiently complied with the Duty-to-Cooperate.

INTRODUCTION

Context

Boyer has been appointed by Sovereign Housing Association ('Sovereign'), to act on their behalf in respect of the ongoing promotion of the Land adjoining The Haven, Kintbury, for residential development. The Site Location Plan is provided at Appendix 1: Site Location Plan.

Sovereign holds a specific land interest within West Berkshire, known as Land adjoining The Haven, Kintbury ('the site'). These representations are aligned with this land interest and address topics within the West Berkshire Local Plan Review consultation, and its supporting evidence base, accordingly.

The site has been assessed by West Berkshire District Council ('the Council') within the district's Housing and Economic Land Availability Assessment ('HELAA') (2023), under Site Reference: KIN6. Furthermore, the site is proposed for allocation within the Local Plan Review document, to accommodate residential development, under proposed Policies SP15: 'Sites allocated for residential development in North Wessex Downs AONB' and RSA23: 'Land adjoining The Haven, Kintbury'.

The purpose of these representations is to assist the Council in formulating and refining an approach that is both consistent with national planning policy and the tests of soundness, as set out at paragraph 35 of the NPPF; namely, whether the emerging West Berkshire Local Plan (2022 – 2039) is:

- a) Positively prepared – providing a strategy which as a minimum seeks to meet the area's objectively assessed needs.
- b) Justified – provides an appropriate strategy, taking into account reasonable alternatives and based on proportionate evidence.
- c) Effective – deliverable over the plan period and based on effective joint working.
- d) Consistent with national policy – enabling the delivery of sustainable development.

At this stage of the plan-making process, it is essential that West Berkshire District Council ('the Council') continues to pursue an approach that is consistent with national policy, effective, justified, and positively prepared. These representations comprise our recommendations to assist the Council in achieving such an approach, as emerging plan progresses toward adoption.

These representations build upon and should be considered in conjunction with the previous representations submitted by Sovereign to the 'Regulation 18' consultation on the West Berkshire Local Plan Review 2020 – 2037: Emerging Draft (December 2020), which ran from 11 December 2020 to 5 February 2021.

Policy Context

The Council adopted the Core Strategy Development Plan Document (2006 - 2026) in July 2012. Five years later, the Council then adopted the Housing Site Allocations Development Plan Document in May 2017, to implement the spatial framework set out within the Core Strategy. The adopted Development Plan for the district therefore sets out the spatial strategy to meet development needs up to 2026 and provides a series of site allocations and planning policies that seek to deliver that strategy.

To ensure that planning policies remain relevant and are able to effectively meet the needs of the local community, the Town and Country Planning (Local Planning) (England) Regulations 2012 (as amended) requires local planning authorities to review local plans at least once every 5 years from their adoption date.

The Proposed Submission West Berkshire Local Plan Review (2022 – 2039), which is the subject of the 'Regulation 19' consultation, reflects the distilled outcome of that review process. The draft plan sets out an updated vision and strategy, alongside an updated series of site allocations and policies that would supersede the adopted Core Strategy upon its adoption, which is anticipated in 2024.

Sovereign **supports** the Council's commitment to review the existing development plan through this process.

Land adjoining The Haven, Kintbury ('the site')

Land adjoining The Haven, Kintbury, comprises approximately 1.5 hectares of land toward the south-western extent of Kintbury village. The site lies to the rear of existing residential properties, which front onto the road known as 'The Haven'. The site currently comprises an undeveloped open field, bordered by dense hedgerows with intermittent tree cover.

To the north of the site lies the Kintbury Rangers Football Club, which includes a range of sports facilities alongside the Jubilee Centre, a community sports building. Beyond the well- vegetated site boundaries to the south and west lie undeveloped fields within the North Wessex Downs AONB. The site lies entirely within Flood Zone 1 (low flood risk) and has no relevant planning history.

West Berkshire District Council assessed the site within the district's Housing and Economic Land Availability Assessment ('HELAA') [Footnote 1: Available online at: <https://westberks.gov.uk/helaa>], under Site Reference: KIN6. The HELAA, which was first published in February 2020 and subsequently updated (most recently in January 2023), concluded that the site was potentially available, potentially suitable, and achievable for residential development within the proposed emerging plan period.

Sovereign supports the conclusion that residential development would be achievable on the site within the emerging plan period. However, Sovereign considers that the site is also immediately available for development and is suitable for residential development within the proposed emerging plan period in relation to the provisions set out in Planning Practice Guidance². Further detail is provided in Section 6 of these representations in relation to the availability, suitability, and achievability of the site for residential development.

As section 5 of these representations illuminates, the site benefits from being sustainably located and there are not considered to be any significant constraints to the development of the site for residential dwellings within the emerging plan period. The development of the site is considered to be achievable whilst conserving and enhancing the special qualities of the AONB, in accordance with proposed Policy SP2: North Wessex Downs AONB.

The development of the site for a minimum of 20 new homes would contribute toward meeting the district's significant identified housing need in a sustainable location, in addition to providing a range of further benefits; including much-needed affordable housing, biodiversity improvements, and financial contributions toward the maintenance of local infrastructure.

Development at this scale is considered to represent an efficient use of the land, whilst respecting the character and setting of the wider landscape in which the site is set. As such, the allocation of the site for a minimum of 20 dwellings, which provides scope for additional dwellings to be provided above the identified quantum, would accord with Paragraph 124 of the NPPF, in which it is made clear that 'planning policies and decisions should support development that makes efficient use of land'.

Consequently, Sovereign supports the proposed allocation of the site for residential development in the emerging local plan. Furthermore, Sovereign considers that, with sensitive design, the site could accommodate a higher number of new homes, that would go towards meeting the district's identified housing needs. As such, Sovereign recommends that the proposed allocation is amended to reflect this approximate capacity to reflect the full potential of the proposed allocation and ensure the efficient use of development land within the district.

THE SCALE OF HOUSING NEED

In providing sufficient capacity within the headroom of supply in West Berkshire, Sovereign recommends that the Council seeks to maximise the development potential of the sites proposed to be allocated for residential development within the plan.

To this end, Sovereign recommends that the identified approximate capacity within proposed Policy RSA23: 'Land Adjoining The Haven, Kintbury' be revised to approximately 35 dwellings. As set out in Section 6 of these representations, the site is considered to be capable of delivering this quantum of development whilst being sensitively designed to conserve and enhance the special landscape character of the AONB.

DEVELOPMENT MANAGEMENT POLICIES

The comments set out in this section are intended to assist the Council in developing an approach that is consistent with national planning policies and the tests of soundness. Some comments have been

included to assist the Council in developing a series of policies that are both effective and robust. Where possible, suggested amendments have been set out in the response.

Sovereign broadly supports the West Berkshire Local Plan Review (2022 - 2039). However, the comments set out below are intended to identify opportunities to improve the effectiveness of the proposed policies.

As a general principle, the plan would benefit from consistent numbering, in relation to the paragraphs, policy criteria, and sub-criteria. This would assist the accessibility and the useability of the draft plan, improving the effectiveness of the document substantially.

Policy RSA23: Land adjoining The Haven, Kintbury (Site ref: KIN6)

Consistent with the comments made within these representations, Sovereign supports the allocation of the Land adjoining The Haven, Kintbury. However, it is recommended that the draft policy is revised to reflect the need to make effective use of land and to boost the supply of housing within the district:

i) The provision of approximately at least 20 dwellings to be developed in a low density well-designed scheme in keeping with the surrounding area;

LAND ADJOINING THE HAVEN, KINTBURY

The Site

Land adjoining The Haven, Kintbury ('the site'), comprises approximately 1.5 hectares of land toward the south-western extent of Kintbury village. A Site Location Plan is provided at **Appendix 1: Site Location Plan** [see attachment 'Boyer obo Sovereign_Full Rep'].

The site currently comprises an undeveloped open field, bordered by dense hedgerows with intermittent tree cover. Immediately to the north of the site lies Kintbury Rangers Football Club, which is further abutted by a range of sports facilities (including three tennis courts, a bowling green, and a skatepark), alongside the Jubilee Centre, a community sports building.

Beyond the well-vegetated site boundaries to the south and west lie undeveloped fields within the North Wessex Downs AONB. The site lies entirely within Flood Zone 1 (low flood risk) and has no relevant planning history.

The site is within a reasonably sustainable location, approximately 365 metres from Kintbury High Street, which represents a short 4-minute walk or 1-minute cycle from the proposed site access to The Haven. Several services are provided within Kintbury village, including:

- Kintbury St Mary's Primary School (420 metres);
- Local convenience stores, including an independent butcher and a Post Office (380 metres);
- Two Public Houses (460 and 710 metres);
- The Jubilee Centre, Kintbury Tennis Club, Kintbury Bowls Club and Kintbury Skatepark (150 metres);
- Kintbury Village Green (225 metres);
- Allotments (400 metres);
- Kintbury Village Hall (110 metres); and
- Kintbury Rail Station (800 metres).

Development of site has the potential to deliver a range of benefits including:

- Approximately 35 high quality new homes, with a wide mix of housing sizes, types, and tenures, including much needed affordable housing;
- Appropriate retention of existing trees and hedgerows, enhanced by additional planting and habitat creation to settle the development in the landscape and provide biodiversity net gains;
- A high-quality development of homes designed to minimise resource use and carbon emissions, which is resilient to the effects of climate change; and
- Developer contributions towards the provision of new and improved local infrastructure, potentially including improvements to the local transport network, maintenance of local sports facilities, and/or other benefits as appropriate.

Additionally, the development of this site within an existing area of residential development and may further trigger wider regeneration efforts within the locality, stimulated by the provision of additional investment and new households into the local area.

Deliverability of the Proposed Development

West Berkshire District Council assessed the site within the district's Housing and Economic Land Availability Assessment ('HELAA') (2023), under Site Reference: KIN6. The HELAA concluded that the site was *potentially available*, *potentially suitable*, and *achievable* for residential development within the proposed emerging plan period.

Sovereign **supports** the conclusion that residential development would be *achievable* on the site within the emerging plan period. However, Sovereign considers that the site is also immediately *available* for development and is *suitable* for residential development within the proposed emerging plan period in relation to the provisions set out in Planning Practice Guidance.

Furthermore, the submission of any forthcoming planning application for the development of the site would be supported by a series of appropriate technical reports, which would demonstrate the proposal's

compliance with all relevant planning policies and demonstrate that suitable mitigation of any potential adverse impacts of the development has been incorporated as appropriate.

Availability

Sovereign is able to confirm that the site is immediately available for residential development. Although the land is currently within multiple landownerships, Sovereign benefits from an option over the entire extent of the site. Furthermore, there are no known legal restrictions to the development of the site for the proposed use.

Consequently, the site is considered to be *available* for residential development within the plan period, in accordance with PPG.

Suitability

In accordance with PPG, a site can be considered to be *suitable* if it would provide an appropriate location for development when considered against relevant constraints and their potential to be mitigated. Sovereign considers that there are no absolute constraints to the development of this site within the proposed plan period.

The Council's HELAA (2023) undertook an assessment of the suitability of the site in relation to a range of potential environmental and policy-based constraints. The assessment determined that the site is *potentially suitable*, based on the requirement for further information to determine the site's potential impacts and the extent of the developable area.

In relation to potential constraints to the development of the site, the HELAA identifies that the Council's Highways Team retained concerns over the potential impact of the development on Local Highway Capacity, in particular on the High Street, should the proposal comprise more than 22 dwellings.

However, given the sustainable location of the site, less than a 5-minute walk from the services located at the High Street, it is considered that the proposal would be unlikely to result in significant adverse impacts to Local Highway Capacity.

Sovereign is committed to ensuring that the development of the site is acceptable in relation to transport impacts. Accordingly, a Transport Note is provided at Appendix 2 in support of these representations.

As identified within the Transport Note, the proposed development of 35 new dwellings in this location will not give rise to any significant impacts on the operation of the transport network. Further, the Note demonstrates that all of the land necessary to provide access to the Site and the necessary visibility splays at local junctions is within the ownership of Sovereign or is Highways Land and is accordingly deliverable.

As part of any future planning application, a Transport Statement will be prepared and submitted to further assess the impacts of the proposed development and any suitable mitigation required. However, at this stage it is considered that robust evidence has been provided to demonstrate that there are no highways constraints, which would prevent the development of this Site.

Furthermore, in relation to the site's location within the North Wessex Downs AONB, the Council's Landscape Sensitivity Assessment (2011), in which the site was assessed under reference KIN011, concluded that development on the whole site would be acceptable subject to certain recommendations:

- the retention of boundary hedgerows and trees and scattered trees within the southern section of the site;
- the replacement of the conifer hedgerow with more appropriate planting;
- that views from the surrounding countryside, Public Right of Way and the neighbouring recreation field are carefully considered; and
- the provision of new planting to integrate the buildings into the landscape.

Sovereign is committed to ensuring that residential development at the site is accommodated without harm to the natural beauty of the AONB. Sovereign is therefore committed to preparing a detailed Landscape and Visual Impact Assessment to inform the detailed design of the development proposal, to ensure that potential impacts are sufficiently mitigated and/or screened as appropriate.

Consequently, the potential concerns relating to the *suitability* of the site are not considered to represent absolute constraints to development and can be appropriately overcome. Sovereign considers that the site is therefore *suitable* for development in relation to the provisions set out in Planning Practice Guidance [Footnote 16: PPG: Housing and economic land availability assessment. Paragraph: 018 Reference ID: 3- 018-20190722].

Achievability

Given that the site is both *available* and *suitable* for the proposed quantum of development within the plan period, in combination with the modest scale of the site, it is considered that the proposed quantum of development identified within the current allocation could be achieved on the site within the first five years of the proposed plan period. Further, as identified through these representations it is considered that the site is capable of accommodating a greater quantum of development (approximately 35 new homes). Consequently, the site is considered to be *deliverable* in relation to the terms of the PPG.

Deliverability

As set out above, the site is *available* for development now, is in a *suitable* location for residential development, and is *achievable* for development in the early part of the proposed plan period. Consequently, the site is considered to be *deliverable* in relation to the provisions set out in Planning Practice Guidance.

Sovereign therefore **supports** the proposed allocation of the site for residential development within the Proposed Submission West Berkshire Local Plan Review (2022 – 2039) through Policies SP15: 'Sites

allocated for residential development in North Wessex Downs AONB' and RSA23: 'Land adjoining The Haven, Kintbury'.

Furthermore, in accordance with the discussion set out within these representations, Sovereign **recommends** that the proposed approximate capacity for residential development identified within the allocation is increased to approximately 35 dwellings, to reflect the full potential of the proposed allocation and ensure the efficient use of development land within the district in accordance with the NPPF.

Revision of the approximate capacity of new homes that could be accommodated on the site is considered to be necessary to ensure that the emerging local plan is *positively prepared* and *effective* in meeting the identified housing needs for the district and in assisting with meeting unmet need arising from outside of West Berkshire.

CONCLUSION

The Proposed Submission West Berkshire Local Plan Review (2022 – 2039) sets out how West Berkshire District Council proposes to, as a minimum, meet identified development needs within the district area. The proposed spatial strategy seeks to direct development toward the most sustainable locations within the district, whilst recognising the vital role that modest growth provides to support medium and smaller-sized villages within the North Wessex Downs Area of Outstanding Natural Beauty.

Sovereign supports the Council's commitment to meeting housing needs in full and supports the Council's identification of a reasonable amount of headroom in the district's housing supply to ensure that local housing needs are met during the plan period.

However, Sovereign recommends that the Council seeks opportunities to maximise the development capacity of appropriate sites to ensure that the identified headroom is as robust as is reasonably practicable. Land adjoining The Haven, Kintbury, which is proposed to be allocated for the development of approximately 20 new homes under emerging Policy RSA23, presents such an opportunity. Sovereign considers that the approximate capacity allocated for the site could be higher, without detriment to the amenity of adjoining residents, with sufficient scrutiny to the design of the scheme and in considering greater benefits to the wider community. The provision of additional capacity could reflect the full potential of the proposed allocation and ensure the efficient use of development land within the district.

Furthermore, Sovereign supports the proposed spatial strategy, which includes a modest amount of residential development within the North Wessex Downs AONB Spatial Area. The approach maintains the existing spatial strategy within the district and would support housing delivery in the wider region in accordance with the Government's commitment to significantly boost the supply of housing. The proposed allocations have also been evidenced and justified through detailed analysis to ensure the high value of the AONB and any potential impacts are carefully considered.

Otherwise relatively unconstrained, the nature of the district's North Wessex Downs AONB Spatial Area, which includes the presence of a series of sustainable, small and mediumsized villages, provides that the area remains appropriate to accommodate a reasonable proportion of the district's identified housing need. Furthermore, to support the longer-term viability of these villages, it is critical that the Council supports opportunities to provide modest growth in appropriate locations.

To this end, Sovereign supports the proposed allocation of Land adjoining The Haven, Kintbury, for residential development under emerging Policies SP15 and RSA23. Kintbury comprises a relatively unconstrained settlement that could accommodate a reasonable level of growth during the proposed plan period. Land adjoining The Haven is well-positioned to make a reasonable contribution to meeting the district's development needs in this location.

The site is in a sustainable location, within practical walking and cycling distance of the range of services and facilities within Kintbury. Furthermore, the site benefits from good access to nearby main settlement areas via bus and rail links, including Newbury and Reading. There are no significant constraints to the development of the site for approximately 35 new homes which could not be resolved through detailed, sensitive design consideration.

Sovereign is able to confirm that the site is available for development now, represents a suitable location for development, and that development of the site is achievable with a realistic prospect that housing can be delivered within the first five years of the draft plan period. The site is deliverable and should continue to be favourably regarded in relation to allocation for residential development within the emerging West Berkshire Local Plan.

We look forward to continuing to work with West Berkshire District Council, Kintbury Parish Council, and the wider community to provide much-needed new housing in this rural community. We also look forward to exploring how the Land adjoining The Haven, Kintbury can contribute to the delivery of sustainable development and benefit the village, local infrastructure, and facilities.

See attached document for a full response <Boyer obo Sovereign_full rep>

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?
* Yes
* No

Yes

Please give reasons for your answer

Sovereign considers that in preparing the emerging local plan, the Council have sufficiently complied with the Duty-to-Cooperate.

3. The Duty-to-Cooperate

Section 33a of the Planning and Compulsory Purchase Act (2004) ('PCPA') requires that local planning authorities should co-operate with other relevant local authorities, the County Council, prescribed bodies, and other persons, in relation to the preparation of a Local Plan. The Duty requires the Council to engage

	<p>constructively, actively, and on an on-going basis, in the preparation of the Plan, insofar as it relates to a strategic matter. Strategic Matters include the sustainable development and use of land that has, or would have, a significant impact on at least two planning areas, such as the amount and distribution of housing.</p> <p>Furthermore, the NPPF confirms, at paragraph 26, that government policy comprises that the effective and ongoing working between strategic policy-making authorities and relevant bodies is integral to the production of a positively prepared and justified strategy. It goes on to confirm that, in particular, joint working should help to determine where additional infrastructure is necessary and whether development needs that cannot be met wholly within a particular authority area could be met elsewhere. As such, cooperation clearly relates to maximising the effectiveness of plan preparation.</p> <p>Demonstrated within the effective and on-going joint working undertaken by West Berkshire District Council with the other Western Berkshire HMA authorities, in particular illuminated through the preparation of the SoCG, Sovereign considers that the West Berkshire Local Plan Review is <i>positively prepared</i> and the product of an <i>effective</i> and robust process of cooperation between the authorities.</p> <p>Sovereign therefore considers that the Duty-to-Cooperate has been sufficiently demonstrated in the plan-making.</p>
4. Proposed Changes	As a general principle, the plan would benefit from consistent numbering, in relation to the paragraphs, policy criteria, and sub-criteria. This would assist the accessibility and the useability of the draft plan, improving the effectiveness of the document
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	Sovereign benefit from a specific land interest within West Berkshire District, which is proposed to be allocated for residential development under the emerging Policy RSA23: Land Adjoining The Haven, Kintbury. In representing Sovereign, Boyer are well-placed to advise on the appropriateness of the land allocated for development.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? -	No

<p>Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure.</p> <p>The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.</p> <p>Early engagement between the developers and Thames Water would be beneficial to understand:</p> <ul style="list-style-type: none"> • What drainage requirements are required on and off site • Clarity on what loading/flow from the development is anticipated • Water supply requirements on and off site <p>The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.</p> <p>To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.</p> <p>Link here > https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity</p> <p>We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.</p> <p>Water Response</p> <p>On the information available to date we do not envisage infrastructure concerns regarding water supply network infrastructure in relation to this development/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p>Waste Response</p> <p>On the information available to date we do not envisage infrastructure concerns regarding wastewater network or wastewater treatment infrastructure capability in relation to this site/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p>Additional Comments</p> <p>These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water flows being discharged to the public sewer.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	

4. Proposed Changes	Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water to determine whether a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered is required.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No

<p>Please give reasons for your answer</p>	<p>Policy RSA24 proposes to allocate an additional 8 permanent pitches at an existing private site at Paices Hill within an area of land currently comprising transit pitches. This allocation is carried forward from the existing adopted plan. The site has now obtained planning permission for a change of use from 8 transit caravan pitches to 8 permanent Gypsy / Traveller pitches. It is noted that the site is located within the Detailed Emergency Planning Zone (DEPZ) of AWE Aldermaston where new residential developments would not usually be acceptable. However, in this particular instance, it was considered that having permanent pitches on site would be an improvement to the existing transit provision as the former would be expected to provide day rooms with more secure accommodation than touring caravans in the event of an emergency. WBC supports the allocation which will make a contribution towards identified need.</p>

<p>Please give reasons for your answer</p>	<p>The site allocations presented in this chapter have not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of each site to accommodate development. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on these sites. We have concerns and have provided this information in a separate document <see comments below></p> <p>Historic landfill site adjacent (Cross Lane Gully), drinking water protection, SPZ3, secondary A bedrock aquifer</p> <p>There is a historic landfill historic landfill next to site which means that any significant foundations or ground excavations at the site may lead to creation of a pathway for pollutants within the landfill to reach groundwater. We refer the LPA to the Environment Agency's Approach to Groundwater Protection guidance Which highlights our requirements for developments on landfill sites. Developers at any allocated sites located on a historic landfill would need to make enquiries regarding potential requirements under the Environmental Permitting Regulations 2016.</p> <p>It is not clear to us that this site would connect to a STW as it is quite far from any Thames Water sewers. Therefore, any wastewater drainage proposal for this site must be clearly stated as well as all mitigation measures proposed to ensure wastewater disposal from the development will not have a negative impact on sensitive receptors. These should be secured before any development can proceed.</p>

Please give reasons for your answer	We are unclear if the potential impact on the setting of the 33 and 34, Church Lane (GII) has been considered. Notwithstanding the fact this is the continuation of an adopted policy, suitable mitigation may be needed along the western edge of the site, informed by heritage assessment. We suggest wording for consideration.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	
4. Proposed Changes	<u>Development will be informed by a Heritage Impact Assessment (HIA) to minimise any harm to the setting of 33 and 34 Church Lane</u>

Please give reasons for your answer	The policy provides protection for ancient woodland in line with the NPPF.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes
Please give reasons for your answer	The NPPF requires protection for ancient woodland. This site is adjacent to ancient woodland, Long Copse (SU44036489) ASNW 4.71 Ha. We support the policy wording <i>e. Provide an appropriate buffer of at least 15m between the development and the Ancient Woodland at Long Copse Wood., The precise buffer will be determined through detailed assessment and design when proposals are submitted for development. A 10m woodland buffer along the northern and western boundaries of the site to link to Long Copse Wood and tree planting along the southern boundary of the site should also be provided. These must be in place before the occupation of the site;</i>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>The site allocations presented in this chapter have not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of each site to accommodate development. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on these sites. We have concerns and have provided this information in a separate document <see comments below></p> <p>Point 'k' states "No caravans will be permitted within Flood Zones 2 and 3 at the northern edge of the site". While we support this as caravans are classed as 'highly vulnerable' under NPPF, there is no Flood zone 2/3 within the site (as per the red line boundary on page 137). Can this be confirmed?</p> <p>It is not clear to us that this site would connect to a STW as it is quite far from any Thames Water sewers. Therefore, any wastewater drainage proposal for this site must be clearly stated as well as all mitigation measures proposed to ensure wastewater disposal from the development will not have a negative impact on sensitive receptors. These should be secured before any development can proceed.</p>

2. Do you consider the Local Plan Review is sound? -	No

Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.

- * Yes
- * No

Please give reasons for your answer

The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure.

The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.

Early engagement between the developers and Thames Water would be beneficial to understand:

- What drainage requirements are required on and off site
- Clarity on what loading/flow from the development is anticipated
- Water supply requirements on and off site

The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.

To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.

Link here > <https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity>

We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.

Water Response

The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website

<https://developers.thameswater.co.uk/>

[Developing-a-large-site/Planning-your-development](https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development).

Waste Response

The scale of development/s is likely to require upgrades to both the wastewater network and sewage treatment infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing and infrastructure phasing plan. The plan should determine the magnitude of spare capacity currently available within the network and what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The developer can request information on the network and treatment infrastructure by visiting the Thames Water website

<https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development>. Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ

	<p>Additional Comments</p> <p>These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water flows being discharged to the public sewer.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water to determine whether a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered is required.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	No
<p>5. Independent Examination</p>	
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes</p> <p>* No</p>	
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes</p> <p>* No</p>	
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes</p> <p>* No</p>

<p>1. Do you consider the Local Plan Review is legally compliant?</p>	Yes

* Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes
Please give reasons for your answer	We note and support the proposed criterion in each of the policies listed in this representation that relates to desk-based archaeological assessment and, if needed, field evaluation.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	
4. Proposed Changes	For all sites listed in this representation, while we support the policy requirement for desk-based archaeological assessment and, if necessary, field evaluation, the language used across the policies used is not consistent. The Council may wish to review the language used across these policies to ensure it improve consistency. We do not consider this is a matter of soundness. Linked with this matter: a) for ESA1, the phrasing implies that field evaluation will definitely be required; is that the case?
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No

5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>Please give reasons for your answer</p>	<p>The site allocations presented in this chapter have not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of each site to accommodate development. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on these sites. We have concerns and have provided this information in a separate document <see comments below></p> <p>This site is on SPZ3, secondary A superficial aquifer</p> <p>We would not support any additional flows entering the Newbury STW - a known high spiller until significant work has been done to tackle the causes of the frequent spills. As stated in our suggested amendments and notes on Policy DM7, adequate wastewater treatment infrastructure capacity resources must be available or provided to support all proposed development prior to the occupation. Due to the constraints highlighted for this site, this must be stated in the policy text for site ESA1. (Please take notes of the details provided under RSA1 regarding wastewater discharge constraints).</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>

<p>Please give reasons for your answer</p>	<p>I am writing to file my complete OBJECTION to the continued expansion of industry at Membury.</p> <p>I write in the hope that you will listen to the RESIDENTS who live in this AREA. However, it is obvious, that so far, nothing we say has any impact.</p> <p>TRAFFIC. The B4000 is inadequate to handle the huge amount of enormous lorries intended if this planning is allowed. There has already been an HGV smashed into the side of a cottage. The road is deteriorating by the day with potholes. The road is too small on some bends for 2 HGVs to pass. These lorries go through the villages as 60/70mph and there are no speed restrictions they adhere to. Would someone please explain to us why they are banned through Wickham B4000 and not through Lambourn Woodlands.</p> <p>These lorries not only abuse the B4000 but also the small lanes behind Membury where they cut through and get stuck around the bends. There must be a full enquiry by the Highway department delivered personally, to all the residents affected by this development.</p> <p>EMPLOYMENT This unsustainable development in an ANOB has no travel plans. There are not enough local employees to work here so they will be coming from outside areas. There is no travel plan buses etc. to facilitate their journeys.</p> <p>There is NO ENVIRONMENTAL IMPACT ASSESSMENT FOR MEMBURY in ANOB AREA.</p> <p>There is no cumulative impact assessment for Membury and all development is impacting on the Critical Infrastructure i.e. power cuts, water shortage etc.</p> <p>WBC HAS A POLLUTION AND CARBON footprint Policy which has not been adhered to with regard to planning at Membury. This causes noise impact [from small planes for example) and air quality. The M4 has been shut down AT Least twice due to chemical releases from Rutpen and we have been told to stay in our houses for our safety.</p> <p>The size and scale of developments are totally against anything in an ANOB AREA. The government is adamant these areas should be protected especially ancient woodland and pollution of chalk streams. It seems the WBC has no worry about industrial spread onto agricultural land. There has been no risk assessment for flooding.</p> <p>THE STANTEC REPORT states that there is NO evidence base for further Industrial expansion at Membury. Therefore there is no justification for further development on this site. (Esa2 and 3)</p> <p>It is required in NEWBURY AND READING where of course there are many people available to employ. The economic arguments do not outweigh the environmental impact these massive industrial developments are having on this landscape.</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I have been appalled by the continued push to expand the Membury site despite the complete lack of transport infrastructure. It seems the that the only agenda West Berks Council have is to plough on with industrialisation regardless of the irreparable damage done to the local area of Outstanding National Beauty. My home is on the B4000 the traffic on which has increased immeasurably in the 35 years my wife and family have lived there. We are woken through the night at ever-increasing intervals - my wife is seriously ill - and this is only set to get even worse. This is a minor road by its very name that is taking major heavy goods traffic and is already crumbling.</p> <p>I honestly believe that West Berks Council are completely blind to the damage that is being done to the health of people who have no wish other than to lead a peaceful life, let alone the havoc caused to the environment and countryside. The council only need to see a developer brandishing a debit card with a promise of employment that benefits people from outside this area to simply roll out the welcome mat no matter the consequences.</p> <p>The Membury development plans are unsustainable if local welfare is given the most minimal consideration, plus the risk of localised flooding, all this without even considering the pollution and carbon footprint. However the council appears keen to implement virtually everything that is put before them concerning Membury until it doesn't suit their purpose.</p> <p>Good alone knows what the light pollution and carbon pullution will do to the local wildlife. Developers care not one jot, they simply wish to boost their wealth no matter what the cost, aided and abetted by the council planners. No heed is paid to the water run off that will pollute ancient chalk streams and poison the aquifer.</p> <p>It would appear that the Stantec Report is quite clear that development is needed in Newbury and Reading but not here.</p> <p>That you have allowed the despised Walker Development to proceed shames you all. It is this department which is overseeing the demise of an area of a ONB. I have zero faith or confidence in West Berkshire Planning to stop this destruction which will see the local infrastructure gradually crumble until complete decay renders it totally unfit for any purpose.</p>

<p>Please give reasons for your answer</p>	<p>Draft Policy ESA2 sets out the requirements for delivering employment floorspace on the allocated site. As explained above, outline planning permission (Ref. 19/02979/OUTMAJ) was granted in May 2021. The applicant has since submitted the RMA (Ref. 22/00897/RESMAJ), which was granted on 14 February 2023, and multiple applications seeking to discharge the pre-commencement conditions attached to Ref. 19/02979/OUTMAJ. Significant effort and cost have been exerted in seeking to realise this planning permission and a lawful commencement of development works on site will take place as soon as possible (2023/2024).</p> <p>Given the applicant's intention to deliver the outline planning permission, and subsequent RMA, we have no comment to make on the wording of Draft Policy ESA2 as we do not envisage a further planning application being required.</p> <p>However, it is crucial that the boundary of the site allocation is extended (for industrial, storage and distribution uses). This would make a significant contribution to helping WBC meet the identified need for industrial floorspace in West Berkshire. The whole site is owned by Walkers, it is in a suitable and sustainable location for development and is therefore a viable option that can be delivered in the short-term (years 1-5). One of the primary purposes of the Local Plan is to consider the future growth aims of the District and to allocate land for development that is not currently committed.</p> <p>It is recognised that the site is within AONB. However, the site is well-contained by existing (and emerging) buildings and the site includes a former runway which comprises concrete/hardstanding, the visual amenity of which is not of benefit to the AONB. It is crucial that the AONB designation does not constrain development which would otherwise result in significant economic benefits. Indeed, this was recognised by WBC through the granting of Ref. 19/02979/OUTMAJ.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	I have said yes here as i do not feel (having no legal background) able to comment otherwise.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy:	No

<p>the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am particularly concerned that no Environmental Impact Assessment has been carried out on the Membury Industrial site which has expanded hugely, especially over the previous eight years. This has led to an intolerable increase in the traffic on this rural road network which affords no regard for the residents who live here. There is no public transport in the area, which along with a complete lack of cycle lanes, means that the impact on the traffic on the network is beyond its capacity. These roads are dangerous and further development will only increase this danger.</p> <p>The economic arguments for increasing the industrial development at Membury do not outweigh the environmental impact on the local environment. This is an ANOB, yet that does seem to be taken into consideration when driving the industrial development on. This is in direct contradiction to DC32 points i, ii and viii</p> <p>Indeed it seems to go against the Government's desire to protect these areas leading to the rural character of this area being destroyed. See DC35 section h:</p> <p>It would not generate traffic of a type or amount inappropriate for the rural roads, byways or restricted byways affected by the proposal or require improvements to these roads.... which could be detrimental to their character.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>25). Strategic policy-making authorities should collaborate to identify the relevant strategic matters which they need to address in their plans. They should also engage with their local communities and relevant bodies including Local Enterprise Partnerships, Local Nature Partnerships, the Marine Management Organisation, county councils, infrastructure providers, elected Mayors and combined authorities (in cases where Mayors or combined authorities do not have plan-making powers).</p> <p>This has been taken from the accompanying documents to the plan in order to justify my comments in this section.</p> <p>I would suggest that the local community and local nature partnerships have not been consulted with reference to the industrial development at Membury.</p> <p>Also as stated in Policy ESA3 section h:</p> <p>Development will be informed by a Flood Risk Assessment, which will include flood mitigation measures including SuDS.</p>
<p>4. Proposed Changes</p>	<p>A full Environmental Impact Assessment needs to be carried out on the whole of the Membury Industrial Site before further development, which expands onto the ANOB, is allowed. This whole area has been subject to piecemeal development over which no-one has an overview of the true impact. The effect on this ANOB is devastating and must be reviewed properly.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	<p>No</p>
<p>5. Independent Examination</p>	
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes</p>	<p>Yes</p>

* No

<p>Please give reasons for your answer</p>	<p>As residents of Lambourn Woodlands, we would like to ensure our comments are recognised and incorporated into the local plan regarding the Membury Industrial area.</p> <p>We urge the plan to Stop further development at Membury for the following reasons.</p> <p>Having lived next to the notorious Membury crossroads for over 25 years, we wanted to highlight the ever-increasing numbers of HGVs using the road and the negative impact on the quality of life for residents. Ermin Street (The primary road access to Membury), originally a narrow country lane, widened to aid the construction of the M4 in the late '60s. It was never designed for the current traffic levels and, in places, is barely wide enough for 2 HGVs to pass. There are numerous sharp bends; adverse cambers and long straights encourage speed and overtaking, which is extremely dangerous on most of the road and hazardous in certain sections. As an unnaturally widened road, most of the properties that front onto the road are very close to the road, making life next to the road increasingly unpleasant, noisy and dangerous. We can vouch for this when pulling into or out of our driveway, having had numerous near misses. Recently a local property was narrowly missed when an out-of-control HGV crashed through its garden wall; the same property was also hit in a separate incident only days earlier. The reality of living on Ermin Street, the main road leading to Membury!</p> <p>We object to further expansion to the Membury industrial area as this is leading to unsustainable traffic and HGVs on Ermin Street. This also highlights the danger of the Membury crossroads junction, the main route into the already over-expanded Membury. There have been many crashes on Membury crossroads in recent months, and it's only a matter of time before fatalities occur.</p> <p>There is no public transport to Membury, so further development will only increase traffic levels (clearly not a sustainable location). Recent planning applications give little or no serious consideration to travel plans. Even more alarming is the lack of environmental impact assessments in what is supposed to be an AONB.</p> <p>As residents, we often experience power outages, with the utility companies blaming the increased demand of the industrial users as the infrastructure can't cope.</p> <p>We hope the plan will incorporate the real-world experiences of residents, halting or seriously limiting future development at Membury the current uncontrolled expansion is unsustainable, environmentally disastrous and will lead to further RTA's and, inevitably, fatalities at the dangerous Membury crossroads.</p> <p>Other objections and consequences of allowing further expansion at Membury include the following.</p> <ul style="list-style-type: none"> - No environmental Impact Assessments – why? - No cumulative impact assessments for Membury and development impact the Critical Infrastructure-e.g constant power cuts. - No flood risk assessments-the increased business footprint has caused localised flooding and no permeable membranes. - Pollution/Carbon Footprint increase-which goes against WBC's Policy as there is no public transport. - Noise impact and Air quality loss as experienced by many local residents. Loss of amenity from the uncontrolled development at Membury. - Size and scale of developments out of keeping with the AONB (Area of Outstanding Natural Beauty) Policy at a time when the Government is stressing the importance of protecting these areas. - WBC Need to Protect the Night skies and Wildlife habitats. - The Stantec report still states that there is no need for Industrial development in this area but that it is required in Newbury and Reading. - The economic arguments do not outweigh the environmental impact that these massive industrial developments are having on the landscape. - The rural character of the area is being destroyed by WBC. It's not too late to halt the sprawl of Membury.
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>We are writing to raise our concerns regarding the proposed industrial development at Membury, and the associated issues that are impacting our community and environment. We are deeply concerned about the following issues:</p> <ol style="list-style-type: none"> 1 Increased traffic on rural road networks: The increase in industrial activity at Membury will lead to increased traffic on local roads, which will have a significant impact on the local community. The roads are not designed to accommodate the volume of traffic that already exists and the increase that will result from further development will lead to more safety concerns for pedestrians, cyclists, and motorists. 2 Unsustainable development plans: There are no sustainable travel plans in place for the proposed industrial development at Membury. This is particularly concerning given the rural location of the development, which makes it challenging to access via public transport. 3 No environmental impact assessments: We are concerned that no environmental impact assessments have been carried out for the proposed development, particularly given the significant impact it will have on the local environment. 4 Cumulative impact assessments: There is a lack of cumulative impact assessments for Membury and other developments in the area, which is leading to critical infrastructure issues such as power cuts. This issue requires urgent attention. 5 Flood risk assessments: There have been no flood risk assessments carried out for the proposed development, and the increased business footprint has caused localised flooding. The lack of permeable membranes is also contributing to this issue. 6 Pollution/Carbon Footprint increase: The proposed industrial development at Membury will significantly increase pollution and the carbon footprint of the area, which goes against WBC's own policy. 7 Noise impact and Air quality: The proposed development will lead to an increase in noise and air pollution, which will have a significant impact on the health and wellbeing of local residents. 8 Size and scale of developments out of keeping with AONB policy: The proposed development is out of keeping with the Area of Outstanding Natural Beauty (AONB) policy, which is concerning given the government's emphasis on protecting these areas. 9 Need to protect the night skies and wildlife habitats: The proposed development will have a negative impact on the night skies and wildlife habitats in the area, which are critical for the conservation of local biodiversity.

	<p>0 Need to protect ancient woodland: The proposed development may impact ancient woodland, which is a valuable natural resource that needs to be protected.</p> <p>1 Concerns for surface water runoff: The proposed development will have a significant impact on surface water runoff, which may pollute local chalk streams and the aquifer.</p> <p>2 Industrial spread into agricultural land: The proposed development will lead to the spread of industry into agricultural land, which may have a negative impact on local food production and the rural economy.</p> <p>3 Stantec report: The Stantec report indicates that there is no need for industrial development in this area, but that it is required in Newbury and Reading.</p> <p>4 Economic argument vs environmental impact: We believe that the economic arguments for the proposed industrial development at Membury do not outweigh the significant environmental impact it will have on the landscape and local community.</p> <p>5 Destruction of rural character: The proposed industrial development at Membury will significantly impact the rural character of the area, which is a critical part of our community and needs to be protected.</p> <p>We urge you to take notice of these concerns and ensure that any proposed industrial development at Membury is carried out in a way that is environmentally sustainable and socially responsible. We believe that it is possible to strike a balance between economic development and environmental protection, and we urge you to prioritise the needs and concerns of local residents in any decision-making processes related to this issue.</p> <p>Thank you for your attention to this matter.</p>

Please give reasons for your answer	<p>This site LAM6 (now ESA2) did not appear in the original draft plan but when a planning application 19/02979/OUTMAJ was made it miraculously appeared in the second draft plan ahead of the decision. Some documentation even seemed to hint that the application proposed and already been approved... I would like to see some investigation as to what happened here...</p> <p>Comment to follow is relevant to ESA2 and 3</p> <p>The LPA's own consultation (Stantec) found that Membury is unsustainable as a location for B2/B8 industrial development due to its location 4.5km away from A338 and M4 J14. There is only one bus per day 1.5 km away along roads that are unlit and with no footpaths. Cycling is also dangerous. Highways Officers state that travel plans are generally unsuccessful as a solution. Traffic assessments must use TRICS data and applicants should not be able to use their own traffic data in applications. Conditions pertaining to traffic data should not be allowed in order to better control traffic volumes on the local road network. It is unclear why the LPA continues to pursue this location for industrial development. It is not in line with the sustainability policies of the LPA nor with the NPPF.</p> <p>There have been 4 serious accidents in the last 3 months on the B4000 / Ermin Street, each one involving 3 or 4 vehicles. One incident involved an HGV crashing into trees, taking out an electricity pole and</p>

	<p>jackknifing into a residential property. Sleeping residents were just a couple of feet from the cab. One week later, the same spot saw yet another accident with two cars written off and a builders lorry driven through a hedge. Two accidents involving multiple vehicles at the Ermin Street / Ramsbury Road (Membury) crossroads have also taken place. One of which took out an electricity pole. In all instances, all 3 emergency services were called and the road closed for several hours. When these roads are closed businesses are impacted and the rural road network is heavily affected. This situation is exacerbated when the M4 is closed as the B4000 is a diversion road in this instance.</p> <p>The rural character of the area is being significantly impacted through traffic and the volume of traffic is impacting the structure of some of the older properties situated close to the road. Air pollution levels along the B4000 are already high at 10.4 similar to the centre of Newbury, adding more traffic to the roads will only make this worse. Increasing light pollution has been devastating on our local bat population despite the LPAs poor attempts at mitigation. Noise pollution is also increasing. Local ancient woodland is also heavily impacted by industry. I have lived in Lambourn Woodlands since 1994 but have only noticed a significant deterioration in local amenity in the last 8 years. It seems unhelpful when officers dismiss any objections regarding negative impacts on the amenity of residents as the area is already impacted.</p> <p>There is no evidence or justification for allowing the development of further sites especially of this size at Membury. The location cannot sustain it. Expansion is inappropriate. Critical infrastructure is missing. There are electricity supply issues as the industrial estate often draws too much power and the network cannot sustain it. Cables burn out from time to time and there are frequent outages. Residential supply can be unreliable as a result. There is a known surface water flooding issue on 3rd party land as a result of overdevelopment on the industrial estate. The LPA continues to ignore this - allowing sites to come forward and be developed in a piecemeal fashion. Their approach is not resolving the problem - residents should not be asked to attenuate water run-off on their land. A Surface Water Management Plan is required.</p> <p>It would also be appropriate to have a Flight Safety Zone for Membury and also a major incident plan as none exists at the moment. Membury is home to two service areas with fueling stations, adjacent to a trunk route, a fuel depot, light aircraft activity, a chemical company dealing in solvents, a timber yard and a grain drier amongst other things. Not to have a plan for this is negligent.</p> <p>Please see attached photograph demonstrating how HGVs are unsuitable on B4000/Ermin Street. (Attachment 0960.jpg)</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>Not qualified to say</p>
<p>4. Proposed Changes</p>	<p>A masterplan for Membury is required encompassing a site specific environmental impact assessment and including a surface water management plan to ensure infrastructure is in place before further development can go ahead.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>Our community would like be able to answer questions about Membury and to give a residents view point. Our community feels unheard.</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No</p>	<p>Yes</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the	No

<p>delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure.</p> <p>The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.</p> <p>Early engagement between the developers and Thames Water would be beneficial to understand:</p> <ul style="list-style-type: none"> • What drainage requirements are required on and off site • Clarity on what loading/flow from the development is anticipated • Water supply requirements on and off site <p>The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.</p> <p>To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.</p> <p>Link here > https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity</p> <p>We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.</p> <p>Water Response</p> <p>The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development.</p> <p>Waste Response</p> <p>On the information available to date we do not envisage infrastructure concerns regarding wastewater network or wastewater treatment infrastructure capability in relation to this site/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p>Additional Comments</p> <p>These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water flows being discharged to the public sewer.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	

4. Proposed Changes	Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water to determine whether a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered is required.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements	

<p>with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>10.12 Critical need to address inaction regarding WBC's core strategy, carbon reduction</p> <p>The LPR lauds the location opportunities for industry highlighting the M4 and A34 crossroads in the centre of West Berkshire. But the reality is our road network beyond that motorway with just junctions 13 and 14, is made up of a few A and many small B roads. Where is the thinking and planned investment to improve the links between major roads to access industrial areas like Membury? With goals to develop these places significantly, actions must be taken to accommodate heavy vehicles as they commute to and from the M4 over small country roads not designed to carry HGV's. The B4000 requires constant road repairs, which will worsen as traffic volume increases. Urgent signage and speed enforcement measures to slow traffic to safe limits are required now. Where are those plans and how will WBC tackle the lack of bus services, let alone provide any kind of safe cycling and walking routes?</p> <p>New ideas are desperately needed to create a sustainable traffic policy. Why not consider ideas such as: serious traffic calming measures to ensure slower vehicle speeds equals less fuel burn; educating businesses to lessen HGV diesel emissions and noise with potential "congestion" charging to encourage environmentally safer alternatives; providing and marketing new, regular rural mini-bus services; incentives to encourage job sharing schemes; etc.</p> <p>Top WBC management commitment and resource must be given to tackling something that is strategically critical and requires urgent actioning if WBC's Local Plan 2037 is to succeed. Simply adding "sustainability" aspirations within each policy is not going to fix this. A huge amount of work needs to be done by Highways to obtain up to date traffic data, strategies to tackle the issues, new ideas and measurements to generate an air quality improvement program.</p> <p>If climate emergency is a core strategy, we are way behind target, and urgent measures are needed to get us back on track. Time is running out</p> <p>WBC Planning decisions are made in advance of public consultation</p> <p>This Local Plan's ambitions as well as Policy guidance/constraints in strategic terms by West Berkshire Council is very similar to what was drafted two years ago for consultation with the Public. For example, Policy SP2n states that in the North Wessex Downs Area of Outstanding Natural Beauty (AONB) will have appropriate and sustainable growth that conserves and enhances its special landscape qualities. Development will be required to respond positively to the local context, conserving and enhancing local distinctiveness, sense of place and setting of the AONB. The strong sense of remoteness, tranquillity and dark night skies, particularly on the open downland, should be preserved. The conservation and enhancement of the natural beauty of the landscape will be the primary consideration in the assessment of all development proposals. Development in the North Wessex Downs will be required to support its local communities and rural economy in a manner commensurate with the statutory status of the AONB as a nationally valued landscape. Planning permission will be refused for major development in the AONB except in exceptional circumstances, and where it can be demonstrated to be in the public interest.</p>

Yet, the Western Area of WBC's Planning Committee gave permission in 2021 to build a giant logistics warehouse on 10,381 square metres of AONB land allowing Membury businesses to expand across protected AONB land (Lam 6) despite fierce local and parish objections: the building scale is out of keeping with its rural surrounds; the transport links to the site are unsustainable using a B-road already over-crowded with HGV's, no close buses, unsafe cycling and walking access to the site etc.

It seems WBC Planning decides what it wants to happen well in advance. The LAM-6 site was already set out as an "approved" development site by WBC consultants, Stantec in their 2020 report. This was several months before that decision was "formally" made by the Planning committee. In this report, it is suggested the site would be part of future industrial expansion plans to provide 19% of growth targets. This seems disingenuous since WBC clearly decided it would go ahead in discussions with their industrial development consultants 3 years ago.

So why seek consultation for LAM-6 in this plan if a) it is now a done deal and b) it contravenes so many sensible "strategic" constraints, yet have been waived? It makes a mockery of any meaningful dialogue via a public consultation when Planning decides major developments beforehand on.

Promises not kept

Policy ESA 2 states the LAM-6 site (Land west of Ramsbury Road, Membury Industrial Estate, Lambourn Woodlands) will be developed in accordance with various provisions. One of the provisions to mitigate the community impact industrial developments on the local road network is the need for a transport assessment: *C) Measures will be provided to mitigate the impact of development on the local road network. A Transport Assessment will be required*

Again, there has been no genuine assessment of the likely impact on traffic from this specific development. Via tactical "chicanery" the applicant used a "Personal Condition" to avoid having to use TRICS to forecast standard traffic volumes. Instead, their own internal estimates based on old data was used to determine a forecast. This allowed a lower traffic estimate to be debated vs data via TRICS, which at 750 extra HGV's per day, was significantly higher.

The provision to mitigate the impact of this development on our roads should use real numbers that are not disguised and are current. This should lead WBC Highways to provide a transport plan that mitigates issues for the benefit of road users and the local community. Accepting the Applicant will use Agency shift workers from Reading and Swindon via mini-bus to 'pick 'n pack' at the new warehouse on minimum wages, all outside the local employment zone, does not mitigate the hundreds of extra HGV's this development will bring on a daily basis. WBC Highways have delivered no road mitigation plan.

Policies must genuinely be followed if LPR 2037 is to retain credibility

12.19 WBC's 2019 landscape Character Assessment outlines that rural areas are more at risk from piecemeal development:

It is especially important to consider the impact that developing a site will have on conserving/enhancing local distinctiveness and sense of place. A successful development in the countryside depends on having a clear understanding of the site's significance, its setting in the wider landscape and sensitivity to and capacity for change

With a further 5,200 square metres of industrial development plans at Membury under LAM-10 (Land to the south of Trinity Grain, Lambourn Woodlands), together with LAM-6, the combined area will contribute almost 30% of industrial land 15-year growth targets. That is such a significant increase it demands that funding for risk assessments are carried out. No longer can it be acceptable that the need for an Environmental Impact Assessment is ignored. With flooding, excess lighting, noise, pollution and emissions, these are all ramping up as major issues at the Membury site. This plus the lack of a proper transport assessment to resolve issues and a plan to carry out appropriate measures must be committed to. Extraordinarily in my view is there any reference to addressing these problems to make industrial expansion plans succeed for the benefit to the area.

Unless Policy DM 35 is genuinely addressed to sustain a prosperous rural economy, the industrial development at Membury will increasingly destroy the rural surrounds of Lambourn's agricultural and equine community. It will certainly drive out those living and working in the Lambourn Woodlands area, rather than encouraging them to stay and prosper.

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>

Please give reasons for your answer	DOCUMENT -Appendix 8c SA/SEA of Employment Sites LAM6 .LAND WEST OF MEMBURY ROAD, WALKERS LOGISTICS. Assesment Table page 33. SA Sub Objectives- 9a To reduce West Berkshire's contribution to Green house gas emissions.

No effects of Policy on SA Objectives are measured

Mitigation- "Mitigation measures would be required"

Comment- " ..there should be no overall impact on any element of sustainability as a result of this development."

My comments - The Council's own Officers have stated that this development is NOT Sustainable. The Council's own Officers have called for no more development at Membury Industrial Area, as the whole site is NOT Sustainable.

- Objective 2(a)- "To support healthy active lifestyle.

- The site will not impact on health, active lifestyle.
- All sites will need to consider travel planning measures for staff which could include support for active travel to and from site"
- "The site is promoted for employment use, it is unlikely there will be an impact on any element of sustainability in relation to health, safety, wellbeing and inequalities.

My Comments- (Note these are based in the current situation and the recently approved development on Lam 6)

This Objective, 2a, will never be met, so 2 statements above are untrue for residents who are severely impacted.

Staff and workers cannot access this site by walking or cycling and have to use private motorised vehicles. Third relating to sustainability, can never be monitored or regulated.

The lanes used as access to this site can NO LONGER be used for walking, cycling or horse riding due to the volume of traffic including small vehicles but especially HGV's which are and will be generated on those lanes to access the trunk road network. It is now extremely dangerous to enter/ exit properties on these lanes. In addition the council have allowed the applicant, Walkers, to suppress the Traffic generation figures in the accepted scheme. This suppression is against Best Practice in Traffic and Transport Planning, can never be monitored or regulated and is possibly illegal. The result of this will be a dramatic rise in HGV vehicles on the access lanes to further reduce the chance of residents leaving their home in a car and preventing residents of the whole area living active lifestyles.

Objective 4(a) " To reduce accidents and improve safety."

4(b) " To increase opportunities for walking, cycling and use of public transport."

The traffic generated from Membury and the enormous future traffic to be generated make the surrounding network of lanes extremely dangerous. There are recent examples of HGV and other vehicles hitting a house outside of normal working hours. There is limited opportunity to improve safety and reduce accidents.

There is no viable Public Transport near the site. The closest is at Hungerford 10km away.

Objective 5(a) "To conserve and enhance ...biodiversity..."

Objective 5(b) "To conserve and enhance the character of the landscape."

Erecting a warehouse the size of a major sports stadium in a field, used for grazing sheep, in the AONB and generating potentially 850 vehicle trips per day CAN NOT conserve or protect anything in the local area.

Objective 10(a) "To encourage a range of employment opportunities that meet the needs of the district."

(b) (c "To support a strong, diverse economic base..."

There is little economic benefit to the local area as most of the current Walker's employees live outside West Berkshire and some of those are bussed in from Reading and Swindon.

This reinforces the view of the Council's Consultants, Stantec, who carried out the supporting study to this plan, that, as all the employee resources are in the East of the District, the use of the Membury site on the Western edge was not supported and any warehousing should be in the East of West Berkshire close to Motorway Junctions.

Overall Effect

Comments on Text.

How can anyone say " The site will have an overall neutral impact on Sustainability." The authors of this report have never studied the area or the current site.

There are no sustainable travel options available which is why some WBC officers have asked for no further development at Membury.

There are limited available staff close to the site and nearly all will come from outside the area, many from Reading, Wiltshire and Hampshire.

There is no public transport so they will all have to be bussed in or use their own vehicles.

Walking and Cycling are not possible due to the dangerous nature of the local road network.

GENERAL POINT ABOUT THE Industrial Area at Membury.

West Berkshire should not include this site in this plan as:

- The current sites are unmanaged and the council has little information on the ownership, tenants and changes of use that are taking place.
- There is no joined up Master Plan of the area showing current and future activities or land use.
- There is no Environmental impact Assessment of the whole site or any part of it.
- There is no Drainage Strategy for Membury and hence no site wide drainage infrastructure which is now leading to local flooding.

	<ul style="list-style-type: none"> • There is no understanding of the utilities demand and capacity. The power system in the local area is often down with temporary generators mobilised to support the local community. • The local road system is unsuitable for the current traffic generation and any increase will further degrade it. • There is no Risk Assessment available for the site as a whole. With a Live airfield adjacent, a major motorway and service area, chemical storage, major fuel storage and unknown risks within the current businesses there could be a disaster waiting to happen. • The location is UNSUSTAINABLE. There is no VIABLE public transport within 10 kilometres, so ALL workers, goods, deliveries have to access the site by road based vehicles. As well as making the area unsafe the quality of healthy life is compromised. COUNCIL OFFICERS HAVE STATED THAT THE INDUSTRIAL SITE IS NOT SUSTAINABLE AND NO FURTHER DEVELOPMENT SHOULD TAKE PLACE. Despite this the Council continue to approve more vehicle intensive planning applications, sometimes with the WRONG traffic generation forecasts <p>For this local plan, I have focussed on the area I know best and it is clear all plans for further industrial expansion at Membury should be removed, as there is little information to support this and overwhelming information to STOP any further development there.</p>

Please give reasons for your answer	<p>The site allocations presented in this chapter have not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of each site to accommodate development. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on these sites. We have concerns and have provided this information in a separate document <see comments below></p> <p>This site is on Principal bedrock aquifer</p> <p>Developments connecting to East Shefford STW may be problematic. The River Lambourn SAC is an area of nutrient neutrality meaning any additional loads from the STW would need to be offset elsewhere in the catchment. Natural England will be better placed to advise on the specifics of this. East Shefford STW has a 0.1mg/l stretch target for P. East Shefford is an exceptionally high spilling site, mostly due to Ground Water infiltration. We would not support additional flows to this site until work has been done to reduce the frequency of storm overflows. As with Newbury or any site with stretch targets for Phosphorous, any additional loading may impact their ability to meet the environment act objectives.</p>

	As stated in our suggested amendments and notes on Policy DM7 <PS1555>, adequate wastewater treatment infrastructure capacity resources must be available or provided to support all proposed development prior to the occupation. Due to the constraints highlighted for this site, this must be stated in the policy text for site ESA2.

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I have been appalled by the continued push to expand the Membury site despite the complete lack of transport infrastructure. It seems the that the only agenda West Berks Council have is to plough on with industrialisation regardless of the irreparable damage done to the local area of Outstanding National Beauty. My home is on the B4000 the traffic on which has increased immeasurably in the 35 years my wife and family have lived there. We are woken through the night at ever-increasing intervals - my wife is seriously ill - and this is only set to get even worse. This is a minor road by its very name that is taking major heavy goods traffic and is already crumbling.</p> <p>I honestly believe that West Berks Council are completely blind to the damage that is being done to the health of people who have no wish other than to lead a peaceful life, let alone the havoc caused to the environment and countryside. The council only need to see a developer brandishing a debit card with a promise of employment that benefits people from outside this area to simply roll out the welcome mat no matter the consequences.</p> <p>The Membury development plans are unsustainable if local welfare is given the most minimal consideration, plus the risk of localised flooding, all this without even considering the pollution and carbon footprint. However the council appears keen to impliment virtually everything that is put before them concerning Membury until it doesn't suit their purpose.</p> <p>Good alone knows what the light pollution and carbon pullution will do to the local wildlife. Developers care not one jot, they simply wish to boost their wealth no matter what the cost, aided and abetted by the council planners. No heed is paid to the water run off that will pollute ancient chalk streams and poison the aquifer.</p> <p>It would appear that the Stantec Report is quite clear that development is needed in Newbury and Reading but not here.</p> <p>That you have allowed the despised Walker Development to proceed shames you all. It is this department which is overseeing the demise of an area of a ONB. I have zero faith or confidence in West Berkshire Planning to stop this destruction which will see the local infrastructure gradually crumble until complete decay renders it totally unfit for any purpose.</p>

<p>the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to file my complete OBJECTION to the continued expansion of industry at Membury. I write in the hope that you will listen to the RESIDENTS who live in this AREA. However, it is obvious, that so far, nothing we say has any impact.</p> <p>TRAFFIC. The B4000 is inadequate to handle the huge amount of enormous lorries intended if this planning is allowed. There has already been an HGV smashed into the side of a cottage. The road is deteriorating by the day with potholes. The road is too small on some bends for 2 HGVs to pass. These lorries go through the villages as 60/70mph and there are no speed restrictions they adhere to. Would someone please explain to us why they are banned through Wickham B4000 and not through Lambourn Woodlands.</p> <p>These lorries not only abuse the B4000 but also the small lanes behind Membury where they cut through and get stuck around the bends. There must be a full enquiry by the Highway department delivered personally, to all the residents affected by this development.</p> <p>EMPLOYMENT This unsustainable development in an ANOB has no travel plans. There are not enough local employees to work here so they will be coming from outside areas. There is no travel plan buses etc. to facilitate their journeys.</p> <p>There is NO ENVIRONMENTAL IMPACT ASSESSMENT FOR MEMBURY in ANOB AREA.</p> <p>There is no cumulative impact assessment for Membury and all development is impacting on the Critical Infrastructure i.e. power cuts, water shortage etc.</p> <p>WBC HAS A POLLUTION AND CARBON footprint Policy which has not been adhered to with regard to planning at Membury. This causes noise impact (from small planes for example) and air quality. The M4 has been shut down AT Least twice due to chemical releases from Rutpen and we have been told to stay in our houses for our safety.</p> <p>The size and scale of developments are totally against anything in an ANOB AREA. The government is adamant these areas should be protected especially ancient woodland and pollution of chalk streams. It seems the WBC has no worry about industrial spread onto agricultural land. There has been no risk assessment for flooding.</p> <p>THE STANTEC REPORT states that there is NO evidence base for further Industrial expansion at Membury. Therefore there is no justification for further development on this site. (Esa2 and 3)</p> <p>It is required in NEWBURY AND READING where of course there are many people available to employ. The economic arguments do not outweigh the environmental impact these massive industrial developments are having on this landscape.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by	

<p>the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>We are writing to raise our concerns regarding the proposed industrial development at Membury, and the associated issues that are impacting our community and environment. We are deeply concerned about the following issues:</p> <ol style="list-style-type: none"> 1 Increased traffic on rural road networks: The increase in industrial activity at Membury will lead to increased traffic on local roads, which will have a significant impact on the local community. The roads are not designed to accommodate the volume of traffic that already exists and the increase that will result from further development will lead to more safety concerns for pedestrians, cyclists, and motorists. 2 Unsustainable development plans: There are no sustainable travel plans in place for the proposed industrial development at Membury. This is particularly concerning given the rural location of the development, which makes it challenging to access via public transport. 3 No environmental impact assessments: We are concerned that no environmental impact assessments have been carried out for the proposed development, particularly given the significant impact it will have on the local environment. 4 Cumulative impact assessments: There is a lack of cumulative impact assessments for Membury and other developments in the area, which is leading to critical infrastructure issues such as power cuts. This issue requires urgent attention. 5 Flood risk assessments: There have been no flood risk assessments carried out for the proposed development, and the increased business footprint has caused localised flooding. The lack of permeable membranes is also contributing to this issue. 6 Pollution/Carbon Footprint increase: The proposed industrial development at Membury will significantly increase pollution and the carbon footprint of the area, which goes against WBC's own policy. 7 Noise impact and Air quality: The proposed development will lead to an increase in noise and air pollution, which will have a significant impact on the health and wellbeing of local residents. 8 Size and scale of developments out of keeping with AONB policy: The proposed development is out of keeping with the Area of Outstanding Natural Beauty (AONB) policy, which is concerning given the government's emphasis on protecting these areas. 9 Need to protect the night skies and wildlife habitats: The proposed development will have a negative impact on the night skies and wildlife habitats in the area, which are critical for the conservation of local biodiversity. 0 Need to protect ancient woodland: The proposed development may impact ancient woodland, which is a valuable natural resource that needs to be protected. 1 Concerns for surface water runoff: The proposed development will have a significant impact on surface water runoff, which may pollute local chalk streams and the aquifer. 2 Industrial spread into agricultural land: The proposed development will lead to the spread of industry into agricultural land, which may have a negative impact on local food production and the rural economy. 3 Stantec report: The Stantec report indicates that there is no need for industrial development in this area, but that it is required in Newbury and Reading. 4 Economic argument vs environmental impact: We believe that the economic arguments for the proposed industrial development at Membury do not outweigh the significant environmental impact it will have on the landscape and local community. 5 Destruction of rural character: The proposed industrial development at Membury will significantly impact the rural character of the area, which is a critical part of our community and needs to be protected. <p>We urge you to take notice of these concerns and ensure that any proposed industrial development at Membury is carried out in a way that is environmentally sustainable and socially responsible. We believe that it is possible to strike a balance between economic development and environmental protection, and we urge you to prioritise the needs and concerns of local residents in any decision-making processes related to this issue.</p> <p>Thank you for your attention to this matter.</p>

4. Proposed Changes	
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No

<p>Please give reasons for your answer</p>	<p>As residents of Lambourn Woodlands, we would like to ensure our comments are recognised and incorporated into the local plan regarding the Membury Industrial area.</p> <p>We urge the plan to Stop further development at Membury for the following reasons.</p> <p>Having lived next to the notorious Membury crossroads for over 25 years, we wanted to highlight the ever-increasing numbers of HGVs using the road and the negative impact on the quality of life for residents. Ermin Street (The primary road access to Membury), originally a narrow country lane, widened to aid the construction of the M4 in the late '60s. It was never designed for the current traffic levels and, in places, is barely wide enough for 2 HGVs to pass. There are numerous sharp bends; adverse cambers and long straights encourage speed and overtaking, which is extremely dangerous on most of the road and hazardous in certain sections. As an unnaturally widened road, most of the properties that front onto the road are very close to the road, making life next to the road increasingly unpleasant, noisy and dangerous. We can vouch for this when pulling into or out of our driveway, having had numerous near misses. Recently a local property was narrowly missed when an out-of-control HGV crashed through its garden wall; the same property was also hit in a separate incident only days earlier. The reality of living on Ermin Street, the main road leading to Membury!</p> <p>We object to further expansion to the Membury industrial area as this is leading to unsustainable traffic and HGVs on Ermin Street. This also highlights the danger of the Membury crossroads junction, the main route into the already over-expanded Membury. There have been many crashes on Membury crossroads in recent months, and it's only a matter of time before fatalities occur.</p> <p>There is no public transport to Membury, so further development will only increase traffic levels (clearly not a sustainable location). Recent planning applications give little or no serious consideration to travel plans. Even more alarming is the lack of environmental impact assessments in what is supposed to be an AONB.</p> <p>As residents, we often experience power outages, with the utility companies blaming the increased demand of the industrial users as the infrastructure can't cope.</p> <p>We hope the plan will incorporate the real-world experiences of residents, halting or seriously limiting future development at Membury the current uncontrolled expansion is unsustainable, environmentally disastrous and will lead to further RTA's and, inevitably, fatalities at the dangerous Membury crossroads.</p>

	<p>Other objections and consequences of allowing further expansion at Membury include the following.</p> <ul style="list-style-type: none"> - No environmental Impact Assessments – why? - No cumulative impact assessments for Membury and development impact the Critical Infrastructure-e.g constant power cuts. - No flood risk assessments-the increased business footprint has caused localised flooding and no permeable membranes. - Pollution/Carbon Footprint increase-which goes against WBC's Policy as there is no public transport. - Noise impact and Air quality loss as experienced by many local residents. Loss of amenity from the uncontrolled development at Membury. - Size and scale of developments out of keeping with the AONB (Area of Outstanding Natural Beauty) Policy at a time when the Government is stressing the importance of protecting these areas. - WBC Need to Protect the Night skies and Wildlife habitats. - The Stantec report still states that there is no need for Industrial development in this area but that it is required in Newbury and Reading. - The economic arguments do not outweigh the environmental impact that these massive industrial developments are having on the landscape. - The rural character of the area is being destroyed by WBC. It's not too late to halt the sprawl of Membury.

Please give reasons for your answer	<p>This site LAM6 (now ESA2) did not appear in the original draft plan but when a planning application 19/02979/OUTMAJ was made it miraculously appeared in the second draft plan ahead of the decision. Some documentation even seemed to hint that the application proposed and already been approved... I would like to see some investigation as to what happened here...</p> <p>Comment to follow is relevant to ESA2 and 3</p> <p>The LPA's own consultation (Stantec) found that Membury is unsustainable as a location for B2/B8 industrial development due to its location 4.5km away from A338 and M4 J14. There is only one bus per day 1.5 km away along roads that are unlit and with no footpaths. Cycling is also dangerous. Highways Officers state that travel plans are generally unsuccessful as a solution. Traffic assessments must use TRICS data and applicants should not be able to use their own traffic data in applications. Conditions</p>

	<p>pertaining to traffic data should not be allowed in order to better control traffic volumes on the local road network. It is unclear why the LPA continues to pursue this location for industrial development. It is not in line with the sustainability policies of the LPA nor with the NPPF.</p> <p>There have been 4 serious accidents in the last 3 months on the B4000 / Ermin Street, each one involving 3 or 4 vehicles. One incident involved an HGV crashing into trees, taking out an electricity pole and jackknifing into a residential property. Sleeping residents were just a couple of feet from the cab. One week later, the same spot saw yet another accident with two cars written off and a builders lorry driven through a hedge. Two accidents involving multiple vehicles at the Ermin Street / Ramsbury Road (Membury) crossroads have also taken place. One of which took out an electricity pole. In all instances, all 3 emergency services were called and the road closed for several hours. When these roads are closed businesses are impacted and the rural road network is heavily affected. This situation is exacerbated when the M4 is closed as the B4000 is a diversion road in this instance.</p> <p>The rural character of the area is being significantly impacted through traffic and the volume of traffic is impacting the structure of some of the older properties situated close to the road. Air pollution levels along the B4000 are already high at 10.4 similar to the centre of Newbury, adding more traffic to the roads will only make this worse. Increasing light pollution has been devastating on our local bat population despite the LPAs poor attempts at mitigation. Noise pollution is also increasing. Local ancient woodland is also heavily impacted by industry. I have lived in Lambourn Woodlands since 1994 but have only noticed a significant deterioration in local amenity in the last 8 years. It seems unhelpful when officers dismiss any objections regarding negative impacts on the amenity of residents as the area is already impacted.</p> <p>There is no evidence or justification for allowing the development of further sites especially of this size at Membury. The location cannot sustain it. Expansion is inappropriate. Critical infrastructure is missing. There are electricity supply issues as the industrial estate often draws too much power and the network cannot sustain it. Cables burn out from time to time and there are frequent outages. Residential supply can be unreliable as a result. There is a known surface water flooding issue on 3rd party land as a result of overdevelopment on the industrial estate. The LPA continues to ignore this - allowing sites to come forward and be developed in a piecemeal fashion. Their approach is not resolving the problem - residents should not be asked to attenuate water run-off on their land. A Surface Water Management Plan is required.</p> <p>It would also be appropriate to have a Flight Safety Zone for Membury and also a major incident plan as none exists at the moment. Membury is home to two service areas with fueling stations, adjacent to a trunk route, a fuel depot, light aircraft activity, a chemical company dealing in solvents, a timber yard and a grain drier amongst other things. Not to have a plan for this is negligent.</p> <p>Please see attached photograph demonstrating how HGVs are unsuitable on B4000/Ermin Street. (Attachment 0960.jpg)</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>Not qualified to say</p>
<p>4. Proposed Changes</p>	<p>A masterplan for Membury is required encompassing a site specific environmental impact assessment and including a surface water management plan to ensure infrastructure is in place before further development can go ahead.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>Our community would like be able to answer questions about Membury and to give a residents view point. Our community feels unheard.</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	<p>Yes</p>

6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes	

<p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure.</p> <p>The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.</p> <p>Early engagement between the developers and Thames Water would be beneficial to understand:</p> <ul style="list-style-type: none"> • What drainage requirements are required on and off site • Clarity on what loading/flow from the development is anticipated • Water supply requirements on and off site <p>The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.</p> <p>To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.</p> <p>Link here > https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity</p> <p>We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.</p> <p>Water Response</p> <p>The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development.</p> <p>Waste Response</p> <p>On the information available to date we do not envisage infrastructure concerns regarding wastewater network or wastewater treatment infrastructure capability in relation to this site/s. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to advise of the developments phasing. Please contact Thames Water Development Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p>Additional Comments</p> <p>These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water flows being discharged to the public sewer.</p>

3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water to determine whether a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered is required.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>DOCUMENT -Appendix 8c SA/SEA of Employment Sites</p> <p>This site is adjacent to the green field to be used for the Lam 9, Walkers, site. On that basis it has similar characteristics.</p> <ol style="list-style-type: none"> 1)Both are a “ Green Lung” in the middle of the Membury Industrial Area. 2)Both use the same network of country lanes for vehicle access. 3)For both there is no available and viable Public Transport to the site. 4) Land adjacent to this site is liable to flooding. 5) This site is adjacent to rural homes. 6) Both are not sustainable and should not be developed. 7) Both generate HGV which are a risk to the local populations. 8) it is not clear what activities would take place on this site but generally the Economy of West Berkshire is strong so it is unlikely that there would be any added Economic gain. <p>GENERAL POINT ABOUT THE Industrial Area at Membury.</p> <p>West Berkshire should not include this site in this plan as:</p> <ul style="list-style-type: none"> • The current sites are unmanaged and the council has little information on the ownership, tenants and changes of use that are taking place. • There is no joined up Master Plan of the area showing current and future activities or land use. • There is no Environmental impact Assessment of the whole site or any part of it. • There is no Drainage Strategy for Membury and hence no site wide drainage infrastructure which is now leading to local flooding. • There is no understanding of the utilities demand and capacity. The power system in the local area is often down with temporary generators mobilised to support the local community. • The local road system is unsuitable for the current traffic generation and any increase will further degrade it.

	<ul style="list-style-type: none"> • There is no Risk Assessment available for the site as a whole. With a Live airfield adjacent, a major motorway and service area, chemical storage, major fuel storage and unknown risks within the current businesses there could be a disaster waiting to happen. • The location is UNSUSTAINABLE. There is no VIABLE public transport within 10 kilometres, so ALL workers, goods, deliveries have to access the site by road based vehicles. As well as making the area unsafe the quality of healthy life is compromised. COUNCIL OFFICERS HAVE STATED THAT THE INDUSTRIAL SITE IS NOT SUSTAINABLE AND NO FURTHER DEVELOPMENT SHOULD TAKE PLACE. Despite this the Council continue to approve more vehicle intensive planning applications, sometimes with the WRONG traffic generation forecasts <p>For this local plan, I have focussed on the area I know best and it is clear all plans for further industrial expansion at Membury should be removed, as there is little information to support this and overwhelming information to STOP any further development there.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>The site allocations presented in this chapter have not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of each site to accommodate development. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on these sites. We have concerns and have provided this information in a separate document <see comments below></p> <p>This site is on Principal bedrock aquifer</p> <p>Developments connecting to East Shefford STW may be problematic. The River Lambourn SAC is an area of nutrient neutrality meaning any additional loads from the STW would need to be offset elsewhere in the catchment. Natural England will be better placed to advise on the specifics of this. East Shefford STW has a 0.1mg/l stretch target for P. East Shefford is an exceptionally high spilling site, mostly due to Ground Water infiltration. We would not support additional flows to this site until work has been done to reduce the frequency of storm overflows. As with Newbury or any site with stretch targets for Phosphorous, any additional loading may impact their ability to meet the environment act objectives.</p> <p>As stated in our suggested amendments and notes on Policy DM7 <PS1555>, adequate wastewater treatment infrastructure capacity resources must be available or provided to support all proposed development prior to the occupation. Due to the constraints highlighted for this site, this must be stated in the policy text for site ESA3.</p>

3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	As stated in our suggested amendments and notes on Policy DM7 <PS1555>, adequate wastewater treatment infrastructure capacity resources must be available or provided to support all proposed development prior to the occupation. Due to the constraints highlighted for this site, this must be stated in the policy text for site ESA3.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No

Please give reasons for your answer	<p>On behalf of our client, Trinity Grain Limited ('Trinity Grain'), we are instructed to submit the following representations to West Berkshire Council ('the Council') in response to its Regulation 19 consultation on the emerging West Berkshire Local Plan Review ('LPR').</p> <p>Trinity Grain is the sole landowner of 'Land to the south of Trinity Grain, Membury Industrial Estate' (hereafter 'the Site'). The Site extends to approximately 2.2 ha and lies immediately to the south of Membury Industrial Estate, a Principal Employment Area within the adopted Development Plan. A Site Location Plan demonstrating extent of land ownership is included at Appendix 1.</p> <p>Within the HELAA (Appendix 4, Stage 2c), the entry for LAM10 (the Site) concludes firstly that there is 1 land owner and then goes on to write in the 'Comments' column that the site is in multiple ownerships. To clarify, the site is owned entirely by Trinity Grain Limited, and they are acting as promoters and developers. Therefore, there are no availability issues pertaining to the site.</p> <p>Trinity Grain promoted the Site for employment development (specifically, office and/or storage and distribution uses) during a Call for Sites exercise run by the Council in December 2021. The LPR proposes allocation of the Site for employment development via Draft Policy ESA3, subject to defined parameters, including the provision of approximately 5,200sqm of B2 and/or E[g][iii] uses. An extract of Draft Policy ESA3 is shown at Appendix 2. The Site is also proposed to form part of an enlarged Designated Employment Area (DEA) covering the Membury Industrial Estate, development within which will be subject to the provisions of Draft Policy DM32.</p> <p>While Trinity Grain supports the Council's decision to allocate the Site for employment development, it does not consider that restricting potential uses to B2 and E[g][iii] (and excluding B8 uses) can be considered 'sound' with regard to the tests outlined at Paragraph 35 of the NPPF for several reasons outlined below.</p>

Please note, as requested by the Council, the contents of this document have been used to fill out the Representation Form, which is included at Appendix 3.

Draft Allocation Parameters Overview

This section assesses the sites potential against the proposed draft allocation parameters and provides Trinity Grain's view on the parameters.

Policy ESA3: Land to the south of Trinity Grain, Membury Industrial Estate, Lambourn Woodlands (Site Ref: LAM10)

<for table see attachment>

Pre-application enquiry

Earlier in 2023, on behalf of Trinity Grain, Carter Jonas submitted a pre-application enquiry for B8 (open storage) use for the site.

The pre-application enquiry included the following information:

- Preliminary Ecological Appraisal;
- Preliminary Landscape Visual Appraisal;
- Landscape Strategy;
- Transport Scoping Note;
- Planning Statement; and
- Site Layout.

The response from the LPA has not yet been received. However, it is evident from the pre-application investigations that B8 can conceivably be delivered on the site.

The pre-application package has been appended to these representations (appendix 4).

Suitability for B8 uses

Primarily, it is not clear why Draft Policy ESA3 de facto excludes B8 uses. As confirmed by paragraph 7.8 of the LPR, the Employment Land Review (ELR) (2020; 2022 Addendum) recommends a minimum industrial land requirement of 91,109sqm, or 23 ha of land, to 2039 to meet identified needs. The 'industrial land' requirement is the sum totalled requirement for B2, E[g][iii] (formerly B1[c]) and B8 uses.

The 2020 ELR (paragraph 4.72) recognises that "these uses generally occupy the same types of building, are generally inter-changeable and are difficult to distinguish in practice" with the exception of strategic-level warehousing under B8. This, in part, explains the appropriateness of identifying a collective industrial land requirement, rather than specific requirements for general industry, storage, distribution etc.

In lieu of the above, there is no sound justification as to why B8 uses would not be suitable. The only loose justification appears to be offered in the Employment Background Paper at paragraph 54:

"LAM10, land to the south of Trinity Grain, is located adjacent to the existing Membury Industrial Estate, and proposed to be allocated for B2 and E(g)(iii) uses. Such uses are considered appropriate given the size of the site and relationship with the surrounding uses".

Turning first to its relationship to surrounding uses, Membury Industrial Estate as an established employment site that provides B2 and B8 uses (including open storage), both currently and as proposed to be allocated in the LPR. Accordingly, there is no reason why the site should be precluded from being allocated for B8 uses by nature of its relationship with the surrounding uses.

In terms of size, it should be recognised that the B8 Use Class is broader than logistical and housed warehouse storage and can include other storage solutions, such as open storage. This part of the B8 use class is more akin to the collective industrial site typology, as outlined above.

The identification of the Site's development potential has been informed by a variety of background studies, including the HELAA and Landscape Sensitivity and Capacity Assessments, which take account of constraints (such as its location within an AONB). The results of these assessments have been carried forward into parameter constraints in Draft Policy ESA3, which govern suitable quantum (not uses) of development, including retaining the existing tree belt/hedgerow along the eastern and southern boundaries and controls to the height of "buildings".

However, Trinity Grain argues these controls would remain relevant to any proposed B8 use, including if no specific buildings with floorspace were provided in the case of open storage. For example, with such use, restricting development to the central part of the site, retaining the landscape buffer and restricting heights to the level of the grain silo towers in buildings and structures could be maintained. This has been evidenced by the Site Layout Plan submitted with the pre-application enquiry.

Trinity Grain, therefore, considers the de facto exclusion of B8 uses for the Site from Draft Policy ESA3 has not been justified, despite its promotion for such uses to the Call for Sites. Moreover, a B8 use can be considered suitable within the established parameter constraints.

Flexibility: Mitigating the shortfall

As detailed in Table 3 of the Employment Background Paper (2023), the LPR is inclusive of site allocations to provide only 58,400sqm of floorspace, or 16.6ha land. Accordingly, there will be a shortfall of 32,709sqm (or 5.4 ha of land) which the Council has stated cannot be met by neighbouring authorities.

In lieu of any identified shortfall, Trinity Grain considers there is an opportunity for the Council to be proactive and flexible with its employment land allocations to meet market demand. Paragraph 81 of the NPPF confirms planning policies should help create the conditions in which businesses can invest, expand and adapt. The approach taken should allow each area to build on its strengths, counter any weaknesses and address the challenges of the future. Paragraph 82 adds that policies should (inter alia): be flexible enough to accommodate needs not anticipated in the plan and to enable a rapid response to changes in economic circumstances.

Accordingly, the allowance for B8 uses to Draft Policy ESA3 would result in policy strategy and allocation that could enable rapid response to requirements for industrial land more generally.

	<p><u><i>Conflict with the DEA</i></u></p> <p>Finally, as currently drafted, the exclusion of B8 uses would be at odds with the provisions of Draft Policy DM32, which supports the redevelopment and regeneration of land within DEAs to provide business uses – including office, industry, storage and distribution.</p> <p>Accordingly, Draft Policy DM32 would not preclude the site from being redeveloped for B8 purposes in the future. As set out above, there is no sound justification for not allowing the allocation of this site for B8 purposes. This, therefore, does not represent an effective strategy or allocation. A simple solution would be to adopt flexibility up front to ensure the right use is delivered to meet market requirements whilst being subject to appropriate site-specific parameter constraints detailed in Draft Policy ESA3.</p> <p>Conclusion and Next Steps</p> <p>In summary, Trinity Grain considers parts of the LPR as currently drafted as unsound.</p> <p>Draft Policy ESA3, in restricting potential uses to B2 and E[g][iii] on the Site and de facto excluding B8 uses, is neither justified, effective or consistent with national policy. Trinity Grain recommends that the Council also allocate the Site for B8 uses, allowing greater flexibility in delivering its industrial land requirements and maintaining the importance of DEAs. This is a simple change, that would also allow the Council to maintain its defined parameter constraints for this Site (save for the recommendations made in this response).</p> <p>We trust that these representations clearly sets out Trinity Grain's concerns and that these will be addressed prior to submission of the LPR to the Secretary of State for Examination.</p> <p>Attachment: Full response and appendices.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	Yes
Please give reasons for your answer	
4. Proposed Changes	Trinity Grain recommends that the Council also allocate the Site for B8 uses, allowing greater flexibility in delivering its industrial land requirements and maintaining the importance of DEAs. This is a simple change, that would also allow the Council to maintain its defined parameter constraints for this Site (save for the recommendations made in this response).
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	Yes
5. Independent Examination	To allow appropriate updates relating to the development of the draft allocation site to be presented, to allow matters to be resolved because the plan is not sound.
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes</p> <p>* No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes</p> <p>* No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes</p> <p>* No</p>	Yes

Please give reasons for your answer	<p>The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure.</p> <p>The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.</p> <p>Early engagement between the developers and Thames Water would be beneficial to understand:</p>

- What drainage requirements are required on and off site
- Clarity on what loading/flow from the development is anticipated
- Water supply requirements on and off site

The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.

To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.

Link here > <https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity>

We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.

Water Response

The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website <https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development>.

Waste Response

The scale of development/s is likely to require upgrades to both the wastewater network and sewage treatment infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing and infrastructure phasing plan. The plan should determine the magnitude of spare capacity currently available within the network and what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The developer can request information on the network and treatment infrastructure by visiting the Thames Water website <https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development>. Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ

Additional Comments

These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water flows being discharged to the public sewer.

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water to determine whether a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered is required.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>No</p>

5. Independent Examination

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.	

* Yes * No	
Please give reasons for your answer	<p>The site allocations presented in this chapter have not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of each site to accommodate development. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on these sites. We have concerns and have provided this information in a separate document <see comments below></p> <p>This site is on Historic landfill sites, COMAH, SPZ2+3,</p> <p>This site is located on top of a historic landfill which means that any significant foundations or ground excavations at the site may lead to creation of a pathway for pollutants within the landfill to reach groundwater. We refer the LPA to the Environment Agency's Approach to Groundwater Protection guidance which highlights our requirements for developments on landfill sites. Developers at any allocated sites located on a historic landfill would need to make enquiries regarding potential requirements under the Environmental Permitting Regulations 2016.</p> <p>We assume wastewater will be discharged at the Reading STW. We have no concerns provided Thames Water are confident any additional flows will not lead to deterioration of phosphate classification. Reading STW is within DWF capacity and not a frequent spiller. The policy notes should include a requirement for developers to liaise with Thames Water to discuss wastewater drainage for the site.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	
5. Independent Examination

<p>4. Proposed Changes</p>	<p>Local Plan Review – comments from Beenham PC</p> <p>ESA5 – Northway Porsche</p> <ul style="list-style-type: none"> • No objection in principle, although this area is a mixed housing and industrial zone. • Access road is in poor condition, and ownership of road is uncertain (?). This needs to be clarified. • Access road is dangerous for pedestrians and cyclists. It is a route from Beenham to rail station and bus-stops. A footpath must be provided. • Parameter d(v) should be deleted. The neighbouring recycling plant is very noisy. Permitted development should be restricted to activities that are not noisy, as there is housing in Beenham Grange and noise travels up the hill to Beenham Village.
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	No

Please give reasons for your answer	<p>The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure.</p> <p>The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.</p> <p>Early engagement between the developers and Thames Water would be beneficial to understand:</p>

- What drainage requirements are required on and off site
- Clarity on what loading/flow from the development is anticipated
- Water supply requirements on and off site

The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.

To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.

Link here > <https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity>

We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.

Water Response

The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website <https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development>.

Waste Response

The scale of development/s is likely to require upgrades to both the wastewater network and sewage treatment infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing and infrastructure phasing plan. The plan should determine the magnitude of spare capacity currently available within the network and what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The developer can request information on the network and treatment infrastructure by visiting the Thames Water website <https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development>. Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ

Additional Comments

These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water flows being discharged to the public sewer.

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water to determine whether a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered is required.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>No</p>

5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable	

<p>development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>I write to support the Proposed Submission (Regulation 19) Additional Employment Site ESA5 Northway Porche (Site Reference BEEN10) which I put forward for allocation in response to the previous consultation,</p> <p>I can confirm that the parameters set out within Policy ESA5 are considered broadly acceptable, but I have two concerns -</p> <p>1. Highways Contributions</p> <p>It is important that any financial contributions to off-site Highway Works (Point c.) must be:</p> <p>a. necessary to make the development acceptable in planning terms</p> <p>b. directly related to the development; and</p> <p>c. fairly and reasonably related in scale and kind to the development.</p> <p>In other words, any off-site highway works must be directly related in scale to the additional demand specifically arising from the allocation, and payment is necessary only if that additional demand cannot be accommodated by the existing capacity on the network.</p> <p>2. Building Design & Heights</p> <p>With regard to building Design and Heights (Point d) iv.) the determining issue should not be what <i>already exists on this site</i> but rather what visual impact any new buildings may have in landscape and rural character terms, considered in the broader landscape context of this site. This issue is covered by requirement e. as the required LVIA will consider the detail of landscape impact on the AONB.</p> <p>I look forward to attending the Local Plan Inquiry to support this allocation and to deal with the two issues above if the wording remains as currently proposed.</p> <p>I would be very pleased to discuss any minor changes to the wording to reflect my concerns, prior to the publication of the next consultation version of the plan.</p> <p>Request for Adjustment of the Boundary of Beenham Industrial Area (BEEN10) [See attached PS928 Beenham Industrial Area Boundary Adjustment]</p> <p>Correction needed to boundary of Beenham Designated Employment Area - I am objecting to policy SP 21 on the grounds that it does not include a 0.2 ha sliver of land within the Beenham Designated Employment Area (as defined under the previous policy SC9).</p> <p>Land Currently Used as Parking and Access— The current protected employment area utilises a small parcel of land containing parking and access, but it falls outside the designation. Correcting this requires no more than straitening the boundary line to reflect what is on the ground.</p> <p>Visually and Physically Enclosed - This parcel of land is visually and physically part of and used in association with, the industrial area. It contains parking and agricultural buildings, there will be no material effect on the landscape, the visual context is of the industrial area.</p> <p>Future Landscape Enhancement - The formal inclusion of this land offers future potential for boundary landscaping, of additional tree and hedge planting and screening, and therefore an overall improvement in landscape terms.</p> <p>Existing Establish Boundaries - The addition of the land would comprise no more than a recognition of its existing uses to an existing boundary line.</p> <p>Less than a 1% Increase - The current Protected Employment Area is approx. 21.7 Ha, the proposed additional 0.2 Ha of employment land would comprise less than a 1% increase, within established natural boundaries on land already mainly used for parking for the employment zone.</p> <p>There is nothing within the Landscape Sensitivity and Capacity Assessment 2022 for Beenham Industrial Area that prevents this minor adjustment to the boundary to reflect the reality on the ground.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes
Please give reasons for your answer	This site is in close proximity to the Kennet & Avon Canal. We are pleased to note that there will a requirement for a traffic impact assessment to include the Padworth Swing Bridge, A detailed LVIA and contamination and ecological assessments. Such assessments should consider the adjacent canal and the need to adequately protect the water environment.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	

4. Proposed Changes	
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No

<p>Please give reasons for your answer</p>	<p>The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure.</p> <p>The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments on water supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.</p> <p>Early engagement between the developers and Thames Water would be beneficial to understand:</p> <ul style="list-style-type: none"> • What drainage requirements are required on and off site • Clarity on what loading/flow from the development is anticipated • Water supply requirements on and off site <p>The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.</p> <p>To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.</p> <p>Link here > https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity</p> <p>We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.</p> <p>Water Response</p>

	<p>The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development.</p> <p>Waste Response</p> <p>The scale of development/s is likely to require upgrades to both the wastewater network and sewage treatment infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing and infrastructure phasing plan. The plan should determine the magnitude of spare capacity currently available within the network and what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The developer can request information on the network and treatment infrastructure by visiting the Thames Water website https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development. Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ</p> <p>Additional Comments</p> <p>These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water flows being discharged to the public sewer.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water to determine whether a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered is required.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>No</p>
<p>5. Independent Examination</p>	
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No</p>

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes
Please give reasons for your answer	We note and support the proposed criterion in each of the policies listed in this representation that relates to desk-based archaeological assessment and, if needed, field evaluation.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	
4. Proposed Changes	For all sites listed in this representation, while we support the policy requirement for desk-based archaeological assessment and, if necessary, field evaluation, the language used across the policies used is not consistent. The Council may wish to review the language used across these policies to ensure it improve consistency. We do not consider this is a matter of soundness. b) for ESA6, wording changes are needed to ensure the criterion is clear i.e. is the DBA required and then field evaluation, if necessary. We suspect this is simply a typo, so hopefully an easy fix.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No

<p>Please give reasons for your answer</p>	<p>The site allocations presented in this chapter have not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of each site to accommodate development. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on these sites. We have concerns and have provided this information in a separate document <see comments below></p> <p>This site is on SPZ2+3, secondary A superficial aquifer, next to historic landfill site</p> <p>There is a historic landfill historic landfill next to site which means that any significant foundations or ground excavations at the site may lead to creation of a pathway for pollutants within the landfill to reach groundwater. We refer the LPA to the Environment Agency's Approach to Groundwater Protection guidance Which highlights our requirements for developments on landfill sites. Developers at any allocated sites located on a historic landfill would need to make enquiries regarding potential requirements under the Environmental Permitting Regulations 2016.</p> <p>We assume wastewater will be discharged at the Reading STW. We have no concerns provided Thames Water are confident any additional flows will not lead to deterioration of phosphate classification. Reading STW is within DWF capacity and not a frequent spiller. The policy notes should include a requirement for developers to liaise with Thames Water to discuss wastewater drainage for the site.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	It fails to support the directives in the NPPF in particular Policy DM1
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>It fails to support the spirit of the NPPF</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Emerging draft 2020-2037</p> <p><u>C1</u> Location of “New housing in the countryside within Housing Site Allocations DPD 2006-2026” Policy has been superseded by <u>SP1</u> Spatial strategy.</p> <p>Under the heading DM1, the following sub para appears.</p> <p><i>Exceptionally new residential development outside of adopted settlement boundaries will be permitted. These exceptions are solely limited to development which is appropriately designed and located and which satisfies one or more of the following criteria..</i></p> <p>Policy DM1 Residential Development in the countryside</p> <p><i>Sub Para i</i></p> <p><i>Limited residential infill in settlements in the countryside with no defined settlement boundary where:</i></p> <ol style="list-style-type: none"> 1 <i>It is within a closely knit cluster of 10 or more existing dwellings adjacent to, or fronting an existing highway; and</i> 2 <i>The scale of development consists of infilling a small undeveloped plot commensurate with the scale and character of existing dwellings within an otherwise built up frontage; and</i> 3 <i>It does not extend the existing frontage; and</i> 4 <i>The plot size and spacing between dwellings is similar to adjacent properties and respects the rural character and street scene of the locality.</i> <p><i>Planning permission will not be granted where a proposal harms or undermines the existing relationship of the settlement within the open countryside, where it does not contribute to the character and distinctiveness of the rural area, including the natural beauty of the AONB or where development would have an adverse cumulative impact on the environment or highway safety.</i></p> <p>The problem with this section is that it creates an embargo on any small development unless it is within a “Settlement Boundary”. It identifies any location outside the Settlement Boundary as a development in the countryside even though there could or should be an opportunity for windfall locations which are adjacent to the boundary. It is accepted that there should be control over isolated homes in the countryside. This policy DM1 however is in direct contravention with the advice provided in the NPPF which does not mention throughout the whole document “Settlement Boundaries” and which is not a commonly used term by other local authorities. NPPF discusses Isolated Homes in the Countryside and does not use the terminology “outside settlement boundaries”.</p> <p>Within the NPPF</p> <p>Para 16 identifies that there is a legal requirement on councils to <i>be prepared with the objective of contributing to the achievement of sustainable development ;</i></p> <p>Para 22 uses the word alone “settlement” <i>new settlements or significant extensions to existing villages</i> <i>support the development of windfall sites through their policies and decisions – giving great weight to the benefits of using suitable sites within existing settlements for homes;</i></p> <p>Para 72(b) uses the word settlement <i>be adjacent to existing settlements, proportionate in size to them not compromise the protection given to areas or assets of particular importance in this Framework, and comply with any local design policies and standards.</i></p> <p>This refers to entry-level exception sites, suitable for first time buyers (or those looking to rent their first home),</p> <p>Para 85 says using the word settlement <i>Planning policies and decisions should recognise that sites to meet local business and community needs in rural areas may have to be found adjacent to or beyond existing settlements, and in locations that are not well served by public transport.</i></p> <p>And</p> <p><i>The use of previously developed land, and sites that are physically well-related to existing settlements, should be encouraged where suitable opportunities exist.</i></p> <p>Para 120 says using the word settlement.</p>

*give substantial weight to the value of using suitable brownfield land within **settlements** for homes and other identified needs, and support appropriate opportunities to remediate despoiled, degraded, derelict, contaminated or unstable land;*

It can be seen from the NPPF that all the uses of the word settlement refer to a group of properties but at no time does the word “boundary” occur. This indicates that the NPPF does not, even in the Green Belt or AONB, determine that development should be restricted other than it does indicate that isolated homes in the countryside should be avoided. This therefore indicates that a home or homes being built in isolation would not be acceptable. The reverse however suggests that infill developments would, perhaps under the heading of a “windfall” site be acceptable, great weight should be given to those within existing settlements but it does not specify within settlement boundaries. There are no NPPF written instructions regarding the number of existing properties, nor does it require that the properties should be in some sort of ribbon development.

To support this premise, Para 60 says

To support the government’s objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed, that the needs of groups with specific housing requirements are addressed and that land with permission is developed without unnecessary delay.

Followed by in para 66,

Strategic policy-making authorities should have a clear understanding of the land available in their area through the preparation of a strategic housing land availability assessment. From this, planning policies should identify a sufficient supply and mix of sites, taking into account their availability, suitability and likely economic viability. Planning policies should identify a supply of:

(a) specific, deliverable sites for years 1 to 5 of the plan period ; and

(b) specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15 of the plan.

And in sub paragraphs within para 69

Small and medium sized sites can make an important contribution to meeting the housing requirement of an area, and are often built-out relatively quickly. To promote the development of a good mix of sites local planning authorities should:

(a) identify, through the development plan and brownfield registers, land to accommodate at least 10% of their housing requirement on sites no larger than one hectare; unless it can be shown, through the preparation of relevant plan policies, that there are strong reasons why this 10% target cannot be achieved;

(c) support the development of windfall sites through their policies and decisions – giving great weight to the benefits of using suitable sites within existing settlements for homes

Whilst the paragraph (c) mentions settlements, it does not describe sites within a settlement boundary so the meaning is quite clear that this indicates a group of properties even within or close to a town or small village that may not fit the West Berks criteria.

Under the heading Rural Housing Para 79;

To promote sustainable development in rural areas, housing should be located where it will enhance or maintain the vitality of rural communities. Planning policies should identify opportunities for villages to grow and thrive, especially where this will support local services. Where there are groups of smaller settlements, development in one village may support services in a village nearby.

Paragraph 80 goes on to identify what the NPPF really means

*Planning policies and decisions should avoid the development of **isolated homes in the countryside** unless one or more of the following circumstances apply:*

For example in (e)

the design is of exceptional quality, in that it:

is truly outstanding, reflecting the highest standards in architecture, and would help to raise standards of design more generally in rural areas; and

would significantly enhance its immediate setting, and be sensitive to the defining characteristics of the local area.

Comment.;

It is easy to understand the concept of the West Berkshire policy which was first raised in the original plan in 2006. The question now is one of relevance going forward from 2023 to 2037. There is and will continue to be, pressure to develop residential properties and it is very obvious that these settlement boundaries are today obsolete because of those rules preventing any building. That includes those locations outside and perhaps adjacent to those settlement boundaries which might in the future come forward. The NPPF makes this premise very clear. The infilling having ten or more existing houses as described in the local plan rules, along with a requirement to be adjacent to a highway would continue to prevent any opportunity for small developments. It is thus failing to support our local building industry and their local workers. It is also contrary to the spirit of the NPPF The council has overcome the red line boundary on virtually every of the new locations that are provided for major development by simply drawing a new boundary line and extending the original. Whilst these are included within the policy document these are all developments undertaken by national builders with little return to the local economy during construction. When the Authority take their CiL and S106 and finally when it starts to take council tax there is a return but support for a local builder would provide the profitability which retains that local industry and maintains a team of tradesmen who live and spend locally.

It should be borne in mind that even though the wording reads “*Exceptionally new residential development outside of adopted settlement boundaries will be permitted.*”, the planners do tick boxes when deciding

	<p>an application, with no recourse against the decision other than the applicant going on to appeal to the Inspector.</p> <p>It is agreed and the NPPF is quite clear that planning policies should be “Plan Led” but there are also opportunities for successful small developments which are in tune with the needs of small communities. It is so often the case that local fibre broadband is out of reach of small groups of homes even when close to boundaries due to the perceived viability by the providers and a couple of extra homes might tip the scales.</p> <p>This argument is sound and the paragraph should be rewritten to bear in mind the points raised above and be less onerous on small developers or builders who have the opportunity to develop and enhance smaller communities that already exist. The rules for isolated homes should still apply but within the description which has been tested in the high court and which is described in the NPPF.</p> <p>Proposal for a more fair and suitable revision to that section in DM1....</p> <p>Development proposals for new housing outside of Settlement Policy Boundaries will only be permitted where they are:</p> <p>Small scale residential proposals (Four dwelling or fewer (net)) of a scale and type that meet a locally agreed need provided that:</p> <ol style="list-style-type: none"> 1 <i>It is well related to the existing settlement and would not result in an isolated form of development; and</i> 2 <i>The development will respect the qualities of the local landscape and be sympathetic to its character and visual quality; and</i> 3 <i>The development will respect and relate to the character, form and appearance of surrounding development, and respect the amenities of the residents of neighbouring properties;</i>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	The Planning Policy department within WBC are fairly fixed in their outlook towards the documentation that they champion and are very reluctant to listen to alternative proposals.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	No comment.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	<ol style="list-style-type: none"> 1 The supporting text to Policy DM38 (Development on Existing Educational and Institutional Sites in the Countryside) refers to Policy DM1 as relevant in the consideration of applications for staff accommodation in locations in the countryside, <u>in terms of infill</u>. Bradfield College supports the recognition through Policy DM38 that residential schools and colleges have a need for staff housing within or close to the campus to enable certain staff to fulfil their role within the boarding school/college. 2 Bradfield College is a full boarding school, with weekend and evening programmes. In order to ensure, the health, safety, security and well-being of pupils, the College needs to house a significant number of staff on site. It is also essential that sufficient staff live on-site in order to fulfil academic, pastoral and co-curricular demands, including duties outside the normal teaching timetable.

	<p>3 The demands placed upon staff continue to increase as the regulatory requirements and expectations in relation to Health and Safety, Security and Child Protection are raised.</p> <p>4 The success of the College is in large part attributable to its sense of community which has been established through the close relationships established between staff and pupils. The ability of staff to live on campus and be available to pupils day and night has made a significant contribution towards the success of the College. However, the College is unable to house sufficient staff on the College campus and it currently rents circa 20 properties in the wider area, which is sub-optimal and poses operational challenges.</p> <p>5 Although the College acknowledges the benefits of the overarching strategy to locate new housing at existing main urban areas to achieve sustainable patterns of development, the plan should acknowledge that where established residential schools, colleges and institutions can demonstrate a need for additional staff accommodation and the benefits associated with its provision within or in close proximity to the campus, a specific policy exception should allow for infill and small-scale redevelopment of existing residential areas outside the defined settlement boundaries.</p> <p>6 As drafted, Policy DM1's policy exceptions to new residential development outside of adopted settlement boundaries do not include housing for staff at existing educational or institutional sites. The exception for housing to accommodate rural workers is limited to workers associated with agricultural, forestry and other land based rural businesses (paragraph 11.43)</p> <p>7 Criteria h of Policy DM1 only allows for limited residential infill in settlements in the countryside with no defined settlement boundary. The policy does not expressly allow for such infill proposals where settlement boundaries are in place, such as Bradfield.</p> <p>8 As a result Policy DM1 provides no policy support for new staff housing to meet the needs of Bradfield College beyond the defined settlement boundary of Bradfield, despite the availability of existing College staff housing outside the settlement boundary which would be eminently suitable for infill development and replacement dwellings and the acknowledgment under Policy DM38 that circumstances may justify staff housing beyond the existing settlement boundaries.</p> <p>9 To be consistent with paragraph 82d of the NPPF (2021), the Local Plan should be flexible enough to accommodate needs not anticipated in the plan, allowing for new and flexible working practices (such as live-work accommodation). Accordingly, an additional criteria for staff housing specific to schools, colleges and other residential institutions should be incorporated into Policy DM1 to clarify its application in respect of Policy DM38 and to allow for infill development beyond settlement boundaries to meet the needs of rural residential institutional settings for staff accommodation.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	No comment.
<p>4. Proposed Changes</p>	<p>1 As drafted, Policy DM1's policy exceptions to new residential development outside of adopted settlement boundaries do not include housing for staff at existing educational or institutional sites. The exception for housing to accommodate rural workers is limited to workers associated with agricultural, forestry and other land based rural businesses (paragraph 11.43)</p> <p>2 Criteria h of Policy DM1 only allows for limited residential infill in settlements in the countryside with no defined settlement boundary. The policy does not expressly allow for such infill proposals where settlement boundaries are in place, such as Bradfield.</p> <p>3 As a result Policy DM1 provides no policy support for new staff housing to meet the needs of Bradfield College beyond the defined settlement boundary of Bradfield, despite the availability of existing College staff housing outside the settlement boundary which would be eminently suitable for infill development and replacement dwellings and the acknowledgment under Policy DM38 that circumstances may justify staff housing beyond the existing settlement boundaries.</p> <p>4 To be consistent with paragraph 82d of the NPPF (2021), the Local Plan should be flexible enough to accommodate needs not anticipated in the plan, allowing for new and flexible working practices (such as live-work accommodation). Accordingly, an additional criteria for staff housing specific to schools, colleges and other residential institutions should be incorporated into Policy DM1 to clarify its application in respect of Policy DM38 and to allow for infill development beyond settlement boundaries to meet the needs of rural residential institutional settings for staff accommodation.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
<p>5. Independent Examination</p>	To explain the importance of amendments to Policy DM1 to support and enable the delivery of new staff accommodation for independent boarding schools and colleges in the rural areas of West Berkshire.

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>This consultation response has been prepared by Fisher German on behalf of our clients Mr M Musgrave and Mr W Begley in respect of their land adjacent to Oxford Road, Chieveley, as illustrated in the attached.</p> <p>The land, which extend to circa 6.58ha, is located to the east of Chieveley. The site is defined by residential development and Graces Lane to the south, Oxford Road to the east, residential development and East Lane to the north and a field to the west. The site benefits from mature boundary planting and forms a logical infill location close to the centre of Chieveley.</p> <p>These representations follow the order of the policies within the Submission Plan, wherein we have not commented we have no specific comments at this stage. If you have any questions regarding these representations, please contact the author.</p> <p><i>Extract of response relevant to consultation point:</i></p> <p>Whilst we broadly support Policy DM1, we consider a further criterion must be added to ensure the Plan is as flexible and robust as possible. Whilst there is an allowance for rural exception sites, we consider that this policy does not go far enough in that it only relates to affordable housing need. Clearly there may be market housing need in any given settlement, and it is considered unfair and prejudicial that by not qualifying for affordable housing this would preclude people from having access to suitable housing in their chosen area. Smaller settlements do not always have suitable market housing available for sale at any time, so this cannot be used as justification for such an approach. It is considered that market and affordable housing needs could exist in a given settlement and should be treated equally, or this would serve to unfairly treat the housing need associated for those who would not qualify for social housing, but equally may have legitimate housing needs that otherwise would not be satisfied.</p> <p>To manage such a criterion, there could be a requirement that any such scheme must be supported by appropriate evidence, for example a housing needs survey. If there is a need for market housing, it could be a requirement that it must be demonstrated that there is not appropriate accommodation for sale. This approach ensures that market housing is not built unduly and is considered fair, ensuring that the Plan remains flexible and is able to respond to emerging rural housing needs throughout the Plan period. This approach would also assist the Council in meeting its high windfall targets.</p> <p><i>For full response please see attachment.</i></p>

Please give reasons for your answer	<i>Extract of response relevant to consultation point</i>

	<p>Policy DM1 (Residential Development in the Countryside) now states that outside of settlement boundaries, some new residential development will be permitted, but in exceptional circumstances where the proposal will need to meet one of more of the listed criteria:</p> <ol style="list-style-type: none"> 1 Sites allocated as part of the development plan; 2 Sites for Gypsies and Travellers and Travelling Showpeople; 3 Rural exception housing and/or First Homes exception sites; 4 The conversion of redundant or disused buildings; 5 Housing to accommodate rural workers; 6 The extension to or replacement of existing residential dwellings; 7 The subdivision of existing residential dwellings; or 8 Limited residential infill in settlements in the countryside with no defined settlement boundary where: <ol style="list-style-type: none"> 1 It is within a closely knit cluster of 10 or more existing dwellings adjacent to, or fronting an existing highway; and 2 The scale of development consists of infilling a small undeveloped plot commensurate with the scale and character of existing dwellings within an otherwise built up frontage; and 3 It does not extend the existing frontage at either end; and 4 The proposed plot size and spacing between dwellings is similar to adjacent properties and respects the rural character and street scene of the locality. <p>Whilst this policy extends circumstances in which development may be acceptable, it does not consider the circumstance of sites which are outside of, but very closely related to, settlements which do have settlement boundaries. It only addresses those settlements without defined boundaries whereas, in many cases, sites at higher order settlements located close to the settlement boundary will be far more sustainably located than sites in more remote settlements.</p> <p>Despite this, such properties will still be treated as being located in the countryside even though they would have more sustainability credentials than many of the 'exceptions' listed in criteria a-h of policy DM1.</p> <p>The combined effect of both policies SP1 and DM1 will still be to draw very tight boundaries around existing built parts of settlements and exclude sites which may well be more sustainable and closely related to services and facilities within those settlements than other sites that are actually within the settlement boundary. Such sites will often have none of features that are characteristic of sites which are found in the 'open countryside'.</p> <p><i>For full response see attachment.</i></p>

<p>Please give reasons for your answer</p>	<p>The Local Plan Review (LPR) strategy where it relates to specialist older persons accommodation has not been positively prepared, is neither justified nor effective, nor is it consistent with national policy. Policies SP18, DM1, DM4, and in particular Policy DM19 of the LPR when read as a whole have not fully taken into account the fact that the population of older people in England is growing rapidly, with the consequence that ensuring future housing supply is met on the basis of <i>"Lifetime Homes Standards"</i> will not of itself be either suitable or capable in meeting the accommodation requirements of various types of specialist older households.</p> <p>The need to consider specialist older persons accommodation in adjoining authorities to assess the extent to which they can meet their own requirements; considerations relating to changes in the type of care home accommodation; attrition levels seen in terms of the reasons behind the closure of care homes; viability issues which can result in substantially different characteristics relative to general housing, and lessons to be learnt from the recent Covid-19 pandemic, with consequences for the design and access to communal open space of specialist older persons accommodation; all play an important role in the need for, and hence the likely future provision of this form of housing. It is contended that these material considerations effecting specialist older persons accommodation have not been fully met in the policies in the LPR, being considered in greater detail later in these representations.</p> <p>The ONS 2019 Mid-year population estimates indicate that over the past 20 years (1998-2018) the number of residents aged 65 and over in England increased by approximately 31%; more than double the rate of growth than the total population over the same time period (15%).</p> <p>This ageing trend is expected to accelerate in that the 2018 base i.e. the ONS 2019 National Population Projections, reveal that the older population in England could increase by some 41% over the 20 year period between 2018 and 2038, meaning that by 2034, almost 1 in 4 (24%) of the population in England are expected to be aged 65 or over. The rate of growth in West Berkshire over the period 2022 to 2039 for residents aged 75 or over, is projected to increase by 64%.</p> <p>Current national policy as set out at paragraph 62 of the NPPF 2021 requires local planning authorities to consider inter alia:-</p> <p><i>"... the size, type and tenure of housing needed for different groups in the community should be assessed and reflected in planning policies (including but not limited to, those who require affordable housing, families with children, <u>older people</u>, students, people with disabilities ..."</i> (my emphasis)</p> <p>The NPPG at paragraph 001 Reference ID: 63-001-20190626 states</p> <p><i>"The need to provide housing for older people is critical."</i> (underlining as per the NPPG; my emphasis)</p> <p>Government guidance concerning older persons specialist housing refers to there being a <i>"critical need"</i>, a term absent when describing all other forms of housing need, emphasising the importance to be attached to specialist older persons housing provision.</p> <p>The Guidance goes on to explain in paragraph 006 Reference ID: 63-006-20190626 that :-</p> <p><i>"... These policies can set out how the plan-making authority will consider proposals for the different types of housing that these groups are likely to require. They could also provide indicative figures or arrange for the number of units of specialist housing for older people needed across the plan area throughout the plan period."</i> (my emphasis)</p> <p>Whilst paragraph 013 Reference ID: 63-013-20190626 states:-</p> <p><i>"It is up to the plan-making body to decide whether to allocate sites for specialist housing for older people. Allocating sites can provide greater certainty for developers, and encourage the</i></p>

provision of sites in suitable locations. This may be appropriate where there is an identified unmet need for specialist housing. The location of housing is a key consideration for older people who may be considering whether to move (including moving to more suitable forms of accommodation)."(my emphasis)

The same NPPG sets out at paragraph 010 Reference ID: 63-010-20190626 the different types of specialist housing for older people; all of which have differing consequences seen in terms of delivery; whilst the contents of paragraph 016 Reference ID: 63-016-20190626 are of relevance, highlighting the fact that:

"Decision-makers should consider the location and viability of a development when assessing planning applications for specialist housing for older people... Where there is an identified unmet need for specialist housing, local authorities should take a positive approach to schemes that propose to address this need."(my emphasis)

The West Berkshire Housing Needs Assessment Update published by Icen Projects Ltd on behalf of your Council states in paragraph 5.35

"It can be seen by 2039 there is an estimated need for 1,137 additional dwellings with support or care across the whole study area. In addition, there is a need for 1,032 additional nursing and residential care bedspaces. Typically for bedspaces it is conventional to convert to dwellings using a standard multiplier (1.80 bedspaces per dwelling for older persons accommodation) and this would therefore equate to around 573 dwellings. In total, the older persons analysis therefore points towards a need for around 1,710 units over the 2021- 39 period (95 per annum) – the older person need equates to some 19% of all homes needing to be for some form of specialist accommodation for older people."

These provisions are similarly reflected in the Housing Background Paper prepared by your Authority in January 2023.

I have previously referred in these representations to a proposed 64% change in the population of older persons of 75 years + between 2021 and 2039. This figure has to be examined in the context of the need for specialist housing for the elderly set out in paragraph

The LPR is to seek "specialist accommodation" as an integral part of the strategic housing allocations at Sandleford Park and North East Thatcham. The only specialist older persons accommodation being proposed is an Extra Care scheme on land at Stonehams Farm, Tilehurst, being the only allocated site for specialist elderly persons accommodation to 2039.

During the nine-year period commencing 2013/14 leading up to 2021/22, a total of 227 Class C2 rooms were completed, amounting to five schemes, of which 204 comprised three individual schemes in Newbury, revealing why it is considered that either further allocations should be made for specialist older persons housing, and/or the need for flexibility in the location of such specialist housing schemes in Policy DM1.

The Housing White Paper "Fixing Our Broken Housing Market" published by DCLG in February 2017 recognised the importance of "offering older people a better choice of accommodation" at the same time highlighting that "helping older people to move at the right time and in the right way could also help their quality of life at the same time as freeing up more homes for other buyers." It is noted that the same White Paper recognised the "barriers to people moving out of family homes that they may have lived in for decades" and the "emotional attachment ... which means that where they are moving to needs to be very attractive to them and suitable for their needs over a twenty to thirty year period.." The Housing White Paper clearly expresses the Government's commitment to "exploring these issues further and finding sustainable solutions to any problems that may come to light."

The Government launched a Select Committee Inquiry into the issue of housing for older people in response to the House of Commons Communities and Local Government Committee (2018). The Inquiry report published in February 2018 aimed to reflect the diversity of older people in terms of their ages, individual circumstances, choices and preferences. It concluded inter alia that:

- A national strategy on housing provision for older people is needed, and should be introduced in consultation with older people and those who provide for them;
- Independent research should be commissioned on the wider housing market impact of older people moving to a smaller home that better suits their needs, to further explore frequent claims that this could be part of the solution to tackling the housing shortage;
- National planning policy should give greater encouragement to the development of housing for older people, ensuring that sites are available for a wider range of developers;
- The new standard approach to assessing housing need should explicitly address the complex and differing housing needs of older people;
- Older people should be able to choose from a wide choice of housing which can accommodate their needs and preferences, including smaller general needs housing, accessible housing, retirement homes, extra care housing and cohousing;
- Local authorities should produce strategies explaining how they intend to meet the housing needs of older people, with Local Plans identifying a target proportion of new housing to be developed for older people as well as suitable well-connected sites close to local communities; and
- Local authorities should be more receptive to private developers who wish to build housing for older people in their area, and appreciate the potential health and wellbeing benefits leading to reduced need for health and social care

Knight Frank in their 2021 Research Paper entitled "Health Care Development Opportunities" found that the UK health care market needs upgrading, with 71% of homes older than 20 years; at least 40% of homes having been converted from other uses and many be outdated, with 29% of beds lacking en-suite facilities. They forecast that the Covid-19 pandemic was likely to accelerate the closure of outdated homes and replace them with high quality assets. They went on to add that the Covid-19 pandemic would no doubt prompt a change in the way care homes are designed and configured, with particular emphasis placed on internal circulation, air quality and ventilation, with further focus directed towards transitional and communal space, with a view to maintaining an element of social distancing. A similar shift in preferences with greater attention is anticipated in respect to important outdoor and breakout spaces.

Levels of attrition involving the closing of care homes needs to be assessed in the future, with the average size of newly registered care homes across the country, i.e. those constructed in the last 56 years being 62 beds, contrasting with the average size of care homes closing over the same time period amounting to 29 beds.

It is also important to consider that there are a number of factors which affect the viability of developments relating to specialist housing for older people, one of the most significant being that they incorporate a significant provision of communal space and on-site facilities, in addition to individual rooms/units, and common parts evident in general need apartment blocks. As a result, the efficiency of age restrictive developments seen in terms of the floorspace of individual units (net) to the total floorspace (gross) is significantly poorer than in traditional or general needs housing. In short traditional general needs housing uses 100% in terms of net:gross efficiency, with a figure of 84% net:gross efficiency envisaged for apartments. Care homes, Extra Care facilities and sheltered living/retirement living apartments in contrast are only able to achieve between 40 and 75% net:gross efficiency.

In addition to these design considerations, there are higher construction costs, with greater requirements in terms of achieving higher accessibility requirements, comprising lifts, specially adapted bathrooms, treatment rooms, with those providing these important facilities relying on third party building contractors who are unable to secure the same economies of scale as volume housebuilders.

To these considerations should be added slower sales, given they are directed at a specialist older persons market, with the inability to phase flatted schemes to sales rates, resulting in higher finance costs for developments.

It is for a combination of these reasons that it is contended the LPR needs to be more proactive in delivering development to meet specialist older persons housing, which it is contended is not being met through the allocation of sites to meet these specialist housing needs. If this process is not addressed, with authorities relying on the market to bring forward sites, with viability assessments at the decision-taking stage, it is considered less likely that sites will come forward for this much needed use, although this situation can be alleviated by incorporating into Policy DM1 an exception in respect of specialist older persons housing subject to a quantitative and qualitative need accompanying any such submission.

These considerations which affect specialist older persons housing were accepted by the Inspector Harold Stephens in an appeal decision concerning land at Sonning Common (PINS Ref. No. APP/Q3115/W/20/235861), viz:-

"117. Extra care housing undoubtedly operates in a very different market. Mr Garside provided detailed evidence to the inquiry how the market for land operates to the detriment of extra care operators. Extra care housing providers cannot compete with house builders or with other providers of specialist housing for older people because of the build costs, the level of the communal facilities and the additional sale costs including vacant property costs. The communal facilities must be provided before any units can be sold and sales tend to be slower. However, I accept that extra care schemes can charge a premium for the specialist accommodation provided and also benefit from an income from deferred management fees.

1 It seems to me that these factors, all mean that age restricted developments and in particular extra care communities are less viable than traditional housing schemes. Ultimately, age restricted developers are less able to pay the same price for land as residential developers and it is much harder for age restricted developers; and in particular those seeking to deliver extra care, to secure sites for development and meet the housing needs they aim to supply. Viability is clearly a relevant factor which supports the case under paragraph 172b) of the NPPF. There is also a strong case for the appeal scheme given the lack of alternative sites in the light of Policy H9 of the SOLP."

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>There is a need in the evidence base to provide a detailed assessment of the different types of specialist housing for older people, which for various reasons cannot be successfully accommodated in adjoining authorities, in order to evaluate whether there are certain diverse links for older persons accommodation which are more likely to be met in West Berkshire. To consider housing solely from a generic basis where the form of housing is in critical need is not considered satisfactory, and more importantly, will only exacerbate the need in the future for older persons accommodation.</p>
<p>4. Proposed Changes</p>	<p>There is a need to adopt a more flexible approach towards specialist housing for older people, for which the Government confirms there is a critical need, so that emphasis can be placed on ensuring that their requirements are met, in the same way as is the case for the housing needs of travellers. Both travellers and older people comprise different groups within the community which are required to be assessed and reflected in planning policy, in accordance with paragraph 62 of the NPPF 2021.</p> <p>This means encompassing specialist housing for older people as a category which exceptionally may be provided as a form of residential development in the countryside, in accordance with Policy DM1, subject to a quantitative and qualitative need being shown. The significance of this proposed policy change is evident in appeal decisions where care proposals, both Extra Care and care homes, are being allowed in the countryside in locations not normally considered acceptable in planning terms, such as in the Metropolitan Green Belt; Area of Outstanding Natural Beauty and sites on the edges of small villages, as well as next to listed buildings and conservation areas. This is a reflection of Inspectors consistently recognising the national imperative of providing more care facilities in the light of the very clear instruction that the need is now critical. It is also the fact that a number of local authorities are failing to properly address or recognise that need.</p>

	<p>There is also a requirement to look at the qualitative need for specialist housing for older people, meaning an examination of the District's current care home stock, which includes converted buildings, along with attrition rates, i.e. the loss of care home facilities. The requirement in this respect should be based on an appropriate standard room, being a single occupancy room with en-suite toilet, wash basin and flat floor shower, i.e. a wet room, the latter being particularly important to avoid the risk of elderly people tripping or falling in the shower. It also requires a shower stool or seat to be placed within easy access in the shower. The appropriate standard in this respect is that envisaged by the Care Act 2014 Section 5 paragraph 1(b).</p> <p>This requirement is now all the more persuasive following the shocking evidence of those who have passed away in care homes due to the Covid-19 pandemic. It is not difficult to see why when so many people who passed away lived in accommodation focused on sharing facilities, which, post Covid, is now completely unacceptable. The extent to which there is an appropriate standard of accommodation should dictate the need in the future for all forms of specialist older persons housing in the LPR. In addition, there is a need to carry out an assessment as set out in answer to Question 3 above.</p>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	N/A

1. Do you consider the Local Plan Review is legally compliant?	Yes

* Yes * No	
Please give reasons for your answer	N/A
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>Due to the number of constraints on development (AONB, AWE DEPZs, floodplains, nutrient neutrality zones) resulting in a serious shortage of available suitable land in settlements, also given the major changes in living, travel and working habits occurring in rural areas with the roll-out of the internet and EV charging, there would seem to be a reduced need to control development in the countryside.</p> <p>Major changes in agriculture are also almost inevitable as a result of climate change, BREXIT and the need for food security, but alongside a more environmentally friendly and low carbon input food production system. Whilst agriculture and food production is outside the remit of LPAs and the wider spatial planning system, these changes are bound to lead to new opportunities for employment in businesses that form part of the food chain. This will lead to pressure for housing associated with these rural businesses and while overwhelmingly new housing will be within existing settlements, there may be a need for housing close to businesses outside settlement areas.</p> <p>Therefore, we feel there is no justification for a policy that prevents almost all housing development in the countryside if it is deemed to cause any harm in the relationship between settlements and countryside. We wish to only prevent significant harm and to give great weight to development that can be shown to be self-sufficient and not lead to significantly more need to travel and is exceptionally well designed, as stated already in 9.6.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	N/A

4. Proposed Changes	In the last paragraph of DM1, insert “significantly” before “harms” in line 1 and before “adverse” in line 4.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	To explain our whole somewhat more relaxed approach to development in the countryside “(see also responses to DM23/24/35). (Comment ID: 1282/1283/1285)

<p>and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>It is noted that draft LPR Policy DM1 has been amended to state that 'exceptionally, new residential development outside of adopted settlement boundaries will be permitted' instead of 'there will be a presumption against new residential development...' as set out in the previous Reg 18 draft LPR. This more positive approach is broadly welcomed in line with reflects NPPF paragraph 16, however it is recommended that 'exceptionally' is deleted on the basis of the criteria which are already set out and in order to ensure that appropriate rural development is not unduly prohibited.</p> <p>As referred to above, the Council has also undertaken a review of settlement boundaries across the District, as set out in the Settlement Boundary Review Background Paper (December 2022) and summarised in the LPR Appendix 3, in order to inform where Policy DM1 is applied. Whilst the Settlement Boundary Review Background Paper (December 2022) includes reference to the consideration of Englefield, it is not clear that the conclusions are based on a detailed assessment or applying the identified criteria for reviewing settlement boundaries. As explained above and in our previous representations, it is our view that a settlement boundary should be identified at Englefield to facilitate sustainable development within the village. It is also recommended, with regard to the criteria set out at LPR Appendix 3, that adopted settlement boundaries are drawn to allow flexibility for appropriate limited future expansion and to thereby support 'opportunities for villages to grow and thrive' (NPPF paragraph 79).</p> <p>Given the predominantly rural character of the District, it is crucial that adequate provision is made for development in the countryside in order to meet rural needs. This is reflected in paragraphs 78-79 of the NPPF which encourage sustainable development in rural areas to meet local needs and to enhance the vitality of rural communities. The exceptions which are set out at parts a-i of draft Policy DM1 provide additional clarity to that of Policy C1 of the HSA DPD (which would be superseded by Policy DM1) and generally reflect the provisions of NPPF paragraph 80. It is however recommended that part e is amended to include reference to 're-use' of redundant or disused buildings, in line with NPPF paragraph 80, in order to clarify that existing buildings can be brought back into use as well as being converted to a different use.</p> <p>The amendment to draft Policy DC1 for all developments to 'contribute' rather than necessarily 'enhance' the character of the rural area is welcomed and will help to ensure that appropriate development will come forward to meet the needs of the rural area whilst continuing to protect its character.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	Yes

Please give reasons for your answer	
4. Proposed Changes	<i>The following changes are recommended in order to ensure the soundness of the Plan in line with NPPF paragraph 35: 'Exceptionally, n New residential development outside of adopted settlement boundaries will be permitted.' "e. The conversion <u>or re-use</u> of redundant or disused buildings"</i>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	<i>The Englefield Estate consider that the plan in its current version is not sound and would like the opportunity to set out how alterations could be made to the plan and its evidence base to enable it to be found sound and progress to adoption.</i>

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>Policy DM1 seems to be one of the most profound re-writes of policy in the Proposed Submission Local Plan compared to the 2020 Emerging Draft (where it was Policy DC1). The main change is to a long-standing Policy West Berkshire for there to be a presumption against new development outside of adopted settlement boundaries (Policy DC1, 2020) to an apparent presumption in favour of residential development outside of settlement boundaries (DM1, 2023: <i>... new residential development outside of adopted settlement boundaries will be permitted (even if exceptionally)</i>).</p> <p>Chieveley Parish Council objects to this change which is not in accordance with national policy and not justified. In addition, and irrespective of whether the policy is worded as a presumption against or a presumption in favour, this Council also objects to the weakening of the specific criteria where residential development outside of settlement boundaries will be permitted.</p> <p><u>Not in accordance with National Policy</u></p> <p>As now proposed, Policy DM1 is not in accordance with the NPPF. Paragraph 80 states: <i>Planning policies and decisions should avoid the development of isolated homes in the countryside unless one or more of the following circumstances apply ...</i> i.e. that's worded as a presumption against, not in favour (as now in DM1).</p> <p><u>Not justified</u></p> <p>The structure and effect of NPPF Para 80 is clear and there is no justification for it to be reversed in West Berkshire.</p> <p>The principle of NPPF Para 80 is not new. Paragraph 55 of the NPPF 2012 was, in this regard, substantively the same: <i>Local planning authorities should avoid new isolated homes in the countryside unless there are special circumstances ...</i> There is no national policy change that requires the change made at DM1 to be made.</p>

	<p>The comments received on Policy DC1 as reported in the 'Consultation Statement for the Proposed Submission West Berkshire Local Plan Review 2022-2039 December 2022' were in the vast majority supportive of Policy DC1.</p> <p>Some concern was expressed about the effect of Policy DC1 being overly restrictive in smaller villages without settlement boundaries. If that is the concern, it would be quite easy to address that by framing one of the exceptions under Policy DC1 to apply to smaller villages where the settlement boundary-type criteria can be met, even if there is no actual settlement boundary; and/or more positive wording for Policy DC1 (2020) exception (l). It does not justify the profound changes to policy as set out in DM1 as a whole.</p> <p>The general exception in Policy DM1: <i>exceptions to this are solely limited to development which is appropriately designed and located</i>, lacks clarity because there are no criteria to what 'appropriately designed and located' means. Paragraph 80 of the NPPF and Policy DC1 are clearer.</p> <p>We acknowledge the need to allocate sites for Gypsies, Travellers and Travelling Showpeople but these should be allocated in accordance with other policies in the plan including Policy DM20 and not subject to an exception to policies restricting isolated dwellings in the countryside as now included in Policy DM1. Exception (b) - permitting sites for Gypsies and Travellers and Travelling Showpeople, should continue to be tied to other policies, as it was in DC1.</p> <p>A presumption in favour of permitting individual dwellings in the countryside will have a negligible effect on the rural economy (that being already covered by Policy DM2), or the viability of settlements, however it will have a cumulative impact on the countryside and the AONB. The final sentence of Policy DM1 '<i>not be granted where ... would have an adverse cumulative impact on the environment ...</i>' Will not prevent this as the cumulative impact on the AONB will result from the policy and not be capable of assessment on individual proposals.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Revert to Policy DC1 in the Emerging Draft of 2020.</p> <p>The exceptions (b) to (g) should continue to relate specifically to the other relevant DM policies (i.e. DM20, DM17, DM24, DM23, MD25, DM26and MD27).</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>We wish to ensure the reasons for these views on the transposition of national policy into the Local Plan are understood.</p> <p>We may be able to explain further with reference to specific examples.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.	No

* Yes * No	
Please give reasons for your answer	<p>This policy should be amended to support delivery of infill development or self or custom build plots in edge of settlement locations adjacent to settlement boundaries where the development would have an appropriate relationship to the existing form and pattern of development.</p> <p>The policy allows for infill within settlement boundaries. In the case of our client's site in Brimpton, development would have all the features of infill, and would be supported were it in the boundary or in a village without a boundary. It would not, however, qualify at present due to the Council's decision not to amend the settlement boundary to follow the natural form and pattern of the settlement. Please also refer to separate comments made on the Settlement Boundary review (in relation to Policy SP1).</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	<p>Amend settlement boundary to bring our client's site into the settlement at Brimpton, to allow for small scale infill development to meet local needs. The site is encompassed within the settlement, with residential dwellings to the north, west, south and part of the western boundary. As such the site is well contained, and realignment of the boundary would not give rise to any risk of continued encroachment into the countryside. There is support for small scale additional development in the village to support the local primary school, which is within walking distance of the site.</p> <p><for map see attachment></p>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	Policies have not given appropriate regard to climate change, sustainability or delivering environmental enhancements.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where	No

<p>practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>Essentially we believe the spatial strategy is flawed and there are inconsistencies within the plan. The plan does not wholly conform to the policies of the Framework.</p> <p>Policy DM1: Residential Development in the Countryside, sets out a number of criteria for development outside adopted settlement boundaries.</p> <p>Exceptions include the conversion of redundant or disused buildings, extension or replacement of existing dwellings, subdivision of existing dwellings and limited residential infill in settlements in the countryside with no defined settlement boundaries (criteria h).</p> <p>In order to meet criteria h, new dwellings must be within a closely knit cluster of 10 or more existing dwellings, adjacent to, or fronting an existing highway. Whilst this policy affords limited development in areas outside defined settlement boundaries, it is somewhat in conflict with Policy SP3.</p> <p>Criteria i) of Policy DM1 is a permissive policy which encourages appropriate growth. However, this is contrary to the restrictive settlement boundary approach at Policy SP3. The provision of limited infill should extend to sites that are beyond the defined development boundaries at the identified settlements where the development of a site would comprise sustainable development. The policies are more permissive of speculative development in unsustainable locations than development adjoining an arbitrary settlement boundary.</p> <p>The Council's evidence sets out that the villages and towns identified in policy SP3 are clearly sustainable and appropriate growth is supported; however the restrictive nature of the settlement boundaries and accompanying policies preclude appropriate growth in sustainable locations where there is no identified harm.</p> <p>Important to this point is an appeal decision (3262431) for new dwellings in South Cerney, Gloucestershire. These two dwellings were outside the settlement boundary, but sustainably located. The strategic policy in this case sought to prevent new market housing outside settlement boundaries to prevent new build market houses in the countryside. The Inspector considered that the site was in an accessible location within the village, albeit outside the defined development boundary. The development was considered to be appropriate housing growth in an accessible location without causing harm.</p> <p>At present, the policy as worded would prevent development that is in an accessible location due to the arbitrary boundary.</p> <p>It is suggested that Policy SP3 is updated to reflect the provisions afforded for development at villages without settlement boundaries (by Policy DM1) for sites that are at villages/towns/settlements that have a settlement boundary but lie outside the defined boundary.</p> <p>It is also suggested that the redevelopment of previously developed land at sites that are well related to identified settlement boundaries are supported.</p> <p>In addition, it is also suggested that opportunities for development in sustainable locations which provide landscape enhancements are supported. This would reflect the three overarching objectives by</p>

	<p>encouraging improvements to landscape character, optimising the opportunities to develop previously developed land and make the best use of land.</p> <p>In short, settlement boundaries are a blunt instrument and a level of flexibility, as afforded by policy DM1, would ensure the plan is positively prepared and would support appropriate sustainable development.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Policy DM1 should be amended to include:</p> <p>'i) Outside defined development boundaries but within and/or well related to settlements with defined development boundaries, limited residential infill and the redevelopment of previously developed land will be supported provided that the development:</p> <ul style="list-style-type: none"> • Is sustainably located and accessible; and, • Comprises small scale development that reflects the character of the existing settlement and surrounding area; and, • Is of an appropriate density that reflects the character of the area; and, • Is in accordance with all other relevant policies of the development plan.'

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>Gladman are concerned with the gap policy designations within Policy DM2 which have been proposed to prevent coalescence between Newbury/Thatcham and to maintain the separate identity of the settlements around both towns. Policy DM2 is not positively prepared, justified and effective in line with national policy and therefore the Local Plan cannot be considered 'sound' as currently drafted. The reasons for this assessment are set out in the following paragraphs.</p> <p>Firstly, the identification of settlement gaps will act to constrain the ability of sustainable development opportunities from coming forward in the district which is significantly constrained by various policy and physical designations. Around 74% of West Berkshire is designated as AONB with further significant ecological and historical designations. The Council have already proposed to allocate 10 development sites to accommodate approximately 334 residential dwellings in the AONB through Policy SP15 and need to identify further residential development sites to meet their identified housing needs and to provide flexibility in the delivery of housing over the plan period.</p> <p>Allocating areas of land as green gaps further restricts potentially sustainable development locations and effectively seeks to designate land as Green Belt by the back door, when they have already sought</p>

to direct development to the AONB, which is a legally protected landscape designated for the quality of its scenic beauty.

The Inspector currently examining the Bracknell Forest Local Plan stated in their Post Hearings Letter that the Strategic Gaps and Green Wedge policies in the plan did not add any value to the Plan and a main modification to Policy LP37 Landscape Character would provide adequate protection to the distinctive character setting of settlements (*footnote: Bracknell Forest Local Plan: Inspectors' Post Hearings Letter (EXAM61): <https://consult.bracknell-forest.gov.uk/file/6134773>*). This is in the context of Bracknell Forest considering that exceptional circumstances existed to amend Green Belt boundaries to enable residential development sites to be allocated.

In this context, Gladman consider that Policy DM2 is not positively prepared or justified and that it would be appropriate to delete the gap policies from the Local Plan. It is considered that Policy SP8 provides adequate protection for the character setting of settlements.

Secondly, the Council should be aware that it is an aspiration of Newbury Town Council to improve the transport and highway network within the town identifying a preferred solution for a new road from the western Sandeford development running east and south of Garden Close Lane before joining the A343 at Wash Water2 (Footnote: Newbury Town Plan 2019-2036 (Page 37) <https://www.newbury.gov.uk/media/v25hhpk1/newbury-town-plan-final.pdf>). Although a suggested route is not mapped within the document, it is apparent that this would involve development within the settlement gap. In this regard, West Berkshire Council should consider the implications of the policy on the future provision of a link road and delivering the local community's aspirations.

Finally, Gladman turn to the evidence base attempting to justify the proposed settlement gaps in Policy DM2. The supporting text highlights that the 'Appropriate

Countryside Designation Study (2022)' was undertaken to determine whether specific designations were required to safeguard characters and identities of settlements.

- The study is formed of a 3-step method comprising of:
- Study Area and Parcel Identification;
- Collect General Parcel Information; and
- Parcel Assessment.

The first step identifies 10 large parcels of land using physical features and administrative boundaries through a 3 step method before the second step involved collecting general information about the parcels such as size, location descriptors and whether there were any general designations such as ecological or historical assets.

Finally, the third step assessed the 10 parcels against the five Green Belt purposes identified in the NPPF and undertook an additional 'Green Gap/Wedge Assessment' using four parameters:

- To prevent coalescence/merging (perceptual and physical) of settlements by maintaining open land between them to protect the separate identity of the settlements;
- To guide development form (maintain existing or influence form and direction of urban development);
- Provide a 'green lung' into urban areas (i.e. penetrating from open countryside into an urban area); and
- Provide essential green infrastructure.

The assessment of Parcel 2 draws on the 'West Berkshire Landscape Character Assessment (LCA) (2019)' and 'Newbury Landscape Sensitivity Study (2009) Potential Strategic Development Sites'. The latter highlights that the housing at Enborne Row is, "...clearly separate at present from the Wash Common area of Newbury".

There is fleeting reference in the proforma and assessment in Appendix 2 of the document before pages 96 and 97 of the document propose a green gap designation despite the landscape notes highlighting that there are, "Few (or no views between the settlements due to topography and woodland".

There is no justification provided for the area of and proposed to form the settlement gap titled, 'Land between Newbury and Enborne Row/Wash Water' and no further assessment on the smaller area and parcels between Newbury and Enborne Row. Indeed, page 39 of the document highlights that the assessment is strategic level and does not assess the impact of individual development proposals utilising "...existing evidence and desktop review using GIS and relevant mapping and aerial imagery. Site visits were then conducted to verify the desktop assessments".

There is no landscape visual assessment undertaken and the site visit appraisals are ineffective given they were not undertaken from within the proposed designation boundary. It is considered that the evidence base justifying the designation is not robust.

Pegasus on behalf of Gladman alongside Donnington New Homes have produced a Landscape Appraisal for Land at Sandeford Park South, Newbury. The document undertakes a comprehensive landscape appraisal of the site and the surrounding areas including utilising view points from within the site.

The assessment highlights that beyond the settlement boundary of Newbury, there is a sense of rurality and this is achieved because there is little by way of visual connection with the adjacent settlements and in particular, Newbury and Wash Common to the north. This is in part due to the topographic profile, the gently undulating topography of the local landscape but also due to the significant presence of tree cover and woodland which forms a patchwork quilt across the countryside. The document is set out at Appendix 1 of this representation and highlights how development could be brought forward in keeping with the character and appearance of the local existing residential neighbourhoods and settlements. This would support the Town Council's link road aspirations and will not lead to coalescence issues.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?

* Yes
* No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need	

<p>and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>This policy states that:</p> <p>In order to prevent the coalescence of Newbury and Thatcham and to maintain the separate identity of the distinct settlements around both towns, the following gaps between settlements have been identified and are outlined on the Policies Map:</p> <ol style="list-style-type: none"> 1 Land between Newbury and Thatcham <for map see attachment> <p>My clients land lies within the proposed “gap” between Newbury and Thatcham. The policy goes on to say that:</p> <p>Development which would detract from the open or rural character of these gaps will not be permitted. In these areas development will only be permitted where it:</p> <ol style="list-style-type: none"> 1 Would not diminish the clear physical and visual separation between distinct settlements; and 2 Would not compromise the integrity of the gap either individually or cumulatively with other existing or proposed development. <p>My client objects to this policy, because it seeks to sterilise and prevent development on land that is currently already protected by its countryside status in the adopted local plan. There is no need to add a further layer of constraint. Neither green gaps or wedges are recognised national policy designations, as neither are mentioned in Government guidance i.e. the NPPF and NPPG. Some local authorities choose to designate green gaps or wedges in order to protect land around and between settlements from development. West Berkshire has not designated green gaps or wedges in the past. There must have been a reason for that approach. Perhaps they felt they were not needed. In this context, the designation of the proposed gaps needs to be justified.</p> <p><for map see attachment></p> <p>The supporting text of policy DM2 states that:</p> <p>9.8 The overarching spatial strategy for the LPR set out in Policy SP1 focuses development on Newbury and Thatcham. This pressure for development has the potential to lead to the loss of the separate and distinct identity of both settlements and the settlements surrounding them through coalescence. This could either be by physically or perceptually reducing the gaps between them or by introducing an increase of activity which has an urbanising effect. The visual break and sense of openness between these settlements is very important in maintaining the separate identity of individual communities and the Council considers it important that the integrity of this openness is maintained.</p> <p>This text is flawed, because it is not a logical consequence of allocation of land for development, that other land between settlements will end up being put under pressure for development. Most of the land in the proposed gap between Newbury and Thatcham, to the south of London Road, currently consists of former gravel workings in the form of lakes and wet woodland, which is also a nature reserve and</p>

flood zone. The land is already protected by these designations and there is no need to add another layer of constraint, simply because nearby land is proposed for allocation and future development.

9.9 An Appropriate Countryside Designation Study (2022) was therefore undertaken of the countryside around Newbury and Thatcham to help determine whether a specific planning designation was needed to safeguard the unique characters and separate identities of the individual settlements. This concluded that should the Council specifically define the particular gaps it wanted to protect, that it would be justified in creating a new green gap policy.

An appeal decision in November 2021 concerning my clients site, is mentioned in the Countryside Designation Study (2022) at paragraph 5.4. The report authors state that:

This appeal case demonstrates that the area between Thatcham and Newbury is currently protected by specified policies relating to landscape character and by the LCA identifying the area as having a strong rural setting that plays an important role in maintaining the distinct separation between the two settlements. The proposed development was identified as having considerable economic benefits to the area, however, these did not outweigh the significant harms to the landscape character.

We consider that they have concluded, as the appeal inspector did, that the area between Newbury and Thatcham is already protected by local plan policies and that the harm to biodiversity and green infrastructure outweighed the economic benefits of the proposal. At no point in his decision letter, does the inspector mention there being a "gap" between Newbury and Thatcham, or that existing policy to protect the rural area is in any way sub-standard. Consequently, there is no need to add a further layer of constraint. Existing countryside policies will ensure that unduly harmful development will not be permitted.

My clients land is in Parcel 4, identified in the report as: a relatively small parcel located between Newbury and Thatcham to the north of the railway line but to the south of the A4. It contains a number of lakes and a large part of the parcel is within flood zone 3.

<for map and table see attachment>

The assessment of the proposed gap fails to mention that unsuitable development on the area would be prohibited by existing policies, such as LV1 and CS19. In addition, existing green / blue infrastructure and rights of way would be protected by policies CS17 and CS18. In this context, there is no need for a further designation of "local gap" and another, unnecessary layer of constraint.

The report concludes with regard to parcel 4, as follows:

Parcel 4 (whole) – this parcel provides an essential gap between Thatcham and Newbury where development would significantly visually or physically reduce the perceived or actual distance between them. Part of this parcel was subject of an appeal (Hambridge Lake, Hambridge Road) which is discussed in Chapter 5. The inspector concluded that although the role that the appeal site plays in maintaining separation between the settlements may be limited in its physical extent, it is nonetheless an important role. This separation role remains particularly important along the southern side of the London Road given the near coalescence of Newbury and Thatcham to the north.

The authors of the report appear to have placed a great deal of emphasis on the fact that an appeal was dismissed in respect of my clients land at Hambridge Lake and this justifies the designation of the whole parcel as green gap. In fact, the opposite is the case, because the inspector found that the proposed development was not acceptable in the context of existing policies, none of which mention the gap or any need for a gap. The appeal decision made it clear that existing policies protected land outside of settlements from unacceptable development. The inspector made no mention of a gap or the need for a policy to protect the gap. Therefore, there is no need for a further layer of constraint.

9.10 Gaps are a long established planning tool used to prevent the coalescence of settlements in order to maintain their separate identity. A clear gap between distinct settlements helps maintain a sense of place for residents of, and visitors to, the settlements on either side of the gap. They prevent development in areas where there is the greatest risk of coalescence and so ensure that by retaining a sense of openness, local distinctiveness is maintained.

West Berkshire Council has managed perfectly well for many years without a specific local plan policy seeking to protect gaps between settlements. A recent appeal decision at Hambridge Lake has demonstrated that existing policies are perfectly adequate when it comes to protecting rural areas and green infrastructure from development that is considered to be harmful. Just because other council's have adopted policies to protect gaps, it doesn't necessarily follow on that West Berkshire Council has to do the same. There is no justification for this policy. It is not needed and it is just another unnecessary layer of constraint.

9.11 The identified gaps set out in the policy have not been specifically defined to protect the landscape character of the countryside around Newbury and Thatcham, the Council's approach to which is set out in Policy SP8. It is important to recognise that the gaps are not a local landscape designation. Landscape character assessment can be used however to inform and understand how the settlement pattern has developed, the nature of the individual character and setting of each distinct settlement, the pattern of the separation between them and how the landscape functions to maintain that separation.

This paragraph contradicts itself. It is clear that the gaps between Newbury and Thatcham are proposed for designation in order to prevent the two settlements from merging into each other. The quality of the landscape is not relevant. The proposed gaps are not landscape designations and the quality of the landscape in the gaps is not a determinative factor. However, the paragraph then goes on to say that "landscape character assessment can be used however to inform and understand how the settlement pattern has developed, the nature of the individual character and setting of each distinct settlement, the pattern of the separation between them and how the landscape functions to maintain that separation." This is a direct contradiction of the first part of the paragraph, which says that the designation of gaps is not intended to protect the landscape character of the area concerned. Gaps are like green belts in that they have a planning function, but the quality of the landscape and other environmental factors are not a consideration. This paragraph further shows that the gap policy is flawed and not fit for purpose.

	<p>9.12 The land included within each identified gap performs an important role in defining the settlement character of the area and separating settlements at risk of coalescence. In defining the extent of a gap, no more land than is necessary to prevent the coalescence of settlements has been included.</p> <p>It is not agreed that that “no more land than necessary” has been proposed for designation as gap. On the contrary, a very large area indeed has been proposed as gap. With regard to the area of gap to the south of the A4, where my clients land is location, most of the proposed gap is former gravel workings, which now consist of lakes and wet woodland. The area is protected by environmental designation, such as SSSIs and Nature Reserves. There is no need for a further layer of constraint and there is certainly no need for such a large area to be designated.</p> <p>9.13 Currently, the parcel of land between Thatcham and Upper Bucklebury does not meet the criteria for designation as an essential gap. However, the Council acknowledges that this situation may change depending on how the North East Thatcham strategic site is delivered. The relationship between the proposed development and the country park to the north of the site will be critical in this regard. In accordance with the recommendations made in the Appropriate Countryside Designation Study (2022), further assessment as to an appropriate essential gap in this area will need to be carried out when the extent of the built development on the site has been established.</p> <p>This matter is not relevant to my client's land. Therefore, we have no comment.</p> <p>In summary, we consider that policy DM2 Separation of Settlements around Newbury and Thatcham is unnecessary and flawed. The policy should be deleted from the draft local plan. The policy just adds a further layer of constraint, which is not necessary or reasonable. Once policy DM2 is deleted, the supporting text in paragraphs 9.8 to 9.13 should also be removed from the local plan.</p> <p>It is hoped that these representations, submitted on behalf of Mr Steve Hamilton, will be given due consideration by the council in the evolution of the emerging West Berkshire Local Plan. (Attachment - Jim Bailey (Steve Hamilton) REDACTED))</p>

DM2 – SEPARATION OF SETTLEMENTS AROUND NEWBURY & THATCHAM

[See attachment PS890 Paula Saunderson – Countryside Designation Study Map]

https://westberks.gov.uk/media/53791/West-Berkshire-Appropriate-Countryside-Designation-Study/pdf/West_Berkshire_Appropriate_Countryside_Designation_for_web.pdf?m=638103394389630000

Policy DM2 relates to this Evidence Document and includes these Gaps:

- 1 Land between Newbury and Donnington
- 2 Land between Newbury and Enborne Row/Wash Water
- 3 Land between Newbury and Thatcham
- 4 Land between Thatcham and Cold Ash
- 5 Land between Thatcham and Ashmore Green

It does not include a Gap between Newbury & Ashmore Green which would run along Stoney Lane and East to Long Lane. And it does not include a Gap between Newbury & Cold Ash - between B4009 & Stoney Lane.

By not having these Gap it will be possible for Developers to build out from Newbury North right up to the AONB, and if that is the intention of this Plan then that should be stated clearly in the Spatial Strategy.

[See attachment PS890 Paula Saunderson – AONB Map]

The Conclusion that the Lands between Newbury North & Ashmore Green & Shaw- cum- Donnington – all part of Parcel 9 - does not provide an essential gap between settlements therefore a Green Gap/Wedge Designation is not recommended is incorrect. And it is obvious that the considerations of Green Gaps put into the North of Thatcham have not been consistently applied to North of Newbury. The North Newbury Urban sprawl will stretch for miles without designated Green Gaps, and the preservation of currently productive Agricultural & Food Producing lands has not been considered in the Assessment.

https://westberks.gov.uk/media/53791/West-Berkshire-Appropriate-Countryside-Designation-Study/pdf/West_Berkshire_Appropriate_Countryside_Designation_for_web.pdf?m=638103394389630000

Document titled APPROPRIATE COUNTRYSIDE DESIGNATION STUDY has not been advised to Newbury Town Council and not come before NTC Planning Committee. None of our Elected Representatives have had the opportunity to comment on or give input into this Document before being published as part of the LPR Section 19 Submission. For this reason this Policy is **Not Sound**.

DM2 - I have concerns around this Appropriate Countryside Designations Study which I am not sure any of my elected representatives will have seen?

https://westberks.gov.uk/media/53791/West-Berkshire-Appropriate-Countryside-Designation-Study/pdf/West_Berkshire_Appropriate_Countryside_Designation_for_web.pdf?m=638103394389630000

1. Do you consider the Local Plan Review is legally compliant?	Yes
* Yes	
* No	
Please give reasons for your answer	Local Plan Review complies with Sections 19 and 20 of the Planning and Compulsory Purchase Act 2004 (as amended)
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.	No
* Yes	
* No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.	Yes
* Yes	

<p>* No</p> <p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>[See attached Proposed Vision document]</p> <p>The proposed submission plan refers on many occasions to the constrained nature of West Berkshire, with 74% of the district designated AONB, 90% rural in character, parts of the district subjected to flooding, the registered battlefield to the west of Newbury, nutrient neutrality zone around the River Lambourn catchment and development restrictions imposed by the Atomic Weapons Establishments at Aldermaston and Burghfield. West Berkshire Council considers that only approximately 15% of the district can be considered available through the local plan process for potential development.</p> <p>It is therefore surprising that, in light of the hugely constrained nature of the district, the Council is now seeking to further prevent the possibility for sustainable development around the most sustainable settlements through the introduction of green wedges in the proposed submission Regulation 19 plan. This is considered contrary to NPPF paragraph 60 as the policy does not support the objective of significantly boosting the supply of homes and instead will strangle the future supply of housing. This is a restrictive policy and, as recognised by the Sustainability Appraisal, is incompatible with the Sustainability Appraisal's objective "to enable provision of housing to meet identified need in sustainable locations."</p> <p>It is considered that this new policy is unnecessary as the existing policies in the Local Plan seek to avoid development outside settlement boundaries in the open countryside. Indeed, it is acknowledged at Paragraph 5.44 in the draft Local Plan Review that;</p> <p><i>"Much of the pressure for development is around the edges of settlements, which can physically lead to coalescence or introduce an increase in activity which has an urbanising effect. Despite this, a key feature of even the larger settlements is the way in which few have coalesced in recent times and so the blurring of the physical distinction between places has largely been avoided."</i></p> <p>Additionally, it is noted that the draft Local Plan Review proposes to continue the allocation of residential development in the North Wessex Downs AONB and is proposing that a further 5 site allocations for a total of 104 dwellings be added to the carried forward allocations totalling 289 dwellings across the 5 sites. The justification for the further major development allocations in the North Wessex Downs AONB are the perceived constraints around the Newbury and Thatcham spatial area.</p> <p>Policy DM2, as currently worded, is a wholly negative and unnecessary policy which imposes further constraint on an already heavily constrained authority. Other planning authorities elsewhere have incorporated green wedge policy into their local plans which contribute to the setting of towns, protecting and enhancing green infrastructure assets as well as supporting development in green wedges subject to a number of criteria.</p> <p>Further development in the AONB could be avoided by the deletion of draft Policy DM2 and a thorough consideration of edge of settlement sites at Newbury and Thatcham should be undertaken. This would facilitate the additional allocation of sustainable edge of settlement locations, out with the AONB, such as on land to the east of Waller Drive, Newbury where up to circa 350 dwellings could be sustainably and sensitively accommodated.</p> <p>The Arup report "Appropriate Countryside Designation Study" (21st November 2022), which aims to justify this policy, applied a blanket approach to the consideration of the green wedge designation and did not consider the potential for nuanced, landscape sympathetic development on sustainably located land parcels adjoining the settlement boundaries, such as on land east of Waller Drive, Newbury. A finer grain assessment needs to be undertaken to consider the landscape where the openness has already been compromised through existing physical structures therefore contradicting the Green Wedge designation.</p> <p>Whilst the proposed development will clearly involve built development, as demonstrated in the accompanying Vision document, it can be designed having regard to the sensitive nature of the site to ensure that substantial green corridors are provided along the site's boundaries and within it to try and maintain the site's open character, in consideration of the character of this part of the proposed green wedge designation. The proposed layout of the development is spacious in character, being of fairly low density at 35 dwellings per hectare and works with the existing landscape to minimise any losses or impact on the landscape value and by retaining landscape features that will act as visual breaks and screens from the wider area. It is considered that the development proposals east of Waller Drive, and</p>

its design / layout, has had regard to the openness and characteristics of this part of the landscape to avoid any potential for coalescence with Thatcham in addition to creating a strong eastern boundary which reinforces the separation of the settlements.

West Berkshire's "Landscape Sensitivity Approach to Settlement Expansion within West Berkshire" summary report for Newbury (Kirkham Landscape Planning Ltd May 2009) concludes that the Lower Henwick Dipslopes, Parcel 2E, which covers a larger land parcel containing the land east of Waller Drive, Newbury, have an overall landscape sensitivity of Medium to Low. It is recognised that draft Policy **DM2** is not a local landscape designation and seeks to safeguard the unique characters and separate identities of Newbury and Thatcham. As confirmed by the appeal decisions cited in Arup's report, the adopted policies in the Core Strategy have been generally strong enough to protect the landscape character of the area, demonstrating that this additional policy restraint is totally unnecessary.

It is also considered that the Sustainability Appraisal (SA) is flawed in relation to Policy **DM2** as Appendix 6 justifies SA Objective 1 "to enable provision of housing to meet identified need in sustainable locations" as having an unknown impact on the provision of affordable housing only and does not consider market housing and the economic benefits of additional housing supply to the economy. The SA Sub Objective is "To enable provision of housing to meet all sectors of the community, including those with specialist requirements". It may be that some specialist requirements are only provided by the private sector and delivered through a market housing mechanism.

Furthermore, the SA considers that there will be a neutral impact on health, safety and wellbeing in that the draft policy is likely to impact on healthy active lifestyles. It is argued that by locating development on the edge of sustainable settlements at the top of the settlement hierarchy encourages active lifestyles through the variety of facilities and services that are on offer at Newbury and Thatcham. The policy similarly conflicts with SA Objective 3, improving accessibility to community infrastructure, and SA Objective 4 in that it does not maximise or promote opportunities for sustainable travel. By restricting development in these sustainable locations will have an overall negative impact and is therefore incompatible with the SA.

It is noted that the Arup report considers that the strength of the existing policy protecting the coalescence of Newbury and Thatcham has been assessed in the context of West Berkshire demonstrating a five year housing land supply and raises caution in the event that the housing supply falls below five years. However, in a 'sub-5 year world' the presumption in favour of sustainable development would apply with or without the green gap policy. There is agreement with the report's conclusion that the current policy approach preventing coalescence is justified and effective however, Carter Jonas consider that a further policy restriction on sustainable development is totally unnecessary and the policy should be worded more positively.

Whilst there is some sympathy with the conceived essential gap between Newbury and Thatcham preventing coalescence, sustainable development east of Waller Drive enables the creation of a permanent green gap in the form of a country park, which would be retained, with certainty, in perpetuity. This approach reinforces Arup's consideration in relation to a potential Local Green Space designation on the existing driving range.

Policy **DM2** is unsound as it is a negative policy, limiting sustainable development and pushing development into less sustainable sites in the AONB in order to meet identified housing need. Consequently, the plan cannot be considered to be sound as it is not positively prepared. Whilst it is considered that the policy should be deleted, the below positive policy amendment which enables sustainable development is provided to assist the Council in planning positively.

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>No</p>
---	-----------

Please give reasons for your answer

<p>4. Proposed Changes</p>	<p>Policy DM2 Separation of Settlements around Newbury and Thatcham Suggested Modification:</p> <p>In order to prevent the coalescence of Newbury and Thatcham and to maintain the separate identity of the distinct settlements around both towns, the following gaps between settlements have been identified and are outlined on the Policies Map:</p> <ol style="list-style-type: none"> Land between Newbury and Donnington Land between Newbury and Enborne Row / Wash Water Land between Newbury and Thatcham Land between Thatcham and Cold Ash Land between Thatcham and Ashmore Green <p>Development which would detract from the open the open or rural character of these gaps will not be permitted. In these areas development will only be permitted where it:</p> <ol style="list-style-type: none"> Would not diminish the clear physical and visual separation between distinct settlements; and Would not compromise the integrity of the gap either individually or cumulatively with other existing or proposed development. <p>Include additional text "Supporting development in Green Wedges that:</p> <ul style="list-style-type: none"> Retains the open and undeveloped character of the Green Wedge; Retains and creates green networks between the countryside and open spaces within the urban areas; and Retains and enhances public access to the Green Wedge, especially for recreation.

<p>Please give reasons for your answer</p>	<p>Separation of settlements around Newbury and Thatcham</p> <p>[See attached document Attachment 5]</p> <p>I welcome and support Policy DM2 Separation of Settlements around Newbury and Thatcham, and believe that it is generally sound. In particular, it supports the inclusion of the following separations between settlements in the Policy:</p> <p>c. Land between Newbury and Thatcham</p> <p>d. Land between Thatcham and Cold Ash</p> <p>e. Land between Thatcham and Ashmore Green</p> <p><i>(I do not express a view on items a. and b. which relate to Newbury)</i></p> <p>However, the omission of 'land between Thatcham and Bucklebury' from this Policy is inconsistent with the evidence. This specific aspect of the Policy is not based on proportionate evidence, and is therefore unsound.</p> <p>The gaps that are defined in Policy DM2 are based on the Appropriate Countryside Designation Study (Arup, 21 November 2022), and particularly on the analysis in Appendix C – Parcel Proformas, which is summarised in Section 7 of the report.</p> <p>In this analysis, the 'Land between Thatcham and Bucklebury' (parcel 6 in the study) 'Land between Thatcham and Cold Ash' (parcel 7 in the study) are given identical scores in the Green Belt Assessment. However the assessment summaries for the two sites are diametrically opposed:</p> <p>For 'Land between Thatcham and Cold Ash' and 'Land between Thatcham and Ashmore Green': "The land between Thatcham and Cold Ash and Thatcham and Ashmore Green (as shown on the map below) are essential gaps and on this basis are recommended for potential Green Gap designation."</p> <p>For 'Land between Thatcham and Bucklebury': "As existing, this parcel provides a 'wider gap' between Thatcham and Upper Bucklebury where there may be scope for development but where the overall openness and the scale of the gap is important to restricting merging.</p> <p>The proposed North East Thatcham strategic allocation is, however, included in this parcel. As noted in Chapter 4 the issue of the allocations proposed in the Emerging LPR is assumed to be potentially open. Given that a masterplan has yet to be produced for the North East Thatcham site which would identify which areas of it would be proposed as green infrastructure/green space, it is not possible to provide a further assessment of the gap at this time."</p> <p>The specification for the Appropriate Countryside Designation Study (which forms part of the tender documentation for this project) included the following considerations:</p> <ul style="list-style-type: none"> - The successful candidate will be expected to propose strategic designations and policy suggestions that ... anticipate changing circumstances over a long term period. - The work should support other relevant policies contained in the LPR. - High level masterplanning work for the North East Thatcham site (the Thatcham Strategic Growth Study) has already been produced and this can contribute to this work. <p>Therefore, the results of the study for 'Land between Thatcham and Bucklebury' were pre-determined by the 'considerations' for the study. The conclusions of the Appropriate Countryside Designation Study that led to the omission of the gap between Thatcham and Bucklebury from Policy DM2 are not based on proportionate evidence in the study. The description of the exclusion of this gap from Policy DM2 that is described in paragraph 9.13 is therefore unsound.</p> <p><i>These considerations can be found in Section 4 of the specification, which is provided as Attachment 5 to these representations (obtained under Freedom of Information).</i></p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>N/A</p>
<p>4. Proposed Changes</p>	<p>The following text should be added to policy DM2: "f. Land between Thatcham and Bucklebury"</p> <p>The resulting consequential changes then need to be made to Policy SP17.</p>

5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	If it would assist the examination.

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	<p>Yes</p>
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>Thatcham Town Council welcomes and supports Policy DM2 Separation of Settlements around Newbury and Thatcham, and believes that it is generally sound. In particular, it supports the inclusion of the following separations between settlements in the Policy:</p> <p>c. Land between Newbury and Thatcham</p> <p>d. Land between Thatcham and Cold Ash</p> <p>e. Land between Thatcham and Ashmore Green</p> <p><i>(Thatcham Town Council does not have a view on items a. and b. which relate to Newbury)</i></p> <p>However, the Town Council believes that the omission of 'land between Thatcham and Bucklebury' from this Policy is inconsistent with the evidence. This specific aspect of the Policy is not based on proportionate evidence, and is therefore unsound.</p> <p>The gaps that are defined in Policy DM2 are based on the Appropriate Countryside Designation Study (Arup, 21 November 2022), and particularly on the analysis in Appendix C – Parcel Proformas, which is summarised in Section 7 of the report.</p> <p>In this analysis , the 'Land between Thatcham and Bucklebury' (parcel 6 in the study) 'Land between Thatcham and Cold Ash' (parcel 7 in the study) are given identical scores in the Green Belt Assessment. However the assessment summaries for the two sites are diametrically opposed:</p> <p>For 'Land between Thatcham and Cold Ash' and 'Land between Thatcham and Ashmore Green':</p> <p>"The land between Thatcham and Cold Ash and Thatcham and Ashmore Green (as shown on the map below) are essential gaps and on this basis are recommended for potential Green Gap designation."</p> <p>For 'Land between Thatcham and Bucklebury':</p> <p>"As existing, this parcel provides a 'wider gap' between Thatcham and Upper Bucklebury where there may be scope for development but where the overall openness and the scale of the gap is important to restricting merging.</p> <p>The proposed North East Thatcham strategic allocation is, however, included in this parcel. As noted in Chapter 4 the issue of the allocations proposed in the Emerging LPR is assumed to be potentially open. Given that a masterplan has yet to be produced for the North East Thatcham site which would identify which areas of it would be proposed as green infrastructure/green space, it is not possible to provide a further assessment of the gap at this time."</p> <p>The specification for the Appropriate Countryside Designation Study (which forms part of the tender documentation for this project) included the following considerations (these are copied in full below):</p> <ul style="list-style-type: none"> • The successful candidate will be expected to propose strategic designations and policy suggestions that ... anticipate changing circumstances over a long term period. • The work should support other relevant policies contained in the LPR. • High level masterplanning work for the North East Thatcham site (the Thatcham Strategic Growth Study) has already been produced and this can contribute to this work.

	<p>Therefore, the results of the study for 'Land between Thatcham and Bucklebury' were pre-determined by the 'considerations' for the study. The conclusions of the Appropriate Countryside Designation Study that led to the omission of the gap between Thatcham and Bucklebury from Policy DM2 are not based on proportionate evidence in the study. The description of the exclusion of this gap from Policy DM2 that is described in paragraph 9.13 is therefore unsound.</p> <p>West Berkshire Green Wedge, Gap or Belt Study between Newbury and Thatcham</p> <p>Considerations</p> <p>4.1 The successful candidate will be expected to propose strategic designations and policy suggestions that are strong and defensible at appeal while also being effective in their use and implementation and should anticipate changing circumstances over a long term period. The work should support other relevant policies contained in the LPR.</p> <p>4.2 High level masterplanning work for the North East Thatcham site (the Thatcham Strategic Growth Study) has already been produced and this can contribute to this work. In addition a Landscape Sensitivity and Capacity Assessment has been undertaken for this site. This has not been published online, but can be made available to the successful tender.</p> <p>4.3 There is also vision for Thatcham which will build on this work and will set out the strategic direction of development in the town over the next 30 years versus the more local vision for the town, although it is not complete yet.</p> <p>4.4 While town centre visioning work has been done for Newbury and can be taken into account, equivalent work to the Thatcham Strategic Growth Study does not exist. The visioning work (being undertaken by Icen) for Newbury will again set out the strategic direction of development over the next 30 years versus the more local vision for the town, but is not complete yet.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	N/A
<p>4. Proposed Changes</p>	<p>The following text should be added to policy DM2: "f. Land between Thatcham and Bucklebury." The resulting consequential changes then need to be made to Policy SP17.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
<p>5. Independent Examination</p>	<p>Thatcham Town Council is the principal representative body of the community of Thatcham, which is the location of only new strategic site allocation in the draft Local Plan. The suitability of this site for development is reliant on having adequate infrastructure. However, the regeneration that was promised in the current Local Plan has not materialised, and would not be delivered through the policies in the draft Local Plan. The Town Council can provide local insight to the examination about Thatcham, and particularly on the substantial deficit of infrastructure in the locality. It would also be happy to elaborate on its other concerns about the current proposals for the North East Thatcham Strategic Site Allocation, as described in these representations.</p> <p>The Town Council anticipates that changes necessary to the draft Local Plan in relation to site allocations are greater than could be addressed through 'main modifications'. If, however, the Inspector is minded to consider recommending 'main modifications' to policy SP17 and related matters in other Policies, it would welcome the opportunity to provide its perspective on what modifications would be required.</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	Yes

6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>[For wider representation and Tables and Figures, see attached Representations on behalf of Croudace Homes]</p> <p>Separation of Settlements around Newbury and Thatcham (Draft Policy DM2)</p> <p>Draft Policy DM2 aims to prevent the coalescence of Newbury and Thatcham to maintain the separate identity of the district settlements around both towns, and was informed by the preparation of the 'Appropriate Countryside Designation Study' (2022). To achieve this goal, the draft policy proposes to designate five gaps, shown on the draft as Policies Map effectively as proposed 'green gaps'.</p> <p>Croudace notes that there are two proposed 'green gaps' to the north of Thatcham, closest to Henwick Park – one between Thatcham and Cold Ash (to the north east), and another between Thatcham and Ashmore Green (to the north west). This is illustrated by the excerpt in Figure 6.</p> <p>Naturally, Croudace supports the exclusion of Henwick Park from both proposed green gaps. Its omission demonstrates that, in line with the policy wording itself, the site's development would not diminish the clear physical and visual separation between the settlements and would not compromise the integrity of the gap, either individually or cumulatively with other proposed development.</p> <p>That being said, some of the proposed green gap between Cold Ash and Thatcham does overlap slightly with some of the area proposed for extensive POS (i.e. a country park) at Henwick Park. However, it is Croudace's firm view that this would not conflict with the policy, as any physical built development would fall outside of the gap, whilst the presence of the Country Park to be proposed by Croudace would provide additional preservation to the gap between Thatcham and both Cold Ash and Ashmore Green.</p> <p>Evidence Base</p> <p>West Berkshire Appropriate Countryside Designation Study (November 2022)</p> <p>The West Berkshire Appropriate Countryside Designation Study was prepared to determine whether specific designations for countryside areas around Newbury and Thatcham would be an appropriate inclusion in the LPR. It assesses the suitability of several parcels of land to be subject to Green Belt, Green Gap/Wedge or Local Green Space designations.</p> <p>Henwick Park forms part of Parcel 7, located to the north/north-west of Thatcham up the boundary of Cold Ash and includes the settlement of Ashmore Green (Figure 12).</p> <p>In summary, the Study found that there would be some benefits to be derived from designating Green Gaps on two specific pieces of land located directly between Ashmore Green and Thatcham and Cold Ash and Thatcham, as the land "provides an essential gap between settlements" and development would be seen to visually or physically reduce the distance between them.</p> <p>However, the Land at Henwick Park lies between these two suggested designations, as illustrated by Figure 12. As such, the site does not play an important role in countryside terms, enough to warrant specific 'Green Gap' protection. This clearly demonstrates the area of Henwick Park is capable of delivering built development free from any designation and well-suited to form a logical extension to Thatcham, between the suggested Green Gaps.</p> <p>The Council can be confident that there are no site-specific reasons why the Land at Henwick Park should not be allocated for residential development.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>The Duty to Cooperate ('DtC') Statement sets out the approach to addressing unmet housing needs from Reading, explaining that the authorities making up the Western Berkshire Housing Market Area have agreed the principle that unmet needs should be met within the housing market area.</p> <p>It acknowledges Reading's current unmet need and confirms that Reading Borough Council must review its Local Plan by 2024. It considers how the unmet need should be dealt with in light of the standard method figure.</p>

	Whilst Croudace commends the authorities for taking the DtC this far, it considers that the LPR should seek to address the unmet needs of Reading now, rather than loosely committing to do so at a later date, as we set out subsequently in these representations.
4. Proposed Changes

<p>Please give reasons for your answer</p>	<p>We support the requirement to provide separation of settlements. Based on the LCA, previously mentioned in our comment on SP8, we strongly believe that the area west of the A34 in Speen Parish should also be included in this Policy. Failure to do so risks development on a 'rural and wooded approach and gateway into Newbury' and, more importantly, the annexation of Stockcross into semi urban Newbury along with the potential loss of leisure facilities that promote health and wellbeing.</p>

<p>Please give reasons for your answer</p>	<p>Undoubtably, there will be financial strains on public expenditure, & it is, therefore, very important that sport & exercise should be prominent & not sidelined in schools.</p> <p>Over many decades successive governments & authorities have reduced time for sport & disposed of playing fields. If the government is serious about reversing the unhealthy trend, then the time has come to make "Sport & Nutrition" a significant & important part of school life & education.</p> <p>As chair of Newbury Junior Netball, I ask members, parents & teachers to keep their "eyes & ears" awake to any changes to sports facilities at schools to ensure that sports facilities are enhanced & not diminished, particularly in respect of Park House & the planned Sandford development.</p> <p>There are, today, so many professional opportunities in sport, not only Netball but in the increasing high profile womens' football, rugby & cricket sports, whether it be, as a player, coach, umpire, administrator, or media commentator. Many of the skills coached in one sport are often transferrable to other team ball games.</p> <p>Sport teaches us discipline, respect for rules etc, team spirit, how to react to disappointment. It sets us up for life to partake in sport & so keep healthy.</p> <p>As new developments come forward, demands will be made for land for schools.</p> <p>Developers may contrive to reduce the area required, at the expense of sports facilities.</p> <p>Facilities for amateur sport to hire from schools is already limited, & the dispute over the LRIE football provision has not improved the situation.</p> <p>Has WBC instigated an appraisal (researching past contract specification documents) of whether any school (& other public buildings) are likely to be affected by the recent event of a school collapsing due to defective reinforced concrete.</p>

<p>Please give reasons for your answer</p>	<p>Herewith our response to the Local Plan 2022-2039:</p> <p>37. DM3 states "Development that would have an unacceptable impact on the health or wellbeing of existing or new communities will not be permitted" yet all the development proposed would have an unacceptable impact, particularly air and noise pollution, increased traffic and congestion, further strain on medical facilities, loss of open green space, loss of biodiversity etc.</p> <p>38. 10 Development Management Policies. 10.2. It states leisure facilities are very good yet Theale has none, or any direct public transport links to any. This needs to be stated in the Plan. Theale already has very little open green space and it is extremely important that these are protected.</p>

Please give reasons for your answer	DM3 (Health and Wellbeing) is supported. We would also suggest including express reference to the health and wellbeing benefits of residents of rural villages being able to stay within their local community as their needs change. Children should be able to buy a home near where they grew up, should they wish, to continue to provide support to their parents as they age. Older residents who are downsizing should have the option of staying in the community where they have social support and connections. Those with particular health/ accessibility needs should be able to commission/ self build a home to suit their needs. Residents should be able to find suitable housing to accommodate their needs without needing to relocate further away from their support network. Development which delivers small scale housing to meet local needs should be supported.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	Amend policy to express support for development which supports rural villages, in allowing them to grow and thrive, and which provides for social limb of sustainability, in terms of residents being able to continue to live in communities where they can provide and receive support to others.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the	Yes

Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

Please give reasons for your answer	<p>*Late Response*</p> <p>NHSPS supports the principles identified in Policies DM3 and DM40</p> <p>There is a well-established connection between planning and health, and the planning system has an important role in creating healthy communities. The planning system is critical not only to the provision of improved health services and infrastructure, enabling health providers to meet changing healthcare needs, but also to addressing the wider determinants of health.</p> <p>The NPPF is clear in stating that "Planning policies and decisions should aim to achieve healthy, inclusive and safe places" (Paragraph 92).</p> <p>Identifying and addressing the health requirements of existing and new development is a critical way of ensuring the delivery of healthy, safe, and inclusive communities. On this basis, we support the principle of policies which require an active consideration of health matters.</p>

	<p>Within the NHS property portfolio, a number of sites are, or may become outdated and no longer suitable for modern healthcare without significant investment. In those cases, and where NHS commissioners can demonstrate that healthcare facilities are no longer required for the provision of services in that particular location, a more flexible approach for public service providers should be applied when considering a change of use to non-community uses.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	The Policy DM4 1B The policy would almost certainly be impossible to achieve commensurate with Listed Building Law and regulations. These properties should be carved out otherwise the plan effectively blocks development or refurbishment of this class of premises. Equally the use of local micro generation is permitted but no context for alterations to listed buildings on the buildings themselves or in the curtilage has been provided for point 4 directly contradicts the supporting text which states that carbon offsetting can be used not just cash facilities. Nor has consideration been given to the potential for carbon offsetting facilities in the district to be in short supply of exhausted at which point the restriction on use of facilities within the district acts as a complete block on development that needs to rely on offsetting.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	We believe that the Plan accords with the requirements of the relevant legislation.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes
Please give reasons for your answer	In regard to the minimum standards of construction for new development of one or more new dwellings set out under point A in part 1 of the draft policy, the first requirement notes that the Future Homes Standard has not yet been confirmed by central government and we understand it is currently envisaged that this will not be implemented until 2025. In the interim, the proposed requirement to achieve a 63% reduction in carbon emissions compared to the baseline emission set by Building Regulations Part L 2021 is considered extremely onerous compared with the current Building Regulations which utilise 2013 as the baseline. This would result in developments having to reach very close to net zero carbon which is not a government target until 2050, beyond the new Plan period. In light of this, we do not consider it is appropriate to introduce new or enhanced requirements beyond Building Regulations at the time and achieving this would likely result in additional costs for developments.

	<p>We therefore suggest that the first requirement under point A in part 1 of the draft policy is amended as follows to reflect current Building Regulation requirements: “achieve the carbon Target Emission Rate set by the Future Homes Standard once this is confirmed and implemented by central government; in the meantime, achieve a reduction in carbon emissions in line with current Building Regulations requirements at the time”.</p> <p>In regard to the second requirement under point A in part 1, the equal to or less than 15 kWh/m2/ year space heat demand target is unachievable. This would likely require different methods of construction to achieve this target which would ultimately result in additional costs that could impact development viability. We therefore suggest that this second point is deleted.</p> <p>In respect of part 4 in relation to carbon offsetting, we suggest that the value per kg of Co2 is established within the draft policy or supporting SPD's to provide certainty for developers in the costs of developments.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	We believe that the Plan sufficiently addresses strategic planning issues relevant to the area.
4. Proposed Changes	We therefore suggest that the first requirement under point A in part 1 of the draft policy is amended as follows to reflect current Building Regulation requirements: “achieve the carbon Target Emission Rate set by the Future Homes Standard once this is confirmed and implemented by central government; in the meantime, achieve a reduction in carbon emissions in line with current Building Regulations requirements at the time”.

Please give reasons for your answer	Herewith our response to the Local Plan 2022-2039: 39. S10. The Plan needs to state how omissions will be reduced. Omissions are already high with the M4 and the A34 cutting across most of the district. More development will dramatically increase these problems. 40. S10. The Plan states that you will meet national targets. The Plan needs to state how you will do this. With more development the Plan needs to state clearly how electricity and gas usage will be cut and how fuel poverty will be addressed. 41. 10.34. You need to explore the current Local Plan and address the issues in 10.15

3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No

Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>Sandleford Park West (SPW)</p> <p>Policy DM4 (Building Sustainable Homes and Businesses) requires that, ahead of formal adoption of Future Homes Standard, development achieves a 63% reduction in carbon emissions by on-site measures, as compared to Part L Building Regulations. It goes on to require targets for space heat demand targets. The proposed levels expected by this policy are completely excessively and overly onerous. In terms of evidence for this, the Council's own evidence base for this policy (WBC Evidence Report – Local Plan Review (LPR) – Policies SP5 and DM4 (Evidence Base) confirms that the Climate Change Act sets standards that require 15-20kWh/m2/year space heat demand, by 2025. As drafted, and at the time of drafting, the Council's proposed policy requires a lower threshold at an earlier point targeted by the Climate Change Act. The explanation as to why a lower threshold (15kWh/m2/year space heat demand as opposed to a range of 15-20) has been included in the Policy is that the '<i>.....target was revised to less than 15kWh after further consideration at the officers' workshop.....</i>'. The technical evidence discussed during that workshop is unclear along with whether any relevant, industry experts attended/informed the conclusions drawn.</p> <p>On a similar theme, para 9.5 of the Council's evidence paper outlines the proposed approach in relation to carbon Target Emission Rates. The paragraph sets out assumptions for % reductions in carbon emissions based on 63% being '<i>approximately equivalent to 75% on the Part L 2013 Building Regulations</i>'. It is unclear how this 'assumption' has been made, whether the result of the assumption has been tested from an implementation and viability perspective, and whether sound technical advice has been sought in relation to the assumption.</p> <p>The above are two examples whereby the Council's evidence for the onerous targets set by policy DM4 appears to be questionable, which gives rise to a question mark over the reliability of the policy as a whole. Furthermore, it is unclear whether the policy has been 'tested' in terms of how viable, or not, the requirements are for implementation.</p> <p>There are other examples within the Evidence Base paper where similar 'assumptions' appear to have been made, and there is a lack of clarity on why the Council has drawn the conclusions it has. Given the technical topic area, before, potentially unsound, evidence is used to inform a policy that could place requirements on the development industry that could compromise future viability, it needs to be rigorously tested by industry experts with the technical expertise to impartially advise on the implications of the various measures/targets proposed.</p> <p>The policy should be re-drafted once these points have been taken into account and properly addressed.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	No
<p>Please give reasons for your answer</p>

<p>Please give reasons for your answer</p>	<p>Draft Policy DM4, requires all new residential and commercial development to achieve the 'Target Emission Rate' set by the Future homes Standards once it is confirmed, but in the meantime to 'achieve 63% reduction in carbon emissions is achieved by on-site measures as compared to the baseline emissions rate as set by building Regulations Part L 2021 (SAP10.2)'. Although the Council's commitment to meeting both its and the UK Government's target of net zero carbon emissions by 2030 is commendable, currently it appears that the Council is going to achieve this through having mandatory standards from adoption of the plan that go beyond government targets until the Future homes Standards come in. However, it is our view that any requirement should be 'stepped' in line with Government targets and the proposed changes to the building regulations. This is more desirable as there is considerable momentum from Government in preparing enhanced sustainability standards as it is clear the energy efficiency requirements for domestic and non-domestic buildings will increase sharply in the coming years as the Future homes Standards come into effect. Aligning the Council's requirement for carbon neutral development with those of Government would therefore be pragmatic and more achievable.</p> <p>Recommendation:</p> <ul style="list-style-type: none"> • That the policy is stepped in line with emerging government targets and requirements • The policy is deleted as Net Zero Carbon development is to be dealt with via the Building Regulations.
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>

2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable	Yes

<p>over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	How has the 63% uplift over current Part L standards been arrived at. This is a strange figure and mirrors no other Local Plans that I am aware of.
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>As a highly experienced Part L of the Building Regulations (SAP) Assessor of many years standing I fail to understand or agree with the policy under the first bullet point of Section 1 under Policy DM4.</p> <p>The uplift figure of 63% appears to be entirely arbitrary and in my experience will be very difficult and in many cases, impossible to deliver without the addition of renewable electricity generation equipment onto a dwelling.</p> <p>I suspect that this is a move to push all dwellings to install an Air Source Heat Pump (ASHP) for their heating, alongside a tight fabric specification (which is of course correct), however ASHPs are not suitable in all instances, particularly smaller dwellings, where the more logical approach is to minimise heating need through energy efficient fabric, supply heating by direct electric sources and offset with Solar Photovoltaics (PV - renewable electricity generation).</p> <p>It becomes increasingly difficult to design out energy requirements from UK housing and this will seriously affect the financial viability of house building. In my opinion, the UK Government is rightly 'greening' the National Electricity grid and it will be this that picks up the slack once dwellings have gone as far as is reasonably practical.</p> <p>By all means set an uplift figure, but let's have one similar to other LPAs and not one that seriously limits the flexibility of housing to meet the increasingly stringent Building Regulations.</p> <p>The adoption of this policy, which appears ill thought out and to have not taken adequate technical advice, will see even more time wasted for all parties as they too and fro over its inapplicability.</p> <p>Section 2 states a BREEAM requirement. I am also an experienced BREEAM assessor and have undertaken a number of projects in West Berkshire. This is a continuation of the current policy and it is fair to say it hasn't been working, with many projects successfully appealing and downgrading to a Very Good requirement.</p> <p>Again, this is a waste of the planning department and developers' time and whilst all schemes are different, BREEAM has to be applied in a sensible manner and not as a blanket requirement.</p> <p>Time, effort and resource would be saved if the 100m/sq limit (just for the BREEAM requirement) was raised to 1,000m/sq - at this point I would say you would see far less need to downgrade, for despite what is often claimed, real experience shows that larger projects are more suited to higher BREEAM ratings (but again, not always).</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	No
<p>5. Independent Examination</p>	
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p>	No

* Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>In Section 4. Carbon offsetting. The lack of specificity of the "cash in lieu contribution" is concerning as it could be a potential avenue for misuse. The amount relative should be specified in £/tCO2 and how the council is to use this contribution to offset the Carbon specified.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	No
<p>5. Independent Examination</p>	
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes * No</p>

Please give reasons for your answer	We suggest further consideration is given to unpacking what is meant by a "suitable" location for renewable energy development. In our opinion, significant detail is not necessarily needed in the Local Plan; but it is likely to help future decision-making if there is greater clarity at this stage on the Council's approach to identifying what "suitable" means, including with reference to the historic environment.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes

<p>Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	Some of the policies in this Local Plan do not appear to be achievable (i.e. effective) without government intervention; for example, some of the carbon-reduction policies. The aim of building carbon-neutral housing (3.1 p. 10) is admirable and should be pursued; but in order for this to be achieved, in practice it would require changes to the (national) building regulations.
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>

Please give reasons for your answer	Object. The policy as currently worded is not effective. A detailed note setting out Bloor Homes' representations in respect of Policy DM4 is attached to this table as Annexe 1. Policy DM4 Representations. Attachment: annex 1

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Proposed amendments.</p> <p>We would recommend that the text is amended to include:</p> <p>POLICY DM4 Building Sustainable Homes and Businesses</p> <p>New development of one or more new dwellings (C3 or C4 use class) and/or 100sqm or more of new non-residential floorspace, including hotels (C1 use class), residential institutions (C2 use class) or Secure Residential Institutions (C2A use class) should achieve net zero operational carbon emissions (regulated energy only) by implementing the energy hierarchy.</p> <p>Proposals should demonstrate application of the energy hierarchy through submission of an Energy Statement or a detailed energy section within the Sustainability Statement in accordance with Policy SP5 and which identifies how the following minimum standards of construction are achieved to the greatest extent feasible and viable.</p> <p>1. Residential Development - minimum construction standard</p> <p>A. New development of one or more new dwellings (C3 or C4 use class) will meet the following minimum standards of construction:</p> <ul style="list-style-type: none"> • <u>Prior to 2025 homes will meet the requirements of the Interim Future Homes Standard and deliver a 31% carbon reduction above Part L 2013.</u> • <u>From 2025 homes will meet the requirements of the 2025 Future Homes Standard, maximising opportunities to reduce energy demand and carbon emissions through design.</u> • <u>Achieve the carbon Target Emission Rate set by the Future Homes Standard once this is confirmed by central government; in the meantime, achieve 63% reduction in carbon emissions is achieved by on-site measures, as compared to the baseline emission rate set by Building Regulations Part L 2021 (SAP 10.2). These regulated carbon emission targets are to be achieved before the addition of on-site renewable electricity generation (which should subsequently be considered in section 3 of this policy); and</u> • <u>Equal to or less than 15kWh/m2/year space heat demand target, evidenced by the Building Regulations Part L SAP Fabric Energy Efficiency metric.</u> <p>B. <u>Where feasible and viable</u>, new residential refurbishment developments of 10+ units will meet BREEAM Domestic Refurbishment Excellent as a minimum.</p> <p>2. New Non-Residential Development, hotels, residential institutions, secure residential institutions - minimum construction standard</p> <p><u>From 2025</u> new development of 100sqm or more of new non-residential floorspace, hotels (C1 use class), residential institutions (C2 use class) or secure residential institutions (C2A use class) will meet the following minimum standards of construction:</p> <ul style="list-style-type: none"> • <u>Appropriate to the building type, calculate a typical building baseline using a nationally recognised standard and demonstrate a percentage reduction in energy (regulated and unregulated) carbon emissions. These operational carbon emission targets are to be achieved before the addition of on-site renewable electricity generation (which should subsequently be considered in section 3 of this policy); and</u> • <u>BREEAM Excellent (BREEAM 2018 or future equivalent)</u> <p>3. Renewable Energy</p> <p>A. <u>From 2025</u> Subsequent to the achievement of the minimum construction standards under parts 1 and 2, new development of one or more new dwellings (C3 or C4 use class) and/or 100sqm or more of new non-residential floorspace, hotels (C1 use class), residential institutions (C2 use class) or Secure Residential Institutions (C2A use class) should include onsite renewable, zero and low carbon energy technologies to achieve net zero carbon operational energy (regulated and unregulated) on site.</p> <p>B. The Council will support proposals for renewable energy provided that the technology is:</p> <ol style="list-style-type: none"> i. Suitable for the location; ii. Not on the most versatile agricultural land (grades 1, 2 and 3a); iii. Is accompanied by a landscape / visual impact assessment; and iv. Would not cause harm to residential amenity by virtue of noise, vibration, overshadowing, flicker or other harmful emissions. <p>4. Carbon Offsetting</p> <p><u>From 2025</u>, where a development proposal of one or more new dwellings (C3 or C4 use class) and/or 100sqm or more of new non-residential floorspace, including hotels (C1 use class), residential institutions (C2 use class) and or secure residential institutions (C2A use class) cannot demonstrate that it is net zero carbon in relation operational energy (regulated and unregulated), it will be required to address any residual carbon emissions for a period of 30 years through a cash in lieu contribution using a carbon offset cost of <u>£xxx</u> per tonne. Grid decarbonisation can be considered when calculating the offset cost.</p> <p><i>Supporting Text</i></p> <p>Renewable energy</p> <p>The use of deficiencies with the national grid as justification for greater renewable energy requirements on development sites is not appropriate and should be removed from the policy and supporting text.</p>

	<p>Furthermore we believe that alternative renewable energy options are prioritised ahead of CHP systems, with the Policy DM4 supporting text updated as shown below:</p> <p>Proposed Amendment 1.</p> <p>Examples of renewable energy technology include:</p> <p>(i) Micro-renewable technology, in particular solar water heating, ground and air source heat pumps, photovoltaic cells and biomass boilers.</p> <p>(ii) Large scale ground mounted solar PV systems; and</p> <p>(iii) Combined heat and power (CHP) with a modest plant being able to serve a large number of dwellings and commercial uses in a small geographical area;</p> <p>Carbon offsetting – The evidence base does not include consideration of the unregulated energy as part of the carbon offsetting cost, it is assumed as a result that no allowance has been included in the viability assessment. Clarity is sought on whether unregulated energy has been properly considered to ensure the soundness of Policy DM4. Draft policy DM4 should also clearly state the carbon offset cost proposed and this should be included in the viability assessment.</p> <p>In addition the Council should clearly set out how the required carbon offset has been achieved, within a reasonable timeframe and suggest paragraph 10.32 is updated as below.</p> <p>'10.32 Funds raised through this policy will be ring-fenced and transparently administered by the Council to deliver a range of projects that achieve measurable carbon savings as locally as possible, at the same average cost per tonne. Funds will be spent within 5 years of collection and returned to the developer. The fund's performance will be reported in the Authority Monitoring report on: amount of funds spent; types of projects funded; amount of CO2 saved.'</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	Yes
<p>5. Independent Examination</p>	Yes, to provide the Inspector with further explanation of the need for appropriate policy wording to ensure a deliverable approach towards the delivery of climate change resilient development in West Berkshire and to explain the amendments required to ensure the policy is effective.
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes</p> <p>* No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes</p> <p>* No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes</p> <p>* No</p>	Yes

<p>Please give reasons for your answer</p>	<p>Principle of the policy</p> <p>Whilst our client is supportive of the need to reduce greenhouse gas emissions and supports West Berkshire Council for their intention to tackle the climate crisis, our client has soundness concerns regarding the effectiveness and consistency with national policy of the proposed DM4 policy as currently worded.</p> <p><u>Effective:</u> The emerging policy will impact upon viability of development, potentially further impacting the supply of employment land. It is also unclear how the policy will be applied in certain circumstances (as set out below)</p> <p><u>Consistent with National Policy:</u> The emerging policy does not set out clearly how any cash-in-lieu contribution would meet the tests required by legislation.</p> <p>The policy is ambitious however, in our client's opinion, it is currently worded with limited flexibility and consideration upon the different scales and types of development that can come forward and their associated means to incorporate these policy aspirations within proposals. The LPR's supporting Viability Assessment (Autumn 2022) is clear that beyond the affordable housing policy, the sustainable construction and development objectives of the plan, driven through Policy DM4, is the other significant emerging policy with a potential impact upon the viability of development as stated in paragraph 1.1.17.</p> <p>Whilst it acknowledged that the Viability Assessment is at high-level, it is evident in various parts of the assessment that policy DM4 has the potential to impact the deliverability of the Local Plan.</p> <p>Firstly, this is made evidently clear in Appendix I Table G (Policy Analysis) which states that proposed policy DM4 has a 'high' viability impact which has resulted in an allowance being added to base build costs. Furthermore, the associated commentary acknowledges that the policy scope could have further site-specific impacts.</p> <p>In regard to base build costs, it is noted within the Viability Assessment Report that there is a lack of detailed guidance of which to base any additional cost assumptions on. The commentary following paragraph 2.14.4 describes the evolving approach to the assumed levels of cost increase for both residential and non-residential development. The commentary shows under the bullet "<i>Carbon reduction – contributing to the Council's Net Zero ambitions</i>", that despite the relatively short period of time between the stages of the review, assumed costs have increased (from an initial ~4% to +5%). As more detailed evidence becomes available to base assumptions on, it is acknowledged that these assumptions will change however the increase here between assessments is evident and can therefore, on balance, be expected to continue to change.</p> <p>Focusing specifically on non-residential developments, paragraph 3.2.44 of the Viability Assessment makes clear that cost estimates around carbon reduction / zero-carbon developments are not widely available and vary greatly, including by source and scheme type. The Viability Assessment appears to consider what is included at this time (+5% construction costs for non-residential) as a reasonable assumption, despite the report noting that costs could be higher or significantly higher in some cases. Furthermore, the report seems to consider that the potential over cost impacts of these</p>

measures will fall over time based on improved markets, technologies, and efficiencies (paragraph 2.14.5 point-d and paragraph 3.2.45). Whilst there is a probable case for improved efficiencies occurring, our client has concerns regarding the over cost assumptions used and the likelihood that these efficiencies will begin to have significant positive impacts in the near future due to the lack of evidence available. There should also be a consideration that additional inflexible requirements alongside current build cost inflation and environmental requirements will in fact make the market less prospective. Build cost inflation and environmental requirement implications are highlighted in paragraph 2.1.6 of Appendix V for the Viability Assessment as mounting pressures for the market following referenced engagement with market reporters.

Building upon the above context, Appendix IV for the Viability Assessment illustrates the findings stated in paragraph 3.2.42 of the Viability Assessment *that “there are few forms of development that are shown to be clearly and consistently viable”*. Looking specifically at industrial uses, the appraisals show ‘indicative non-viability’ despite the different % yields considered.

Notwithstanding the suggestion in paragraph 3.2.42 that this is not unusual in West Berkshire, or that, in paragraph 3.2.47, “significantly increased sustainable development expectations would be likely in themselves to unduly affect the viability of schemes that are considered to have the demand and viability to drive their progression”, this should not distort the fact that the policy will have impacts on build costs and delivery.

In our client’s opinion it should not be the case that much-needed development which is not proposed to be met by this Local Plan Review (see our client’s representations regarding policies SP20 and SP21 [see comments PS1147 and PS1148]), and is already difficult to bring forward, is made harder to deliver simply based on the assumption that schemes will be delivered if there is the demand and viability to drive their progression. Indeed, if it is not unusual in West Berkshire for viability to be a challenge as stated in paragraph 3.2.42, additional land should be identified to provide confidence and ensure a consistent and deliverable supply should any forthcoming sites encounter difficulties.

In our client’s opinion, with regard to the above it is difficult to see how the current rigid policy wording is effective and will therefore contribute to the delivery of sustainable development in West Berkshire.

Policy Wording

With specific regards to the policy wording, our client has several concerns.

We consider that not all proposals will neither be physically able (in terms of space) or financially able (in terms of viability) to deliver BREEAM Excellent standard buildings and/or renewable, zero or low-carbon energy technologies on site. Whilst ‘where appropriate’ is included in paragraph 10.27 of the supporting text for emerging policy DM4, unless this wording is included in the policy wording, in our client’s opinion the policy would not be effective.

Secondly, reference is made to the ‘energy hierarchy’ throughout the policy and supporting text. However, a description or illustration of the hierarchy does not appear to be evident. For clarity, in our client’s opinion, the LPR should include a diagram or list of the hierarchy so that there is a clear understanding about the approach developers should take.

Thirdly, regrading construction standards for new non-residential development, clarity should be provided as to the nationally recognised standards that should be used to calculate a typical baseline. This will add clarity to policy and ensure it is consistent with paragraph 16 (d) of the NPPF.

Lastly, our client is aware that the proposal under point 4 of emerging policy DM4 – Carbon Offsetting. Our client considers it pertinent to emphasise that any cash contribution sought by West Berkshire through a planning obligation must satisfy the requirements set out in regulation 122 (2) of the CIL Regulations 2010 (see also NPPF paragraph 57). The supporting text for this element of the emerging policy is set out from paragraphs 10.28 to 10.32 of the LPR document. Currently, within the policy and the supporting text it is unclear how any funds raised would be used. Clarity should be added so that it is clear and consistent with national policy.

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>N/A</p>
<p>4. Proposed Changes</p>	<p>With regard to section 2 above, in our client’s opinion, the below changes would add clarity and flexibility to the policy thereby improving its effectiveness and consistency with national policy. Additions are shown underlined, and deletions shown by strikethrough.</p> <p>“Policy DM4 Building Sustainable Homes and Businesses</p> <p>New development of one or more new dwellings (C3 or C4 use class) and/or 100sqm or more of new non-residential floorspace, including hotels (C1 use class), residential institutions (C2 use class) or Secure Residential Institutions (C2A use class) should, <u>where practicable</u>, achieve net zero operational carbon emissions (regulated and unregulated energy) by implementing the energy hierarchy.</p> <p>All proposals should demonstrate application of the energy hierarchy through submission of an Energy Statement or a detailed energy section within the Sustainability Statement in accordance with Policy SP5 and which identifies how the following minimum standards of construction are achieved to the greatest <u>feasible and viable</u> extent feasible and viable.</p>

	<p>1. Residential Development - Minimum Construction Standard</p> <ul style="list-style-type: none"> • New development of one or more new dwellings (C3 or C4 use class) will meet the following minimum standards of construction: • Achieve the carbon Target Emission Rate set by the Future Homes Standard (once this is confirmed by central government); in the meantime, achieve 63% reduction in carbon emissions is achieved by on-site measures, as compared to the baseline emission rate set by Building Regulations Part L 2021 (SAP 10.2). These regulated carbon emission targets are to be achieved before the addition of on-site renewable electricity generation (which should subsequently be considered in section 3 of this policy); and • Equal to or less than 15kWh/m2/year space heat demand target, evidenced by the Building Regulations Part L SAP Fabric Energy Efficiency metric. New residential refurbishment developments of 10+ units will meet BREEAM Domestic Refurbishment Excellent as a minimum. <p>2. New Non-Residential Development, Hotels, Residential Institutions, Secure Residential Institutions - Minimum Construction Standard</p> <p>New development of 100sqm or more of new non-residential floorspace, hotels (C1 use class), residential institutions (C2 use class) or secure residential institutions (C2A use class) will meet the following minimum standards of construction:</p> <ul style="list-style-type: none"> • <u>A demonstrated percentage reduction in energy (regulated and unregulated) carbon emissions based on the appropriate building type baseline calculated using nationally recognised standards (*name of the standards to be inserted*)</u> Appropriate to the building type, calculate a typical building baseline using a nationally recognised standard and demonstrate a percentage reduction in energy (regulated and unregulated) carbon emissions. These operational carbon emission targets are to be achieved before the addition of on-site renewable electricity generation (which should subsequently be considered in section 3 of this policy); and • Where practicable, BREEAM Excellent (BREEAM 2018 or future equivalent) <p>3. Renewable Energy</p> <p>A. Subsequent to the achievement of the minimum construction standards under parts 1 and 2, new development of one or more new dwellings (C3 or C4 use class) and/or 100sqm or more of new non-residential floorspace, hotels (C1 use class), residential institutions (C2 use class) or Secure Residential Institutions (C2A use class) should where possible and appropriate include onsite renewable, zero and low carbon energy technologies to achieve, to the greatest extent possible, net zero carbon operational energy (regulated and unregulated) on site.</p> <p>B. The Council will support proposals for renewable energy provided that the technology is:</p> <ol style="list-style-type: none"> Suitable for the location; Not on the most versatile agricultural land (grades 1, 2 and 3a); Is accompanied by a landscape / visual impact assessment; and Would not cause harm to residential amenity by virtue of noise, vibration, overshadowing, flicker or other harmful emissions. <p>4. Carbon Offsetting</p> <p>Where a development proposal of one or more new dwellings (C3 or C4 use class) and/or 100sqm or more of new non-residential floorspace, including hotels (C1 use class), residential institutions (C2 use class) and or secure residential institutions (C2A use class) cannot demonstrate that it is net zero carbon in relation operational energy (regulated and unregulated), it will be required to, subject to viability, address any residual carbon emissions by:</p> <ul style="list-style-type: none"> - a cash in lieu contribution based on the national carbon offset price set by the latest HM Treasury Green Book to fund verified carbon offsetting measures in West Berkshire to relevant national standards. <p>The policies supporting text should be reviewed to ensure spelling and grammatical mistakes are removed.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>Yes</p>

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	<p>Whilst embracing the Zero Carbon movement, we are concerned that local authorities do not have the capacity to deal with the technical intricacies of drafting standards that are deliverable. This could inadvertently lead to housing delivery issues.</p> <p>We have particular concern with DM4, point 1(A), Residential Development – minimum construction standard, and the practicality/feasibility of complying with the first bullet point, which includes a 63% reduction in carbon emissions.</p>

	<p>We have taken advice from energy specialists and understand that this requirement is completely impractical as most dwellings will not pass current Part L without the addition of PV and whilst this pushes heat pumps to the fore, these are not always suitable for smaller units, where an electric heating/PV combination makes more sense. We are concerned that this policy belies a misunderstanding of Part L and lacks justification for the figure of 63%.</p> <p>As such, we have concern that policy, as drafted, will serve only to frustrate efforts to bring forward sustainable development.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>A redrafting of this policy to ensure it is clear, measurable, achievable and justified and so that it does not inadvertently act as a barrier to helping delivery the district's development needs.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>Feltham Properties is a reputable local development company and has significant concerns that the policy as drafted will be a barrier to bringing forward development in the district.</p>

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	<p>The Council are proposing that all new residential dwellings should achieve net zero for both regulated and unregulated energy by implementing the energy hierarchy. This would require new residential development to deliver a 63% reduction in carbon emission compared to baseline emission rate achieved using 2021 Part L of the Building Regulations prior to the introduction of the Future Homes Standard. In addition, the Council are seeking a target of 15 kwh/m2/year for space heating demand and carbon offsetting via a cash in lieu contribution if homes cannot demonstrate that it is sent zero carbon. The approach being put forward by the Council will in effect require developers to bring forward energy efficiency standards in their new homes that are beyond current building regulation but also those that would be introduced in the Future Homes Standard through the requirement to achieve a target for space heating that matches those required for a Passivhaus.</p> <p>The HBF recognises the need to improve the energy efficiency of new homes and consider that the most effective way of achieving these improvements is through nationally applied standards and not through a variety of different approaches adopted in local plans. Delivering new homes to a variety of different standards in different LPAs increasing costs and reducing the economies of scale that come from building homes to consistently applied national regulations. In particular this has a significant impact on small and medium sized housebuilders and as such could impact on a key sector the government are seeking to encourage and which ensure the greater diversity of housing across the country. The house building industry is not resistant to improving the energy efficiency of new homes and reducing carbon emissions</p>

it merely wants these improvements to be consistent across the country as a whole rather than face different standards in each local planning authority.

We also consider the Council's approach to be inconsistent with that being put forward in policy. Firstly, the Council must consider section 5 of Planning and Energy Act 2008 which states that energy policies in local plans "... *must not be inconsistent with relevant national policy*". Secondly consideration must be given to current Government policy which was first established in the Written Ministerial Statement and then reiterated in paragraph 6-012 of PPG. These two statements set out that Council's should not go beyond a 20% improvement on the 2013 building regulations (an improvement equivalent to the long-abolished level 4 of the Code for Sustainable Homes). Given that this has now been exceeded by Building Regulations it is evident that the Government's intention is to use building regulations as the main focus for change on this matter and this is further reinforced by paragraph 154b of the NPPF states in relation to greenhouse gas emissions that "... *any local requirements for the sustainability of buildings should reflect the Government's policy for national technical standards*".

This would suggest that whilst the Government have accepted some uplifts to technical standard can be made through local plans, they are seeking to deliver major changes to energy efficiency standards through building regulations. To some extent the Council would appear to acknowledge this situation by stating that Target Emissions Rates should achieve those set by the Future Homes Standard once it is introduced. However, to then require a space heating demand equivalent to Passivhaus standards means that buildings will still have to go beyond what is expected within Building Regulations once the Future Homes Standard is introduced. The HBF consider that the Government's expectation through the policy framework is that Council's do not seek to go beyond the requirements that are set out in current and future Building Regulations. As such

the Council must amend this policy to remove reference to achieving standards beyond those required by Building Regulations.

It is important to recognise that the development of the Future Homes Standard has included and been supported by the house building industry, energy and water providers, bodies such as RSPB and three Government departments. The framework developed will ensure that the transition to zero carbon homes is feasible whilst maintaining house building levels that can address the current housing crisis facing the country. To then place additional requirements with regard to such matters is unnecessary and unjustified.

Whilst we do not consider the policy to be sound, if the Council are to continue with this approach, we would recommend that more clarity on flexibility is included in the policy where this would result in a development becoming unviable. At present the second paragraph refers to both feasibility and viability but it is not clear as to how a decision maker should react where it is not possible to meet these standards. Therefore, if these policies are to be retained greater clarity as to flexibility in their application is required.

Finally, the policy requires a payment to be made where net zero cannot be achieved. The HBF considers such policies to be inconsistent with national policy which makes no reference to offsetting of residual carbon emissions from both unregulated and regulated energy. In particular development should not be required to offset unregulated energy. Housebuilders cannot dictate how individuals use their homes once they are occupied, the number of appliances they use, and the energy efficiency of those appliances. As such any reference to unregulated energy use in this policy should be deleted as it is not in the control of the developer.

Costs of meeting zero carbon standard.

The Council's viability study to support the LPR suggests that the evidence on the cost of achieving zero carbon in relation to regulated and unregulated emissions is between 7 and 11% of build costs. However, in the latest tests the Council have included a +5% build cost allowance on the basis that costs will reduce over time as efficiencies improve. This may be the case but in the short term it would appear to be the case that these costs will be higher, and viability should be tested against these costs not on future efficiencies. It is also not clear as to how the potential cost of carbon offsetting has been included in these estimates.

Conclusion on net zero operational carbon

In brief the HBF are concerned that the higher level of energy efficiency standards being proposed by the Council go well beyond what is being proposed by the Government and we say beyond the intention of its stated position in PPG. The Government have set out its intentions with regard to the Future Homes Standard from 2025 which will provide a significant improvement to the energy efficiency of new homes, a process that allows for the decarbonisation of the grid to transition homes net zero. Given that the Future Homes Standard will be challenging for the industry to deliver nationally there will be difficulties at the same time in achieving the Council's more stringent requirements. As such the HBF consider the policy to be unsound as it is unjustified to push for a more stringent target than that set out by a careful dialogue between Government and a range of stakeholders.

Please give reasons for your answer	<p>Policy DM4 (Building Sustainable Homes and Businesses) – Thakeham has a number of concerns with this Policy and its supporting text. Firstly, operational carbon emissions are usually defined through regulated energy consumption, as unregulated energy consumption is impossible to accurately predict, and its verification post-occupation is not something the Council are going to be able to administer, and neither is the housebuilding industry ready to conduct this monitoring.</p> <p>Thakeham supports the requirement for on-site renewables, however only in the form of regulated energy only, which takes into consideration the trajectory of the decarbonisation of the national grid to play its part in the transition of every home's electricity use to be Net Zero. However, by including unregulated energy, we believe that the cost and embodied carbon impact will affect viability for all developers.</p> <p>Thakeham supports the Future Homes Standard approach to Net Zero Ready, and have already committed that from 2025, every Thakeham home we complete will be Net Zero carbon in operational emissions, as defined by regulated energy consumption using the SAP calculator. Thakeham considers that the Council should follow this approach, and therefore not take into consideration unregulated energy when defining carbon emissions.</p> <p>Moreover, the higher level of energy standards sought by draft Policy DM4, in our view, go beyond national policy and the Government's future intentions. Thakeham would therefore welcome the Council's thoughts as to whether it considers draft Policy DM4 satisfies the tests of soundness, as drafted.</p> <p>Thakeham supports the creation of the Reg 19 Local Plan and looks forward to engaging further. Currently however we have concerns in relation to the wording of the policies, their evidence base and therefore on the overall soundness of the Reg 19 Local Plan as drafted. Whilst the Council's evidence underpinning certain policies is strong, in others it is notably weak.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	N/A
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy:	No

<p>the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>Policy DM4 'Building Sustainable Homes and Businesses' appears to relate to uses under Class C of the Town and Country Planning (Use Classes) Order 1987 (as amended). However, in the absence of a definition for 'businesses' under this Policy, it is not clear if the word 'businesses' refers only to those businesses under Class C (such as hotels) or if the Policy covers other commercial uses under Classes B, E and F.</p> <p>As such, in the interests of clarity, we recommend that the Council separates this Policy into two different Policies, covering Class C uses and non-residential development respectively.</p> <p>In addition to the above, whilst we support the Council's need to tackle climate change, we question the effectiveness of Policy DM4 as currently worded.</p> <p>However, point 4 of Policy DM4 refers to carbon offsetting and states that a cash in lieu contribution can be provided. The supporting text for this element of the emerging policy is set out from paragraphs 10.28 to 10.32 of the Draft Local Plan. Although we do not object to the carbon-offsetting payment currently, within the policy and the supporting text it is unclear how any funds raised would be calculated and used. We suggest that the supporting text includes information setting out how the Council will calculate the price for offsetting carbon. We recommend that when setting a cost for carbon, the Council develops and publishes a price for offsetting carbon based on either: a nationally recognised carbon pricing mechanism; or the cost of offsetting carbon emissions across the LPA. The price set should not put an unreasonable burden on development and must enable schemes to remain viable.</p> <p>Furthermore, clarity should be provided in terms of where the cash in-lieu payment will be used. In our view, it would be beneficial to allow flexibility such that offsetting contributions can be used by the same business / reinvested in business operations.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>N/A</p>
<p>4. Proposed Changes</p>	<p>In light of the above discussions, we consider that the Council should review the above Policy and its supporting text to clarify the following:</p> <ul style="list-style-type: none"> - Include information regarding setting out how the Council will calculate the price for offsetting carbon; - Provide further clarity in terms of where the cash in-lieu payment will be used.
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes * No</p>	<p>Yes</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	We believe that the Plan accords with the requirements of the relevant legislation.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes
Please give reasons for your answer	We acknowledge that developments should not lead to adverse effects on pollution of the environment however we do not support the requirement in points e and f of the draft policy with regard to tranquility, light spill and glare. These requirements may result in additional technical work for planning applications, in particular small-scale minor developments, which could add unnecessary additional costs and delays thus impacting the viability of development. In addition, the requirement to preserve tranquility of sites is reflective of the policy requirements in the AONB, as set out in draft Policy SP2. This is considered to be extremely onerous for development proposals outside of this protected landscape. We therefore suggest that points e and f in this draft policy are deleted.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	We believe that the Plan sufficiently addresses strategic planning issues relevant to the area.
4. Proposed Changes	We therefore suggest that points e and f in this draft policy are deleted.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	N/A
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

Please give reasons for your answer	<p>I support the inclusion of obtrusive light in Policy DM5 on Environmental Nuisance and Pollution Control. The ILP Guidance note on 'Reduction of Obtrusive Light' is an appropriate and proportionate technical basis for this policy.</p> <p>My reservation is the absence of any guidance on the which Zone in Table 6 "ILP environmental zone for exterior lighting control" applies to different parts of West Berkshire. This will make the determination of this planning application somewhat subjective, and therefore open to challenge.</p> <p>It could be a substantial task to develop a definition that is applicable to all locations in West Berkshire, but it may be feasible to make a definition that is applicable to the great majority of applications, especially outside the AONB. For example:</p> <p>E4, Urban: Business districts of Newbury and Thatcham</p> <p>E3, Suburban: Within those settlement boundaries or areas of employment land that are outside the AONB</p> <p>E2: Remainder of the area outside the AONB</p> <p>Within the AONB: decided on a case-by-case basis.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	N/A
4. Proposed Changes	West Berkshire Council should consider providing guidance on which environmental zone for exterior lighting control is applicable to different parts of West Berkshire, either in this Policy or an SPD.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	If it would assist the examination.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	Regarding the Spatial Strategy, a Strategic Environmental Assessment (SEA) has been carried out, as part of the Local Plan appraisal process to promote sustainable environmental considerations in the preparation of the local plan.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is	

<p>consistent with achieving sustainable development.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>We previously stated that there should be a policy requiring robust evidence regarding investigation and remedial measures to prevent discharge to groundwater aquifers through land affected by contamination. We have reviewed Policy DM5 Environmental Nuisance and Pollution Control and some texts should be included in the policy to ensure that ground and surface waters are protected from pollution as required by national policy- NPPF section 15.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	Yes
<p>Please give reasons for your answer</p>	<p>The Council (Under Section 33A of the Planning and Compulsory Purchase Act) in its Duty to Cooperate with other prescribed bodies/key agencies when preparing the LPR in order to address strategic planning issues relevant to their areas has engaged generally with the Environment Agency during the Plan making process.</p>
<p>4. Proposed Changes</p>	<p>We previously stated that there should be a policy requiring robust evidence regarding investigation and remedial measures to prevent discharge to groundwater aquifers through land affected by contamination. We have reviewed Policy DM5 and section 10.49 of the justification notes for policy DM5 it states; “<i>To this end, appropriate conditions may be imposed requiring certain remedial measures prior to construction or appropriate design and wastewater management schemes.</i>”</p> <p>Whilst this is satisfactory, we suggest the following wording instead of the current wording; (changes in red):<u>[underlined]</u></p> <p><i>‘To this end, appropriate conditions may be imposed requiring certain remedial measures prior to construction <u>and or appropriate design of and</u> wastewater <u>and surface water run-off</u> management schemes.’</i></p> <p>This is to ensure all sensitive water resources and controlled waters are protected which is consistent with paragraphs 170 and 178 of the NPPF. Secondly Section 1.23 provides details regarding evidence base which supports the policies in the local plan. We note that there is no information on groundwater protection needs within the Evidence Base. The Evidence Base includes the Brownfield Register which gives an indication of where the land has been used for activities that may have caused contamination of the land. However, information on details/assessments prepared to protect associated groundwater resources is also required and whilst an assessment has not been carried out, it is important to ensure through policy that ground and surface waters are protected from pollution. This is due to high risks to groundwater quality within West Berkshire, particularly given the River Lambourn Nutrient Neutrality Zone. Also a Chalk stream, the River Lambourn and tributaries are highly dependent on groundwater</p>
<p>5. Independent Examination - If your representation is seeking a</p>	Yes

<p>change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	
<p>5. Independent Examination</p>	<p>We wish to attend the examination for an opportunity to explain the need for sensitive water resources and controlled waters to be protected which is consistent with national policy.</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes</p> <p>* No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes</p> <p>* No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes</p> <p>* No</p>	<p>Yes</p>

<p>Please give reasons for your answer</p>	<p>West Berkshire Local Plan Review to 2039 – Regulation 19 Proposed Submission Consultation</p> <p>We write on behalf of our client Green Park Reading No.1 LLP, which is the owner of Green Park. Green Park Reading No.1 LLP (“GPR”) is ultimately wholly owned by Mapletree Investments Pte Ltd (“Mapletree”). This response relates to the Regulation 19 Proposed Submission Consultation of the West Berkshire Local Plan Review (“the LPR”), which is open for comment until 3 March 2023. Deloitte previously responded to two Regulation 18 Consultations on behalf of GPR on 21 December 2018 and 5 February 2021.</p> <p>In writing this letter, we do so under the statutory provisions of a Regulation 19 consultation under the Town and Country Planning (Local Planning) (England) Regulations 2012.</p> <p>Background to Green Park</p> <p>Since acquiring GPR in 2016, Mapletree has been reviewing the Park’s potential, undertaking asset management and considering future opportunities. GPR is keen to support the Council in achieving sustainable development in the Borough.</p> <p>Green Park is a premier business park located in the Thames Valley area, serving the office needs of Reading, Wokingham and West Berkshire. It is situated on the border of the three local authority areas, covering a 79-hectare plot offering high quality office stock and associated amenities, located around a central body of water.</p> <p>Green Park is accessed from the A33 relief road and is located south of Reading town centre. The Park is home to a variety of office occupiers across a range of business sectors. A range of business accommodation is provided, ranging from larger corporate headquarter floorplates to smaller business start-up areas.</p> <p>The Park continues to be highly successful with ongoing interest from both global and smaller companies for office space. In 2016/17, Aukett Swanke undertook a refresh of the Fosters masterplan prepared in 1998 in order to update the development potential of the Park. Mapletree continue to look for opportunities to respond to market demand and manage the planned growth of the Park in a sustainable way. Securing an allocation for employment uses on land at 900 South Oak Way forms part of this ambition (referred to hereafter as the Site (see Figure 1 below)).</p> <p><i>[See attached map - Deloitte obo Green Park Reading_Figure 1]</i></p> <p>Previous Response to Regulation 18 Draft Local Plan</p> <p>On behalf of GPR, Deloitte submitted formal representations in response to the LBW Pre-Publication (Regulation 18) Draft Local Plan on 21 December 2018 and 5 February 2021. As part of the previous consultation, GPR proposed a series of changes, including the below:</p> <ul style="list-style-type: none"> • Requested that Green Park was included as a Designated Employment Area; • Requested an emphasis on the need for the continued enhancement of sustainable transport options and infrastructure, in particular the M4 corridor, which serves Green Park; • Requested support for Data Centres; and, • Requested clarification be added to Policy SP 4 that although the Office for Nuclear Regulation will be consulted, it is unlikely this will restrict non-residential development in the Detailed Emergency Planning Zone (DEPZ). <p>Local Plan Regulation 19 Response</p> <p><u>Policy DM6: Water Quality</u></p> <p>Policy DM6 requires proposals for built development to be <i>“at least 10 metres away from the top of the bank of the nearest watercourse or main river, providing or retaining a natural/semi-natural habitat buffer”</i>. GPR recognises the importance of protecting the quality and biodiversity of watercourses. However, a blanket buffer zone of 10 metres is restrictive to sustainable development and does not allow flexibility to promote high quality development that can enhance the biodiversity and quality of watercourses. GPR notes that in the supporting text there is a reference to the Strategic Flood Risk Assessment (2021) which states that no development should be within 10 metres from the top of a main river, but then recommends that this is applied to all watercourses.</p> <p>The majority of the built plots in Green Park are located close to Foudry Brook, with some, including 100 Longwater Avenue, close to this 10 metre distance. These have successfully mitigated any risk of flooding and have been found acceptable in planning terms. GPR therefore recommends that given the recognition that the requirement mostly applies to main rivers, additional flexibility is incorporated for smaller water bodies, especially where it can be demonstrated that flood risk can be adequately mitigated.</p> <p>Summary</p> <p>In summary, GPR welcomes the West Berkshire LPR and the published Regulation 19 document. However, GPR requests several modifications to the LPR as set out in this letter. In particular, GPR</p>

	requests that the identified Site is classified as a Designated Employment Area to reflect its existing uses and its existing allocation, and that additional guidance is given in relation to the consultation process and considerations for development located within a DEPZ.

Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	We have reviewed policy DM6 – Water Quality and additional wording and some amendments to the policy justification texts are required to ensure sensitive water resources and controlled waters are protected which is consistent with paragraphs 170 and 178 of the NPPF.
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	The Council (Under Section 33A of the Planning and Compulsory Purchase Act) in its Duty to Cooperate with other prescribed bodies/key agencies when preparing the LPR in order to address strategic planning issues relevant to their areas has engaged generally with the Environment Agency during the Plan making process.
<p>4. Proposed Changes</p>	<p>We suggest the following additional wording like that of section 10.59 to be included in the justification text of policy DM6.</p> <p><i>'Most foul water is removed from a development site by a mains sewer. However, where this is not the case, foul water is usually treated on site and then discharged either to ground to filter away from the site, or into a nearby watercourse. If the treated water is discharge to ground, it has the potential to impact on water quality sensitive features, particularly by increasing the already high nitrate concentrations. The Environment Agency's publication 'General binding rules: small sewage discharge to groundwater (2021) stipulates that the general binding rules can only be met if the discharge is less than 2 cubic metres per day and via a shallow drainage field located, designed, and constructed in line with the recommendations in British Standard BS 6297:2007. If it is identified that a planning application could affect groundwater, the potential impact on water quality will need to be investigated and include a mitigation strategy which demonstrates how the applicant will reduce the negative effects of their proposal and show how they will implement risk reduction measures.'</i></p> <p>An alteration of the wording of the penultimate bullet point is required since contaminated land has a specific meaning in legislation. We suggest the following:</p> <p><i>works to restore <u>land contamination</u> contaminated-land where applicable;</i></p> <p>This is to ensure sensitive water resources and controlled waters are protected which is consistent with paragraphs 170 and 178 of the NPPF.</p> <p>In support of the above point made, we are pleased to see in section 10.62 of Policy DM6, Water quality the inclusion of the following text as requested previously; <i>"Developments should allow sufficient shallow drainage areas if infiltration is to be used. The use of deep soakaways for infiltration (e.g. boreholes) are not a recognised SUDS solution and may be refused a permit. This is to protect groundwater quality."</i></p> <p>We mentioned previously that the SSSIs and SAC designations need extra standards of Common Standards Monitoring (CSM), which sets higher standards than WFD for water quality. This has not been mentioned in the plan. We ask that this is included/added in the plan to ensure the designated areas meet the higher water quality standards which are set compared the Water Framework Directive. The River Kennet Site of Special Scientific Interest (SSSI), the River Lambourn SSSI and Special Area of Conservation (SAC) and a number of SSSI and SAC wetland habitats within the Kennet floodplain are globally important chalk streams.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	Yes

5. Independent Examination	We wish to attend the examination for an opportunity to explain the need for these sensitive water resources and controlled waters in West Berkshire to protected which is consistent with paragraphs 170 and 178 of the NPPF.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	Regarding the Spatial Strategy, a Strategic Environmental Assessment (SEA) has been carried out, as part of the Local Plan appraisal process to promote sustainable environmental considerations in the preparation of the local plan.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	

<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>We stated in our response at the regulation 18 consultation that a standalone water course policy should be included in this local plan. This is to provide more protection for the water environment in West Berkshire as required by NPPF Section 15. This is particularly important given the nationally and internationally protected sites that includes the River Kennet Site of Special Scientific Interest (SSSI), the River Lambourn SSSI and Special Area of Conservation (SAC) and a number of SSSI and SAC wetland habitats within the Kennet floodplain.</p> <p>There are some nearby local authorities which have specific wording protecting water bodies such as the below which we refer the LPA to, to assist in drafting a watercourse protection policy.</p> <ul style="list-style-type: none"> • South Oxfordshire Local Plan 2011 – 2035: adopted Dec 2020 (Particularly Policy ENV4: Watercourses) SODC-LP2035-Publication-Feb-2021.pdf (southoxon.gov.uk) • Vale of Aylesbury Local Plan (VALP) 2013 – 2033: adopted September 2021. Particularly Policy NE2: River and Stream Corridors Vale of Aylesbury Local Plan (VALP) (buckinghamshire-gov-uk.s3.amazonaws.com)
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>The Council (Under Section 33A of the Planning and Compulsory Purchase Act) in its Duty to Cooperate with other prescribed bodies/key agencies when preparing the LPR in order to address strategic planning issues relevant to their areas has engaged generally with the Environment Agency during the Plan making process.</p>
<p>4. Proposed Changes</p>	<p>We have referred the LPA to some good examples polices to assist with drafting a watercourse protection policy. We are happy to work with the LPA to write this policy. The below should be considered when this policy is being written.</p> <p>Any development which contains or is adjacent to a watercourse need to provide a buffer zone of at least 10 metres, measured from the top of the bank. This buffer zone needs to be provided on both sides of any watercourse. There is a particularly important need for this in this area as there is several protected sites in West Berkshire local authority. Only in exceptional circumstances such as urbanisation where, providing a 10 m buffer may be challenging should a smaller buffer be negotiated and be permitted if there is sufficient biodiversity enhancement, and a plan is agreed with the local planning authority. Otherwise, and as a last resort, biodiversity net gain will need to be provided off-site.</p> <p>This buffer zone should be planted with native species of plants and be free from any type of development, including parking spaces and domestic gardens. There should be a plan provided of how the buffer zone will be maintained for the short, medium and long term. This should be in the form of a Construction Environment Management Plan which should be agreed with the local planning authority before commencement of development.</p> <p>The above is important because buffer zones provide habitat and an ecological corridor for species to be able to move between habitats with ease, as well as contributing to biodiversity net gain. Buffer zones allow rivers to go through natural processes such as erosion and deposition of material, which also contributes to the promotion of natural processes of the watercourse.</p>

	Options to de-culvert watercourses should be actively pursued. Culverting has a significant impact on the ecology of the watercourse. Planning permission will only be granted for proposals which do not involve culverting of watercourses, and which do no prejudice future opportunities for de-culverting.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	We wish to attend the examination for an opportunity to explain the need for a stand-alone watercourse protection policy due to the unique nature of the water environment - (includes the River Kennet Site of Special Scientific Interest (SSSI), the River Lambourn SSSI and Special Area of Conservation (SAC) and a number of SSSI and SAC wetland habitats) in West Berkshire.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>We do not regard it as justified to apply a safeguarding provision to land owned by the Town and Manor of Hungerford charity, without prior consultation and despite the existence of a more suitable alternative site for future upgrades to the Waste Water Treatment Works at Hungerford.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>The Proposed Submission states that “land adjacent to the Hungerford Waste Water Treatment Works (as shown on the plan below), will need to be safeguarded to enable upgrades to the Waste Water Treatment Works to serve future growth” We do not regard this proposal as “sound” for the reasons given below. <for map see attachment></p> <p>The land in question is owned by the Town and Manor of Hungerford and has ancient Commoners’ rights dating back many centuries. It is one of the few parking areas on Hungerford Common and is widely used by walkers and fishermen including members of the Hungerford Canal Angling Association. It is also used by organisations running events on the Common, by contractors working for Thames Water and by Network Rail who have a licence to use it for track access and parking.</p> <p>The Town and Manor owns a parcel of land to the east of the Sewerage Works as outlined in red on the plan below, which we suggest would be far more suitable for safeguarding and future expansion of the Works. This land is not used by the general public, is larger and is only accessible via the Sewerage Works. It is already licensed on an annual basis to Thames Water. The land has no agricultural value and may well be categorised as “brownfield”, having been the site of the town rubbish dump in past centuries. <For map see attachment></p> <p>We request that reference to our car park being identified for safeguarding by the West Berkshire Phase 2 Water Cycle Study (2021) be removed and replaced by reference to our alternative site and with a reviewed plan showing the eastern site.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	We believe that the Plan accords with the requirements of the relevant legislation.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.	Yes

* Yes * No	
Please give reasons for your answer	With regard to the requirement in point b of the draft policy which references making efficient use of water through recycling measures, grey water recycling would likely to result in an average additional cost of £4,000 per plot for houses and £3,000 per plot for apartments as well as additional future maintenance and management costs. This could become unviable for certain developments whereas rainwater harvesting is easily achievable without any significant additional costs and typically forms part of SUDS scheme. We therefore suggest that point b is amended to state "measures such as rainwater harvesting and where feasible, grey water recycling".
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	We believe that the Plan sufficiently addresses strategic planning issues relevant to the area. In regard to the second requirement under point A in part 1, the equal to or less than 15 kWh/m2/ year space heat demand target is unachievable. This would likely require different methods of construction to achieve this target which would ultimately result in additional costs that could impact development viability. We therefore suggest that this second point is deleted.
4. Proposed Changes	We therefore suggest that point b is amended to state "measures such as rainwater harvesting and where feasible, grey water recycling".
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	N/A
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
Please give reasons for your answer	<p>We generally support Policy DM7 as it is in line with our previous consultation responses. However, we think it should be improved in line with the following detailed comments:</p> <p>Water Efficiency</p> <p>Policy DM7 in relation to water efficiency is supported in principle, but needs to be strengthened to ensure the water efficiency standard of 110 litres per person per day is met.</p> <p>The Environment Agency has designated the Thames Water region to be an area of "serious water stress" which reflects the extent to which available water resources are used. Future pressures on water resources will continue to increase and key factors are population growth and climate change. On average our customers each use 30% more water than they did 30 years ago. Therefore water efficiency measures employed in new development are an important tool to help us sustain water supplies for the long term.</p> <p>Water conservation and climate change is a vitally important issue to the water industry. Not only is it expected to have an impact on the availability of raw water for treatment but also the demand from customers for potable (drinking) water. Therefore, Thames Water support the mains water consumption target of 110 litres per head per day (105 litres per head per day plus an allowance of 5 litres per head per day for gardens) as set out in the NPPG (Paragraph: 014 Reference ID: 56-014-20150327) and support the inclusion of this requirement in Policy.</p>

Thames Water promote water efficiency and have a number of water efficiency campaigns which aim to encourage their customers to save water at local levels. Further details are available on our website via the following link:

<https://www.thameswater.co.uk/Be-water-smart>

It is our understanding that the water efficiency standards of 110 litres per person per day is only applied through the building regulations where there is a planning condition requiring this standard (as set out at paragraph 2.8 of Part G2 of the Building Regulations). As the Thames Water area is defined as water stressed it is considered that such a condition should be attached as standard to all planning approvals for new residential development in order to help ensure that the standard is effectively delivered through the building regulations. We therefore support Policy DM7 in referring the use of planning conditions. However, clarification should be provided in relation to the preferred 'Fittings Approach'.

Within Part G of Building Regulations, the 110 litres/person/day level can be achieved through either the 'Calculation Method' or the 'Fittings Approach' (Table 2.2). The Fittings Approach provides clear flow-rate and volume performance metrics for each water using device / fitting in new dwellings. Thames Water considers the Fittings Approach, as outlined in Table 2.2 of Part G, increases the confidence that water efficient devices will be installed in the new dwelling. Insight from our smart water metering programme shows that household built to the 110 litres/person/day level using the Calculation Method, did not achieve the intended water performance levels.

We therefore consider that text in the policy should be amended as set out below.

Water and Wastewater Infrastructure

We support the policy DM7 in principle.

Water and wastewater infrastructure is essential to any development. Failure to ensure that any required upgrades to the infrastructure network are delivered alongside development could result in adverse impacts in the form of internal and external sewer flooding and pollution of land and water courses and/or low water pressure.

A key sustainability objective for the preparation of Local Plans and Neighbourhood Plans should be for new development to be co-ordinated with the infrastructure it demands and to take into account the capacity of existing infrastructure. Paragraph 20 of the revised National Planning Policy Framework (NPPF), 2021, states: "*Strategic policies should set out an overall strategy for the pattern, scale and quality of development, and make sufficient provision for... infrastructure for waste management, water supply, wastewater...*"

Paragraph 11 states: "*Plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that:*

a) All plans should promote a sustainable pattern of development that seeks to: meet the development needs of their area; align growth and infrastructure; improve the environment; mitigate climate change (including by making effective use of land in urban areas) and adapt to its effects"

Paragraph 28 relates to non-strategic policies and states: "*Non-strategic policies should be used by local planning authorities and communities to set out more detailed policies for specific areas, neighbourhoods or types of development. This can include allocating sites, the provision of infrastructure...*"

Paragraph 26 of the revised NPPF goes on to state: "*Effective and on-going joint working between strategic policy-making authorities and relevant bodies is integral to the production of a positively prepared and justified strategy. In particular, joint working should help to determine where additional infrastructure is necessary...."*

The web based National Planning Practice Guidance (NPPG) includes a section on 'water supply, wastewater and water quality' and sets out that Local Plans should be the focus for ensuring that investment plans of water and sewerage/wastewater companies align with development needs. The introduction to this section also sets out that "*Adequate water and wastewater infrastructure is needed to support sustainable development"* (Paragraph: 001, Reference ID: 34-001-20140306).

It is important to consider the net increase in water and wastewater demand to serve the development and also any impact that developments may have off site, further down the network. The new Local Plan should therefore seek to ensure that there is adequate water and wastewater infrastructure to serve all new developments. Thames Water will work with developers and local authorities to ensure that any necessary infrastructure reinforcement is delivered ahead of the occupation of development. Where there are infrastructure constraints, it is important not to under estimate the time required to deliver necessary infrastructure. For example: local network upgrades take around 18 months and Sewage Treatment & Water Treatment Works upgrades can take 3-5 years.

Supporting paragraph 10.70 indicates that developers will be expected to fund network upgrades – this requires clarification. The provision of water treatment (both wastewater treatment and water supply) is met by Thames Water's asset plans and from the 1st April 2018 network improvements will be from infrastructure charges per new dwelling.

As from 1st April 2018, the way Thames Water and all other water and wastewater companies charge for new connections has changed. The changes mean that more of Thames Water's charges will be fixed and published, rather than provided on application, enabling you to estimate your costs without needing to contact us. The services affected include new water connections, lateral drain connections, water mains and sewers (requisitions), traffic management costs, income offsetting and infrastructure charges. Paragraph 10.70 should therefore be amended accordingly.

Information on how off site network reinforcement is funded can be found here

<https://developers.thameswater.co.uk/New-connection-charging>

Thames Water therefore recommends that developers engage with them at the earliest opportunity (in line with paragraph 26 of the revised NPPF) to establish the following:

- The developments demand for water supply and network infrastructure both on and off site;
- The developments demand for Sewage/Wastewater Treatment and network infrastructure both on and off site and can it be met; and
- The surface water drainage requirements and flood risk of the development both on and off site and can it be met.

Thames Water offer a free Pre-Planning service which confirms if capacity exists to serve the development or if upgrades are required for potable water, waste water and surface water requirements. Details on Thames Water's free pre planning service are available at:

<https://www.thameswater.co.uk/developers/>

[larger-scale-developments/planning-your-development/](https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/)

[water-and-wastewater-capacity](https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity)

In light of the above comments and Government guidance we consider that the New Local Plan should include a specific policy on the key issue of the provision of water and sewerage/wastewater infrastructure to service development. This is necessary because it will not be possible to identify all of the water/sewerage infrastructure required over the plan period due to the way water companies are regulated and plan in 5 year periods (Asset Management Plans or AMPs). We therefore recommend Policy DM7 is amended as set out below.

Local Authorities should also consider both the requirements of the utilities for land to enable them to meet the demands that will be placed upon them. This is necessary because it will not be possible to identify all the water and wastewater/sewerage infrastructure required over the plan period due to the way water companies are regulated and plan in 5 year periods (AMPs). Thames Water are currently in AMP7 which covers the period from 1st April 2020 to 31st March 2025. AMP8 will cover the period from 1st April 2025 to 31st March 2030. The Price Review, whereby the water companies' AMP8 Business Plan will be agreed with Ofwat during 2024.

Hence, a further text should be added to Policy DM7 as set out below.

Development within the vicinity of Sewage Treatment Works (STW)

The new Local Plan should assess impact of any development within the vicinity of existing sewage treatment works (STW) in line with the Agent of Change principle set out in the NPPF.

Where development is being proposed within 800m of a sewage treatment works, the developer or local authority should liaise with Thames Water to consider whether an odour impact assessment is required as part of the promotion of the site and potential planning application submission. The odour impact assessment would determine whether the proposed development would result in adverse amenity impact for new occupiers, as those new occupiers would be located in closer proximity to a sewage treatment works.

Paragraph 174 of the NPPF, February 2021, sets out that: "Planning policies and decisions should contribute to and enhance the natural and local environment by: ...e) preventing new and existing development from contributing to, being put at unacceptable risk from, or being adversely affected by, unacceptable levels of soil, air, water or noise pollution or land instability. Development should, wherever possible, help to improve local environmental conditions such as air and water quality, taking into account relevant information such as river basin management plans..."

Paragraph 185 goes on to state: "Planning policies and decisions should also ensure that new development is appropriate for its location taking into account the likely effects (including cumulative effects) of pollution

	<p>on health, living conditions and the natural environment, as well as the potential sensitivity of the site or the wider area to impacts that could arise from the development....”</p> <p>The online PPG states at Paragraph: 005 Reference ID: 34-005-20140306 that: “Plan-making may need to consider: ...whether new development is appropriate near to sites used (or proposed) for water and wastewater infrastructure (for example, odour may be a concern).”</p> <p>The odour impact study would establish whether new resident’s amenity will be adversely affected by the sewage works and it would set the evidence to establish an appropriate amenity buffer.</p> <p>Hence, Policy DM7 should include reference in policy that development within the vicinity of existing sewage treatment works should be assessed in relation to impact on amenity in line with the Agent of Change as set out below.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p><i>Policy DM7</i> <i>Water Resources and Waste Water</i></p> <p><i>Development will be required to minimise water use and aim to be water-neutral as far as practicable by incorporating appropriate water efficiency and water recycling measures. A collaborative approach is encouraged between the Council, statutory agencies, water companies and site promoters / developers to promote innovation in water efficiency and re-use within and outside of dwellings and commercial buildings, including demand reduction to improve longer term water resilience. Liaison with other local authorities is expected where relevant.</i></p> <p><i>Development will be required to be designed to be water efficient and reduce water consumption. Refurbishments and other non-domestic development will be expected to meet BREEAM water-efficiency credits. All new residential developments (including replacement dwellings) will meet the Building Regulation optional higher water efficiency standard of 110 litres per person per day, using the ‘Fittings Approach’ in table 2.2 as set out in Building Regulations part G2. Planning conditions will be applied to new residential development to ensure that the water efficiency standards are met.</i></p> <p><i>New or replacement non-residential development of 1000sqm gross floor area or more will meet BREEAM ‘excellent’ standards for water consumption (with at least a 40% improvement in water consumption against the baseline performance of the building), unless demonstrated not to be practicable.</i></p> <p><i>Both of the above apply unless it can be demonstrated that it would not be feasible on technical or viability grounds. Where subsequent national standards exceed those set out above, the new national standards will be applied.</i></p> <p><i>Development proposals should satisfactorily demonstrate the following criteria:</i></p> <p><i>a. There is adequate water supply and waste water treatment infrastructure capacity resources are available, or can be provided, to support the development proposed at the time of occupation, and will be safeguarded from the potential impacts of development;</i></p> <p><i>b. Efficient use of water is made through recycling measures such as rainwater harvesting and grey water recycling;</i></p> <p><i>c. Foul water treatment and disposal of adequate design and capacity already exists or can be provided in time to serve the development ensuring that the environment and amenity of local residents are not adversely affected. Developers are encouraged to contact the water/waste water company as early as possible to discuss their development proposals and intended delivery programme to assist with identifying any potential water and wastewater network reinforcement requirements. Where there is a capacity constraint the Local Planning Authority will, where appropriate, apply phasing conditions to any approval to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of the relevant phase of development;</i></p> <p><i>d. Foul water flows produced by the development will be drained separately from surface water run off to a suitable point of connection to a public foul sewer or, for non mains drainage proposals, where there would be no detrimental impact on the environment;</i></p> <p><i>e. Suitable land and access is safeguarded for the maintenance and treatment of water resources and wastewater, flood defences and drainage infrastructure; and</i></p> <p><i>f. It will not adversely impact the water quality, ecological value or drainage function of water bodies in the District, including any adverse impacts on Source Protection Zones (SPZ).</i></p>

	<p>Development which would overload available facilities and create or exacerbate problems of flooding or pollution will not be permitted. Where upgrades to water supply and waste water are required consideration should be given to phasing the development so that the necessary infrastructure is in place.</p> <p>The West Berkshire Phase 2 Water Cycle Study (2021) identifies that land adjacent to the Hungerford Waste Water Treatment Works (as shown on the plan below), will need to be safeguarded to enable upgrades to the Waste Water Treatment Works to serve future growth.</p> <p><u>The development or expansion of other water supply or waste water facilities will normally be permitted, either where needed to serve existing or proposed development in accordance with the provisions of the Development Plan, or in the interests of long term water supply and waste water management, provided that the need for such facilities outweighs any adverse land use or environmental impact that any such adverse impact is minimised.</u></p> <p><u>When considering sensitive development, such as residential uses, close to a Sewage Treatment Works, a technical assessment should be undertaken by the developer or by the Council. The technical assessment should be undertaken in consultation with Thames Water. The technical assessment should confirm that either: (a) there is no adverse amenity impact on future occupiers of the proposed development or; (b) the development can be conditioned and mitigated to ensure that any potential for adverse amenity impact is avoided."</u></p> <p>-</p> <p>Supporting paragraph 10.70 indicates that developers will be expected to fund network upgrades – this requires clarification. The provision of water treatment (both wastewater treatment and water supply) is met by Thames Water's asset plans and from the 1st April 2018 network improvements will be from infrastructure charges per new dwelling.</p>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	N/A
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where	No

<p>practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>The policy admits that West Berkshire District is part of a “severely water stressed area” but accepts the Building Regulations reduced standard supply rate for new developments of 110l/p/d maximum as adequate.</p> <p>We are aware that other parts of the south and south east have adopted 100L/p/d as the standard, with 80L/p/d for strategic sites.</p> <p>We therefore believe that the Council needs to work with other statutory bodies (EA & Thames Water, also NE) and the building industry to demonstrate that this higher standard is appropriate as Local Plan policy for West Berkshire. This would help in several ways:</p> <ol style="list-style-type: none"> 1 Reduce waste water volumes; 2 Encourage grey water recycling, which could assist SUDS and reduce surface water network volumes; 3 Reduce the need for more reservoirs within the Thames Water severely stressed area; 4 Help protect chalk streams and aquifers from excess abstraction. <p>Failure to explore this would seem to show this policy is unsound in every sense.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>The fact that this has not been explored fully, and with Thames Water in particular, indicates a failure to exercise the Duty to Cooperate.</p>
<p>4. Proposed Changes</p>	<p>In the second paragraph of the policy, after “...Regulations G2.” Add this sentence:- “For strategic sites a higher standard of 80l/p/d will be sought.”</p> <p>In supporting text 10.69, after “Phase 2 (2021)” at end, add “, which recommended consideration of an even more stringent target, particularly for strategic sites.”</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	Yes
<p>5. Independent Examination</p>	<p>We strongly believe the JBA Stage 2 report needs following up and will be seeking to engage urgently with Thames Water and the development industry on this matter.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	N/A
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into	No

<p>account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>The West Berkshire Water Cycle Study – Phase 2, prepared by JBA Consulting states:</p> <p>“Both Water Resource Zones in the study area are classed as being under serious water stress – justifying the more stringent target of 110 l/p/d under building regulations.</p> <p>WBC may want to consider going further than the 110l/p/d water efficiency target particularly in larger strategic developments.</p> <p>Policies to reduce water demand from new developments, or to go further and achieve water neutrality in certain areas, could be defined to reduce the potential environmental impact of additional water abstractions in West Berkshire, and also help to achieve reductions in carbon emissions.”</p> <p><i>(The recommendation in the second sentence occurs in three places in the document, on pages 5, 21 and 87)</i></p> <p>This recommendation should have been considered as part of the Strategic Environmental Assessment. Policy DM7 in the draft Local Plan states:</p> <p>“All new residential developments (including replacement dwellings) will meet the Building Regulation optional higher water efficiency standard of 110 litres per person per day, as set out in Building Regulations part G2.”</p> <p>The assessment of this policy in the SA/SEA Environmental Report November 2022 states:</p> <p>“This is a new policy proposed for inclusion in the LPR. A Water Cycle Study (WCS) was carried out in response to comments made by the Environment Agency during the Regulation 18 consultation. The policy reflects the findings of the WCS, which highlights West Berkshire as are area of serious water stress. No other alternatives have been considered. A summary of the SA/SEA of the policy wording is included in table x [sic] below.” <i>(our emphasis)</i></p> <p>The detailed assessment of Policy DM7 in Appendix 6 of the SA/SEA also makes no mention of the recommendation to consider going further than the 110l/p/d water efficiency target.</p> <p>Therefore, the recommendation of JBA Consulting in the Water Cycle Study has not been properly considered.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	N/A
<p>4. Proposed Changes</p>	<p>West Berkshire Council should undertake a proper environmental assessment of the target for water usage efficiency. Depending on the conclusions of that assessment, it should reduce the water efficiency target in Policy DM7.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	Yes

5. Independent Examination	<p>Thattham Town Council is the principal representative body of the community of Thattham, which is the location of only new strategic site allocation in the draft Local Plan. The suitability of this site for development is reliant on having adequate infrastructure. However, the regeneration that was promised in the current Local Plan has not materialised, and would not be delivered through the policies in the draft Local Plan. The Town Council can provide local insight to the examination about Thattham, and particularly on the substantial deficit of infrastructure in the locality. It would also be happy to elaborate on its other concerns about the current proposals for the North East Thattham Strategic Site Allocation, as described in these representations.</p> <p>The Town Council anticipates that changes necessary to the draft Local Plan in relation to site allocations are greater than could be addressed through 'main modifications'. If, however, the Inspector is minded to consider recommending 'main modifications' to policy SP17 and related matters in other Policies, it would welcome the opportunity to provide its perspective on what modifications would be required.</p>

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	Elements of the policy are unsound as the are inconsistent with national policy and unjustified. The HBF recognises that there will be a need for homes in water stressed areas to be built to higher optional standards. However, the Council should not be asking development to aim for water neutrality as outlined in the opening sentence of this policy. As the Council notes in order to achieve neutrality will require reductions in water use in other buildings across the Borough. This is not in the gift of the development industry to deliver but, as indicated in the policy, for the Council to work with other partners to achieve. We would therefore suggest that the "... and aims to be water neutral as far as practicable by incorporating appropriate water efficiency and water recycling measures" is deleted. We would also recommend that the opening paragraph of the policy is moved to the supporting text as it is more of an objective than a policy against which an application will be determined.

<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>We asked previously for the Chieveley, Hungerford and Newbury WWTW to be mentioned/included in the plan.</p> <p>The draft plan states that, these need to be upgraded as stated in section 10.71:</p> <p><i>"In order to allow for water and wastewater infrastructure delivery national planning guidance stipulates that phasing new development should be considered to ensure that the 'infrastructure will be in place <u>when and where needed</u>'. As the Water Cycle Study (Phase 2) (2021) is showing the need for upgrades it may be necessary for development to be phased in West Berkshire to allow for the delivery of this infrastructure."</i></p> <p>However further details such as the timeline and approach to ensure these improvements meet the needs of upcoming developments have not been provided. Developments proposed across the plan period should not outpace required wastewater infrastructure provision or improvements. Developments should not go ahead when there is no wastewater drainage infrastructure in place or when the existing infrastructure will still be exceeding their permit limit.</p> <p>The justification text in section 10.71 should therefore be amended to read;</p> <p><i>"In order to allow for water and wastewater infrastructure delivery national planning guidance stipulates that phasing new development should be considered to ensure that the 'infrastructure will be in place <u>when and where needed and provided through the timely provision of new, or the enhancement of existing necessary strategic and local infrastructure to ensure that infrastructure is in place and available prior to the occupation of all developments</u>.' As the Water Cycle Study (Phase 2) (2021) is showing the need for upgrades it may be necessary for development to be phased in West Berkshire to allow for the delivery of this infrastructure."</i></p> <p>Policy text 'a' of Policy DM7 should also be amended to read;</p> <p><i>'There is adequate water supply and wastewater treatment infrastructure capacity resources are available, or can be provided, to support the development proposed <u>at the time of occupation prior to the occupation of all developments</u>', and will be safeguarded from the potential impacts of development;'</i></p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	We believe that the Plan accords with the requirements of the relevant legislation.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	<p>Whilst we support the requirement for development to maintain, and where possible, improve air quality, we do not support point iii of this draft policy which requires an Air Quality Assessment for developments involving more than 100 parking spaces outside of an AQMA or 50 spaces within or close to an AQMA. Given the Council's current and proposed parking standards, this requirement generally would apply to developments of a minimum of circa 30 units with 100 parking spaces or a minimum of circa 20 units with 50 parking spaces, subject to housing mix.</p> <p>Government guidance states that air quality impacts may need to be considered for developments that would, inter alia, lead to changes in vehicle-related emissions in the immediate vicinity of the development or further afield. We do not agree that it could be reasonably said that developments of this size could result in significant changes in vehicle-related emissions as to justify the requirement for an air quality assessment based on parking provision only. We therefore suggest that point ii of this policy is deleted.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	We believe that the Plan sufficiently addresses strategic planning issues relevant to the area.
<p>4. Proposed Changes</p>	We therefore suggest that point ii of this policy is deleted.
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	No
<p>5. Independent Examination</p>	N/A

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	SP16 is in conflict with DM8 para e. e) It does not expose occupiers who are particularly sensitive to air pollution, such as those in schools, health care establishments or housing for older people; By changing the sustainable transport link via Warren Road to a main access route, vulnerable users will be subjected to additional air pollution. In particular PM2.5 which is now linked to major health and

	development issues in young people. With 2 schools and 2 churches in this area already, and additional school planned, this seem both counter intuitive and irresponsible.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	
4. Proposed Changes	Warren Road should remain a green link to SP16 development.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>Please give reasons for your answer</p>	<p>10.12 Critical need to address inaction regarding WBC's core strategy, carbon reduction</p> <p>An urgent Air Quality improvement plan is a critical outage from the LPR 2037. Carbon reduction is a key issue for West Berkshire since it was introduced as a Core Strategy in 2016 to deliver carbon neutral development. Despite a reduction in CO2 emissions 2005, emissions are 3 times higher than national England and 4 times worse than rest of Berkshire and South East. Yet, there is no specific action plan to address the Climate Emergency facing us.</p> <p>[See attached Table]</p> <p>The LPR 2037 should have been the perfect opportunity to set out actions to remedy this. Without a specific plan to do this, West Berkshire's 15-year growth ambitions for housing, office and industry will simply worsen an already dangerous situation.</p> <p>Your own consultants highlight road traffic emissions as the primary cause. It is unacceptable WBC Highways bases its transport thinking with traffic surveys that are six-year-old! ATC road strip surveys which monitor volume, vehicle type and speed are low in cost and can be produced in a matter of weeks. This data collection and planning inaction is unacceptable. The continuing problem of unchecked and growing traffic pollution will impact on everyone and will derail West Berkshire's vision to make this a place people want to live in, work from and invest in.</p> <p>While cycling and walking are to be encouraged, since 90% of land area is rural, road vehicles are sadly the primary transport option for most rural communities of villages and small parishes given, a) the inadequate rural bus network which is underfunded and stretched, and b) outside Newbury, the rail network is small with timetables not attractive and conducive to greater use.</p>

<p>Please give reasons for your answer</p>	<p>The general tenor of SP9 is welcomed. A proposal to update the HEAP has been submitted to the Heritage Service, and a response is awaited.</p> <p>The value of each Conservation Area lies in direct proportion to the extent that a Conservation Area Appraisal has been prepared and approved for it. Little or no progress in this regard has taken place. If it is to be rectified, considerably more attention and time will be need to be allocated by the Council, in collaboration with the Heritage Forum, than has been apparent to date.</p> <p>The support of the Council in extending local listing under the agreement with the Heritage Forum is welcomed. This would be assisted by pointing local parish councils towards the Forum when issues are raised regarding planning permission or proposed developments which may impact on heritage assets.</p>

<p>Please give reasons for your answer</p>	<p>Policy DM9 on Conservation Areas is misleading and flawed (see 10.81 p. 220).</p> <p>West Berkshire Council has been repeating general assurances about Conservation Area Appraisals for many years, with little sign of progress. In the 1990 (<i>sic</i>) Local Plan (policy B.ENV.6), WBC's predecessor Newbury District Council stated that "The District Council will encourage the preparation and implementation of schemes to preserve and enhance Conservation Areas." In this Local Plan WBC now says it is undertaking a "phased programme of Conservation Area Appraisals." What has actually happened for the 53 CAs across West Berkshire (mostly created in the 1970s and 1980s), is that 51 of them have never had Appraisals adopted.</p> <p>In 2010, two CAAs were adopted; and in the 13 years since then, no CAAs have been adopted, in spite of several documents being put forward from different parishes in the hope that these will encourage action from WBC. Of the six conservation areas in Newbury, created from 1971 onwards, none has ever received an Appraisal. In practice, despite its assurances, WBC is not following national policy on the creation of Appraisals, let alone on their regular review.</p> <p>Far from facilitating local involvement, as national policy indicates and the current draft Local Plan suggests, WBC has ignored or rejected approaches for nearly 20 years. Submissions from Newbury Town Council were made as long ago as 2006. Even in work on preparing the recent draft Appraisal for Newbury town centre, WBC deliberately excluded participation from Newbury Town Council and community groups such as The Newbury Society.</p> <p>The Conservation Area Working Group (named in this policy) has not met since March 2020. Its status is unclear (- Is it an informal group?), and it was not even notified by WBC about the Newbury town centre draft Appraisal, let alone consulted. In addition, any progress at all in WBC adopting CAAs was dependent upon the limited time of its conservation officer(s), yet over the past year this has been heavily cut, to effectively remove them from future involvement and to stall future efforts. A policy which consists of empty words, and can be demonstrated as such, cannot be considered sound, effective or consistent with national policy.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p>	Yes

* Yes	
* No	
Please give reasons for your answer	
4. Proposed Changes	In the light of 2. above, policy DM9 needs to be rewritten to put forward a clear and achievable policy for the preparation of some Conservation Area Appraisals for West Berkshire, referencing resources required. Heritage should be seen as one element of sustainability.

<p>Please give reasons for your answer</p>	<p>Para 10.81</p> <p>Our main concern regarding conservation areas in West Berkshire concerns the large number that do not have a CA Appraisal and, ideally, a Management Plan. To support further action on this, we suggest moving the text from paragraph 10.81 to the text supporting SP9 and adding relevant commitments to policy SP9.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	N/A
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? -	No

<p>Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>Most of the 53 CAs in the District were designated more than 30 years ago, yet the only two for which a CAA has been carried out and approved as Local Plan evidence are two of the most recently designated: Streatley & Peasemore. These are among the smallest and yet the CAAs were carried out immediately after they were first designated.</p> <p>This shows that the Council has not used any kind of systematic, evidence based or reasonable approach and has failed to carry out its statutory function cited in 10.80. Without a CAA it is very difficult for any LPA to “define what is special about a particular Conservation Area” and therefore to justify a claim that a particular development harms its character. This leads to a significant degree of uncertainty in the minds of all stakeholders in the planning process, adds to delays and costs and brings the process and the Plan itself into disrepute among the community.</p> <p>CAs are by definition the areas within settlements that far more people experience in their routine daily lives than other aspects of Heritage protection of which seems to have been given a much greater share of the Council’s resources over many decades.</p> <p>For these reasons, we believe the Plan is currently ineffective and not in accordance with national planning policy.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	N/A
<p>4. Proposed Changes</p>	<p>Nothing that can be added to the Plan itself can make this aspect of it sound. Until evidence is produced that some of the larger CAs will have CAAs made within a period of, say, five years, there can be no confidence that Policy DM9 will carry sufficient weight in decision making for developments within or affecting the setting of a CA. For example, Newbury Town Centre was designated a CA in 1971 and contains more Listed Buildings than any other in the District, but 50 years on its CAA has only this year been published for consultation.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	Yes
<p>5. Independent Examination</p>	To give examples of how lack of CAAs has impacted on development in central Newbury and details of what I know about how local policy and resourcing priorities have caused this.
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes * No</p>	Yes

6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.	

* Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	Paragraph 10.82 is incorrect. The loss of a building that does not make a positive contribution to the CA cannot, by definition, be considered harmful to it.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	<p>There should be a general cross reference to Policy SP9 to ensure that the public benefits approach in Conservation Areas is carried through.</p> <p>Bullet point g should be deleted. It sets out:</p> <p><i>g. to ensure it does not generate levels of traffic, parking or other environmental problems which would result in substantial harm to the character, appearance or significance of the area; and</i></p> <p>The use of the term substantial harm is confusing, as these factors would be unlikely to result in a level of harm of that nature.</p> <p>The section on demolition of positive contributors should have another bullet point added to be consistent with the general approach in the NPPF:</p> <p><i>iii. OR The proposed development generates planning benefits that outweigh the harm arising from its loss in accordance with paras 201 or 202 of the NPPF as appropriate</i></p> <p>Paragraph 10.82 is incorrect. The loss of a building that does not make a positive contribution to the CA cannot, by definition, be considered harmful to it.</p>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes

Please give reasons for your answer	Support
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer

<p>1. Do you consider the Local Plan Review is legally compliant? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>The following policy text conflicts with the approach set out in SP9 and the NPPF: <i>Development will not be permitted if it would:</i> <i>i. Adversely affect the character, scale, proportion, design, detailing, or materials used in the Listed Building; or</i> <i>ii. Result in the loss of/or irreversible change to original features or other features of importance or interest; or</i> <i>iii. Harm the setting of the Listed Building.</i></p> <p>This is because it does not allow for the application of paras 201 or 202 of the NPPF or the approach in SP9. It simply says 'will not be permitted'. This requires a binary assessment and does not allow a balanced judgement, as required by the NPPF and SP9.</p> <p>Similarly, the paragraphs that follow set out a series of tests under which the council will permit development:</p> <p><i>Unless justified to the satisfaction of the Council, that the proposed changes, loss or irreversible damage, and/or addition of new features to the Listed Building and its setting are:</i></p> <ul style="list-style-type: none"> • <i>Less than substantial in terms of impact/harm on the character and significance of the Listed Building and its setting; and</i> • <i>Is off-set by the public benefit from making the changes, including enabling optimal viable use, and net enhancement to the Listed Building and its setting. Clear justification for this harm should be set out in full in the Statement of Heritage Significance accompanying the proposals.</i>

	<p>This element of the policy conflicts with the NPPF, relevant NPPGs and all heritage guidance. The reference to public benefits is superfluous as SP9 and the NPPF already set this out, and here it introduces yet more tests. It is not necessary according to the NPPF or statutory provision to result in a net enhancement, and this too is a direct conflict with SP9 and the NPPF -if the impact needs to be net beneficial, then there would not be any harm, and this limb of the policy would not be engaged.</p> <p>If, on the other hand, what this part of the policy is trying to say is that harm to a LB (including by its setting) can be offset by net enhancements, then this is a confusing way of setting this out, and should be worded a clearer fashion.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>The following wording (in bold) should be added to Policy DM10: <i>Development will not be permitted if applicants fail to provide adequate or accurate detailed information to show the effect on the significance and architectural and historic interest of the Listed Building and/or the contribution made by its setting and any curtilage listed features</i></p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	
<p>5. Independent Examination</p>	
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No</p>

<p>Please give reasons for your answer</p>	<p>The general tenor of SP9 is welcomed. A proposal to update the HEAP has been submitted to the Heritage Service, and a response is awaited.</p> <p>The value of each Conservation Area lies in direct proportion to the extent that a Conservation Area Appraisal has been prepared and approved for it. Little or no progress in this regard has taken place. If it is to be rectified, considerably more attention and time will be need to be allocated by the Council, in collaboration with the Heritage Forum, than has been apparent to date.</p> <p>The support of the Council in extending local listing under the agreement with the Heritage Forum is welcomed. This would be assisted by pointing local parish councils towards the Forum when issues are raised regarding planning permission or proposed developments which may impact on heritage assets.</p>

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	<p>We note that this Policy states that proposals affecting non-designated heritage assets will be determined in accordance with Policy SP9. As set out in our comments to Policy SP9, we consider that this policy does not meet the test of soundness because it is not consistent with national policy, insofar as it affords the same level of protection to both designated and non-designated heritage assets.</p> <p>The NPPF is clear in stating that the proposals affecting non-designated assets will be subject to a balanced judgement having regard to the scale of any harm or loss (paragraph 200):</p>

	<p><i>The effect of an application on the significance of a non-designated heritage asset should be taken into account in determining the application. In weighing applications that directly or indirectly affect non-designated heritage assets, a balanced judgement will be required having regard to the scale of any harm or loss and the significance of the heritage asset.</i></p> <p>We note that point c makes reference to a number of characteristics that developments should satisfy. However, we draw attention to para 200 of the NPPF, which does not state that regard should be paid to the setting of non-designated heritage assets when assessing proposals that may affect them.</p> <p>On the basis of the above discussions, we consider that Policy DM11 is not consistent with the NPPF, as it is more stringent than para 200 of the NPPF.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	N/A
<p>4. Proposed Changes</p>	<p>We therefore recommend that Policy DM11 is revised as detailed below (additions shown <u>underlined</u> deletions shown with a strikethrough).</p> <p>Proposals for development affecting buildings, monuments, sites, places, areas or landscapes identified as being non-designated heritage assets will be determined in accordance with Policy SP9. Proposals should satisfy all of the following criteria <u>where appropriate</u>:</p> <p>a. Demonstrate a clear understanding of the significance of the asset and/or its setting, alongside an assessment of the potential impact of the proposal on that significance;</p> <p>b. Be undertaken in a sympathetic manner using <u>appropriate</u> high-quality design; and</p> <p>c. Have particular regard to all of the following characteristics, depending on the type of asset affected:</p> <p>i. Its historic character and appearance;</p> <p>ii. Its scale, proportion, design, historic fabric, detailing and materials;</p> <p>iii. Ensuring there is no unacceptable level of loss, damage or covering of original features;</p> <p>iv. The layout, boundary features and setting of the asset, including key views into, through or out of it;</p> <p>v. Ensuring development is appropriate and sympathetic to its setting in terms of height, massing, density, materials and night and day visibility;</p> <p>vi. The conservation of both human-made and natural features of architectural, archaeological, artistic and historic interest within it and the requirement to record such features on the Historic Environment Record;</p> <p>vii. Its biodiversity interest;</p> <p>viii. Any disturbance which could harm its archaeological potential;</p> <p>ix. The integrity of the landscape;</p> <p>x. The cumulative impact of successive small scale changes; and</p> <p>xi. The enhancement of existing public access and interpretative opportunities.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes

Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable	Yes

development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	Policies supported
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>Please give reasons for your answer</p>	<p>The Berkshire Gardens Trust has a more active role than the draft LPR suggests. It has carried out a survey of historic public parks in Central and East Berkshire, and wishes to extend this to West Berkshire. The Heritage Forum, in consultation with the WBC Heritage Service, will pursue this.</p>

Please give reasons for your answer	Maintenance of the landscape will depend on the long term on the owners having both the income and the desire to do so. For major and public landscapes, this is straightforward. For small parcels of land attached to housing estates, diversified ownership is not likely to produce this result.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	A common policy for maintenance of all publically used landscape is needed.
5. Independent Examination - If your representation is seeking a change, do you consider it	

necessary to participate at the examination hearing session(s)? * Yes * No	
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No

Please give reasons for your answer	The Linear Park is not on the 'Register of Historic Parks and Gardens of Special Historic Interest in England'. However, the Park has been Awarded Green Flag status for more than 11 consecutive years and it should, therefore, be listed by the Council as a protected local asset.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer

<p>the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>See attachment 'Paula Saunderson - Full LPR Rep' for full consultation response. Comments on each chapter/policy can be found at the specific consultation point.</p> <p>DM12 – Registered Parks & Gardens – relates only to Historic sites and I find the correlation of the DM Policies not obvious and would rather see them collected under headings such as those in the Case Study.</p> <p>And Non-Delivery of the promises in the old CS18 was never monitored via the AMR as it mainly concentrated on Housing delivery and not ALL Policy delivery.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	<p>Thank you for the opportunity to comment on this plan. The Battlefields Trust would like to commend West Berkshire Council for developing a specific policy related to the registered and unregistered battlefields at Newbury.</p> <p>In the last paragraph of the policy, we wondered whether it might be possible to strengthen this by adding after the word 'assessment': 'using best practice methodology for investigating battlefields supervised by an archaeologist with prior experience of battlefield archaeology'.</p> <p>The Battlefields Trust would also like to see the statement in the supporting text section of policy DM13 (Registered Battlefields) strengthened so that the Battlefields Trust will be consulted (as a non-statutory consultee) in the event planning applications are made on the Newbury battlefield(s). At the moment the supporting text indicated the planning authority will consider consulting the Battlefields Trust.</p> <p>In para 10.114 we assume the second battle of Newbury (1644) will be considered under the policy relating to undesignated heritage assets (DM11). At the moment the text says that this policy is DM12 (which relates to Parks and Gardens), so this needs correcting.</p> <p>We wonder whether it might be possible to define the area of the second Newbury battlefield somewhere to assist developers in knowing which areas are included. The Battlefields Trust attempted to have this battlefield included in a Local Listing in 2014/15, but this was rejected by West Berkshire Heritage Forum because '...to do so would entail discussions and negotiations with the many landowners involved, for which the Heritage Forum has not the administrative or legal resources or the public standing. It could perhaps be undertaken by Historic England for national listing or West Berkshire Council for local listing.' Historic England rejected registering the battlefield in July 2020 on the grounds that the topographic integrity of the battlefield was lacking, though it acknowledged that 'there are still disparate parts of the battlefield that are undeveloped'. On this basis a Local Listing initiated by West Berkshire Council appears to be the best way to delineate the boundaries of the battlefield. The Battlefields Trust would be happy to work with West Berkshire Council in developing such a listing.</p> <p>Finally, the Battlefields Trust remains concerned about the impact permitted development can have on registered battlefields and wondered if you might consider applying an Article 4 direction to the registered area of the first Newbury (1643) battlefield? The Battlefields Trust has been working with Hinckley and Bosworth Council on developing a proportionate Article 4 direction for the Bosworth (1485) battlefield along the lines of: 'all development within relevant permitted development classes that are within the registered area need to be reviewed for archaeological impact and mitigation put in place if that is deemed necessary; and for any permitted development above a certain height (say 5m) needs to be considered as a normal planning application as it may have an impact on the battlefield setting.'</p>
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need	

<p>and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>

Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by	

<p>the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>The 1644 Second Battle of Newbury was as historically significant as the 1643 First Battle, as it resulted directly in the formation of Cromwell's New Model Army, with which he was able to win the Civil War. The site of the Second Battle is therefore as deserving of being designated a Registered Battlefield as the site of the First Battle. Unfortunately, the more extensive development of the Second Battle site, which is currently unprotected, has prevented this happening.</p> <p>The Heritage Forum would be happy to work with the Council to at least locally list the site of the Second Battle, in collaboration with the Battlefields Trust, which will require legal support which only the Council has available.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	
<p>5. Independent Examination</p>	
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes</p> <p>* No</p>	
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes</p> <p>* No</p>	
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes</p> <p>* No</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	We believe that the Plan accords with the requirements of the relevant legislation.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes
Please give reasons for your answer	In regard to the requirements for the planting of new trees, woodland and hedgerows, we do not agree with point c which introduces a requirement to use native species wherever possible. We are of the view that species selection should be determined by the location, character and purpose of the proposed planting and in certain locations, different species may be considered more appropriate, as set out in points a, b, d and e. We therefore suggest that point c of the requirements for new planting is deleted.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	We believe that the Plan sufficiently addresses strategic planning issues relevant to the area.
4. Proposed Changes	We therefore suggest that point c of the requirements for new planting is deleted.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	N/A
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes

Please give reasons for your answer	Sandleford Park West (SPW) The amendments to Policy DM15 – Trees, Woodland and Hedgerows are welcomed as they provide the flexibility for trees which are of a lower quality to be replaced, at an appropriate location and scale, to maximise the development potential of allocated and other sites.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	<p>Yes - the policy recognises that ancient woodland and related habitats are irreplaceable, in line with the NPPF.</p> <p>This is strengthened by the robust guidance in the supporting text in paras 10.1.33-10.1.37.</p> <p>Para 10.1.33 recognises the unique quality of ancient woodland</p> <p>Para 10.1.34 sets out a precautionary approach to determining the buffers required for ancient woodland</p> <p>Para 10.1.35 draws on Woodland Trust expert guidance to advise on the makeup of buffer zones</p> <p>Para 10.1.36 requires a detailed Ancient Woodland Nitrogen Impact Assessment for ammonia-emitting facilities</p> <p>Para 10.1.37 specifies that historic ancient wood pastures and historic parkland should be treated as ancient woodland, in line with the NPPF.</p> <p>Together, these represent a best practice approach to meeting the legal requirements for ancient woodland protection that the Woodland Trust strongly welcomes and endorses.</p>
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes
Please give reasons for your answer	Draft policy DM15 supports national policy on the protection of ancient woodland in the NPPF and the promotion of woodland cover as part of the Nature Recovery Network.

	<p>The Woodland Trust strongly welcomes the policy and the supporting text in paras 10.125 to 10.138 of the Local Plan review which combine to make the plan effective in support for national policy.</p> <p>We support the policy wording “use native species wherever appropriate” and the supporting text in para 10.126 “For new planting the use of UK and Ireland sourced and grown tree stock is encouraged.” This is important for tree health & biosecurity, in line with Government policy in the England Trees Action Plan and the GB Plant Biosecurity Strategy.</p> <p>As noted above, we support the policy to protect ancient woodland, strengthened by the robust guidance in the supporting text, paras 10.1.33-10.1.37.</p> <p>We support para 10.138 which commits to set an evidence-based tree canopy cover target for West Berkshire. This is an effective way to ensure that the Local Plan contributes to supporting national policy for Local Nature Recovery Strategies and the delivery of Biodiversity Net Gain.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes
Please give reasons for your answer	<p>The AMR 2022 (January 2023) (paragraph 1.14) notes that 'house prices in West Berkshire are high and the provision of affordable housing to meet local needs, particularly for young people and key workers, is one of the Council's priorities.' Accordingly, it is important that measures are taken to address this need. The general approach of draft LPR Policies DM15 and DM16, to support First Homes and rural exception housing adjacent to settlement boundaries, is therefore supported. This approach will also help to meet rural housing needs and enhance the vitality of rural communities in the District, in line with NPPF paragraph 79, and therefore it is important that a positive approach is taken to considering such schemes.</p> <p>It is welcomed that draft LPR Policies DM15 and DM16 include some allowance for a proportion of enabling market housing on entry-level exception schemes where appropriate (in line with the Written Ministerial Statement on First Homes and NPPF paragraph 78) which will help to support appropriate schemes to come forward and benefit rural communities.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan	

<p>provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>The importance of Biodiversity Net Gain and habitat restoration and creation within the Government's Environmental Improvement Plan Apex Goal – Improving Nature – as well as the contribution captured and sequestered carbon can make to West Berkshire's Net Zero plans, means Biodiversity should be a specific item within the Development Management Policies in the Local Plan. Biodiversity is referenced, but often simply in passing, within other sections. Given our Government's high commitment to leaving the environment in a better state than we found it, and the Government's ambition to reverse the decline of nature, there needs to be specific policy in this section of the Local Plan.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>

delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	This policy states that "Development which conserves and enhances trees, woodland and hedgerows will be supported". It is not appropriate to conserve trees, woodlands and hedgerows in all instances, for example where they do not have significant amenity and landscape value and where replacement vegetation will result in enhancements to the area/ an improved design scheme. The policy should be amended accordingly for clarity.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	Policies have not given appropriate regard to climate change, sustainability or delivering environmental enhancements.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	Essentially we believe the spatial strategy is flawed and there are inconsistencies within the plan. The plan does not wholly conform to the policies of the Framework. The supporting text highlights that the protection of existing trees, woodland and hedgerows and the addition of new planting contributes greatly to conserving and enhancing the local character of an area. This policy notes that development which conserves and enhances trees, woodland and hedgerows will be supported; however this policy could go further and give weight to developments that provide enhancements to trees, woodland and hedgerows. This would better reflect the supporting text which highlights the importance of existing and additional planting.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	

4. Proposed Changes	Policy DM15 should be amended to include: 'Positive weight will be afforded to development that can demonstrate enhancements to and/or propose new trees, woodlands and hedgerows of appropriate species'
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>Point c of this draft policy (and text at paragraph 11.3) suggests that market homes should only be permitted where this will enable grant funding of First Homes, however grant funding is not available for the delivery of First Homes as this tenure is outside the Affordable Homes Programme. First Homes funding was available as part of the initial pilot scheme (First Homes Early Delivery Programme), but this has not been rolled out further.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Point C of the policy, together with the text in paragraph 11.3, should be updated to remove reference to grant funding, to be effective.</p>

Please give reasons for your answer	Herewith our response to the Local Plan 2022-2039: 44. DM16 e. The Plan needs to state that all affordable housing will remain affordable e.g. no extensions allowed on properties which can increase value and then make the properties non-affordable. 45. DM16. 11.1. 'Rent' needs to be reinstated as there are many people who cannot get a mortgage for a variety of reasons.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	<p>The AMR 2022 (January 2023) (paragraph 1.14) notes that 'house prices in West Berkshire are high and the provision of affordable housing to meet local needs, particularly for young people and key workers, is one of the Council's priorities.' Accordingly, it is important that measures are taken to address this need. The general approach of draft LPR Policies DM15 and DM16, to support First Homes and rural exception housing adjacent to settlement boundaries, is therefore supported. This approach will also help to meet rural housing needs and enhance the vitality of rural communities in the District, in line with NPPF paragraph 79, and therefore it is important that a positive approach is taken to considering such schemes.</p> <p>It is welcomed that draft LPR Policies DM15 and DM16 include some allowance for a proportion of enabling market housing on entry-level exception schemes where appropriate (in line with the Written Ministerial Statement on First Homes and NPPF paragraph 78) which will help to support appropriate schemes to come forward and benefit rural communities.</p> <p>Draft LPR Policy DM16 and the supporting text set out the requirement for rural exception schemes to meet local housing needs, identified through a local needs survey. Whilst acceptable in theory, there may be additional ways in which local housing need can be demonstrated and the policy would benefit from setting out additional guidance on what evidence should support planning applications. Our experience to date is that the lack of clarity and consistency, as well as onerous expectations relating to housing needs surveys, has been a disincentive to landowners to release otherwise appropriate sites for this type of development.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p>	Yes

* No	
5. Independent Examination	The Englefield Estate consider that the plan in its current version is not sound and would like the opportunity to set out how alterations could be made to the plan and its evidence base to enable it to be found sound and progress to adoption.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>West Berkshire Local Plan Review – Proposed Submission (January 2023)</p> <p>Pro Vision is instructed by Rivar Ltd. to submit representations in response to the West Berkshire Council ('the Council') Regulation 19 Consultation on the proposed submission version of the Local Plan Review (LPR) to 2039, herein after referred to as the 'the Plan'.</p> <p>This representation is not made in relation to any particular site, albeit related generally to our client's land interests at various locations within the district, and in the interests of contributing to a sound plan.</p> <p>Submissions on Policy DM17 - Rural Exception Housing</p> <p>The Policy sets out the requirements to deliver rural exception sites adjacent to rural settlements in accordance with paragraph 78 of the Framework'.</p> <p>Rivar, in principle, support the inclusion of Policy DM17. Indeed, the Housing Needs Assessment Update (dated, July 2022) prepared by Iceni (on behalf of the Council) demonstrates that within the North Wessex Downs AONB area (a large proportion of the rural area in West Berkshire) that there is a significant affordable housing need of 152 affordable and social rented homes per annum, and a further 160 shared ownership homes. This equates to 46% of the overall need for affordable and social rented homes and 43% of the shared ownership need in the district.</p> <p>However, we have concerns that the requirement for all schemes to provide a local housing needs survey is onerous and will severely restrict the delivery of sites through this policy, particularly as the Council do not incentivise the Parishes to have an up to date Housing Needs Survey. The lack of affordable housing provision will determine who can live in these rural villages contrary to the overarching aim of improving affordability as a key objective of the Plan. The Council should be seeking to maximise the provision of affordable housing (paragraph 4.74 of the Housing Needs Assessment Update) and, therefore, this strict requirement has the potential to restrict supply where it is needed.</p> <p>The Policy should allow for greater flexibility to help demonstrate a local need, including a range of evidence such as the Council's Housing Register, past delivery of affordable housing, affordability and any other available evidence base prepared by the Council and/or a Parish etc., as well as any Housing Needs Survey.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>For the Policy to be sound it is recommended that the following modifications are made:</p> <p>Policy DM17 <i>Rural Exception Housing</i></p> <p><i>Small scale rural exception housing schemes will be supported adjacent to rural settlements to meet a local housing need. Such schemes will be expected to be in response to a need identified through a local needs survey. It will need to be demonstrated that the scheme meets an identified local need for a parish or group of parishes.</i></p> <p>The affordable housing within the scheme will be required to remain affordable in perpetuity.</p> <p>...</p> <p><i>[The supporting text can then set out the range of evidence that the Council will accept to demonstrate an identified local need as discussed above]</i></p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>We wish to appear at the examination to present our evidence and technical information to support these representations</p>

6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into	

<p>account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>Our client's representations concern Policy DM17 – Rural Exceptions Housing. Our client is currently working with East Ilsley Parish Council to bring forward an exception site to meet local need in the village identified through a Housing Needs Survey (HNS). In addition to identifying a need for affordable dwellings, the East Ilsley HNS also identifies a significant need for smaller 2-3 bedroom market dwellings. In fact, the need for market housing for local people in the village is demonstrably greater than the need for affordable housing and many responses to the HNS expressed support for modest sized dwellings for private sale to meet a real shortage in the village.</p> <p>The shortage of smaller dwellings for private sale in East Ilsley is backed up by census data (2011 Census - Table LC4405EW) which shows that 51% of all owned dwellings (i.e. excluding affordable and private rental) in the village have 4 or more bedrooms. This compares to a figure for West Berkshire as a whole of 37% dwellings with 4 or more bedrooms. The shortage of smaller dwellings for private sale has a significant impact locally on the demographic balance of the village and the ability for people who grew up in the village to remain living there in adulthood. The Council's Housing Background Paper (January 2023) identifies a need for 85-90% of all new market dwellings to have fewer than 4 bedrooms and yet the Local Plan Review includes no way for market dwellings to be delivered in villages like East Ilsley to meet the clear need for a more balanced housing stock.</p> <p>The only way for market housing to currently be delivered is as small scale development within the settlement boundary (which is far more likely to deliver larger dwellings that are not needed) or on rural exception sites, but only if it is required to make the scheme viable. There is no policy allowance in the local plan for the delivery of homes for private sale to meet an identified local need.</p> <p>At paragraph 62, the NPPF states that the size, type and tenure of housing needed for different groups in the community should be assessed and reflected in planning policies. This would include people living in an area who wish to stay in the area but who do not qualify for affordable housing and are unable to meet their housing needs due to a shortage of suitable homes for private sale. In the context of East Ilsley, the Local Plan Review currently fails to meet an identified need for smaller market dwellings for local people and it is therefore not consistent with national policy and cannot be considered sound.</p> <p>In order to make the Local Plan Review sound, we consider that Policy DM17 should be amended to allow for the delivery of market housing to meet a specific local need identified through a Housing Needs Survey. We are not advocating for a relaxation of normal development controls to allow any form of market housing outside of settlement boundaries, but rather for the delivery of dwellings for private sale when there is specific evidence of a local need, where the dwellings are secured for local people and where schemes would also meet the identified need for affordable housing.</p> <p>We have experience of similar policies elsewhere in the country that allow for the delivery of market housing as part of the mix on exception sites (without a requirement to demonstrate viability requirements) and consider that the following proposed changes would ensure that Policy DM17 can be considered sound.</p> <p>Policy DM17 Rural Exception Housing <i>Small scale rural exception housing schemes will be supported adjacent to rural settlements to meet a local housing need. Such schemes will be expected to be in response to a need identified through a</i></p>

local needs survey for a parish or group of parishes. The affordable housing within the scheme will be required to remain affordable in perpetuity.

It is expected that rural exception housing schemes will **focus on the delivery of** deliver 100% affordable housing. In some cases, a proportion of market housing may be acceptable where this **either** enables the closing of a funding gap for the delivery of the affordable housing within the scheme **or it would meet a specific identified need for market housing**. The market homes should be integrated with the affordable homes to form a single scheme.

Where market housing is being used to financially support a rural exception housing scheme, the following detailed evidence is required:

a. A financial appraisal demonstrating the viability of the scheme and the financial relationship between open market and affordable housing;

b. The measures being taken to ensure the use of the affordable housing is to meet local needs in perpetuity; and

c. The relationship of open market housing to meeting local need, in terms of location, design, visual character, and type of accommodation.

Where market housing is proposed to meet an identified unmet need on a rural exception housing scheme, the following detailed evidence is required:

d. The need for new homes for private sale must be identified through a local needs survey;

e. The dwellings must be secured for local people living or working in the parish or people with close relatives in the parish. This will be achieved by requiring each dwelling to be marketed to people with a local connection only for a period of 6 months at a maximum price set by taking the average of two independent valuations; and

f. The proposed development must demonstrate that any need for affordable housing identified in the local needs survey is also met.

We trust these representations will be given due consideration in the examination of the Local Plan Review and we look forward to participating further in due course. In the meantime, if you have any questions please don't hesitate to contact me.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?
 * Yes
 * No

Yes

Please give reasons for your answer

4. Proposed Changes

In order to make the Local Plan Review sound, we consider that **Policy DM17** should be amended to allow for the delivery of market housing to meet a specific local need identified through a Housing Needs Survey. We are not advocating for a relaxation of normal development controls to allow any form of market housing outside of settlement boundaries, but rather for the delivery of dwellings for private sale when there is specific evidence of a local need, where the dwellings are secured for local people and where schemes would also meet the identified need for affordable housing.

We have experience of similar policies elsewhere in the country that allow for the delivery of market housing as part of the mix on exception sites (without a requirement to demonstrate viability requirements) and consider that the following proposed changes would ensure that Policy DM17 can be considered sound.

Policy DM17
Rural Exception Housing

Small scale rural exception housing schemes will be supported adjacent to rural settlements to meet a local housing need. Such schemes will be expected to be in response to a need identified through a local needs survey for a parish or group of parishes. The affordable housing within the scheme will be required to remain affordable in perpetuity.

*It is expected that rural exception housing schemes will **focus on the delivery of** deliver 100% affordable housing. In some cases, a proportion of market housing may be acceptable where this **either** enables the closing of a funding gap for the delivery of the affordable housing within the scheme **or it would meet a specific identified need for market housing**. The market homes should be integrated with the affordable homes to form a single scheme.*

Where market housing is being used to financially support a rural exception housing scheme, the following detailed evidence is required:

a. A financial appraisal demonstrating the viability of the scheme and the financial relationship between open market and affordable housing;

b. The measures being taken to ensure the use of the affordable housing is to meet local needs in perpetuity; and

c. The relationship of open market housing to meeting local need, in terms of location, design, visual character, and type of accommodation.

	<p><u>Where market housing is proposed to meet an identified unmet need on a rural exception housing scheme, the following detailed evidence is required:</u></p> <p><u>d. The need for new homes for private sale must be identified through a local needs survey;</u></p> <p><u>e. The dwellings must be secured for local people living or working in the parish or people with close relatives in the parish. This will be achieved by requiring each dwelling to be marketed to people with a local connection only for a period of 6 months at a maximum price set by taking the average of two independent valuations; and</u></p> <p><u>f. The proposed development must demonstrate that any need for affordable housing identified in the local needs survey is also met.</u></p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	Yes

Please give reasons for your answer	<p>DM18 (Self and Custom Build Housing) is supported, as it is evidence of the Council's recognition of its statutory duty to consider demand for custom and self build housing in plan making. The LPR is required to be informed by housing need assessment which includes the needs of different groups, including those wishing to commission or build their own homes. Based on the latest Governmental data release (May 2022), West Berks Council granted planning permission for 29 serviced plots between 31 Oct 2020 and 30 Oct 2021. Data was not supplied to indicate the level of demand based on the number of people on your registers. This data should be transparent and published regularly. By way of comparison, in neighbouring Basingstoke and Deane there are 328 entries on the register. If demand is similar in West Berks, then delivery is falling woefully short. Therefore, policy which supports delivery of self and custom build is supported.</p> <p>We note however, that this should not rely on delivery as part of large strategic development locations due to the time delays in such plots coming forward. Rather, policy should support delivery of self and custom build on small plots in a limited number settlements. Brimpton is one such location where a small</p>

	number of sites could be delivered, to meet local demand for custom and self-build in close proximity to facilities such as the local primary school.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	Include site allocations for small scale self and custom build plots, rather than relying upon large strategic development sites to deliver these. Sites are available immediately, including our client's site in Brimpton, and could deliver small scale development to meet this identified need, in a way which is appropriate to the pattern and form of the settlement. <for map see attachment>

<p>1. Do you consider the Local Plan Review is legally compliant? * Yes * No</p>	No
<p>Please give reasons for your answer</p>	
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>[For wider representation and Tables and Figures, see attached Representations on behalf of Croudace Homes]</p> <p>Self-Build</p> <p>Footnote 28 of the NPPF explains that under the Self-build and Custom Housebuilding Act 2015 (as amended by the Housing and Planning Act 2016), authorities are required to keep a register of those seeking to acquire serviced plots in the area for their own self-build and custom housebuilding. They are also subject to duties to have regard to this and to give enough suitable development permissions to meet the identified demand.</p> <p>The 2022 Authority Monitoring Report (January 2023) contains data on the number of individuals and associations on the self-build register in West Berkshire. We understand that as at October 2022, the number of entries logged on the register since May 2016 comprised 541 individuals and 2 groups. By comparison, a total of 128 self-builds were granted planning permission over the same period (May 2016 to October 2022).</p> <p>Therefore, Croudace is encouraged to see that Policy SP18 (Housing Type and Mix) outlines support for the principle of self and custom-build housing, but considers that in order to be sound, the LPR should either allocate or ensure that development is obliged to deliver an element of self and custom-build housing to ensure needs are met.</p> <p>Self and Custom-Build</p> <p>Whilst Croudace is encouraged to see that Policy SP18 (Housing Type and Mix) outlines support for the principle of self and custom-build housing, only two proposed allocations within the plan (SP17 – North East Thatcham Strategic Site Allocation which requires 3% to be delivered via serviced custom/self-build</p>

	<p>plots; and RSA7 – 72 Purley Rise, Purley on Thames which more vaguely requires ‘an element’ of self or custom-build homes).</p> <p>To increase the variety in the supply of land for residential development, Croudace considers that the Council actively seeks to meet the needs for self and custom-build housing by outlining locations where this type of accommodation would be supported and allocating sites to deliver it. Without doing so, the LPR does not meet the tests of soundness and Croudace cannot support it.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	<p>Thank you for the opportunity to comment on the West Berkshire Council Local Plan Review 2022-2039 Proposed Submission Reg 19 draft – January 2023. McCarthy Stone is the leading provider of specialist housing for older people in the UK.</p> <p>Policy DM19 seeks to support schemes that are providing for new specialised forms of housing. However, given the substantial need for specialist housing for older people within the District as identified in our response to SP12 and detailed in supporting text to the policy at para 11.18 ((1,710 units (95 per annum) over the plan period), the policy should be amended to emphasise the importance of older people's housing. It is additionally clear that the policy is mainly aimed at supporting the delivery of housing to meet the needs of older people and those with disabilities and therefore emphasising older people's need would make the policy clearer.</p> <p>Older person's housing also produces a large number of significant economic, social and environmental benefits which can help to reduce the demands exerted on Health and Social Services and other care facilities – not only in terms of the fact that many of the residents remain in better health, both physically and mentally, but also doctors, physiotherapists, community nurses, hairdressers and other essential practitioners can all attend to visit several occupiers at once. This leads to a far more efficient and effective use of public resources.</p> <p><u>Economic</u></p>

A report 'Healthier and Happier' An analysis of the fiscal and wellbeing benefits of building more homes for later living" by WPI Strategy for Homes for Later Living explored the significant savings that Government and individuals could expect to make if more older people in the UK could access this type of housing. The analysis showed that:

- 'Each person living in a home for later living enjoys a reduced risk of health challenges, contributing to fiscal savings to the NHS and social care services of approximately £3,500 per year.
- Building 30,000 more retirement housing dwellings every year for the next 10 years would generate fiscal savings across the NHS and social services of £2.1bn per year.
- On a selection of national well-being criteria such as happiness and life satisfaction, an average person aged 80 feels as good as someone 10 years younger after moving from mainstream housing to housing specially designed for later living.'

Each person living in a home for later living enjoys a reduced risk of health challenges, contributing fiscal savings to the NHS and social care services of approximately £3,500 per year (Homes for Later Living September 2019). More detail on these financial savings is set out within the report.

A further report entitled *Silver Saviours for the High Street: How new retirement properties create more local economic value and more local jobs than any other type of residential housing* (February 2021) found that retirement properties create more local economic value and more local jobs than any other type of residential development. For an average 45 unit retirement scheme, the residents generate £550,000 of spending a year, £347,000 of which is spent on the high street, directly contributing to keeping local shops open.

As recognised by the PPG, retirement housing releases under-occupied family housing and plays a very important role in recycling of housing stock in general. There is a 'knock-on' effect in terms of the whole housing chain enabling more effective use of existing housing. In the absence of choice, older people will stay put in properties that are often unsuitable for them until such a time as they need expensive residential care. A further Report "*Chain Reaction" The positive impact of specialist retirement housing on the generational divide and first-time buyers (Aug 2020)*" reveals that about two in every three retirement properties built, releases a home suitable for a first-time buyer. A typical Homes for Later Living development which consists of 40 apartments therefore results in at least 27 first time buyer properties being released onto the market.

Social

Retirement housing gives rise to many social benefits:

- Specifically designed housing for older people offers significant opportunities to enable residents to be as independent as possible in a safe and warm environment. Older homes are typically in a poorer state of repair, are often colder, damper, have more risk of fire and fall hazards. They lack in adaptations such as handrails, wider internal doors, stair lifts and walk in showers. Without these simple features everyday tasks can become harder and harder
- Retirement housing helps to reduce anxieties and worries experienced by many older people living in housing which does not best suit their needs by providing safety, security and reducing management and maintenance concerns.
- The Housing for Later Living Report (2019) shows that on a selection of wellbeing criteria such as happiness and life satisfaction, an average person aged 80 feels as good as someone 10 years younger after moving from mainstream housing into housing specifically designed for later living.

Environmental

The proposal provides a number of key environmental benefits by:

- Making more efficient use of land thereby reducing the need to use limited land resources for housing.
- Providing housing in close proximity to services and shops which can be easily accessed on foot thereby reducing the need for travel by means which consume energy and create emissions.
- Providing shared facilities for a large number of residents in a single building which makes more efficient use of material and energy resources.

Given the need for specialist housing for older people already identified within the plan at para 11.18 and benefits such schemes bring, the policy should be amended to make it clearer that it specifically supports the delivery of specialist housing for older people. In addition, developers should not be required to demonstrate older person's housing need given the substantial need identified in the District and this point should therefore be deleted from the plan to ensure it is justified and effect.

Recommendation

In order for the Local Plan to be effective, justified and consistent with national policy the following amendments should be made to policy DM19:

The provision of new specialist forms of housing designed to meet the needs of those with identified support or care needs **including schemes delivering specialist housing for older and disabled people** will be supported where:

- 1 **Housing meets a proven locally identified need in the District for the specific housing product being proposed; and**
- 2 The location is appropriate, in terms of design, layout, and accessibility of facilities, services and public transport

Specialist **accommodation housing meeting the needs of older people development** will be sought as an integral part of the mix from the strategic housing allocations at Sandleford Park and North East Thatcham.

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>

Please give reasons for your answer	Churchill Retirement Living is an independent, privately owned housebuilder specialising in sheltered housing for older people. Paragraph 1 of the PPG Housing for Older and Disabled people states: <i>"The need to provide housing for older people is critical. People are living longer lives and the proportion of older people in the population is increasing Offering older people, a better choice of accommodation to suit their changing needs can help them live independently for longer, feel more connected to their communities and help reduce costs to the social care and health systems Therefore, an understanding of how the ageing population affects housing needs is something to be considered from the early stages of plan-making through to decision-taking".</i> Paragraph: 001 Reference ID: 63-001-20190626 The West Berkshire Updated Housing Needs Assessment (2022) (HNA) advises that 'In total population terms, the projections show an increase in the population aged 65 and over of 73,500 people. This is against a backdrop of an overall increase of 70,900 - population growth of people aged 65 and over therefore accounts for over 700% of the total projected population change' (Paragraph 5.6 HNA). Both the HNA and the supporting text to Policy DM19 advises that the need for specialist housing for older people in the district is estimated to be around 1,710 units over the 2021-39 period (95 per annum), Table 5.8 of the HNA concludes that there is substantial oversupply of 'affordable' housing with support and that all future demand is for open market tenure.

	<p>The delivery of a suitable level of specialist older persons' housing will be a substantial undertaking over the Local Plan period and unless action is urgently taken the Council will struggle to address this need. The inclusion of a dedicated policy which is supportive of the need to deliver specialist older persons' housing at suitable locations in West Berkshire is commendable and supported accordingly</p> <p>Sub-clause A) of the policy refers to developers to provide up-to-date evidence of local need. However, the need for these forms of accommodation is self-evident and detailed at length in the HNA and the justification to the policy itself.</p>

<p>Please give reasons for your answer</p>	<p>Muller Property Group control a site at Kennet Reach, Ham Mill Lane, Newbury on which they are progressing proposals for a new care home. A planning application was refused by West Berkshire District Council last year, and a new application is being prepared which responds to the Council's reasons for refusal.</p> <p>The representations are made in the context of a new care home on this site within the Newbury built up area.</p> <p>The focus of this response is therefore draft Policy DM19 Specialist Housing. The proposed wording states:</p> <p><i>The provision of new specialist forms of housing designed to meet the needs of those with identified support or care needs will be supported where:</i></p> <p><i>Housing meets a proven locally identified need in the District for the specific housing product being proposed; and</i></p> <p><i>The location is appropriate, in terms of design, layout, and accessibility of facilities, services and public transport.</i></p> <p>We welcome the built-in support for specialist forms of housing including care homes and that "support" is the starting planning policy position.</p> <p>However the Policy comes with caveats which in our view are unnecessarily restrictive.</p> <p>It is important that the Policy reflects how the number of units needed in the District should be seen as a minimum and not a cap, the stated need of 1,710 units (95 per annum) over the Plan period is the absolute minimum number of units required to meet identified need. Anything above this should be</p>

	<p>welcomed. Policies which are grounded in need figures (for example) can only ever be reactive and slow, rather than agile and able to respond to changing circumstances.</p> <p>Furthermore, the need figure is a blunt instrument and doesn't account for the different types of accommodation in terms of offer, the level of care provision, the quality of the units themselves, and other factors such as their location.</p> <p>There will be situations where the quality of a modern new purpose-built care home is preferable to older stock. The true need will be higher than the stated figures, it doesn't account for people wishing to move or upgrade their accommodation. It doesn't break down the different types of need, for example the "need" or "demand" for modern high quality purpose built care home accommodation will be different to the figure stated in the supporting text.</p> <p>There will be situations where a care home within the built up area of Newbury and in a sustainable location is preferable to existing outdated stock in a less sustainable location.</p> <p>It is not clear why the Council wish to restrict speculative development of specialist types of accommodation, but the Policy as currently worded appears to unnecessarily restrict development of (for example) an upgraded offer in a better location.</p> <p>We would therefore recommend that flexibility is built into the Policy and allowance made for speculative or "windfall" development.</p> <p>New policy should build in flexibility which allows for market shifts or individual preferences. It should have sufficient scope to allow the decision taker to have regard to the potential of sites on an individual basis, both now and in the future over the course of the Plan period, rather than the acceptability of a proposal be tied to need.</p> <p>Policy DM19 as currently presented could fail to realise the potential of individual sites and creates unnecessary barriers to development. There are many different types of demand or need.</p> <p>It is in our view too prescriptive to restrict from the outset specialist housing only where a need can be demonstrated. "Need" will change over time, it will be subject to short-term and longer term trends and Policy DM19 as currently worded will be unable to respond to changing needs and market conditions. It is an inflexible Policy.</p> <p>The way Policy DM19 is currently worded is unsound, it has not been positively prepared. It would not be effective in meeting the needs of the District's residents for the reasons set out above. Finally, it is not clear why this approach has been taken, the restrictive and inflexible wording is not justified.</p> <p>Policy DM19 therefore needs modification.</p> <p>We note no changes to the Newbury built up area boundary is proposed in this location, which we agree with.</p> <p>Summary</p> <p>It is essential that Policies are flexible as the economy seeks to navigate and then recover from the challenges presented by the current economic downturn and the aftermath of the COVID-19 crisis.</p> <p>The planning system should be a tool to unlock the potential of sites rather than restrict or hamper them.</p>

Please give reasons for your answer	<p>West Berkshire Local Plan Review – Proposed Submission (January 2023)</p> <p>Pro Vision is instructed by Rivar Ltd. to submit representations in response to the West Berkshire Council ('the Council') Regulation 19 Consultation on the proposed submission version of the Local Plan Review (LPR) to 2039, herein after referred to as the 'the Plan'.</p> <p>This representation is not made in relation to any particular site, albeit related generally to our client's land interests at various locations within the district, and in the interests of contributing to a sound plan.</p> <p>Submissions on Policy DM19 - Specialised Housing</p> <p>The Housing Needs Assessment Update (dated, July 2022) prepared by Icení (on behalf of the Council) demonstrates a projected growth in those aged 65 and over of 13,500 persons over the plan period, representing 42% growth in West Berkshire. This forms part of the national picture which is described as "critical" in national policy guidance (Planning Policy Guidance Paragraph 001 Reference ID: 63-001-20190626).</p> <p>Evidence locally and nationally, therefore, demonstrates that there is a significant need for housing for older persons (i.e. specialist housing units and care/nursing beds) in the district during the plan period. In which case, Policy DM19 is not sufficiently positive to ensure that this problem is addressed. We have concerns that the policy requires evidence that each individual scheme meets a local need for that specific housing product to be supported by the Council. The Council's approach is clearly flawed as the evidence base already demonstrates that there is a significant need for specialist housing for older persons in the district during the plan period. The Policy therefore adds another onerous and unnecessary step to the process that may impede delivery of schemes for older persons accommodation.</p> <p>With the above in mind, it is considered that the Council needs to remove the requirement for evidence of a local need. The Policy should positively encourage development for specialist accommodation for older persons in areas with good access to public transport and local facilities and services. This was the approach supported by the Inspector into the South Oxfordshire Local Plan and Policy H13 – see paragraphs 241-242 of the Inspector's report enclosed with this letter (<i>see PS1386 Pro Vision (Rivar) - attachment</i>).</p> <p>The Policy explains that development will be supported where the location is appropriate in terms of design, layout and accessibility of services and public transport. However, Policy SP1 of the LPR generally provides a presumption in favour of development within the settlement boundaries (and seeks to restrict development beyond).</p> <p>The Council has not provided any evidence that this approach will deliver the significant need for housing for older persons during the plan period. The implications of this are important. On the face of it, it seems unlikely that the significant need can be met solely within settlement boundaries or via the limited site allocations. The remedy</p>

	is to provide clarification in the Policy that schemes that meet the above criteria will be supported both within and outside settlement boundaries. A positively worded policy which encourages delivery in sustainable locations will help bring forward specialised housing for older persons across the district.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	For the Policy to be sound it is recommended that the following changes are made: <i>Policy DM19 Specialised Housing The provision of new specialist forms of housing designed to meet the needs of those with identified support or care needs will be supported where: a. Housing meets a proven locally identified need in the District for the specific housing product being proposed; and b. The location within or outside of a settlement boundary is appropriate, in terms of design, layout, and accessibility of facilities, services and public transport. ...</i>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	We wish to appear at the examination to present our evidence and technical information to support these representations
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

Please give reasons for your answer	[See attached Combined Appendices for appendices. For wider representation and Tables and Figures, see attached Representations on behalf of Croudace Homes] Specialist Housing for Older People Other than one line within draft Policy DM19 (Specialised Housing), which requires specialist accommodation to form "an integral part of the mix from the strategic housing allocations at Sandleford Park and North East Thatcham", there is no direction or clarity provided regarding the location, quantum or types of housing this sector needs over the plan period. Given the scale of the increase in older people in West Berkshire over the plan period, the LPR cannot be said to be 'positively prepared' on this basis, which is a clear failing.

	<p>Therefore, in order to ensure that the plan is 'positively prepared', Croudace urges the Council to explicitly and more seriously address the requirement in relation to specialist housing, especially for older people, by ensuring that planning policies contain a clear recognition of how needs for specialist housing will be delivered.</p> <p>Allocations for Specialist Housing</p> <p>The NPPF at paragraph 62 outlines the importance of considering the size, type and tenure of housing needed for different groups in the community and that these needs should be assessed and reflected in planning policies. Such groups may include older people or those with disabilities.</p> <p>Such accommodation could include care homes or sheltered, supported or extra care housing for people who may not be in a position to live independently in more traditional forms of housing. In addition, the provision of specialist accommodation for these groups has the potential to free up existing housing stock (e.g. larger family accommodation) to meet more general housing needs.</p> <p>Whilst draft Policy DM19 (Specialised Housing) generally supports the provision of new specialist forms of housing designed to meet the needs of those with identified support or care needs, no specific allocations are proposed to meet these needs in West Berkshire. Instead there is an expectation that the two strategic housing allocations at Sandford Park and North East Thatcham will provide specialist accommodation as an integral part of their mix. In Croudace's view, this is grossly insufficient to meet the scale of needs set out within the evidence base.</p> <p>Croudace provides the Council with two alternative ways in which this could and should be addressed.</p> <p>Firstly, the most logical approach would be to allocate specific sites, or parts of sites (alongside more general market and affordable housing), to meet specialist housing. In this vein, Croudace wishes it to be known that Henwick Park offers the obvious potential to provide specialist housing in a sustainable location with good access to local services and space for appropriate on-site amenity. As explained at Section 2 of these representations, any proposal to bring forward residential development at Henwick Park could feasibly include specialist accommodation to meet the needs of certain groups.</p> <p>Alternatively, another approach would be to introduce a specific mechanism in planning policy which supports the provision of specialist housing outside of settlement boundaries, subject to certain criteria. For example, the South Northamptonshire Council model in Policies LH6 and LH7 of its Part 2 Local Plan (Appendix J). These policies provide support for proposals bringing forward housing for older persons, specialist housing, residential care and nursing care on land directly adjoining settlement 'confines' (i.e. boundaries) where certain criteria relating to sustainability, design, highways and parking and amenity space is met, and where there is evidenced need for the facility and no preferential sites within settlement confines are available.</p> <p>By taking the latter approach, the Council could help to deliver land for specialist housing without needing to specifically allocate it for development. In essence, the market for that type of housing would determine appropriate locations for growth and it would not be reliant on spatial allocations for delivery.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	No
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Ensuring the needs for all types of housing are accounted for – the LPR at present does not specifically allocate land for specialised housing and only allocates land for a small number of self and custom build homes in one area. Croudace encourages the Council to re-think this strategy to ensure that the needs of all members of the community are accounted for, particularly in light of the needs outlined within the LPR's evidence base. As it stands, the LPR is not 'consistent with national policy' or 'positively prepared', in this regard.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
<p>5. Independent Examination</p>	The opportunity to discuss matters of legal compliance and soundness with the Planning Inspector, together with proposed modifications to the Plan.

1. Do you consider the Local Plan Review is legally compliant?	
* Yes	
* No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.	Yes
* Yes	
* No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.	No
* Yes	
* No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by	No

the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	Object. The wording is not justified or effective. As currently worded this element of the policy is a little vague. The proposed amendment directs the decision maker and developer towards information required to appraisal the requirement for the provision of specialist accommodation.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	"Specialist accommodation development will be sought as an integral part of the mix from the strategic housing allocations at Sandleford Park and North East Thatcham <u>subject to evidence of need and site specific viability.</u> "
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	This policy refers to meeting a proven locally identified need for that housing product. It is inappropriate to have to prove locally identified need to support delivery of individual schemes given the evidence base and already identified need for specialist Housing.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	No

<p>Please give reasons for your answer</p>	<p>The Council recognise that an increasing elderly population will require the delivery more specialist accommodation in future. As such, the priority should be for the Council to allocate sites promoted for such accommodation in the local plan. Only through site allocations can the Council be certain that the needs of older people be met.</p> <p>However, the HBF recognise that it may not be possible to allocate sufficient sites for specialist accommodation to meet the needs of older people. As such it is important that the policy provides an effective mechanism through which decisions on accommodation can be made on the basis of the need for and supply of such development. It is therefore important that this policy sets out how many specialist homes for older people are required in West Berkshire and a commitment is made to monitoring supply against this level of need across the plan period. In addition, the HBF would also recommend that a presumption in favour of development be applied if the supply of land for such development falls below identified annual needs of 95 units per annum.</p> <p>Whilst there is no direct requirement to do so in national policy the HBF would argue that in order for the policy to be effective it needs to be clear as to what is required and how a decision maker should react to ensure those needs are met. By including the level of need in the policy rather than the supporting text greater weight will be given to this in decision making leading to more positive approach that is required to meet housing the needs of older people.</p>

Please give reasons for your answer

The Local Plan Review (LPR) strategy where it relates to specialist older persons accommodation has not been positively prepared, is neither justified nor effective, nor is it consistent with national policy. Policies SP18, DM1, DM4, and in particular Policy DM19 of the LPR when read as a whole have not fully taken into account the fact that the population of older people in England is growing rapidly, with the consequence that ensuring future housing supply is met on the basis of "Lifetime Homes Standards" will not of itself be either suitable or capable in meeting the accommodation requirements of various types of specialist older households.

The need to consider specialist older persons accommodation in adjoining authorities to assess the extent to which they can meet their own requirements; considerations relating to changes in the type of care home accommodation; attrition levels seen in terms of the reasons behind the closure of care homes; viability issues which can result in substantially different characteristics relative to general housing, and lessons to be learnt from the recent Covid-19 pandemic, with consequences for the design and access to communal open space of specialist older persons accommodation; all play an important role in the need for, and hence the likely future provision of this form of housing. It is contended that these material considerations effecting specialist older persons accommodation have not been fully met in the policies in the LPR, being considered in greater detail later in these representations.

The ONS 2019 Mid-year population estimates indicate that over the past 20 years (1998-2018) the number of residents aged 65 and over in England increased by approximately 31%; more than double the rate of growth than the total population over the same time period (15%).

This ageing trend is expected to accelerate in that the 2018 base i.e. the ONS 2019 National Population Projections, reveal that the older population in England could increase by some 41% over the 20 year period between 2018 and 2038, meaning that by 2034, almost 1 in 4 (24%) of the population in England are expected to be aged 65 or over. The rate of growth in West Berkshire over the period 2022 to 2039 for residents aged 75 or over, is projected to increase by 64%.

Current national policy as set out at paragraph 62 of the NPPF 2021 requires local planning authorities to consider inter alia:-

"... the size, type and tenure of housing needed for different groups in the community should be assessed and reflected in planning policies (including but not limited to, those who require affordable housing, families with children, older people, students, people with disabilities ..." (my emphasis)

The NPPG at paragraph 001 Reference ID: 63-001-20190626 states

"The need to provide housing for older people is critical." (underlining as per the NPPG; my emphasis)

Government guidance concerning older persons specialist housing refers to there being a "critical need", a term absent when describing all other forms of housing need, emphasising the importance to be attached to specialist older persons housing provision.

The Guidance goes on to explain in paragraph 006 Reference ID: 63-006-20190626 that :-

"... These policies can set out how the plan-making authority will consider proposals for the different types of housing that these groups are likely to require. They could also provide indicative figures or arrange for the number of units of specialist housing for older people needed across the plan area throughout the plan period." (my emphasis)

Whilst paragraph 013 Reference ID: 63-013-20190626 states:-

"It is up to the plan-making body to decide whether to allocate sites for specialist housing for older people. Allocating sites can provide greater certainty for developers, and encourage the provision of sites in suitable locations. This may be appropriate where there is an identified unmet need for specialist housing. The location of housing is a key consideration for older people who may be considering whether to move (including moving to more suitable forms of accommodation)."(my emphasis)

The same NPPG sets out at paragraph 010 Reference ID: 63-010-20190626 the different types of specialist housing for older people; all of which have differing consequences seen in terms of delivery; whilst the contents of paragraph 016 Reference ID: 63-016-20190626 are of relevance, highlighting the fact that:

"Decision-makers should consider the location and viability of a development when assessing planning applications for specialist housing for older people... Where there is an identified unmet need for specialist housing, local authorities should take a positive approach to schemes that propose to address this need."(my emphasis)

The West Berkshire Housing Needs Assessment Update published by Icen Projects Ltd on behalf of your Council states in paragraph 5.35

"It can be seen by 2039 there is an estimated need for 1,137 additional dwellings with support or care across the whole study area. In addition, there is a need for 1,032 additional nursing and residential care bedspaces. Typically for bedspaces it is conventional to convert to dwellings using a standard multiplier (1.80 bedspaces per dwelling for older persons accommodation) and this would therefore equate to around 573 dwellings. In total, the older persons analysis therefore points towards a need for around 1,710 units over the 2021- 39 period (95 per annum) – the older person need equates to some 19% of all homes needing to be for some form of specialist accommodation for older people."

These provisions are similarly reflected in the Housing Background Paper prepared by your Authority in January 2023.

I have previously referred in these representations to a proposed 64% change in the population of older persons of 75 years + between 2021 and 2039. This figure has to be examined in the context of the need for specialist housing for the elderly set out in paragraph

The LPR is to seek "specialist accommodation" as an integral part of the strategic housing allocations at Sandford Park and North East Thatcham. The only specialist older persons accommodation being

proposed is an Extra Care scheme on land at Stonehams Farm, Tilehurst, being the only allocated site for specialist elderly persons accommodation to 2039.

During the nine-year period commencing 2013/14 leading up to 2021/22, a total of 227 Class C2 rooms were completed, amounting to five schemes, of which 204 comprised three individual schemes in Newbury, revealing why it is considered that either further allocations should be made for specialist older persons housing, and/or the need for flexibility in the location of such specialist housing schemes in Policy DM1.

The Housing White Paper "*Fixing Our Broken Housing Market*" published by DCLG in February 2017 recognised the importance of "*offering older people a better choice of accommodation*" at the same time highlighting that "*helping older people to move at the right time and in the right way could also help their quality of life at the same time as freeing up more homes for other buyers.*" It is noted that the same White Paper recognised the "*barriers to people moving out of family homes that they may have lived in for decades*" and the "*emotional attachment ... which means that where they are moving to needs to be very attractive to them and suitable for their needs over a twenty to thirty year period.*" The Housing White Paper clearly expresses the Government's commitment to "*exploring these issues further and finding sustainable solutions to any problems that may come to light.*"

The Government launched a Select Committee Inquiry into the issue of housing for older people in response to the House of Commons Communities and Local Government Committee (2018). The Inquiry report published in February 2018 aimed to reflect the diversity of older people in terms of their ages, individual circumstances, choices and preferences. It concluded inter alia that:

- A national strategy on housing provision for older people is needed, and should be introduced in consultation with older people and those who provide for them;
- Independent research should be commissioned on the wider housing market impact of older people moving to a smaller home that better suits their needs, to further explore frequent claims that this could be part of the solution to tackling the housing shortage;
- National planning policy should give greater encouragement to the development of housing for older people, ensuring that sites are available for a wider range of developers;
- The new standard approach to assessing housing need should explicitly address the complex and differing housing needs of older people;
- Older people should be able to choose from a wide choice of housing which can accommodate their needs and preferences, including smaller general needs housing, accessible housing, retirement homes, extra care housing and cohousing;
- Local authorities should produce strategies explaining how they intend to meet the housing needs of older people, with Local Plans identifying a target proportion of new housing to be developed for older people as well as suitable well-connected sites close to local communities; and
- Local authorities should be more receptive to private developers who wish to build housing for older people in their area, and appreciate the potential health and wellbeing benefits leading to reduced need for health and social care

Knight Frank in their 2021 Research Paper entitled "*Health Care Development Opportunities*" found that the UK health care market needs upgrading, with 71% of homes older than 20 years; at least 40% of homes having been converted from other uses and many be outdated, with 29% of beds lacking en-suite facilities. They forecast that the Covid-19 pandemic was likely to accelerate the closure of outdated homes and replace them with high quality assets. They went on to add that the Covid-19 pandemic would no doubt prompt a change in the way care homes are designed and configured, with particular emphasis placed on internal circulation, air quality and ventilation, with further focus directed towards transitional and communal space, with a view to maintaining an element of social distancing. A similar shift in preferences with greater attention is anticipated in respect to important outdoor and breakout spaces.

Levels of attrition involving the closing of care homes needs to be assessed in the future, with the average size of newly registered care homes across the country, i.e. those constructed in the last 56 years being 62 beds, contrasting with the average size of care homes closing over the same time period amounting to 29 beds.

It is also important to consider that there are a number of factors which affect the viability of developments relating to specialist housing for older people, one of the most significant being that they incorporate a significant provision of communal space and on-site facilities, in addition to individual rooms/units, and common parts evident in general need apartment blocks. As a result, the efficiency of age restrictive developments seen in terms of the floorspace of individual units (net) to the total floorspace (gross) is significantly poorer than in traditional or general needs housing. In short traditional general needs housing uses 100% in terms of net:gross efficiency, with a figure of 84% net:gross efficiency envisaged for apartments. Care homes, Extra Care facilities and sheltered living/retirement living apartments in contrast are only able to achieve between 40 and 75% net:gross efficiency.

In addition to these design considerations, there are higher construction costs, with greater requirements in terms of achieving higher accessibility requirements, comprising lifts, specially adapted bathrooms, treatment rooms, with those providing these important facilities relying on third party building contractors who are unable to secure the same economies of scale as volume housebuilders.

To these considerations should be added slower sales, given they are directed at a specialist older persons market, with the inability to phase flatted schemes to sales rates, resulting in higher finance costs for developments.

It is for a combination of these reasons that it is contended the LPR needs to be more proactive in delivering development to meet specialist older persons housing, which it is contended is not being met through the allocation of sites to meet these specialist housing needs. If this process is not addressed, with authorities relying on the market to bring forward sites, with viability assessments at the decision-taking stage, it is considered less likely that sites will come forward for this much needed use, although this situation can be alleviated by incorporating into Policy DM1 an exception in respect of specialist older persons housing subject to a quantitative and qualitative need accompanying any such submission.

	<p>These considerations which affect specialist older persons housing were accepted by the Inspector Harold Stephens in an appeal decision concerning land at Sonning Common (PINS Ref. No. APP/Q3115/W/20/235861), viz:-</p> <p><i>“117. Extra care housing undoubtedly operates in a very different market. Mr Garside provided detailed evidence to the inquiry how the market for land operates to the detriment of extra care operators. Extra care housing providers cannot compete with house builders or with other providers of specialist housing for older people because of the build costs, the level of the communal facilities and the additional sale costs including vacant property costs. The communal facilities must be provided before any units can be sold and sales tend to be slower. However, I accept that extra care schemes can charge a premium for the specialist accommodation provided and also benefit from an income from deferred management fees.</i></p> <p>1 <i>It seems to me that these factors, all mean that age restricted developments and in particular extra care communities are less viable than traditional housing schemes. Ultimately, age restricted developers are less able to pay the same price for land as residential developers and it is much harder for age restricted developers; and in particular those seeking to deliver extra care, to secure sites for development and meet the housing needs they aim to supply. Viability is clearly a relevant factor which supports the case under paragraph 172b) of the NPPF. There is also a strong case for the appeal scheme given the lack of alternative sites in the light of Policy H9 of the SOLP.”</i></p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>There is a need in the evidence base to provide a detailed assessment of the different types of specialist housing for older people, which for various reasons cannot be successfully accommodated in adjoining authorities, in order to evaluate whether there are certain diverse links for older persons accommodation which are more likely to be met in West Berkshire. To consider housing solely from a generic basis where the form of housing is in critical need is not considered satisfactory, and more importantly, will only exacerbate the need in the future for older persons accommodation.</p>
<p>4. Proposed Changes</p>	<p>There is a need to adopt a more flexible approach towards specialist housing for older people, for which the Government confirms there is a critical need, so that emphasis can be placed on ensuring that their requirements are met, in the same way as is the case for the housing needs of travellers. Both travellers and older people comprise different groups within the community which are required to be assessed and reflected in planning policy, in accordance with paragraph 62 of the NPPF 2021.</p> <p>This means encompassing specialist housing for older people as a category which exceptionally may be provided as a form of residential development in the countryside, in accordance with Policy DM1, subject to a quantitative and qualitative need being shown. The significance of this proposed policy change is evident in appeal decisions where care proposals, both Extra Care and care homes, are being allowed in the countryside in locations not normally considered acceptable in planning terms, such as in the Metropolitan Green Belt; Area of Outstanding Natural Beauty and sites on the edges of small villages, as well as next to listed buildings and conservation areas. This is a reflection of Inspectors consistently recognising the national imperative of providing more care facilities in the light of the very clear instruction that the need is now critical. It is also the fact that a number of local authorities are failing to properly address or recognise that need.</p> <p>There is also a requirement to look at the qualitative need for specialist housing for older people, meaning an examination of the District's current care home stock, which includes converted buildings, along with attrition rates, i.e. the loss of care home facilities. The requirement in this respect should be based on an appropriate standard room, being a single occupancy room with en-suite toilet, wash basin and flat floor shower, i.e. a wet room, the latter being particularly important to avoid the risk of elderly people tripping or falling in the shower. It also requires a shower stool or seat to be placed within easy access in the shower. The appropriate standard in this respect is that envisaged by the Care Act 2014 Section 5 paragraph 1(b).</p> <p>This requirement is now all the more persuasive following the shocking evidence of those who have passed away in care homes due to the Covid-19 pandemic. It is not difficult to see why when so many people who passed away lived in accommodation focused on sharing facilities, which, post Covid, is now completely unacceptable. The extent to which there is an appropriate standard of accommodation should dictate the need in the future for all forms of specialist older persons housing in the LPR. In addition, there is a need to carry out an assessment as set out in answer to Question 3 above.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? -	

<p>Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>On the basis of the GTAA (2019), as set out in Table 7 of the LPR, the identified need for gypsies is 30 pitches (based on cultural need) and 20 (based on PPTS need) between 2021/22 and 2037/38 (which includes a shortfall between 2021/22 to 2025/26). Table 8 indicates there is a travelling show people requirement of 24 plots, and a need for four transit pitches. However, it is noted from the Plan (para. 11.35) that the longer term need for Gypsy and Traveller pitches and the need for transit sites will be addressed in a separate Development Plan Document, with evidence due to be prepared between 2023-2025, and anticipated adoption in 2027. It is assumed that the GTAA will be updated to reflect a new plan period, and should be seeking to meet cultural needs following the 2022 'Lisa Smith v SSLUHC [2022] EWHC' judgement.</p> <p>In relation to transit provision, the LPR states that collaborative working will be undertaken with neighbouring authorities (para. 11.26). However, BFC is of the view that transit provision is not a duty to co-operate matter. This follows legal advice in respect of the Criminal Justice and Public Order Act 1994. Under the latter, the police are unable to exercise their powers under sections 62A-E concerning the removal of a trespasser to an alternative site, if there is no suitable pitch or site within a Borough. This means that the matter must be addressed within each Council and does not therefore have cross boundary implications.</p> <p>Prior to submission of the BFLP, BFC undertook Duty to Co-operate discussions with adjoining LPAs in January 2021 (these being the authorities most likely to be able to meet local needs) asking for assistance from adjoining authorities in helping to meet its Gypsy and Traveller pitch needs. No LPA was in a position to assist. The Council proposed to release a site from the Green Belt on Land at Jealott's Hill (as part of a wider allocation in the area) to meet full cultural needs. However, in their post hearings letter the Inspectors conclude that the required exceptional circumstances for the Jealott's Hill allocation has not been evidenced and that a Main Modification is needed to remove the associated policy from the plan. They go on to conclude in paragraph 47 of their letter that because BFC can demonstrate a five-year supply of deliverable Gypsy and Traveller sites, and the BFLP has a windfall policy with a positive approach to development, that no further compensatory allocations are needed. This means that BFC is unable to help West Berks meet its Gypsy and Traveller pitch needs, should it be determined that there is unmet need within West Berks.</p>

<p>Please give reasons for your answer</p>	<p>Typographic Error</p> <p>We believe there is a typographic error in para 11.31, and that the reference to Policy RSA32 should be to Policy RSA24 (the quoted reference seems to be to the current Plan)</p> <p>Misleading Text</p> <p>We feel the current wording of the Policy referred to in para 11.31 is misleading as the growth at Old Stocks Farm has already been approved (Planning Application 22/00120/FUL refers). In the unlikely event that further expansion at Old Stocks Farm is proposed, we would comment that the site is very close to AWE(A), and we have been advised by the WBC Planners that the protection against nuclear radiation is less for a mobile home than for a normal residential home. APC would therefore probably oppose any such expansion</p>

Please give reasons for your answer	It is noted that the GTAA does not identify a need for houseboat dwellers and thus the LPR does not provide for any permanent houseboats. The Canal & River Trust cannot comment on whether such a need exists, however any perceived need for residential moorings in the future should be discussed with the Canal & River Trust to ensure that suitable locations are considered.

<p>Please give reasons for your answer</p>	<p>Policy DM20 deals with provision for gypsies, travellers and travelling showpeople. It is noted that the Local Plan does not meet the identified need for permanent gypsy and traveller pitches, and notes that a specific development plan document to deal with longer term need will be prepared.</p> <p>As set out in the Reading Borough Local Plan, RBC has unmet needs for permanent accommodation for gypsies and travellers. RBC's Gypsies and Travellers, Travelling Showpeople and Houseboat Dwellers Accommodation Assessment (September 2017) identified a need for 10-17 permanent pitches for gypsies and travellers. After thorough assessment of potential land within Reading, RBC has concluded that this need cannot be met within Reading.</p> <p>RBC therefore seeks to work with adjoining authorities to understand how these needs can best be met. On 21st February 2018, RBC made a request under the duty to co-operate to a number of authorities, including WBDC, to understand whether there is potential to meet these permanent needs outside Reading's boundaries. It remains the position that meeting Reading's permanent needs is likely to require provision outside our Borough, and therefore RBC is keen to work with WBDC on the development plan for gypsy and traveller provision to discuss wider needs within the area, as well as what resources would be required to help in meeting those needs.</p>

<p>Please give reasons for your answer</p>	<p>Wokingham Borough Council (WBC) broadly supports West Berkshire District Council's (WBDC) approach to the provision of Gypsy and Traveller sites.</p> <p>WBDC published a 'Gypsy and Traveller and Travelling Showperson Accommodation Assessment' (GTAA) in 2019. A further GTAA Update was published in 2021 (GTAA 2021). The GTAA 2021 study identifies a cultural need for 30 pitches in the period 2021/22 – 2037/38. 20 of these pitches are for households that meet the definition of Gypsies and Travellers within the Planning Policy for Traveller Sites (PPTS). Further needs for a 4 pitch transit site (capable of accommodating 8 caravans) and 24 Travelling Showperson plots are identified.</p> <p>The Plan proposes to address this need through a combination of site allocations and a criteria based policy (Policy DM20). WBC notes that the Plan does not set a specific requirement for pitches, rather it simply notes the GTAA evidence. The criteria based policy supports the development of Gypsy and Traveller pitches and Travelling Showpeople plots where relevant criteria are satisfied. There is no requirement for strategic housing allocations to provide pitches or plots as part of a mix.</p> <p>WBC notes that the Plan does not contain allocations to meet cultural needs in full, and while the criteria based policy will facilitate the delivery of windfall pitches where appropriate, there are no estimates provided on how many pitches this would enable. It is therefore not possible to say with certainty that needs over the plan period will be met in full. However, WBDC has committed via its updated Local Development Scheme (LDS) to produce a Gypsy and Traveller Accommodation Development Plan Document (DPD). The LDS sets out that this will contain policies and allocations to meet the Gypsy and Traveller Accommodation Needs. On this basis, WBC supports the production of the separate DPD to meet needs in full, and raises no issues of soundness in relation to the Plan.</p> <p>As regards Travelling Showperson needs, Policy RSA25 proposes to allocate 24 Travelling Showperson plots. This would meet the identified need in full. WBC has no comments on this proposed allocation and supports the commitment to fully addressing Travelling Showperson need, which is considered sound.</p>

<p>Please give reasons for your answer</p>	<p>We also note that the identified shortfall in Gypsy, Traveller and Travelling Show People pitch provision is intended to be addressed via the preparation of a separate Development Plan document. The Royal Borough has also identified needs for Gypsies, Travellers and Travelling Show People and intends to produce a Traveller Local Plan in order to meet these needs, and as such we welcome West Berkshire's approach to meet the accommodation needs of these groups in full.</p> <p>In conclusion, the Royal Borough of Windsor and Maidenhead has no concerns or objections to the Regulation 19 version of the Local Plan Review.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes

<p>Please give reasons for your answer</p>	<p>Regarding the Spatial Strategy, a Strategic Environmental Assessment (SEA) has been carried out, as part of the Local Plan appraisal process to promote sustainable environmental considerations in the preparation of the local plan.</p>
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>We have reviewed Policy DM20 - Gypsies, Travellers and Travelling Showpeople, and as part of the criteria required to satisfy proposals for this type of development, point vii states, <i>"Development avoids areas of high flood risk and if required provide a Flood Risk Assessment, in accordance with Policy SP6: "</i></p> <p>As caravans are classed as 'highly vulnerable' under NPPF, we ask that the following wording is added to point vii to read;</p> <p><i>vii. 'Development avoids areas of high flood risk and if required provide a Flood Risk Assessment, in accordance with Policy SP6: "Caravans are not permitted in Flood Zone 3 as per Table 2 of the Planning Practice Guidance'.</i></p> <p>This is to ensure the policy is fully compliant with National Planning Policy.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>The Council (Under Section 33A of the Planning and Compulsory Purchase Act) in its Duty to Cooperate with other prescribed bodies/key agencies when preparing the LPR in order to address strategic planning issues relevant to their areas has engaged generally with the Environment Agency during the Plan making process.</p>
<p>4. Proposed Changes</p>	<p>Policy DM20 - Gypsies, Travellers and Travelling Showpeople</p> <p>Caravans (associated with Gypsies, Travellers and Travelling Showpeople developments) are classed as 'highly vulnerable' under NPPF, we ask that the following wording is added to point vii as stated above.</p>

	<p>Including the suggested wording above will ensure the policy is fully compliant with National Planning Policy.</p> <p><i>"Development avoids areas of high flood risk and if required provide a Flood Risk Assessment, in accordance with Policy SP6. Caravans will not be or are not permitted in Flood Zone 3 as per Table 2 of the Planning Practice Guidance".</i></p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
<p>5. Independent Examination</p>	We wish to attend the examination for an opportunity to explain the need to include the suggested wording to ensure these types of developments are not at risk of flooding.
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No</p>	Yes

<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>The draft Plan also sets out the council's strategy for meeting gypsy and traveller needs, including through the replacement of transit pitches with permanent pitches at New Stocks Farm on Paices Hill (Policies DM20 and RSA24). Although Policy DM20 states that 'The Council will meet the identified need... by allocating land for plots and/or pitches' it appears that there would still be an overall shortfall in pitches (as explained in para 11.35). It is acknowledged that the council have committed to producing a DPD in respect of longer term pitch requirements and transit sites/short term stopping places. BDBC wishes to ensure that WBC has a robust strategy to meet its gypsy and traveller needs in full to ensure that those needs would not need to be met in Basingstoke and Deane.</p> <p>In light of the above, BDBC has concerns about the shortfall in provision in terms of both employment, and gypsy and traveller pitch provisions, and is keen to continue to engage in suitable discussions under the Duty to Cooperate in relation to these issues.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>

Please give reasons for your answer	N/A
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>We believe this policy is not justified in demanding that such developments have “no adverse impact on the rural character...” (etc.) because there will be so much change in the nature and national importance of land based businesses, owing to needs of food security and changes to agriculture, also to the factors influencing “sustainability” in all three dimensions, that this is too restrictive.</p> <p>For example, housing workers close to, but not within a rural settlement – let alone the nearest town – might incur more travel and transport related carbon emissions and deny a village school and shop the additional customers it needs to survive economically and the rural community to flourish socially. Meanwhile it might increase peak hour congestion in urban areas caused by journeys that would not be needed if the worker lived near to their workplace.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>N/A</p>
<p>4. Proposed Changes</p>	<p>In 'g', insert “significant” before adverse.</p> <p>In 11.43 replace “nearby” with “within or near to” in line 1 and in the last sentence after “workplace” insert “the overall sustainability of siting the accommodation nearer to the workplace than policy would otherwise allow,”</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>To expand on our Viable Villages concept and why we believe the evidence leads to a more flexible attitude towards development in the countryside.</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes * No</p>	<p>Yes</p>

Policy DM 24 Conversion of Existing Redundant or Disused Buildings in the Countryside to Residential Use

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>Specifically, this representation is made in relation to Policy DM24. The Policy confirms that the conversion of redundant or disused buildings in the 'countryside' to residential use will be supported provided they meet the criteria listed.</p> <p>This Policy follows a similar content and structure to Policy C4 of the Housing Site Allocations DPD (adopted 2017). Furthermore, the support for conversion of buildings to new homes in the 'countryside' is supported in the National Planning Policy Framework ('the Framework') at paragraph 80 c.</p> <p>Our client, in principle, supports the inclusion of Policy DM24 in the Plan. However, they have concerns regarding the soundness of some of the specific criteria and wording in the Policy which has the potential to undermine its success in delivery housing in the 'countryside'.</p> <p>Submissions on the criteria and wording of Policy DM24</p> <p><u>The Policy</u></p> <p>It is considered that some of the criteria (e.g heritage c., amenity e., ecology i.) in the Policy simply require consideration of other Development Plan policies. Therefore, for clarity and ease these should be removed as they are unnecessary duplication. There also appears to be no justification why some matters are included and others not. For example, there is no criteria/cross reference to policies on highway safety or drainage. Alternatively, the Policy could simply state that any proposal should comply with other relevant policies within the Development Plan.</p> <p><i>f. It has no adverse impact on rural character</i></p> <p>This criteria is not justified and does not accord with national policy and paragraph 80 c which simply refers to an enhancement of the immediate setting. It cannot be sensibly applied that this is a 'zero harm' policy/criteria - indeed, if it were, any conversion of agricultural buildings to residential use would infringe it. The criteria should be re-worded to: 'seeks to respect the prevailing rural character of the area'. This should advocate a balanced planning judgement</p> <p><i>g. The existing vehicular access is suitable in landscape terms for the use proposed</i></p> <p>This criteria goes beyond that required by national policy and is essentially 'double counting' as any harm to the rural character of the area/landscape from the proposal (including its access) would also be considered under criteria f (see comments above). It is not clear what the Council is trying to achieve with this criteria.</p> <p><i>h. The creation of the residential curtilage would not be visually intrusive, have a harmful effect on the rural character of the site, or its setting in the wider landscape; and</i></p> <p>Similar comments to criteria f and g. The impact of the curtilage would be considered under criteria f and it cannot sensibly be applied that this is a 'zero harm' policy/criteria. All proposed changes from agriculture to residential use would involve the need to provide amenity space (e.g. garden land) as part of the residential curtilage which would by definition include a degree of harm to the character of the area/landscape.</p> <p><i>There will be a presumption against permission being granted for replacement building(s) pursuant to a change to a residential use established under this Policy</i></p> <p>This statement is contrary to Section 38(6) of the Planning and Compulsory Purchase Act 2004. This confirms that there may be other material considerations that indicate that a proposal should be determined other than in accordance with the Development Plan. The statement is also vague and ambiguous.</p> <p>It appears that the Council are concerned that a proposal that accords with this conversion Policy could subsequently be used as a 'fallback' position to support new build development in the countryside. However, there may be circumstances where a new build/replacement proposal, in comparison to a conversion scheme, will have significant benefits and be considered preferable.</p> <p>As a result, it is considered that rather than seeking to restrict development the Policy could be positively worded to allow new build/replacement proposals - where it has been proven that the conversion of the existing building(s) would comply with the criteria of Policy DM24 - that deliver an improved and enhanced development.</p> <p>This approach follows the Government's agenda of promoting and increasing high quality design and paragraph 8 of the Framework that seeks opportunities to secure 'net gains' across the different sustainability objectives, including environmental. The North Wessex Downs AONB Management Plan also supports achieving 'net gains' in landscape character and natural beauty.</p> <p>Supporting Text</p> <p>Paragraph 11.50 notes that the Policy applies to all structurally sound buildings, including traditional farmsteads or buildings. The paragraph however goes on to add that the Policy is not intended to encourage the retention of buildings that currently have adverse visual/landscape impact such as large agricultural sheds.</p> <p>As such, whilst the paragraph notes that the Policy applies to all structurally sound buildings, the Council appear to be implying that traditional and historic farm buildings are more likely to be considered acceptable for conversion under this Policy than more 'modern' large agricultural sheds. The Council's approach is unsound as it is not justified and national Policy does not make any such distinction or assume that all 'large agricultural sheds' are not structurally sound or inappropriate for conversion to residential use.</p>

	<p>This text therefore may influence the decision-makers assessment of these types of buildings when considered against the criteria in the Policy.</p> <p>It is considered that this last sentence in the supporting text should be removed as each case should be considered on its merits and supported by the appropriate evidence e.g structural survey.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Accordingly, the Council's approach to conversion of existing buildings in the countryside to residential use does not meet the following tests for soundness: justified or consistent with national Policy and paragraph 80 c. The Policy is not clearly written with issues muddled between criteria and repetition of other policies that may only be relevant in some circumstances. As such, the Policy as currently worded is likely to lead to uncertainty in decision-making.</p> <p>For the Policy to be sound it is recommended that the following changes are made:</p> <p>Conversion of Existing Redundant or Disused Buildings in the Countryside to Residential Use</p> <p><i>The conversion of existing redundant or disused buildings in the countryside to residential use will be supported provided that the following criteria are satisfied:</i></p> <p><i>a. The proposal involves a building that is structurally sound and capable of conversion without substantial rebuilding, extension or alteration;</i></p> <p><i>b. The applicant can prove the building is genuinely redundant or disused;</i></p> <p><i>c. Any internal and external changes do not harm the significance of a heritage asset in accordance with Policies SP9 and DM12;</i></p> <p><i>d. The proposal respects and retains the character, fabric and distinctive features of the building and uses matching materials where those materials are an essential part of the character of the building and locality;</i></p> <p><i>e. The site and location is suitable for residential use and gives a satisfactory level of amenity for occupants;</i></p> <p><i>f. It has no adverse impact on <u>seeks to respect the prevailing rural character of the area</u>;</i></p> <p><i>g. The existing vehicular access is suitable in landscape terms for the use proposed;</i></p> <p><i>h. The creation of the residential curtilage would not be visually intrusive, have a harmful effect on the rural character of the site, or its setting in the wider landscape; and</i></p> <p><i>i. The impact on any protected species is assessed and appropriate avoidance and mitigation measures are implemented to ensure any protected species are not adversely affected.</i></p> <p><i>[new criteria] accords with other relevant policies in the Development Plan (e.g on heritage, amenity and ecology)</i></p> <p><i>There will be a presumption against permission being granted for replacement building(s) pursuant to a change to a residential use established under this Policy.</i></p> <p><i>There is a presumption in favour of the conversion of existing buildings in the countryside to residential use in accordance with the above criteria unless there are clear benefits for doing otherwise (e.g a new build/replacement proposal) when considered against other policies in the Plan. For example, this may include [but not limited to]: enhancement to the setting of heritage assets and the landscape/character of the area; energy efficiency gains; remediation of contamination or reducing flood risk.</i></p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>We wish to appear at the examination to present our evidence and technical information to support these representations</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? -	No

Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.
* Yes
* No

Please give reasons for your answer

West Berkshire Local Plan Review – Proposed Submission (January 2023)

Pro Vision is instructed by Rivar Ltd. to submit representations in response to the West Berkshire Council ('the Council') Regulation 19 Consultation on the proposed submission version of the Local Plan Review (LPR) to 2039, herein after referred to as the 'the Plan'.

This representation is not made in relation to any particular site, albeit related generally to our client's land interests at various locations within the district, and in the interests of contributing to a sound plan.

Submissions on Policy DM24 - Conversion of Existing Redundant or Disused Buildings in the Countryside to Residential Use

The Policy

It is considered that some of the criteria (e.g heritage c., amenity e., ecology i.) in the Policy simply require consideration of other Development Plan policies. Therefore, for clarity and ease these should be removed as they are unnecessary duplication. There also appears to be no justification why some matters are included and others not. For example, there is no criteria/cross reference to policies on highway safety or drainage. Alternatively, the Policy could simply state that any proposal should comply with other relevant policies within the Development Plan.

f. It has no adverse impact on rural character

This criteria is not justified and does not accord with national policy and paragraph 80 c which simply refers to an enhancement of the immediate setting. It cannot be sensibly applied that this is a 'zero harm' policy/criteria - indeed, if it were, any conversion of agricultural buildings to residential use would infringe it. The criteria should be re-worded to: 'seeks to respect the prevailing rural character of the area'. This should advocate a balanced planning judgement.

g. The existing vehicular access is suitable in landscape terms for the use proposed

This criteria goes beyond that required by national policy and is essentially 'double counting' as any harm to the rural character of the area/landscape from the proposal (including its access) would also be considered under criteria f (see comments above). It is not clear what the Council is trying to achieve with this criteria.

h. The creation of the residential curtilage would not be visually intrusive, have a harmful effect on the rural character of the site, or its setting in the wider landscape; and

Similar comments to criteria f and g. The impact of the curtilage would be considered under criteria f and it cannot sensibly be applied that this is a 'zero harm' policy/criteria. All proposed changes from agriculture to residential use would involve the need to provide amenity space (e.g. garden land) as part of the residential curtilage which would by definition include a degree of harm to the character of the area/landscape.

There will be a presumption against permission being granted for replacement building(s) pursuant to a change to a residential use established under this Policy.

This statement is contrary to Section 38(6) of the Planning and Compulsory Purchase Act 2004. This confirms that there may be other material considerations that indicate that a proposal should be determined other than in accordance with the Development Plan. The statement is also vague and ambiguous.

It appears that the Council are concerned that a proposal that accords with this conversion Policy could subsequently be used as a 'fallback' position to support new build development in the countryside. However, there may be circumstances where a new build/replacement proposal, in comparison to a conversion scheme, will have significant benefits and be considered preferable.

As a result, it is considered that rather than seeking to restrict development the Policy could be positively worded to allow new build/replacement proposals - where it has been proven that the conversion of the existing building(s) would comply with the criteria of Policy DM24 - that deliver an improved and enhanced development. This approach follows the Government's agenda of promoting and increasing high quality design and paragraph 8 of the Framework that seeks opportunities to secure 'net gains' across the different sustainability objectives, including environmental. The North Wessex Downs AONB Management Plan also supports achieving 'net gains' in landscape character and natural beauty.

Supporting Text

Paragraph 11.50 notes that the Policy applies to all structurally sound buildings, including traditional farmsteads or buildings. The paragraph however goes on to add that the Policy is not intended to encourage the retention of buildings that currently have adverse visual/landscape impact such as large agricultural sheds.

As such, whilst the paragraph notes that the Policy applies to all structurally sound buildings, the Council appear to be implying that traditional and historic farm buildings are more likely to be considered acceptable for conversion under this Policy than more 'modern' large agricultural sheds. The Council's approach is unsound as it is not justified and national Policy does not make any such distinction or assume that all 'large agricultural sheds' are not structurally sound or inappropriate for conversion to residential use. This text therefore may influence the decision-makers assessment of these types of buildings when considered against the criteria in the Policy.

It is considered that this last sentence in the supporting text should be removed as each case should be considered on its merits and supported by the appropriate evidence e.g structural survey.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?
 * Yes
 * No

Please give reasons for your answer

4. Proposed Changes

Proposed Amendments to Policy DM24

Accordingly, the Council's approach to conversion of existing buildings in the countryside to residential use does not meet the following tests for soundness: justified or consistent with national Policy and paragraph 80 c. The Policy is not clearly written with issues muddled between criteria and repetition of other policies that may only be relevant in some circumstances. As such, the Policy as currently worded is likely to lead to uncertainty in decision-making.

For the Policy to be sound it is recommended that the following changes are made:

Policy DM24

	<p>Conversion of Existing Redundant or Disused Buildings in the Countryside to Residential Use</p> <p>The conversion of existing redundant or disused buildings in the countryside to residential use will be supported provided that the following criteria are satisfied:</p> <p>a. The proposal involves a building that is structurally sound and capable of conversion without substantial rebuilding, extension or alteration;</p> <p>b. The applicant can prove the building is genuinely redundant or disused;</p> <p>c. Any internal and external changes do not harm the significance of a heritage asset in accordance with Policies SP9 and DM12;</p> <p>d. The proposal respects and retains the character, fabric and distinctive features of the building and uses matching materials where those materials are an essential part of the character of the building and locality;</p> <p>e. The site and location is suitable for residential use and gives a satisfactory level of amenity for occupants;</p> <p>f. It has no adverse impact on <u>seeks to respect the prevailing rural character of the area</u>;</p> <p>g. The existing vehicular access is suitable in landscape terms for the use proposed;</p> <p>h. The creation of the residential curtilage would not be visually intrusive, have a harmful effect on the rural character of the site, or its setting in the wider landscape; and</p> <p>i. The impact on any protected species is assessed and appropriate avoidance and mitigation measures are implemented to ensure any protected species are not adversely affected.</p> <p>[new criteria] accords with other relevant policies in the Development Plan (e.g on heritage, amenity and ecology)</p> <p>There will be a presumption against permission being granted for replacement building(s) pursuant to a change to a residential use established under this Policy.</p> <p>There is a presumption in favour of the conversion of existing buildings in the countryside to residential use in accordance with the above criteria unless there are clear benefits for doing otherwise (e.g a new build/replacement proposal) when considered against other policies in the Plan. For example, this may include [but not limited to]: enhancement to the setting of heritage assets and the landscape/character of the area; energy efficiency gains; remediation of contamination or reducing flood risk.</p>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	We wish to appear at the examination to present our evidence and technical information to support these representations

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	<p>This policy is not consistent with paragraph 80 of the NPPF as there are a number of detailed criteria which are not necessary and/or duplication.</p> <p>The last paragraph of policy DM24 states that "There will be a presumption against permission being granted for replacement building(s) pursuant to a change to a residential use established under this policy". This is contrary to section 38(6) of the Planning and Compulsory Purchase Act 2004 that requires planning applications be determined "in accordance with the policies of the Development Plan, unless material considerations indicate otherwise" and contrary to established case law on fallback positions. This paragraph should therefore be removed.</p>

	Accordingly, the Council's housing trajectory fails to meet the test for soundness in the NPPF (2021) as the LPR is not positively prepared, justified effective or consistent with national policy.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	No
Please give reasons for your answer	
4. Proposed Changes	The last paragraph should be removed.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	To ensure that the views of our client in respect of the spatial strategy, and particular the failure to recognise Mortimer as a Rural Service Village and fail to allocate sites to support the vitality of this village are heard
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	<p>The overall approach of draft LPR Policy DM24 to supporting conversion of redundant or disused buildings in the countryside to residential use is supported. As above, it is however recommended that the reference to 're-use' of redundant or disused buildings is retained, in line with NPPF paragraph 80, in order to clarify that existing buildings can be brought back into use as well as being converted to a different use.</p> <p>Part b requires the applicant to prove that the building is genuinely redundant or disused and it is welcomed that paragraph 11.63 provides additional clarity to help this determination. In particular it is noted that the Council will consider whether the original use and purpose of the building exists and it is welcomed that 'the Council will take account of all the circumstances' together in making a judgement. The deletion of the need to satisfy 'all' of the criteria is also welcomed. This will help to enable a balanced judgement to be taken having regard to the overall criteria and the economic, social and environmental benefits.</p> <p>We are however concerned that the draft policy contains a number of detailed criteria with unnecessary duplication of other policies (e.g. relating to heritage, amenity, access and ecology), and a requirement to 'retain' features and fabric for instance, which may prejudice suitable development being delivered in rural areas. As noted above, the Estate's experience previously is that similar policies have been applied to prohibit development, and instead it is important that a positive approach is taken towards new development in the countryside in line with NPPF paragraphs 78-79.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes

Please give reasons for your answer	
4. Proposed Changes	<p>The following changes are recommended in order to ensure the soundness of the Plan in line with NPPF paragraph 35:</p> <p><i>'The conversion or re-use of existing redundant or disused buildings in the countryside to residential use will be supported provided that the following criteria are satisfied...'</i></p> <p><i>'c. Any internal and external changes do not harm the significance of a heritage asset in accordance with Policies SP9 and DM12;'</i></p> <p><i>'d. The proposal respects and retains the character, fabric and distinctive features of the building and uses matching materials where those materials are an essential part of the character of the building and locality;'</i></p> <p><i>'e. The site and location is suitable for residential use and gives a satisfactory level of amenity for occupants;'</i></p> <p><i>'g. The existing vehicular access is suitable in landscape terms for the use proposed;'</i></p> <p><i>'i. The impact on any protected species is assessed and appropriate avoidance and mitigation measures are implemented to ensure any protected species are not adversely affected.'</i></p>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	The Englefield Estate consider that the plan in its current version is not sound and would like the opportunity to set out how alterations could be made to the plan and its evidence base to enable it to be found sound and progress to adoption.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

Please give reasons for your answer	<p>It is not easy to decide whether a building is structurally unsound. While an applicant is considering whether to retain a building that they no longer have use for, its condition can deteriorate from being 'sound' to being dangerous. Adding this to the list of criteria to be met before planning consent can be given simply adds to the cost and delay and makes it likely that we will have more unsightly crumbling buildings in our rural landscape. Such buildings are all too common a feature of the countryside in areas where local policy is unduly strict on this.</p> <p>This policy adds to the cost and delays of what could be beneficial restoration of buildings with character that befits their setting. It is not really the business of planners but of structural engineers and cost accountants – and, as regards legislation, of Building Regulations – to determine whether it is 'worth' retaining a building because of its poor structural condition.</p> <p>We prefer to see the planning decision focus on the outcome of any restoration and re-use and also whether its restoration will result in fewer carbon emissions than if the embedded energy in its original construction is allowed to go to waste. We have no problem with the other criteria listed, but if these are all met, we can see no good reason to condemn a structurally unsound but otherwise potentially harmless building, that could find a new use.</p>

3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	N/A
4. Proposed Changes	In 'a', insert "permanent" before "building" and delete the words "structurally sound and". In 'f', add "significant" before "adverse". In 11.50, replace "structurally sound" with "substantially entire". Reword 11.51 in entirety: "This policy will allow the retention for residential use of any redundant or derelict building in the countryside that retains a significant element of character that is appropriate in its rural setting, irrespective of its structural soundness. The judgement as to whether to allow its conversion should not be based on matters that in legislation properly belong to Building Regulations, but should depend on whether its planned use and design are in accordance with national and local planning policy alone – in particular DM1 - and are suited to the particular location." In 11.53 last line replace "can" with "should". Delete 11.57 and re-number.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	I may wish to give examples of how such buildings have been restored well and also of where they have been allowed to crumble because the current local policy has insisted on structural soundness as a criteria; also same as DM23. Ideally in the same oral session as SP1, DM1/23/31.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

Please give reasons for your answer	Regarding the Spatial Strategy, a Strategic Environmental Assessment (SEA) has been carried out, as part of the Local Plan appraisal process to promote sustainable environmental considerations in the preparation of the local plan.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.	

* Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	We have reviewed Policy DM24 - Conversion of Existing Redundant or Disused Buildings in the Countryside to Residential Use, and to strengthen this policy text to ensure that it is sustainably viable and adheres to national policy, we ask that it includes points to ensure any proposed conversion development is not at risk of flooding and would not cause any detrimental impact to sensitive receptors. See the suggested wording in section 4.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	The Council (Under Section 33A of the Planning and Compulsory Purchase Act) in its Duty to Cooperate with other prescribed bodies/key agencies when preparing the LPR in order to address strategic planning issues relevant to their areas has engaged generally with the Environment Agency during the Plan making process.
4. Proposed Changes	To strengthen this policy text to ensure that it adheres to national policy, we ask that it includes these bullet points (the criteria required to satisfy proposals for this type of development) suggested below to ensure any proposed conversion development is not at risk of flood risk and would not cause any detrimental impact to sensitive receptors. <ul style="list-style-type: none"> • <u>Development avoids areas of high flood risk and adheres to the requirements of PPG and NPPF and if required provide a Flood Risk Assessment, in accordance with Policy SP6</u> • <u>Development will address all environmental concerns/constraints such as wastewater drainage, to ensure the development is sustainable.</u>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	We wish to attend the examination for an opportunity to explain the need to include the suggested wording to ensure these types of developments are not at risk of flooding and would not have a negative impact on sensitive receptors.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes	Yes

* No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

Policy DM 25 Replacement of Existing Dwellings in the Countryside

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	Policies have not given appropriate regard to climate change, sustainability or delivering environmental enhancements.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>Essentially we believe the spatial strategy is flawed and there are inconsistencies within the plan. The plan does not wholly conform to the policies of the Framework.</p> <p>The supporting text sets out that there is evidence that small rural properties in the AONB have previously been demolished and replaced with substantial new properties that do not reflect the local context. The supporting text then goes on to note that there are no rules that can be applied as to the acceptable size of a replacement dwelling; noting that size increase has to be considered on the basis of the impact of a particular property in a particular location.</p> <p>It is clear that Policy DM25 is underpinned by the objective to protect and enhance the landscape. However, the policy fails to encourage landscape enhancements from the outset. There is no mechanism to afford weight to environmental enhancements, sustainable design or innovative design. Instead the policy text focuses on 'proportionate in size' and preventing adverse impacts. The only element where landscape and environmental enhancements can be considered is through the resiting of replacement dwellings.</p> <p>This policy does not reflect the clear intention of the policy, as set out in the supporting text; which is to improve the landscape character and visual appearance of the site.</p> <p>The policy text relating to curtilage appears unsubstantiated and short sighted and overly prescriptive. Each site needs to be considered on its own merits and the policy doesn't allow for that. 'There is no extension of the existing curtilage, unless it is necessary to provide additional parking or amenity space to be consistent with dwellings in the immediate vicinity; This policy is incredibly restrictive and does not allow for any flexibility or recognise that there may indeed be cases where an existing building and/or curtilage may be inappropriately located and that there could be improvements through amending/altering/moving the building and/or its curtilage. Opportunities for improving the landscape character or overall appearance of the site would be missed.</p> <p>This policy does not link with criteria b of this policy, which does allow for replacement dwellings to be located on a different area of the site if positive benefits can be demonstrated. This approach should be taken into account within criteria g.</p> <p>This policy provides a mechanism to encourage landscape, biodiversity, environmental and sustainability benefits through replacement dwellings. We support this policy, however we are of the opinion that the support and consideration of enhancements shouldn't be limited to the placement/siting of a replacement dwelling.</p> <p>We therefore suggest that the policy is amended to clearly set out that weight will be afforded to developments that provide enhancements to the landscape, biodiversity, sustainability and/or innovative and/or high quality design.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Policy DM25 should be amended to:</p> <p>The replacement of an existing dwelling of permanent construction in the countryside with another dwelling will be supported providing that the following criteria are satisfied:</p> <ol style="list-style-type: none"> 1 The existing dwelling is not subject to a condition limiting the period of use as a dwelling; 2 The replacement dwelling is located on the footprint of the existing building unless alternative siting has a positive benefit on the impact on the countryside or other environmental benefits can be demonstrated; 3 The replacement dwelling is proportionate in size and scale to the existing dwelling, uses appropriate materials and sustainable technologies in accordance with Policy SP7, and does not have an adverse impact on: <ol style="list-style-type: none"> 1 The character and local distinctiveness of the rural area; 2 Individual heritage assets and their settings; 3 Its setting within the wider landscape; 4 <u>Any amendments to curtilage will be assessed on a case by case basis; amendments to curtilage must not cause landscape harm and must respect the character of the area.</u> 5 Where the existing dwelling forms part of an agricultural or other land based rural business and is an essential part of that business, the replacement dwelling must continue to perform the same function. An occupancy condition may be applied; and 6 The impact on any protected species is assessed and appropriate avoidance and mitigation measures are implemented to ensure any protected species are not adversely affected.

	7 <u>Positive weight will be afforded to developments that exceed sustainability standards, that provide enhancements to the landscape, enhance local character and provide biodiversity enhancements beyond the requirements of BNG.</u>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>Provision for the sub-division of existing dwellings in the countryside will help to further meet the needs of rural communities and boost the overall supply of housing. The introduction of draft LPR Policy DM27 is therefore welcomed. It will be important that a positive approach is taken to considering applications for such schemes in line with paragraphs 38, 78 and 79 of the NPPF.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>The Englefield Estate consider that the plan in its current version is not sound and would like the opportunity to set out how alterations could be made to the plan and its evidence base to enable it to be found sound and progress to adoption.</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	<p>Yes</p>

Please give reasons for your answer	The Council (Under Section 33A of the Planning and Compulsory Purchase Act) in its Duty to Cooperate with other prescribed bodies/key agencies when preparing the LPR in order to address strategic planning issues relevant to their areas has engaged generally with the Environment Agency during the Plan making process.
4. Proposed Changes	To strengthen this policy to ensure that it adheres to national policy, we ask that it includes these bullet points (the criteria required to satisfy proposals for this type of development) suggested below to ensure

	<p>any proposed development is not at risk of flooding and would not cause any detrimental impact to sensitive receptors.</p> <ul style="list-style-type: none"> • <i>'Development avoids areas of high flood risk and adheres to the requirements of PPG and NPPF and if required provide a Flood Risk Assessment, in accordance with Policy SP6</i> • <i>Development will not result in any detrimental impact on sensitive receptors. The development will satisfactorily address all environmental issues such as wastewater drainage, to ensure the sustainability of the development.'</i>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	Yes
<p>5. Independent Examination</p>	We wish to attend the examination for an opportunity to explain the need to include the suggested wording to ensure these types of developments are not at risk of flooding and would not have a negative impact on sensitive receptors.
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes</p> <p>* No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes</p> <p>* No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes</p> <p>* No</p>	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	We believe that the Plan accords with the requirements of the relevant legislation.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes
Please give reasons for your answer	We do not support the introduction of nationally described space standards for market housing. The size of market units should be determined by market preferences and the location of the site rather than stipulated unit sizes across the whole District. The requirement for market housing to be designed to these standards can also result in additional build costs due which may cause some developments to become unviable. We therefore suggest that Policy DM30 is amended to apply to affordable dwellings only.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	We believe that the Plan sufficiently addresses strategic planning issues relevant to the area.
4. Proposed Changes	We therefore suggest that Policy DM30 is amended to apply to affordable dwellings only.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	N/A
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	As far as Purley on Thames Parish Council are aware.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes
Please give reasons for your answer	As far as can be seen the Plan is NPPF compliant. <i>Purley On Thames 2018 Village Plan Action Point summary in relation to proposed policies attached.</i>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	After a revised period, consultation was advised
4. Proposed Changes	None - we would ask the planning authority to take into account the attached observations

5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

Please give reasons for your answer	Policy is unsound as it has not been justified. This policy will require all new residential development to meet the nationally described space standards. As the Council will be aware in order to adopt these standards the Council must show that there is a need for such homes within the Borough, but we could not find the evidence referred to in paragraph 11.105 of the Local Plan. If the Council cannot provide sufficient evidence to support the adoption of these standards, then this policy should be deleted.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>In regard to the requirements for new residential developments, we do not support the requirement set out in point iv which stipulates a garden size of at least a minimum of 10.5 metres in depth, where possible. We are of the view that garden sizes should be determined by the size of the associated property, the provision of open spaces on the development site and the provision and proximity of open spaces in the locality rather than a stipulated minimum depth. In addition, the varying design of house types may mean that some dwellings are generally wider units and as a result benefit from wider gardens. Sufficient garden sizes may therefore be achievable with shorter garden depths so it would not be appropriate to apply minimum depths.</p> <p>We therefore suggest that point iv is amended to state that “a garden size which is commensurate with the size of the property, taking into consideration the provision and proximity of on-site and nearby public open space”.</p> <p>In regard to point v, we do not support the requirement for a minimum distance of 21m between habitable room windows for all separation distances. Where this relates to front-to-front relationships, whilst street widths vary depending on the role of the street, the width may typically be circa 9m therefore the 21m requirement could significantly impact site layouts and the character of street scenes. In addition, if this separation distance is applied to a back to side relationship, this could significantly impact site layouts and could result in the inefficient use land, contrary to paragraph 124 of the NPPF.</p> <p>We therefore suggest that point v should be amended to state “a minimum back-to-back distance of 21 metres between directly facing windows, serving habitable rooms, subject to design and layout”.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>We believe that the Plan sufficiently addresses strategic planning issues relevant to the area.</p>

Please give reasons for your answer	<p>Policy DM31 details a set of standards for new residential developments to ensure a high standard of amenity for existing and future users of land. Requirements for new residential developments are set out in sub-clauses i) to v).</p> <p>The respondent is concerned about sub-clause iv) which requires '<i>a garden size which is at least a minimum of 705 metres in depth, where possible</i>' and, more generally, guidance on external requirements for outdoor amenity space in the supporting text.</p> <p>Local Plan's that incorporate policies that impose generic design standards for external amenity space on Specialist Older Persons' Housing are problematic as they rarely consider the specific needs of the intended residents (typically a 79-year old widow) and disregard the expertise of specialist providers in delivering these types of development.</p> <p>Housing designed for a range of potential occupiers, in particular families require a greater amount of outdoor space to accommodate space for children's play, space for light exercise and socialising. This is not however the case for retirement living apartments and other forms of specialist housing more generally.</p> <p>Successful retirement living developments do not require large areas of external amenity space, as garden areas tend to be used for passive recreation and visual amenity A smaller quantum of high-quality external amenity space, in conjunction with the internal communal facilities, is better suited to meet the needs of the intended residents.</p>

	We would therefore respectfully request that more flexibility on external amenity space standards is provided for specialist forms of residential development (such as specialist older persons' housing/ student housing etc.).

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes

<p>Please give reasons for your answer</p>	<p>N/A</p>
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>In an urban setting, where residential development is within a short distance of public open space, the need to achieve wider sustainability policy objectives can mean that to insist on a minimum length or area of private amenity space, irrespective of the functional needs of future occupants, is not always justified.</p> <p>What matters, is whether the occupants have access to the benefits that come from outdoor exercise and the natural environment, with all the health benefits it brings and with the added advantage that access to public open space of makes social contact easier and leads to a more vibrant local community.</p> <p>This particularly applies to urban settings with their advantages of easy access to other facilities by means of active travel: schools, shops, hospitality venues, etc.</p> <p>By removing any requirement for a specific size of private outdoor amenity space, other than for functions such as hanging out the washing, spaces for growing salads or flowers, or generally personalising that space within reasonable limits, planning policy will enable more effective use of high value urban land and therefore promote more sustainable urban communities, where residents care more for their shared outdoor spaces than for private gardens that many neglect and may find a burden to maintain.</p> <p>The proposed change of policy here will increase choice for some households want a house for their small family but who would otherwise be denied access to decent sustainable living space with any totally private outdoor amenity space, in soulless blocks of flats.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>N/A</p>

4. Proposed Changes	Delete "iv" in DM31 and renumber 'v' as 'iv'. Add new 11.110 after 11.109 and re-number: "Proposals to provide shared private space between neighbouring dwellings within a new development will be considered if they can demonstrate outcomes more likely than not to improve neighbourly relations. However a clear distinction will need to be made between such private space for the development's residents only and public open space available to all." Add after existing 11.113 new paragraph and re-number: "In urban settings near public parks or high quality public open spaces (such as a canal towpath or riverside right of way), a reduction in private amenity space standards may be acceptable if access to those public spaces is within 5 minutes on foot."
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	I wish to provide evidence of public and academic support for these changes.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

Please give reasons for your answer	<p>As explained above, we agree with the proposal to extend the DEA at Membury Estate. It is the correct approach to extend existing DEAs. Such extensions ensure efficiencies are maximised and that development is best or properly integrated with functioning employment areas.</p> <p>However, the DEA should (at a minimum) be extended to reflect the boundary of the ESA2 site allocation. As drawn, it removes the eastern part of the site allocation.</p> <p>It is also appropriate to further extend the DEA to include the whole of the site being promoted by Walkers, including the airfield runway. In addition, we consider that the existing Walker Logistics complex (to the south), which comprises employment floorspace, should be included in the DEA.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No

<p>Please give reasons for your answer</p>	<p>We write on behalf of our client, BYM Capital, who welcomes the opportunity to engage with West Berkshire Council (WBC) on the Local Plan Review. This letter comprises BYM Capital's representations to the Proposed Submission (Regulation 19) West Berkshire Local Plan Review 2022-2039 consultation, specifically in relation to its land holdings at Overbridge Square, Hambridge Lane, Newbury, RG14.</p> <p>The Overbridge Square site comprises five buildings: Leat House, Wier House, Bridge House, Lock House and Mill House (see plan at Annex 1). The site also contains an underutilised car park located off Hambridge Lane, adjacent to the Overbridge Square residential development. The five existing buildings were converted from office to residential use via Permitted Development Rights (PDR) in 2016. The buildings are occupied and therefore the site has an established residential use and character.</p> <p>Representations - Policy DM32 Designated Employment Areas</p> <p>Throughout the Local Plan Review, areas previously known as Protected Employment Areas (PEAs) are renamed Designated Employment Areas (DEAs). Draft Policy DM32 states that DEAs 'are specific locations designated for business uses (office, industry, storage, distribution). These areas are safeguarded for such uses and for the role they play in meeting the future economic needs of the District.'</p> <p>As defined by the Regulation 19 Policies Map, the entire Overbridge Square site is designated within a wider DEA known as Hambridge Road/Lane (see extract at Annex 2). Considering that all five buildings located at Overbridge Square are in established residential use, the land is no longer considered a suitable part of a DEA designation.</p> <p>Draft Policy DM32 seeks to safeguard employment land, however, there is no longer any existing office (or other employment) use at the Overbridge Square site, and this is unlikely to change within the Plan period, given the residential leases within the existing buildings.</p> <p>In light of the above, BYM Capital object to the extent of the Hambridge Road/Lane DEA designation as it is not justified and, therefore, it fails the soundness test. To remedy this objection, BYM Capital request that the land comprising the Overbridge Square site, shown at Annex 1, is removed from the Hambridge Road/Lane DEA designation.</p> <p>This approach would be consistent with changes already proposed to DEA's elsewhere in West Berkshire, for example at Newbury Business Park:</p> <ul style="list-style-type: none"> • Emerald House, Newbury Business Park, London Road: PDR approval on 8th May 2018 for the change of use from offices (B1a) to 138 residential units (C3). This site was consequently removed from DEA through the Local Plan Review. • Lambourn House, Derby House and Nexus House, Newbury Business Park, London Road: PDR approval on 15th May 2017 for the conversion of Lambourn House, Derby House and Nexus House into 129 x 1 bed flats (C3). This site was consequently removed as DEA land through the Local Plan Review.

	<p>These sites have been removed from DEA designations due to their residential use. BYM Capital requests that this approach is appropriate for the Overbridge Square site in Newbury.</p> <p>Concluding Remarks</p> <p>The existing use of the Overbridge Square site is residential. It does comprise any employment uses, and hence, its inclusion within a proposed Designated Employment Area is not justified nor appropriate. We request that the site be removed from the DEA designation, as has been the case with other comparable residential sites in the District.</p> <p>We reserve the right to appear at the Local Plan Review Examination in Public should our objection not be suitably addressed by WBC.</p> <p><i>See attachments for photos.</i></p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	It is considered that the local plan has been prepared in accordance with the relevant European, national and local policy context
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes
Please give reasons for your answer	Protection of employment sites, as set out in policy DM32, is strongly supported. The location of office development towards accessible centres is also supported and proposals for the redevelopment of redundant office stock within employment areas should consider this to ensure the optimum use and employment provision on suitable sites.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer

4. Proposed Changes	<p>If not included in supporting text for SP21 as proposed above, propose including instead in the supporting text of DM32, with the wording below, to align with the Council as landowner's aspirations for the LRIE site as set out in Executive Report EX4219 approved on 9 June 2022 and supporting documents, available at https://info.westberks.gov.uk/lrie:</p> <p>12.11 In addition, the London Road Industrial Estate has scope for intensification of employment use within the plan period to maximise the potential of the site. Some mixed use development may be appropriate, provided that no net loss of employment floorspace results from that development.</p> <p>12.12 The Council-owned London Road Industrial Estate (LRIE) currently has an estimated 23,000 sqm of employment space (Avison Young Development Brief 2020) occupied by 36 businesses that employ about 300 people. Following a review taking into account evolving economic drivers, market demand and the district's ambition to be carbon neutral by 2030, a revised Delivery Strategy for LRIE approved by Executive on 9/6/22 aims to increase employment floorspace on the site by at least 30%, safeguard 300 jobs and create at least 200 new jobs by 2030.</p> <p>12.13 The Council as freeholder will work with leaseholders to deliver environmental enhancements on the site including on carbon net zero, nutrient neutrality, sustainable drainage and biodiversity net gain. Further details to be set out in an LRIE Place-making Strategy which will be submitted as a Supplementary Planning Document in due course and progressed through the statutory planning process in parallel with the Local Plan Review.</p> <p>12.14 The Council as landowner is promoting alternative provision outside the LRIE to mitigate the loss of the playing field. This approach is supported by Sport England and aligns with the Council's Playing Pitch Strategy. The exact location of the alternative provision will be determined at the point at which a planning application for redevelopment of the playing field is submitted, accepting that it is for the statutory planning process to determine whether or not redevelopment of the former football ground should be permitted.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	The policies do not follow national advice
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	

<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	No
<p>Please give reasons for your answer</p>	The policy states that “The redevelopment and regeneration of land within DEAs to provide additional business development that meets the needs of the District will be supported”. In light of the Refresh report on the regeneration of the LRIE including the Faraday Road football ground as an area for redevelopment despite it not being part of the DEA, this policy should provide greater clarity on the approach to land on the periphery of DEAs.
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	Furthermore, it is proposed that the following be added to the policy: “Redevelopment and regeneration of land within DEAs should still seek to protect and/or enhance green infrastructure and community facilities where possible, including in the DEA’s immediate surroundings”.
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
<p>5. Independent Examination</p>	
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	Yes

6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	We do not foresee any legal compliance issues
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.	Yes

* Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	<p>It is clear that 'policy DM32 – Designated Employment Areas', as referred to in Appendix 4 (Paices Hill/Youngs Industrial Estate) of the West Berkshire Local Plan Review 2022-2039, does not provide an accurate reflection of the potential employment area which could be included within the designation.</p> <p>As per application reference 20/02527/OUTMAJ ('the extant permission'), Decision Notice attached as Appendix 2 and Location Plan attached as Appendix 3, it is clear that the land to the south of Paices Hill/Youngs Industrial Estate ('our client's site') has been granted outline permission for:</p> <p>'the construction of an industrial estate to comprise up to 15,917 sqm of flexible commercial floorspace for B8 (Storage or distribution), Former B1 (c) now Class E (Commercial, Business and Service Use) and B2 (General Industry) with associated access, parking, infrastructure and landscaping. Matters to be considered: Access.'</p> <p>As such, we consider that our clients site represents a logical expansion to the designated employment area given its outline permission. With this in mind, we consider that the existing designation should be extended to include the extant permission area at Blacks Lake Track Racing, Blacks Lake, Paices Hill, Aldermaston, Reading, RG7 4PG.</p> <p>For the reasons as described above, we do not consider that the plan is positively prepared (as it does not seek to meet the area's objectively assessed need in terms of economic growth and management), nor is it justified (does not considered the extant permission) or consistent with national policy (does not seek to support economic growth and productivity, taking into account both local business needs and wider opportunities for development in line with para 81).</p> <p>Attachment: Appendix 1 and 2</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	We do not foresee any Duty to Co-operate issues
4. Proposed Changes	<p>We consider that our client's site at 'Blacks Lake Track Racing, Blacks Lake, Paices Hill, Aldermaston, Reading, RG7 4PG', which comprises the extant permission (Decision Notice attached as Appendix 2), should be included as part of/ an extension to the employment designation at Paices Hill/Youngs Industrial Estate.</p> <p>This would result in a natural extension of the designated employment area and given it comprises outline planning permission for industrial uses, would be a logical extension to this designation. We therefore consider that the site should be given have weight in terms of 'policy DM32 – Designated Employment Areas' of the West Berkshire Local Plan Review 2022-2039.</p>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	Should the Inspector consider it necessary for us to further justify the expansion of the designated employment area, we would be happy to participate at the examination hearing session.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	No comments.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes	Yes

* No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes
Please give reasons for your answer	<p>Wokingham Borough Council (WBC) notes that West Berkshire District Council's (WBDC) employment evidence identifies a need for 50,816sqm of office floorspace and a combined 91,109sqm industrial, storage and distribution floorspace over the plan period. Policy SP20 details the strategic approach to addressing economic development needs, Policy SP21 sets out a number of site allocations for industrial land, and Policy DM32 identifies Designated Employment Areas where businesses uses are to be safeguarded. No allocations are made in the Plan for additional office floorspace.</p> <p>The Plan supports the redevelopment and regeneration of existing employment sites. It therefore retains, and identifies new, employment sites which can be intensified to meet some of its identified needs. New allocations for industrial use are anticipated to provide 58,400sqm. However, this is insufficient to meet the full identified needs for industrial land, resulting in a shortfall of 32,709sqm industrial floorspace. There are no estimates provided of how much floorspace the wider policy approach might deliver, and no specific land is identified to provide for office use. As a result, the full identified office need of 50,816sqm remains unmet. WBDC has approached WBC and other duty to co-operate partners to seek assistance in meeting these needs.</p> <p>Like WBDC, WBC has commissioned a new Employment Land Needs Review, to better understand future economic needs, for both office and industrial/warehousing. The key emerging finding of the report is an increased need for industrial/warehousing floorspace across Wokingham Borough, which reflects changes in both the local and sub-regional economy. The report suggests there is no need for additional office floorspace.</p> <p>Work is ongoing to assess the availability, suitability and deliverability of land promoted for economic uses within Wokingham Borough, as part of the Housing and Economic Land Availability Assessment (HELAA), which will help to inform whether these economic needs can be met. However, given the scale of the need for new industrial/warehousing floorspace arising in Wokingham Borough and the small number of sites promoted for economic uses, at this stage WBC confirms that it is considered highly unlikely any of the unmet office or industrial needs from WBDC will be able to be accommodated. Indeed, WBC cannot guarantee meeting the need arising from Wokingham Borough.</p> <p>WBC recognise and support WBDC's ongoing recognition of the arising employment needs and the attempts to reach agreement with other authorities. WBC requests continued engagement with WBDC on this matter as part of the duty to cooperate.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	WBC notes that separate duty to co-operate discussions are ongoing between the two authorities. WBC welcomes these discussions progressing

<p>over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p><See attached report for full representation - DPDS obo TVCC_attachment_full rep_redacted> DM32 Designated Employment Areas</p> <p>The Chamber supports the general ambition of Policy DM32 in so far as it seeks to support and expand business in West Berkshire. The Chamber also supports redevelopment and regeneration of land within DEAs to provide additional business development where it is needed, including the statement in supporting text paragraph 12.7 that this is to be supported to attract inward investment.</p> <p>However, in line with previous representations on Policy SP20, the Chamber believes that this policy could go even further in setting out a positive strategy for the future of the Designated Employment Areas which would guarantee appropriate development or redevelopment and help ensure the best conditions for attracting inwards investment are created.</p> <p>Therefore, the Chamber would like to reiterate earlier comments that a development-plan and SEA led framework of positive, criteria-led site specific policies for each Designated Employment Area should be included within the Local Plan.</p> <p>Conclusion</p> <p>These representations have outlined West Berkshire Chamber of Commerce's concerns as to the soundness of the Local Plan preparation process. The primary concern of WBCC is that the proposed policies regarding designated employment areas, in particular SP20 as exemplified by the Council's approach to LRIE, are unsound and do not go far enough to ensure that the development or redevelopment of DEAs across the district is sustainable and creates the best conditions for attracting inward investment. This is as well as the policies potentially not being appropriately justified. As they are, the policies run the risk of enabling piecemeal development at Designated Employment Areas which would result in a lower quality of land available for business use as well as potentially resulting in vital environmental investigation not being able to take place.</p> <p>As such, various modifications have been proposed to ensure the soundness of the Local Plan. Most importantly, a development-plan and SEA led framework of criteria-based site specific policies for each DEA should be adopted which would guarantee that development or redevelopment is sustainable and can create the best conditions for inwards investment and regeneration. There have also been several wider minor comments and representations on other policies throughout the Local Plan.</p> <p>To conclude, these representations have concluded that the Proposed Local Plan is potentially unsound and we therefore respectfully request that the sentiments of these representations be fully considered and reflected in further Modification to the submitted Local Plan.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	Yes
<p>5. Independent Examination</p>	We believe it is necessary as we are proposing significant modifications and the content of our representations is important.

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	Yes
<p>Please give reasons for your answer</p>	<p>Draft LPR Policy DM32 states that proposals for employment uses will continue to be focused within DEAs. Whilst this is a logical and sustainable approach, it is important to ensure that this is balanced with supporting the needs of the rural economy as set out at draft LPR Policy DM35 and other existing employment sites. The NPPF sets out a positive approach towards supporting the rural economy and is clear that planning policies should enable 'the sustainable growth and expansion of all types of business in rural areas' (paragraph 83). It is therefore important that the LPR does not restrict rural employment development in rural areas and that draft LPR Policies DM32 and DM35 are applied together.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	Yes
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>Nuleaf (the Nuclear Legacy Advisory Forum) is the Local Government Association (LGA) representative body on nuclear legacy wastes and decommissioning. We are directly supported by over 100 local authorities and national park authorities across England and Wales and speak for the wider LGA. West Berkshire Council is a member of Nuleaf, though this submission has been prepared without any engagement with representatives of the local authority.</p> <p>Nuleaf's remit encompasses all aspects of the management of the UK's nuclear waste legacy. Our primary objectives are:</p> <ul style="list-style-type: none"> • to provide a mechanism to identify, where possible, a common local government viewpoint on nuclear legacy management issues; • to represent that viewpoint, or the range of views of its member authorities, in discussion with national bodies, including the Welsh and UK Government, the Nuclear Decommissioning Authority (NDA) and the regulators; • to seek to influence policy and strategy for nuclear legacy management in the interests of affected communities; and • to develop the capacity of its member authorities to engage with nuclear legacy management at a local level. <p>Our Radioactive Waste Planning Group is an expert forum for senior land-use and waste planning officers, which aims to support the development of Local Plans and Minerals and Waste Plans. Nuleaf advocates that all Local Plans and Minerals and Waste Plans, particularly those covering areas which include parts of the UK's nuclear infrastructure, should have policies on decommissioning and radioactive waste management. More information on our suggested approach is set out in our Briefing Paper 11: Approaches to Radioactive Waste Management in Local Plans.1</p> <p>The absence of clear policies leaves local authorities and communities less able to influence proposals for the disposal, storage, management or transportation of radioactive materials within their area. We therefore welcome the inclusion of Policy DM33 on Development within AWE, covering the Aldermaston and Burghfield sites. This policy is primarily aimed at facilitating appropriate development within the two sites.</p> <p>We also note that the West Berkshire Minerals and Waste Local Plan 2022-37 (M&WP) includes Policy 13 that covers the management of all relevant categories of radioactive waste and requires that a need is proven before the development of any new waste facilities is permitted.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>We would propose that DM33 is amended to reference Policy 13 of the M&WP i.e. that any new development at the AWE sites which has implications for radioactive waste management should have to demonstrate need and be based primarily in managing waste that has arisen locally.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>

Please give reasons for your answer	AWE supports the inclusion of this policy which continues the express policy support for development at Aldermaston (AWE A) and in Burghfield (AWE B). This will enable AWE efficiently to develop, modernise, rationalise and consolidate its estate footprints in accordance with the Government's investment programme, which responds to the Government's policy commitment to UK's defence and security needs. AWE's land use requirements and aspirations for AWE A and AWE B are dynamic, reflecting the mix of buildings and uses on the sites and the Government's investment programme which is focussed, inter alia, on enhancing the sites' science, research and development capabilities together with related production facilities. The Policy is in accordance with Paragraphs 20 (b), 97 (b) and 187 of the NPPF in terms of a strategic policy which sustains, protects and promotes the established strategic uses at the two sites and their important national security and local employment functions.

	<p><i>Para 12.13</i></p> <p>AWE is broadly supportive of this paragraph but this should also refer to other enabling works in connection with the development and uses covered under Policy DM33.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	Yes
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p><i>Para 12.12</i></p> <p>In accordance with the representation made against Para 4.37, AWE requests an amendment to the paragraph in order to align with the NPPF reference and also provide consistency through the Local Plan as to how the function of the sites is explained</p> <p>“Both AWE sites as Government research and defence establishments are core to sustaining the UK Government’s national defence and security and in particular the delivery of the warhead contribution to the national and international nuclear deterrent.”</p> <p><i>Para 12.13</i></p> <p>Suggested text</p> <p>“Planning permissions should also positively consider any enabling works and/or the temporary use of land needed in connection with site optimisation and phased delivery of the development”</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	Yes

Please give reasons for your answer	<p>Please find set out below specific representations submitted on behalf of the Secretary of State for Defence on the consultation. Please note that these comments should be read in addition to those to be provided by colleagues in respect of MOD Safeguarding interests. The comments set out below relate to wider MOD estate related interests.</p> <p>1. Background</p> <p>1.1 The Defence Infrastructure Organisation (DIO), on behalf of the Ministry of Defence (MOD) welcomes the opportunity to comment on the West Berkshire Local Plan Review Proposed Submission (Regulation 19) Consultation. The DIO is the estate expert for defence, supporting the armed forces to enable military capability by planning, building, maintaining, and servicing infrastructure on behalf of the MOD.</p> <p>1.2 The MOD has significant land interests within the area covered by West Berkshire, including both of the Atomic Weapons Establishments (AWE) at Aldermaston and Burghfield, Denison Barracks and RAF Welford. These are important operational defence sites with an enduring requirement to support national defence outputs.</p>

2 National Planning Policy Framework

2.1 The Council will be aware of the requirements of paragraphs 97 and 187 of the National Planning Policy (NPPF) as quoted below:

“97. Planning policies and decisions should promote public safety and take into account wider security and defence requirements by:

b) recognising and supporting development required for operational defence and security purposes, and ensuring that operational sites are not affected adversely by the impact of other development proposed in the area.”

“187. Planning policies and decisions should ensure... Existing businesses and facilities should not have unreasonable restrictions placed on them as a result of development permitted after they were established.”

3 Representations

3.1 Whilst not directly referencing paragraph 97 of the NPPF paragraph 12.11 of the West Berkshire Local Plan Review 2022-2039 explains that planning policies and decisions should recognise and support development required for operational defence and security purposes. This paragraph forms the supporting text for proposed policy DM33.

3.2 Policy DM33 supports development where it directly sustains the functioning of each of the AWE sites as Government research and defence establishments. DIO **supports** this Policy.

3.3 Denison Barracks and RAF Welford are operational defence sites and for the same reasons as DM33, these sites should also have a local plan policy that supports development at these sites where it is required for operational defence and security purposes. Please see enclosed plans of these two sites.

3.4 As currently proposed Policy DM33 of the Local Plan is very helpful to the decision maker when dealing with development proposals that sustains the function of each of the AWE sites. Whereas at Denison Barracks and RAF Welford the decision maker would have before them a defence related policy but would be unable to afford it weight as it directly relates to two different establishments, albeit establishments that also fall within the description of paragraph 97 of the NPPF and with the same purpose to provide defence outputs.

3.5 Paragraph 16d) of the NPPF sets out that Plans should ‘contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals’. We contend that whilst the principle of Policy DM33 is correct, the absence of a similar policy does not assist the decision maker when it comes to making decisions for any future planning applications for developments at both Denison Barracks and RAF Welford.

3.6 To ensure that it is clear to the decision maker how to react to development proposals at Denison Barracks and RAF Welford, and for consistency with the approach the Plan takes for the other two defence sites at Aldermaston and Burghfield, DIO requests that an additional policy for these two sites is also included in the Local Plan.

3.7 Paragraph 4.41 of the West Berkshire Local Plan Review 2022-2039 quite rightly quotes parts of paragraphs 97 and 187 of the NPPF in regard to the need to protect the ongoing day-to-day needs of defence sites, and to ensure that they are not affected adversely by the impact of other development proposed in the area, and to ensure that unreasonable restrictions are not placed on them as a result of development permitted after they were established.

3.8 These paragraphs support the provision of policy SP4 (Atomic Weapons Establishment Aldermaston and Atomic Weapons Establishment Burghfield) whose purpose is, amongst other considerations, to prevent developments that pose an external hazard to the AWE sites. While Denison Barracks and RAF Welford do not have a defined Detailed Emergency Planning Zone (DEPZ) like they do at the AWE sites, they are however, also at risk from third party developments that could affect adversely the operations of these sites and place unreasonable restrictions on them contrary to paragraphs 97 and 187 of the NPPF. For the same reasons as paragraph 4.41 and the purpose of policy SP4 the Plan should also include a policy that protects the day-to-day needs of Denison Barracks and RAF Welford.

3.9 As explained above, for consistency in decision making, all defence related sites must be treated in the same way. While we recognise policy SP4 is specific to the DEPZ and therefore including Denison Barracks and RAF Welford within this Policy would be ambiguous, a sentence could be included within a specific new Policy for these two sites within the Plan. This should include provision that non-defence related development in the areas around a defence site will not be supported where it would adversely affect defence related operation or capability.

4 Conclusion

4.1 DIO is supportive of the principle of policy DM33 which recognises the important land use role of defence establishments but has significant concerns that the Plan is not covering wider MOD interests and therefore is ambiguous by focusing on only two of the four defence sites within Plan area. Whilst we appreciate the particular consideration of AWE given the operations carried out at Aldermaston and Burghfield the Plan as currently written is inconsistent by providing support for future operational developments at the two AWE sites but is unclear to the decision maker on how to consider defence related activity and capability development proposals at Denison Barracks and RAF Welford in a fair and consistent way. Neither does the Plan make provision to protect Denison Barracks and RAF Welford from third party development proposals in the same way as it does for the two AWE sites.

4.2 Accordingly, as currently written the West Berkshire Local Plan Review would fail to meet the criteria of paragraph 16 of the NPPF.

[See attachments Denison Barracks site plan and RAF Welford site plan]

3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	
4. Proposed Changes	<p>3.10 With the above in mind and for the avoidance of doubt DIO considers that the following Policy should be included within the submission version of the Plan: Development within and effecting Denison Barracks and RAF Welford a) Development within Denison Barracks and RAF Welford will be supported where it directly sustains the functioning of these defence establishments. b) Non-defence related development in the areas around a defence site will not be supported where it would adversely affect defence related operation or capability.</p> <p>3.11 DIO also considers that the following text would be suitable to support the above recommended Policy: Denison Barracks and RAF Welford provide important outputs that support national defence activities. The NPPF outlines that planning policies and decisions should recognise and support development required for operational defence and security purposes, ensuring that operational sites are not affected adversely by the impact of other development proposed in the area and existing businesses and facilities should not have unreasonable restrictions placed on them as a result of development permitted after they were established.</p> <p>4.3 The inclusion of DIO's recommended policy in addition to Policies SP4 and DM33 would enable the decision maker to consistently and fairly apply the following principles across all defence sites within the Plan area in accordance with paragraphs 97 and 187 of the NPPF by: - recognising and supporting development required for operational defence and security purposes, - ensuring that operational sites are not affected adversely by the impact of other development proposed in the area, and - ensuring unreasonable restrictions are not placed on them as a result of development permitted after they were established.</p> <p>4.4 Incorporation of this Policy, in addition to Policies SP4 and DM33 for AWE would ensure that for defence requirements the Plan would contain policies that are clearly written and unambiguous and which are evident to the decision maker how to react to development proposals for all defence establishments within the Plan area in accordance with Paragraph 16d) of the NPPF.</p> <p>We would be grateful to receive further consultations as the Local Plan progresses and the opportunity to make further comments as necessary.</p>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	Whilst we consider soundness can be achieved by way of an additional policy as suggested in our representations, should the Council not recommend such changes we would wish to reserve our right to explain in person our concerns to the Inspector at the forthcoming Examination in Public.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.	

* Yes * No	
Please give reasons for your answer	<p>We have reviewed the policies and site allocations in relation to our remit (flood risk, biodiversity and conservation of fisheries and the water environment, groundwater quality and contaminated land, water quality and water resources) and have provided you with comments below. These comments are not soundness issues but will provide some clarity to the plan.</p> <p>We make no comments or suggest amendments to policies SP4 or DM33 of the draft plan. The Environment Agency is part of an offsite planning group who are consulted by West Berkshire District Council on any development proposals in the Detailed Emergency Planning Zone (DEPZ) of the AWE sites. We have permitted a number of activities and installations within AWE sites under our regulatory requirements and influences and would expect that AWE, or any other organisation undertaking new activities in developments considered under DM33 to consult with us if their activities would require environmental permits.</p>

<p>Please give reasons for your answer</p>	<p>Newbury Retail Park, owned by our client, is a successful and currently fully let Retail Park with recent new tenants including Lidl, Pets at Home, Hobbycraft and Deichmann. JD Sports and Cancer Research UK are both opening stores in 2023. A Tim Hortons drive-thru restaurant is also opening in 2023. It is necessary for the owner/our client to take a long term view in relation to the Parks future as the Local Plan runs up to 2039.</p> <p>Draft Policy DM34 seeks to safeguard identified existing retail parks within the District for retail and leisure uses, including Newbury Retail Park. However, it also states that proposals within these areas should either individually, or cumulatively with other such proposals, have no significant detrimental impact on the vitality and viability of Newbury town centre or other nearby centres. The supporting text (para. 12.15) specifically references that any proposals would be subject to the sequential test, where appropriate.</p> <p>The policy, as currently drafted, therefore restricts the future use of the identified retail parks to retail and leisure use (with the supporting text highlighting that the areas perform well and it is important that such locations are safeguarded for retail and leisure uses to ensure the health and diversity of the local economy) but at the same time, it conversely constrains any future expansion/alteration of these locations for further retail and leisure uses without the NPPF retail tests (sequential and impact) being met.</p> <p>Over the Plan period, this constrains future development/redevelopment of the site and does not meet any of the Monitoring Indicators for the Economy and Town Centres set out in Appendix 1. The past 10 to 15 years have seen the retail economy significantly change and the need for flexibility to ensure retail floorspace can be adapted and repurposed as the retail market is dynamic and continues to evolve. The draft policy does not allow for this and is overly stringent.</p> <p>The SA/SEA Environmental Report (Nov 2022), Appendix 6 states that, as worded, the policy is "likely to have a positive impact on access to local services and facilities that are located within retail parks". However, we do not consider this will be the case as the proposed designation and draft policy is overly restrictive, does not support the evolution of retail and leisure uses or allow any flexibility for alternative uses and adaptation to respond to changing shopping patterns and the resulting retail climate.</p> <p>The policy is also based on a historic evidence base (West Berkshire Retail and Commercial Leisure Assessment (WBRCLA) 2016 – now approaching seven years old). The Council's Retail Background Paper (Dec 2022) acknowledges this stating that the Council is committed to a full review of the District's needs in the first five year review of the Local Plan and highlights that this is also because of the changes to retail, locally and nationally since the WBRCLA was published.</p> <p>We therefore consider draft Policy DM34 is not sound as it is neither justified nor is it consistent with national policy. To ensure that the future of the Newbury Retail Park site can be realised (whether it be for continued use as retail or for alternative uses) the policy should therefore be removed from the draft Local Plan.</p>

Please give reasons for your answer	The IKEA and Dunelm retail warehouses are not an integral part of the retail park centred on Sainsburys Calcot. IKEA, in particular, is very prominent in the landscape and causes severe traffic congestion at times. Pincents Lane, and its junction with the A4, is not suitable for the volume of traffic attracted by large retail premises. Any future development proposal for the IKEA or Dunelm site should not be for retail.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	"Pincents Lane, Calcot" should be renamed "Calcot Retail Park" and its boundary in the Policies Map should be redrawn to exclude the Dunelm and IKEA sites.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	

<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	Yes
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	Yes
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	<p>Regarding retail, the Plan identifies a hierarchy of centres and designates primary shopping areas. It supports development for town centre uses that contributes to vitality and viability of these centres and provides for changes of use away from retail, only in certain circumstances. The Plan also designates a number of Retail Parks to safeguard retail and leisure uses. It does not identify any specific allocations for retail floorspace.</p> <p>The Plan sets out a commitment to review retail evidence within the first 5 years of the Plan, owing to significant changes brought about by Brexit and COVID19 making it impractical to update its evidence in a meaningful way. WBDC's existing evidence from 2016 (The Western Berkshire Retail and Commercial Leisure Assessment jointly prepared with WBC, RBC, and BFBC) identified a need for 25,600sqm comparison retail floorspace in West Berkshire to 2036. This represents a significant need, and it is not clear how far this has been met, or whether the identified needs remain appropriate. WBC has embarked upon an update to retail and commercial leisure evidence as part of its own emerging Local Plan Update. Given the significant need previously identified, WBC stresses the importance of WBDC's evidence being updated as soon as possible and the Plan being reviewed as necessary to address this in the short term.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	WBC notes that separate duty to co-operate discussions are ongoing between the two authorities. WBC welcomes these discussions progressing

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	N/A
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>We welcome Policy DM35, which encourages a prosperous rural economy. We support the Council's position to encourage appropriate proposals which make use of previously developed land.</p> <p>However, we hold reservations in relation to point j., which we consider to be inconsistent with the requirements of the NPPF. Para 111 of the NPPF reads as follows:</p> <p><i>Development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe.</i></p> <p>DM35 point j. states that proposed developments should not generate traffic of a type or amount inappropriate for the rural roads which could be detrimental to their character and use. The NPPF is clear in stating that development should only be prevented refused on highway grounds where there is an unacceptable impact on highway safety or the impact on the road network would be severe. Character and use are not referenced within the NPPF and, as such, we consider the DM35 (j) to be inconsistent with national policy.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	N/A
<p>4. Proposed Changes</p>	<p>We therefore recommend that Policy DM35 is revised as detailed below (additions shown <u>underlined</u> deletions shown with a strikethrough).</p> <p>[...]</p> <p>j. It would not generate traffic of a type or amount inappropriate for the rural roads, byways or restricted by ways affected by the proposal or require improvements to these roads, byways, or restricted byways which could be detrimental to their character and use by motorised and non-motorised traffic <u>an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would not be severe.</u></p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	Yes
<p>5. Independent Examination</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No

<p>Please give reasons for your answer</p>	<p>Draft Policy DM35 encourages development proposals that contribute to sustaining a prosperous rural economy and does allow for proposals for economic development in the countryside, which is supported. However the Estate objects to the proposed amendments to the policy which are considered to be very onerous and conflicting with the aims of national policy:</p> <p>a) The proposals demonstrate that the business can make a long term contribution to the rural economy Criteria (a) is now significantly more onerous than previously drafted and clear guidance is not given as to how this policy criteria may be demonstrated. This will preclude many proposals for economic development from coming forward.</p> <p>d) Where new buildings are proposed the landowner has not disposed of, or converted, any buildings to a residential use in the previous 3 years which could have met the needs of the development proposed The proposed amendments to criteria (d) are unjustified and significantly more onerous, and prejudice businesses that may have had to previously adapt to earlier changes in circumstances. This criteria fails to accord with Paragraph 82(d) of the NPPF that requires planning policies to be flexible and to enable a rapid response to changes in circumstances, enabling conditions in which businesses can invest, expand and adapt.</p> <p>h) New or replacement buildings are located within or adjoining an existing group of buildings and further expansion into the open countryside is avoided This prohibits economic development on any site that does not already have existing buildings or is not already adjoining existing buildings. This approach suggests a presumption against new buildings for economic development, where in fact this is supported under Paragraph 84(a) of the NPPF.</p> <p>j) It would not generate traffic of a type or amount inappropriate for the rural roads, byways or restricted byways affected by the proposal or require improvements to these roads, byways, or restricted byways which could be detrimental to their character and use by motorised and non-motorised traffic This criteria is not justified and goes beyond that required by national policy. The assessment of highways impacts should be consistent with Paragraph 111 of the NPPF, which states only that "Development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe."</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>

Please give reasons for your answer	<p>In the absence of the wider context that can be provided to decision makers in development management by landowners and rural businesses, it can be difficult to appreciate the longer term objectives behind a particular development proposal in the countryside. Therefore the creation of West Berkshire Rural Business Forum in late 2022 is greatly welcomed.</p> <p>We see a need for some mention of this Forum in the new Local Plan. This would encourage better relations between the Council and rural businesses and landowners facing the immense challenges of climate change, and with the wider rural community. As their elected representatives, the Council - especially in its role as Local Planning Authority - should lead initiatives such as Whole Estate Plans that should help achieve more timely decisions and better outcomes for all.</p> <p>In the absence of this proposed change, policy for sustaining a prosperous rural economy may not achieve its aim as successfully as it should with the more proactive involvement of the Council through the Rural Business Forum. In particular, we see this change as encouraging the production of Whole Estate Plans by larger estates.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	N/A
4. Proposed Changes	Add to end of 12.18: "Reference to Whole Estate Plans, prepared with the active involvement of appropriate officers of the Council and other public bodies, will normally be taken as evidence in support of specific development proposals. In their absence, decisions may be delayed while equivalent comprehensive evidence and negotiations have to take place."
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	To give evidence as to how we see the Rural Business Forum assisting with achieving the objectives of the policy.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes
Please give reasons for your answer	<p>The policy as worded does not include any reference to enabling development or tacit support for leisure-based uses. Equally, the Council currently only recognises enabling development in the context of the preservation of historic buildings. Whilst 'enabling development' is a concept set out in the NPPF in reference to funding the retention and repair of heritage assets, this has a wider scope beyond the protection of heritage assets as confirmed through legal judgements such as R (on the application of Thakeham Village Action Ltd) v Horsham District Council, 29 January 2014 where paragraphs 213 and 214 of that judgement state that:</p> <p><i>"I do not believe that the principles of enabling development are limited to ventures that would protect a heritage asset or a facility that serves or is accessible to the public. And I also reject the submission that those principles do not extend to a financial contribution that would support development undertaken by another company on another site."</i></p>

	<p><i>The jurisprudence does not support either of those concepts. The scope for enabling development is wide. There are many ways in which it may serve a proper planning purpose. It may fund works of repair or improvement to a listed building. It may fund the protection of a particular habitat. It may fund the provision of a swimming pool for public use, or some other public facility. But that is far from being an exhaustive list of the benefits it may help to provide.”</i></p> <p><i>Policy DM 35 - Supporting the Rural Economy is objected to in its present form. The policy needs to be amended to include the above additional criterion, which will allow for a wider and more appropriate definition of enabling development, which in turn will help to maintain rural enterprises, like NCGC, into the foreseeable future.</i></p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	
4. Proposed Changes	<p>Accordingly, appropriate wording should be added to the policy to provide greater flexibility and allow for proactive assistance to be given to local community and leisure facilities that will otherwise fail, as follows:</p> <p><i>xii. Enabling development will be permitted in circumstances where the capital generated will be used to improve the facilities of the rural enterprise, such that it can continue to provide economic, environmental and social benefits for the community in the long-term future. Planning permission will only be granted for enabling development schemes, if sufficient justification is provided to demonstrate that the level of capital generated is proportionate to the cost of providing the improved facilities, this being secured by S106</i></p>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	To enable the Local Plan to recognise the further assistance needed for rural business and leisure facilities and to underpin a robust mechanism to allow enabling development to come forward to help realise this, where appropriate.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	It is noted that draft LPR Policy DM35 has been amended to refer to 'sustaining' the rural economy rather than 'supporting' rural economy, which differs to the wording of the NPPF. For clarity and to ensure that development proposals relating to the rural economy are considered positively, it is recommended that Policy DM35 is amended to refer to 'supporting the rural economy'.

	<p>The overall provision for development relating to rural businesses is welcomed and the deletion of the need to satisfy 'all' of the criteria and to justify that other existing buildings cannot be used is also welcomed. This will help to enable a balanced judgement to be taken having regard to the overall criteria and the economic, social and environmental benefits. However, the requirement for proposals to 'make a long-term contribution' to the rural economy is considered to be onerous and unjustified. Draft Policy DM35 also continues to include considerations which are not unique to development in rural areas (e.g. impacts on heritage) but which are covered by other LPR policies, and therefore the policy as currently worded has unnecessary repetition.</p> <p>The NPPF is clear that planning policies should 'enable the sustainable growth and expansion of all types of business in rural areas' (paragraph 84). It is important therefore that the LPR does not seek to restrict rural employment uses, but rather takes a positive approach which supports diversification and the vitality of rural settlements.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>The following changes are recommended in order to ensure the soundness of the Plan in line with NPPF paragraph 35:</p> <p><i>'Sustaining a Prosperous Rural Economy Supporting the Rural Economy'</i></p> <p><i>'a. The proposals demonstrate that the business can make a long term contribution to the rural economy'</i></p> <p><i>'It would not have a detrimental effect on the fabric, character and setting of historic buildings or other heritage assets'</i></p> <p>Please see covering letter for further details. <see attachment></p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
<p>5. Independent Examination</p>	<p>The Englefield Estate consider that the plan in its current version is not sound and would like the opportunity to set out how alterations could be made to the plan and its evidence base to enable it to be found sound and progress to adoption.</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No</p>	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>Whilst the principle of allowing farm diversification proposals is supported, the Estate objects to draft policy DM26 as drafted, particularly criteria (e), (h) and (j).</p> <p>e) When new buildings are proposed, the business has not disposed of a building or converted one to a residential use in the previous 3 years which could have met the need of the development proposed; As above, criteria (e) fails to accord with Paragraph 82(d) of the NPPF that requires planning policies to be flexible and to enable a rapid response to changes in circumstances, enabling conditions in which businesses can invest, expand and adapt. This is an unnecessary criteria and prejudices those where this situation may have arisen as a result of requiring adaptation to changing circumstances. The policy, therefore, is unjustified and fails to accord with national policy.</p> <p>h) Any internal and external changes do not harm the significance of a heritage asset in accordance with Policies SP9 and DM12 This criteria simply requires consideration of other development plan policies and therefore, for clarity and ease, should be removed as it is unnecessary duplication.</p> <p>j) It does not generate traffic of a type or amount inappropriate for the rural roads affected by the proposal or require improvements to these roads which could be detrimental to their rural character. As above, this criteria is not justified and goes beyond that required by national policy. The assessment of highways impacts should be consistent with Paragraph 111 of the NPPF, which requires only that "Development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe."</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>

* Yes * No	
Please give reasons for your answer	<p>We welcome Policy DM36, which recognises the importance of farm diversification businesses in supporting the rural economy.</p> <p>However, we note that point h. requires development proposals not to harm the significance of a heritage asset in accordance with Policies SP9 and DM12. As set out in our comments to Policy SP9, we consider that this Policy is inconsistent with national policy, as it seeks to afford the same level of protection to designated and non-designated assets.</p> <p>Turning into point j., we echo our comments to Policy DM35. We consider that this point is inconsistent with the NPPF, by requiring that proposals are assessed against their impact on the character of the road. National Policy is clear that development should only be prevented refused on highway grounds where there is an unacceptable impact on highway safety or the impact on the road network would be severe.</p> <p>[...]</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	N/A
4. Proposed Changes	<p>We therefore recommend that Policy DM36 is revised as detailed below (additions shown <u>underlined</u> deletions shown with a strikethrough).</p> <p>[...]</p> <p>h. Any internal and external changes do not harm the significance of a <u>designated</u> heritage asset in accordance with Policies SP9 and DM12;</p> <p>j. It does not generate traffic that is <u>detrimental to highway safety</u> or amount inappropriate for the rural roads affected by the proposal or require improvements to these roads which could be detrimental to their rural character.</p>

<p>Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>This comment is submitted by Lambourn Parish Council and Lambourn Neighbourhood Development Plan.</p> <p>Policy DM37: Equestrian and Horseracing Industry</p> <p>Lambourn Parish Council/Lambourn Neighbourhood Development Plan reiterates the comments made by the Parish Council in response to the previous Regulation 18 Consultation on WBC's LPR. The Council considers that Policy DM37 does still blur the distinction between general equestrian use and use by the horse racing industry. The distinction should be made clear, in the interests of both the HRI and general equestrian users, and show it seeks to meet the area's objectively assessed needs.</p> <p>Lambourn Parish Council / Lambourn Neighbourhood Development Plan supports the robust application and enforcement of the requirement to justify a lack of <i>demand for an alternative horseracing industry-related use (which should be the first priority)</i> (12.53) before redevelopment or permanent change of use of a horseracing facility. Supporting or ancillary facilities, as highlighted in 12.52, are an integral part of the success of the horseracing industry in the Parish of Lambourn.</p> <p>The Parish Council /LNDP also agree that proposals for development be in keeping with the character and appearance of the local area and prevent the spread of the built form in the countryside and the AONB.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	Not qualified to say
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	I am concerned that the LPA does not consider the health and wellbeing of racehorses when making planning decisions in Lambourn and the surrounding area. Pollution has a negative impact on horse health.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	Not qualified to say
4. Proposed Changes	The LPA should actively seek to curb development at Membury which might harm the health of racehorses in and around Lambourn.

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>This comment is submitted by Lambourn Parish Council and Lambourn Neighbourhood Development Plan.</p> <p>Policy DM37: Equestrian and Horseracing Industry</p> <p>Lambourn Parish Council/Lambourn Neighbourhood Development Plan reiterates the comments made by the Parish Council in response to the previous Regulation 18 Consultation on WBC's LPR. The Council considers that Policy DM37 does still blur the distinction between general equestrian use and use by the horse racing industry. The distinction should be made clear, in the interests of both the HRI and general equestrian users, and show it seeks to meet the area's objectively assessed needs.</p> <p>Lambourn Parish Council / Lambourn Neighbourhood Development Plan supports the robust application and enforcement of the requirement to justify a lack of demand for an alternative horseracing industry-related use (which should be the first priority) (12.53) before redevelopment or permanent change of use of a horseracing facility. Supporting or ancillary facilities, as highlighted in 12.52, are an integral part of the success of the horseracing industry in the Parish of Lambourn.</p> <p>The Parish Council /LNDP also agree that proposals for development be in keeping with the character and appearance of the local area and prevent the spread of the built form in the countryside and the AONB.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>

<p>Please give reasons for your answer</p>	<p>Introduction</p> <p>Lambourn Trainers' Association ('LTA'). LTA represents licensed racehorse trainers in Lambourn, one of the key stakeholders of the success of the Horse Racing Industry (HRI) in Lambourn (known as the Valley of the Racehorse), along with others including Jockey Club Estates (JCE), the owner and operator of Lambourn Training Grounds.</p> <p>The HRI cluster in and around Lambourn is identified on a plan titled Lambourn Horseracing Industry Cluster at Appendix 1 [see attachment]. The success of the HRI is vital to protecting Lambourn's racing heritage dating back to the 18th Century and making a substantial contribution to the economic, cultural and environmental well-being of the area. LTA also recognises that the HRI cluster in Lambourn is located in the North Wessex Downs AONB, where development proposals would need to be considered sensitively, and that the HRI makes a contribution to the character of the AONB.</p> <p>In this context, LTA wishes to ensure that the new Local Plan contains appropriate and clear policies to protect the HRI in Lambourn and to support its future success while recognising its location being within the AONB. Further, a Neighbourhood Plan for Lambourn is being prepared by Lambourn Parish Council, which is understood to include policies for the HRI. While LTA is broadly supportive of the draft Local Plan, it is considered that further amendments are necessary to ensure the effectiveness and the soundness of the Plan, taking into account evidence for the HRI in the area, and a Neighbourhood Plan being prepared for Lambourn.</p> <p>EVIDENCE FOR THE HORSE RACING INDUSTRY IN LAMBOURN</p> <p>Lambourn HRI Cluster</p> <p>Great Britain is the birthplace of modern thoroughbred horseracing. The high quality of racing has been central to the substance and long-term success of the country's HRI. Britain's reputation for the training and breeding of thoroughbreds as well as for high horse welfare standards, which are governed and regularised by the British Horseracing Authority ('BHA'), is internationally renowned.</p> <p>Lambourn's HRI Cluster is shown on the plan at Appendix 1 [see attachment]. It comprises: JCE owned public training grounds (or gallops), private gallops, training yards (existing and sites with planning permission) concentrated in Lambourn (including Upper Lambourn) and facilities and infrastructure supporting the HRI. The concentration of the facilities and establishments in Lambourn makes the HRI cluster a success and secures its long term viability.</p> <p>Lambourn's HRI cluster plays a crucial part in Britain's horseracing industry and international reputation. The Lambourn area is a nationally important location for the HRI. We support paragraph 4.16 of the consultation document which identifies that Lambourn serves as the heart of one of the most important areas for horseracing in the country.</p> <p>The importance of maintaining HRI facilities in Lambourn cannot be overstated. Lambourn HRI has grown since 2006, facilitated by JCE's significant investment in the public training grounds and wider infrastructure which has, in turn, encouraged investment in new and existing training yards, and is once again a successful HRI cluster. However, its reputation and JCE's investment alone cannot maintain</p>

Lambourn HRI's vitality and success as the HRI competes with the international market in terms of investment in the industry. Appropriate local policy will be critical in maintaining Lambourn HRI's success. Opportunities for further growth also need to be recognised given its contribution to the rural economy and British horseracing. Public training grounds such as those operated by JCE in Lambourn are training facilities which are made available to all licensed trainers. Due to economies of scale achievable, they enable trainers to access higher quality and a greater variety of facilities than would otherwise be possible in all but a very few cases. As well as being used by many trainers throughout their careers, public training grounds are particularly important in enabling start-up training businesses to operate without the capital or maintenance costs of their own training facilities.

In the context of the above, protection of the HRI's success can be achieved through local planning policy that balances the need to enhance and grow the HRI, while protecting the crucial features of the industry i.e. the existing facilities and establishments which make the HRI cluster.

Evidence Base

The Council's evidence cited is the Study of the Key Effects of the Horseracing Industry on the North Wessex Downs Area of Outstanding Natural Beauty dated March 2007, though this does not provide the most up to date evidence for the HRI. A report entitled "*Horse Racing in Lambourn Valley: The Industry's Economic and Social Impacts*", dated January 2019 by SQW ('the HRI Report') (Appendix 2) [see attachment] was commissioned by JCE with support from West Berkshire Council. The HRI Report describes the HRI in Lambourn and sets out the economic and social impacts of the HRI as well as the industry's needs which should be taken into account in the plan making process.

The study area is Lambourn Valley 'equine cluster' (defined as the parishes of Lambourn, East Garston and Great Shefford) and focuses on the racehorse training industry. The HRI Study identifies that there is a concentration of trainers' yards (where racehorses are cared for by trainers) in Upper Lambourn and along the B4000 Ashbury Road leading back towards Lambourn, owing to the good access to the training grounds operated by JCE and other private gallops.

In summary, the following findings are drawn from the HRI Study:

There are over 1,500 racehorses in yards, being cared for and exercised by over 500 FTE staff.

Organisations and businesses relating to the HRI (veterinary practices, horse transportation, equine surfaces and equipment, farriers, media companies specialised in racing, inns with rooms, yard & stable hygiene services, saddlers, and stud farms) in the study area employ over 160 FTE staff.

Taking into account direct and indirect Gross Added Value (GVA) contribution and induced employment and GVA contributions, the HRI's contributions to Lambourn Valley were 745 FTE staff (representing 30% of the area's total jobs) and GVA of £22 million per annum.

Whilst there are a number of trainers whose horses do not use JCE's public training grounds on a regular basis, the number of horses which do is a useful barometer of the health of the HRI in Lambourn. In 2006 the daily average was 367 horses using the public training grounds. In 2022 the daily average was 649. Several racehorse trainers from a wider area benefit from the opportunity to use JCE's facilities on a "casual" (per visit) basis; in 2006 this equated to 615 horses visiting rising to 1,286 in 2022.

In addition to the economic contribution, the HRI Study identifies the following challenges and development needs:

There is a lack of low-cost housing for staff employed in the HRI which meets the industry's requirements reflecting the nature of jobs involving animal husbandry and anti-social hours. Accommodation to be built by trainers for their staff and/or the HRI should be seen as key infrastructure for the HRI.

There are ongoing concerns with safety of horses accessing the gallops due to increase in traffic. Measures such as horse crossings and horse walks have been installed, but there is a need to ensure that appropriate mitigation and the necessary infrastructure to ensure safety of horses and other road users are considered as part of future development proposals in the area.

It is critical that the HRI continues to make investment in the area to secure Lambourn's position as a vibrant and successful equine cluster in the long term, which would in turn encourage further investment in the HRI in the area. In order to facilitate this, an appropriate policy framework is required to ensure that the HRI in Lambourn is safeguarded, its needs are met and its growth is supported.

In addition to the Council's evidence on the contribution that the industry makes to the character of the area set out in the West Berkshire Landscape Character Assessment, the SQW HRI Report should be included as evidence for the Local Plan.

POLICY DM37 – EQUESTRIAN AND RACING INDUSTRY

Structure of the Policy

Policy DM37 deals with equestrian and horseracing industry. It should be noted that the HRI's operational requirements and characteristics are entirely different from non-racing equestrian industry. Without a clear distinction separating the policy between the HRI and non-racing equestrian development, the policy would be ineffective in responding to the needs of the HRI, or worse it would fail to protect the HRI.

In this regard, the first part of the policy under the heading "Equestrian Development" appears to consider non-racing related equestrian development, as it refers to the guidance and standards set out in the Equine Industry Welfare Guidelines and the British Horse Society. These standards are not necessarily applicable to the HRI as HRI related developments (e.g. training yards) are regulated and licensed by the British Horseracing Authority ('BHA'). However, equestrian development could also mean development related to the HRI and the supporting paragraphs do not make this point clear. We therefore object to the structure of Policy DM37, as it is not clearly written, is ambiguous and it is not evident how a decision maker should react to development proposals contrary to paragraph 16 of the NPPF. We request that

the heading for the first part of the policy is amended to “Equestrian Development (*not related to Horseracing Industry*).”

Supporting text for Policy DM37 makes the interpretation of the policy unclear, particularly with the terms “equestrian activities and related development”, “the equestrian industry”, “equestrian development” and “the horseracing industry” being used interchangeably without definitions in the paragraphs 12.35 to 12.44.

Paragraph 12.35 states that equestrian activities and related development and the horseracing industry are characteristic features of West Berkshire and are of particular importance to the rural economy. There is evidence of the economic contribution the HRI makes to the economy, and the needs and impacts of the HRI industry are different from the other equestrian activities. Therefore, supporting text should follow the same structure as the policy and provide headings for each industry. More specifically, paragraph 12.38 to 12.44 should have a heading “Equestrian Development (not related to Horseracing Industry)”.

Protection of Existing HRI Facilities

We support the aspect of the policy under the heading of North Wessex Downs AONB Horseracing industry, which seeks to protect the existing establishments and facilities from uses and redevelopment not related to the HRI. As evidenced in the earlier section, contributions Lambourn’s HRI makes to Britain’s horseracing industry and the local economy are significant. Given that the area is located within AONB and developments are generally constrained, it is of critical importance that existing facilities and establishments in connection with the HRI are safeguarded for the ongoing maintenance and success of the HRI. Once an existing facility is lost, it would put the HRI’s vitality at risk as existing facilities are not easily replaceable without further development within the AONB. Therefore, robust policy is needed to ensure that existing establishments and facilities in connection with the HRI are given the necessary safeguarding.

Policy DM37 expects to retain “suitable” existing establishments or facilities under criterion i) and its application in terms of protection of existing establishments and facilities is provided in criterion iii) by way of the tests of suitability and necessity outlined in the supporting text at paragraphs 12.51 and 12.53. For clarity, criterion i) and part of criterion iii) should be combined as these are dealing with the protection of existing facilities and establishments.

In terms of suitability test, we object to criteria a), d) and e) for the following reasons:

- 1 a) The location of the site relating to the form and character of the settlement is not relevant to the suitability test relative to the retention of the existing facilities. It is a test which is ambiguous and not clear how this aspect is assessed. Any facilities or establishments which were formally used in connection with the HRI should be protected regardless of its locational relationship to the form and character of the settlement. The principle of the existing facilities location in the context of the settlement should not be a factor which determines the suitability of existing facilities/establishments to be

The impact on local roads including the safety of horses and riders and traffic using the highway should not be a factor informing the suitability of the “existing” establishments or facilities relating to the HRI. It is not clear how the decision maker will assess the impact of the retention of the existing establishments and facilities relating to the HRI for the HRI on local roads. Rather, the HRI’s existing establishments and facilities should be protected from impacts on local roads from new developments in the HRI Cluster and investment should continue to be made to improve accessibility and highway safety for all road users. The ambiguous criterion such as this will undermine the importance and need to protect the existing HRI establishments and facilities.

The availability of sources of labour and the accommodation of personnel on site or in the locality should not be a relevant factor in assessing the suitability of the site, as the availability of accommodation of personnel on site may not always be relevant to the particular use and the availability of sources of labour is not a material consideration, as the maintenance of the HRI will attract labour regardless of the availability of sources at that particular point in time. For example, the availability of labour is not questioned in the development of traditional employment developments in the determination of planning applications. It is considered that such a test goes beyond the role of planning. Moreover, this would make any development difficult to secure planning permission, given that the lack of labour within or near the HRI area is commonplace.

In order to ensure the effectiveness of the policy to safeguard the existing facilities and establishments to ensure the long-term future of Lambourn’s HRI, criteria a), d) and e) should be deleted.

Protection and Development of facilities and infrastructure supporting equestrian development

At paragraph 12.36, it explains that the shared facilities and infrastructure which support the wider equestrian industry including the HRI, commercial and recreational markets will be considered in accordance with Policy DM35 which considers developments sustaining a prosperous rural economy. Policy DM35 seeks to prevent proposals resulting in the loss of existing business sites and premises in the countryside unless it can be demonstrated that no alternative economic use can be found, and that the proposal does not have a significant negative impact upon the vitality and viability of the local economy of the surrounding area.

As the HRI Report, the HRI is supported by a range of businesses which are located in Lambourn because of the HRI. Without these businesses, the HRI in Lambourn will not be as successful and viable a cluster as it can be. Therefore, it is considered that the protection of existing businesses supporting the HRI does not go far enough under Policy DM35 and should be protected under Policy DM37, as follows:

Existing support facilities and infrastructure which support the HRI in Lambourn will be protected unless the applicant can demonstrate that there is no alternative economic use for the site within the HRI and

that the proposal does not have a negative impact upon the vitality and viability of Lambourn horseracing industry cluster.

Housing for the HRI

Housing for the HRI on site or in close proximity to facilities/establishments is key infrastructure for the future of the HRI, reflecting the nature of jobs in the HRI involving animal husbandry and anti-social hours. Therefore, we support the second part of criterion iii) which supports proposals for associated new residential accommodation in the countryside where genuine need is suitably demonstrated through a business case and accommodation cannot be reasonably secured within existing settlements. This is a separate point from the first part of criterion iii) which seeks to protect existing facilities and establishments for the HRI. Therefore, the second part of criterion iii) should be a new criterion.

Supporting text at paragraph 11.45 for Policy DM23 which addresses housing related to rural workers makes it clear that housing in the countryside essential for the HRI is supported by Policy DM37. Paragraph 11.45 provides the following guidance in terms of new housing development for the HRI:

Where new stabling or breeding facilities are proposed, together with residential accommodation, financial viability will need to be demonstrated together with supporting evidence to show the new facility has sufficient need to require a worker to be permanently living on the site in the long term. It should be noted that a restricted occupancy condition may be applied.

It is considered that this should be moved to paragraph 12.55 so that evidence needed and key considerations for residential accommodation relative to the HRI are set out in Policy DM37. In particular, the imposition of a restricted occupancy condition for the accommodation of those employed in the HRI is critical to the HRI. If a restricted occupancy condition is not imposed, racing staff/employee accommodation will be lost to non-HRI occupants. This will threaten the function and viability of the HRI establishments or facilities, leading to a permanent loss to non-HRI related uses. This point should be addressed in the supporting text.

Suggested changes to new criterion iv) is as follows:

- 1 *New residential accommodation in association with the HRI in the countryside proposed as a standalone development or as part of proposed new stabling or breeding facilities will be permitted where genuine need is suitably demonstrated through a business case and accommodation cannot reasonably be secured within existing settlements.*

Supporting the Expansion of the HRI

The significance and importance of the HRI in Lambourn and the Council's desire to support the expansion of the industry as being of particular importance to the local rural economy are recognised in the consultation document (e.g. paragraph 11.45 expressly states that the Council wishes to retain and support the expansion of the horseracing industry and Policy DM37 also states that the horseracing industry's sensitive growth will be allowed for). Paragraph 12.46 provides further guidance on sensitive development and growth of the HRI. It is understood that the emerging Neighbourhood Plan for Lambourn will look to include more detailed design guidance specific to the HRI. As such, Paragraph 12.46 should refer to the emerging Neighbourhood Plan to ensure there is a clear framework within the Local Plan upon which the Neighbourhood Plan is to be prepared relative to the HRI.

Development Affecting the Horseracing Industry

The HRI Cluster in the Lambourn area is a historical and cultural asset as well as making a significant contribution to the economy. Therefore, it should be safeguarded from developments in and around the area which would threaten the long-term sustainability of the HRI Cluster, such as those impacting on the safety of racehorses accessing training grounds, which they need to do on a daily basis. Any development that would adversely affect the economic, social and environmental role of the HRI should not be permitted. Accordingly, we suggest that the following criteria is added to Policy DM37:

"Any development within or around Lambourn horseracing industry cluster which is likely to have a material adverse impact on the operational use of an existing site within the horseracing industry (such as noise, volume of traffic, loss of paddocks or other open space, access and/or servicing requirements), or which would threaten the long term viability of the horseracing industry, will not be permitted unless the benefits would significantly outweigh the harm to the horseracing industry."

A similar policy in West Suffolk District Council's Local Plan has been effective in protecting the horseracing cluster in Newmarket.

CONCLUSION

The success of the HRI is vital to protecting the Lambourn area's racing heritage making a substantial contribution to the economic, cultural and environmental well-being of the area.

LTA wishes to ensure that the new Local Plan contains appropriate and clear policies to protect the HRI Cluster in and around Lambourn and to support its success while recognising its location being within the AONB. Further, a Neighbourhood Plan for Lambourn is being prepared by Lambourn Parish Council, which is understood to include policies for the HRI. While LTA is broadly supportive of the draft Local Plan, it is considered that amendments are necessary to ensure the effectiveness and the soundness of the Plan, taking into account evidence for the HRI in the area, and a Neighbourhood Plan being prepared for Lambourn.

These representations provide evidence identifying the national importance of the HRI in Lambourn and needs of the industry to sustain and grow its success in the long term, and seek the following amendments to Policy SP1 and DM37 and relevant supporting text for the soundness of the Plan:

To recognise the importance of the HRI to the rural economy and the Plan's commitment to the protection and support for growth of the HRI in the strategic policy;

To identify Lambourn's HRI Cluster in the Policies Map;

	<p>To make a clear distinction between equestrian development not related to the HRI and uses and developments for the HRI;</p> <p>To include the protection of the existing facilities and infrastructure for the HRI in and around Lambourn;</p> <p>To clarify the relevant consideration and necessary protection of new and existing residential accommodation in association with the HRI;</p> <p>To include a policy which protects the HRI from developments within and around the HRI Cluster;</p> <p>To make the suitability test for the protection of the existing HRI facilities and establishments effective and relevant; and</p> <p>To have regard to the emerging Neighbourhood Plan for Lambourn in relation to more detailed HRI related policies and guidance.</p> <p>It is respectively requested that these representations are fully taken into account in the current consultation process. We will be pleased to discuss our representations and work collaboratively with Planning Policy Officers.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Change the sub-heading “Equestrian Development” to “Equestrian Development (<i>not related to Horseracing Industry</i>)”</p> <p>North Wessex Downs AONB Horseracing Industry</p> <p>Whilst conserving environmental quality and countryside character, the horseracing industry in the AONB will be maintained, and its sensitive growth will be allowed for. Within this context:</p> <p>Suitable existing establishments or facilities are expected to be retained. <i>Re-development or conversion away from uses essential to the horseracing industry will be subject to the tests of suitability and necessity outlined in the supporting text to this policy;</i></p> <p>Permanent fragmentation will be resisted; <i>and</i></p> <p><i>Re-development away from uses essential to the horseracing industry will be subject to the tests of suitability and necessity outlined in the supporting text to this policy;</i></p> <p><i>Existing support facilities and infrastructure which support the HRI in Lambourn will be protected unless the applicant can demonstrate that there is no alternative economic use for the site within the HRI and that the proposal does not have a negative impact upon the vitality and viability of Lambourn horseracing industry cluster; and</i></p> <p><i>New residential accommodation in association with the HRI in the countryside proposed as a standalone development or as part of proposed new stabling or breeding facilities will be permitted where genuine need is suitably demonstrated through a business case and accommodation cannot reasonably be secured within existing settlements.</i></p> <p><i>Any development within or around Lambourn horseracing industry cluster which is likely to have a material adverse impact on the operational use of an existing site within the horseracing industry (such as noise, volume of traffic, loss of paddocks or other open space, access and/or servicing requirements), or which would threaten the long term viability of the horseracing industry, will not be permitted unless the benefits would significantly outweigh the harm to the horseracing industry.</i></p> <p>Supporting Text</p> <p>Insert a heading “<i>Equestrian Development (not related to Horseracing Industry)</i>” for Paragraphs 12.38 and 12.44.</p> <p>Paragraph 12.51</p> <p>Suitability test: In considering the suitability of existing establishments, the key factors to consider will be:</p> <ol style="list-style-type: none"> 1 <i>The location of the site relating to the form and character of the settlement;</i> 2 <i>ab.</i> The existing range of facilities on the site and their adequacy for the purpose of training and/or breeding horses, or their capability for adaptation to meet such needs; <i>and</i> 3 <i>bc.</i> The availability of and access to (including the potential for improved access) suitable gallops and training areas; <p><i>The impact on local roads including the safety of horses and riders and traffic using the highway; and</i></p> <p><i>The availability of sources of labour and the accommodation of personnel on site or in the locality.</i></p> <p>Paragraph 12.46</p> <p>“The policy aims to allow for the sensitive development and growth of the horseracing industry whilst conserving environmental quality and countryside character. This includes the built and natural form, and social and economic aspects such as the influence of the horseracing industry as part of the local economy which gives Lambourn its unique character. Outside of settlements, preference will be given to proposals that seek to locate within valleys and avoid development on hilltops or ridgelines. Equine buildings on sites which are open, exposed, elevated or sloped are likely to have particular landscape impacts that may make it difficult to achieve sensitive design solutions. <i>Design guidance specific to the horseracing industry in Lambourn will be considered in the preparation of the emerging Neighbourhood Plan for Lambourn.</i>”</p>

	<p>Move part of Paragraph 11.45 to Paragraph 12.55:</p> <p>“It is acknowledged that there is a need in some circumstances to provide accommodation close to hand in order to provide 24 hour supervision as part of licensing requirements, or for the effective running of an establishment. It is the Council’s preference for workers to be accommodated within existing nearby villages, so as to contribute to the overall sustainability of settlements and limit development in the countryside. Whilst racing charities <i>and training yard owners</i> provide some <i>low cost subsidised</i> and/or hostel accommodation in the area, it is recognised there is still a specific need for affordable single person accommodation in Lambourn. <i>Where new stabling or breeding facilities are proposed, together with residential accommodation, financial viability will need to be demonstrated together with supporting evidence to show the new facility has sufficient need to require a worker to be permanently living on the site in the long term. It should be noted that a restricted occupancy condition will be applied in order to ensure that the accommodation for staff employed in the HRI will not be lost to non-HRI occupants, as it would threaten the function and viability of the HRI establishments or facilities and could lead to a permanent loss of the HRI establishments or facilities.</i>”</p>

1. Do you consider the Local Plan Review is legally compliant?	Yes

* Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	This policy is covering two distinct subjects. It is aiming to control equestrian developments and to support the horseracing industry.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	The policy should be replaced by two: one for proposed equestrian developments and one to support the horseracing industry.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The	Yes

submission of the Local Plan Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>Please give reasons for your answer</p>	<p>*LATE RESPONSE*</p> <p>Policy DM37 recognises the importance of the horseracing industry within the North Wessex Downs AONB. However, this policy should recognise the many different ways of supporting the industry outside of the establishment of new equestrian facilities by affording policy support to the re-use of inappropriate facilities which have ceased use and are unlikely to be re-used in the future. The policy recognises that permanent fragmentation should be resisted but does not provide support for positive solutions where this fragmentation has already occurred, such is the case with the Windsor House Paddocks site and its disconnection with the many uses which have located to Upper Lambourn, which offer a more suitable location and range of facilities for the equestrian industry.</p> <p>The Policy should allow some flexibility for former land used by the equestrian industry which is unlikely to be used again in the future (be it unsuitable location, facilities or fragmentation with other similar uses which inhibits the operation) to be reused in ways that still support the industry. One such instance would be the re-use of such land for housing in appropriate locations, subject to a percentage of the housing being reserved for local workers in the industry. As highlighted housing has an important role to play in maintaining the vitality of Lambourn as a rural service centre linked to the racehorse industry.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	Regarding the Spatial Strategy, a Strategic Environmental Assessment (SEA) has been carried out, as part of the Local Plan appraisal process to promote sustainable environmental considerations in the preparation of the local plan.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by	

<p>the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>We have reviewed Policy DM37 - Equestrian and Horseracing industry Equestrian Development and to strengthen this policy text to ensure that it is sustainably viable and adheres to national policy, we ask that it includes points to ensure any proposed development is not at risk of flood risk and would not cause any detrimental impact to sensitive receptors. See the suggested wording in section 4.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	Yes
<p>Please give reasons for your answer</p>	<p>The Council (Under Section 33A of the Planning and Compulsory Purchase Act) in its Duty to Cooperate with other prescribed bodies/key agencies when preparing the LPR in order to address strategic planning issues relevant to their areas has engaged generally with the Environment Agency during the Plan making process.</p>
<p>4. Proposed Changes</p>	<p>To strengthen this policy text to ensure that it is sustainably viable and adheres to national policy, we ask that it includes these bullet points (the criteria required to satisfy proposals for this type of development) suggested below to ensure any proposed Equestrian development is not at risk of flood risk and would not cause any detrimental impact to sensitive receptors.</p> <ul style="list-style-type: none"> • <i>'Development avoids areas of high flood risk and adheres to the requirements of PPG and NPPF and if required provide a Flood Risk Assessment, in accordance with Policy SP6</i> • <i>'Development will address all environmental concerns/constraints such as wastewater drainage, to ensure the development is sustainable.'</i>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	Yes
<p>5. Independent Examination</p>	<p>We wish to attend the examination for an opportunity to explain the need to include the suggested wording to ensure these types of developments are not at risk of flooding and would not have a negative impact on sensitive receptors.</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes</p> <p>* No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes</p> <p>* No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes</p> <p>* No</p>	Yes

Please give reasons for your answer	No comment.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<ol style="list-style-type: none"> 1 Bradfield College broadly supports Policy DM38 and the allowances for new development in the countryside at existing educational sites. As noted at paragraph 12.56, Bradfield College's campus lies partially outside the settlement boundary of Bradfield College and in order to meet its ongoing operational needs it is necessary for some developments to take place beyond the settlement boundary. 2 In respect of the policy criteria, Bradfield College makes the following comments: 3 This criterion requires a demonstration that there are no existing buildings or accommodation within the site or wider ownership of the establishment, or in proximity that can reasonably be used before development would be considered acceptable in the countryside. The reference to "or in proximity" is of concern to the College. This suggests the College would need to demonstrate that buildings outside of their ownership, but in proximity to the campus, could not reasonably be used to meet the College's needs. It is not reasonable to expect applicants to assess the suitability of buildings outside of their ownership, which may not be available for purchase, to meet their needs. 4 This criterion requires the design of new buildings to respect local building styles and materials. The policy does not allow for contemporary building designs which may introduce alternative building forms and materials which contrast but complement traditional building styles. Bradfield College includes many listed buildings and heritage assets and lies within a Conservation Area. However, recent developments have included contemporary buildings including the Tennis Centre, Music School and Blackburn Science Centre which have successfully assimilated alongside traditional building styles. This policy criteria should be broadened to allow for sensitively designed contemporary buildings where appropriate. 5 This criterion states that new or replacement buildings should be located within or adjoining existing buildings or groups of buildings. A minor correction is requested to improve the legibility: <i>"New or replacement buildings are located adjoining existing buildings or within or adjoining existing groups of buildings."</i> <p>The support for proposals identified through estate plans and development frameworks at paragraph 12.58 is thoroughly welcomed by Bradfield College. The College adopted a Campus Development Framework in June 2019 with the endorsement of West Berkshire Council which establishes a framework for future development across the campus, supported by technical assessments. The Local Plan's support for development frameworks provides reassurance to schools and colleges that the time and effort involved in the production of such documents can be worthwhile and the agreed principles will carry weight in the determination of future planning applications.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<ol style="list-style-type: none"> 1 In respect of the policy criteria, Bradfield College makes the following comments: 2 This criterion requires a demonstration that there are no existing buildings or accommodation within the site or wider ownership of the establishment, or in proximity that can reasonably be used before development would be considered acceptable in the countryside. * Yes	
* No	

<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	The criteria for supporting development on existing educational site do not include any measure of forward planning. There should be included something like 5 or 10 year school population forecast as waiting till the need reasonable need can be actually demonstrated is too late. Schools need time to plan and build for future populations, not the current one.
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>

<p>delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>Proposed Policy DM38 does not give sufficient recognition of the location of Pangbourne College within the AONB and the constraints that places on development within the estate, despite the policy seeking to support the College as an existing educational site.</p> <p>Attachment: Pangbourne College Location Plan</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Proposed policy DM38 Development on Existing Educational and Institutional Sites in the Countryside acknowledges the need for development at existing educational sites. Furthermore, it acknowledges that these sites can be located wholly in the Countryside outside of settlement boundaries. The supporting text to the policy makes specific reference to this being the case for Pangbourne College.</p> <p>Whilst the intent of policy DM38 is supported, it does not acknowledge or make any reference to how development on such sites will be dealt with where they are within the AONB (such as Pangbourne College), which is not considered to result in a policy which has been positively prepared, despite the positive intentions of the Policy.</p> <p>It is considered that in order to address this two changes should be made:</p> <ol style="list-style-type: none"> 1 The policies maps should be amended to give recognition to educational sites within the AONB 2 Additional wording should be added to Policy DM38 in line with that included in Policy DM37 stating: Educational Sites within the North Wessex Downs AONB Whilst conserving environmental quality and countryside character, educational establishments within the AONB will be maintained, and sensitive growth will be allowed for. <p>We also consider that changes are required to the wording of Part F of the Policy which currently places potential unjustified constraints on establishments which may have buildings of heritage value where it is important to preserve their setting or where buildings are required as outliers to the main campus for sporting, boarding or educational purposes. This should be reflected within the policy wording.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	<p>No</p>
<p>5. Independent Examination</p>

Please give reasons for your answer	<p>Although this policy is sound in basic terms in relation to loss, we consider that the policy wording has been weakened compared to the previous version which we had supported.</p> <p>We broadly consider utilising 'viable' as a sole measure in justifying loss of facilities to be problematic and advise against it, although in this instance it could be appropriate due to the relatively good detail set out in supporting paragraphs 12.67 - 12.72 which guide applicants as to the evidence that would be expected. We recommend minor amendment to this to add a criteria seeking evidence that alternative methods of ownership or operation had been explored, such as community or voluntary ownership. This would ensure that viability is tested in a broader sense rather than on purely commercial terms; there have been several examples of supposedly redundant facilities flourishing under alternative management.</p> <p>We also recommend that the supporting text makes clear that sale or rental prices should be based on existing use and condition without development potential to avoid manipulation of lack of demand due to unrealistic values being set.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	
4. Proposed Changes	To either strengthen the policy text more in line with the previous version, or to amend supporting text outlining evidence requirements in line with our comments above.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	As far as Purley on Thames Parish Council are aware.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters	Yes

that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes
Please give reasons for your answer	As far as can be seen the Plan is NPPF compliant. <i>Purley On Thames 2018 Village Plan Action Point summary in relation to proposed policies attached.</i>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	After a revised period, consultation was advised
4. Proposed Changes	None - we would ask the planning authority to take into account the attached observations
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

4. Proposed Changes	Under Policy DM39, we recommend that a site specific approach to community facilities (in terms of loss of) is adopted by the Council in the new Local Plan. This would allow for development opportunities to respond better to current / changing market conditions and demand for development. By adopting this approach, the Local Plan would be positively prepared and consistent with national policy, as it would make effective use of land.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No

Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a	Yes

<p>minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	Yes
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	Yes
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	The NPPF is clear that planning policies 'should identify opportunities for villages to grow and thrive' (paragraph 79) and should enable the development of accessible local services and community facilities such as local shops (paragraph 83d). The overall presumption in favour of local community facilities in draft LPR Policy DM39 therefore reflects the provisions of the NPPF and is supported.
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	The policies do not follow national advice
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable	

<p>over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>Our main concern is that the whole approach to the regeneration of the LRIE is unsound on account of the lack of a proper planning policy context and site-specific guidance to control the development or redevelopment of the area – the strategy is inappropriate for a development of this scale.</p> <p>Our client supports this policy, especially where it states that:</p> <p>Proposals which would result in the loss of an existing local community facility will only be permitted where it can be clearly demonstrated that:</p> <p>iii. To outweigh the loss of the existing facility, the proposal will deliver equivalent or, where possible, greater community benefit which is easily accessible to the community it is intended to serve.</p> <p>Our client further supports the inclusion of “Areas or places for community outdoor sport or recreation” in the definition of local community facilities for the purposes of this policy but would also suggest that the additional phrase “...within walking distance and in the same geographical area as the existing facility ...” be added.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Our client further supports the inclusion of “Areas or places for community outdoor sport or recreation” in the definition of local community facilities for the purposes of this policy but would also suggest that the additional phrase “...within walking distance and in the same geographical area as the existing facility ...” be added.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	Yes
<p>5. Independent Examination</p>	<p>We believe it is necessary as we are proposing significant modifications and the site which is the subject of our core representations is both important and controversial.</p>

4. Proposed Changes	<p><See attached report for full representation - DPDS obo TVCC_attachment_full rep_redacted></p> <p><u>DM39 Local Community Facilities</u></p> <p>The Chamber supports the Council's stated aim of retaining local community facilities, only permitting proposals which would result in the loss of an existing local community facility subject to the clear demonstration of the criteria contained within this policy.</p> <p>The Chamber would like to stress the importance of local community facilities, not just for the citizens of West Berkshire but also for the local economy. Good health, happiness and wellbeing in the workforce increase productivity, alongside the great benefits they have for individuals.</p> <p>Conclusion</p> <p>These representations have outlined West Berkshire Chamber of Commerce's concerns as to the soundness of the Local Plan preparation process. The primary concern of WBCC is that the proposed policies regarding designated employment areas, in particular SP20 as exemplified by the Council's approach to LRIE, are unsound and do not go far enough to ensure that the development or redevelopment of DEAs across the district is sustainable and creates the best conditions for attracting inward investment. This is as well as the policies potentially not being appropriately justified. As they are, the policies run the risk of enabling piecemeal development at Designated Employment Areas which would result in a lower quality of land available for business use as well as potentially resulting in vital environmental investigation not being able to take place.</p> <p>As such, various modifications have been proposed to ensure the soundness of the Local Plan. Most importantly, a development-plan and SEA led framework of criteria-based site specific policies for each DEA should be adopted which would guarantee that development or redevelopment is sustainable and can create the best conditions for inwards investment and regeneration. There have also been several wider minor comments and representations on other policies throughout the Local Plan.</p> <p>To conclude, these representations have concluded that the Proposed Local Plan is potentially unsound and we therefore respectfully request that the sentiments of these representations be fully considered and reflected in further Modification to the submitted Local Plan.</p>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes
Please give reasons for your answer	<p>it is considered that Policy DM39 should provide a mechanism to enable the funding of new and expanded community facility provision. The case for supporting enabling development and the breadth of uses that this can be tailored to is set out in our response to Policy DM35, but for completeness in respect of this separate policy is reiterated below.</p> <p>Whilst '<i>enabling development</i>' is a concept set out in the 2021 NPPF in reference to funding the retention and repair of heritage assets, this has a wider scope beyond the protection of heritage assets as confirmed through legal judgements such as R (on the application of Thakeham Village Action Ltd) v Horsham District Council, 29 January 2014 where paragraphs 213 and 214 of that judgement state that:</p>

	<p><i>"I do not believe that the principles of enabling development are limited to ventures that would protect a heritage asset or a facility that serves or is accessible to the public. And I also reject the submission that those principles do not extend to a financial contribution that would support development undertaken by another company on another site.</i></p> <p><i>The jurisprudence does not support either of those concepts. The scope for enabling development is wide. There are many ways in which it may serve a proper planning purpose. It may fund works of repair or improvement to a listed building. It may fund the protection of a particular habitat. It may fund the provision of a swimming pool for public use, or some other public facility. But that is far from being an exhaustive list of the benefits it may help to provide."</i></p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	
4. Proposed Changes	<p>Accordingly, appropriate wording should be added to the policy to provide greater flexibility and allow for proactive assistance to be given to local community facilities that will otherwise fail, as follows:</p> <p><i>"Enabling development will be permitted in circumstances where the capital generated will be used to underpin the improvement the Local Community Facilities, such that it can continue to provide economic, environmental and social benefits for the community in the long-term future. Planning permission will only be granted for enabling development schemes, if sufficient justification is provided to demonstrate that the investment is necessary and that the level of capital generated is proportionate to the cost of providing the improved facilities, this being secured by S106".</i></p>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	To enable the Local Plan to recognise the further assistance needed for rural business and leisure facilities and to underpin a robust mechanism to allow enabling development to come forward to help realise this, where appropriate.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

Please give reasons for your answer	*Late Response* Policy DM39 Local Community Facilities states that proposals which would result in the loss of an existing local community facility will only be permitted where it can be clearly demonstrated that: <ol style="list-style-type: none"> 1 It is no longer viable to retain the facility in its current use; or 2 The facility is no longer needed and any need arising from its loss can be accommodated within easily accessible existing facilities, or 3 To outweigh the loss of the existing facility, the proposal will deliver equivalent or, where possible, greater community benefit which is easily accessible to the community it is intended to serve.

	<p>NHSPS supports the provision of sufficient, quality community facilities, but objects to specific wording within this policy. We would request that policy wording amendments will be made to support the principle that where the NHS can demonstrate a health facility will be changed as part of NHS estate reorganisation programmes, this will be sufficient for the local planning authority to accept that a facility is neither needed nor viable for its current use, and therefore that the principle of alternative uses for NHS land and property will be fully supported.</p> <p>In order to enable the NHS to be able to promptly adapt its estate to changing healthcare requirements, it is essential that all planning policies enable flexibility within the NHS estate. On this basis, NHSPS would advise the Council that policies aimed at preventing the loss or change of use of community facilities and assets, where healthcare is included within this definition, can potentially have a harmful impact on the NHS's ability to ensure the delivery of facilities and services for the community. In instances where such policies are overly restrictive, the disposal of surplus and unsuitable healthcare facilities for best value can be prevented or delayed, which in turn delays vital re-investment in the NHS estate.</p> <p>The NPPF is clear in stating that Local Plans should adopt policies that "take into account and support the delivery of local strategies to improve health, social and cultural well-being for all sections of the community" (Paragraph 93b).</p> <p>It is important that policies consider that some public service providers, such as the NHS, routinely undertake strategic reviews of their estates. Reviews of the NHS estate are aimed at improving the provision of healthcare services by increasing efficiencies, including through the disposal of unneeded and unsuitable properties. This means that capital receipts from disposals, as well as revenue spending that is saved, can be used to improve facilities and services.</p> <p>Where it can be demonstrated that health facilities will be changed as part of a wider NHS estate reorganisation programme it should be accepted that a facility is neither needed nor viable for its current use.</p> <p>With this in mind, we are keen to encourage that flexibility be granted to the NHS via the wording of any planning policy and the expectations set out in supporting text. This will ensure that the NHS can promptly and efficiently respond to the healthcare requirements of residents through the evolution of its estate.</p> <p>Within the NHS property portfolio, a number of sites are, or may become outdated and no longer suitable for modern healthcare without significant investment. In those cases, and where NHS commissioners can demonstrate that healthcare facilities are no longer required for the provision of services in that particular location, a more flexible approach for public service providers should be applied when considering a change of use to non-community uses.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>We recommend the addition of the following amended wording (shown in bold):</p> <p><i>Proposals which would result in the loss of an existing local community facility will only be permitted where it can be clearly demonstrated that:</i></p> <ol style="list-style-type: none"> 1 <i>It is no longer viable to retain the facility in its current use; or</i> 2 <i>The facility is no longer needed and any need arising from its loss can be accommodated within easily accessible existing facilities, or</i> 3 <i>To outweigh the loss of the existing facility, the proposal will deliver equivalent or, where possible, greater community benefit which is easily accessible to the community it is intended to serve; or</i> 4 the loss or change of use of an existing built community facility is part of a wider public service estate reorganisation. <p>This change would directly address the issues outline above; they would ensure that the NHS is able to effectively manage its estate, disposing of unneeded and unsuitable properties where necessary, to enable healthcare needs to be met.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable	Yes

<p>over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>it is considered that Policy DM39 should provide a mechanism to enable the funding of new and expanded community facility provision.</p> <p>Whilst <i>'enabling development'</i> is a concept set out in the 2021 NPPF in reference to funding the retention and repair of heritage assets, this has a wider scope beyond the protection of heritage assets as confirmed through legal judgements such as R (on the application of Thakeham Village Action Ltd) v Horsham District Council, 29 January 2014 where paragraphs 213 and 214 of that judgement state that:</p> <p><i>"I do not believe that the principles of enabling development are limited to ventures that would protect a heritage asset or a facility that serves or is accessible to the public. And I also reject the submission that those principles do not extend to a financial contribution that would support development undertaken by another company on another site.</i></p> <p><i>The jurisprudence does not support either of those concepts. The scope for enabling development is wide. There are many ways in which it may serve a proper planning purpose. It may fund works of repair or improvement to a listed building. It may fund the protection of a particular habitat. It may fund the provision of a swimming pool for public use, or some other public facility. But that is far from being an exhaustive list of the benefits it may help to provide."</i></p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Accordingly, appropriate wording should be added to the policy to provide greater flexibility and allow for proactive assistance to be given to community assets that will otherwise fail, as follows:</p> <p><i>"Enabling development will be permitted in circumstances where the capital generated will be used to underpin the improvement the Local Community Facilities, such that it can continue to provide economic, environmental and social benefits for the community in the long-term future. Planning permission will only be granted for enabling development schemes, if sufficient justification is provided to demonstrate that the investment is necessary and that the level of capital generated is proportionate to the cost of providing the improved facilities, this being secured by S106"</i></p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>To enable the Local Plan to recognise the further assistance needed for underpin the long-term retention of leisure facilities and to underpin a robust mechanism to allow enabling development to come forward to help realise this, where appropriate.</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes</p>	<p>Yes</p>

* No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>Maintenance of the landscape will depend on the long term on the owners having both the income and the desire to do so. For major and public landscapes, this is straightforward. For small parcels of land attached to housing estates, diversified ownership is not likely to produce this result.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>A common policy for maintenance of all publically used landscape is needed.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	We believe that the Plan accords with the requirements of the relevant legislation.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes
Please give reasons for your answer	We do not support the absolute requirement for the provision of public open space for developments of 10 dwellings or more. We are of the view that this should be assessed based on the site's local context with regard to the availability, quality and proximity of existing nearby open spaces, including the considerations set out in points a-g in the draft policy. We therefore suggest that the draft policy is amended to state "proposals for residential development of 10 or more dwellings should provide high quality public open space, subject to the considerations set out in points a-g". We also suggest that the commentary on public open space in the sub-text of the policy includes an acknowledgement that blue infrastructure (ponds, lakes, rivers etc) is considered as part of the public open space assessment. Such infrastructure can offer a variety of recreational and leisure roles and can form a positive role in new developments.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes

Please give reasons for your answer	We believe that the Plan sufficiently addresses strategic planning issues relevant to the area.
4. Proposed Changes	We suggest that the draft policy is amended to state "proposals for residential development of 10 or more dwellings should provide high quality public open space, subject to the considerations set out in points a-g". We also suggest that the commentary on public open space in the sub-text of the policy includes an acknowledgement that blue infrastructure (ponds, lakes, rivers etc) is considered as part of the public open space assessment. Such infrastructure can offer a variety of recreational and leisure roles and can form a positive role in new developments.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	N/A
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>Please give reasons for your answer</p>	<p>The Berkshire Gardens Trust has a more active role than the draft LPR suggests. It has carried out a survey of historic public parks in Central and East Berkshire, and wishes to extend this to West Berkshire. The Heritage Forum, in consultation with the WBC Heritage Service, will pursue this.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>Whilst the policy is supported in general terms – access to appropriate open space is a key issue for health and well being - as drafted the policy fails to allow for consideration of local context.</p> <p>It states that the provision of on-site public open space should be made “wherever possible”. It will always be “possible” to provide open space on a development site at the expense of alternative land use, but that may not always be feasible, viable or appropriate.</p> <p>The policy should include an appropriate degree of flexibility so that sites can be developed to optimise their potential benefits. For example, where sites are located adjacent to, or otherwise very close to, existing and substantial public open space, such as urban parks or common land, the level of on-site should be adjusted. Without that flexibility, sites may not be utilised effectively and noting the heavily constrained district (including large areas of protected landscape), it is important that the development management policies are flexible to allow for optimising development potential and thereby reduce pressure for further sites.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>We propose that the policy is modified to read “<i>Wherever possible</i>feasible, on-site provision will be made to a standard of 3-4 ha per thousand population. Where more appropriate to the circumstances of the site or the open space requirements, a reduced amount of on-site provision, off-site provision, and/or a financial contribution in lieu of provision will be consideredsupported”.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	Yes
<p>5. Independent Examination</p>	<p>Feltham Properties is a reputable local development company and is concerned that without modification this development management policy will act as barrier to sustainable development that is appropriate for its location and context.</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes * No</p>	Yes

<p>the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>Paragraph 12.87 of the supporting text to Policy DM40 provides that "Public open space should be genuinely available in perpetuity to the public at large. The Council will normally seek the transfer of public open space areas into local authority ownership/control in a condition appropriate for such use, and together with a reasonable sum for their ongoing maintenance".</p> <p>Darcliffe supports the Council in seeking to ensure that public open space is genuinely available in perpetuity to the public at large. However, it would not be practical or desirable for the Council to take transfer of all areas of public open space (particularly where these areas are smaller in scale) and in certain circumstances it may be preferable that these are not transferred.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Accordingly, we would propose that the supporting text is revised to make more explicit allowance for such circumstances e.g. "However, it is recognised that in some instances it may not be practical or desirable for the public open space to be transferred and these situations will be assessed on a case by case basis".</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>Darcliffe have specific land interests within West Berkshire District, which are promoted to be allocated for residential development (Land to the east of Long Lane & south Blackthorn Close, Tilehurst, and Land east of Sulham Hill between Barefoots Copse & Cornwell Copse, Sulham Hill, Tilehurst). In representing Darcliffe, Boyer are well-placed to advise on the appropriateness of the land promoted for development</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes</p> <p>* No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes</p> <p>* No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes</p> <p>* No</p>	<p>Yes</p>
<p>Event Name</p>	<p>Proposed Submission (Reg 19) West Berkshire Local Plan Review 2022-2039</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	Furthermore, Sovereign considers that the Proposed Submission West Berkshire Local Plan Review (2022 – 2039), as currently formulated, is Legally Compliant.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.	

* Yes * No	
Please give reasons for your answer	<p>DEVELOPMENT MANAGEMENT POLICIES</p> <p>The comments set out in this section are intended to assist the Council in developing an approach that is consistent with national planning policies and the tests of soundness. Some comments have been included to assist the Council in developing a series of policies that are both effective and robust. Where possible, suggested amendments have been set out in the response.</p> <p>Sovereign broadly supports the West Berkshire Local Plan Review (2022 - 2039). However, the comments set out below are intended to identify opportunities to improve the effectiveness of the proposed policies.</p> <p>As a general principle, the plan would benefit from consistent numbering, in relation to the paragraphs, policy criteria, and sub-criteria. This would assist the accessibility and the useability of the draft plan, improving the effectiveness of the document substantially.</p> <p>Policy DM40: Public Open Space</p> <p>Paragraph 12.87 of the supporting text to Policy DM40 provides that "<i>Public open space should be genuinely available in perpetuity to the public at large. The Council will normally seek the transfer of public open space areas into local authority ownership/control in a condition appropriate for such use, and together with a reasonable sum for their ongoing maintenance.</i>"</p> <p>Sovereign supports the Council in seeking to ensure that public open space is genuinely available in perpetuity to the public at large. However, it would not be practical or desirable for the Council to take transfer of all areas of public open space (particularly where these areas are smaller in scale) and in certain circumstances it may be preferable that these are not transferred.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	<p>Sovereign considers that in preparing the emerging local plan, the Council have sufficiently complied with the Duty-to-Cooperate.</p> <p><i>3. The Duty-to-Cooperate</i></p> <p>Section 33a of the Planning and Compulsory Purchase Act (2004) ('PCPA') requires that local planning authorities should co-operate with other relevant local authorities, the County Council, prescribed bodies, and other persons, in relation to the preparation of a Local Plan. The Duty requires the Council to engage constructively, actively, and on an on-going basis, in the preparation of the Plan, insofar as it relates to a strategic matter. Strategic Matters include the sustainable development and use of land that has, or would have, a significant impact on at least two planning areas, such as the amount and distribution of housing.</p> <p>Furthermore, the NPPF confirms, at paragraph 26, that government policy comprises that the effective and ongoing working between strategic policy-making authorities and relevant bodies is integral to the production of a positively prepared and justified strategy. It goes on to confirm that, in particular, joint working should help to determine where additional infrastructure is necessary and whether development needs that cannot be met wholly within a particular authority area could be met elsewhere. As such, cooperation clearly relates to maximising the effectiveness of plan preparation.</p> <p>Demonstrated within the effective and on-going joint working undertaken by West Berkshire District Council with the other Western Berkshire HMA authorities, in particular illuminated through the preparation of the SoCG, Sovereign considers that the West Berkshire Local Plan Review is <i>positively prepared</i> and the product of an <i>effective</i> and robust process of cooperation between the authorities.</p> <p>Sovereign therefore considers that the Duty-to-Cooperate has been sufficiently demonstrated in the plan-making.</p>
4. Proposed Changes	5.21 Accordingly, we would propose that the supporting text is revised to make more explicit allowance for such circumstances; e.g., " <u>However, it is recognised that in some instances it may not be practical or desirable for the public open space to be transferred and these situations will be assessed on a case by case basis</u> ".
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	Sovereign benefit from a specific land interest within West Berkshire District, which is proposed to be allocated for residential development under the emerging Policy RSA23: Land Adjoining The Haven, Kintbury. In representing Sovereign, Boyer are well-placed to advise on the appropriateness of the land allocated for development.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan	Yes

Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

Please give reasons for your answer	*Late Response* NHSPS supports the principles identified in Policies DM3 and DM40 There is a well-established connection between planning and health, and the planning system has an important role in creating healthy communities. The planning system is critical not only to the provision

	<p>of improved health services and infrastructure, enabling health providers to meet changing healthcare needs, but also to addressing the wider determinants of health.</p> <p>The NPPF is clear in stating that “Planning policies and decisions should aim to achieve healthy, inclusive and safe places” (Paragraph 92).</p> <p>Identifying and addressing the health requirements of existing and new development is a critical way of ensuring the delivery of healthy, safe, and inclusive communities. On this basis, we support the principle of policies which require an active consideration of health matters.</p> <p>Within the NHS property portfolio, a number of sites are, or may become outdated and no longer suitable for modern healthcare without significant investment. In those cases, and where NHS commissioners can demonstrate that healthcare facilities are no longer required for the provision of services in that particular location, a more flexible approach for public service providers should be applied when considering a change of use to non-community uses.</p>

Please give reasons for your answer	(d) "development should consider the mobile telecommunications requirements of the development" is far too vague and developers will be very able to avoid the requirement. A far more specific obligation is needed for this very important requirement.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	"should consider" in point d should be reworded as "should provide".

<p>Please give reasons for your answer</p>	<p>The policy requires all residential development to enable Fibre-to-the-Premises (FTTP) at first occupation. However, the delivery of super-fast broadband connections is often not in the gift of the developer. The HBF agrees that such infrastructure is important, however, its provision is not essential and should not be considered a barrier to the occupation of new homes as indicated in this policy. Whilst the HBF supports the Council's desire for such infrastructure it is their responsibility to work with the infrastructure provider to ensure its delivery and enable developments to be connected. Given that the type of connection required of development is also set out in Part R of the Building Regulations we consider it unnecessary to set this out in local plan policy. Paragraph relating to Fibre to the Premises should therefore be deleted.</p>

<p>Please give reasons for your answer</p>	<p>The emphasis in this section on a shift away from car travel should take more account of the movement towards more working from home. More importantly, the objective to reduce emissions will be achieved as much by the transition to electric vehicles, which will become progressively more cost-effective, as by abandonment of car usage. People will continue to wish to travel on short and longer journeys, and the convenience of private motoring will continue to be strongly felt. National policy strongly supports the trend to electric transmission.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>The LPR should therefore include a specific plan for the widespread availability of charging points on both private and public premises, existing as well as new.</p> <p>Judging solely from that part of Newbury where I live, bus travel has had only a limited effect. If it is to be better supported, a more strategic approach may be needed, with a wider range of routes.</p> <p>The LPR should not exclude new roads and road extensions, should those prove necessary.</p>

Please give reasons for your answer	At para 12.98 the name of the Kennet & Avon Canal is incorrect. The 'and' should be replaced by an ampersand. We are pleased to note that opportunities at other locations, including use of the Kennet and Avon Canal towpath, will be sought where applicable). Please note however the parenthesis here is incorrect. Finally, it is noted that the canal is incorrectly named at several other locations. At Para 5. 71 and Para 12.130 the name of the Kennet & Avon Canal is incorrect. The 'and' should be replaced by an ampersand.

Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	<p>Yes</p>
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>We do not support the proposed wording for the provision of electric charging points as set in point i of the draft policy. As this does not stipulate a specific provision, it is ambiguous and may cause confusion and uncertainty for developers. The requirement for electric vehicle charging points is addressed by Building Regulations so we suggest that this policy is amended to refer to the latest Building Regulations to take account of current and future requirements. This would reflect the proposed wording of Policy DM44.</p> <p>In addition, it may be not feasible to provide a high provision of charging points on certain sites as in some locations there may be insufficient capacity in the electricity network to support this. Greater flexibility should be incorporated into this policy to address possible constraints of specific sites in accordance with Building Regulations.</p> <p>We therefore suggest that point i of this policy is amended to state "provision of electric vehicle charging points and/or associated infrastructure to future proof provision in accordance with the latest building regulations requirements, where feasible".</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>We believe that the Plan sufficiently addresses strategic planning issues relevant to the area.</p>
<p>4. Proposed Changes</p>	<p>We therefore suggest that point i of this policy is amended to state "provision of electric vehicle charging points and/or associated infrastructure to future proof provision in accordance with the latest building regulations requirements, where feasible".</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it</p>	<p>No</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.	

* Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	Herewith our response to the Local Plan 2022-2039: 50. DM42. Theale already lacks access to facilities by public transport. The Plan makes reference to bus stops etc but Theale does not have adequate public transport. The Plan needs to address this and state how public transport will be increased sufficiently.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No

Please give reasons for your answer	<p><i>c) Comments on other LPR Draft Policies (SP1, SP5, SP23, DM42 and supporting text)</i></p> <p>In non-site-specific terms the LPR policies in respect of spatial strategy, climate change and transport considerations also raise concerns in the context of the tests of soundness. The spatial strategy, climate change policy and transport policy should equally be consistent with National Policy requirements with regard to supporting and promoting sustainable transport.</p> <p>Across the LPR there are concerns that opportunities for policies to support sustainable development and specifically to encourage modal shift (to ensure the plan is positively prepared and consistent with national policy) have not been included. This again raises issues of soundness.</p> <p>The LPR as currently drafted is not consistent with NPPF requirements in terms of meeting the challenge of climate change (paragraphs 152-154). Neither is it consistent with wider national policy</p> <p><i>d) Consideration of Tests of Soundness</i></p> <p>By reference to Response Form Question 2, and in the absence of any wording in the LPR expressly supporting the growth of rail freight provision at Theale and wider omissions in respect of the Spatial Strategy, Climate Change Policy and Transport Policies, the LPR is not considered to meet the tests of soundness for the reasons identified above and summarised below:</p>

- **The Plan is not positively prepared** – it does not respond to identified need and it does not facilitate sustainable development.

- **The Plan is not justified** – The Plan is not justified since it fails to be an appropriate strategy taking into account reasonable alternatives and based on proportionate evidence. The approach of not including either policy or supporting text to identify and support the growth of rail freight at Theale is not the most appropriate strategy when considered against the reasonable alternatives. There is no clear audit trail as to why this approach has been adopted and changed from earlier stages. The Sustainability Appraisal does not appear to consider how a different approach (supporting growth) would perform. As such it is not clear that the SA has been able to robustly inform the content of the LPF. The evidence points to the need to support the growth in rail freight provision both generally and in regional/local plan terms. The sound approach (and reasonable alternative) would be to at minimum provide supporting text which supports growth at Theale and/or to otherwise have this expressed within Policy text itself.

- **The Plan is not Consistent with National Policy** – the LPR is not consistent with NPPF and other relevant national policy in particular with regard to: promoting a sustainable pattern of development; meeting the challenge of climate change; supporting sustainable transport (including supporting modal shift of freight from road to rail, wherever possible, to reduce emissions from the freight sector); considering the specific locational requirements of different sectors in suitably accessible locations. The lack of consistency with National Policy is both in terms of site specific considerations of the Theale Rail-Road Transfer Site under Policy DM 43 and supporting text and more generally in respect of: Spatial Strategy Policy SP1, Climate Change Policy SP5, and Transport and Transport Infrastructure Policies SP23 and DM42.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?

- * Yes
- * No

Please give reasons for your answer

4. Proposed Changes

e) Changes required to make the West Berkshire Proposed Submission (Reg 19) Local Plan Sound

By reference to **Response Form Question 4** changes are identified as being required to make the West Berkshire Proposed Submission Local Plan sound. Specifically, the changes are required to ensure the plan is positively prepared, justified, and consistent with National Policy.

To address the concerns raised with regard to soundness and specifically the failure of the LPR to appropriately identify and support modal shift in the context of transshipment of freight changes are sought in the context of spatial strategy, climate change and transport policies. Additionally, in site specific terms express support for growth of the Rail-Road Transfer Site at Theale is sought. The specific changes required to make the plan 'sound' are as follows: (Changes required shown in red underlined/struck through). It is confirmed that the schedule of required changes has been jointly drafted and agreed between NR, Bectonforth and the Englefield Estate.

Schedule of Required Changes

(e) Policy DM42, Transport Infrastructure

“Proposals for new development will be expected to demonstrate the type and level of travel activity likely to be generated. In order to assist in tackling the climate emergency, this travel activity will be expected to be minimised by design of developments that support low levels of travel with a focus on local journeys that can be made sustainably *and that support more sustainable freight distribution practices. Development which encourages modal shift of goods and people to more sustainable forms of transport will be supported.* Developments will be required to be supported by a range of infrastructure associated with different transport modes. New development will only be supported where the relevant transport infrastructure is delivered in a timely manner. Where required....”

- a. Connections and improvements
- b. Walking, cycling and
- c. Secure cycle and
- d. Improvements to
- e. Provision of real
- f. New or improved
- g. Improvements to
- h. Works to
- i. Provision of electric vehicle charging points and associated infrastructure; *and*
- j. Measures to improve the movement of people and goods by rail.*

(f) Policy DM42, Supporting Text (paragraph 12.95)

12.95 The development and delivery of transport infrastructure will need to contribute to the aims of Policy SP23 and.....Transport Plan. There is a need for development to assist in the provision of deliverable measures that will contribute towards modal shift to sustainable modes for travel for residents and employees of both new, and if possible, for existing communities *and towards modal shift to sustainable modes for the transport of freight.*

	Early discussion with West Berkshire Council with regard to the representations made and suggested changes would be welcomed.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather	Yes

<p>than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>The policy advises that 'travel activity will be expected to be minimised by the design of developments that support low levels of travel with a focus on local journeys that can be made sustainably.' However, travel activity should only be expected to be minimised by car. Travel activity by other sustainable modes should be welcomed for the economic benefits that accrue from travel.</p> <p>The policy fails to reference accommodating electric scooters in the event that their use on the external highway network becomes legal. This should be rectified to allow flexibility in approach should such legislation change during the plan period.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	Yes
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Review the use of 'travel activity' to be focussed on use of car, supporting travel activity by other sustainable modes.</p> <p>Flexibility should be included with regards to use of scooters should such become legal during the plan period</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	No

West Berkshire Local Plan Review to 2039 – Regulation 19 Proposed Submission Consultation

We write on behalf of our client Green Park Reading No.1 LLP, which is the owner of Green Park. Green Park Reading No.1 LLP (“GPR”) is ultimately wholly owned by Mapletree Investments Pte Ltd (“Mapletree”). This response relates to the Regulation 19 Proposed Submission Consultation of the West Berkshire Local Plan Review (“the LPR”), which is open for comment until 3 March 2023. Deloitte previously responded to two Regulation 18 Consultations on behalf of GPR on 21 December 2018 and 5 February 2021.

In writing this letter, we do so under the statutory provisions of a Regulation 19 consultation under the Town and Country Planning (Local Planning) (England) Regulations 2012.

Background to Green Park

Since acquiring GPR in 2016, Mapletree has been reviewing the Park’s potential, undertaking asset management and considering future opportunities. GPR is keen to support the Council in achieving sustainable development in the Borough.

Green Park is a premier business park located in the Thames Valley area, serving the office needs of Reading, Wokingham and West Berkshire. It is situated on the border of the three local authority areas, covering a 79-hectare plot offering high quality office stock and associated amenities, located around a central body of water.

Green Park is accessed from the A33 relief road and is located south of Reading town centre. The Park is home to a variety of office occupiers across a range of business sectors. A range of business accommodation is provided, ranging from larger corporate headquarter floorplates to smaller business start-up areas.

The Park continues to be highly successful with ongoing interest from both global and smaller companies for office space. In 2016/17, Aukett Swanke undertook a refresh of the Fosters masterplan prepared in 1998 in order to update the development potential of the Park. Mapletree continue to look for opportunities to respond to market demand and manage the planned growth of the Park in a sustainable way. Securing an allocation for employment uses on land at 900 South Oak Way forms part of this ambition (referred to hereafter as the Site (see Figure 1 below)).

[See attached map - Deloitte obo Green Park Reading No1 LLP_Figure 1]

Previous Response to Regulation 18 Draft Local Plan

On behalf of GPR, Deloitte submitted formal representations in response to the LBW Pre-Publication (Regulation 18) Draft Local Plan on 21 December 2018 and 5 February 2021. As part of the previous consultation, GPR proposed a series of changes, including the below:

- Requested that Green Park was included as a Designated Employment Area;
- Requested an emphasis on the need for the continued enhancement of sustainable transport options and infrastructure, in particular the M4 corridor, which serves Green Park;
- Requested support for Data Centres; and,
- Requested clarification be added to Policy SP 4 that although the Office for Nuclear Regulation will be consulted, it is unlikely this will restrict non-residential development in the Detailed Emergency Planning Zone (DEPZ).

Local Plan Regulation 19 Response

Policy DM42: Transport Infrastructure

Policy DM42 identifies the types of transport infrastructure that new development will be expected to make a contribution towards. As covered in GPR’s previous representations, GPR wishes to reemphasise the need for the continued enhancement of sustainable transport options and infrastructure, in particular the M4 corridor, which serves Green Park. This is vital to supporting West Berkshire and the wider Thames Valley area as it continues to grow as an important employment location. GPR continues to request that an additional bullet point is included in Policy DM42 as follows: *“Improvements to the M4 motorway and strategic road network in the Thames Valley”*.

Policy DM42 also states that travel activity will be expected to be minimised by the design of developments to support low levels of travel and be reached by local journeys. GPR is supportive of this part of the policy’s aspirations but would like to highlight that the reach of employment parks can extend to further authorities and that their locations are often in order to attract tenants wishing to attract high quality employers and employees. Therefore, requiring a sole focus on local journeys could prevent the sustainable growth of employment sites.

Summary

In summary, GPR welcomes the West Berkshire LPR and the published Regulation 19 document. However, GPR requests several modifications to the LPR as set out in this letter. In particular, GPR requests that the identified Site is classified as a Designated Employment Area to reflect its existing uses

	and its existing allocation, and that additional guidance is given in relation to the consultation process and considerations for development located within a DEPZ.

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
Please give reasons for your answer	<p>[See attached document for full accompanying statement - PSPconsulting obo Beftonforth Ltd REDACTED]</p> <p>Please refer to Section 3 and Section 4 of the accompanying statement prepared by PSP on behalf of Beftonforth Ltd – Ref PER109 Dated March 2023.</p> <p>SECTION 3 - POLICY REVIEW INCLUDING DRAFT POLICIES DM43 AND DM42</p> <p>National Planning Policy Framework (NPPF July 2021)</p> <p>The National Planning Policy Framework (NPPF) has a presumption in favour of sustainable development at its heart. Of particular relevance to the potential for growth in rail use at the Theale Railhead, Beftonforth have highlighted below particular elements of National Policy which support the Government's intention to increase the use of rail freight to assist in achieving national decarbonisation targets and deliver net-zero.</p> <ul style="list-style-type: none"> • At NPPF paragraph 106(c), planning policies should: "identify and protect, where there is robust evidence, sites and routes which could be critical in developing infrastructure to widen transport choice and realise opportunities for large scale development;" • At NPPF paragraph 106(e) planning policies are also required to: "provide for any large scale transport facilities that need to be located in the area, and the infrastructure and wider development required to support their operation, expansion and contribution to the wider economy..." • Footnote 44 on page 31 confirms that: "Policies for large scale facilities should, where necessary, be developed through collaboration between strategic policy-making authorities and other relevant bodies. Examples of such facilities include ports, airports, interchanges for rail freight," [our underlining]. • NPPF paragraph 83 is clear that in the context of building a strong, competitive economy:

“Planning policies and decisions should recognise and address the specific locational requirement of different sectors. This includes making provision for clusters or networks of knowledge and data-driven, creative or high technology industries; and for storage and distribution operations at a variety of scales and in suitably accessible locations.” [our underlining].

• At NPPF paragraph 152 *In the context of meeting the challenge of climate change, the planning system should help to:*

“shape places in ways that contribute to radical reductions in greenhouse gas emissions...”.

• And NPPF paragraph 153 requires that:

“Plans should take a proactive approach to mitigating and adapting to climate change...”.

- Similarly, NPPF paragraph 154 confirms that new development should be planned in ways that: *“can help reduce greenhouse gas emissions...”.*

The consultation on the December 2022 proposed updates to the NPPF, which run to March 2023, do not propose any material change to the NPPF paragraphs quoted above.

The Planning Practice Guidance (PPG) on Climate Change gives advice at paragraph 003 on *“How the challenges of climate change can be addressed through the Local Plan”*. The Guidance states that *“there are many opportunities to integrate climate change mitigation and adaptation objectives into the Local Plan. Sustainability appraisal can be used to help shape appropriate strategies in line with the statutory duty on climate change and ambition in the Climate Change Act 2008.*

Examples of mitigating climate change by reducing emissions:

- *Reducing the need to travel and providing for sustainable transport;”*

Draft Policy DM42 Transport Infrastructure

Section 12 of the Proposed Submission Draft Local Plan covers Development Management Policies ‘Fostering Economic Growth & Supporting Local Communities’. Draft Policy DM42 ‘Transport Infrastructure’ is below:

> see Policy DM42 text in attached document - PSPconsulting obo Beftonforth Ltd REDACTED <

The Supporting Text to Draft Policy DM42 (paragraph 12.95) explains that *“the development and delivery of transport infrastructure will need to contribute to the aims of Policy SP23 and relevant Council strategies and plans, such as the West Berkshire Environment Strategy, July 2020 and the Local Transport Plan. There is a need for development to assist in the provision of deliverable measures that will contribute towards modal shift to sustainable modes of travel for residents and employees of both new development, and if possible, for existing communities”*.

Beftonforth consider that the movement of people and goods by rail is a fundamental omission from Draft Transport Policy DM42, placing this draft policy in conflict with the December 2022 adopted Minerals & Waste Local Plan Transport Policy 22 (December 2022) and National and Regional Transport Policy objectives. The Draft Policy DM42 should recognise that measures which contribute towards modal shift to sustainable modes of travel, including by rail, apply equally to the movement of goods, as well as for residents and employees. Appropriately, Submission Draft Local Plan paragraph 4.9 recognises that *“.... transport linkages, by rail and road are vital”*.

Draft Policy DM42 should thus be extended to emphasise the importance of moving people and goods by rail, by including a new item:

j. measures to improve the movement of people and goods by rail.

In addition, the wording of Draft DM42 Supporting Text paragraph 12.95 should also be extended, by adding *including the movement of goods*.

In Beftonforth’s opinion, without the above changes Draft Policy DM42 is Unsound. With the above changes, Draft Policy DM42 would be Sound and would be in line with adopted Minerals & Waste Local Plan Transport Policy 22 (December 2022).

As explained in Section 4 of these representations, the Required Changes to the Regulation 19 Submission Draft Local Plan, to make the Plan Sound, have been agreed with Network Rail and the Englefield Estate.

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>All as set out in detail in the Local Plan Review Documentation</p>
<p>4. Proposed Changes</p>	<p>Please refer to Section 4 of the accompanying statement prepared by PSP on behalf of Beftonforth Ltd – Ref PER109 Dated March 2023.</p> <p>SECTION 4 - REQUIRED CHANGES TO MAKE THE PLAN SOUND</p> <p>With reference to Response Form Question 2, in the absence of any wording in the Regulation 19 Submission Draft Local Plan expressly supporting the growth of the Theale Railhead, and with wider omissions with respect to the Spatial Strategy, Climate Change Policy and Transport Policies, the Submission Draft Local Pan is not considered to meet the tests of Soundness for the reasons identified above and summarised below:</p>

The **Submission Draft Local Plan is not positively prepared** since it does not respond to identified need and it does not facilitate sustainable development in accordance with National and Regional Policy.

The **Submission Draft Local Plan is not justified** since it fails to deliver an appropriate strategy taking into account reasonable alternatives and based on proportionate evidence. The approach of not including either policy or supporting text to identify and support the growth of rail freight at Theale is not the most appropriate strategy when considered against the reasonable alternatives.

There is no clear audit trail as to why this approach has been adopted and changed from the adopted Development Plan and from earlier stages of the current Local Plan Review. The Sustainability Appraisal fails to consider the increased use of rail freight consistent with National and Local Policy, when the evidence points to the need to support the growth in rail freight provision. The Sound approach and reasonable alternative would be to provide supporting text which supports the growth of rail freight at Theale and to have this expressed within the Policy itself.

The **Submission Draft Local Plan is not Consistent with National Policy** in particular with regard to: promoting a sustainable pattern of development; meeting the challenge of climate change; supporting sustainable transport (including supporting modal shift of freight from road to rail, wherever possible, to reduce emissions from the freight sector); considering the specific locational requirements of different sectors in suitably accessible locations. The lack of consistency with National Policy is both in terms of site-specific considerations of the Theale Rail-Road Transfer Site under Policy DM43 and supporting text and more generally in respect of: Spatial Strategy Policy SP1, Climate Change Policy SP5, and Transport and Transport Infrastructure Policies SP23 and DM42.

Changes required to make the West Berkshire Regulation 19 Proposed Submission Draft Local Plan Sound

With reference to **Response Form Question 4** changes have been identified below which are considered necessary to make the Submission Draft Local Plan Sound. The changes are required to ensure that the Submission Draft Local Plan is positively prepared, justified, and consistent with National Policy.

To address the concerns raised in these representations with regard to Soundness, and specifically the failure of the Submission Draft Local Plan to appropriately identify and support modal shift in the context of the movement of freight, changes are sought below with respect to spatial strategy, climate change and transport policies. Additionally, in site specific terms, express support for growth of the Rail-Road Transfer Site at Theale is sought. The specific changes required to make the plan 'Sound' are shown below in red underline or strike through.

It is confirmed that the schedule of required changes set out below, has been jointly drafted and agreed between Network Rail, Bectonforth and the Englefield Estate.

(e) Policy DM42, Transport Infrastructure

"Proposals for new development will be expected to demonstrate the type and level of travel activity likely to be generated. In order to assist in tackling the climate emergency, this travel activity will be expected to be minimised by design of developments that support low levels of travel with a focus on local journeys that can be made sustainably and that support more sustainable freight distribution practices. Development which encourages modal shift of goods and people to more sustainable forms of transport will be supported. Developments will be required to be supported by a range of infrastructure associated with different transport modes. New development will only be supported where the relevant transport infrastructure is delivered in a timely manner. Where required...."

- a. Connections and improvements
- b. Walking, cycling and
- c. Secure cycle and
- d. Improvements to
- e. Provision of real
- f. New or improved
- g. Improvements to
- h. Works to
- i. Provision of electric vehicle charging points and associated infrastructure; and
- j. Measures to improve the movement of people and goods by rail.

(f) Policy DM42, Supporting Text (paragraph 12.95)

12.95 The development and delivery of transport infrastructure will need to contribute to the aims of Policy SP23 and.....Transport Plan. There is a need for development to assist in the provision of deliverable measures that will contribute towards modal shift to sustainable modes for travel for residents and employees of both new, and if possible, for existing communities and towards modal shift to sustainable modes for the transport of freight.

<p>Please give reasons for your answer</p>	<p>We support the Council's position in seeking to tackle the climate emergency through promoting a sustainable transport network. However, we note that this policy as worded seems to apply to all types of development and does not take into consideration the type and size of developments, as well as their location. Indeed, we consider that this policy fails to recognise the rural nature of West Berkshire's District and the limited availability of public transport modes in more remote areas.</p> <p>The Policy requires travel activity to be minimised by the design of developments that support low levels of travel with a focus on local journeys that can be made sustainably. We query how this can reasonably be applied to modest developments in the countryside where the offer of public transport is limited or non-existent. Furthermore, we consider that the Policy's requirement for developments to be supported through a range of infrastructure associated with different transport modes may place unnecessary burden on smaller developments. For these reasons, we do not consider that this Policy is justified.</p> <p>Finally, we note that there is a conflict between the requirements of this Policy and Policies DM35 and DM36. On one hand, the Council seeks to support businesses in rural areas, however Policy DM42 is stringent and does not appear to reflect or acknowledge the more limited accessibility in terms of public transport to rural areas. We would therefore encourage the Council to adopt a more flexible approach within this policy in relation to the rural economy.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	Yes
<p>Please give reasons for your answer</p>	N/A
<p>4. Proposed Changes</p>	<p>We therefore recommend that Policy DM42 is revised as detailed below (additions shown <u>underlined</u> deletions shown with a strikethrough).</p> <p><u>Where relevant</u>, Proposals for new development will be expected to demonstrate the type and level of travel activity likely to be generated. In order to assist in tackling the climate emergency, this travel activity will be expected to be minimised by the design of developments that support low levels of travel with a focus on local journeys that can be made sustainably. Developments will be required to be supported through a range of infrastructure associated with different transport modes <u>in a manner that is proportionate to the proposed development and takes into account its location</u>. New development will only be supported where the relevant transport infrastructure is delivered in a timely manner. Where required, new developed will be expected to make a <u>proportionate</u> contribution to the provision or improvement of a range of transport infrastructure. This transport infrastructure will specifically, but not exclusively, include the following:</p> <p>[...]</p>

<p>Please give reasons for your answer</p>	<p>[See attached document for full accompanying statement - PSPconsulting obo Beftonforth Ltd REDACTED]</p> <p>Please refer to Section 3 and Section 4 of the accompanying statement prepared by PSP on behalf of Beftonforth Ltd – Ref PER109 Dated March 2023.</p> <p>SECTION 1 - INTRODUCTION</p> <p>PSPconsulting (PSP) are appointed by Beftonforth Limited (Beftonforth) to give highways and transport planning advice in relation to their land which forms part of the Theale Railhead.</p> <p>The Beftonforth land is the last parcel of land within the Theale Railhead to come forward for development under Development Plan Saved Policy ECON.7. Across the period 2021 and 2022, PSP have designed the new access road to the Beftonforth land, required by Saved Policy ECON.7, and PSP have provided support and advice with respect to West Berks review of the Minerals & Waste Local Plan.</p> <p>PSP are now instructed to prepare this response, on behalf of Beftonforth, in relation to the West Berks Proposed Submission Draft Local Plan. Beftonforth fully support the continued identification of the Theale Railhead under Draft Policy DM43 'Theale Rail-Road Transfer Site' and as shown on the Draft Policies Map. However, Beftonforth consider the removal of the positive provisions relating to the potential for growth of the Theale Railhead is not consistent with National or Local Policy and the Proposed Submission Draft Local Plan has therefore not been Positively Prepared and is Unsound.</p> <p>The Beftonforth land (circled below), lies between the Puma Energy Oil Depot and the mainline railway. The Beftonforth land has been derelict for many years and was formerly a builder's yard.</p> <p>> see map on pg 1 of attached document - PSPconsulting obo Beftonforth Ltd REDACTED <</p> <p>SECTION 2 - BACKGROUND</p> <p>The current Development Plan for West Berkshire includes the Core Strategy (2006–2016) which was adopted in 2012 and the 1991-2006 Local Plan Saved Policies, set out in the Council's September 2007 Written Statement. The 1991-2006 Local Plan was adopted in 2002.</p> <p>Saved Policy ECON.7 'Safeguarding Rail-based Industry at Theale' is detailed on page 79 of the Written Statement (extract below). Saved Policy ECON.7 includes the Beftonforth land, which is described below as a builder's yard, house and paddock.</p> <p>> see Local Plan text on pg 2 of attached document - PSPconsulting obo Beftonforth Ltd REDACTED <</p> <p>Saved Policy ECON.7 states that "any development of this site [ie the Beftonforth land] should be subject to satisfactory road access, this access should be contained from within the existing rail site and not from outside". This comment is a reference to the unsuitability of using the existing access to the Beftonforth land along Wigmore Lane in front of the existing residential properties. The properties are close to the road, the road width is narrow and the road surface is not in a good condition.</p> <p>The extract below from the Core Strategy Proposals Map shows:</p> <ul style="list-style-type: none"> • the access to the Theale Railhead, and the Wigmore Lane residential properties, from the primary road network at the A4 roundabout; • the Theale Railhead cross-hatched in brown; • the Theale Protected Employment Area cross-hatched in red; and • the existing residential properties fronting Wigmore Lane, to the west of the Railhead and to the south of the A4. <p>> see map on pg 3 of attached document - PSPconsulting obo Beftonforth Ltd REDACTED <</p> <p>Public Rights of Way</p> <p>The extract below from the West Berkshire Online Public Rights of Way Map shows public footpath SULH/2/2 with Theale FP19 running along the southern section of Wigmore Lane to the railway line. The West Berkshire Highway Records Team have confirmed that this section of Wigmore Lane is not publicly maintained highway.</p> <p>> see map on pg 4 of attached document - PSPconsulting obo Beftonforth Ltd REDACTED <</p> <p>The Beftonforth land is the last remaining undeveloped parcel of land within the Theale Railhead and Beftonforth have been working with Network Rail to bring forward the delivery of a new access road and a new rail sidings to serve the Beftonforth land. Following early discussions between Network Rail, Beftonforth and Puma Energy, PSP were instructed to work with Network Rail and Puma Energy to prepare the design of a new access road, consistent with the requirements of Saved Policy ECON.7. PSP have subsequently prepared two new access road designs, running through the Puma Energy site to the Beftonforth land, to avoid passing in front of the Wigmore Lane residential properties. Both of these</p>

designs are agreed with Network Rail and Puma Energy, and are shown illustratively on enclosed **Drawing 2422/100** >See attached document PSPconsulting obo Bectonforth Ltd REDACTED>

- The first access road design incorporates Wigmore Lane (south) and this was the subject of the Prior Approval application (21/02298/PAD56) to West Berks in September 2021; and
- The second access road design is off-set from Wigmore Lane (south) and runs behind a Network Rail security fence. This access road can be delivered under Network Rail's statutory powers and does not need any approval from West Berks.

With a suitable new access road designed and agreed with Network Rail and with Puma Energy, Network Rail instructed their Engineering Team to look at the new rail sidings to serve the Bectonforth land. The proposed rail sidings are shown illustratively on enclosed **Drawing 2422-105** >See attached document PSPconsulting obo Bectonforth Ltd REDACTED>. Approximately 300m of new rail sidings are proposed on the Bectonforth land, situated parallel and adjacent to the existing mainline railway.

It is expected that the new rail sidings will be used to import aggregates and Network Rail Operational Division have confirmed that the Bectonforth land would have a likely maximum capacity of 375,000 tonnes of aggregates per annum. Puma Energy have agreed that the new rail sidings can run along the edge of their operational area, currently used for lorry parking.

During the course of the preparation of the access road and rail sidings designs, Bectonforth met with Network Rail and the Englefield Estate to discuss the opportunities for expanding rail use at the Theale Railhead to include an intermodal rail freight facility.

As Network Rail explain in their response to the Submission Draft Local Plan, rail freight contributes to the economy and plays a significant role in modal shift, reducing congestion and carbon emissions, and supporting long-term sustainable growth. Future freight growth forecasting identifies significant continued growth of rail freight and it is anticipated that the Government will set a rail freight growth target to be factored in to Network Rail's strategic planning framework. It is Network Rail and the Government's intention to increase the use of rail freight to assist in achieving national decarbonisation targets and deliver net-zero.

The Spring 2022 Rail Industry Review of potential Intermodal Rail Freight Interchange sites is summarised in the Network Rail response to the Submission Draft Local Plan. From an original long list of over 600 sites across the UK, the search for suitable locations identified only four sites within the Southeast of England and of these four sites, the land west of Wigmore Lane has been identified as the only site capable of serving the western part of the region. Network Rail has thus been in discussions with the Englefield Estate, the owners of the land west of Wigmore Lane to investigate the potential the land offers to secure modal shift from road to rail and meet the identified demand for further rail served development in this area.

Network Rail, the Englefield Estate and Bectonforth have agreed to work together to ensure that any rail-based development of the Bectonforth land, and particularly the design of the new rail sidings, will not prejudice or preclude the opportunity to extend the rail sidings westwards into the land west of Wigmore Lane. The following joint statement is agreed between the parties:

It is confirmed that Network Rail, Bectonforth and Englefield Estate have been liaising with regard to the Bectonforth proposals and Network Rail's identification of the potential that land west of Wigmore Lane offers for expansion. It is understood by all parties that growth of the existing Theale Rail-Road Transfer Site will require close working between the three parties and that connection to the main line for land west of Wigmore Lane would ideally be taken via the Bectonforth Land.

All parties are committed to working jointly to ensure that development of the Bectonforth land is brought forward for rail freight use in accordance with the current Development Plan and that the potential for the future growth of rail freight provision at Theale on land west of Wigmore Lane is safeguarded and protected.

There is agreement that the provision for future rail expansion must be taken into consideration and all siding designs on the Bectonforth land will not fetter further rail connections to the west (land west of Wigmore Lane). Network Rail and the Englefield Estate are making their own representations to the Local Plan Review which, amongst other things, reflect the above position.

SECTION 3 - POLICY REVIEW INCLUDING DRAFT POLICIES DM43 AND DM42

National Planning Policy Framework (NPPF July 2021)

The National Planning Policy Framework (NPPF) has a presumption in favour of sustainable development at its heart. Of particular relevance to the potential for growth in rail use at the Theale Railhead, Bectonforth have highlighted below particular elements of National Policy which support the Government's intention to increase the use of rail freight to assist in achieving national decarbonisation targets and deliver net-zero.

- At NPPF paragraph 106(c), planning policies should:

"identify and protect, where there is robust evidence, sites and routes which could be critical in developing infrastructure to widen transport choice and realise opportunities for large scale development;"

- At NPPF paragraph 106(e) planning policies are also required to:

"provide for any large scale transport facilities that need to be located in the area, and the infrastructure and wider development required to support their operation, expansion and contribution to the wider economy..."

- Footnote 44 on page 31 confirms that:

"Policies for large scale facilities should, where necessary, be developed through collaboration between strategic policy-making authorities and other relevant bodies. Examples of such facilities include ports, airports, interchanges for rail freight," [our underlining].

- NPPF paragraph 83 is clear that in the context of building a strong, competitive economy:

“Planning policies and decisions should recognise and address the specific locational requirement of different sectors. This includes making provision for clusters or networks of knowledge and data-driven, creative or high technology industries; and for storage and distribution operations at a variety of scales and in suitably accessible locations.” [our underlining].

• At NPPF paragraph 152 *In the context of meeting the challenge of climate change, the planning system should help to:*

“shape places in ways that contribute to radical reductions in greenhouse gas emissions...”.

• And NPPF paragraph 153 requires that:

“Plans should take a proactive approach to mitigating and adapting to climate change...”.

- Similarly, NPPF paragraph 154 confirms that new development should be planned in ways that: *“can help reduce greenhouse gas emissions...”.*

The consultation on the December 2022 proposed updates to the NPPF, which run to March 2023, do not propose any material change to the NPPF paragraphs quoted above.

The Planning Practice Guidance (PPG) on Climate Change gives advice at paragraph 003 on *“How the challenges of climate change can be addressed through the Local Plan”*. The Guidance states that *“there are many opportunities to integrate climate change mitigation and adaptation objectives into the Local Plan. Sustainability appraisal can be used to help shape appropriate strategies in line with the statutory duty on climate change and ambition in the Climate Change Act 2008.*

Examples of mitigating climate change by reducing emissions:

- *Reducing the need to travel and providing for sustainable transport;”*

Draft Policy DM43 Theale Rail-road Transfer Site

The Theale Railhead site is identified on the currently adopted West Berkshire Core Strategy Policies Map under Saved Policy ECON.7 ‘Safeguarding Rail- Based Industry at Theale’, and has been more recently confirmed in the adopted Minerals & Waste Local Plan (December 2022) under Policy 9 and the associated Policies Map. The Theale Railhead is a key rail freight site serving the region and the continued identification of this site on the Submission Draft Local Plan Policies Map and by Draft Policy DM43 ‘Theale Rail-Road Transfer Site’ is fully supported.

However, Beftonforth consider the removal of the positive provisions relating to the potential for growth of the Theale Railhead, contained in Saved Policy ECON.7 and Regulation 18 Draft Policy DC31, is not consistent with National or Local Policy and the Regulation 19 Proposed Submission Draft Local Plan has therefore not been Positively Prepared and is Unsound, for the reasons set out below.

Appendix 7 of the Submission Draft Local Plan presents a schedule of policies to be superseded or deleted and Saved Policy ECON.7 ‘Safeguarding Rail-Based Industry at Theale’ is to be replaced by Draft Policy DM43 ‘Theale Rail-road Transfer Site’. Draft Development Management Policy DM43 is reproduced below:

> see Policy DM43 text in attached document - PSPconsulting obo Beftonforth Ltd REDACTED <

Saved Policy ECON.7, and supporting lower case text, are reproduced in Section 2 above. The first sentence of Draft Policy DM43 is equivalent to Saved Policy ECON.7. There is no second sentence in Saved Policy ECON.7.

The lower case text from Saved Policy ECON.7, paragraph 4.11.1, explains that transferring goods from rail to road is a *“special use which needs to be protected due to the shortage of appropriate sites for such facilities across West Berkshire”*.

Paragraph 4.11.3 then embraces the prospect of extending the Theale Railhead and states that *“any extension to the area designated under Policy ECON.7 would therefore be subject to the following factors: (a) a demonstrated need for expansion of the rail-based industries; (b) the scale and intensity of the proposed development and its wider environmental impact; (c) its impact upon the existing residential properties which are in proximity, in particular, in terms of noise, traffic and visual intrusion; (d) the scale and nature of environmental and landscape improvements; (e) the provision of satisfactory access”*.

In moving forward from Saved Policy ECON.7, the December 2020 Regulation 18 Draft Local Plan includes the Theale Railhead site under Draft Policy DC31, with the same policy wording as Draft Policy DM43 above. However, the Regulation 18 draft Local Plan at paragraph 12.12 states that *“Theale is the only location which offers road-rail transfer facilities in the area. As a result, it is important to the local economy that this continues to be protected and grows”*. This is a helpful acknowledgement of the potential for growth of the Theale Railhead consistent with National and Local Policy, however, this paragraph has been omitted from the Regulation 19 Draft Local Plan.

Unfortunately, neither the Regulation 18 Draft Local Plan nor the Regulation 19 Draft Local Plan, bring forward paragraph 4.11.3 from Saved Policy ECON.7. The dropping of paragraph 4.11.3 is, in itself, a fundamental omission, and this is compounded by the removal of the Theale Railhead ‘protected and grows’ paragraph 12.12 between the Regulation 18 and the Regulation 19 versions of the Draft Plan.

The removal of these growth provisions, which are entirely consistent with current National and Local Policy, demonstrates that the Regulation 19 Draft Local Plan has not been positively prepared; in fact, it has been negatively prepared. Draft Policy DM43 is thus fundamentally Unsound. The Council have, unreasonably and without evidence or justification, removed statements that should properly have been brought forward into the Regulation 19 Draft Local Plan and as a result this would close down the opportunities for the growth of inherently sustainable and policy compliant rail-road development at Theale.

The **West Berks Minerals & Waste Local Plan (MWLP)**, adopted in December 2022, recognises the strategic importance of the existing railhead sites within the District, which are safeguarded under MWLP Policy 9. The MWLP ‘Vision’ is *“to plan for the delivery of mineral resources and waste management*

capacity in locations which meet the needs of West Berkshire in the most sustainable way, and taking into account climate change". This of course applies equally to freight as it does to minerals and waste.

The MWLP notes at paragraph 4.8 that the NPPF "has a presumption in favour of sustainable development at its heart. Therefore, the Council's plan is based upon this principle as demonstrated by the vision, objectives and policies of the plan". This leads directly to MWLP Policy 22 'Transport' which confirms that "Sustainable modes of transport will be encouraged, in particular the use of rail and/or water where this is practicable and aligned to other policies in the plan".

The MWLP contemplates growth in the use of rail transport at paragraph 5.57 "While there may be some scope for growth, the level of growth is partly constrained by the capacity on the rail network itself and providing new siding sites can be very costly". The logical conclusion of this statement is that expanding existing rail sidings sites, such as the Theale Railhead, is sustainable and cost effective.

Following the adoption of the MWLP in December 2022, the West Berks Policies Map was updated and an extract of the December 2022 Policies Map for Theale is below:

> see map on pg 11 of attached document - PSPconsulting obo Beftonforth Ltd REDACTED >

The West Berks Consultation **Draft Local Transport Plan (LTP4)** was published in the second week of February for public consultation until the 22nd March 2023. To support sustainable growth, Draft LTP4 at paragraph 5.12 identifies "four objectives to support sustainable growth, including carbon neutral development which means new development should not add to current carbon challenge". And at paragraph 5.13, "The movement of people, goods and services in and through the district is vital to the economy and the LTP aims to protect and enhance strategic connectivity. Alongside this the LTP will support improving freight, including the transition to more sustainable modes and the management of freight in and through urban centres".

The Draft LTP4 Strategic Connections Strategy identifies enhancements to improve 'sustainable access for all'; 'decarbonising transport'; and 'support sustainable growth'. One of two enhancements to support sustainable growth includes the Theale Strategic Rail Freight Depot. Rail freight provides a faster, greener, safer and more efficient way of transporting goods than by road. Movement of freight by rail contributes to the economy and plays a big part in reducing congestion and carbon emissions.

The Draft LTP4 Strategic Rail Freight Depot is consistent with the Draft Strategic Investment Plan for the South East; initially published for public consultation in June 2022, with a final draft of the Strategic Investment Plan approved in November 2022. The Strategic Investment Plan sets out proposals for strategic transport investment for the next 30 years. The Theale Strategic Rail Freight Terminal is identified at Ref O18 in the extract from the Strategic Investment Plan below:

> see table on pg 12 of attached document - PSPconsulting obo Beftonforth Ltd REDACTED <

Network Rail are an active member of the Partnership Board who are responsible for the preparation of the above Strategic Investment Plan. As explained in their representations to the Regulation 19 Proposed Submission Draft Local Plan, Network Rail have identified for some time the opportunity for an intermodal interchange/strategic rail freight depot at Theale. The locational advantage (ie the 'gap' to be filled) is clearly illustrated by the extract below from Network Rail's map of Intermodal Rail Terminals.

Network Rail representations explain that their operational and technical assessments have identified the land to the west of Wigmore Lane as the most appropriate site to expand rail freight and rail-road transfer operations. Network Rail have confirmed that there are no alternative sites in Theale or in West Berkshire, or in this part of the region, that could accommodate an intermodal interchange/strategic rail freight depot.

> see map on pg 13 of attached document - PSPconsulting obo Beftonforth Ltd REDACTED <

In summary, Beftonforth firmly believe that the Regulation 19 Proposed Submission Draft Local Plan must include the opportunity for the expansion of rail- road transfer facilities at Theale. With respect to Draft Policy DM43, to ensure consistency with National and Local Policy, the Regulation 18 paragraph 12.12 should be reinstated and Saved Policy ECON.7 paragraph 4.11.3 should be brought forward and included in the Submission Draft Local Plan. Without these changes Draft Policy DM43 is Unsound. With the above changes, Draft Policy DM43 would be Sound.

As set out in Section 4 of these representations, the Required Changes to the Regulation 19 Proposed Submission Draft Local Plan, to make the Plan Sound, have been agreed with Network Rail and the Englefield Estate.

It could, of course, reasonably be argued that the current drafting within the Regulation 19 Proposed Submission Draft Local Plan does not prevent the growth of the Theale Railhead and paragraph 4.9 of the Submission Draft Local Plan is clear that "..... transport linkages, by rail and road are vital". Beftonforth understand, from First Plan discussions with Officers, that any perceived changes in emphasis with regard to support for the growth of the Theale Railhead were not intentional. However, the removal of references to growth and the failure to expressly identify and support the potential for growth of rail freight at Theale, if not corrected, is considered to make this part of the Submission Draft Local Plan Unsound.

The failure to expressly identify and support the potential for growth of rail freight at the Theale Railhead has significant implications for the November 2022 Local Plan Review Sustainability Appraisal, which considers Draft Policy DM43 at Appendix 6.

The Sustainability Appraisal does not take account of or consider the potential for the growth of the Theale Railhead and therefore does not weigh the environmental advantages the increased movement of freight by rail offers and does not identify the positive effects that growth of the Theale Railhead would have on greenhouse gas emissions, sustainable transport and the local economy. It is Beftonforth's view

	<p>that the growth of the Theale Railhead should have been considered within the Sustainability Appraisal, addressing a wider range of Sustainability Appraisal objectives and more effectively supporting the delivery of sustainable development in West Berkshire.</p> <p>The NPPF is also clear in the context of preparing and reviewing plans and confirms at paragraph 31 that: <i>“the preparation and review of all policies should be underpinned by relevant and up-to-date evidence. This should be adequate and proportionate, focused tightly on supporting and justifying the policies concerned, and take account relevant market signals”</i>. It is thus a significant omission from the Sustainability Appraisal that increased use of rail freight and growth of the Theale Railhead has been omitted.</p> <p>Appendix A contains a letter from Guy Bates, Head of Freight Development at Network Rail, to the Chief Executive at West Berks (dated the 22nd May 2022) and Appendix B contains a letter from Guy Bates to Beftonforth dated the 11th November 2022, both letters emphasising the sustainability credentials of rail freight and the importance of delivering rail freight development at Theale.</p> <p>In Section 3 of their representations submitted on behalf of the Englefield Estate, consultants, First Plan, have prepared a comprehensive review of the Planning Policy Context and Evidence Base for the Regulation 19 Proposed Submission Draft Local Plan, and Beftonforth support and commend this review to the Council.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>All as set out in detail in the Local Plan Review Documentation</p>
<p>4. Proposed Changes</p>	<p>Please refer to Section 4 of the accompanying statement prepared by PSP on behalf of Beftonforth Ltd – Ref PER109 Dated March 2023.</p> <p>SECTION 4 - REQUIRED CHANGES TO MAKE THE PLAN SOUND</p> <p>With reference to Response Form Question 2, in the absence of any wording in the Regulation 19 Submission Draft Local Plan expressly supporting the growth of the Theale Railhead, and with wider omissions with respect to the Spatial Strategy, Climate Change Policy and Transport Policies, the Submission Draft Local Pan is not considered to meet the tests of Soundness for the reasons identified above and summarised below:</p> <p>The Submission Draft Local Plan is not positively prepared since it does not respond to identified need and it does not facilitate sustainable development in accordance with National and Regional Policy.</p> <p>The Submission Draft Local Plan is not justified since it fails to deliver an appropriate strategy taking into account reasonable alternatives and based on proportionate evidence. The approach of not including either policy or supporting text to identify and support the growth of rail freight at Theale is not the most appropriate strategy when considered against the reasonable alternatives.</p> <p>There is no clear audit trail as to why this approach has been adopted and changed from the adopted Development Plan and from earlier stages of the current Local Plan Review. The Sustainability Appraisal fails to consider the increased use of rail freight consistent with National and Local Policy, when the evidence points to the need to support the growth in rail freight provision. The Sound approach and reasonable alternative would be to provide supporting text which supports the growth of rail freight at Theale and to have this expressed within the Policy itself.</p> <p>The Submission Draft Local Plan is not Consistent with National Policy in particular with regard to: promoting a sustainable pattern of development; meeting the challenge of climate change; supporting sustainable transport (including supporting modal shift of freight from road to rail, wherever possible, to reduce emissions from the freight sector); considering the specific locational requirements of different sectors in suitably accessible locations. The lack of consistency with National Policy is both in terms of site-specific considerations of the Theale Rail-Road Transfer Site under Policy DM43 and supporting text and more generally in respect of: Spatial Strategy Policy SP1, Climate Change Policy SP5, and Transport and Transport Infrastructure Policies SP23 and DM42.</p> <p>Changes required to make the West Berkshire Regulation 19 Proposed Submission Draft Local Plan Sound</p> <p>With reference to Response Form Question 4 changes have been identified below which are considered necessary to make the Submission Draft Local Plan Sound. The changes are required to ensure that the Submission Draft Local Plan is positively prepared, justified, and consistent with National Policy.</p> <p>To address the concerns raised in these representations with regard to Soundness, and specifically the failure of the Submission Draft Local Plan to appropriately identify and support modal shift in the context of the movement of freight, changes are sought below with respect to spatial strategy, climate change and transport policies. Additionally, in site specific terms, express support for growth of the Rail-Road Transfer Site at Theale is sought. The specific changes required to make the plan ‘Sound’ are shown below in red underline or strike through.</p> <p>It is confirmed that the schedule of required changes set out below, has been jointly drafted and agreed between Network Rail, Beftonforth and the Englefield Estate.</p> <p>(g) Policy DM43, Theale Rail-road Transfer Site</p> <p>“The rail-road transfer site at Theale is reserved solely for those industries which require a rail-road transfer facility and access to the highway network.</p> <p>Redevelopment for any uses not expressly for this purpose will not be permitted.</p>

	<p><u>Expansion of the Theale Site to provide further rail-road transfer, in particular for the transshipment of consumer goods, will be supported subject to other policies in the Local Plan.”</u></p> <p>(h) Policy DM43, Supporting Text (para 12.101 and new para 12.102)</p> <p>12.100 The rail-road transfer site at Wigmore Lane, Theale, is an important infrastructure facility within the District allowing for the transfer of goods from rail to road. The facility is primarily an aggregates terminal and the Minerals and Waste Local Plan (2022-2037) safeguards the site to ensure the supply of minerals and the continued export of minerals from the District by road. Any non-mineral and waste development on the site would need to comply with Policy 9 of the Minerals and Waste Local Plan</p> <p>12.101 Nonetheless, transport of consumer goods by rail continues to be important for the local economy and <u>West Berkshire and Reading are a significant consumer market. Theale is the only location which offers road-rail transfer facilities in the area and there is an identified shortage of appropriate sites for such facilities across West Berkshire and the South East.</u>†The Theale Site should be protected for those industries which require a rail-road transfer facility and access to the network. <u>The growth and expansion of the Theale Site to support additional and diversified transport of goods by rail will be supported in principle. Land west of Wigmore Lane is in particular identified as having the potential to accommodate expansion of the existing facility and meet identified need for the transport of consumer goods by rail.</u> National Local Plan and Local Transport Plan policies support modal shift from road to more sustainable means of transport subject to environmental and transport considerations.</p> <p><u>12.102 Any extension to the area designated under Policy DM43 would be subject to other policies in the Local Plan and the following factors: (a) a demonstrated need for the expansion of the road-rail transfer site; (b) the scale and intensity of the proposed development and its wider environmental impact; (c) its impact upon existing residential properties which are in proximity, in particular in terms of noise, traffic and visual intrusion; (d) the scale and nature of environmental and landscape improvements; (e) the provision of satisfactory access.</u></p> <p>12.102₃ The extent of the rail-road transfer site is defined on the Policies Map.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
<p>5. Independent Examination</p>	To explain in detail to the Inspector, the importance of the Local Plan Review including the opportunity for the growth of rail freight at the Theale Railhead.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	<p>1. Theale Rail-Road Transfer Site</p> <p>a) Relevant Context</p> <p>Our response to the LPR is made in the context of key policy drivers to increase the movement of freight by rail and to ensure that any future development does not impact on the operational railway.</p> <p>Rail freight is vital to Britain's economic success. It contributes to the economy and plays a significant role in reducing congestion and carbon emissions. Rail freight provides a faster, greener, safer and more efficient way of transporting goods than roads. It is an indispensable part of the British economy, and an essential component in supporting economic recovery and long-term sustainable growth.</p>

Rail freight has seen significant growth over the last 20 years, particularly those involving intermodal and construction materials. Despite this growth, rail freight's overall market share amongst all commodities transported sits at around roughly 9% leaving much room for growth. The surge in recent years in the construction sector has seen considerable uplift in construction material volumes with demand for materials in the Southeast a particular driver.

Future freight growth forecasting has highlighted considerable expected continued growth across rail freight commodities which in turn is factored into Network Rail's strategic planning framework.

Critical to the growth of rail freight is a wider Government and societal commitment to modal shift. As such one of the core commitments for freight in the 'Plan for Rail' (and the Transport Decarbonisation Plan) is that the Government will set a rail freight growth target.

The Great British Railways Transition Team (GBRTT) is developing a range of rail freight growth targets to support the development of rail freight across Great Britain. The target has been mandated by Government, with a recent address by the Secretary of State for Transport outlining the importance of setting a long-term freight growth target for rail.

The rail freight growth target will act as a catalyst for investment in the rail freight sector by setting a clear ambition for growth and modal shift to rail. It will help to highlight the role of freight on the rail network, giving confidence to the sector's customers and investors.

This growth would decarbonise the nation's logistics chains and get lorries off roads and generates approximately 76% less carbon emissions compared to HGVs per tonne of goods transported.

It is Network Rail and the government's intention to increase the use of rail freight to hit national decarbonisation targets and achieve net-zero. Given the finite number of rail freight sites nationwide and in line with government policy objectives around achieving net-zero carbon emissions by 2050; Network Rail is wholly supportive of development of facilities on third party owned rail-served sites to maximise modal-shift; enabling goods to pass by rail in lieu of long-haul HGV movements.

By way of illustration of the modal shift potential, a single typical contemporary bulk materials freight train would displace some 70+ HGVs from national and regional trunk roads.

In this context the Theale Rail-Road Transfer Site, as identified on the currently adopted West Berkshire Core Strategy Policies Map and under Saved Policy ECON.7, Safeguarding Rail-Based Industry at Theale, is a key rail freight site serving the region. Its proposed continued identification on the existing Rail-Road Transfer Site on the LPR Policies Map and by Draft Policy DM43, Theale Rail-Road Transfer Site, is fully supported.

Currently the Theale Rail-Road Transfer Site is primarily a rail aggregates and cement terminal, and this traffic will continue to grow. Critically the last remaining undeveloped parcel of land within the rail freight site comprises land in the ownership of Beftonforth with whom Network Rail are currently working to secure further rail served development supported by a new access road and new rail sidings. It is expected that the new rail sidings will be used to import aggregates and Network Rail Operational Division have confirmed that the Beftonforth land would have a likely maximum capacity of 375,000 tonnes of aggregates per annum. This will secure significant sustainability and environmental benefits.

It is important to recognise that consumer goods traffic by rail is also growing rapidly and is now the largest single commodity on Britain's railways at 40% of all volume. West Berks and Reading is a major consuming area for these goods and there is significant interest in using rail to transport consumer goods into the area. Indeed the LPR at paragraph 12.101 itself confirms that transport of consumer goods by rail continues to be important for the local economy.

A rail industry led (GBRTT) national review of potential Intermodal Rail freight Interchange (IRFI) sites was undertaken in Spring 2022. This worked through a sequence of a) existing operational sites, b) non-operational sites with existing main line connections, c) sites with previous main line connections, and d) other sites with potential merit in terms of location and accessibility by rail. The overall objective was to identify a future pipeline of sites able to provide additional capacity in the event of existing Intermodal or Strategic Rail Freight Interchange facilities being exhausted, and/or where no material capacity exists at present to serve particular regions or sub-regions (e.g. South West or South-East).

From an original long list of over 600 sites nationally, the high-level search for suitable locations for IRFI identified only 4 sites following the first sift, within the South East. Of these land west of Wigmore Lane (and west of the existing Theale Rail-Road Site) has been identified as the only site capable of serving the western end of the region. The assessment concluded that scope existed to create an intermodal facility, subject to land availability (land is not in the ownership of the rail industry) and flood risk mitigation.

Network Rail Operational Division and Engineering Team have looked in detail at all exiting rail sidings at Theale and their relationship to the mainline and regional railway lines, and they have concluded that the only site that can accommodate an IRFI is the land west of Wigmore Lane.

On this basis, Network Rail has subsequently engaged with Englefield Estate, the owners of the land west of Wigmore Lane with a view to investigating the key potential the land offers to secure modal shift from road to rail and meet identified demand for further rail served development in this location. As a result NR and the Estate are working jointly to review development options for the land in particular in terms of operationally suitable options for the delivery of necessary sidings infrastructure. The proposals are at an early stage and at the appropriate time will need to be reviewed via preapplication consultation with West Berkshire, be subject to detailed design development and full assessment as part of a formal planning application. Initial engagement has also been had with West Berkshire Council in respect of the potential this site offers in rail freight terms.

It is further confirmed that Network Rail, Englefield Estate and Beftonforth have agreed to work together to ensure that any rail-based development of the allocated Beftonforth land will not impact on the potential future development of land west of Wigmore Lane particularly the design of the new rail sidings, which will not prejudice or preclude the opportunity to extend the rail sidings westwards to allow for the expansion and growth of the existing Rail-Road Transfer site..

The following joint statement is agreed between the three parties:

It is confirmed that Network Rail, Bectonforth and Englefield Estate have been liaising with regard to the Bectonforth proposals and Network Rail's identification of the potential that land west of Wigmore Lane offers for expansion. It is understood by all parties that growth of the existing Theale Rail-Road Transfer Site will require close working between the three parties and that connection to the main line for land west of Wigmore Lane would ideally be taken via the Bectonforth Land.

All parties are committed to working jointly to ensure that development of the Bectonforth land is brought forward for rail freight use in accordance with the current Development Plan and that the potential for the future growth of rail freight provision at Theale on land west of Wigmore Lane is safeguarded and protected.

There is agreement that the provision for future rail expansion must be taken into consideration and all siding designs on the Bectonforth land will not fetter further rail connections to the west (land west of Wigmore Lane).

There is further agreement between NR and Englefield Estate that:

Rail connection of land west of Wigmore Lane could potentially be provided direct to the main line.

Expansion of rail freight development on land west of Wigmore Lane will give rise to a requirement to reduce risk at the pedestrian crossing of the GWR main line to the southeast of the proposed expansion site. This will require the provision of a footbridge

Englefield Estate and Bectonforth are making their own representations to the Local Plan Review which, amongst other things, reflect the above position as relevant to each party. The representations made by Englefield Estate and Bectonforth provide further detailed consideration of their respective sites and relevant planning considerations in the context of the LPR. It is confirmed that NR are fully supportive of the respective representations made and are in agreement in particular with regard to points of objection raised, points of soundness identified and required changes.

In summary, given Theale is the only location identified as being available to provide for additional transfer of freight from road to rail to serve this part of the South East region it is critical that capability for this to grow continues to be supported in the LPR. This is alongside continued support for aggregates traffic within the existing Theale Rail-Road Transfer Site. The following specific comments in the context of the Theale Rail-Road Transfer Site, potential for expansion and growth and wider policy support for movement of freight by rail are provided for completeness but should be read in conjunction with the representations made by Englefield Estate and Bectonforth.

b) Response to Draft Policies Map and Policy DM43 – Theale Rail-Road Transfer Site

Identification of the full extent of the existing Theale Rail-Road Transfer Site on the draft Policies Map is fully supported as is the proposed Draft Policy DM43 which continues to reserve the site solely for those industries which required a rail-road transfer facility and access to the highway network. Identification and safeguarding of such sites is as required by national policy (NPPF).

It is noted that the Regulation 18 Consultation (December 2020) included supporting text to then Draft Policy DC31 (Now Policy DM43) which signposts the potential for 'growth' of the Theale Rail-Road Transfer Site and the importance of this. Specifically supporting paragraph 12.12 was clear that:

"...Nonetheless, transport of consumer goods by rail continues to grow and West Berkshire and Reading area significant consumer market. Theale is the only location which offers road-rail transfer facilities in the area. As a result, it is important to the local economy that this continues to be protected and grows".

This approach reflects to a large extent the approach in the currently adopted Local Plan (Policy ECON.7 and supporting Text) and accords with the adopted Local Transport Plan and is consistent with National Policy requirements. Objection is raised to the removal at Regulation 19 stage to references to 'growth' in supporting text to Policy DM43.

There was certainly no expectation on the part of NR that the position, in terms of references to growth of the Theale Rail-Road Transfer Site, would significantly alter between Regulation 18 and Regulation 19 stage. It is acknowledged that the potential of land west of Wigmore Lane specifically to allow for expansion and growth of the existing Theale Rail-Road Transfer Site was not identified at Regulation 18 stage either by NR or the landowner. However, in the intervening period of more than two years since the last Regulation 18 consultation NR has identified the clear potential that land West of Wigmore Lane offers, underpinned by policy based need and identified demand, and as confirmed has been progressing early discussion, review and assessment of the potential the land offers both with West Berkshire Council and the landowner Englefield Estate.

It would appear from informal engagement with the West Berkshire Policy Team that the implications of the redrafting and any perceived changes in emphasis with regard to support for 'growth' of the Theale Rail-Road Transfer Site were not intentional. It is understood that the changes at Regulation 19 stage were intended to bring it more into line with the Minerals and Waste Plan. Certainly the amendments do not make any statement to the effect that growth is not supported and do not in themselves preclude growth of the site. Notably the importance of transport of consumer goods by rail in terms of it continuing to be important for the local economy continues to be referenced. It is appreciated that the implication of the redrafting in terms of removing references to growth may not have been fully considered. However, the removal of references to growth and the failure to expressly identify and support the potential for growth of rail freight at Theale, if not corrected, is considered to make this part of the LPR unsound.

The NPPF is clear in the context of preparing and reviewing plans and confirms at paragraph 31 that:

"the preparation and review of all policies should be underpinned by relevant and up-to-date evidence. This should be adequate and proportionate, focused tightly on supporting and justifying the policies concerned, and take account relevant market signals".

The relevant and up-to-date evidence base is that there is a need to ensure that expansion and growth of rail freight at Theale is supported. Critically, there are no other locations where this need could be met within the West Berkshire area and indeed beyond the LPR area. Land has been identified by NR with potential to accommodate expansion of rail freight provision at Theale and is being jointly proposed with the landowner. It is considered that it would be unsound if the potential for expansion of the existing Theale Transfer Site were not appropriately referenced and supported in the West Berkshire Local Plan. This would reflect how expansion of the Theale site is referenced and supported in the currently adopted Local Plan policy and supporting text and in more general terms in the Local Transport Plan. There has been no material change in circumstances since the current Local Plan and Local Transport Plan documents were adopted which would justify a different approach being taken. If anything the declaration of a climate change emergency and the role sustainable transfer of goods by rail has to play in that context only serves to underpin the increased need to ensure growth of rail freight at Theale is supported. There is a clear policy drive both at National, Regional and Local Transport Plan level (and notably in the emerging Local Transport Plan recently issued for consultation) to shift freight from road to rail (or other sustainable means of transport) and a clear imperative to support sites which can support sustainable transport of freight in coming forward.

If the LPR fails to continue the same policy approach as has been historically in place (and remains in place to date) i.e. that potential for growth is expressly identified, then it is considered to fail to accord with the requirement at Paragraph 11 of the NPPF to apply a presumption in favour of sustainable development. For plan-making this means, amongst other things, that all plans should promote a sustainable pattern of development. It is also considered to be an unduly inflexible approach. This inflexibility is contrary to the NPPF, paragraph 32 (d), which requires, in the context of building a strong, competitive economy, that planning policies should be flexible enough to accommodate needs not anticipated in the plan and to enable a rapid response to changes in economic circumstances.

It is relevant that in the context of promoting sustainable transport the NPPF, para 106 (c) require that planning policies should identify and protect, where there is robust evidence, sites and routes which could be critical in developing infrastructure to widen transport choice and realise opportunities for large scale development. At paragraph 106 (e) there is a requirement for planning policies to provide for any large scale transport facilities that need to be located in the area. This is to be read together with the requirements at paragraph 83 that planning policies should recognise and address the specific locational requirements of different sectors and for storage and distribution operations at a variety of scales and in suitably accessible locations. The LPR as currently drafted is not consistent with any of these National policy requirements.

In the context specifically of promoting sustainable transport, and the soundness tests and key requirements, the LPR should be identifying and supporting sites and routes where infrastructure could be developed to widen transport choice and linked to the Local Transport Plan (adopted and emerging).

c) Comments on other draft LPR Policies (SP1/SP5/SP23/DM42 and supporting text.

>See each consultation point for details.<

d) Consideration of Tests of Soundness

By reference to **Response Form Question 2**, and in the absence of any wording in the LPR expressly supporting the growth of rail freight provision at Theale and wider omissions in respect of the Spatial Strategy, Climate Change Policy and Transport Policies, the LPR is not considered to meet the tests of soundness for the reasons identified above and summarised below:

- **The Plan is not positively prepared** – it does not respond to identified need and it does not facilitate sustainable development.

- **The Plan is not justified** – The Plan is not justified since it fails to be an appropriate strategy taking into account reasonable alternatives and based on proportionate evidence. The approach of not including either policy or supporting text to identify and support the growth of rail freight at Theale is not the most appropriate strategy when considered against the reasonable alternatives. There is no clear audit trail as to why this approach has been adopted and changed from earlier stages. The Sustainability Appraisal does not appear to consider how a different approach (supporting growth) would perform. As such it is not clear that the SA has been able to robustly inform the content of the LPR. The evidence points to the need to support the growth in rail freight provision both generally and in regional/local plan terms. The sound approach (and reasonable alternative) would be to at minimum provide supporting text which supports growth at Theale and/or to otherwise have this expressed within Policy text itself.

- **The Plan is not Consistent with National Policy** – the LPR is not consistent with NPPF and other relevant national policy in particular with regard to: promoting a sustainable pattern of development; meeting the challenge of climate change; supporting sustainable transport (including supporting modal shift of freight from road to rail, wherever possible, to reduce emissions from the freight sector); considering the specific locational requirements of different sectors in suitably accessible locations. The lack of consistency with National Policy is both in terms of site specific considerations of the Theale Rail-Road Transfer Site under Policy DM 43 and supporting text and more generally in respect of: Spatial Strategy Policy SP1, Climate Change Policy SP5, and Transport and Transport Infrastructure Policies SP23 and DM42.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?

- * Yes
- * No

<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p><i>e) Changes required to make the West Berkshire Proposed Submission (Reg 19) Local Plan Sound</i></p> <p>By reference to Response Form Question 4 changes are identified as being required to make the West Berkshire Proposed Submission Local Plan sound. Specifically, the changes are required to ensure the plan is positively prepared, justified, and consistent with National Policy.</p> <p>To address the concerns raised with regard to soundness and specifically the failure of the LPR to appropriately identify and support modal shift in the context of transshipment of freight changes are sought in the context of spatial strategy, climate change and transport policies. Additionally, in site specific terms express support for growth of the Rail-Road Transfer Site at Theale is sought. The specific changes required to make the plan 'sound' are as follows: (Changes required shown in red underlined/struck through). It is confirmed that the schedule of required changes has been jointly drafted and agreed between NR, Beftonforth and the Englefield Estate.</p> <p>Schedule of Required Changes</p> <p>(g) Policy DM43, Theale Rail-road Transfer Site</p> <p>"The rail-road transfer site at Theale is reserved solely for those industries which require a rail-road transfer facility and access to the highway network.</p> <p>Redevelopment for any uses not expressly for this purposes will not be permitted.</p> <p><i>Expansion of the Theale Site to provide further rail-road transfer, in particular for the transshipment of consumer goods, will be supported subject to other policies in the Local Plan."</i></p> <p>(h) Policy DM43, Supporting Text (para 12.101 and new para 12.102)</p> <p>12.100 The rail-road transfer site at Wigmore Lane, Theale, is an important infrastructure facility within the District allowing for the transfer of goods from rail to road. The facility is primarily an aggregates terminal and the Minerals and Waste Local Plan (2022-2037) safeguards the site to ensure the supply of minerals and the continued export of minerals from the District by road. Any non-mineral and waste development on the site would need to comply with Policy 9 of the Minerals and Waste Local Plan</p> <p>12.101 Nonetheless, transport of consumer goods by rail continues to be important for the local economy and <i>West Berkshire and Reading are a significant consumer market. Theale is the only location which offers road-rail transfer facilities in the area and there is an identified shortage of appropriate sites for such facilities across West Berkshire and the South East.</i> The Theale Site should be protected for those industries which require a railroad transfer facility and access to the network. <i>The growth and expansion of the Theale Site to support additional and diversified transport of goods by rail will be supported in principle. Land west of Wigmore Lane is in particular identified as having the potential to accommodate expansion of the existing facility and meet identified need for the transport of consumer goods by rail. National Local Plan and Local Transport Plan policies support modal shift from road to more sustainable means of transport subject to environmental and transport considerations.</i></p> <p>12.102 <i>Any extension to the area designated under Policy DM43 would be subject to other policies in the Local Plan and the following factors: (a) a demonstrated need for the expansion of the road-rail transfer site; (b) the scale and intensity of the proposed development and its wider environmental impact; (c) its impact upon existing residential properties which are in proximity, in particular in terms of noise, traffic and visual intrusion; (d) the scale and nature of environmental and landscape improvements; (e) the provision of satisfactory access.</i></p> <p>12.1023 The extent of the rail-road transfer site is defined on the Policies Map.</p> <p>Early discussion with West Berkshire Council with regard to the representations made and suggested changes would be welcomed.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>

1. Do you consider the Local Plan Review is legally compliant?	Yes
* Yes	
* No	
Please give reasons for your answer	No comment
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.	No
* Yes	
* No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.	No
* Yes	
* No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable	Yes

<p>over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p><i>Extract of Full Representation relevant to consultation point (for full rep see attachments)</i></p> <p>It is noted that the existing Theale Rail-Road Transfer Site, including the Bectonforth land, continues to be identified on the draft LPR Policies Map for its rail freight functions as well as under Draft Policy DM43. This approach is fully supported.</p> <p>The Regulation 18 consultation (December 2020) included wording which signposted the potential for 'growth' of the Theale Rail-Road Transfer Site and the importance of this. This reflects, to a large extent, the approach in the currently adopted Local Plan (Policy ECON.7 and supporting text) and accords with the adopted Local Transport Plan and is consistent with National Policy requirements.</p> <p>It is understood that there was no expectation on the part of NR that the position, in terms of references to growth of the Theale Rail-Road Transfer Site, would significantly alter between Regulation 18 and Regulation 19 stage. It is acknowledged that the potential of land West of Wigmore Lane specifically to allow for expansion and growth of the existing Theale Rail-Road Transfer Site was not identified at Regulation 18 stage either by NR or the landowner. However, in the intervening period of two years since the last Regulation 18 consultation NR has been working to deliver the final parcel of land within the currently allocated 'Rail Industry Theale' site in the Core Strategy and under saved Policy ECON.7. In addition in that period NR has critically identified the clear potential that land West of Wigmore Lane offers, underpinned by policy based need and identified demand, and has been progressing early discussion, review and assessment of the potential the land offers both with WBC and the landowner Englefield Estate.</p> <p>As already acknowledged, it would appear that the implications of the redrafting and any perceived changes in emphasis with regard to support for 'growth' of the Theale Rail-Road Transfer Site were not intentional. It is understood that the changes at Regulation 19 stage were intended to bring it more into line with the Minerals and Waste Plan. Certainly the amendments do not make any statement to the effect that growth is not supported and do not in themselves preclude growth of the site. Notably the importance of transport of consumer goods by rail in terms of it continuing to be important for the local economy continues to be referenced. It is appreciated that the implication of the redrafting in terms of removing references to growth may not have been fully considered. However, the removal of references to growth and the failure to expressly identify and support the potential for growth of rail freight at Theale, if not corrected, is considered to make this part of the LPR unsound.</p> <p>It is entirely relevant that if transport of consumer goods, as identified by the Regulation 19 Plan as continuing to be important for the local economy, is to grow then this can only realistically be achieved if the existing Theale Rail-Road facility grows. The existing freight site does not currently provide for transfer of consumer goods and primarily supports rail carriage of minerals and fuel which as confirmed by NR is itself expected to grow. Indeed, as detailed, the last remaining undeveloped parcel of land (the Bectonforth land) is in the process of being brought forward for development for the transfer of aggregates.</p> <p>Across the LPR there are also concerns that opportunities for policies to support sustainable development and specifically to encourage modal shift (to ensure the plan is positively prepared and consistent with national policy) have not been included. This again raises issues of soundness.</p> <p>The NPPF is clear in the context of preparing and reviewing plans and confirms at paragraph 31 that: <i>"the preparation and review of all policies should be underpinned by relevant and up-to-date evidence. This should be adequate and proportionate, focused tightly on supporting and justifying the policies concerned, and take account relevant market signals"</i>.</p> <p>The relevant and up-to-date evidence base is that there is a need to ensure that expansion and growth of rail freight at Theale is supported. Critically, there are no other locations where this need could be met within the West Berkshire area and indeed for some significant distance beyond the LPR area. Land has been identified by NR with potential to accommodate expansion of rail freight provision at Theale and is being jointly proposed with the landowner. It is considered that it would be unsound if the potential for expansion of the existing Theale Transfer Site were not appropriately referenced and supported in the West Berkshire Local Plan. This would reflect how expansion of the Theale site is referenced and supported in the currently adopted Local Plan policy and supporting text and in more general terms in the Local Transport Plan. There has been no material change in circumstances since the current Local Plan and Local Transport Plan documents were adopted which would justify a different approach being taken. If anything the declaration of a climate change emergency and the role sustainable transfer of goods by rail has to play in that context only serves to underpin the increased need to ensure growth of rail freight at Theale is supported.</p>

There is as detailed in the policy and evidence base review, at Section 3 of this Statement, a clear policy drive both at National, Regional and Local Transport Plan level (and notably in the emerging LTP4 at time of writing subject to consultation) to shift freight from road to rail (or other sustainable means of transport) and a clear imperative to support sites which can support sustainable transport of freight in coming forward.

If the LPR fails to continue the same policy approach as has been historically in place (and remains in place to date) i.e. that potential for growth is expressly identified, then it is considered to fail to accord with the requirement at Paragraph 11 of the NPPF to apply a presumption in favour of sustainable development. For plan-making this means, amongst other things, that all plans should promote a sustainable pattern of development. It is also considered to be an unduly inflexible approach. This inflexibility is contrary to the NPPF, paragraph 32 (d), which requires, in the context of building a strong, competitive economy, that planning policies should be flexible enough to accommodate needs not anticipated in the plan and to enable a rapid response to changes in economic circumstances.

It is relevant that in the context of promoting sustainable transport the NPPF, para 106 (c) require that planning policies should identify and protect, where there is robust evidence, sites and routes which could be critical in developing infrastructure to widen transport choice and realise opportunities for large scale development. At paragraph 106 (e) there is a requirement for planning policies to provide for any large scale transport facilities that need to be located in the area. This is to be read together with the requirements at paragraph 83 that planning policies should recognise and address the specific locational requirements of different sectors and for storage and distribution operations at a variety of scales and in suitably accessible locations. The LPR as currently drafted is not consistent with any of these National policy requirements.

The LPR as currently drafted is not consistent with NPPF requirements in terms of meeting the challenge of climate change (paragraphs 152-154). Neither is it consistent with wider national policy requirements in terms of encouraging modal-shift to of freight to rail in the context of the role it has to play in reducing emissions from the freight sector.

In the context specifically of promoting sustainable transport, and the soundness tests and key requirements, the LPR should be identifying and supporting sites and routes where infrastructure could be developed to widen transport choice and linked to the Local Transport Plan (adopted and emerging). The evidence base supports the fact that there are no sites in the West Berkshire area (and indeed for some significant distance beyond) where growth of rail freight provision could be accommodated other than at Theale and the clear policy need and market demand for such provision.

In non-site-specific terms the LPR policies in respect of spatial strategy, climate change and transport considerations also raise concerns in the context of the tests of soundness. The spatial strategy, climate change and transport policies should equally be consistent with National Policy requirements with regard to supporting and promoting sustainable transport.

By reference to **Response Form Question 2**, and in the absence of any wording in the LPR expressly supporting the growth of rail freight provision at Theale and wider omissions in respect of the Spatial Strategy, Climate Change Policy and Transport Policies, the LPR is not considered to meet the tests of soundness for the reasons identified above and summarised below:

- **The Plan is not positively prepared** – it does not respond to identified need and it does not facilitate sustainable development.
- **The Plan is not justified** – The Plan is not justified since it fails to be an appropriate strategy taking into account reasonable alternatives and based on proportionate evidence. The approach of not including either policy or supporting text to identify and support the growth of rail freight at Theale is not the most appropriate strategy when considered against the reasonable alternatives. There is no clear audit trail as to why this approach has been adopted and changed from earlier stages. The Sustainability Appraisal does not appear to consider how a different approach (supporting growth) would perform. As such it is not clear that the SA has been able to robustly inform the content of the LPR. The evidence points to the need to support the growth in rail freight provision both generally and in regional/local plan terms. The sound approach (and reasonable alternative) would be to at minimum provide supporting text which supports growth at Theale and/or to otherwise have this expressed within Policy text itself.
- **The Plan is not Consistent with National Policy** – the LPR is not consistent with NPPF and other relevant national policy in particular with regard to: promoting a sustainable pattern of development; meeting the challenge of climate change; supporting sustainable transport (including supporting modal shift of freight from road to rail, wherever possible, to reduce emissions from the freight sector); and considering the specific locational requirements of different sectors in suitably accessible locations. The lack of consistency with National Policy is both in terms of site specific considerations of the Theale Rail-Road Transfer Site under Policy DM 43 and supporting text and more generally in respect of: Spatial Strategy Policy SP1, Climate Change Policy SP5, and Transport and Transport Infrastructure Policies SP23 and DM42.

Specific changes sought to the Regulation 19 Local Plan Review to ensure the Plan does meet the tests of soundness are provided at Section 5 of this Statement.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.	

* Yes * No	
Please give reasons for your answer	Vehicular access to the currently undeveloped southern part of the site (former builder's yard) could have an adverse impact on residents in Wigmore Lane
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	Policy should require that access to the currently undeveloped southern part of the site (former builder's yard) should avoid the residential part of Wigmore Lane
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>Please give reasons for your answer</p>	<p>1. No provision for large van based parking. The LPR has no provision to the parking of business vans which are extensively used as either transport to and from jobs allocated.</p> <p>There is a significant allocation (40%) of much needed social housing in the plan. However, there is a higher percentage of people who use vans for their own personal businesses or work of business that need vans to complete business (eg plumbing, building, drainage clearing, roofing etc) who occupy social housing. This is seen in all local West Berkshire developments with social housing (and in nearby towns of Reading, Oxford, and Basingstoke. The plan makes no mention of the provision of extra secure parking for large vans. This will result in vans being parked on grass verges, over pavements, public spaces etc. Vans that are not parked either securely (area CCTV) or close to the owners residence (within 10m) will be subject to break-in for tools etc. Any plan with a good and needed amount of social housing must make accommodation for the parking of vehicles that people rely on to complete their job or business (van based economy).</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	We believe that the Plan accords with the requirements of the relevant legislation.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes
Please give reasons for your answer	We support the inclusion of the reference to Building Regulations with regard to the provision of electric vehicle charging points. In regard to the parking standards, it is not physically possible to deliver 0.5 of space per unit in isolation and therefore the parking standards as drafted may cause confusion and ambiguity for developers. We suggest that additional commentary is included to specifically confirm that the delivery of a 0.5 space can be achieved through shared spaces. Alternatively the parking provision could be delivered on

	aggregate across a whole development i.e. 1 dwelling provided with 3 spaces and 1 dwelling provided with 2 spaces to equate to 2.5 spaces per unit overall. The commentary on Travel Plans is a duplicate of the wording of Policy DM45 so this should be deleted.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	We believe that the Plan sufficiently addresses strategic planning issues relevant to the area.
4. Proposed Changes	We suggest that additional commentary is included to specifically confirm that the delivery of a 0.5 space can be achieved through shared spaces. Alternatively the parking provision could be delivered on aggregate across a whole development i.e. 1 dwelling provided with 3 spaces and 1 dwelling provided with 2 spaces to equate to 2.5 spaces per unit overall. The commentary on Travel Plans is a duplicate of the wording of Policy DM45 so this should be deleted.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	N/A
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>Please give reasons for your answer</p>	<p>When will planning officers and councilors recognize the obvious fact that residents want and need cars. In towns such as the size of Newbury, public transport cannot be as comprehensive and frequent as in a large city to support a comprehensive & frequent public transport system whereby commuters can expect a bus every 10 minutes (as in large cities such as London). In parts of Newbury, even a 30 minute service would be appreciated.</p> <p>The standard of 1.25 can per household is totally unrealistic. It is ironic that on estates built in the 1950's (such as Chestnut Crescent), when house holders probably had few cars, there is now plenty of space for off street parking (in most cases 3 or more), and that most properties actually have 3 or more vehicles. Contrast this with some modern estates, where the density is so intense & parking spaces limited to 2 or less, that parking has to be on the pavements and makes driving through hazardous. Of course, developers accede to these requirements, as they can increase the density of units. The social climate at the moment means that the majority of households need 2 or 3 cars. Even those who perhaps no longer drive will have visitors & social carers. The cost of acquiring a house/apartment/flat has meant that more households are multi-generational.</p> <p>It would be interesting to know how many officers, councilors, & developers have 2 or more vehicles!!</p> <p>With the high cost of housing, homes are becoming multi-generational, & several parking spaces are required (given the preponderance of vans etc. used by individuals working from home). The standards set are totally inadequate for current (& for-seeable) lifestyles, but eagerly accepted by developers as they can achieve higher densities of properties. It is disappointing that the proposals at Market Street did not encompass more underground parking .(1 did suggest this during the consultation meetings organized by the developers).</p>

	<p>In a country short of horizontal space, architects & engineers should think vertically to make the most efficient use of the horizontal area of the proposed development.</p> <p>I raise strong objections to the access via Warren Road, as this is unsuitable due to the exit from the school - imagine morning traffic with the school run combined with commuters from the development — a lethal accident waiting to happen involving school children!!!</p> <p>The proposed approx. 2,000 houses east of Thatcham & north of the A4 up to Bucklebury, not only raise local highway & environmental issues; but due to the topography pose particular flood risk & the requirement for extra capacity in sewers downstream & at the sewage treatment works in Lower Way.</p> <p>Development should be considered premature, & hence refused, until the capacity of the sewers & treatment works have been upgraded to accommodate the additional flows. This should prevent sewage spills during dry weather conditions.</p> <p>The proposed site south of the Thatcham Rail Station has some advantages. This is a brown field site with some potential toxic waste. Therefore, removal of this waste would eliminate the risk of leachate into the river/canal. The developer has proposed a bridge over the rail/river, which would address the general traffic flow problems.</p> <p>The site is adjacent to good rail links.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	<p>Sandleford Park West (SPW)</p> <p>Policy DC36 – Parking: Objection is raised to this Policy as drafted because it excludes garages from being counted as part of parking provision on housing sites. No justification has been provided for this. Garages should be included where alternative storage space is provided on plot or within a garage of adequate dimensions for items such as bicycles. For comparison, BCP Council's "Parking Standards SPD" (adopted January 2021) allows garages to be counted as parking spaces where they meet minimum internal size requirements of 7m x 3.3m. Paragraphs 3.2.10 - 3.2.11 of this SPD state:</p> <p><i>"Research has shown that in many developments less than half of all garages are used for car parking, instead being used for storage. In terms of sizes, an internal minimum of 7m x 3.3m is considered appropriate to ensure that a large modern family car (eg SUV) will fit comfortably with a minimum circulation</i></p>

	<p><i>space to allow for some general storage which may include cycles... "This 7m x 3.3m must be a clear, unobstructed space to allow a vehicle to enter and exit safely. Garages must also have entrances wide and high enough to allow for large family cars.....Garages will only be counted as a parking space where they meet the minimum size requirements..."</i></p> <p>It is recommended that the Council takes this approach to the treatment of garages as parking spaces. Otherwise, to completely discount garages from every housing site's parking provision will have significant negative effects on the efficient use of land, contrary to Government guidance.</p> <p>The Policy also fails to acknowledge and allow for the valuable contribution that on-street car parking can make to parking provision on a site, particularly for visitors. It is considered that the Policy, as drafted, lacks sufficient detail to address these issues and that a new Parking SPD should be prepared and adopted by the Council to address this matter.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	The assessment of non residential parking provision on a case by case basis is strongly supported, given the significant variance in parking demand to different types of development. Efforts should be made to reduce parking and mimimse car joureys where possible
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No

Please give reasons for your answer	5.7 Policy DM44 'Parking' – We continue to object to the wording of this policy in that it excludes garages from being counted toward parking provision on residential sites. Garages should be included where alternative storage space is provided on plot or within a garage of adequate dimensions for items such as bicycles. Discounting garages as parking spaces will result in the ineffective use of land, contrary to the NPPF.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	No
Please give reasons for your answer	
4. Proposed Changes	
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	Our position is that the site should be included as a proposed residential allocation and that the LPR does not provide enough sites to provide sufficient housing supply.

* Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	Object. The policy is inconsistent with national policy and not effective.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	<p>Proposed amendment 1</p> <p>For residential developments, the policy does not allow for site-specific circumstances to be taken into consideration contrary to Para 107 of NPPF. Para 57 states,</p> <p>“If setting local parking standards for residential and non-residential development policies should take into account: a) the accessibility of the development; b) the type, mix and use of development; c) the availability of and opportunities for public transport; d) local car ownership levels; and e) the need to ensure an adequate provision of spaces for charging plug-in and other ultra-low emission vehicles”.</p> <p>The zoning system for residential development set out in Policy DM44 is intended to address this to some extent but it does not sufficiently provide for the individual circumstances of a site to be taken into consideration. Additionally, the removal of the ‘exceptional circumstances’ line below the minimum standards table suggests no flexibility which is a concern when dealing with minimum standards.</p> <p>Wording should be inserted into the policy after the minimum standards table to allow for agreement on a case-by-case basis, as follows :</p> <p><u>A reduced residential parking standard may be accepted for sites in sustainable locations deemed suitable by the Council and based on evidence presented by the applicant.</u></p> <p>In general, I would question the use of minimum standards. Setting maximums would help to ensure that developments continue to come forward with levels of parking provision that remain commensurate with the vision to reduce car dependency and to promote alternative sustainable transport options. Nevertheless, NPPF does state that maximum parking standards for residential and non-residential development should only be set where there is a clear and compelling justification that they are necessary for managing the local road network or for optimising the density of development in city and town centres and other locations that are well served by public transport.</p> <p>Proposed amendment 2.</p> <p>The policy specifies that garages will not be counted as a parking spaces. There will, however, be circumstances where garages will be used for parking. To ensure the policy is justified and therefore sound, some flexibility should be introduced.</p> <p>The following amendment is proposed:</p> <p><u>Garages will not be counted as a car parking space for the purposes of meeting the required levels of parking set out in this policy.</u></p> <p><u>Garages will only be accepted as contributing towards parking provision for development if they have adequate functional space. Where garages are also used to provide cycle storage, additional space must be provided to accommodate this.</u></p> <p>Proposed amendment 3.</p> <p>For Zone 2 residential developments, the policy does not specify whether half spaces are the minimum spaces plus 1 unallocated space per X dwellings. This requires clarification in the policy wording.</p>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	Yes to explain the purpose of parking standards and the extent of variation from national policy, which makes the policy unsound.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan	Yes

Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

Please give reasons for your answer	It is understood that the 'Cycling and Motorcycling Advice and Standards for New Development' guidance document referred to within the policy does not currently exist and so it is not possible to advise if AWE consider the provision to be correct. However, providing AWE is consulted on the guidance document when it is produced then this is considered acceptable.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	
4. Proposed Changes	Review the use of 'travel activity' to be focussed on use of car, supporting travel activity by other sustainable modes. Flexibility should be included with regards to use of scooters should such become legal during the plan period
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.	No

* Yes * No	
Please give reasons for your answer	The policy is unsound as it is unjustified and not consistent with national policy. The HBF is concerned that the wording in the third sentence of the third paragraph is amended could appear to decision makers that there will be times when development should go beyond building regulations. Building regulations clear sets out what is required with regard electric vehicle charging points for residential development and there is no need for a developer to go beyond these standards. We would therefore recommend that the words "and <i>where there are opportunities to go beyond minimum standards</i> " is deleted. This will ensure the policy is consistent with paragraph 16 of the NPPF in providing a clear and unambiguous policy.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	To represent the views of our members
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant?	Yes
* Yes	
* No	
Please give reasons for your answer	Furthermore, Sovereign considers that the Proposed Submission West Berkshire Local Plan Review (2022 – 2039), as currently formulated, is Legally Compliant.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.	

<p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>DEVELOPMENT MANAGEMENT POLICIES</p> <p>The comments set out in this section are intended to assist the Council in developing an approach that is consistent with national planning policies and the tests of soundness. Some comments have been included to assist the Council in developing a series of policies that are both effective and robust. Where possible, suggested amendments have been set out in the response.</p> <p>Sovereign broadly supports the West Berkshire Local Plan Review (2022 - 2039). However, the comments set out below are intended to identify opportunities to improve the effectiveness of the proposed policies.</p> <p>As a general principle, the plan would benefit from consistent numbering, in relation to the paragraphs, policy criteria, and sub-criteria. This would assist the accessibility and the useability of the draft plan, improving the effectiveness of the document substantially.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>Sovereign considers that in preparing the emerging local plan, the Council have sufficiently complied with the Duty-to-Cooperate.</p> <p><i>3. The Duty-to-Cooperate</i></p> <p>Section 33a of the Planning and Compulsory Purchase Act (2004) ('PCPA') requires that local planning authorities should co-operate with other relevant local authorities, the County Council, prescribed bodies, and other persons, in relation to the preparation of a Local Plan. The Duty requires the Council to engage constructively, actively, and on an on-going basis, in the preparation of the Plan, insofar as it relates to a strategic matter. Strategic Matters include the sustainable development and use of land that has, or would have, a significant impact on at least two planning areas, such as the amount and distribution of housing.</p> <p>Furthermore, the NPPF confirms, at paragraph 26, that government policy comprises that the effective and ongoing working between strategic policy-making authorities and relevant bodies is integral to the production of a positively prepared and justified strategy. It goes on to confirm that, in particular, joint working should help to determine where additional infrastructure is necessary and whether development needs that cannot be met wholly within a particular authority area could be met elsewhere. As such, cooperation clearly relates to maximising the effectiveness of plan preparation.</p> <p>Demonstrated within the effective and on-going joint working undertaken by West Berkshire District Council with the other Western Berkshire HMA authorities, in particular illuminated through the preparation of the SoCG, Sovereign considers that the West Berkshire Local Plan Review is <i>positively prepared</i> and the product of an <i>effective</i> and robust process of cooperation between the authorities.</p> <p>Sovereign therefore considers that the Duty-to-Cooperate has been sufficiently demonstrated in the plan-making.</p>
<p>4. Proposed Changes</p>	<p>Policy DM44: Parking</p>

	<p>To ensure that the policy remains effective over the length of the plan period, it is recommended that additional wording is included to clarify that development proposals would be required to meet the most up to date standards where relevant:</p> <p>i) Cycle and motorcycle parking should be provided in accordance with the Council's 'Cycling and Motorcycling Advice and Standards for New Development', <u>or such other standards as may be prepared</u>. This sets out design standards and expected levels of provision for different types of development.</p> <p>[...]</p> <p>ii) The layout and design of parking spaces should follow the parking design guidance included within the Council's 'Highway Design Guidance for Residential Development', <u>or such other standards as may be prepared</u>, in order that good quality homes and neighbourhoods are created.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
<p>5. Independent Examination</p>	Sovereign benefit from a specific land interest within West Berkshire District, which is proposed to be allocated for residential development under the emerging Policy RSA23: Land Adjoining The Haven, Kintbury. In representing Sovereign, Boyer are well-placed to advise on the appropriateness of the land allocated for development.
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No</p>	Yes

<p>1. Do you consider the Local Plan Review is legally compliant? * Yes * No</p>	No
<p>Please give reasons for your answer</p>	
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>4. Comment on DM policies</p> <p>4.2 Policy DM44 'Parking' – we object to the wording of this policy in that it excludes garages from being counted toward parking provision on residential sites. Garages should be included where alternative storage space is provided on plot or within a garage of adequate dimensions for items such as bicycles. Discounting garages as parking spaces will result in the ineffective use of land, contrary to the NPPF.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	No
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes</p>	No

* No	
5. Independent Examination	Our position is that the site should be included as a proposed residential allocation and that the LPR does not provide enough sites to provide sufficient housing supply.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	We welcome the Council's approach to assess the level of vehicular parking for non-residential developments to be judged on case by case basis. However, we have reservations about the proportionality of the requirement to provide for other ultra-low emission vehicles, car sharing spaces and car club vehicles.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	N/A
4. Proposed Changes	We therefore recommend that Policy DM44 is revised as detailed below (additions shown <u>underlined</u> deletions shown with a strikethrough). In addition to cycle and motorcycle parking and adequate provision of spaces for electric vehicles to plug-in, priority should be given to provision for other ultra-low emission vehicles, car sharing spaces and car club vehicles <u>where relevant</u> . [...]

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	We object to the inflexibility of the minimum car parking standards set out in draft Policy DC36. The policy directly and indirectly encourages car ownership and usage to the detriment of other more sustainable forms of travel and entirely fails to support the Council's declared climate emergency. Policy SP1: Spatial Strategy, directs development to the most sustainable locations in the borough. Policy DM44 is inconsistent with this approach and fails to acknowledge that there will undeniably be circumstances where parking levels as proposed would be wholly inappropriate taking into account

	<p>location, access to public transport, local amenities and the type of development proposed and inherent car ownership patterns for said type of development. Maximum restraint should be applied to parking levels in highly sustainable locations. The centre of Newbury lies within walking distance of the train station and bus station, and there are alternative modes of transport available including car hire schemes, electric charging locations and cycle facilities in the town centre.</p> <p>This policy fails to meet the soundness tests in the NPPF as it fails to offer any exception taking account of the variables set out in paragraph 107 of the NPPF. As such, the following wording should be added to this policy:</p> <p><i>It will increasingly be the case that the level of onsite car parking should be reduced in the most sustainable locations. Where developments can demonstrate that non car-based travel modes have been maximised (for example through the implementation of car share schemes, by virtue of proximity to public transport hubs, or through enhanced cyclists' facilities) a reduced level of onsite car parking will be actively supported. Residential car parking within defined town centres will not be required to have regard to the minimum provision set out in this policy but instead will be assessed on an individual basis."</i></p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>The emphasis in this section on a shift away from car travel should take more account of the movement towards more working from home. More importantly, the objective to reduce emissions will be achieved as much by the transition to electric vehicles, which will become progressively more cost-effective, as by abandonment of car usage. People will continue to wish to travel on short and longer journeys, and the convenience of private motoring will continue to be strongly felt. National policy strongly supports the trend to electric transmission.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>The LPR should therefore include a specific plan for the widespread availability of charging points on both private and public premises, existing as well as new.</p> <p>Judging solely from that part of Newbury where I live, bus travel has had only a limited effect. If it is to be better supported, a more strategic approach may be needed, with a wider range of routes.</p> <p>The LPR should not exclude new roads and road extensions, should those prove necessary.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>

Please give reasons for your answer	We believe that the Plan accords with the requirements of the relevant legislation.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes
Please give reasons for your answer	Paragraph 113 of the NPPF requires all developments that will generate significant amounts of movement to provide a travel plan. The requirement to provide travel information pack for developments of 10 or more dwellings conflicts with this as it cannot be reasonably said that a development of this scale will generate significant amounts of movement. In addition, the preparation of travel information packs for smaller development would result in additional costs and delays which could render the development unviable.

	We therefore suggest that this section of the draft policy is deleted.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	We believe that the Plan sufficiently addresses strategic planning issues relevant to the area.
4. Proposed Changes	
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	N/A
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes

Please give reasons for your answer	As far as Purley on Thames Parish Council are aware.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes
Please give reasons for your answer	As far as can be seen the Plan is NPPF compliant. <i>Purley On Thames 2018 Village Plan Action Point summary in relation to proposed policies attached.</i>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	After a revised period, consultation was advised
4. Proposed Changes	None - we would ask the planning authority to take into account the attached observations
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination	Yes

* Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>Object. The policy is not justified.</p> <p>Monitoring is not compulsory once targets within travel plans have been met. The statement "regular monitoring and reporting in line with the requirements of the council" is, therefore, a concern without clarification as to what those requirements are.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>The policy should be amended to read as follows:</p> <p>Where developments are required to develop travel plan measures, it is expected that necessary targets will be ... and undertake regular monitoring and reporting <u>until the travel plan targets have been met</u> in line with the requirements of the Council.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	Yes
<p>5. Independent Examination</p>	Yes to explain the purpose of parking standards and the extent of variation from national policy, which makes the policy unsound.
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes * No</p>	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>See attachment 'Paula Saunderson - Full LPR Rep' for full consultation response. Comments on each chapter/policy can be found at the specific consultation point.</p> <p>APPENDICES</p> <p>No time to review in Detail but a general comment is the lack of maps within documents and the lack of ability to pull together data for a Specific Spatial Area and important Sub Areas.</p> <p>Appendix 1 – Monitoring & Delivery</p> <p>The Monitoring Indicators Titles do not tie up with the Categorisations used within the Objectives or the LPR Chapters, therefore they feel illogical and will be difficult to track. However as each MI does list perceived relevant Policies it leads one to wonder why they were not better grouped within the Plan and the DMs appropriately numbered.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	Yes
Please give reasons for your answer	
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	Yes
Please give reasons for your answer	Yes, although I would have liked to have seen more input from the public.
4. Proposed Changes	I propose that the monitoring of "Number of net dwellings completed" as a delivery indicator is an insufficient measure of whether or not the Council is meeting the districts housing needs. As it fails to take into account whether these dwellings are occupied or not. I propose that a measure to be added which takes into account suitable occupancy of total and newly developed dwellings.
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>The target of 538 is the top of the range of 513 to 538 dwellings per annum given in policy SP12. It should be the minimum in the range given in policy SP12: 513 dwellings per annum.</p> <p>The Secretary of State's Written Statement of 6th December 2022 removed the need to maintain a 5-year housing supply for Local Authorities with up-to-date Local Plans</p> <p>No target is given for the use of previously developed "brownfield" land. Use of brownfield land is a government and council priority. Also, use of brownfield land minimises the use of greenfield land.</p> <p>The target of 30-40% on site of 10+ dwellings does not make it clear that 30% is for developments on brownfield land and 40% is for developments on greenfield land.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	

Please give reasons for your answer	
4. Proposed Changes	<p>The target should be changed to 513 dwellings per annum (the minimum in the range)</p> <p>The target should be removed.</p> <p>A challenging target should be given for the use of previously developed "brownfield" land.</p> <p>The wording should be changed to make it clear that 30% is for developments on brownfield land and 40% is for developments on greenfield land.</p> <p>No target is given for number of net dwellings completed by dwelling size</p> <p>A target should be given that is based on those in Policy SP18/Table 3.</p>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<ul style="list-style-type: none"> • Bradfield College supports the proposed amendments to the settlement boundary of Bradfield which incorporate the full extent of the indoor Tennis Centre, sports centre car park, Crossways house, boarding houses at the top of the hill and teaching facilities on Buscot Hill. • However, the proposed amendments should extend further to include: <ul style="list-style-type: none"> • The Moat – a College building used for goods deliveries immediately west of the Blackburn Science Centre; and • The staff accommodation to the west of Faulkner's Green. • With reference to the criteria for review of the settlement boundaries (Settlement Boundary Review Background Paper December 2022), the above sites do not warrant exclusion from the settlement boundaries. The sites do not occupy highly visible areas on exposed ridges, land forms or open slopes on the edge of settlements. Whilst the staff accommodation occupies higher land, it is visually contained by mature landscaping and visually connected to the College campus, in particular the Science Centre and visitor car park to the north and indoor sports facilities to the east. The pattern of residential development cannot be described as loose knit, sporadic or dispersed development. • The Moat lies immediately adjacent to the proposed extension of the settlement boundary and an associated cluster of principal College buildings which front onto the public highway and is well related to these buildings. • The inclusion of land opposite Faulkner's Green within the settlement boundary would provide the College with the opportunity to enhance the provision of staff accommodation through redevelopment and/or infill to deliver an improved mix of house types and sizes to meet the needs of staff and achieve a more efficient use of the land within the settlement than allowed under countryside policies. • The Bradfield College Campus Development Framework (June 2019), endorsed by WBC, identifies land at The Moat as suitable to meet future needs of the College through development of a new academic teaching facility. The inclusion of the existing built development within the settlement boundary would align with these agreed principles. • Accordingly, in respect of the tests of soundness the inclusion of these areas within the settlement boundary of Bradfield would represent a positively prepared policy approach consistent with paragraph 79 of the NPPF (2021) to locate housing in rural areas where it can enhance or maintain the vitality of rural communities and paragraph 84 to enable the expansion of all types of rural businesses.
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>The settlement boundary of Bradfield should be amended further to include The Moat and residential properties to the west of Faulkner's Green for the reasons set out above.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>To explain the rationale for including additional land within Bradfield's settlement boundary and the particular benefits of an enlarged settlement boundary for directing and controlling future development.</p>

1. Do you consider the Local Plan Review is legally compliant?	
* Yes	
* No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.	No
* Yes	
* No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.	No
* Yes	
* No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by	No

<p>the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>Please see accompanying statement for our full representations.</p> <p>It is considered that West Berkshire's housing target should be increased and concern that the Council expected housing supply is not sufficient to meet the minimum LHN and will lead to a significant housing shortfall across the plan period.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Please see accompanying statement for our full representations.</p> <p>The settlement boundaries should be amended further as part of the Council's review to provide additional opportunities for growth to help meet the Council's housing targets during the plan period, including at 'Land adjacent New Road, Newbury'.</p> <p>Extract of full response relevant to consultation point:</p> <p>The site <GRE6> could be included in the settlement boundary given its modest scale. It is considered that character of this area clearly makes a greater contribution to the built form of the area; rather than the wider countryside. Such amendments to the settlement boundaries through the review provides an opportunity to proactively deliver small-scale sites to boost supply and to help meet the Council's housing targets during the plan period.</p> <p><Full response attached></p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	Yes
<p>5. Independent Examination</p>	We wish to appear at the examination to present our evidence and technical information to support these representations
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes</p> <p>* No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes</p> <p>* No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes</p> <p>* No</p>	Yes

4. Proposed Changes	<p>The burghfield common settlement boundary has been moved to allow for Oakley drive and Burghfield park to be included within the settlement boundary. It is not a natural defining line to base a settlement boundary, for example where the parish lines finish or even a clear buffer between settlements.</p> <p>There is an obvious settlement boundary line for Burghfield Common that would provide a natural tree buffer between the settlement of Burghfield Common and that of Ufton Nervet as attached.</p> <p>The current proposed west of Burghfield common will omit the following houses from being outside of the settlement boundary:</p> <p>Benhams farm, The Old Barn at Benhams, The Byre at Benhams, The Gatehouse at Benhams, and the Bolt Hole.</p> <p>The settlement boundary review by Burghfield parish council suggested similar to what we are suggesting in that;</p> <p>i) The settlement should include the new Burghfield Park development. ii) The settlement should include the HELAA BUR11 site which will be recommended for development in the forthcoming Burghfield ND</p> <p>It should be noted BUR11 is now SUL1 in the latest HELLA which of course is Benhams Farm.</p> <p>The councils response to this creates a somewhat disjointed settlement boundary and has likley come about due to the changes to the DPEZ and WBC seeking to impose a housing monitorium in Burghfield common and Burghfield Village which goes against everything the NPPF promotes, which is to be in favour of sustainable development</p>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes

Please give reasons for your answer	As we have set out in previous representations (Regulation 18, February 2021), Mr D'Arcy owns land in the village of Wickham, which is considered suitable for development in principle. The land is previously identified in the Housing and Economic Land Availability Assessment (HELAA) as site 'Wel1' (as shown on the following extract from the HELAA (<i>document attached</i>)). Following the Settlement Boundary Review, we support the amendment of the Wickham settlement boundary which now includes this land (Map 55, copied below)(<i>document attached</i>).

<p>Please give reasons for your answer</p>	<p>We have no further comments on the Settlement Boundary Review, however our comments in relation to the Regulation 18 consultation still apply so please do read and consider these (<i>see Appendix 1</i>).</p> <p>The settlement boundary change we suggested does not appear to have been incorporated into the appendix of the Regulation 19 Local Plan. Therefore we would like to take this opportunity to reinforce our comments which suggest the revision to the settlement boundary to include land east of Stoney Lane which would follow clearly defined boundaries and would result in a logical rounding of the urban area of Newbury. It would also be very fitting with the recently approved planning application at land at Coleley Farm. The land east of Stoney Lane could be delivered in the short to medium term and would help to bolster the 5 year housing land supply of West Berkshire.</p> <p><i>For appendix see attachment.</i></p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	The local plan is a good and sound document but in my view does not adequately cover settlement boundary decision criteria adequately enough for hamlet settlements particularly for cul-de-sacs such as Westbrook where particular reference should be made.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is	Yes

<p>consistent with achieving sustainable development.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	Yes
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	Yes
<p>Please give reasons for your answer</p>	Yes to all over the above with the exception of a reference to traffic, parking and double stacking house development in cul-de-sac hamlet settlements within conservation areas such as West brook. I would be useful to reference the special characteristics of a hamlet as opposed to a village and what it means to retain the historic nature of a hamlet.
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	Yes
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	Where small settlements have particular historic and often individual characteristics such as hamlets, cul-de-sacs in rural areas that are within conservation areas, every effort will be made to preserve the character of the settlement by not extending settlement boundaries to allow the distinct and historic nature of the settlement to change in a way that loses its identity.
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	Yes
<p>5. Independent Examination</p>	I understand that the uniqueness of Westbrook within the geographical jurisdiction of the WBC but having lived there for 40 years, I do understand the issues and would be able to explain them coherently. Being unique makes a settlement special as opposed to irrelevant and these places need to be referenced.
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes</p> <p>* No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the</p>	Yes

Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p><i>Extract of response relevant to consultation point</i></p> <p>The approach to identifying settlement boundaries is set out in Appendix 2 to the emerging Local Plan. It states (p.248) that the boundaries will include:</p> <ul style="list-style-type: none"> • "...The main settlement area. i.e. the area of close knit physical character..... •Curtilages which are contained, are visually part of the built up area and are separated from the open or wider countryside..." <p>This is in effect indicating that significant parts of settlements will be regarded as being in 'open countryside', an approach which is plainly illogical where those parts of the settlements that are currently outside settlement boundaries but which continue to play an important role in both contributing Council Tax towards the settlements in question, providing support for local services and facilities, and providing dwellings that are generally counted as forming part of the settlements for Office for National Statistics purposes.</p> <p>The NPPF supports development that is sustainable in all three objectives (social, economic and environmental) (para 8). In recognising the role that dwellings in rural settlements play in supporting local services and facilities (the social and economic elements of sustainable development), the NPPF confirms (paragraph 78) that residential development in rural areas:</p> <p><i>"...should be located where it will enhance or maintain the vitality of rural communities. Planning policies should identify opportunities for villages to grow and thrive, especially where this will support local services. Where there are groups of smaller settlements, development in one village may support services in a village nearby."</i></p> <p>This approach is very much aimed at recognising the value that those existing dwellings towards the edge of settlements such as Streatley and Goring play in terms of helping to achieve sustainable development. However there is no recognition in the policies of the draft Local Plan of the role such dwellings play in supporting their local settlements. This is a significant omission given the important role that these edge of settlement dwellings play in the helping to maintain the viability of the settlements in question.</p> <p>Appendix 2 – Settlement Boundary Review</p> <p>The settlement boundary review (December 2022) which has been undertaken as part of the Local Plan review is understood to have followed a landscape-led approach, but that it is being enhanced with community-led assessments of each individual settlement in determining whether settlement boundaries should be changed.</p> <p>The main criteria for drawing boundaries to include land are understood to be as follows. Boundaries will, in future, <u>include</u>:</p> <ul style="list-style-type: none"> • The main settlement area. i.e. the area of close knit physical character • Sites allocated through the Local Plan and Neighbourhood Plan processes • Curtilages which are contained, are visually part of the built up area and are separated from the open or wider countryside • Recreational or amenity open space which is physically surrounded by the settlement (or adjoined on three sides by the settlement) • Existing community facilities (such as churches, schools and village halls) which are physically and visually related to the settlement • Single plots or other similar small scale development opportunities which would provide infill and rounding off opportunities that are physically, functionally and visually related to the existing built up area, taking account of any environmental development constraints. <p>In contrast it is understood that the following will be excluded from settlement boundaries:</p> <ul style="list-style-type: none"> • Highly visible areas such as exposed ridges, land forms or open slopes on the edge of settlements • Open undeveloped parcels of land on the edges of settlements which are not either functionally or physically or visually related to the existing built up area • Recreational or amenity open space which extends into the countryside or primarily relates to the countryside in form and nature. This includes designated Local Green Space. • Tree belts, woodland areas, watercourses and other features which help to soften, screen existing development and form a boundary to the settlement • Areas of isolated development which are physically or visually detached from the settlement and areas of sporadic, dispersed or ribbon development • Large gardens or other areas, such as orchards, paddocks, allotments, cemeteries and churchyards, which visually relate to the open countryside rather than the settlement

- The extended curtilages of dwellings where future development has the capacity to harm the structure, form and character of the settlement
- Loose knit arrangements of buildings on the edge of a settlement
- Farmsteads, agricultural buildings, or converted agricultural buildings on the edge of a settlement which relate more to the rural context
- Horse related development, minerals extraction, landfill, water features, public utilities (sewage treatment plants, substations) on the edge of a settlement
- Important gaps between developed areas in fragmented settlements. Settlement boundaries do not need to be continuous. It may be appropriate, given the nature and form of a settlement, to define two or more separate elements of it.
- Roads, tracks and public rights of way running along the edge of a settlement

In our previous submission dated 20th January 2021 it was proposed that the settlement boundary should be extended for the reasons as set out below, and all of which remain valid despite the December 2022 report not recommending to extend the settlement boundary at this point.

Land at Vicarage Lane, Streatley (postcode RG8 9HX) represents a parcel of land containing three properties which, although outside the settlement boundary for Streatley as depicted on the proposed Local Plan proposals map, are logically part of the settlement and therefore should be included within the settlement boundary for Streatley despite the findings of the recent review. They are visually related to the village, rather than being visually relate to the open countryside.

The three properties have been described by name in the Village Design Statement for Streatley (2009) p.17 as lying within the settlement boundary. These properties are Waterford House (previously the Vicarage); the Old Vicarage; and Windrush.

Under the heading "THE VILLAGE OF STREATLEY WITHIN THE SETTLEMENT BOUNDARY" the text on page 17 states:

"Vicarage Lane lies opposite Church Lane and to the south of the High Street. A two-storey, 20th century house on the west side of Vicarage Lane occupies part of the originally extensive gardens of Streatley House.

On the east side of Vicarage Lane is the attractive, riverside Millstream House. The Lane leads to a landmark building – the 19th century Vicarage, now a private house, with cream painted brickwork. The stables to that Vicarage have been converted into a two-storey family house. Adjacent to the "Old Vicarage" lies the 1960s vicarage. All these houses are in traditional style with brick walls and plain tile roofs. The windows vary in type, casement or vertical sash, and some frames are painted white whilst others are in natural hardwood finish." (the three properties in question are those underline above).

The proposed extension to the settlement boundary which should be considered is set out in Figure 1 <see attachment pg.6>:

The three properties and their associated curtilages clearly read as forming part of the physical settlement rather than lying outside of the settlement. The Streatley Conservation Area Appraisal takes this further confirming in Appendix 7 that the three properties form part of the historic settlement or recent settlement growth (see Figure 2 <in attachment>) and that they form a part of the setting of – or are included within - the Conservation Area boundary for the Streatley Conservation Area (see extract from Appendix 8 in Figure 3 <see attachment>). Southfields to the south of Waterford House is significant because it does not form part of the continuum of built development on Vicarage Lane and is therefore not a logical part of the settlement. It is an outlier property which takes its access off the Reading Road and is remote, both physically and visually, from the Vicarage Lane properties.

Over the last 20 years Vicarage Lane has changed from a rural muddy track extending southwards out of the village of Streatley into a low density residential road with built development and village amenities along the length of the Lane.

In particular the following changes have taken place:

- The 1960s Vicarage was redeveloped in 2010 to create Waterford House, a modern well-appointed detached dwelling and grounds leading to the edge of the River Thames
- Vicarage Lane was resurfaced for the first time in 2011 and is now well-used for vehicular traffic every day
- In 2011 planning permission was granted for the construction of a manege and equestrian facilities on the west side of Vicarage Lane.
- In 2017 the Granary was demolished and a new dwelling was constructed on the eastern side of Vicarage Lane to the north of Windrush.
- The land immediately to the north of Windrush was acquired by the Parish Council for the benefit of the community in 201.
- In 2015 Windrush was substantially extended to form an impressive family home.
- An impressive indoor swimming pool was built by Streatley House in their garden adjoining the Lane in 2020.

The Lane forms an integral part of the built area of the village of Streatley, and it is therefore entirely logical to include the three properties within an extension to the settlement boundary.

The inclusion of these properties within the boundary will neither harm the setting of the Conservation Area nor the AONB, as the properties are already in situ and no change is proposed as part of this proposed boundary extension.

In the assessment of recent application ref. 21/03097/FULD the Councils' Conservation Officer has confirmed that the potential development of the site, in Conservation terms, was not likely to the impact on designated heritage assets which would be limited to the nearby conservation area only and that a well screened site could be developed without detriment to the setting of the conservation area.

The land clearly reads and is understood by the casual observer to form part of the settlement already, indeed this has been recognised in both the Conservation Area Appraisal and the Village Design Statement. The environmental constraints that affect these three properties (ANOB, Conservation Area

	<p>/ trees / River Thames corridor etc) will serve to ensure that by including these properties within the settlement boundary there is no greater prospect of further development taking place than that which is there today. This satisfies the third objective for sustainable development in the NPPF – the environmental objective.</p> <p>I trust that the above is helpful in clarifying my clients' concerns in relation to the emerging Local Plan. I would be grateful if you could acknowledge receipt of these representations and enclosures.</p> <p><i>For full response see attachment.</i></p>

Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	<p>Yes</p>
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>HAMPSTEAD NORREYS SETTLEMENT BOUNDARY:</p> <ul style="list-style-type: none"> • The Parish Council requested the inclusion of the land of properties that have received planning approval on land outside the village settlement boundary, such as development for 10 houses at Folly View, Springbank, The Old Smythy and development at Manor Farm. However, it is not including the land that has served Tree Tops as an access track and rear garden since 2006. • We recognise that planning permission to formally pave this track has been disputed in the past, however, it is clear that this track has been in constant use since 2009, serving as the main vehicular access to the property Tree Tops. Evidence of this can be seen on the attached letters and photographs of various previous applications, whereby neighbours and nearby residents confirm its long term use. Further evidence can be seen from satellite images, such as google earth, where cars can be seen parked outside the back of the house. It is also clear from satellite imagery that the land to the rear has been used as a garden. • The last planning application ref 20/01914/FUL which was granted in 2020 for an extension of the house, approved the change of use of the lower part of this track to domestic curtilage. • Considering the evidence that this track and land behind Tree Tops has been in domestic use for over 10 years, we request the inclusion of this land to the village settlement boundary. We consider this approach would be consistent with the evidence base underpinning the emerging local plan, in particular the Settlement Boundary Review (SBR) background paper. Specifically Appendix 1

	<p>notes that locations which it is appropriate included curtilages which are contained, visually part of the built up area and are separated from the wider or open countryside.</p> <p>Please see attached on the plan, the land in the request is coloured in pink</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>HAMPSTEAD NORREYS SETTLEMENT BOUNDARY: Inclusion of access track and rear garden of Tree Tops, Forge Hill, Hampstead Norreys, RG18 0TE. Please see attached document and map indicating in pink, the area to be considered for inclusion.</p>

<p>Please give reasons for your answer</p>	<p>We fully support West Berkshire's Local Plan Settlement Boundary Review for Brightwalton as proposed in Regulation 19.</p> <p>This Review of Settlement Boundaries extension to the South, will bring the settlement boundary for Isbury & Killbegs in line with the Settlement boundary of Saxon Acres and Brickleton House to the West of Isbury & Killbegs.</p> <p>Objections made by the Parish Council for not wanting this one area only, not to be extended to the South and brought in line with the other properties to West, doesn't make sense. Particularly as Saxon Acres has its Settlement Boundary in line with the current proposal Review and is adjacent to Isbury & Killbegs and the Conservation Area begins East of Killbegs. In my opinion there doesn't seem to be any valid reason for the objections of extending the Settlement Boundary as per your Review proposal.</p> <p>Concerns about garden infill for development of Isbury and Killbegs seems a bit premature, as any development that may or may not be proposed in the future would still have to adhere to rules and regulations set by West Berkshire Planning Department at the time of application. The current Settlement Boundary Review is based on the whole of Brightwalton Village and therefore, should not prejudice one area only.</p>

<p>Please give reasons for your answer</p>	<p>I do not believe the settlement boundary, as currently defined around Cold Ash - specifically at Alley Gully, Bucklebury Alley, is consistent with the criteria set out in the consultation draft Local Plan and national policy in terms of delivering sustainable development. The current alignment of the Cold Ash settlement boundary at Alley Gully, Bucklebury Alley, should be revised in accordance with the settlement boundary criteria specified by the Council.</p> <p>The current alignment of the boundary is arbitrary and ill-defined; cutting through an area of woodland, identified by DeFRA as priority habitat (circled in black on the extract from Defra Magic Map) and does not follow any defined features, leaving its precise position open to misinterpretation on the ground. The area in question is identified on an extract from the local plan shown by red hatching (see attachment).</p> <p>The Council suggests settlement boundaries have been defined based on landscape analysis, contained within a variety of reports, including:</p> <p>“Landscape Capacity Assessment of Potential Housing Sites within and adjacent to the North Wessex Downs Area of Outstanding Natural Beauty, West Berkshire: FINAL PHASE 2 REPORT: COLD ASH”</p> <p>This report sets out the key landscape characteristics of Cold Ash, which include, inter alia:</p> <p>“- variable land cover forming an intricate mosaic of woodland, pasture and small areas of remnant heathland.....</p> <ul style="list-style-type: none"> • large, interconnected woodland blocks and strong hedgerow pattern with mature trees restrict views and create an enclosed and intimate character; • low wooded horizons are a feature; • numerous semi-natural woodlands of ancient origin; • many features of biodiversity interest including heathland, dry and wet woodland, bog and areas of wet meadow; • intricate network of rural lanes, many sunken and overhung by woodland plus more <p>intrusive road infrastructure.....” The report specifically states:</p> <p>“- historic parkland based on medieval deer parks and manor houses with associated ornamental parklands with gardens, rides and plantings are a particular feature;</p> <ul style="list-style-type: none"> • flat to undulating plateau, generously scaled rolling landscape with some pronounced wooded ridges (VDS); • a complex pattern of landscape, dominated by woodland; coniferous, or mixed with beech and birch (VDS) • pastures; remnant heathlands and commons (VDS); • heathland and woodland habitats - deciduous and mixed woodland to pasture and arable (VDS); • the area abounds with natural drains, issues and sinks, all of which help to ensure natural drainage and control the run-off of excessive rainfall. These are particularly evident in the local gaps between Cold Ash and the neighbouring parishes (VDS); • woodland is a dominant natural feature in this area with a typical landscape of pine and birch...; • the older parts of the villages are more wooded and have larger and more mature species than the newer parts (VDS); • in the future, the lack of large trees could have an adverse effect on the village as a whole if sufficient open space is not provided in new developments to allow for planting larger trees (VDS).” <p>Reference is made to the importance of woodland and natural habitats throughout the report.</p>

This same theme is continued throughout the Cold Ash and Ashmore Green Village Design Statement, adopted as SPG, by West Berkshire Council.

The Design Statement advises, particular landscape features include: "... heathland and woodland habitats...."

"...,deciduous and mixed woodland to pasture and arable linear settlements within wooded areas;"

Bucklebury Alley is specifically mentioned:

"Areas such as Fishers Lane, Bucklebury Alley and the lower part of Ashmore Green Road have retained much of their original look, having grass verges, large trees and hedges and no pavements. Any houses are set well back. Otherwise, the lanes are flanked by fields or woods."

Moreover, the report advises:

"The oldest part of the settlement appears to be the houses and cottages at Bucklebury Alley, which even today gives the impression of being a forest clearing settlement."

Under Policy ENT. 1 Guidelines for Environment, Landscape; specific reference is made to conserving:

"...the diversity and mix of landscape character types in the parish, eg the wooded setting of Cold Ash".

The Council states that:

"...settlement boundaries protect the character of a settlement and prevent unrestricted growth into the countryside...."

The wording "settlement boundaries protect the character of a settlement" is particularly relevant on this occasion. In this instance, the wider "settlement" is Cold Ash, but more specifically in terms of this representation the "settlement" is Bucklebury Alley, which displays its own unique landscape characteristics within the overall context of Cold Ash, as detailed above.

The red hatched area shown on the plan, contributes to the wooded vernacular, of Bucklebury Alley, fronted by mature, if not "vintage" oak trees, set atop a hedge bank along Bucklebury Alley. The site comprises mature ash trees, some of which have already been felled without licence by the landowner, as well as young Beech, Hazel and Holly trees. The area sits within the North Wessex Downs AONB. The site also allows for long views towards Westrop Woods, a key feature of the landscape setting of Bucklebury Alley.

The Council advises:

"Where practicable and barring the exceptions set out below, boundaries will usually follow clearly defined features such as walls, hedgerows, railway lines and roads.

Where possible, preference will be given to using features that are likely to have a degree of permanence as some features can change over time."

This is crucially relevant to the site in question, an area of woodland, with the settlement boundary running through it, which does not follow any clearly defined feature and is, therefore, very much, open to interpretation.

The proposed alteration to the settlement boundary at this point would result in the alignment being clearly and permanently defined by the fence line of the north east boundary to Pine Lodge, by Bucklebury Alley itself along the northern boundary, and the fence line of the garden surrounding Eddystone House (also known as Chy an Drea) along the north west side, illustrated by the red line on the attached extract from the local plan.

The Council suggests:

"single plots or other similar small scale development opportunities which would provide infill and rounding off opportunities that are physically, functionally and visually related to the existing built up area, taking account of any environmental development constraints..."

are suitable for inclusion within settlement boundaries.

However, the critical wording is "physically, functionally and visually related to the existing built up area" and even more importantly "taking account of any environmental development constraints"

The area of land in question falls foul of these specific criteria.

Physically, the site is a small, misshaped, sloping, narrow, sight located on a sharp bend along the Alley with significantly impaired sight lines to east and west, in direct contrast to existing properties.

Functionally, the site provides an area of green infrastructure, especially, essential habitat for protected and non protected species, including bats, as well as an unrestricted stepping stone for roaming mammals such as Muntjacs and a linear habitat in terms of its hedgerow. Its function does not, therefore, accord with the existing built development along the Alley.

Visually, as discussed above, the site plays an essential role in the natural, wooded landscape setting of the Alley,

The Council advises areas to exclude from settlement boundaries, include, inter alia:

"Tree belts, woodland areas, watercourses and other features which help to soften, [and] screen existing development...."

I advocate, this particular area accords with this criteria comprising elements of woodland, hedgerow and an overall area of green infrastructure which contributes to the unique wooded and natural landscape of Bucklebury Alley and should, therefore, fall outside the settlement boundary for Cold Ash.

The proposed re alignment of the Cold Ash settlement boundary at this point - Alley Gully - Bucklebury Alley will be marked by clearly defined, permanent features.

(see attachment)

<p>Please give reasons for your answer</p>	<p>Sir Richard Sutton Limited has land interests in the district including at Stockcross (identified on Map 41 of the SBR, December 20221). We note that the proposed boundary amendments were not subject to open public consultation at Regulation 18 stage, and therefore, we have not had opportunity to comment previously, other than on the criteria for the review. The SBR (Appendix 2) reports that the Parish Council did respond to the Council's closed consultation. It supported the proposed changes, noting that they allowed for a number of potential infill sites, whilst restricting encroachment into wider areas and open spaces. We support the amendment of the Stockcross settlement boundary, including the proposed amendment to include land to the rear of 38-47 Ermin Street. These amendments represent positive planning to help encourage proportionate growth of the village over the plan period (to 2039), which is in general accordance with national policy and its objective to help sustain rural communities, and their existing services and facilities (National Planning Policy Framework, 2021; paragraph 79)</p>

<p>Please give reasons for your answer</p>	<p>Feltham Properties has interest in the outcome of the Settlement Boundary Review (SBR) (December 2022), especially in regard to South East Newbury (Map 37; formerly Map 36), and land around Newbury College and the A339.</p> <p>We note that the only amendment to the settlement boundary in this specific location, is to move the adopted boundary from the west to the east side of the A339.</p> <p>The relatively recent development immediately south of the Newbury College campus appears to have been overlooked in this review. There is now a new primary school (Highwood Copse Primary), accessed from a new service road from the A339., and which will in due course provide an access into the Sandleford Park major development area (now benefitting from outline permission following the Secretary of State decision as well as the extant site allocation in the Core Strategy).</p> <p>With reference to the SBR criteria, settlement boundaries should include, amongst many other things, <i>“Existing community facilities (such as churches, schools and village halls) which are physically and visually related to the settlement”</i>.</p> <p>In this case, the area around the new school and access road are quite clearly both physically and visually related to the settlement of Newbury, adjacent as they are to the College campus, which is within the boundary.</p> <p>It appears that Town Council and the District Council has overlooked the necessity to update this specific part of the town in line with the on the ground reality.</p> <p>Finally, we make a procedural point. There was no open public consultation on the SBR and therefore we and the wider public have not had the opportunity to comment on the proposed amendments until this advanced (Regulation 19 stage), when the Council's position has been finalised (subject to examination). Had there been an open consultation during Regulation 18 stage, Feltham Properties would have raised these matters and encouraged the Council to amend Map 36 in accordance with the review criteria.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>A minor extension of the boundary of Map 37 to include land between the A339 and south of Newbury College, including the Highwood Copse Primary School and access road within the settlement boundary of Newbury.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters	No

<p>that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>Objection.</p> <p>We do support a new boundary review but there is no evidence that any work has been carried out since the last Plan. Alternatively that work was either effective and inadequate.</p> <p>Setting the parameters narrowing the review before carrying out the review is flawed.</p> <p>We are sceptical that this review has been a thorough a vigorous exercise hence it still includes phrases such as "Boundaries will include" and "Boundaries will exclude" which are unnecessary if that work has actually been carried out</p> <p>Further, existing allocated but undeveloped sites were automatically included in the settlement boundary whatever their landscape impact may be.</p> <p>The Plan's approach to the selection of sites prior to the review of settlement boundaries is flawed and not justified.</p> <p>In particular site HAS 19/RSA22 is a large extension to the settlement with no particular boundaries to the north and HAS 20/RSA23 can be described as a ribbon of development which is sporadic and not part of the close knit physical character of the village of Lambourn.</p> <p>HAS 20/RSA 23 has been selected and yet there is no landscaped boundary.</p> <p>The site is on a ridge, and an open area on the edge of the settlement seen at the entrance to the village.</p> <p>The Plan's review of settlement boundaries was previously poorly applied and continues as settlement boundaries have not been <u>comprehensively</u> re-examined.</p> <p>It is nonsensical if an unallocated site which has little impact on the landscape can be examined but a previously allocated site which has not been developed and has undesirable landscape impacts is ignored.</p> <p>Sites HAS 19/RSA22 and HAS 20/RSA 23 should be removed if not required, or one should be replaced by LAM007 or alternatively LAM007 "Land between Folly Road, Rockfel Road and Stork House Drive" should be included in the settlement boundary alteration for Lambourn in addition to meet overall housing need.</p> <p>in particular HAS 20/RSA 23 compares unfavourably with LAM007. It is irregular in shape, has no natural containment and is further from the village centre. It is unable to provide the variety of mix and type of housing which can be delivered by LAM007 and is centred on the provision of low density high cost housing unsuited to the low cost housing required by the horse racing economy of Lambourn.</p> <p>Site LAM007 should be included in the Draft LPR.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	Please see other submissions on this specific point <See Rep: ID1170>
<p>4. Proposed Changes</p>	Carry out an unconstrained boundary review to include all sites on the edge of urban areas, especially around Lambourn, and not the limited review that appears to have taken place.
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	Yes
<p>5. Independent Examination</p>	We do not consider the LPR is sound and would like to participate in the examination.
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p>	Yes

* Yes	
* No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination	Yes

Please give reasons for your answer	<p>The settlement boundaries have been reviewed in the Settlement Boundary Review Background Paper published in December 2022, a paper which forms part of the 'evidence base' supporting the Draft Local Plan.</p> <p>We note that the scope of these reviews for smaller settlements was extremely limited and mainly consisted of slight tweaks to the existing boundaries, as opposed to any more significant changes to include adjoining built form or meaningful extension of settlements to reflect functional relationships. Map 54, contained in appendix 3 of the Settlement Boundary Review Background Paper shows that the review of Yattendon applied this limited approach and has not sought to include existing development to the south within an updated settlement boundary.</p> <p>The existing built form to the south of the existing boundary (comprising The Withys / Home Farm Cottages and the Renegade Brewery) forms part of the functional operation of Yattendon Village in combination with the central cricket pitch. This area of built form comprises 21no dwellings and 14no commercial properties, amounting to approx. 8,400m² of commercial floorspace. These commercial premises employ 120no people. Due to its scale and functional relationship, this area should be included within the Yattendon settlement boundary.</p> <p>The Settlement Boundary Review Background Paper lists the criteria of inclusion of land within a settlement boundary (pages 7 and 8). Page 8 in particular set out the specific issues to be considered on a site by site basis and we note that leisure uses located on the edge of settlements will be considered according to their scale, functionality, visual and physical relationship to the settlement.</p> <p>The cricket pitch, which represents a leisure use, shares two boundaries with the existing settlement boundary of Yattendon and therefore they are physically connected. The Withys / Home Farm Cottages and the Renegade Brewery are sited directly to the south of the cricket pitch, on a third side, emphasizing the functional and visual relationship of this built form with the settlement of Yattendon as currently defined.</p> <p>On the basis of the above, we request that the settlement boundary for Yattendon is expanded to include the cricket pitch, The Withys, Home Farm Cottages and the Renegade Brewery.</p> <p>Alternatively, should the Council not wish to include the cricket pitch, a second separate settlement boundary for Yattendon should be introduced to comprise The Withys, Home Farm Cottages and the Renegade Brewery. We note that other settlements within the district, such as Enborne Row and Eastbury, comprise 2 separate boundaries and this approach should also be applied to Yattendon.</p>

Please give reasons for your answer	<p>Settlement Boundary Review Background Paper (December 2022)</p> <p>Croudace notes the Settlement Boundary Review confirms that no changes to the settlement boundaries to the north of Thatcham, either affecting or close to the site, are proposed. The Council confirms a 'landscape led approach' to the re-drawing of settlement boundaries has been taken.</p> <p>Page 7 of the document provides a list of built development and landscape features that settlement boundaries will or will not include. It is confirmed that contained curtilages and single plots that are physically and visually related to the settlement will be included, whilst the inclusion/exclusion of employment and leisure uses located at the edge of settlements will be considered on a site by site basis.</p> <p>On that basis, Croudace are concerned that the Regency Park Hotel, and dwellings known as 'The Creek', 'Creek Cottage' and 'Creek Bungalow' along Bowling Green Road and Heath Lane have not been included within the settlement boundary for Thatcham.</p> <p>Regarding the hotel, Croudace contests that it is counterproductive and economically limiting to exclude this business from the settlement of Thatcham. To promote investment in existing facilities, Croudace considers that a relatively straightforward amendment to the settlement boundary should be made to allow future expansion or alteration to the hotel to be more straightforward and not constrained by an arbitrary line on a plan at which point planning policy direction changes.</p> <p>Likewise, the dwellings mentioned above are all read as part of Thatcham, are accessed from a main public highway and turn their back on the open countryside beyond Thatcham.</p> <p>The dwellings and their enclosed curtilages should be included within the settlement boundary, particularly as it has already been established that:</p> <ul style="list-style-type: none"> - The Settlement Boundary Review Background Paper takes a 'landscape led' approach; and - The sites mentioned fall below the 95m contour above which landscape impacts begin to arise. <p>Croudace urges the Council to revisit its assessment of the settlement boundary of Thatcham accordingly.</p>

Please give reasons for your answer	<p>The plan fails to consider amendments to the existing settlement boundary to include existing developed areas and anomalies within the existing mapping that would form a logical part of the existing settlement. The LPR evidence base includes the settlement boundary review topic paper. Appendix 1 of the topic paper – the audit criteria for services and facilities states that:</p> <p>“A settlement’s accessibility to services and facilities is defined by a 1 kilometre radius from the centre of the settlement and for access to railway stations and employment opportunities within 2 kilometres. These distances demonstrate a reasonable commutable walking distance as suggested by the Chartered Institution of Highways and Transportation (Providing for Journeys on Foot 2000)”</p> <p>Appendix 2 – the settlement audit identifies the range of services and facilities available in Pangbourne and maps the 1km and 2km distances. It is of note that the whole of the Pangbourne College Estate is within 2km of the centre of the settlement, and a large proportion lies within 1km.</p> <p>Appendix 3 – the audit matrix and settlement scores identifies Pangbourne as the joint third highest scoring settlement within the District (excluding the main urban areas). It scores 40 points out of a maximum of 48, losing points for matters such as the lack of a mobile library (despite it having a permanent one). It is clearly one of the most sustainable settlements within the district.</p> <p>The plan fails to consider amendments to the existing settlement boundary to include existing developed areas and anomalies within the existing mapping that would form a logical part of the existing settlement. It is considered that the settlement boundary around Pangbourne should be reviewed to take into the account the “on the ground” position of the Pangbourne College boathouse site, where the settlement currently dissects the site artificially.</p> <p>The below map extract shows the existing settlement boundary (black line), the proposed change to it shown in the Settlement Boundary Background Paper 2022 as part of Local Plan Review (green line) and the Pangbourne College boathouse site (red line). We consider that there is no rationale for the settlement not extending to the end of the boathouse site, which would align with the settlement edge at Hartslock Court. This would form a more logical edge to the settlement to reflect the existing built for within the settlement and would not extend it beyond the current eastern extent.</p> <p><i>See attachment ‘PS1546 Turley (Pangbourne College) Boathouse SBR Plan’</i></p> <p>There is no logical rationale for the placement of the current settlement boundary line and it is requested that it is amended to include the whole of the site. This is not a major modification to the proposed plan but instead corrects the current on the ground position.</p> <p>Submissions have previously been made throughout the emerging Housing Site Allocations DPD process proposing the amendment of the settlement boundary to include the site which is considered more closely reflects the existing pattern of development on this edge of Pangbourne.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	N/A
4. Proposed Changes	It is considered that the settlement boundary around Pangbourne should be reviewed to take into the account the “on the ground” position of the Pangbourne College boathouse site, where the settlement currently dissects the site artificially.

	<p>The below map extract shows the existing settlement boundary (black line), the proposed change to it shown in the Settlement Boundary Background Paper 2022 as part of Local Plan Review (green line) and the Pangbourne College boathouse site (red line). We consider that there is no rationale for the settlement not extending to the end of the boathouse site, which would align with the settlement edge at Hartslock Court. This would form a more logical edge to the settlement to reflect the existing built for within the settlement and would not extend it beyond the current eastern extent.</p> <p><for map see attachment></p> <p>There is no logical rationale for the placement of the current settlement boundary line and it is requested that it is amended to include the whole of the site. This is not a major modification to the proposed plan but instead corrects the current on the ground position.</p> <p>Submissions have previously been made throughout the emerging Housing Site Allocations DPD process proposing the amendment of the settlement boundary to include the site which is considered more closely reflects the existing pattern of development on this edge of Pangbourne.</p>

Please give reasons for your answer	<p>*LATE RESPONSE*</p> <p>I am the joint owner of a plot of land and garage on Morphetts Lane Chieveley included in the 2017 HSA DPD as CHI016 under boundary Changes too Small to allocate now called CHI014.</p> <p>It has been in family ownership for 53 years, Morphetts lane used as an access at all times with or without vehicles and a right established to drive on the footpath. As such a prescriptive access is noted on the HMLR title gained by long use. Any questions regarding this I am happy to answer. I have not been consulted.</p> <p>I apologise for my late response <i>[personal information removed]</i> I have been following closely the stages of the Local Plan Review in which it was stated that settlement boundary maps would be included in the plan by the spring of 2021. I was unable to locate these and there was no written reference to boundary changes for Chieveley that I could find.</p> <p>It has now come to my attention that there is a proposal for the settlement boundary to the North of the Village of Chieveley to revert to its pre 2017 HSA DPD position. There seems to be no evidence put forward for this and the change would appear to be arbitrary.</p> <p>Chieveley Parish Council wrote in response to Consultation on the LPR 2022-39 settlement boundary review in 2020 page 136 "The settlement boundaries were reviewed for the housing site Allocations Development Plan Document adopted in May 2017. Nothing has changed since then. The settlement boundaries for Chieveley and Courage seem appropriate the Parish Council is unaware of any compelling need to Change them"</p> <p>In this document the response from West Berks Council Certainly does not mention changes to the settlement boundary North of the village.</p> <p>The Kirkham Landscape report is used as base evidence for the 2022-2039 LPR in which it highlights that in this part of the village there would be no harm to the landscape from some development.</p>

	<p>The 2017 HSA DPD was a rigorously researched and endlessly consulted upon ,legal document.Is there any evidence to say the settlement boundary of Chieveley was established in the wrong location?</p> <p>If there is a proposal for the settlement boundary to be moved where is the proposal?</p> <p>From ,Review of settlement boundaries West Berks LPR 2022-39</p> <p>“Settlement boundaries create a level of certainty about whether or not the principle of development is likely to be acceptable.”</p> <p>Considering that, should a settlement boundary be moved without reason within 5 years?</p> <p>From 2011 to 2017 my family and I participated in the HSA DPD as complete amateurs with no planning or Planning Policy skills. We were patiently guided by West Berks Planning Policy through the process of the plan as to the correct pathway. I strongly object to this backward step and question the transparency of this part of the Plan. We hope that we have a voice all be it small one.</p>

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	<p>The Council's decision to not take forward the amendment to the settlement boundary at 'land north of Laburnum Cottages, Boxford' is flawed.</p> <p>Background Specifically, this representation is made in relation to our client's land interests at Boxford, particularly 'Land to the north of Laburnum Cottages' and 'Land to the west of Westbrook Cottage'. We have previously submitted to the Council a proposed amendment to the settlement boundary to the north of Boxford – to include the 'land to the north of Laburnum cottages' - as part of the 'emerging draft' LPR Consultation concluding in February 2021. The Settlement Boundary Background Paper (December 2022) demonstrates that the Council suggested inclusion of this land within the settlement boundary (amongst other minor changes) at Boxford – see Map 6 'consultation with town/parish councils', dated March 2021. However, following the consultation with the Parish and their objection, the settlement boundary was revised to exclude our client's site – see Map 6 'proposed submission', dated December 2022. We disagree with this revised assessment/conclusion for the reasons set out below.</p> <p>Housing Delivery</p>

It is considered that there are a number of matters (e.g affordability, boosting supply etc.) that indicate that the proposed housing strategy is flawed and there is justification to increase the housing requirement. Furthermore, the Council's current housing supply would fail to meet the LHN, particularly due to reliance on windfall sites and the strategic allocations.

As such, the settlement boundary review provides an opportunity to proactively identify small-scale/infill sites to boost supply and to help ensure that the Council meets it's housing target.

Submissions to Settlement Boundary Review

'Land to the north of Laburnum Cottages'

Boxford Parish Council strongly objected to the inclusion of 'land to the north of Laburnum Cottages'. The Parish, at Appendix 2 of the Settlement Boundary Background Paper, contend that the site would be an extension to the built up area, rather than infill. Further, that the site is not either functionally or physically or visually related to the existing built-up area.

Contrary to the Parish Council's assessment, the site has a contiguous link with existing dwellings to the south, north, and east. In addition, beyond the road to the west lies further residential development. The land is visually well contained from the wider countryside and landscape and would be seen in the context of the existing residential dwellings and built-up area of the village running along the road.

The land is also within the boundary of the Boxford Conservation Area, which further demonstrates that it is functionally related to the existing built up area of the village. The merits for including the site within the settlement boundary are compelling.

The Council in response to the Parish comments explain that they wanted to "explore the potential for including the site as a single plot or other similar small scale development opportunity which would provide an infill or rounding off opportunity that is physically, functionally and visually related to the existing built up area". Further, the Council acknowledge that "an extension on this side of the road would therefore present a good 'rounding off opportunity'". However, they conclude that given the Parish's strong views, the settlement boundary would not be revised to include this site.

The Council's decision to not take forward this amendment to the settlement boundary is clearly not justified. The Officers professional planning assessment is that the proposed extension to the settlement boundary meets the criteria for inclusion in the settlement boundary. However, the Parish Council's views take precedence over this professional assessment.

As a result, and noting that there is a need to significantly increase the supply of housing in West Berkshire, we are of the view that the Council should re-consider 'land to the north of Laburnum Cottages' for inclusion in the settlement boundary of Boxford – and it would be hard to imagine a more suitable site than this for a small infill development in the settlement boundary.

Land to the west of Westbrook Cottage

With the need to significantly boost supply of housing in West Berkshire, our client notes that the following land in their ownership is also available for inclusion in the settlement boundary of Boxford.

Similarly, the land is visually well contained from the wider countryside and landscape and would be seen in the context of the existing residential dwellings and built-up area of the village.

As such, there is potential to include this land within a revised settlement boundary to accommodate a small-scale infill development. Further, it clearly follows the Council's criteria for land uses to include within the revised settlement boundaries.

Summary

It is considered that the Council should actively seek to identify opportunities to amend the settlement boundaries to deliver small-scale sites, alongside allocations, to meet the Council's housing target. Accordingly, we are of the view that the Council should re-consider the inclusion of 'land to the north of Laburnum Cottages' within the settlement boundary at Boxford, in addition to other land/plots that have been not previously considered in suitable locations such as 'land to the west of Westbrook Cottage'. We trust this Statement clearly sets out our client's position at this stage and respectively request that the above is given due consideration as part of the West Berkshire Local Plan Review.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?

- * Yes
- * No

Please give reasons for your answer

4. Proposed Changes

There is a need to significantly increase the supply of housing in West Berkshire. As such, we are of the view that the Council should re-consider 'land to the north of Laburnum Cottages' for inclusion in the settlement boundary of Boxford and other sites to help ensure that the Council meets it's housing target.

Please refer to attachment (Figure 1 Map) for suggested further amendment to the Boxford settlement boundary.

5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?

Yes

* Yes * No	
5. Independent Examination	We wish to appear at the examination to present our evidence and technical information to support these representations
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes	Yes

* No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	Settlement Boundary At present the settlement boundary runs along Lower Way, thereby excluding a development site from the built-up area. We do not understand the reasoning behind this as it is clearly a developed site. We therefore request that the settlement boundary is amended in accordance with Plan A [see attachment PS1678 Iver (A.Hindocha) Plan A] to include our site within the settlement boundary. Concluding Remarks The former Newbury Leisure Park, given it's a redundant brownfield site should be given priority by West Berkshire District Council to enable it to be re-developed prior to the release of greenfield sites.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	The settlement boundary that runs along Lower Way should be amended to include the former Newbury Leisure Park site and Moorstream Cottages as this is previously developed land
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	The use of brownfield sites prior to greenfield release should be a fundamental objective of the local plan which needs to be addressed. We would therefore wish to have a seat at the examination.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination	Yes

* Yes	
* No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review	Yes
* Yes	
* No

<p>the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>HNPC does not feel it is appropriate to include the land known as 'The Paddock' within the settlement boundary as this may then allow for development to occur on this land. Currently, Hampstead Norreys experiences regular closures of Water Street due to the drains being blocked. This has been particularly noticeable over the current winter and Thames Water has been required to do extensive work to maintain the system.</p> <p>As the drainage in Water Street is already unable to cope with the pressure of the surrounding dwellings, it is deemed inappropriate to make The Paddock more susceptible to the development of new dwellings. In Appendix 9, the LPR states the following definition:</p> <ul style="list-style-type: none"> • Settlement boundaries identify the main built up area of a settlement within which development is • considered acceptable in principle, subject to other policy considerations. While allowing for • development, settlement boundaries protect the character of a settlement and prevent unrestricted • growth into the countryside. They create a level of certainty about whether or not the principle of • development is likely to be acceptable. <p>This confirms that the presence of the settlement boundary along the proposed line will leave The Paddock susceptible to development.</p> <p>The LPR states:</p> <p>4.35 Settlements outside of the settlement hierarchy will deliver additional development but this will be limited to infill or change of use within the settlement where a settlement boundary has been defined, and to rural exception schemes for affordable housing to meet local needs. Some limited development is important for the long-term sustainability of rural communities. Outside these settlements, in the countryside, a more restrictive approach to development will be taken as set out in other policies in the LPR . Again, the presumption is that if an area of land is included within the settlement boundary, there is a presumption that it is available for infill development.</p> <p>In Appendix 2 of the LPR, it states:</p> <p>Principles of inclusion of land uses</p> <p>Settlement boundaries identify the main built up area of a settlement within which development is considered acceptable in principle, subject to other policy considerations. While allowing for development, settlement boundaries protect the character of a settlement and prevent unrestricted growth into the countryside. They create a level of certainty about whether or not the principle of development is likely to be acceptable.</p> <p>West Berkshire Local Plan Review 2022-2039 Proposed Submission Representation Form (20 January – 3 March 2023) Where practicable and barring the exceptions set out below, boundaries will usually follow clearly defined features such as walls, hedgerows, railway lines and roads. Where possible, preference will be given to using features that are likely to have a degree of permanence as some features can change over time. Where development is on one side of the road only, the settlement boundary will be drawn along the edge closest to the settlement. Some boundaries may also follow along the rear of built development in order to prevent inappropriate development, for instance where dwellings have large back gardens.</p> <p>It should be noted that the current proposed settlement boundary line runs across The Paddock but does not follow a clearly defined feature. However, were the settlement boundary to run along the boundary of Red Cottage, these criteria would be met.</p> <p>HNPC therefore strongly requests that the proposed settlement boundary is altered as it is suggesting, to run along the boundary of Red Cottage</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Having reviewed the proposed LPR settlement boundary, Hampstead Norreys Parish Council (HNPC) requests changes be made as per the green line on the attached map. The green line is proposed to run from the current settlement boundary along the rear of the dwellings at Folly View, along the side of the end property, and then drop back along the front of the properties adjacent to the road before running along the boundary of Red Cottage and back up along the rear boundaries of the houses on Water Street.</p>

	HNPC therefore strongly requests that the proposed settlement boundary is altered as it is suggesting, to run along the boundary of Red Cottage

<p>Please give reasons for your answer</p>	<p><i>Extract of full representation relevant to this consultation point. For full representation see attachment. Footnotes are included in the attachment.</i></p> <p>We also wish to comment on the Settlement Boundary Review (footnote 17), undertaken as part of the LPR.</p> <p>On a procedural point, we note that the proposed changes to the settlement boundaries were not subject to public consultation at Regulation 18 stage, but consultation was limited to local representatives (Parish Councils and Neighbourhood Plan Groups). We have therefore not had opportunity to comment on how the Council has applied the criteria to settlements and specific contexts and would have wished to have done so prior to Regulation 19 stage.</p> <p>The settlement boundary map for Hungerford (Map 30; previously Map 29) shows a proposed amendment on the southern part of the town. The proposed change appears to represent the new residential development that was previously allocated in the development plans as site HSA18.</p> <p>In terms of the review criteria, the SBR explains that “boundaries will usually follow clearly defined features such as walls, hedgerows, railway lines and roads” (footnote 18).</p> <p>Noting this criteria, and the Town Council’s preference for directing the housing requirement, either all or in part, to site HUN14 (which covers this part of the town), it would be logical and positive plan making to amend the boundary to include all of the remainder of this field, i.e. up to the well-established, treelined hedge boundary that contains the field, and provides a strong, defensible boundary.</p> <p>We note that Town Council’s response to the closed consultation was to align the boundary with the planning permission for land South of Priory Road (footnote 19). By contrast, this does not provide a strong defensible boundary, and follows no obvious physical features on the ground. We contend that the logical boundary, consistent with the review criteria, is to align it as we have described.</p> <p>The area in question is identified in blue mark-up on the following extract of Map 30: <for map see attachment></p> <p>Attachments: full representation including appendix A and B</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>We note that the settlement boundary review has been undertaken since the Regulation 18 consultation took place. The Settlement Boundary Review (SBR) (December 2022) includes the proposed new settlement boundary for Donnington, which we note does not significantly differ from the current settlement boundary.</p> <p>In limiting the ambition of the settlement boundary review, the Council has overlooked the opportunity to consider potential for development on well-located sites in close proximity to existing settlements.</p> <p>Within our representations to the Regulation 18 Consultation, we commented that we disagree with the Council's approach of relying on larger sites and ruling out sites within smaller settlements and only allocating sites which fall within the service villages, rural service villages or urban areas. The Regulation 19 Draft Local Plan follows suit in its approach to allocating sites for housing development, as evidenced by the allocated sites Sanddeford Park (1,500 dwellings) and North-East Thatcham (1,500 dwellings). As such, we maintain that the Council should seek to accommodate further growth across the district. The Council's approach, in our view, is not consistent with the NPPF.</p> <p>The Landscape and Visual Appraisal Note which accompanies these representations shows that our client's site at Donnington Valley Golf Course could accommodate housing development which would assist the Council in reducing reliance on larger sites. Whilst the principles of delivering large sites with accompanying infrastructure is supported by national planning policy, and we do not object to these allocations, we raise concern that the numbers suggested may not be delivered within the plan period. In particular, large allocations require substantial infrastructure to be delivered prior to any housing delivery. Increased small and medium scale sites would complement the larger sites by ensuring a constant stream of delivery whilst larger sites start to mobilise. A modest area of development (50-100 dwellings) at Donnington Valley Golf Course would provide a suitable additional allocation to be delivered in the short term and compliment the longer-term allocations.</p> <p>At paragraph 79, the NPPF states:</p> <p>"To promote sustainable development in rural areas, housing should be located where it will enhance or maintain the vitality of rural communities. Planning policies should identify opportunities for villages to grow and thrive, especially where this will support local services. Where there are groups of smaller settlements, development in one village may support services in a village nearby."</p> <p>The Council's approach to rule out sites which are outside of the settlement hierarchy (at stage 3 of the site selection process), without considering the site-specific benefits of such sites, is inconsistent with the above paragraph of national planning policy. The approach also overlooks the circumstances relevant to settlements such as Donnington which, whilst below the Council's settlement hierarchy, has a close</p>

	functional relationship to Newbury and, therefore, benefits from the services and facilities in Newbury which are readily accessible.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	
4. Proposed Changes	Based on the comments above, we request the following: <ul style="list-style-type: none"> • The Council to reconsider the scope of the settlement boundary review around Donnington to include our client's site. • Reconsider the overreliance on larger sites through the allocation of more small / medium sites. • Consider the allocation of sites within lower-order settlements of the settlement hierarchy. The above will ensure that this approach is 'effective', 'justified' and 'consistent with national policy.'

Please give reasons for your answer	<p>Appendix 2 of the draft Local Plan defines Settlement Boundaries as follows: "They identify the main built up area of a settlement within which development is considered acceptable in principle, subject to other policy considerations."</p> <p>This definition creates a presumption in favour of development unless this would conflict with policies within the Local Plan.</p> <p>The area for housing will in any case need to be reduced from what was envisaged in the Strategic Growth Study, in order to deliver the housing densities defined in the West Berkshire Density Pattern Book. The settlement boundary needs to reflect this.</p> <p>Appendix 2 states that "Boundaries will exclude: Recreational or amenity open space which extends into the countryside or primarily relates to the countryside in form and nature. This includes designated Local Green Space." The map on page 65 shows three areas of "Country Park / Public Open Space" adjacent to the 'site boundary'. These are clearly 'recreational or amenity open space' – so must be outside the settlement boundary. However, there is no supporting evidence to support their location and size – so their position on the map must be considered at present to be indicative.</p> <p>Paragraph 6.58 of the draft Local Plan states: "The new revised settlement boundary will be defined following the studies and work identified in the policy at the application stage."</p> <p>The 'red line' boundary map of the map on page 65 of the draft Local Plan is described as the "North East Thattham Site Boundary" – i.e. the boundary of site THA20. However, this same boundary has been incorrectly transferred to the Policies Map and shown in map 46: Thattham E of the Settlement Boundary Review paper as the settlement boundary.</p>

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	N/A
<p>4. Proposed Changes</p>	<p>The term “settlement boundary” is not used in legislation or Government guidance on planning. There is therefore no requirement for a site allocation in a Local Plan to fall within a settlement boundary. It is clearly premature to specify any new settlement plan, and incompatible with paragraph 6.58 of the draft Local Plan.</p> <p>The map on page 65 of the draft Local Plan provides a way forward, because it shows the boundary of the site, rather than the settlement boundary:</p> <p>(i) Paragraph 6.58 needs to be modified as follows: “The new revised settlement boundary will be defined within the <u>‘North East Thattham Site Boundary in the accompanying map.’</u> following the studies and work identified in the policy for a development of <u>at most approximately 1,500 dwellings</u> at the application stage. <u>The settlement boundary will exclude any country park or public open space on the edge of the development</u>” <i>(added text is underlined)</i></p> <p>(ii) The settlement boundary on the Policies Map needs to be restored to its current position – along Bath Road and Floral Way, in accordance with Paragraph 6.58 of the draft Local Plan.</p> <p>(iii) A revision of the document ‘Settlement Boundary Review (SBR) December 2022’ needs to be published, in which ‘Map 46: Thattham E’ is amended to show the settlement boundary in its current position – along Bath Road and Floral Way.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
<p>5. Independent Examination</p>	<p>Thattham Town Council is the principal representative body of the community of Thattham, which is the location of only new strategic site allocation in the draft Local Plan. The suitability of this site for development is reliant on having adequate infrastructure. However, the regeneration that was promised in the current Local Plan has not materialised, and would not be delivered through the policies in the draft Local Plan. The Town Council can provide local insight to the examination about Thattham, and particularly on the substantial deficit of infrastructure in the locality. It would also be happy to elaborate on its other concerns about the current proposals for the North East Thattham Strategic Site Allocation, as described in these representations.</p> <p>The Town Council anticipates that changes necessary to the draft Local Plan in relation to site allocations are greater than could be addressed through ‘main modifications’. If, however, the Inspector is minded to consider recommending ‘main modifications’ to policy SP17 and related matters in other Policies, it would welcome the opportunity to provide its perspective on what modifications would be required.</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>Introduction</p> <p>We refer to the above consultation event and respond on behalf of our client, Ms S McElhinney who have interests with respect of land located east of Little Lane, Upper Bucklebury. As explained below, land east of Little Lane, Upper Bucklebury should be included in the defined settlement boundary of the village when considered against the Council's criteria for definition (as outlined in appendix 2 of the Draft Submission Plan), including its application elsewhere in the district. The omission of land east of Little Lane, Upper Bucklebury is therefore a clear illustration of inconsistency within the Draft Submission Local Plan and therefore that it is unsound, of the basis of not being justified.</p> <p>National Planning Policy Framework (NPPF) and the Tests of Soundness</p> <p>The NPPF (July 2021) sets out the principal components to be included in local plans. Paragraph 35 requires that in order to be "sound" a Development Plan Document ('DPD') should be positively prepared, justified, effective and consistent with national policy.</p> <p>In order to be justified the DPD must be founded upon a proportionate evidence base and represent an appropriate strategy when considered against the reasonable alternatives.</p> <p>Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the Statement of Common Ground.</p> <p>The positive preparation test requires plans to as a minimum, seeks to meet the area's objectively assessed needs and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical.</p> <p>For the reasons set out in these submissions there are a number of potential matters that need to be addressed in future iterations of the emerging Plan. These are outlined following the relevant policies and supporting information within the Draft Submission Local Plan.</p> <p>Review of settlement boundaries</p> <p>Irrespective of the objection to the Council's categorization of settlements, we also dispute the application of the methodology for defining settlement boundaries as detailed in appendix 2 of the Draft Submission Plan. The Council's proposed approach has unjustifiably excluded the existing dwellings along Byles Green, to the east of Little Lane, Upper Bucklebury, whereas had it consistently applied its methodology these would have been included.</p> <p>The Council's methodology as detailed in appendix 2 states the following " principles for inclusion of land uses":</p> <p>Settlement boundaries identify the main built up area of a settlement within which development is considered acceptable in principle, subject to other policy considerations. While allowing for development, settlement boundaries protect the character of a settlement and prevent unrestricted growth into the countryside. They create a level of certainty about whether or not the principle of development is likely to be acceptable.</p> <p>Where practicable and barring the exceptions set out below, boundaries will usually follow clearly defined features such as walls, hedgerows, railway lines and roads. Where possible, preference will be given to using features that are likely to have a degree of permanence as some features can change over time. Where development is on one side of the road only, the settlement boundary will be drawn along the edge closest to the settlement. Some boundaries may also follow along the rear of built development in order to prevent inappropriate development, for instance where dwellings have large back gardens.</p> <p>The analysis above when determining the population of Upper Bucklebury is an illustration of the potential extent of the main built up area of the village, and this thus a useful aid.</p> <p>Appendix 2 of the Draft Submission Plan confirms that "Boundaries will include":</p> <ul style="list-style-type: none"> • The main settlement area. i.e. the area of close knit physical character • Residential sites allocated through the Local Plan and neighbourhood plan processes • Curtilages which are contained, are visually part of the built up area and are separated from the open or wider countryside • Recreational or amenity open space which is physically surrounded by the settlement (or adjoined on three sides by the settlement) • Existing community facilities (such as churches, schools and village halls) which are physically and visually related to the settlement

- **Single plots or other similar small scale development opportunities which would provide infill and rounding off opportunities that are physically, functionally and visually related to the existing built up area, taking account of any environmental development constraints.**

Within the criteria, it is important to emphasize the role of those areas with a close knit physical character and equally important that recreational or amenity space can be included within the proposed boundaries, even where it is surrounded on three sides by the settlement.

The current and proposed boundaries for Upper Bucklebury are illustrated in the Settlement Boundary Review Background Paper (December 2022) within map 53 and are shown below

[for map, see page 6 of attachment 'PS1572 Woolf Bond (S. McElhinney)].

The proposed boundary of the Local Plan entails the removal of the existing amenity/open space area to the east of Little Lane even though it is enclosed on at least three sides by existing development. This is considered to be contrary to the clear approach that the Council indicated that it would follow.

However, our view is that rather than omitting the open space east of Little Lane from the settlement boundary for Upper Bucklebury, this should be retained and also that the dwellings that lie to its north (off Byles Lane) should also be included. Our advocated amended settlement boundary is shown below (blue dashed line)

[for map, see page 7 of attachment 'PS1572 Woolf Bond (S. McElhinney)].

The retention of the existing area of open space east of Little Lane, Upper Bucklebury within the settlement boundary whilst adhering to the Council's methodology would also reflect its approach for similar areas of open space in settlements like Burghfield Common and Chieveley as illustrated below.

Area of open space enclosed on up to three sides in Burghfield Common included in the settlement boundary

[for map, see page 7 of attachment 'PS1572 Woolf Bond (S. McElhinney)]

Area of open space enclosed on up to three sides in Burghfield Common included in the settlement boundary

[for map, see page 8 of attachment 'PS1572 Woolf Bond (S. McElhinney)]

The exclusion of the open space east of Little Lane, Upper Bucklebury from the defined settlement boundary is therefore an illustration of the inconsistent application of the Council's methodology.

Furthermore, and irrespective of this, the Council in other settlements has included linear tongues of residential development within the defined settlement and this should therefore apply to the dwellings along Byles Green, Upper Bucklebury. Had this been done, the open space as analyzed above would have been included in the defined settlement as it would have been encircled by existing development. This is therefore a further reason for making the adjustment to the settlement boundary advocated.

Some of the examples of where linear residential development is included in the proposed settlement boundary are shown below. As indicated, the approach of the Local Plan has not sought to apply its methodology consistently and therefore it is not justified.

The area in south-east Brightwalton includes a tongue of residential development included in the settlement as shown below

[for map, see page 9 of attachment 'PS1572 Woolf Bond (S. McElhinney)].

Linear development in Brightwalton Green included in a settlement boundary as shown below

[for map, see page 9 of attachment 'PS1572 Woolf Bond (S. McElhinney)].

Linear development to the south-west of Pangbourne included in a settlement boundary

[for map, see page 10 of attachment 'PS1572 Woolf Bond (S. McElhinney)].

The revision to Upper Bucklebury's settlement boundary as advocated would address the concerns on soundness outlined above, and would also provide scope to support additional development in the village to support and enhance the vitality and viability of existing services, a benefit for existing residents which already totals over 1,000 together with future ones.

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>That to address the soundness concerns, the following amendments to the policy are made: 3. That the settlement boundary of Upper Bucklebury is revised to both retain the existing open space east of Little Lane and include the dwellings of Byles Green.</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>[See attachment 'Andrew Black Consulting (Bucklebury PC) Full Rep' for full consultation response]</p> <p>The Settlement Boundary Review (SBR) Paper (December 2022) also forms part of the evidence base for the LBR. Paragraph 12 of the paper sets out the following:</p> <p><i>In Spring 2020, the council gave all town/parish councils and neighbourhood planning (NDP) groups across the District an opportunity to undertake an initial review of boundaries themselves. Officers held three workshops in Calcot, Newbury and Hungerford in February 2020 outlining the work involved and then followed this up with further written advice and maps showing existing boundaries to encourage community involvement.</i></p> <p>The SBR Paper goes onto state at paragraph 15:</p> <p><i>As far as possible the council used the results from this exercise as a clear community steer for the way forward and considered this information alongside the evidence contained in existing landscape character assessments and other relevant documents referred above. At the same time, a number of requests that had been submitted, as part of the Local Plan Review, by residents and other developers for small extensions to boundaries in some settlements were also considered. An 'on the ground' review of all the settlements across West Berkshire was completed by officers in 2021 and proposed boundaries were drawn up.</i></p> <p>The position set out within the SBR Paper and responses summarised in appendix 1 are misleading and represent a failure in due process as part of the site selection process and setting of settlement boundaries. Thatcham Town Council and BPC were not adequately consulted as part of this process and their comments were not accurately recorded. The response that was submitted by BPC is included in appendix 1 of these representations.</p> <p>Appendix 1 - BPC Comments on Thatcham North East Settlement Boundary Review</p> <p><u>Introduction</u></p> <p>Bucklebury Parish Council (BPC) strongly OBJECTS to the proposed settlement boundary for Thatcham North East.</p> <p>WBC's consultation request on this proposed settlement boundary (SB) change was sent to some parties, but not BPC, on or about 9th March 2021. Bucklebury parish boundary is but metres from the proposed SB so it is hard to understand why WBC would consider that BPC lacked a legitimate interest in this matter. The initial boundary review took place in Feb-Mar 20 of which BPC was not informed. Given the wider circumstances at that time, it is understandable that Parish Councils did not search out the changes that were proposed for their neighbours. The consultation is lacking in its communication.</p> <p>BPC has had the benefit of reading the comments on this boundary review by Thatcham Town Council and adopts and endorses those in this response.</p> <p><u>Consultation Process</u></p>

It is BPC's view that the consultation process is flawed in that it fails any test of 'community involvement'. WBC failed to inform BPC of the proposed changes to the SB that lies just over the parish boundary. This casts doubt on the integrity and legitimacy of the whole LPR consultation, which WBC states will be a "...a detailed 'on the ground' community led assessment ...". As SB changes are an important part of the proposed Draft Local Plan consultation, not involving bordering Parish Councils, and arguably individuals, means that the local populations are not being adequately consulted on the entirety of the Local Plan review.

BPC expects WBC to launch a new and meaningful consultation to take account of the views of all communities affected by the proposed settlement boundary change.

Strategic Gap

A tenet of past planning in West Berks has been the maintenance of strategic gaps to separate communities. Until this boundary change proposal was tabled, the land north of Floral Way has provided the gap between Thatcham and Bucklebury. The proposal all but eliminates that separation and will visually and socially break natural community boundaries. Breach of the strategic gap has been cited by WBC to both refuse planning applications and to remove site allocations from the HELAA process eg THA9, CA16. The description of CA16 in the HELAA documents acknowledges that the Thatcham - Upper Bucklebury Strategic Gap would be sacrificed and the separate identity of Upper Bucklebury lost, despite WBC's stated intent to "protect the character of a settlement..."

It should be noted that the treatment of the 'country park' within THA20 causes particular concern. The SBR documentation states that: "1. Boundaries will exclude: Recreational or amenity open space which extends into the countryside or primarily relates to the countryside in form and nature. This includes designated Local Green Space." There appears to be no provision for this necessary protection - a change in the plan could see building to the proposed settlement boundary and the 'country park' lost. There must be some provision to limit the SB to the edge of the proposed building line to protect the 'country park' from any development.

Landscape Setting

The Landscape Character Assessment LCA Section WH4 states "Open farmland on the lower slopes contributes to a sense of separation between the elevated character area and the towns of Thatcham and Newbury in the valley below." This sense of partition and openness is amplified in the Landscape Sensitivity Study (LSS): Thatcham "LLCA14F: Colthrop Manor Plateau Edge...forms an important ... rural transition zone between the urban area and the AONB," "Lower slopes of important ridgeline," "Good views across the area and long views across the Kennet Valley," and "The area is highly visible from the Kennet Valley and the Greenham escarpment"

The SBR documentation states that "1. Boundaries will exclude: Highly visible areas such as exposed ridges, land forms or open slopes..." and "Specific issues to be considered...The wider setting and important views both into and out of the settlement will... be taken into account..."

WBC should reconsider the proposed SB in light of its own guidance. Account should also be taken of the proximity of the ancient woodland and the historic settlement at Siege Cross Farm. WBC should also review the landscape-based defence it put forward to oppose the previous development proposal at Siege Cross, and recognise the failings of this SB change proposal.

AONB and The Common

The proposed SB would inevitably have a lasting negative impact on these special environs that WBC is specifically charged, through legislation and its own Strategic Objectives, with protecting.

Not only would the AONB settlement pattern be distorted by the movement of the SB (as acknowledged in the comments in CA12 of the Site Selection Paper), but Bucklebury Common, part of the AONB, would be irretrievably damaged. The impacts would fall into two categories: those that would impact the Common directly, and those resulting from the inevitable increase in visitors. The Common requires protection because of its flora, fauna and AONB situation; it contains remnants of ancient and fragile habitats that are home to rare and protected wildlife. These would be put under increased pressure if the SB were moved to the proposed location and building could literally overlook and overshadow the delicate ecosystems. Increased footfall would inevitably exacerbate the direct damage caused by the effects of the SB change.

Exclusion of a more adequate "country park" from the Thatcham North East proposed settlement boundary would be a starting point in protecting the Common, but the AONB would only be truly protected if WBC was to reconsider this entire proposal in light of its strategic objectives.

Conclusion

Thatcham North East is a deeply unpopular plan that is marked by flawed execution of the consultation process. In what is a fundamental part of the progression of the LPR, WBC has failed to adequately consult all the communities, and all community members, in the areas surrounding the proposed settlement boundary changes. The area delineated by the settlement boundary itself is too close to the AONB and fails to adequately protect it, and inadequate weight appears to have been given to the effects on the landscape.

BPC **strongly OBJECTS** to the proposed site settlement boundary changes at Thatcham North East.

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>BPC has wider concerns around the way in which WBC has undertaken the consultation process for the LPR and the Duty to Cooperate in general. Failings with Duty to Cooperate are matters which are not</p>

	capable of being remedied in advance of the plan being submitted for examination. BPC will set out further details of these failings to the inspector should the plan be submitted to the Planning Inspectorate by WBC.

<p>development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>[Same comments submitted in PS1343 under Policy SP17]</p> <p>[See attached document Attachment 2]</p> <p>Appendix 2 of the draft Local Plan defines Settlement Boundaries as follows: "They identify the main built up area of a settlement within which development is considered acceptable in principle, subject to other policy considerations."</p> <p>This definition creates a presumption in favour of development unless this would conflict with policies within the Local Plan.</p> <p>The area for housing will in any case need to be reduced from what was envisaged in the Strategic Growth Study, in order to deliver the housing densities defined in the West Berkshire Density Pattern Book. The settlement boundary needs to reflect this.</p> <p>Appendix 2 states that "Boundaries will exclude: Recreational or amenity open space which extends into the countryside or primarily relates to the countryside in form and nature. This includes designated Local Green Space." The map on page 65 shows three areas of "Country Park / Public Open Space" adjacent to the 'site boundary'. These are clearly 'recreational or amenity open space' – so must be outside the settlement boundary. However, there is no supporting evidence to support their location and size – so their position on the map must be considered at present to be indicative.</p> <p>Paragraph 6.58 of the draft Local Plan states: "The new revised settlement boundary will be defined following the studies and work identified in the policy at the application stage."</p> <p>The 'red line' boundary map of the map on page 65 of the draft Local Plan is described as the "North East Thattham Site Boundary" – i.e. the boundary of site THA20. However, this same boundary has been incorrectly transferred to the Policies Map and shown in map 46: Thattham E of the Settlement Boundary Review paper as the settlement boundary.</p> <p>The 'Landscape Capacity Assessment of Potential Housing Sites within and adjacent to the North Wessex Downs Area of Outstanding Natural Beauty, West Berkshire: Report Thattham (August 2015)' by Kirkham Landscape Planning Ltd provides an assessment for site THA11, which is adjacent to the settlement boundary of Thattham to its north. The existing housing adjacent to this site extends to a higher elevation AOD than the nearest housing to SP17.</p> <p>This report concludes for THA11:</p> <p>"It is recommended that only part of the site should be pursued further as a potential housing site ... to conserve and enhance the AONB and to maintain the character of the land north of Thattham:</p> <ul style="list-style-type: none"> - The potential development area is ... limited to land on the lower slopes lying below the 95m AOD contour" <p>West Berkshire Council has commissioned studies of landscape capacity for a substantial part of this site in relation to a planning appeal for a previous application for Siege Cross. West Berkshire Council's expert witness on landscape was Bettina Kirkham DipTP BLD CMLI. The summary of her Statement of Case to the appeal inquiry provides the following conclusion:</p> <p>"The site contains pasture farmland, within well-established woodlands, and mature hedgerows. It is also on rising exposed ground which forms the southern flank of the open countryside hillside ridge of the AONB above Thattham. Extending from 75m AOD to 105m AOD, the proposed development area lies well above the local limit of development of 90m AOD and above the limit within eastern Thattham of 95m AOD. The proposed development on the appeal site would therefore be an extensive arm into this open elevated and prominent landscape. It is clearly not a logical extension to Thattham as it will intrude into an overwhelmingly rural landscape, which forms an intrinsic part of the wider landscape between the AONB and Thattham, well beyond a clearly defined and established landscape boundary to the settlement."</p> <p><i>This document is provided as Attachment 2 to my representations (paragraph S.12 is copied above).</i></p> <p>Therefore, the available evidence on the landscape character and capacity for the North East Thattham site indicates that development should not extend above the 95m AOD contour, and probably not above the 90m AOD contour.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>N/A</p>
<p>4. Proposed Changes</p>	<p>The term "settlement boundary" is not used in legislation or Government guidance on planning. There is therefore no requirement for a site allocation in a Local Plan to fall within a settlement boundary. It is clearly premature to specify any new settlement plan, and incompatible with paragraph 6.58 of the draft Local Plan.</p> <p>The map on page 65 of the draft Local Plan provides a way forward, because it shows the boundary of the site, rather than the settlement boundary:</p> <p>(i) Paragraph 6.58 needs to be modified as follows: "The new revised settlement boundary will be defined <u>within the 'North East Thattham Site Boundary in the accompanying map.'</u> following the studies and work identified in the policy for a development of <u>at most approximately 1,500 dwellings</u> at the application</p>

	<p>stage. <u>The settlement boundary will exclude any country park or public open space on the edge of the development</u>". (added text is underlined)</p> <p>(ii) The settlement boundary on the Policies Map needs to be restored to its current position – along Bath Road and Floral Way, in accordance with Paragraph 6.58 of the draft Local Plan.</p> <p>(iii) A revision of the document 'Settlement Boundary Review (SBR) December 2022' needs to be published, in which 'Map 46: Thatcham E' is amended to show the settlement boundary in its current position – along Bath Road and Floral Way.</p> <p>If however, the Examination concludes that it is appropriate to modify the settlement boundary for North East Thatcham at this time, the extended settlement boundary should extend no further than the 95m AOD contour, in line with the recommendations of the "Landscape Capacity Assessment of Potential Housing Sites within and adjacent to the North Wessex Downs Area of Outstanding Natural Beauty, West Berkshire: Report Thatcham (August 2015) and the statements of West Berkshire Council's expert witness for landscape at the Planning Appeal for the application for Siege Cross.</p> <p>If, however, the Examination concludes that it is appropriate to extend the settlement boundary for North East Thatcham at this stage (which I would not support, because this needs further analysis), the new settlement boundary should certainly not extend above the 95m contour, and probably not above the 90m contour, in accordance with the best available evidence on landscape.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	Yes
<p>5. Independent Examination</p>	If it would assist the examination.
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes</p> <p>* No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes</p> <p>* No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes</p> <p>* No</p>	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>The proposed development site is within the Detailed Emergency Planning Zone of AWE Burghfield. While there is no blanket ban on new people being accommodated in this area the local authorities have been citing it as a barrier to obtaining planning permission.</p> <p>This document (<i>see attached document Charlesgate Homes_response to AWE DEPZ zone</i>) sets out to show that because of the distance between the development site and the AWE site the risks posed by the AWE site to residents of any new development would be very low compared to normal day to day risks and that the development itself poses no risk to the AWE site nor to the operation of the local authority's off-site plan.</p> <p>The first argument is that the probability of an accident leading to a significant release of radioactive material to the atmosphere is low. It is argued that this is below 1 in 10,000 years, probably much lower.</p> <p>The consequences of this accident, as deduced from the AWE's Consequence Report, at the distance of the development site would be classed as "minor" using the REPPPIR risk framework.</p> <p>As the site is beyond the range recommended for prompt protective actions by AWE. No protective actions would be needed at the development site even if the wind blew towards the site and the weather conditions were such as to minimise dispersion.</p> <p>The estimates risk of death at the development site due to an accident on the AWE site is estimated to be far lower than the risk of a fatal lightning strike.</p> <p>As it is beyond the AWE range for protective actions, the development site need not be in the DEPZ. Some options for the route of the DEPZ boundary are discussed.</p> <p>As the off-site plan is to inform the residents of the area using an automatic phone system and then set up an information gathering and decision-making process in the Strategic Coordination Centre, the added number of people in the DEPZ do not impose any load on the off-site plan.</p> <p>As the site is beyond the urgent protective action zone the emergency services and home support services should be allowed to operate as normal within the area of the development site even during the short release phase as an accident at the AWA site.</p> <p>The risks at the site are compared to the ONR criteria for recommending against a development and it is concluded that the ONR should be comfortable not objecting to this development.</p> <p><i>Full representation is set out in the attached document >Charlesgate Homes_Response to AWE DPEZ zone></i></p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	<p>No</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	We believe that the Plan accords with the requirements of the relevant legislation.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>In reference to the Residential Parking Zone - Pangbourne, Theale and Eastern Settlements map, we suggest that Zone 1 in Theale is extended westwards to include the site at "Lakeside, The Green, Theale". A Location Plan of the site is enclosed for reference.</p> <p>The site benefits from an extant outline planning permission for up to 325 units (ref: 15/02842/OUTMAJ) as well as an extant detailed permission for 350 units (ref: 04/01219/FULMAJ). Both of these applications introduce a requirement to deliver a pedestrian and cycle route to Station Road. This would therefore reduce journey times to the station and enhance the sustainability of the site, justifying reduced parking standards.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>We believe that the Plan sufficiently addresses strategic planning issues relevant to the area.</p>
<p>4. Proposed Changes</p>	<p>In reference to the Residential Parking Zone - Pangbourne, Theale and Eastern Settlements map, we suggest that Zone 1 in Theale is extended westwards to include the site at "Lakeside, The Green, Theale".</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	<p>No</p>
<p>5. Independent Examination</p>	<p>N/A</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes * No</p>	<p>Yes</p>

<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>The draft Local Plan proposes to not carry forward site allocation policies from the West Berkshire Core Strategy 2006-2026 and Housing Site Allocations DPD 2006-2026. These policies include "CS2 Newbury Racecourse strategic site allocation". This proposed deletion is also referenced in the Sustainability Appraisal (Para. 5.3.2.1).</p> <p>The draft Local Plan explains the policies are not carried forward "as they have either been built out or are nearing completion."</p> <p>In terms of planning status, the site has outline consent for 1,500 new dwellings, in accordance with the policy, however not all of the reserved matters applications have come forward. Therefore, we suggest that it is not built out or nearing completion.</p> <p>The sustainability and suitability of the site for future development is not in question, and therefore we suggest that as a location for future development it is not discounted by the new Local Plan. It could also deliver additional growth in the future e.g. at the Nuffield Health site. The site is deliverable and suitable for future development.</p> <p>We recommend that through the Local Plan the Council does not prevent future development at the "racecourse" site. By adopting this approach the Local Plan would be positively prepared and consistent with national policy, as it would make effective use of land (previously developed land).</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p><i>See attachment 'Paula Saunderson - Full LPR Rep' for full consultation response. Comments on each chapter/policy can be found at the specific consultation point.</i></p> <p>APPENDICES</p> <p>No time to review in Detail but a general comment is the lack of maps within documents and the lack of ability to pull together data for a Specific Spatial Area and important Sub Areas.</p> <p>The Glossary of Terms (GOT) fails to include some frequently used terms such as:</p> <ul style="list-style-type: none"> • Rural -the list of those Designated should be included somewhere • Countryside • Heritage • Green Gaps • Designated Employment Areas -even though they have their own Appendix • Residential Parking Zones – has own Appendix so should be in GOT • etc.
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>I seek an change which is to introduce Policies and Site Allocations which are not currently in the Plan for the Sub-Area Newbury Settlement.</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	<p>Yes</p>
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No</p>	<p>Yes</p>
