Please give reasons for your answer	Furthermore, Sovereign considers that the Proposed Submission West Berkshire Local Plan Review (2022 – 2039), as currently formulated, is Legally Compliant.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	EXECUTIVE SUMMARY

Boyer has been appointed by Sovereign Housing Association ('Sovereign'), to act on their behalf in respect of the ongoing promotion of the Land adjoining The Haven, Kintbury, for residential development. Boyer have prepared these representations on behalf of Sovereign, in response to the 'Regulation 19' consultation relating to the Proposed Submission West Berkshire Local Plan Review (2022 – 2039).

The purpose of these representations is to assist the Council in formulating and refining an approach that is both consistent with national planning policy and the tests of soundness. To this end, general support is provided to the spatial strategy set out in the West Berkshire Local Plan Review (2022 – 2039), to the Council's conduct of the plan-making process in relation to the Duty-to-Cooperate, and specifically for the allocation of Land Adjoining The Haven, Kintbury, for residential development.

The Proposed Submission West Berkshire Local Plan (2022 – 2039) ('emerging local plan') proposes to allocate a series of sites to, as a minimum, meet the identified housing needs within the district. Despite the constrained nature of the district, the plan identifies a robust selection of sites that are capable of delivering residential development appropriate to accommodate sustainable growth to meet the minimum local housing need of the area.

Sovereign supports this approach, recognising that the Council's commitment to accommodate the identified minimum Local Housing Need ('LHN') figure within the district is paramount.

The Council's identification of sufficient developable land to deliver approximately 5% additional homes above the minimum identified need is also supported. Sovereign considers that this 5% 'headroom' provides for a flexible and robust quantum of housing supply to fully ensure that the identified housing needs of the district are met.

Furthermore, the identified headroom in the housing supply could usefully accommodate a proportion of the unmet need that is likely to arise from Reading, as part of the Western Berkshire Housing Market Area ('HMA'). Sovereign supports the Council in seeking to accommodate a reasonable proportion of this unmet need and recommends that the Council seek to maximise the delivery of new homes on the proposed site allocations to assist in delivering this aim. Such an approach would support housing delivery in the wider region in accordance with the Government's commitment to significantly boost the supply of housing, ensuring minimum housing needs are met.

In seeking to deliver the amount of new homes required in the district, the Council have identified an appropriate spatial strategy. The emerging local plan recognises that there is limited further growth potential at the district's most sustainable settlements; namely, Newbury and Thatcham, alongside the Eastern Urban Area, whilst maximising the available land within the relevant site allocations. Sovereign supports the Council's identification of a spatial strategy which directs development to available land within the next most sustainable locations as appropriate, in accordance with the settlement hierarchy.

The otherwise relatively unconstrained nature of the North Wessex Downs Area of Outstanding Natural Beauty ('AONB'), in combination with the presence of a series of sustainable medium and smaller-sized Service Villages, provides that the North Wessex Downs AONB Spatial Area (as identified in proposed Policy SP1) remains appropriate to accommodate a reasonable proportion of the district's identified housing needs.

To maintain the longer-term vitality of the district's Service Villages, such as Kintbury, it is imperative that the Council supports the sustainable growth of these areas, supporting the viability of local services and amenities, alongside delivering much-needed affordable housing in rural areas. To this end, Sovereign supports the identification of specific site allocations within these villages, which provide opportunities for modest sustainable growth whilst conserving and enhancing the special landscape qualities of the AONB.

Sovereign therefore supports the identification of Land Adjoining The Haven, Kintbury ('the site') as being suitable for allocation within the emerging local plan, through proposed Policies SP15: 'Sites allocated for residential development in North Wessex Downs AONB' and RSA23: 'Land adjoining The Haven, Kintbury'. Kintbury comprises a relatively unconstrained settlement that can accommodate sustainable growth during the plan period. The site is well-positioned to make a reasonable contribution to meeting the district's development needs.

The site is in a sustainable location, within practical walking and cycling distance of the range of services and facilities provided in the village, benefitting from good access to nearby main settlements including Newbury (by bus and rail), Reading, and London Paddington (by rail). There are not considered to be any significant constraints to the development of the site, which could provide at the very least a minimum of 20 high-quality new homes.

Sovereign is able to confirm that the site is available for development now, offers a suitable location for residential development, and is achievable with a realistic prospect that housing can be delivered on-site within the first five years of the proposed plan period. Consequently, the site should be considered favourably in relation to planning practice guidance and its proposed allocation within the emerging West Berkshire Local Plan is supported.

Furthermore, Sovereign considers that the Proposed Submission West Berkshire Local Plan Review (2022 – 2039), as currently formulated, is Legally Compliant and is capable of being found Sound following independent Examination. Sovereign considers that in preparing the emerging local plan, the Council have sufficiently complied with the Duty-to-Cooperate.

INTRODUCTION

Context

Boyer has been appointed by Sovereign Housing Association ('Sovereign'), to act on their behalf in respect of the ongoing promotion of the Land adjoining The Haven, Kintbury, for residential development. The Site Location Plan is provided at Appendix 1: Site Location Plan.

Sovereign holds a specific land interest within West Berkshire, known as Land adjoining The Haven, Kintbury ('the site'). These representations are aligned with this land interest and address topics within the West Berkshire Local Plan Review consultation, and its supporting evidence base, accordingly.

The site has been assessed by West Berkshire District Council ('the Council') within the district's Housing and Economic Land Availability Assessment ('HELAA') (2023), under Site Reference: KIN6. Furthermore, the site is proposed for allocation within the Local Plan Review document, to accommodate residential development, under proposed Policies SP15: 'Sites allocated for residential development in North Wessex Downs AONB' and RSA23: 'Land adjoining The Haven, Kintbury'.

The purpose of these representations is to assist the Council in formulating and refining an approach that is both consistent with national planning policy and the tests of soundness, as set out at paragraph 35 of the NPPF; namely, whether the emerging West Berkshire Local Plan (2022 – 2039) is:

- a) Positively prepared – providing a strategy which as a minimum seeks to meet the area's objectively assessed needs.
- b) Justified – provides an appropriate strategy, taking into account reasonable alternatives and based on proportionate evidence.
- c) Effective – deliverable over the plan period and based on effective joint working.
- d) Consistent with national policy – enabling the delivery of sustainable development.

At this stage of the plan-making process, it is essential that West Berkshire District Council ('the Council') continues to pursue an approach that is consistent with national policy, effective, justified, and positively prepared. These representations comprise our recommendations to assist the Council in achieving such an approach, as emerging plan progresses toward adoption.

These representations build upon and should be considered in conjunction with the previous representations submitted by Sovereign to the 'Regulation 18' consultation on the West Berkshire Local Plan Review 2020 – 2037: Emerging Draft (December 2020), which ran from 11 December 2020 to 5 February 2021.

Policy Context

The Council adopted the Core Strategy Development Plan Document (2006 - 2026) in July 2012. Five years later, the Council then adopted the Housing Site Allocations Development Plan Document in May 2017, to implement the spatial framework set out within the Core Strategy. The adopted Development Plan for the district therefore sets out the spatial strategy to meet development needs up to 2026 and provides a series of site allocations and planning policies that seek to deliver that strategy.

To ensure that planning policies remain relevant and are able to effectively meet the needs of the local community, the Town and Country Planning (Local Planning) (England) Regulations 2012 (as amended) requires local planning authorities to review local plans at least once every 5 years from their adoption date.

The Proposed Submission West Berkshire Local Plan Review (2022 – 2039), which is the subject of the 'Regulation 19' consultation, reflects the distilled outcome of that review process. The draft plan sets out an updated vision and strategy, alongside an updated series of site allocations and policies that would supersede the adopted Core Strategy upon its adoption, which is anticipated in 2024.

Sovereign **supports** the Council's commitment to review the existing development plan through this process.

THE SCALE OF HOUSING NEED

This section details Sovereign's position with regard to the scale of housing need within West Berkshire. In determining the appropriate Housing Requirement for the emerging West Berkshire Local Plan (2022 – 2039), the discussion considers three key themes:

- a) the scale of housing need within West Berkshire;
- b) unmet need arising outside of West Berkshire & the Duty-to-Cooperate; and
- c) the need for affordable housing in West Berkshire.

Calculating Housing Need

In considering the appropriate housing requirement for the district, the supporting text accompanying emerging Policy SP12: 'Approach to Housing Delivery' identifies that the strategic policies contained within the emerging local plan should be informed by an assessment of Local Housing Need ('LHN').

The National Planning Policy Framework ('NPPF') [footnote 3: Available online at:

[https://assets.publishing.service.gov.uk/](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/1005759/NPPF_July_2021.pdf)

[government/uploads/system/uploads/attachment_data/](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/1005759/NPPF_July_2021.pdf)

[file/1005759/NPPF_July_2021.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/1005759/NPPF_July_2021.pdf)] confirms, at paragraph 61, that:

"...to determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard method in national planning guidance – unless exceptional circumstances justify an alternative approach".

The Government's Standard Method for calculating housing need is set out clearly in Planning Practice Guidance ('PPG') [Footnote 4: Available online at:

[https://www.gov.uk/guidance/](https://www.gov.uk/guidance/housing-and-economic-development-needs-assessments#identifying-the-need-for-different-types-of-housing)

[housing-and-economic-development-needs-](https://www.gov.uk/guidance/housing-and-economic-development-needs-assessments#identifying-the-need-for-different-types-of-housing)

[assessments#identifying-the-need-for-different-types-of-housing](https://www.gov.uk/guidance/housing-and-economic-development-needs-assessments#identifying-the-need-for-different-types-of-housing)]. Proposed Policy SP12 clarifies that the appropriate LHN figure for West Berkshire comprises 513 dwellings per annum ('dpa), derived using

the Government's Standard Method. No exceptional circumstances have been identified that apply to West Berkshire which justify the use of an alternative approach to the government's Standard Method. We do not consider that there are any, particularly given the high bar that this test requires, and that the Standard Method represents the appropriate basis for calculating the District's housing need.

Sovereign **supports** the Council's use of the Government's Standard Method to derive an appropriate housing need figure for the district area. However, as noted within the emerging local plan, it remains an important consideration that the LHN figure represents the minimum identified housing need for the district and should not be considered to represent a maximum quantum of development to be provided.

PPG clarifies that there are various circumstances in which it may be appropriate for an authority to plan for a higher number of homes than indicated through the LHN calculation. Such circumstances include, but are not limited to, situations in which an authority has agreed "to take on unmet need from neighbouring authorities, as set out in a statement of common ground" [Footnote 5: *Ibid*. PPG Paragraph: 010 Reference ID: 2a-010-20201216].

Furthermore, it is considered to be prudent for local authorities to identify a quantum of supply that provides sufficient flexibility to ensure that the housing requirement would be delivered in practice. Typically, this is reflected in the provision of an amount of headroom in the supply over the minimum target, to account for potential market conditions that may cause some of the identified development sites to be delayed or wholly inhibited from coming forward throughout the plan period.

To this end, the Council has identified an approach to housing need that reflects a range, between the LHN minimum of 513 dpa to 538 dpa. Sovereign **supports** the Council's approach. The identification of an appropriate housing target that is approximately 5% above the LHN minimum figure is considered to be sufficiently robust, as this is considered to assist in ensuring that the identified supply meet, at least, the district's minimum housing needs.

Unmet Need Arising Outside of West Berkshire

Notably, the Government's Standard Method calculation does not take account of unmet need arising from outside of the authority's area. However, as noted within the emerging local plan, West Berkshire district falls within the Western Berkshire Housing Market Area ('HMA'), which also comprises Bracknell Forest Council, Reading Borough Council, and Wokingham Borough Council.

The Berkshire (including South Bucks) Strategic Housing Market Assessment ('SHMA') (2016) [Footnote: Available online at: https://www.westberks.gov.uk/media/40949/Berkshire-inc-South-Bucks-Strategic-Housing-Market-Assessment/pdf/Berks_SHMA_Feb_2016.pdf?m=638103405174070000], published as part of the Council's evidence base, affirms the strong functional relationships exhibited between these local authority areas, in relation to where people live and work.

Recognising these functional relationships, the Western Berkshire HMA authorities have demonstrated a shared history of collaborative working in relation to housing matters and associated infrastructure, which included the preparation of a joint Statement of Common Ground ('SoCG') for the purposes of local plan-making.

Signed by each constituent authority in August 2021, the West of Berkshire Area SoCG [Footnote: Available online at: [https://www.westberks.gov.uk/media/53787/Duty-to-Cooperate](https://www.westberks.gov.uk/media/53787/Duty-to-Cooperate-Statement-January-2023/pdf/LPR_Interim_DtC_Statement_January_2023.pdf?m=638086137283470000)

-Statement-January-2023/pdf/LPR_Interim_DtC_Statement_

January_2023.pdf?m=638086137283470000] recognises that, in the first instance, each authority will seek to meet its own development needs in full. However, the SoCG acknowledges that there is a shortfall in planned residential development in Reading borough of 10 dpa, equating to 230 net new homes over the adopted plan period.

Consequently, it is recognised that there is currently a modest identified quantum of unmet need arising from within the Western Berkshire HMA. In seeking to address this unmet need, the SoCG recognises that this should, in principle, be met within the Western Berkshire area.

As such, Sovereign **supports** the Council's identification of additional headroom within the identified supply, which could be partially utilised to accommodate an appropriate proportion of the unmet need arising from Reading borough throughout the plan period.

In providing sufficient capacity within the headroom of supply in West Berkshire, Sovereign recommends that the Council seeks to maximise the development potential of the sites proposed to be allocated for residential development within the plan.

To this end, Sovereign recommends that the identified approximate capacity within proposed Policy RSA23: 'Land Adjoining The Haven, Kintbury' be revised to approximately 35 dwellings. As set out in Section 6 of these representations, the site is considered to be capable of delivering this quantum of development whilst being sensitively designed to conserve and enhance the special landscape character of the AONB.

Given that the identified unmet need arising within Reading is anticipated within the latter stages of the borough's adopted plan period, alongside the borough's commitment to review the adopted local plan by 2024, it is considered that the long term extent of unmet need arising from Reading remains unclear. Sovereign therefore supports the Council's identification of headroom within the supply, whilst not explicitly identifying a quantum of homes that specifically relate to providing for unmet need in Reading.

Affordable Housing Need in West Berkshire

West Berkshire faces a significant need for affordable housing over the plan period, as affirmed within the emerging local plan. The conclusions of the Berkshire (including South Bucks) SHMA (2016), updated in 2022 [Footnote 8: Available online at: <https://www.westberks.gov.uk/media/49801/Updated-Housing-Needs-Evidence-July->

[2022/pdf/West_Berkshire_Housing_Needs_Assessment_Update](#)

[_July_2022.pdf?m=638006715718270000](#)], further demonstrate the extent of this need in the plan area, finding that there is a need within West Berkshire for approximately 330 new affordable homes per annum up to 2039.

The identified need for affordable homes in West Berkshire, of 330 dwellings per annum, comprises approximately 64% of the overall identified housing need for the plan area, of 513 dwellings per annum. To deliver the number of affordable homes that are needed in West Berkshire, the plan would be required to identify a housing supply of, at least, 825 dwellings per annum (assuming a policy requirement of 40% affordable housing provision is applied), which represents +160% of the LHN figure.

Given that the identified annual need for affordable housing provision comprises approximately 64% of the overall annual local housing need, there is a clear case for accommodating further residential development, as far as is reasonably practicable, within the district to promote the delivery of greater affordable housing.

Furthermore, the Updated Housing Needs Evidence (2022) [Footnote 9: *Ibid*] illustrates, at Table 4.15, that a significant proportion (approximately 46%) of the district's total affordable housing need is required within the North Wessex Downs AONB Spatial Area, comprising 152 dpa out of the overall total of 330 dpa.

ONS datasets [Footnote 10: Source: House Price Statistics for Small Areas and Annual Survey of Hours and Earnings, ONS] confirm that the latest median housing affordability ratio (2021) for West Berkshire is 9.73 [Footnote 11: Median housing affordability ratio refers to the ratio of median price paid for residential property to the median workplace-based gross annual earnings for full-time workers]. This is up from a ratio of 5.1 in 2000 and 7.3 in 2010, which indicates that homes in West Berkshire have become markedly less affordable over time.

To support the long-term viability of services and amenities of the district's numerous Service Villages within the North Wessex Downs AONB Spatial Area, such as Kintbury, there is clearly a need to deliver new market and affordable homes in the village within the plan period. Sovereign therefore **supports** the allocation of Land Adjoining The Haven, which presents the most suitable opportunity in Kintbury to provide much-needed new homes.

DEVELOPMENT MANAGEMENT POLICIES

The comments set out in this section are intended to assist the Council in developing an approach that is consistent with national planning policies and the tests of soundness. Some comments have been included to assist the Council in developing a series of policies that are both effective and robust. Where possible, suggested amendments have been set out in the response.

Sovereign broadly supports the West Berkshire Local Plan Review (2022 - 2039). However, the comments set out below are intended to identify opportunities to improve the effectiveness of the proposed policies.

As a general principle, the plan would benefit from consistent numbering, in relation to the paragraphs, policy criteria and sub-criteria. This would assist the accessibility and the useability of the draft plan, improving the effectiveness of the document substantially.

Policy SP12: Approach to Housing

Currently formulated, the proposed policy limits the exception to the net loss of residential units (i.e., where there is a reasoned justification in the form of a benefit to the wider community) to situations in which there is a change of use.

There are situations in which the public benefit of a net loss of residential units could be justified without a change of use occurring; for example, where an outdated apartment building is to be demolished and replaced to provide improved accommodation (e.g. larger units which meet Nationally Described Space Standards and address current housing needs).

CONCLUSION

The Proposed Submission West Berkshire Local Plan Review (2022 – 2039) sets out how West Berkshire District Council proposes to, as a minimum, meet identified development needs within the district area. The proposed spatial strategy seeks to direct development toward the most sustainable locations within the district, whilst recognising the vital role that modest growth provides to support medium and smaller-sized villages within the North Wessex Downs Area of Outstanding Natural Beauty.

Sovereign supports the Council's commitment to meeting housing needs in full and supports the Council's identification of a reasonable amount of headroom in the district's housing supply to ensure that local housing needs are met during the plan period.

However, Sovereign recommends that the Council seeks opportunities to maximise the development capacity of appropriate sites to ensure that the identified headroom is as robust as is reasonably practicable. Land adjoining The Haven, Kintbury, which is proposed to be allocated for the development of approximately 20 new homes under emerging Policy RSA23, presents such an opportunity. Sovereign considers that the approximate capacity allocated for the site could be higher, without detriment to the amenity of adjoining residents, with sufficient scrutiny to the design of the scheme and in considering greater benefits to the wider community. The provision of additional capacity could reflect the full potential of the proposed allocation and ensure the efficient use of development land within the district.

Furthermore, Sovereign supports the proposed spatial strategy, which includes a modest amount of residential development within the North Wessex Downs AONB Spatial Area. The approach maintains the existing spatial strategy within the district and would support housing delivery in the wider region in accordance with the Government's commitment to significantly boost the supply of housing. The proposed allocations have also been evidenced and justified through detailed analysis to ensure the high value of the AONB and any potential impacts are carefully considered.

	<p>Otherwise relatively unconstrained, the nature of the district's North Wessex Downs AONB Spatial Area, which includes the presence of a series of sustainable, small and mediumsized villages, provides that the area remains appropriate to accommodate a reasonable proportion of the district's identified housing need. Furthermore, to support the longer-term viability of these villages, it is critical that the Council supports opportunities to provide modest growth in appropriate locations.</p> <p>To this end, Sovereign supports the proposed allocation of Land adjoining The Haven, Kintbury, for residential development under emerging Policies SP15 and RSA23. Kintbury comprises a relatively unconstrained settlement that could accommodate a reasonable level of growth during the proposed plan period. Land adjoining The Haven is well-positioned to make a reasonable contribution to meeting the district's development needs in this location.</p> <p>The site is in a sustainable location, within practical walking and cycling distance of the range of services and facilities within Kintbury. Furthermore, the site benefits from good access to nearby main settlement areas via bus and rail links, including Newbury and Reading. There are no significant constraints to the development of the site for approximately 35 new homes which could not be resolved through detailed, sensitive design consideration.</p> <p>Sovereign is able to confirm that the site is available for development now, represents a suitable location for development, and that development of the site is achievable with a realistic prospect that housing can be delivered within the first five years of the draft plan period. The site is deliverable and should continue to be favourably regarded in relation to allocation for residential development within the emerging West Berkshire Local Plan.</p> <p>We look forward to continuing to work with West Berkshire District Council, Kintbury Parish Council, and the wider community to provide much-needed new housing in this rural community. We also look forward to exploring how the Land adjoining The Haven, Kintbury can contribute to the delivery of sustainable development and benefit the village, local infrastructure, and facilities.</p> <p>We hope these representations are of assistance in taking the plan forward. Should you require any further clarification on the issues raised in our comments please contact me.</p> <p><i>See attached document for a full response <Boyer obo Sovereign_full rep></i></p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>Sovereign considers that in preparing the emerging local plan, the Council have sufficiently complied with the Duty-to-Cooperate.</p> <p><i>3. The Duty-to-Cooperate</i></p> <p>Section 33a of the Planning and Compulsory Purchase Act (2004) ('PCPA') requires that local planning authorities should co-operate with other relevant local authorities, the County Council, prescribed bodies, and other persons, in relation to the preparation of a Local Plan. The Duty requires the Council to engage constructively, actively, and on an on-going basis, in the preparation of the Plan, insofar as it relates to a strategic matter. Strategic Matters include the sustainable development and use of land that has, or would have, a significant impact on at least two planning areas, such as the amount and distribution of housing.</p> <p>Furthermore, the NPPF confirms, at paragraph 26, that government policy comprises that the effective and ongoing working between strategic policy-making authorities and relevant bodies is integral to the production of a positively prepared and justified strategy. It goes on to confirm that, in particular, joint working should help to determine where additional infrastructure is necessary and whether development needs that cannot be met wholly within a particular authority area could be met elsewhere. As such, cooperation clearly relates to maximising the effectiveness of plan preparation.</p> <p>Demonstrated within the effective and on-going joint working undertaken by West Berkshire District Council with the other Western Berkshire HMA authorities, in particular illuminated through the preparation of the SoCG, Sovereign considers that the West Berkshire Local Plan Review is <i>positively prepared</i> and the product of an <i>effective</i> and robust process of cooperation between the authorities.</p> <p>Sovereign therefore considers that the Duty-to-Cooperate has been sufficiently demonstrated in the plan-making.</p>
<p>4. Proposed Changes</p>	<p>As such, the following amendment to the policy is recommended:</p> <p>ii) There should be no net losses from the existing stock of homes in West Berkshire. Existing homes should be retained in residential use (or replaced at least in equal numbers, normally on the proposed site), unless there is a reasoned justification in the form of a benefit to the wider community for a change of use. Developments should utilise opportunities to make better use of the existing housing stock.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>Sovereign benefit from a specific land interest within West Berkshire District, which is proposed to be allocated for residential development under the emerging Policy RSA23: Land Adjoining The Haven,</p>

	Kintbury. In representing Sovereign, Boyer are well-placed to advise on the appropriateness of the land allocated for development.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No

<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>[See attached Combined Appendices for appendices. For wider representation and Tables and Figures, see attached Representations on behalf of Croudace Homes]</p> <p>Detailed Comments on the Evidence Base</p> <p>Croudace has reviewed the Council's evidence base prepared to inform the LPR and makes comments on specific elements, particularly where they support the site's allocation.</p> <p>Evidence Base Studies Relating to Site Selection</p> <p>Housing and Economic Land Availability Assessment (January 2023)</p> <p>Henwick Park is assessed in the HELAA under site reference CA12 'Land at Henwick Park, Bowling Green Road, Thatcham, RG18 3BY'. It is correctly identified as being adjacent to the settlement boundary, outside the AONB and available for the delivery of residential development.</p> <p>Table 3 provides a summary of the HELAA's conclusions on the site, with Croudace's response to the points made.</p> <p>We understand the HELAA's conclusion of the site's partial suitability and developability stems from the fact that at the 'Call for Sites' stage, the entirety of the red line boundary was originally submitted for consideration. However, Croudace can confirm that only the southern part of the site, equating to less than half (45%) of the site, is proposed for built development, whilst the northern part (55%) is set aside for POS and BNG (Appendix D). This has been derived from landscape studies and feedback on earlier planning applications which identified the 95m AOD (above ordnance datum) contour line as being the appropriate limit to development without causing landscape harm. This approach was found acceptable by the Council, Inspector and SoS at appeal (Appendix C).</p> <p>It is notable (and accurate) that no technical constraints are identified which would preclude the development of the southern part of the site for residential development. As Croudace is seeking only to deliver development in line with the conclusions of the HELAA (on the southern part of the site), it is contended that this part of the site (extending to 10.09 ha) is fully suitable, available, achievable, and therefore deliverable and developable.</p> <p>Croudace confirms that if the Council concludes that additional sites are required for housing, it can be confident that there are no site-specific reasons why the Land at Henwick Park should not be allocated for residential development.</p> <p>West Berkshire Strategic Vision 2050 (November 2022)</p> <p>The West Berkshire Strategic Vision 2050 looks to guide long term, sustainable growth in West Berkshire setting out how Newbury and Thatcham can achieve a zero carbon future whilst meeting its objectives for key strategic infrastructure requirements.</p> <p>Croudace notes that Figure 5 of the document (extract above) specifically identifies Henwick Park as an 'area identified for future growth'. Croudace firmly agrees with the assessment made.</p> <p>In addition, Figure 6 (extract above) sets out a series of key benefits of directing growth to areas including Henwick Parks: – "The growth areas identified are parts of the district with the least constraints and influences";</p> <ul style="list-style-type: none"> – "They benefit from their co-location to existing settlements and existing strategic infrastructure"; – "They have the opportunity to graft onto the existing settlements and contribute to the vitality of the existing town centre"; – "They can be well connected to both existing settlements and interconnected within themselves";

– “The existing topography adds value to some sites by providing passive solar gain; as they form part of the southern slope of the North Wessex Downs”.

Furthermore, Figure 11 (extract below) confirms that Henwick Park is a ‘Potential Area of Search for Future Growth’. Again, on the following page of the document, the site is shown to benefit from safe and convenient walking distances to local centres and/or shopping areas.

It is clear, based on the contents of the West Berkshire Strategic Vision 2050 that the Council’s evidence base supports Croudace’s assessment that Henwick Park constitutes a logical and sustainable location for growth, as confirmed through these representations. 4.12 The Council can be confident that there are no site-specific reasons why the Land at Henwick Park should not be allocated for residential development.

Evidence Base Studies Relating to Housing Need Berkshire (including South Bucks) Strategic Housing Market Assessment (February 2016)

Croudace has reviewed the Strategic Housing Market Assessment (‘SHMA’) with interest to verify that the mix of housing proposed at Henwick Park is in accordance with the needs of West Berkshire. This is despite its somewhat dated nature and the fact it has been superseded by the Updated Housing Needs Evidence (‘HNAU’) (July 2022).

Firstly, regarding the housing needs of older people, it found that population projections advise that the proportion of over 65s to be resident in West Berkshire by 2036 was due to increase by 76% – a stark increase, which emphasises the requirement to consider the housing needs of the ever-aging population.

The SHMA outlines that many older residents have built up equity in their properties and may look to downsize to release equity to support their retirement. However, they often want to retain housing with space for relatives to stay, or to remain within their chosen area close to family. It is therefore important to consider the creation of specialised housing close to areas where the elderly population is, or is predicted to be, high.

Table 116 of the SHMA sets out the projected need for specialist housing for older people, and outlines that in West Berkshire, there is a net need for 2,239 units between the period 2013-2036. This therefore demonstrates an acute need to deliver additional specialist housing within West Berkshire.

Secondly, with regard to affordable housing, the SHMA confirms that around three fifths of households with a need for new housing are likely to have insufficient income to afford market housing. Equally, approximately 34% of newly forming households would be unable to purchase market housing without some form of subsidy. Table 81 of the SHMA outlines a net affordable housing need for West Berkshire of 189 dpa, whilst paragraph 6.103 recognises that the private rented sector has taken on an increasing role in providing housing for households who require financial support to meet housing needs.

Thirdly, in terms of the required size of homes needed going forward, the SHMA outlines that the Western Berkshire HMA is likely to require mostly 3-bedroom homes (42.3%), supplemented with a lower proportion of 2-bedroom homes (28.9%), 4+ bedroom homes (19.7%) and a small amount of 1-bedroom homes (9.1%). Croudace considers this supports a broad mix of dwelling sizes.

Finally, the SHMA assesses the need for self-build plots, acknowledging that the lack of land is one of the biggest barriers to self-build projects. As of 2015, it was identified that West Berkshire had only five available plots for selfbuild and the HMA as a whole had only 14, demonstrating a clear need for this type of housing, which is anticipated to have grown.

West Berkshire Housing Needs Assessment Update (July 2022)

The Housing Needs Assessment Update (‘HNAU’) provides more up to date information regarding the specific housing needs of West Berkshire, building on the work carried out to inform the SHMA in 2016. It claims that there are no circumstances (relating to economic growth, growth funding, strategic infrastructure requirements or affordable housing need) that indicate that actual housing need is higher than the standard method indicates (513 dwellings per annum (‘dpa’)).

The HNAU outlines a need for 330 dpa affordable and social rented to 2039 and an additional need for 367 dpa for affordable home ownership – a total of 697 dpa, which far outstrips the standard method figure. However, the potential for re-sales of market homes could be enough to provide a significant additional supply of affordable homes for ownership. It is only through new development that new affordable and social rented dwellings can be provided, therefore placing a greater emphasis on the need for the delivery of affordable rented dwellings through new development.

Specialist housing needs are also assessed, with the HNAU outlining that the number of older people is expected to grow by 43% over the period to 2039. In terms of housing needs, there is a stark shortage of homes for wheelchair users, with a need for 1,200 homes designed to technical standard M4(3) wheelchair user dwellings.

The HNAU suggests the focus of new market housing should be on 2-3 bedroom properties, whereas affordable homes for ownership and or rent are needed as 1-3 bedroom homes, although the HNAU does suggest that policy requirements remain flexible.

Housing Background Paper (January 2023)

The Housing Background Paper explains the background to the housing policies contained within the LPR, including in relation to the housing requirement, affordable housing and strategic site allocations, as well as non-strategic site allocations and development control policies.

The Housing Background Paper contains the detailed Housing Trajectory which provides the supporting calculations to the trajectory contained at Appendix 8 of the LPR. However, as we explore in Section 6 of these representations, we have significant concerns with the underlying assumptions and conclusions and therefore we dispute the robustness of the housing trajectory figures provided, which undermines the soundness of the plan.

Detailed Comments on the Housing Requirement

Overall, Croudace is compelled to object to the proposed approach the Council is taking to its housing requirement on the grounds that it is unambitious and fails to meet unmet needs from neighbouring authorities. As a very minimum, the requirement needs to look ahead over a minimum 15-year plan period from adoption. **Approach to Housing Delivery (Draft Policy SP12)**

Draft Policy SP12 establishes that the housing requirement for West Berkshire across the plan period (2022-2039) will be between 8,721 and 9,146, equating to between 513 to 538 dpa.

Paragraph 61 of the NPPF requires strategic policies to be informed by a local housing need ('LHN') assessment, conducted using the standard method in national planning guidance.

The 'housing and economic needs assessment' section of PPG explains that the standard method uses a formula to identify the minimum number of homes expected to be planned for, in a way which addresses projected household growth (at present using the 2014-based Household Projections) plus an uplift for affordability based on data from the Office of National Statistics ('ONS') (at present, data from April 2022). 5.5 The largest 20 cities and urban areas in England are then subject to a further 35% increase (the 'urban centres uplift'), reflecting Government objectives to place new housing in existing urban areas and encourage the redevelopment of brownfield land. Whilst West Berkshire itself is not subject to the urban centres uplift, the neighbouring authority of Reading is, which has implications on West Berkshire, as the two authorities fall within the Western Berkshire Housing Market Area ('HMA'). 5.6 It is important to emphasise that the Government considers the standard method calculation, and where relevant, the urban centres uplift, to be the minimum LHN for an area.

In the first instance, Croudace is therefore encouraged to see that the Council (in the supporting text to draft Policy SP12), confirms that the LHN is derived from the standard method figure of 513 dpa, which represents the latest figure following the release of the aforementioned ONS data in April 2022, even though that figure represents less housing growth than required by the adopted Core Strategy (525 dpa).

However, Croudace does not consider that the inclusion of an additional 5% buffer (538 dpa), whilst higher than the Core Strategy figure, is sufficiently ambitious enough to align with the Government's objective to significantly boost the supply of homes, albeit the Council clarifies this does not constitute a 'cap'. Croudace suggests that the inclusion of an additional 15% buffer would be more reasonable and would allow for much more flexibility in the plan-making process.

Unmet Need from Neighbouring Authorities

Paragraphs 24 to 27 of the NPPF sets out a DtC on strategic matters that cross administrative boundaries. The importance of effective and ongoing joint working is deemed as being integral to the production of a 'positively prepared' and 'justified' strategy. Joint working is encouraged to help determine whether development meet needs that cannot be met wholly within a particular plan area could be met elsewhere.

Paragraph 6.4 of the LPR outlines that West Berkshire has a strong functional relationship with Wokingham Borough, Reading Borough and Bracknell Forest Councils which together form the Western Berkshire HMA, and confirms that the authorities work collaboratively on housing matters.

The LPR identifies that Reading Borough Council has a shortfall of 230 dwellings, based on the findings of the Berkshire SHMA (February 2016), which is anticipated to arise in the latter part of its current Local Plan period. Through ongoing joint working, the local authorities mentioned at paragraph 3.9 recognise that Reading's unmet need should be met within the authorities working together.

The Statement of Common Ground ('SoCG') that has been agreed by the Western Berkshire HMA authorities recognises Reading's unmet need and the principle that this should be met in the West of Berkshire area. The NPPF is clear that unmet needs must be taken into account when establishing the housing requirement. The emerging LPR therefore represented the optimum time to address Reading's shortfall and accommodate the small amount of unmet need within West Berkshire, but Croudace is concerned that the opportunity has been missed.

By way of context, the SHMA and subsequently the Reading Borough Local Plan (adopted November 2019) set the objectively assessed need ('OAN') figure for Reading as 699 dpa. However, Reading's LHN as calculated by the standard method is currently 907 dpa, which represents an increase of 208 dpa or 30%. Therefore, in principle, the actual shortfall could be significantly higher than 230 dwellings.

The Reading Borough Local Plan at paragraph 4.4.3 explains the shortfall is due to the fact that "Reading is a very tightly defined urban area, and sites for new development are limited. The undeveloped land that does exist is mainly either in the functional floodplain or is important public open space".

These constraints are somewhat immovable and any increase in the housing requirement (such as through the standard method) for Reading Borough will lead to an increased shortfall that will need to be met elsewhere in the Western Berkshire HMA.

Whilst Reading has committed to a review of its Local Plan by 2024, at which point it will be required to adjust its housing requirement in line with the LHN in effect at the time, Croudace urges the Council to be more proactive by seeking to accommodate a proportion of Reading's unmet needs within its housing requirement and consequently to allocate additional sites to ensure such requirements are met. By not seeking to do so at this stage, Croudace considers that the LPR is not 'positively prepared'.

Naturally, Henwick Park, would be extremely well placed to meet the shortfall arising from Reading, as we demonstrate earlier in these representations.

Detailed Comments on Housing Delivery

Croudace is concerned that housing delivery is constrained in several ways by the LPR.

As we explore below, Croudace is concerned there may not be a deliverable 5YHLS upon adoption and equally has significant doubts concerning the longer-term developable supply. Greater flexibility is therefore required to ensure that the wide range of needs across the District are suitably met across the plan period, in order to represent a 'positively prepared' or 'effective' strategy.

Meeting the Housing Requirement

Firstly, against draft Policy SP12's housing requirement of 9,146 new dwellings (538 dpa), Table 4 outlines how the Council envisages this will be met across a range of supply components.

Table 4 demonstrates that even with the Council's 'best estimates' of delivery, the identified housing land supply together with proposed LPR allocations are not sufficient to meet the housing requirement. There is, by the Council's own admission, a shortfall of 7 units over the plan period to 2039 (based on 538 dpa).

That precarious position has been reached even before:

1 In terms of the requirement:

- The plan period is increased by at least one year, to account for likely delays in the plan's adoption;
- A proportion of Reading's unmet needs are incorporated into West Berkshire's housing requirement;
- The housing requirement is increased to help ensure affordable and other needs (such as for older people or those wishing to build or commission their own home) are met; - A more ambitious buffer of 15% is applied to provide additional flexibility.

1 In terms of housing supply:

- The Council's historic projections have been overly optimistic by 11% on average (Table 5);
- Our detailed conclusions on the 5YHLS have been factored in;
- Conclusions on the appropriateness of the proposed allocations and their ability to deliver completions at the point envisaged (or indeed at all) has been properly tested through the Examination process.

As mentioned above, Croudace has undertaken a comparison of actual completions witnessed in West Berkshire against historic forecasts. The results in Table 5 reveal that over a 11-year period, the Council's predictions have overestimated the actual completions delivered on-site by around 11% on average.

There is therefore less certainty that West Berkshire's full needs will be met over the plan period. As such, this undermines the soundness of the plan, at least from a 'positively prepared' and 'effective' perspective. This is fundamental and goes to the heart of the plan's soundness.

Five Year Housing Land Supply

Croudace has undertaken a detailed assessment of the immediate five-year (i.e. deliverable) housing land supply, focusing on the deliverability of the sites or allowances included to establish if they meet the requirements of NPPF paragraph 74, the definition within the Glossary and guidance in PPG.

It has reviewed sites within the following categories:

- Allocated sites:
 - Core Strategy allocations;
 - HSA DPD and Neighbourhood Plan allocations.
- Non-allocated (large/medium) sites:
 - Sites with planning permission (10+ units);
 - Sites with prior approval (10+ units).
- Non-allocated (small) sites:
 - Sites with planning permission (<10 units)
 - Sites with prior approval (<10 units).
- Allowances:
 - Small site windfall allowance
- Communal accommodation

In addition there is a further component which has not been allowed for- an allowance for future demolition and other losses, albeit this has a negative effect in supply figures.

Based on 538 dpa over the five-year period 2022 to 2027, Croudace's assessment finds there to be a supply of only **4.9 years**. In addition, looking at the subsequent five-year period 2023 to 2028, the position worsens further to **3.8 years**. 6.12 Croudace's highlights that its findings are much more realistic and robust than the Council's forecasts. They highlight that there is a real risk that the Plan would not be able to demonstrate a 5YHLS upon adoption. As such, additional new non-strategic, unconstrained sites without requiring significant new infrastructure and which can deliver early in the plan period should be allocated. Croudace considers that the Land at Henwick Park is an ideal candidate site for consideration.

Longer-term Housing Land Supply

Croudace has also undertaken an assessment of the longer-term (i.e. developable) housing land supply.

Table 2 of the LPR ("Housing Supply at 31 March 2022") outlines a claimed supply of 7,337 dwellings. By offsetting that total against the housing requirement of 9,146, the Council suggests that sites sufficient to accommodate a further 1,809 dwellings need to be found.

The LPR proposes to allocate land for an additional 1,720 dwellings. This leaves a shortfall of 89 dwellings, of which 80 dwellings are proposed to be delegated to come forward through new Neighbourhood Plan allocations.

Croudace raises concerns regarding the Council's claimed supply. Our detailed analysis results in a reduction to the Council's assumed supply of 560 dwellings across the plan period.

The results of our assessment are summarised in Table 6.

Existing Commitments

Croudace's assessment of the Council's claimed supply has appraised the individual sites which make up the element of supply entitled 'Existing Commitments', from which 1,958 units are expected to be delivered.

The analysis confirms that the following sites should be removed from the supply as they are not considered to be deliverable or developable in line with the tests set out within national policy:

– 1 West Street, Newbury (20 units) – the Council's assessment of 5YHLS confirms that the site's planning permission expired in September 2022;

– Bloor Homes, Southern River View House, Newbury Business Park (12 units) – Croudace's assessment of this site as part of the 5YHLS Assessment deduced that this building was still being marketed for office use, with no developer identified;

– 6 units should be removed from the supply at the existing commitment 'Market Street redevelopment, Newbury' due to over-counting of permissions/completions.

As such, Croudace confirms that **38 units should be removed from the supply.**

Windfall

In terms of windfall, the Council makes an allowance for 1,949 units to come forward from Year 4 of the Plan onwards. This equates to 129 dwellings in Year 4, and 140 dpa thereafter.

Paragraph 6.20 of the LPR states that the windfall allowance does not include sites of 10 or more dwellings, and therefore Croudace has had regard to historic delivery rates to make a judgement as to whether the allowance of 140 dpa is in line with the requirements of the NPPF at paragraph 71, which requires compelling evidence that windfalls provide a reliable source of supply.

As such, Croudace has drawn upon Table 3.1 of the Council's 5YHLS Statement, which breaks down net windfall completions since 2006/07.

Looking solely at sites less than 10 units, the average annual windfall delivery is 141 units, although Croudace considers this to be skewed by a handful of years where performance is significantly improved. In reality, in only five years of the 16-year monitoring period has windfall delivery on small sites reached 140 dpa. In addition, windfall delivery from small non-allocated sites generally has a negative trend as indicated within Figure 13.

Croudace urges the Council to look again at historic windfall delivery rates in a manner that is not influenced so heavily by well performing years. This is pertinent especially in light of current economic conditions, the price of building materials, supply chain issues, shortages of labour and increasing interest rates etc. – which all reduce the likelihood of SME builders meeting the 140 dpa 'target'.

These issues suggest that historic delivery rates may not continue at the same rate into the future and therefore the Council must take a broader look at windfalls, particularly given small sites within the urban area are a finite resource which dwindles over time, as demonstrated by the trend-line at Figure 13.

Instead, Croudace considers that a 'median' figure (rather than the 'mean') may be more appropriate. The median figure in this case would result in an annual windfall allowance of 126 units. Applied over the same period from Year 4 (2025/26) onwards, this would generate a more modest windfall allowance of 1,764 dwellings.

Croudace therefore applies a **deduction of 185 units from the Council's assumed supply for windfall development.**

Even with this reduction, approximately 20% of the Council's supply would still be comprised of windfalls, which is a significant proportion.

Clearly, Croudace does not consider that the reliance on windfalls is a 'positively prepared' or 'effective' strategy. Instead, the Council should seek to allocate a sufficient quantum of additional sites to provide certainty that the housing requirement (even if it were to remain at 538 dpa) would be delivered. Croudace would like to highlight that the Land at Henwick Park is an unconstrained site which could give greater certainty and therefore credibility to the plan.

Existing Allocations Carried Forward / Effects of the Housing Trajectory

The LPR proposes to carry forward 18 existing allocations from the Core Strategy (adopted July 2012) and the HSA DPD (adopted May 2017). These sites are spread across the three spatial areas identified at draft Policy SP1.

Croudace notes that a number of these sites are affected by constraints which are likely to impede development either in totality, or at least through a delayed start on site or lower rate of delivery. For example, Five allocations to be carried forward are located in areas which are constrained by nutrient neutrality as noted in Table 8.

As explained above, Croudace therefore considers that the reliance on five existing allocations within areas constrained by nutrient neutrality to be a fundamental flaw in the plan-making process. These sites are unlikely to be able to deliver residential development within the first five years of the plan period, owing to a lack of available mitigation schemes to offset the likely impacts on nutrients.

Appendix 8 of the LPR and Appendix 2 of the Housing Background Paper set out the anticipated Housing Trajectory across the plan period. The trajectory identifies that only 27 units from the sites listed at Table 8 are expected to deliver units within the first five years of the plan period – i.e. those with the benefit of full planning permission. 6.79 This emphasises the difficulty the Council may find itself in as regards the 5YHLS, by relying upon existing allocations which cannot yet deliver housing.

In Croudace's view, it is not a 'positively prepared', 'justified' or 'effective' strategy to carry forward allocations on sites where there remain such uncertainties. It therefore recommends that allocations RSA2, RSA14, RSA15 and RSA21 are removed from the LPR and alternative land be found to accommodate the 163 units lost as a result.

Adding Sufficient Flexibility

Overall, Croudace considers there to be an inherent lack of flexibility built into the LPR, which raises concerns that it is not an 'effective' strategy:

- 1 The LPR should allocate a sufficient quantity of smaller, deliverable sites (such as Henwick Park for development immediately); and

	<p>2 The LPR should look to allocate a reserve supply of sites (i.e. 'Plan B' sites) if the projected housing land supply does not materialise as predicted.</p> <p>As touched upon earlier, large strategic sites can take many years to assemble (e.g. Sandleford Park) and sometimes some do not materialise whatsoever. For example, there may be uncertainty surrounding such issues as the need to overcome constraints relating to land ownership, agreeing masterplans, securing planning consent, agreeing S106 agreements, discharging conditions and funding and constructing new infrastructure etc. It can therefore take a significant period of time for strategic sites to yield completions, which should not be underestimated.</p> <p>Croudace urges the Council to allocate a range of unconstrained, smaller, less strategic sites that can complement those strategic allocations in helping to meet housing needs. Deliverable sites such as Henwick Park can help to boost housing delivery in the short term to plug the gap in delivery before strategic sites begin to deliver housing.</p> <p>We believe the Council should also be requested to consider allocating a stock of reserve or 'Plan B' sites, providing an additional buffer of housing land within the plan period. Such land could be released under specific circumstances (such as a lack of 5YHLS or failing the Housing Delivery Test, or where accommodating unmet needs from Reading, for example). This would create inherent flexibility in the LPR thereby avoiding lengthy delays associated with undertaking another Local Plan Review or a more comprehensive update.</p> <p>Alternatively, a policy allowing the development of land outside of settlement boundaries where certain circumstances arise (such as no five-year housing land supply, as per Fareham at Appendices H and I) or constraints-based criteria are met could be considered. Sites with no constraints could then provide additional flexibility.</p> <p>Finally, flexibility could be written into the plan by following a similar approach to South Northamptonshire (Appendix J), where certain types of specialist housing are supported outside of settlement boundaries subject to the meeting of several criteria and a clear evidencing of need and lack of available alternative sites.</p> <p>Conclusion</p> <p>Following a review of the LPR and the associated evidence base, Croudace firmly considers that the Plan as currently drafted is not legally compliant and cannot be found 'sound' in line with the tests outlined at paragraph 35 of the NPPF.</p> <p>Fundamental changes are required in order to ensure that the LPR is 'positively prepared', 'justified', 'effective' and 'consistent with national policy', as well as being legally compliant.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Adoption of a more ambitious approach to plan-making by increasing the housing requirement – the adoption of a mere 5% buffer over and above the LHN figure is unambitious, constricting and inconsistent with all tests of soundness. Croudace considers that the housing requirement should be higher to provide greater flexibility and surety that housing needs can be delivered across the plan period. In addition, an increased housing requirement to assist Reading in meeting its unmet needs, ensuring the delivery of affordable, specialist and self and custom-build housing and reflecting a necessary increase to the plan period would make for a more appropriate strategy.</p> <p>Making a more realistic assessment of housing land supply– Croudace calls on the Council to make a more accurate, realistic and therefore 'effective' assessment of housing land supply, reducing reliance on windfall development and removing allocations which are not deliverable. This would have the effect of reducing the supply of housing to a level which would mean the Council would need to allocate additional land for housing on readily available sites.</p> <p>The identification of land to provide inherent flexibility for the future – if not making sufficient allocations at this stage, the Council should look to provide sufficient flexibility in the plan to adapt to potential changing circumstances in the future by identifying reserve (i.e. 'Plan B') sites which can be brought forward for development in specific circumstances, or by looking to support development outside of settlement boundaries in specific circumstances. This would be a much more 'positively prepared' and 'effective' strategy.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>Yes</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable	

<p>alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>EXECUTIVE SUMMARY</p> <p>Boyer have prepared these representations on behalf of Darcliffe Homes Ltd ('Darcliffe'), in response to the 'Regulation 19' consultation relating to the Proposed Submission West Berkshire Local Plan Review (2022 – 2039) ('the emerging plan').</p> <p>The purpose of these representations is to assist the Council in refining an approach that is consistent with both national planning policy and the tests of soundness. To this end, the representations provide general support to the overall objectives of the emerging plan, but provide detailed commentary in relation to aspects where Darcliffe has concerns with regard to aspects of the emerging plan's soundness.</p> <p>Darcliffe supports the Council's principal objectives, which include seeking to meet the District's local housing needs. However, Darcliffe has concerns in relation to certain aspects of the plan, which we encourage the Council to consider amending prior to submission for examination in public.</p> <p>Darcliffe recommends the plan is amended in relation to: the duty to co-operate; increasing the level of headroom provided in the identified housing requirement (to both improve the robustness of the planned supply and to deliver additional much-needed affordable housing); allocating a specified amount of development to accommodate unmet need arising in Reading; updating the proposed plan period to include an additional year; and ensuring a robust rolling five-year housing land supply position throughout the plan period, reducing reliance on both the windfall allowance and on larger strategic site allocations that are likely to only begin delivering in the later extent of the plan period.</p> <p>Darcliffe considers that these concerns could and should be resolved with the introduction of an allocation for residential development, of approximately 322 homes, at Land west of Little Heath Road, Reading (the site).</p> <p>INTRODUCTION</p> <p>Policy Context</p> <p>West Berkshire District Council adopted the Core Strategy Development Plan Document (2006 - 2026) in July 2012. Five years later, the Council adopted the Housing Site Allocations Development Plan Document in May 2017: which sought to implement the spatial framework set out within the Core Strategy. The adopted Development Plan for the District therefore sets out the spatial strategy to meet development needs up to 2026, and provides a series of site allocations and planning policies that seek to deliver that strategy.</p> <p>To ensure that planning policies remain relevant and are able to effectively meet the needs of the local community, the Town and Country Planning (Local Planning) (England) Regulations 2012 (as amended) requires local planning authorities to review local plans at least once every 5 years from their adoption date.</p> <p>The Proposed Submission West Berkshire Local Plan Review (2022 – 2039) ('the emerging plan'), which is the subject of the 'Regulation 19' consultation, reflects the distilled outcome of that review process. The Draft Plan sets out an updated vision and strategy, alongside an updated series of site allocations and policies that would supersede the adopted Core Strategy upon its adoption. The Council's Local Development Scheme ('LDS') anticipates its adoption in September 2024.</p> <p>Darcliffe fully supports the Council's commitment to review the existing development plan through this process. However, it is considered that there are several aspects of the emerging plan and its evidence-base, which would benefit from further consideration. These areas are detailed within these representations. We encourage the council to address the concerns we've identified to ensure the emerging plan is capable of being found sound.</p> <p>To assist in resolving our concerns, Darcliffe are promoting the allocation of Land west of Little Heath Road, Reading for the development of approximately 322 new homes, including 129 much needed affordable homes, on-site public open space, SuDS, landscaping, biodiversity enhancements, multiple vehicular access points, pedestrian and cycle links, and associated infrastructure.</p>

THE SCALE OF HOUSING NEED

This section details Darcliffe's position with regard to the scale of housing need within West Berkshire. In determining the appropriate Housing Requirement for the emerging West Berkshire Local Plan (2022 – 2039), the discussion considers several key themes:

- the scale of housing need in West Berkshire,
- the need for affordable housing in West Berkshire, and
- unmet need arising outside of West Berkshire & the Duty-to-Cooperate.

The Scale of Housing Need in West Berkshire

Calculating Housing Need

In considering the appropriate housing requirement for the District, the supporting text accompanying emerging Policy SP12: 'Approach to Housing Delivery' identifies that the strategic policies contained within the emerging local plan should be informed by an assessment of Local Housing Need ('LHN').

The National Planning Policy Framework ('NPPF') [Footnote 2: Available online at:

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/1005759/NPPF_July_2021.pdf] confirms, at paragraph 61, that:

"...to determine the minimum number of homes needed, strategic policies should be informed by a local housing needs assessment, conducted using the standard method in national planning guidance – unless exceptional circumstances justify an alternative approach".

The Government's Standard Method for calculating housing need is set out clearly in Planning Practice Guidance ('PPG') [Footnote 3: Available online at:

<https://www.gov.uk/guidance/housing-and-economic-development-needs-assessments#identifying-the-need-for-different-types-of-housing>]. Proposed Policy SP12 clarifies that the appropriate LHN figure for West Berkshire comprises 513 dwellings per annum ('dpa'), as derived using the Government's Standard Method.

Furthermore, no exceptional circumstances have been identified that apply to West Berkshire which justify the use of an alternative starting position approach to the Government's Standard Method. Darcliffe **agrees** there are no exceptional circumstances that justify the application of an alternative assessment of housing need that would result in an identified need below that of the Standard Method, in accordance with PPG.

Darcliffe **supports** the Council's use of the Government's Standard Method to derive a minimum housing need figure for the District area. However, as noted within the emerging local plan, it remains pertinent that the LHN figure represents the minimum identified housing need. It should not be considered to represent a maximum quantum of development to be provided.

PPG clarifies there are various circumstances in which it may be appropriate for an authority to plan for a higher number of homes than indicated through the LHN Standard Method calculation. Such circumstances include, but are by no means limited to, situations in which an authority has agreed *"...to take on unmet need from neighbouring authorities, as set out in a statement of common ground"* [Footnote 4: *Ibid.* PPG Paragraph: 010 Reference ID: 2a-010-20201216].

Expressing the Housing Requirement

Darcliffe notes it is common practice, indeed best practice, for Local Planning Authorities ('LPAs') to identify a 'buffer' in the identified housing requirement, to ensure at least the minimum local housing needs of the area are more likely to be delivered in practice. Typically, this is represented in the provision of an amount of headroom in the supply over the minimum target, to account for the practical realities that inhibit sites being delivered as anticipated throughout the plan period.

To this end, the Council has identified an approach to its identified housing requirement that reflects a range, between the LHN minimum of 513 dpa to 538 dpa. Within the supporting text to Policy SP12, the Council clarifies that the housing target of 513 dpa represents a minimum housing delivery figure to be achieved, and therefore that it does not represent a cap, or 'maximum' amount. Darcliffe welcome the Council's recognition that the LHN figure of 513 dpa should be exceeded where possible.

Further, the Council assert that the application of a range within the identified housing requirement of an authority's area represents common practice. However, Darcliffe contends that this is not the case. Indeed, the expression of the housing requirement as a range is considered to introduce unnecessary confusion into the planning process and is therefore considered to be inconsistent with the NPPF.

Paragraph 16 of the NPPF requires that local plans should '...contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals'. The expression of a housing requirement that consists of a range between two targets is unnecessarily opaque and introduces entirely unnecessary uncertainty with regard to how the Council's annual housing requirement will be measured and monitored.

For example, the use of a range introduces uncertainty in relation to how the 5% buffer, as required by paragraph 74 of the NPPF, would be applied in considering the Council's Five- Year Housing Land Supply position ('5YHLS').

Given these concerns, Darcliffe recommends the Council seeks to identify a single housing requirement figure, which reflects the LHN figure, plus an appropriate buffer, in the identified housing requirement, that is sufficient to ensure that the District's minimum housing needs will be delivered in practice, providing flexibility in the supply of homes and choice and competition in the market for land.

The Appropriate Buffer in the Housing Requirement

Darcliffe **supports** the Council's recognition that, to be *effective*, the emerging plan must identify a housing requirement, and accompanying housing land supply, which includes an appropriate buffer over the minimum LHN figure of 513 dpa. However, Darcliffe contends the provision of just a 5% buffer over the LHN figure is insufficient to effectively ensure that the District's minimum local housing needs will be delivered in practice.

Research undertaken by Lichfields in 2015 indicated that approximately 10-20% of all planning permissions granted nationally were not ultimately implemented (excluding re-plans) [Footnote 5: Lichfields (2021) Taking Stock: The geography of housing need, permissions and completions. Available online at: <https://lichfields.uk/media/6453/>

[taking-stock-the-geography-of-housing-need-permissions-and-completions_may21.pdf](#)]. Given the typical detractors from the implementation of planning permissions; including market fluctuations, delays in the planning process, legal restrictions, complications with the discharge of conditions, *et al.*, it is entirely reasonable to expect that a certain proportion of the allocated housing supply over a fifteen-year period would either not come forward as the Council's trajectory anticipates, or not be delivered at all.

Consequently, to be *effective*, the emerging plan must seek to identify a buffer of at least 10% above the identified minimum local housing need figure. This is considered to be necessary to ensure that those minimum housing needs can be effectively delivered, in practice, over the length of the emerging plan period.

As such, Darcliffe contends that the Council should amend Policy SP12 accordingly, to reflect a housing requirement figure of 564 dwellings per annum. This reflects the identified minimum housing needs as derived through the Standard Method, plus a 10% buffer to ensure that these needs are delivered in practice. This represents an increase in the identified housing requirement by an additional 442 dwellings over the plan period.

To assist the Council in providing an *effective* and robust housing land supply, Darcliffe recommends that the Land west of Little Heath Road, Reading is allocated for the delivery of approximately 322 new homes. In isolation, this site would provide approximately 3.8% of the district's total identified housing requirement over the plan period, which would help to ensure that the district's housing needs would be met effectively and in a sustainable location.

Affordable Housing Need in West Berkshire

West Berkshire faces a significant need for affordable housing over the plan period, as affirmed within the emerging local plan. The conclusions of the Berkshire (including South Bucks) SHMA (2016), updated in 2022 [Footnote 6: Available online

at: https://www.westberks.gov.uk/media/53425/Local-Development-Scheme-January-2023/pdf/Local_Development_Scheme_Jan_2023_clean.pdf?m=638097176540170000], further demonstrate the extent of this need in the plan area, finding there is a need within West Berkshire for approximately 330 new affordable homes per annum up to 2039.

The identified need for affordable homes in West Berkshire, of 330 dwellings per annum, comprises approximately 64% of the overall identified housing need for the plan area, of 513 dwellings per annum. To deliver the number of affordable homes needed in West Berkshire, the Plan would be required to identify a housing supply of, at least, 825 dwellings per annum (assuming a policy requirement of 40% affordable housing provision is applied), which represents +160% of the LHN figure.

Given that the identified annual need for affordable housing provision comprises approximately 64% of the overall annual local housing need, there is a clear case for accommodating further residential development, as far as is reasonably practicable, within the District, to promote the delivery of greater affordable housing.

Furthermore, the Updated Housing Needs Evidence (2022) [Footnote 7: *Ibid*] illustrates, at Table 4.15, that a significant proportion (approximately 46%) of the District's total affordable housing need is required within the North Wessex Downs AONB Spatial Area, comprising 152 dpa out of the overall total of 330 dpa.

ONS datasets [Footnote 8: Source: House Price Statistics for Small Areas and Annual Survey of Hours and Earnings, ONS] confirm that the latest median housing affordability ratio (2021) for West Berkshire is 9.73 [Footnote 9: Median housing affordability ratio refers to the ratio of median price paid for residential property to the median workplace-based gross annual earnings for full-time workers]. This means that the median house prices in the District are almost 10 times that of median workplace-based earnings. This is up from a ratio of 5.1 in 2000 and 7.3 in 2010, which indicates that homes in West Berkshire have become markedly less affordable over time.

To support the long-term viability of the services and amenities of the District's Eastern Urban Area, such as Tilehurst and the other western suburbs of Reading, there is clearly a need to deliver new market and affordable homes in the area within the plan period. The area comprises the District's highest order settlement and as such represents the most sustainable location to accommodate new development in the District.

Given the principal mechanism for the delivery of affordable homes is through the allocation of market housing there is justification for adopting a higher housing requirement, we therefore encourage the Council to consider allocating both Site A and Site B to assist in meeting the identified need for affordable housing in the District. Given a policy compliant mix of homes, the sites are together capable of delivering approximately 32 new much-needed affordable homes.

Policy SP12: Approach to Housing

In accordance with the discussion set out previously, Darcliffe recommends that the housing requirement is clearly expressed as a single value, which includes at least a 10% buffer over the Local Housing Need figure. Furthermore, Darcliffe recommends that Policy SP12 is amended to clarify a specific contribution to meeting the identified unmet need arising from Reading.

Furthermore, as currently formulated, the proposed policy limits the exception to the net loss of residential units (i.e., where there is a reasoned justification in the form of a benefit to the wider community) to situations in which there is a change of use.

There are situations in which the public benefit of a net loss of residential units could be justified without a change of use occurring; for example, where an outdated apartment building is to be demolished and replaced to provide improved accommodation (e.g., larger units which meet Nationally Described Space Standards and address current housing needs).

CONCLUSION

The Proposed Submission West Berkshire Local Plan Review (2022 – 2039) sets out how West Berkshire District Council proposes to, as a minimum, meet identified development needs within the district area. The proposed spatial strategy seeks to direct development toward the most sustainable locations within the district area. The proposed spatial strategy seeks to direct development toward the most sustainable locations within the district, whilst recognising the vital role that modest growth within the North Wessex Downs Area of Outstanding Natural Beauty provides to the longer-term viability of those settlement locations contained within it.

To this extent, Darcliffe **supports** the Council’s principal objectives; which include meeting the district’s local housing needs in full, and directing required development toward the most sustainable locations within the district. However, Darcliffe has concerns in relation to certain aspects of the plan, which we encourage the Council to consider amending prior to submission for examination in public. These include: increasing the level of headroom provided in the identified housing requirement, allocating a specified amount of development to accommodate unmet need arising in Reading, and updating the proposed plan period to include an additional year.

In meeting the district’s identified housing needs, Darcliffe recommends the Council reconsider the omission of an allocation for residential development at the Land west of Little Heath Road, Reading. Darcliffe considers that the site could accommodate approximately 322 new dwellings, providing a policy-compliant development in one of the most sustainable locations in the district.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?

- * Yes
- * No

Please give reasons for your answer

Unmet Need Arising Outside of West Berkshire & the Duty-to-Cooperate

Unmet Need Arising Outside of West Berkshire

The Government’s Standard Method calculation does not take account of unmet need arising from outside the authority’s area. However, as noted within the emerging plan, West Berkshire District falls within the Western Berkshire Housing Market Area (‘HMA’). Which also comprises Bracknell Forest, Reading Borough, and Wokingham Borough Councils administrative areas.

The Berkshire (including South Bucks) Strategic Housing Market Assessment (‘SHMA’) (2016) [Footnote 10: Available online at: https://www.westberks.gov.uk/media/40949/Berkshire-inc-South-Bucks-Strategic-Housing-Market-Assessment/pdf/Berks_SHMA_Feb_2016.pdf?m=638103405174070000], published as part of the Council’s evidence base, affirms the strong functional relationships exhibited between these local authority areas - in relation to where people live and work. Recognising this, the Western Berkshire HMA authorities have sought to demonstrate a shared history of collaborative working in relation to housing matters and associated infrastructure, which included the preparation of a joint Statement of Common Ground (‘SoCG’) for the purposes of local plan-making.

Signed by each constituent authority in August 2021, the West of Berkshire Area SoCG [Footnote 11: Available online at: https://www.westberks.gov.uk/media/53787/Duty-to-Cooperate-Statement-January-2023/pdf/LPR_Interim_DtC_Statement_January_2023.pdf?m=638086137283470000] recognises that, in the first instance, each authority will seek to meet its own development needs in full. However, the SoCG acknowledges that there is a shortfall in planned residential development in Reading borough of 10 dpa throughout their plan period, equating to a total of 230 net new homes.

Consequently, the authorities have recognised that there is currently a modest identified and agreed-upon quantum of unmet need arising from within the Western Berkshire HMA. In seeking to address this unmet need, the SoCG recognises that this should, in principle, be met within the Western Berkshire area. Given the relatively modest level of unmet need, Darcliffe expect that an appropriate contribution should be accommodated within West Berkshire district toward meeting some, if not all, of Reading’s unmet need.

The Bracknell Forest Local Plan has recently been subject to examination in public and has not included any additional supply to address the shortfall in Reading. As such, it falls to either Wokingham or West Berkshire to include it within their housing requirement.

Planning Practice Guidance (‘PPG’) states that “Inspectors will expect to see that strategic policy making authorities have addressed key strategic matters through effective joint working, and not deferred them to subsequent plan updates...”. Darcliffe maintains therefore that simply pushing consideration of Reading’s unmet need back to a subsequent plan update would be inconsistent with national policy and fails to adequately respond to the requirements under the duty to co-operate.

The emerging plan fails to provide any such clear commitment to meeting Reading’s unmet need. The Housing Background Paper states that this exercise should be undertaken through the review of the local plan once Reading has clarified the extent of unmet need through its own local plan review.

RBC’s unmet need is primarily due to its constrained administrative boundaries, which results in the lack of greenfield sites for development, and noting RBC is now subject to the 30% uplift to the minimum Standard Method OAN, and is substantively reliant on brownfield sites to meet housing needs. As evidenced by the unmet need of their adopted Local Plan, brownfield sites within RBC are diminishing.

Furthermore, the location of the developable sites is predominately central and lend themselves to flatted development. Consequently, RBC will likely be supplying a lack of family homes, alongside likely failing

to meet its own OAN minimum needs, within the borough to meet local needs. This further promotes the need for Tilehurst, as a settlement which is located and essentially forms a functional suburb of Greater Reading, to pick up the unmet need for RBC's family homes.

It is also notable RBC's last recorded 5YHLS figure was 2 years in 2021, which is less than 2 years after their Local Plan was adopted. This downwards trajectory so early in the plan period clearly indicates their allocated sites are already not delivering at anticipated rates. This assumedly relates to the dependence on brownfield sites which are generally slower to deliver housing in comparison to greenfield sites. As a consequence of RBC's housing trajectory, the 230 home shortfall will likely increase in the next Local Plan Review.

To redress these concerns, Darcliff recommends West Berks Council reconsider including a specified commitment toward meeting at least the existing identified unmet needs of Reading Borough within the District's housing requirement figure under Policy SP12. Furthermore, in meeting this specified amount of unmet need, Darcliff recommends that the Council seeks to identify opportunities to deliver it within locations that are functionally linked to the area in which the unmet need arises.

Consequently, we encourage the council to consider the allocation the Land west of Little Heath Road, Reading, which is capable of accommodating unmet need arising from Reading. The site is capable of meeting Reading's entire unmet need over the entire plan period with further capacity to meet additional need in West Berkshire. It is adjacent to the existing settlement of Reading, so is well-placed to provide for its unmet need in a location that is functionally connected to Reading.

The Duty-to-Cooperate ('the Duty')

Section 33a of the Planning and Compulsory Purchase Act (2004) ('PCPA') requires that local planning authorities should co-operate with other relevant local authorities, the County Council, and prescribed bodies (as relevant), in relation to the preparation of a Local Plan. The Duty requires the Council to engage constructively, actively, and on an on-going basis, in the preparation of the Plan, insofar as it relates to a strategic matter. Strategic Matters include the sustainable development and use of land that has, or would have, a significant impact on at least two planning areas, such as the amount and distribution of housing.

A fundamental requirement of a Local Plan is to meet the area's development needs as well as any needs that cannot be met within neighbouring areas unless there are policies in the Framework that protect areas or assets, or adverse impacts of doing so would significantly and demonstrably outweigh the benefits taken as a whole (NPPF, Paragraph 11). Indeed, Paragraph 35 of the NPPF notes that this is an express requirement of a sound Local Plan.

Furthermore, paragraph 24 of the NPPF is clear that LPAs have a duty to cooperate with each other and with other prescribed bodies, on strategic matters that cross administrative boundaries. The NPPF goes on to note that '*...joint working should help to determine where additional infrastructure is necessary, and whether development needs that cannot be met wholly within a particular plan area could be met elsewhere*'.

The NPPF is clear that the Duty is not simply a bureaucratic exercise but one which should ensure Local Plans are *effective* and *positively prepared*. As such, cooperation clearly relates to maximising the effectiveness of plan preparation.

Importantly, the requirement is to 'cooperate', rather than to just 'communicate', although it is accepted that the Duty to Cooperate is not *de facto* a duty to agree. There is however an expectation that neighbouring authorities will work together to collectively address strategic matters, including meeting housing need.

The Oxford English Dictionary ('OED') definition of *cooperate* is to 'work together to achieve something', whereas the OED definition of *communication* is to 'share or exchange information'. There is a fundamental difference between the two, with the emphasis in cooperation being to achieve something. Engagement alone is therefore insufficient to comply with the Duty.

From review of the signed statement of common ground it appears the HMA authorities have undertaken and satisfied a process of identifying material strategic planning matters. And there has been a process of communication considering the identified strategic matters. However, we do not consider the arrived at conclusion of not undertaking any action to remedy Reading Borough's unmet need until such time as a future plan review is undertaken satisfies the base expectation and requirement of co-operation. We are also concerned by the apparent lack of ongoing co-operation and engagement. These matters undermine confidence in the effectiveness of the process undertaken in context of the DtC.

Failure of WBDC to properly cooperate with neighbouring authorities and other bodies to meet development needs would therefore result in the emerging Plan being found unsound. It is essential that WBDC fully cooperates with other LPAs to meet Reading's identified unmet housing needs. To redress this issue, Darcliff encourages the Council to consider the allocation of the Land west of Little Heath Road, Reading, to meet a specified proportion of the unmet need arising from Reading.

<p>4. Proposed Changes</p>	<p>i) Provision will be made for 8,724 to 9,146 <u>9,588</u> net additional homes in West Berkshire for the period 1 April 2022 to 31 March 2039; 513 to 538 <u>564</u> dwellings per annum. The target figure of 538 <u>564</u> dwellings per annum does not constitute a ceiling or cap to development. <u>The target includes the provision of 230 dwellings toward meeting the unmet need arising from Reading borough, which is to be accommodated as close to the Eastern Urban Area as possible.</u></p> <p>ii) There should be no net losses from the existing stock of homes in West Berkshire. Existing homes should be retained in residential use (or replaced at least in equal numbers, normally on the proposed site), unless there is a reasoned justification in the form of a benefit to the wider community for a change of use. Developments should utilise opportunities to make better use of the existing housing stock.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that	No

<p>unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>[See attachment 'Andrew Black Consulting (Bucklebury PC) Full Rep' for full consultation response]</p> <p>Timing of Consultation</p> <p>[See attachment 'Andrew Black Consulting (Bucklebury PC) Full Rep' for full consultation response]</p> <p>On 6 December 2022, Michael Gove, Secretary for Levelling Up, Housing and Communities, released a written ministerial statement which set out the following in relation to Local Plans:</p> <p><i>We will end the obligation on local authorities to maintain a rolling five-year supply of land for housing where their plans are up-to-date. Therefore, for authorities with a local plan, or where authorities are benefitting from transitional arrangements, the presumption in favour of sustainable development and the 'tilted balance' will typically not apply in relation to issues affecting land supply.</i></p> <p><i>I also want to consult on dropping the requirement for a 20% buffer to be added for both plan making and decision making – which otherwise effectively means that local authorities need to identify six years of supply rather than five. In addition, I want to recognise that some areas have historically overdelivered on housing - but they are not rewarded for this. My plan will therefore allow local planning authorities to take this into account when preparing a new local plan, lowering the number of houses they need to plan for.</i></p> <p>Subsequently on the 22 December 2022, the Department for Levelling Up, Housing and Communities (DLUHC) commenced a consultation on the draft amendments to the NPPF which runs until March 2023.</p> <p>In accordance with the Written Ministerial Statement, paragraph 61 of the NPPF in relation to <i>delivering a sufficient supply of homes</i> is proposed to be amended (in bold) to require the following:</p> <p><i>To determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance. The outcome of the standard method is an advisory starting-point for establishing a housing requirement for the area (see paragraph 67 below). There may be – unless exceptional circumstances relating to the particular characteristics of an authority which justify an alternative approach to assessing housing need; in which case the alternative used which should also reflects current and future demographic trends and market signals. In addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for [footnote 29].</i></p> <p>Policy SP12 of the Local Plan sets out provision will be made for up to 9,146 additional homes. This is based on the Local Housing Need Figure of 513 dwellings per annum which is based on the 2014-based ONS Household Projections. A shortfall of 230 dwellings from Reading Borough Council has been added in to the housing requirement.</p> <p>Alongside the changes to the NPPF the Consultation Document published by DLUHC states that the government will review the implications on the standard method of new household projections data based on the 2021 Census which will be published in 2024.</p>

It is therefore clear that the direction of travel is for a plan led system where the amount of housing which must be planned for within any local plan is likely to be significantly reduced from the 513 dpa figure in the WBC LPR which is based on outdated ONS projections, and a flawed methodology used to derive a housing target. Other local authorities have chosen to pause further progress on local plans whilst the extent of the changes to the method of housing need calculation is fully understood.

The consultation also proposes significant changes to the presumption in favour of sustainable development as applied to plan making under paragraph 11 of the framework. The changes to paragraph 11b are also significant and state that:

b) *strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas [footnote 6], unless:*

i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area [footnote 7]; or

*ii) any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole; **such adverse impacts may include situations where meeting need in full would mean building at densities significantly out of character with the existing area [footnote 8]; or***

iii) there is clear evidence of past over-delivery, in terms of the number of homes permitted compared to the housing requirement in the existing plan; in which case this over-delivery may be deducted from the provision required in the new plan

The Housing Delivery Test results published in January 2022 show that WBC provided 117% of the required housing over the preceding three years. However closer examination of the figures shows a more significant oversupply in the last year

[see page 8 of attachment 'Andrew Black Consulting (Bucklebury Parish Council) for table]

Given this picture it is clear that this would be taken into account if the plan were to be brought forward under the new measures in the consultation version of the NPPF. This could mean that large scale release of sites such as North East Thattham would be wholly unnecessary.

Numerous other local authorities have taken the opportunity to pause their plan making progress until the results of the consultation are released and the changes to Planning Policy are finalised. It is illogical that WBC has not taken the same opportunity.

Site Selection Process

BPC submit that the Site Selection Process undertaken by WBC was fatally flawed from the outset and has resulted in a plan which is wholly unjustified and as a result is unsound.

The Site Selection Methodology Paper (January 2023) forms part of the evidence base for the LPR. The Paper simply repeats much of the policy context which the plan is based upon and correctly references the methodology as set out in the Planning Practice Guidance (PPG) as follows:

- Stage 1 - *identification of sites and broad locations*
- Stage 2 – *site and broad location assessment;*
 - *Estimating development potential*
 - *Assessing suitability*
 - *Assessing availability*
 - *Assessing achievability*
- Stage 3 – *windfall assessment*
- Stage 4 – *assessment review*
- Stage 5 – *final evidence*

Despite the acknowledgement of the methodology as set out within the PPG there is actually little in the way of evidence presented in the Site Selection Methodology Paper of a rigorous process being undertaken. Moreover, it makes no reference whatsoever of the change in site selection process following the decision to drop the decision to make a large allocation at Grazeley.

The Sustainability Appraisal sets out the following in relation to the Thattham Growth Study:

The Thattham Growth Study [footnote 13] was commissioned to considered how best to deliver strategic development in Thattham. The study identified that strategic development would be required in Thattham to support the service provision and regeneration that Thattham requires. While all sites in Thattham have been considered the only sites (in combination with each other) that are considered suitable for strategic level of development are the group of sites located in North East Thattham. No other alternatives have been considered as there are no other sites, or group of sites within Thattham that would be able to deliver the scale of development required to support the additional infrastructure required (further details in the Site Selection Methodology [footnote 14]).

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>BPC has wider concerns around the way in which WBC has undertaken the consultation process for the LPR and the Duty to Cooperate in general. Failings with Duty to Cooperate are matters which are not capable of being remedied in advance of the plan being submitted for examination. BPC will set out further details of these failings to the inspector should the plan be submitted to the Planning Inspectorate by WBC.</p>

<p>area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>No explanation is given for the restriction of the windfall allowance to sites of 10 units or less, especially given that historically over 70% of new homes were built on windfall sites. The resulting low windfall allowance of 140 units per annum means that far too many units are being allocated on greenfield sites</p> <p>No sites have been allocated within settlement boundaries. For example, planning applications have been submitted for hundreds of units on a redeveloped Kennet Shopping Centre in Newbury. Another example is the London Road Industrial Estate in Newbury where West Berks Council, who own the site, have put forward re-development schemes that include converting part of the site to housing.</p> <p><i>Para 6.25 - 6.27</i> The Secretary of State's Written Statement of 6th December 2022 removed the need to maintain a 5-year housing supply for Local Authorities with up-to-date Local Plans</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>The threshold should be site area of one hectare, with allowance for those already with planning permission (as the LPR does with sites of less than ten units). This would increase the windfall allowance significantly. Greenfield housing site allocations should then either be reduced in size or removed altogether to compensate</p> <p>Sites within settlement boundaries that are in the Brownfield Land Register should be evaluated and, if appropriate, be allocated in the LPR and included in the target housing total. Ditto sites subject to suitable major planning applications to change land use to housing.</p> <p>Greenfield housing site allocations should then either be reduced in size or removed altogether to compensate.</p> <p>Paragraphs 6.25 to 6.27 should be removed from the LPR.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p>	Yes

* Yes * No	
5. Independent Examination	To explain to the inspector why the windfall allowance should be changed To explain to the inspector why sites within settlements should be allocated in appropriate circumstances Paragraphs 6.25 to 6.27 should be removed from the LPR.

<p>Please give reasons for your answer</p>	<p>On the scope of the Regulation 18 Consultation we commented that we do not agree with the proposed policy on the basis that the housing target is insufficient. We note that the Regulation 19 Draft Local Plan has further lowered the housing target. Nevertheless, the housing provision set out under Policy SP12 is consistent with the Council's evidence base, as detailed in the Housing Background Paper (January 2023). This is also consistent with the standard method figure.</p> <p>Please refer to the Affordable Housing Need Technical Note prepared by Barton Willmore now Stantec, dated March 2023 submitted with these representations [see attachment 'PS1638 Barton Willmore (Sulham Estate) Aff Housing Tech Note'] for our full response in relation to SP12. A brief summary follows but this should be read in the context of the full Technical note.</p> <p>The accompanying Technical Note undertakes a review of the affordable housing delivery in West Berkshire against the identified need set out within the emerging evidence base. The pipeline of sites identified as part of Council's five year land supply, all of which have potential to contribute to the supply of affordable housing, is also reviewed. This provides a basis for understanding the extent to which affordable housing supply is likely to keep pace with identified need. The Technical Note concludes that the rate of affordable housing delivery needs to increase from the existing rate and continue into the future to ensure that the needs for West Berkshire are met. When combining the existing and future shortfall in affordable housing, there is a need to provide up to 10,406 affordable dwellings to ensure that the needs of West Berkshire are met.</p> <p>In light of the above, it is evident that the number of homes delivered in total across West Berkshire should increase, which in turn will increase the number of affordable dwellings delivered within the district.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	Yes
<p>Please give reasons for your answer</p>	N/A
<p>4. Proposed Changes</p>	<p>To ensure that more affordable homes are delivered, the Council should increase their housing target and allocate further sites for development including our client's site at Our client's site at Hall Place Farm (reference TIL18) within the West Berkshire Housing and Economic Land Availability Assessment ('HELAA') (February 2020).</p>

<p>Please give reasons for your answer</p>	<p><i>Extract of full representation relevant to this consultation point. For full representation see attachment. Footnotes are included in the attachment.</i></p> <p>The housing requirement</p> <p>We have concerns regarding the effectiveness of the proposed development strategy as set out for housing in Policy SP12.</p> <p>Policy SP12 explains that provision will be made for a range of 8,721 to 9,146 net additional homes for the plan period.</p> <p>We consider that there is clear justification for higher housing growth in the district to meet the level of need identified in the evidence, not least in respect of addressing affordability.</p> <p>Affordable housing</p> <p>Addressing affordability of homes in the district is clearly a very significant matter for the LPR.</p> <p>The Vision (Chapter 3) of the Plan states that the Council will ensure that delivering "...housing of different types, sizes, tenures and affordability will be a priority in order to provide West Berkshire residents with homes and environs at sustainable locations in towns and villages that meet their needs, whatever their income, stage of life and ability" [our emphasis].</p> <p>This is backed-up by the evidence base. The Updated Housing Needs Assessment (dated, July 2022) confirms that there is a "notable need for affordable housing, and it is clear that provision of new affordable housing is an important and pressing issue across the District" [our emphasis]. The conclusion adds that "the evidence does however suggest that affordable housing delivery should be maximised where opportunities arise" [our emphasis].</p> <p>The report advises that the scale of affordable housing need is 697 dpa (a 188% increase on need following the Council's Housing Needs Assessment in 2020). This is also 136% of the standard method minimum LHN. Accordingly, the report advises that theoretically, if 40% of all new housing delivered was for affordable housing around 1,740 dpa would be needed to meet West Berkshire's affordable housing need in full (paragraph 3.24). The Council's affordable housing position is clearly worsening.</p> <p>It is acknowledged that the delivery of housing in line with the standard method figure may over time improve the affordability of market housing (and thus reduce affordable housing needs) through the affordability uplift in the standard method. However, West Berkshire's past housing delivery rates have generally been in line - if not greater - than the current minimum LHN and yet affordability problems/affordable housing need remains pressing. As a result, not positively addressing the affordability problems and affordable housing need across West Berkshire in this plan period could have significant social and economic consequences which do not appear to have been appropriately considered, including in the Sustainability Appraisal (SA/SEA) for Policy SP12.</p> <p>In this context, we have doubt that the LPR's housing requirement will be effective in improving affordability and therefore risks failing to deliver on its own vision. For this reason, the calculation of affordable housing need supports an increase in the overall housing requirement.</p> <p>Please also see section 3, where we comment more specifically on the housing need in Hungerford. <see Rep ID:PS1216 or Attached full representation></p> <p>Buffer to housing supply</p> <p>The LPR's housing target includes a 5% 'buffer' on top of the LHN at the top end of the range.</p> <p>The Council states in its Housing Background Paper (HBP) that its plans to meet the upper of the range in an effort to boost supply and have some built-in flexibility (footnote 4).</p> <p>The Regulation 18 version of the West Berks LPR included a 10% buffer. The Council's explanation for the reduction is the limitations and constraints of a largely rural district (footnote 5). On the face of it, that is justified by the Written Ministerial Statement in the HBP.</p> <p>However, this appears to be counter-intuitive; the greater level of constraint, the greater level of buffer is required to provide greater prospect of meeting the housing need, especially where one of the Plan's priorities is to improve affordability. Furthermore, the SA/SEA undertakes an analysis, at Appendix 4 Section 2.1, between LHN+ 5% and LHN+ 10%. The LHN + 10% scores significantly better with 'overall positive, with some significantly positive effects'. However, the SA/SEA concludes at Table 26 of the report that this would put the rural nature of the district at undue pressure. The SA/SEA therefore takes forward a apparently incorrect interpretation of the evidence base.</p> <p>The Council does not provide any justification that a 10% buffer/uplift (or greater) to the housing requirement could not be accommodated within the district. Indeed, none of the key environmental</p>

constraints (e.g. AONB) in the district or the rural nature of the district preclude the principle of residential development (different to floodplain, Green Belt, internationally protected habitats etc.), but instead will shape the scale, form and direction of growth across the district via the broad spatial strategy.

Evidence in the HELAA indicates that there are many more available sites in the HELAA to accommodate further growth, notwithstanding that not all of them can be expected to prove to be suitable and achievable.

In addition, an appropriate buffer will support greater flexibility in the Plan if the anticipated housing supply does not deliver. This is considered further at Section 4 below. <see heading Meeting the housing requirement>

A more effective buffer/uplift to the housing requirement is likely to fall between 10-20%.

This would increase the Council's target housing requirement to 564 - 616 dpa, which would equate to finding a supply of 9,588 – 10,472 dwellings up to 2039. This would more closely follow the tried and tested approach in other recently adopted Local Plans, including South Oxfordshire (c. 27% buffer), Windsor & Maidenhead (c. 12% buffer), and North Herts (c. 13% buffer), notwithstanding that all of these districts vary in the precise nature of their constraints and opportunities. Further, the neighbouring draft Wokingham Local Plan currently includes a 20% buffer.

Duty to cooperate

The LPR (footnote 6) notes that there is a current unmet need from Reading Borough Council of around 230 dwellings up to 2036 and that there will be a need to consider any further unmet need given the housing needs generated by the standard method (i.e. the government's 35% uplift to Reading as one of the largest urban areas in England) (footnote 7).

Reading has identified that a five year review of its Plan is required by 2024. This will need to include an urban capacity assessment. A revised future unmet need figure is therefore likely to be available shortly. It is anticipated that the future unmet need from Reading will be significant – the housing requirement increases to 907 dpa from Lichfield's analysis of the standard method for local housing need, dated April 2022 (from 689 dpa in the current Reading Borough Local Plan). However, at this stage without further evidence there is no certainty on what the unmet need will be or how it will be redistributed. However, it is widely accepted that Reading has limited land capacity to deliver these additional housing requirements in full and, therefore, highly likely that neighbours, including West Berkshire will be required to deliver in meeting some of this unmet need.

In this context, it is appropriate that the LPR plans positively for greater flexibility in its housing requirement rather than reacting to events during the plan period.

Meeting the housing requirement

We have reviewed the proposed development strategy and have identified areas of concern its effectiveness to deliver the housing requirement over the plan period.

The LPR identifies several sources of housing supply across the plan period at Table 2 of the Plan. These include: retained allocations; existing commitments on unallocated sites; windfall sites; and through new allocations in the Local Plan Review and Neighbourhood Plans.

In terms of existing allocations, the history of some of these sites identified in the supply that do not currently have planning permission (around 95 units, excluding Sandleford Park West) or only have outline permission (392 units, excluding Sandleford Park East) or where a site's delivery has been continually delayed clearly does not support confidence in their timely delivery. As such, it is considered that a 10% non-implementation rate is factored in to, at least, some of this supply would provide a more robust strategy.

In terms of non-allocated sites with planning permission, Table 2 shows that nearly 1,958 dwellings are provided on un-allocated sites (including prior approvals) with planning permission. Again, a 10% non-implementation rate would provide a more robust strategy as it is unlikely that all these permissions will be delivered over the plan period, for various reasons, potentially including changing constraints (such as the phosphates issue in the Lambourn catchment).

Windfall allowance

The housing supply includes a windfall allowance of 1,949 dwellings (or 26.6% of the total housing supply) up to 2039. It has been based on the average annual delivery on small sites of less than 10 units (excluding prior approvals for permitted development) between 2006 – 2022.

In the context of the latest consultation on the revised NPPF and the Levelling Up and Regeneration Bill also place a greater emphasis and need to provide a genuinely plan-led system, we consider that the LPR would be more effective if it relied less significantly on this level of unplanned development. A more positively planned approach would help to ensure greater delivery of affordable homes, noting that small windfall sites are generally less able to deliver this and over reliance on them risks exacerbating the affordability issues in the district and failing to deliver on a key priority of the plan (as discussed above).

The Council contend that past delivery of windfalls has been consistent and reliable. The Council has not provided any evidence however about future supply to justify such an approach.

There also appears to be a recent trend that yield from windfalls are reducing on small sites. As set out at Table 3.1 of the Housing Background Paper the delivery over the last three years 2019/20 to 2021/22 has reduced to an annual average of 97 completions. Indeed, in the last five years the annual average is also only 112 completions, notably lower than LPRs anticipation of 140 dpa. What evidence is there to give confidence that the rates will increase over the plan period?

In addition, it is also worth noting the windfall allowance is taken from smaller sites (i.e. less than 10 new homes) and, therefore, a reliance on sites for potentially between 1-4 dwellings in the housing supply will not deliver any affordable housing and further exacerbate affordable housing need within West Berkshire, contrary to the LPR's priority to improve affordability of housing for its existing and future residents.

	<p>The implications of this are important. Even a relatively modest but more realistic reduction in the windfall allowance from 140 to 100 dpa would reduce immediately the total housing supply by, at least, 549 dwellings.</p> <p>A more robust and effective alternative is to take forward more of the available and suitable sites from the HELAA. This will reduce the reliance on windfall sites and provide greater certainty of supply in a positively-planned way.</p> <p>Scale and timescales for Housing Delivery</p> <p>Notwithstanding the above, the Council's assumptions on the expected housing supply from NE Thatcham are also clearly unreasonable.</p> <p>The Housing Background Paper demonstrates that the Council expect NE Thatcham to start delivering 150 dpa from 2029/30 to 2038/2039. On the face of it, this appears to be overly optimistic (footnote 16).</p> <p>The market evidence demonstrates that for schemes of 1,500 dwellings, the lead-in time from validation of an application through to first completions is approximately 7 years (Source: Lichfield's Start to Finish (2nd Edition), dated February 2020). As such, given the timescales for the adoption of the Plan (i.e. late 2024 in the LDS) and taking a view that the planning application for this site is submitted by the end of 2024/2025, first completions cannot be projected before 2031/2032. This timescale may be optimistic given there is a need to prepare and agree to a coherent masterplan or development framework, and if, for example, prior mineral extraction is required and/or there are delays to the adoption of the Plan.</p> <p>As noted with the delays with Sandleford Park, and its need for a Secretary of State decision, delivery of strategic allocations is challenging.</p> <p>Furthermore, market evidence suggests that for sites of 1,500, a realistic average annual build out rate is c.100-120 dpa (Source: Lichfield's Start to Finish (2nd Edition)). As such, delivering completions from 2031/32 at 120 dpa would therefore equate to, at best, 960 dwellings over the plan period. A shortfall of 540 dwellings.</p> <p>In conclusion on the matter of meeting the housing requirement, we consider that the LPR is unsound as it:</p> <ul style="list-style-type: none"> • Does not provide sufficient contingency for non-delivery of currently extant planning permissions; • Relies heavily on windfall sites, when there are many alternative available sites identified in the HELAA; • Is unrealistic in its assumptions about delivery rates at the strategic allocations; • Lacks a vision for strategic development beyond the plan period. <p>If found unsound on these points, the remedy is to revisit the HELAA and engage with the promoters and other stakeholders to bring forward more of the most suitable sites for development.</p> <p>Attachments: full representation (Hungerford) including appendix A and B Full representation (Pinchington Lane, Newbury) including appendix A and B</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	N/A
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>The draft Local Plan was approved to move to Regulation 19 Consultation by a meeting of West Berkshire Council on 1st December 2022. This approval was given on the basis that the size of the development when complete would be approximately 1,500 dwelling. The Council's press release on this decision stated:</p> <p>"Councillors allocated a new strategic development of 1,500 new homes in north-east Thatcham, a significant decrease from the 2,500 previously proposed."</p> <p>"We have cut the proposals for any future development in north-east Thatcham by 1,000 homes, which is a big change." (<i>the full press release is copied below - see attached document Thatcham Town Council_Press Release Dec 22</i>)</p> <p>The emerging draft Local Plan (December 2020) stated at paragraphs 6.12 and 6.13:</p> <p>"This includes the strategic allocation at North West Thatcham for up to 2,500 homes where delivery of at least 1,250 dwellings is anticipated within the plan period."</p> <p>The Local Plan Submission draft (January 2023) states in Policy SP17: "The site is to be allocated for approximately 1,500 dwellings which will be completed within the period of the plan.";</p> <p>at paragraph 6.22: "additional housing supply on newly allocated sites ... includes the strategic allocation at North West Thatcham for up to 1,500 homes within the plan period.";</p> <p>and at paragraph 6.61: "Delivery of approximately 1,500 dwellings is anticipated within the plan period.</p> <p>Policy SP17 is silent on the possibility of additional dwellings following the plan period.</p> <p>Policy SP17 also states: "The Thatcham Strategic Growth Study provides guiding principles for the delivery of the site therefore proposals will demonstrate that these guiding principles have been positively responded to."</p> <p>The Thatcham Strategic Growth Study was prepared for a site allocation of 2,500 dwellings, and has not been updated following the decision. It could there be interpreted that one of the 'guiding principles' of the Growth Study is a final size for the development of 2,500 dwellings.</p> <p>Even worse, an applicant for planning permission might 'cherry pick' a site allocation of up to 2,500 dwellings with the infrastructure provisions in Policy SP17 that are based on the needs of 1,500 dwellings.</p> <p>The wording of Policy SP17 is therefore unclear and ambiguous on the expected final number of dwellings on the North East Thatcham site. It is therefore not evident how a decision maker (whether West Berkshire Council or the Planning Inspectorate in case of an appeal) would interpret the policy.</p> <p>Paragraph 16 of the NPPF (July 2021) states that: "Plans should: d) contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals". Policy SP17 is therefore not in accordance with Paragraph 16 of NPPF, and is therefore not consistent with national policy.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>N/A</p>
<p>4. Proposed Changes</p>	<p>To make this aspect of policy SP17 sound, it must be clarified that the 1,500 dwellings is the final number when development is completed, and not the number completed during the plan period.</p> <p>Supporting evidence needs to be provided to justify this number.</p> <p><i>NOTE: This comment is without prejudice to other representations by the Town Council on Policy SP17.</i></p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>Thatcham Town Council is the principal representative body of the community of Thatcham, which is the location of only new strategic site allocation in the draft Local Plan. The suitability of this site for development is reliant on having adequate infrastructure. However, the regeneration that was promised in the current Local Plan has not materialised, and would not be delivered through the policies in the</p>

	<p>draft Local Plan. The Town Council can provide local insight to the examination about Thatcham, and particularly on the substantial deficit of infrastructure in the locality. It would also be happy to elaborate on its other concerns about the current proposals for the North East Thatcham Strategic Site Allocation, as described in these representations.</p> <p>The Town Council anticipates that changes necessary to the draft Local Plan in relation to site allocations are greater than could be addressed through 'main modifications'. If, however, the Inspector is minded to consider recommending 'main modifications' to policy SP17 and related matters in other Policies, it would welcome the opportunity to provide its perspective on what modifications would be required.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	<p>Thank you for opportunity to feedback and hope our comments are acted on</p> <p>The Plan appears to be based on an outdated concept of housing targets. These targets were previously binding, but recent policy changes announced by Housing Secretary Michael Gove mean they are now advisory.</p> <p>West Berkshire Council therefore had the opportunity to set their own more enlightened target of allowing building only on brownfield, previously developed land, of which there are over 45 hectares in the district,</p>

	<p>which could accommodate over 2,500 homes. Given that so many GP surgeries are no longer accepting new patients, and other similar examples of overstretched local resources, 2,500 new homes would be a stiff target to meet but at least one based on the logic of not removing farmland from food production or harming the countryside in general.</p>
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No</p>	Yes
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	No

<p>Please give reasons for your answer</p>	<p>Policy SP12 - Approach to Housing Delivery</p> <p>This policy states that 8,721 to 9,146 net additional homes are required for the period 1 April 2022 to 31 March 2039, equating to 513 to 538 dwellings per annum. It is noted that the higher figure provided does not constitute a ceiling or cap to development. New homes will be located according to policies SP1, SP3 and DM1. It is important for the council to ensure that the reference to the housing target figure not being a “ceiling or cap to development” is retained in the policy. This is because, this is a positive message to send out, whilst there is a nationally recognised shortage of housing in the UK and any policy that seeks to facilitate additional housing provision at this time is to be encouraged.</p> <p>The policy states that new housing will be focused in and adjoining the larger settlements, including the largest and most sustainable settlement of Newbury. Therefore, a development of 31 dwellings on land at NCGC, on the eastern edge of Newbury, will comply with policies SP1 and SP3, which will enable housing to be provided to meet the council’s housing requirements, as set out in policy SP12. The proposed dwellings will make a valuable contribution towards the housing needs of the district. The allocation of land on the edge of Newbury at NCGC will comply with this policy, by helping to provide much needed new housing in a sustainable location, where the impacts of development can be satisfactorily mitigated.</p> <p>Policy SP12 – Approach to Housing Delivery is supported. However, it is considered that the text should not be amended to remove reference to the delivery of housing over and above the “target figure” of 538 dwellings per annum.</p> <p><i>[For Table 2 see attachment 'PS1298 Opus Works (NCGC & Chartfield) Table 2']</i></p> <p>Paragraph 6.12 states that the requirement of 9,146 dwellings minus the supply of 7,337, means that sites for a further 1,809 homes need to be found. In addition, there needs to be some built-in flexibility to allow for phasing issues and to allow for non-delivery, particularly of larger sites, which need a great deal of up-front investment in roads and other infrastructure. Therefore, it is important to make it clear that the current shortfall of 1,809 dwellings should be a minimum and not a ceiling or a cap to development, as required by policy SP12 (see above).</p> <p>It is likely that larger sites identified in the Local Plan will have some problems with delivery. It is unlikely that they will deliver the housing numbers predicted in the suggested timescales, because all larger sites encounter issues with such matters as site assembly, ownership and title issues, capital funding, infrastructure costs and delivery, planning permissions and legal undertakings, such as section 38, 106 and 278 agreements. Some larger sites, such as North East Thatcham, are also the subject of vehement objections from residents and scrutiny by Full Council and may not actually come forward in the numbers identified in the LPR during the period to 2039, particularly as sales enquiries and corresponding build rates start to recognisably decline. Overall, it should be expected that the larger sites will not deliver the housing numbers needed in a timely fashion and there is a real need for more medium-sized and smaller sites, of less than 100 dwellings, to help to fill the gaps. Smaller sites can be delivered in short time</p>

	<p>frames, as they do not have the depth of issues that the larger sites have. Therefore, the council should allocate more smaller sites to ensure that housing needs are met in the short to medium-term.</p> <p><i>Table 2 and Paragraph 6.12 – Housing Supply at March 2022 is supported. However, it is considered that it should be made very clear that the current shortfall of 1,809 dwellings is a minimum provision and not a ceiling or cap on development.</i></p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	
4. Proposed Changes	<i>It is considered that it should be made very clear that the current shortfall of 1,809 dwellings is a minimum provision and not a ceiling or cap on development.</i>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	To enable the Local Plan to recognise the further assistance needed for rural business and leisure facilities and to underpin a robust mechanism to allow enabling development to come forward to help realise this, where appropriate.

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
Please give reasons for your answer	<p>The policy is unsound as it does not provide the necessary clarity required of a policy as set out in paragraph 16 of the NPPF as well as failing to take account of the unmet needs of a neighbouring area as required by paragraphs 11 and 61 of the NPPF.</p> <p>Housing needs</p> <p>The Council state that provision will be made for between 8,721 and 9,146 new homes over the plan period, between 513 to 538 dwellings per annum. This range is based on the minimum required using the standard method and that minimum plus an additional 5% in order to support the government objective of boosting the supply of homes. The Council suggest in paragraph 2.32 of the Housing Background Paper that the use of a range is common practice. The HBF would disagree and consider the use of a range to be inconsistent with the NPPF.</p> <p>Whilst the HBF supports Councils that seek to boost the supply of homes the use of a range does not provide the necessary clarity, as required by paragraph 16 of the NPPF, as to the Council's annual housing requirement against which delivery will be measured. It could also create confusion as to the application of the 5% buffer required, as set out in paragraph 74 of the NPPF, to provide flexibility in the supply of homes and provide choice and competition in the market for land. The Council needs to be clear in policy what the minimum requirement is and what will be supplied, including any buffer. To confuse the two will just create difficulties the assessments of five-year land supply on any appeals that are brought forward after its adoption.</p> <p>Unmet housing needs</p>

The Council refers to Reading's unmet housing need of 230 dwellings in paragraph 6.5 of the Local Plan. However, no mention is made as to how this unmet need will be met with the statement of common ground only stating that this will be met within the West of Berkshire HMA. The NPPF is clear at paragraph 61 that the unmet needs of neighbouring area must be taken into account when establishing the number of homes to be planned for. Given that the Bracknell Forest Local Plan, that has recently been through its examination in public, has not included any additional supply to address the shortfall in Reading it falls to either Wokingham or West Berkshire to include it within their housing requirement. The Council has had a number of years to ensure this relatively small amount of additional supply is addressed and it should have been included either wholly or in part within the Council's housing requirement.

Instead, the Council are looking to push back the delivery of these homes. The Housing Background Paper states at paragraph 2.24 that distribution of unmet needs will be done through a local plan review before the need arises. However, Planning Practice Guidance (PPG) states that "Inspectors will expect to see that strategic policy making authorities have addressed key strategic matters through effective joint working, and not deferred them to subsequent plan updates ..." which therefore requires these needs to be addressed in this local plan not a future update of this plan or the Reading Local Plan. It must also be noted that given the physical constraints faced by Reading it is unlikely that a review will address these needs in future, it is more likely that unmet housing needs in Reading will grow and will need to be addressed in West Berkshire and the other authorities surrounding Reading.

Affordable housing

As the Council will be aware the local housing needs assessment (LHNA) is the starting point and that there may be circumstances where the Council must plan for a higher level of housing needs. One such circumstance, as highlighted in paragraph 2a-024 of PPG, is where increased housing delivery would help deliver the required number of affordable homes. The Council's evidence indicates that there is a need for at least 330 affordable and social rented homes per annum.

This is roughly 60% of the Council's housing requirement. Given that the principle mechanism for the delivery of affordable homes is through the allocation of market housing there is justification for adopting a higher housing requirement.

Housing Supply

Whether or not the Council is meeting its housing needs over the proposed plan period is dependent on the requirement. Based on the upper end of the range the Council is not meeting its housing needs with a small shortfall of 89 homes. Using the minimum requirement of 513 there is small buffer of 336 homes over the plan period, circa 4% of total need. As such there is very limited flexibility in supply and no certainty that needs will be met over the plan period. This is a very small buffer in terms of overall supply and as such the ability of the plan to show that needs can be met in full across the whole plan period will be at risk from changes in delivery rates on any sites that deliver towards the end of the plan period. Given the reliance on delivery in the second half of the plan period from the strategic allocation at North East Thatcham and development of windfall sites a more substantial buffer in overall supply would provide greater certainty that the plan is deliverable over the plan period.

As to the degree of buffer required it is not possible to provide a definitive answer. The size of the buffer required to provide the necessary flexibility will depend on the nature of the supply coming forward across the plan period. A greater reliance on a few small sites will need a higher buffer between needs and supply. With regard to the West Berkshire Local Plan the HBF would recommend that a buffer of at least 15% is included to ensure the plan meets housing needs in full.

The HBF are also concerned that the five-year land supply on adoption in 2024/25 is marginal against either the upper or lower range. On the upper requirement of 538 dpa the Council will have a land supply of just 5.04 on adoption and a 5.38 using the 513 dpa requirement. This is marginal and could see the Council not having five-year land supply on adoption should there be changes to the delivery expectations in any of the allocated sites. In order to provide a more robust five-year land supply in the early years of the local plan it will be important for the Council to revisit its land supply and seek to include more small and medium sized sites that will deliver earlier in the plan period. This would also help to ensure that the Council ensures that at least 10% of the housing requirement is delivered on identified sites of less than one hectare. At present it is not clear that this requirement in paragraph 69 of the NPPF has been achieved with the plan identifying just 65 homes coming forward on allocated sites that are less than one hectare. The HBF would therefore recommend that additional small and medium sized sites are allocated to meet the requirements of the NPPF and provide a more secure five-year housing land supply on adoption.

Windfall

The Council have concluded that at least 1,958 homes will come forward on windfall sites – around 20% of overall supply. Firstly, we would suggest that rather than rely on this level of windfall the Council seeks to allocate more small sites in order to meet the requirement set out in paragraph 69 of the NPPF. The proactive identification and allocation of such sites is a key part of plan making that was included in the NPPF to provide more support to SME house builders who rarely have the security of sites being allocated through the local plan. A thriving SME sector is key to delivering a mix of homes and ensuring a robust supply in the early years of any plan as this sector will bring forward sites rapidly once a plan is adopted.

With regard to the level of small site windfall the HBF would suggest that there is a risk that the evidence could overstate the how many homes will come forward on such sites. The evidence supporting this level of supply is set out in section 3e of the Housing Topic Paper with table 3.1 indicating that on average 140 small sites came forward through windfall each year. However, this is a long-term average and the HBF is concerned that this may well be a declining source of supply given the high average rates in previous years. For example, over the last five years small site windfalls have delivered on average 113 dwellings each year. Whilst there is evidence to support a small sites windfall allowance, we would recommend that a 20% reduction is made reflect the lack of certainty of this source of supply at the proposed rate.

	The HBF agree with the Council's decision not to include larger and medium sized sites as part of any windfall allowance. There is no certainty as to the when or if these types of sites will come forward over the plan period. It is also the case that large windfalls that have been developed previously are similar to the types of sites that are allocated in the local plan and a such are far less likely to come forward. Their inclusion would in effect double count their delivery in the proposed trajectory.

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>(same comments submitted under Policy SP17 - ref: PS1318)</p> <p>Housing allocation for North East Thattham</p> <p>The draft Local Plan was approved to move to Regulation 19 Consultation by a meeting of West Berkshire Council on 1st December 2022. This approval was given on the basis that the size of the development when complete would be approximately 1,500 dwelling. The Council's press release on this decision stated:</p> <p>"Councillors allocated a new strategic development of 1,500 new homes in north-east Thattham, a significant decrease from the 2,500 previously proposed."</p> <p>"We have cut the proposals for any future development in north-east Thattham by 1,000 homes, which is a big change."</p> <p>The emerging draft Local Plan (December 2020) stated at paragraphs 6.12 and 6.13: "This includes the strategic allocation at North West Thattham for up to 2,500 homes where delivery of at least 1,250 dwellings is anticipated within the plan period."</p> <p>The Local Plan Submission draft (January 2023) states in Policy SP17: "The site is to be allocated for approximately 1,500 dwellings which will be completed within the period of the plan."; at paragraph 6.22: "additional housing supply on newly allocated sites ... includes the strategic allocation at North West Thattham for up to 1,500 homes within the plan period."; and at paragraph 6.61: "Delivery of approximately 1,500 dwellings is anticipated within the plan period. Policy SP17 is silent on the possibility of additional dwellings following the plan period."</p>

	<p>Policy SP17 also states: “The Thatcham Strategic Growth Study provides guiding principles for the delivery of the site therefore proposals will demonstrate that these guiding principles have been positively responded to.”</p> <p>The Thatcham Strategic Growth Study was prepared for a site allocation of 2,500 dwellings, and has not been updated following the decision. It could there be interpreted that one of the ‘guiding principles’ of the Growth Study is a final size for the development of 2,500 dwellings.</p> <p>Even worse, an applicant for planning permission might ‘cherry pick’ a site allocation of up to 2,500 dwellings with the infrastructure provisions in Policy SP17 that are based on the needs of 1,500 dwellings.</p> <p>The wording of Policy SP17 is therefore unclear and ambiguous on the expected final number of dwellings on the North East Thatcham site. It is therefore not evident how a decision maker (whether West Berkshire Council or the Planning Inspectorate in case of an appeal) would interpret the policy.</p> <p>Paragraph 16 of the NPPF (July 2021) states that: “Plans should: d) contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”. Policy SP17 is therefore not in accordance with Paragraph 16 of NPPF, and is therefore not consistent with national policy.</p> <p>NOTE: as stated in other representations, I believe that the number of 1,500 homes needs to be reviewed. This representation only addresses the clarity of the wording, and not the number.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	N/A
<p>4. Proposed Changes</p>	To make this aspect of policy SP17 sound, it must be clarified that the number of dwellings defined in the second paragraph of the Policy is the final number when development is completed, and not just the number completed during the plan period.
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
<p>5. Independent Examination</p>	If it would assist the examination.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	On the scope of the Regulation 18 Consultation we commented that we do not agree with the proposed policy on the basis that the housing target is insufficient. We note that the Regulation 19 Draft Local Plan has further lowered the housing target. Nevertheless, the housing provision set out under Policy SP12 is consistent with the Council's evidence base, as detailed in the Housing Background Paper (January 2023). This is also consistent with the standard method figure.

	Notwithstanding the above, the Housing Background Paper (January 2023) advises that housing affordability remains a key issue in West Berkshire, with the Government's 2021 statistics showing the median house price in the district (£380,000) being 9.73 times the average annual earnings (para 6.23). In light of the unaffordability of housing within the District, the Council should consider the wider social and economic benefits of housing provision in excess of the standard method figure.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	
4. Proposed Changes	In light of the unaffordability of housing within the District, the Council should consider the wider social and economic benefits of housing provision in excess of the standard method figure. This would ensure that the Plan is sound by reason of being 'Justified'.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes

Please give reasons for your answer	<p>Housing Requirement</p> <p>3.9 Policy SP12 confirms that provision will be made for 8,721 to 9,146 net additional homes in West Berkshire for the period 1 April 2022 to 31 March 2039; 513 to 538 dwellings per annum.</p> <p>3.10 The provision of a range is misleading and confusing. In accordance with paragraph 61 of the NPPF, the current standard method calculation requires provision of a minimum of 513 dwellings in the plan period (unless exceptional circumstances apply – these are not relevant to West Berkshire), and para 74 of the NPPF requires an additional 5% buffer to ensure choice and competition in the market. This equates to 538.65 dwellings.</p> <p>3.11 This should be the minimum starting point for provision of housing. This is implied in the Policy, with reference to the 'target figure of 538 dwellings per annum does not constitute a ceiling or cap to development'. Strictly speaking, the figure should be rounded up to 539 dwellings.</p> <p>Affordable Housing</p> <p>3.12 The local housing needs assessment (LHNA) and application of the Standard Method is the starting point and that there may be circumstances where the Council must plan for a higher level of housing</p>

needs. Paragraph 2a-024 of PPG advises that 'an increase in the total housing figures included in the plan may need to be considered where it could help deliver the required number of affordable homes'.

3.13 The Council's evidence indicates that there is a need for at least 330 affordable and social rented homes per annum. This is roughly 60% of the Council's housing requirement. The principal mechanism for the delivery of affordable homes will be through allocation of sites for market housing. There is justification for adopting a higher housing requirement on this basis and a related identification of additional housing sites in suitable locations.

3.16 The LPR proposals for providing new development at Newbury are focussed on the long-standing allocation at Sandleford Park, on greenfield land to the south of Newbury in accordance with Policy SP16. In addition, smaller scale developments will include redevelopment of previously developed land. There are no additional greenfield allocations put forward.

3.17 Councils are required to maintain a five year supply of housing land, and more specifically, in accordance with paragraph 68 of the NPPF policies should identify 'a supply of (a) specific, deliverable sites for years 1 to 5 of the plan period'.

3.18 The deliverability of allocated sites are key to ensuring sites are coming forward as anticipated. There is currently an over-reliance on sites that have not delivered and are therefore retained allocations from the current Core Strategy, or large strategic sites where delivery is likely to be slow, to meet housing needs, particularly in the short-term.

3.19 There are alternative available and deliverable sites adjacent to Newbury that should be considered in the selection of proposed residential allocations to meet the identified housing need in the short to medium term. The planning merits of the Site at Enborne Street, Newbury are considered in Section 2 of these representations.

3.20 The Spatial Strategy recognises that the allocation of greenfield sites is required alongside brownfield development in order to maintain a five year supply of housing land.

3.21 The Council's housing supply position as of 31st March 2022 takes into account the Core Strategy Sandleford Park Strategic Site amongst other sites allocated in the current Plan period, some of which are not being taken forward as proposed allocations as they are at an advanced stage of construction, and existing planning commitments on unallocated sites.

3.22 This totals 7,337 dwellings. The annual requirement of 538 new dwellings results in an additional need of 1,809 dwellings. As outlined above, Policy SP12 acknowledges that the 538 dwellings are not a ceiling nor a cap. There is no specific housing need identified for Newbury within the housing figures.

Summary of Implications for meeting Housing Needs

3.37 It is considered the LPR does not propose sufficient sites that can come forward in the short to medium term to ensure sufficient housing delivery in the first five years of the LPR. In order to provide a more robust five-year land supply in the early years of the LPR it will be important for the Council to revisit its land supply and seek to include more small and medium sized sites that will deliver earlier in the LPR period.

3.38 The allocation of the site at Enborne Street for up to 70 dwellings is ideally located to fulfil this role. *[For details of the site at Enborne Street see Rep ID: PS1652]*

5. Summary and Conclusions

5.1 These representations have been prepared by Turley on behalf of Hathor Property in respect of the West Berkshire Local Plan Review 2039 Proposed Submission (Regulation 19) Consultation (January 2023).

5.2 The LPR does not identify sufficient housing to meet identified needs, nor is their sufficient flexibility should circumstances change. The plan period should be extended by a year, and some provision for meeting the unmet needs of Reading should be factored in.

5.3 Equally significantly, even assuming that the planned housing provision within the LPR was appropriate, there is considerable doubt that the LPR will provide for a sufficient supply of housing in the first five years of the LPR period.

5.4 The scale of the strategic allocation at North-East Thatcham is acknowledged as providing the potential for securing infrastructure and facilities alongside development. However, this is unlikely deliver any housing in the short-medium term, and certainly within the five year period. Equally, the Council have carried forward long-standing allocations from the previous adopted Core Strategy and there

	remains significant uncertainty about their deliverability, again especially within the first five years of the LPR.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	No
Please give reasons for your answer	<p>Duty to Cooperate</p> <p>3.5 At paragraph 6.5 of the LPR reference is made to the unmet housing need of 230 dwellings as identified within the Reading Local Plan period to 2036. However, no mention is made as to how this unmet need will be met with the statement of common ground between the Local Planning Authorities, only stating that this will be met within the West of Berkshire HMA</p> <p>3.6 The NPPF is clear at paragraph 61 that the unmet needs of neighbouring area must be taken into account when establishing the number of homes to be planned for. Given that the Bracknell Forest Local Plan, that has recently been through its examination in public, has not included any additional supply to address the shortfall in Reading it falls to either Wokingham or West Berkshire to include it within their housing requirement. The Council has had a number of years to ensure this relatively small amount of additional supply is addressed and it should have been included either wholly or in part within the Council's housing requirements.</p> <p>3.7 Conversely, the Council are looking to push back the delivery of these homes. The Housing Background Paper states at paragraph 2.24 that distribution of unmet needs will be done through a local plan review before the need arises. However, Planning Practice Guidance (PPG) states that "Inspectors will expect to see that strategic policy making authorities have addressed key strategic matters through effective joint working, and not deferred them to subsequent plan updates ...".</p> <p>3.8 The unmet need should be addressed in this LPR. This unmet need is likely to be exacerbated, given the physical constraints faced by Reading it is unlikely that a review will address these needs in future. It is more likely that unmet housing needs in Reading will grow and will need to be addressed in West Berkshire and the other authorities surrounding Reading.</p>
4. Proposed Changes	
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	Our position is that the site should be included as a proposed residential allocation and that the LPR does not provide enough sites to provide sufficient housing supply.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes

Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No

<p>Please give reasons for your answer</p>	<p>3. Regulation 19 Proposed Submission document representations</p> <p>3.1 We generally support the draft Local Plan and the proposed strategy for the Plan period, including the spatial approach to development and its approach to housing numbers. However, we have some concerns about the lack of flexibility in the Plan, the failure of the Plan to allocate sites in accordance with its identified spatial framework, and inadequacies / inaccuracies in its evidence base in relation to our client's site.</p> <p>3.2 We are particularly mindful that Councils are required to maintain a rolling five-year supply of housing land, and consider that this may be a challenge for the Council due to the sites it has selected for allocation. The deliverability of these identified allocated sites are key to ensuring sites are coming forward as anticipated in the Plan.</p> <p>3.3 There is currently a continued reliance on sites that have not yet delivered and are therefore retained allocations from the current Core Strategy and Site Allocations DPD; or large strategic sites where delivery is likely to be slow.</p> <p>Windfall allowance</p> <p>3.26 We note that the draft Plan makes provision for 140 windfall dwellings per annum. That is not an insignificant figure, and although it is acknowledged that there has been some past experience of windfalls at that level, it is apparent from the limited brownfield site availability that in order to reach these figures each and every year over the plan period will be challenging.</p> <p>3.27 To exemplify the level of existing commitments in that regard, paragraph 6.16 of the draft Plan notes that "<i>Existing permissions for housing on non-allocated sites will also contribute to supply. Over 1,958 units on windfall sites, those not specifically identified in the development plan, already had permission or prior approval for permitted development at 31 March 2022.</i>"</p> <p>3.28 There is of course no guarantee that these 1,958 dwellings will be built out. The absence of evidence setting out the status of these PD conversion and other windfalls is concerning, given the Plan's reliance on them. We reserve the right to comment on these in detail in future, but for such a significant component of housing supply, the Council must be able to demonstrate delivery of ALL of these homes, as there is no buffer built into the Plan to accommodate non delivery.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	Local Plan Review complies with Sections 19 and 20 of the Planning and Compulsory Purchase Act 2004 (as amended)
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by	No

<p>the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>We welcome the Council's decision not to include demolitions or empty homes as contributing in some form to the housing supply, given that neither will be a significant source. However, concern is raised with the assumption of 1,949 dwellings coming from windfalls. Carter Jonas advocate that windfalls should not be included as a source of supply and should be seen as a bonus over the plan period as part of the Government's policy to substantially boost the supply of housing. Furthermore, it is considered that the Council's calculation for the windfall allowance is skewed owing to the long-term average period that has been used to inform the allowance. While there is evidence to support a small site windfall allowance, the calculation should be reduced to be more realistic of housing delivery from this source.</p> <p>Table 2 and paragraph 6.21 onwards of the Local Plan Review identifies the sources of supply to suggest that the overall cumulative total requirement is 9,146 dwellings and that there is an existing supply of 7,337 dwellings requiring a further 1,809 dwellings to be found. Policies SP13-15 provide additional housing supply on newly allocated sites of 1,720 dwellings (including the North East Thatcham allocation for approximately 1,500 dwellings) to be delivered within the plan period. Owing to the scale of the strategic allocations, the delivery rates from these sites will not materialise until the second half of the plan period. In the absence of a buffer for the possibility that windfalls may not arise, or extant permissions are not delivered, the housing requirement will not be met. This does not represent positive planning and is therefore unsound.</p> <p>Additionally, there is a concern that the authority's housing land supply will be on the cusp of five years at the time of the plan's adoption. In order to provide a more robust housing land supply in the early part of the plan period the Council should reconsider the sources of housing land supply and include more small and medium sized sites in the plan. This would assist in ensuring that the plan complies with NPPF paragraph 69 in that 10% of the housing requirement is delivered on identified sites of less than one hectare. Currently it is unclear whether the NPPF's requirement has been achieved therefore it is recommended that further residential allocations are made to ensure a more certain 5-year housing land supply exists on plan adoption.</p> <p><u>Unmet housing needs</u></p> <p>Furthermore, it is noted that Reading Borough Council have identified a shortfall of 230 dwellings that is anticipated to arise in the latter part of their current Local Plan period (the plan considers the period through to 2036) and it is understood that the shortfall was calculated against the now dated Berkshire Strategic Housing Market Assessment of February 2016. The agreed Statement of Common Ground with the local authorities that make up the Western Berkshire Housing Market Area (Bracknell Forest, Reading, West Berkshire and Wokingham) for the purposes of local plan making recognises the principle that Reading's need should be met within the West Berkshire area. Reading have identified that a 5-year review is required by 2024 and that it will need to consider how to deal with the housing needs generated by the standard methodology. The West Berkshire Housing Background paper confirms that:</p> <p><i>"Though the principle of meeting any unmet need within the HMA is accepted, the distribution of that unmet need within the HMA has not been agreed and will be subject to further review, through the plan-making process, before the need arises."</i> (Para 2.24 Housing Background Paper January 2023)</p> <p>Whilst the draft Local Plan Review reiterates NPPF Paragraph 61 that <i>"In addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for"</i> the housing provision of between 513 (local housing need) and 538 dwellings (local housing need plus 5% buffer as required by NPPF Paragraph 74) does not include for Reading's unmet need. It is therefore recommended that the housing number provision over the plan period should be between 528 and 554 dwellings per annum, 8,976 to 9,418 dwellings for the period 1st April 2022 to 31st March 2039.</p> <p>Whilst it is proposed that consideration of addressing Reading's housing shortfall will not take place until a future time, provision should be made now in the West Berkshire Local Plan Review to ensure that additional sites are planned for to meet this identified future need. West Berkshire's approach is contrary to NPPG paragraph 2a-010-20201216 as, in the knowledge of Reading's need, to ensure the plan is positively prepared, there should be provision in the West Berkshire Local Plan Review now to meet that need. Not allocating sites for Reading's need now renders the duty to cooperate futile as the cooperation has not resulted in a positively prepared plan with an effective outcome, i.e., accommodating Reading's housing shortfall. In addition, by deferring the allocation of sites to address Reading's unmet need renders the plan ineffective.</p> <p>Additionally, Carter Jonas would suggest that a buffer of additional sites is applied so that sufficient flexibility is included into the Plan to ensure the housing requirement and the economic aspirations of the plan can be met. The use of such a buffer is two-fold: a) to conform to national policy the housing requirement should be identified as a minimum (to ensure a boost in supply and to represent positive planning) it is prudent therefore for the Plan to seek to exceed that target; and b) a buffer will provide a balance against non-delivery or under delivery. It is considered therefore that the Plan should identify more sites.</p>

	<p>It is evident from the Housing Trajectory 2022/23 – 2038/39 (Housing Background Paper January 2023) that there is a significant shortfall anticipated in housing completions for the year 2026/27 owing to the lag for the strategic allocations to come through. Whilst there is an assumed recovery in completions for the period 2027 – 2032 anticipated to meet the housing requirement of 538 dwellings per annum (Local Housing Need 513 dwellings per annum plus NPPF required 5% buffer), it is noted that after 2032 the Council does not anticipate meeting its housing requirement for the remainder of the plan period. Furthermore, after 2036/37, the housing trajectory suggests that both the Plan's overall housing requirement and the annual requirement, which takes into consideration past / projected completions, will not be met. It is therefore considered that the Plan is unsound as it has not been positively prepared for the plan period.</p> <p>Advice from the Local Plan Expert Group recommends that a buffer of allocated sites should be set to around 20%. Therefore, the Plan as drafted should include for new residential allocations for at least around 2,171 dwellings over the plan period to ensure the housing requirement is met. This equates to a minimum of 646 dwellings per annum, against the 538 dwelling identified figure. If Reading's unmet need were included in the additional 20% calculation and spread across the plan period, the annual housing requirement would amount to 662 dwellings per annum.</p> <p>It is encouraging that the Council have responded to concerns raised at North East Thatcham (Policy SP17 North East Thatcham Strategic Site Allocation) in relation to environmental and highways impacts and given more consideration to the draft allocation by reducing the proposal from 2,500 dwellings at the Regulation 18 stage down to 1,500 dwellings at Regulation 19. However, the draft policy's supporting text suggests that further detailed studies need to be undertaken, including landscape and visual impact assessment in relation to potential impact on the AONB, suggesting that the site's capacity could be further reduced in this sensitive location through refined detailed assessment.</p> <p>In order for the assessed housing need over the Plan period to be fully realised it is recommended that additional residential sites are allocated to make up the likely shortfall created by this additional refinement. Whilst acknowledged by the SA (page 38), "<i>the [reduced] scale of the site will mean that more additional sites will need to be allocated across the district</i>". However, as the standard method illustrates a decreasing population, additional residential allocations have not been made.</p> <p>The district's decreasing population could be seen as an indicator that, owing to the district's house prices being higher than the average for England, people are choosing to live where it is more affordable elsewhere. This is likely to have an economic impact on the district through the inevitable 'brain drain' and the ever-increasing aging population of the district due to the authority's inability to retain the younger generations.</p> <p>In the absence of these additional technical studies and the time required to obtain a deliverable planning consent, it is unlikely that the 1,500 dwellings at North East Thatcham will be provided in the plan period. Therefore, additional sites should be allocated now to ensure that the Council's housing need is met in full over the lifetime of the Plan.</p> <p>It is noted that the evidence base for assessing the local housing need and demand consists of the Berkshire (including South Bucks) Strategic Housing Market Assessment (2016) and a slightly more recent sensitivity report of March 2018. The 2016 SHMA considered that the local housing need requirement was for an average of 665 new dwellings a year for the period 2013 to 2036 which was reduced by the 2018 sensitivity report to 600 dwellings per annum.</p> <p>Whilst the Local Housing Need Assessment is the starting point for plan-making, there may be circumstances where the Council must plan for a higher level of housing needs. The NPPG confirms at paragraph 2a-024-20190220 that "<i>An increase in the total housing figures included in the plan may need to be considered where it could help deliver the required number of affordable homes.</i>" The Council's evidence indicates that there is a need for at least 330 affordable and social rented homes per annum, which is approximately 60% of the council's housing requirement. Owing to the majority of the affordable homes being delivered through the allocation of market housing there is justification for a higher housing requirement.</p>

Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>Draft Policy SP12 explains that provision will be made for 8,721 to 9,146 net additional homes for the period 1 April 2022 to 31 March 2039. It is acknowledged that the target figure of 538 dwellings per annum (dpa) does not constitute a ceiling or cap to development. The target figure of 538 dpa is a 5% uplift on the local housing need (LHN), as calculated using the standard method.</p> <p>In this regard, we note that the Regulation 18 version of the West Berks LPR included a 10% buffer/uplift, but that this has been reduced to 5%, as set out within the Housing Background Paper, to provide a balance between boosting housing supply in the district while considering the limitations and constraints of a largely rural district (paragraph 2.33).</p> <p>The Council does not provide any justification that a 10% buffer/uplift (or greater) to the housing requirement could not be accommodated within the district without harm to those constraints. Indeed, none of the key environmental constraints (e.g AONB) in the district or the rural nature of the district preclude the principle of residential development (different to floodplain, Green Belt etc.), but instead will shape the form and direction of growth across the district via the broad spatial strategy. As such, there is no justification to identify such a reduction in housing growth during the plan period on this basis, particularly as there appear to be sufficient sites available in the HELAA to accommodate further growth. As such, it is considered that the level of housing currently proposed is insufficient to support the Government's objective of significantly boosting the supply of housing.</p> <p>It is considered that West Berkshire's housing target should be increased to between 564 - 616 dpa (i.e. a 10-20% buffer/uplift to the minimum LHN), which would equate to finding a supply of between 9,588 – 10,472 dwellings up to 2039. This level of housing will ensure sufficient flexibility to deliver the minimum local housing need, but also provides for choice and contingency to the market and reflect current and future demographic trends and housing market signals and affordability in West Berkshire.</p> <p>In respect of housing supply, it is concluded that to be positively prepared and sound, the LPR should be allocating more sites for housing over the plan period and we refer back to the comments above in respect of the settlement hierarchy and the council's approach to allocating new sites for development. It is considered that the LPR should be allocating more sites for housing over the plan period that is consistent with the broad spatial strategy, and noting that many available sites in the 'smaller villages' with a defined settlement boundary have been overlooked contrary to paragraph 79 of the NPPF.</p> <p>Conclusion</p> <p>In conclusion, The Wasing Estate have concerns over a number of the policies as drafted, and overall consider that the plan is not consistent with national planning policy, and particularly the council's strategy and approach in respect of new housing and employment development has not been fully justified. The LPR does not identify sufficient residential or employment sites to meet the district's housing and employment needs. Furthermore, as drafted a number of policies do not provide adequate flexibility and support to existing rural businesses to achieve a prosperous rural economy in West Berkshire. As a result, the Plan is not sound and should be modified to address the concerns in this letter prior to submission.</p> <p>Attachments:</p> <ul style="list-style-type: none"> • Appendix 1 - Reg 18 consultation BRIM1 and BRIM2 • Appendix 2 - Reg 18 consultation ALD5 • Appendix 3 - Letter relating to ALD5

<p>Please give reasons for your answer</p>	<p>Sandleford Park South (SPS)</p> <p>On behalf of our Client, Donnington New Homes (DNH), I write in response to the Council's current consultation on the emerging West Berkshire Local Plan Review 2002-2039.</p> <p>As the Council will be aware our Client controls land south of the existing Core Strategy allocation at Sandleford Park (Policy CS3). These representations follow the previous submission made by our Client in 2013 (for inclusion in the Strategic Housing Land Availability Assessment (SHLAA)); in 2017 in response to the Council's Call for Sites (HELAA); in 2018 in response to the Council's Local Plan Scoping Report and Sustainability Appraisal; later in 2018 in response to the Regulation 18 West Berkshire Local Plan Review to 2036; in November 2020 as an update to our original HELAA Call for Sites submission, and in February 2021 in response to the consultation carried out by the Council on its Regulation 18 Local Plan Review.</p> <p>Housing Need and Supply</p> <p>Paragraph 20(a) of the NPPF states strategic policies should set out an overall strategy for the pattern, scale and design quality of places, and make sufficient provision for, inter alia, housing (including affordable housing). On 22 December 2022 the Department for Levelling Up, Housing and Communities published for consultation proposed amendments to the NPPF. The transitional arrangements in the proposed revised Annex to the NPPF make it clear that the dWBLP will be assessed against the test of soundness as outlined in paragraph 35 of the NPPF published in July 2021. In other matters, until the proposed revisions to the NPPF are made, the dWBLP should proceed on the basis of existing national policy and guidance.</p> <p>Strategic Objective 2 of the Proposed Submission Plan is: -:</p> <p><i>"To provide a range of sites to ensure that the District's housing needs and aspirations are met by providing a range of market, affordable and specialist housing types, tenures and sizes in appropriate and sustainable locations."</i></p> <p>Policy S12 of the dWBLP sets out the minimum housing requirement for the Council as 513 dwellings per annum (dpa) for the for the period 1 April 2022 to 31 March 2039; resulting in a total requirement of 8,721 dwellings. The figure of 513 dpa is calculated using the Government's Standard Methodology (SM) as set out in the NPPF and the accompanying Planning Practice Guidance. The figure of 513 dpa corresponds with that calculated by Pegasus Group in accordance with the SM and latest available data. The Planning Practice Guidance (PPG) (<i>Footnote: Paragraph: 010 Reference ID:2a-010-20190220</i>) explains that the SM should be considered as a starting point and that the level of need should be informed by local conditions:</p> <p><i>" The government is committed to ensuring that more homes are built and supports ambitious authorities who want to plan for growth. The standard method for assessing local housing need provides a minimum starting point in determining the number of homes needed in an area. It does not attempt to predict the impact that future government policies, changing economic circumstances or other factors might have on demographic behaviour. Therefore, there will be circumstances where it is appropriate to consider whether actual housing need is higher than the standard method indicates."</i></p>

It goes onto outline circumstances where this may be appropriate:

.... include, but are not limited to situations where increases in housing need are likely to exceed past trends because of:

- growth strategies for the area that are likely to be deliverable, for example where funding is in place to promote and facilitate additional growth (e.g. Housing Deals);
- strategic infrastructure improvements that are likely to drive an increase in the homes needed locally; or
- an authority agreeing to take on unmet need from neighbouring authorities, as set out in a statement of common ground;

The West Berkshire Housing Needs Assessment Update (WBHNAU) prepared by Icen Projects Limited on behalf of West Berkshire Council in July 2022 concluded that there are at present no reasons to increase housing supply above that calculated using the Standard Method.

Housing Requirement Buffer

Policy S12 of the dWBLP expresses the housing requirement as a range, with an additional 5% above the LHN (rounded to 538 per annum) made to be in accordance with the Government's objective of significantly boosting the supply of homes as set out in the NPPF. Paragraph 6.10 of the dWBLP states that:

"The allocation of sites in the LPR aims to meet delivery of a higher number of homes in order to both boost supply and have some built-in flexibility. The upper end of the range is a target but should not be considered a maximum amount. It is not intended to be a cap on development that would otherwise be acceptable."

The inclusion of such a buffer helps to ensure that the LHN as a minimum is delivered within the Plan period. The inclusion of a buffer is supported in principle by Donnington New Homes. However, concern is raised as to the extent of the buffer planned for in the dWBLP. Although there is no national guidance regarding the extent of any buffer, it is common practice in local plans to have at least a 10% buffer to ensure the minimum housing requirement is met, should the sources identified in the Plan not come forward as expected.

The approach to housing delivery was assessed through the Sustainability Appraisal (SA) as part of the Plan making process and published alongside the dWBLP. As well as ensuring the Plan meets the NPPF's objective of boosting the supply of housing, the SA recognises the need for some flexibility above the LHN figure to take account any changes to the LHN and allow for phasing issues and an element of non-delivery of sites.

Two reasonable alternatives were considered in the SA, namely meeting the Local Housing Need (LHN) figure and LHN plus a buffer. The two reasonable alternatives were then subject to SA/SEA.

The Regulation 18 consultation considered a buffer of 10% to help to boost supply and provide Flexibility. However, in response to the comments made as part of the Regulation 18 consultation a buffer of 5% was also considered for the production of the Regulation 19 dWBLP. This lower buffer was considered on the basis that "it would also provide a degree of flexibility helping to provide flexibility and a boost to the supply, while taking into account the constraints seen across the district". These two options, along with the baseline LHN were then subject to SA/SEA.

All three options were assessed as having an overall positive effect against the SA objectives. However the LHN+10% buffer was assessed as having 'an overall positive effect with some significantly positive effects'. In particular, the LHN+10% buffer option would significantly help to support the economy.

The SA concluded that all three options would have a negative effect on two of the SA objectives:

- 5: Ensure that the character and distinctiveness of the natural, built and historic environment is conserved and enhanced, and
- 6: To protect and improve air, water and soil quality, and minimise noise levels throughout West Berkshire

However, in relation to the above objectives it was noted that with mitigation the impact should be neutral for all three options. It is therefore, surprising that the Council progressed on the basis of the lower buffer option of +5% for determining the housing requirement when there were no additional negative effects from the option of using the LHN+10% buffer, and indeed the higher figure would provide some additional significant positive benefits.

Unmet Needs of Reading

Paragraph 11b of the NPPF specifies that strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas.

The Reading Local Plan was adopted in November 2019 and includes a housing need of 16,077 homes (699 pa) for the period 2013-36, of which 230 (unmet need) are to be provided elsewhere in the Housing Market Area.

The Duty to Co-operate was introduced by section 33A of the Planning and Compulsory Purchase Act 2004 and the Localism Act 2011. It places a legal duty on local planning authorities, county councils and prescribed public bodies to work together on strategic cross boundary matters. The Localism Act states that the 'duty' requires that engagement should occur constructively, actively and on an ongoing basis during the plan making process and that regard must be given to the activities of other authorities where these are relevant to the local planning authority in question.

Two of the four tests of soundness of local plans (NPPF Paragraph 35) directly relate to the Duty to Co-operate: Plans must be:

- *Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development.*

• *Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.*

Planning Practice Guidance (PPG) at Section 61, paragraphs 09-28, includes specific guidance on the production, scope, and content of Statements of Common Ground. West Berkshire Council published a Duty to Co-operative Statement in January 2023. It refers to and includes a Statement of Common Ground (WBCSoCG) published in August 2021, and signed by representatives of Bracknell Forest, Reading, West Berkshire and Wokingham Councils.

The WBCSoCG refers to A Memorandum of Understanding that was originally signed by these four Berkshire authorities in October 2017. This recognised the level of unmet need and agreed that the West of Berkshire area should meet its housing needs in full. This was replaced by a revised Memorandum of Understanding signed in August 2021. The Western Berkshire authorities have agreed through the Memorandum of Understanding that Reading's existing unmet need of 230 dwellings (based on the current development plan) is a collective responsibility and will be met within the HMA through flexibility included in emerging plans. It goes on to say that no authority is required to increase the minimum housing requirement or identify specific sites. However, this agreement relates only to Reading's need as calculated by the SHMA, not by any alternative calculations of need, which will need to be subject to separate discussions.

The Memorandum of Understanding states the identified 230 dwellings unmet need is likely to affect the planned level of housing provision in the latter part of the plan period, from 2026 to 2036, and will not therefore need to be accommodated in the short term. There is no specific identification of site(s) to meet the identified 230 dwellings of the unmet need of Reading, nor inclusion within the housing requirement of any adjacent authority. Policy SP12 of the dWBLP therefore does not include any provision for meeting the unmet needs of Reading.

Paragraph 6.7 of the dWBLP addresses the needs of Reading as calculated using the SM:

"Reading has identified that a five yearly review is required by 2024 and that will need to consider how to deal with the housing needs generated by the standard methodology. Though the principle of meeting any unmet need within the Western Berkshire Housing Market Area (HMA) is accepted, the distribution of that unmet need within the HMA has not been agreed and will be subject to further review, through the plan-making process, before the need arises."

A review of the Reading Local Plan should take place by November 2024. The Reading Local Development Scheme (LDS) has not been updated from that published in November 2016 and there is no indication of a timetable to review the Local Plan. Given the lack of progress since the adoption of the Reading Local Plan in 2019 the prospect of a new Plan being adopted by November 2024 is extremely unlikely. Furthermore, housing delivery within Reading has fallen below the expected amount. Between 2013 and 2022 a total of 5,853 dwellings were completed in Reading Borough as compared to the annualised total of 6,201 representing a shortfall of 348 homes.

Reading is identified as a 35% uplift urban local authority in the 2020 revised Standard Methodology for Housing Need. The current figure for Reading based on the Standard Methodology is 907 dpa; an increase of 32% on the adopted Local Plan figure. If this is applied to the remainder of the Plan period 2022 to 2036, the need increases by 3,052 above the Adopted Plan figure.

The approach of the Western Berkshire authorities is to challenge the extent of the housing needs of Reading and to delay any resolution to meeting that need for as long as possible.

As an unmet need was identified in the 2036 Reading Local Plan, it is highly likely that a continued unmet need will be identified for the subsequent Review of the Reading Local Plan, particularly given the higher local housing need figure outlined above. Once established in the Revised Reading Local Plan, the adjacent authorities will need to accommodate this need in their own local plan reviews. In the case of West Berkshire this will not be until 2028 at the earliest and more realistically 2030 at best. In total therefore a period of 8 years will have elapsed since the housing need was established before it is effectively met. The total shortfall would be 1,557 homes over that period.

The West of Berkshire Authorities should be planning now to meet the future unmet needs of Reading Borough, including a realistic assessment of the proportion that can be met within West Berkshire, rather than deferring this contrary to the requirements of paragraph 35c of the NPPF. The dWBLP should be flexible enough to accommodate, at least in part, some of that unmet need.

Housing Delivery

The Council's Five Year Housing Land Supply Statement (November, 2022) claims a 6.4 year supply against the LHN figure of 513 dpa for the 5 year period commencing at April 2022. It should be noted that none of the proposed new allocations in the dWBLP are forecast by the Council to commence before April 2027. However, as the Plan is unlikely to be adopted before April 2024 it is necessary to assess the likely five year housing land supply at that point.

The housing trajectory presented in the Housing Background Paper shows there will be a nominal shortfall of 434 dwellings against the housing requirement of 538 + 5% buffer (*Footnote: As per paragraph 74 of NPPF*) for the period 2024 to 2029 before any oversupply in the first two years (*Footnote: 'Oversupply' 2020-22 = 1,177*) of the Plan period are taken into account, resulting in a 4.23 year supply. Should the oversupply be accounted for across the remaining plan period (*Footnote: The inverse 'Liverpool' method*) the shortfall would reduce to 61 and result in a 4.89 year supply. However, if the shortfall is accounted for in the first five years of the plan following its adoption (*Footnote: The inverse 'Sedgefield' method*) there would be a surplus of 684 dwellings and a 5 year supply of 6.21 years.

Whilst it currently falls to a matter of planning judgement as to which of these three approaches should be used, it is clearly open to a decision-maker to conclude that at the point of adoption the Council will be unable to demonstrate a five-year land supply. Therefore, additional sites capable of delivering early in the plan period would ensure that a five year land supply will be able to be demonstrated on any basis.

Housing Needs and Supply Conclusions

	<p>The above analysis highlights shortcomings in respect of housing provision in the dWBLP as follows:-</p> <ol style="list-style-type: none"> 1. an insufficient buffer to allow for flexibility and ensure the LHN is met in full over the Plan period, 2. a higher housing requirement by increasing the buffer can be made with no additional negative affects against the Sustainability Appraisal objectives, and indeed would provide additional positive benefits 3. the current unmet needs of Reading are not adequately provided for, 4. the likely future unmet needs of Reading should be planned for now, and the dWBLP should include flexibility to allow for the provision of that need as part of the Duty to Co-operate, 5. there is a clear case for an uplift to the housing provision to account for the identified affordable housing needs of the area, and 6. a potential shortfall in the five year housing land supply from the intended date of adoption of the plan if the oversupply is not accounted for in the five years following adoption
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	No

2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	<p>HELAA sites for previously developed land</p> <p>Paragraph 119 of NPPF states: "Strategic policies should set out a clear strategy for accommodating objectively assessed needs, in a way that makes as much use as possible of previously-developed or 'brownfield' land."</p> <p>Paragraph 6.20 of the draft Local Plan states: "Any future windfall sites of 10 units or more are not included in the calculations of future supply, which introduces flexibility and means that any allocations of medium or large sites within settlement boundaries will not result in any double-counting."</p> <p>The availability of larger sites will vary. The cut-off of 10 units is arbitrary, and not based on proportionate evidence for each site. It also appears to exclude such sites from inclusion in the brownfield register, or from being included in the Local Plan as a non-strategic policy.</p> <p>This approach to calculation of future supply will artificially reduce the estimation of the contribution that will be made from previously-developed or 'brownfield' land, and therefore artificially inflate the estimated requirement for homes on developments on greenfield sites.</p> <p>This approach will skew planning decisions towards development on greenfield sites, and away from brownfield sites – especially as the brownfield sites will not be identified though non-strategic policies in</p>

	the local plan, or perhaps even by not being included in the brownfield register. This is contrary to the policies of NPPF. One site that appears to have suffered from this flawed approach is THA21; Newbury Leisure Park, Lower Way, Thatcham.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	N/A
4. Proposed Changes	The assessment of availability of sites on previously developed land should be assessed individually, rather than using an arbitrary upper limit of ten units.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	If it would assist the examination.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>We note that this section describes how 513-538 dwellings per annum will be provided from existing planned developments, windfall within settlement boundaries, the defined sites and allocations within named neighbourhood plans. Whilst we understand these numbers are not a limit, it is good to see that no further development is necessary outside settlement boundaries to meet the anticipated housing need and that the plan delivers the anticipated need. It is also reassuring to see that windfall sites of 10 units or more are not included in the calculation of future supply, so there is no need for large-scale development within settlement boundaries.</p>

<p>Please give reasons for your answer</p>	<p>Context: Background to these representations</p> <p>These representations into the West Berkshire Local Plan Review 2022-39 consultation (R19 LPR) are submitted by TOWN on behalf of the landowners of Land East of Pincents Lane, categorised as TIL13 in the West Berkshire Housing & Economic Land Availability Assessment, HELAA.</p> <p>The site is wholly owned by two landowners:</p> <ul style="list-style-type: none"> • U+I (Pincents Lane) Ltd; a wholly owned subsidiary of the U+I Group, itself now owned by Land Securities, the UK's largest Real Estate Investment Trust – owing around 86% of the site; and • Alasdair Barron, Barbara Barron and Cilla Platt – who together own around 14% of the site. <p>The extent of the site and respective landownerships is shown in the plan at Appendix 1.</p> <p>The majority of the site (shown in dark green in the plan at Appendix 1) is a former ninehole golf course which closed in the 1990s. The remainder is used for grazing by horses.</p> <p>These representations are submitted by TOWN, a multiple award-winning developer and development manager. The professional team which helped prepare the representations comprises:</p> <ul style="list-style-type: none"> • Tetlow King – Affordable Housing Advisers; • Pell Frischmann – Highways and Transport Planning; • Civic Engineers – Civil Engineering, specifically flood risk; • Node – landscape and masterplanning. <p>Approach to Housing Delivery</p> <p>It is recognised that R19 draft policy SP12 provides for the provision of the Local Housing Need (LHN) figure as a minimum – and the calculation of LHN includes an adjustment for market factors. Nevertheless, an increase in the suggested buffer from 5% to 10% would assist in addressing the widening affordability challenge in West Berkshire in general, particularly adjacent to Reading itself.</p> <p>Providing a mix of sites</p> <p>NPPF paragraph 69 notes that “Small and medium sized sites can make an important contribution to meeting the housing requirement of an area, and are often built-out relatively quickly.” Sites in the eastern part of the WBC area, which are free of infrastructure or planning constraints, should therefore be at a premium to offset both the bias towards large-scale sites in the western part of WB and to maintain the plurality of offer.</p> <p>It is noted from Table 2 that there is a heavy reliance on unallocated sites:</p> <ul style="list-style-type: none"> • Existing planning commitments on unallocated sites = 1,958 • Windfall allowance to 2039 = 1,949 units <p>Thus, a total of 3,907 units out of the total 7,337 or a total of 53% of dwellings are proposed to be met from sites which are not allocated in the plan. Such a high percentage is inappropriate and not in accordance with national policy. Additional sites should be allocated, particularly in the east of WB.</p> <p>Finally, it is noted that these unallocated and windfall sites tend to be smaller ones which offer only lower delivery rates for affordable housing by virtue of the national exemption and further representations against the reliance on a small number of large-scale urban extensions is made in the responses to policy SP13 below.</p> <p>Conclusion</p>

The reliance of the LPR on a few very large strategic developments in the west of West Berkshire, in the control of a small number of promoters and housebuilders, threatens its soundness measured against the tests set out in the NPPF. Namely, it cannot be said to be:

- 1 Positively prepared – since it is not informed by agreements with other authorities, and is not consistent with achieving sustainable development;
- 2 Justified – since it ignores the requirement for sites in the part of the Council area closest to Reading;
- 3 Effective – is not deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been deferred, as evidenced by the statement of common ground; and
- 4 Consistent with national policy – will not deliver sustainable development due to the encouragement of unsustainable travel patterns in relying on development in the west of WBC.

Outside of this imbalanced spatial strategy, challenges to the soundness of the R19 LPR have been demonstrated in respect of:

- A failure to meet the Duty to Co-operate, specifically in respect of addressing the shortfall of unmet need arising in Reading;
- A failure to assess the risk of flooding correctly through the SFRA and Sequential Test;
- An over-reliance on unallocated and windfall sites contrary to national policy;
- Concerns about the ability of the strategic sites at Sandford and North East Thatcham to deliver quickly and to the numbers proposed in the plan period;
- A fundamental need to allocate more sites in the east of WB, adjacent to Reading;
- A failure to allocate sites to meet the high demand for affordable housing across WB and in the east in particular; and
- Focusing growth reliant on the use of M4 junction 13 whilst capacity exists for development to be served at junction 12.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?
 * Yes
 * No

No

Please give reasons for your answer

Assessing soundness of the plan: The Duty to Co-operate

In order for the WBC LPR to be found sound, it must accord with the four tests of soundness set out in NPPF 2021 paragraph 35, which are:

- 1 Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs²¹; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- 2 Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- 3 Effective – deliverable over the plan period, and based on effective joint working on crossboundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- 4 Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national planning policy, where relevant.

And:

Where this relates to housing, such needs should be assessed using a clear and justified method, as set out in paragraph 61 of this Framework.

The Duty to Co-operate is a legal requirement under section 33A of the Planning and Compulsory Purchase Act 2004 for which guidance is set out in NPPF 2021 paragraphs 24-27.

The four LPAs which make up the Western Berkshire Housing Market Area, including WBC and Reading Borough Council, signed an updated Statement of Common Ground for Local Plan Making in August 2021.

That SoCG (paragraph 4.5) recognises a shortfall of 230 dwellings in total for Reading BC's area, or 10 per annum over the plan period (to 2036). This shortfall derives from Policy H.1 of the adopted Reading Local Plan, November 2019, which states:

H1: PROVISION OF HOUSING

Provision will be made for at least an additional 15,847 homes (averaging 689 homes per annum) in Reading Borough for the period 2013 to 2036. The Council will continue to work with neighbouring authorities within the Western Berkshire Housing Market Area to ensure that the shortfall of 230 dwellings that cannot be provided within Reading will be met over the plan period.

Paragraph 4.4.6 develops the issue of the shortfall:

Delivering the level of housing set out in policy H1 will mean that there is a shortfall of 230 dwellings when considered against Reading's need. This will need to be accommodated elsewhere within the Western Berkshire Housing Market Area. The other three authorities within the HMA recognise that there will be issues with Reading's ability to accommodate its need within its own boundaries, and this issue is set out within the West of Berkshire Spatial Planning Framework to which the four authorities have signed up⁷⁵. There will be continuing dialogue on this matter between the affected authorities which will inform local plans. Where agreement is reached, it will be for individual authorities' Local Plans to specify where development will be located.

	<p>Where: <Link to Bracknell Forest West Of Berkshire Spatial Planning Framework></p> <p>In principle, therefore, the shortfall of 230 dwellings must be met within the West of Berkshire Area. Policy H1 envisages that individual Local Plans will specify where development will be located yet there is no such specification or allocation in the WB R19 LPR. Indeed paragraph 1.28 of the R19 LPR is silent on Reading's unmet need. The SOCG contains out an important caveat:</p> <p><i>"... it is important to note that this agreement relates only to Reading's need as calculated by the (West of Berkshire SHMA) not by any alternative calculations of need, which will need to be subject to separate discussions." (footnote 1)</i></p> <p>Although the 230 dwelling shortfall is a product of the SHMA, it has been examined and is now embedded in policy H1 of Reading's adopted local plan.</p> <p>Reading BC's area need is due to be calculated by the end of December 2024 using the standard method (or any other calculation which applies at that time), yet there is no evidence of any separate discussions with regard to this.</p> <p>There is no agreement between the four LPAs on how this current shortfall might be met across the HMA. Furthermore, RBC will face an uplift in its figures of 35% as a result of it being one of the 20 most populous urban LPAs in England. Whilst there may be no requirement for adjoining LPAs to accept this element of unmet need it will still serve to increase the pressure on the HMA as a whole.</p> <p>Moreover, as recognised further in the WBC Duty to Co-operate Statement (footnote 2):</p> <p><i>The settlements in the Eastern Area – Purlley on Thames, Tilehurst, Calcot and Theale have a close functional relationship with Reading. Whilst many residents in this area use facilities and services in Reading, there is a significant movement the other way in terms of school children, with West Berkshire schools educating a significant number of Reading pupils.</i></p> <p>Without a clear and document agreement on how Reading BC's unmet need can be met across the HMA, and more specifically West Berkshire which shares its border with the Reading urban area, it is obvious that WBC has failed to meet the Duty to Co-operate tests. This means the R19 LPR is also not sound because it has not been positively prepared and is not consistent with NPPF 24-27.</p>
<p>4. Proposed Changes</p>	<p>The requirement to allocate more sites in the Eastern Area would address many of these challenges to soundness. Whilst it is acknowledged that some constraints do exist, there are sites which are recognised as achievable and deliverable in the Council's evidence base supporting the LPR. Prime amongst these is site TIL13 at Pincent's Lane (see overleaf).</p> <p>Site TIL13 has a long planning history. By common consent, the problems with the 2011 appeal scheme have been resolved and no technical obstacles exist to development of the site for a scheme of up to 165 dwellings. By the LPA's own assessment, the concerns – and the reasons for not proposing it for allocation – are entirely "political". No one would deny the validity of elected members making political choices where real choices exist, but the fact is that not allocating the site would leave the LPA without a single significant contribution to offer to meet either its own housing need in the Eastern Area or that arising from Reading, of which the Area is functionally part. The site should therefore be allocated.</p>

<p>Please give reasons for your answer</p>	<p>Policy SP12 (Approach to Housing Delivery) – Thakeham is concerned that the housing target figures, including the dwellings per annum (DPA) figure have dropped since the previous Plan consultation. Previously, 8,840 to 9,775 net additional dwellings were provided for over the Plan period, which equated to approximately 575 dpa. This has now reduced to 8,721 to 9,146 additional homes over the plan period, or approximately 513 to 538 dpa. This is of concern particularly when existing housing allocations are appearing slow to build-out, and villages such as Lambourn are also considered to be allocated less housing than is required.</p> <p>Indeed, it is also noted that the Council suggest (paragraph 6.9) 513 dpa is a minimum and 538 dpa represents a 5% increase to support the Government's objective of significantly boosting the supply of homes. Whilst it is appreciated that the 538 dpa figure is stated as not constituting a 'ceiling or cap to development', Thakeham does not consider a range to be consistent with the NPPF. The current approach does not appear to be planning positively for existing residents. The purpose of housing delivery is to ensure there is sufficient housing being delivered to meet the needs of West Berkshire inhabitants. In the previous Local Plan period, West Berkshire has delivered 8,288 houses between 2006 and 2022 (2022 AMR). However, only 1,902 of these were affordable, or 23%. This exacerbates the affordability of housing, with the current ratio more than double the national affordability. In order to support more people to buy their own homes, there needs to be a higher provision of housing, which can in turn deliver higher percentages of affordable housing.</p> <p>Paragraph 6.12 and 6.13 (Retained Allocations) – It is of concern to note that despite the fact that the Core Strategy and Site Allocations DPD were adopted in 2011 and 2017 respectively, that there are still 2,652 outstanding units, which represents over 50% of the total homes allocated. This brings into doubt the deliverability of these allocations and further work would be undertaken to ensure that there is realistic chance of them coming forward. If there is any doubt, then they should not be considered 'available', and alternative Sites need to be included.</p> <p>As commented above, an example is Land adjoining Lynch Lane, Lambourn, where the last three AMRs make no comment on its status, just that '<i>at the current time no planning application has been received</i>'. If no update is forthcoming from the landowner or agent, then it cannot be considered to be 'available' and should be replaced by an alternative site (or supported by a reserve site). This lack of delivery is of particular concern where the allocation is the only significant housing site for a whole village, particularly one such as Lambourn identified as a Rural Service Centre.</p> <p>Paragraph 6.21 (Future Supply) – Thakeham is concerned that the Council no longer intends to provide allocations that exceed the housing shortfall, with paragraph 6.21 confirming that 1,809 dwellings '<i>need to be found</i>'. However, paragraph 6.22 confirms that proposed allocations will provide for just 1,720 dwellings, and paragraph 6.23 states that only 80 dwellings are now expected to be delivered from emerging Neighbourhood Plans (down from 315 in the previous consultation draft). This equates to 1,800 dwellings through new Local Plan allocations, and expected Neighbourhood Plan allocations. This leaves 9 dwellings unaccounted for, with no flexibility given for phasing issues or non-delivery as alluded to by paragraph 6.21. Whilst this does not take into account windfall sites, Thakeham does not consider relying on delivery of windfall sites to make up the remainder of housing need and provide a suitable buffer to be a sensible approach, particularly in a local authority that is heavily constrained by the AONB. To this end we note that the Council has concluded that at least 1,958 homes will come forward on windfall sites – around 20% of the overall supply. Thakeham suggests that in order to ensure that housing needs are met and not left to change, the Council should seek to allocate more smaller sites, as advocated by paragraph 6.9 of the NPPF.</p> <p>Thakeham supports the creation of the Reg 19 Local Plan and looks forward to engaging further. Currently however we have concerns in relation to the wording of the policies, their evidence base and therefore on the overall soundness of the Reg 19 Local Plan as drafted. Whilst the Council's evidence underpinning certain policies is strong, in others it is notably weak.</p>

<p>Please give reasons for your answer</p>	<ol style="list-style-type: none"> 1 The number of homes allocated in the plan ignores the 500 - 1000 flats likely to be built in Newbury at the London Road Industrial Estate, that the council owns, and at a re-developed Kennet Shopping Centre. 2 The plan depends on 1,500 homes being built at Sandford, south of Newbury. This site was first allocated in 2012 and no houses have been built there yet. In fact only part of the site has planning permission and that was only granted recently. 3 The plan also depends on another site for 1,500 homes being allocated in north east Thatcham (in the corner formed by the A4 and Floral Way). As experience with the site at Sandford shows, large sites can be difficult to deliver.

Please give reasons for your answer	I would like to know how many local residents are on the West Berkshire Planning committee? In my experience consultations of this type receive more attention from those likely to gain financially from proposed plans!! I have no doubt the plans take into account the additional schools, doctors and dental surgeries and retail park. However, the massive increase in number of motor vehicles will most definitely require a railway bridge in Thatcham and a north Thatcham bypass. To fully understand this need you need to be a local frustrated resident. Hence my first sentence. Thank you.

<p>Please give reasons for your answer</p>	<p>This consultation response has been prepared by Fisher German on behalf of our clients Mr M Musgrave and Mr W Begley in respect of their land adjacent to Oxford Road, Chieveley, as illustrated in the attached.</p> <p>The land, which extend to circa 6.58ha, is located to the east of Chieveley. The site is defined by residential development and Graces Lane to the south, Oxford Road to the east, residential development and East Lane to the north and a field to the west. The site benefits from mature boundary planting and forms a logical infill location close to the centre of Chieveley.</p> <p>These representations follow the order of the policies within the Submission Plan, wherein we have not commented we have no specific comments at this stage. If you have any questions regarding these representations, please contact the author.</p> <p><i>Extract of response relevant to consultation point:</i></p> <p>A critical part of the Council's supply equating to c30% of the housing requirement derives from two large scale allocations in Newbury and Thatcham; Sandlesford Park, Newbury (1,500 dwellings) and North East Thatcham (1,500 dwellings). We have a number of concerns relating to the reliance on these sites, as clearly if there were to be issues in delivering these strategic sites this would mean the Plan would significantly underdeliver against even base Local Housing Need, let alone any uplift, only delivering circa 6,146 dwellings assuming all other sites were delivered and the windfall rate was maintained.</p> <p>Sandlesford Park is a locally difficult site, with multiple applications refused in the previous five years. This impasse ultimately resulted in an appeal which was allowed last year, dissecting the site in two (Sandlesford Park East and West). The record of uncooperative working and multiple refusals leads to severe concerns on the timely delivery of an acceptable scheme. The housing trajectory within the background paper outlines that the Council anticipate delivery will commence in 2025/26 with 100 dwellings being delivered in each of the first two years (Sandlesford Park East). This increases to 150 units per annum once Sandlesford Park West comes on stream in 2027/28 and continuing until 2034/25 where development reaches an anticipated completion. We do not believe it is likely that the scheme will commence delivery in only 2 years from now, and that immediate delivery will be 100 units. Given there are currently no Reserved Matters applications pending and the difficulty associated with the site's development to date, we consider there remains a number of years before delivery will begin in earnest, having regard for the need to gain a planning permission, marketing, initial site works and infrastructure delivery. When delivery commences, we do not consider it likely that the first year of delivery will yield 100 dwellings. We also consider it unlikely that the site will deliver 150 dwellings per annum at its peak. Having regard for these factors, we consider it highly unlikely that the site will contribute positively to the</p>

	<p>five year supply on adoption, nor will be fully built out by the end of the Plan period. A shortfall of around 400 dwellings is anticipated at a minimum, though it could very reasonably be higher.</p> <p>North East Thatcham also has a chequered planning history, with the Council refusing an application for part of the site in February 2015, ref 15/00296/OUTMAJ, citing a multitude of reasons for refusal, including impacts on landscape. The applicants appealed this decision and following a public inquiry the appeal was to be allowed, due to Paragraph 14 of the NPPF being engaged owing to a lack of housing land supply, however the decision was called in by the Secretary of State who dismissed the appeal in July 2017, against the recommendation of the Inspector.</p> <p>The previous iteration of the Plan set out that 1,250 dwellings would be delivered over the Plan period. This has been increased to 1,500 without compelling justification. The trajectory assumes a start in 2029/30, which is considered to be more robust, given there is no current planning applications for the site and the sites history.</p> <p>As acknowledged by the Site Selection Background Paper (2020), there is a lack of evidence as to the ability to service the site and what works would be required to ensure that there is utilities capacity to deliver the site at the rate the site is expected to deliver. There is currently no comprehensive application for the delivery of the site, and it is unclear when one will be submitted. Given the various issues associated with the delivery of Sandleford Park, and the time taken thus far, it is vital that realistic and robust assumptions are made for the delivery of the North East Thatcham site.</p> <p>Again the trajectory assumes high delivery in the first year equating to 150 dwellings, continued thereafter. It is clearly not sensible to assume a strategic site will deliver 150 dwellings in its first year of delivery. Whilst this could normally be overlooked, to achieve the Council's target of 1500 dwellings within the Plan period, as set out in the trajectory, 150 dwellings are required annually from 2029/30 to 2038/39. Given the Plan period ends in 2038/39, any slippage automatically results in a reduction of the total number of dwellings delivered in the Plan period. Again, the ability to deliver 150 dwellings per annum continuously is challenged and 100 dwellings considered to be more robust. Assuming 100 can be delivered in the first year, which again is doubtful, this results in a shortfall of 500 units.</p> <p>Considering the above, the Council will entirely lose the proposed 5% buffer of c.400 dwellings and have a shortfall of overall housing land supply against the housing requirement of circa 500 dwellings. Additional allocations are therefore required to ameliorate this shortfall, and to reintroduce an acceptable buffer as the 5% assumes all other sites, and the windfall rate, will deliver as anticipated which is seriously doubted. Failure to respond positively to this issue should result in the Plan being found unsound.</p> <p><i>For full response please see attachment.</i></p>

Please give reasons for your answer

Please refer to our accompanying statement for our full representations.

Our assessment of the housing requirement and supply demonstrates that there is a need to allocate additional housing sites that is consistent with the broad spatial strategy.

Extract from full representation relevant to consultation point (for full response see attachment):

Land adjoining New Road, Newbury and Site Assessment

In the context of these concerns about the vulnerability of the submitted development strategy, and the obvious remedy to identify a greater yield of new homes from the available sites in the HELAA, we turn to our client's land which was removed as a preferred allocation ('Land adjacent New Road, Newbury (HELAA Ref: GRE6)')

Whilst the 'emerging draft' LPR included GRE6 as a preferred site allocation, it is not now currently selected for development in the proposed submission version of the Plan. The Council's HELAA (Dec 2020) concluded that the Site is 'potentially developable in part'. However, the Council's Updated HELAA (Jan 2023) now identifies that the Site is 'not developable within the next 15 years'. The Council contend that advice on ancient woodland has changed and, therefore, the site is no longer suitable for development. We disagree with this revised assessment/conclusion for the reasons set out below.

Accordingly, we are of the view that the Council should include our client's land, in addition to other sites that have been overlooked, for allocation in the Local Plan Review (this Rivar site alone will not remedy the issues we have identified).

Suitability of GRE6

The 'emerging draft' LPR included a draft site allocation Policy for 'land adjacent New Road, Newbury'. This confirmed that "detailed policy criteria will be developed to highlight specific mitigation measures and infrastructure requirements that will cover amongst others a buffer between the developable area and the ancient woodland that is situated to the west of the site, and access".

The Council's HELAA document now concludes that the advice on ancient woodland has changed and there is a need for a buffer greater than 15m. Overall, the HELAA concludes that 'the impact on the ancient woodland would be so great that the site is not suitable for development'. In respect of this, we comment as follows:

An assessment of the ancient woodland for Rivar was prepared in July 2022 by Sylvan Consulting and accompanies these representations. The assessment confirms that West Wood includes a number of indicator species plants supporting its very long term presence and, therefore, is suggestive of being ancient woodland (albeit, this could not be confirmed definitively).

The assessment acknowledges paragraph 180 c of the Framework and the Standing Advice jointly published by Natural England & Forestry Commission. The assessment concludes that a 15m buffer would be satisfactory alongside additional protective measures (e.g zero development in the buffer zone, avoidance of residential curtilage backing onto buffer and reinforcement of woodland edge) as part of the design scheme.

This approach to the ancient woodland is similar to that taken at the Sandleford Park East I and that was supported by the Inspector and Secretary of State in the recent appeal decision (Ref: APP/W0340/W/20/3265460). The Inspector accepted that a 15m buffer to the ancient woodlands was adequate, alongside other mitigation measures.

The assessment also identifies that there are current management challenges facing West Wood. As such, any development of the site could help secure a long-term management strategy of the woodland through a S106.

Overall, it is considered by the technical experts that with a 15m buffer, together with the additional protective measures and a long term management strategy, the overall effect of development would be 'significantly net-beneficial'. This therefore should carry significant weight in favour of re-allocating the site for housing, contrary to the Council's revised assessment in the HELAA.

An Illustrative Site Plan, at Appendix B (*see full response attachment*), demonstrates how the development of the site could accommodate 10 dwellings, as previously suggested by the Council. The proposed development will provide a minimum 15m buffer to the edge of the surrounding woodland and respect the significant trees within the site. It also ensures that residential curtilage is situated away from the buffer zone. The site would provide a mix of predominantly 2 and 3 bed dwellings and integrate with the surrounding residential development.

It is considered that developing the 'Land adjoining New Road, Newbury' remains a developable option for the following reasons:

- 1 There is a need to identify a range of sized sites for housing in West Berkshire to meet the indicative housing requirements during the plan period. Due to its modest scale, the Site can be built out quickly in accordance with paragraph 69 of the Framework.
- 2 The site is located in the 'Newbury and Thatcham Area' which is capable of accommodating significant levels of growth given the range of services and facilities it currently offers and is therefore a sustainable location for development.
- 3 The land has a strong relationship with the existing residential development to the north and follows the existing pattern of the settlement.
- 4 The site is visually well contained by existing woodland and trees which affords a degree of separation from the wider landscape.
- 5 An appropriate buffer (i.e. 15 metres) can be maintained to the Ancient Woodland (see above for further comments).

	<p>6 The site is not subject to any specific environmental or statutory designations such as Green Belt, Special Protection Area (SPA), Area of Outstanding Natural Beauty (AONB), Site of Special Scientific Interest (SSSI) and outside the DEPZ emergency zone.</p> <p>7 The site is located in Flood Zone 1 (i.e. low probability of flooding) and a sustainable drainage system would be provided.</p> <p>8 The site has access to local employment opportunities within Newbury, Greenham and beyond.</p> <p><u>Availability of GRE6</u></p> <p>The site is available for a residential development immediately. Rivar, as a local developer, has an option on the site which will facilitate its timely development.</p> <p><u>Achievability of GRE6</u></p> <p>The site is considered to be 'achievable' for the reasons set out below:</p> <ul style="list-style-type: none"> • A vehicular access can be delivered via New Road/Lamtarra Way. • The site is greenfield - therefore it is likely that there are no significant constraints (such as contamination) which would preclude development of the site on viability grounds. • Rivar enjoys a reputation for building high quality homes in desirable locations throughout central southern England and is based in Newbury. In recent years, Rivar has delivered a range of different sized housing schemes across West Berkshire. It has a good track record of delivery. <p><u>Summary</u></p> <p>There are no insurmountable constraints that would prevent the delivery of the 'Land adjacent New Road, Newbury' (Ref: GRE6)' for development. Our specialist evidence indicates that the Council's conclusions in regard to ancient woodland are not well founded. The site is therefore suitable, available and achievable for residential development which can help West Berkshire meet the identified housing need in a timely and sustainable manner. Accordingly, we are of the view that the Council should consider the re-allocation of our client's site in the Local Plan Review.</p> <p>Alternatively, the site could be included in the settlement boundary given its modest scale. It is considered that character of this area clearly makes a greater contribution to the built form of the area; rather than the wider countryside. Such amendments to the settlement boundaries through the review provides an opportunity to proactively deliver small-scale sites to boost supply and to help meet the Council's housing targets during the plan period.</p> <p><i>For full response see attachment. Please give reasons for your answer

Please refer to our accompanying statement for our full representations.

Our assessment of the housing requirement and supply demonstrates that there is a need to allocate additional housing sites that is consistent with the broad spatial strategy.

Extract of full response relevant to consultation point

Land South of Newbury Racecourse and Site Assessment

In the context of these concerns about the vulnerability of the submitted development strategy, and the obvious remedy to identify a greater yield of new homes from the available sites in the HELAA, we turn to our client's land which has been overlooked ('Land south of Newbury Racecourse (HELAA Ref: GRE3)')

The Council's HELAA (Dec 2020) concluded that the Site is 'potentially developable in part'. However, the Council's Updated HELAA (Jan 2023) now identifies that the Site is 'not developable within the next 15 years'. There has been no obvious change in assessment of the site which justifies this change in status. We disagree with this revised assessment/conclusion for the reasons set out below.

Accordingly, we are of the view that the Council should include our client's land, in addition to other sites that have been overlooked, for allocation in the Local Plan Review (the Racecourse site alone is unlikely to remedy the issues we have identified).

The capacity of the site is around 160-170 dwellings. However, subject to further assessment (e.g. tree surveys) the capacity of the site could be greater. The evolution of the Masterplan has been landscape-led and informed by a comprehensive Landscape and Visual Impact Assessment (LVIA). Consequently, the proposed layout reduces the area of built development and enhances the existing green infrastructure to further integrate the development into the immediate and wider landscape.

An Illustrative Masterplan, at Appendix B <see attachment>, demonstrates how the development of the site could accommodate around 161 dwellings, as suggested by the Council. The proposed development will respect the edges of the surrounding woodland and the significant trees within the site. It avoids development on the more steeply sloping parts of the site and makes adequate provision for surface water attenuation. The aim is to integrate the development within its setting with pedestrian links to create a permeable environment.

Suitability of GRE3

The Council's HELAA document concludes that the 'there is low capacity for development due to the site being constrained by in a number of ways where any development would affect views and characteristics which would cause harm to the landscape. The Assessment therefore recommends that the site is not developed for housing.' In respect of this, we comment as follows:

A comprehensive LVIA, prepared by WH Landscape Consultancy Ltd accompanies these representations and were previously submitted to the Council as part of the consultation on the 'emerging draft' LPR in 2021. The LVIA assess the existing landscape to determine and describe the conditions against which changes resulting from the development can be measured or predicted and assessed. In response to the landscape conclusions of the Council's Site Assessment, the LVIA demonstrates that:

- Overall, the development will have an overall Moderate – Moderate/Minor effect, which is not considered significant under the LVIA methodology.
- There will be some localised benefits in respect of the enhancement of the current green infrastructure within and around the site. These benefits will be further enhanced by the proposed additional green infrastructure.

The HELAA identifies no 'showstoppers' that would prevent the delivery of the site for housing, including on heritage, ecology, drainage, traffic, air quality and the sustainability of the site.

Availability of GRE3

The site is available for a residential development immediately. The site is within the sole control of the Racecourse which will facilitate its timely development.

Achievability of GRE3

The site is considered to be 'achievable' (as defined in the HELAA Methodology 2016) for the reasons set out below:

- A primary access is achievable from Mandarin Drive/ Rosyth Gardens. The Racecourse's land extends to the highway boundary in this location and, therefore, an access from this location can be implemented. A secondary southern access can also be achieved from Greyberry Copse Road (albeit the technical evidence considers that this is not essential). An agreement has, in principle, been agreed with the landowner and the Racecourse expect to conclude a formal access agreement shortly allowing the secondary access if required.
- The site is greenfield - therefore it is likely that there are no significant constraints (such as contamination) which would preclude development of the site on viability grounds.
- The Racecourse have ample experience in selling sites to developers and delivering development at Newbury. There is also developer interest in the site.

Summary

There are no insurmountable constraints that would prevent the delivery of the 'Land south of Newbury Racecourse (Ref: GRE3)' for development. The site is therefore suitable, available and achievable for residential development which can help West Berkshire meet the identified housing need in a timely and sustainable manner. Accordingly, we are of the view that the Council should re-consider our client's site for allocation in the Local Plan Review.

Conclusion

Newbury Racecourse Plc. has concerns that the Council's Local Plan Review is currently unsound having regard to the tests of soundness at paragraph 35 of the Framework.

	<p>It is considered that there are a number of matters that indicate that the proposed strategy is not robust and, therefore, liable to fail in its objectives. There is justification to increase the housing requirement, to address these issues including:</p> <ul style="list-style-type: none"> • The Plan's priority to improve affordability and to deliver additional affordable homes; • The need to boost supply significantly and to build in greater flexibility in the Plan if the anticipated housing supply does not deliver; and • Unmet need from neighbouring authorities (e.g Reading); <p>With the above in mind, it is considered that West Berkshire's housing target should be increased to between 564 - 616 dpa (i.e. a 10-20% buffer/uplift to the minimum LHN), which would equate to finding a supply of between 9,588 – 10,472 dwellings up to 2039.</p> <p>In addition, the Council's housing supply would fail to meet the minimum LHN. This is particularly due to reliance on windfall sites and large strategic sites (e.g Sandford Park and NE Thatcham) that are questionable in terms of timescales for housing delivery and annual rate of completions. The Council's justification for the allocation NE Thatcham is also not warranted, particularly given the lack of updated evidence and reduction in housing numbers.</p> <p>As a result, and noting the significant amount of available land in the HELAA that has been overlooked, it is concluded that the remedy is for the LPR is to allocate more sites for housing over the plan period, consistent with the broad spatial strategy i.e. focusing development on the most sustainable settlements, including Newbury, in accordance with the settlement hierarchy (Policy SP3/Table 1 District Settlement Hierarchy).</p> <p>Accordingly, we are of the view that the Council should consider 'land south of Newbury Racecourse', in addition to other sites that have been overlooked in suitable locations, for allocation in the Local Plan Review. We contend that the site is suitable, available and achievable and therefore the Council has been premature and unjustified in declaring it undevelopable over the plan period. Its allocation would, in principle, be consistent with the settlement hierarchy.</p> <p>We trust this Statement clearly sets out our client's position at this stage and respectfully request that the above is given due consideration as part of the West Berkshire Local Plan Review.</p> <p><Accompanying statement attached></p> <p>"Land south of Newbury Racecourse" documents attached:</p> <ul style="list-style-type: none"> • LVIA • Illustrative Maps (1 - 3) • Appendices

1. Do you consider the Local Plan Review is legally compliant?	No
* Yes	
* No	
Please give reasons for your answer	<p>Regulation 12 of The Environmental Assessment of Plans and Programmes Regulations 2004 states:</p> <p>“(1) Where an environmental assessment is required by any provision of Part 2 of these Regulations, the responsible authority shall prepare, or secure the preparation of, an environmental report in accordance with paragraphs (2) and (3) of this regulation.</p> <p>(2) The report shall identify, describe and evaluate the likely significant effects on the environment of—</p> <p>(a) implementing the plan or programme; and</p> <p>(b) reasonable alternatives taking into account the objectives and the geographical scope of the plan or programme.”</p> <p>The SA/SEA Environmental Report states:</p> <p>“The Core Strategy had a focus on Newbury and Thatcham, with two strategic sites allocated in Newbury and smaller sites allocated across the rest of the district. This mix of strategic and smaller sites across the district worked well for the Core Strategy by providing flexibility and natural phasing of developments across the plan period. As a result a similar mix of sites is considered to be appropriate for the LPR with no other alternatives considered.”</p> <p>Regulation 12 requires the identification, description and evaluation of ‘reasonable alternatives’. If an approach worked well in the current plan period, it does not follow that it is the best approach for the following plan period—and it is certainly does not follow that there are no ‘reasonable alternatives’. It is incorrect for the SA/SEA to assert that the approach in the current Local Plan has ‘worked well’ by providing ‘natural phasing of developments across the plan period. This is certainly not the case for the Sandleford Strategic Site Allocation. Policy CS3 of the current Local Plan states: “Within the area identified at Sandleford Park, a sustainable and high quality mixed use development Issue: The Sustainability Appraisal for Policy SP1-Spatial Strategy</p> <p>Section/paragraph: 4.19 Policy: SP1–Spatial Strategy Appendix: Policies</p> <p>Map: Other: SP16, SP17 Sustainability Appraisal / Strategic Environmental Assessment (SA/SEA) November 2022</p> <p>Sustainability Appraisal / Strategic Environmental Assessment; Appendix 5 will be delivered in accordance with the following parameters:</p> <p>Phased delivery of up to 2,000 dwellings, of which at least 40% will be affordable and with an emphasis on family housing. At least half the housing is planned to be delivered by 2026;” However, as the SA/SEA explains (pages 35-37): “no work has started at the site at Sandleford, with outline planning permission for the eastern part of the site only granted (on appeal) in May 2022.” The site has been re-allocated “as a single site for up to 1500 dwellings”. “Reducing the number of dwellings on the site allowed for better consideration of the constraints on the site (Ancient woodland, drainage, landscape buffers etc.) and will allow for adequate and appropriate mitigation measures to be put in place.”</p>

	<p>The SA/SEA states (page 25, below the table): "Following the decision that the spatial strategy should focus on Thatcham, strategic site options were considered, based on the sites submitted through the February 2020 HELAA."</p> <p>Therefore, 'reasonable alternatives' that are not around Thatcham were not considered. This decision was also based on the false premise that the town of Thatcham would have sufficient infrastructure to support this development, either at the time of the decision or as a result of the development. The lack of infrastructure in Thatcham is addressed by other representations of the Town Council.</p> <p>The Sustainability Appraisal / Strategic Environmental Assessment (SA/SEA) for Policy SP1 cannot be legally compliant, because it explicitly states that it has not complied with the requirement to identify, describe and evaluate reasonable alternatives to the proposed policy. The experience of delays in delivery of Sandleford Park in the current plan period (described in paragraphs 6.44–6.46 of the draft Local Plan, and the reduction in the number of dwellings from 2,000 to 1,500, suggest that the proposed policy for North East Thatcham is not even the best alternative.</p>
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>As explain in Section 1 above, the draft Local Plan explicitly states that no alternatives have been considered. The evidence of the failure of the Sandleford Strategic Site Allocation to deliver the expected number of houses suggests that relying on two strategic sites (with a number of smaller sites) is not even the best approach.</p> <p>As the sustainability appraisal is not legally compliant, the Local Plan cannot be in accordance with Paragraph 32 of NPPF.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	N/A

4. Proposed Changes	A new Sustainability Appraisal / Strategic Environmental Assessment (SA/SEA) needs to be undertaken, which considers all 'reasonable alternatives' to the decisions relating to strategic sites and proposed approach of Policy SP1.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No

<p>Please give reasons for your answer</p>	<p>Sandleford Park South (SPS) (site: NEW8)</p> <p>WBC Evidence Base</p> <p>Turning now to the Evidence Base on which the Council has based its assessment. In January, 2023, the Council updated its HELAA to reflect a number of additional sites put forwards along with corrections made in response to the previous consultation (including reference to my client's part of site as 'NEW8: Sandleford Park South'). In line with previous versions of the HELAA, the 2023 update assesses each site at Appendix 4. In relation to 'Local Plan History', the assessment of my client's site states the site was;</p> <p><i>'.....ruled out for allocation because the site is close to the strategic site allocation of Sandleford, and it was considered that this part of Newbury should not have further development of this scale in the short to medium term.'</i></p> <p>The Council's method for not considering Sandleford Park South for allocation is flawed in that considering an area 'should not have further development' does not accord with the requirements set out in the NPPG in relation to Plan Making. Para 038 states that '<i>Policies need to be justified</i>' and goes on to state that, '<i>evidence needs to inform what is in the plan</i>'. Simply considering that an area should 'not have further development' is not a justified approach to plan making and is not based on evidence. The evidence presented in our previous representations (including Appendix A) relating to Sandleford Park South shows that the site is SUITABLE for development, AVAILABLE, and ACHIEVABLE.</p> <p>In relation to evidence, para 038 of NPPG states that '<i>evidence needs to inform what is in the plan.....rather than being collected retrospectively</i>'. It is therefore, interesting that the Council only updated its HELAA in January 2023, which is the same month it published its current Regulation 19 Consultation Plan – it would seem this would have allowed little time for the Council to properly consider the updates to the HELAA in order that they be given thorough consideration within the current consultation Plan and reflect the requirements of the NPPG that evidence should inform the Plan.</p> <p>The Council's other key concern relating to the site relates to impact on distant views of the landscape stating that development of the site, '<i>would not respect the role the landscape plays as setting to the character of Newbury</i>'. As demonstrated by the Landscape Appraisal commissioned by our client and submitted as an Appendix to our February 2021 representations (and included here at Appendix A <See attached document PS708 Pegasus (Donnington New Homes) Appendix 1>, the Council's conclusions on this matter are incorrect. The Landscape Appraisal clarifies that (absence of) impact, as follows:</p> <ul style="list-style-type: none"> • Visual Amenity – <i>"the site benefits from a significant degree of visual containment such that development as proposed with the masterplan would not have a significant visual effect upon the</i>

surrounding settlements or countryside".... "By introducing a substantial tree belt running along the southern boundary of the western half of the site on the steeper slopes and adjacent to the River Enborne watercourse, such a linear tree belt would provide substantial screening for residential properties on the lower slopes of the site. With a spine road running through the site orientated east-west linking the Andover Road with the residential allocation to the north, this would provide the opportunity to introduce substantial tree cover along this highway corridor."

- **Landscape Character** – "the site and its immediate environs form a heavily wooded landscape and that as far as the site is concerned, it physically and visually relates to the River Enborne Valley, a shallow narrow valley which is broadly orientated east-west linking Newtown and Newtown Common to the east with Enborne Row to the west. Beyond the boundary of the settlement itself, there is a sense of rurality and this is achieved because there is little by way of visual connection with the adjacent settlements and in particular, Newbury and Wash Common to the north"...."; "There is a wooded character to the landscape, and this is also evident on the site"; "The proposed masterplan envisages a number of neighbourhood areas which are set within the retained vegetation and in particular tree cover that frames and subdivides the site. As a consequence, the residential neighbourhoods would have a strong sylvan backdrop and character to them which reflects the general character of the immediate locality. The proposed development would therefore be in keeping with the character and appearance of the local existing residential neighbourhoods".
- **Potential Development Framework Strategy** – "In terms of visual amenity, the eastern half of the site is extremely well contained in visual terms given the topography and configuration of tree cover and woodland framing the site. Whilst the western half of the site is more visible from some public footpaths on the southern side of the valley, by introducing a tree belt along the southern boundary of the site adjacent to the Enborne River as a riparian wooded landscape, together with a strong boulevard feature defining the spine road which traverses the mid slope, both these features would effectively visually frame residential neighbourhoods on the upper and lower slopes within the western half of the site".
- **Concluding Remarks** – "A residential development within this site accommodating the field and vegetation pattern would ensure that the proposal would reflect the grain of the landscape and in so doing would be in keeping with the character and appearance of other residential neighbourhoods in the local landscape and townscape. This would ensure that the residential scheme would be successfully integrated into the existing landscape framework of the site and its surrounding area."

As detailed in the submission made in February 2021 (Appendix A) which set out our client's views in relation to the Council's conclusions on the suitability of the site, we remain of the same views which, in summary, are that the Council has inaccurately categorised the site in relation to its **SUITABILITY** for development. The Council concluded that the site would be 'inappropriate in the context of settlement form, pattern and character of the landscape' and included references to 'Local Wildlife Sites within the site'.

Of most importance, is that this conclusion significantly overlooks the range of benefits that could be delivered in association with the site including new publicly accessible open space, including a riverside walk, a range of new homes including affordable provision, potential for landscape enhancements within and around parcels of development designed to 'integrate into the landscape' (WBC HELAA 2023, Appendix 4). In addition, and of key importance, however, is the delivery of the **Wash Common Relief Road**.

It is well documented that the delivery of a **Wash Common Relief Road** has been a long-standing local aspiration as evidenced by its reference within the Newbury Town Plan 2019-2036 (Adopted June 2018) which states, on page 37:

*"The foregoing [a new road from the Swan roundabout to the A34 along the River Enborne] would link in with a specific proposal by the Town Council on the vehicle access to Sandleford. In common with local residents, we do not support Warren Road as the principal western access, because of interference with the considerable local traffic to schools and shops, and Andover Road's role as a principal gateway into the town. We need to make provision for the large proportion of cars from Sandleford which will wish to join the A34. **Our recommended solution is a new road from the western Sandleford development east and south of Garden Close Lane, joining the A343 at Wash Water. The Town Council's position is that this is the only feasible solution for a western access to Sandleford.**"*

This is reiterated at para 8.11.4 on page 41, where proposals to create additional road capacity in the Town are outlined: "A new road from the planned western Sandleford development east and south of Garden Close Lane, joining the A343 at Wash Water, to provide a direct access for Sandleford residents to the A34."

This aspiration is reflected in WBDC's own conclusions on the suitability of Sandleford Park South to deliver an additional access to Sandleford Park whereby, in relation to Highway and Access matters, Appendix 4 of the January 2023 HELAA states;

'Vehicular access for this site and the adjoining sites would be obtained via the A343 Andover Road ...connecting into Sandleford (Park). This is very important as it allows traffic to not only spread from these three sites, but will also provide access to for Sandleford that will reduce traffic on Andover Road to the north'.

It is therefore clear that plan makers - both within West Berkshire District Council and within Newbury Town Council - consider the benefits associated with an allocation at Sandleford Park South as being highly significant in delivering the long-held aspiration of a Wash Common Relief Road. As set out in previous representations relating to this site, and reiterated above, the site can deliver this benefit together with a series of other local benefits (including affordable housing, public open space and a riverside walk), without causing any harm to the landscape setting of the local area. Accordingly, is entirely appropriate for development and should be allocated within the emerging Plan.

	<p>Relationship with adjoining land</p> <p>Land to the west of the my clients site is currently controlled by Gladman developments. That area of land provides connectivity to the A343 (Andover Road) which would allow for the consolidated delivery of the Wash Common Relief Road. My client is advised by Gladman that they will make their own representations under separate cover in relation to their land and that matter. My client remains committed to working collaboratively with Gladman, as appropriate, in relation to this matter and all other cross site matters.</p> <p><Attachment SPS Reps Feb 2021: PS708 Pegasus (Donnington New Homes) Appenidx 1></p>

<p>Please give reasons for your answer</p>	<p>As highlighted previously, there are a number of site allocations which are being carried forward from the current Local Plan. Whilst it is understandable that some sites will be included within the Local Plan Review, as they may have been forecast to be in the later years of the currently adopted Local Plan period, it is slightly concerning that main strategic allocation, Sandeford Park is being carried forward together with five of the existing site allocations. It is noted that three of the previously propose allocations, equating to 280 dwellings have been removed. One of these sites was the Kennet Centre which we raised concerns about in our previous representations and we are pleased to see that the Council has now realised that the allocation does not have a realistic prospect of coming forward within the plan period. It is however still concerning to see the over reliance on the Sandeford Park site.</p> <p>Further, as set out in more detail in respect of Policy RS3, formerly RS4, we do not consider that given the advanced stage of this site in the planning process, that the Local Plan Review should be including it as an allocation.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>

<p>Please give reasons for your answer</p>	<p>Thames Water owns land on the east side of Hill Road, Speen that is identified on the enclosed plan [see attachment PS1125 Thames Water - Site Location Plan_east of Hill Rd] and which it is considered should be allocated for residential development.</p> <p>The site is an enclosed area of grassland that has been historically retained by Thames Water for operational purposes in association with the adjacent water treatment works. It is approximately 1.2 hectares in size and is located on the south eastern edge of Speen Village, approximately 0.6 miles to the west of Newbury Town Centre. The land slopes from north to south, from approximately 95m AOD to 75m AOD. Access is presently gained from Hill Road, towards the southern end of the site.</p> <p>Pedestrian and cycle access to the site from the town centre can also be achieved via North Croft Lane, making the site an approximate 10 minute walk from the town centre. It is consequently located in a highly sustainable location. Thames Water therefore supports the Council's previous SHLAA assessment that it is suitable for residential development, being located in a predominantly residential area with good access to the services and facilities located in Newbury Town Centre, as well as the open space and leisure facilities at Goldwell Park and Northcroft Leisure Centre.</p> <p>The site has previously been promoted for development through the Council's Housing Site Allocations Development Plan Document (HSADPD). The site was proposed as an allocation in the HSADPD, but then removed due to concerns that the Council had regarding achieving access to the site.</p> <p>Thames Water submitted representations to West Berkshire Council in response to consultation on the HSADPD in December 2015, that provided evidence to demonstrate that access to the site is not a barrier to its allocation for housing. The consultation response provided confirmation of the site assessment work undertaken on behalf of Thames Water, in relation to the site, to demonstrate that there are no technical barriers to the delivery of 33 new homes and public open space at the site.</p> <p>Notwithstanding that the Council did not reinstate the site as an allocation in the HSADPD, Thames Water held a public exhibition at Majendie Hall, St Marys Church, Church Lane, Speen on Friday 8th and Saturday 9th July 2016. The consultation event followed consultation with Speen Parish Council and was based on a development of 22 new homes within a developable area of 0.85ha alongside some 0.35ha of open space. The illustrative masterplan on which the public consultation was based is also enclosed with this representation (drawing SK05E) [see attachment PS1125 Thames Water - Illustrative Masterplan_east of Hill Rd], which shows how the 22 new homes could be accommodated within the site at a density of 25 dwellings per hectare; this low density being in keeping with the wider area.</p> <p>Site Access</p> <p>The principle reason that the Council decided to omit the allocation of the site in the HSADPD was over concerns regarding access. Thames Water instructed Transport Planning Associates (TPA) to confirm that safe access into the site can be achieved via Hill Road and its junction with Speen Lane.</p> <p>Enclosed with this submission are drawings PL04 [see attachment PS1125 Thames Water - Drawing PL04_east of Hill Rd], PL07 [see attachment PS1125 Thames Water - Drawing PL07_east of Hill Rd] and</p>

	<p>PL08 [see attachment PS1125 Thames Water - Drawing PL08_east of Hill Rd] which illustrate TPA's designs for improvements to Hill Road, creation of a new site access and the junction with Speen Lane. The result is an acceptable access to the site which is capable of facilitating the bringing forward of the site for residential development.</p> <p>Drawing PL04 shows that the lane would be widened to 4.8m with a 1.8m footway on the eastern side. The newly created carriage way and footway will continue on into the site itself (drawing PL08). Drawing PL07 illustrates how traffic calming measures could be introduced along Speen Lane reducing the speed limit to 20 mph.</p> <p>For the reasons set out above, it is concluded that adequate access can be achieved to facilitate the development of the site.</p> <p>Further Technical Work</p> <p>Further technical work has been undertaken, including the assessment of landscape and visual impacts, flood risk, an ecological appraisal, a ground conditions and hydrological risk assessment, and archaeological appraisal. This work has not identified any constraints that would prevent the development of the site in a manner proposed.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>For the above reasons we consider the site suitable and deliverable for a development of approximately 22 dwellings as illustrated on the enclosed drawing SK05E [see attachment 'PS1125 Thames Water - Illustrative Masterplan_east of Hill Rd] and should be allocated as such.</p> <p>Given that large sites at Newbury and Thatcham that were allocated in the Core Strategy and HSADPD (including the 2,000 home allocation at Sandford Park) have been delayed in coming forward it is important therefore that this shortfall is addressed. The allocation of the sustainably located site at Speen would help address this shortfall in line with the spatial strategy and should be allocated accordingly.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
<p>5. Independent Examination</p>	To test the council's argument for not allocating the sustainably located site

Please give reasons for your answer	Thames Water owns land on the west side of Hill Road, Speen that is identified on the enclosed plan [see attachment 'PS1127 Thames Water - Site Location Plan_west of Hill Rd'] and which it is considered should be allocated for residential development. This site has not been previously promoted for development by Thames Water due to concerns regarding the protection of an operational abstraction borehole located immediately to the south of the site. However, in undertaking the work required to confirm that the land east of Hill Road can be released without harming

	<p>Thames Water's operational works at Speen, it was confirmed that the northern part of Thames Water's land holding to the west of Hill Road could be released for development. A detailed risk assessment would be required once a development proposal has been produced. At this stage, we believe a development of 10 to 20 houses would be possible, with the remainder of the site being brought forward as open space and environmental enhancements.</p> <p>It is proposed that the site would be accessed via Hill Road, as per the proposal for the land to the East of Hill Road. Work previously undertaken by TPA demonstrated that the proposed access arrangements submitted for the land to the east of Hill Road was sufficient for 33 dwellings. Consequently, were the land to the East and West of Hill Road to come forward for development as proposed this would entail a total of 42 dwellings. It is therefore felt that the access proposals are adequate to enable both sites to come forward.</p> <p>In light of the work already undertaken on the land to the east of Hill Road, there are no known constraints for this site coming forward for residential development during the lifetime of the Local Plan.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>For the above reasons we consider the site suitable and deliverable for a development of 10-20 dwellings. Given that large sites at Newbury and Thatcham that were allocated in the Core Strategy and HSADPD (including the 2,000 home allocation at Sandford Park) have been delayed in coming forward it is important therefore that this shortfall is addressed. The allocation of the sustainably located site at Speen would help address this shortfall in line with the spatial strategy and should be allocated accordingly.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<i>Omission Site</i> Gladman Developments Ltd, together with Donnington New Homes, are jointly promoting the area of land located to the south of the existing Core Strategy allocation at Sandleford Park (Policy CS3), referred to as Sandleford Park South (SPS), for residential development alongside proposals for the delivery of a Relief Road. A location plan is included at Figure 1 below. This representation follows on from previous submissions which have been submitted by Gladman and by Pegasus on behalf of Gladman, the most recent of which was to the Regulation 18 West Berkshire Local Plan Review emerging draft consultation in February 2021. As part of the previous submission, a detailed Landscape Appraisal was undertaken by Pegasus and is included at Appendix 1 <see attachment>. <Figure 1 Sandleford Park South Location Plan – see attachment>

Newbury is the largest and most sustainable settlement within West Berkshire and as such has rightly been the focus for future development. The proposed development site is well located to the south of the town and is within safe walking distance of a wide variety of services and facilities, including Falkland Primary School, Park House School and range of medical and retail outlets along Andover Road. Further to the current available services and facilities, the site is directly adjacent to the Sandlesford Park strategic site which will provide further amenities and services once completed.

The proposed development would include the delivery of a Relief Road running between the western part of the Sandlesford Park strategic development site, within New Warren Farm and the A343 Andover Road at Sandpit Hill, Wash Water, providing a fifth access to Sandlesford Park. The delivery of this road infrastructure would redistribute traffic from Sandlesford Park, relieving Monks Lane, Andover Road and Warren Road as west-bound routes to the A34. The proposed indicative route of this road and how this would sit alongside proposed residential development is set out in the concept masterplan at Appendix 2.

Pegasus's February 2021 representation highlighted our concerns that the HELAA assessment of the site had not fully considered the significant benefits the scheme could deliver to the local highway network by providing a fifth access into Sandlesford Park. Indeed, the Council's Highways engineer's response to the HELAA stated that the delivery of strategic road infrastructure through the site is 'very important'.

Access

Vehicular access for this site and the adjoining sites would be obtained via the A343 Andover Road with a 6.0 meter wide through road northwards connecting into Sandlesford. This is very important as it allows traffic to not only spread from these three sites, but will also provide a fifth access for Sandlesford that will reduce traffic on Andover Road to the north. The access on to the A343 will need to be a full roundabout or a traffic signal junction.

Further to the positive benefits the Council's highways engineers deem from the delivery of the fifth access in Sandlesford Park, there is also a clear level of support from the local community for the provision of the Relief Road. Newbury Town Council prepared a Town Plan to focus on how the town of Newbury should respond positively and constructively to future development and challenges over the period 2019-2036. Within the Town Plan there is an aspiration of Newbury Town Council to improve the transport and highway network within the town. A key component of delivering this aspiration is the provision of a new road from the planned western Sandlesford development east and south of Garden Close Lane, joining the A343 at Wash Water in order to provide a direct access for Sandlesford residents to the A347.

This Relief Road could be delivered in full within Sandlesford Park on land controlled by Gladman and Donnington New Homes.

As set out in the Landscape Appraisal, the site is relatively free from environmental constraints and as shown in the concept masterplan, included at Appendix 2, the areas of woodland would be retained. The areas of woodland which are present on site have been examined and have been shown to be in a state of steady decline. The provision of residential development would enable these woodland areas to form part of the green infrastructure and enable the public to access and enjoy them.

Future public recreation could be kept to specific footpaths providing a benefit for existing and future residents. The proposed development of the site would reverse the current state of decline of the woodlands through investment in woodland management and maintenance, thus providing ecological benefits.

Further benefits of the proposed development site include a riverside linear park following the northern bank of the River Enborne. Whilst providing an attractive natural area of public open space, the riverside park will also provide a new route by foot and cycle from Wash Water to the new Country Park which forms part of the Sandlesford Park allocation and which is to be delivered through the planning permission to Bloor Homes. At present, there is only one public right of way from Wash Common through Sandlesford Park to the A339 – that being from Warren Road eastwards to a point opposite St Gabriel's School. The provision of a second pedestrian/cycle route will be of benefit to existing and future local residents.

<p>Please give reasons for your answer</p>	<p>See attachment 'Paula Saunderson - Full LPR Rep' for full consultation response. Comments on each chapter/policy can be found at the specific consultation point.</p> <p>SP13 – SITE ALLOCATIONS FOR RESIDENTIAL & MIXED-USE DEVELOPMENT – in Newbury</p> <p>Sites without Site Allocations and an absence of Policy include:</p> <ul style="list-style-type: none"> • <u>NEW 1 – LRIE within the London Road Estates DEA</u> (but NOT in the Brownfield Register) and earmarked for Office and Industrial use, yet it is unclear the status of some previously approved Residential Units on lands within, and Merchants Court which is now Residential and in the DEA. This land has the highly polluted Northbrook Stream running through it and partial culverting followed by un-culverted sections are clearly showing this pollution is build up and it runs into a SSSI. • <u>Gateway Plaza</u> (2 brownfield sites and the latest spreadsheet states their Planning Applications have expired). They are within London Road Estates DEA but appears to be mixed with Residential, albeit there are no complete Maps anywhere for the development as illustrated in this video because it has no Site Allocation? https://www.youtube.com/watch?v=RCa_C7DGfR8 . There is no logical reason why these lands are not in the Site Allocations and given Policy to guide their development through to 2039. • <u>the Kennet Centre/Eagle Quarter</u> redevelopment (Brownfield) which will probably go to appeal and something will happen there in the next 20 years. Ideal for Site Allocation with a Policy around it to determine the endless debates about Mix, Height, Density, Design, Provision of Public Open Space, Impact on the Conservation Area Analysis etc. etc. • <u>the Old Magistrates Court</u> (brownfield) which is within the Kennet SSSI Buffer Zone. Not started and required Buffer Zones are compromised. <p>All these 4 above are also subject to Flood Risk of varying degrees so Policy in the DPD is very important again in terms of mix, density, height, design, and Environmental Impacts etc.</p> <p>Likewise, some Sites which are already under construction should be included such as:</p> <ul style="list-style-type: none"> • the <u>Sterling Gardens Residential Phase 2</u> as the 1st Phase has been fraught with problems and the new road is not yet finished or tested, the SuDS have not been signed off, and there is still no agreement to deal with the on-street parking outside neighbouring properties in Kings Road which has been displaced. I would like to see a Site Allocation AND Policy for the Phase 2 Development which are separate blocks of flats. • The <u>Shaw 401 straddling the A339 North of Newbury</u>- issues around the SuDS and future phases as development appears to have stopped on the Donnington Heights west-side. The Shaw Valley East-side has significant flood risk to parts of the site and the Cumulative Impact of Development on Flood Risk in the Catchment Area (CIOD OFRICA) may not have been assessed as there is no Methodology for doing this within the new SFRA Level 1 Addendum 1. • The new <u>Mayfield Point Mixed Development at Wash Common</u> on the South-side between the College & the A339 which appears to be within the Settlement Boundary and has now gone to appeal. • <u>Sims Metal Management & J. Passey & Son Butchers, Turnpike Road/Waller Drive, Newbury</u>- (brownfield and an old knacker's yard) not started and again Contamination & Flood Risk issues as the site includes the Stone Copse bourn which has a history of flooding (42 in Waller Drive the other side of the road). It has never been clear why it was not included in the Turnpike Estate DEA as to make it viable it will not deliver any Social Housing. Would be better filling the gaps in Industrial or Manufacturing land. • Land adjoining the <u>Phoenix Centre</u> (brownfield) • <u>Bayer House and land to the rear of 1-15 Northbrook Street</u> – (brownfield and salami sliced to avoid EIA). The Sites include the very polluted and partially culverted Northbrook Stream which runs underneath the site. <p>Nb.</p> <p>The Map of Brownfield Sites is no longer visible, and we are just given a spreadsheet to try and visualise how they map together?</p> <p>Finding Maps of the DEAs is difficult.</p> <p>Given the comments above It almost appears as if someone has just forgotten to Allocate the Mixed Sites for Newbury within this Policy or most of them are on the too difficult pile which is precisely why they need Allocating and Policy behind them.</p>

The number of missing Mixed and Brownfield Sites gives the whole Plan for Newbury a feeling of not being SOUND and probably not Justifiable in its current form. There will be a huge increase in Dwellings and Households within this Plan without identified local Employment land to provide jobs for those households which indicates lots of extra commuting without any major improvements within the Transport for Southeast Strategic Investment Plan to 2050.

LRIE & Gateway Plaza –

None of this is allocated in the Plan under any category, and as far as I can ascertain none has Planning Applications in date. All lies within the London Rd Estates DEA.

These 2 or 3 Sites total about 13 hectares with mixed development, mixed Landowners, and at various Risk of Flooding.

- Fluvial from the R. Kennet, and Canal overflow
- Fluvial from Lambourn Catchment and the polluted Northbrook Ordinary Watercourse
- Groundwater levels which are between the Surface and 0.25m below the Surface,
- Kennet & Avon Canal Overflow
- Incidents of Sewage overspill.
- And the majority of the Area is in the NE NNZ for R. Lambourn Catchment (source to Newbury).

Part of this much fought over area which is known as NEW1 – LRIE (WBC land in London Road Industrial estate) does NOT have a Site Allocation or development plan policy. It is a horrible polluting area which includes an old Landfill Site, the Newbury Wastewater Treatment Works, a Calor Gas Centre, and a Plant Hire business that washes very undesirable soils into the faulty drainage.

It has been rumbling on for 10 years without the basic Environmental Assessments taking place and this really is an opportunity to try and have proper Site Allocation within this Plan and some Policy which would direct its re-development in a modern Holistic way. This would enable:

- the pollution of the Northbrook to stop
- the malfunctioning sewage and surface water drainage to be rectified,
- the WwTW to be expanded to cope for Sandleford,
- the Flood Risk downstream and to the North in the Catchment where I live to be rectified,
- the correct Buffer Zones to be introduced for the SSSIs,
- projected Air Quality, Noise, Light, Hot Spots to be properly dealt with
- Nature-based solutions within a new Green/Blue Infrastructure Framework to be mapped and installed to gain Biodiversity
- And Highways volumes and drainage to be properly assessed.

We do not want to wait for an SPD – we want these Sites Allocated now with Policy

These Sites are part of the London Road Estates DEA, however the Policy for DEA at DM32 is not sufficiently robust to cover them and they should be Allocated Sites – separately or jointly whichever the wise Inspector feels is the best way to deal with them.

As there is a good deal of confusion over this rather large area right on my doorstep. As it currently poses more flood risk I was hoping that the Local Plan Review would include the Site(s) to give clarity on what high-level Policy would be in place to guide the work of development over a 20 year timescale. The avoidance of conducting holistic Flood Risk Assessment from ALL Sources and preparation of a holistic Surface Water Drainage Strategy with Thames Water cannot continue. The SFRA Level 2 Site Specific Analysis in Appendix B&C demands this is done under the Local Plan Review and it is a cop out not to include these Sites in this LPR.

<Comments from representation form>

None of the **Key Mixed Sites for Newbury** are included such as NEW 1 – LRIE, Gateway Plaza, Kennet Centre/Eagle Quarter, and without these Key Sites and any specific Policy around them.

The Plan omits **Key Brownfield Sites for Newbury** which has favoured the Sandleford Greenfield site.

It omits one **Key Employment Site for Newbury**.

Without a **Newbury Settlement Sub Area SP Policy** there is no clearly articulated Map or Data for this important Major Town.

Without clear **Maps & Data & Lists for Newbury** of what is already promised, is underway, and the remaining numbers required by the area it is not an Effective Plan as it stands.

Therefore, I conclude the Plan is **Not Sound** for Newbury Settlement and:

- Is Not Positively Prepared
- Is Not Justified
- Is Not Effective for the next 20 years, and this Plan as it stands will Not Achieve the Visions

My document highlights many examples.

Soundness

This means all the missing sites identified in this Document will not have the benefit of coming before a Planning Inspector. This position, in my view, makes the LPR 2022-2039 **Unsound** in respect of the Newbury Settlement.

The missing Sites mean it has **not been Positively Prepared**,

It is **Not Justified** in terms of Households vs Infrastructure vs Employment as this is not adequately explained for this Settlement.

	<p>As it is without the missing Sites which are required to make it work it will also Not Be Effective. Therefore, I conclude the Plan is Not Sound for Newbury Settlement and:</p> <ul style="list-style-type: none"> • Is Not Positively Prepared • Is Not Justified • Is Not Effective for the next 20 years, and this Plan as it stands will Not Achieve the Visions <p>My document highlights many examples.</p>

Please give reasons for your answer	<p><i>Extract of full representation relevant to this consultation point. For full representation see attachment. Footnotes are included in the attachment.</i></p> <p>New allocations</p> <p><i>Sandleford Park (as allocated at Policies SP13 and SP16)</i></p> <p>The HBP, at Appendix 2, sets out the housing trajectory including the phasing of individual sites.</p> <p>The Council contends that Sandleford East (which benefits from outline planning permission) will begin delivering 100 dpa from 2025/26 through to 2034/35, with 80 dwellings provided during the year 2035/36.</p>

This appears to be an optimistic timetable, particularly given the previous planning delays with the site (allocated in 2012), that we understand a reserved matters application has yet to be submitted for any phase(s) and the need to address several planning conditions prior to commencement of construction. The start date of 2025/26 for first completions therefore seems very much a 'best case scenario'.

It is understood that the site is being delivered by a single housebuilder. This therefore could lead to a lower absorption rate due to lack of variety of housing product in accordance with the findings of Letwin's Independent Review of Build Out (October 2018). The 100 dpa across the plan period therefore is likely to be impractical and affect site delivery over the plan period.

With regards to Sandleford West, this site does not have any planning permission despite an outline application being submitted in April 2018. It appears that the Council are awaiting an amended package of information and revised plans. Therefore, first completions in 2027/8 is simply conjecture. There will also be a need to submit and agree reserved matters and address conditions ahead of that time.

With the above in mind, it is considered that the Council should take a more cautious approach with the delivery of Sandleford Park during the plan period. The Regulation 18 Consultation noted that Sandleford Park was expected to deliver 1,000 dwellings across the plan period. This seems a more robust figure than the 1,580 dwellings now proposed, and a more realistic basis for the LPR's development strategy.

North East Thattham (as allocated at Policies SP13 and SP17)

The Council has reduced the delivery of NE Thattham from a total of 2,500 dwellings to 1,500 dwellings. Notwithstanding this, the Council anticipate that NE Thattham will deliver 1,500 homes over the plan period (compared to 1,250 dwellings expected at the Regulation 18 stage). For reasons we discuss below, this appears to be unjustified.

The justification for NE Thattham

The supporting evidence base for NE Thattham - including the Thattham Strategic Growth Study (which includes a Vision and Concept Plan) - still refer to the delivery of 2,500 homes and has not been updated to reflect the position in the current version of the LPR. This also includes the Viability Testing which tested 2,300-2,500 new homes. This work would need to be updated for any Plan to be found sound.

The site allocation policy also still refers to the delivery of the secondary school. However, there is no updated viability appraisal to confirm that this is deliverable for a site of 1,500 new homes in total. This raises the following concerns:

- The Thattham Growth Study (Stage 3) acknowledges that strategic development at this scale (i.e. 2,500 new homes) is the only approach that is likely to deliver an additional secondary school for the town, without which any growth would cause issues in provision.
- Again, the Thattham Growth Study (Stage 3) notes that the scale of development (i.e. 2,500 new homes) would not create the need for a secondary school development on its own and, therefore, is only half-funded by developer contribution. A reduction to 1,500 new homes is therefore likely to increase this funding gap further, with no indication of how this additional funding will be resolved.
- A secondary school would internalise a significant number of trips from the proposed development. Indeed, the Access and Movement Report for NE Thattham in the Thattham Growth Study (Stage 3) assumes that the secondary school will have 50% internal trips. Therefore, with question marks over the potential delivery of a secondary school for a site of 1,500 new homes, the sustainability credentials of NE Thattham are uncertain.

As a result, the identification of NE Thattham lacks evidence to support the allocation of for 1,500 new homes. In particular, the lack of delivery of a secondary school and reduction in housing numbers would take away the key justification for growth at this location to help deliver new education provision and additional community infrastructure. The SA/SEA, at Appendix 4, acknowledges this but the Council still proceed on this basis as it is considered that 2,500 new homes in Thattham is too many.

There is a confused picture in the evidence base. We note the publication of the West Berkshire Strategic Vision (November 2022), which is explained to be a response to paragraph 22 of the NPPF (requiring local plans to look beyond the plan period where they include larger scale developments).

This evidence suggests that there remains intention for a much larger development at NE Thattham than the 1,500 homes now included in the LPR. The settlement boundary amendments, and site boundaries identified in the LPR (footnote 14), are unchanged from Regulation 18, gives clear indication that a more substantial development is planned for (footnote 15).

The LPR, however, makes no reference to this strategic vision. In which case, there is a potential conflict with national policy (specifically NPPF 22).

We also note that, whilst the vision has been subject of targeted stakeholder consultation, it has not been published for public consultation as part of the Draft LPR at Regulation 18 stage.

<p>Please give reasons for your answer</p>	<p><i>Omission Site</i></p> <p>CALA is promoting land at Pinchington Lane for residential development (HELAA site GRE1).</p> <p>In the context of the preceding sections identifying potential weaknesses in the development strategy of the LPR, and noting that there are many more available sites in the HELAA that could be brought into a more effective strategy, we now briefly address the evidence base in respect of the assessment of GRE1.</p> <p>The latest HELAA11 concludes that the site is unsuitable for development. Previous versions, however, considered it “potentially developable”¹².</p> <p>Further consideration of the latest site assessment criteria indicates that the latest conclusion is unsound or at least premature in the absence of further site specific survey. Neither is it consistent with the Policy DM12 (Registered Parks and Gardens), which makes it clear that development within, or otherwise affecting, these designations is not necessarily precluded, but that care and attention is needed over managing the impacts. The supporting text explains that applications (for development) within or adjoining parks and gardens “will therefore be expected to protect the special features, historic interest and setting of the designed landscape”¹³.</p> <p>In summary, the HELAA assesses the site to be:</p> <ul style="list-style-type: none"> • Not impacting the AONB; • Adjoining the settlement boundary; • Benefiting from Local Highways “initial support”, noting the potential access and suitable visibility, and would require further traffic survey (common to other potential development sites); • At low risk of river flooding; surface water can be managed on site and low risk of groundwater flooding, and no recorded history of flooding; • Absent of open space designations; • At low risk of contamination; • Low risk of noise and vibration; • Adjacent to protected wildlife areas (Greenham and Crookham SSSI) and within a biodiversity opportunity area, therefore, detailed site assessment is needed noting that at least part of the site may be suitable but care and mitigation will be needed; • Outside of the Nutrient Neutrality Zone; • With some TPO trees surrounding the property (but few within); • Within a Registered Park and Garden, a designated heritage asset, where development is normally inappropriate, but the recommendation is for further site specific heritage assessment; • Within minerals safeguarding area, possibility of prior extraction; • No other suitability observations are made beyond these standard considerations. <p>The HELAA’s overall conclusion is that the site is “unsuitable” simply due to the heritage impact.</p> <p>We would also note that the site is outside of the Detailed Emergency Planning Zone (DEPZ14).</p> <p>Overall therefore, we consider that the evidence clearly indicates that the site is well located to the built-up area, and has many positive attributes, and is worthy of detailed consideration, including with site specific heritage and ecology assessment.</p>

To assist the Council in this, CALA has submitted a vision for the development of the site and commissioned a heritage report¹⁵, copies of which are appended to this statement. This was submitted to the Planning Policy team last year, and its receipt was acknowledged. However, we note that no acknowledgement of this evidence has been given in the updated HELAA.

In summary, the heritage statement concludes that there is realistic expectation of less than substantial harm from development of part of the site:

In conclusion the site of the proposed development has low potential to impact on below ground archaeology dating to before the creation of the Sandford Parkland. However it is likely that as a 'greenfield' site further evaluation to assess this potential by the conventional methods of geophysical survey and trial trenching are likely to be requested by the local authority.

The site, whilst within the RPG is in private ownership and has been since the 1930s. The site is not accessible from or connected by footpaths to the remainder of the RPG to the south west.

There is therefore no public appreciation or physical indicators of it as being part of a wider landscape setting. The significance and relevance of the RPG designation upon the site has been significantly reduced by the residential development to the west and the site does not in any real sense relate to the remaining significant portion of the RPG situated around St Gabriel's school.

*With respect to the impact of development on the RPG this will be harmful, **though less than substantially harmful**. The impact of development will be due to the reduction in the parkland area, its transformation from parkland to residential and its visual presence when seen from outside the parkland and when viewed from within the park area.*

Mitigation to ensure the impact of the development is as low as possible may be achieved by employing the following design principles:

- *Enhancing the parkland by the inclusion of elements such as the historic driveways in the masterplan proposals (NPPF para 126; Core Strategy CS19).*
- *Limiting the impact of new housing on the northern boundary of the park by landscaping (Core Strategy CS19).*
- *Maintaining the present wooded character of the area (Core Strategy CS19).*
- *Ensuring that new development is appropriate in terms of scale and design in the context of the existing settlement form, pattern and character (Core Strategy CS19).*

The illustrative proposals seek to include these mitigation design principles through: the design of the layout referencing the historic driveways; the retention and enhancement of existing landscaping on the northern boundary; by maintaining and seeking to enhance the woodland area to the south west, including improving the setting around the fishpond to make it more appreciable in the landscape and; by proposing a development that is carefully designed and considered in form, that will respond appropriately to the context around whilst have due regard and care for its setting within the existing RPG.

*The objective of applying these principles is to ensure that the potential impact of development **will be less than substantially harmful for the purposes of the NPPF**. (Our emphasis).*

1. Do you consider the Local Plan Review is legally compliant?	No
* Yes	
* No	
Please give reasons for your answer	<p>egulation12 ofThe Environmental Assessment of Plans and ProgrammesRegulations 2004 states: “(1) Where an environmental assessment is required by any provision of Part 2 of these Regulations, the responsible authority shall prepare, or secure the preparation of, an environmental report in accordance with paragraphs (2)and (3) of this regulation. (2) The reportshallidentify, describe and evaluate the likely significant effects on the environment of— (a)implementing the plan or programme; and (b)reasonable alternatives taking into account the objectives and the geographical scope of the plan or programme.” TheSA/SEA Environmental Report states: “The Core Strategy had afocus on Newbury and Thatcham, with two strategic sites allocated in Newbury and smaller sites allocated across the rest of the district. This mixofstrategic and smaller sites across the district worked well for the Core Strategy by providing flexibility and natural phasing of developments across theplan period. As a result a similar mix of sites is considered to be appropriate for the LPR with noother alternatives considered.” Regulation 12requirestheidentification, description and evaluation of ‘reasonable alternatives’.If an approach worked well in the current plan period, itdoes not follow thatit is the best approach for the following plan period—andit is certainlydoes not followthatthere are no‘reasonable alternatives’. It is incorrect for theSA/SEA toassertthat the approach in thecurrentLocal Plan has‘worked well’ by providing‘naturalphasing of developments across the plan period.This is certainly not the case for theSandleford Strategic Site Allocation. Policy CS3 of the current Local Plan states: “Within the area identified at Sandleford Park, a sustainable and high quality mixed usedevelopment Issue:TheSustainability AppraisalforPolicySP1-Spatial Strategy Section/paragraph:4.19 Policy:SP1–SpatialStrategy Appendix: Policies Map: Other: SP16,SP17 Sustainability Appraisal / Strategic Environmental Assessment(SA/SEA) November 2022 Sustainability Appraisal /Strategic Environmental Assessment; Appendix 5 will be delivered in accordance with the following parameters: Phaseddelivery of up to 2,000 dwellings, of which at least 40% will be affordable and withan emphasis on family housing. At least half the housing is planned to be delivered by2026;” However,as the SA/SEA explains(pages 35-37):“no work has started at the site atSandleford, with outline planningpermission for the eastern part of the site only granted (on appeal) in May 2022.” The site has been re-allocated“as a single sitefor up to 1500 dwellings”.“Reducing thenumber of dwellings on the site allowed forbetterconsideration of the constraints on the site (Ancient woodland, drainage, landscape buffers etc.) and willallow for adequate and appropriate mitigationmeasures to be put in place.” TheSA/SEAstates(page25, belowthetable): “Following the decisionthat the spatial strategy should focus on Thatcham, strategic site options were considered, based on the sites submitted throughthe February 2020 HELAA.” Therefore,‘reasonable alternatives’thatare notaround Thatchamwere not considered.This decisionwas alsobased on the falsepremisethat the town ofThatchamwould have sufficient infrastructure to support</p>

	<p>this development, either at the time of the decision or as a result of the development. The lack of infrastructure in Thatcham is addressed by other representations of the Town Council.</p> <p>The Sustainability Appraisal / Strategic Environmental Assessment (SA/SEA) for Policy SP1 cannot be legally compliant, because it explicitly states that it has not complied with the requirement to identify, describe and evaluate reasonable alternatives to the proposed policy. The experience of delays in delivery of Sandleford Park in the current plan period (described in paragraphs 6.44–6.46 of the draft Local Plan, and the reduction in the number of dwellings from 2,000 to 1,500, suggest that the proposed policy for North East Thatcham is not even the best alternative.</p>
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>The Sustainability Appraisal should be based on evidence, rather than speculation or supposition. Table 30 compares the SA/SEA a development of 2,500 homes (i.e. the proposal for the Regulation 18 consultation) and for 1,500 homes (i.e. the proposal for the Regulation 19 consultation) for North East Thatcham. It should therefore be based on the SP17 Policy for this development in the Emerging Draft Local Plan for the Regulation 18 consultation and the Draft Local Plan for the Regulation 18 consultation. The table below compares the text of Table 30 with the corresponding parts of Policy SP17 in those two consultations.</p> <p>With the exception of secondary education, the version of Policy SP17 for 1,500 homes (i.e. Regulation 19) gives a greater positive impact and confidence in that impact than the version of Policy SP17 for 2,500 homes (i.e. Regulation 18). Nothing can be meaningfully inferred regarding provision of secondary education:</p> <ul style="list-style-type: none"> -The figure of 8FE appears to have been copied from the Thatcham Strategic Growth Study, where it is given very tentatively as a need resulting from other unspecified developments in the Newbury/Thattham area. -The figure of 2.5FE is below the minimum viable size for a secondary school, so is undeliverable. <p>Thattham Town Council has provided detailed representations on many aspects of Policy SP17, including primary healthcare, secondary education and the provision of social infrastructure in the town.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p>	No

* No	
Please give reasons for your answer	N/A
4. Proposed Changes	A new Sustainability Appraisal / Strategic Environmental Assessment (SA/SEA) needs to be undertaken, which considers all 'reasonable alternatives' to the decisions relating to strategic sites and proposed approach of Policy SP1.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	Local Plan Review complies with Sections 19 and 20 of the Planning and Compulsory Purchase Act 2004 (as amended)
2. Do you consider the Local Plan Review is sound? -	No

<p>Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	<p>[See attached Proposed Vision document]</p> <p>Owing to the anticipated shortfall in housing delivery requiring the need for additional allocations, it is considered that an additional allocation of land to the east of Waller Drive, Newbury should be included in this policy. As demonstrated in the appended Vision document, this sustainably located site could accommodate up to approximately 350 dwellings and associated public open space. Land to the south of Turnpike Road by the hospital is available for commercial or specialist residential purposes.</p> <p>Summary</p> <p>These representations introduce land east of Waller Drive, Newbury as a highly sustainable development opportunity, suitable for a residential allocation in the Local Plan Review. Additionally, land south of Turnpike Road is available for commercial or specialist residential use. The sites represent an excellent opportunity to deliver much needed, high-quality market and affordable housing, publicly accessible open space and specialist residential or commercial uses whilst maintaining the separation of Newbury and Thatcham.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Suggested Modification: Additional Residential Allocation - Land East of Waller Drive, Newbury</p> <p>The land East of Waller Drive, Newbury provides an opportunity for sustainable residential development in close proximity to employment uses, public transport nodes and the services and facilities of Newbury and Thatcham. The site is well located to form a logical extension to the residential area of Newbury in addition to creating an opportunity for betterment to the surface water flooding reported in the vicinity at Turnpike Road. The representation is supported by a Vision document which further justifies development in this location and demonstrates that landscape impact will be marginal, successfully maintaining and reinforcing the separation of Newbury and Thatcham.</p>

The land east of Waller Drive comprises several parcels of land to the north and south of the access lane to Tigers Day Nursery. The site is currently farmland and slopes upwards from Turnpike Road to the north and is bounded by Waller Drive to the west and a hedgerow with an unnamed watercourse to the east. The site is surrounded by extensive hedgerow planting with sporadic tree coverage in the southern fields north of Turnpike Road.

An additional parcel of land south of Turnpike Road is available for commercial or specialist residential purposes. The site is flat and bordered by hedgerow and trees and is well related to Newbury. The site could be developed for commercial purposes or specialist residential use complimenting the nearby hospital.

The site could provide employment opportunities for the area whilst recognising the importance of this gateway to Newbury. Development will be focused to the western side of the site to ensure that there is a landscaped buffer to the roundabout to retain the views towards Thatcham and to ensure separation of the settlements.

Land east of Waller Drive, Newbury provides a highly sustainable development opportunity, which would accord with the Council's Vision of providing sustainable development at the main urban areas, including supporting infrastructure, that would deliver a range of different house types, sizes, tenures and affordability that would help to address West Berkshire's future housing need. The site is in one ownership, providing comfort in terms of its deliverability, and avoiding protracted developer negotiations across different interests as demonstrated at Sandleford Park and as likely to occur at North East Thatcham.

We agree with the Council's view that Newbury and Thatcham should remain separate and distinct towns with their own character, whilst remaining geographically close and functionally related, offering significant employment provision with good access to transport linkages. Through the landscape-led master planning process we have demonstrated in the attached opportunities and constraints analysis contained within the appended Vision Document, and the concept masterplan that flows from that analysis, that an attractive development can be provided in a parkland setting that would not have an adverse impact on the existing settlement form, pattern and character of the landscape, and which can be delivered in accordance with the Council's emerging LPR development management policies. The development proposals for the site seek to provide surety that the separation of Newbury and Thatcham will be maintained in addition to providing highly sustainable residential and commercial development in discreet landscaped parcels within the site.

The development of the concept masterplan has been entirely landscape led, seeking to respect and preserve the existing landscape, TPO'd trees and heritage assets through a sensitive response and sympathetic development in a parkland setting. The approach seeks to provide opportunities for improved green infrastructure, woodland planting, accessible and useable public open space in a clearly defined public realm, maximising biodiversity enhancements and sustainable transport solutions whilst providing an opportunity to permanently retain the physical separation of Newbury and Thatcham in conjunction with enabling development in this highly sustainable location.

Development proposals east of Waller Drive, Newbury have given due consideration to the nature of the local topography and have kept built form away from the higher ground in the northern section of our client's landownership, seeking to maximise new public open space opportunities in this location. The development proposals will contribute positively to the local character and will take references from the local architectural and landscape vernacular through the retention of the parkland character within the site. The proposed green infrastructure network within the site has sought to conserve and enhance existing biodiversity features and to create linkages between local features through the retention of existing boundary features, individual trees and the introduction of new woodland planting.

The provision of new woodland areas and other areas of recreation within the site will reduce pressure on neighbouring woodlands and contribute to the local character and sense of place in line with the opportunities raised within the Local and National Character Area profiles. Landscape buffers along the western and eastern boundaries of the site will include enhancement of existing boundary vegetation to help screen and soften views towards the site from neighbouring visual receptors.

Public footpaths passing through and directly adjacent to the site will be retained and buffered by including these routes within green corridors passing through development areas or including perimeter buffers to routes outside but adjacent to the site. This will maximise the potential for strengthening the local green infrastructure in accordance with draft Policy **SP10** 'Green Infrastructure' and will enable opportunities to increase pedestrian and cycle access across the site tying into the local network in accordance with draft Policies **SP23** and **DM42** 'Transport Infrastructure'.

Access to the land north of Turnpike Road is currently proposed via a priority junction west of the existing access to Tigers Day Nursery and Henwick Court complex. Sustainable infrastructure to contribute to the Council's aim to deliver carbon neutrality by 2030 will be incorporated into the development, including contributions towards public transport and enhancement of active travel routes to Thatcham and Newbury.

5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?
* Yes
* No

Yes

5. Independent Examination

Attendance is required at the examination to enable explanation of stance, participation in the discussions and to answer questions posed by the Inspector.
Carter Jonas confirms that it wishes to take part in the oral part of the Local Plan examination to enable the explanation of our stance, to impart to the Inspector specific and relevant knowledge about West Berkshire, the land east of Waller Drive, Newbury, in addition to answering any questions that the Inspector may have.

2. Land at Long Lane, Newbury (site reference CA15)

The site and surroundings

2.1 The site extends to an approximate area of 16.74ha occupying land which includes three agricultural fields separated by Long Lane (B4009) (see Site Location Plan at Appendix 1).

2.2 The site is situated approximately 2km north of Newbury town centre, and physically adjoins the edge of the settlement on the western field (10.17ha). The eastern field (6.57ha) is separated from the settlement by Shaw Cemetery. Both parcels are accessed directly off Long Lane B4009.

2.3 The western parcel comprises two agricultural fields separated by an access track serving Highwood Farmhouse. The Farmhouse is to the west of this parcel, which is also bounded by established mature vegetation (tree belt). There is a Public Right of Way along this boundary running north-south. The southern boundary abuts the rear of dwellings on Highwood Close. The eastern boundary abuts Long Lane and comprises hedgerows. The northern boundary abuts open countryside and also comprises hedgerows.

2.4 The eastern parcel to Long Lane narrows to the north of the site. The boundary to Long Lane comprises hedgerows, the southern boundary abuts Shaw Cemetery and is bounded by established vegetation. The eastern boundary abuts a disused railway line and dense vegetation. A Public Right of Way runs close to the southern portion of eastern boundary before diverting off to the north east. To the north of the parcel is a cattery and kennels, beyond which is open countryside.

2.5 An oil pipeline with 3m easement crosses the very southern end of this parcel. There is also a flood attenuation bund that has been constructed by West Berkshire Council along the southern boundary of the eastern parcel of land, to the south of the oil pipeline, known as the Cromwell Road Flood Alleviation Scheme.

2.6 The site lies fully in Flood Zone 1. The site is not subject to any statutory landscape or ecological designations. In terms of heritage assets, the site does not lie within or adjacent to a Conservation Area or contain or lie within the setting of any Listed Buildings or Scheduled Ancient Monuments.

2.7 The site is within walking distance of Trinity Secondary School and Sixth Form (1km to the west), St Joseph's Catholic Primary School (1.3km to the south), Shaw-cum-Donnington Primary School (1.5km to the west) and The Winchcombe School (1.6km to the south west), as well as local shops along Kiln Road. A bus service provides connections to Newbury Town Centre and West Ilsley.

2.8 Newbury is the main settlement in the District which has good rail, bus and road connections to Reading, Basingstoke and London.

2.9 The land parcels are under separate ownership but controlled by Donnington New Homes who are committed to bringing forward residential development on the site following an allocation through the Local Plan Review process.

2.10 New development here on any scale will need to be respectful and responsive to its context, aware of the need to maximise use of development land but protecting the special character of the surroundings. The proposals for the site have been developed in this context.

2.11 There are relevant planning permissions and site promotions to the north of Newbury that are in proximity to the Site:

- 75 dwellings approved at Coley Farm (to the east of the Site) – application reference 20/00604/FULEXT.
- Reserved matters approval for 401 dwellings to the west of Long Lane, north of Vodafone Headquarters – application reference 20/00048/RESMAJ.
- Reserved matters approval for 222 dwellings to the west of Long Lane, west of the A339 – application reference 18/03061/RESMAJ.

Technical Studies

2.12 A series of technical studies have been undertaken to inform the emerging proposals for the site and support its assessment by the Council as a suitable site for allocation for residential development. These were previously submitted to the Council at Regulation 18 stage in 2021, although their conclusions do not appear to have been fully used to inform the Council's own Sustainability Appraisal / site selection process.

2.13 These studies are summarised below.

Flood Risk and Drainage

2.14 A Preliminary Flood Risk Assessment has been prepared by Glanville (February 2021, see Appendix 4). From a flood risk perspective, the site is within Flood Zone 1 (low risk). There are areas of low to high risk of surface water flooding, which are across the centre of the sites, running north to south, as well as along ground depressions within the site boundary.

2.15 Development on the site provides opportunities to improve flood protection for both existing properties that have been affected by surface water flooding, as well as future occupants. Suitable provisions for the disposal of surface water and opportunities to increase flood storage offered by the Cromwell Road Flood Alleviation Scheme can be provided on-site. The SuDS features identified within the report would also provide effective nitrogen mitigation measures as well as ecology benefits to support biodiversity net gain.

2.16 The report concludes that the site can be developed without increasing flood risk on-site or elsewhere. Flood risk and drainage are not therefore considered to represent a constraint to development of the site.

2.17 The SA scoring for the site is negative, however our assessment is that this should be a positive impact for the reasoning above.

Landscape

2.18 A Preliminary Landscape and Visual Baseline Appraisal has been prepared by EDP (February 2021, see Appendix 5).

2.19 On the basis of a site walkover of the site and review of relevant planning policy and designations, there do not appear to be any in principle landscape and visual constraints to the development of the site, with effects on visual amenity and landscape character considered to be manageable through a well-designed scheme. There is no intervisibility between the Site and the North Wessex Downs AONB and it is considered there would be no effects on its setting due to distance and topography.

2.20 The site walkover and wider consideration of views has found that the greatest potential for views into the site are from the north and east. However, this view is seen in the context of north Newbury with the B4009 running through the site.

2.21 Overall, it is considered that the potential for adverse effects can be moderated by retention of distinctive landscape features, establishment of new boundary hedgerows to enhance the landscape structure and integration of sound principles underpinning a site-wide Green Infrastructure approach that contributes towards addressing the criteria of local and national policy requirements.

2.22 The SA scoring is uncertain for the protection and enhancement of multi-functional green infrastructure, and also for the conservation and enhancement of the character of the landscape. We consider these will be positive impacts as the proposed development can accommodate high-quality Green Infrastructure on-site, providing a range of benefits. Development can be designed to provide suitable landscape buffers to the north of the site in particular, with dwellings designed in a sensitive manner at a lower density.

Ecology

2.23 A Preliminary Ecological Appraisal has been prepared by The Landmark Practice (January 2021, see Appendix 6).

2.24 Designated sites are not considered likely to pose a constraint to its future development due to their distance and lack of functional links to the Site. A Phase 1 walkover survey mapped the habitats present and potential for protected species which would need to be confirmed through further survey work.

2.25 There are no Habitats of Principal Importance within the site. The site contains common low ecological value habitats. There are higher quality habitats surrounding the site therefore it is recommended that these are protected from development impacts.

2.26 It is not considered that development of the Site will result in significant negative ecological impact nor would the potential presence of any protected species be likely to preclude or significantly limit the capacity of the site to deliver housing, subject to a well-designed scheme.

2.27 The scheme will deliver a 10% biodiversity net gain on-site.

2.28 The SA scoring for the conservation and enhancement of the biodiversity and geodiversity of West Berkshire is negative. We consider there will be a positive impact for the reasoning above.

Transport

2.29 A Transport Appraisal has been prepared by David Tucker Associated (dated February 2021, see Appendix 8).

2.30 The report confirms access can be achieved off the B4009 into both parcels via and controlled by the promoter and public highway. All accesses can achieve local and national standards in terms of geometry, capacity, safety and visibility.

2.31 Trip generation for up to 260 dwellings forecasts less than 2 additional vehicles per minute during the morning and evening peak hours through junctions nearest to the site. This is unlikely to result in a material impact on highway safety or capacity.

2.32 The scheme is not dependent on a future link road from the B4009 to A339 coming forward.

2.33 The SA scoring for supporting health and active lifestyles, to improve access to education, health and other services, and to increase opportunities for walking, cycling and use of public transport is positive, which is agreed with. However, the SA scoring for reducing accidents and improving safety is negative. We consider this will be positive due to the reasoning above that the site can achieve safe and suitable access, with an acceptable level of traffic generation into the local road network that has capacity to accommodate this.

Archaeology/Heritage

2.34 An Archaeological Desk Based Assessment has been prepared by Thames Valley Archaeological Services (January 2021, see Appendix 7).

2.35 There are no designated heritage assets within the boundary of the site, and no in-principle constraints to its allocation and development have been identified.

2.36 The report considers there is potential that the Site was within the battlefield of the Second Battle of Newbury (1644) although this has not been formally defined. Several cannon balls are reported as having been found within the site. The wider area around the site contains limited evidence for prehistoric and Roman occupation mainly in the form of findspots and some undated cropmark evidence, moderate evidence for medieval activity and extensive evidence for post-medieval and modern occupation. LiDAR analysis has also identified several features of possible archaeological origin.

2.37 Further archaeological investigation to assess the potential of the site can be achieved through an appropriately worded planning condition.

2.38 On the basis of the above, there is no reason to believe that archaeological or heritage issues will constrain the deliverability and/or capacity of the site for residential development.

2.39 The SA scoring for the protection, conservation and enhancement of the built and historic environment to include sustaining the significant interest of heritage assets is negative. We consider this will be a neutral impact as there are no known heritage constraints relating to the site. Further archaeological investigation is required that can be suitably achieved through a planning condition.

Nutrient neutrality

2.40 A Technical Note on Nutrient Neutrality has been prepared by Glanville (dated January 2023, see Appendix 9). West Berkshire Council has issued guidance and a Nutrient Budget Calculator for the River Lambourn SAC specifically.

2.41 Thames Water have confirmed that foul water from any future development of the site will discharge to the Newbury STW Wastewater treatment works, which itself discharges into the River Kennet. As the River Lambourn is not the outfall for the treatment works, the site would not impact the nutrient load to the River Lambourn SAC.

2.42 Regarding surface water runoff, the potential nutrient load from the proposed development has been calculated using WBC's Nutrient Budget Calculator.

2.43 There is no SA scoring relating to nutrient neutrality.

The Proposed Development

2.44 The technical studies undertaken indicate that the site could accommodate approximately 260 dwellings. A Concept Masterplan indicating how the site could be developed is attached at Appendix 2.

2.45 The Concept Masterplan has been guided by the following factors:

- Retention of boundary vegetation for visual impact and ecological importance;
- Adjoining PRoW links;
- Existing residential properties/businesses;
- Surface water flooding area;
- Oil pipe and 3m easement;
- Overhead electricity pylons; and
- Topography and views into the site.

2.46 The developable area totals approximately 40% (6.83ha) of the site, with the remaining 60% (9.91ha) provided as green space which will be landscaped open space for existing and future residents to enjoy.

2.47 The Concept Masterplan illustrates how development of the site has been led by the landscape and ecological considerations, providing substantial areas of green space, part of which acts as SuDS features to improve the Cromwell Road Flood Alleviation Scheme.

2.48 Development parcels have been given sufficient buffers to boundary vegetation and Highwood Farmhouse. An area of lower density housing is proposed to the north of the western parcel, in a courtyard, barn-style residential cluster to ensure a sensitive edge to the north. There are green links between some development parcels, with area for a LEAP.

2.49 Vehicular access would be provided from both parcels onto Long Lane. There is a potential for a route to connect through to sites to the west, to eventually connect to the A339, if available in the future.

2.50 The framework has been drafted according to the following assumptions:

- The proposed housing mix will respond to local housing need and include a range of 2, 3 and 4 bedroom homes and include provision of affordable housing in accordance with proposed policies.
- Housing will range in scale and height between 2 and 2.5 storeys. No building on the site will be taller than 2.5 storeys.
- Detail with regards to materials, planting etc. will be dealt with at the application stages of the planning process, although design detail will seek to reflect the locality.

2.51 We consider that the development of the site would secure the following benefits:

- Housing Need - the site is capable of delivering approximately 260 high quality family homes, assisting in the delivery of new market and affordable housing that is capable of addressing local need in terms of type and tenure. The site can be brought forward for development quickly, by a well established local housebuilder and is capable of making an important contribution towards the immediate housing needs of the District during the early years of the plan period.
- Housing Mix and Choice – the site is capable of delivering a mix of open market and affordable housing reflective of current and future demographic and market trends and the needs of different groups in the community.
- Open Space - any new residential development will provide a strong landscape framework comprising new open space provision for formal and informal play and recreation providing opportunities embedded within green infrastructure. A housing development on the site would include permeable and legible pedestrian and cycle routes, linking through to the existing settlement of Newbury and to the Public Right of Way networking connecting to the surrounding countryside.
- Promoting Healthy Communities - the site is in an ideal location for residential development, immediately adjacent to the most sustainable settlement in the District and in close proximity to existing community facilities and services which are easily accessible by foot, and beyond this is Newbury Town Centre which provides access to key locations such as Reading, Basingstoke and London.
- Economy – the proposed development will provide a boost to the local economy during construction and operation.

3. Regulation 19 Proposed Submission document representations

Proposed residential site allocations

3.17 Having taken into account existing commitments and windfalls, the draft Plan proposes the delivery of 4,252 dwellings through specific housing allocations. The following allocations are retained allocations from the adopted Core Strategy and Site Allocation documents.

3.18 The following residential site allocations are proposed in Newbury and Thatcham:

Retained allocations:

- Sandleford Park, Newbury (SP16) – 1,500 dwellings
- Land at Bath Road, Speen, Newbury (RSA2) - 100 dwellings
- Land at Coley Farm, Stoney Lane, Newbury (RSA3) – 75 dwellings
- Land off Greenham Road, South East Newbury (RSA4) – 160 dwellings

- Land north of Newbury College, Monks Lane, Newbury (RSA1) – 15 dwellings

New allocations:

- North East Thatcham (SP17) – 1,500 dwellings

3.21 Some of the above allocations are retained from the previous adopted plan period of 2006 – 2026 due to the overlap of the plan period for the emerging plan (2022 – 2039). These amount to 2,652 dwellings that were outstanding from the previous plan period at 31st March 2022.

3.22 New sites proposed for allocation in the new plan period total 1,720 dwellings, which with 1,500 proposed at North East Thatcham.

3.23 The proposed allocated sites are listed in the table below, along with a review of their current planning status. We would question why some are retained as allocations, rather than commitments, given their planning status.

Retained allocation from Core Strategy: Sandleford Park, Newbury (Policy SP16) This is a site allocation being carried forward from the current adopted Local Plan for approximately 1,500 dwellings (current policy CS3).

Planning Status: Planning applications have been submitted to the Council however the site does not yet benefit from full planning permission. A large part of the site benefits from outline consent for 1,000 dwellings (submitted by Bloor Homes and Sandleford Farm Partnership, application reference 20/01238/OUTMAJ, allowed at appeal in May 2022 (ref. APP/W0340/W/20/3265460)).

The remainder of the allocation is under different land ownership (Donnington New Homes) and a live application for up to 500 dwellings (reference 18/00828/OUTMAJ) is pending determination.

1,580 homes have been counted for in the Council's housing supply position at 31st March 2022. It is unclear from the Council's Annual Monitoring Report 2022 and Five Year Housing Land Supply 2022 statements how many dwellings arising from the Sandleford allocation are anticipated to be delivered within the first 5 year period.

The AMR does acknowledge *"the timing of delivery is likely to be largely in the period post 2026"*.

Retained allocation from Core Strategy: Land north of Newbury College, Monks Lane, Newbury (site ref. HSA 1) This is a site allocation being carried over from the Housing Site Allocations DPD (adopted 2017) for approximately 15 dwellings.

Planning status: the site benefits from outline permission (application reference 19/00669/OUTMAJ) for 16 dwellings dated August 2019, and reserved matters approval dated January 2021 (application reference 20/00346/RESMAJ).

The AMR 2022 states that there is a delay in development due to a revised scheme incorporating additional land and increased number of dwellings.

Retained allocation from Core Strategy: Land at Bath Road, Speen, Newbury (site ref. HSA 2). This is a site allocation being carried over from the Housing Site Allocations DPD (adopted ay 2017) for approximately 100 dwellings.

Planning status: The site benefits from permission for a hybrid planning application (application reference 17/02092/OUTMAJ) dated February 2020 (comprising outline for up to 93 dwellings, and full application for 11 dwellings). 104 dwellings have therefore been permitted. A reserved matters submission has been made and is awaiting determination (application reference 22/01235/RESMAJ).

Retained allocation from Core Strategy: Land at Coley Farm, Stoney Lane, Newbury (site ref. HSA 3)

This is a site allocation being carried over from the Housing Site Allocations DPD (adopted at 2017) for approximately 75 dwellings.

Planning status: A full application has been approved in June 2021 (application reference 20/00604/FULEXT). Several conditions have been discharged according to WBC's online application search.

Retained allocation from Core Strategy: Land off Greenham Road, South East Newbury (site ref. HSA 4)

This is a site allocation being carried over from the Housing Site Allocations DPD (adopted ay 2017) for approximately 160 dwellings.

Planning status: The site benefits from reserved matters approval (application reference 20/02546/RESMAJ) dated February 2021 for 157 dwellings.

There is a S73 application currently pending determination (application reference 22/02046/RESMAJ), for variation of the approved plans.

3.25 The spatial strategy states that Newbury should be focus for growth, yet the proposed housing allocations do not accord with this strategy. We consider housing allocations should focus on the most sustainable settlements in the district, i.e. Newbury.

4. Sustainability Appraisal Scoring for Land at Long Lane, Newbury

4.1 Our client's Site is assessed under reference CA15 in Appendix 8b of the consultation documents, for 351 dwellings.

4.2 Fundamentally, there are **no significant negative effects identified**.

4.3 **Significant positive effects** have been identified in relation to:

- To maximise the provision of affordable housing to meet identified need
- To enable provision of housing to meet all sectors of the community, including those with specialist requirements
- To support healthy, active lifestyles
- To improve access to education, health and other services
- To increase opportunities for walking, cycling and use of public transport.

4.4 There are **uncertain** effects identified in relation to:

- *To reduce West Berkshire's contribution to greenhouse gas emissions*
- *To enable the protection and enhancement of high quality multi-functional GI across the District*
- *To support the development of access to IT facilities including Broadband particularly in rural locations*
- *To conserve and enhance the character of the landscape*
- *To reduce air pollution*
- *To manage noise levels*
- *To reduce energy use and promote the development and use of sustainable /renewable energy technologies, generation and storage*
- *To reduce the consumption of minerals and promote reuse of secondary materials.*

4.5 The SA concludes:

"The site is likely to have an overall neutral impact on sustainability. Positive sustainability impacts are identified in relation to social sustainability as the site would help to meet local housing needs as well as being close to local services and facilities accessible by walking and cycling. Potential negative sustainability impacts have been identified in relation to environmental sustainability as the site is close to a number of ecological features, heritage assets, with a potential negative impact on the landscape. Negative impacts have also been identified in relation to environmental and social sustainability as the water network and possibly waste water network would need to be significantly upgraded to accommodate the development. A number of unknown sustainability impacts have also been identified. Many of these may be able to be mitigated but further would be needed to determine what would be required."

Sustainability Appraisal requirements and Council's approach

4.6 European Directive 2001/42/EC ("the Strategic Environmental Assessment Directive") seeks to ensure a high level of protection to the environment by integrating environmental considerations into the process of preparing relevant Plans and Programmes.

4.7 The Environmental Assessment of Plans and Programmes Regulations 2004 (SI1633) ("the Regulations") implement the Strategic Environmental Assessment Directive. We note as follows so far as the requirements of a Sustainability Appraisal are concerned:

- a. Regulation 8 of the Regulations prohibits a Plan being adopted until certain requirements in other regulations have been complied with;
- b. Regulation 12 requires an environmental report "to identify, describe and evaluate the likely significant" environmental effects of implementing the Plan, and of "reasonable alternatives taking into account the objectives and the geographical scope of the plan or programme";
- c. The report has to include such of the information set out in Schedule 2 as is reasonably required, including "an outline of the reasons for selecting the alternatives dealt with, and a description of how the assessment was undertaken including any difficulties...encountered in completing the information."

4.8 The NPPG considers the Sustainability Appraisal process in detail. It states the following (our underlining)

“Reasonable alternatives should be identified and considered at an early stage in the plan making process, as the assessment of these should inform the local planning authority in choosing its preferred approach (when developing alternatives, paragraph 152 of the National Planning Policy Framework should be referred to).” (Paragraph: 017 Reference ID: 11-017-20140306)

4.9 In this context, paragraph 018 of the PPG (Reference ID: 11-018-20140306) records, then, as follows so far as the comparison with reasonable alternatives is concerned:

“The sustainability appraisal should identify any likely significant adverse effects and measures envisaged to prevent, reduce and, as fully as possible, offset them. The sustainability appraisal must consider all reasonable alternatives and assess them in the same level of detail as the option the plan-maker proposes to take forward in the Local Plan (the preferred approach).

Reasonable alternatives are the different realistic options considered by the plan-maker in developing the policies in its plan. They must be sufficiently distinct to highlight the different sustainability implications of each so that meaningful comparisons can be made. The alternatives must be realistic and deliverable. The sustainability appraisal should outline the reasons the alternatives were selected, the reasons the rejected options were not taken forward and the reasons for selecting the preferred approach in light of the alternatives. It should provide conclusions on the overall sustainability of the different alternatives, including those selected as the preferred approach in the Local Plan. Any assumptions used in assessing the significance of effects of the Local Plan should be documented.

The development and appraisal of proposals in Local Plan documents should be an iterative process, with the proposals being revised to take account of the appraisal findings. This should inform the selection, refinement and publication of proposals (when preparing a Local Plan, paragraph 152 of the National Planning Policy Framework should be considered).”

4.10 The above plainly require consideration of all reasonable alternatives on a fair and equal basis. The Sustainability Appraisal lamentably fails to achieve this.

4.11 Paragraph 32 of the NPPF, referred to above, states as follows under the heading *“Preparing and Reviewing Local Plans”*:

“Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements. This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered).”

4.12 The failure of the Council to have considered ‘reasonable alternatives’ in terms of other sites located at the highest tier settlement, instead of AONB and other less sustainable sites is a fatal failure of the Sustainability Appraisal in the light of the above legislative requirements, PPG guidance, NPPF, and case law. As such, it is difficult to understand how the Council assessed reasonable alternatives from the beginning of the plan making process and considered that the proposed strategy was the most appropriate.

Precedent and case law

4.13 The failures of the SA process have been considered through the Courts on a number of occasions, and there is a risk that the approach that the Council has taken to date puts the emerging Plan at risk.

4.14 In *Save Historic Newmarket Ltd v. Forest Heath District Council* [2011] J.P.L. 1233 (which pre-dated the clarity provided in the NPPG/F), the High Court quashed parts of the Forest Heath Core Strategy, where there was a very marked lack of coverage and assessment of reasonable alternatives and increases to housing provision, and a complete failure in terms of explanation as to why the nominated alternatives had been rejected.

“40. It was not possible for the consultees to know from it what were the reasons for rejecting any alternatives to the urban development where it was proposed or to know why the increase in the residential development made no difference. The previous reports did not properly give the necessary explanations and reasons and in any event were not sufficiently summarised nor were the relevant passages identified in the final report. There was thus a failure to comply with the requirements of the Directive and so relief must be given to the claimants.”

4.15 Following the case of *Heard v. Broadland District Council, South Norfolk District Council, Norwich City Council* [2012] EWHC 344 (Admin) (See, in particular: paragraphs 56-57, 62-66, and 70-72 of the judgment, the court considered the ‘reasonable alternative’ requirements and referred to the PPG paragraphs detailed above. In this case, the judge was concerned about an imbalanced assessment, where the alternatives received merely notional treatment. The judge held at [71]:

"the aim of the directive, which may affect which alternatives it is reasonable to select, is more obviously met by, and it is best interpreted as requiring, an equal examination of the alternatives which it is reasonable to select for examination alongside whatever, even at the outset, may be the preferred option. It is part of the purpose of this process to test whether what may start out as preferred should still end up as preferred after a fair and public analysis of what the authority regards as reasonable alternatives. I do not see that such an equal appraisal has been accorded to the alternatives referred to in the SA of September 2009. If that is because only one option had been selected, it rather highlights the need for and absence here of reasons for the selection of no alternatives as reasonable. Of course, an SA does not have to have a preferred option; it can emerge as the conclusion of the SEA process in which a number of options are considered, with an outline of the reasons for their selection being provided. But that is not the process adopted here"

4.16 In *Ashdown Forest Economic Development Lp v SS Communities & Local Government & ors* [2014] EWHC 406 (Admin), the claimants sought to extend similar arguments to those pursued in *Save Historic Newmarket and Heard*, to an extent that was considered inapplicable and impermissible by the court in that particular case. A fuller excerpt is helpful:

"90. I turn, then, to Mr Elvin's two criticisms of what was done by WDC. As to the substance of the work to be done by a local planning authority under Article 5 in identifying reasonable alternatives for environmental assessment, the necessary choices to be made are deeply enmeshed with issues of planning judgment, use of limited resources and the maintenance of a balance between the objective of putting a plan in place with reasonable speed (particularly a plan such as the Core Strategy, which has an important function to fulfil in helping to ensure that planning to meet social needs is balanced in a coherent strategic way against competing environmental interests) and the objective of gathering relevant evidence and giving careful and informed consideration to the issues to be determined. The effect of this is that the planning authority has a substantial area of discretion as to the extent of the inquiries which need to be carried out to identify the reasonable alternatives which should then be examined in greater detail."

4.17 This judgement provides additional clarity on process. The difficulty with the SA is that there simply has been no reasonable alternative site selection process set out. Given the above, the SA fails to clearly identify the options which have been selected and also any reasonable alternatives, let alone why they have been discounted. It therefore does not state any sound reasons within the Sustainability Appraisal for the decisions reached in preparing the draft Plan.

SA Scoring of Long Lane Site

4.18 In the context of the foregoing, the Council's scoring within its Sustainability Assessment is not fully supported by our client. It appears that the previously supplied technical work has not informed the Council's assessment.

4.19 We have consequently undertaken our own assessment against the SA criteria, which is set out below:

[for table see pages 23 to 28 of attachment 'Turley (Donnington New Homes) Full LPR Rep']

Conclusions on site selection and SA

4.20 We consider that the LPR Sustainability Appraisal ("SA") has therefore not considered reasonable alternative options, which is inarguable given the omission of any consideration of sites not included within the Plan. The SA is therefore in breach of the SEA Directive and the SEA Regulations and these breaches are fatal to the legality of the LP.

4.21 Additionally, it calls into question the entire site selection process if a site has been assessed and rejected for technical reasons when no legitimate and substantiated technical reasons exist to justify such an outcome. This, we submit, suggests that the entire site selection process is fundamentally flawed, particularly given the conflict with the identified spatial strategy.

4.22 The draft Plan proposes sites in the AONB, and the eastern area which does not accord with the Council's spatial strategy.

4.23 There are only two strategic site allocations (SP16 Sandleford Park and SP17 North East Thatcham), the remainder are relatively small sites (between 15-160 dwellings). The Sandleford Park allocation has outline planning permission allowed at appeal for two-thirds of the allocation. The remainder of the site is under Donnington New Homes' ownership and there is a live planning application pending determination (reference 18/00828/OUTMAJ).

4.24 It is considered the plan does not propose medium sized sites that can come forward in the interim period to ensure housing delivery. The site at Long Lane for approximately 260 dwellings can provide a

	<p>medium sized site that is available and deliverable under land controlled by Donnington New Homes. The SA conclusions state that the negative and uncertain effects may be able to be mitigated further. It is considered the uncertain and negative effects identified in the SA can be overcome through a well-designed scheme and submission of information, resulting in positive impacts.</p> <p>4.25 The planning merits of the Site considered in section 2 of these representations demonstrate that there are no in-principle technical barriers to prevent residential development of the site.</p> <p>6. Summary and Conclusions</p> <p>6.1 These representations have been prepared by Turley on behalf of Donnington New Homes in respect of the West Berkshire Local Plan Review 2039 Proposed Submission (Regulation 19) Consultation (January 2023).</p> <p>6.2 We reiterate that Newbury is the largest settlement in the District and is able to support residential growth to support the district's housing needs. The strategy set out in the Plan is supported, however the proposed site allocations are not varied enough to deliver the District's housing need in the short to medium term. There is an over-reliance on the two strategic sites coming forward, one of which (Sandleford Park) has been slower to come forward than anticipated in the previous plan period.</p> <p>6.3 In order to ensure an ongoing sufficient supply of land, further sites should be allocated for development.</p> <p>6.4 Land at Long Lane, Newbury is a sustainable and deliverable site, with the parcels in separate land ownership but under single control by Donnington New Homes. There are no identified technical barriers to development.</p> <p>6.5 The site is of a scale that it can contribute residential development of an appropriate scale to the context of Newbury. It is a medium sized site that can deliver in the short to medium term, on the edge of the existing settlement in a sustainable location and a logical extension to meet housing need. The SA acknowledges that the site is within walking and cycling of local services and facilities.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.	

* Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	Support. (in relation to Sandlesford Park East) The policy specifies that the Sandlesford Park Strategic Allocation is retained for “approximately 1500 dwellings”. This correctly directs development towards the most sustainable settlement in the district, in line with policies SP1 Spatial Strategy and SP3 Settlement Hierarchy. The estimated number of homes to be provided reflects detailed site assessment work undertaken by Bloor Homes on its site ‘Land at Sandlesford Park’ and information in the public domain for the Sandlesford Park West developer. Subject to the submission and grant of planning permission for Reserve Matters, the site is realistically deliverable within the plan period.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	As detailed in the accompanying statement, the Plan as prepared is not legally compliant as the Sustainability Appraisal/Strategic Environmental Assessment has not considered reasonable alternatives, especially non-strategic sites of less than 1,000 dwellings around Newbury/Thatcham.
2. Do you consider the Local Plan Review is sound? -	No

<p>Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	Yes
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>The Draft Submission Local Plan includes a number of proposed housing allocations at Newbury and Thatcham, which are intended to contribute towards achievement of the minimum requirements for the district as detailed in policy SP12.</p> <p>For the reasons detailed in the representation to draft policy SP12, insufficient land has been identified to address the needs.</p> <p>The current draft policy SP12 indicates that the District's minimum housing need over the period April 2022 to March 2039 is for between 8,721 and 9,146 dwellings.</p> <p>The supporting text of policy SP12 outlines the sources which the Council relies upon to address the majority of its housing needs. This indicates that existing known sources will provide 7,337 dwellings.</p> <p>Paragraph 6.21 notes that to address the highest figure in the housing requirements range (9,146 dwellings), sites for at least 1,809 dwellings must be found.</p> <p>Paragraph 6.22 indicates that policies SP13-15 propose the allocation of sites for some 1,720 dwellings with a further 80 dwellings through Neighbourhood Plans (paragraph 6.23). This is a total of 1,800 dwellings which is marginally below the minimum 1,809 dwellings required.</p> <p>Once the housing requirement is adjusted to reflect our representation to policy SP12 (an increase of 988 dwellings) from the highest figure in the council's range (9,146 dwellings) between 2022 and 2039 to at least 10,134 dwellings from 2022 until 2040, the sources of supply relied upon by the Council are insufficient. This therefore justifies an increase in the number of homes allocated.</p> <p>Additionally, within the draft Plan, the Council expects delivery of over 3,000 dwellings from two strategic sites – the retained Sandleford site from the current Core Strategy where 1,580 dwellings are envisaged in the Plan period (policies SP13 and SP16) and a new strategic allocation to the north east of Thatcham for 1,500 dwellings in the Plan period (Policies SP13 and SP17).</p> <p>Whilst the provision of over 3,000 dwellings across these two sites alongside other sources around Newbury and Thatcham ensure a significant proportion of the district's housing is delivered adjoining these settlements at the top of the hierarchy, there is a clear concern regard the over reliance on strategic sites of over 1,000 dwellings, especially for growth in around these settlements.</p> <p>The Sandleford site has a poor record of delivery with the Core Strategy envisaging (Policy CS3) that at least 1,000 dwellings would have been completed by March 2026. However, the Council's latest trajectory (the 5 year land supply assessment for April 2022) now indicates that only 100 dwellings will</p>

be completed by March 2026. This is a reason for the rephrasing of the site within the emerging plan period.

The Sustainability Appraisal (December 2022) considered a variety of options for delivering growth as summarised in Table 11, which included a continued focus of Newbury (option 4) separately to a focus on Thatcham (option 5).

Further growth at Newbury was discounted as “further large scale development opportunities are more limited” and “there was an unknown impact as to whether the strategy would be able to deliver adequate housing to meet the identified need due to the lack of suitable sites within the area”.

However, this analysis and the subsequent evolution of the plan discounted the potential of a mixed portfolio of sites around the settlements of Newbury and Thatcham rather than its reliance upon strategic sites, especially having regard to the challenges which have impacted upon Sandford's development.

The failure of the Sustainability Appraisal to adequately consider a mix of sites rather than a focus on larger scale development was one of the reasons why the Local Plan prepared by the City and District of St Albans failed at its examination. Whilst this was generally with regard to consideration of Green Belt matters, as paragraph 44 of the Inspector's Post Hearing Letter (14th April 2020 (copy enclosed)) confirms:

We accept that large scale urban extensions would provide significant amounts of new infrastructure which both the new and already established communities would benefit from. On the other hand, a range of sites including smaller sites could also provide benefits. For example, they could be delivered more quickly without requiring additional infrastructure, provide choice and flexibility in the housing market and secure affordable housing more immediately.

This provides a clear indication of the need for the plan to actively consider a range of scenarios of sites including both strategic and a portfolio of small and large ones, such as the delivery of 400 dwellings on our client's land (HELAA Ref: SCD4).

The provision of 400 dwellings on our client's site would make a valuable contribution towards addressing the Council's identified need for 1,809 dwellings without reliance upon 1,500 dwellings at North East Thatcham. It would also provide greater flexibility should the Council's expectations of delivery from other sources be unrealistic, reflecting that which has occurred to date at Sandford.

Recognising that Newbury and Thatcham are appropriately included in the top tier of the district's settlement hierarchy (in draft policy SP3), this is therefore an appropriate location for further growth. This is covered further in the representation concerning the omission of our clients land to the north of Newbury (either side of the A339) as an allocation for around 400 dwellings.

In order to be consistent with the amendments advocated elsewhere in these representations it is essential that the policy is revised to ensure that it reflects the changes associated with the allocation of land north of Newbury, on either side of the A339 for the delivery of around 400 dwellings.

This change also need to be evaluated through the SA since as currently drafted, it has failed to consider the reasonable alternative of a mix of sites such as that controlled by our clients for around 400 dwellings within a wider portfolio around Newbury. This is therefore a matter of legal compliance, consistent with the conclusions of the Inspector who examined the St Albans Local Plan.

Omission Site

As explained above, there is a need to allocate additional land for housing development in order to meet identified needs. Providing for further housing allocations at Newbury is consistent with the aims of the NPPF in seeking to plan for sustainable patterns of growth.

Our client's site comprising land north of Newbury (either side of the A339) (within HELAA Site Ref: SCD4) is edged red on Plan WBP1 attached and extends to approximately 15.7ha. It comprises two land parcels, straddling land currently under construction (allowed at appeal in March 2017).

The northern most extends to around 4.7 ha and is illustrated below.

<for map see attachment>

The eastern parcel extends to around 11ha as illustrated below

<for map see attachment>

We have undertaken a thorough assessment of the character of the two parcels of land and surrounding area and consider that combined it affords a sustainable development opportunity for approximately 400 dwellings.

The site is well related to the urban area of Newbury, especially having regard to development which has been approved to the north of the town along the A339 corridor which has either been built (the Vodafone HQ) or is under development (401 dwellings, local centre and 1 form entry primary school granted on appeal on 20th March 2017 (footnote 12)).

HELAA Assessment

Whilst the HELAA's assessment of the wider parcel ref SCD4 concluded that it was “potentially developable in part” this is the same classification of other locations which the Council has included as allocations i.e land to the north-west of Thatcham (within policy SP17). However, for the reasons detailed below, it is concluded that the Council's assessment is flawed and had the evidence for the Plan been robustly prepared, the overall strategy would have included our clients land as an allocation for 400 dwellings.

The inclusion of our client's land would contribute towards resolve the concerns regarding the inconsistency of both the current plan target and period (within objections above to policy SP12) with the NPPF.

Within the HELAA, the Council appraises each parcel of land under a number of different steps. Our response to the Council's flawed assessment within each step is detailed below.

For Steps 1a (Site Identification) and 1b (Automatic Exclusion), we concur with the

Council that wider parcel SCD4 is appropriate for a detailed assessment through the subsequent steps.

For Step 2a (Development potential), whilst the assessment notes that the parcel adjoins a settlement boundary, it concludes that this is “Donnington” and it subsequently notes that “Donnington falls outside of the settlement hierarchy and is therefore suited for limited development”.

However as confirmed in paragraph 13 of the appeal decision for the erection of 401 dwellings on part of SCD4, it was agreed that “the appeal site is outside, but partly adjacent to, the Newbury settlement boundary”. This position is re-affirmed in paragraph 21 of the appeal decision which states “although the appeal site is outside the settlement boundary it is next to it, and the Council agreed that it is adjacent to Newbury”.

Therefore, within Step 2a, the initial assessment of the site is inconsistent with the Council's agreed position through the appeal. This flawed assessment of the site which discounts its location adjacent to Newbury (a settlement at the top of the hierarchy) is then continued through subsequent steps. Whilst this resulted in the conclusion that the site was potentially developable, had the assessment been robust at initial stages it would have clearly been confirmed as an allocation.

Such an approach would reflect the history of the evolution of the existing Core Strategy for West Berkshire as summarised in paragraphs 22 and 23 of the March 2017 appeal decision, which states as follows:

- 1 CS policy ADPP2 states that Newbury is intended to accommodate around 5,400 homes over the plan period, and refers to urban extensions at Newbury Racecourse and Sandford Park. It also contemplates other development coming forward through (amongst other mechanisms) the allocation of smaller extensions to the urban area through the HADPD. The appeal site has not come forward by any of the mechanisms envisaged in ADPP2 and, as a consequence, the proposal is in conflict with this aspect of the policy. The HADP also states that a number of sites which have future potential for development have been identified in the Strategic Housing Land Availability Assessment (SHLAA).
- 2 There are a number of factors which must be balanced against this conflict with policy ADPP2:
 - The appeal site has been considered through the SHLAA process in 2011 and 2013 – an approach which was noted in policy ADPP2. Both these SHLAA assessments identified the appeal site as potentially developable. The 2013 SHLAA noted that it was in a basket of sites from which the most suitable would be allocated through the development plan process. However as a potential strategic site, the appeal site is outside the scope of the HADPD, as noted in the relevant Sustainability Appraisal. Nevertheless, the potential of the appeal site is clearly recognised.
 - CS policy CS1 makes reference to at least 10,500 new homes coming forward in the plan period, but the Council accept that this figure is out of date as a requirement for FOAN or five year housing land supply purposes. In addition the approach of the CS Inspector appears to have been that the plan did not provide for all housing needs even at that time, but adopted a pragmatic approach and recommended the adoption of the plan as it stood and encouraged an early review. This approach further reduces the weight which can be accorded to the CS housing and settlement policies.
 - As mentioned above, the area around the appeal site was considered during the CS Examination process. The Examining Inspector noted that there was a choice to be made between Sandford Park to the south of Newbury and the area north of Newbury (including the appeal site). This was in addition to the development at Newbury Racecourse for which planning permission had already been granted. A number of the concerns which were identified related to the north of Newbury area were apparently not fully investigated by the Council at that time, although the Inspector described highway matters and flood risk as not being ‘show stoppers’. However, on balance, the Sandford Park site was preferred as it was stated that there was not the evidence to demonstrate that north Newbury was a clearly preferable site. Overall, the Examining Inspector stopped well short of recommending that there were problems associated with the north Newbury area, although preference was given to Sandford Park.
 - I heard detailed and uncontested evidence that the Sandford Park site is experiencing substantial delays. No party was able to suggest how or when this major development might progress. Before the Council's withdrawal from the Inquiry, the authority had accepted that completions at this site could not be expected in the next five year period – or perhaps longer. Under these circumstances this loss of around 1000 units makes the achievement of even the limited CS target highly optimistic.
 - As noted, the appeal site was in the basket from which the SHLAA envisaged that the most suitable would be allocated through the development plan process. The Council, before withdrawing its opposition to the appeal scheme, accepted that there were no sites of comparable scale which might be preferable and/or more sustainable than the appeal site. In effect, even if the development at Sandford Park were to progress more rapidly than the evidence indicates, the appeal site is next in line to meet the housing needs of the area.
 - There is nothing to suggest that, even if the CS figure of approximately 5,400 dwellings were exceeded, this would cause any harm. There is nothing to suggest that the figure was envisaged as a cap on development, as was made clear by the CS Inspector.

It is therefore clear that the Council had previously accepted that further development to the north of Newbury was appropriate.

For Step 2b (Suitability), under relevant planning history it states:

Planning applications:

Planning permission was allowed at appeal for a mixed use scheme of up to 401 dwellings, a local centre, a one form entry primary school, and public open space on adjacent landholdings (planning app ref: 14/02480/OUTMAJ).

Local Plan history:

Parts of the site (the southern part of the parcel of land that lies to the west of the A339 and the western part of the parcel of land which lies to the east of the A339) were assessed in the 2013 Strategic Housing Land Availability Assessment (Strategic Housing Land Availability Assessment, whereby it has the site refs NEW031A and NEW031B) as ‘potentially developable’.

The site was subsequently assessed in more detail as part of work on the Housing Site Allocations Development Plan Document (Housing Site Allocations Development Plan Document). It was ruled out as an allocation because the site needed to be considered as a strategic site, which was outside of the scope of the Housing Site Allocations Development Plan Document.

The site selection work also identified that there were a number of issues relating to highways and access that would need to be overcome in order for development on the site to be acceptable. The relationship between the two areas of the site was also a concern given the only link between the sites is via an underpass under the A339 which suffers from flooding.

The assessment of the site as noted references a number of points, first a need for it to be considered as a strategic site which whilst outside of the scope of the Site Allocations Plan is clearly within the remit of the new Plan. However, this has not been undertaken for the current plan.

The planning history also references concerns over highways, site access and flooding matters with the underpass which linked the two parts of the site. However, these were matters considered by the Inspector in determining the appeal on the site.

With regard to highways and site access, this is covered in paragraphs 36 and 37 of the appeal. These state:

- 1 The highways consequences of the proposal were summarised in the HSOCG in relation to a number of junctions in the vicinity, the most critical of which is the Robin Hood gyratory to the south of the entrances to the appeal site. Local residents gave clear evidence of the difficulties which this junction currently causes. However a mitigation scheme, full funded through the UPO, has been put forward for that junction and has been tested against various scenarios. The conclusion of the analysis is that the scheme would do more than mitigate the effects of the proposal and would improve the operation of the junction compared to the 2021 Base Case scenario (i.e. including committed development and the scheduled gyratory improvements).
- 2 There was also concern from some residents that the proposal would generate traffic along Love Lane which, as I saw on my visit, has recently had chicanes installed. However, although I can appreciate that Love Lane may well be currently used as a rat run between Shaw Hill and Oxford Road, there is no evidence that this would be substantially increased as a result of the proposal, as new residents would access the development direct off the A339.

For flooding matters and any other concerns regarding the underpass, this is within paragraphs 33 to 35 of the appeal decision. These state:

- 1 The design and safety of the underpass, and the consequent extent to which the two parts of the development would be linked in a satisfactory manner was the subject of concern for some residents, although the local cycling group's position was that it would provide a very good route. This matter was originally a reason for refusal and was the subject of evidence for the Council until the authority changed its overall position on the scheme.
- 2 The proposed underpass is short, the paths approaching it are in a relatively straight line, and the limited slope means that the visibility into and through the underpass is good, as I saw on my site visit. Visibility and safety could be further improved when the details of the development were being considered. The evidence is that the dimensions of the underpass comply with Sustrans guidance and the underpass, with improvements, would provide an appropriate and safe link for pedestrians and cyclists alike. The proposal would not conflict with the Quality Design SPD and the two parts of the site would be linked in a manner which would encourage the use of non-car modes of transport.
- 3 The footpaths around the Vodafone site, which provide access towards the town centre from the eastern parcel and, via the underpass, from the whole of the development, were also originally criticised by the Council. However as I saw on my site visit, these are wide paved routes and I saw that they were apparently well used by Vodafone employees. I see no reason why they should act as a deterrent to cyclists or pedestrians wishing to access the town centre.

Although the HELAA includes reference to planning history, it is clear that it has not been updated to reflect the accepted position as detailed in the appeal on the site. The Council has not provided any reasons for departing from the agreed position at the appeal and therefore the wider SCD4 land should have been favourably considered and then included as an allocation.

Within the "Location" category for step 2b, the HELAA assessment of parcel SCD4 states:

The eastern land parcel is adjacent to the settlement of Newbury, whilst the western land parcel is adjacent to the settlement of Donnington.

Newbury is identified as an Urban Area in the settlement hierarchy. Urban Areas have a wide range of services and are to be the focus for the majority of development.

Donnington does not fall within the settlement hierarchy, and is instead identified as a 'smaller village with a settlement boundary'. Such settlements are suitable only for limited infill development subject to the character and form of the settlement.

Western parcel of land – the south western corner of the site adjoins the settlement boundary.

Eastern parcel of land – a small area of the southern site adjoins the settlement boundary of Newbury.

As noted, the above assessment contrasts with the position agreed by the Council on the appeal.

With regard to landscape and harm to the AONB, no concern is raised.

The Step 2b assessment notes that flooding is not a constraint for the site,

For ecology, although it is within the River Lambourn Neutrality Zone, there would be the potential for mitigation measures. A suitable off-setting will ensure the protection of the Ancient Woodland adjoining the site, reflecting the approach of the Draft Plan for other sites.

With respect of landscape, it notes that a further assessment is required.

For heritage, it notes that there is a need to establish extent that development could affect the historic significant of the Grade II Listed Barn at Shaw Farm. This could readily be achieved and addressed through the submission of an application.

The overall conclusions on suitability within Step 2b were:

Development would impact on the character and identity of Donnington. Further landscape assessment required. Highways concerns, particularly if the access for the eastern land parcel via The Connection is not upgraded from a private road to adoptable standards, and a route through CA15 to the B4009 is not provided.

Surface water flow paths within the site. Flooding was reported in the eastern land parcel during the July 2007 flood event.

The site is located within the River Lambourn Nutrient Neutrality Zone, and residential development could result in additional nutrient loads that could have an adverse effect on the condition of the River Lambourn SSSI/SAC. Mitigation measures needed. A Habitat Regulations Assessment would be required supported by an appropriate Nutrient Neutrality Assessment and Mitigation Assessment.

High risk of adverse nature conservation impacts. Additional ecology surveys required.

Allocation would be dependent on a review of the settlement boundaries in the Local Plan Review.

It is therefore clear that the site has development potential.

Step 2c provides an assessment of availability. The whole area of parcel SCD4 was confirmed to be available. This remains the case and therefore this would not limit development of the site.

The Achievability of the site was considered in Step 2e. This confirms that the site is achievable.

The deliverability potential of the site is within Step 2e. The conclusions on this subject was:

The site is available (in single ownership, and there is an option agreement with a developer) and achievable as there are no known market, legal, cost, ownership fragmentation or delivery issues. Development would impact on the character and identity of Donnington. Further landscape assessment required.

Highways concerns, particularly if the access for the eastern land parcel via The Connection is not upgraded from a private road to adoptable standards, and a route through CA15 to the B4009 is not provided.

Surface water flow paths within the site. Flooding was reported in the eastern land parcel during the July 2007 flood event.

There are a number of factors which would need to be investigated further to confirm that the site is developable - the site is located within the River Lambourn Nutrient Neutrality Zone, and residential development could result in additional nutrient loads that could have an adverse effect on the condition of the River Lambourn SSSI/SAC. Mitigation measures needed. A Habitat Regulations Assessment would be required supported by an appropriate Nutrient Neutrality Assessment and Mitigation Assessment. High risk of adverse nature conservation impacts. Additional ecology surveys required.

Whether the site is considered developable is also dependent on further assessment through the plan-making process, in relation to whether circumstances exist to support the change to the settlement boundary.

The site was considered to be potentially development in part. Such an assessment is reflective of other parcels which have been included as allocations.

Overall, the site has no physical constraints, and is well-related to the existing residential development. It is in close proximity to local services and facilities such that it affords a sustainable location in helping to meet identified housing needs whilst providing for sustainable patterns of growth.

Whilst additional growth at Newbury was considered during the earlier stages in the preparation of the Local Plan (Option 4 of the Spatial Strategy Options summarised in Table 11 of the SA/SEA) (November 2022), it notes:

This option gives a number of potentially positive sustainability effects in relation to focusing development on the biggest town with the largest number of facilities, with a significantly positive effect predicted due to the strategies' focus on the use of brownfield and. However, there are is an unknown impact as to whether the strategy would be able deliver adequate housing to meet the local identified need due to the lack of suitable sites within the area.

However, the Council has accepted the development at north Newbury on our clients land would be feasible. Whilst the Council discounted a strategic scale development in Newbury, there is no reason why a proposal for around 400 dwellings could not be delivered within the Plan. The document as currently drafted has failed to consider this as an integral part of its strategy.

Given the clear need for additional housing and its location as a logical extension to Newbury, the site should be included as a further allocation for around 400 dwellings.

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>To ensure a sound Local Plan, land to the north of Newbury (either side of the A339) should be included as a residential allocation for circa 400 dwellings, with consequential amendments to settlement boundaries.</p>

5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	To explain why the plan is unsound and requires the inclusion of the allocation of land north of Newbury (either side of A339) for housing.

Please give reasons for your answer	N/A
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements	Yes

<p>with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>Within our representations to the Regulation 18 Consultation, we commented that we disagree with the Council's approach of relying on larger sites and ruling out sites within smaller settlements and only allocating sites which fall within the service villages, rural service villages or urban areas. The Regulation 19 Draft Local Plan follows suit in its approach to allocating sites for housing development, as evidenced by the allocated sites Sandford Park (1,500 dwellings) and North-East Thatcham (1,500 dwellings).</p> <p>Whilst the principles of delivering large sites with accompanying infrastructure is supported by national planning policy, and we do not object to these allocations, we raise concern that the numbers suggested may not be delivered in accordance with the Council's housing trajectory. In particular with the large allocations, substantial infrastructure will need to be delivered prior to any housing delivery. Increased small and medium scale sites would complement these larger sites by ensuring a constant stream of delivery whilst larger sites start to mobilise.</p> <p>As such, we maintain that the Council should seek to accommodate further growth across the district. Hall Place Farm, Tilehurst (TIL18) which would deliver approximately 80 dwellings is of a scale and within a location which the Council should be seeking to allocate. Due to the medium scale of development and edge of settlement location, the site can be delivered in the short to medium term utilising existing infrastructure including public transport, schools and local shops.</p> <p>The need for further small/medium sized sites to compliment the delivery of larger sites is also compounded by the need for an increased housing target and the necessity for further allocations in order to meet this target.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	N/A
<p>4. Proposed Changes</p>	<p>Based on the comments above, we request the following:</p> <ul style="list-style-type: none"> - The Council to allocate additional small / medium sites to ensure a consistent delivery of homes in accordance with the Council's housing trajectory. <p>The above will ensure that this approach is 'effective', 'justified' and 'consistent with national policy.'</p>
<p>5. Independent Examination - If your representation is seeking a</p>	Yes

change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	
5. Independent Examination

<p>Please give reasons for your answer</p>	<p>[For wider representation and Tables and Figures, see attached Representations on behalf of Croudace Homes]</p> <p>Proposed New Allocations</p> <p>The LPR proposes to allocate nine new sites for residential development to bring forward an estimated 1,720 units. It also delegates the allocation of land for 80 units upon adoption of two respective Neighbourhood Plans.</p> <p>North East Thattham Strategic Site (Policy SP17)</p> <p>The largest of the proposed draft allocations is 'North East Thattham', identified to deliver 1,500 units across the plan period.</p> <p>Whilst Croudace generally supports the direction of a large amount of growth to Thattham, it does have ongoing concerns regarding the deliverability and developability of North East Thattham. On this basis, the Council should allocate smaller, unconstrained sites which can come forward early on in the plan period without requiring much in the way of supporting infrastructure.</p> <p>However, should the draft allocation at North East Thattham ultimately remain, Croudace considers that there is still a scenario in which there is a need to allocate additional sites around Thattham to alleviate some of the pressures on supply arising from elsewhere in the District and to provide additional flexibility for a 'top tier' settlement in the earlier part of the plan period. Sustainable sites such as Henwick Park, which are not subject to any constraints and do not require any large scale infrastructure interventions to ensure delivery, are very well placed in the short-term to deliver development on land which is directly adjacent to the settlement boundary.</p> <p><u>North East Thattham – Spatial Matters</u></p> <p>Despite acknowledging that Thattham is a focus for strategic growth, the Council proposes to allocate one single site at North East Thattham. Land is identified for an urban extension to deliver approximately 1,500 dwellings across the plan period. Draft Policy SP17 requires the site to be masterplanned and delivered comprehensively along with key infrastructure including community uses, green infrastructure and transport and the achievement of high standards of sustainability.</p> <p>By way of context, the Regulation 18 stage LPR identified North East Thattham for the delivery of 2,500 dwellings and associated infrastructure. As such, there has been a theoretical reduction of 1,000 dwellings. However, Croudace notes that the proposed allocation boundary (shown both within the draft Proposals Map and on page 65 of the LPR) has not been amended accordingly to match the reduction. Croudace therefore assumes that as currently drawn, the amended settlement boundary for Thattham will also extend in a similar manner.</p> <p>As such, Croudace objects to the extension of the settlement boundary in such a manner and considers that this could lead to development being brought forward at North East Thattham which is far in excess of the number of dwellings envisaged to be allocated at the site. That is indeed, if the site does deliver.</p> <p><u>North East Thattham – Deliverability</u></p>

Policy SP17 outlines the expectation that all 1,500 dwellings proposed to be allocated at North East Thatcham will be delivered within the plan period.

The Council's Housing Trajectory (within the Housing Background Paper) illustrates that North East Thatcham is not expected to start yielding housing completions within the first five years of the plan period. As such, it can be concluded not to be a 'deliverable' site in accordance with the definition in national policy.

Assuming that it is capable of being considered a 'developable' site, it is instead slated to deliver 150 units from a standing start in 2029/30 (i.e. Year 8 of the LPR) and then in every subsequent year until 2038/39 (i.e. Year 17).

Croudace considers it unrealistic for the site to deliver 150 units in its first year given significant preliminary and enabling works will be required to install key infrastructure, before construction of houses can begin. Whilst there is no indication as to how 150 units a year will be delivered (e.g. through multiple sales outlets etc.), Croudace considers that the trajectory should be redrafted to show more realistic delivery rates, together with lead-in times for supporting items of key infrastructure.

Large strategic sites, including those allocated by the Council's Core Strategy at Sandford Park, can often take much longer to begin delivering dwellings and subsequently thereafter due to complex infrastructure requirements and delays with land assembly.

The Lichfields document 'From Start to Finish' (February 2020) suggests at figure 4 that for sites of 2,000+ dwellings, the average timeframe from validation of first outline planning application to completions on site is 8.4 years. After that, the average build out rate for a greenfield site of 2,000+ dwellings is 181 dpa.

Therefore, to achieve the delivery of 1,500 dwellings as assumed within the plan period, an outline planning application would have needed to be submitted in Spring 2022, allowing first completions in 2029/30. Clearly, an outline planning application has not been submitted at North East Thatcham and the trajectory set out by the Council is unlikely to be achievable. As such, the Council should take a precautionary approach and make provision for smaller scale allocations such as at Henwick Park.

For example, according to the 5YHLS Statement (November 2022), Sandford Park has failed to deliver any completions since it was allocated by the Core Strategy in 2012. Sandford Park East was granted outline planning permission on appeal in May 2022 but no reserved matters application has yet been submitted, while Sandford Park West is subject to a longstanding outline planning application which remains undetermined since submission in 2018. The Council has correctly not counted any units arising from Sandford Park West in its 5YHLS up to 2028.

In common with the Sandford Park site, draft Policy SP17 requires a 'comprehensive' form of development (i.e. a single planning application) to ensure that the "provision of all infrastructure, services, open space and facilities will be timely and co-ordinated". Given that requirement and for a scheme of this size, the Council may require a Supplementary Planning Document to guide development, thus adding further scope for delays to delivery whilst such a document is drafted.

Given the delays experienced with the comparable allocation at Sandford Park, Croudace is concerned that the Council relies on two strategic sites to deliver a combined 70% of the LPR's total allocations (and one large strategic site to deliver 80% of the LPR's new allocations). Likewise, the two large strategic sites make up a combined 32% of the Council's claimed supply across the plan period. Croudace does not believe that this represents a 'justified' or 'effective' strategy. To the contrary, it is a high-risk strategy.

Croudace considers that the delivery issues at Sandford Park clearly demonstrates the types of challenges that can be faced with delivering housing on such a large scale. This should respectfully serve as a warning to the Council that a variety of allocations are required for flexibility across the plan period.

The inability of North East Thatcham to yield housing completions within the first seven years of the plan period has the potential to lead to a shortfall in housing land supply for the Council, soon after plan adoption. Clearly therefore, the LPR should be allocating a range of additional smaller sites to provide greater flexibility and certainty. NPPF paragraph 68 is clear that planning policies should identify a sufficient supply and mix of sites and that authorities should identify a supply of specific, deliverable sites for years one to five of the plan period.

Paragraph 73 of the NPPF refers to the potential benefits of larger scale development but requires authorities to make a realistic assessment of likely rates of delivery, given the lead-in times for large scale sites.

If allocated for development, the Land at Henwick Park is a deliverable site which could deliver dwellings within the first five years of the plan period, as we demonstrate earlier within these representations.

North East Thatcham – Affordable Housing

Draft Policy SP17 expects North East Thatcham to deliver 40% affordable housing, potentially equating to 600 units as part of its comprehensive development. However, given it is unlikely to deliver housing until Year 8 of the plan period (i.e. 2029/30), this will also result in a delay to the delivery of vital affordable housing.

Thatcham, as a result of its period of 'consolidation', has suffered from a lack of affordable housing in recent years and would therefore benefit from a meaningful delivery of affordable housing early in the plan period.

The site at Henwick Park would deliver at least a policy compliant level of affordable housing (40%) and as set out above, Croudace anticipates that a significant proportion of affordable units could be delivered within the first five years of the plan.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?

No

* Yes * No	
Please give reasons for your answer	
4. Proposed Changes	<p>A reduction in the reliance on the large strategic site at North East Thatcham– large strategic sites such as that proposed at North East Thatcham can take many years to begin delivering housing and can often run into difficulties with land assembly and infrastructure requirements. By relying solely on one large strategic site in one of the key growth areas, the Council runs the risk of not delivering housing in an area where it is much needed until much later, or even beyond the plan period. Croudace do not consider this to be a 'justified' or 'effective' strategy.</p> <p>The removal of allocations in areas affected by nutrient neutrality– the LPR proposes new allocations in areas affected by nutrient neutrality, and proposes to carry forward HSA DPD allocations affected by the issue. Croudace does not consider it to be a 'justified' or 'effective' strategy to rely on sites which have uncertain delivery timeframes to deliver housing in areas which need delivery early in the plan period. By opting to allocate such sites, the Council risks restricting the supply of housing and forcing itself into a position where it may not be able to demonstrate a 5YHLS soon after adoption of the LPR.</p> <p>Consideration and allocation of sustainable, reasonable alternative sites – such as Henwick Park, in order to address the above issues.</p> <p>Croudace considers that the LPR fails to meet the legal compliance requirements of the Planning and Compulsory Purchase Act 2004 by not properly considering all reasonable alternatives to meet a variety of challenges faced by the LPR. Henwick Park, for example was dismissed as a strategic site but not even considered as a non-strategic option by the SA/SEA.</p> <p>If the site were properly assessed as a non-strategic option, Croudace is confident that the Council would find Henwick Park's ability to be delivered, crucially in absence of constraints and within the first five years of the plan period, of benefit to its housing land supply position. Furthermore, its allocation would add more choice to the land identified for the delivery of housing and would help to make a meaningful contribution to the delivery of a range of housing in the short-term, which will deliver the much required housing that West Berkshire needs.</p> <p>Croudace strongly urges the Council to reconsider the Regulation 19 LPR before it submits the Plan to the Planning Inspectorate to address the above failures in soundness and legal compliance. If it does not do so, Croudace will respectfully ask the appointed examining Inspector to find the Plan unsound in the absence of such modifications.</p>

2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<i>[For full response see attached document]</i> The policy has removed all previously allocated sites for development within the settlement of Cold Ash, in addition to removing or reducing the number of homes to be delivered at the allocations within Newbury. Given the conveyed concerns regarding the Council's approach to housing delivery, it is clear that

	<p>additional sites will need to be identified for allocation in order to provide a Plan that is positively prepared and sound.</p> <p>There are opportunities within this sub-area to provide a mix of additional large and small site allocations within the settlements of Newbury and Cold Ash to provide a robust strategy on housing deliver. This would also assist demonstrating compliance with Paragraph 69 of the NPPF through additional small site allocations.</p>

<p>Please give reasons for your answer</p>	<p>Full approval has been given by West Berkshire Council for 91 dwellings on this site by 18/00964/FULEXT. This has a single access from Lower Way.</p> <p>This approved application does not include cycle linkages through the site, despite a specific request by Thatcham Town Council.</p> <p>The development does not front onto Lower Way, and one property is only around 1m away from the public footpath that now runs through the site.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	N/A
<p>4. Proposed Changes</p>	<p>Point (i) in Policy RSA7 (Council note - the site referred to is RSA5 in LPR) needs to be amended as follows:</p> <p>(i) Provision for approximately 85 91 dwellings, with a mix of dwelling sizes and types.</p> <p>(ii) The site should be accessed via Lower Way. To ensure permeability through the site, the scheme should be designed with the potential for two accesses to be provided. Pedestrian and cycle linkages will be expected through the site and linking to the surrounding area.</p>

	<p>(iv) It is expected that development will front onto Lower Way to enable effective integration with the existing built form and be set back from the existing public rights of way to the east and west of the site. (added text is underlined; deleted text is struck through)</p> <p>The consequential change to the number should be made to Policy SP13.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
<p>5. Independent Examination</p>	<p>Thatcham Town Council is the principal representative body of the community of Thatcham, which is the location of only new strategic site allocation in the draft Local Plan. The suitability of this site for development is reliant on having adequate infrastructure. However, the regeneration that was promised in the current Local Plan has not materialised, and would not be delivered through the policies in the draft Local Plan. The Town Council can provide local insight to the examination about Thatcham, and particularly on the substantial deficit of infrastructure in the locality. It would also be happy to elaborate on its other concerns about the current proposals for the North East Thatcham Strategic Site Allocation, as described in these representations.</p> <p>The Town Council anticipates that changes necessary to the draft Local Plan in relation to site allocations are greater than could be addressed through 'main modifications'. If, however, the Inspector is minded to consider recommending 'main modifications' to policy SP17 and related matters in other Policies, it would welcome the opportunity to provide its perspective on what modifications would be required.</p>

Please give reasons for your answer	<p>LPR paragraph 6.23 identifies a need for an additional 1,809 dwellings to 2039, taking into account existing commitments for 7,337 dwellings. Notably the existing commitments includes 1,580 dwellings at Sandford Park, which was allocated in 2012 and has only recently been granted planning permission, and a large proportion (1,949 dwellings) at windfall sites which do not have planning permission, and so it is questionable whether all of the existing commitments will be delivered during the LPR plan period. It is therefore considered that an additional supply of housing is likely to be required in the LPR, above the stated requirement of 1,809 dwellings, which could be met through smaller sites distributed throughout the District to avoid similar delays to that experienced at Sandford Park. It is important that the LPR identifies a sufficient supply of deliverable sites to meet the local housing target, taking into the previous shortfall in delivery and the potential that identified sites do not come forward as envisaged.</p> <p>It is noted that draft LPR Policies SP13-SP15 make provision for 1,720 new dwellings (as referred to at paragraph 6.24), with 80 dwellings proposed to be allocated at neighbourhood plans (as referred to at</p>

	<p>paragraph 6.25), below the stated outstanding requirement for 1,809 dwellings. It is therefore crucial that additional housing sites are identified in order to meet the LPR housing target (with a need for more housing sites to be identified given the comments raised above regarding the existing commitments).</p> <p>The NPPF also emphasises that small and medium sites 'can make an important contribution to meeting the housing requirements of an area, and are often built out relatively quickly' (paragraph 68). Indeed the Estate's landholdings across the eastern part of the District include a number of small and medium land parcels (as noted further below) which are suitable to accommodate sustainable development and contribute to the District's housing land supply. This includes the Estate's land at Burghfield Common, Theale and Mortimer as noted further below. A number of these sites are currently located within the DEPZ, however should this change during the plan period (as noted above) and additional housing be required, these sites are well placed to accommodate this need.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	Yes
Please give reasons for your answer	
4. Proposed Changes	Policy SP13-15 and the supporting text as currently worded do not meet the tests of soundness set out in NPPF paragraph 35. Accordingly, in order to ensure the soundness of the Plan, additional housing sites should be identified to ensure that local housing needs are met. This should include consideration of small and medium sites at Burghfield Common, Theale and Mortimer.
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
5. Independent Examination	<i>The Englefield Estate consider that the plan in its current version is not sound and would like the opportunity to set out how alterations could be made to the plan and its evidence base to enable it to be found sound and progress to adoption.</i>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	<i>[See attachment 'Andrew Black Consulting (Bucklebury PC) Full Rep' for full consultation response]</i> Development in the Countryside and the 'Strategic Gap' A Site Selection Background Paper (Reg18 SSBP) was produced for the regulation 18 consultation and curiously has not been published as part of the regulation 19 consultation. Paragraph 8.11 of the reg 18 SSBP states: <i>The master planning work considered all of the HELAA sites promoted in Thatcham, rather than considering all suitable sites within West Berkshire.</i> Such a cavalier approach to trying to make the plan fit is noticeable throughout the proposal but is spelt out quite clearly in the attitude to the Strategic Gap. The Reg18 SSBP set out the following in relation to Site THA9 in Table 8.2:

	<p><i>There are concerns that development may reduce the open countryside between Thatcham and Newbury / Greenham, and introduce built form to south of Lower Way. The site is a buffer to development and forms part of the open character along this side of Lower Way. There is further concern that development would not be appropriate in the context of the existing settlement form, pattern and character of the landscape.</i></p> <p>THA9 is for a proposed HELAA development of 36 houses, situated beyond the natural and actual settlement boundary of Lower Way, and which would breach the strategic gap between Thatcham and Newbury.</p> <p>By contrast at the time of regulation 18, THA20 was a proposed development of 2500 houses, which would be situated beyond the natural and actual settlement boundary of Floral Way and the A4, and which would breach the strategic gap between Thatcham and Upper Bucklebury and the AONB. The proposed site is a buffer to development and forms part of the open character along this side of Floral Way and the A4. There is much local concern that development would not be appropriate in the context of the existing settlement form, pattern and character of the landscape.</p> <p>If fair selection criteria were applied, then the comments for THA20 would have been consistent with those for the much smaller development of THA9. However, the comments for THA20 stated:</p> <p><i>In contrast there are very few negative impacts that developing the site would have.</i></p> <p>This shows how predisposed and skewed the “analysis” that WBC is undertaking is.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	No
<p>Please give reasons for your answer</p>	BPC has wider concerns around the way in which WBC has undertaken the consultation process for the LPR and the Duty to Cooperate in general. Failings with Duty to Cooperate are matters which are not capable of being remedied in advance of the plan being submitted for examination. BPC will set out further details of these failings to the inspector should the plan be submitted to the Planning Inspectorate by WBC.
<p>4. Proposed Changes</p>	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
<p>5. Independent Examination</p>	Bucklebury Parish Council wishes to participate in the examination process and will be presenting further evidence through the submission of matters statements and oral evidence from experts. To provide updated evidence to the examiner. For other relevant experts employed by parish council to give detailed technical views on matters.
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No</p>	Yes

[See attachment 'PS1652 Turley (Hathor Property) Full LPR Rep'] for full consultation response]

1. Introduction

1.1 These representations have been prepared by Turley on behalf of Hathor Property in respect of the West Berkshire Local Plan Review 2039 Proposed Submission (Regulation 19) Consultation (January 2023) (LPR).

1.2 Our client has land interest to the south of Enborne Street, Newbury, and adjacent to the existing built up area of Newbury.

1.3 We look forward to continuing to engage with the LPR process as it emerges.

1.4 These representations are accompanied by the following plans and reports included in the relevant appendices:

- Site Location Plan [see attachment 'PS1652 Turley (Hathor Property) App 1];
- Landscape Appraisal [see attachment 'PS1652 Turley (Hathor Property) App 2];
- Heritage Appraisal [see attachment 'PS1652 Turley (Hathor Property) App 3];
- Transport Note [see attachment 'PS1652 Turley (Hathor Property) App 4];
- Opportunities and Constraints Plan [see attachments 'PS1652 Turley (Hathor Property) App 5'
- Concept Masterplan 'PS1652 Turley (Hathor Property) App 6'];

2. Land at Enborne Street, Newbury

The site and surroundings

2.1 The site extends to an approximate area of 3.15ha occupying land comprising an agricultural field (see Site Location Plan at Appendix 1). There is an existing vehicular access from Enborne Street with associated gates, fencing and parking, which leads to a track extending north-south on the western side of the site and providing access to a courtyard of agricultural buildings.

2.2 The site lies on the southern edge of West Berkshire District. The A34 connects Newbury to Oxford to the north, and Winchester to the south. The north-eastern edge of the site is a short distance (circa 30m) from the settlement boundary of Newbury, as identified in the adopted Core Strategy [and retained as such in the LPR]

2.3 The site lies approximately 3.5km from Newbury Town Centre. Newbury is the main settlement in the District which has good rail, bus and road connections to Reading, Basingstoke and London. It also includes a mainline railway station, and an extensive range of retail, commercial, education and community facilities.

2.4 There is a local centre at Wash Common approximately 1.5km to the north east that provides a range of facilities and services, including a primary school, convenience store, allotments, recreation ground, library and church.

2.5 There are bus stops located circa 500m away in the residential area of Wash Common. The bus services 2 and 2a serve Newbury town centre, Newbury Railway Station and Newbury College. The service runs hourly between Monday-Friday and on Saturdays. The number 6 service also connects with the town centre and railway station, but extends north of Newbury and provides a more irregular service every few hours Monday-Friday and on Saturdays.

2.6 Enborne Street forms part of the Round Berkshire Cycle Route, a circa 140 mile route broadly around the perimeter of the County.

2.7 The site slopes gently from north to south, toward the River Enborne. Established vegetation runs along all boundaries of the site, containing the site. To the north-east of the site, separated from the field by a boundary defined by vegetation, is open land with some clusters of trees, beyond which is the settlement of Newbury. There are detached properties opposite the site on the north side of Enborne Street.

2.8 To the east of the site there is deciduous woodland. The land to the west of the site is also woodland, with some former agricultural buildings enclosed within. This land also has a vehicular access off Enborne

Street. To the south of the site is agricultural field land, beyond which is a small amount of ribbon-like residential development within Enborne Row, located either side of Washwater road.

2.9 To the north of the site, on the opposite side of Enborne Street, are some detached residential properties off the road set in predominantly agricultural land.

2.10 The site is not covered by any statutory landscape or ecological designation. The site falls within the Impact Risk Zones of two SSSIs – Redhill Wood circa 2.6km west of the site, and Greenham and Cookham SSSI circa 3km east of the site.

2.11 A watercourse runs along the eastern boundary of the site, leading from Enborne Street to a pond close to the southern boundary of the site, however the site lies fully within Flood Zone 1.

2.12 The site is classified as Grade 3b agricultural land, which is moderate quality agricultural land.

2.13 There are no listed buildings within or immediately adjacent to the site. The closest listed buildings to the site is circa 580m south of the site (Mill at Falkland Farm, Grade II Listed). The site does not lie within a Conservation Area.

2.14 A Registered Battlefield (Battle of Newbury 1643) lies on the northern side of Enborne Street, opposite the site, extending north adjacent to the built-up area of Newbury.

2.15 There are no Public Rights of Way within the site. Route number ENBO/9/3 runs from Enborne Street a short distance to the west of the site, through the adjacent woodland to Enborne Row settlement to the south of the site.

2.16 The land is under single ownership and is controlled by Hathor Property who are committed to bringing forward residential development on the site following an allocation through the LPR process.

2.17 New development here on any scale will need to be respectful and responsive to its context, aware of the need to maximise use of development land but protecting the special character of the surroundings. The proposals for the site have been developed in this context.

2.18 There is a Class Q approval for change of use from agricultural to residential on the site to the south east (application reference 21/03177/PACOU, approved 15th February 2022). This consent has been implemented and is due to be completed in May 2023.

2.19 To the south of the Site an application for a solar photovoltaic farm has been submitted to WBC (application reference 22/00101/COMIND). This is currently awaiting determination. There are no other relevant planning applications for the site or its surroundings.

Technical Studies

2.20 A series of technical studies have been undertaken to inform the emerging proposals for the site and support its allocation for residential development. These studies are summarised below.

Landscape and Visual

2.21 A Preliminary Landscape and Visual Appraisal has been prepared by LVIA Ltd (February 2023) and is included at Appendix 2. Ten viewpoints were selected to represent a variety of receptors in the surrounding area, all of which were chosen from publicly accessible vantage points. The Zone of Theoretical Visibility was set 2.5km from the site.

2.22 The Appraisal considers the overall sensitivity of the landscape is considered to be medium. The proposal would be consistent with the current landscape character of the site and its surrounding context. With a successful mitigation strategy, the proposal would further integrate with its setting.

2.23 The construction phase will give rise to temporary, short term impacts. The overall weighted level of landscape effect can be considered moderate (i.e. not a material change).

2.24 The viewpoints demonstrate that the visibility of the site is quite limited. The visual impact and the significance of the impacts of the development on the open countryside have been assessed as potentially major/moderate (i.e. a material change) without mitigation from viewpoint 1 at the proposed site access. Change is very limited in its geographic extent due to the surrounding vegetation, landform and built form. The visual effects are minimal due in most part to mature vegetation between the receptor and the site, the topography in the area and similar setting of the proposed scheme.

2.25 Mitigation measures have been identified that can be embedded into development of the site to further reduce the identified impacts. These comprises:

- Retention and management of the existing boundary vegetation;
- Additional ornamental planting;
- Heights of built form to reflect that of its surroundings;
- Built form set back from boundaries to allow growth of boundary vegetation;
- External lighting to be design in line with best practice to minimise potential for light spill;
- Use of external building materials which minimise potential visual intrusion and follow the local vernacular to aid visual blending.

2.26 With the above mitigation measures, the development will have a moderate visual impact and a minor character impact (i.e. not a material change). It therefore is considered can be satisfactorily integrated into the landscape.

Heritage and Archaeology

2.27 A Heritage and Archaeology Statement has been prepared by Ridgeway Heritage Consultancy (February 2023) and is included at Appendix 3.

2.28 The site is located south of the of the southernmost section of the Registered site of the First Battle of Newbury, of 1643. The setting of the designated battlefield has been greatly compromised by modern development on its eastern side.

2.29 The Site and the designated battlefield display contrasting landscape characters, and a limited spatial and visual relationship, which is represented by a narrow frontage on the northern edge of the Site. Inter-visibility between the Site and a small number of distant Grade II-listed buildings is obstructed by intervening land-forms and vegetation.

2.30 The site has low potential for archaeological finds and features, with the possible exception of objects relating to the 1643 battle.

2.31 The proposed development would result in minimal harm to the setting and significance of the adjacent battlefield site and of any other heritage assets, surmounting to the lower end of less than substantial harm. In accordance with the requirements of the Planning (Listed Buildings and Conservation Areas) Act 1990 and paragraphs of 194, 195, 197 and 202 of the National Planning Policy Framework (NPPF) (Note: these are primarily applicable to determining planning applications but are a useful benchmark) , this less than substantial harm is significant.

2.32 It requires a balancing exercise to be undertaken assessing the extent of any harm against the public benefits delivered by the Proposed Development, as part of the overall planning balance. In this instance the level of harm associated with a future allocation is less significant and would be more than outweighed by the benefits of the proposals in meeting market and affordable housing needs.

Transport

2.33 A Technical Note has been prepared by PEP to consider the sustainability of the site, suitability of vehicular access onto Enborne Street and capacity of the road network to accommodate development, and is included at Appendix 4.

2.34 The site would be accessible by non-car means of travel to the local area and to Newbury town centre (as discussed in paragraph 2.1 – 2.6 above). A suitable access with appropriate visibility splays can be provided off Enborne Street.

2.35 Up to 70 dwellings would produce around one vehicle movement every two minutes, which is a low level of traffic generation and would not affect existing traffic or safety conditions on Enborne Street.

2.36 From a sustainable transport and highways perspective, development of the site for up to 70 dwellings would be acceptable. There would be no severe impact in line with the NPPF (2021).

The Proposed Development

2.37 The technical studies indicate the site could accommodate up to 70 dwellings. An Illustrative Masterplan indicating how the site could be developed is attached at Appendix 6 [*see attachment 'PS1652 Turley (Hathor Property) App 6'*].

2.38 The Illustrative Masterplan has been guided by the following factors:

- Retention of boundary vegetation for visual screening;
- Topography and views into the site;
- Consideration of nearby heritage assets; and

- Achieving safe and suitable access into the site from Enborne Street.

2.39 The accompanying Constraints and Opportunities plan at Appendix 5 [see attachment 'PS1652 Turley (Hathor Property) App 5'] illustrates that there are no overriding constraints within the site boundary. The site comprises an open field with established vegetation boundary. On the south west edge of the field there are agricultural buildings, one of which has Class Q approval for conversion to a dwelling (Use Class C3). This area will be maintained as existing.

2.40 The Illustrative Masterplan illustrates how development of the site has been led by the landscape and heritage considerations, providing areas of green open space, part of which acts as SuDS features, and an equipped play space.

2.41 Development parcels have been given sufficient buffers to boundary vegetation on all sides. A set back from Enborne Street is provided, in response to heritage comments. A 5m planting buffer is proposed between the development parcel and the road.

2.42 A new vehicular access is proposed from Enborne Street. A main street with several secondary streets will serve the development parcels.

2.43 Pedestrian links can be provided connecting the existing PRoW from the west of the site (ref. ENBO/9/3), to continue through the site, with potential to connect to the north east toward Wash Common. A new 1.8m footpath is proposed at the northern side of the proposed access, to run along the eastern side of Enborne Street to connect to the existing footway at The Grange junction. This would connect the site to the existing footpath network.

2.44 On-site provision of equipped play space can be accommodated within the site, alongside a policy compliant level of public open space. SuDS features can also be located on-site.

2.45 The framework has been drafted according to the following assumptions:

- The proposed housing mix will respond to local housing need and include a range of 2, 3 and 4 bedroom homes and include provision of policy compliant level of affordable housing.
- Housing will be 2 storey with potential for 2 ½ storey in key locations.
- Detail with regards to materials, planting etc. will be dealt with at the application stages of the planning process, although design detail will seek to reflect the locality.
- Priority will be given to ensuring a bio-diversity net gain of at least 10%

2.46 We consider that the development of the site would secure the following benefits:

- **Housing Need** - the site is capable of delivering up to 70 high quality homes,. This will assist in the delivery of new market and affordable housing that is capable of addressing local need in terms of type and tenure. The site can be brought forward for development quickly and is capable of making an important contribution towards the immediate housing needs of the District during the early years of the LPR period.
- **Housing Mix and Choice** – the site is capable of delivering a mix of open market and affordable housing reflective of current and future demographic and market trends and the needs of different groups in the community.
- **Open Space** - any new residential development will provide a strong landscape framework comprising new open space provision for formal and informal play and recreation providing opportunities embedded within green infrastructure.
- **Promoting Healthy Communities** - the site is in an ideal location for residential development, immediately adjacent to the most sustainable settlement in the District and in close proximity to existing retail, education and community facilities and services within Wash Common. These facilities are accessible by foot, and beyond this Newbury Town Centre and railway station are accessible via cycling or public transport. The railway station provides access to key locations such as Reading, Basingstoke and London.
- **Economy** – the proposed development will provide a boost to the local economy during construction and subsequent occupation.

Sustainability Appraisal

3.23 Table 11 of the Sustainability Appraisal / Strategic Environmental Assessment considers the merits of different strategic options for delivering the necessary growth to meet development needs during the LPR period.

3.24 There is little evidence to justify why the particular options have been selected. Having identified that Newbury offers the greatest potential for sustainable development, there is a specific option that focusses development on Newbury. It is concluded that:

“This option gives a number of potentially positive sustainability effects in relation to focusing development on the biggest town with the largest number of facilities, with a significantly positive effect predicted due to the strategies’ focus on the use of brownfield and. However, there are is an unknown impact as to whether the strategy would be able deliver adequate housing to meet the local identified need due to

the lack of suitable sites within the area." A reliance on focusing development in Newbury may not deliver the number of dwellings required to meet the local need."

3.25 The conclusion is that:

"Further largescale development opportunities are more limited, although there are opportunities for redevelopment within the settlement boundary and on brownfield sites."

3.26 Appendix 4 [see attachment 'PS1652 Turley (Hathor Property) App 7] provides a more detailed scoring assessment of this option and a useful comparison with the option focussing on strategic growth in Thatcham (the 'preferred option'). Whilst it is recognised that strategic growth in Thatcham does offer the potential to secure related infrastructure, facilities and services alongside residential development, a suitable balance does need to be made with the greater level of existing facilities and services, and opportunities to use alternatives to the private car, that exist both within the settlement but also around Newbury.

3.27 It is unreasonable to score this option less positively than the preferred option of strategic growth at Thatcham when, for example, opportunities for reducing impacts on climate change or deliver development in sustainable locations are more likely to be positive in the short term. Scoring this option negatively on the basis of a 'limited number of smaller site options' is not appropriate.

3.28 In addition, if confirmed, the strategic allocation will inevitably take some time to deliver housing, as evidenced by the large timescales associated with the allocation at Sandleford Park. It is highly unlikely that any delivery will come forward within the first five years of the LPR period, and potentially significantly longer.

3.29 To this effect, an alternative option that explored a focus on both Newbury and Thatcham, with reduced growth in the AONB villages and Eastern Area, may well have been more appropriate. This would have provided a better balance in delivering sustainable development throughout the LPR period.

5. Summary and Conclusions

5.1 These representations have been prepared by Turley on behalf of Hathor Property in respect of the West Berkshire Local Plan Review 2039 Proposed Submission (Regulation 19) Consultation (January 2023).

5.5. Newbury is the largest settlement in the District and is able to support residential growth to provide the housing needs in a sustainable location. The strategy set out in the LPR gives insufficient weight to the ability to meet key sustainability objectives from greenfield sites adjacent to Newbury.

5.6 Land at Enborne Street, Newbury is a sustainable and deliverable site under single ownership. The accompanying Transport note, Heritage Assessment and Landscape and Visual Assessments confirm that the proposals can be accommodated without adverse impact on highway safety, and will have no adverse effect on heritage assets or the wider landscape. There are no other identified technical barriers to development of the site.

5.7 The Illustrative Masterplan demonstrates how proposals could be provided on site to further minimise these impacts and deliver a well-designed scheme that retains boundary hedging and woodland and provides suitable open space, equipped play space, and connectivity with the surrounding rights of way and footways along Enborne Street to connect to Wash Common/Newbury. It would provide a logical extension to the existing settlement.

5.8 It is considered Land at Enborne Street, Newbury should be considered as a residential site allocation to support housing delivery in the District.

5.9 Hathor Property look forward to working with the Council throughout the LPR process.

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is	Yes

<p>consistent with achieving sustainable development.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>Omission Site: Gorse Covert</p> <p>Object. The policy is not justified or consistent with national policy.</p> <p>The Sandleford Park allocation has been carried forward from the Core Strategy, Policy CR3 Sandleford Park. It was intended to deliver up to 2,000 homes. Site constraints and the importance of delivering a significant level of green infrastructure have reduced its capacity to around 1,500 units.</p> <p>The draft plan, through policies SP1 Spatial Strategy and SP3 Settlement Hierarchy, continues to place importance on focusing housing development in Newbury, identifying that an urban extension on greenfield land at Sandleford Park will form a new residential neighbourhood. The Sustainability Appraisal/Strategic Environmental Assessment reinforces this approach. It did, however, consider four options for Sandleford Park (Table 28, page 36). It did not consider an additional option to include Land South of Gorse Covert. Land South of Gorse Covert (plan attached) presents an opportunity to support the plan strategy of focusing new residential development in Newbury and ensure that the optimum number of dwellings is proposed in this sustainable location [Sandleford Park].</p> <p>Land South of Gorse Covert is available, suitable and deliverable within the plan period. The site has capacity to deliver up to circa 200 housing units. It is adjacent to, and immediately to the south of, the Sandleford Park Strategic Allocation set out in Policy SP16. Consequently, it abounds the land the subject of an outline planning permission for up to 1,000 homes, Land at Sandleford Park (Ref 20/01238/OUTMAJ), the larger of the two Sandleford Park sites. Bloor Homes is the developer for both Land South of Gorse Covert and Land at Sandleford Park.</p> <p>The site is in a sustainable location for development, being in Newbury and adjacent to an allocated site. There are no site constraints which prevent it from being developed</p> <p>Land South of Gorse Covert was assessed in the HELAA Update 2023 with reference GRE2. The capacity was incorrectly estimated as 150 units instead of up to circa 200 units. Contrary to information in the HELAA, it is now being promoted by a developer. The site is identified as being bordered by ancient woodland to the north but this is an area of commercial woodland and is not subject to an ancient woodland designation. There is scope to provide access to the site through this wooded area. Woodland to the south is at some distance from the site boundary. Overall, the site appears to have been excluded from further consideration due concerns over landscape character.</p> <p>The accompanying note Annexe 2. Land South of Sandleford Park, Newbury (HELAA Site Reference GRE2) Preliminary Landscape Review sets out an assessment by the developer's landscape architects SLR. This concludes that 'development of the site would not have a detrimental effect on the "settlement form, pattern and character of the landscape.'" The review was based on consideration of relevant policy documents and a desktop-based study of the existing landscape pattern within the site and its immediate vicinity.</p> <p>The review reaches this conclusion (paragraph 6.2) 'due to the site's location within the landscape, and the strong existing boundaries associated with the current and future1 landscape and visual baseline. The setting of, and views from, Grade 2 listed Sandleford Priory would also be preserved. The proposed settlement form and pattern within the site would be aligned with the proposed development pattern</p>

	<p>within the allocated Sandford Park8 development north of Gorse Covert. It would respect and strengthen existing boundary elements – reinforce existing hedgerows to the east and west and provide appropriate buffers from the woodland edges to the north and south. This would help to integrate the site and associated development within its landscape context, thereby ensuring that new development is appropriate in terms of location, scale and design in the context of the existing settlement form, pattern and character.'</p> <p>The site is being promoted by the developer for Land at Sandford Park, which offers maximum potential to integrate the site into the existing allocation. The site would benefit from the new services and infrastructure coming forward as part of Sandford Park, representing a highly sustainable extension to a long standing commitment in the Local Plan.</p> <p>As currently proposed, SP13 does not present an appropriate strategy in that it has not fully taken account of all reasonable alternatives i.e an option to increase the size of the Sandford Park Strategic Allocation. It also fails to include a parcel of land which would contribute towards the delivery of sustainable development, contrary to the intentions of the NPPF (2021)</p> <p>Attachment: annex 2 and Gorse Covert Location Plan</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>

Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>As the owner of the Kennet Centre in Newbury, we set out in this letter our representations on those policies in the Proposed Submission Local Plan that are relevant to this key regeneration site in Newbury's town centre.</p> <p>An application for the redevelopment of the site was refused in November 2022 for: "Full planning permission for the phased redevelopment of the Kennet Centre comprising the partial demolition of the existing building on site and the development of new residential dwellings (Use Class C3) and residents' ancillary facilities; commercial, business and service floorspace including office (Class E (a, b, c, d, e, f, and g)); access, parking and cycle parking; landscaping and open space; sustainable energy installations; and associated works."</p>

It is however the intention of Lochailort Newbury Ltd to continue to pursue the redevelopment of this site and the below representations are made in this regard.

The site is located in the centre of Newbury and currently forms one of two purpose-built shopping centres in the town. The existing shopping centre has suffered a gradual but sustained period of decline as a result of the redevelopment and newer retail centres in the town, and edge of town, changes in the pattern of retail including online shopping and more recently the COVID-19 pandemic. The Kennet Centre is now a failed and out of date shopping centre in need of significant investment and repurposing.

The regeneration benefits of redeveloping the site as a mixed use scheme incorporating residential, commercial and retail will result in significant economic, environmental and social benefits for Newbury and these are detailed in Appendix 1.

Site Allocation

The Regulation 18 included draft Policy RSA 1 which allocated the Kennet Centre for a mixed use development and acknowledged its highly sustainable location, with the intention to draft further detailed policy criteria. The draft policy is set out below:

[See attached Emerging Draft Policy RSA1 and Appendix 1]

Lochailort Newbury Ltd wrote to the Council in response the Regulation 18 in their letter of 5th February 2021 as follows and, while the policy is no longer included in the Proposed Submission Local Plan, the below comments still stand:

*We **support** the identification of the Kennet Centre as a site in need of regeneration.*

*We **support** the explicit recognition that this is a highly sustainable location. We also support the flexible wording of the policy in referring to a mix of uses rather than setting out any use mix requirement or restriction.*

*However, we also request the following **policy changes** to align the emerging site-specific allocation with our comprehensive redevelopment masterplan that has already been subject to extensive consultation:*

It is within the context of the above background that we make the following representations.

1. Quantum of residential development

*The iterative masterplanning process that we have undertaken over the past months has confirmed that, as part of a mix of uses, this highly-sustainable location could accommodate **a minimum of 400 dwellings**. The reference to “approximately 250 dwellings” in the draft policy should be increased to “approximately 400 dwellings, or approximately 500 dwellings should C2 uses form part of the redevelopment.”*

2. Existing uses

It would be difficult to extend or redevelop the Kennet Centre in its current form from an engineering and energy performance perspective and to that end, whilst we intend to retain the existing multi-storey car park and the 2009-built cinema wing, the rest of the centre (built in phases from the 1970s onwards) will be demolished in its entirety. The policy wording should be amended to read “The residential aspect would complement any retained and/or additional non-residential uses on the site.”

3. Development density

The Kennet Centre occupies a significant parcel of land in West Berkshire’s largest town centre. It benefits from excellent sustainable transport links by virtue of its location mid-way between the railway station and bus station. It has a level of accessibility to services, facilities and employment opportunities that no other brownfield site in the District can equal. Its comprehensive redevelopment offers an unparalleled opportunity to revitalise and regenerate this part of the town centre. Consequently, the site’s unique sustainability credentials, together with its scale, mean that redevelopment here should be maximised to make the most efficient use of the site and thus minimise the quantum of development needed on greenfield land elsewhere. The opportunity for sustainable energy installations is also maximised with higher density schemes. This means that an appropriate development density should be informed by proper master planning and contextual analysis, rather than being led or constrained by the more generalised approach adopted in the West Berkshire Density Pattern Book. Accordingly, the policy wording should be amended to read “The site occupies a highly sustainable location and presents an opportunity for a substantially higher density than estimated using the West Berkshire Density Pattern Book.”

4. Appraisal criteria

We acknowledge the site’s location within the Conservation Area, where the test is whether a development preserves or enhances the area’s character and appearance. We would expect the appraisal criteria to be defined to align with the statutory test.

It is acknowledged that WBC does not consider it necessary to allocate sites within development boundaries as the principle of development is established as set out in paragraph 6.26 of the Submission Draft Local Plan. However, we consider that the Kennet Centre site allocation should be reinstated to acknowledge the importance of this site to Newbury in terms of town centre uses, significant residential development, highly sustainable location and regeneration.

There is exceptionally strong policy support for the principle of the comprehensive redevelopment within the *National Planning Policy Framework*, *Planning Practice Guidance*, and the numerous ministerial and Prime Ministerial announcements and speeches on the importance of revitalising our town centres. It is notable that the Newbury BID formally support the redevelopment. A site allocation would acknowledge the significant challenges the existing Kennet Centre faces and the considerable benefits its redevelopment would bring to Newbury. It would also assist in the delivery of this important site.

Please give reasons for your answer	<p>Omission Site - Donnington Valley Golf Course</p> <p>We note that the settlement boundary review has been undertaken since the Regulation 18 consultation took place. The Settlement Boundary Review (SBR) (December 2022) includes the proposed new settlement boundary for Donnington, which we note does not significantly differ from the current settlement boundary.</p> <p>In limiting the ambition of the settlement boundary review, the Council has overlooked the opportunity to consider potential for development on well-located sites in close proximity to existing settlements.</p> <p>Within our representations to the Regulation 18 Consultation, we commented that we disagree with the Council's approach of relying on larger sites and ruling out sites within smaller settlements and only allocating sites which fall within the service villages, rural service villages or urban areas. The Regulation 19 Draft Local Plan follows suit in its approach to allocating sites for housing development, as evidenced by the allocated sites Sandleford Park (1,500 dwellings) and North-East Thatcham (1,500 dwellings). As such, we maintain that the Council should seek to accommodate further growth across the district. The Council's approach, in our view, is not consistent with the NPPF.</p> <p>The Landscape and Visual Appraisal Note which accompanies these representations shows that our client's site at Donnington Valley Golf Course could accommodate housing development which would assist the Council in reducing reliance on larger sites. Whilst the principles of delivering large sites with accompanying infrastructure is supported by national planning policy, and we do not object to these allocations, we raise concern that the numbers suggested may not be delivered within the plan period. In particular, large allocations require substantial infrastructure to be delivered prior to any housing delivery. Increased small and medium scale sites would complement the larger sites by ensuring a constant stream of delivery whilst larger sites start to mobilise. A modest area of development (50-100 dwellings) at Donnington Valley Golf Course would provide a suitable additional allocation to be delivered in the short term and compliment the longer-term allocations.</p> <p>At paragraph 79, the NPPF states:</p> <p>"To promote sustainable development in rural areas, housing should be located where it will enhance or maintain the vitality of rural communities. Planning policies should identify opportunities for villages to grow and thrive, especially where this will support local services. Where there are groups of smaller settlements, development in one village may support services in a village nearby."</p> <p>The Council's approach to rule out sites which are outside of the settlement hierarchy (at stage 3 of the site selection process), without considering the site-specific benefits of such sites, is inconsistent with the above paragraph of national planning policy. The approach also overlooks the circumstances relevant to settlements such as Donnington which, whilst below the Council's settlement hierarchy, has a close functional relationship to Newbury and, therefore, benefits from the services and facilities in Newbury which are readily accessible.</p> <p>Attachments: Donnington site boundary and Donnington Valley Golf Course LVA Note</p>

<p>Please give reasons for your answer</p>	<p>Location and type of sites allocated in the WBC LPR for Newbury and Thatcham</p> <p>The WBC LPR proposes a range of 8,721 to 9,146 net additional homes during the period to 2039. Of these, some 3,000 units or around one-third of total homes are proposed for just two strategic sites; Sandford Park, Newbury and North East Thatcham. Each site has a proposed allocation of 1,500 units during the plan period. Given that part of the North East Thatcham allocation lies in area of flood risk and the full extent of the development site has not been shown to comply with the Sequential Test we object to the figure of 1500 for this site.</p> <p>The strategy of a full third of the homes proposed in West Berkshire being provided from only two of the sites cannot be said to be justified or consistent with National Policy. The NPPF (paragraphs 68-68) underlines the need for a mix of sites to meet the needs of the area.</p> <p>Adding all the provision set out in Policy SP13 totals 3,459 dwellings to be provided in Newbury and Thatcham. Even ignoring the fact that some of the unallocated and windfall sites will be provided from Newbury and Thatcham, this equates to some 47% of total housing numbers. Such a spatially imbalanced strategy flies in the face of the guidance set out in the NPPF and questions the soundness of the plan.</p> <p>There is a plethora of studies concerning the delivery of large-scale strategic sites nationally in respect of market factors and constraints including the provision of infrastructure (footnote 3). The implications of these studies for the strategic sites is discussed in the representations to policies SP16 and SP17 below but the general conclusion is that the numbers allocated in the current plan period are over-optimistic and the delivery trajectory for both sites should be flatter. As such, they fail to meet the test set out in paragraph 73 d) of the NPPF, whereby strategic policy-making should "make a realistic assessment of likely rates of delivery, given the lead-in times for large scale sites..." They are also less likely to deliver their full potential during the plan period.</p>

<p>Please give reasons for your answer</p>	<p>Allocation SP17 (NE Thatcham) is not appropriate Please see comments on policy SP17 <see ID: PS1426> <i>para 6.28</i> Text regarding the strategic site at NE Thatcham is not appropriate. The sentence "Strategic development in Thatcham will bring considerable benefits to the town... provision of new schools, community facilities and recreational provision." Is not accurate as the proposed benefits would only benefit the proposed new housing, not the existing town. <i>Para 6.29</i> The sentences "There is significant potential on previously developed land within settlement boundaries, particularly in Newbury town centre and periphery" and "sites within settlement boundaries are not being allocated" are self-contradictory. The latter means that the LPR is allocating far more housing on greenfield sites than is necessary.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Allocation should be significantly reduced or removed - please see my comments on Policy SP17 <i>para 6.28</i> The sentence regarding benefits should be removed.</p>

	para 6.29 The sentence “sites within settlement boundaries are not being allocated” should be removed and sites on previously developed land within settlements should be allocated where appropriate. Housing allocations on greenfield sites should be reduced or removed accordingly.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	To explain to the inspector why the allocation is not appropriate To explain to the inspector why sites within settlement boundaries should be allocated
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	N/A
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the	

<p>area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>As reasoned in our SP12 response (<i>ID: PS1260</i>), we do not think there is a need in the Thatcham part of this Spatial Area for a greenfield site larger than 5-700 homes. There are windfall sites there within or on the edge of the settlement area that could take that number, so an allocation of 500 for a single site in the general area of North East Thatcham is all that is justified. More work will be needed while the Plan making process is paused to establish more precisely where this should be.</p> <p>We also think that there remain significant issues with the Sandlesford site allocated in 2012. We see little prospect of more than 50 new dwellings being occupied south of Monks Lane Newbury until Thames Water upgrades the foul sewer network through Newbury and on to Lower Way Thatcham treatment works, which is likely to take at least five years according to its own estimates. More detail of our reasoning for a reduced number over the Plan period is in our response to SP16.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	N/A
<p>4. Proposed Changes</p>	<p>In the table for Large sites, SP16 should be reduced to 1200 and for SP17 to 500.</p> <p>In 6.28, delete all after "1500 homes could be developed" in line 3 in that sentence and add", of which only 1200 are likely to be delivered by 2039." In the fourth line replace 1,500 with 500. The remainder of this paragraph can stay as it is.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	Yes
<p>5. Independent Examination</p>	We wish to explain our whole approach to new housing in these urban areas.

6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>Please give reasons for your answer</p>	<p><i>[See attachment 'Opus Works (NCGC & Chartfield) Full LPR Rep']</i></p> <p>We have reviewed the Local Plan Review (LPR) and we wish to submit a number of representations in response to policies and proposals, which impact upon the development plans of Newbury and Crookham Golf Club (NCGC), particularly in light of ongoing determination of the plans for redevelopment of the existing clubhouse (ref: 22/01400/FUL), which is proposed to be financially enabled via a residential development of 31 units (ref: 22/01448/FULEXT).</p> <p>In the paragraphs below, we will identify the relevant policies and proposals before commenting on them either in support, or in the form of an objection, which we trust West Berkshire Council (the Council) as Local Planning Authority (LPA) will give careful consideration, before the submission draft of the Local Plan Review is published and submitted for examination.</p> <p>Policy SP1 - Spatial Strategy</p> <p>This policy states that the overall approach to development will be based on three spatial areas:</p> <ul style="list-style-type: none"> • Newbury and Thatcham • Eastern Area • North Wessex Downs AONB <p>Newbury is identified as a focus for housing development. NCGC is located on the south- eastern edge of Newbury. Therefore, in accordance with policy SP1, it is a suitable and sustainable location for housing development.</p> <p>Policy SP3 - Settlement Hierarchy</p> <p>This policy states that development in West Berkshire will comply with the spatial strategy set out in policy SP1. Development will be focused on the most sustainable settlements. The Urban Areas (including Newbury) will be the prime focus for housing and economic development, offering development potential through: regeneration of built-up areas; allocated sites in the LPR and Neighbourhood Plans; retention of settlement identity and necessary supporting infrastructure.</p> <p>In this case, we consider that land at NCGC is suitable for allocation as a residential site in the LPR, as it lies on the edge of the settlement of Newbury and is adjacent to an existing bus stop on an established bus route (Number 2 and 8 services).</p> <p>Policy SP7 - Design Principles</p> <p>This policy states that new development will strengthen a sense of place through high quality locally distinctive design and place shaping. It will make places better for people, taking opportunities available for conserving and enhancing the character, appearance and quality of an area and the way it functions.</p>

NCGC consists of 50 hectares (123 acres) of undulating land immediately to the east of the built-up area of Newbury, as delineated by Pigeons Farm Road. NCGC contains considerable areas of woodland and green infrastructure. A modest housing development of c.31 units on 2 hectares (5 acres) of land at the western edge of NCGC, which sits on relatively flat land, offers opportunity to make good use of this under-utilised space which does not form part of the playing area associated with golf course, to create a verdant and attractive "landscape-led" scheme. Enabling the retention of NCGC through delivery of a much-needed replacement clubhouse and will in turn conserve and enhance the existing landscape character and historic context of the site, which is the seventh oldest golf club in England, as well as its wider surroundings. The location on the edge of the countryside, adjacent to existing rights of way and overlooking land in leisure use will offer unique opportunities to improve access to the countryside and leisure facilities for new residents and existing ones. The health and well-being benefits of the proposal for the local population will be significant.

Policy SP8 - Landscape Character

This policy states that landscape-led development which conserves and enhances the biodiversity and local distinctiveness of the landscape character of the district will be supported. With regard to development proposals, particular regard will be given to: valued features and qualities; sensitivity and capacity of area to change and ensuring that new development is appropriate in terms of location, scale and design to the context of the existing settlement form, pattern and character.

The proposed residential site does not lie in a sensitive landscape location. The site is remote from the AONB to the north, while closer to the north-west is the racecourse and to the south is the former Greenham Common Air Base. As part of the residential application process, a LVIA has been undertaken which has demonstrated that the new buildings will not have a harmful impact on the existing settlement form, pattern and character. Appropriate landscape mitigation is also proposed, including native planting and significant biodiversity enhancement measures. The 50-hectare land holding

contains substantial areas of woodland, which helps to screen the residential site from long-distance views and the proposed residential development will therefore make little significant impact to the landscape setting of the settlement or the surrounding area; development may arguably improve the setting.

Furthermore, the proposed demolition and replacement of the clubhouse, which will be funded by the proposed housing development, is proposed as a wholly single-storey building, on previously developed land, which is subject to landscape planting to ensure that it blends into the landscape and does not lead to any harm arising either to the site or its surroundings, as demonstrated by the submissions made in support of the planning application. The new homes and clubhouse will provide significant economic, environmental and social benefits for the local community, whilst not harming the landscape character of the area and its surroundings.

Policy SP10 - Green Infrastructure

This policy states that the council will maximise the potential for strengthening both local and strategic Green Infrastructure (GI) across the district. Development will protect and enhance existing GI assets and linkages and add to the local network for the benefit of both the natural environment and the health and wellbeing of the community.

NCGC is a land holding of 50 hectares (123 acres). Only 2 hectares (5 acres) are proposed for residential development in the south-west extremity of the land holding. There is considerable scope available to use parts of the remaining 48 hectares of land to plant new trees and other GI to enhance and protect the verdant character and appearance of the local area on the south-eastern edge of the settlement and this is demonstrated in the landscape proposals and the Biodiversity Net Gain report submitted in support of the proposals.

Allocation of land at NCGC will ensure that significant GI improvements will be provided as part of a landscape-led scheme. The availability of so much land in the same ownership and adjoining the proposed development will offer opportunities to make a net gain in GI, which will be to the benefit of the local community. Given the location of the GI on NCGC, which is managed by a team of green keepers, who are highly qualified in arboreal and ecological care, it will be possible to ensure that any new planting is maintained and properly managed over the long-term which will ensure that the GI improvements are there to be enjoyed by the local community for many decades to come.

Policy SP11 - Biodiversity and Geodiversity

This policy states that development proposals will conserve and enhance biodiversity and/or geodiversity and will deliver net gain. Development proposals across the district will be expected to deliver 10% net gain for biodiversity either within the site boundary or as off-site compensation where appropriate.

On a land holding of 50 hectares, with only 2 acres proposed for residential development, there will be considerable scope for the provision of biodiversity net gain. This will be available not only for the 2 acres of residential development proposed by NCGC, but it could potentially be available for other smaller residential sites to utilise. To support the planning application package, a Biodiversity Net Gain assessment has been undertaken to establish the means to achieve a 10% on-site net gain. This has ensured that the proposal will make a positive contribution to bio and geodiversity in the local area to the benefit of the local community, both in visual and well-being terms. Such improvements, if consented, will ensure that NCGC contributes positively the bio and geodiversity of the locality for many decades to come.

Policy SP13 - Sites allocated for residential and mixed-use development in Newbury and Thatcham

The policy lists a number of sites of varying sizes, which are proposed to be allocated for residential development. It is recognised, however, that the LPR demonstrates a considerable housing shortfall and whilst there is a sizeable contribution by windfall sites, of which the ongoing residential proposals could form part of the potential quantum, it is contended that further sites should be allocated to provide more certainty regarding where development is identified and the rationale underpinning this inclusion, particularly given the increase in the identified shortfall from 1,661 dwellings to 1,809 dwellings between the Reg.18 and Reg.19 versions of the LPR.

It is noted from review of the current LPR allocations that the Council is not averse to allocating land in the countryside or to amend settlement boundaries. It is also pertinent to highlight Full Councils concerns about delivery at the scale identified in respect of the NE Thatcham allocation. In this context, and irrespective of any changes to 5YHLS guidance, it is considered that allocation of the proposed residential land at NCGC is merited. The 2 hectares of land proposed for residential development is relatively flat with no long distance views. It is well-screened and fully enclosed by existing woodland, both around the development parcel and at site boundaries and a landscape-led scheme that will enhance and improve the visual amenity of the local area and provide 10% biodiversity net gain has been developed. Use of additional owned by NCGC to enhance the natural environment on the edge of Newbury and provide improvements to access and usability of surrounding public rights of way as part of the residential proposals, will lead to considerable improvements to the amenities, wellness and mental health of both existing and future local residents.

In its current form, it is therefore considered that Policy SP13 has not allocated sufficient sites to help meet the District-wide shortfall of 1,809 dwellings identified in the LPR. The allocation of residential development at NCGC would not only help towards more effective delivery against identified housing need, but would also support other policy aspirations of the LPR relating to support for the rural economy and local community facilities (in this regard, please see our additional comments against Policies DM35 and DM39, below).

Policy SP13 – Sites allocated for residential and mixed-use development in Newbury and Thatcham is Objected to, because it is considered that accommodation can be made for the proposed residential development at NCGC, which should be included in the list of larger sites (1ha or larger) for the allocation of c.31 dwellings.

Policy DM35 - Sustaining a prosperous Rural Economy

NCGC is a rural 'not for profit' company, located beyond the settlement boundary of Newbury, but in an area adjacent to many homes and local residents who make use of its attractive open spaces to play golf and enjoy the countryside. The sport of golf is currently under a great deal of pressure. Overall, player numbers are on a long-term downward trend and balance sheets around the world have been hit hard by Covid-19 related closures. In this context, there have been two recent closures; the Racecourse and Donnington Valley, the latter of which has closed to members.

Whilst the Covid period provided a small boost in numbers to NCGC when golf provided that chance to enjoy sport in safety, the financial pressures have remained and change is required. There are several examples of other golf courses within the Council area or in adjacent Districts and Boroughs seeking to similarly plan for their future through discreet residential development and/or diversification of the leisure offer.

It is therefore important to plan proactively to ensure retention of sports and leisure facilities for the local community, especially ones that provide opportunities for exercise in the open air, which is good for fitness, health and mental well-being. NCGC is a leisure facility located in a rural area in a very accessible location. It is a business that supports 19 on-site, as well as a number of associated indirect jobs, which leads to overall investment of over £500k per annum in the local economy. NCGC also maintains 50 hectares of attractive countryside, which would otherwise suffer from lack of stewardship. There are significant community, well-being and environmental benefits accruable from ensuring that the golf club is retained and encouraged to thrive into the future.

Policy DM 35 states that proposals for development relating to rural enterprises, such as NCGC, should demonstrate that they comply with a long list of criteria. As mentioned previously, NCGC proposes to demolish and replace its existing clubhouse and car park. The new clubhouse will have much-improved

facilities for use by members and the general public. The enhanced facilities will create opportunities for greater training, work with schools and the local community. Significant landscape and biodiversity improvements will be possible because the golf club owns 50 hectares of rural land, which offers tremendous scope for investment in the local area. It will not just be a case of allocating 2 hectares of land and getting c.31 dwellings in return. The benefits of the allocation of the proposed enabling development will be substantial and will ensure that the community gains considerable tangible benefits from the scheme over many years.

The development proposals, which are supported by England Golf and Sport England, will help to attract new and varied membership, diversify income streams and ensure that the future of the golf club will be secure for decades to come. However, this will only be possible if an enabling development of c.31 dwellings on surplus land, which adjoins the existing settlement, is permitted in order to fund the redevelopment of the clubhouse and to provide capital to ensure the golf club is robust and can thrive into the future.

Policy DM39 - Local Community Facilities

NCGC is a leisure-based business, located adjacent to many homes and local residents in the Newbury Area who make use of its attractive open spaces to play golf and visit the facilities. The sport of golf is currently under a great deal of pressure. Player numbers are on a long-term downward trend and balance sheets around the world have been hit hard by Covid-19 related closures. Against this, it is important for the local community to have access to sports and recreation facilities, especially ones that provide opportunities for exercise in the open air, which is good for fitness, health and mental well-being. In this regard, it is noted that in supporting text to Policy DM39, paragraph 12.62 identifies 'Areas or places for community outdoor sport or recreation' within the definition of local community facilities.

NCGC is a leisure facility located in a highly accessible location. It is a business that supports 19 FTE jobs and it maintains c.50 hectares of attractive and maintained land, which would otherwise suffer from lack of stewardship. There are significant community, well-being and environmental benefits accruable from ensuring that the golf club is retained and encouraged to thrive into the future.

Policy DM39 provides support for new and expanded provision of local community facilities, subject to meeting a number of criteria relating to need, accessibility, design, engagement and use of spaces. The proposals at NCGC have been subject to lengthy and meaningful engagement and consideration to identify how to best respond to changing needs and demands in the golf industry and to deliver on inclusivity and diversity ambitions and these are manifest in the planning applications submitted to the Council for its consideration.

The new clubhouse will have much improved facilities for use by members and the general public. The enhanced facilities will create opportunities for greater training, work with schools and the local community. Significant landscape and biodiversity improvements have been suggested through the planning applications, as have improved access and extensions to public rights of way around the golf course. The golf club ownership of c.50 hectares of rural land offers tremendous scope for investment in the local area. It will not just be a case of allocating c. 2 hectares of land and getting c.31 dwellings in return. The benefits of the allocation of the proposed enabling development will be substantial and will ensure that the community gains considerable tangible benefits from the scheme over many years.

A scheme of c.31 dwellings is currently proposed, which has been subject to significant due diligence at pre-application stage and identified as a quantum that could provide the quantum of enabling development desired, whilst also ensuring that the minimum level of development required is progressed. Retention of long-term golf at NCGC is the scheme driver and the residential development is being progressed solely to fund this. A detailed Business Case has been submitted to the Council to set out issues and options leading to the development decisions made, these being subject to robust Viability Review.

The improvements to the clubhouse and course will help to attract new and varied membership, diversify income streams and ensure that the future of the golf club will be secure for decades to come. However, this will only be possible in these testing times, if an enabling development of c.31 dwellings on surplus land, which adjoins the existing settlement, is permitted in order to fund the redevelopment of the clubhouse and to provide capital to ensure the golf club is robust and can thrive into the future.

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Should the Council consider the representations made in support of allocation of land at NCGC for residential development to have merit, NCGC respectfully suggest the following policy wording:</p>

	<p>Policy RSA XX – Land at Newbury and Crookham Golf Club, Greenham, Newbury (Site Ref: GRE10 and GRE11)</p> <p>The site, as identified on the indicative map [<i>the attachment 'Opus Works (NCGC & Chartfield) Appendix 1 includes a plan of the site</i>], has a developable area of 2 hectares and is proposed to be allocated for residential development comprising c. 31 dwellings, made up primarily of family-sized homes.</p> <p>Development will be delivered in accordance with the following parameters:</p> <ol style="list-style-type: none"> 1. The provision of c.31 dwellings will be developed at a mass and density that reflects the character of the adjoining settlement. 2. The site will be developed in accordance with the Landscape Sensitivity Assessment (2011). 3. The design and layout of the development will be further informed by a full detailed LVIA as required by Policy SP8. 4. The scheme will provide significant Green Infrastructure improvements in accordance with Policy SP10. 5. The scheme will include at least 10% bio and geodiversity net gain in accordance with Policy SP11. 6. The scheme will be supported by an extended phase 1 habitat survey, together with further detailed surveys arising from that as necessary. 7. The scheme will be informed by a FRA, which will advise on any necessary flooding and drainage mitigation measures. 8. A Transport Assessment will be required to establish the appropriate locations for access onto the wider road network and to ensure appropriate measures are put in place to mitigate impacts on the highway network. 9. As the proposal is to enable redevelopment of an existing Local Community Facility, a S106 agreement will be required to ensure that capital released by the development is only spent on the redevelopment of the NCGC clubhouse and other improvements to the golf course to improve its long-term viability. 10. A Viability Report will be required to identify the level of affordable housing capable of being supported by the enabling residential development.
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
<p>5. Independent Examination</p>	To enable the Local Plan to recognise the further assistance needed for rural business and leisure facilities and to underpin a robust mechanism to allow enabling development to come forward to help realise this, where appropriate.
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No</p>	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	N/A
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	The Regulation 18 Emerging Draft Local Plan included a Policy RSA1 for a non-strategic site allocation for the Kennet Centre Newbury: "Policy RSA 1

The Kennet Centre, Newbury (Site Ref: NEW3)
The site, as identified on the indicative map, is proposed to be allocated for a mixed-use development that includes approximately 250 dwellings. The residential aspect would complement the existing uses on the site.
The site occupies a highly sustainable location and may present opportunities for higher densities than estimated using the West Berkshire Density Pattern Book, as much will depend on the mixture of uses and design of the development.
Detailed policy criteria will be developed to highlight specific mitigation measures and infrastructure requirements, and will include the need for the design and scale of development to complement existing buildings and the Newbury Conservation Area.”
This site allocation was included in its Policy SP13 “Sites allocated for residential and mixed-use development in Newbury and Thatcham”.
However, this non-strategic allocation has been excluded from the Regulation 19 draft Local Plan.
The Regulation 18 representations (contained in the Consultation Statement) on this policy and site allocation were generally supportive, provided that it is at an appropriate scale. West Berkshire Council gave the following responses to these representations:
“it is no longer proposed to allocate the Kennet Centre as the site is located within the settlement boundary. Settlement boundaries are a long established planning tool. They identify the main built up area of a settlement within which development is considered acceptable in principle, subject to other policy considerations. While allowing for development, settlement boundaries protect the character of a settlement and prevent unrestricted growth into the countryside. They create a level of certainty about whether or not the principle of development is likely to be acceptable. The LPR will not include allocations within settlement boundaries.”
The logic of this response is unclear. There are many places within settlement boundaries that are not suitable for development, such as parks and open spaces. If the purpose of the Local Plan is to “create a level of certainty about whether or not the principle of development is likely to be acceptable”, then it is illogical for the Plan not to identify those locations where the principle
“The site will now be removed from the LPR due to flood risk. As the site lies within the settlement boundary there is already a presumption in favour of development as set out in Policy SP1.
The site was originally promoted as part of the ‘call for sites’ for the Housing and Economic Land Availability Assessment (HELAA) in 2017. The promoter at the time indicated that there was potential to accommodate residential and/or a hotel to complement the existing uses on the site.
The Level 1 Strategic Flood Risk Assessment (SFRA) indicated that 40% of the site was within Flood Zone 1 (low risk of flooding), with 60% within Flood Zone 2 (medium risk of flooding). The Site Selection Background Paper for the emerging draft (Regulation 18) Local Plan Review (LPR) therefore advised that any residential development should be located within the southern area of the site which falls within Flood Zone 1.
Since the Regulation 18 consultation on the LPR, the site has changed ownership and alternative proposals have been put forward by the promoter. These proposals seek a comprehensive redevelopment with residential uses spread across much of the site.”
The first paragraph of this response is contradictory: Policy SP1 gives a presumption in favour of development but, if there is a flood risk (which I question below), then Policy SP6 would give a presumption against development.
Since the Regulation 18 consultation, a detailed planning application has been made for this site, with the name of ‘Eagle Quarter’. This application provided retail space on the ground floor, with housing at higher levels. This application was refused on grounds of over-development, but any future application is likely to devote the ground floor to retail and business units.
Paragraph 85 of NPPF states:
“The use of previously developed land, and sites that are physically well-related to existing settlements, should be encouraged where suitable opportunities exist.”
And Paragraph 119 states:
“Strategic policies should set out a clear strategy for accommodating objectively assessed needs, in a way that makes as much use as possible of previously-developed or ‘brownfield’ land.”
The Kennet Centre clearly falls into the definition of “previously developed land” in the glossary of NPPF.
Paragraphs 159 and 160 of NPPF state:
“inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at highest risk (whether existing or future). Where development is necessary in such areas, the development should be made safe for its lifetime without increasing flood risk elsewhere.
Strategic policies should be informed by a strategic flood risk assessment, and should manage flood risk from all sources.”
If the dwellings on this site are restricted to the first floor and above, and the access to these dwellings are limited to locations within the 40% of the site in Flood Zone 1, then the residential element of the development is not at risk of flooding, and this development cannot therefore be considered as ‘inappropriate. A sequential and exception test would therefore conclude that the residential aspect of the development is acceptable.

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>N/A</p>

4. Proposed Changes	Policy RSA1 should be restored to the draft Local Plan, with appropriate conditions added to ensure that the residential element is not at risk of flooding. It should then be included in Policy SP13. The number of additional homes defined in Policy SP12 should be adjusted accordingly.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	If it would assist the examination.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a	Yes

<p>minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	Yes
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>NPPF clearly states Brownfield sites to be brought forward for development prior to the release of greenfield sites</p> <p>Thatcham has been identified for strategic development with a major greenfield release. Brownfield sites have been failed to be reviewed, and should be brought forward prior to the release of greenfield sites in Thatcham</p> <p>Former Newbury Leisure Park is a 4.25 acre redundant brownfield site, in a residential area</p> <p>It is already developed land since 1980s with a commercial building of 37,500 sqft, and residential dwellings called Moorstream Cottages of 3,300 sqft. The commercial building has become redundant as a leisure facility (3 operators have gone into administration over 9 years) and has been derelict since 2021. It attracts vandalism, crime, and demands time from the emergency services.</p> <p>An FRA has been produced which outlines a strategy to overcome flood plain issues which exist on 25% of the site.</p> <p>The site is in a sustainable location suitable for residential development.</p> <p>The site is immediately available for development</p> <p>Background</p> <p>I have owned the above property for several years when it was operating as a Ten Pin Bowling centre with ancillary uses such as soft play/refreshments. Between 2012 and 2020, there have been 3 leisure operators that have gone into administration whilst running their businesses at this site, demonstrating that both national leisure chains and private businesses cannot successfully operate a leisure business at this site. Sadly, as a result of the Pandemic, the operator never re-opened after the enforced closures. Despite being marketed since 2021 and being available, it has since remained vacant. The premises are now falling into a poor state of repair and the number of break ins is only on the increase.</p> <p>During 2020 and 2021, I was in constant dialogue with the Economic Development Team at West Berks, and they agreed there is no economic viability of this site for leisure use. In fact, the Economic Development Team discussed the demise of this site with the Economic Development Board, and concluded that they would support a planning application for residential and or use for the Care sector.</p> <p>In response to approaches received from the planning policy team, submissions highlighting the site's availability were made to the draft plan consultation(2021), the site promotion register, and the Brownfield Register in 2021. Despite this I am disappointed over the lack of engagement with the Council to bring forward this site forward for re-development and that the site should be allocated for residential /care home development in the forthcoming review of the Local Plan. This is based on the following;</p>

	<p>Re-use of brownfield sites prior to the release of greenfield land for development</p> <p>It is a requirement of all Local Authority's to seek the re-use of brownfield sites prior to the release of green field sites for residential development. This is particularly so when sites such as the former Newbury Leisure Park are redundant and available for development.</p> <p>Significant releases on greenfield sites are being proposed in the Thatcham area which should only occur once all potential brownfield opportunities have been utilised. With the omission of our site the Council have failed to do this and should review their allocations.</p> <p>Suitability of development</p> <p>The overall site extends to 4.25 acres. It is in a sustainable location with easy access to local amenities such as schools, shops, on the main bus routes and open space.</p> <p>Within the site are the former Bowling Centre/Soft Play centre which is some 37,500 sq.ft. Also located on the site are Moorstream Cottages which are 3,300 sq.ft. To support the Bowling Centre the site has car parking for 180 cars on hard standing tarmac. Significant development is therefore already accommodated on site.</p> <p>The site is falls partly within Flood Zones 2 and 3. To address this concern we commissioned Floodline Consultants to provide a Flood Risk Assessment, a copy of their Non-Technical Summary is attached. It concluded that, taking into account the flood zones, a minimum of 2 acres of land was capable for development. This could be increased further following a detailed hydrological assessment. It is our view that the site is therefore capable of accommodating a care home and ancillary residential development or 80 to 100 residential units.</p> <p>Demand for current use</p> <p>Since the premises became vacant (Jan 2021) we have been marketing the premises to find an alternative occupier or use for the site. During this period, we have had no enquiries to use the premises for leisure use. The trend for such uses as ten pin bowling centres has been for them to locate in town centres as part of a mixed-use scheme which is not able to be achieved in this location. Further detailed commentary on this can be provided by the joint agents Haslams and Re-made UK</p> <p>Need to accommodate demand for C2 (care) accommodation / housing in Thatcham</p> <p>Since the COVID pandemic the care sector has been under close scrutiny, with numerous sub-standard homes being closed. This has been combined with an increase in demand for care provision due to an increase in life expectancy and our ageing population increasing. This has led to more modern care homes being built, often providing a range if accommodation to reflect the varying needs of the elderly. Never has there been a stronger case for catering for this demand.</p> <p>The former Newbury Leisure Park provides a perfect opportunity to part meet this need for the Newbury area. It is a brownfield site and is of a size which can accommodate a care home of up to 90 beds, with ancillary or open residential units in the grounds. Safe access can be provided to the highway network and wonderful views over the lakes can be offered to the residents.</p> <p>Concluding remarks</p> <p>The former Newbury Leisure Park, given it's a redundant brownfield site should be given priority by West Berkshire District Council to enable it to be re-developed prior to the release of greenfield sites. We would therefore ask the Council, in reviewing its current Local Plan, to;</p> <p>- Allocate the site for residential / care development</p> <p>The NPPF states "local planning authorities, and other plan-making bodies, should take a proactive role in identifying and helping to bring forward land that may be suitable for meeting development needs"</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Former Newbury Leisure Park site, Lower Way, Thatcham to be added for up to 90 residential units.</p> <p>Allocate the site for residential/care development</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>The use of brownfield sites prior to greenfield release should b a fundamental objective of the local plan which needs to be addressed. We would therefore wish to have a seat at the examination.</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes</p> <p>* No</p>	<p>Yes</p>

6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<ol style="list-style-type: none"> 1 The plan is being rushed through so as to meet artificial deadlines. 2 The current Local Plan Core Strategy contained the following statement: "The Lakeside development has planning permission to provide 350 homes in a range of different sizes and types, which would become a well-integrated part of the Theale community. If this development goes ahead, Theale would need to undergo a period of consolidation to provide an opportunity for facilities and services to be upgraded". No justification has been given as to why this requirement, which is still much needed, has not been carried forward into the Local Plan Review. 3 It excludes developments of more than 10 homes from its estimates of the number of "windfall" sites (sites in towns and villages that are not on sites allocated in the plan). Many windfall sites are bigger than 10 homes - Cumber Place and Trafalgar Court in Theale both contain around 30 homes. 4 Concerns (2) and (3) mean that more homes than necessary would be built on greenfield sites like those proposed for Theale.

Please give reasons for your answer	We have not seen the impact of the development on the village. The doctor's surgery is already under pressure and the waiting time for appointments is too long. The children's parks are two small already. Even though they have recently been improved anyone who has visited them at the end of the school day can see they are still inadequate. The impact on wildlife and the climate criss by removing the few remaining green areas at a time we should be preserving and improving green spaces is irresponsible.

<p>Please give reasons for your answer</p>	<p>I came to this village 37 years ago to live in a village not a town It has grown so much with houses and businesses But now coming to my retirement I find I am living in a little town Not what I invested in 37 years ago But now find I am not in the persision to move to a village I understand the need for more house but No Schools No Doctors No Dentist More Traffic Drainage How much more can this village (small town) take ? I am sure I am not the only person upset at what you are building around Theale Village</p>

Please give reasons for your answer	Herewith our response to the Local Plan 2022-2039: 19. HSA15. We object to this as there is a strong possibility that an increase in the population would use Theale's facilities which are already struggling e.g. GP surgery, schools etc.

<p>Please give reasons for your answer</p>	The policy identifies a limited number of sites for development in the Eastern Area, which is the area likely to have the greatest implications for Reading. Of these, only three sites (RSA6, RSA7 and RSA8) are within the Reading urban area itself, and the total development proposed within those sites is 70 dwellings and 65 residential care bedspaces. All of these sites are already allocated within the existing Local Plan. There are no significant cross-boundary implications as a result of this policy which RBC therefore supports.

2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	

Please give reasons for your answer	6.36 identifies Mortimer as a Service Village whereas in the hierarchy of settlements it is defined as a Rural Service Centre i.e. one level higher
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No

<p>Please give reasons for your answer</p>	<p>Our client has an agreement with the landowners of the site, known as 'Land to the rear of The Hollies' in the District, which currently forms part of an allocated site for approximately 60 dwellings under Policy HSA16 in the adopted Housing Site Allocations Development Plan Document (HSADPD) (May 2017).</p> <p>It is understood the 'emerging draft' Local Plan Review (LPR) no longer seeks to carry this allocation forward. This is despite part of the allocated site having already been built out and now occupied by residents. The Council say this is because the site now falls within the extended Detailed Emergency Planning Zone (DEPZ) of AWE Burghfield. The DEPZ was extended as a result of the updated Radiation (Emergency Preparedness and Public Information) Regulations (REPPiR) 2019.</p> <p>Our client does not support the removal of this allocated site from the Development Plan. Our client is keen to work collaboratively with the Council to secure the development of the remaining part of this currently allocated site. These representations therefore focus on responding to the removal of the allocated site from the LPR and the changes proposed to Policy SP4 in relation to AWE Aldermaston and AWE Burghfield.</p> <p>These representations also seek to respond to the Council's development strategy (including Policies SP1 and SP3, SP12 and SP14) and decision-making in relation to an effective 'moratorium' on new development within Burghfield Common, despite the village remaining as a 'Rural Service Settlement', which offers 'development potential appropriate to the character and function of the settlement', according to the proposed Spatial Strategy.</p> <p>These representations also discuss Policy RSA12, which seeks the provision of approximately 100 dwellings within Burghfield Common1, within the extended DEPZ.</p> <p>In order to consider whether a Local Plan is sound, reference needs to be made to the National Planning Policy Framework (NPPF) (July 2021) paragraph 35. This identifies that a sound Plan is:</p> <p>1 a) Positively Prepared– 'providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development';</p>

	<p>b) Justified – ‘an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence’;</p> <p>c) Effective – ‘deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground’; and</p> <p>d) Consistent with National Policy – ‘enabling the delivery of sustainable development in accordance with the policies in this Framework’.</p> <p>It is in light of these criteria that the LPR (Regulation 19) version has been considered. We find the de-allocation of site HSA16 is not consistent with the Council's approach to its development strategy and the settlement hierarchy. In addition, its approach towards a ‘moratorium’ on further development within the parish of Burghfield Common is flawed.</p> <p>Policy SP14 relates to sites allocated for residential development in the Eastern Area. An allocation of 100 dwellings on land adjacent to Pondhouse Farm (Policy RSA12) is identified for Burghfield Common. The Reserved Matters for this site were approved by the Council on 29 July 2022, despite Officer's confirming the development “<i>would bring perhaps an additional 240 plus residents into the AWE inner protection zone as defined under policy CS8 in the WBCS of 2006 to 2026, since planning permission was granted prior to the new DEPZ being agreed, the Council cannot object to the development</i>”.</p> <p>Conclusion</p> <p>These representations have been prepared by Pro Vision on behalf of our client, T A Fisher & Sons, in response to West Berkshire Council's consultation on its Local Plan Review 2022-2039 (Regulation 19) (January 2023).</p> <p>Our client has an agreement with the landowners of the site known as ‘Land to the rear of The Hollies’ in the District, which currently forms part of allocated site ‘HSA16’, in the adopted HSADPD (May 2017). We note the allocation for the site is no longer included within the ‘emerging draft’ LPR, as the site falls within the extended Detailed Emergency Planning Zone (DEPZ) of AWE Burghfield, despite there being a remainder of 32 units still to be delivered.</p> <p>Our client does not support the removal of this allocated site from the LPR.</p> <p>These representations have therefore focused on responding to the unjustified removal of the allocated site from the LPR and the changes proposed to Policy SP4 in relation to AWE Aldermaston and AWE Burghfield as well as the development strategy and spatial hierarchy proposed by the LPR.</p> <p>In particular, we consider the remaining number of dwellings should be carried forwards in the LPR as the development of the western part of the allocated site can be achieved and is deliverable now. We contend that the Emergency Plan can be updated to accommodate the delivery of 32 units without impacting adversely on the operation of AWE Burghfield, public safety or the functioning of the Emergency Plan. The LPR as currently drafted is unsound, as it is not justified, not consistent with the Framework and not positively prepared.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	No

<p>Please give reasons for your answer</p>	<p>AWE fully supports the non-allocation of the Grazeley Garden Town under this Policy, given its location within the DEPZ for AWE Burghfield.</p> <p>AWE object to the re-allocation of land adjoining Pondhouse Farm, Clayhill Road. Despite this allocation being within the current local plan, due to the redefining of the DEPZ during the plan period, this allocation for 100 residential units would now be in direct contravention of SP4 as the site is located within the Burghfield DEPZ; in applying policy SP4 the allocation is "likely to be refused planning permission..... especially when the ONR and/or MOD have advised against the development and/or object".</p> <p>Para 6.35</p> <p>AWE is supportive of no additional sites being brought forward through Neighbourhood Plans in the Eastern Area given that Burghfield Parish lies within the DEPZ for AWE Burghfield.</p>

3. Regulation 19 Proposed Submission document representations

Proposed residential site allocations

3.17 Having taken into account existing commitments and windfalls, the draft Plan proposes the delivery of 4,252 dwellings through specific housing allocations. The following allocations are retained allocations from the adopted Core Strategy and Site Allocation documents.

3.19 The following sites are proposed in the Eastern Area:

Retained allocations

- 72 Purley Rise, Purley on Thames (RSA7) – 35 dwellings
- Land adjacent to Bath Road and Dorking Way, Calcot (RSA8) – 35 dwellings
- Land between A340 and The Green, Theale (RSA9) – 100 dwellings
- Land adjoining Pondhouse Farm, Clayhill Road, Burghfield Common (RSA12) – 100 dwellings
- Stonehams Farm, Tilehurst (EUA003) (RSA6) – 65 bedspace care home

New allocations (totally 140 dwellings)

- Former sewage treatment works, Theale (RSA11) – 60 dwellings
- Whitehart Meadow, Theale (RSA10) – 40 dwellings
- Land north of A4 at junction of New Hill Road, Woolhampton (RSA13) – 16 dwellings
- New Stocks Farm, Paices Hill (RSA24) – 8 pitches

3.21 Some of the above allocations are retained from the previous adopted plan period of 2006 – 2026 due to the overlap of the plan period for the emerging plan (2022 – 2039). These amount to 2,652 dwellings that were outstanding from the previous plan period at 31st March 2022.

3.22 New sites proposed for allocation in the new plan period total 1,720 dwellings, which with 1,500 proposed at North East Thatcham.

3.23 The proposed allocated sites are listed in the table below, along with a review of their current planning status. We would question why some are retained as allocations, rather than commitments, given their planning status.

Retained allocation from Core Strategy: Land adjacent to Bath Road and Dorking Way, Calcot 35 dwellings

Planning status: Hybrid application for 28 dwellings and pub – refused June 2018. Dismissed at appeal March 2019.

Full application 22/01836/FULEXT for a 70-bed care home received 1 August 2022, pending determination.

Outline planning application 22/01829/OUTD for up to 9 residential dwellings received 28 July 2022, pending determination.

It is therefore unclear how this site can be identified for 35 dwellings, following the dismissed appeal and very different proposals now submitted on it.

Retained allocation from Core Strategy: Land between A340 and The Green, Theale 100 dwellings

Planning status: Outline application 17/02904/OUTMAJ for up to 104 dwellings approved December 2020.

No reserved matters application submitted and the outline permission will lapse imminently.

The lack of delivery at this site has been subject to much discussion, and its ability to be brought forward continues to be subject to debate.

Retained allocation from Core Strategy: Land adjoining Pondhouse Farm, Clayhill Road, Burghfield Common 100 dwellings

Planning status: Outline application 18/02485/OUTMAJ for 100 dwellings permitted December 2019. Reserved matters 22/00325/RESMAJ approved July 2022.

It is stated that the developer anticipates development could commence in 2022/23, yet we do not believe it has commenced.

Retained allocation from Core Strategy: Stonehams Farm, Tilehurst (EUA003)

65 bedspace care home

Planning status: Outline application 16/01947/OUTMAJ for 15 dwellings approved June 2017. Full planning application 21/01216/COMIND for 64 bed care home approved in August 2021 and expected to be implemented.

3.24 The Eastern Area has been taken out of the spatial strategy for the LPR, yet some 343 dwellings are being retained as allocations in this area with a total of 459 dwellings proposed (i.e. 116 dwellings in new allocations for the plan period). In addition, there are 334 dwellings across AONB sites, equating to 8% of the proposed housing supply for the plan. The Inspector’s Report for the adopted Core Strategy references a 2,000 dwelling cap within the AONB, stating for the Core Strategy to be found sound “*the reference in policy ADPP5 [N.B. Policy ADPP5 refers to North Wessex Downs AONB] to 2,000 dwellings needs to be prefaced with up to so as to make clear that it is not a minimum that has to be achieved and that delivering less is acceptable.*” (paragraph 78).

4. Sustainability Appraisal scoring for Land at Long Lane, Newbury

Conclusions on site selection and SA

4.20 We consider that the LPR Sustainability Appraisal (“SA”) has therefore not considered reasonable alternative options, which is inarguable given the omission of any consideration of sites not included within the Plan. The SA is therefore in breach of the SEA Directive and the SEA Regulations and these breaches are fatal to the legality of the LP.

4.21 Additionally, it calls into question the entire site selection process if a site has been assessed and rejected for technical reasons when no legitimate and substantiated technical reasons exist to justify such an outcome. This, we submit, suggests that the entire site selection process is fundamentally flawed, particularly given the conflict with the identified spatial strategy.

4.22 The draft Plan proposes sites in the AONB, and the eastern area which does not accord with the Council’s spatial strategy.

4.23 There are only two strategic site allocations (SP16 Sandford Park and SP17 North East Thatcham), the remainder are relatively small sites (between 15-160 dwellings). The Sandford Park allocation has outline planning permission allowed at appeal for two-thirds of the allocation. The remainder of the site is under Donnington New Homes’ ownership and there is a live planning application pending determination (reference 18/00828/OUTMAJ).

4.24 It is considered the plan does not propose medium sized sites that can come forward in the interim period to ensure housing delivery. The site at Long Lane for approximately 260 dwellings can provide a medium sized site that is available and deliverable under land controlled by Donnington New Homes. The SA conclusions state that the negative and uncertain effects may be able to be mitigated further. It is considered the uncertain and negative effects identified in the SA can be overcome through a well-designed scheme and submission of information, resulting in positive impacts.

4.25 The planning merits of the Site considered in section 2 of these representations demonstrate that there are no in-principle technical barriers to prevent residential development of the site.

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>Yes</p>

5. Independent Examination	Our position is that the site should be included as a proposed residential allocation and that the LPR does not provide enough sites to provide sufficient housing supply.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? -	

<p>Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>It is noted that 200 new housing units will be provided in Theale (RSA 9,10 and 11) and that there are also 35 Housing units to be provided in Calcot (RSA 8) and 35 in Purley (RSA 7). It is further noted that in the current (2016) iteration of the West Berkshire IDP, that within the table on page 60, “Improvements to GP premises in area of development. Approx additional 50 sq.m” are described as being required to mitigate housing growth at “Tilehurst, Calcot, Purley, Theale”. This Table indicates that this 50 sq m is a collective total of new floor space that should be paid for by developer contributions at a cost of £150,000. The ICB’s view is that the 50 sq m currently articulated should be described as a net (as opposed to gross) floor area. Furthermore, as 50 sq m net space would cost around £350k to build as at Q1 2023 prices, not £150k as stated. The ICB considers that if developer contributions were sought that amount to £350k, this would be sufficient for the local GP Practices to deal with the additional capacity, either through 50 sq m of additional space, or through the provision of internal modifications to create additional clinical/patient-facing space.</p> <p>The ICB note that there are also 100 housing units planned in Burghfield (RSA 22) – part of the Local Plan Review SP14. It is further noted that the mitigation for this is described in the IDP as “Improvements to GP premises in area of development. Approx additional 25 sq.m” at a cost of £75,000. The ICB’s view is that the 25 sq m currently articulated should be described as a net (as opposed to gross) floor area. Furthermore, as 25 sq m net space would cost around £175k to build as at Q1 2023 prices, not £75k as stated. The ICB considers that if developer contributions were sought that amount to £175k, this would be sufficient for the local GP Practices to deal with the additional capacity, either through 25 sq m of additional space, or through the provision of internal modifications to create additional clinical/patient-facing space.</p>

<p>Please give reasons for your answer</p>	<p>There would appear to be several facts that are incorrect in the assessment. All we can conclude is that the writer has not visited the area.</p> <ol style="list-style-type: none"> 1 Nearly all of Pincents Lane is single lane only with no room for pedestrians other than the banks. There are only 3 areas where a car can pull in to allow for vehicles to pass one another. (It is stated that there are only 2 pinch points – clearly not so). 2 The dust carts sometimes don't come down the lane on icy days as they consider it too steep and dangerous. Notwithstanding, that the dust carts are too wide for the lane and have damaged the banks by approximately 1ft on each side. There is a stream from the top field which runs diagonally across the lane into Pincents Hill which freezes. (Picture attached). A few years ago, the stream stripped the top layer off the surface which slipped downhill and had to be replaced. This should be on file. 3 It is not clear from this document whether it is intended to open this lane up from the A4 to City Road/Little Heath Road. This road was closed approximately 18 years ago after an accident involving a school child and to prevent further accidents as there are 3 local schools. If this road is opened up City Road and Little Heath Road would be a rat run to Reading and Oxford and the risk to school children greatly increased. The immediate area would see a devastating increase in traffic. The turning area for buses coming from Little Heath Road into City Road is too narrow and they are forced to turn into the oncoming car lane. 4 Pincents Lane is an ancient sunken lane, unique to this area which adds to the character of the locality and should be regarded as part of our heritage. The lane is on ancient maps which show the borders of The Common which was 1,000 acres with its hedgerows. All that remain of that 1,000 acres is Prospect Park, Pincents Hill and the Allotments. 5 If this is a Council document that states there are two footpaths on the hill but clearly your files show 4. <p>Footpath 20© Tilehurst</p> <p>This footpath running north-south, which local people applied over ten years ago to have added onto the Definitive Maps as close as possible to its actual route but because trees have grown on the original path and now needs a diversion order.</p> <p>Footpath 14 Tilehurst</p> <p>This footpath is very well used as a direct link between Starlings Drive and the Recreation Ground/Calcot Centre/Sainsbury's and beyond. It was recently provided with an improved surface by West Berkshire Council. The upgrading of the route to a cycleway should be considered.</p> <p>New definitive footpath to link Footpath 13 Tilehurst and Footpath 12 Tilehurst</p> <p>Footpath 12 Tilehurst to the north of the site forms part of one of the Council's promoted circular walks (around Sulham Valley, specifically the Green Route).</p> <p>Any development on this site will have a considerable impact on the Rights of Way network and the scale of the development proposed, has huge implications both on the footpath network within the site and immediately beyond the site boundaries.</p> <ol style="list-style-type: none"> 1 There is mention of a possible provision of a school and yet West Berkshire has previously said that the current education needs can be met and that pupil numbers will decrease over time. 2 There have been seven planning applications on this site since 1985 and 3 failed planning appeals all of which failed mainly because this piece of land forms a gap between settlements and would appear that it retains this status in the New Local Plan. The new draft NPPF rules do not seem to have changed in this respect and actually seem to favour Neighbourhood Plans, <p>If this is so, why is the Council listing all the reasons why this site should even be considered for development. Although at the moment it may not be, however it would appear to be encouraging the owners to put in another planning application. It is known that the Council has to consider every application for development, so all we can assume is that a development could take place.</p> <p>Could and would West Berkshire Council decide during the period of the plan to rescind the Gap Between Settlement status and what would be the criteria for doing this?</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p>

1. Do you consider the Local Plan Review is legally compliant?	No
* Yes	
* No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan	No

<p>provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>Our client has an agreement with the landowners of the site, known as 'Land to the rear of The Hollies' in the District, which currently forms part of an allocated site for approximately 60 dwellings under Policy HSA16 in the adopted Housing Site Allocations Development Plan Document (HSADPD) (May 2017).</p> <p>It is understood the 'emerging draft' Local Plan Review (LPR) no longer seeks to carry this allocation forward. This is despite part of the allocated site having already been built out and now occupied by residents. The Council say this is because the site now falls within the extended Detailed Emergency Planning Zone (DEPZ) of AWE Burghfield. The DEPZ was extended as a result of the updated Radiation (Emergency Preparedness and Public Information) Regulations (REPPiR) 2019.</p> <p>Our client does not support the removal of this allocated site from the Development Plan. Our client is keen to work collaboratively with the Council to secure the development of the remaining part of this currently allocated site. These representations therefore focus on responding to the removal of the allocated site from the LPR and the changes proposed to Policy SP4 in relation to AWE Aldermaston and AWE Burghfield.</p> <p>These representations also seek to respond to the Council's development strategy (including Policies SP1 and SP3, SP12 and SP14) and decision-making in relation to an effective 'moratorium' on new development within Burghfield Common, despite the village remaining as a 'Rural Service Settlement', which offers 'development potential appropriate to the character and function of the settlement', according to the proposed Spatial Strategy.</p> <p>These representations also discuss Policy RSA12, which seeks the provision of approximately 100 dwellings within Burghfield Common1, within the extended DEPZ.</p> <p>In order to consider whether a Local Plan is sound, reference needs to be made to the National Planning Policy Framework (NPPF) (July 2021) paragraph 35. This identifies that a sound Plan is:</p> <p>a) Positively Prepared – 'providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development';</p> <p>b) Justified – 'an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence';</p> <p>c) Effective – 'deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground'; and</p>

d) Consistent with National Policy – ‘enabling the delivery of sustainable development in accordance with the policies in this Framework’.

It is in light of these criteria that the LPR (Regulation 19) version has been considered. We find the de-allocation of site HSA16 is not consistent with the Council's approach to its development strategy and the settlement hierarchy. In addition, its approach towards a ‘moratorium’ on further development within the parish of Burghfield Common is flawed.

As outlined in Section 1, the LPR no longer seeks to carry forward the site subject of these representations as an allocated site for residential development.

HSADPD Policy HSA16 sets out to deliver approximately 60 dwellings with a mix of dwelling types and sizes, as did draft Policy RSA19 of the Local Plan Review 2020-2037 (Regulation 18), although this has since been removed from the latest iteration of the Local Plan Review 2022-2039 (Regulation 19).

In Appendix 7 (Schedule of Policies to be Superseded / Deleted) of the LPR there is no explanation why the site has been removed from the Plan, simply that *“The following site allocation policies from the Housing Site Allocations DPD 2006-2026 have not been carried forward as part of the LPR because they are not considered deliverable at this time:*

- *HSA6 Poplar Farm Cold Ash*
- *HSA16 The Hollies Burghfield Common”.*

The definition of ‘deliverable’ is provided within the NPPF and states: *“To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years...where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years”.*

The site is under option to a housebuilder who has submitted a full application for planning permission on the allocated site. The site is therefore regarded as deliverable under the NPPF definition.

The currently allocated site's recent planning history is necessary to consider and is summarised below.

- APP/W0340/W/22/3312261 – appeal against the refusal of application 22/00244/FULEXT on land to the rear of The Hollies – submitted to the Planning 30 November 2022 (elevated to an Inquiry – currently undetermined at the time of this representations submission).
- 22/02010/PREAPP – *“pre-application advice consultation for a proposed development of up to 32 residential dwellings (Use Class C3), including access, associated parking, landscaping and Public Open Space (POS)”* on land to the rear of The Hollies – advice received 1 November 2022.
- 22/00244/FULEXT – *“erection of 32 dwellings including affordable housing, parking and landscaping. Access via Regis Manor Road”* on land to the rear of The Hollies – refused planning permission 1 June 2022.

The 32 dwellings refused under application 22/00244/FULEXT sought to make up the remainder of the 60 allocated dwellings under Policy HSA16. The application was refused for the following (summarised) reasons:

1. The need for a legal agreement to secure Affordable Housing;
2. The site's location within the extended DEPZ and the impact of the development on public safety; and
3. The impact of the development on protected trees.

Reason for Refusal 1 and 3 are considered to be able to be suitably addressed. Reason for Refusal 2 is to be the main focus for discussion at the upcoming planning appeal Inquiry.

The following two applications relate to the eastern parcel of the allocated site (i.e. land which our clients do not have an interest in). Nonetheless, as the eastern parcel forms part of the same allocation and is within the extended DEPZ, its planning history is relevant.

- 19/00772/RESMAJ – *“approval of reserved matters application following outline application 16/01685/OUTMAJ for 28 dwellings. Matters to be considered: Appearance, Landscaping, Layout and Scale”* on land adjacent to Primrose Croft – granted permission on 8 August 2019.
- 16/01685/OUTMAJ – *“outline planning application for 28 dwellings. Matters to be considered: Access. Matters reserved: Appearance, Landscaping, Layout and Scale”* on land adjacent to Primrose Croft – granted outline planning permission on 30 October 2018.

The 28 dwellings on the eastern part of the allocated site have since been built out by Crest Nicholson Operations Ltd and are now occupied.

Table 3.1: Neighbourhood plans of the Site Selection Methodology (January 2023) identifies that within the Designated Neighbourhood Area of Burghfield Common, there will be no allocations as *“The Atomic Weapons Establishment (AWE) has a base within the Parish. Changes to legislation have resulted in the redetermination of the emergency planning arrangements around AWE Burghfield. The Detailed Emergency Planning Zone (DEPZ) for AWE Burghfield now covers the whole Parish. Due to the presence of the DEPZ, it is not considered appropriate to allocate further sites for housing in Burghfield”.*

An update to the HELAA has been prepared (January 2023) as part of the evidence base which excludes the site. There is no commentary on why ‘The Hollies’ site has been removed from the HELAA. However, other sites within Burghfield Common (and therefore within the extended DEPZ) are shown as not being ‘automatically excluded’ from further consideration², although are noted not being deliverable for an arbitrary 15 years. However, this does imply that these sites might be deliverable within the longer term, which is an acceptance that the DEPZ is not in fact placing a moratorium on development.

The HELAA confirms at paragraph 2.2 that sites within notified safety zones (i.e. AWE Burghfield) will not automatically be excluded and instead *“the impact will be assessed on merits, taking into account the type of development and the nature of the hazard. Therefore, sites within notified safety zones have*

	<p><i>gone through to Stage 2 of the HELAA (site assessment) and advice from the Ministry of Defence has been fed into the site assessment”.</i></p> <p>Taking the above into account and noting that other sites are put forward for residential development within the extended DEPZ, the site should not be excluded from the HELAA and we consider it remains still suitable, achievable, available and deliverable now, being within the control of our client, a local house builder.</p> <p>It is also relevant to note, having regard to the definition of “deliverable” in the NPPF, that the Council has carried forward the allocation of site at Poundhouse Farm (HSA15) into Policy RSA12 of the LPR. This allocation is for significantly greater development – 100 dwellings – than the 32 dwellings at The Hollies. The two sites share a boundary. Both sites are currently allocated within the Housing Site Allocations DPD. Both sites were regarded as deliverable in the Annual Monitoring report for 2021/22 and in the Regulation 18 Local Plan consultation before that, yet the Council has singled out The Hollies for deallocation. This is not positive planning. If this is allowed to continue, it will leave an undeveloped gap within the settlement policy boundary.</p> <p>In summary, we consider that the Council's failure to carry forward allocation HSA16 into the plan is not justified. No sound reasons have been provided and this results in the plan not being positively prepared. The LPR is therefore unsound as drafted.</p> <p>Conclusion</p> <p>These representations have been prepared by Pro Vision on behalf of our client, T A Fisher & Sons, in response to West Berkshire Council's consultation on its Local Plan Review 2022-2039 (Regulation 19) (January 2023).</p> <p>Our client has an agreement with the landowners of the site known as ‘Land to the rear of The Hollies’ in the District, which currently forms part of allocated site ‘HSA16’, in the adopted HSADPD (May 2017).</p> <p>We note the allocation for the site is no longer included within the ‘emerging draft’ LPR, as the site falls within the extended Detailed Emergency Planning Zone (DEPZ) of AWE Burghfield, despite there being a remainder of 32 units still to be delivered.</p> <p>Our client does not support the removal of this allocated site from the LPR.</p> <p>These representations have therefore focused on responding to the unjustified removal of the allocated site from the LPR and the changes proposed to Policy SP4 in relation to AWE Aldermaston and AWE Burghfield as well as the development strategy and spatial hierarchy proposed by the LPR.</p> <p>In particular, we consider the remaining number of dwellings should be carried forwards in the LPR as the development of the western part of the allocated site can be achieved and is deliverable now. We contend that the Emergency Plan can be updated to accommodate the delivery of 32 units without impacting adversely on the operation of AWE Burghfield, public safety or the functioning of the Emergency Plan. The LPR as currently drafted is unsound, as it is not justified, not consistent with the Framework and not positively prepared.</p>

<p>Please give reasons for your answer</p>	<p>[See attached Mortimer Vision Document]</p> <p>Hallam control land at Mortimer in the east of the District that is eminently suitable for housing development, both in terms of the Plan's spatial strategy and its specific characteristics.</p> <p>As drafted, the consultation document does not afford a role to Mortimer in providing additional housing over that which is allocated in the current Stratfield-Mortimer Neighbourhood Plan. Yet, that Neighbourhood Plan was prepared in the context of the 2012 West Berkshire Core Strategy and covered the period to 2026.</p> <p>By simply rolling forward the current allocation to meet the new housing requirement to 2039, the growth of Mortimer is proportionately lower over the longer term.</p> <p>The Neighbourhood Plan describes particular socio-economic characteristics that are prevalent locally; the affordability of housing; a shortage of certain types of housing in the parish; an ageing population and an under-representation of young persons and families.</p> <p>Given that the existing allocation was to be developed by 2026 to assist in ameliorating these issues, the fact it is now proposed to be the only new housing over a much longer period will undermine its contribution. Those characteristics will endure and worsen unless a greater amount of new housing is provided in addition to the existing allocated site.</p> <p>Moreover, whilst the delineation of Settlement Boundaries has been considered in the process of preparing the Local Plan Review, an objective examination of that drawn at Mortimer illustrates it is drawn tightly around the existing built-up area of the settlement. Consequently, there are no genuine opportunities for windfall development.</p> <p>For these reasons, we consider the Local Plan should increase the amount of housing to be provided at Mortimer. This would be consistent with paragraph 66 of the NPPF.</p> <p>In this context, our representations consider the following matters:</p> <ul style="list-style-type: none"> - Chapter 4 The Development Strategy and the role of Mortimer in the east of the District - Chapter 6 Delivering Housing and the approach to Mortimer - The suitability of land at Kiln Lane, Mortimer <p>The Development Strategy</p> <p>Consistent with the current Local Plan, the Development Strategy retains its Spatial Areas: (1) Newbury and Thatcham, (2) the Eastern Area and (3) the North Wessex Downs Area of Outstanding Natural Beauty.</p> <p>We agree, as a matter of principle, that Newbury and Thatcham, as the main settlements in the District, should be a focus for new development. We similarly agree that, because of its valued landscape characteristics, only a modest amount of development should be directed to the AONB.</p> <p>However, we consider that insufficient regard has been had to the role of the Eastern Area and its ability to accommodate new housing. Policy SP14 indicates that Theale is the only Rural Service Centre in the Eastern Area where new housing allocations are proposed (i.e., in addition to existing those identified in the Site Allocation DPD). As such, the suitability of other settlements, particularly Mortimer, is overlooked.</p> <p>Mortimer is a Rural Service Centre. This is a group of settlements with a good range of key services and opportunities for employment, community and education. They serve a wide catchment area and contain reasonable accessibility and regular public transport to a number of destinations (Table 1 of the consultation document refers).</p> <p>Paragraph 4.32 of the consultation document refers to these settlements in the following terms: "...the six rural service centres across the District provide a focal point for the surrounding villages and rural areas in terms of the provision of services and facilities. Although they do not have as wide a range of services as the urban areas, they are still sustainable locations."</p> <p>The Settlement Audit (Appendix 3) indicates the relative advantages of Mortimer in comparison with other locations generally in the rural parts of the District. Mortimer's scoring is comparable to other settlements where new housing allocations are proposed.</p> <p>It is instructive to consider how the Neighbourhood Plan describes Mortimer. <i>Rail and road links mean that people naturally look to Reading and then Newbury or Basingstoke for employment and town-based facilities. Mortimer has a railway station on the Reading to Basingstoke line but it is about 1.5 miles from the centre of the village. The centre of the village is now in what was Mortimer Common, with Post Office, bank, shops, St. John's Infant School, village hall, and churches all close together. St. Mary's Junior School is located over a mile from the centre of the village, nearer the station. For secondary schooling, students usually attend Willink School in the neighbouring parish of Burghfield. Because Mortimer has a long history and an increasing population it has managed to retain most of its traditional facilities and</i></p>

to develop some new ones. As such it continues to act as a small rural centre for itself and other villages nearby. The age structure of the parish is slightly older than the average for West Berkshire and there are fewer persons in the 13 to 30 year age groups than on average in West Berkshire. However, there are slightly more children below the age of 13 than the average for the wider area. Of particular note is the age band of 25 to 30 where Stratfield Mortimer has only some 62% of the wider average. (Emphasis added)

Identified “weaknesses” in the Parish are accelerating housing cost, lack of affordable housing to buy and lack of affordable housing to rent.

In these terms, Mortimer is a suitable location for new housing when viewed in the context of advice in the NPPF: *“In rural areas, planning policies and decisions should be responsive to local circumstances and support housing developments that reflect local needs; and To promote sustainable development in rural areas, housing should be located where it will enhance or maintain the vitality of rural communities. Planning policies should identify opportunities for villages to grow and thrive, especially where this will support local services.”* (§78 and §79 refers)

Yet the consultation document does not intend that any additional housing is provided at Mortimer to that already allocated in 2017.

Paragraph 6.36 of the consultation document sets out the position for Mortimer as follows: *“110 dwellings are already allocated up to 2026 in the Stratfield Mortimer Neighbourhood Plan. The Parish of Stratfield Mortimer contains the village of Mortimer which is identified as a Service Village within the settlement hierarchy meaning that it has a limited range of services and has some limited development potential. Given the outstanding dwellings still to deliver, no additional allocations in the plan period are proposed.”*

Table 2 of the consultation document indicates that of the 110 dwellings allocated for development up to 2026, only 28 have been built with a remaining 82 as at 31st March 2022. The rationale set out in paragraph 6.36 lacks logic as it dilutes the contribution it makes to new housing and in effect constrains the growth of the settlement, despite its status and suitability as a Rural Service Centre.

In effect it is simply reducing what was to be 110 houses built between 2017 and 2026 to 110 houses built between 2017 and 2039; in effect halving the amount of housing relative to the overall period of time. In the face of the characteristics of Mortimer, described by the Neighbourhood Plan, this is illogical.

In this context is instructive to consider the Housing Background Paper which reveals that housing completions from The Street are expected to be achieved by 2026. The effect of this is that for the remaining 13 years of the plan period, there would be no new planned housing at Mortimer despite its role and status in the Local Plan.

Accordingly, contrary to the established tests of soundness, in this respect, the Local Plan is not “positively prepared”.

Moreover, in the east of the District, these settlements are in close proximity to the District’s administrative boundary, and consequently related to a greater extent than other settlements to the major urban area of Reading. Reading is a sub-regionally important settlement with exceptional linkages to London which have been enhanced by the recent opening of Cross Rail.

Successive assessments of how Reading is expected to meet its future development requirements have confirmed the likelihood of unmet need arising. In this regard, a new settlement concept at Grazeley, south of the M4, partly within West Berkshire and partly within Wokingham was considered as an option, although later the restrictions associated with the Atomic Weapon Establishment precluded this.

The locational attributes of a new settlement at Grazeley are of course shared by those existing settlements in close proximity to it, including Mortimer which is well related to the existing railway station. In these terms, those settlements could contribute to meeting future development needs with the benefit of accessibility to Reading.

Importantly, Mortimer is not constrained by the Emergency Planning Zone (DEPZ), shown at Appendix 3 of the consultation document, which covers a significant part of this spatial area.

For all these reasons, and in the context of the need for additional housing land, discussed in the following section, Mortimer represents an eminently suitable settlement for additional housing.

4 The suitability of land at Kiln Lane, Mortimer

Located to the east of Kiln Lane and west of The Avenue, the land which Hallam control measures 7 hectares in size, and is comprised of a horse paddock and a single arable field.

Via The Street and the existing Public Rights of Way network, the Site is well located to existing facilities within the village centre (within 800m - 10 mins), whilst to the east is the Primary School and Mortimer train station, providing strong links to Reading and Basingstoke.

The Site could accommodate some 75 new homes which is consistent with the scale and role and function of a rural service centre. In addition, there is potential for elderly persons accommodation and the provision of a new early years facility, which reflects identified needs in the Neighbourhood Plan. Alongside new development would be accessible green space, potentially comprising children’s / teenage play space, and allotment provision. These community facilities seek to compliment existing green spaces within the village.

Future development has the potential to establish an effective transitional edge to the east of Mortimer, to slow traffic speeds along The Street and to maintain an attractive gateway or sense of arrival to the village.

5 Summary

This response to the West Berkshire Local Plan 2022-2039 has been prepared on behalf of Hallam Land Management Limited.

We have identified that, irrespective of the current consultation relating to the NPPF, it is firmly the case that Local Plans should continue to provide a sufficient supply of housing land to meet identified needs.

	<p>In this regard, we agree with the Council that there is no basis to reduce the number of new homes that is planned for on the basis of the Government's Standard Method. In fact, because of the inevitable situation where unmet need will arise from Reading, the higher end of the range is still too low and should be increased.</p> <p>Turning to spatial strategy and the distribution of new housing, to manage the pattern of growth and achieve the most sustainable pattern of development, an additional amount of housing should be provided in the Eastern Spatial Area. For the reasons set out herein, Mortimer is an eminently suitable location categorised as a Rural Service Centre and outside the Emergency Planning Zone which constrains other locations. It is not within the Area of Outstanding Natural Beauty which is subject to a high level of protection.</p> <p>The notion of no additional housing at Mortimer to that allocated in 2017 and to be developed by 2026, fails to consider longer term needs to the end of this current plan period. In these terms, the Local Plan is not positively prepared.</p> <p>Located to the east of the Kiln Lane and west of The Avenue, the land which Hallam control measures 7 hectares in size, and is comprised of a horse paddock and a single arable field. The Site could accommodate some 75 new homes which is consistent with the scale and role and function of a rural service centre. In addition, there is potential for elderly persons accommodation and the provision of a new early years facility, which reflects identified needs in the Neighbourhood Plan. Alongside new development would be accessible green space, potentially comprising children's / teenage play space, and allotment provision. These community facilities seek to compliment existing green spaces within the village.</p> <p>Accordingly, the Local Plan should either allocate land at Kiln Lane or set out an additional amount of housing to be provided by additional allocations in a new Stratfield-Mortimer Neighbourhood Plan.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	Omission Sites: To assist in resolving our concerns, Darcliffe are promoting the allocation of: <ul style="list-style-type: none"> • Land West of Little Heath Road, Reading ('The site') • Land to the east of Long Lane & south Blackthorn Close, Tilehurst ('Site A'), for approximately 30

- Land east of Sulham Hill between Barefoots Copse & Cornwell Copse, Sulham Hill, Tilehurst ('Site B'), for approximately 49 homes.

Land West of Little Heath Road, Reading

LAND WEST OF LITTLE HEATH ROAD, TILEHURST

The Opportunity

The site comprises approximately 13.5ha of land providing the opportunity to deliver approximately 322 much needed new homes. A Site Location Plan is provided at **Appendix 1** [see attachment 'PS1747 Boyer (Darcliffe Homes) Full LPR Rep].

Development of the site will provide a mix of housing in line with national and local policy. A range of house types, sizes and tenures are envisaged in order to maximise the effective and efficient use of the site and to meet the accommodation needs of a variety of household types.

The site has not previously been promoted in the current LPR and therefore does not feature in the 2023 HELAA. However, the site is sustainably located in terms of access to local facilities, amenities and public transportation links to the centre of Reading. The site would also represent a logical extension to the western boundary of the built-up area of Tilehurst, up to Sulham Woods.

A detailed assessment of the site's deliverability is set out in **Appendix 2** [see attachment 'PS1747 Boyer (Darcliffe Homes) Full LPR Rep]. However, to summarise, the site itself is largely unconstrained and forms mostly developable land. Vehicular access points are available multiple locations along Little Heath Road. Furthermore, there is ample space to mitigate impacts and work around the Tree Preservations Orders ('TPO's'), Root Protection Areas ('RPA's'), Ancient Woodland and Local Wildlife Areas to the west of the site, through the means of green and blue infrastructure.

The main constraint to overcome would be the impacts on the North Wessex Downs AONB and local landscape sensitivity. **Appendix 2** provides a detailed assessment of the site's suitability in relation to the AONB.

Darcliffe is acting as agent for the Sulham Estate whilst an imminent option agreement between the two parties is agreed. Darcliffe and the Sulham Estate have a proven record of promoting land in Tilehurst as exemplified by Stonehams Farm (refs. EUA003 and EUA008) allocation in the HSA DPD (2017).

Furthermore, there are no known legal restrictions to the development of the site for the proposed use. The site is therefore considered to be available for residential development within the plan period (within the next 1 – 5 years), in accordance with PPG.

SUSTAINABILITY APPRAISAL (SA) / STRATEGIC ENVIRONMENTAL ASSESSMENT (SEA)

The Council's Sustainability Appraisal ('SA') / Strategic Environmental Assessment ('SEA') [Footnote 16: Available online at: <https://www.westberks.gov.uk/lpr-proposed-submission-consultation>.] forms a core part of the evidence base underpinning the Local Plan.

The LPR has identified a number of new residential site options following the Housing and Economic Land Availability Assessment ('HELAA'), which rejected a number of sites that the council deems to be unsuitable based on the available evidence at the time.

At Appendix 8b, the Council's SA/SEA makes an assessment of each of the new residential site options which are identified not to be unsuitable.

Given that Land west of Little Heath Road was not assessed in the HELAA and therefore not the SA/SEA either, the assessment is replicated (below) at Table 1, where an equivalent assessment is made by Darcliffe Homes.

The scoring system also replicates that used in the SA/SEA, as follows:

[see pages 24-28 of attachment 'PS1747 Boyer (Darcliffe Homes) Full LPR Rep']

To summarise, the development site would likely have an overall neutral to positive impact on sustainability. Positive impacts have been identified in relation to all types of sustainability. Social sustainability as the site seeks to set out the requirements for a ranging typology of new houses on the site (of which 40% would be affordable), as well as requirements for good access routes to local services and facilities. Impacts on environmental sustainability are likely to be positive as a potential policy would set out the measures required to protect and enhance biodiversity and provide development that is conscious of climate change impacts. Economic sustainability would benefit from new development in a sustainable location where there is good access to services and facilities including employment opportunities. No negative sustainability impacts have been identified.

Policy SP15: Sites allocated for residential development in North Wessex Downs AONB [it should be noted that the site falls within the Eastern Area and not the AONB Spatial Area. It is for this reason that the comments below have been included here]

To ensure consistency within the document, it is recommended that additional wording is included within Policy SP15 to confirm that the identified capacity for each allocated site represents an approximate capacity and not a cap, as set out in Policy SP12.

Land to the east of Long Lane & south Blackthorn Close, Tilehurst ('Site A')

Land to the east of Long Lane & south Blackthorn Close, Tilehurst ('Site A') comprises approximately 1.3 hectares of land adjoining the western extent of Tilehurst, which comprises a suburb of Reading's western extent. The site adjacent to Sulham Hill, forming a vacant field between the road and the existing community that comprises the suburb of Tilehurst.

The site currently comprises an undeveloped agricultural field, which is bordered by established woodland to the north, south and west. Beyond the well-vegetated site boundaries to the north, south, and west lie undeveloped fields within the North Wessex Downs AONB. The site lies entirely within Flood Zone 1 (low flood risk) and has no relevant planning history.

The site was submitted to the Council as part of a Call for Sites exercise, which took place between 2012 - 2013. The site was assessed in the 2013 Strategic Housing Land Availability Assessment ('SHLAA')

(site ref: EUA033) as 'potentially developable'. The Council's Housing and Economic Land Availability Assessment ('HELAA'), which succeeded the SLAA and was updated most recently in January 2023, concluded that the site was *potentially available*, but *unsuitable* for residential development within the proposed emerging plan period, largely due to access and landscape considerations.

Darcliffe confirms that the site is immediately *available* for development, is *suitable* for residential development, and is *achievable* with a realistic prospect that development would be delivered on the site within the proposed emerging plan period.

Consequently, Darcliffe contend that the site is deliverable in relation to the provisions set out in Planning Practice Guidance [Footnote 1: PPG: Housing and economic land availability assessment. Paragraph: 018 Reference ID: 3-018- 20190722]. Further detail is provided in Sections 5 and 6 of these representations in relation to the *availability*, *suitability*, and *achievability* of Site A for residential development.

Sections 5 and 6 of these representations demonstrate that the site benefits from being very sustainably located and there are no significant constraints to the development of the site for residential dwellings within the emerging plan period. The development of the site is considered to be achievable whilst conserving and enhancing the special qualities of the AONB, in accordance with proposed Policy SP2: North Wessex Downs AONB.

The development of the site for approximately 30 new homes would contribute toward meeting the district's significant identified housing need in a highly sustainable location, in addition to providing a range of further benefits; including much-needed affordable housing, biodiversity improvements, contributing to meeting Reading's unmet need, the provision of public open space, and financial contributions toward the maintenance of local infrastructure.

Development at this scale is considered to represent an efficient use of the land, whilst respecting the character and setting of the wider landscape in which the site is set. As such, allocation of the site for approximately 30 dwellings would accord with Paragraph 124 of the NPPF, in which it is made clear that 'planning policies and decisions should support development that makes efficient use of land'.

Consequently, Darcliffe encourage the Council to reconsider the omission of the site for residential development and include an allocation of the site for the development of approximately 30 dwellings within the emerging local plan.

The Opportunity

The site comprises approximately 1.3ha of land providing the opportunity to deliver approximately 30 much needed new homes. A Site Location Plan is provided at **Appendix 1** [see attachment 'PS1725 Boyer (Darcliffe Homes) Full LPR Rep'].

Development of the site will provide a mix of housing in line with national and local policy. A range of house types, sizes and tenures are envisaged in order to maximise the effective and efficient use of the site and to meet the accommodation needs of a variety of household types.

The site is sustainably located in terms of access to local facilities, amenities and public transportation links to the centre of Reading. The site would also represent a logical extension to the western boundary of the built up area of Tilehurst, up to Sulham Woods.

A detailed assessment of the site's deliverability is set out in **Appendix 2** [see attachment 'PS1725 Boyer (Darcliffe Homes) Full LPR Rep'], however to summarise, the site itself is mostly unconstrained and forms mostly developable land. Vehicular access points are available at multiple locations along Long Lane. Furthermore, there is ample space to mitigate impacts and work around the Tree Preservations Orders ('TPO's'), Root Protection Areas ('RPA's'), Ancient Woodland and Local Wildlife Area to the west of the site, through the means of green and blue infrastructure.

The 2023 HELAA under ref. TIL14, however, identified the site 'not to be developable within the next 15 years' owing to concerns surrounding impacts on highways, the North Wessex Downs AONB and local landscape sensitivity. **Appendix 2** forms a detailed assessment of the sites suitability in relation to these matters, drawing upon evidence set out in technical reports. **Appendix 4 - Transport and Access Appraisal Report** [see attachment 'PS1725 Boyer (Darcliffe Homes) Full LPR Rep'], directly addresses the HELAA highways concerns.

The site is in the control of Darcliffe and, if allocated, is envisaged would be capable of delivering sustainable development within the first 5-years of the LPR's plan period.

SUSTAINABILITY APPRAISAL (SA) / STRATEGIC ENVIRONMENTAL ASSESSMENT (SEA)

The Sustainability Appraisal ('SA') / Strategic Environmental Assessment ('SEA') forms a core part of the evidence base underpinning the Local Plan.

The LPR has identified a number of new residential site options following the Housing and Economic Land Availability Assessment ('HELAA') which rejects a number of sites that the council deems to be unsuitable based on the available evidence.

At Appendix 8b, the SA/SEA makes an assessment of each of the new residential site options which are not deemed to be unsuitable.

Site A (HELAA Ref. TIL 14) was assessed in the HELAA as '*not be developable within the next 15 years*' and therefore not assessed in the SA/SEA. However, as set out in section 5, technical work has been undertaken to demonstrate how the concerns raised in the HELAA can be overcome.

As such, the SA/SEA assessment is replicated (below) at Table 1, which is accompanied by an equivalent assessment made by Darcliffe alongside summarised commentary.

The scoring system also replicates that used in the SA/SEA, as follows [see pages 18 to 23 of attachment 'PS1725 Boyer (Darcliffe Homes) Full LPR Rep'].

To summarise, the development site would likely have an overall neutral to positive impact on sustainability. Positive impacts have been identified in relation to all types of sustainability. Social sustainability as the site seeks to set out the requirements for a ranging typology of new houses on the site (of which 40%

would be affordable), as well as requirements for good access routes to local services and facilities. Impacts on environmental sustainability are likely to be positive as a potential policy would set out the measures required to protect and enhance biodiversity and provide development that is conscious of climate change impacts. Economic sustainability would benefit from new development in a sustainable location where there is good access to services and facilities including employment. No negative sustainability impacts have been identified.

Land east of Sulham Hill between Barefoots Copse & Cornwell Copse, Sulham Hill, Tilehurst ('Site B')

Land east of Sulham Hill between Barefoots Copse & Cornwell Copse, Sulham Hill, Tilehurst ('Site B') comprises approximately 2.2 hectares of land adjoining the western extent of Tilehurst, which comprises a suburb of Reading's western extent. The site adjacent to Sulham Hill, forming a vacant field between the road and the existing community that comprises the suburb of Tilehurst.

The site currently comprises an undeveloped agricultural field, which is bordered by established woodland to the north, south and west. Beyond the well-vegetated site boundaries to the north, south, and west lie undeveloped fields within the North Wessex Downs AONB. The site lies entirely within Flood Zone 1 (low flood risk) and has no relevant planning history.

The site was submitted to the Council as part of a Call for Sites exercise, which took place between 2012 - 2013. The site was assessed in the 2013 Strategic Housing Land Availability Assessment ('SHLAA') (site ref: EUA032) as 'potentially developable'. The Council's Housing and Economic Land Availability Assessment ('HELAA'), which succeeded the SLAA and was updated most recently in January 2023, concluded that the site was *potentially available*, but *unsuitable* for residential development within the proposed emerging plan period, largely due to access and landscape considerations.

Darcliffe confirms that the site is immediately available for development, is *suitable* for residential development, and is achievable with a realistic prospect that development would be delivered on the site within the proposed emerging plan period.

Consequently, Darcliffe contend that the site is deliverable in relation to the provisions set out in Planning Practice Guidance [Footnote 2: PPG: Housing and economic land availability assessment. Paragraph: 018 Reference ID: 3-018- 20190722]. Further detail is provided in Sections 5 and 6 of these representations in relation to the *availability*, *suitability*, and *achievability* of Site B for residential development.

Sections 5 and 6 of these representations demonstrate that the site benefits from being very sustainably located and there are no significant constraints to the development of the site for residential dwellings within the emerging plan period. The development of the site is considered to be achievable whilst conserving and enhancing the special qualities of the AONB, in accordance with proposed Policy SP2: North Wessex Downs AONB.

The development of the site for approximately 30 new homes would contribute toward meeting the district's significant identified housing need in a highly sustainable location, in addition to providing a range of further benefits; including much-needed affordable housing, biodiversity improvements, contributing to meeting Reading's unmet need, the provision of public open space, and financial contributions toward the maintenance of local infrastructure.

Development at this scale is considered to represent an efficient use of the land, whilst respecting the character and setting of the wider landscape in which the site is. As such, allocation of the site for approximately 30 dwellings would accord with Paragraph 124 of the NPPF, in which it is made clear that 'planning policies and decisions should support development that makes efficient use of land'.

Consequently, Darcliffe encourage the Council to reconsider the omission of the site for residential development and include an allocation of the site for the development of approximately 30 dwellings within the emerging local plan.

The Opportunity

The site comprises approximately 2.2ha of land providing the opportunity to deliver approximately 49 much needed new homes. A Site Location Plan is provided at Appendix 1 [see attachment 'PS1725 Boyer (Darcliffe Homes) Full LPR Rep'].

Development of the site will provide a mix of housing in line with national and local policy. A range of house types, sizes and tenures are envisaged in order to maximise the effective and efficient use of the site and to meet the accommodation needs of a variety of household types.

The site is sustainably located in terms of access to local facilities, amenities and public transportation links to the centre of Reading. The site would also represent a logical extension to the western boundary of the built up area of Tilehurst, up to Sulham Woods.

A detailed assessment of the site's deliverability is set out in **Appendix 3** [see attachment 'PS1725 Boyer (Darcliffe Homes) Full LPR Rep'], however to summarise, the site itself is mostly unconstrained and forms mostly developable land. Vehicular access points are available at multiple locations along Long Lane. Furthermore, there is ample space to mitigate impacts and work around the TPO's, RPA's, Ancient Woodland and Local Wildlife Area to the north, west and south of the site, through the means of green and blue infrastructure.

The 2023 HELAA under ref. TIL15, however, identified the site 'not to be developable within the next 15 years' owing to concerns surrounding impacts on the North Wessex Downs AONB and local landscape sensitivity. **Appendix 2** forms a detailed assessment of the sites suitability in relation to these matters, drawing upon evidence set out in technical reports. **Appendix 5 - Transport and Access Appraisal Report** [see attachment 'PS1725 Boyer (Darcliffe Homes) Full LPR Rep'], directly addresses the HELAA's highway concerns.

The site is in the control of Darcliffe and, if allocated, is envisaged would be capable of delivering sustainable development within the first 5-years of the LPR's plan period.

SUSTAINABILITY APPRAISAL (SA) / STRATEGIC ENVIRONMENTAL ASSESSMENT (SEA)

	<p>The Sustainability Appraisal ('SA') / Strategic Environmental Assessment ('SEA') forms a core part of the evidence base underpinning the Local Plan.</p> <p>The LPR has identified a number of new residential site options following the Housing and Economic Land Availability Assessment ('HELAA') which rejects a number of sites that the council deems to be unsuitable based on the available evidence.</p> <p>At Appendix 8b, the SA/SEA makes an assessment of each of the new residential site options which are not deemed to be unsuitable.</p> <p>Site A (HELAA Ref. TIL 15) was assessed in the HELAA as '<i>not be developable within the next 15 years</i>' and therefore not assessed in the SA/SEA. However, as set out in section 7 and Appendix 3, technical work has been undertaken to demonstrate how the concerns raised in the HELAA can be overcome.</p> <p>As such, the SA/SEA assessment is replicated (below) at Table 1, which is accompanied by an equivalent assessment made by Darcliffe alongside summarised commentary.</p> <p>The scoring system also replicates that used in the SA/SEA, as follows [see attachment 'PS1725 Boyer (Darcliffe Homes) Full LPR Rep'].</p> <p>To summarise, the development site would likely have an overall neutral to positive impact on sustainability. Positive impacts have been identified in relation to all types of sustainability. Social sustainability as the site seeks to set out the requirements for a ranging typology of new houses on the site (of which 40% would be affordable), as well as requirements for good access routes to local services and facilities. Impacts on environmental sustainability are likely to be positive as a potential policy would set out the measures required to protect and enhance biodiversity and provide development that is conscious of climate change impacts. Economic sustainability would benefit from new development in a sustainable location where there is good access to services and facilities including employment</p>

2. Do you consider the Local Plan Review is sound? - Consistent with national policy:	No

<p>the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>The availability of sites for housing and other development in the Eastern Area is restricted by constraints including the safeguarding zones for the Atomic Weapons Establishments at Aldermaston and Burghfield. Some of these sites are – in part or in full – on land in Flood Zones Two and Three. We object to the allocation of site RSA11, the former sewage treatment works at Theale, since it is in a zone of higher flood risk than TIL13.</p> <p>These and similar factors were recognised by WBC in the previous adopted Core Strategy Policy ADP4, which established a ‘Broad Location for Development’ within which to find sites for the housing required. The Land at Pincents Lane falls squarely within this Broad Location.</p> <p>Policy SP14 suggests that “<i>The Tilehurst Neighbourhood Plan will not include allocations for residential development, and will instead only include development management policies.</i>” No additional sites are proposed for allocation in Tilehurst as a result. However, it should be pointed out that this policy of not allocating sites for development in the Tilehurst Neighbourhood Plan has yet to be tested at its own Examination. It is contrary to the advice at paragraph 66 of the NPPF that:</p> <p><i>“... strategic policies should also set out a housing requirement for designated neighbourhood areas which reflects the overall strategy for the pattern and scale of development and any relevant allocations...”</i></p> <p>Policy SP14 therefore fails to make appropriate provision for the scale of need in the Eastern Area and the fact that many sites will be inherently more sustainable due to their proximity to the dominant urban area of Reading. It also fails to provide for any of Reading’s unmet needs. As such it is inconsistent with NPPF 11 a&b.</p> <p>Omission Site - Pincents Lane</p> <p>Attachments: Pincents Lane additional Information</p> <ul style="list-style-type: none"> • Appendix 1 - Site Location Plan • Appendix 2 - Planning History • Appendix 3 - SoCG 2016 • Appendix 4 - 165 unit illustrative Masterplan • Appendix 5 - Committee Report 19/00113/OUTMAJ • Appendix 6 - References to the site in LPR • Appendix 10 - Node: draft Masterplan
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>The requirement to allocate more sites in the Eastern Area would address many of these challenges to soundness. Whilst it is acknowledged that some constraints do exist, there are sites which are recognised as achievable and deliverable in the Council’s evidence base supporting the LPR. Prime amongst these is site TIL13 at Pincents Lane (see overleaf). Site TIL13 has a long planning history. By common consent, the problems with the 2011 appeal scheme have been resolved and no technical obstacles exist to development of the site for a scheme of up to 165 dwellings. By the LPA’s own assessment, the concerns – and the reasons for not proposing it for allocation – are entirely “political”. No one would deny the validity of elected members making political choices where real choices exist, but the fact is that not allocating the site would leave the LPA without a single significant contribution to offer to meet either its own housing need in the Eastern Area or that arising from Reading, of which the Area is functionally part. The site should therefore be allocated.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? -	

<p>Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>HELAA Appendix 4 - It is not clear where or how the figure of 138 dwellings has been generated. The developer has submitted multiple unsuccessful planning applications over many years, the latest being for 265 dwellings, revised to 165. This was refused at committee in April 2022 and the decision was not appealed. It is noted that Stage 2a Development Potential states "Up to 138 dwellings but known issues exist which are likely to decrease this number". This statement has not been carried into Appendix 8b (below). Additional important details that contribute to rejection of this site from the Plan have also not been transferred to the SA/SEA. Some examples are detailed below.</p> <p>Local Green Space Designation (Stage 2b Suitability): it should be noted that part of the land has been identified as being suitable for LGS designation in the Tilehurst NDP which recently completed Regulation 14 Consultation.</p> <p>TIL19 *New Site* Calcot Park Golf Club, Calcot, Reading.</p> <p>This site has been added to the HELAA site assessment. Tilehurst Parish Council has no record of being consulted on the inclusion.</p> <p>The site is inside the settlement boundary so it is not clear why it is assessed here. Its inclusion is making an already complex Planning Process even more incomprehensible and concerning to local residents, particularly when they see references to potential development of 130 houses or up to 335 flats. The "Availability" determination for this site has multiple "unknowns"- legal issues, timeframe for bringing forward for development, potential timeframe for development, and whether a developer/housebuilder is involved. Since the site promoter has been sufficiently involved to indicate a number of dwellings it seems odd none of these other factors are known yet.</p> <p>For clarity it should be noted again that the Local Plan Review clearly defines how expected housing need will be met through strategic site allocations outside the settlement boundary, allocations from named NDPs and small scale (less than 10 units) windfall inside the settlement boundary. Windfall development on this scale within the settlement boundary will not be required to meet the anticipated need.</p> <p>Appendix 8b – SA/SEA of New Residential Site Allocation Options</p> <p>TIL14 Pincents Lane, Tilehurst.</p> <p>P.31 States "Parish/Town Council: No comments"</p> <p>This council is not aware of any request for comment on this document or the revised HELAA.</p> <p>Whilst this Council agrees with the decision not to include this site in the updated Plan, it feels the sound planning reasons behind this decision are not adequately explained in this document.</p> <p>Numerous important points from the updated HELAA site assessments have been poorly summarized or omitted altogether from the summary tables.</p> <p>For example, under "Air Quality, Pollution & Contamination" (Stage 2b Suitability) the HELAA Site Assessment states-</p> <p>"The site is close to the M4 and A4.</p> <p>Significant worsening of nitrogen dioxide and particulate matter. Medium risk of contamination.</p> <p>Medium risk to future occupants from nearby commercial uses. Medium risk to neighbours"</p> <p>Yet in the summary table of this document, it merely states "The site is unlikely to impact on air quality". The HELAA wording is relegated to a footnote and does not seem to have been taken into account in the summary.</p> <p>The HELAA Site Assessment notes- "The site will generate circa 828 vehicle movements per day with circa 83 during peak hours. There is much concern regarding the impact along Pincents Lane and along the A4."</p> <p>No reference is made to this in the summary table of this document under "To promote and maximise opportunities for all forms of safe and sustainable transport", except to note "Locally there are significantly concerns regarding access to the site." It is not clear why this text is under the heading "mitigation/enhancement".</p> <p>It is concerning to local residents familiar with the history of this site to see the words "At the time planning permission is sought for development at this site...". This implies a planning application is expected</p>

	despite the numerous failed previous attempts and this site's rejection as not developable in the proposed Local Plan Review.

<p>Please give reasons for your answer</p>	
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>[See attached Combined Appendices for appendices. For wider representation and Tables and Figures, see attached Representations on behalf of Croudace Homes]</p> <p>Local Plan Review Allocations</p> <p>The Council proposes to allocate the sites listed at Table 7 for residential development. Croudace's analysis of the proposed allocations and their ability to deliver completions is summarised alongside each relevant allocation, with further analysis contained within the subsequent paragraphs.</p> <p>Proposed New Allocations</p> <p>The LPR proposes to allocate nine new sites for residential development to bring forward an estimated 1,720 units. It also delegates the allocation of land for 80 units upon adoption of two respective Neighbourhood Plans.</p> <p>Other New Allocations (Draft Policies SP13, SP14 and SP15)</p> <p>Croudace notes that draft allocations are proposed in each spatial area. However, some of these sites are subject to constraints which should see them removed from the LPR as their development is likely to be impeded.</p> <p>For example, the following sites are within the River Lambourn Special Area of Conservation ('SAC') – an area constrained by issues surrounding nutrient neutrality as marked on the draft Policies Map:</p> <ul style="list-style-type: none"> – RSA17: Land at Chieveley Glebe (15 units); – RSA19: Land West of Spring Meadows, Great Shefford (15 units); – RSA22: Land Adjacent Station Road, Hermitage (34 units). <p>In addition, 25 units are proposed to be delegated by the LPR to come forward via a Neighbourhood Plan at Lambourn; a Neighbourhood Area highly constrained by nutrient neutrality issues.</p> <p>As explained by Natural England, "nutrient neutrality is a means of ensuring that a development plan or project does not add to existing nutrient burdens within catchments, so there is no net increase in nutrients as a result of the plan or project".</p>

	<p>Planning applications submitted in areas affected by nutrient neutrality must be accompanied by a Habitat Regulations Assessment ('HRA') which demonstrates that there is no effect on the level of nutrients within watercourses. Where there is a negative effect on nutrient levels, mitigation strategies must be secured.</p> <p>It is our understanding that mitigation strategies (likely to be in the form of a scheme enabling developers to purchase 'nutrient credits') are not currently well advanced, and until they are, it is the case that development in affected areas is effectively 'on-hold' unless nutrient neutrality can be demonstrated.</p> <p>Croudace does not consider the proposed allocation of sites in areas which are so heavily constrained by an issue which is unlikely to be resolved in the short term to be a 'justified' or 'effective' strategy. Nutrient neutrality is a complex matter, and a resolution is likely to mean that development in nutrient neutrality zones is impeded for long enough to delay delivery of housing beyond a five year period.</p> <p>On that basis, Croudace considers that the Council should remove draft allocations RSA17, RSA19 and RSA22 and the reliance on the Lambourn Neighbourhood Plan. The effect of this would be to reduce the claimed supply by 89 units.</p> <p>Part of this shortfall could be made up by proposing alternative allocations on unconstrained sites, such as Henwick Park, which is not impacted by nutrient neutrality issues.</p>

<p>Please give reasons for your answer</p>	<p>Development Management Policies</p> <p>The comments set out in this section are intended to assist the Council in developing an approach that is consistent with national planning policies and the tests of soundness. Where possible, suggested amendments have been set out in the response.</p> <p>Darcliffe broadly supports the objectives of the West Berkshire Local Plan Review (2022 - 2039) but advises that the Council reconsider the omission of an allocation for residential development at Land west of Little Heath Road, Reading, for approximately 322 dwellings, to ensure that the plan can be found sound at the Examination in Public.</p> <p>The comments set out below are intended to identify opportunities to improve the effectiveness of the proposed policies. Darcliffe's overriding recommendation comprises the inclusion of a new site allocation for approximately 322 additional dwellings at the Land west of Little Heath Road, Reading. The various benefits of including such an allocation are set out in sections 6, 7 and Appendix 2 of these representations.</p> <p>As a general principle, the plan would benefit from consistent numbering, in relation to the paragraphs, policy criteria, and sub-criteria. This would assist the accessibility and the useability of the draft plan, improving the effectiveness of the document substantially.</p> <p>Darcliffe recommends the inclusion of site allocations for residential development at 'Land to the east of Long Lane & south Blackthorn Close, Tilehurst', and 'Land east of Sulham Hill between Barefoots Copse & Cornwell Copse, Sulham Hill, Tilehurst', under new policies 'RSA24' and 'RSA25'.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>i) Development in the North Wessex Downs <u>AONB</u> is will be allocated for the approximate number of <u>homes</u> as follows: [...]</p> <p>Furthermore, Darcliffe recommends the inclusion of an allocation for residential development at Land west of Little Heath Road, Reading, under a new policy 'RSA24'.</p> <p>Darcliffe recommends the inclusion of site allocations for residential development at 'Land to the east of Long Lane & south Blackthorn Close, Tilehurst', and 'Land east of Sulham Hill between Barefoots Copse & Cornwell Copse, Sulham Hill, Tilehurst', under new policies 'RSA24' and 'RSA25'.</p> <p><for table see attachments></p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>Darcliffe have specific land interests within West Berkshire District, which are promoted to be allocated for residential development (Land west of Little Heath Road, Reading). In representing Darcliffe, Boyer are well-placed to advise on the appropriateness of the land promoted for development.</p>

2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? -	No

<p>Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>LPR paragraph 6.23 identifies a need for an additional 1,809 dwellings to 2039, taking into account existing commitments for 7,337 dwellings. Notably the existing commitments includes 1,580 dwellings at Sandford Park, which was allocated in 2012 and has only recently been granted planning permission, and a large proportion (1,949 dwellings) at windfall sites which do not have planning permission, and so it is questionable whether all of the existing commitments will be delivered during the LPR plan period. It is therefore considered that an additional supply of housing is likely to be required in the LPR, above the stated requirement of 1,809 dwellings, which could be met through smaller sites distributed throughout the District to avoid similar delays to that experienced at Sandford Park. It is important that the LPR identifies a sufficient supply of deliverable sites to meet the local housing target, taking into the previous shortfall in delivery and the potential that identified sites do not come forward as envisaged.</p> <p>It is noted that draft LPR Policies SP13-SP15 make provision for 1,720 new dwellings (as referred to at paragraph 6.24), with 80 dwellings proposed to be allocated at neighbourhood plans (as referred to at paragraph 6.25), below the stated outstanding requirement for 1,809 dwellings. It is therefore crucial that additional housing sites are identified in order to meet the LPR housing target (with a need for more housing sites to be identified given the comments raised above regarding the existing commitments).</p> <p>The NPPF also emphasises that small and medium sites 'can make an important contribution to meeting the housing requirements of an area, and are often built out relatively quickly' (paragraph 68). Indeed the Estate's landholdings across the eastern part of the District include a number of small and medium land parcels (as noted further below) which are suitable to accommodate sustainable development and contribute to the District's housing land supply. This includes the Estate's land at Burghfield Common, Theale and Mortimer as noted further below. A number of these sites are currently located within the DEPZ, however should this change during the plan period (as noted above) and additional housing be required, these sites are well placed to accommodate this need.</p> <p>Development Opportunities</p> <p>Burghfield Common</p> <p>The Estate's landholdings at Burghfield Common include land adjacent to Pondhouse Farm (ref. BUR10) and land at Hollybush Lane, Burghfield Common (ref. SUR3). Taking into account the role of Burghfield Common within the District, and given that the DEPZ may be subject to change (as noted above), it is recommended that some provision is made for additional housing at Burghfield in order to ensure certainty of future housing supply.</p> <p>The site adjacent to Pondhouse Farm (ref. BUR10) adjoins the eastern edge of Burghfield Common and is within walking distance of all the services and facilities within the village (including educational, retail and community facilities). The site is currently in agricultural use and is not constrained environmentally e.g. by ecological or landscape designations, or by flood risk considerations. The site is therefore situated in a sustainable location to accommodate development in the region of 100-140 dwellings.</p> <p>The site at Hollybush Lane (ref. SUR3) adjoins the northern edge of the Burghfield Common settlement boundary. The site is a c10 minute walk to educational, retail and community facilities and 1 mile away from the village centre. The site is recognised as having opportunities for biodiversity enhancements through its designation as a 'Biodiversity Opportunity Area', however in all other respects, the site is not constrained environmentally e.g. by landscape designations or flood risk considerations. The site, or part thereof, is therefore situated in a sustainable location to accommodate development.</p> <p>Mortimer</p> <p>In addition to land at West End Road (ref. SM2) and The Street (ref. SM3) (promoted by others), the Estate has landholdings at Spring Lane (ref. SM4) and Monkton Copse, Mortimer (ref. SM5). As explained further above, Mortimer is located just outside the DEPZ in the Eastern Area and has potential to accommodate additional development within the LPR plan period to 2039 (beyond the existing Neighbourhood Plan period).</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	Yes

Please give reasons for your answer	
4. Proposed Changes	Policy SP13-15 and the supporting text as currently worded do not meet the tests of soundness set out in NPPF paragraph 35. Accordingly, in order to ensure the soundness of the Plan, additional housing sites should be identified to ensure that local housing needs are met. This should include consideration of small and medium sites at Burghfield Common, Theale and Mortimer.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	<i>The Englefield Estate consider that the plan in its current version is not sound and would like the opportunity to set out how alterations could be made to the plan and its evidence base to enable it to be found sound and progress to adoption.</i>
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes

<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>SP14 Sites allocated for residential development in the Eastern Area</p> <p>This policy highlights where West Berkshire council are proposing to allocate the housing requirements in the Eastern area.</p> <p>It is proposed that up to 386 houses will come forward on new allocated sites, a 65 bedroom care home and 8 pitches.</p> <p>It should be noted that of the 386 new site allocations proposed, 270 of these proposed units were adopted in the current local plans 'daughter' document so it would appear that only enough land for 116 houses is being proposed in the whole of the Eastern area.</p> <p>This will only amount to 6.8 additional houses per year up until 2039 on top of the already allocated sites from the current local plan, which is clearly not a satisfactory position bearing in mind the significant shortage of houses in country, especially going by the fact that this area is not constrained by the AONB.</p> <p>RSA 7 (HSA11 from current local plan) has had delivery issues that that the access is not agreed with all the land owners, so that site is currently able to be delivered until all the land owners and Highways are satisfied that this can be achieved. This amounts to 35 houses that are proposed in the 2022-2039 proposed local plan.</p> <p>The reasoning for the significantly reduced amount of houses being proposed is due to increase in size of the Burghfield AWE DPEZ and the proposed policy wording to take a starting position of 'NO' on any developments proposed in the DPEZ zone.</p> <p>Point 6.32 of the SP14 claims that;</p> <p><i>"In the Eastern Area the significant constraints to development mean provision for new development is more limited. Though Grazeley had been identified as a possible location for a new garden settlement, changes to legislation (Radiation (Emergency Preparedness and Public Information) Regulations 2019) have resulted in the redetermination of the emergency planning arrangements around AWE Aldermaston and AWE Burghfield. The Detailed Emergency Planning Zone (DEPZ) for AWE Burghfield now covers</i></p>

the area of Grazeley. The change resulted in objections to the Grazeley garden town proposal from the Defence Nuclear Organisation (part of the Ministry of Defence) and the Office for Nuclear Regulation. No strategic allocation is therefore made in this spatial area.”

This is somewhat of a misleading statement in effort of seeking to restrict the whole of the DPEZ zone from additional housing. The ONR did object to the 15000 houses proposed at the Grazeley Garden village, but they did not object to any of the other sites that were deemed acceptable in the original HELLA document.

Jessica McGuinness who is the Policy and Communications Directorate at ONR have advised the following regarding some direct questions on the DPEZ;

1. The consequences report states that the DPEZ zone now needs to be a minimum 3160m from the AWE Burghfield, is there a requirement from the ONR that it needs to be in excess of 3160m?

ONR Response

ONR has not made a specific requirement for the DEPZ for AWE Burghfield to be in excess of 3160 m. Under the provisions of REPP19, the site operator's consequences report recommends the minimum geographical extent of the DEPZ to the Local Authority and the Local Authority is prohibited from setting the DEPZ any smaller than this minimum. REPP19 permits the Local Authority to extend the DEPZ in consideration of certain factors set out in the regulations and the REPP19 Approved Code of Practice provides more information on how this should be done in practice.

2. Does the 2019 RIPPIR report or consequences report state that no additional houses are allowed within 5km of the AWE Burghfield?

ONR Response

REPP19 does not state that no additional houses are allowed within 5 km of AWE Burghfield. REPP19 requires that the Local Authority make an adequate off-site emergency plan for a radiation emergency. Demographic changes within the DEPZ may affect the adequacy of the plan and so Local Authorities are expected to monitor and control such changes.

The AWE Burghfield Consequences Report does not state that no additional houses are allowed within 5 km of AWE Burghfield. REPP19 requires that the site operator produce a consequences report, but does not require that the consequences report make a recommendation on developments within the DEPZ.

3. Although the ONR do not draft or implement the West Berkshire policies, but the ONR would be consulted on this emergency plan, so was the 5km radius, and strictly no additional houses within 5km a requirement of the ONR?

ONR response

ONR Land Use Planning consultation zones and consultation criteria are available [here](#). For applications that meet our consultation criteria we request consultation within the DEPZ and also within a 5km Outer Consultation Zone which has been set by ONR around AWE Burghfield. ONR has not specified that no additional housing can be built within these zones, but when ONR is consulted on an application it will seek assurance from the local authority emergency planners that the proposed development can be accommodated within the existing off-site emergency planning arrangements (or an amended version). If the ONR Inspector does not receive adequate assurance of this, ONR will advise against the development.

There has never been any individual site assessment done on any of the other sites that were deemed “developable” prior to the changes to the DPEZ in 2020, and to suggest that the office of nuclear regulation has specifically stated that no more houses can be built in the DPEZ zone is somewhat wide of the mark.

The issue has come about because the WBC emergency planners have significantly increased the size of the DPEZ zone well beyond the UPAZ 3160m, and as a result now has significantly more houses. It should be noted that in the Burghfield DPEZ zone, since the HELLA was undertaken there has only been an additional 30 houses on the Reading Road, Burghfield common, and 100 houses have gained an outline consent granted on Clay Hill Road, Burghfield Common. The latter consent in Clay Hill road was granted outline consent after the proposed changes to the DPEZ and this site is well within UPAZ 3160m zone

The new DPEZ zone around Burghfield AWE splits parts of Sulhamstead, and goes beyond the settlement boundary of Burghfield Common, so is going against the RIPPAR 19 directives.

Dr Keith Pearce who has undertaken a detailed assessment of not only Charlesgate Homes promoted site SUL1 (Benhams farm, Hollybush Lane), but also undertaken a risk assessment on the likelihood of any radiation leaks from AWE Burghfield, and the likely risk is causes to existing and future residents.

There is absolutely no supporting scientific evidence to support a housing monitorium in Burghfield common, this is proven in the attached report from Dr Keith Pearce.

The HELLA assessment highlighted that the site SUL 1 in Burghfield common is;

“The site is well related to the existing town of Burghfield Common. Burghfield Common is a Rural Service Centre, and has a range of services and reasonable public transport provision, and is a focus of development in this area. The site itself is in close proximity to a range of services and facilities, with good connections via existing pathways and rights of way to connect to the countryside to the west. The proposal would bring forward custom and self-build plots which is of benefit. The Landscape Character Assessment noted that the landscape strategy is to positively manage the land to avoid suburbanisation of the fringe of this settlement. High quality design and a sound layout scheme will therefore be important, and will need to factor in the setting of the nearby Grade II listed building Crofters Cottage.

The access will need to be upgraded, both on the access road and onto Hollybush Lane. Overall the site is likely to have a positive effect on sustainability and the SA/SEA does not highlight any significant sustainability effects. Issues which need resolving relate to updating the ecological surveys, undertaking a Heritage Impact Assessment, and undertaking a Minerals Resource Assessment”

The HELLA conclusion for SUL 1 was that;

“Potentially developable. Small risk of surface water flood risk on north part of site may affect capacity. Allocation would be dependent on a review of the settlement boundary of Burghfield. Landscape capacity work and ecological surveys needed.”

The sole reason for the site being taken out at a potentially developable site is;

“The site’s location within the Detailed Emergency Planning Zone (DEPZ) of Burghfield Atomic Weapons Establishment, and the impact of development on ‘blue light services’ and the emergency off site plan would mean that 43 dwellings would not be suitable within this location. An updated emergency off site plan is due in January 2021. Due to the presence within the DEPZ the site is not recommended for allocation at this time, dependent on the conclusions of the off site plan.”

It has been proven in the attached “AWE Burghfield emergency planning implications for a proposed development at Benham’s Farm, Hollybush Lane, Burghfield Common, Reading RG7 3JS” that there is no justification to support a housing moratorium in and around the Burghfield AWE, the size and position of the extended DPEZ is not justifiable, and SUL1 should not be omitted as a developable site on this reason alone.

Summary

1. The supporting Evidence from Dr Keith Pearce which is attached, highlights that there is no scientific evidence to support the claim that no more houses can come forward in the DPEZ.
 2. The sole reason for the site being omitted is because it is within the DPEZ, the site has gone from potentially developable to deemed as unsuitable, due to WBC seeking to impose a housing moratorium by way of the extended DPEZ zone as well very restrictive policy wording.
 3. The proposed development site SUL1 is outside the UPAZ where prompt protective actions (in this case shelter) are estimated to be able to provide a nett benefit if the postulated accident occurred on the AWE Burghfield site while the wind was blowing towards the proposed development site under relatively unlikely weather conditions. Therefore, no detailed emergency plan is required to enable urgent protective actions at this site.
 4. The potential radiation dose to people living on the proposed development are so low and the probability of any such event affecting the site so low that we can assert with confidence that the AWE Burghfield site does not pose a significant risk to those who might live in the proposed development site, Benhams farm, Hollybush lane, Burghfield Common (SUL1)
 5. The dose rates at the proposed development site during and after the postulated event would be sufficiently low as to allow life as normal, including home visits by emergency services and in-home service providers.
 6. There are a number of sensible options to redefine the DEPZ such that the development site would be outside it. This would remove all the REPPiR-19 emergency planning requirements except those associated with severe accidents and outline planning.
 7. The AWE Burghfield site will not be affected by external hazards resulting from a residential development this far away.
 8. The development will not affect the ability of the emergency services or others to gain access to, or egress from the site and so will have no impact on the ability to respond any event on the AWE Burghfield site.
 9. This proposal does not raise serious safety concerns nor does it lead to a breach the ONR demographic criteria.
 10. It is concluded that the proposal would not present a barrier to the ability of emergency services to safely carry out their duties, and nor would it affect the Council’s ability to execute and manage its obligations under the REPPiR plan.
 11. Given the above, the local authority can provide the ONR with “adequate assurance that the proposed development can be accommodated within their existing off-site emergency planning arrangements (or an amended version)” allowing the ONR to allow the inclusion of SUL1 in the 2022-2039 local plan as an allocated housing site for self and Custom building.
- It has been proven in the attached document “AWE Burghfield emergency planning implications for a proposed development at Benham’s Farm, Hollybush Lane, Burghfield Common, Reading RG7 3JS” that there is no justification to support a housing moratorium in and around the Burghfield AWE, the size and position of the extended DPEZ is not justifiable, and SUL1 should not be omitted as a developable site on this reason alone. The HELLA highlights the site is a developable site, and the only thing that is stopping the site coming forward as an allocated site is because of the location of the site in the extended DPEZ zone even though it is well outside of the UPAZ.

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	

4. Proposed Changes

SP14 Site allocations Eastern area

Additional supporting information for inclusion of Benhams Farm, Hollybush lane, Burghfield Common, RG7 3JS (SUL1)

Site location.

Benhams farm proposed site (SUL1) is located off Hollybush lane and the land is currently accessed via Oakley Drive.

The site is adjacent to the settlement boundary and benefits from having an extensive tree lined screening from both the Northern and Eastern Boundary viewpoints. The site also benefits from being screened from the southern public viewpoint from the Sulhamstead public bridleway, by the houses that have been built on Oakley Drive.

The eastern boundary of the site is slightly visible at points from the Sulhamstead bridleway although this is only limited due to the farm buildings and Residential buildings that block public viewpoints into the proposed site.

The site is largely flat with a slight fall to the northern boundary.

The site is located in Sulhamstead Parish, but lies adjacent to the Burghfield Common settlement boundary.

Local amenities

The proposed site is within 1km of a good level of local facilities that include the following:

Schools

- Willink secondary school
- SUN infant and Junior school
- Mrs Blands Infant school
- Garlands Junior School

Leisure facilities

- Willink Leisure center, that included indoor swimming pool, all weather floodlight pitches, sports hall, gymnasium.
- Skate park
- Burghfield recreation ground
- Good access to cycle routes
- Good access to the Englefield estate for walking, running and dog walking

Local shops

- 4 convenience stores
- 3 takeaway outlets
- 2 restaurants
- Bakery
- Butchers
- Fruit and veg outlet
- Pet store
- 2 estate agents
- Funeral directors
- Curtain store
- 2 x Hairdressers
- Mechanics
- Petrol station
- Numerous bus stops
- 2 x public houses within 3km

The site location also has the benefit of being within 2-3 miles to;

- Mortimer
- Theale
- Tadley

All of which have a good levels of access to additional amenities, schools, places of employment and train stations.

The site also benefits from having good links to the M4 and M3 as well as green park industrial estate.

Access and services

The site is accessed of highway standard road, Oakley drive, that is 5.5m wide also has the potential for a pedestrian access footway onto Hollybush lane.

The site has the benefit of already having the following services to the site or within the access roadway Oakley drive:

- Mains drainage
- Mains water supply
- Mains gas Supply
- Mains electric supply
- BT services

Due to the above services already being on the site or within the road, this reduces any further need to cause disruption to residents with road closures to upgrade the supplies as they are already in place.

Site proposal

The site is being promoted as a self and Custom build site and will enable self or Custom builders to purchase serviced plots with a outline consent along with a plot passport that will highlight the parameters

to which WBC would agree to design and size wise so that they are able to design their own homes to their own designs and budgets.

There is a huge demand for self and Custom build houses in West Berkshire, which is highlighted within the Self build register. There has also been significant demand for serviced plots in this location, when it was promoted as a potential self and Custom build site, to see if the demand was there.

At this moment there is no specific policy to satisfy this demand for self and custom build and as result very limited self and custom build serviced plots are becoming available within West Berkshire Council.

WBC HELLA on SUL 1 (Benhams Farm) site inclusion Supporting comments

The site is well related to the existing village of Burghfield Common.

Burghfield Common is a Rural Service Centre, and has a range of services and reasonable public transport provision, and is a focus of development in this area.

The site itself is in close proximity to a range of services and facilities, with good connections via existing pathways and rights of way to connect to the countryside to the west.

The proposal would bring forward custom and self-build plots which is of benefit. The Landscape Character Assessment noted that the landscape strategy is to positively manage the land to avoid suburbanisation of the fringe of this settlement. High quality design and a sound layout scheme will therefore be important, and will need to factor in the setting of the nearby Grade II listed building Crofters Cottage.

The access will need to be upgraded, both on the access road and onto Hollybush Lane.

Overall the site is likely to have a positive effect on sustainability and the SA/SEA does not highlight any significant sustainability effects.

Issues which need resolving relate to updating the ecological surveys, undertaking a Heritage Impact Assessment, and undertaking a Minerals Resource Assessment.

The Sustainability Appraisal (SA)/Strategic Environmental Assessment (SEA) indicates that a predominately positive sustainability impact.

There are positive effects in delivering affordable and custom and self-build housing; supporting healthy and active lifestyles, enhancing Green Infrastructure, conserves the character of the landscape subject to design and layout; makes efficient use of land; and has the opportunity to embed the principles of climate change into the development.

Outstanding issues relate to the impact on heritage assets, ecology, and the minerals safeguarding area and proximity to Firlands, a preferred option for minerals extraction.

The site is within the catchment for Mrs Blands and Garland primary schools.

Mrs Blands is approximately 490m from the site.

Garland is approximately 1km from the site.

The scale of the development would be absorbed into the catchment population.

In terms of secondary provision, the school is within the catchment for The Willink School which is located approximately 550m away.

This development could be incorporated into the existing catchment population

The site is the ownership of three landowners and is available immediately. A developer has an option on the land.

Access would be from Hollybush Lane and the landowner has ownership over the access road.

The site has already been the subject of planning applications (16/00658/OUTMAJ for the site only, plus small scale development to the south), and amendments to the site access at Hollybush Lane as well as improvements to the lane are required.

There would be no impact on the local highway network.

The nearest bus stop, on Clayhill Road/Omer's Rise, is approximately 620m from the site, providing regular services between Tadley and Reading, including Mortimer.

HELLAA conclusions: Potentially developable. Small risk of surface water flood risk on north part of site may affect capacity. Allocation would be dependent on a review of the settlement boundary of Burghfield. Landscape capacity work and ecological surveys needed.

WBC HELLA on SUL1 (Benhams farm) Reasons for not being allocated

The Sole reason for this site not being sought as an allocated site is as below:

The site's location within the Detailed Emergency Planning Zone (DEPZ) of Burghfield Atomic Weapons Establishment, and the impact of development on 'blue light services' and the emergency off site plan would mean that 43 dwellings would not be suitable within this location.

An updated emergency off site plan is due in January 2021.

Due to the presence within the DEPZ the site is not recommended for allocation at this time, dependent on the conclusions of the off site plan

As of March 2023 we have still not be provided with copies of "updated emergency plan" that was due in Jan 2021.

The attached assessment from Dr Keith Pearce ("AWE Burghfield emergency planning implications for a proposed development at Benham's Farm, Hollybush Lane, Burghfield Common, Reading RG7 3JS") <see attached document Charlesgate Homes_attachment_Response to AWE DEPZ zone> who qualifications include a BSc (Hons) degree in Physics, a PhD in Nuclear Physics and an MSc in Emergency Planning Management. He is a fellow of the Emergency Planning Society and a Chartered Physicist.

	<p>Dr Pearce has extensive experience and expertise in that he has written the REPP19 Hazard Evaluation and Consequence Assessment and the Consequence Report for a fuel enrichment company.</p> <p>helped local authorities understand the Consequence Report sent to them by operators; helping them understand the risk profile of the site they host and to develop appropriate off-site plans.</p> <p>Between 2005 and 2014 he was Head of Emergency Planning, responsible for the developing, maintaining and testing of the on-site emergency plans and responsible for supporting the local authority in the preparation and testing of the off-site plans for 10 reactor sites across the UK. In this role he liaised with local authorities, regulators, emergency responders, health bodies and government departments and played an active role on several national committees.</p> <p>Dr Pearce report does not support the concerns to omit this site due to be included within the DPEZ especially as it is outside the 3160 UPEZ.</p> <p>Summary</p> <ul style="list-style-type: none"> • The site is very well related to existing settlement • The site is very close to many local amenities • The site has a positive sustainability impact in terms of the overall HELLA assessment • The site will secure much needed supply of serviced self and Custom build serviced plots • The site has all services already to the land by way of drainage, water, electric, BT and access road. • The site was previously listed as developable prior to the DPEZ being increased in size and WBC changing the policy on development within the DPEZ. • The proposed site would have no impact on 'blue light services' serving AWE Burghfield • Dr Keith Pearce has undertaken a full assessment on the site and advises the site would have no detrimental impact on the DPEZ and therefore omitting the site as an allocated site on these grounds alone are not supported by the evidence supplied within Dr Pearces report. <p>We believe the supporting evidence supplied within the HELLA and Dr Pearces report should enable WBC to now include SUL1 as an allocated site and we believe this this site should be included as a site suitable for the development of self and Custom build plots within the West Berkshire Council local plan 2022-2039</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	Yes
<p>5. Independent Examination</p>	<p>The site SUL1 Benhams Farm, Holybush Lane, Burghfield, RG7 3JS was initially listed as a site suitable for development and strongly supported as a site in the HELAA.</p> <p>The changes to the DEPZ and changes to policy have meant this site was taken out as an adopted site, but feel the need to highlight to the inspector and potentially to have my expert witness Dr Keith Pearce also alongside me to provide additional evidence regarding the DEPZ and what impact this site would have on the Burghfield AWE and also what impact the Burghfield AWE would have on future residents.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	<p>Site Selections and Reg 19 plan finalised and voted through for public consultation prior to finalisation of HELAA and full range of site assessments. Decision of members to move forward to consultation on Reg 19 Plan taken in the absence of knowledge of the range of site assessments/ options available to accommodate development.</p> <p>Public comments invited until 3 March, in the knowledge of proposed Full Council meeting the evening of 2 March to decide whether to abandon the consultation/ draft strategy. This will inevitably have impacted decisions taken on whether or not to spend time/ funds pursuing representations on the plan, leading to a flawed consultation process.</p> <p>Errors in evidence base contributing to flawed consultation process, with stakeholders unable to review/ comments on full assessment of the impact of the proposed development strategy/ site allocations</p>
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>The LPR does not allocate any small sites, less than 1ha, for general residential development in the Eastern Area. Rather, it provides for a 65 bed care home (RSA6) and 8 pitches (RSA24). The NPPF (para 69) emphasises that small and medium sites can make an important contribution to meeting the housing requirement of an area, and are often built out relatively quickly. The LPR should accommodate at least 10% of the housing requirement on sites no larger than 1ha. We submit that it would be sensible to take this approach in <i>each</i> of the three spatial areas, including the Eastern Area.</p> <p>Our client's site is located directly adjacent to the settlement boundary of Brimpton, is not in the AONB or at risk of flooding. Nor is it within the AWE DEPZ. It is available immediately and could provide small scale housing relatively quickly. Given the LPR's reliance on large strategic development locations which may take many years to gain planning permission, deliver necessary supporting infrastructure (such as schools) and become available for occupation, we submit that the Council should also allocate our client's site to boost delivery of small scale housing sites in the immediate short term.</p> <p><for map see attachment></p> <p>We propose our client's land as an additional site allocation in the Eastern Area. The land in which our client has an interest (see attachment) has not previously been submitted to, or assessed within the HELAA.</p> <p>This 0.65ha parcel of land is partially within the settlement boundary (in the southern portion of the site near Forge Cottage) but otherwise directly adjacent to the boundary. As seen in Figure 1 (on the right) the form of the settlement is such that the site is encompassed within the settlement, with existing residential development to the north, west, south and directly adjacent to the lower part of the site to its west.</p> <p>The Parish Council has previously expressed support for realignment of the settlement boundary to include this site, subject to public consultation and the 'right' development coming forward (further detail is provided below). As can be seen from the mapping in Figure 1, an adjustment to the settlement boundary to include this site (to allow for small scale infill development on this land) would be appropriate to the historic form of the settlement. The site is well contained (by residential development) and the settlement boundary would prevent and further development beyond the site into the countryside.</p> <p>Part of the site is within the Brimpton Conservation Area. A Heritage Impact Assessment has been prepared, to consider the heritage impacts of small scale housing on the site. The report concluded that such development would have a neutral impact on nearby listed buildings/ non designated heritage assets.</p> <p>The part of the site which is in the Conservation Area is assessed as having no special historical or architectural interest and in fact recommends its removal from the designated area. Development of the site would have a negligible adverse effect on the setting of the Conservation Area. The report is attached for your review and consideration. We would highlight, in particular, the comment at paragraph 9.4.15 of that report regarding the decision to include this open area at Brimpton Road in the Conservation Area. This suggests that the Conservation Area boundary in Brimpton includes some arbitrary/ marginal areas which were perhaps erroneously included in the boundary when moving from paper to digital mapping in the 1980s.</p> <p>The site is outside the AONB. The Landscape Character Assessment (Aug 2019) identifies the site as being within:</p> <ul style="list-style-type: none"> • National Landscape Character Area 129: Thames Basin Heaths • West Berks Landscape Classification: WH2: Greenham Woodland and Heathland Mosaic. This area is defined by gently undulating slopes which rise to Greenham and Crookham Common further west of the site. The eastern area of WH2, in which Brimpton is situated, is "distinguished by the presence of a mix of arable and pasture contained by a network of woodlands." It describes Brimpton as a more "nucleated village, focused around the junction of Brimpton Road, Brimpton Lane, Crookham Common Road and Wasing Road." The site is situated right at the centre of the village, at the 'nucleus', as it were. <p>Being so centrally located within the village, the site is in easy walking distance of the local primary school (Brimpton CoE). No allocations have been proposed in Brimpton, despite the presence of local facilities and services, and close proximity to urban areas for employment. This is based on the settlement hierarchy report and its significant focus on public transport (as opposed to active travel) which is discussed further below.</p> <p>From Brimpton, it is a short cycle ride to many employment locations/ local services and facilities, including:</p> <ul style="list-style-type: none"> • Midgham Station: 10 minute cycle ride (1.9 miles) • Thatcham Station: 15 min cycle ride (2.7 miles) • Reading: 10 min cycle to Midgham followed by 17 minute commute by rail to Reading. • Basingstoke: 10 minute (2.2 mile) cycle to Baughurst, then 25 min bus to Basingstoke Hospital/35 to centre/ railway station • Aldermaston: 13 mins cycle (2.2 miles) • Greenham Common: 10 min cycle (2.2 miles) • Newbury: 38 min cycle (7.2miles)

	<p>In the Eastern Spatial Area, no sites of less than 1ha have been proposed for allocation for general housing. The NPPF recognises the role that small sites can play in quick delivery of housing and requires that 10% of allocations be of small/ medium size. Given the LPR's reliance on large strategic development locations, we urge the Council to consider including this site within the settlement boundary and/ or allocating it for development in the LPR before submission to Independent Examination.</p> <p>Please refer to our comments on SP3 and the Settlement Hierarchy and also SP1 (Spatial Strategy) and the Settlement Boundary Review.</p> <p>In summary, the evidence base and early LPR work has shown that:</p> <ul style="list-style-type: none"> • There is some Parish Council support for realignment of the settlement boundary to include our client's site, subject to public consultation and a suitable development proposal. This feedback was provided as part of consultation to the Settlement Boundary review; • The parish Plan supports proposals for up to 10 additional houses in the village, particularly affordable housing or homes for downsizers; • The public supported a recent proposal for 4 new homes in the village, demonstrating a need for housing for families and lack of suitable options; • The HELAA demonstrates that the landscape could accommodate some infill development to the north of the site – a conclusion which must also rationally apply to our client's site. • Development on this site would amount to infill, based on the form and arrangement of the settlement. Brimpton Road features linear housing development opposite the site and to the north. This site could accommodate infill development along the road frontage in a manner which is respectful to the form and character of the settlement. <p>The only reason, it seems, for not allocating any additional housing in Brimpton, or altering the boundary to provide scope for infill, is its rating in the Settlement Hierarchy. Our representations on SP3 demonstrate that the site is accessible via active transport to a number of services, facilities and employment centres. The Settlement Hierarchy review is overly focused upon public transport rather than other sustainable modes of transport, such as active travel (cycling and walking). It also fails to take account of altered working patterns following the pandemic, with a large proportion of workers now working from home for part of the week, thereby reducing the need to travel/ commute to work.</p> <p>Attachments:</p> <ul style="list-style-type: none"> • maps • Heritage Impact Assessment
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Allocate land to the west of Brimpton Road, Brimpton, for small scale residential development. The site is not in the AONB or at risk of flooding and can be developed without adverse impact to heritage assets. Development could come forward as infill development continuing a gap in the building line north and south. This would deliver a small site less than 1ha in the Eastern area, where none is presently proposed. Rather than plan only delivers care home/ pitches on small sites in the Eastern Area.</p> <p><for map see attachment></p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where	

<p>practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>I have recently seen the local plan for Theale and surrounding areas.</p> <p>I believe this has previously been rejected for multiple reasons. And it should be again.</p> <p>Theale is NOT in a place to be having further dwellings built in it. Theale is already stretched to capacity and local services, ESPECIALLY the doctors surgery are overwhelmed. Unless the local services are going to be upgraded or made larger, Theale cannot sustain any further developments or dwellings. It is already impacting on the people, like myself, who have lived here for decades.</p> <p>I remember Theale 20 years ago. And it is nothing like what it is now. Theale used to have character and and wasn't built up. Now? Now you struggle to park, you can't get a doctors appointment (which may also be down to the nhs situation) and they've already had to build a larger primary school.</p> <p>Please, please, consider the current residents of Theale before deciding to build more homes which will further damage our village.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>

<p>Please give reasons for your answer</p>	<p><i>[See attachment 'Opus Works (Calcot Golf Club) Full LPR Rep' for full consultation response]</i></p> <p>We have reviewed the Local Plan Review (LPR) and we wish to submit our representations in response to policies and proposals, which impact upon the development plans of Bewley Homes PLC and Calcot Park Golf Club (CPGC). In the paragraphs below, we will identify the relevant policies and proposals before commenting on them either in support, or in the form of an objection, which we trust West Berkshire Council (the Council) as the Local Planning Authority (LPA) will give careful consideration before the next draft of the local plan is published for public review.</p> <p>Policy SP1 - Spatial Strategy</p> <p>This policy states that the overall approach to development will be based on three spatial areas:</p> <ul style="list-style-type: none"> • Newbury and Thatcham • Eastern Area • North Wessex Downs AONB <p>Calcot is within the Eastern Area, which is identified as a focus for housing development. CPGC is located on the eastern edge of Calcot/Tilehurst, within the greater Reading conurbation. Therefore, in accordance with policy SP1, it is a suitable and sustainable location for housing development.</p> <p>The identification that additional development is needed and come forward within settlement boundaries to meet identified housing need in the LPR is welcomed.</p> <p>Policy SP3 - Settlement Hierarchy</p> <p>This policy states that development in West Berkshire will comply with the spatial strategy set out in policy SP1. Development will be focused on the most sustainable settlements. The Urban Areas (including the Eastern Urban Area) will be the prime focus for housing and economic development, offering development potential through: regeneration of built-up areas; allocated sites in the LPR and Neighbourhood Plans; retention of settlement identity and necessary supporting infrastructure.</p> <p>In this case, we consider that land at CPGC is suitable for allocation in a development plan, as it lies within the settlement boundary of the most suitable and sustainable location for residential development, according to this policy.</p> <p>Policy SP7 - Design Principles</p> <p>This policy states that new development will strengthen a sense of place through high quality locally distinctive design and place shaping. It will make places better for people, taking opportunities available for conserving and enhancing the character, appearance and quality of an area and the way it functions.</p> <p>CPGC consists of 81 hectares (200 acres) of gently sloping land and woodland located within the settlement of Calcot, which is surrounded on all sides by the built-up area of Greater Reading. The golf club contains considerable areas of woodland and green infrastructure. A modest housing development for c.72 dwellings on c.5.8 hectares (14.3 acres) of land at the north-eastern edge of the golf club, see Appendix 1 for details of the proposed site location and potential site layout, will offer the opportunity to make good use of this valuable green infrastructure to create a verdant and attractive "landscape-led" scheme, which will conserve and enhance the existing landscape character and historic context of the site and its wider surroundings. The location of the site within the built-up area and on land in leisure</p>

use at present will offer unique opportunities to improve access to verdant, open areas and leisure facilities for new residents and existing ones. The health and well-being benefits of the proposal for the local population, will be significant.

Policy SP8 - Landscape Character

This policy states that landscape-led development which conserves and enhances the biodiversity and local distinctiveness of the landscape character of the district will be supported. With regard to development proposals, particular regard will be given to: valued features and qualities; sensitivity and capacity of area to change and ensuring that new development is appropriate in terms of location, scale and design to the context of the existing settlement form, pattern and character.

CPGC does not lie in a sensitive landscape location. The site is remote from the AONB to the west and it is surrounded on all 4 sides by urban development. It has been used historically as a practice range and more recently for accommodation of material dredged from CPGC's lake and swales. As stated above, the 81-hectare land holding contains substantial areas of woodland and Green Infrastructure (GI). The proposed development, of just 5.8 hectares, in the north-eastern corner of the GC, adjoining the existing built-up area, will be screened by dense areas of woodland on all sides. The sloping topography and the existence of significant woodland and GI, means that there are few long-distance views into the site and the development site makes a modest contribution to the landscape setting of the settlement and the surrounding area.

In this context, any planning application for development on the CPGC will be supported by a Landscape and Visual Impact Assessment (LVIA), which will demonstrate that proposed built form will not have a harmful impact on the existing settlement form, pattern and character and will come forward as part of a landscape-led scheme.

Furthermore, the proposed replacement clubhouse, which will be funded by the new residential development, will sit on the same footprint and will be surrounded by additional landscape planting and bunding, to ensure that it blends into the landscape and does not result in any additional harm over that attributable to current built form being done to the site and its surroundings, including the Grade II* Calcot Court. The new homes and clubhouse will provide significant economic, environmental and social benefits for the local community, whilst not harming the landscape character of the area and its surroundings.

Policy SP10 - Green Infrastructure

This

policy states that the council will maximise the potential for strengthening both local and strategic Green Infrastructure (GI) across the district. Development will protect and enhance existing GI assets, create additional GI which is integrated into the overall development and take opportunities to achieve multi-functionality by bringing GI functions together. A series of criteria are then provided to set out how to protect and optimise GI within the District.

CPGC is a land holding of 81 hectares (200 acres). Only 5.8 hectares (14.3 acres) is proposed for residential development in the north-eastern extremity of the land holding. There is considerable scope available to use parts of the remaining landholding to plant new trees and other GI to enhance and protect the verdant character and appearance of the local area. Other sites that the council has selected for development do not have the scope for GI improvements on this scale. Allocation of land at CPGC will ensure that significant GI improvements will be provided as part of a landscape-led scheme. The availability of so much land in the same ownership and adjoining the proposed development will offer opportunities to make a significant net gain in GI, which will be to the benefit of the local community. Land could also be used to improve GI provision to compensate for the allocation of other small development sites in the Eastern Area, where opportunities are limited on the allocated sites. Given the location of the GI, on CPGC, which is managed by a team of experienced green keepers, it will be possible to ensure that any new planting is maintained and properly managed over the long-term, which will ensure that the GI improvements are there to be enjoyed by the local community for many decades to come.

Policy SP11 - Biodiversity and Geodiversity

This policy states that development proposals will conserve and enhance biodiversity and/or geodiversity and will deliver net gain. Development proposals across the district will be expected to deliver 10% net gain for biodiversity either within the site boundary or as off-site compensation where appropriate.

On a landholding of 81 hectares, with only 5.8 hectares proposed for residential development, there will be considerable scope for the provision of biodiversity net gain. This will be available not only for the c.72 dwellings proposed by CPGC, but it could potentially be available for other smaller residential sites to utilise. To support the forthcoming planning application, a bio and geodiversity assessment will be undertaken to establish what measures should and could be taken to provide at least a 10% net gain. The results of surveys and recommendations by ecologist experts will form part of this process and ensure that the proposal will make a positive contribution to bio and geodiversity in the local area to the

benefit of the local community, both in visual and well-being terms. Such improvements will ensure that CPGC contributes positively the bio and geodiversity of the locality for the foreseeable future.

Policy SP14 - Sites allocated for residential development and mixed-use development in the eastern Area.

The policy lists a number of sites of varying sizes, which are proposed to be allocated for residential development.

Within Tilehurst only a 65 bedspace care home, equating to c.35 dwellings is allocated. As part of the HELAA, which helps to form the evidence base for the LPR, there is an identified need to build 175 dwellings over the next 15 years, yet there are no allocations for housing development proposed in the Tilehurst Neighbourhood Plan (TNP), which is at a relatively advanced stage.

It is considered that provision of c.72 dwellings at CPGC would help to meet identified local need and remove any requirement to impose housing numbers and allocations upon the TNP given that it covers the most sequentially preferable location for development in the District.

The 5.8 hectares of land at CPGC, is gently sloping with limited long distance views. It is heavily screened and fully enclosed by existing woodland and there are considerable opportunities available to provide a landscape-led scheme that will enhance and improve the visual amenity of the local area and at least 10% biodiversity net gain. Use of land owned by CPGC to enhance the natural environment within a sustainable location, as part of a modest development of c.72 dwellings will lead to considerable improvements to the amenities, wellness and mental health of both existing, and future, local residents.

In its current form, it is therefore considered that Policy SP14 has not allocated sufficient sites to help meet the District-wide shortfall of 1,809 dwellings identified in the Local Plan; this number having increased by 148 units since the earlier Reg 18 consultation.

Policy SP14 – Sites allocated for residential and mixed-use development in Eastern Areas is Objected to, because insufficient land is allocated to meet identified need. CPGC needs to be included in the list of larger sites (1ha or larger) for the allocation of c.72 dwellings.

Policy DM39 - Local Community Facilities

CPGC is a leisure-based business, located within the Eastern Area, adjacent to many homes and local residents who make use of its attractive open spaces to play golf and visit the facilities. The sport of golf is currently under a great deal of pressure. Player numbers are on a long-term downward trend and balance sheets around the world have been hit hard by Covid-19 related closures. Against this, it is important for the local community to have access to sports and recreation facilities, especially ones that provide opportunities for exercise in the open air, which is good for fitness, health and mental well-being. In this regard, it is noted that in supporting text to Policy DM39, paragraph 12.62 identifies 'Areas or places for community outdoor sport or recreation' within the definition of local community facilities.

CPGC is a leisure facility located in a highly accessible location. It is a business that supports 17 FTE jobs and it maintains c.81 hectares of attractive and maintained land, which would otherwise suffer from lack of stewardship. There are significant community, well-being and environmental benefits accruable from ensuring that the golf club is retained and encouraged to thrive into the future.

Policy DM39 provides support for new and expanded provision of local community facilities, subject to meeting a number of criteria relating to need, accessibility, design, engagement and use of spaces. The proposals at CPGC have been subject to lengthy and meaningful engagement and consideration to identify how to best respond to changing needs and demands in the golf industry and to deliver on inclusivity and diversity ambitions.

The new clubhouse will have much improved facilities for use by members and the general public. The enhanced facilities will create opportunities for greater training, work with schools and the local community. Significant landscape and biodiversity improvements will be possible; the golf club ownership of c.81 hectares of rural land offers tremendous scope for investment in the local area. It will not just be a case of allocating 5.8 hectares of land and getting c.72 dwellings in return. The benefits of the allocation of the proposed enabling development will be substantial and will ensure that the community gains considerable tangible benefits from the scheme over many years.

A scheme of c.72 dwellings is currently proposed, which has been subject to significant due diligence at pre-application stage and identified as a quantum that could provide both the enabling development desired and the delivery of affordable housing.

Therefore, should a lower quantum of housing be considered appropriate on-site further to discussions with the Council, it would need to be acknowledged that retention of long-term golf at CPGC is the

	<p>scheme driver and that there will be consequential reduction in the delivery of affordable housing; to be determined by Viability Assessment.</p> <p>The improvements to the clubhouse and course will help to attract new and varied membership, diversify income streams and ensure that the future of the golf club will be secure for decades to come. However, this will only be possible in these testing times, if an enabling development of c.72 dwellings on surplus land, which adjoins the existing settlement, is permitted in order to fund the redevelopment of the clubhouse and to provide capital to ensure the golf club is robust and can thrive into the future.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>As the site at CPGC is sustainably-located, well-screened, can provide substantial GI improvement and will enable the significant improvement and long-term retention of a well-recognised leisure and community facility, it is considered that Policy SP14 should the LPA consider the representations made in support of allocation of the land at CPGC for residential development to have merit, CPGC respectfully suggest the following policy wording:</p> <p>Proposed Policy RSA XXX – Land at Calcot Park Golf Course, Calcot</p> <p><i>This 5.8 hectare site lies within the north eastern perimeter of Calcot Park Golf Club, adjacent to the Tilehurst residential area. The site will deliver high quality, sustainable development that will:</i></p> <p>a) Provide for c.72 dwellings at a mass and density that reflects the character of the adjoining settlement; b) Respond positively to the special characteristics and sensitivities of the landscape to minimise any visual impacts; c) Respond positively to the surrounding heritage assets, particularly Grade II* Listed Building Calcot Court, to avoid harm to the significance of the Listed Building and its setting; d) Provide significant Green Infrastructure improvements in line with Local Plan Policy SP10; e) Avoid or mitigate adverse impacts on key species and habitats whilst ensuring at least 10% biodiversity net gain in line with Local Plan Policy SP11; f) Ensure adequate infrastructure is provided for sewage and surface water drainage; g) Ensure appropriate measures are put in place to mitigate impacts on the highway network; h) Improve the long-term viability of the golf course through enabling the redevelopment of the Calcot Park Golf Club clubhouse and other improvements to the Golf Course, this to be secured by S106. i) A Viability Report will be required to identify the level of affordable housing capable of being supported by the proposed, enabling residential development.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
<p>5. Independent Examination</p>	To enable the Local Plan to recognise the further assistance needed for underpin the long-term retention of leisure facilities and to underpin a robust mechanism to allow enabling development to come forward to help realise this, where appropriate.
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	Yes

6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>The following submissions are made on behalf of the above three landowners who own part of the land allocated under Policy HSA 16 in the Adopted West Berkshire Local Plan 2017. The land in question is identified as Policy HSA16 'Land to the rear of The Hollies Nursing Home, Reading Road and Land opposite 44, Lamden Way, Burghfield Common'. Phase One of the site has already been implemented for some 28 dwellings. The second phase, owned by the above landowners is proposed for 32 dwellings. The allocation of that site was the result of many years of promotion by the landowners and the examination of that land for housing through a lengthy development plan preparation process. The allocation was followed by the optioning of the land by a reputable local developer and the submission of a detailed planning application in early 2022 under ref: 22/00244/FULEXT.</p> <p>Between the adoption of the Local Plan in May 2017 and the submission of this planning application in February 2022 there was a material change to the planning policy context to this site by the extension of the Detailed Emergency Planning Zone (DEPZ) at AWE Burghfield to cover all of the settlement of Burghfield Common, including this allocation site. This change occurred in March 2020. In December 2020 the Council consulted on this Local Plan Review Emerging Draft which commenced in December 2020, nine months after the DEPZ had changed, yet the site was still proposed for allocation in that Draft Plan. It is assumed that the Council's Emergency Planning Officer, AWE personnel and the Office for Nuclear Regulation (ONR) were consulted on this Draft Plan and had no objection to the inclusion of this housing allocation at that time despite the site now clearly inside the revised DEPZ area. There was therefore no necessity to challenge the Draft Plan's provisions at that time as far as this allocation was concerned. It was assumed, reasonably, that the Council had taken the DEPZ changes into account and had determined that the allocation should be maintained because of its statutory status and that the site was capable of accommodating new housing without adversely affecting the ability of the Council to implement the Emergency Offsite Plan.</p> <p>During consideration of the planning application the Council's Emergency Planning Officer objected to the proposed development and the application was subsequently refused, essentially the principle issue being the site's location within the DEPZ. That decision is awaiting an appeal decision by way of a Public Local Inquiry at the time of writing.</p> <p>The purpose of these submissions is therefore twofold. Firstly, to secure the reinstatement of this Housing Allocation in this Local Plan Review; and second, to seek a revision to Proposed Policy SP4 'Atomic Weapons Establishment (AWE) Aldermaston and Atomic Weapons Establishment (AWE) Burghfield'.</p> <p>The case for reinstatement of Housing Allocation HSA16 in this Local Plan Review.</p> <p>The only reason for proposing the removal of this housing allocation is because of its recent inclusion into the widened DEPZ at AWE Burghfield. The Council undertook extensive assessment of all potential housing sites in its SHELAA prior to proposing and confirming this housing allocation throughout all stages of the preparation and consultation of its current Local Plan. Additionally, there was very little local objection to the site's allocation for housing. Indeed, it was one of two sites in Burghfield Common recommended by the Burghfield Parish Council for allocation. The other is at Pond House Farm on the other side of the valley to this site, which secured an outline planning consent before the DEPZ was extended, and is currently under construction. During the consideration of planning application ref: 22/00244/FULEXT the site was the subject of full and detailed technical assessments to address its suitability for the housing scheme proposed. The only substantial planning objection was its inclusion within the recently extended DEPZ. The site had been the subject of detailed examination through a whole Local Plan process, including Examination in Public, and also via a detailed planning application.</p> <p>If the DEPZ objection is to be applied consistently, as it has been to this planning application, then it effectively sterilises Burghfield Common to all new housing development. The Settlement Hierarchy identifies Burghfield Common as one of only six Rural Service Centres across the whole of West Berkshire District which are sustainable in terms of the services and facilities provided within them and which are therefore appropriate to accommodate a reasonable level of new development appropriate to their character and function. This means that any new development in future would have to be met by the remaining three Rural Service Centres in the Eastern Policy Area i.e. Mortimer, Pangbourne and Theale, each of which is arguably already more constrained to new development than Burghfield Common and where appropriate development sites are therefore harder to identify. This is not sensible planning since the Policy's effective sterilization of Burghfield Common to new development cannot reasonably be justified when weighed against the proper planning requirements of the area.</p> <p>As matters are now proposed either the Council:</p> <p>A) Continues to apply the policy of no further housing development at Burghfield Common, contrary to good and sustainable planning; or</p> <p>B) This Local Plan Review addresses properly the issue of Proposed Policy SP4 and amends that Policy to allow Burghfield Common to accommodate the levels of sustainable housing development which it is</p>

	<p>capable of accommodating and can and should support, but in a manner that meets the safeguarding needs of AWE and ONR. I set out below a revision to Proposed Policy SP4 which meets both requirements.</p> <p>In conclusion, Proposed Policy SP4 and its predecessors are unreasonable and open to inconsistent application, to the detriment of the policy itself and good planning in general. The policy wording is too constraining, preventing new development in locations which are entirely appropriate; and unreasonably constraining fully sustainable settlements such as Burghfield Common from accommodating their share of new housing growth. Housing Allocation HSA16 is an example of such an appropriate location. Half of it has already been developed, it is allocated in a statutory Local Plan and its development will not adversely impact on the ability of the Council to implement the Emergency Offsite Plan. The allocation should properly be reinstated as a Housing Allocation in this Local Plan Review. Proposed Policy SP4 should be re-worded as set out above.</p> <p>I would be grateful if you would take these comments into account in your further Local Plan Update preparations. If any additional information of clarification is required please do not hesitate to contact the writer.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	<p>These representations have been prepared by Pro Vision on behalf of our client T A Fisher & Sons Ltd in response to West Berkshire Council's consultation on its Local Plan Review 2022-2039: Proposed Submission.</p> <p>Our client welcomes the opportunity to be involved in the preparation of the Local Plan Review and it is within this context that they wish to make representations to the draft Local Plan.</p> <p>Our client has an option on Land at West End Road, Mortimer (HELAA ref. SM2; SHLAA ref. MOR005), that has been promoted for development. The landowner, Englefield Estate, has endorsed the submission of these representations.</p> <p>Our client's land interest has not been allocated for development in the draft Local Plan. This is due to Policy SP14 of the draft Local Plan not allocating additional housing to the village beyond that already</p>

accommodated in the current Stratfield Mortimer Neighbourhood Development Plan (NDP) (June 2017), which extends until 2026.

These representations therefore respond to Policy SP14 regarding the absence of a housing allocation to Stratfield Mortimer beyond 2026. We consider that it is necessary for the Local Plan Review to allocate additional housing to the village, which can be accommodated through a NDP Review, up to the end of the Plan-period in 2037.

In this regard, the land at West End Road, Mortimer, is suitable, available and achievable for housing development, as well as being deliverable in full within the next five years (or later in the plan period to meet locals needs after 2026). The Site is well located close to existing facilities and housing.

The Site offers the potential for a sustainable and logical residential development of approximately 47 dwellings, alongside associated access and open space, in line with the Council's strategy for growth and settlement hierarchy. The Site Promotion Document provided in Appendix A of these representations is re-submitted in support of the development opportunity.

T A Fisher is a well-respected local house builder with a long association with Mortimer. The Council will be aware that T A Fisher is currently building out the 110 units on the MOR006 site (Tower Gardens). T A Fisher worked collaboratively with Stratfield Mortimer Parish Council and the Neighbourhood Plan during the preparation of the Adopted Neighbourhood Plan and has maintained a positive working relationship with the Parish Council during the planning application and ongoing construction phases.

Our client wishes to work collaboratively with the District and Parish Council with the aim of securing the sustainable development of the site – through the NDP process – following an allocation of additional housing to the village within the Local Plan Review. These representations therefore respond to the draft Local Plan and its evidence base with reference to the need to allocate additional housing to Stratfield Mortimer, alongside the wider matters identified within the Document, building upon the information previously submitted.

These representations have been prepared in recognition of prevailing planning policy and guidance, particularly the National Planning Policy Framework (NPPF) (July 2021) and Planning Practice Guidance (PPG).

Whilst, at this stage, we consider that the Local Plan Review is unsound, we have provided some recommendations to ensure that the Plan is made more robust.

Overview

Policy SP14 of the draft Local Plan details the sites that are allocated for residential development in the Eastern Spatial Area.

This includes an allocation for 110 dwellings in the Stratfield Mortimer Designated Neighbourhood Area up to 2026.

This is accommodated in Policy RS5 of the Stratfield Mortimer Neighbourhood Development Plan (NDP) (June 2017), which allocates the Land to the South of St John's Church of England Infant School (SHLAA ref. MOR006) for 110 dwellings. This land is also owned by our client, and is currently being built out following the grant of planning permission.

At present, Policy SP14 fails to allocate additional housing to Stratfield Mortimer beyond that already accommodated in the current NDP (Policy RS5 for 110 dwellings) up to 2026.

Furthermore, Policy SP14 fails to recognise that as the draft Local Plan extends to 2039, additional housing should be allocated at Stratfield Mortimer beyond 2026, in line with the spatial strategy and settlement hierarchy and in accordance with the NPPF, within the remaining 13 years of the Plan-period.

These representations therefore respond to Policy SP14 regarding the absence of an allocation of new housing to Stratfield Mortimer beyond 2026. We consider that the Local Plan Review should allocate additional housing to the village, as it is a sustainable location suitable for growth, to be accommodated through a NDP Review.

Neighbourhood Plan Review

The Stratfield Mortimer NDP was formally made in June 2017. It is already therefore over five years old.

Whilst the PPG (footnote 1) notes that *"There is no timeframe within which neighbourhood plans are required to be reviewed or updated."* the PPG (footnote 2) also outlines the value of reviewing / updating a NDP alongside the review / update of strategic policies. It notes that:

"When strategic housing policies are being updated, neighbourhood planning bodies may wish to consider whether it is an appropriate time to review and update their neighbourhood plan as well. This should be in light of the local planning authority's reasons for updating, and any up-to-date evidence that has become available which may affect the continuing relevance of the policies set out in the neighbourhood plan."

Page 17 of the NDP sets out that *"Any future policy development or significant development which affects the parish will be subject to an update of this NDP involving community consultation."*

The Stratfield Mortimer Neighbourhood Plan steering group website sets out their intentions for *"a wider-reaching longer-term revision to the Plan, to reflect latest national policies and community priorities. This new Plan version is expected to be approved by Autumn 2024 and valid until 2039."*

The NDP and Local Plan Review would therefore be aligned and based on the same Plan-period as the Local Plan Review i.e. end date of 2039.

Future Growth in the Neighbourhood Area

In light of the above, it is clear that Policy SP14 of the draft Local Plan should recognise the potential growth that can be accommodated in Stratfield Mortimer throughout the whole Plan-period i.e. beyond 2026, up to 2039. This can be achieved through a review of the Stratfield Mortimer NDP.

However, the draft Local Plan fails to make such provision. This fails to accord with paragraph 66 of the NPPF, which explains that:

*“Strategic policy-making authorities should establish a housing requirement figure for their whole area, which shows the extent to which their identified housing need (and any needs that cannot be met within neighbouring areas) can be met over the plan period. **Within this overall requirement, strategic policies should also set out a housing requirement for designated neighbourhood areas which reflects the overall strategy for the pattern and scale of development and any relevant allocations.** Once the strategic policies have been adopted, these figures should not need retesting at the neighbourhood plan examination, unless there has been a significant change in circumstances that affects the requirement (our emphasis).”*

This requirement is underlined by the PPG (footnote 3), which notes that:

*“Housing requirement figures for neighbourhood plan areas are not binding as neighbourhood planning groups are not required to plan for housing. However, **there is an expectation that housing requirement figures [for Designated Neighbourhood Areas] will be set in strategic policies**, or an indicative figure provided on request (our emphasis).”*

Policy SP15 of the draft Local Plan confirms that new housing has been allocated to other Designated Neighbourhood Areas. This is explained in paragraph 6.14 of the draft Local Plan, which notes that:

“A number of Neighbourhood Plans are in preparation which will allocate further sites for housing development. It is proposed that a further 80 dwellings will be allocated by local communities through their NDPs. The figures for individual neighbourhood areas are set out in Policies SP13-15.”

The Designated Neighbourhood Areas that have been allocated housing in policy SP15 are Hungerford (55 dwellings) and Lambourn (25 dwellings).

Paragraph 6.38 of the draft Local Plan sets out its reasons for not allocating additional housing to Mortimer. It sets out that:

*“110 dwellings are already allocated up to 2026 in the Stratfield Mortimer Neighbourhood Plan. The Parish of Stratfield Mortimer contains the village of Mortimer which is identified as a Service Village within the settlement hierarchy meaning that it has a limited range of services and has some limited development potential. **Given the outstanding dwellings still to deliver, no additional allocations in the plan period are proposed** (our emphasis).”*

This is incorrect. Mortimer is a Rural Service Centre – one tier above that of a Service Village. Indeed Policy SP3 identifies Mortimer as a Rural Service Village and states *“These larger rural settlements offer development potential appropriate to the character and function of the settlement through: ... Non-strategic sites allocated for housing and economic development through other policies in the LPR or neighbourhood plans;”*. Clearly therefore, as a Rural Service village, it has the services and facilities to support additional development and indeed should be a focus for growth. 2.19 This Council’s approach to not allocate housing to Mortimer fails to recognise the growth that a sustainable village such as Mortimer could and should accommodate over the remainder of the Plan-period, in addition to that already planned for. This is a significant missed opportunity. Such an approach does not accord with the spatial strategy and settlement hierarchy set out in Policies SP1 and SP3 of the draft Local Plan respectively.

Regarding the other Designated Neighbourhood Areas that have been allocated additional housing over the Plan-period (Hungerford and Lambourn), the Site Selection Background Paper4 and draft Local Plan simply explains that each area is in the process of preparing a NDP and will include residential allocation(s). There is no reference to the potential for / opportunities provided by allocating housing to areas with existing NDPs that could be reviewed and deliver further sustainable development within the Plan-period (up to 2039).

Given the sustainability of Stratfield Mortimer as a location for growth, it is inappropriate for the village not to receive an additional housing requirement simply because it has already allocated some land for housing. The Stratfield Mortimer NDP is clear that it covers the period up until 2026. It is therefore necessary to review the potential for the village to accommodate additional growth over the additional thirteen years provided by the Local Plan Review.

We recommend that discussions take place with the Parish Council regarding this matter to ensure that the Local Plan is capable of being found sound in line with paragraph 35 of the NPPF.

Land at West End, Mortimer

Appendix A of these representations contains the Site Promotion Document previously submitted to the Council in support of the land owned by our client at West End Road, Mortimer (HELAA ref. SM2; SHLAA ref. MOR005). This sets out, in detail, the suitability of the site for development.

In summary, the site is suitably located to the west of Mortimer and offers the potential for a sustainable and logical residential development of approximately 47 dwellings, alongside associated development, in line with the Council’s strategy for growth and the settlement hierarchy outlined in policies SP1 and SP3.

For the reasons explained in Section 2 of these representations, we consider that the Local Plan Review should allocate additional housing to Stratfield Mortimer, beyond that currently planned up to 2026, as outlined in the Stratfield Mortimer NDP.

It is acknowledged that the Local Plan itself will not allocate specific sites for housing in Designated Neighbourhood Areas, as this is to be addressed through the NDP process. Nonetheless, the submitted Site Promotion Document reiterates the sustainability of Stratfield Mortimer, while confirming that land owned by our client at West End Road, Mortimer is suitable, available and achievable for housing development, as well as being deliverable in full within the next five years. It is well located to assist with meeting the village’s housing needs.

In summary, while not exhaustive, key reasons as to why the site is a suitable location for development include the following:

- The site is adjacent to the settlement of Mortimer, which is identified as a Rural Service Centre in the settlement hierarchy.

- Rural Service Centres have a range of services and reasonable public transport provision and provide opportunities to strengthen the role in meeting the requirements of surrounding communities. The site is within easy walking distance of the village centre and the range of services and facilities that it provides.
- There is a train station to the east of Mortimer which provides connections to Reading and Basingstoke. The village is also served by a regular bus service to Tadley, Burghfield, Mortimer rail station and Reading.
- The northern, eastern, and southern boundaries of the site adjoin the settlement boundary.
- The site represents a logical 'rounding off' opportunity for the village. Through the use of an appropriate design and density, this will ensure the scheme remains in-keeping with the village character.
- The site is under option to a Local Housebuilder, T A Fisher who can not only ensure the deliverability of the site but can also ensure a high standard of design as achieved elsewhere on their sites in this area.
- Existing mature hedgerows bound most of the site and would largely be retained.
- The site is relatively flat.
- The site can accommodate approximately 47 dwellings, including affordable housing.
- The site can deliver a mix of 1, 2, 3, 4- and 5-bedroom homes.
- There is the potential to provide a Local Area for Play (LAP) on site.
- A safe and suitable access can be achieved.
- The site is not within the North Wessex Downs Area of Outstanding Natural Beauty (AONB) and would not harm its setting.

Considering the above, it is clear that the site is a suitable and sustainable location for residential development that has the potential to provide a wide range of benefits.

Furthermore, T A Fisher is currently building out the development of 110 units in the village. Providing additional housing beyond the 110 units will contribute to maintaining the vitality of this community beyond the current plan period. T A Fisher wish to continue working collaboratively with the Parish Council and local community to deliver additional housing within the village to meet needs. As a local house builder, and with an existing strong connection to the Parish, our clients have a clear understanding of local need and demand including the type and style of properties that the Parish Council wish to see and the local market wants to buy.

Conclusion

These representations have been prepared by Pro Vision on behalf of our client T A Fisher & Sons Ltd in response to West Berkshire Council's consultation on its Local Plan Review 2022-2039: Proposed Submission.

Our client welcomes the opportunity to be involved in the preparation of the Local Plan Review and it is within this context that they wish to make representations to the draft Local Plan.

Our client has an option on the land at West End Road, Mortimer (HELAA ref. SM2; SHLAA ref. MOR005) and is promoting this land for development with the consent of the landowner, Englefield Estate.

Our client's land has not been allocated for development in the draft Local Plan. This is due to Policy SP14 of the draft Local Plan not allocating additional housing to the village beyond that already accommodated in the current Stratfield Mortimer Neighbourhood Development Plan (NDP) (June 2017), which extends until 2026.

These representations therefore respond to Policy SP14 regarding the absence of a housing allocation to Stratfield Mortimer beyond 2026. We consider that it is necessary for the Local Plan Review to allocate additional housing to the village, which can be accommodated through a NDP Review, up to the end of the Plan-period in 2039.

In this regard, the land owned by our client at West End Road, Mortimer, is suitable, available and achievable for housing development, as well as being deliverable in full within the next five years. It is well located to assist with meeting the village's housing needs.

The site offers the potential for a sustainable and logical residential development of approximately 47 dwellings, alongside associated development, in line with the Council's strategy for growth and settlement hierarchy. The Site Promotion Document provided in Appendix A of these representations is re-submitted in support of the development opportunity.

We consider our client better placed than most to bring forward development in Mortimer given their existing and established working relationship with the Parish and community. Our client wishes to work collaboratively with the District and Parish Council with the aim of securing the sustainable development of the site – through the NDP process – following an allocation of additional housing to the village within the Local Plan Review. These representations therefore respond to the draft Local Plan and its evidence base with reference to the need to allocate additional housing to Stratfield Mortimer, alongside the wider matters identified within the Document, building upon the information previously submitted.

In summary, our main comments in relation to the draft Local Plan are as follows:

- The need to recognise the role that Stratfield Mortimer can play beyond 2026, given that it is identified as a Rural Service Village that is suitable for growth in line with the Council's spatial strategy and settlement hierarchy.
- The need to allocate additional housing to Stratfield Mortimer beyond that already accommodated in the current Stratfield Mortimer NDP, which extends until 2026. This can be accommodated through a NDP Review, up to the end of the Plan-period in 2039.
- The need for the Council to engage with Stratfield Mortimer Parish Council regarding its aspirations for the future of the village.
- The need to review the level of housing that the Council is looking to accommodate to ensure that it provides a suitable buffer to allow flexibility to allow housing targets to be met, assists with addressing the pressing need for affordable housing in the District, as well as the additional

	<p>economic, social and environmental benefits associated with a higher level of growth, alongside the potential need to assist neighbouring authorities with meeting any of their unmet housing needs.</p> <ul style="list-style-type: none"> • The need to review the approach to housing delivery as it is overly reliant upon two complex, large sites (Sandleford Park and North East Thatcham), windfalls and existing planning commitments to deliver a large proportion of the District's housing need. • The need for additional housing allocations to ensure that planning decisions remain Plan-led throughout the whole Plan-period, there is sufficient flexibility in the Council's housing supply and the Plan is deliverable. • Confirmation that land at West End Road, Mortimer is suitable, available and achievable for housing development, as well as being deliverable in full within the next five years. • The need for minor amendments to some of the development management policies/matters within the draft Local Plan. • Compliance with national planning policy and guidance. <p>Whilst, at this stage, we consider that the Local Plan Review is unsound, we have provided some recommendations to ensure that the Plan is made more robust.</p> <p>Attachments:</p> <ul style="list-style-type: none"> • Full Rep (inc. footnotes) • Appendix 1 - Site Promotion document

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	We note that this section describes how 513-538 dwellings per annum will be provided from existing planned developments, windfall within settlement boundaries, the defined sites and allocations within named neighbourhood plans. Whilst we understand these numbers are not a limit, it is good to see that no further development is necessary outside settlement boundaries to meet the anticipated housing need and that the plan delivers the anticipated need. It is also reassuring to see that windfall sites of 10 units or more are not included in the calculation of future supply, so there is no need for large-scale development within settlement boundaries.

<p>Please give reasons for your answer</p>	<p>In response to the scope of the Regulation 18 Consultation we commented that we did not agree with the Council's approach to housing delivery, on the basis that the Local Plan Review did not include any additional site allocations in Tilehurst. The Regulation 19 Draft Local Plan does not include any additional site allocations under this Policy and therefore we maintain our objection to the Council's approach.</p> <p>The Council recognises the "close functional relationship" between the urban area of Tilehurst and Reading (as stated at paragraph 4.14 of the Draft Local Plan). As such, the development at Hall Place Farm represents a highly appropriate location to provide residential development within the context of the wider housing market area.</p> <p>The Council should consider the most sustainable areas to ensure that the contribution they can make to housing delivery is fully optimised. Hall Place Farm on the edge of Tilehurst represents an appropriate location for growth on a site which is deliverable within the short term. The site is well-related to existing infrastructure and services including public transport and schools. Please refer to the Vision Document submitted with these representations for further details.</p>

Land at Hall Place Farm (TIL18) was ruled out through the site selection process on the basis that “development would be inappropriate in the context of the existing settlement form, pattern and character of the landscape”.

This is an incorrect assessment of the site and relationship to the settlement/wider landscape. As set out in the accompanying Landscape and Visual Appraisal for Land at Hall Place Farm, the Site not only immediately adjoins the existing western settlement boundary of Reading, but is physically and visually separated from the wider open countryside to the north-west and west of the Site. This is by the combination of the existing topography and the containment provided by the substantial woodland and vegetation to the west of the Site, such that the Site is orientated to and well related to the existing settlement of Reading, rather than to that the open or wider countryside.

Furthermore, as a consequence of the above, the Site is physically, visually and functionally related to the existing residential area of Tilehurst on the western edge of the settlement of Reading. Set within the existing residential development to the north and south the Site, provides the opportunity for the continuing rounding off of the settlement edge of Reading.

It is inappropriate for the Council to discount sites purely on basis of AONB without detailed landscape consideration. West Berkshire is dominated by AONB (74% of the district) which leads to large swathes of urban areas directly abutting the AONB. As a result, some of the most sustainable locations for small and medium scale development, well related to existing services and facilities are within the AONB. This is the case with Tilehurst as this part of the Eastern Urban Area directly abuts the AONB. Consideration of development opportunities in these areas should be based on sound landscape principles.

The Site should be included within the settlement boundary and allocated for development for the following reasons:

- It is visually well contained, and whilst on rising ground is not highly visible, nor located on an exposed ridge, landform or open slope.
- It is well contained by boundary vegetation and is developed in part, and is therefore not an open undeveloped parcel.
- It is not a recreational or amenity open space which extends into the countryside.
- Existing woodland and tree belts on the western edge of the Site would form a natural western boundary to the settlement, and already assist in screening views of the western edge of Reading from the wider countryside
- It immediately adjoins the western settlement boundary of Reading and is set within the context of existing residential areas to the immediate north, north-east, east, south-east and south, and is therefore not an isolated area of potential development and is not physically or visually detached from the settlement of Reading.
- Whilst the Site comprises areas of horse paddocks, these are physically and visually enclosed by the immediately surrounding woodland and vegetation, such that they do not visually relate to the open countryside, but more to that of the adjoining settlement edge of Reading.
- It does not form an important gap between developed areas in fragmented settlements.

On this basis, the site presents an opportunity for development which is consistent with the existing settlement form and, could be successfully and sympathetically accommodated within the landscape.

Whilst we acknowledge that some of these documents are dated 2018 and, as such, past their typical lifespan for the purpose of a planning application, the baseline conditions on site and reflected in the report remain unaltered. As such, we consider that these continue to provide a helpful and informative baseline to relevant technical considerations. Should the Council wish to explore the deliverability of the site in further detail, we would be pleased to update these reports.

Our consultation response follows up on our comments to the Council's Regulation 18 consultation undertaken in February 2021. Whilst Land at Hall Place Farm has not been allocated in the regulation 19 Draft Local Plan Review, we believe that there is merit in re-emphasising the benefits of the site and restating previous points raised in our previous consultation.

As emphasised within these representations, our client's site, Land at Hall Place Farm, is deliverable within the short to medium term and offers a sustainable location for the delivery of up to 80 homes. The documentation which accompanies these representations demonstrates that the proposed development can be successfully accommodated and is able to address all relevant constraints.

It is noted that the Council held an Extraordinary Meeting on 2nd March to decide whether they proceed or withdraw the current consultation. The related agenda item itself describes the current Local Plan consultation as containing serious 'omissions and ambiguities' which make the plan unsound. The flaws appear to principally relate to the northeast Thatcham allocation and how processes were followed including communication of key information to Council Members. The housing number relevant to this allocation is also in doubt. The ultimate vote resulted in the motion being lost and the Plan consultation to continuing. These important matters of soundness and related procedural matters will need to be addressed prior to the submission of the plan for examination. We reserve our position with respect to

	making further representations on this matter at any subsequent consultation or at the Examination stage or at any further.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	Based on the comments above, we request the following: - The Council to reconsider the overreliance on larger sites through the allocation of more small / medium sites to ensure a consistent delivery of homes. The above will ensure that this approach is 'effective', 'justified' and 'consistent with national policy.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	We would welcome the opportunity to be notified of the progress of the Local Plan Review and to participate in the examination hearing session.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>1. Do you consider the Local Plan Review is legally compliant? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>HELAA Appendix 4 - It is not clear where or how the figure of 138 dwellings has been generated. The developer has submitted multiple unsuccessful planning applications over many years, the latest being for 265 dwellings, revised to 165. This was refused at committee in April 2022 and the decision was not appealed. It is noted that Stage 2a Development Potential states "Up to 138 dwellings but known issues exist which are likely to decrease this number". This statement has not been carried into Appendix 8b (below). Additional important details that contribute to rejection of this site from the Plan have also not been transferred to the SA/SEA. Some examples are detailed below.</p> <p>Local Green Space Designation (Stage 2b Suitability): it should be noted that part of the land has been identified as being suitable for LGS designation in the Tilehurst NDP which recently completed Regulation 14 Consultation.</p> <p>TIL19 *New Site* Calcot Park Golf Club, Calcot, Reading.</p> <p>This site has been added to the HELAA site assessment. Tilehurst Parish Council has no record of being consulted on the inclusion.</p> <p>The site is inside the settlement boundary so it is not clear why it is assessed here. Its inclusion is making an already complex Planning Process even more incomprehensible and concerning to local residents, particularly when they see references to potential development of 130 houses or up to 335 flats. The "Availability" determination for this site has multiple "unknowns"- legal issues, timeframe for bringing forward for development, potential timeframe for development, and whether a developer/housebuilder is involved. Since the site promoter has been sufficiently involved to indicate a number of dwellings it seems odd none of these other factors are known yet.</p>

For clarity it should be noted again that the Local Plan Review clearly defines how expected housing need will be met through strategic site allocations outside the settlement boundary, allocations from named NDPs and small scale (less than 10 units) windfall inside the settlement boundary. Windfall development on this scale within the settlement boundary will not be required to meet the anticipated need.

Appendix 8b – SA/SEA of New Residential Site Allocation Options

TIL14 Pincents Lane, Tilehurst.

P.31 States “Parish/Town Council: No comments”

This council is not aware of any request for comment on this document or the revised HELAA.

Whilst this Council agrees with the decision not to include this site in the updated Plan, it feels the sound planning reasons behind this decision are not adequately explained in this document.

Numerous important points from the updated HELAA site assessments have been poorly summarized or omitted altogether from the summary tables.

For example, under “Air Quality, Pollution & Contamination” (Stage 2b Suitability) the HELAA Site Assessment states-

“The site is close to the M4 and A4.

Significant worsening of nitrogen dioxide and particulate matter. Medium risk of contamination.

Medium risk to future occupants from nearby commercial uses. Medium risk to neighbours”

Yet in the summary table of this document, it merely states “The site is unlikely to impact on air quality”. The HELAA wording is relegated to a footnote and does not seem to have been taken into account in the summary.

The HELAA Site Assessment notes- “The site will generate circa 828 vehicle movements per day with circa 83 during peak hours. There is much concern regarding the impact along Pincents Lane and along the A4.”

No reference is made to this in the summary table of this document under “To promote and maximise opportunities for all forms of safe and sustainable transport”, except to note “Locally there are significantly concerns regarding access to the site.” It is not clear why this text is under the heading “mitigation/enhancement”.

It is concerning to local residents familiar with the history of this site to see the words “At the time planning permission is sought for development at this site...”. This implies a planning application is expected despite the numerous failed previous attempts and this site’s rejection as not developable in the proposed Local Plan Review.

<p>Please give reasons for your answer</p>	<p>This consultation response has been prepared by Fisher German on behalf of our clients Mr M Musgrave and Mr W Begley in respect of their land adjacent to Oxford Road, Chieveley, as illustrated in the attached.</p> <p>The land, which extend to circa 6.58ha, is located to the east of Chieveley. The site is defined by residential development and Graces Lane to the south, Oxford Road to the east, residential development and East Lane to the north and a field to the west. The site benefits from mature boundary planting and forms a logical infill location close to the centre of Chieveley.</p> <p>These representations follow the order of the policies within the Submission Plan, wherein we have not commented we have no specific comments at this stage. If you have any questions regarding these representations, please contact the author.</p> <p><i>Extract of response relevant to consultation point:</i></p> <p>We welcome and support the Council's acknowledgement that Chieveley should receive residential allocations. This will assist to ensure its long-term vitality and vibrancy by meeting local housing needs. Whilst within the AONB, high quality new development which fits with existing settlements is considered to have a limited impact on this wider designation. The failure to deliver sufficient housing will however have very real impacts on the day to day lives of residents, forcing young people away due to rising house prices and lack of suitable available homes. Populations in rural areas will likely age, trends which can be seen locally and nationally, and average house occupancy will lower as children grow up and move away. This lowering and ageing of the rural population will have repercussions on the ability of services and facilities to stay open, which will lead to a gradual decline of sustainability. Chieveley has a high level of service provision, as demonstrated by the Settlement Audit, and this is something which must be supported by commensurate new housing, ensuring the vitality of the community.</p> <p>Whilst we recognise the Council has allocated a site in Chieveley, for the reasons set out in these representations we consider there to be significant merit in additional allocations in Chieveley, as 15 dwellings alone is clearly insufficient having regard for the high level of housing need, particularly affordable. As such we consider the Council should positively consider our client's land for allocation. Whilst the entirety of the site is considered available, a smaller section of the site can be selected. The larger nature of the site provides for significant opportunities for associated landscaping, amenity space and biodiversity net gains, whilst contributing to the overall attractiveness and value of the AONB.</p> <p>In respect of our client's site, the Council's stage 1 sieving document concludes: "<i>Development would result in harm to the AONB, and would be inappropriate in the context of the existing settlement form and pattern.</i>" Highways raised concerns about the lack of pedestrian route into Chieveley, and difficulties in providing one.</p> <p>Linear development similar to that allocated by the Draft Local Plan, on Graces Lane and/or East Lane would have no more impact in terms of harm to the AONB than the preferred allocation, and arguably even less so when having regard for the potential harm to historic designated assets associated with the current allocation's location. Linear development would also not be inappropriate in terms of existing settlement form and pattern, it would be entirely in accordance with the prevailing settlement form, which is frontage development onto the existing road network. Whilst the highways concern is noted, it is clearly not a demonstrable issue for existing residents, and it would equally be applicable to the draft allocation, so cannot reasonably form a reason for exclusion.</p> <p>Development on our client's site would have a highly limited impact on the historic core of Chieveley, unlike the draft allocation, by virtue of being located away from the historic core of the settlement, its Conservation Area and Listed Buildings. Development here would also not impact on highways, as on street parking is less of an issue here, and there isn't the pressure for parking from the services and facilities in the village centre.</p> <p>Whilst there would need to be some removal of hedgerow, it is considered the ecological impact would be far less than the draft allocation. Particularly so on land north of Graces Lane, as access could be gained from east of the public right of way, where there is only low-level scrub. This would have a significantly less impact than that proposed by the draft allocation. The removal of this vegetation is considered to have a limited impact on settlement character, unlike the removal of the mature vegetation on the draft allocation, which will have more significant impacts.</p> <p>On the basis of the above, it is considered that there is compelling justification to allocate our client's land to provide significant local benefits. We do not consider sufficient justification has been provided as to why the Council have considered a smaller section of the draft allocation, and seemingly not any omission sites. As set out in previous representations and submissions, the site provided is just our client's land in its totality, but we are entirely content with a smaller parcel being allocated if preferable. This approach is prejudicial to those landowners whose sites have been excluded early, as the approach taken has not been consistent. Clearly, we argue if that approach is adopted in respect of our client's land, there are two opportunities to allocate land (linear development along Graces and East Lane) which are commensurate to the Council's preferred allocation, for the reasons set out above.</p> <p>We also consider that land under our client's control can be allocated to assist and deliver any shortfall of housing land supply, particularly to assist in meeting any needs arising in respect of the Council's preferred allocations, particularly the strategic allocations. Despite being in the AONB, Chieveley is a sustainable settlement which can deliver a higher quantum of growth than is currently proposed, without</p>

	causing any undue harm to the AONB. Having regard for the more acute housing needs in this area, particularly affordable, the benefits associated with this delivery would be significant. <i>For full response please see attachment.</i>

<p>Please give reasons for your answer</p>	<p>New Homes considers that this policy should be revised to account for the opportunities to release land to enable delivery of housing in the early years of the Plan, particularly within the sustainable settlement of Hungerford.</p> <p>Site Specific Representations - Land at Smitham Bridge Road & Marsh Lane</p> <p>This section addresses the promotion of the site at land at Smitham Bridge Road (housing) and Marsh Lane (allotments). The site has been promoted through the emerging Hungerford Neighbourhood Plan (HUN7 & HUN9) (Appendix C).</p> <p>The masterplan (Appendix B) has been informed by Donnington New Homes' technical team and proposes housing on land at Smitham Bridge Road and allotments at Marsh Lane. The proposed density is reflective of the local area and would provide approximately 34 homes, including affordable housing, making a valuable contribution to the housing requirement, in a sustainable location.</p> <p>There are no environmental constraints on the site and its development would allow the early delivery of housing in the Plan Period.</p> <p>Whilst Donnington New Homes recognises that the allocation of sites in Hungerford is to be addressed through the emerging Neighbourhood Plan, the purpose of this section is to illustrate that in increasing the housing provision across the District, there are suitable, available and achievable sites (not already allocated) that could deliver housing in the early years of the Plan period, in a sustainable manner and in accordance with the spatial strategy.</p> <p>Attachments:</p> <ul style="list-style-type: none"> • Appendix B - Illustrative Masterplan • Appendix C - Submission to Hungerford Neighbourhood Development Plan

<p>Please give reasons for your answer</p>	<p><i>Omission Site</i></p> <p><u>Land south of Recreation Ground, Boxford and Site Assessment</u></p> <p>In the context of the concerns about the vulnerability of the submitted development strategy, and the obvious remedy to identify a greater yield of new homes from the available sites in the HELAA, we turn to our client's land which was overlooked ('Land south of the Recreation Ground, Boxford (HELAA Ref: BOX1)').</p> <p>The Council's HELAA document concludes that the site is 'not developable within the 15 years'. The Council contend that development would be inappropriate in the context of the existing settlement form and pattern. Furthermore, development would fail to conserve and enhance the AONB. We disagree with this assessment/conclusion for the reasons set out below.</p> <p>The appended Development Opportunities Plan demonstrates that our client's site in principle could accommodate around 20 new homes.</p> <p>The Boxford Parish Plan is in the process of being updated, however the 2008 report noted significant support for a need to deliver affordable housing for young local people and for local elderly people. This can only be secured through the allocation of reasonable scale development at Boxford.</p> <p>The Development Opportunities Plan demonstrates that the northern part of the site could deliver a significant area of new green infrastructure. The use of this green space is open to further discussion with the Boxford Parish Council but could offer for example: public open space, a community orchard & garden, allotments, wildlife areas , or new children's play equipment (such as a skate park).</p> <p>The Boxford Parish Plan also comments that the "the parish is divided and has no social centre". Furthermore, residents raised that there is a need to improve access from the village to the community facilities at the recreation ground. The development of BOX1 would help to deliver this aspiration by providing an improved pedestrian and cycle link to this 'Community Hub'. In addition, the potential of the site to deliver new green infrastructure provides a unique opportunity to extend this community space to create a green 'social centre' to the village that can be used by all age groups.</p>

	<p>Suitability of BOX1</p> <p>The Council's HELAA document states that the AONB Officer has concerns that any development would create a hard edge to the village which would suburbanise the rural character and impact on the AONB. However, it appears the Officer has not considered the Development Opportunities Plan.</p> <p>Whilst the site and Boxford lie within the AONB, the Development Opportunities Plan demonstrates that the residential development would be located to the south of the site, immediately adjacent existing residential development. The proposed new Green Infrastructure to the north would also provide a transition between the built-up area of the village and the wider landscape. Indeed, it is considered that a landscaping buffer could help to break up views and soften what can be seen of the built development. Notwithstanding the above, the proposed development would strongly relate to the existing settlement pattern and is visually and physically well contained. Therefore, the development of this site would form a logical extension and any built development would be seen in conjunction with the existing residential development to the south and east. Accordingly, we are of the view that the Council should consider the allocation of BOX1 in the Local Plan Review in accordance with the objectives of paragraph 79 of the Framework and to help strengthen the district's housing supply.</p> <p><i>Attachments:</i></p> <ul style="list-style-type: none"> • <i>Development Opportunities Plan</i> • <i>Site Location Plan</i>

2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	Objection Policy SP15 should be amended to delete RSA14/RSA22/HSA19 Lynch Lane Lambourn and RSA15/RSA23/HAS 20 Newbury Road, Lambourn. The Section is entitled "Delivering Housing". Despite being allocated in April 2017 there is no sign of either site coming forward with no planning

applications being made in respect of Lynch Lane. It is not clear what is happening with Newbury Road. Firstly planning permission was refused, then planning permission was granted for eight houses but these are not being pursued. If permission has been granted the site should not be included. However there is also an application for five units on the site further adding to the uncertainty about its delivery.

Policy HSA 19 Site LAM005 Lynch Lane, Lambourn

Our Clients have made representations elsewhere that the housing provision in the Plan is inadequate and extra sites should be included, in particular our Client's Site LAM007.

However if the Inspector considers that extra sites are not required then LAM007 should be included instead of sites HSA19 or HSA20, in the Submission LPR document.

HSA 19 has the disadvantage of being a very large site for the village to accommodate. The capacity of the site has risen arbitrarily since the 2014 Preferred Options document and yet the constraints have increased. Notwithstanding this the text has been altered to reduce the size of the site. It lies alongside an SSI/SAC and part of the site is liable to flooding from the River Lambourn which flows along the northern boundary. No work seems to have been carried out on a number of aspects including archaeology, nutrient neutrality. It appears that the site capacity has arbitrarily increased by 4 units from 56 in the 2014 document to 60 in the current document merely so that, together with Newbury Road, it tries to compensate for the unjustified omission in this version of the Plan of site LAM007 which was previously included. Since its allocation in the previous adopted Local Plan there is no evidence that it is coming forward and is deliverable.

The Summary of Lambourn Sites SA/SEA page 122 notes the negative points in relation to environmental sustainability and flooding. The need for a buffer zone and the inability to develop within the flood zone appear to reduce the size and capacity of the site and not to increase it as is again arbitrarily suggested (from 56 to 60) in the previous Submission LPR.

The Parish Council within their response with regard to LAM005 included the following key points:-

"Environment -the site is within the AONB. The site is immediately adjacent to the River Lambourn, the corridor of which is a Site of Special Scientific Interest.

Housing and the Community – Lambourn needs a period of consolidation to adjust to the social impact resulting from recent rapid growth.

Industry – impact on the racehorse industry– safety of horses and riders will be affected by increased traffic generation

Archaeology – Lambourn formed part of the parkland of Lambourn Place, and the site is believed to be a site of a Saxon palace. Any development would destroy this.

Roads – roads are narrow, with blind bends and dangerous junctions. Inadequate footpaths and the roads are busy. Any increase in traffic will be detrimental to the safety of the road users".

These matters have not been addressed.

The Lambourn Site Assessments document, in its summary notes that "the Parish Council had various concerns about this site, as does the local community". Indeed this was the least favoured site for development by the residents responding to the survey that this site

The Plan's approach to the selection of sites is not justified or consistent with other policies of the LPR.

Policy HSA 20 Site LAM015 Newbury Road Lambourn

HAS now has planning permission for eight units but this is not being pursued. It should not be included if it has planning permission. It is assumed that it is being included as there is a current proposal for eight units.

Policy HSA 20 and in particular site LAM015 should be deleted and replaced by previously preferred Option Site LAM007.

HSA20 or LAM015 is a very small, inflexible site and makes little contribution to housing supply (five dwellings). It appears to have been included (and the notional capacity of LAM005 increased) merely so that LAM007, previously included as being acceptable, can be excluded.

HSA20 or LAM015 was not examined in the West Berks Landscape Sensitivity Assessment by Kirkham Landscape Planning.

The reference to the site in The Lambourn Site Assessment was both cursory and inadequate. The Parish Council were consulted about its inclusion (apparently it appears neither were statutory consultees).

HSA 20 scores poorly when compared against the criteria in Appendix 2 for the settlement boundary review. It is accepted that it forms an extension of the existing settlement boundary and is located on a ridge etc.

HAS 20 was selected at a late stage during processing of the Local Plan and yet has no identifiable feature to create its northern boundary which is open and on a ridge contrary to Criteria used in the Review at Appendix 2 of the LPR. There is no landscaped boundary contrary to other Criteria. It is on a ridge contrary to another Criteria and can be described as an open area on the edge of the settlement seen at the entrance to the village, contrary to yet more Criteria. It also lies close to the Medieval Village of Bockhampton.

Lastly planning permission has been refused for the development of the site, then permission granted for eight units but no longer being pursued and so there is no evidence it is deliverable or will provide the certainty that the LPR requires.

Policy HSA 20 should include site LAM007 instead of HAS 20 (LAM015).

The LPR's approach to the selection of sites and the review of settlement boundaries is not justified or consistent with the LPR.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	No
Please give reasons for your answer	Please see other submissions on this specific point <See Rep ID: PS1170>
4. Proposed Changes	<p>Policy SP15 should include the site known as LAM007 instead of HSG 19 and HSG20.</p> <p>The LPR's approach to the selection of sites is not justified or consistent with the LPR. Further the detailed examination of Site HSA 19 means that it may not be delivered or may only delivered with reduced capacity. Our Clients would prefer that Site HSA19 is omitted. However if there is a need for additional housing following the inclusion of site LAM007 then a more realistic appraisal of the "parameters" should take place to ensure that the LPR is both sound and effective</p> <p>Site HSG20 should be omitted. It has been refused planning permission and did not go through the rigorous consultation process or selection procedure applied to other sites such as LAM007. Its impact on the landscape was not been adequately assessed. It is further from services than LAM007 and has a number of other disadvantages landscape and other.</p> <p>The inclusion of HSG 20 would undermine the Plan and would mean that it is both unsound and ineffective.</p>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	We do not consider the LPR is sound and would like to participate in the examination.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>Please give reasons for your answer</p>	<p>*LATE RESPONSE*</p> <p>We write on behalf of <i>[personal details removed]</i> the owner of Windsor House Paddocks in respect of West Berkshire Council's (WBC) Local Plan Review Proposed Submission (Regulation 19) document which is currently out for consultation.</p> <p>Our client has been promoting the Windsor House Large Paddock site for some time and maintains that the site represents a suitable site for housing development and should be allocated in the emerging Local Plan. We have also been promoting the site through the Lambourn Neighbourhood Development Plan. In summary, these representations highlight that:</p> <ul style="list-style-type: none"> • The entire large paddock site should be allocated for housing and included within the settlement boundary of Lambourn. This is because as previously highlighted, the surface and groundwater flooding experienced by the site can be mitigated for; • An interim development proposal for large confines of the site which are not subject to flood risk could be brought forward in the short to medium term, prior to more detailed mitigation measures in order bring forward the rest of the site; • The current allocations in the area do not take into account previous under-delivery of housing sites in Lambourn; • The site provides a unique opportunity to deliver affordable housing for local needs, such as those working in the racehorse industry; and • The lack of flexibility within Policy DM37 for discontinued horseracing uses and recognition of the wider role that appropriate housing has to play in supporting the local economy and thus the industry as a <p>We also have concerns relating to the housing numbers proposed for the North Wessex Downs AONB and Lambourn in particular as we believe both are too low.</p> <p>All of the above, either individually or cumulatively mean that the draft Regulation 19 Plan is not 'sound' as it is not justified or effective as required by the National Planning Policy Framework (NPPF) (2021). Our key concerns with the Draft Regulation 19 Plan and our suggested amendments are outlined below.</p> <p>Section 8 Sites Allocated in North Wessex Downs AONB</p> <p>The council should reconsider their selection of housing allocations within Lambourn and include the Windsor House Paddocks site (LAM5).</p> <p>This site would perform better environmentally speaking than the two allocated sites in Lambourn, due to its well contained position in terms of surrounding patterns of development and positioning further away from the Lambourn River SSSI/SAC. Localised surface water flooding issues can be successfully mitigated against in the short term through locating dwellings on portions of the site which are not susceptible to this localised flooding, of which a significant number of dwellings could still be accommodated. In the medium to long term, well established mitigation measures can be put in place</p>

which could unlock greater proportions of the site to bring forward more housing, which would be valuable in delivering upon housing need in the area on a well contained site close to the village centre.

We would urge the council to revisit the 2014 Housing Allocations DPD representations for this site, where detailed work was undertaken by our client's Flood Risk Consultants including engagement with Stuart Clarke, West Berkshire Flood Engineer, where a variety of options have been discussed in resolving these flooding issues. It is clear from these representations, that the issue of flooding can be overcome.

It is also disappointing to see that two previously undelivered sites have been rolled over to the Regulation 19 Plan without the addition of any other allocations in the village to appropriately take into account previous under delivery. These two sites were allocated in the Housing Site Allocations DPD in 2017 and remain undelivered more than 5 years later. Land adjoining Lynch Lane, which is allocated for 60 units, has not received planning permission since its allocation and whilst Land at Newbury Road (allocated for 5 units) received planning permission in September 2021, this permission has yet to be implemented and will lapse in under a years' time.

There is no immediate indication that these sites will be delivered in the near term, therefore they are not addressing current and growing housing needs in the area. This is exacerbated by that fact that West Berkshire's 5 year housing supply has decreased from 7.34 years in 2021 to 6.4 years in 2022, as reported by the council's Annual Monitoring Reports.

There is a short term solution to delivering housing on the Windsor House Paddocks site.

It is also recognised that Lambourn has a thriving racehorse training industry that must have continued support. The importance of this industry is recognised in Policy DM37. With many people employed in the equestrian industry, often on low pay, there is an acute need to provide market and affordable housing. Our client is exploring the ability to accommodate a number of units to be made available specifically for local people working within the industry. A development on the site could therefore provide for a local specific need that may not otherwise be met by the other allocations, complying with the spirit of Policy DM37 which affords support to this industry which is intrinsically linked to the vitality of this rural service centre.

As has previously been put forward, the Paddocks have not been used for racehorse training purposes for a number of years and the land is therefore underutilised.

This has occurred for practical reasons in terms of providing ample space for the training of these horses and other associated buildings required, as well as logistical issues associated with transporting yearlings in the village to the training uses in Upper Lambourn, along busier roads in the centre of the village. The Paddocks are therefore becoming increasingly disconnected from the cluster of racehorse training uses and facilities located in Upper Lambourn and is unlikely to be used again for these purposes due to this.

The provision of housing on the site would contribute towards the continuing vitality of the settlement as well as maintaining an onsite link to the race horing industry by providing affordable housing for workers in this field.

In addition to this, the development of the site could also provide benefits to the local area that the other sites could not, including:

- Opportunities to make improvements to the surface water and groundwater flooding concerns within the local area (through onsite improvements as well as S106 contributions to offsite improvements);
- Improved footways in the immediate vicinity of the site to enhance accessibility to the village centre;
- Improved sight lines at the Crowle Road/Baydon Road Junction; and
- Provision of a bus layby to facilitate safe and efficient school drop

The Windsor House Paddocks Site (LAM5) should be included as a site allocation in the Draft Regulation 19 Plan. The site performs well and can provide tangible benefits to the village in the short term, through the provision of affordable housing units for workers in the racehorse industry.

Section 6 Delivering Housing

We have criticisms of the draft Local Plan in relation to the residual requirement for the North Wessex Downs AONB area, and the balance of this area requirement planned for in Lambourn. These criticisms mean that the draft Local Plan is not sound as it does not properly meet the housing requirements for the District, and is not the most appropriate strategy based on the evidence available.

Lambourn Housing Allocation

Given the Lambourn's relative size compared to Hungerford and Pangbourne, the other two Rural Services Centres in West Berkshire, and the unique requirements to provide housing for the racehorse training industry, the number of houses identified in the village is disproportionately low.

Hungerford has a population of circa 5,500, Lambourn circa 4,000, and Pangbourne 3,000 people. Despite Lambourn being only 30% smaller in population terms than Hungerford, Hungerford's housing allocation of over twice as high as the housing numbers identified for Lambourn. Lambourn's proposed allocation is more akin to Pangbourne's, even though the settlement is 25% smaller in population terms than Lambourn. This is only one indication of what a proportionate housing allocation should be but is telling.

To add to this, it is recognised that Lambourn has a thriving racehorse training industry that it must continue to support. With many people employed in the equestrian industry, often on low pay, there is an acute need to provide market and affordable housing. This housing need is not present in Hungerford and Pangbourne.

For the reasons set out above, more land for housing should be identified in Lambourn. The Windsor Paddocks site could provide between up to 50 houses. This would take the overall housing numbers proposed for Lambourn over the next 12 years up to 115-130, which is a more proportionate given the size and unique needs of the town.

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>[See attached documents Lambourn Business Park cover letter and Lambourn Business Park location plan]</p> <p>West Berkshire Local Plan Review 2022-2039 – Proposed Submission Version (Regulation 19) Representations on Behalf of Lambourn Business Park</p> <p>On behalf of Lambourn Business Park, we write to submit representations to the West Berkshire Local Plan Review 2022-2039 Proposed Submission Version.</p> <p>We support the general thrust of the plan and approach to development, however, it is our view that our client's site (land adjacent to Lambourn Business Park) represents a suitable and deliverable site for housing and should therefore be included within the non-strategic site allocations identified under Policy SP15 and Chapter 8 for the North Wessex Downs AONB Area. This amendment will result in a plan that is positively prepared, justified and effective and will ensure that the housing targets for the North Wessex AONB Area are achieved.</p> <p>This site (1.9 hectares) could deliver a high quality development which makes efficient use of the land and should be included for the reasons set out below. The site has also been submitted as a potential housing site in response to separate consultation in respect of the Lambourn Neighbourhood Development Plan.</p> <p>In order to be found sound at Examination in Public, the policies in the draft Local Plan need to comply with the tests of soundness set out in paragraph 35 of the NPPF (July 2021). The plan must be:</p> <p>"a) Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;</p> <p>b) Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;</p>

- c) **Effective** – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- d) **Consistent with national policy** – enabling the delivery of sustainable development in accordance with the policies in this Framework.” (author’s emphasis underlined).

Policy SP3 of the emerging Local Plan identifies Lambourn as a Rural Service Centre offering development potential appropriate to the character and function of the settlement.

Policy SP1 of the emerging Local Plan identifies the spatial strategy for West Berkshire to:

- Direct development to areas of lower environmental value;
- Optimise the use of previously developed land; and
- Optimise the density of development to make the best use of land whilst conserving and enhancing the distinctive character and identity of the built, historic and natural environment.

Policy SP2 of the emerging Local Plan (North Wessex Downs AONB) states that the North Wessex Downs Area AONB will have appropriate and sustainable growth that conserves and enhances its special landscape qualities.

The proposed site offers the potential to deliver housing in accordance with emerging policies SP1 – SP3 for the following reasons:

- The site is ‘wrapped around’ by other parts of the business park (see below). There is built development on three sides and a number of established buildings on the fourth. Therefore the development would be ‘infill’ development that could be incorporated into the existing surrounding built form without any westward incursion into the countryside beyond the existing built form of the business park.

[See image within attached Cover Letter]

- Today, Lambourn Business Park (to the east and south of the site) is established as a location for office / industrial and storage use and designated as a Protected Employment Area in the Council’s Local Plan. The proposed site benefits from an extant planning permission (11/01822/OUTMAJ) for commercial development but remains vacant (see approved layout below). The approved buildings are single storey and do not make efficient use of the site. The site has been marketed but commercial development is not viable at the current time. However, the planning permission remains ‘extant’ which means it could be built in the future if market forces change.

[See diagram within attached Cover Letter]

- Up until now the site has been underutilised, considering its historic use and long-established planning consent for redevelopment. Aside from the site’s position within a designated AONB there are no other known constraints to development. The site is positioned within an established business park with an extant planning consent for commercial development and is not considered to make a positive contribution to the AONB.
- Through a landscape-led approach to layout, scale, density and design the development offers the opportunity to make a positive impact on the landscape.
- Buffer planting will serve to soften and screen the development from the adjacent business park and surrounding landscape alongside additional opportunities to ‘green’ the site through play and drainage features.
- The proposals seek to deliver up to 25 new homes (see sketch below). The development would offer a range of housing types and tenures, informed by local housing needs. It would include affordable housing.

[See image within attached Cover Letter]

- Mixed use development would add vitality to the business park, particularly at evenings and weekends. Night-time activity would naturally add security and safety to the business park. None of the existing activities at the business park would preclude adjacent residential development.
- Access would be provided via the existing and retained business park to the east, along the Public Right of Way which dissects the site.
- The site could come forward independently or as part of a wider site incorporating land to the west (which already has some limited buildings) within the plan period, subject to the needs of existing businesses currently located on the site. As part of the wider site, this could deliver a meaningful contribution to the housing targets for this spatial area with limited impact on the AONB.
- The site (including the wider site) is within a single ownership and is available immediately for development.

Allocation of this site within Policy SP15 of the Local Plan will accord with emerging policy SP1 of the Local Plan on the basis that the site benefits from an extant planning permission and is therefore tantamount to previously developed land, it represents an opportunity to make a positive impact on the landscape and AONB and would make efficient use of the land (unlike the extant planning permission).

	<p>In order to ensure that the Local Plan is effective and justified, and ultimately sound, this site should be included within Policy SP15 the Local Plan as a non-strategic site allocation in the North Wessex AONB.</p> <p>If the Council and / or appointed Inspector wanted to consider a larger housing allocation then our client would be open to considering residential development on the wider site in their ownership (see attached location plan showing the proposed site in red and wider land ownership in blue).</p> <p>We request to be kept informed as the plan progresses and would like to participate in the Examination Hearing sessions to ensure our client's case is fully understood.</p> <p>Please do let us know if you have any queries or would like to discuss.</p>

2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<ul style="list-style-type: none"> Policy SP15 (Sites allocated for residential development in North Wessex Downs AONB) states inter alia that 140 units will be provided at Compton (HAS 23), 60 at Lambourn (HAS 19) and 49 at Hermitage (HAS 24 and RSA 22). It is further noted that in the current (2016) iteration of the West Berkshire IDP, that within the table on page 60, "Improvements to GP premises in area of development. Approx additional 50 sq.m" are described as being required to mitigate housing growth at "AONB (Hungerford, Lambourn, Pangbourne)". This Table indicates that this 50 sq m is a collective total of new floor space that should be paid for by developer contributions at a cost of £150,000. The ICB's view is that the 50 sq m currently articulated should be described as a net (as opposed to gross) floor area. Furthermore, as 50 sq m net space would cost around £350k to build as at Q1 2023 prices, not £150k as stated. The ICB considers that if developer contributions were sought that amount to £350k, this would be sufficient for the local GP Practices to deal with the additional capacity, either through 50 sq m of additional space, or through the provision of internal modifications to create additional clinical/patient-facing space.

<p>Please give reasons for your answer</p>	<p><i>Extract of full representation relevant to this consultation point. For full representation see attachment. Footnotes are included in the attachment.</i></p> <p>Strategy for the North Wessex Downs Area of Outstanding Natural Beauty (AONB)</p> <p>Policy SP15 identifies a total of 414 homes for the AONB over the plan period (including a proportion which will need to be found through neighbourhood plans). This equates to around 4.5% (footnote 8) of the housing provision for the district.</p> <p>Policy SP15 includes deferring the identification of specific sites for the requirement in Hungerford and Lambourn to the respective emerging neighbourhood plans.</p> <p>Whilst we have no objection to this approach, and indeed, CALA has been actively engaged in supporting the Town Council's work on the Hungerford Neighbourhood Plan, what is missing is a contingency in the event that, for whatever reasons, the neighbourhood plan process does not succeed as expected. The process has inherent uncertainty within it, not least the public referendum stage.</p> <p>Therefore, the LPR should include a contingency whereby it is clear what the alternative is if the neighbourhood plan process does not work out as expected (footnote 9).</p> <p>An obvious option would be to include a time limit within the LPR for sites to be identified and confirmed as allocations (the South Oxfordshire Local Plan provides a local precedent for this) (footnote 10).</p> <p>Although the LPR is expected to be reviewed on a 5 year basis, deferring the contingency to these reviews risks significant delay in meeting identified needs. A positive planning approach would be to include the contingency in the LPR (involving a modification to Policy SP15 and the supporting text, including paragraph 6.40 and 6.41).</p> <p>On a side point, we would also note that there seems little (if any) purpose to listing the Compton and Hermitage Neighbourhood Plans in policy SP15, which is about site allocations in the AONB area. Both are now listed as providing no additional homes.</p> <p>Local housing need in the AONB and specifically in Hungerford</p> <p>A stated priority for the LPR, set out in the Vision, is to address affordability of homes for the local population (footnote 11).</p> <p>As addressed in the previous section, the proposed spatial strategy makes policy decisions about how to apportion the development needs across the spatial areas. "Modest", or more accurately, very modest, growth is proposed to be directed to the AONB area.</p> <p>Specifically within Hungerford, the main settlement of the AONB area, what does the evidence base say about local need?</p> <p>Affordable housing</p>

In terms of the published evidence base, noting that the Strategic Housing Market Assessment has not been updated since 2016, a key evidence document for the LPR is the Updated Housing Need Evidence (UHNE) , covering the period 2021 to 2039, which provides information on the need for affordable housing.

This report does not appear to drill down to specific settlements, but does give useful information of need by spatial area.

The UHNE identifies a need for 152 affordable and social rented homes per annum in the AONB spatial area, and a further 160 shared ownership homes. In both cases , the level of need is noticeably higher in the AONB part of the district than the other sub-areas.

This equates to 46% of the overall need for affordable and social rented homes in the district (footnote 12) and 43% of the shared ownership need in the District (footnote 12).

This need is described as “substantial” and “the Council is justified in seeking to maximise the provision of affordable housing on eligible development sites, subject to viability” . However, the proposed scale of the district’s growth directed to the AONB is less than 5% (as explained in the previous section).

Indeed, the report invites the Council to “consider through plan-making process whether higher housing provision would have positive benefits on affordable housing delivery” .

Noting the proposed spatial strategy is for 500 homes in total (open market and affordable) across the spatial area, there is no prospect whatsoever of the need being met through this plan. The LPR will inevitably fall well short of meeting the need, especially in the AONB spatial area, with significant social and economic consequences.

Need in Hungerford

There appears to be no published evidence behind the LPR on specific need for Hungerford.

We assume therefore that local level need is being deferred to the neighbourhood plan process, which is well underway, led by the Town Council.

Therefore, it is relevant to turn to the evidence base supporting the emerging Hungerford Neighbourhood Plan (HNP).

A report into development need was published in 2019 by Aecom to inform the HNP (a copy is provided in appendix B).

At paragraph 3, it is reported that the Housing Needs Figure (HNF) for Hungerford is 27 net additional dwellings per year, equating to a total of 486 over the Plan period (2018 to 2036).

We note that the LPR plan period has been delayed by a couple of years, but not so significantly to mean that this independent calculation of need is no longer accurate or relevant. In need, if anything, the need is likely to have increased.

Further, it is reported that “There is a **severe lack of suitably affordable houses** for the population of Hungerford, and **every effort** should be made to maximise AH provision going forward...” (Our emphasis).

The Aecom report goes on to note that the HNF is an “upper-bound target that is subject to supply of suitable sites” i.e. that supply of suitable land will be a significant factor in what is a realistic housing target for the settlement. CALA has been cooperating with the HNP process to allow for detailed assessments of available sites.

In accordance with the NPPF, preparation of the HNP has been delayed until a housing requirement is identified through the Local Plan.

The requirement proposed in the Regulation 19 LPR, Policy SP15, is 55 dwellings. That is some 431 fewer than the settlement specific assessment of need. In other words, the proposed requirement for the HNP, if adopted, is just 11% of specific need identified for the town.

Even if you were to include the 100 homes allocated (and now being delivered) under HSA18, the shortfall is substantial at 331 homes (i.e. providing for only 32% of need).

It is not clear in the evidence if site availability has been a factor in the proposed housing requirement, or whether it is a top-down figure based on a proposed spatial strategy of very significant constraint to development in the AONB over the plan period.

It would certainly be appropriate, indeed essential, for the requirement to be tested against the realistic site capacity in the town, which the HNP process is in the process of doing.

As it stands, unless there was clear evidence that capacity was so constrained that no more than around 55 homes could be achieved, the proposed LPR will make a significant contribution to exacerbating housing need in the community.

The implication of such a policy approach is likely to be new households, for example, new families, having to leave the town, with implications for the social fabric and sustainability of the community.

There is evidence to strongly indicate that there is significantly greater capacity in and immediately around the town. Sites HUN12 and HUN14, for example, could potentially deliver in the order of 150 homes immediately adjacent to the current settlement boundary.

In brief summary, initial assessment of the sites for the HNP, and in parallel through the HELAA, has raised no insurmountable constraints to development, albeit both sites, but HUN12 (West of Salisbury Road) in particular, would require careful, landscape led master planning to mitigate impacts in the landscape. The site assessment recognises that specific landscape assessment is required to fully test the site capacities.

The LPR however provides no incentive for the Town Council to look more keenly for available land given the very modest requirement of 55 homes over the plan period. It is evident that the Town Council, quite understandably in some respects (despite its own evidence of local need), is restricting the extent of its growth ambitions.

	<p>Noting the relatively prominent status of the town in the district's settlement hierarchy (the main Rural Service Centre in the AONB), and the evidence of local need identified by Aecom, there is clear justification for further growth, without necessarily compromising the designated landscape.</p> <p>A greater level of positively planned development for the town is likely to help reduce the potential for more ad hoc growth in the AONB area under exceptional circumstances. A shortfall in housing supply during the plan period, escalating affordability issues, and/or growing constraints for development elsewhere in the district (such as the phosphates issues in the Lambourn catchment [Policy DM6, water quality] and the DEPZ constraints [Policy SP4]) could soon put pressure on additional growth in settlements in the AONB.</p> <p>In summary we are confident that there is greater capacity for more development in Hungerford than the proposed housing requirement (55 homes), and it is the arbitrary LPR requirement that is constraining sustainable growth. Positive planning would involve the LPR looking again at opportunities in the town.</p> <p>The proposal to constrain the amount of development in the AONB, and Hungerford in particular, is likely to have significant social and economic impacts. Whilst it is more than likely that meeting the housing need in full would challenge the overarching objectives of the AONB to conserve and enhance the special landscape, <i>a more balanced approach to meeting the three strands of sustainable development is needed, including the social element that Aecom's evidence highlighted was so important. This would be in keeping with the spatial strategy for the AONB (Policy SP2), which recognises that development is required in the AONB to support its local communities and rural economy.</i></p> <p>Attachments: full representation including appendix A and B</p>

Please give reasons for your answer	<i>Omission Site</i> Include "Land between Folly Road, Rockfel Road and Stork House Drive" (SHLAA site reference LAM007) in the LPR._

In the West Berkshire Housing Site Allocations Development Plan Document - Inspector's Report March 2017 by David Hogger BA MSc MRTPI MCIHT he stated:-

“88. Another site in the settlement between Folly Road and Stork House Drive (LAM007 in the SHLAA) displays similar characteristics to the allocated site at Lynch Lane. However, the proposed allocation is sound and there is no justification at this time for allocating further development within the AONB because the limit of 2,000 dwellings, as set out in the CS, would be significantly breached. I note, however, that there is a commitment from the Council to reconsider this site as part of the WBLP preparation”.

This has not been done and the site has not been included in the Draft Plan.

To ensure Section 8 Policy RSA is justified, sound and effective, Site LAM007 should be restored to the Plan (in place of site RSA23/HSA20) as previously suggested in the July 2014 Preferred Options Draft in the text of the Plan and in the settlement boundary review as follows:-

"Policy RSA ?? - Land between Folly Road, Rockfel Road and Stork House Drive (SHLAA site reference LAM007)

Just over one hectare of this site is considered to be developable for approximately 24 dwellings. The developable area excludes the middle section of the site, reflecting the outcome of the Landscape Assessment which indicates that development on part of the site would be acceptable as long as the required mitigation measures are adhered to.

The site is well related to the existing settlement and close to local services, facilities and open countryside. It is proposed that the site is allocated for low to medium density development, with a mix of dwelling sizes and types including affordable housing. Access can be obtained either from Folly Road or from Rockfel Road, with a potential additional pedestrian access onto Holly Road.

Full ecological and archaeological surveys will be required to inform any development proposal."

<for site map see attachment>

Background

Our Client, Mr R L Jones has been involved in the equestrian industry in Lambourn for many years.

The representations by Carter Planning Limited on his behalf (and on behalf of his family and Company interests) seek to demonstrate that the Draft LPR is fundamentally unsound because it underestimates the required housing provision generally. as a result it produces too few housing sites to meet needs or be flexible.

More specifically our Client takes exception to the failure by the Council to consider site LAM007 despite the Council making a commitment to do this at the last Examination and despite its late omission from the current Plan which has previously been through consultation and examined in detail and found to be acceptable (and its replacement by Site RSA 23/HAS 20, formerly LAM015 which had not).

This failure undermines the Council's stated criteria for the selection of sites and settlement boundaries in the rest of the Draft Plan.

Our Clients representations therefore seek to increase housing which in turn means and increase in housing sites. As a result either the addition of SHLAA site LAM007 as having previously been acceptable in all regards to meet this need, or, if the Inspector reduces the housing need then the replacement of site RSA 23/HSA20 by site LAM007 (and a re-examination of the allocation and capacity of Site RSA 22/HSA19).

Site LAM007 is located in an area where recent development has occurred over time. It is well located in relation to the heart of the village and is contained by development on three sides. It is a site which can be flexible in the amount of development which it supplies.

In respect of site LAM007 the Council's Draft Plan (LPR) is neither positive nor justified, in that LAM007 is totally and promptly deliverable and consistent with national policy, which may not be the case with other sites.

Facts and experience show that, contrary to assertions made by the Council and others previously, mixed housing can be provided on site, LAM007, in a manner that is beneficial to the community and horse racing industry, in contradiction to those claims.

It is still not clear why Site LAM007 was suddenly excluded from the last Plan and site HAS 20, LAM015 included and HAS 19, LAM005 enlarged. It seems likely that this is only due to incorrect evidence regarding our Clients' adjoining stables. see below.

LAM007 was previously included as a preferred site in the 2014 Consultation Issues and Options Draft when the Council concluded:-

The principle -

The Core Strategy sets out the Spatial Strategy for the District and provides an overall framework to guide development over the plan period. The Core Strategy also outlines a housing requirement for the District to 2026, along with a spatial distribution to identify where this housing will be provided.

The Core Strategy identifies Lambourn as a rural service centre within a Settlement Hierarchy. This means that Lambourn, along with the other rural service centres, has a range of services and reasonable public transport provision, with opportunities to strengthen its role in meeting the requirements of surrounding communities. As such, it is expected that Lambourn will accommodate some additional housing growth to 2026.

Policy ADPP5 sets out how the spatial strategy will be delivered in the AONB. The Housing Site Allocations DPD sits underneath the Core Strategy and within this clear framework. The Housing Site Allocations DPD will allocate non-strategic housing sites for development adjacent to the existing settlement boundaries of those settlements identified within the settlement hierarchy. As such a review of settlement boundaries will take place as part this DPD.

The Core Strategy is clear that the conservation and enhancement of the natural beauty of the landscape will be the paramount consideration in assessing sites for development within the AONB. In order to ensure that the diversity and local distinctiveness of the landscape character is conserved and enhanced, the natural, cultural and functional components of the landscape character will be considered as a whole in accordance with Core Strategy policy CS19.

One of the consultation responses set out above outlines that '2 suitable sites have been discounted for no apparent reason'. Both these sites (LAM004 and LAM006) have been ruled out for landscape reasons. The Council's landscape consultant (Kirkham Landscape Planning Ltd/Terra Firma) carried out a Landscape Sensitivity Assessment (LSA) on sites submitted within the AONB. This work concluded that both sites LAM004 (Land off Bockhampton Road) and LAM006 (Land at Wantage Road and Northfields) should not be pursued for development due to the landscape impact.

With regard to the housing type and mix, policy CS4 of the Core Strategy outlines the Council's approach and states that residential development will be expected to contribute to the delivery of an appropriate mix of types and sizes to meet the housing needs of all sectors of the community, having regard to the local context and relevant evidence sources.

The Council's Archaeology Team has been consulted on the site and has concluded that a variety of archaeological features are in close proximity and on the site resulting in a high archaeological potential. Further investigation and evaluation will be required through the production of Heritage Impact Assessment. This will need to be carried out as part of any planning application to inform the development of the site. Should the site be taken forward as an allocation within the plan this will be set out within an allocation policy.

The Council's Ecologist has been consulted and has concluded that the site is possibly Chalk Grassland. An extended phase 1 habitat survey would be required together with further detailed surveys arising from that as necessary. Appropriate avoidance and mitigation measures would need to be implemented, to ensure any protected species were not adversely affected. Should the site be taken forward as an allocation within the plan this will be set out within an allocation policy. The site is located over 600m (as the crow flies) from the River Lambourn, a SSSI/SAC, and it is essential that any development on the site will not adversely affect the SAC/SSSI.

The site is not within a Flood Zone and does not sit within an area of surface water flood risk. The site is located adjacent to a groundwater emergence zone but the risk of flooding on this site is considered low. Given the site is over 1 hectare in size a Flood Risk Assessment (FRA) would be required to support any planning application on the site in accordance with policy CS16 of the Core Strategy.

This site can accommodate up to 24 houses that will generate circa 144 daily vehicle movements including circa 14 during the 08.00 to 09.00 AM peak. It is considered that given the size of the development, the traffic impact from the proposal would be limited. Access can be obtained from Folly Road, but it probably wouldn't be appropriate considering the rural nature of the road. An alternative place for access would be via Rockfel Road. This would also connect the site to footways in the vicinity. There are currently no footways along Folly Road. A pedestrian access onto Folly Road would also be welcomed. There are footways and bus stops within the vicinity where bi-hourly services pass to Hungerford and Newbury. The site is also within walking and cycling distance of Lambourn centre.

Existing pressure on some local services and facilities is recognised. The Infrastructure Delivery Plan (IDP) prepared alongside the Core Strategy considered all the infrastructure (including schools and doctors) that would be required to support the development of 10,500 new homes (including the scale of development allocated to each of the spatial areas). The IDP will be updated in partnership with service providers to support the Housing Site Allocations DPD once the site allocations have been confirmed and any necessary infrastructure improvements will be taken forward.

Service providers are aware of the potential sites for future development and discussions are taking place as to the provision of additional services/facilities to serve the new population. All new development will be subject to the Community Infrastructure Levy (CIL) which was implemented by the Council on 1 April 2015. CIL is a levy charged on most new development and the money is used to pay for new infrastructure required as a result of the new development. Financial contributions towards mitigating the impact of an increased population on infrastructure (such as the NHS and Education provided by West Berkshire Council) could be sought through CIL. Whilst CIL replaces most of the previous system of developer contributions collected under Section 106, it will still be necessary to have S106 agreements under certain circumstances, for example to provide affordable housing, or provide infrastructure on site, or pay for infrastructure improvements required off site but specifically as a result of a development.

In particular, consultation has taken place with Thames Water and they have not raised any concerns regarding water supply or waste water capability in relation to this site. It should be noted that infiltration of groundwater into the network has been identified as a strategic issue within Lambourn, therefore should development come forward on this site an integrated water supply and drainage strategy would be required.

The Core Strategy is clear that the conservation and enhancement of the natural beauty of the landscape will be the paramount consideration in assessing sites for development within the AONB.

The Council's landscape consultant (Kirkham Landscape Planning Ltd/Terra Firma Consultancy) has carried out a Landscape Sensitivity Assessment (LSA) on the site and recommended that only the land adjacent to Folly Road and below the 150m AOD contour in the south of the site be developed. Development on these parts of the site would be subject to a number of conditions, along with the protection and enhancement of key landscape features (set out within the LSA). The LSA also recommended that the larger sites within Lambourn, LAM005 and LAM007, are either only developed in part concurrently, or either one or the other selected, to continue the pattern of sequential small developments in the village.

A Landscape and Visual Impact Assessment (LVIA) would be required as part of any planning application for development on this site to ensure any proposed development conserved and enhanced the surrounding landscape of the AONB. The requirement to provide this work as part of a planning application

will be outlined within an allocation policy for the site should it be taken forward as an allocation within the plan.

The Council's Environmental Health Department has been consulted on the Housing Site Allocation DPD Preferred Options and will have further opportunity to comment throughout the process. No concern has been raised regarding this site. The site is at risk of groundwater contamination given the local aquifer and the level of risk and any necessary mitigation measures will be explored further through a Flood Risk Assessment to be provided as part of any planning application.

The racehorse industry plays a vital role within the local rural economy of Lambourn and surrounding areas. It is evident from the consultation responses that the site is currently used as turnout paddocks for an adjacent yard. As such the loss of the site for housing development would be contrary to policy CS12 of the Core Strategy. Policy CS12 aims to prevent pressure for redevelopment of existing facilities to other uses and the fragmentation of existing sites. Such pressures could lead to the decline of the industry locally, threaten the character and form of the settlement and increase pressure for replacement facilities in environmentally sensitive areas. Protecting yards from development for alternative uses is particularly important to the Council. **(Note this is incorrect for reasons given below).**

As part of the Housing Site Allocations DPD the Council will be reviewing the settlement boundaries of those settlements within the settlement hierarchy of the Core Strategy. Criteria for this review were consulted upon as part of the Preferred Options consultation in 2014.

Completed developments are already taken into account in terms of the housing requirement/numbers. Such areas of land adjacent to the settlement boundary will be considered further as part of the settlement boundary review

The site LAM007 was also comprehensively tested by Kirkham Landscapes in 2011 who concluded:-

"Relationship with adjacent settlement

The site is surrounded on 3 sides by housing, with 20th century medium density and more recent development to the north east and south east boundaries, and older, low density housing across the road to the north west

The lower density housing occurs up to the 170m AOD contour, with higher density on the lower slopes, below 150m. The site itself extends up to 170m AOD with the majority below 165m AOD

The site contains horse paddocks and stable buildings

Relationship with adjacent wider countryside

The site has some relationship with the countryside to the south west, which is a continuation of the east facing valley side, but hedgerows around and within the site, including a tall, conifer hedge disconnect the site visually from the countryside beyond

The site lies on slopes dropping into the valley and the settlement away from the extended wider landscape

Impact on key landscape characteristics

No woodlands are affected

Potential for replacing the incongruous conifer hedgerow with more appropriate planting

Other boundary hedges made up of native species are important features

Site currently in use as paddocks

Impact on key visual characteristics

Not typical of the wider LCA – less exposed and smaller in scale

Development of the whole site would be prominent in views from the surrounding Downs and from within the settlement

Impact on key settlement characteristics

Some appropriate development would not be out of keeping with existing settlement pattern

Summary of compliance with PPS7 paragraph 21

Development on part of this site, subject to the recommendations below, would result in little harm to the natural beauty of the AONB. It is recommended that only the land adjacent to Folly Road and below the 150m AOD contour in the south of the site be included

Our Client.

Our Client and his wife have lived in Lambourn for over 40 years, as a successful jockey and trainer, in the employ of others, and for the majority of that period, self-employed in the industry. During that period they have consistently used capital gained from housing development in Lambourn to heavily invest in the horse racing industry, including a new stables, upgrading another, provision of lads' accommodation units, lunging rings, a horse walker, an innovative paper bedding business, and other facilities. They currently have a planned programme of further development in the horse racing facilities within their ownership, including a potential new yard, upgrading of boxes, a lads' hostel and a manager's unit, which is being discussed with others, but this programme will not proceed without investment within their capabilities.

In previous submissions our Clients have consistently stated that the subject land is not part of any racing establishment, is in different ownership, and that the stables will continue. The land is agricultural.

Background.

After long periods of previous DPD consultations, including landscape, archaeological, highways, local community open day and parish council etc. assessments, and in the knowledge of horse racing issues during the consultation process the Council concluded in 2013 and again in 2014 that the site be considered a preferred site for housing development in Lambourn, subject to safeguards. This consideration was under LAM007. Our Client was notified in June 2015, that the preferred site status was proceeding to Council for confirmation in the progress to the EIP stage.

Suddenly, in July, 2015, the process was “pulled” and late in October 2015 our Client was notified that LAM007 was rejected in the recommendations for the DPD to be put before the Council on 5 November, 2015. The reason given was conflict with the Council’s Policy (CS12) of protection for the horse racing industry in Lambourn, as the retention of the site in such use is considered important to that industry.

On further investigation, our Client discovered that the tenant of Highview had submitted objections in or about September to the allocation, on the need of the site for “turn out”, and that with other objections about horses being on the land, caused the change. Our Client was unaware of these comments, and on 30 October his solicitor wrote to the Council requesting that the Council’s decision be deferred pending an opportunity to consider and reply to what had been said – “the right to reply”. It is also significant that the Council substituted the LAM007 site with a smaller linear development site at LAM015 (now HAS 20/RSA 23), which only entered the process very late in the day and had not gone through the same rigours of assessment that all other Lambourn sites have experienced.

The objection was spurious as “turn-out” land though useful, is not essential, and is not necessary in any case to “adjoin” stables. The tenant at Felstead (who is very successful) does not have it, it is not usual in Lambourn, and our Client has expert testimonials to this effect. Furthermore, the land excluded from the submission can still be used for grazing etc.

The Issues.

From the consultation documents and the papers before the Council on 5, November, 2015, it is evident that at every appropriate stage, including to the “stalled” recommendation stage in mid 2015, that LAM007 was a preferred site.

All the consideration parameters were, subject to safeguards considered positive and the conclusion of the SHLAA was “the site is proposed for a mix of dwellings and densities to suit the needs of the area”. It is significant that horse racing industry and highways concerns had been considered and dismissed in reaching the conclusion. 48% of respondents to Parish Council questionnaire favoured the site for residential development as their first or second choice.

Clearly something happened in the period from mid 2015 to the Council’s report in November, 2015, and those events were touched on by the last Inspector but in the absence of any explanation by the Council as to why an acceptable site had been dropped in favour of less favourable one(s) they appeared to us be:

- 1) Objections from a tenant and others relating to the horse racing industry issue;
- 2) The appearance in the document of a brand new site LAM015 in Newbury Road;
- 3) Highway comments;
- 4) A contention relating to the delivery of the site.

We address each issue in turn.

1 The Racehorse Industry.

This issue significantly rests upon the assertions of the tenant and others and ignores the history of the site’s previous submissions. Comments had been received by the Council on this subject before June 2015, and the Council had given LAM007 “preferred status”.

The planning basis for current omission of LAM007 is stated in the papers as Core Strategy Policy CS12. This policy is based on three core objectives :-

- Retention of suitable establishments/facilities;
- Resistance to permanent fragmentation;
- Redevelopment away from **essential** uses to the industry will be subject to suitability and necessity tests.

Fundamental to application of the policy is an understanding of the particular site characteristics and industry practice.

Our Client and his wife, through their interests have two yards, one at Felstead Court and the other at Highview in Lambourn. It should be noted that the subject land is not part of any racing establishment and in separate ownership from the adjacent stables of Felstead Court and Highview, which are in Company ownerships, and now let, having previously been operated by the Clients wife (as trainer) and himself until their retirement due to health and age issues.

Felstead Court, which is also subject to a tenancy, is larger and has no adjacent land within its agreement (more follows). The tenant of Felstead is very successful – hence the need for further investment in new and improved stables.

To the south of site LAM007 is a housing development (Rockfel Road), formerly part of the proposal land, on which our Client obtained residential permission via an appeal in the 1980’s. This land was subsequently built out by Westbury in the 90’s.

To the east of the site, at Stork House stables in 2002 our Client obtained residential permission, and separately, a new stables (i.e. the Highview) permission. Although the permissions are subject to S.106 Agreements, these agreements (relating to open space and jockeys accommodation at Highview) do not bind or enjoin site LAM007 in any way. The residential site was, subsequently, built by Bovis.

In addition, to the new Highview Stables, through our Clients’ companies, they have invested at the Felstead and Highview sites in a stable lads accommodation unit, a horse walker, and ancillary developments. They are currently planning further stables investments at Felstead, additional lads accommodation units and a new stables. So rather than destroying the race horse industry by seeking residential development, through their Companies, our Clients are one of the few in Lambourn to be heavily investing in it and have been able to do so because of the capital gained from gradual residential development.

The subject land LAM007 is not part of the Felstead Court or Highview stables ownership, is not necessary for the stables and is agricultural in use. In short our Client can plough it, or keep any animals for sustenance on it or grow crops on it.

Our Client is desirous of exploring the potential for either an alternative combined scheme (residential, stables, and lads units) or an alternative proposal including say, residential frontage development on the Folly Road frontage, with lads accommodation in the south eastern corner accessed of Rockfel Road, new stables at Felstead Court and a totally new stables in the north western corner.

The LAM007 land is agricultural, in accordance with the definition in the Town & Country Planning Act 1990. When our Client acquired the land from the Goulandis family trust it had been historically used for the grazing of pedigree cattle for sustenance and until three years ago it was intermittently used from Goulandis times by 3 local farmers for the grazing of sheep. All these animals grazed for sustenance from the land. Racehorses do not graze for sustenance as is explained later. To use land for the keeping of racehorses for commercial purposes is a separate user, which requires planning permission. There has never been a planning permission for such a use on the site, and to benefit from any lawfulness the horse related use would require 10 years of uninterrupted activity – 3 years is insufficient. Legally, there is no application of Policy CS12 to the land.

The main facilities required for the training of a racehorse consist of a well ventilated stable, good food, clean hay, bedding and water together with the ability of the trainer to exercise a horse safely on a sound surface as provided by the excellent public training grounds in Lambourn. Other facilities can also include horse exercisers such as walkers and turn out pens like those manufactured by Claydon. The Claydon Turnout Pens, as an example, are designed for restricted and controlled turnout in order to avoid horses galloping when they are shod with metal shoes on all four feet. The crucial factor is horses are at high risk of injury to themselves and to other horses if turned out on large areas, which owners, insurers and the like would not want. Racehorses in licensed training yards are there for the purpose of being trained for the racetrack. They are shod with metal shoes in front and behind in order that they remain sound during their training routine and that they have additional grip and stability in training and racing conditions. Most trainers will have two or three turnout pens up to the recommended 30' in diameter or a small restricted, well rail fenced area, of similar dimensions, if a shod horse needs turning out. It would be negligent to turn such horses out, other than in restricted areas.

Horses in training for the racetrack are fed on a high protein specialised diet - they DO NOT get their sustenance from turn out.

Our Clients two yards, which adjoin the LAM007 site are training yards and both have turn out pens, separate from the site proposed for housing. There also is an area of land which has been deliberately excluded, and will be kept open and free from any development.

In summary on the facts the land is agricultural, does not do away with or fragment any facilities and does not involve any facilities essential to the racehorse industry.

2) The appearance in the document of a new site LAM015 now HSA20/RSA 23 in Newbury Road;

This is dealt with under our comments on site HAS 20/RSA 20, formerly LAM015.

3) Highway comments;

In all previous considerations of site LAM007 there has not been any highways objection to the development of the site in whole or in part.

Our Clients commissioned Highways Consultants to re-examine the situation. Development Transport Planning Ltd concluded, that, "*in summary, they do not consider there are any substantive highway reasons for Site LAM007 to be excluded from consideration as a site to be allocated for housing in Lambourn*".

4) A contention relating to the delivery of the site.

The site is readily available and can be delivered.

Other matters.

Other matters that have been raised by third parties include the following:-

Amenity

There are several opportunities for access from the LAM007 site onto Rockfel Road or on to Folly Road none of which need impact on adjoining houses.

The local impact on views due to topography is strictly limited as the Council's Landscape Assessment demonstrates.

Any scheme for development can be designed in such a way as to provide a good standard of amenity for proposed properties and to protect the amenities of existing properties.

Foul Sewers

Work has recently been carried out by Thames Water. Increased sewage from this new development can be accommodated.

Drainage

A combination of surface water drainage and SUDs can ensure the site is adequately drained without off site impacts.

Infrastructure

The development will make CIL contributions towards any infrastructure improvements that are required.

Lastly in the West Berkshire Housing Site Allocations Development Plan Document - Inspector's Report March 2017 by David Hogger BA MSc MRTPI MCIHT he stated:-

"88. Another site in the settlement between Folly Road and Stork House Drive (LAM007 in the SHLAA) displays similar characteristics to the allocated site at Lynch Lane. However, the proposed allocation is sound and there is no justification at this time for allocating further development within the AONB because the limit of 2,000 dwellings, as set out in the CS, would be significantly breached. I note, however, that there is a commitment from the Council to reconsider this site as part of the WBLP preparation".

	<p>This has not been done and the site has not been included in the Draft Plan.</p> <p>Conclusion</p> <p>All these matters were raised before Inspector David Hogger in the last Examination and the Council made a commitment to reconsider the site in front of the Inspector. This has not been done</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	Please see other submissions on this specific point <See Rep ID: PS1170>
<p>4. Proposed Changes</p>	<p><u>Recommendations</u></p> <p><i>Development on this site should be subject to the following conditions and the protection and enhancement of the following features:</i></p> <p><i>Low density, linear housing (similar to that north of Folly Lane would be the most appropriate form of development at the higher elevation, and</i></p> <p><i>Higher density, similar to the housing to the east, on the lower ground in the eastern part of site.</i></p> <p><i>Views from the surrounding countryside would need to be carefully considered</i></p> <p><i>New planting would be important in integrating the buildings into the landscape, including the replacement of the conifer hedges.</i></p> <p><i>An area between the two portions of the site for development would need to be left as open field or open space to reduce the overall impact of the development</i></p> <p>We consider that site LAM007 should be allocated for housing and the settlement boundary altered to include this site. It has previously considered to be a suitable site It is the more logical site of the two considered (HAS 19/RSA 22 and HAS 20/RSA 23) and has been assessed as being sustainable. Unlike the other two it can come forward straight away to be developed. The fundamental principle of the NPPF is the presumption in favour of sustainable development.</p> <p>Elsewhere we have submitted that the housing requirement as a minimum, the LPR relies too heavily on windfall sites, the Plan must meet unmet need from elsewhere and further sites are required. Therefore in the alternative we consider there is no clear planning reason why additional sites should not allocated for development especially as Lambourn. This has the services available in the town, which is recognised as a Rural Service Centre in the existing and proposed Development Plan with development potential. This positive preparation would make the Draft LPR sound.</p> <p>Allocation of Site LAM007 would be a positive approach to plan preparation and meeting the objectively assessed needs of the housing market. Allocation of the site would comply with the existing and proposed Development Plan spatial strategy because Lambourn is a Rural Service Centre where additional housing will be provided.</p> <p>The site itself is deliverable and there are no insurmountable items which preclude its development. Its development would subsidise and support the equestrian industry. There are no highways reasons why the site cannot be developed.</p> <p>The site complies with the adopted spatial strategy. It has been found to be a sustainable location for development. The NPPF has at its core a presumption in favour of sustainable development. The inclusion of LAM007 would be consistent with the NPPF and would make the Plan sound and effective.</p> <p>Site LAM007 Land between Folly Road, Rockfel Road and Stork House Drive should be included in/restored to the Plan in Section 8 as a specific RSA/HSA Policy.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	Yes

<p>Please give reasons for your answer</p>	<p>These representations have been prepared by Turley on behalf of Pangbourne College and provide comments on the Regulation 19 Consultation currently taking place in relation to the West Berkshire Local Plan Review 2022- 2039.</p> <p>As you will be aware our client has important land interests in the Local Plan area, including the Pangbourne College estate. The majority of the estate lies to the north of Pangbourne village and surrounds the main core of the college, sports facilities and boarding houses. Additional land within the College's ownership includes the Boathouse on the western edge of the village.</p> <p>These representations provide commentary on the consultation document as a whole, as well as specifically in relation to two parcels of land within our clients' ownership. Separate representations are submitted in relation to other parcels of the College's land.</p> <p>LOCAL PLAN CONTEXT</p> <p>The current Development Plan comprises the Core Strategy (adopted 2012) and the Housing Site Allocations DPD adopted in 2017. The Core Strategy covers the plan period up to 2026 and is premised on the housing need set out within the now revoked South East Plan.</p> <p>This consultation relates to the Local Plan Review covering the period up to 2039. We fully support the principle of the Council reviewing the plan as it provides the opportunity for development needs (for new homes, employment and other land uses) to be considered based on an up-to-date evidence base. Furthermore, it provides the opportunity for the Council to take into consideration any unmet needs from neighbouring authorities and the need to fulfil the Duty to Co-operate.</p> <p>There are some significant physical and technical constraints within the District, including AWE Burghfield and Aldermaston and area of flood plain. The AONB is a policy and landscape designation that covers over 60% West Berkshire, however, not all areas of the AONB are of such a high quality as to warrant their immediate dismissal from consideration in terms of allocating housing site.</p> <p>HOUSING REQUIREMENT AND THE SPATIAL STRATEGY</p> <p>Proposed Policy SP1 (Spatial Strategy) states that development will be focused on three spatial areas: Newbury and Thatcham, the Eastern Area and the North Wessex Downs AONB.</p> <p>The spatial strategy for the North Wessex Downs AONB is set out in proposed Policy SP2 (North Wessex Downs AONB) and confirms that there will be appropriate and sustainable growth that conserves and enhances its special landscape qualities. The Housing Background Paper (January 2023) sets out at paragraph 5.7 that allocations within the AONB have been directed to the settlements within the settlement hierarchy</p> <p>It is of note, however, that the LPR does not allocate any housing to Pangbourne and only very limited housing to both Hungerford and Lambourn (the two other larger settlements within the AONB).</p> <p>SETTLEMENT HIERARCHY</p> <p>Pangbourne is identified by Proposed Policy SP3 as being a Rural Service Centre (the same designation as is currently has through ADPP1 of the Adopted Core Strategy). This is the second tier of settlements after the main urban areas of Newbury, Thatcham and the Eastern Urban Area. SP3 identifies Rural Service Centres as larger rural settlements offering development potential appropriate to the character and function of the settlement.</p> <p>Pangbourne has a mainline railway station offering direct high speed services to Oxford, Reading and London and has frequent bus services operating into Reading and to other surrounding towns and villages. Within the village centre there is a supermarket, bank, pharmacy, post office, doctors surgery, library, primary school, public houses, dental practices, places of worship, a protected employment area, convenience stores, restaurants and takeaways, and a village hall, as well as a youth / water sports centre, children's play areas and sports grounds.</p> <p>The LPR evidence base includes the settlement boundary review topic paper. Appendix 1 of the topic paper – the audit criteria for services and facilities states that:</p> <p><i>“A settlement's accessibility to services and facilities is defined by a 1 kilometre radius from the centre of the settlement and for access to railway stations and employment opportunities within 2 kilometres. These distances demonstrate a reasonable commutable walking distance as suggested by the Chartered Institution of Highways and Transportation (Providing for Journeys on Foot 2000)”</i></p> <p>Appendix 2 – the settlement audit identifies the range of services and facilities available in Pangbourne and maps the 1km and 2km distances. It is of note that the whole of the Pangbourne College Estate is within 2km of the centre of the settlement, and a large proportion lies within 1km.</p> <p>Appendix 3 – the audit matrix and settlement scores identifies Pangbourne as the joint third highest scoring settlement within the District (excluding the main urban areas). It scores 40 points out of a</p>

maximum of 48, losing points for matters such as the lack of a mobile library (despite it having a permanent one). It is clearly one of the most sustainable settlements within the district.

Paragraph 4.19 of the LPR states that Pangbourne has limited development opportunities, we disagree with this statement. Pangbourne does have development opportunities with sites such as those identified later on in this letter, which would go a long way towards providing well designed and appropriate development as natural extensions of the existing settlement, within acceptable distances from the centre of the village as defined in the settlement hierarchy topic paper.

Pangbourne does not have a neighbourhood plan, and therefore, sites are unlikely to come forward through one in the early part of the new plan period.

Pangbourne is also designated as a District Centre through proposed Policy SP22 and it is considered important that, in order to support the vitality and viability of district centres, additional housing should be brought forward in combination with economic and commercial growth. This will ensure that businesses can thrive through both additional customers as well as employees being able to live locally and the facilities such as the local schools benefit from additional families in the area. This is of particular importance when the local school has a falling roll as evidenced by the schools allocation data available on the Council's website. It is considered that further housing should be allocated to settlements where district centres are supported, such as Pangbourne.

There is a clear need for housing to be provided at Pangbourne given its status within the sub region, its sustainability in terms of the services and facilities it provides as well as its proximity to Reading and its role within the Greater Reading Area. The existing settlement boundary is tightly drawn around the existing built form of Pangbourne and as such it will need to be revised to accommodate an appropriate level of growth.

The LPR does not propose housing allocations in and around Pangbourne. We consider that this approach is artificially restricting the level of new housing development that can come forward and that not proposing any allocations at one of the most sustainable settlement in the District is unsound.

The NPPF sets out that the tests of soundness include positively prepared, justified, effective and consistent with national policy.

For a plan to be considered positively prepared, it needs to provide a strategy that seeks to meet the area's objectively assessed needs together with any unmet need from other authorities. It is considered that this plan does not allocate housing in accordance with its settlement hierarchy to meet its housing needs.

The plan is not considered to be justified in its approach as it seeks for the remainder of its unallocated housing need to be met through windfall sites and neighbourhood plans instead of allocating developable and available sites. Therefore, we do not consider the strategy to be appropriate.

We do not consider that the plan will be effective in delivering the amount of development needed in the area as it fails to fully address its housing need through site allocations.

For these reasons, we consider that the plan cannot be considered to be sound.

CONCLUSIONS

To summarise, we broadly support the Council's approach to the Local Plan Review but consider that the plan is not currently sound because it has not been positively prepared, is not justified and not effective for the reasons set out above. We consider that our client's land interested can assist in meeting the District's development needs, through the delivery of housing. These representations also confirm the suitability of the two sites for small extensions to the existing settlement.

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>LAND AT CENTENARY FIELDS</p> <p>The site at Centenary Fields (location plan included at appendix 1 [see attachment 'PS1558 Centenary Fields Plan']) lies on the periphery of the College's estate, along Bere Court Road and close to the existing settlement boundary. Vehicular access to the site is taken from an existing driveway track serving the residential properties known as St Vincent, Rodney and Derwent. This track is a former access to Pangbourne College itself and has sufficient visibility splays to accommodate additional traffic.</p> <p>The site is screened to all boundaries by existing trees and hedging and sites on a plateau meaning its visibility from the wider countryside and AONB is limited.</p> <p>In sustainability terms, the facilities within Pangbourne all lie within less than 1km of the site, wholly within the most accessible distance outlined in the Council's settlement hierarchy topic paper. Bere Court Road is a quiet rural road and there is a footpath within 200m of the site which provides off road access to Pangbourne Hill, where there is a segregated footway into the village centre and railway station. Alternative routes into the village on foot include Courtlands Hill, which is a quiet private street.</p> <p>In 2010 planning permission was granted on appeal for the residential redevelopment of former College properties 75m to the west of the Centenary Fields site. In allowing the appeal and granting planning permission the Inspector stated that</p> <p><i>"the location's closeness to the settlement boundary would ensure that the option of a journey on foot or by bicycle would also be available ... the site's location is not unsustainable."</i></p>

This is echoed by the Council's own evidence in the settlement hierarchy topic paper which sets out the acceptable distances from services and facilities as 1km to 2km. The whole of this site lies within that area.

Technical considerations

There are no Flood Risk issues in relation to the site, with surface water drainage matters capable of being dealt with through the detailed design stage.

An initial ecological appraisal has been carried out which confirmed that there are no statutory designated sites of ecological value that would be affected by the development and that only the boundaries of the site have the potential to offer suitable habitats from some ecological species. Whilst further surveys will be required and appropriate mitigation strategies may be required to support a planning application, the retention of the mature boundaries will ensure that any species present will be protected and managed appropriately.

The site was assessed by the Council through the Housing and Economic Land Availability Assessment (HELAA) 2020 and was considered unsuitable for allocation because:

Development would result in harm to the natural beauty and special qualities of the AONB.

Development would be inappropriate in the context of the existing settlement form, pattern and character of the landscape.

Due to these constraints, the Council considered that the site would not be developable within the next 15 years.

In light of the Council's up to date evidence the site is considered to be appropriate in the context of the existing settlement form, especially given the residential enclave of properties immediately to the west of the site and the very large extensions and redevelopments of residential properties on the southern side of Bere Court Road.

This site would essentially be the infilling of the gap between an estate of houses and the existing settlement.

The location of the site on a plateau with higher ground to the north and dense screening to the south is such that there would be no adverse landscape impact and no harm to the beauty and special qualities of this part of the AONB.

LAND AT BERE COURT ROAD, PANGBOURNE

This site is located adjacent to the Bewley development known as Croft Drive, which was deemed to be a sustainable location by a Planning Inspector (location plan included at Appendix 2) [see attachment 'PS1558' .

Bere Court Road is characterised by residential plots comprising large residential properties accessed directly from the road via private driveways. This gives a 'ribbon development' effect to this area. This site presents an ideal location to add a small number of further properties to this land reflecting on the existing development pattern. It is considered that the site could be a suitable location for a number of self build development plots given the diverse style and character of the existing properties in the locality; many of which have been extensively remodelled, extended or redeveloped recently.

In sustainability terms, the facilities within Pangbourne all lie within less than 2km of the site, wholly within the most accessible distance outlined in the Council's settlement hierarchy topic paper. Bere Court Road is a quiet rural road that leads out onto Pangbourne Hill, where there is a segregated footway into the village centre and railway station. Alternative routes into the village on foot include Courtlands Hill, which is a quiet private street.

In 2010 planning permission was granted on appeal for the residential redevelopment of former College properties immediately adjacent to this site. In allowing the appeal and granting planning permission the Inspector stated that

"the location's closeness to the settlement boundary would ensure that the option of a journey on foot or by bicycle would also be available ... the site's location is not unsustainable."

This is echoed by the Council's own evidence in the settlement hierarchy topic paper which sets out the acceptable distances from services and facilities as 1km to 2km. The whole of this site lies within that area.

Technical considerations

There are no Flood Risk issues in relation to the site, with surface water drainage matters capable of being dealt with through the detailed design stage.

In light of the Council's up to date evidence the site is considered to be appropriate in the context of the existing settlement form, especially given the existing residential properties along Bere Court Road and the new properties immediately to the north of the site.

The location of the site amongst existing trees and vegetation means it would be well visually screened and such that there would be no adverse landscape impact and no harm to the beauty and special qualities of this part of the AONB.

<p>Please give reasons for your answer</p>	<p>The plan fails to consider whether Pangbourne, as a rural service centre, can accommodate development outside of the existing settlement, in particular, to contribute to meeting the needs of specialised housing as set out in Policy DM19.</p> <p>OMISSION SITE</p> <p>Pangbourne College has a suitable, available and deliverable site (Bowden Fields) which could provide elderly living accommodation to meet the ever growing need (and unmet demand) and assist with meeting the Council's housing requirement [see attachment 'PS1567 Turley (Pangbourne College) Bowden Fields Plan'].</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>The plan should be amended to identify sites in and round Pangbourne, which is identified within the settlement hierarchy (SP3) and the second highest tier settlement with extensive services and facilities available.</p> <p>Allocating sites for specialist housing, in this instance older persons accommodation / retirement living, plays a key part in allowing family housing within villages to be made available on the open market, bringing new economically active adults into the area and assisting in sustaining local services and facilities. It also provides job opportunities for the local community and allows older people to stay in their communities with additional support.</p> <p>Bowden Fields sits outside of, but less than 2km of, Pangbourne village centre. It has existing development in form of sports facilities and pitches with suitable vehicular access. The site is screened by existing trees and hedging to the south and by residential properties to all other boundaries. Bowden Fields can be developed without adverse impact on the wider landscape due to the existing screening. Access to the site can be provided from Yattendon Road to the south, with the access to be upgraded as required.</p> <p>There are no Flood Risk issues in relation to the site, with surface water drainage matters capable of being dealt with through the detailed design stage.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes	No

* No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	<p>In other representations we found much of Policy SP 1 is unobjectionable and can be supported but objection was raised to the very last sentence which has now been deleted:-</p> <p>“Allocations for housing for Hungerford, Lambourn, Compton and Hermitage will be made through Neighbourhood Development Plans”.</p> <p>However this matter had now been fudged and the LPR does not provide the required certainty. This problem is exacerbated in Paragraph 6.25 which proposes that 80 dwellings will be provided through Neighbourhood Plans and paragraph 6.41 states <i>“Additional sites will be delivered through the Neighbourhood Plans for Lambourn and Hungerford. The Neighbourhood Plans for Compton and Hermitage do not include residential allocations, and instead comprise of development management policies”</i>. No explanation is given as to why this figure of 80 has reduced from the 315 in the Reg 19 Plan. This matter is also referred to in Paragraph 6.25 of the LPR</p> <p>That is an abrogation of the function of this LPR. Neighbourhood Plans should not be making housing allocations, that is a function of the LPR, and indeed some such sites coming forward may cut across the LPR.</p> <p>Furthermore Policy SP15 (page 65) suggest that the Lambourn Neighbourhood Plan should provide 25 dwellings in addition to the sites already included in the Draft Plan (and which we suggest may not come forward).</p> <p>Indeed if the task of allocating housing sites is left to Neighbourhood Plans, especially in Lambourn, either that Plan may not come forward or, more likely, local residents will not want additional housing in their locality leaving the housing needs/requirement unsatisfied.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	No
Please give reasons for your answer	Please see other submissions on this specific point <See Rep ID: PS1170>
4. Proposed Changes	<p>The reliance on allocations through the Neighbourhood Plan process raises questions as to whether the objectively assessed needs will be met within the plan period increasing pressures on other settlements to meet the unmet need.</p> <p>The Council should allocate all housing sites through this Draft LPR and do not leave the task to Neighbourhood Plans. Amend or delete Paragraphs 6.25 and 6.41 and Policy SP15 “Total designated by Neighbourhood Area” to delete the 80 dwellings therein and replace them with allocated sites one of which could be our Clients site “Land between Folly Road, Rockfel Road and Stork House Drive (SHLAA site reference LAM007)”.</p>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	We do not consider the LPR is sound and would like to participate in the examination.

<p>Please give reasons for your answer</p>	<p>[See attached documents Lambourn Business Park cover letter and Lambourn Business Park location plan]</p> <p>West Berkshire Local Plan Review 2022-2039 – Proposed Submission Version (Regulation 19) Representations on Behalf of Lambourn Business Park</p> <p>On behalf of Lambourn Business Park, we write to submit representations to the West Berkshire Local Plan Review 2022-2039 Proposed Submission Version.</p> <p>We support the general thrust of the plan and approach to development, however, it is our view that our client's site (land adjacent to Lambourn Business Park) represents a suitable and deliverable site for housing and should therefore be included within the non-strategic site allocations identified under Policy SP15 and Chapter 8 for the North Wessex Downs AONB Area. This amendment will result in a plan that is positively prepared, justified and effective and will ensure that the housing targets for the North Wessex AONB Area are achieved.</p> <p>This site (1.9 hectares) could deliver a high quality development which makes efficient use of the land and should be included for the reasons set out below. The site has also been submitted as a potential housing site in response to separate consultation in respect of the Lambourn Neighbourhood Development Plan.</p> <p>In order to be found sound at Examination in Public, the policies in the draft Local Plan need to comply with the tests of soundness set out in paragraph 35 of the NPPF (July 2021). The plan must be:</p> <p>a) Positively prepared – <u>providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs</u>; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;</p> <p>b) Justified – an appropriate strategy, <u>taking into account the reasonable alternatives</u>, and based on proportionate evidence;</p> <p>c) Effective – <u>deliverable over the plan period</u>, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and</p> <p>d) Consistent with national policy – <u>enabling the delivery of sustainable development</u> in accordance with the policies in this Framework." (author's emphasis underlined).</p> <p>Policy SP3 of the emerging Local Plan identifies Lambourn as a Rural Service Centre offering development potential appropriate to the character and function of the settlement.</p> <p>Policy SP1 of the emerging Local Plan identifies the spatial strategy for West Berkshire to:</p> <ul style="list-style-type: none"> • Direct development to areas of lower environmental value; • Optimise the use of previously developed land; and • Optimise the density of development to make the best use of land whilst conserving and enhancing the distinctive character and identity of the built, historic and natural environment. <p>Policy SP2 of the emerging Local Plan (North Wessex Downs AONB) states that the North Wessex Downs Area AONB will have appropriate and sustainable growth that conserves and enhances its special landscape qualities.</p> <p>The proposed site offers the potential to deliver housing in accordance with emerging policies SP1 – SP3 for the following reasons:</p> <ul style="list-style-type: none"> • The site is 'wrapped around' by other parts of the business park (see below). There is built development on three sides and a number of established buildings on the fourth. Therefore the development would

be 'infill' development that could be incorporated into the existing surrounding built form without any westward incursion into the countryside beyond the existing built form of the business park.

[See image within attached Cover Letter]

- Today, Lambourn Business Park (to the east and south of the site) is established as a location for office / industrial and storage use and designated as a Protected Employment Area in the Council's Local Plan. The proposed site benefits from an extant planning permission (11/01822/OUTMAJ) for commercial development but remains vacant (see approved layout below). The approved buildings are single storey and do not make efficient use of the site. The site has been marketed but commercial development is not viable at the current time. However, the planning permission remains 'extant' which means it could be built in the future if market forces change.

[See diagram within attached Cover Letter]

- Up until now the site has been underutilised, considering its historic use and long-established planning consent for redevelopment. Aside from the site's position within a designated AONB there are no other known constraints to development. The site is positioned within an established business park with an extant planning consent for commercial development and is not considered to make a positive contribution to the AONB.
- Through a landscape-led approach to layout, scale, density and design the development offers the opportunity to make a positive impact on the landscape.
- Buffer planting will serve to soften and screen the development from the adjacent business park and surrounding landscape alongside additional opportunities to 'green' the site through play and drainage features.
- The proposals seek to deliver up to 25 new homes (see sketch below). The development would offer a range of housing types and tenures, informed by local housing needs. It would include affordable housing.

[See image within attached Cover Letter]

- Mixed use development would add vitality to the business park, particularly at evenings and weekends. Night-time activity would naturally add security and safety to the business park. None of the existing activities at the business park would preclude adjacent residential development.
- Access would be provided via the existing and retained business park to the east, along the Public Right of Way which dissects the site.
- The site could come forward independently or as part of a wider site incorporating land to the west (which already has some limited buildings) within the plan period, subject to the needs of existing businesses currently located on the site. As part of the wider site, this could deliver a meaningful contribution to the housing targets for this spatial area with limited impact on the AONB.
- The site (including the wider site) is within a single ownership and is available immediately for development.

Allocation of this site within Policy SP15 of the Local Plan will accord with emerging policy SP1 of the Local Plan on the basis that the site benefits from an extant planning permission and is therefore tantamount to previously developed land, it represents an opportunity to make a positive impact on the landscape and AONB and would make efficient use of the land (unlike the extant planning permission).

In order to ensure that the Local Plan is effective and justified, and ultimately sound, this site should be included within Policy SP15 the Local Plan as a non-strategic site allocation in the North Wessex AONB.

If the Council and / or appointed Inspector wanted to consider a larger housing allocation then our client would be open to considering residential development on the wider site in their ownership (see attached location plan showing the proposed site in red and wider land ownership in blue).

We request to be kept informed as the plan progresses and would like to participate in the Examination Hearing sessions to ensure our client's case is fully understood.

Please do let us know if you have any queries or would like to discuss.

2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.	

<p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>Policy SP15 (Sites allocated for residential development in North Wessex Downs AONB) – Thakeham is supportive of this policy, encouraging neighbourhood plans being prepared in Lambourn and Hungerford to allocate housing. However, we would re-emphasise the point about making sure that each allocation is deliverable.</p> <p>Policy RSA14 (Land Adjoining Lynch Lane, Lambourn. Site ref. HSA19) – Thakeham notes that this site was allocated in the 2017 Site Allocations Plan where the policy states “<i>This site is expected to deliver early and to contribute immediately to the supply of land needed to demonstrate a five year housing land supply</i>”. Despite this, the site has not commenced, and successive Annual Monitoring Reports fail to give any justification. As stated elsewhere in these representations, the Council should not just allow these allocations to roll forward unless there is a reasonable prospect of them being delivered, or at least supporting them with additional allocations should they continue to prove undeliverable, with sites that are demonstrably available, suitable and deliverable, such as the Site at Wantage Road, Lambourn.</p> <p>Thakeham supports the creation of the Reg 19 Local Plan and looks forward to engaging further. Currently however we have concerns in relation to the wording of the policies, their evidence base and therefore on the overall soundness of the Reg 19 Local Plan as drafted. Whilst the Council’s evidence underpinning certain policies is strong, in others it is notably weak.</p> <p>Thakeham has interests across West Berkshire, including land at west of Wantage Road, Lambourn.</p> <p>Land at West of Wantage Road, Lambourn (“the Site”)</p> <p>Please find enclosed a Vision Document for the Site at Lambourn, which should be read alongside our commentary herein. In summary, it is considered that a sensitive development of the Site could accommodate the following:</p> <ul style="list-style-type: none"> • Delivery of 10% Biodiversity Net Gain; • Delivery of zero carbon homes in lifetime operation; • Circa 27 new homes comprising a variety of accommodation to attract different households; • Policy compliant provision of affordable housing, in tenure blind design; • Scope for delivery of housing to meet the needs locally of those in the racing industry; • New local facilities (allotments indicatively proposed); • The provision of an open community recreation space; • A focus on sustainable transport through the provision of a new access in addition to pedestrian links into the existing neighbouring <p>Alongside undertaking this review of the Reg 19 Local Plan, Thakeham has engaged with the ongoing preparation of the Lambourn Neighbourhood Development Plan (LNDP). In July 2022, the LNDP Steering Group issued a Call for Sites, having identified a need for further homes within Lambourn. Thakeham submitted the Site to be assessed and considered for allocation within the emerging LNDP on 31 August 2022.</p> <p>In January 2023, the LNDP Steering Group undertook a public consultation on the nine proposed housing sites that had come forward via the Call for Sites process, asking for feedback from the local community. Of those who responded, and who expressed a first- choice preference, 55% stated that the Site at Land West of Wantage Road was their preferred option, with the second-most preferred Site achieving just 16% of the responses. Thakeham therefore considers that the Site is generally well supported among</p>

	<p>the local community and represents the most sustainable and acceptable location for housing development in the Village.</p> <p>Attachment Fig1: Lambourn Neighbourhood Development Plan, Preferred Sites consultation 2023. <p>Please give reasons for your answer</p>	<p>3. Regulation 19 Proposed Submission document representations</p> <p>Proposed residential site allocations</p> <p>3.17 Having taken into account existing commitments and windfalls, the draft Plan proposes the delivery of 4,252 dwellings through specific housing allocations. The following allocations are retained allocations from the adopted Core Strategy and Site Allocation documents.</p> <p>3.20 The following sites are proposed within the North Wessex Downs AONB:</p> <p>Retained allocations</p> <ul style="list-style-type: none"> • Land adjoining Lynch Lane, Lambourn (RSA14) – 60 dwellings • Pirbright Institute site, High Street, Compton (RSA18) – 140 dwellings • Land off Charlotte Close, Hermitage (RSA20) – 15 dwellings • Land at Newbury Road, Lambourn (RSA15) – 5 dwellings • Land north of South End Road, Bradfield Southend (RSA16) – 20 dwellings • Land west of Spring Meadows, Great Shefford (RSA19) – 15 dwellings • Land to the south east of the Old Farmhouse, Hermitage (RSA21) – 10 dwellings

New allocations (totally 69 dwellings):

- *Land at Chieveley Glebe (RSA17) - 15 dwellings*
- *Land adjacent Station Road, Hermitage (RSA22) – 34 dwellings*
- *Land adjacent to The Haven, Kintbury (RSA23) – 20 dwellings*

3.21 Some of the above allocations are retained from the previous adopted plan period of 2006 – 2026 due to the overlap of the plan period for the emerging plan (2022 – 2039). These amount to 2,652 dwellings that were outstanding from the previous plan period at 31st March 2022.

3.22 New sites proposed for allocation in the new plan period total 1,720 dwellings, which with 1,500 proposed at North East Thatcham.

3.23 The proposed allocated sites are listed in the table below, along with a review of their current planning status. We would question why some are retained as allocations, rather than commitments, given their planning status.

Retained allocation from Core Strategy: Land adjoining Lynch Lane, Lambourn 60 dwellings

Planning status: No planning application submitted at the current time. Delivery timings unknown.

Retained allocation from Core Strategy: Pirbright Institute site, High Street, Compton 140 dwellings

Planning status: Outline application 20/01336/OUTMAJ for up to 160 homes approved February 2022, subject to S106 agreement. Resolution to approve at planning committee in February 2023, in accordance with previous resolution in 2022.

Retained allocation from Core Strategy: Land off Charlotte Close, Hermitage 15 dwellings

Planning status: Full application 20/00912/FULEXT for 16 dwellings approved in October 2021. Various discharge of conditions have been approved throughout 2022.

The developer anticipates delivery of residential units in 2023/24.

Retained allocation from Core Strategy: Land at Newbury Road, Lambourn 5 dwellings

Planning status: Full application 20/00972/FULMAJ for 8 dwellings approved September 2021. This site is also subject of a pending planning application for 5 dwellings (22/00277/FULMAJ) submitted in Feb 2022. This is pending determination.

Retained allocation from Core Strategy: Land to the south east of the Old Farmhouse 10 dwellings

Planning status: Outline application for 21 dwellings approved November 2018. Reserved matters application 21/02923/RESMAJ submitted in November 2021 and pending determination.

4. Sustainability Appraisal scoring for Land at Long Lane, Newbury

Conclusions on site selection and SA

4.20 We consider that the LPR Sustainability Appraisal (“SA”) has therefore not considered reasonable alternative options, which is inarguable given the omission of any consideration of sites not included within the Plan. The SA is therefore in breach of the SEA Directive and the SEA Regulations and these breaches are fatal to the legality of the LP.

4.21 Additionally, it calls into question the entire site selection process if a site has been assessed and rejected for technical reasons when no legitimate and substantiated technical reasons exist to justify

	<p>such an outcome. This, we submit, suggests that the entire site selection process is fundamentally flawed, particularly given the conflict with the identified spatial strategy.</p> <p>4.22 The draft Plan proposes sites in the AONB, and the eastern area which does not accord with the Council's spatial strategy.</p> <p>4.23 There are only two strategic site allocations (SP16 Sandford Park and SP17 North East Thatcham), the remainder are relatively small sites (between 15-160 dwellings). The Sandford Park allocation has outline planning permission allowed at appeal for two-thirds of the allocation. The remainder of the site is under Donnington New Homes' ownership and there is a live planning application pending determination (reference 18/00828/OUTMAJ).</p> <p>4.24 It is considered the plan does not propose medium sized sites that can come forward in the interim period to ensure housing delivery. The site at Long Lane for approximately 260 dwellings can provide a medium sized site that is available and deliverable under land controlled by Donnington New Homes. The SA conclusions state that the negative and uncertain effects may be able to be mitigated further. It is considered the uncertain and negative effects identified in the SA can be overcome through a well-designed scheme and submission of information, resulting in positive impacts.</p> <p>4.25 The planning merits of the Site considered in section 2 of these representations demonstrate that there are no in-principle technical barriers to prevent residential development of the site.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
<p>5. Independent Examination</p>	Our position is that the site should be included as a proposed residential allocation and that the LPR does not provide enough sites to provide sufficient housing supply.

Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	Policy SP15 of the Plan identifies part of the 'Land north of Southend Road, Bradfield Southend' as a site allocation for approximately 20 dwellings. A site-specific Policy is included at Policy RSA16. Rivar, in principle, support the allocation of the 'Land north of Southend Road, Bradfield Southend' for residential development in Policies SP15 and RSA16. <i>[For comments relating to policy RSA16, see PS1534]</i>

3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No

Please give reasons for your answer	<p><Full Representation and appendices attached></p> <p>These representations have been prepared by Nexus Planning on behalf of Pangbourne Beaver Properties Ltd, in response to the West Berkshire Local Plan Review 2022-2039 – Regulation 19 consultation (“the Plan”).</p> <p>We object to Policy SP15 as the site allocations made therein are internally inconsistent with the identified spatial strategy and settlement hierarchy as set out elsewhere in the Plan.</p> <p>Given the Council's acceptance that some residential development is justified / necessary in the North Wessex Downs AONB area (a conclusion with which we agree), we object to the subsequent failure of the Plan to allocate <u>any</u> development at Pangbourne (a Rural Service Centre as identified in Policy SP3) whilst allocating development in materially less sustainable locations, and on sites that are far less logical / justifiable than Site Ref: PAN8 at Pangbourne (Land to the north of Sheffield Place) as identified in the HELAA 2020 (updated in 2023). Site Ref: PAN8 adjoins the existing settlement of Pangbourne to the east and to the south, is within easy walking distance of Pangbourne railway station and the village centre, and sits well within the landscape.</p> <p>We can only assume that the failure to allocate Site PAN8, the only material site available at Pangbourne, is based on the conclusions of the Council's HELAA 2020 / 2023. However, we submitted representations to that document in 2020 identifying fundamental flaws and inaccuracies in relation to its conclusions relevant to Site PAN8 - flaws / inaccuracies that have not been either acknowledged or subsequently corrected. As a consequence, this site has not been allocated for development and as a result, Pangbourne has not been allocated <u>any</u> growth despite the Council's acceptance of the need for development in the North Wessex Downs AONB, and the inherent sustainability of Pangbourne as a settlement.</p> <p>We support the Vision and Strategic Objectives that are set out in Section 3 of the Plan, and the three key policies upon which the 'Place-Based Approach' is structured. However, the allocations made in the Plan do not accord with the identified Vision / Objectives / Policies and accordingly we have additionally submitted objections to the following policies:</p> <p>SP1 - The Spatial Strategy SP2 - North Wessex Downs AONB SP3 - Settlement Hierarchy.</p> <p>Policy SP1 identifies a strategy (with which we agree in principle) that includes the provision of appropriate and sustainable growth within the North Wessex Downs AONB spatial area. This objective is repeated in Policy SP2.</p> <p>Policy SP2 is also clear (and we again agree) that development within each spatial area will follow the districtwide settlement hierarchy, which takes account of the function and sustainability of settlements.</p> <p>Policy SP3 identifies this settlement hierarchy (see Appendix 1) identifying Pangbourne as one of six 'Rural Service Centres' i.e. settlements acknowledged by the Council to benefit from a good range of key services and opportunities for employment, community and education, serving a wide catchment area and containing reasonable accessibility and regular public transport provided to a number of destinations (and behind only the Urban Areas of Newbury, Thatcham and the Eastern Urban Area in terms of sustainability). At Appendix 2 to this representation we have re-provided the 'Audit Matrix and</p>

Settlement Scores' for each village as produced by the Council. At **Appendix 3** we have provided, for ease of reference, an extract of Policy SP15 itself.

Pangbourne, notably, and unlike the other Rural Service Centres such as Burghfield Common and Lambourn, has a mainline railway station providing access to Oxford, Reading and London. This is a significant sustainability benefit and makes it even more important as a location for some residential development.

The locational and policy advantages of Pangbourne are identified on the 'Constraints Plan for Pangbourne' taken from the West Berkshire Interactive Map and re-provided at **Appendix 4**.

Policy SP15 proposes to make allocations of between 15 and 140 homes on sites in the North Wessex Downs AONB area at Hermitage, Compton, Lambourn, Chieveley and Kintbury, and to make further smaller allocations of between 5 and 20 units at Lambourn, Bradfield Southend, Great Shefford and Hermitage. However, it makes no allocations at all at Pangbourne despite it having the fourth highest settlement score according to the Council's own Audit Matrix and Settlement Scores i.e. the Plan makes residential allocations at locations that the Council itself accepts are less sustainable than Pangbourne. This approach is wholly unjustified, inappropriate, internally inconsistent and unsound, resulting in a Plan that does not meet or consider the needs of Pangbourne, and with an unsustainable pattern of development that fails to recognise the inherent sustainability of the settlement of Pangbourne.

The plan below, which uses the West Berkshire Core Strategy Key Diagram as its base but which we have annotated, show the levels of housing proposed in the Plan at the various settlements within the North Wessex Downs AONB area. As can be quickly appreciated from this plan, a relatively significant quantum of housing is proposed at a range of lower level settlements whilst Pangbourne, despite being one of the most sustainable locations in this part of the district (and the district as a whole), is allocated with no housing despite the availability of appropriate sites, most specifically Site PAN8 as referenced further in these representations.

<See map on page 4 of attached document 'Nexus obo Pangbourne Beaver Properties_SP15 Attachment 1'>

Why Pangbourne Needs Housing

Beyond existing commitments, the failure to allocate any additional housing at Pangbourne in the Plan means that no additional provision is made to meet local housing needs over the 17-years covered (2022 to 2039). Over this period, the reliance only on existing commitments (53 dwellings) equates to housing growth at Pangbourne of only 3 dwellings per annum (dpa).

Delivery of 53 dwellings would accommodate population growth over the Plan period of around 127 persons (based on an assumed 2.4 persons per household) - broadly a population change of 7 persons per annum. However, Census 2011 and Office for National Statistics (ONS) Mid Year Estimates (MYEs) indicate that Pangbourne's population has increased by an average of 35 persons per annum between 2011 and 2019 (a total change of 277 total persons) – a rate of change very meaningfully greater than that provided for in the Plan. Analysis of the Census 2011 and the MYEs also indicates that the resident population of Pangbourne Parish has consistently been around 2% of West Berkshire's total resident population.

The Council's monitoring data confirms that over the five monitoring years (2015/16 to 2018/19), an average of 11 dpa have been delivered at Pangbourne. Over a longer 10-year monitoring period (2009/10 to 2018/19), an average of 8 dpa have been delivered.

Overall, trend analysis would suggest that housing growth of at least 8 - 11 dpa would be required at Pangbourne to support the continuation of trend-based population change over the Plan period. This equates to delivery of between 136 and 187 dwellings over the Plan period, with the mid-point being 10 dpa (or 162 dwellings over the Plan period).

Notably, 2% of the Policy SP12 minimum housing target for the District (513-538 dpa) equates to 10-11 dpa (or 170-187 dwellings over the Plan period) - a level of growth broadly similar to housing growth trends at Pangbourne but a figure which also includes an appropriate affordability and 'significantly boosting' housing growth uplift. Indeed, Land Registry housing affordability indicators show that median house prices at Pangbourne (£579k for the year ending December 2019) are meaningfully higher than West Berkshire as a whole (£392k for the year ending December 2019).

Provision of only around 3 dpa at Pangbourne, relying on existing commitments only, is therefore wholly inappropriate and unsound and will not, contrary to Policy SP1, provide for appropriate and sustainable growth that has regard to the district-wide settlement hierarchy. The approach is also inconsistent with national policy which states (National Planning Policy Framework paragraph 78) that housing should be located where it will enhance or maintain the vitality of rural communities. Planning policies should identify opportunities for villages to grow and thrive, especially where this will support local services.

It is acknowledged within the AONB that the scale and extent of development should be limited (Framework paragraph

176) but as outlined above, delivery of only 3 dpa within one of the district's most sustainable Rural Service Centres is a level of growth which is significantly below that required to meet local market and affordable housing needs, and maintain the settlement's vitality over the Plan period, and beyond.

Delivery of at least 10 - 11 dpa (170-187 dwellings over the Plan period) should, therefore, be proactively planned for at Pangbourne. In addition to the 53 homes that already form commitments at Pangbourne, land to accommodate between 109 and 151 additional dwellings should be allocated within the Local Plan. As outlined later in these representations, Site Ref PAN8 can contribute towards meeting these local housing needs.

Sites Allocated for Development in the North Wessex Downs AONB

As referenced previously, the Council's approach to the allocation of sites within the North Wessex Downs AONB area is unsound given the wholly unjustified absence of any provision at the highly

sustainable settlement of Pangbourne. To demonstrate this further, and the conflict it creates with the Plan's own Vision and spatial strategy, we have undertaken an assessment of those sites that are proposed to be allocated in Policy SP 15. This assessment provides the following for each of these sites:

- a. Site allocation plan – West Berkshire Council.
- b. Site allocation policy – West Berkshire Council
- c. Aerial photograph to show the site in context
- d. Settlement Hierarchy and HELAA designation
- e. Environmental designations
- f. Our high level commentary on planning history and qualities of the site

Of the six 'Large sites' (1ha or larger) that have been allocated two sites:

- RSA 18 Compton; and
- RSA 20 Charlotte Close, Hermitage

have planning permission and we cannot therefore question them.

Of the four 'Small and Medium sites' (less than 1 ha) that have been allocated two sites:

- RSA 15 Newbury Road Lambourne; and
- RSA 21 Land to the south east of the Old Farmhouse at Hermitage

also have planning permission and we cannot now question these.

As such, our assessment focusses on the six remaining proposed allocations. This allows a relative assessment to be carried out with Site Ref: PAN8 at Pangbourne. From this, it can clearly be seen that the allocated sites are in materially less sustainable locations, are less well-located having regard to their relationship with existing settlements, and have similar / greater landscape and / or ecological impacts. Accordingly, the allocation of these sites, in the absence of an appropriate allocation at the materially more sustainable Pangbourne, does not comply with the strategic objectives of the Plan and in particular Policies SP1, SP2 and SP3. Appendix 5 of this representation is the analysis of these sites according to the criteria set out in paragraph 3.1 above. In summary, however, we note the following in relation to these 6 sites:

RSA 14 Lynch Lane, Lambourn – (Current Policy Ref HSA 19) - Lambourn is a settlement that is materially less sustainable than Pangbourne. It is a site originally allocated in the Housing Site Allocations DPD (201) ("HSADPD") but it is constrained by a number of environmental factors including flood risk associated with the River Lambourn to the north and a SSSI. In addition, on the basis that this site was originally allocated in the HSADPD but has still not been developed, its deliverability must be questioned.

RSA 17 Land at Chieveley Glebe – This site comprises ribbon development at a village with a low sustainability score (26) in the Council's own Audit Matrix and Settlement Scores.

RSA 22 Land adjacent Station Road, Hermitage – A large extension (34 homes) to a village with a low sustainability score in the Council's Audit Matrix and Settlement Scores (24).

RSA 23 Land adjacent to The Haven, Kintbury – A relatively incongruous extension to a well-established settlement boundary, at a settlement that scored only 29 in the Council's Audit Matrix and Settlement Scores paper.

RSA 16 Land north of South End Road, Bradfield Southend – A large extension (20 homes) to a village with a low Settlement Score (21) as identified in the Council's Audit Matrix and Settlement Scores document. The northern boundary of the site is undefined by physical features and it has a poor site access.

RSA 19 Land west of Spring Meadows, Great Shefford – An exposed and relatively incongruous extension to a small village with a low Settlement Score (22) as set out in the Council's Audit Matrix and Settlement Scores document.

We consider that the allocation of these sites, in the absence of the allocation of any new development at the materially more sustainable settlement of Pangbourne (that scores 40 in the Council's Audit Matrix and Settlement Scores document), and specifically Site PAN8, means that Policy SP15 conflicts with the Council's Vision and spatial strategy, and the objectives of Policies SP1, SP2 and SP3, and is unsound. For comparison, Section 4 of these representations assesses the PAN8 site at Pangbourne against the same criteria applied to the above sites.

The Merits of land to the North of Sheffield Close in Pangbourne (PAN8)

For all of the reasons identified previously, and elsewhere in our representations, it is evident that provision must be made for additional housing at Pangbourne. In this regard, the only realistic site that is available for any meaningful quantum of residential development is site reference PAN8, which is accessed from Sheffield Place.

This site is gently undulating land that is well-screened by existing trees and hedges. It is a short walk from the centre of Pangbourne, via a pedestrian ramp that abuts Pangbourne Hill in the south east corner of Sheffield Place. It will form a natural extension to the village. It is also in close proximity to Pangbourne railway station, that provides access to services to Reading and Oxford.

The 'West Berkshire Landscape Sensitivity Assessment 2011 – Site Reports PAN 002' considered the merits, in landscape terms, of the large open field (as it was then) that ran from Pangbourne Hill in the south to the railway line in the north. This concluded that development was possible in this location, recommending more specifically that:

"Recommendations

- *Development on this site should be subject to the following constraints to ensure the protection and enhancement of the AONB:*
- *The mass and scale of development should not be visually intrusive and must not detract from views of the Thames valley and the Chilterns*

- *The western boundary should be planted with a linear woodland designed to respect the local topography and vegetation pattern and contain the settlement*
- *The continuous bank and tree cover along Pangbourne Hill/Road should not be broken to provide access to the site*
- *The development should be in keeping with the mass, scale and density of the western part of Pangbourne and include a high level of landscape infrastructure as found in the adjacent Breedon Estate*
- *The layout should work with the grain of the topography and be restricted to lower slopes below the 75m AOD contour, or 70m AOD where the site is more visually exposed.”*

Since that Recommendation was made, the residential development (now known as Sheffield Place) has been completed together with significant woodland planting along the western boundary and across the ridge at the top of the valley at the northern end of the Site, that runs from west to east. This development and planting has transformed the Site and it is now well-enclosed.

The site is located to the west of Riverview Road, and so is substantially above the flood plain. The Landscape Sensitivity Assessment that was undertaken by West Berkshire Council in 2011 indicated that development should be restricted to land below the 75m AOD contour. The development of Sheffield Place has adhered to this guide, as could proposed development of the PAN8 site. The overall site has an area of approx. 5.6 ha, including the existing woodland planting areas. Proposed development would occupy only 50% of the site and could accommodate either:

- Approximately 39 dwellings comprising a mix of two storey houses and flats; or
- A 75-bed senior living Care Home together with approximately 28 dwellings.

Both would include a policy-compliant level of affordable housing.

These alternative concepts are shown graphically on the masterplans below:

<See plan on page 9 of attached document 'Nexus obo Pangbourne Beaver Properties_SP15 Attachment 1'>

Appendix 6 is an analysis of the site according to the criteria set out in paragraph 3.1 of these representations.

The Council's HELAA concludes that Site PAN8 was unsuitable for housing for the following three reasons (the last two of which both relate to landscape matters):

“Development would impact upon local highway network.

Development on the whole site would be inappropriate in context of the existing settlement form, pattern, and character of the landscape.

Concerns that development will result in harm to the natural beauty and special qualities of the AONB.”

We do not accept that any of these reasons can be substantiated, as we have set out previously to the Council.

To demonstrate this further, we have produced reports that address each of issues (which are appended) and summarised in the following sections of this representation.

Landscape Impact/Impact on the AONB

A Preliminary Landscape and Visual Appraisal (PLVA) has been undertaken by EDP (see Appendix 7) which notes, inter alia, that the findings of the Council's HELAA contain a number of inaccuracies in relation to landscape matters, which are summarised as follows:

1. Site Location – the HELAA states that the site only abuts Pangbourne Settlement Boundary to the east, whereas Figure EDP 3.1 shows the southern boundary also abutting the settlement boundary;
2. Landscape Capacity – the HELAA has assumed a capacity of 72 dwellings, whereas representations previously submitted state a maximum of 40 dwellings;
3. Landscape Character – the HELAA states that a key issue for the site is potential significant harm to the special qualities of the AONB. However, the baseline study identified that development of the site would not be likely to affect the special qualities and that any relevant key issues can be mitigated through good design;
4. Landscape Character – the HELAA identified the site within the incorrect Landscape Type and Character Area within the West Berkshire Landscape Character Assessment (August 2019). Conclusions are, therefore, made on the basis of incorrect baseline information and cannot be relied upon;
5. Visual Amenity – conclusions relevant to the visual amenity of the site appear to have been made on the findings of the Landscape Sensitivity Assessment carried out in 2011 i.e. before the significant woodland planting within the site was implemented and omitting nine years of growth of the surrounding vegetation. It is clear that no site visit has taken place since this date - a key omission in relation to the identified 'suitability conclusions'.

As a result, the PLVA considers that the basis on which the 'unsuitable' conclusion was made for Site Ref PAN8 is flawed and cannot be relied upon.

Furthermore, the PLVA concludes, inter alia, that:

1. due to the influence of a number of urbanising features within and adjacent to the site, it is considered to have a close relationship to the western urban edge of Pangbourne, rather than the rural landscape associated with the open downlands to the west;
2. whilst the site is located within the North Wessex Downs AONB and in close proximity to the Chilterns AONB, the implementation of the suggested landscape strategy principles would ensure the identified Special Qualities of both are conserved and, where possible, enhanced;
3. visually, the site is well-contained to the south and west by existing vegetation and topography;

- 4. it is possible to develop a scheme which provides new housing while respecting the sensitivity of the site and thereby minimising adverse effects on landscape character and visual amenity; and
- 5. in landscape and visual terms, the site has capacity to accommodate residential development following the landscape principles set out within the report, and as set out within the two masterplan options.

Highways Impact

A Transport Statement (2023) prepared by Bellamy Roberts is provided at Appendix 8 and has been prepared in response to the assertions in the Council's HELAA as to the unacceptable impacts of development of the site on the highway network. In summary this report concludes that:

- 1. the adjacent development at Sheffield Close (35 dwellings) was granted planning permission by the Council (Ref. 15/03320/OUTMAJ) in 2016 based on 2015 traffic survey data. Although some concern was expressed at the time by the Local Highway Authority in relation to the junction of Pangbourne Hill and the A340, this concern was not sufficient to warrant a recommendation to refuse the scheme;
- 2. Pangbourne Beaver Properties Ltd commissioned a traffic survey at the Pangbourne Hill / A340 junction in 2023 to allow a comparison between the baseline data in 2015 to support the approved (and now constructed development) at Sheffield Close and now;
- 3. the 2023 traffic survey confirms that the overall traffic flows through this junction have reduced when compared to 2015, in both morning and evening peak hour periods;
- 4. the introduction of new development on Site Ref: PAN8 would (assuming 100% of vehicles travelled via the Pangbourne Hill / A340 junction) increase flows by circa 21-25 vehicles (2-way). However, such an increase would still not result in flows at this junction at 2015 levels. In other words, current flows plus flows generated by the development of Site Ref: PAN 8 would not result in the traffic flows being greater than the 2015 flows;
- 5. consideration was also given to the accident rate at this junction and it was found there has been no material change in the number of accidents and circumstances that has occurred along the local road network between 2015 and 2023;
- 6. as such if the Local Highway Authority is to be consistent in its approach, it should reach the same conclusion as it did in 2015 i.e. that development can take place without unacceptable highways impacts;
- 7. the access to the site would be safe and suitable for all users; and
- 8. the traffic impact would not be severe and it would not be any worse than it was when permission was granted for 35 dwellings in 2015. As such in considering Site Ref: PAN8, there are no valid highway reasons to find the site suitable for residential development.

Conclusion

This representation and its associated appendices sets out why Policy SP15 of the Plan is unsound.

Policy SP15 fails to make any development allocations at Pangbourne despite the settlement's need for development, its inherent sustainability as a Rural Service Centre which benefits also from a railway station, and contrary to the Vision, objectives and spatial strategy set out in the Plan.

Whilst failing make any allocations at Pangbourne, Policy SP15 somewhat inexplicably makes a series of allocations in the North Wessex Downs AONB area at settlements that are significantly less sustainable than Pangbourne. Furthermore, these sites would have environmental impacts that are similar to or often greater than Site PAN8 at Pangbourne.

The allocation of PAN 8 would have the following benefits:

- provide either a senior living-led development or family housing including 40% affordable units in a sustainable location;
- pedestrian access to the village centre via the south east corner of Sheffield Close which links onto Pangbourne Hill;
- the existing woodland and boundary planting creates a well-enclosed site with limited impact on the AONB and in a well landscaped setting;
- existing overhead electricity cables that are visually intrusive and detrimental to the setting of the site can be placed underground; and
- an area of replacement grassland can be established to provide a replacement for the lost grassland and provide 10% biodiversity net gain.

We have additionally demonstrated that the reasons identified in the Council's HELAA for discounting Site Ref: PAN8 cannot be substantiated and as such provide no justifiable reason for not making this allocation at Pangbourne.

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p><Full Representation and appendices attached> For the reasons set out in these representations, the approach to housing provision in the North Wessex AONB area as set out in Policy SP15, which makes no provision for development at Pangbourne, is fundamentally unsound.</p>

	<p>It should be corrected through a review of the approach to the allocation of sites in the North Wessex AONB area and specifically, the allocation of Site PAN8 at Pangbourne, as the most sustainable location for development in this spatial area. We include a plan below, using the same style and legend as the other allocations in the Local Plan, to identify how this allocation might be taken forward in the Plan.</p> <p><i>See map of site in attached document 'Nexus obo Pangbourne Beaver Properties_SP15 Attachment part 1></i></p>

<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan</p>	Yes

<p>provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	Yes
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	<p>The Plan preparation has failed to adequately consider alternative and additional sites within the village of Bradfield Southend. The arbitrary cap placed on housing allocations within the village harms the viability of local shops and services.</p> <p>These representations make the case for consideration of an additional allocation of BRAD6 (Land at Ash Grove) within Bradfield Southend. Additional Landscape and Highways investigative works confirm that previous objections to the scheme can be suitably mitigated. The promoters support the concepts of the Plan, however differences in decision making question the overall soundness of the proposed strategy. The scheme has demonstrable and unique community benefits for the village which have been overlooked in favour of alternative sites. Benefits include:</p> <ul style="list-style-type: none"> • The donation of 0.46ha of land to Bradfield Church of England School • Potential highway safety improvements associated with a reconfiguration of the School site to allow drop-off / pick up onsite to alleviate congestion on Cock Lane. • Additional residents to halt the population decline and help safeguard the viability of shops and services within the village - including the school which is significantly under capacity. • Significant improvements to the woodland landscape buffer surrounding the site. • Retention of the paddock land to the northern part of the site. • <p>The site remains available and deliverable and the site promoters Friday Street Developments Ltd are keen to work collaboratively with the Council to bring the site forward in the early part of the Local Plan period.</p> <p>Introduction</p> <p>These representations have been prepared by Pegasus Group on behalf of our client Friday Street Developments Limited in respect of land to the rear of Ash Grove, Bradfield Southend ('the site'), as enclosed at Appendix 1 (Site Location Plan).</p> <p>These representations are submitted in response to the current West Berkshire Local Plan Review Regulation 19 'Proposed Submission' consultation, which sets out the Council's proposed approach to accommodating growth across the district over the next plan period (2022-2039) and identifies a number of sites for allocation to meet these needs.</p> <p>At this stage of the Local Plan Review preparation, the site is not proposed for allocation.</p>

The purpose of these representations is primarily to respond to the feedback given by the council at earlier stages of the Local Plan-making process and to reaffirm the deliverability (suitability, availability and viability) of the above site, to highlight the substantial benefits associated with the proposed scheme, and to make the case for additional housing allocations within Bradfield Southend. With consideration of this, it is proposed that the site be included as a mixed allocation for residential (up to 16no. dwellings) and educational land (0.46ha).

These representations build upon, and should be read in conjunction with, the previous representations made to West Berkshire District Council at prior stages of the Local Plan Review process as these highlight the overall benefits of the scheme. Notwithstanding this, the scheme has now evolved to be shaped by the feedback received from consultees and West Berkshire Council, and these representations highlight these changes which materially and positively impact upon the deliverability of the site.

The landowner is fully supportive of the broad concepts of the draft Local Plan, including the spatial strategy, settlement hierarchy and quantum of development across the district.

In particular noting that proposed housing targets are not capped and will therefore allow additional flexibility in housing delivery, especially where larger allocations do not come forward as anticipated. However, it is considered that the Council has failed to adequately assess the deliverability of the site (referenced within previous submissions as BRAD6) and the significant benefits the site can provide to the community as a whole.

These representations are made on the basis of further works which have been undertaken to demonstrate the deliverable benefits of the scheme for the local community and to nullify previous objections to the development of the site. In addition, the revised proposals for allocation reduce quantum of development to 16 dwellings in total to balance housing delivery with the constraints of the site and now includes the addition of approximately 0.46ha of education land.

This revised promotion illustrates that the delivery of the site would result in substantial and unique community benefits within the village. These include, but are not limited to, alleviated school congestion and improving pedestrian safety on Cock Lane, significant enhancement of the existing woodland buffer, and additional housing to secure the ongoing viability of the school and services within the village. These are achieved alongside the retention of the paddocks and donation of 0.46ha of adjoining land to the Primary School. The retention of existing paddocks and donation of land to the school is enabled by the concentration of residential development to the south-eastern corner of the site, a strategy which had been endorsed by previous Landscape Capacity Assessments undertaken for the Council. The proposed allocation presents an opportunity to not only deliver the benefits outlined above but also deliver these with minimal landscape impact upon the AONB.

Previous Promotions

The site has previously been promoted at each stage of the Local Plan Review preparation, including first through the West Berkshire Housing Site Allocations and Delivery Development Plan Document in 2014. The site was later promoted by Bell Cornwell, firstly at the Call for Sites in 2017 and later in earlier versions of the Local Plan Review, with the most recent in early 2021, the latter of which is included in Appendix 2.

As part of the Council's assessment of individual sites, a Sustainability Appraisal was carried out for each of the submitted sites. Feedback from the Sustainability Appraisal relating to the recent Regulation 18 stage of consultations is appended to these representations (Appendix 3) which will be responded to in this section. Although the site has been consistently promoted at earlier consultation stages of the Local Plan Review, earlier promotions on the site included a flexible-approach with the potential for a greater quantum of development, which, whilst flexible from the perspective of the landowner, overstated the detractions of the scheme and in turn outbalanced the potential of the site to deliver benefits due to uncertainty about how many dwellings the site could supply without unacceptable detrimental impact upon its surroundings.

As such, the promoters sought pre application advice in December 2021 in order to gain feedback from West Berkshire Council on the revised proposals. A pre application response was received from West Berkshire Council in March 2022 has provided additional detail and informed these representations.

Below is a summary of a selection of the responses to the 'Appendix 8b SA/SEA of New Residential Site Allocation Options' (included in Appendix 3) which forms part of the Council's evidence base for the draft Local Plan Review and includes a detailed assessment of each site. Positive and neutral responses contained within Appendix 8b have been omitted.

<Table 1: Key criteria highlighted in SA App 8b – see full rep attached>

The conclusions reached by the Council at earlier stages of representations found that much of the site could not be developed without having an adverse impact upon the surrounding landscape of the North Wessex Downs Area of Outstanding Natural Beauty

(NWD AONB). The landscape investigations did confirm that land to the south of a roughly horizontal line bisecting the site was developable without impact upon the surrounding landscape.

Detailed landscape, visual and capacity reviews were carried out by Liz Lake Associates in 2020 in response to earlier representations (Appendix 4). These assessments confirmed that the site has capacity for a moderate scale of development, subject to appropriate mitigation.

The LV&C assessment also gives a detailed overview of previous Landscape Capacity Assessments carried out for the Council. In these, the relationship of the site is considered to be acceptable and 'not considered to be a restriction on potential suitability'. In addition, the woodland boundary of the site is highlighted as a particular strength, helping to contain the site and reduce the impact upon outside views.

These demonstrated that part of the site could be developed with minimal impact to the surrounding landscape. Despite this, the Council neglected to allocate the site.

At each stage of the plan preparation, the site has been seen as undeliverable with sites in the west of the village being preferred for development as shown in Figure 1 below.

<figure 1 – see full rep attachment>

Pre-Application March 2022

A pre-application advice request was submitted in December 2021, with a response received in March 2022. This pre-application request was materially similar to the scheme, which is now being promoted, however amendments have been made to take account of Officers' responses.

Principle of Development

Officers note two alternative sites within Bradfield Southend at Stretton Close, one of which benefits from planning consent for 11 dwellings (17/03411/OUTMAJ) (now completed) and the second of which is proposed for allocation in the Local Plan for 20 dwellings (BRAD5). Officers are of the opinion that these two developments represent the maximum quantum of development that the village can presently handle, given its status as a Service Village. The following sections will challenge this opinion, and present material reasons to reconsider this arbitrary cap on development within the village.

Landscape

The pre-application response references the responses from Natural England received in previous representations. Namely, Officers referred to the encroachment into the AONB through 'incongruous extension beyond the settlement' which was not 'in keeping with the linear pattern of development'.

The emerging Local Plan states that the North Wessex Downs AONB covers approximately 74% of West Berkshire – with these areas managed carefully to conserve and enhance the natural beauty. Undoubtedly this places pressure on the availability of housing land across many of the towns and villages across the district and beyond. Indeed, Bradfield Southend is entirely encompassed within the AONB designation.

The Draft Policy SP2 outlines the strategy for protecting the natural beauty of the North Wessex Downs and outlines that:

"Development in the North Wessex Downs will be required to support its local communities and rural economy in a manner commensurate with the statutory status of the AONB as a nationally valued landscape",

"In determining what constitutes major development, the Council will consider whether the development, by reason of its scale, character or nature, has the potential to have a significant adverse impact on the landscape and scenic beauty of the AONB. This will include the consideration of the individual characteristics of a proposal and its context and the impact of cumulative development",

The reduced scale of development, as a result of the condensed form towards the southern extent of the site substantially reduces any potential for impact upon the landscape and scenic beauty of the AONB.

The Included Landscape Visual & Capacity Review prepared by Liz Lake (Appendix 4) provides a detailed response to the Council's 2015 Landscape Capacity Assessment. In Section 3.5 of the report addresses concerns raised by the Council in the 2015 Landscape Capacity Assessment and demonstrates a much reduced potential for 'harm' to the AONB's qualities with mitigations.

The LVC review also confirms that approximately 2.1ha of the site constitutes developable area, potentially supporting up to 48 dwellings at medium density on the site. The revised representations do not seek to fully exhaust this capacity, and instead take a cautious approach to conserving the landscape character with a lesser scheme of 16 dwellings. As for the rural economy, the population of Bradfield Southend is currently stagnating which brings into question the ongoing viability of the village's existing services and facilities. In particular the school, the public house, convenience store and Post Office. When considering the rural economy of the village it is important to note that this is not static, and services which exist now are not necessarily secured in perpetuity and requires sustainable growth in order to support the vitality and viability of the village.

Highways

Concerns over the deliverability of an adoptable access from Ash Grove/Cock Lane were voiced, owing to doubts over sight-lines to the left (east) and conflict with the existing access to Ash Grove.

The amended proposals include pedestrian and vehicular access through Ash Grove and as such no conflict exists onto Cock Lane. The Transport Statement (included in Appendix 5) prepared by Bellamy Roberts demonstrates that safe and suitable vehicular access can be achieved onto Cock Lane via Ash Grove. This includes appropriate visibility splays which properly consider 85th percentile speeds along Cock Lane. The proposed visibility splays are also demonstrated to be suitable for 30mph speeds, meaning any reduction to 20mph, as is commonplace outside schools across the district and the country, will go over and above highways standards. The Transport Statement confirms that safe and suitable access arrangements can be achieved for all road users, including pedestrians and vehicles, in accordance with current standards.

The scale of vehicular movements into and out of the site are estimated to be in the region of 5-8 vehicular movements during peak hours. Such movements can easily be accommodated within the existing road network. In addition to this, the Transport Statement concludes that there are genuine and realistic opportunities for residents and visitors to travel into and out of the site using sustainable and active modes of transport.

The scope for active transport modes will be detailed further in the coming sections of these representations.

Restrictive Covenants

The Local Plan evidence base (Strategic Housing Land Availability Assessment) identify that the site is subject to restrictive covenants which may impact upon the deliverability of the site. Whilst such covenants are linked to the land, this is not a material planning consideration and is a purely commercial matter which will be the subject of negotiations by the landowners and is something can be addressed once the planning potential of the site has been established. The covenants do not affect the deliverability of the site in planning terms, and certainly do not preclude development within the plan period.

Moreover, we note that a number of local sites have similar covenants and that the covenant on the local doctor's surgery has not prevented from the Council granting planning permission for two new dwellings at the site. In addition, the committee report for the relatively recent reserved matters application at Stretton Close (20/02410/RESMAJ) states, in paragraph 6.13:

"...a number of residents believe that no utilities can be laid underground across the application site due to restrictive covenants. The presence of effect of restrictive covenants are not a planning matter but a civil matter for the developer to address". (Emphasis added).

In addition, the existing development on Ash Grove (Nos 1-5) had the same covenants in place, prior to a negotiation by Tay Homes for their removal. Therefore, such a covenant did not prevent the delivery of housing at the site.

The site promoter understands that the covenant holder has a number of local land and property holdings and will be familiar with normal commercial negotiations over their removal, provided the planning potential is confirmed and community benefits of any scheme fully understood.

The landowners remain confident that the matter of the covenants can be reasonably resolved and are committed to actively promoting the site through the Local Plan-making process. We are confident therefore that there is no justification for the council citing covenants linked to the land as a reason for ruling the site out as a site allocation.

Design, Character and Appearance

Officers noted the reduced scale of development within the site, however referred back to the Landscape Capacity Assessment of Potential Housing Sites within and adjacent to the

AONB (August 2015) which identifies that the southern extents of the site hold potential for development which would not significantly impact upon the North Wessex Downs AONB.

<Figure 2 – see full rep attached>

Officers also noted that the layout of the then-proposed dwellings still resulted in a significant northward extension to the village and represented a significant encroachment beyond the landscape capacity outlined in the 2015 LCA referred to above in Figure 2.

These comments have been carefully considered within the revised proposals and prompted further Landscape Capacity works which are included in Appendix 4.

These additional LVC works undertaken by Liz Lake Associates (Dated March 2020) demonstrate that the site has capacity over and above that which was indicated by the

Council's own assessments – with a potential capacity of up to 48 dwellings across part of the site. The 16 dwellings proposed for allocation represent a small portion of this potential capacity and are a cautious approach to conserving the landscape character of the AONB.

Other Allocations within Bradfield Southend

The Draft Local Plan includes a single allocation within Bradfield Southend, at Land North of Southend Road (BRAD5). This scheme includes 20 dwellings within a low-density scheme accessed from Southend Road.

Our client supports this allocation and recognises that each is not necessarily mutually exclusive, with more than one allocation able to demonstrate additional benefits for the village as a whole.

However, the soundness of the selection of BRAD5 over BRAD6 is questioned in light of the differences in the way the two sites (BRAD5 and BRAD6) have been scored within the evidence base. In the SA, both sites are scored on an almost identical basis, with only very minor differences between the two. These differences amount to just 3 categories: the ability of the site to reduce accidents and improve safety; the impact upon biodiversity and geodiversity and; the ability of the site to protect, conserve and enhance the built and historic environment.

Notable is the way in which both sites have scored poorly against landscape impact, with both requiring mitigations in order to enable development over part of the site. Natural England" that if required/needed only one site be brought forward for allocation. Their preference would be part of BRAD5." Reasoning for this is not substantiated, beyond the reference to the apparent landscape capacity indicated in the 2015 LCA. As previously stated, further landscape investigations undertaken by Liz Lake confirm a greater capacity for the site with appropriate mitigations and so this objection from Natural England cannot be substantiated.

Of particular note in the SA is the difference in assessing the potential for biodiversity and geodiversity conservation, with BRAD6 considered unlikely to have an impact upon biodiversity, benefiting from generous provision to enhance hedgerows and woodland planting, whilst BRAD5 was also assessed as unlikely to have an impact upon biodiversity in spite of the need to remove several TPO trees and hedgerows along the boundary of the site in order to gain access.

Despite clear differences in the sustainability of the locations of each site, the two are ranked as almost equally sustainable across the board.

The Transport Assessment (Appendix 5) confirms BRAD6 offers a realistic opportunity for future residents to use active and sustainable modes of transport for day-to-day needs within the village. To illustrate these differences, the differences in proximity to various local amenities is shown below. These clearly highlight that BRAD6 demonstrates a more sustainable location within the village when compared to a continued western expansion.

As shown above, each of the Village's key services are within proximity to Ash Grove, representing no more than a 5 minute walk. In contrast, BRAD5 and the continued expansion of the village to the west is concentrating housing development at a more remote distance to essential shops and services of the village. Development at BRAD6 would be closer to the functional core of the village and has a greater potential to reduce car use for day-to-day intra-village needs.

In addition, whilst the Transport Statement included with these representations confirms safe and appropriate access can be demonstrated to Cock Lane (via Ash Grove), there remain substantial questions over access to BRAD5, given the presence of a number of TPO trees and vegetation at the proposed access point. There also remain questions over whether access via the existing employment and small industrial estate are appropriate given the potential for conflict.

<Table 2 – see full rep attachment>

Summary

Whilst promoting BRAD6 for allocation, Friday Street Developments remain supportive overall of the allocation of BRAD5. However, it should be noted that the differences in assessing the two sites do raise questions into the soundness of the selection process.

Site Proposal & Benefits

The proposals have been amended in response to feedback provided by the Council and the Local Plan evidence base. The proposals now consist of a small development of 16 dwellings, focused within the southern half of the site to the rear of Ash Grove. This landscape-led approach reflects the findings of the Local Plan evidence base as referred to above, directing development towards the southern part of the site where capacity exists in landscape terms to ensure the development minimises impact on the surrounding landscape and AONB and sits comfortably within and contributes positively towards the character of the area.

<Figure 3 – see full attachment>

Other changes to the scheme include the removal of the previously included village green in response to pre-application advice advising that there exists sufficient open space provision within the village, particularly noting the extensive playing field provision towards the centre of the settlement. Whilst there was a clear aesthetic value to prospective residents, Officers questioned whether this would be considered as usable space, especially given the alternative options in the vicinity which would likely remain more attractive prospects for recreation.

The site promoters Friday Street Developments are keen to deliver a high quality scheme, addressing the unique local character of Bradfield Southend. Accordingly, each element of the revised indicative masterplan has been considered to address local constraints, and previous feedback received from the Council and consultees in order to present a deliverable concept for the site which is also capable of full compliance with all relevant emerging Local Plan policies, including in relation to biodiversity net gain, energy efficiency and sustainable design and construction.

School Land

Forming part of this proposed allocation is 0.465 ha of land to the north of the current Bradfield C of E Primary playing fields, which is proposed to be gifted to the school for their use. Whilst the land could be used for the school as they see fit, it is suggested a reconfiguration of the existing hardstanding areas would enable school drop off / pick up from the site and thus alleviate the current traffic problems causing highway safety concerns to Cock Lane.

As of November 2019, the school has approximately 159 pupils on roll¹, with many of these travelling in from outside Bradfield Southend. As a result, morning and afternoon peaks associated with the school run cause congestion on Cock Lane which was not designed with this volume of traffic in mind. Cock Lane itself only has a footpath on the eastbound side, meaning parents arriving in the westbound carriageway are forced to exit directly into the road and immediately cross to the footpath opposite. The existing school site is highly constrained, with very limited opportunities for reconfiguration within the existing boundaries to combat these issues.

As an interim solution, to discourage use of Cock Lane, the school have put in place a remote drop off point at Bradfield Village Hall which is accessed by a 250m pedestrian path which snakes around the community football pitches. This path was funded by the Parish Council, who acknowledged safety issues on Cock Lane and recognised the need to provide safe access.

The interim measure has alleviated traffic to some extent; however, this measure frequently fails when weather is poor, meaning for much of the time Cock Lane remains heavily congested during the school pick-up and drop-off times.

Being one of the only adjoining landowners with physical connection to the school grounds, there is limited alternative land available for the school's future growth. The proposed donation of land to the school represents a significant benefit of the proposals and could enable a partial reconfiguration of the site, including a potential expansion to the vehicular turning circle to improve capacity for onsite drop-offs / pick ups. Initial productive discussions have been held with the Oxford Diocesan Board of Education (ODBE), whom are receptive to the proposals and willing to enter into detailed discussions. Their full letter of support is included in Appendix 7.

Accordingly, the gifting of land to the Primary School could assist in improving highway congestion and safety for its pupils which is a material community benefit of the proposals which can only be provided through the allocation and delivery of BRAD6 to the rear of Ash Grove. In order to secure comparable benefits through other means, the school would have to consider relocation.

School Viability

In addition to the land donated to the school, allocating further residential developments within Bradfield Southend will increase the potential pool of pupils within the school's catchment area. Increasing the number of pupils enrolled supports the viability of the school for future and safeguards its continued operation.

The emerging Local Plan draft Policy SP23 states that 'New development will only be supported where infrastructure, facilities and services both on and off site, necessary to make the development acceptable, will be provided as and when appropriate. The Council will work with infrastructure providers and stakeholders to identify requirements for infrastructure provision and services for new development and will seek to co-ordinate infrastructure delivery, whilst protecting local amenities and environmental quality'.

The school is able to accommodate 30 students per year in single form entry, giving a total capacity of up to 210 pupils. The most recent Ofsted reports indicate that the school currently has 159 pupils on roll, which amounts to approximately 75.7% capacity utilisation.

Given that the Council aims to locate housing development in areas of infrastructure and service capacity, Bradfield Southend is currently an underutilised resource. At approximately 75% capacity, the school could accommodate over 50 additional pupils without the need for substantial capital investment. In addition, increasing the number of pupils on roll will help to safeguard the continued viability of the school, especially given that new-build housing tends to attract a younger family demographic.

Therefore, the allocation of an additional site within Bradfield Southend will not only provide the opportunity to alleviate existing highways concerns relating to the school but will also safeguard its continued provision for current and future residents of the village as a whole.

Development within Bradfield Southend

As of Mid-2020, Bradfield Southend is estimated to have a population of 7242. Using the average household size of 2.4, it is estimated that there are around 300 dwellings across the village. Therefore, the proposed allocation of an additional 16 dwellings comprises an approximate increase of less than 6%.

Additionally, ONS Data confirms that the population of the village is stagnating and on a steady downward trajectory - declining from approximately 769 in 2016 and continuing trends seen between the 2001 and 2011 Census³.

Despite other developments coming forward in Bradfield Southend, the population is set to continue on a downward trajectory. The addition of 16 dwellings in a sustainable village location could provide approximately 38 additional residents who will use the school, shops and local services helping to secure their ongoing viability.

These benefits can be secured in addition to the those proposed for allocation at BRAD5 – which itself has the potential for 20 dwellings, or approximately 48 residents at average occupancy levels. A fully complete and occupied BRAD5 would represent a flat population when compared to the 2016 mid-year population estimates. However, this does not allow for the length of time taken to build out, over which time the village population may continue to decline.

Notwithstanding the above, the potential for two allocations, BRAD5 and BRAD6 would bring controlled and proportionate growth to support the viability of services within the village. The provision of one site allocation for 20 dwellings (BRAD5) should not be seen as a cap to development within the village over the plan period. The current capacity within local services such as the School, mean that it cannot be argued that a moderate population increase would cause burden upon these services – to the contrary, these allocations will enable growth to support ongoing provision. The prospect of both allocations coming forward has a greater potential than either does individually to support and enhance the vitality of the village as a whole.

Woodland Buffer

The proposed allocation at BRAD6 will include both retention of the existing paddocks on the northern portion of the site, but also enhance the established woodland buffer which surrounds the parcel.

Enhancement of this woodland belt, as outlined in the LVC (Appendix 4) will further reduce the visual impact of both the proposed development and the existing settlement from views into the village. Over time, the growth of these additional trees and hedgerows will tightly enclose the site and provide a natural edge to the northern boundary of Bradfield Southend.

This retention and enhancement of the woodland boundary is capable of full compliance with draft policy DM15 which states that 'Development which conserves and enhances trees, woodland and hedgerows will be supported.'

Conclusion

This representation has been submitted on behalf of Friday Street Developments Ltd., in support of their land interest at

- Site Reference BRAD6: Land to the Rear of Ash Grove

The representations demonstrate the deliverability (sustainability, availability and viability) of the proposed allocation for 16no. dwellings plus 0.46ha of education land to be gifted to the adjoining Bradfield Southend Church of England Primary School, at the above site.

The representations have demonstrated that development in this location can have an acceptable visual impact upon the North Wessex Downs AONB.

Additional Transport assessments undertaken following prior rounds of consultation have demonstrated safe and appropriate access for all users is possible to Cock Lane via Ash Grove. The Transport Statement included with these representations confirm a policy and standards-compliant design is possible subject to detailed design.

In conclusion, Land to the Rear of Ash Grove (BRAD6) has the ability to deliver significant benefits to existing and future residents of Bradfield Southend. Highways congestion and safety improvements around Bradfield Southend Church of England Primary can only be feasibly delivered through a donation of land linked to the site and the proposed development.

Additional allocations within the village, over and above the single allocation at BRAD5, will safeguard the local shops, services and Primary School and reverse current downward demographic trends. These representations have confirmed that there is no justifiable reason to limit allocations within the village to a single site.

The site remains deliverable and available and represents a realistic prospect for development in the short-medium term, contributing towards West Berkshire's housing delivery in the earlier stages of the Local Plan period.

<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>[See attached Combined Appendices for appendices. For wider representation and Tables and Figures, see attached Representations on behalf of Croudace Homes]</p> <p>Local Plan Review Allocations</p> <p>The Council proposes to allocate the sites listed at Table 7 for residential development. Croudace's analysis of the proposed allocations and their ability to deliver completions is summarised alongside each relevant allocation, with further analysis contained within the subsequent paragraphs.</p> <p>Proposed New Allocations</p> <p>The LPR proposes to allocate nine new sites for residential development to bring forward an estimated 1,720 units. It also delegates the allocation of land for 80 units upon adoption of two respective Neighbourhood Plans.</p> <p>Other New Allocations (Draft Policies SP13, SP14 and SP15)</p> <p>Croudace notes that draft allocations are proposed in each spatial area. However, some of these sites are subject to constraints which should see them removed from the LPR as their development is likely to be impeded.</p> <p>For example, the following sites are within the River Lambourn Special Area of Conservation ('SAC') – an area constrained by issues surrounding nutrient neutrality as marked on the draft Policies Map:</p> <ul style="list-style-type: none"> – RSA17: Land at Chieveley Glebe (15 units); – RSA19: Land West of Spring Meadows, Great Shefford (15 units); – RSA22: Land Adjacent Station Road, Hermitage (34 units).

In addition, 25 units are proposed to be delegated by the LPR to come forward via a Neighbourhood Plan at Lambourn; a Neighbourhood Area highly constrained by nutrient neutrality issues.

As explained by Natural England, “nutrient neutrality is a means of ensuring that a development plan or project does not add to existing nutrient burdens within catchments, so there is no net increase in nutrients as a result of the plan or project”.

Planning applications submitted in areas affected by nutrient neutrality must be accompanied by a Habitat Regulations Assessment (‘HRA’) which demonstrates that there is no effect on the level of nutrients within watercourses. Where there is a negative effect on nutrient levels, mitigation strategies must be secured.

It is our understanding that mitigation strategies (likely to be in the form of a scheme enabling developers to purchase ‘nutrient credits’) are not currently well advanced, and until they are, it is the case that development in affected areas is effectively ‘on-hold’ unless nutrient neutrality can be demonstrated.

Croudace does not consider the proposed allocation of sites in areas which are so heavily constrained by an issue which is unlikely to be resolved in the short term to be a ‘justified’ or ‘effective’ strategy. Nutrient neutrality is a complex matter, and a resolution is likely to mean that development in nutrient neutrality zones is impeded for long enough to delay delivery of housing beyond a five year period.

On that basis, Croudace considers that the Council should remove draft allocations RSA17, RSA19 and RSA22 and the reliance on the Lambourn Neighbourhood Plan. The effect of this would be to **reduce the claimed supply by 89 units**.

Part of this shortfall could be made up by proposing alternative allocations on unconstrained sites, such as Henwick Park, which is not impacted by nutrient neutrality issues.

Sites Allocated for Residential & Mixed-Use Development in the North Wessex Downs AONB (Draft Policy SP15)

Croudace notes the proposed draft allocation of five new sites to deliver a total of 104 new dwellings within the North Wessex Downs AONB:

- RSA16: Land north of South End Road, Bradfield Southend (20 units)
- RSA17: Land at Chieveley Glebe (15 units);
- RSA19: Land west of Spring Meadows, Great Shefford (15 units);
- RSA22: Land adjacent Station Road, Hermitage (34 units);
- RSA23: Land adjacent to The Haven, Kintbury (20 units).

In addition, a further 80 dwellings are proposed to be delegated by the LPR to come forward through neighbourhood plans at Hungerford and Lambourn – both Neighbourhood Areas are within the AONB.

Croudace considers the AONB to be a sensitive location for this scale of growth proposed given its inherent special characteristics. Whilst Croudace is supportive of the need to support the vitality and viability of rural settlements, which may be achieved via the delivery of housing, this should only be essential and directly linked to the needs of the relevant settlements.

The NPPF states at paragraph 176 that great weight should be given to conserving and enhancing landscape and scenic beauty in National Parks, the Broads and AONBs which have the highest status of protection in relation to these issues. The scale and extent of development within all these designated areas should be limited.

Croudace has previously undertaken an assessment of four of these sites within its representations to the Regulation 18 stage (Appendix G).

It was concluded that sites RSA16, RSA17 and RSA19 are not suitable for development, owing to landscape impacts and thus all three should be removed from the Council’s assumed housing supply – this would equate to the removal of 50 units. RSA23 was considered only to be developable in part and therefore this site’s yield should be reduced to 10 units, rather than the 20 identified in the LPR.

Removal of inappropriate allocations in the North Wessex Downs AONB should therefore necessitate the removal of a total of 60 units from the Council’s assumed supply. In addition, the 55 units directed to the Hungerford Neighbourhood Area should also be removed given the extent to which the NPPF and the LPR’s objectives seek to protect the AONB.

However, as set out above, we have already recommended that sites RSA17 and RSA19 (delivering 30 units), and the 25 units to be delivered through the Lambourn Neighbourhood Plan, be removed from the Council’s claimed supply due to their potential to be impacted by nutrient neutrality.

Croudace therefore considers that 85 units should be removed from the Council’s claimed supply (arising from 55 Neighbourhood Plan units, the removal of the allocation at Land North of South End Road, Bradfield Southend (20 units) and the reduction of the allocation at Land adjacent to The Haven, Kintbury (reduced from 20 units to 10 units)).

Part of this shortfall could be made up by allocating land at Henwick Park for development. Henwick Park lies entirely outside of the AONB and its development would not generate adverse landscape impacts. Its location on the edge of Thatcham, which is a highly sustainable settlement, should be preferred over the proposed allocations within the AONB.

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	

4. Proposed Changes	<p>A reduction of the level of growth proposed in the North Wessex Downs AONB– the AONB is offered the highest level of protection by national planning policy and therefore the Council should not be seeking to direct any more growth to it in preference to other less constrained areas than is absolutely essential. To do so is not ‘justified’ or ‘consistent with national policy’. Croudace’s assessment of the sites proposed for allocation within the AONB shows that they are largely unsuitable for development in any event and therefore the proposed allocations should be removed from the Council’s claimed housing supply.</p> <p>The removal of allocations in areas affected by nutrient neutrality– the LPR proposes new allocations in areas affected by nutrient neutrality, and proposes to carry forward HSA DPD allocations affected by the issue. Croudace does not consider it to be a ‘justified’ or ‘effective’ strategy to rely on sites which have uncertain delivery timeframes to deliver housing in areas which need delivery early in the plan period. By opting to allocate such sites, the Council risks restricting the supply of housing and forcing itself into a position where it may not be able to demonstrate a 5YHLS soon after adoption of the LPR.</p>

1. Do you consider the Local Plan Review is legally compliant?	Yes

* Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	<p>LPR paragraph 6.23 identifies a need for an additional 1,809 dwellings to 2039, taking into account existing commitments for 7,337 dwellings. Notably the existing commitments includes 1,580 dwellings at Sandleford Park, which was allocated in 2012 and has only recently been granted planning permission, and a large proportion (1,949 dwellings) at windfall sites which do not have planning permission, and so it is questionable whether all of the existing commitments will be delivered during the LPR plan period. It is therefore considered that an additional supply of housing is likely to be required in the LPR, above the stated requirement of 1,809 dwellings, which could be met through smaller sites distributed throughout the District to avoid similar delays to that experienced at Sandleford Park. It is important that the LPR identifies a sufficient supply of deliverable sites to meet the local housing target, taking into the previous shortfall in delivery and the potential that identified sites do not come forward as envisaged.</p> <p>It is noted that draft LPR Policies SP13-SP15 make provision for 1,720 new dwellings (as referred to at paragraph 6.24), with 80 dwellings proposed to be allocated at neighbourhood plans (as referred to at paragraph 6.25), below the stated outstanding requirement for 1,809 dwellings. It is therefore crucial that additional housing sites are identified in order to meet the LPR housing target (with a need for more housing sites to be identified given the comments raised above regarding the existing commitments).</p> <p>The NPPF also emphasises that small and medium sites 'can make an important contribution to meeting the housing requirements of an area, and are often built out relatively quickly' (paragraph 68). Indeed the Estate's landholdings across the eastern part of the District include a number of small and medium land parcels (as noted further below) which are suitable to accommodate sustainable development and contribute to the District's housing land supply. This includes the Estate's land at Burghfield Common, Theale and Mortimer as noted further below. A number of these sites are currently located within the DEPZ, however should this change during the plan period (as noted above) and additional housing be required, these sites are well placed to accommodate this need.</p> <p>Development Opportunities</p>

	<p>Englefield</p> <p>Englefield village comprises a sustainable rural community within the district with a range of local community services and facilities. The current local planning policies that apply to the village are restrictive of development and this is reflected in the amount of new development that the village has experienced in recent years. As such there is very little inward migration of new families to the village and, together with a lack of employment opportunities, the resultant trend is towards an ageing population. This threatens the medium to long term economic and social viability of the village and its community, in particular the survival of core services. It is however considered that, together with updates to draft LPR policies above, opportunities exist within the village (e.g. HELAA site refs. ENG1, ENG2 and ENG3) to ensure that it remains a diverse, vibrant and rural community with a mix of housing, employment and education which sustains the community and contributes to meeting the needs identified in the LPR.</p> <p>Bradfield Southend</p> <p>The Estate's landholdings at Cock Lane, Bradfield Southern (ref. BRAD4) is situated within the existing settlement boundary of Bradfield Southend, and is less than 5 minutes' walk from all the services and facilities within the village (including educational, retail and community facilities). The site is located within the North Wessex Downs AONB, which washes over the entirety of the settlement, however in all other respects, the site is not constrained environmentally. The site is therefore situated in a sustainable location could accommodate in the region of 4-5 dwellings to meet local needs.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	Yes
Please give reasons for your answer	
4. Proposed Changes	Policy SP13-15 and the supporting text as currently worded do not meet the tests of soundness set out in NPPF paragraph 35. Accordingly, in order to ensure the soundness of the Plan, additional housing sites should be identified to ensure that local housing needs are met. This should include consideration of small and medium sites at Burghfield Common, Theale and Mortimer.
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
5. Independent Examination	<i>The Englefield Estate consider that the plan in its current version is not sound and would like the opportunity to set out how alterations could be made to the plan and its evidence base to enable it to be found sound and progress to adoption.</i>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No</p>	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes

<p>Please give reasons for your answer</p>	<p>Furthermore, Sovereign considers that the Proposed Submission West Berkshire Local Plan Review (2022 – 2039), as currently formulated, is Legally Compliant</p>
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>INTRODUCTION</p> <p>Context</p> <p>Boyer has been appointed by Sovereign Housing Association ('Sovereign'), to act on their behalf in respect of the ongoing promotion of the Land adjoining The Haven, Kintbury, for residential development. The Site Location Plan is provided at Appendix 1: Site Location Plan.</p> <p>Sovereign holds a specific land interest within West Berkshire, known as Land adjoining The Haven, Kintbury ('the site'). These representations are aligned with this land interest and address topics within the West Berkshire Local Plan Review consultation, and its supporting evidence base, accordingly.</p> <p>The site has been assessed by West Berkshire District Council ('the Council') within the district's Housing and Economic Land Availability Assessment ('HELAA') (2023), under Site Reference: KIN6. Furthermore, the site is proposed for allocation within the Local Plan Review document, to accommodate residential development, under proposed Policies SP15: 'Sites allocated for residential development in North Wessex Downs AONB' and RSA23: 'Land adjoining The Haven, Kintbury'.</p> <p>The purpose of these representations is to assist the Council in formulating and refining an approach that is both consistent with national planning policy and the tests of soundness, as set out at paragraph 35 of the NPPF; namely, whether the emerging West Berkshire Local Plan (2022 – 2039) is:</p> <ol style="list-style-type: none"> a) Positively prepared – providing a strategy which as a minimum seeks to meet the area's objectively assessed needs. b) Justified – provides an appropriate strategy, taking into account reasonable alternatives and based on proportionate evidence. c) Effective – deliverable over the plan period and based on effective joint working. d) Consistent with national policy – enabling the delivery of sustainable development. <p>At this stage of the plan-making process, it is essential that West Berkshire District Council ('the Council') continues to pursue an approach that is consistent with national policy, effective, justified, and positively</p>

prepared. These representations comprise our recommendations to assist the Council in achieving such an approach, as emerging plan progresses toward adoption.

These representations build upon and should be considered in conjunction with the previous representations submitted by Sovereign to the 'Regulation 18' consultation on the West Berkshire Local Plan Review 2020 – 2037: Emerging Draft (December 2020), which ran from 11 December 2020 to 5 February 2021.

Policy Context

The Council adopted the Core Strategy Development Plan Document (2006 - 2026) in July 2012. Five years later, the Council then adopted the Housing Site Allocations Development Plan Document in May 2017, to implement the spatial framework set out within the Core Strategy. The adopted Development Plan for the district therefore sets out the spatial strategy to meet development needs up to 2026 and provides a series of site allocations and planning policies that seek to deliver that strategy.

To ensure that planning policies remain relevant and are able to effectively meet the needs of the local community, the Town and Country Planning (Local Planning) (England) Regulations 2012 (as amended) requires local planning authorities to review local plans at least once every 5 years from their adoption date.

The Proposed Submission West Berkshire Local Plan Review (2022 – 2039), which is the subject of the 'Regulation 19' consultation, reflects the distilled outcome of that review process. The draft plan sets out an updated vision and strategy, alongside an updated series of site allocations and policies that would supersede the adopted Core Strategy upon its adoption, which is anticipated in 2024.

Sovereign **supports** the Council's commitment to review the existing development plan through this process.

THE SPATIAL DISTRIBUTION OF HOUSING

Supporting the Vitality and Viability of Rural Villages

However, it remains pertinent for an appropriate amount of development to be located within the North Wessex Downs AONB Spatial Area; given, in particular, the identified need for market and affordable housing to support the viability of the area's various Rural Service Villages and Service Villages, including Kintbury.

In accordance with the discussion set out previously, in Section 3 of these representations, Sovereign recommend that any appropriate spatial strategy for West Berkshire must include the allocation of land to provide sustainable development at different levels across the current settlement hierarchy and within the different Spatial Areas.

Such an approach would align with the general principle of the district's existing spatial strategy, which would support the sustainable growth of the larger settlements, whilst providing sufficient growth for the abundance of medium and smaller-sized villages in the district to support their sustainable growth.

This strategy would also accord with paragraph 78 of the NPPF, which states:

"Planning policies should identify opportunities for villages to grow and thrive, especially where this will support local services. Where there are groups of smaller settlements, development in one village may support services in a village nearby."

Reductions in average household sizes, alongside low housebuilding rates, present a challenge for rural communities. Without an appropriate uplift in the level of development in these locations, there is a risk that local services in such areas would become unviable, undermining the vitality and sustainability of the district's rural villages.

In addition to helping maintain the vitality of the district's villages, medium and smaller-scale development in appropriate locations will assist with the district's housing delivery, both in the short-term and over the life of the plan period.

Paragraph 68 of the NPPF states that local planning authorities should promote a good mix of sites, with small and medium sites often able to be built out relatively quickly. This is supported in research conducted by Lichfields [Footnote 14: Available online at: <https://lichfields.uk/content/insights/start-to-finish>], which reports that schemes of 500 dwellings or more take on average between 5 to 8.4 years from the validation of an application for outline planning permission to the delivery of the first new home. The consequence being larger sites, such as the proposed strategic allocations, typically only substantively contribute to new housing delivery later on in the plan's lifespan.

As such, Sovereign **supports** the Council's commitment to allocate sufficient small and medium sized sites to maintain housing delivery throughout the plan period. Furthermore, Sovereign encourages the Council to seek to secure efficient delivery of new homes from any future proposed site allocations, i.e., maximising development potential whilst ensuring appropriate local character and context are respected. This would be particularly important for the smaller and medium-sized sites, which would help to ensure the district meets its housing needs in the shorter-term.

Development in the North Wessex Downs AONB Spatial Area

In seeking to identify sufficient development sites to meet the district's local housing needs, the Council has sought to accommodate a modest amount of new homes (approximately 8% of the overall need) within the North Wessex Downs AONB.

The NPPF, at paragraph 174, sets out that *"Planning policies and decisions should contribute to and enhance the natural and local environment by: [inter alia] protecting and enhancing valued landscapes"* such as the country's Areas of Outstanding Natural Beauty. Furthermore, the NPPF clarifies, at paragraph 176, that *"Great weight should be given to conserving and enhancing landscape and scenic beauty in [...] Areas of Outstanding Natural Beauty"*.

Given the significant housing need within the district, as set out in the previous discussion, there is clearly a need to accommodate a modest amount of residential development within the North Wessex Downs AONB Spatial Area. Sovereign **supports** the Council's proposed spatial strategy, in which a modest amount of new homes are proposed to support local communities within the area.

Furthermore, in determining appropriate locations to accommodate residential development within the North Wessex Downs AONB Spatial Area, Sovereign considers that the Council has clearly had due regard to the conservation and enhancement of the landscape and scenic beauty of the AONB, in accordance with Paragraph 176 of the NPPF.

The Council assessed parcels of land within the North Wessex Downs AONB Spatial Area through the Landscape Character Assessment ('LCA') and Landscape Sensitivity Assessment ('LSA') processes, which informed the Council's assessment of the potential *suitability* of sites for residential development. This assessment is set out within the Council's HELAA (2023). The Council concluded that, taking account of the LCA/LSA process, several parcels of land within the AONB could be appropriate to accommodate development, subject to various recommendations to maintain and enhance the landscape and scenic beauty of the AONB, as set out in Policies SP2, SP15, and, in relation to the Land adjoining The Haven, Kintbury, RSA23.

Consequently, the proposed site allocations represent locations where development can best be situated within the landform, or best relate to the existing built form, or are enclosed by substantive established native deciduous tree cover, of value in its own right. As such, Sovereign considers that the proposed allocations sufficiently ensure that the special qualities of the AONB, and the settlements that sit within it, can be appropriately conserved and enhanced.

With regard to Land adjoining The Haven, Kintbury, the LSA (2011)¹⁵ concluded that the site has '*no visual link to the wider landscape*' and that '*the site has a strong relationship with the settlement*'. As such, the LSA concludes that development on the whole site would be acceptable subject to:

- the retention of boundary hedgerows and trees and scattered trees within the southern section of the site,
- the replacement of the conifer hedgerow with more appropriate planting,
- views from the surrounding countryside, Public Right of Way and the neighbouring recreation field being carefully considered, and
- the provision of new planting to integrate the buildings into the landscape.

Sovereign is committed to bringing forward development on the site in accordance with the recommendations of the LSA set out above.

In summary, Sovereign supports the Council's proposed spatial strategy and site allocations, which direct development toward the most sustainable locations in the district whilst accommodating an appropriate level of development within the North Wessex Downs AONB. The approach successfully conserves and enhances the special qualities of the AONB.

DEVELOPMENT MANAGEMENT POLICIES

The comments set out in this section are intended to assist the Council in developing an approach that is consistent with national planning policies and the tests of soundness. Some comments have been included to assist the Council in developing a series of policies that are both effective and robust. Where possible, suggested amendments have been set out in the response.

Sovereign broadly supports the West Berkshire Local Plan Review (2022 - 2039). However, the comments set out below are intended to identify opportunities to improve the effectiveness of the proposed policies.

As a general principle, the plan would benefit from consistent numbering, in relation to the paragraphs, policy criteria and sub-criteria. this would assist the accessibility and the useability of the draft plan, improving the effectiveness of the document substantially.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?
 * Yes
 * No

Yes

Please give reasons for your answer

Sovereign considers that in preparing the emerging local plan, the Council have sufficiently complied with the Duty-to-Cooperate.

3. The Duty-to-Cooperate

Section 33a of the Planning and Compulsory Purchase Act (2004) ('PCPA') requires that local planning authorities should co-operate with other relevant local authorities, the County Council, prescribed bodies, and other persons, in relation to the preparation of a Local Plan. The Duty requires the Council to engage constructively, actively, and on an on-going basis, in the preparation of the Plan, insofar as it relates to a strategic matter. Strategic Matters include the sustainable development and use of land that has, or would have, a significant impact on at least two planning areas, such as the amount and distribution of housing.

Furthermore, the NPPF confirms, at paragraph 26, that government policy comprises that the effective and ongoing working between strategic policy-making authorities and relevant bodies is integral to the production of a positively prepared and justified strategy. It goes on to confirm that, in particular, joint working should help to determine where additional infrastructure is necessary and whether development needs that cannot be met wholly within a particular authority area could be met elsewhere. As such, cooperation clearly relates to maximising the effectiveness of plan preparation.

Demonstrated within the effective and on-going joint working undertaken by West Berkshire District Council with the other Western Berkshire HMA authorities, in particular illuminated through the preparation

	<p>of the SoCG, Sovereign considers that the West Berkshire Local Plan Review is <i>positively prepared</i> and the product of an <i>effective</i> and robust process of cooperation between the authorities.</p> <p>Sovereign therefore considers that the Duty-to-Cooperate has been sufficiently demonstrated in the plan-making.</p>
4. Proposed Changes	<p>Policy SP15: Sites allocated for residential development in the North Wessex Downs AONB</p> <p>To ensure consistency within the document, it is recommended that additional wording is included within Policy SP15 to confirm that the identified capacity for each allocated site represents an approximate capacity and not a cap, as set out in Policy SP12:</p> <p>i) Development in the North Wessex Downs <u>AONB</u> <u>is</u> <u>will be allocated for the approximate number of homes</u> as follows:[...]</p>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	Sovereign benefit from a specific land interest within West Berkshire District, which is proposed to be allocated for residential development under the emerging Policy RSA23: Land Adjoining The Haven, Kintbury. In representing Sovereign, Boyer are well-placed to advise on the appropriateness of the land allocated for development.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>This section is not consistent with the outline planning consent for 1000 houses for the (eastern) Bloor Homes part of the site. This consent does not include or permit a connection with the (western) Donnington New Homes part, nor an exit via Warren Road, and it must be assumed that those constraints will continue. The statement that the site is for 1500 houses, with an exit via Warren Road, is therefore not correct. A reversal of this policy would cause unacceptable congestion to the regular Andover Road traffic.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	Please see accompanying statement for our full representations. It is considered that the housing delivery of 1,580 dwellings at Sandford Park during the plan period is questionable. (Full representation attached, but does not make specific comments on this consultation point)
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	Please see accompanying statement for our full representations.

	In brief, it is considered that the Council should take a cautious approach with the delivery of Sandford Park during the plan period. The Regulation 18 Consultation on the LPR noted that Sandford Park was expected to deliver 1,000 dwellings across the plan period. This seems a more robust figure than the 1,580 dwellings now proposed, and a more realistic basis for the LPR's development strategy. <Full response attached>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	We wish to appear at the examination to present our evidence and technical information to support these representations
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

Please give reasons for your answer	This site has been looked upon as a favourable site since 2000, it was allocated in the last plan for circa 2000 houses, now it is down as 1500 houses, the highways dont appear to support the scheme and yet there appears to be heavy reliance on this site again to deliver a significant number part of WBC housing numbers. At what point will WBC seek alternative options to this site that clearly has delivery issues
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	No
Please give reasons for your answer	
4. Proposed Changes	Start to consider smaller sites with less reliance on multiple land owners, hugh amount of infrastructure commitment that clearly cant be met on this site
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination

Please give reasons for your answer	<p>The Planning and Highways Committee of this Council considered the above matter on Monday 20 February.</p> <p>The meeting considered Policy SP 16, "Sandleford Strategic Site Allocation" and expressed concerns around the environmental and traffic impacts of the proposals. It was noted that outline planning permission had been granted for 1,000 homes, while SP 16 proposed the delivery of 1,500 dwellings on the lands. It was suggested that if the allocations suggested in the resolution regarding SP 12 above were taken into account, that the additional 500 homes would not be required on this greenfield site.</p> <p>The meeting resolved that Newbury Town Council opposes the Sandleford West development (an additional 500 homes on the Sandleford strategic site) as Warren Road cannot be used to access these lands.</p>

<p>Please give reasons for your answer</p>	<p>Sandleford Park West (SPW)</p> <p>Clearly our client supports Policy SP16: Sandleford Strategic Site Allocation. As drafted however, the Policy is unclear in relation to the requirement for Flood Risk Assessment whereby the Policy states that 'a detailed flood risk assessment with hydraulic modelling will be required for the whole site'. It is very common for a site of this scale to be under multiple ownerships / control and not uncommon for separate flood risk assessments (FRA) to be prepared by each applicant depending on the ability to manage water on land within their control. As drafted, the Policy could be interpreted to require a full site (i.e. all land within the red line accompanying Policy SP16) FRA to be submitted in all circumstances, regardless of which land / parcel of land an individual planning application relates to. This is unnecessary. It is entirely reasonable and appropriate for a FRA to relate only to land within a red line submitted with a planning application and, subject to that FRA taking into account the circumstances (such as levels, gradient, ground conditions), at a reasonable scale, of surrounding land, that FRA should be considered acceptable and allow a parcel of land within a wider site / allocation to come forwards (as has happened, with the Secretary of State's approval, for that part of Sandleford Park controlled by Bloor Homes). Accordingly, Policy SP16, should be amended, to be clearer that a FRA for "the site" need only to relate to the land within a red line submitted with any given planning application.</p> <p>There is a requirement for the wording within the Policy to be further amended to clarify the requirements in relation to housing mix. As currently drafted, the Policy requires that there should be an emphasis on homes with at least 3 bedrooms. It is entirely reasonable to expect that the housing mix requirements within the District may change over the Plan period and accordingly, Policy SP16 should be clearer that the housing mix should respond appropriately to the SHMA (or other relevant housing needs assessment) requirements relevant at the time an application is considered.</p> <p>In relation to the red line plan contained within the Plan relating to Sandleford Park, it is unclear why the Council has excluded land to the rear / south of Ashton House and Lynwood House at the eastern end of Warren Road from the allocation. That land falls within my clients control, and has previously been included in planning application proposals for the Sandleford Park West site. It has no significance in relation to ecology, heritage or other constraint that may require it to be free from development. It is not, therefore, clear why the Council has excluded it from the allocation in the Plan and accordingly, the red line plan should be amended to include that land. Should the Council require clarification on the precise extent of this area of land, my client would be pleased to provide it.</p> <p>We note that the Reg 19 Plan is consistent with the adopted Core Strategy in excluding Warren Road, west of the entrance to New Warren Farm, from the allocation boundary and this is supported.</p> <p>The boundary line of the allocation across the south side of Eastern Fields within Sandleford Park West should also be reviewed. The plan contained within the red line includes a 'kink' part way across Eastern</p>

	<p>Fields. This doesn't appear to tie in with any notable features on the ground and does not accurately represent the land my client has promoted or sought planning permission for. The site location plan submitted with my client's planning application on the land shows a straight line across the boundary of this part of the site. The plan within emerging Local Plan should reflect that position.</p> <p>There may also be issues around the definition of the red line plan relating to Sandlesford Park Strategic Site on the eastern boundary adjacent to A339 and north of the recycling centre. The Core Strategy Plan, and the red line plan relating to planning permission 20/01238/OUTMAJ (Bloor/SFP) include the balancing pond directly west of the A339 and north of the recycling centre. The site access plans approved by the SoS through planning permission ref 20/01238/OUTMAJ show the site access north of that balancing pond. We suggest that the Council should review the site allocation red line in this area to ensure consistency.</p>

Please give reasons for your answer	<p>I write on behalf of the campaign organization SayNoToSandleford (SNTS) in relation to the above document. We have the following comments on the following specific policies.</p> <p><u>Policy SP16 (Sandleford Strategic Site Allocation)</u></p> <p>SP16: Comment 1</p> <p>We request that the underlined text below be removed. The junction of Andover Road and Warren Road is unsuitable for all vehicle access, due to presence of schools and churches in the vicinity. Any vehicular access should exclude private cars and larger vehicles apart from buses.</p> <p>Four primary all vehicle accesses: Two off Monks Lane; <u>One through to Andover Road via Warren Road; and</u> One onto the A339.</p> <p>SP16: Comment 2</p>

	<p>We request that the underlined text below be changed to: “buffers of at least 15 metres”, in order to avoid direct damage to the root system.</p> <p>Conserve the areas of ancient woodland and provide <u>appropriate buffers</u> between the development and the ancient woodland;</p> <p>SP16: Comment 3</p> <p>Further SP16 is in conflict with DM8 (Air Quality) para e.</p> <p>1 e) It should not expose occupiers who are particularly sensitive to air pollution, such as those in schools, health care establishments or housing for older people;</p> <p>By changing the sustainable transport link via Warren Road to a main access route, vulnerable users will be subjected to additional air pollution. In particular PM2.5 which is now linked to major health and development issues in young people. With 2 schools and 2 churches in this area already, and additional school planned, this seem both counter intuitive and irresponsible.</p>

2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is	

<p>consistent with achieving sustainable development.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>*LATE RESPONSE*</p> <p>Thank you for consulting Hampshire County Council on the West Berkshire District Council Local Plan. The County Council in its capacity as a neighbouring highway authority has focussed this response on the potential implications of the Sandleford Strategic Site (SP16) on the A339 within Hampshire.</p> <p>It is noted that there are other local infill and strategic sites which may lead to increased flows on the A339, but Sandleford is likely to have the biggest impact by virtue of its location. It is also noted that the site allocation for Sandleford extends down to the Hampshire border, although the development is likely to actually be focused in the north and west of the site.</p> <p>It is proposed that there will be four all-vehicle accesses to this strategic site, one being from the A339. Whilst the part of the A339 that the site access is likely to be achieved from would be outside of Hampshire's boundary, the impact on the A339 within Hampshire must be considered.</p> <p>Policy DM2 of Hampshire County Council's emerging Local Transport Plan 4 (LTP4) states '<i>we will only support requests for NEW accesses onto A roads, the principal road network or traffic sensitive streets where the strategic flow of traffic is prioritised and not compromised and when all other reasonable options (such as taking access from nearby side roads) has been considered.</i>'</p> <p>Therefore, for Hampshire County Council to support the proposal for a new access onto the A339 it should be demonstrated that the strategic flow of traffic is prioritised and not compromised, and when all other reasonable options (such as taking access from nearby side roads) has been considered.</p> <p>It should be noted that the A339 is an ex-trunk route, and it is Hampshire County Council's view that strategic traffic should be routed via the A34, therefore any evidence provided to demonstrate the suitability of a new access onto the A339 should take account of this position and consider wider strategic routes to and from the site.</p> <p>As further modelling work is done to underpin development in West Berkshire where cross boundary impacts are a possibility, but in particular Sandleford, Hampshire County Council would like to work closely with West Berkshire District Council to discuss modelling parameters and underlying assumptions.</p> <p>Hampshire County Council is particularly interested in understanding how the cumulative impacts of cross boundary traffic flows have been taken into account, i.e. whether new allocations outside of the West Berkshire boundary have been taken into account, or if the modelling rests on assumptions of background growth.</p> <p>Hampshire County Council also take this opportunity to point out that the North Manydown site of up to 3,500 homes on the north west side of Basingstoke will have direct access to the A339 and so this may have an impact on background traffic flows. Moreover, under the West Berkshire Local Plan policy SP12 there is a relatively large allowance for windfall sites to help West Berkshire District Council reach its housing supply (1,949 net additional homes out of a total of up to 9,146). Hampshire County Council would like to be involved in discussions where sites are planned adjacent to the common border between Hampshire and West Berkshire.</p> <p>Of note is the strategic transport study focusing on potential future improvements to the A339 that Hampshire County Council, Basingstoke and Deane Borough Council and West Berkshire District Council have been working together to manage. Hampshire County Council note that if West Berkshire District Council chooses</p>

	<p>to safeguard land for the measures emerging from the study in the region of the Sandleford development, with a view to taking these forward, Hampshire County Council would want to discuss the impacts on Hampshire's highway network and the redistribution of traffic across the strategic network. From the high level study and modelling work done thus far Hampshire County Council are not currently satisfied that the measures suggested would achieve the aims of reducing through traffic and could serve to bring additional traffic demand to the A339.</p> <p>Finally, the designation of Greenham business park as a Designated Employment Area is noted. It is recognised that it is already a well-established employment area but given policy DM32 that <i>'the redevelopment and regeneration of land within DEAs to provide additional business development that meets the needs of the District will be supported'</i>, Hampshire County Council would like to be involved as a stakeholder in any discussions regarding any potential changes which are likely to affect traffic flows of heavy vehicles which utilise the A339 in accessing or departing from the site.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	The policy requires protection for the ancient woodland, in line with the NPPF. We welcome the wording requiring: <i>A network of green infrastructure to be provided which will:</i> <i>Conserve the areas of ancient woodland and provide appropriate buffers between the development and the ancient woodland;</i> <i>Mitigate the increased recreational pressure on nearby sensitive wildlife sites, secure strategic biodiversity enhancements</i>
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	Yes
Please give reasons for your answer	As noted above, the policy includes wording for protection for ancient woodland, in line with the NPPF. It is important that this wording is included for the Local Plan to be effective and consistent with national policy. This is a major site, allocated for residential development of 1500 dwellings. The site contains seven areas of ancient semi-natural woodland: - Crooks Copse (SU46936508) ASNW 2.31 Ha - Barn Copse (SU46336474) ASNW 2.45 Ha - High Wood (SU46646473) ASNW 0.27 Ha - High Wood (SU46786472) ASNW 2.68 Ha

	<ul style="list-style-type: none"> - High Wood (SU47086462) ASNW 8.92 Ha - Dirty Ground Copse (SU46716448) ASNW 2.55 Ha - Unnamed (SU46716387) ASNW 5.42 Ha <p>It also includes the following significant trees which require protection (Ancient Tree Inventory IDs given):</p> <ul style="list-style-type: none"> - Ancient tree (Pedunculate Oak) ID: 150885 - Veteran trees (all Pedunculate Oaks) IDs: 159632, 150908, 150907, 150906, 150933, 150936, 150938, 150939, 150896, 150898, 150899, 150900, 150901, 150902, 150903, 150904, 150929, 150940, 150941, 150942, 150943, 150884, 150883, 150882, 150881, 150875, 150879 - Notable Trees (all Pedunculate Oaks) IDs: 150937, 150897, 150880.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	Yes
Please give reasons for your answer	n/a
4. Proposed Changes	Propose amending the wording <i>A network of green infrastructure to be provided which will:</i> <i>Conserve the areas of ancient woodland and provide appropriate buffers between the development and the ancient woodland;</i> To read <i>A network of green infrastructure to be provided which will:</i> <i>Conserve the areas of ancient woodland and provide appropriate buffers between the development and the ancient woodland, and appropriate Root Protection Areas for ancient & veteran trees;</i> This will make the policy more robust in delivering the same protection for important trees as ancient woodland, as required by the NPPF

Please give reasons for your answer	The information contained within the new Local Plan will be of significant value to Thames Water as we prepare for the provision of future water supply/wastewater infrastructure. The attached table [see 'Thames Water - Employment & Residential Site Allocations Table'. The text below under the headings 'Water Response', 'Waste Response' and 'Additional Comments' is extracted from the table for this site] provides Thames Water's site specific comments from desktop assessments on water

supply, sewerage/waste water network and waste water treatment infrastructure in relation to the proposed sites, but more detailed modelling may be required to refine the requirements.

Early engagement between the developers and Thames Water would be beneficial to understand:

- What drainage requirements are required on and off site
- Clarity on what loading/flow from the development is anticipated
- Water supply requirements on and off site

The time to deliver water/wastewater infrastructure should not be underestimated. It can take 18 months – 3 years for local upgrades and 3 – 5 years plus for more strategic solutions to be delivered. It is therefore vital that the Council and Developers work alongside Thames Water so that we can build up a detailed picture what is being built where, get confidence of when that development is going to start and what the phasing of that development will be.

To support this Thames Water offers a Free pre planning service where developer can engage Thames water to understand what if any upgrades will be needed to serve the development where and when.

Link here > <https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity>

We recommend developers attach the information we provide to their planning applications so that the Council and the wider public are assured water and waste matters for the development are being addressed.

Water Response

The scale of development/s in this catchment is likely to require upgrades of the water supply network infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing phasing plan. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The housing phasing plan should determine what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s in this catchment. The developer can request information on network infrastructure by visiting the Thames Water website <https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development>.

Waste Response

The scale of development/s is likely to require upgrades to both the wastewater network and sewage treatment infrastructure. It is recommended that the Developer and the Local Planning Authority liaise with Thames Water at the earliest opportunity to agree a housing and infrastructure phasing plan. The plan should determine the magnitude of spare capacity currently available within the network and what phasing may be required to ensure development does not outpace delivery of essential network upgrades to accommodate future development/s. Failure to liaise with Thames Water will increase the risk of planning conditions being sought at the application stage to control the phasing of development in order to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of development. The developer can request information on the network and treatment infrastructure by visiting the Thames Water website <https://developers.thameswater.co.uk/Developing-a-large-site/Planning-your-development>. Planning, either by email Devcon.team@thameswater.co.uk tel: 02035779998 or in writing Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ

Additional Comments

These comments are based on foul flows connecting to the public sewer by gravity (not pumped) and no surface water flows being discharged to the public sewer.

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Include reference to concerns regarding waste water/water supply network capacity and the need to liaise with Thames Water to determine whether a detailed drainage/water infrastructure strategy informing what infrastructure is required, where, when and how it will be delivered is required.</p>

Please give reasons for your answer	See attachment 'Paula Saunderson - Full LPR Rep' for full consultation response. Comments on each chapter/policy can be found at the specific consultation point. SP16 – SANDLEFORD STRATEGIC SITE Despite the Appeal Decision I find this Site Allocation a very sad one given the amount of Sensitive Wildlife Sites that will be permanently impacted by these proposals. Had the Site come forward freshly in this plan or in the next couple of years it may have been rejected on Environmental, Biodiversity, and loss of Wildlife with species numbers degradation or elimination. It is also sad to see that Warren Road – a completely unsuitable 4th Entrance/Exit Point onto the Andover Road for occupants of this huge site - is Mandated by this Policy for use by All Vehicles. And this will open up the Gateway for the Norgate operated Donnington New Homes to bid for more Residential Housing on Greenfield Space completing the Urbanisation of the this Area between Newbury and Wash Water/Enborne Row. It puts the concept of wildlife corridors into disrepute as there will no nowhere left to go. Others with more knowledge can argue detail of this Policy but suffice to say I would like this to be finite.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	N/A
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>There remains considerable doubt as to whether the build-out of the whole site will be achieved before the end of the Plan period. Hence we believe it fails the soundness test by not being effectively deliverable.</p> <p>For a start, Thames Water notified the Council in 2020 that no more than 50 new dwellings can be occupied before a significant upgrade to sewage treatment works and drainage is completed. This presumably involves a developer contribution towards the cost and will also be far-reaching in scope and includes: a new pumping station near the top of the Monks Lane / Newtown Road (A339) hill needed on third party land; upgrades to several sections of foul sewage mainly lying below main roads in Newbury; a new holding tank near - and expansion to - the (Listed) existing Victorian pumping station at Faraday Road, which is in the middle of the Council-owned London Road Industrial Estate (itself due for redevelopment). This alone, quite apart from other infrastructure that needs to be available before works commence, means that the earliest completion of new units is likely to be significantly later than that shown in Appendix 1 to the Nov 2022 Five Year Housing Land Supply: 2025/26. Presumably all of the Bloor Homes Sandleford Park East site (1080 units) will need to feed into this sewage system.</p> <p>At a rate of 100/year (as shown in the Housing Land Supply table) and starting in, say, 2028/29 in theory the Bloor development could be built out within the Plan period. However, the southern section of Bloor's site needs to link with Sandleford Park West (on another developer's land) if it is to rely on the Warren Road access onto A343 and not on a large valley crossing bridge to connect the Community Centre with the main housing north of the valley. Until a detailed Planning Performance Agreement between Bloor and the Council (and ideally also with the other developer, whose outline application has yet to be approved) has been seen, there can be little confidence that the Bloor site will not reach a point where progress is slowed.</p> <p>As for Sandleford Park West, the developer is known to be hoping to avoid using Warren Road and instead to be able to extend the development south towards the Hampshire border and make a new access onto A343 either north or south of the River Enborne. Therefore, we have little confidence that the western part of the allocated site will proceed at pace and be delivered by the end of the Plan period 2039.</p> <p>For this reason we suggest the allocation from Sandleford be reduced to 1200, although the site can remain allocated for 1500, with the remaining 300 completed in the period after 2039.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>N/A</p>
<p>4. Proposed Changes</p>	<p>At the end of the first sentence in SP16 add "of which only 1200 are to be delivered in the period to 2039".</p> <p>In 6.45 (or in new paragraph), add to the end: "A first Reserved Matters application for the eastern part of the site is expected in late 2023 and the last Reserved Matters need not be submitted for 12 years thereafter (i.e. 2035). Based on this and because there remain significant technical reasons why no completions are likely until about 2028 and why the linkages between the east and west parts could prove problematic, we do not expect it will be possible to build out the whole allocated site by the end of the Plan period."</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>Whether or not I remain a Member of the Council, I intend to keep a close interest in progress of the site. I have had a close involvement in it since 2009. A Planning Performance Agreement is due to be published late this year and we would wish to review our comments on Sandleford after that.</p>

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>I do not accept that the area's need has been "objectively assessed". The target for housing is an arbitrary figure based on government guidelines which the government itself has now disowned. The draft plan takes no account of this. West Berkshire has particular issues, notably that a large part of the district falls within an AONB, that make the target in the plan unrealistic without two large developments on greenfield sites that in my view are not consistent with the NPPF and are contradictory to many parts of the draft plan itself.</p> <p>The plan is not an appropriate strategy for the reasons given above.</p> <p>The plan is not deliverable because, as the history of its predecessor demonstrates, developments on the scale of Sandleford Park and Thatcham NE are not deliverable within the plan period.</p> <p>I do not believe that the plan enables the delivery of sustainable development in accordance with the NPPF.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	Yes
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>SP16</p> <p>Inclusion in the draft plan of further development at Sandleford Park contradicts the very first strategic policy in the plan, SP1 (spatial strategy), which says priority should be given to sites of "lower environmental value", on "previously developed land," and "conserving and enhancing the distinctive character and identity of the natural environment".</p> <p>It is also inconsistent with SP10 (green infrastructure), which seeks to prevent the loss of green spaces and to "extend wildlife corridors and provide habitat connectivity", with DM15 (trees, woodland and hedgerows) and DM16 (ancient woodland).</p> <p>SP 11 (biodiversity and geodiversity) states: "A network of green infrastructure will be provided which will conserve the areas of ancient woodland and provide appropriate buffers between the development and the ancient woodland." There are several areas of ancient woodland on this site. The draft plan does not explain what it means by "appropriate buffers" but the council has indicated that it considers 15 metres appropriate, despite the following:</p> <p>"Although the minimum size of a buffer zone should be at least 15 metres, we would expect this to be significantly larger for a development of this nature and size." (Natural England)</p>

“It is considered that a buffer of greater than 15m would be appropriate for the ancient woodland on this site and that a buffer of 30m would be appropriate in areas where the ancient woodland is immediately adjacent to the built development ... If this development were to proceed with the currently proposed 15m buffer zone, it is likely that these ancient woodlands will deteriorate for the reasons stated above and the council will fail to meet its statutory obligations under the Natural Environment and Rural Communities Act (2006) and will fail to meet the policy objectives of both the NPPF and West Berkshire Core Strategy.” (Berkshire, Buckinghamshire and Oxfordshire Wildlife Trust)

The Woodland Trust recommends 50 metres; Kings Lynn & West Norfolk Council agreed a 50-metre buffer for its Reffley Wood) site and Wiltshire County Council's policy is “a 100-metre woodland/parkland buffer between all ancient woodland ... and built development”.

At an absolute minimum, therefore, SP16 should contain clear guidance on what precisely it considers an appropriate buffer for ancient woodland in line with the above comments and policies, and indeed the policies included elsewhere in the draft plan.

SP16 is inconsistent with the NPPF (2018) on biodiversity which it defines as “development that leaves the environment in a measurably better state than beforehand”. It is inconceivable that further Sandleford Park development, on a wildlife-rich greenfield site, can meet this requirement.

It is also inconsistent with SP23, which says that development should “minimise the impact of all forms of travel on the environment” (in accordance with the council's climate emergency and environment strategy). The location of the site in relation to Newbury Town Centre makes it inevitable that many if not most residents would be reliant on cars. One only has to look at comparable developments (for example the Glendale Avenue estate on the opposite side of the A343) to realise that Sandleford Park will maximise, rather than minimise, the impact of transport (and in particular private cars) on the environment because of its location.

However much wishful thinking the council engages in, the fact is that the location of Sandleford guarantees that many if not most people living there will rely on the private car for most journeys.

SP16 further contradicts the draft plan on DM2 (separation of settlements) where the proposed expansion of Sandleford Park southwards, with access via Warren Road, significantly reduces the separation between Newbury and Enborne Row/Wash Water. Developers are already proposing "Sandleford Park South" which would remove this separation entirely and create a single housing development from Monks Lane to the Hampshire border. The plan as drafted can only encourage rather than prevent this process because it clearly identifies Sandleford as the principal area of Newbury for development.

SP16 is also in conflict with DM8 (Air Quality), which says it should not expose occupiers who are particularly sensitive to air pollution, such as those in schools, healthcare establishments or housing for older people. By changing the sustainable transport link via Warren Road to a main access route, vulnerable users will be subjected to additional air pollution. Warren Road is literally a few metres away from Park House School, opposite Falkland School, and close to at least one of the proposed Sandleford development schools.

The Warren Road access road is perhaps the least acceptable and explicable part of SP16. Previously this had been designated for pedestrians, cyclists and public

	<p>transport only. Without explanation, in the new draft plan this has now been redesignated for “primary all-vehicle access”. This is clearly in conflict with SP23 and DM8 and in addition will completely change the character and environment of the entire Wash Common area. It is outrageous that this change has appeared in the draft plan without any explanation or justification.</p> <p>For all these reasons it is the view of West Berkshire Green Party, the minority Green Group of West Berkshire councillors, the official opposition Green Group of Newbury town councillors, and myself as Green Party councillor for Newbury Wash Common ward (West Berkshire Council) and Wash Common ward (Newbury Town Council) – which includes the Sandleford Park site – that SP16 is in conflict with numerous elements of the draft plan, the NPPF, and indeed government policy on housing allocations, and therefore renders the current draft plan unsound.</p> <p>One final point is that although Bloor Homes' application to develop the first phase of Sandleford Park was granted outline planning permission on appeal, for up to 1,000 homes, this has no bearing on the rest of the allocated site. The draft plan includes 1,500 homes, envisaging 500 in addition to the Blair Homes development. However, we would argue that these 500 homes should be removed from the plan for all the reasons stated in this submission, particularly as they would have a far more seriously detrimental effect on the area because of Warren Road access.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
<p>5. Independent Examination</p>	As West Berkshire councillor for the ward that includes Sandleford, I have an in-depth knowledge of the issues affected by SP16 and feel it would be beneficial for the examination if I were able to participate and answer any questions that may arise.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	Yes
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	No
Please give reasons for your answer	Object. The policy is not justified or effective. (in relation to Gorse Covert)

The Sandleford Park allocation has been carried forward from the Core Strategy, Policy CR3 Sandleford Park. It was intended to deliver up to 2,000 homes. Site constraints and the importance of delivering a significant level of green infrastructure have reduced its capacity to around 1,500 units.

The draft plan, through policies SP1 Spatial Strategy and SP3 Settlement Hierarchy, continues to place importance on focusing housing development in Newbury, identifying that an urban extension on greenfield land at Sandleford Park will form a new residential neighbourhood. The Sustainability Appraisal/Strategic Environmental Assessment reinforces this approach. It did, however, consider four options for Sandleford Park (Table 28, page 36). It did not consider an additional option to include Land South of Gorse Covert.

Land South of Gorse Covert (plan attached) presents an opportunity to support the plan strategy of focusing new residential development in Newbury and ensure that the optimum number of dwellings is proposed in this sustainable location [Sandleford Park]. Land South of Gorse Covert is available, suitable and deliverable within the plan period. The site has capacity to deliver up to circa 200 housing units. It is adjacent to, and immediately to the south of, the Sandleford Park Strategic Allocation set out in Policy SP16. Consequently, it abounds the land the subject of an outline planning permission for up to 1,000 homes, Land at Sandleford Park (Ref 20/01238/OUTMAJ), the larger of the two Sandleford Park sites. Bloor Homes is the developer for both Land South of Gorse Covert and Land at Sandleford Park.

The site is in a sustainable location for development, being in Newbury and adjacent to an allocated site. There are no site constraints which prevent it from being developed. Land South of Gorse Covert was assessed in the HELAA Update 2023 with reference GRE2. The capacity was incorrectly estimated as 150 units instead of up to circa 200 units. Contrary to information in the HELAA, it is now being promoted by a developer. The site is identified as being bordered by ancient woodland to the north but this is an area of commercial woodland and is not subject to an ancient woodland designation. There is scope to provide access to the site through this wooded area. Woodland to the south as at some distance from the site boundary. Overall, the site appears to have been excluded from further consideration due concerns over landscape character. The accompanying note Annex 2. Land South of Sandleford Park, Newbury (HELAA Site Reference GRE2) Landscape Review sets out an assessment by the developer's landscape architects SLR. This concludes that 'development of the site would not have a detrimental effect on the "settlement form, pattern and character of the landscape."' The review was based on consideration of relevant policy documents and a desktop-based study of the existing landscape pattern within the site and its immediate vicinity.

The review reaches this conclusion (paragraph 6.2) 'due to the site's location within the landscape, and the strong existing boundaries associated with the current and future2 landscape and visual baseline. The setting of, and views from, Grade 2 listed Sandleford Priory would also be preserved. The proposed settlement form and pattern within the site would be aligned with the proposed development pattern within the allocated Sandleford Park8 development north of Gorse Covert. It would respect and strengthen existing boundary elements – reinforce existing hedgerows to the east and west and provide appropriate buffers from the woodland edges to the north and south. This would help to integrate the site and associated development within its landscape context, thereby ensuring that new development is appropriate in terms of location, scale and design in the context of the existing settlement form, pattern and character.'

As previously stated, the site is being promoted by the developer for Land at Sandleford Park, which offers maximum potential to integrate the site into the existing allocation. The site would benefit from the new services and infrastructure coming forward as part of Sandleford Park, representing a highly sustainable extension to a long standing commitment in the Local Plan.

As currently proposed, SP13 does not present an appropriate strategy in that it has not fully taken account of all reasonable alternatives i.e an option to increase the size of the Sandleford Park Strategic Allocation. It also fails to include a parcel of land which would contribute towards the delivery of sustainable development, contrary to the intentions of the NPPF (2021).

Para 6.55

Object. The supporting wording is not justified or consistent with national policy guidance. Supporting paragraph 6.55, which specifies that additional policy criteria will be added as the Local Plan Review progresses. Now the plan is at consultation stage, this caveat should be removed. The policy needs to be clear and sound, giving certainty to the developers.

Object. The policy is not justified or consistent with national policy. (in relation to Sandleford Park East)

The Local Plan, in continuing to direct development to Sandleford Park, is consistent with the NPPF by proposing new development in locations that will achieve a sustainable pattern of development. Newbury, as the main settlement in the District is the most sustainable location and Sandleford Park is the most appropriate location for strategic housing delivery in Newbury (paragraph 6.49). Bloor Homes Ltd have secured outline planning permission (20/01238/OUTMAJ) for Land at Sandleford Park, the larger of the two Sandleford Park sites. Subject to submission and grant of planning permission for Reserve Matters, the site is realistically deliverable within the plan period.

There are, however, a number of areas where the policy should be amended to ensure that the plan is sound. Attachments: Annex 2 (Gorse Covert) and Sandleford Park Location Plan.

<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	

<p>4. Proposed Changes</p>	<p>Proposed amendment 1. Land as shown on the Policies Map is allocated for a residential development of approximately 1,500 1,750 dwellings.</p> <p>Proposed amendment 2. Amend Sandleford Park Site Boundary on page 69 of the Local Plan Review, to include Land South of Gorse Covert as shown outlined in red on the attached plan 'Land South of Gorse Covert'.</p> <p>Proposed amendment 3. Supporting paragraph 6.55 should be deleted.</p> <p>6.55 Criteria for the delivery of the site are included in the policy above. As work on the LPR progresses, these will be further developed and refined to include any additional, specific, mitigation measures and infrastructure requirements identified by stakeholders engaging with the process.</p> <p>Now the plan is at an advanced stage of consultation, this caveat should be removed. The policy needs to be clear and sound, giving certainty to the developers.</p> <p>Proposed amendment 4.</p> <p>Delete A Minerals Resources Assessment will be provided for the site.</p> <p>The requirement for a Minerals Resource Assessment is not necessary. Detailed studies have shown that the winning of minerals would adversely impact on this sensitive site with ancient woodland and associated ground water regime. The requirement should be removed from the policy.</p> <p>Proposed amendment 5. Sustainable Transport through routes connecting the A339, Monks Lane and Andover Road for pedestrians, cyclists and public transport subject to agreement with bus operators.</p> <p>Additional wording is required to qualify the requirement for sustainable bus routes, as this is partly controlled by the bus operators. The extent to which Warren Road can be widened is understood to be limited, although the Manual for Streets does recognise that whilst streets on bus routes should not generally be less than 6.0 metres wide, this could be reduced on short sections with good inter-visibility between opposing flows. Therefore, the existing widening scheme can serve as a bus route subject to agreement with bus operators.</p> <p>Proposed amendment 6.</p> <p>Bloor Homes do have significant concerns with the requirement for the provision of: "On-site renewable energy to assist in the delivery of a carbon neutral development;"</p> <p>In its current form, Bloor Homes believe that this aspect of draft Policy SP16 is unsound for the following reasons:</p> <ol style="list-style-type: none"> 1 The current Outline Planning Permission (OPP) does not require the development to be carbon neutral and therefore introducing such a requirement at this stage is unsound because at no point during the preparation or determination (including at the Public inquiry) was the requirement to be carbon neutral considered from a technical and commercial perspective. 2 There are many different definitions of Carbon Neutral (some of which include embodied carbon) which are significant commercial and technical challenges which must be considered at the very outset of the design process. Sandleford is currently proceeding to Reserved Matters applications and therefore undertaking detailed design work. 3 The request for 'on-site' renewable energy is also ambiguous and can refer to large scale renewable energy infrastructure, implementing this type of system would impact on land availability and could also lead to a reduction in housing delivery. 4 The Outline Planning Permission for Sandleford Park East is supported by a number of planning conditions which were agreed with the Secretary of State (SoS). These should therefore form the basis for the sustainability and energy strategy. No additional requirements should be introduced at this stage. <p>To resolve the issues of soundness for Policy SP16, Bloor Homes consider that the most effective way to achieve this is to delete this requirement from Policy SP16 and replace it with the following text:</p> <p>"Development of the site will be expected to deliver:</p> <p>... On-site renewable energy to assist in the delivery of a carbon neutral development;"</p> <p><u>'A sustainability and energy strategy.'</u></p> <p>Infrastructure: The Policy refers to an Infrastructure Delivery Plan, but this is not appended to the consultation document. We reserve the right to make further representations in relation to this in due course.</p> <p>Para 6.55 - Remove</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	<p>Yes</p>
<p>5. Independent Examination</p>	<p>Yes. To fully explore the merit of including additional land within the Strategic Allocation.</p>

<p>Please give reasons for your answer</p>	<p>*Late Response*</p> <p>Opposition to the development of the Sandford Park site has been ongoing for more than a decade. The various planning application submitted by Bloor Homes for Sandford Park East and Donnington New Homes for Sandford Park West were rejected by West Berkshire Council in October 2020 only to be overturned by the Planning Inspectorate/Government in May 2021, approval being subject to 58 conditions. This approval only appears to apply to the 1000 home development for Sandford Park East submitted by Bloor Homes. As SP16 refers to 1500 homes presumably the additional 500 homes refers to the Sandford Park West development proposed by Donnington New Homes, which was previously rejected by West Berkshire Council. The strategic Development Plan for Sandford Park calls for a single planning application to achieve a comprehensive development for the whole of the Sandford Park Site. The Sandford Park East development on its own does not achieve this objective.</p> <p>The Planning Inspectorate/Government approved in subject to 58 conditions. Given the extreme pressure that will be placed on local services, transport, roads and utilities there is a need to ensure all condition placed on the approval are fully met. A planning requirement should be that the newly constructed Highfield Copse road linking to the A339 is extended from the outset of the development to form a spine road through the site to relieve the pressure of construction traffic using the two Monks Lane access and Warren Road.</p>

<p>development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>The strategic site at Sandford Park was first allocated more than a decade ago in the adopted Core Strategy 2012, but progress has been slow ever since.</p> <p>Following a lengthy planning process involving significant delays, the first phase of Sandford Park (1,000 units) was granted permission on appeal by the Secretary of State only in May 2022. The appellants were Bloor Homes (a volume housebuilder) and the Sandford Farm Partnership.</p> <p>Of the 58 planning conditions on the Sandford permission, 36 require pre-commencement submission and approval of details. As of February 2023, the West Berkshire planning portal has not registered a single discharge of conditions application. The sole submission being a s.96A non-material amendment, requesting a change to shorten the period for submission of all reserved matters to a maximum of 12 years.</p> <p>The 2022 WBC AMR gives (at Table 3.6) a figure of 100 homes to be delivered by 2026 in the current five-year housing land supply. This would require two outlets (ie developers) operating at optimum output for a period of two years (circa 0.8 units per week), plus affordable housing delivery (footnote 4 - Lichfields blog October 2018 'Driving Housing Delivery from Large Sites').</p> <p>Instead, it would be common practice to allow some 12-18 months for discharge of all conditions with a further 18-24 months of on-site enabling works prior to first construction.</p> <p>In summary, given the following:</p> <ul style="list-style-type: none"> • The infrastructure requirements of any large urban extension; • The number of pre-commencement conditions to be discharged; • The requirement for reserved matters applications to be prepared and submitted; • The absence of any other volume housebuilders appointed to date; • The fragility of the housing market generally <p>it is considered that delivery of 100 units by 2026 is highly unlikely. Again, the evidence from the previous studies quoted is that large strategic sites have a longer time to open up and generally deliver low numbers of units in the early years, building to a higher rate of delivery subject to local market conditions including competition. Commencement of first homes in the 2025-6 financial year seems potentially achievable, but the figure of 100 homes delivered by 2026 seems hopelessly optimistic.</p> <p>Beyond 2026, Sandford Park is proposed for completion within the timescale of the Local Plan Review, ie to 2039. This would require market units to be completed at the rate of 65pa plus the full 40% proportion of affordable housing in order to be built out within this timescale. This is highly unlikely from only one outlet and still subject to the vagaries of the housing market cycle were two developers to be delivering from the site.(footnote 5)</p> <p>It would therefore not be sound to rely on the delivery of 1500 homes in the plan period rather that figure should be reduced by at least around 250 units so that the rest will fall to be delivered beyond 2039</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	<p>No</p>

<p>Please give reasons for your answer</p>	<ul style="list-style-type: none"> The ICB notes that regarding Sandleford (SP16) consisting of 1,500 proposed housing units, that on page 55 of the Supplementary Planning Document for this site, it states that "Health care facilities to serve the site, likely to be through the extension of Falkland Surgery" but no details are given. It is further understood that there may be a Section 106 Agreement in existence for this Sandleford housing site which provides for £512,625 for health mitigation in the form of an extension at Falkland Surgery/68.35 % of the cost of such an extension (WBC email to Helen Clark of 10 February 2023 refers). As the assumption from this is that such an extension would then in total only cost £750,000 (including VAT, fees and finance), the ICB wishes it to be known that the extension that Falkland Surgery now to mitigate such a large housing development is estimated to cost around £1.25 M including VAT, and that consequently, if at all possible, the Local Plan Review and the amount of developer contributions required by the ICB for this 1,500 housing unit proposed development at Sandleford should be increased to reflect these more accurate cost estimated. A failure to reflect up to date cost estimates (given that we understand the £750k estimate dates back to 2014) will mean that the proposed extension will become unaffordable to the NHS.

2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	

Please give reasons for your answer	Warren Road is not suitable for general vehicular access
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	The policy should be re-worded so that Warren Road reverts to access for public transport and cycles as originally proposed.
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	No
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

<p>Please give reasons for your answer</p>	<p>Delivery of Proposed residential site allocations</p> <p>It is important to assess the progress and delivery of the sites identified in the LPR to meet housing requirements, in order to ensure there is sufficient certainty. This is particularly the case where allocation have been 'carried over' from the previous adopted Core Strategy. These amount to 2,652 dwellings, and represent a significant proportion of the overall housing requirement.</p> <p>Following an initial review of this progress, the table below lists those sites where there has been no progress or where progress has stalled are listed in the table below <i>[for table in full, see attachment 'Turley (Hathor Properties) Table']</i>, along with a review of their current planning status.</p> <p>Retained allocation from Core Strategy: Sandeford Park, Newbury (Policy SP16) This is a site allocation being carried forward from the current adopted Core Strategy for approximately 1,500 dwellings (current policy CS3).</p> <p>Planning status: Sandeford Park, Newbury (Policy SP16) This is a site allocation being carried forward from the current adopted Core Strategy for approximately 1,500 dwellings (current policy CS3).</p> <p>The remainder of the allocation is under different land ownership and has not yet come forward under a new planning application.</p> <p>1,580 homes have been counted for in the Council's housing supply position at 31st March 2022. It is unclear from the Council's Annual Monitoring Report 2022 and Five Year Housing Land Supply 2022 statements how many dwellings arising from the Sandeford allocation are anticipated to be delivered within the 5 year period.</p> <p>The AMR does acknowledge <i>"the timing of delivery is likely to be largely in the period post 2026"</i>.</p> <p>Based on the above, there remains some uncertainty regarding delivery from these existing long-standing allocations, particularly during the first five years of the LPR period.</p> <p>The LPR is clear that Newbury is the primary settlement in the District and has the greater potential to deliver sustainable development, yet it is not the primary focus for the proposed housing allocations. In order to secure a more balanced approach to delivering sustainable development across the LPR plan period, and to assist in delivery of a likely shortfall in housing in the short term, Newbury is well placed to accommodate further allocations.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	Yes

5. Independent Examination	Our position is that the site should be included as a proposed residential allocation and that the LPR does not provide enough sites to provide sufficient housing supply.
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	Yes
Please give reasons for your answer	Regarding the Spatial Strategy, a Strategic Environmental Assessment (SEA) has been carried out, as part of the Local Plan appraisal process to promote sustainable environmental considerations in the preparation of the local plan.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	

<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>This allocation for a residential development comprising approximately 1,500 Dwellings presented in this plan has not considered/listed environmental constraints and highlighted requirements and opportunities to ensure the sustainable delivery of the site as required by national policy. Including this information in the policy page will provide perspective which then highlights the need for the necessary requirements to allow development on this site.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	<p>Yes</p>
<p>Please give reasons for your answer</p>	<p>The Council (Under Section 33A of the Planning and Compulsory Purchase Act) in its Duty to Cooperate with other prescribed bodies/key agencies when preparing the LPR in order to address strategic planning issues relevant to their areas has engaged generally with the Environment Agency during the Plan making process.</p>
<p>4. Proposed Changes</p>	<p>The below should be addressed and included in Policy SP16 - Sandlesford Strategic Site Allocation as requirements and opportunities.</p> <p>Requirements</p> <p>There should be no penetration of the London Clay strata. No discharge into groundwater and information should be provided to demonstrate this. Please refer to the Environment Agency's Approach to Groundwater Protection guidance Environment Agency's Approach to Groundwater Protection guidance for all types of development proposals. [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/692989/Environment-Agency-approach-to-groundwater-protection.pdf]</p> <p>There is no mention of the Enborne on the south boundary of the site or the provision of a buffer zone of a minimum of 10 metres to prevent run-off which we requested previously. This needs to be included as the Enborne is a main river.</p> <p>We would not support any additional flows to Newbury STW (as is the case for some other allocations). Newbury STW is currently at around 98% of its dry weather flow - DWF capacity, and the development planned to drain to the STW would certainly take it over capacity. A new DWF permit would be required that ensured no deterioration of any quality elements. Newbury STW is to get a 0.1mg/l phosphorus permit limit during AMP 8. This is to meet the CSMG requirements of getting the River Kennet SSSI to good status. Before any development connecting to Newbury STW proceeds, we would need to have confidence that the additional phosphorus load would not undermine the AMP 8 objectives. 0.1mg/l is a 'stretch target' and TW would need to have confidence they would be able to meet that target with any additional loading. The Environment Act will compel water companies to reduce their phosphorous loading from STWs by 80% from a 2020 baseline. Permit limits lower than 0.25mg/l do not count towards that target so higher loads to a STW with a permit limit lower than 0.25mg/l may undermine a water companies' ability to meet the Environment Act objectives. Newbury is a high spiller, and additional developments and flows will increase frequency of spilling. Therefore, we would not support any additional flows entering - the Newbury STW, a known high spiller until significant work has been done to tackle the causes of the frequent spills. As stated in our notes on Policy DM7, adequate water supply and wastewater treatment infrastructure capacity resources must be available or provided to support all proposed development proposed prior to the occupation.</p>

	<p>Opportunities</p> <p>There may be opportunities to enhance the river corridor which would contribute to biodiversity net gain. There is also various local wildlife sites and ancient woodlands which would need to be protected and a buffer of 15m between these and any Local Wildlife Site and Atomic Weapons Establishments</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No</p>	Yes
<p>5. Independent Examination</p>	<p>We wish to attend the examination for an opportunity to explain the need for this site allocation to include</p> <ul style="list-style-type: none"> • environmental constraints • site requirements to enable development and • opportunities to ensure the sustainable delivery
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No</p>	Yes

<p>1. Do you consider the Local Plan Review is legally compliant? * Yes * No</p>	No
Please give reasons for your answer	<p>Regulation 12 of The Environmental Assessment of Plans and Programmes Regulations 2004 states: “(1) Where an environmental assessment is required by any provision of Part 2 of these Regulations, the responsible authority shall prepare, or secure the preparation of, an environmental report in accordance with paragraphs (2) and (3) of this regulation.</p>

	<p>(2) The report shall identify, describe and evaluate the likely significant effects on the environment of—</p> <p>(a) implementing the plan or programme; and</p> <p>(b) reasonable alternatives taking into account the objectives and the geographical scope of the plan or programme.”</p> <p>The SA/SEA Environmental Report states:</p> <p>“The Core Strategy had a focus on Newbury and Thatcham, with two strategic sites allocated in Newbury and smaller sites allocated across the rest of the district. This mix of strategic and smaller sites across the district worked well for the Core Strategy by providing flexibility and natural phasing of developments across the plan period. As a result a similar mix of sites is considered to be appropriate for the LPR with no other alternatives considered.”</p> <p>Regulation 12 requires the identification, description and evaluation of ‘reasonable alternatives’. If an approach worked well in the current plan period, it does not follow that it is the best approach for the following plan period – and it is certainly does not follow that there are no ‘reasonable alternatives’.</p> <p>It is incorrect for the SA/SEA to assert that the approach in the current Local Plan has ‘worked well’ by providing ‘natural phasing of developments across the plan period. This is certainly not the case for the Sandleford Strategic Site Allocation. Policy CS3 of the current Local Plan states:</p> <p>“Within the area identified at Sandleford Park, a sustainable and high quality mixed use development will be delivered in accordance with the following parameters:</p> <p>Phased delivery of up to 2,000 dwellings, of which at least 40% will be affordable and with an emphasis on family housing. At least half the housing is planned to be delivered by 2026;”</p> <p>However, as the SA/SEA explains (pages 35-37): “no work has started at the site at Sandleford, with outline planning permission for the eastern part of the site only granted (on appeal) in May 2022.” The site has been re-allocated “as a single site for up to 1500 dwellings”. “Reducing the number of dwellings on the site allowed for better consideration of the constraints on the site (Ancient woodland, drainage, landscape buffers etc.) and will allow for adequate and appropriate mitigation measures to be put in place.”</p> <p>The SA/SEA states (page 25, below the table):</p> <p>“Following the decision that the spatial strategy should focus on Thatcham, strategic site options were considered, based on the sites submitted through the February 2020 HELAA.”</p> <p>Therefore, ‘reasonable alternatives’ that are not around Thatcham were not considered. This decision was also based on the false premise that the town of Thatcham would have sufficient infrastructure to support this development, either at the time of the decision or as a result of the development. The lack of infrastructure in Thatcham is addressed by other representations of the Town Council.</p> <p>The Sustainability Appraisal / Strategic Environmental Assessment (SA/SEA) for Policy SP1 cannot be legally compliant, because it explicitly states that it has not complied with the requirement to identify, describe and evaluate reasonable alternatives to the proposed policy. The experience of delays in delivery of Sandleford Park in the current plan period (described in paragraphs 6.44 – 6.46 of the draft Local Plan, and the reduction in the number of dwellings from 2,000 to 1,500, suggest that the proposed policy for North East Thatcham is not even the best alternative.</p>
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by</p>	

<p>the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>As explain in Section 1 above, the draft Local Plan explicitly states that no alternatives have been considered. The evidence of the failure of the Sandeiford Strategic Site Allocation to deliver the expected number of houses suggests that relying on two strategic sites (with a number of smaller sites) is not even the best approach.</p> <p>As the sustainability appraisal is not legally compliant, the Local Plan cannot be in accordance with Paragraph 32 of NPPF.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	N/A
<p>4. Proposed Changes</p>	<p>A new Sustainability Appraisal / Strategic Environmental Assessment (SA/SEA) needs to be undertaken, which considers all 'reasonable alternatives' to the decisions relating to strategic sites and proposed approach of Policy SP1.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	Yes
<p>5. Independent Examination</p>	<p>Thattham Town Council is the principal representative body of the community of Thattham, which is the location of only new strategic site allocation in the draft Local Plan. The suitability of this site for development is reliant on having adequate infrastructure. However, the regeneration that was promised in the current Local Plan has not materialised, and would not be delivered through the policies in the draft Local Plan. The Town Council can provide local insight to the examination about Thattham, and particularly on the substantial deficit of infrastructure in the locality. It would also be happy to elaborate on its other concerns about the current proposals for the North East Thattham Strategic Site Allocation, as described in these representations.</p> <p>The Town Council anticipates that changes necessary to the draft Local Plan in relation to site allocations are greater than could be addressed through 'main modifications'. If, however, the Inspector is minded to consider recommending 'main modifications' to policy SP17 and related matters in other Policies, it would welcome the opportunity to provide its perspective on what modifications would be required.</p>
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes</p> <p>* No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes</p> <p>* No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes</p> <p>* No</p>	Yes

Please give reasons for your answer	I see that west Berkshire council are still not listening to the people that live in the area where you are planning to build Thatcham on green belt land, this will heavy impact on the residents that already live in this area. There are too many too many cars traveling in Thatcham at peak times. You will be creating more flooding in an area that is already prone you have already built in Thatcham there has been no new infrastructure with wait times for a Doctor's appointment is are coming from other surgery's to fill in. The schools catchment areas are getting bigger and bigger and with a shor devastating for children that are already being taught in the local schools with bigger classes.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No

Please give reasons for your answer	I am writing in opposition of the planned development in North East Thatcham. As a resident of Upper Bucklebury and Chapel Row, I foresee a safety risk in the volume of traffic that would be generated on the new lane. Already traffic is heavier in this area. With the proposed extra houses would come commuters seeking a route to the bus stop via the footpaths or lampposts. When children are walking to their school buses that park opposite the Bladebonr, I can see a child being injured by a rushing commuter in a car.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	

4. Proposed Changes	With other brownfield sites available to develop , I don't think greensite is the option the council should support.

<p>1. Do you consider the Local Plan Review is legally compliant?</p> <p>* Yes</p> <p>* No</p>	No
Please give reasons for your answer	<p>We are very concerned about the lack of attention to AONB issues as well as the reluctance to discuss the development of Brownfield sites in the area. Many of us in Bucklebury can attest to the existing problems with off-roading, littering, and noise, which will only worsen as the number of vehicles increases. In short, Bucklebury has an ecosystem of natural beauty which we understand no environmental research has yet taken place notwithstanding there is a statutory requirement to do so.</p>
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes</p> <p>* No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	No
<p>2. Do you consider the Local Plan Review is sound? -</p>	No

<p>Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>As an overview we think the Plan has been badly thought through and should be delayed until the various local interest groups, including the Parish Council and Bucklebury says No, are satisfied it is in the interests of all, which is not remotely the case at the present time. The proposal to build 1250, 1500 or 2500 additional homes is understandably causing considerable concern among residents and especially, Bucklebury. The NPPF consultation process has not yet been completed and we suggest WBC should take a pause, to pause the planning process and to bring forward an updated plan when the details become known in 2023.</p> <p>We are very concerned about the lack of attention to AONB issues as well as the reluctance to discuss the development of Brownfield sites in the area. Many of us in Bucklebury can attest to the existing problems with off-roading, littering, and noise, a Common which will only worsen as the number of vehicles increases. In short, Bucklebury has an ecosystem of natural beauty.</p> <p>We understand no environmental research has yet taken place notwithstanding there is a statutory requirement to do so.</p> <p>We further understand there has been no traffic modelling to take account of the significant increase in vehicles resulting from the proposed development. This is evidenced by the comments in the latest issue of the Newbury Weekly News from Mr Brian Lyttle, the WBC Planning Officer, that there is no provision for any increased parking at Thatcham Station and, moreover, there is no provision in the Infrastructure Delivery Plan 4 of the Sustainability Appraisal - to promote and maximise opportunities for all forms of safe and sustainable transport.</p> <p>There is no significant increase in parking at Thatcham Station. Moreover, it has come to light that there is a proposal to create a new road, which is not a sensible proposal. The road is steep, narrow and winding, is without pavement and is already dangerous. This proposal will not have a positive impact on road safety and would reduce opportunities for walking and cycling. We understand the proposal is on HHR which would add yet more traffic and may well result in an increase in anti social behaviour which is already a problem in the area. In short, there does not appear to be a credible infrastructure plan or a willingness to discuss these issues, publicly.</p> <p>No clear and important infrastructure plans appear to have been taken about schools and medical services in the area.</p> <p>There are many other issues which concern us and we may follow up this e.mail nearer to the time the Public Consultation takes place. We would like to see evidence based responses to these issues bearing in mind the Local Plan is meant to take us through to 2038.</p>

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>Firstly, the plans are unsound and will have a negative impact on my family, neighbours and me personally.</p> <p>I believe that this development will devastate the peoples lives already living in the area. The infrastructure cannot cope</p> <p>The impact to local wildlife will be incredibly negative affecting this renown area of outstanding natural beauty. We can't take that away from us with the inevitable light pollution.</p> <p>I can't understand why developers are not forced to build consciously. I appreciate there is a need for housing but not in a small town.</p>

Please give reasons for your answer	<p>I would like to express my official objections to the proposed NE Thatcham housing development between Thatcham and Reading. In reviewing the plans, I have several reasons for my objections, which I will outline below.</p> <p>1. TRANSPORTATION. Traffic volume and road safety: I reside <address redacted> in Burdens Heath by the <address redacted> pathways on Burdens Heath and in maintaining the hedge and the verge side around the property already poses a significant risk to my and other residents' safety still further. The proposal will significantly increase the risk to my and other residents' safety still further. The current volume of traffic to the speed limit will undoubtedly increase with the higher volumes of traffic that will be seen because of the development of a straight road that is already a magnet for young drivers who park up before flooring their accelerators to test the speed limit stretch. Alongside this, regular drivers persistently fail to slow down when entering the village. The proposed development will be substantially because of cars circumnavigating the A4 travelling through Cold Ash, Upper Bucklebury, Chapple Row and the already congested traffic on the A4 travelling through Thatcham and onward towards Reading and the M4. The development is very dangerous to maintain the frontage of my property and safely walk into the village. Harts Hill is a narrow and winding road.</p>

	<p>Heath is very narrow in places, both of which cannot accommodate the increase in the volume of traffic, nor the increase in the number of vehicles safely.</p> <p>2. LOCAL HEALTHCARE SERVICES: There are insufficient Healthcare Services under the NHS to meet current demand. Getting a dental appointment is currently very difficult, due to the shortage of GP's in the area and I fear the extra strain from the increase in traffic will have a detrimental impact on the services used by the existing residents. From a dental perspective, regular check-ups at a dental practice are cancelled by the NHS Practice as they regularly lose and fail to replace existing dentists. These cancelled appointments are difficult to rearrange, and it is a consistent pattern driven by the volume of patients and the ability to attract dental staff. I recall a dental appointment cancelled and they will not rebook as they don't have visibility on when they will be able to get a replacement dentist.</p> <p>3. ENVIRONMENTAL FACTORS: The area surrounding my property comprises ancient woodlands and heaths which are of high ecological and bio-diversity. The rear of my property sees many deer feeding up to my fence approaching from the area where the deer roam on their natural habitat. The deer roam freely and regularly cross Burdens Heath, Harts Hill Road, the village of Upper Bucklebury Common and The Avenue. The increase in traffic will undoubtedly shrink the area of their roaming habitat whilst also increasing the number of vehicle accidents because of their crossings will undoubtedly rise, both significantly reducing their population and the road users and would pose serious harm to road users in general.</p> <p>I moved to Upper Bucklebury expressly to get away from the towns and cities that have been my home in the past and my view of the area and outlook. I look out onto ancient woodland <redacted> and am located <address redacted> the edge of the North Downs which is a natural barrier/buffer behind my property, which currently acts as a barrier between the urbanisation of Thatcham and the village of Upper Bucklebury. The Natural Beauty, for the proposed development, will undoubtedly both affect the landscape and biodiversity of the region. The presence of Fox, Badger, and birds of prey will be adversely affected. In addition, we see the Great Crested Newt which is a protected Government wildlife and habitat conservation (hyperlink: https://www.gov.uk/guidance/great-crested-newts-protection) and the proposed development is likely to destroy the habitat of this protected species and would require a licence from Natural England to be protected. I am unaware if this has been granted.</p>

Please give reasons for your answer	Having read the proposals of your 325 residential homes to be built almost opposite our estate, we ask these questions Where are the thousands of people who live in them going to find doctors? Trying to see a doctor since covid is almost impossible building (how many?) places for the elderly, where will they access doctors, nurses and have their obvious extra needs met in this area when they require urgent help, but not urgent enough for an ambulance? Where are people going to find chemists? In Thatcham, town centre there are NO chemists left. The only one nearby is the Medical Centre and is so tiny, that stock is reduced to practically nothing and the queues outside on a daily basis are

	<p>Where are they going to find a bank? None left in Thatcham now.</p> <p>As we have no school-age children we don't know if any have places for all the new incomers, but do they? Have you?</p> <p>New homes are not viable without the infrastructure for everyday living and we don't see any of that on your plans.</p> <p>Country parks, woodland, play areas and wildflower meadows are all very well but people need doctors, banks, chemists etc.</p> <p>And these things should be in place before one single house is built.</p> <p>It was only recently in 2019 that Bloor Homes built their Thatcham Place estate on Tull Way. There are 75 houses there. How many more will they build? How many more market town like Thatcham?</p> <p>Yet plans are still in place for a new development at the top of Floral Way, containing an enormous 2,500 homes. More than 2,500 homes. How many thousands of people will settle there? If that gets planning permission granted why will we need your homes? How many thousands of people will go for essential services?</p> <p>Just because land is available, doesn't mean you have to fill it!</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>

Please give reasons for your answer	<p>I'm responding to the proposed Local Plan review consultation for 2022-39.</p> <p>My name is <name redacted>, I live at <address redacted>.</p> <p>My main concern is the Theale area.</p> <p>"- 40 houses built on Whitehart Meadow - the area of land between the Woodfield Way estate and the M4. - 60 houses built on the site of the old sewage works, off Blossom Lane - 1,500 houses built on the Theale side of Thatcham."</p> <p>At least 50% of each of these if they are approved MUST be social housing. This is the biggest need in our increasing and maybe 5% affordable homes shouldn't just be flats either! Just because people can't afford to stay in their village garden or basic things many people take for granted. It's a village, they are green and plentiful, NO PLACE for flats. My and gives everyone outside space and a garage and is an ideal fit for the village if inspiration is needed.</p> <p>My next concerns is the doctors surgery and schools that are very over subscribed as it is. We would need them ma the area.</p> <p>Theale already has a bad smell of sewage outside the new Red Lion Flat development on the Englefield road/church s court/Elizabeth court already have sewage issues so Theale's entire village will need its sewage waste pipes upgrad</p>

3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	Off the back of this we have already got several hundred houses coming to the village maybe they need to be the "G they have been built a new review for Theale can take place to see if they can even cope with those?
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	
5. Independent Examination

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	The plan has not been easily accessible - eg not in village halls, very difficult to understand and complete for people literate. Local councils and local groups have had limited opportunities to reply and respond to the plan.

	Destruction of wildlife and habitat - lack of consideration eg ground nesting burds such as the night jars
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>Encouragement of brown site development - there are still many sites in Newbury which need development and would be better served by the old police station,</p> <p>Protection of the countryside and greenbelt areas</p> <p>Protection of rare species eg ground nesting birds eg bringing cats nearer to their breeding sites</p> <p>Travel- encouraging green travel.</p> <p>Residents would all have to use a car - would be better nearer the centre of Newbury where there is better travel infrastructure</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>There seems to have been limited consultation with local groups.</p> <p>There have been no maps or proposals shown on the local village halls.</p> <p>Not easily accessible to people who are not computer literate</p> <p>Not easily understandable format</p>
<p>4. Proposed Changes</p>	<p>More widely advertised and accessible</p> <p>Reducing the proposals to nearer the centre of Newbury where transport is more easily accessible and there is less impact on green spaces and wild species habitats</p> <p>Further consultation response submitted: 31.01.23 via email:</p> <p>I am very concerned about the proposed North Thatcham to Upper Bucklebury housing development for the following reasons:</p>

	<p>1. the loss of such a beautiful area which is full of wildlife - hares, birds etc</p> <p>2. bringing cats nearer to rare ground nesting birds and species</p> <p>3.the impact on traffic - the road to Bucklebury is already like a busy race track to Reading</p> <p>4. the loss of green space between Newbury and Upper Bucklebury and the urban spread.</p> <p>I would like to have these objections raised</p> <p>There appear to be many brown sites in Newbury which could be developed to make Newbury itself more appealing eg the old police station site.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>	Yes
5. Independent Examination	The effect will be widespread on the local community and effect everyone who lives locally
<p>6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination</p> <p>* Yes</p> <p>* No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination</p> <p>* Yes</p> <p>* No</p>	Yes
<p>6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review</p> <p>* Yes</p> <p>* No</p>	Yes

Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I would like to put forward an objection to the proposed building works between Thatcham and Upper Bucklebury, I feel this would have a devastating effect on the local area for the following reasons</p> <ol style="list-style-type: none"> 1. Traffic increases through upper Bucklebury would have a detrimental effect on the health and safety of its residents and have a negative impact on the environment 2. The increased pressure on the primary and secondary schools cannot be sustained, the local schools are already at capacity 3. I am particularly concerned about the impact of the increased use of Bucklebury common, this will impact the wildlife and the common has been unchanged for hundreds of years, the increased use of the common will ruin the natural quiet tracks and footpaths and the common in a way which cannot be reversed. The ANOB will be gone forever. I also feel the light pollution will effect the night sky in the few areas where the stars can be enjoyed. The increase in noise will also have a huge impact on Bucklebury residents 4. I am also very concerned about how the local doctors surgeries and the dentists are going to cope with the increased numbers and cannot cope with any increase in numbers, as a recently retired nurse I know this will be a major problem. 5. From your proposal Upper Bucklebury will become part of Thatcham and we will loose our village, I feel Berkshire is a special place and to loose any of these is a tragedy.
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes * No</p>	

5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No

Please give reasons for your answer	<p>I am writing to you to object the plans for up to 2,500 properties to be built in NE Thatcham.</p> <p>I live on <address redacted> and regularly use the green area to walk my dog.</p> <p>The traffic on floral way is already very heavy and the traffic through town builds up very quickly. Sometimes it can take me 10 minutes to get to my road onto the main road.</p> <p>It has also taken me 3 weeks to get a doctors appointment. With the increased numbers of people I am very concerned about the impact on our doctors.</p> <p>I think thatcham is a lovely small town and the increased number of people will heavily change the area.</p> <p>I am also concerned about the environment, there has already been a lot of houses build by Vodafone and another property on the main road, a hotel, which may I add you have already build access before the plans have been approved, is this aloud?</p>

Please give reasons for your answer	<p>I write to object most strongly to the councils proposals to build between 1500-2500 houses in Thatcham.</p> <p>There are many areas which make the building of any houses completely wrong.</p> <p>Firstly, the roads are not able to cope with the traffic we now have, let alone any more cars. For every additional house we have more cars and then more pollution than we have already.</p> <p>The schools are full to overflowing. This is both primary and secondary. We have no bus service so children get bought and should be walking.</p> <p>Our GP surgery are overstretched and already have more patients than they can cope with. They want to do a good job but we all need but they cannot do this because of patient numbers.</p> <p>We live in an area of outstanding Natural Beauty which must be protected at all cost. Nothing is more important than protecting our countryside and people. Wildlife is disappearing at an alarming rate and people are suffering from all kinds of health issues that they would not have had space around us to live our lives.</p> <p>I shall not live to see the appalling destruction of our beautiful countryside if the Housing Development goes ahead, but I shall be there after me and who will have to live with the consequences of your actions.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	Destroying an AONB cannot be legal!

<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>The plan is completely unsound. It is not positively prepared, justified, effective and nor is it consistent with national policy. It would not be a sustainable development for WBC nor the Thatcham area.</p> <p>The grounds for impact and benefit assessment lack any credibility whatsoever and are simply not evidence-based. No alternatives have been explored and there is no evidence to show that this is an appropriate strategy for WBC.</p> <p>There is no evidence that such a ridiculously large development is deliverable within the timescale.</p> <p>This development would destroy the landscape in an AONB.</p> <p>The increased traffic, lack of access, junctions, car parks and insufficient safe and sustainable transport would increase the impact on the area.</p> <p>There is completely inadequate education and healthcare provision already and this development would exacerbate the situation.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	There is insufficient evidence that local residents views have been taken into account.
<p>4. Proposed Changes</p>

<p>Please give reasons for your answer</p>	<p>Please accept this e-mail as our objection towards the proposed development in Thatcham NE based on the following:</p> <p>Significant increase in population - what provisions are being made for a Doctors surgery, Dentists and hospital space at full capacity, with some services reducing i.e pharmacies closing down.</p> <p>Significant increase of traffic - we already have a struggling road network around the whole area, take Thatcham Tra example. The 'rat runs' the surrounding villages will be subject to will most certainly increase danger to life as they are very few passing places and blind bends. Harts Hill does not lend itself safely to more traffic with the added danger of The junctions of Burdens Heath onto Broad Lane and short section of road by the SAAB garage to join Harts Hill Road extremely hazardous to pull out of with the extra vehicle numbers. Likewise the 'pinch points' along Broad Lane in Upper more 'near miss' incidents as drivers will be waiting much longer for their turn to proceed</p> <p>Services - we have had a number of issues with our water supply and leaks over the years. Whilst there has been work still experience a number of leaks. Can all the services, be it water, waste, electricity etc cope with such an increase to help alleviate flooding, where will all the rainfall run off to now as it wont have the fields to help absorb it? a fact that become a more common problem with our changing weather patterns.</p> <p>Whilst we appreciate affordable housing is in short supply, does this area really deserve to be disfigured by a development when open green space is being hailed as a 'healer' and everyone is being encouraged to go out and benefit from it, why it, let alone the untold damage we are doing to our wildlife. There are alternative plots of land available for development sites, why can't these be looked into before all the irreversible damage is done to our green fields?</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>

<p>Please give reasons for your answer</p>	<p>We live in Upper Bucklebury and are appalled by the proposal to build 1500 houses as an enormous of Thatcham, through the village. You will know of the increased strain on Thatcham, already overloaded and with little recent infrastructure. Kennet School already take any more pupils. Broad Lane, Upper Bucklebury, already often has too much traffic and another lot of about 1500 houses would be a disaster for the system.</p> <p>However I particularly want to draw your attention to the impact on Bucklebury Common. The Common is an important heath in Southern England. A number of unusual birds breed there; there are nightjars, stonechats, woodlarks and skylarks and trouble and indeed money have been spent to preserve the heath as heathland, in particular by control of the encroaching trees. All nest on or near the ground and the nests are likely to fail if disturbed by dogs... If 1500 houses are built there would be a lot of dogs and many of them would be exercised on the Common. This would alter the ecosystem substantially and we would lose the heath. For these reasons and many others I hope you will reject the proposal for 1500 houses in NE Thatcham.</p>

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	I wish to formally object to the proposed Thatcham North East Housing Development as I believe that the approved plan is not in the public interest. Environmental The land that it is being considered for development is currently on a green field site and is prime agricultural land. As a result, the land is not able to become more self-sufficient in our foodstuff production and less reliant on imported goods. Furthermore, the land is a valuable resource (as a result of its location in the Common) and such a large development would have a huge detrimental effect on such a fragile and diverse eco-system. Therefore, the Council should give more consideration has been given to the negative impact on this valuable resource.

Much of this land also lies in the Kennet river valley which at present floods regularly down stream – a situation which is a serious situation for the neighbouring communities.

I do not believe that WBC has given serious consideration to brown field sites that are currently available for development.

Healthcare

As I understand it, only vague references have been made towards the provision of infrastructure to support such a development of medical services, etc.

On the subject of healthcare, a 450 sq/m primary healthcare facility with the suggestion that a GP surgery be offered to the Integrated Care Board but the document contains no details into strategic healthcare planning. A development of this scale is not a fit for purpose Health Impact Assessment (HIA) according to current guidelines from Public Health England. The plan is overstretched so obviously there would be serious negative impact on both existing and new residents. The only realistic HIA is that the inevitable conclusion would be an acceptably high negative impact on existing and new communities and such a development should not be permitted. Again, the proposals for this development are fundamentally unsound as any required documentation has been deliberately ignored. None of the local GP practices have been consulted and none would be prepared to take the full range of branch surgery on economic/practical grounds.

The same argument applies to the provision of dental services in the Thatcham area.

Education

WBC as an Education Authority has a duty to make arrangements for suitable school provision. How this obligation is met is not defined or evidenced in the LPR. It is therefore clear that the plan for secondary school provision is unsound for the following reasons:

- 1 There is no satisfactory evidence of the number of pupils the school is to cater for.
- 2 The location of the school is not clear.
- 3 The number of Form Entries is not defined but it is noted that anything less than a 6FE school is unsustainable.
- 4 The timing of the funding is not clear.
- 5 There is no evidence that the proposed funding is sufficient to meet the Council's obligations to provide education.

Transport

There would be serious traffic management issues with the major trunk route of the A4 (single carriageway and currently used for the majority of the traffic). The plan includes an exit from the development onto Harts Hill Road, a single track road through the village of Upper Bucklebury. With the inevitable congestion caused along the A4, this will lead to much of the traffic seeking alternative routes through the unlit villages eastwards through Upper Bucklebury, Chapel Row and Bradfield Southend. Potentially, much of the traffic will be heading towards the Bradfield College area. Any traffic heading in a westerly direction would inevitably make its way through Cold Ash towards the M4 junction 13, passing by the schools of St Finian's Catholic Primary School and Downe House School. The scant consideration given to these issues seems unsound and unsafe to the point of being dangerous. Furthermore, WBC claim that modelling suggests that such measures will not cause problems. However, they not produced any modelling results to this effect. For some reason WBC have not considered the Harts Hill junction. This again would seem to be unsound as scant thought appears to have been applied.

Timing of the LPR Consultation

At the outset, one of the reasons given for this development was to fulfil WBC's obligation to meet certain Government targets. The use of this particular area was that there was nowhere else suitable due to the high percentage of AONB and nuclear facilities in the area. Burghfield. At the time, it was acknowledged that the siting was far from ideal. Since the latest announcements from the Government for Levelling Up, Housing and Communities) a Written Ministerial Statement was released setting out forthcoming amendments to the National Planning Policy Framework (NPPF).

The Statement set out the following (inter alia):

I will retain a method for calculating local housing need figures, but consult on changes. I do believe that the plan-makers should start with a number. This number should, however, be an advisory starting point, a guide that is not mandatory. It should be used, working with their communities, to determine how many homes can actually be built, taking into account what should be protected, that our precious Green Belt or national parks, the character of an area, or heritage assets. It will also be up to them to ensure affordable housing if they wish.

My changes will instruct the Planning Inspectorate that they should no longer override sensible local decision making where there are local constraints and concerns. Overall this amounts to a rebalancing of the relationship between local councils and the Secretary of State to give local communities a greater say in what is built in their neighbourhood.

Obviously none of this has been taken into consideration. Local communities have been totally ignored. The precious AONB will be severely impacted. The fact that the site was not ideal at the outset and the mandatory requirement to develop it down, it is unsound to go ahead and develop on an unsatisfactory site.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable	No

<p>alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>I wish to object to the proposed Thatcham NE Development as some of the plan's components appear to be unsound.</p> <p>My reasons for this are:</p> <ul style="list-style-type: none"> • Loss of a substantial sized piece of prime precious "green belt" land which currently clearly separates Thatcham from the building of houses, which will have a devastating affect and impact on the local wildlife, environment and ecosystem. • During the building phase of this development there will be significant disruption from noise and heavy goods vehicles on the site on Harts Hill; the A4 and other local roads, as well as large noisy construction vehicle movements within the development time span. • Once the development is completed there will be a huge rise in vehicle movements on the A4, Flora Way, Hartley Row, Bradfield Southend, Thatcham, Cold Ash as most home occupants have one or more vehicles. • There are no clear provisions in the plans for additional health centres, dental practices, or schools in the locality of the development. The local current services and schools are already heavily pressured/stretched and will not be able to cope with the increase from the development. • The negative impact that this Development has for me is that it's creation will take away from myself and other's beautiful views where the Development is going to be sited. Collateral damage would occur in and on the nearby Bucklebury woodlands and protected species, from the extra foot fall from the inhabitants from the Development visiting the area. • The proposed development will increase my driving journey time along the A4 towards Newbury from the East of Thatcham. Extra vehicles that will be exiting and entering the Development. These extra vehicles will be creating additional environmental impacts.
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>West Berkshire Council Planners should look at all the closed public houses, derelict, unused dwellings and commercial premises in the area and consider building new homes on these brown belt sites rather than taking PRIME PRECIOUS GREEN BELT land for this new development.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p> <p>* No</p>

that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	The Thatcham area is already over subscribed with housing versus the appropriate services such as medical, police council provided services, etc. Then there is the environment, the destruction of huge areas of green field and wood habitats, some maybe endangered species cannot be overlooked or swept aside. Another aspect of increased population system would also be totally inadequate. Say NO the this development.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	Building 1500-2500 Houses is simply not suitable for the size of Thatcham and the current infrastructure we have. The additional cars, would make even the shortest of journeys, much longer. Where are the jobs for the adults employed at these homes? I appreciate that some jobs are WFH, but not all. Where are the school places for the children going to live at these homes? The schools just don't have the space for additional pupils. Where are the additional doctor appointments for the new residents? How many of doctors appointments. I have personally experienced calling Thatcham Medical Practice to make an appointment and they had one doctor's appointment available that day, for the whole day, for the whole of the area they cover. Are you proposing a capacity for an additional (at a minimum) 3000 residents?
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to express my strong objection to the proposed North East Thatcham development. This is on the grounds that the provision of secondary education, in particular in secondary education, is inadequate to cope with such a large concentrated increase in housing, and also the impact it would have on the adjacent Area of Outstanding Natural Beauty.</p> <p>The infrastructure in Thatcham cannot support the increase in population this development would cause, I am going to raise this as a separate objection. Similarly the case for medical support, transport, etc. The provision for education from Early Years through to Secondary Education is also inadequate within the Local Plan Review (LPR). The fact that there is no coherent end-to-end plan breaches the Council's obligations under the Act for children. As the parent of a child at Kennet School, I have seen the overcrowding that has already occurred since the school opened in 2019, it would further deteriorate education provision to increase numbers, meaning that any additional pupils would be unable to attend. Where schools are oversubscribed those children who live nearer to the school are given precedence, this means that those from Thatcham development would be able to opt for Kennet and those from Bucklebury would have to travel further distances.</p> <p>Furthermore, the LPR plans to address the number increase with an additional secondary school in Thatcham are in my view contradictory. The latest LPR proposes that a sum of £15 million be contributed by the developers to Secondary Education. However, the location of the land to be provided and hence no possibility of assessing its suitability. The Thatcham NE development was assessed by David Locke Associates and Stantec on behalf of WBC, proposes funding for a 6-8FE (Form Entry) secondary school. Government guidelines are that Secondary Schools with less than a 6FE are not sustainable. However, the NE Thatcham development (which proposed 2,500 houses), is not sufficient to fill a 6-8 FE school. With an allocation of 1500 houses in this same Thatcham NE Development Plan it was noted that the education provision exercise was based on WBC's 2023 LPR of date 11 year old study. The LPR Review to 2039, Policy SP17, now states that land (but not the Secondary school) is allocated for development. How long would it be until the actual school is built and how would it be paid for?</p> <p>My second area of objection is in relation to the location's proximity to an AONB. Recently a bid to build 26 homes in the area was dismissed. Basingstoke and Deane Borough Council turned down the proposed development in October 2022 by development company JPP Land. The council refused the development on the grounds that they would have a significant impact on the North Wessex Downs Area of Outstanding Natural Beauty. This opinion was shared by the Planning Inspectorate, who issued a decision in January 2023. In the decision it stated "The appeal scheme would suburbanise an important green gap which makes the rural setting of Highclere and in doing so would cause irreversible harm to the intrinsic rural character and appearance of the area...Furthermore, it would fail to conserve and enhance the landscape and scenic beauty of the North Wessex Downs AONB. It is of the importance of considering AONB when making planning decisions; if Basingstoke and Deane Borough Council had approved this with 26 houses, why can't West Berkshire Council recognise the impact of 1500 that would boarder onto the same area?"</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>Although I appreciate the difficulty you face in West Berkshire Council in trying to find suitable space to accommodate housing targets, I hope the recent announcement that mandatory targets are to be scrapped, will mean the N.E.T.D into account comments made on 7th December by the Prime Minister in "the house" namely "Developments should protect the character of local communities", that there will be a "crackdown on Land Banking" being invested in Brown Field Site developments"</p> <p>All of which now appear to have a bearing on this proposed development and will mean along with many other key areas disregarded, the whole plan can and should, be reconsidered along with areas that appear not to have been given due weight.</p> <p>A] an improvement to road and access infrastructure to handle the inevitable increase in road use along the A4 and through Cold Ash, Upper Bucklebury, Midgham, Brimpton, Woolhampton and of course not least Thatcham and the provision of the railway, canal and river Kennet.</p> <p>B] I see no mention for extra secondary school capacity for the Kennet school or anywhere else. The Kennett already has will extra places be achieved?</p> <p>C] With the development being proposed on a green field site adjoining an AONB I see nothing positive or related to a development on biodiversity or damage etc to the ecosystem both in the general AONB and in particular Bucklebury development will definitely not "protect the character of our local community" therefore should be seen as going against and the current government's view.</p> <p>D] I believe there has been a development proposed to you [WBC] covering an area containing a portion of land on the south side of Thatcham know as Colthorp. This development also proposes a rail bridge. It seems to me, that such a development to help answer some of the infrastructure issues previously mentioned.</p> <p>Equally some years ago a proposal was rejected for a smaller development covering an area known as Seigecroft Farm. It was re-visited and pulled together with the previously mentioned, Colthorp / South Thatcham opportunity a much more harmonious could be achieved.</p> <p>I could continue endlessly with negative observations regarding the proposal and in particular its scale and the negative impact on the local environment the wild life and general ecosystems that flourish in such an area and the adjoining AONB.</p> <p>But considering the apparent NEW attitude in rural development reflected in the Prime Ministers announcement I would like to check and absorb the latest information and hopefully be in a better position to develop a more practical and acceptable</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I object to this proposal as I find it unsound for the reasons detailed herein.</p> <p>3.1.1 TRANSPORT</p> <p>I live in Upper Bucklebury - a very unique and delightful small RURAL community that would be hugely negatively impacted (and pollution) from the proposed plan for an exit at the north of the site onto Harts Hill Road (and only became apparent in my Report July 2021). WBC predicts 'some DISPLACEMENT of A4 traffic onto wider RURAL routes such as Upper Bucklebury Road.</p> <p>This would cause our lovely RURAL (WBC) to be split in two (You just need to look at Winnersh RG41 to see what that would be like there) with an unwelcome and dangerous continual surge in traffic along Broad Lane. The result would be danger to access the primary school where already roads are inadequate, without pavement (or with very narrow pavements) for elderly residents who need to access the only village store (SPAR/Peaches Stores) who are already in peril due to the development of Floral Way. This is neither sound nor safe.</p> <p>The road surfaces are already poor (with frequent and multiple Thames Water leaks requiring repair) with traffic passing over them there is simply not the infrastructure to allow for any additional traffic along this beautiful and rural route.</p> <p><u>I ALSO DRAW YOUR ATTENTION TO THE COUNCIL'S REFUSAL FOR AN ACCESS ROAD CONNECTING FIVE MILE CROSSING AND ST GABRIELS FARM at Cold Ash (near Thatcham) THAT HAS BEEN REFUSED BECAUSE IT WOULD HAVE AN 'ADVERSE IMPACT.'</u> This argument applies in this case too and I object to the proposed plan and demand that equity to be applied to Upper Bucklebury.</p> <p>3.1.2 Access and junctions</p> <p>There is No modelling plan shown in the documents for the proposed junction at Harts Hill despite WBC having assumed it would be sound</p>

3.1.3 Car Parks

A proposed new CAR PARK on Harts Hill would encourage even MORE traffic to this dangerous road (I refer you to that stretch of the road in the recent cold spell - despite the council gritting the road it remained impassable for several days). How is this car park? How is anti social behaviour and night time 'racing' of cars through the common road going to be quelled? meeting site?

3.1.4 Safe and Sustainable Transport

How do the council possibly conclude that the policy is likely to have a Positive impact on road safety and travel, when the impact on Upper Bucklebury **WOULD BE THE OPPOSITE as cited above.**

3.2 Healthcare

The NE Thatcham Development plan proposes a Primary Healthcare facility (to be offered to BOB ICS however there is no provision in accordance with latest NHSE guidance. I am passionate about this having dedicated my entire working life to the proposed facilities never get delivered (I cite Jennets Park, Bracknell RG12 as just one example of hundreds in recent years that was reneged).

FEW NEW GP PRACTICES ARE COMMISSIONED BY NHSE (I should know as I work in one in BOB ICS) not least in Upper Bucklebury. It is not available to be employed in them.

GP numbers in England down every year since 2015 (The Guardian 11/04/22),..... and **132,139 NHS POSTS lie vacant**. Even if the proposed facilities were to be commissioned and built there would simply be no staff to run it.

These are FACTS and again prove the unsound judgements being banded about in even considering such a huge (and substantially reduced) development. **THERE WILL BE NO HEALTHCARE PROVISION FOR THE RESIDENTS OF THE LOCALITY**. Nor are there **ANY dentists** in the locality (or further afield) taking on NHS patients. There are not currently the facilities to meet the demand for populous, let alone the addition of another 1,000 to 2,500 houses with all that entails. Completely unsound.

The impact of such a huge development on the local air quality should be assessed and investigated.

More traffic including stationary traffic be that on the A4 or Floral Way or Broad Lane will bring increased pollution and noise. This along with the proposed number of houses releasing energy into the local environment will inevitably cause a decline in the local population. This is completely unacceptable when 'spreading' the housing numbers required over a far more extensive area by having fewer small developments would STOP this from happening. This is unsound and its impact would be lifelong.

3.3 Environmental Impact

Upper Bucklebury consists of ancient woodlands, heaths and an historic and beautiful common (Bucklebury Plateau) with habitat for important vegetation and animal life.

Placing a major green field development in the broader landscape setting of the North Wessex Downs AONB would cause a significant impact on wildlife known to be present on this site.

THERE IS NO EVIDENCE TO SUPPORT CLAIMS THAT SP17 WILL HAVE A POSITIVE IMPACT ON THE ENVIRONMENT. IT IS EVIDENT THAT IT WOULD HAVE A SIGNIFICANTLY NEGATIVE IMPACT. Of note the strategy documents required for the development (if they exist) have not been made public for the regulation 19 consultation. Rendering this proposal unsound.

The updated SP17 text makes note of two 'community parks' that were initially put forward as 'country parks'. This demonstrates a lack of commitment to protecting the natural environment and peoples' enjoyment thereof.

As SP17 does not provide proven plans for providing adequate green space within the development nor demonstrate a commitment to protect and delicate biodiversity, there will inevitably be spill over of people visiting the common areas locally and causing a decline in the local population. This is in polar opposition to the management vision for Bucklebury Common which is explicitly focused on NOT increasing the number of ecosystems that they work hard to restore and nurture. **The LPRs sustainability Appraisal accepts that SP17 will have a significant impact on environmental sustainability. This would be irreparable thus is unsound and unacceptable.**

3.4 Education

There is no clear plan showing provision for education from nursery through to secondary education which renders the conceived housing plan untenable.

The proposed development would have significant impact on secondary school provision for children in Upper Bucklebury. There is only one school catchment (near Compton) with no provision of a paid for school bus which would prove prohibitive for many. This has not been considered in the plan.

There is no evidence of the number of pupils a proposed new secondary school would have to cater for.

The location of the school is not clear

There is no clear plan of the funding nor that such funding is sufficient to meet the councils obligations to provide education.

None of this is clearly defined nor evidenced in the LPR thus making it unsound.

IN ADDITION

The water and sewerage systems in this locality are often overwhelmed with Thames Water frequently having to attend to the system. This is even more worryingly currently having to pump effluent into the local river nearby. Additional housing (and certainly the associated traffic) in such circumstances is simply not tenable.

	<p>The Secretary of State for Levelling up, Housing and Communities issued a statement on 6th December concerning the Local Plan Review process. The statement states that the Local Plan Review process is NOT mandatory and that THE PLANNING INSPECTORATE SHOULD NO LONGER OVERRIDE SENSIBLE LOCAL PLANNING DECISIONS WHICH IS SENSITIVE TO AND REFLECTS LOCAL CONSTRAINTS AND CONCERNS.</p> <p>I urge WBC to do as other local councils have and PAUSE the planning process in order to bring forward a revised plan with the updated planning guidance.</p> <p>To not do so would be folly.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>

Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>I should like to register my strongest objection to the proposed North East Thatcham development as put forward plan to be unsound because:</p> <ol style="list-style-type: none"> 1. Building so many houses on greenfield sites goes against Government guidelines of 'supporting brownfield sites' 2. The WBC modelling for traffic shows exits from the site onto the A4, which is already badly congested several times a day, apparently onto Harts Hill Road but no drawings for this proposed exit exist - suspicious <p>Because Harts Hill road is already too dangerous for cyclists and pedestrians, it is steep with sharp blind bends. A proposed exit onto Hill would equal double trouble. Therefore the Council's assessment of a Positive Impact of Road Safety and Safe Travel of the site is surely questionable.</p> <ol style="list-style-type: none"> 3. Combined with the obvious substantial increase in the use by cars, vans, lorries of the roads through nearby villages, the lack of lighting, equalling dangerous rather than 'safe travel'. Especially in relation to the Primary School in Upper Bucklebury, this would impact every single person be they cyclist, dog walker, horse rider or resident. 4. No Health Impact Assessment for this development has been published, and we understand this should have been done, which may leave the scheme without any Healthcare. 5. There does not seem to be any funding earmarked for a new GP Surgery. Few new practices are being commissioned nationwide. Therefore a new GP Surgery and its' associated health practices are not a realistic prospect. This is another example needed for a development of this size is problematical. 6. Combined with the building, or not, of new schools

	<p>7. Combined with water run-off from this quantity of houses, especially if they are to be built up hills, which will adversely affect the village.</p> <p>8. A development of this size, 1500 or 2500 houses, will effectively join the village of Upper Bucklebury to the top of the hills with no approach by WBC to the residents of this area despite the Council's member for housing Hilary Cole stating that with 'the local community'. This has not happened.</p> <p>9. The damage to the environment and in particular Bucklebury Common which would occur cannot be overstated. We are working to <u>reduce</u> footfall in order to protect the rare habitats and species therein, not increase it, and the LPR's own evidence states that there will be a negative impact on environmental issues particular to the Common, and the whole area of the Common.</p> <p>10. The scheme ignores the fact that in Bucklebury Vision and Bucklebury Plan a definite and substantial green belt around Bucklebury was agreed to and approved by WBC.</p> <p>This proposed development the size of a town the size of Hungerford represents a massive over-development of green space and adjacent AONB.</p> <p>I believe the proposed development known as North East Thatcham to be inherently unsound.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>

Please give reasons for your answer	<p>I am writing in opposition of the planned development in Northeast Thattham.</p> <p>As a resident of Chapel Row, I am extremely concerned about the increase in the volume of traffic that would be generated on Hatch Lane, with commuters seeking ways to the A4 and onwards.</p> <p>The traffic is already heavy in this area.</p> <p>The traffic is generating a situation where children are walking to their school buses, with no street paths or streetlights, and many children carrying their torches. Combining this with an increase of commuters rushing to work in their cars. Is a very clear accident waiting to happen in a child being seriously injured or killed.</p> <p>The proposed extra houses would see more commuters seeking a route to the A4 via Hatch Lane, and thus increasing the risk of accidents happening.</p>

	For this reason, I don't think the council should support this development.

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>In summary, I find the plan unsound.</p> <p>Traffic Problems: Without the council stating the potential locations of any additional primary healthcare and dental secondary schools, it is impossible for them to evidence the likely flow of additional traffic from this development in any and improvements to the existing road infrastructure assessed as necessary to accommodate it before this development.</p> <p>I live in <address redacted>, Midgham, which <address redacted> via Cox's Lane or Church Hill. Both roads are barely the former is single track for most of its length, and the latter single track at certain points with passing places. These roads are heavily congested on the A4.</p> <p>These roads are already experiencing more traffic from new builds along the A4 and more locals new to the area either in cars, on their bikes and walking dogs. <Address redacted>, it's more efficient for me fuel-wise (& to avoid risk – turning round) to use Coxs Lane when travelling to Thatcham and Newbury but it's becoming increasingly dangerous to do so as more cars are using single track lanes. It's almost impossible to make any journey now along Coxs Lane without encountering two or three cars having to reverse back to one of the few limited passing places. This makes every journey take longer, raises the risk of accidents and increases the risk of driver confrontation as drivers unfamiliar with these roads don't know the passing places, and I can point out that the nearest passing point is much closer to them than for you!</p> <p>These roads are heavily used by cyclists, horse riders, people and dog walkers accessing public byways and footpaths along these roads. It is unconscionable for any increase in traffic along Coxs Lane, Birds Lane or Church Hill without an unacceptable risk of injury to me, other humans and animals. I'd like to see modelling that shows there will be no increase in traffic along these roads impacting on their current use for recreation, leisure and sustainable commuting by bike by the local community.</p> <p>The load of traffic on the A4 is already too heavy, particularly between 7am – 9am and 4.30pm – 6pm. As commuters and residents of Woolhampton which is a bottle neck, and when locals use the pedestrian crossing to cross the road, and we are regularly stuck at Pips Way and Theale roundabouts. This idling traffic pumps out exhaust fumes making it hazardous for me as a driver, residents, pedestrians trying to walk to the Midgham train station or along the footpaths along the Bath Road. The council's plan to increase traffic on these roads is a disaster.</p>

longer than it used to due to the increase in traffic over the past 6 years since I've moved to the area. More traffic using these roads increases travel time and further pollute the local area with emissions. When I try to exit either Coxs Lane, or Church Hill to turn onto the Bath Road I have to wait for up to 5 minutes and sometimes longer to find a safe gap in the traffic. And the risk of a collision is high. The stream of drivers using the Bath Road to travel between M4, Newbury and beyond. The speed limit has been reduced to 30mph for various reasons. But unexpected congestion and drivers speeding up make up time makes traffic speed irregular & unpredictable. This is very dangerous for anyone pulling out against the grain of traffic! This road simply can't safely accommodate any increase in traffic.

Broad Lane, The Common and The Avenue are already being used as rat runs for people as an alternative to using the Bath Road. This is unsafe driving along these roads as impatient drivers overtake at speed during rush hour. These roads are also regularly used with our dogs, horses and bikes. We criss cross these roads to find different tracks through the common for walks. In the future (and potentially?) will bleed from this NE Development onto these roads making it unsafe for us to use for recreation and pollution. The wooded environment with fuel emissions. This AONB is so revered that it regularly attracts people from outside of the area. The flow of traffic in the middle of this rare and beautiful place will make it less friendly and safe for everyone wanting to use it.

When travelling to Thatcham, I use Hart Hill and Floral Way. Harts Hill has several dangerous blind bends and a steep descent which is dangerous in icy conditions. Floral Way is heavily congested during rush hour traffic. May I see the traffic modelling for any junctions in particular any safety assessment done on the risk to other road users of having junctions on these roads? I can't see how to encourage safe and sustainable commuting: riding a bike down Harts Hills will be even more perilous?

How will this development have a positive impact on walking, cycling and public transport?

I note the proposal for a car park on Harts Hill. For what purpose?

I'd like to see the council's traffic modelling at the various bottle necks in the area during peak traffic to see what the impact will be on time (all modes), safety & emissions from this development?

Environment: There are adders where the proposed development is. We know this because our dog ran off on a walk near Manor. We found him eventually on private land where the development is intended to be sited. He disturbed an adder which prevented him being bitten (he was poised to bite it as it reared up at him).

Our friend, a reptile expert, was unwilling to visit the location because this is private land and we didn't want to be forced to tell the owner to know what we'd found. In her experience, landowners of development sites have been known to make the location a secret. We have kept this a secret. We will reveal the location for an independent assessment to take place once we are sure before that happens.

I note the plan makes reference to providing green space and playing fields for the new households, but again no details. If schools will open their playing fields to the general public is not feasible due to H&S, safeguarding, maintenance issues. If these are not provided, new households will gravitate to other green spaces in the area, increasing traffic in areas around the flora and fauna. There are already a high number of deer, badger and kites struck by traffic on the roads around the area. I fear this will increase with more traffic flowing through our local roads.

I am also a mushroom hunter. Many mushrooms in the Common and surrounding woods only grow in undisturbed soil. The Common is trafficked by locals and daytime visitors. Last autumn we noticed a near total absence of mushrooms during October. In other woods in the Chilterns and New Forest, they were plenty. It might be because the Common is now a favorite for everything, or because the woods are so heavily used for recreation since covid, that the soil is too widely disturbed? In these woods, the soil will be even more disturbed and the fungi won't have enough time for their hyphae to develop and become devoid of mushrooms & other edibles.

We need a thorough impact assessment to be done on the impact the NE Development plan will have on local flora and fauna.

I and other walkers will also lose access to the popular footpaths from Coxs Lane leading to Colthrop and Upper Bucklebury. Will we be able to access these areas safely on foot with our animals without these footpaths? This development will limit my access to the countryside I currently enjoy and will impair my ability to enjoy it as a local citizen. I'd like to better understand how the council will support the local community for what it will lose in footpath access to areas we currently enjoy?

Flood defence & pollution of river Kennet: Can the council also show local residents how the recent flood alleviation works on a vast paved area (the housing estate & associated roads), and evidence how the consequential run off of water will affect the river further.

Primary & dental care: I am registered at Chapel Row surgery. The medical facility is stretched to capacity with long waiting times. The dispensary regularly operates reduced hours due to demand and recruitment problems. The hours of opening are limited. I struggle to find appointments I can make as a fulltime working person. If more households try to access this facility, the waiting times for professionals are able to give to the current local population. I fear getting a face-to-face appointment will become impossible for my wellbeing at risk.

I am also registered with a dental practice in Tilehurst, some 13 miles away!

As a local resident, I'd like to understand what plans have been created for additional primary and dental care to meet the needs of new households? Not a generic statement that the needs will be met, but something more substantive showing where the council is considering the feasibility of resourcing them and so on. For example, if local facilities struggle to resource their practices, how will the council support new practices?

House price devaluation/ other options: Many home owners here have paid a premium to live on the doorstep of a beautiful area with scenic views & quiet, less congested roads and access to open countryside. What consideration has the council given to changing the area and the impact this will have on the value of our properties?

	<p>There are thousands of individual building plots sites which could spread the load of this proposed housing development for new housing development within the country without degrading the rural landscape.</p> <p>The council must surely have access to a register of potential individual building plot sites within the county that it redevelopments in greenbelt areas as part of its due diligence?</p> <p>Will the council share this due diligence work and all rejected planning applications for new builds for the past 5 years the imperative to use this greenbelt land as opposed to developing other options?</p> <p>This should form part of the consultation documentation.</p> <p>Consultation:</p> <p>I have <redacted> and I have found accessing documentation for this proposed plan very difficult. I am unwell with <redacted> offices to view documents in person and the documents are difficult for me to read online. I also struggle putting anything my objections to this proposed plan.</p> <p>As such I find this entire "consultation" to have been discriminatory. I'd like the council to evidence that fact that they possible to get local residents like us informed, engaged and able to contribute before this plan goes any further. I think residents who've gone over and beyond to explain things to us in a way we can understand as best they can. Something done, but has not.</p> <p>May I also ask why the exit onto Hart Road at the proposed North of the site was only revealed to the local community late disclosure is disingenuous. This fact, and the impact this will have displacing traffic through Cold Ash, Bucklebury would have encouraged more local residents to get involved.... had they known.</p> <p>I believe the council has paid lip service to policies it must comply with, and to an extent, outsourced its responsibilities vested and commercial interest in this proposed development - to the detriment of the local community.</p> <p>This fact, the inaccessibility of the planning documents and the late disclosure of key facts makes this application un</p>

* No	
Please give reasons for your answer	<p>I am contacting you to formally register my objection to the proposed development of between 1,500 & 2,500 houses & surrounding area as I find it unsound.</p> <p>My objection is based upon the following reasons:</p> <ul style="list-style-type: none"> • Infrastructure can not handle the current number of vehicles on the road around Floral Way & the A4 Bath Road • The local schools cannot take more pupils, both Francis Baily & Kennet are struggling & are maximised in numbers already across intakes in the case of Francis Baily. Kennet school is already a huge secondary school & had a 7s. • The area proposed for development is one in which we regularly walk as a family, benefitting both physical & mental health. The remaining green areas locally already for wildlife to flourish & benefit our climate from. • The drainage would be a concern given historic flooding in Thatcham, requiring yet further investment. • Thatcham town centre requires investment to encourage footfall like Newbury has had. • There are not enough amenities already, such as places at Doctors surgeries. <p>I think it would be far more beneficial to look at brown field sites elsewhere, should West Berkshire not meet its housing needs. I thought councils now had more control over housing numbers, following recent legislative changes by national government.</p>

Please give reasons for your answer	<p>I would like to object most strongly to the Thatcham NE Development which I find to be unsound on the following grounds:</p> <p>Medical provision and support for residents : Medical services across this region are already under strain and stretched to capacity by a growing population, most particularly in GP Surgeries and Dental Practises. It is of enormous concern to me that neither WEA nor the NHS have arranged or published a prospective HIA specific to the proposed North-East Thatcham development and therefore there is no meaningful engagement between the North-East Thatcham Development Consortium and local general practices.</p> <p>From what I can read we should be realistic that there is no genuine prospect of a new GP practice being established in the foreseeable future and therefore any residents of the new development would be funnelled into existing provision which will struggle to cope with this influx.</p> <p>Education: As a local Early Years Manager I am very aware of the pressures which local educational settings and schools are already experiencing. A new development on this scale cannot be permitted to proceed without a clear plan for providing for the educational needs of the new residents.</p>

	<p>years through to Sixth Form. This is a legal obligation; all children are entitled to receive an education and they should receive this education in schools away from home wherever spaces can be found. From reading documents published that there is any clear understanding of demographics for potential new populations and current/future demands on</p> <p>Transport and road safety : Increased traffic at unacceptable levels through villages and rural areas is an inevitable from a development on this scale. The roads in these areas are inadequate, already damaged with potholes, without the potential for serious accidents for daily drivers, pedestrians, cyclists and also those enjoying the rural areas with riding, rambling and family outings.</p> <p>The purpose of a new car park on Harts Hill is somewhat confusing as this will merely direct more traffic to what is already the year and specifically in cold/wintery weather as local residents have experienced in recent weeks) and may also behaviour in the car parks of which I am all too aware as a resident of Bucklebury Common.</p> <p>Rural Environment : A residential development on this scale would have a disastrous impact on our local environment of our ancient woodlands and heaths (I am a resident of the Bucklebury Common area and as such I am very aware and also the local wildlife which we should be protecting and conserving. I have not been made aware of any documents would evidence any positive outcomes for the environs should this development proceed and indeed as the plans have "a country park" has already been downgraded to "community park" which highlight a worrying lack of commitment to impact.</p>

<p>Please give reasons for your answer</p>	
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	<p>No</p>
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to register my objections to the scheme to develop the NE Thatcham site. Firstly, may I mention that several areas of the plan seem unsound and unsubstantiated. The development would have a hugely detrimental effect on the local area for many reasons.</p> <p>1. Traffic and pollution 1,500 homes probably equals at least 3000 new vehicles, each doing at least 2 journeys a day, more if living in Beenham, a small village with narrow, winding roads, many with no footways, any increase in traffic will have a detrimental effect and endanger the many pedestrians, cyclists and horse-riders who live here. Whenever there is an increase in traffic, there are increased amounts of people driving through the village, most of whom do not appreciate the danger.</p> <p>The A4 is regularly at a stand-still at rush hour and drivers heading east may well think it quicker to go to the junction at Southend Bradfield to the A340. That junction is often backed up to Parkers Corner and satnav suggests it is often quicker to go to the junction at Southend Bradfield to the A340. We really do not need more traffic on our narrow roads.</p> <p>Even if all the new residents "only" use the main road it would cause major problems for Beenham residents heading to the A4. This junction has been flagged up to WBC several times because it is dangerous and poorly lit. It needs to be done to improve it. The white lines in the centre of the junction do not allow for traffic coming from the south. It often takes many minutes to negotiate even when there isn't a huge amount of traffic, because of the narrowness of the road on to the crossing point. Are the proposed "new priority" road junctions on Floral Way and Harts Hill going to be better than the junction as the A4 turn at Beenham?</p> <p>Where are all these new residents going to shop? Are more car parks going to be built in Thatcham to accommodate them? If Reading is the destination, how will the A4 cope with all the extra traffic, and where will they park?</p>

The lack of a coherent Plan on Schools Provision across the various proposed developments also means we cannot estimate the subsequent impact on traffic. The siting of a secondary school to the NE of Thattham would increase in traffic across the whole Thattham area.

The Sustainability Appraisal (SA) / Strategic Environmental Assessment (SEA) which accompanies the Local Plan, the allocation of North East Thattham against key Sustainability Objectives. Objective 4 is – To promote sustainable transport for all forms of safe and sustainable transport. The SEA makes the following assessments: 'To Reduce Accidents' Council Assessment - The policy is likely to have a Positive Impact on road safety as safe travel will be encouraged on the site. This is not the case for residents of nearby villages.

The policy also mentions sustainable transport links and cycling. However it should be noted that WBC has not been successful on providing good cycle pathways. Cycling along the A4 between Newbury and Theale is definitely not safe. There are no designated cycle lanes often only running for a few dozen metres, stopping, and starting again further down the road. This is of flooding or fallen trees which are not cleared for months.

If new residents are encouraged to travel by train, where should they park? There is very little car parking available.

2. Infrastructure

At the most recent Parish Council meeting, 6th February 2023, our district councillor was unable to answer questions on infrastructure on the proposed site, despite being himself the lead on education, which was rather worrying.

3. Healthcare

Our local surgeries are already at full capacity, with staff regularly suffering stress-related problems due to the time and diminishing funding and support. The major central pharmacy in Thattham was recently closed, making it impossible to get a dentist's appointment on the NHS in Thattham. Knowing all this, why has nothing been done? Why have developers to arrange a relevant Health Impact Assessment or provide evidence of having appropriate health care agencies or providers? They have not made provision to mitigate the burden that 1,500 or more new residents on a local NHS struggling to cope. The aim of WBC and the North-East Thattham Development Consortium to provide a health service component of community infrastructure has not been met as they have not provided evidence of a viable primary care medical facility.

4. Education

The provision for education from Nursery, Early Years, through Infant to Secondary education is not clear in the Local Plan Review (LPR). As there is no coherent end-to-end plan this therefore breaches the Council's obligation to provide facilities for children. Without this provision, the Plan for a large new housing development is untenable.

There are no details in the LPR of the provision for Nursery or Early Years education. The provision for secondary education is unclear and contradictory. There is no data or evidence on the planned numbers of schools or Form Entry places.

The current situation for secondary school students from Bucklebury is that they have a choice of either The Downs School as they are in the catchment area for both. Where schools are oversubscribed those children from the proposed NE Thattham development would be given precedence. This means that children from the proposed NE Thattham development would not be able to attend those from Bucklebury would then be limited to The Downs. The LPR is inconsistent, incomplete and does not provide for secondary schooling in and around Thattham.

West Berkshire Council is an education authority and as such it has a duty to make arrangements for secondary education. This obligation will be met across all school years is not defined or evidenced in the LPR.

5. Playing Fields Provision

Sports fields and playgrounds should be provided. However, these require flat ground. The only flat area on the site is that which is closest to the A4 and therefore in an area with the most traffic fumes. Also, there are no existing facilities. WBC should not assume schools, if they materialize, would open their grounds to the public. Safeguarding and other concerns such as litter and animal waste which the school would be obliged to manage. Safely use the fields. The objective of WBC and the North-East Thattham Development Consortium to provide playing fields has not been met as they have not provided evidence for funding or for a suitable location.

6. Environment

There is bound to be collateral damage to the Bucklebury Plateau Biodiversity Opportunity Area and its heaths, in particular the Common. The management vision for Bucklebury Common is explicitly focused on reducing pressure on the fragile ecosystems they are working to restore and nurture. Siting a major greenfield development in the landscape setting of the North Wessex Downs AONB will forever impair enjoyment of the open countryside and cause detrimental impacts to legally protected wildlife known to be present on the site.

This whole plan is full of serious potential problems which have not been addressed. West Berkshire Council should be drawing board and evaluate the long-term effects on the rural environment which is the bulk of their residents. The interests of their current constituents, particularly those of us who choose to live in quiet, rural areas. Perhaps they should consider the issue of the 500 or so homes which are permanently empty in the district, and look at brown field sites which are ruining part of the AONB which is such an important and precious resource.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?

<p>development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to register my formal objections to the proposed NE Thatcham housing development located between T. My objections are based on my review of the plans and the following concerns.</p> <p>1. TRANSPORTATION. Traffic volume and road safety: I reside <address redacted> in Burdens Heath by the <address redacted> footpaths and the challenges of maintaining the hedge and verge near my property already pose a significant risk to my property. This risk will only increase this risk for myself and other residents. The current volume of traffic and disregard for the speed limit will increase with increased traffic from the development. Burdens Heath is already a popular spot for young drivers who slow right down to their speed along the straight road. Furthermore, drivers frequently fail to slow down when entering the village. The presence of more cars travelling through Cold Ash, Upper Bucklebury, Chapel Row, and Bradfield Southend to avoid the congestion makes it even more dangerous to maintain my property and walk into the village. Harts Hill and Burdens Heath are narrow roads that cannot safely accommodate the increased volume and size of vehicles.</p> <p>2. LOCAL HEALTHCARE SERVICES: The current NHS healthcare services cannot meet the demand, and it is already difficult to get an appointment due to a shortage of GPs. The extra strain from the increased population will only make it worse. Thatcham cannot keep up with the volume of patients and regularly cancel appointments, which can take over a year to reschedule. This makes it harder to access dental services.</p> <p>3. ENVIRONMENTAL FACTORS: My property is surrounded by ancient woodlands and heaths that support a significant population of deer, which roam freely and frequently cross Burdens Heath, Harts Hill Road, Upper Bucklebury, Broad Lane, The C. at the rear of my property in the area where the proposed development will encroach on their habitat. The increased traffic will increase the number of accidents involving deer, which will reduce their population and pose a serious risk to the deer. Upper Bucklebury to escape urban areas and enjoy the countryside, wildlife, and views. The proposed development will impact on and protected species in the area, such as the Great Crested Newt, which requires a licence from Natural England to be aware if such a licence has been granted.</p>

Please give reasons for your answer	I wish to submit my very very strong objection to the housing development that has been planned for between Thatcham and the A4. I feel really distraught at what is being proposed, the building of 2,500 houses on grass and farmland! This development will cause to the infrastructure to the A4 corridor and surrounding areas is extremely disturbing. The pollution with the added car fumes of possibly 5,000 more cars crawling along the already congested, slow moving, one lane A4 road is a real concern. I have a lot of empathy for the residents and wildlife of the area, if such a development were to go ahead. Apart from the fact, the

	<p>between the villages of Thatcham and Midgham, is going against the ruling, that there should be no joining of villages fields that separate the two villages are used to be built upon.</p> <p>In the late 1970's the housing development of 6,000 houses in Lower Earley in Reading was at the time considered West Berkshire are considering building 2,500 houses between two old historical villages, it is nothing short of an ad</p> <p>I am a regular walker in the countryside of Midgham and Bucklebury and I see it as an area of natural beauty of rolling wildlife. On the field of Cox's Lane I have often seen Brown Hare and from May when the field is laying fallow I have seen getting to be a rare sight in our countryside, these sightings would be lost forever if houses were built on these fields set adjacent to the fields, in fact I saw a badger out foraging when returning in the evening from the local pub quiz la</p> <p>This habitat will be destroyed by housing just like the countryside is being destroyed throughout rural England. The countryside everyone to enjoy.</p> <p>The health and wellbeing of the local people is also being put at risk, as the threat of this development makes for nothing positive with this proposal for the current residents, it only takes away from the quality of living in the countryside. What happened to the mantra of "Walk in the countryside for your health" that the government was so keen the population</p> <p>There are not enough Doctors, Dentist, Banks, Post Offices and Amenities for the population of the local villages as the car journeys along the A4 are already slow and frustrating it can take more than half an hour just to travel into Newbury is faster to walk at times! The idea of thousands of more cars trying to join the A4 from a huge housing estate is a lot more Schools, Doctors Surgeries, Dentist etc to accommodate the new housing population will not help the situation for anyone. I think the area of West Berkshire has had it's fill of housing development. I have noticed housing developments near Henwick and Woolhampton and along the A4 towards Reading.</p> <p>It will not make any difference to me, if there is a revision for a reduced number of proposed houses of the development over a period of time, as I don't trust the Developers, and unfortunately, I don't trust Councils, as often these arrangements are made up there minds that, "the thing is going ahead" and I won't change mine mind that I am utterly opposed to any development and farmland! I have heard with concern that a resident of the area, that attended a Parish Council meeting to appeal for a halt to fight this housing planning application was treated very rudely and dismissively.</p> <p>It is not a question of "not in my back yard" as I would be opposed to any destruction of meadow land for building housing. It would be interesting to know where the developers and those in agreement with blighting this area of West Berks live, as I think their plan for housing is NOT IN THEIR BACKYARD!</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>Yes people need houses and there are suitable sites for them to be built on but losing the countryside for concrete is</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	<ul style="list-style-type: none"> • Traffic – increased traffic through Upper Bucklebury and other villages; The scope for accidents is already too large. • Pressure on secondary schools – Kennet is already over-subscribed; accommodation for additional secondary schools is specifically stated. We need a new Secondary School to accommodate the extra children. • Consequential damage to the Common – increased footfall; increasing damage to an ecosystem of national importance. The width and muddiness of the footpaths through to Common were evidence that these are already heavily used. • Environment – Greenfield development abutting an AONB with no up-to-date evidence nor strategy for positive environmental gain. Flora and fauna will not make a home in brick and concrete! • Pressure on medical & complementary services – additional GP surgeries are not part of NHS strategy for the region. It takes weeks to get a non-emergency appointment at Chapel Row Surgery and it is just not feasible for it to serve any more. • A 'Country park' – this has a specific accepted definition which is not met in this Plan. The three small, isolated areas of land on the boundary have no meaningful environmental value or commitment to exclude subsequent development. I am not satisfied with an insubstantial 'nod' to acknowledge the importance of our environment. • Lack of strategic gap between Thatcham and Bucklebury – Thatcham and Upper Bucklebury will effectively merge and lose its identity. Not only have residents chosen this place to live based on its rural identity but the Plan is disregarding those born and bred in the village and have a right to expect their community identity to continue. • Number of houses now "at least 1,500" – From an initial site assessment of 2,500 of which 1,250 were to be built in 2036, the Plan in fact increased to 1,500 houses because the Plan extends to 2039 rather than 2036 (as originally proposed) and up to 50 would be more realistic.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No

Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable	

<p>over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>The above plan for NE Thatcham has been poorly thought through with numerous reasons why it should not proceed.</p> <p><u>Location</u></p> <p>This is a totally Greenfield site on a relatively steep hillside, adjoining areas of Outstanding Natural Beauty, and ultimately having a significant impact on these areas and the local natural diversity.</p> <p>On the wrong side of Thatcham for major business, shops and arterial roads.</p> <p>Too far away from Thatcham Town Centre and Railway station to encourage walking, along with the steep hill on one side.</p> <p>Effectively cutting the natural break between Thatcham and upper Bucklebury.</p> <p><u>Transport</u></p> <p>On this development there are likely to be 3,000 plus cars. There is very limited work locally so residents will need to travel to the station, (limited parking here with no space for more), and to major shops and schools.</p> <p>No bridge proposed within this development for Thatcham station, thus restricting Southern access and meaning multiple journeys at peak times now all the local routes around the station are full with stationary or slow moving traffic and this site will cause a massive increase in car journeys from this development will increase pollution and carbon dioxide exponentially across the area.</p> <p>With a Northern exit from the site, these journeys will almost certainly come through the villages of Cold Ash and Upper Reading. These villages already suffer from greatly increase traffic at peak times owing to slow moving traffic on narrow roads and 'pinch points', where long queues of stationary vehicles is normal now.</p> <p>Harts Hill is a narrow, winding and steep hill with no pedestrian walkway or safe verges from the junction with the Cold Ash Road and in places has high banks either side of the road. It is exceedingly dangerous for walkers and cyclists, who invariably have to climb up the steep hill, causing much danger to themselves and frustration and dangerous overtaking from cars.</p> <p><u>Flood Risk and Domestic Water</u></p> <p>With all the development on the side of a hill, once large areas are built on and paved, there will be a massive increase in runoff of heavy rain, and very high risk of floods in low areas of Thatcham.</p> <p>Domestic water has to be pumped up the hill to Upper Bucklebury now, and we have times of low pressure due to demand, a leak, or the power or pump fails. As it's up the hill, all the domestic water will have to be pumped to the entire site, which we experience now.</p> <p><u>Education</u></p> <p>Local schools are at capacity now and struggling to employ enough staff. This development will only exacerbate the problem.</p> <p><u>Dental and Healthcare</u></p> <p>Again, local GP Practises and Dental Surgeries are at capacity now and Pharmacies closing. The local NHS Trusts have no plans to expand. I cannot imagine anyone would think it will make financial sense to set up a satellite practise on the site.</p> <p><u>Sport and Leisure Facilities</u></p> <p>More outdoor sports require level playing fields, given that the majority of the site is on a gradient, this will require massive earthworks. There is no real indication of sports buildings and where they would be sited.</p> <p><u>Conclusion</u></p> <p>The whole document of the NE Thatcham LPR is ill thought out with many flaws and questionable processes in its approach, and is against most aspects that are being suggested, with no real thought given to their impacts on society, the environment and the local economy. Overall, a major negative impact, with no foreseeable positives.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	This plan has caused serious concern since it was originally mooted. Requirement such as appropriate ecological surveys have not been carried out The road systems are NOT safe.

	<p>There has been a desperation to produce a plan and the plan mooted was allowed after a considerable monetary incentive by the developer of the plan.</p> <p>Other significant parts of this plan seem to be hardly legal or safe as mentioned below</p> <p>full assessments not carried out-ecological, amenities, safety</p> <p>development plan drawn up by developer who gave monetary incentive to planning at west berks council</p>
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes</p> <p>* No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>this is not a brownfield site. It threatens a AONB. Upper Bucklebury has ancient woodland, common land and a compact road connecting it to Thatcham. Large vehicles and tractors always stray over to the other part of the road. In the recent years the road in one day. Surface water is a problem and Thames water have had many problems in this area</p> <p>Thatcham cannot support proposed development in ways as mentioned. The existing schools would struggle to absorb the development. The health board has not been consulted but is very unlikely to permit another medical practice. The current medical practice is struggling.</p> <p>There are serious flooding issues with this proposed development. There is always runoff water on surrounding roads and there has not been any flood alleviation work in this plan</p> <p>all these issues are being dismissed with out any substantiated evidence to reassure communities</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>schools and medical facilities have not been thought through</p> <p>Roads to larger roads and effect on local villages has not been thought through</p> <p>Transport links are worse than the used to be in terms of bus access</p>
<p>4. Proposed Changes</p>	<p>The best way of making this plan compliant would be to find an area that does not destroy the countryside and takes into account the need for further development as this plan is not appropriate in this area</p>

5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	To be able to hear justification of the dubious way in which this plan has come about and to be able to challenge the PLEASE NOTE NAME AND DETAILS OF FORM FILLER BERNADETTE SOUTHGATE TANGLE COTTAGE TURNERS GREEN UPPER BUBKLEBURY RG76RD email : bernie@sogat.net

<p>Please give reasons for your answer</p>	<p>I would like to make an objection to the proposed development in north Thatcham I live on the Dunstan Park estate and there is already a lack of transport links and facilities in that area. Added to the secondary school clearly cannot take an increase of this size of people moving to this area. This is an area of outstanding natural beauty we have enjoyed walking in this area for years and would be so upsetting to see this destroyed. The local villages would be joined to Thatcham and become a very large built-up area that the locality cannot support. It's clear there are better options than this one.</p>

<p>Please give reasons for your answer</p>	<p>I write to object to the proposed Thatcham North East Development.</p> <p>There are several reasons but principally there are components of the plan that are unsound.</p> <p>This is a proposal for a minimum 1,500, maximum 2,500 houses. At an average of 2-4 people per house this equates to an additional population and it therefore follows a minimum 3,000 extra cars. The infrastructure of Thatcham does not support this.</p> <p>From an unsound perspective, I would focus on both the Primary Healthcare and Secondary Education provision, both of which are underfunded through. The NHS is already struggling to cope with the growth in the Thatcham population following the Kennet Health Centre. The closure of GP's. As regards Education, Kennet School is at capacity and there appears to be no provision to fund or locate a new school.</p> <p>I live in <address redacted> and it is already difficult to turn right or left out of Simmonds Field onto Floral Way with no alternative route to Newbury as the A4 is usually congested due to amount of traffic, traffic lights and cycle lanes. The additional volume of traffic from a housing estate will only add to the congestion which is unsafe from an Environmental and pollution perspective. Further, the railway station is a dead end Station due to the level crossing will only worsen in the absence of a bridge. Parking at the station is also limited. The road is narrow and a new road but a new estate will add to the amount of traffic both towards Reading and Newbury. A dual carriageway all the way would be needed to cope this additional volume.</p> <p>The countryside around Thatcham enhances the area and ticks all the boxes around Environment. A development of this scale would be a major loss to the area.</p> <p>This Development scheme is not suitable and I recommend its withdrawal</p>

1. Do you consider the Local Plan Review is legally compliant?	
* Yes	
* No	
Please give reasons for your answer	<p>WBC LPR Regulation 19 Objection</p> <p>I am objecting to the above plan as I find it unsound</p> <p>Transport</p> <p>Harts Hill is already a busy road and at peak times traffic is backed up the hill in an attempt to access Floral Way. At redacted> we often have to wait for some time to access Harts Hill as traffic both ways can be very heavy. An addition exacerbate this problem on this very busy road with no pedestrian pavement. I have on a number of occasions witnessed the blind bends on this road.</p> <p>The addition of these proposed houses would also have an impact on traffic going into Newbury and traffic accessing has to cross over the Thatcham railway crossing. Traffic on some occasions has been backed up to the A4. An addition add to this problem unless some major road improvements are implemented and a bridge across the railway and river.</p> <p>I cannot see what purpose or benefit the proposed car park at Harts Hill would be!</p> <p>Healthcare</p> <p>We already have long waits for appointments to see doctors and rarely get to see our own doctor as we have to take This results in the personal relationship breaking down and can create a lack of confidence.</p> <p>I am fortunate to have a local dentist who I have been with for many years. My wife had to register with a dentist in P as there were no options in the local area.</p> <p>My concern is that without a guaranteed provision of a primary care medical facility the possible impact of an additional a meltdown of the existing healthcare facilities.</p> <p>Environment</p> <p>It looks as if the WBC documentation is printed off from some template! It is obvious that detailed investigation and n been completed and evidence is not available.</p> <p>Education</p> <p>The LPR is extremely vague in providing details for Nursery, Primary and Secondary education. This again shows a l costs. A number of primary schools are oversubscribed. Kennet Secondary is well oversubscribed with no possibility An additional 1500/2500 houses would necessitate pupils having to be bussed to Theale or Compton if they have ca</p> <p>There is a lack of evidence that the proposed funding will meet the Councils obligations to provide the required education sports fields required for a modern Secondary School.</p> <p>I hope all of the above points will be considered</p>
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan

<p>Please give reasons for your answer</p>	<p>I am writing to object to the planned development in northeast Thatcham as I find this unsound.</p> <p>As a long term resident of Thatcham, I am concerned about this development for a variety of reasons:</p> <p>Flooding</p> <p>We were seriously impacted by the floods in 2007 and I am deeply concerned about the impact this new development will have. Please can you confirm what Thames Water's view of this development is? During periods of heavy rain there is concern that despite the apparent 'flood alleviation' works which have been completed. I think the impact on both the local houses, the Avon and Avon canal, and the river Kennet will be highly detrimental. Have studies been completed into the environment impact of this development?</p> <p>My other concern relates to drainage. The sewerage works in Thatcham are old and I am concerned that an additional development will overload the system completely.</p> <p>Transport</p> <p>The impact of the additional traffic created by residents of 1500 new houses is going to be enormous. There are already queues during the rush hour on the A4 and surrounding roads, in particular Floral Way. How will this traffic be mitigated? Thatcham has a bus stop but these are inconsistent and in the case of the train very expensive, so the majority of commuting will be undertaken by car.</p> <p>The crossing at the train station is another area of concern. How will the additional vehicle movements be mitigated? There are already queues, creating delays and having a detrimental impact on the air quality in the local areas.</p> <p>Healthcare</p> <p>The local GP surgeries are already massively oversubscribed – it already takes an average of 3-4 weeks to get a routine surgery and the numbers of patients per GP is already far too high.</p> <p>Although the plans state healthcare provision is incorporated, I see no detail within the plan. How will you recruit GPs to fill the shortage and the local GPs are in no position to deal with additional patients.</p> <p>Education</p> <p>I do not understand the provision for education within your plan? Kennet school already has over 1800 students – how will you accommodate all the extra children without jeopardising their 'Outstanding' status? I do not understand what provision has been made for this either.</p> <p>I hope my concerns will be taken into account when considering this proposal and that common sense prevails and the plan will be declined.</p>

<p>that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>I am writing to submit my strong objection to the proposal to build 1500-2500 homes in NE Thatcham on the grounds of unsound and there are several major flaws.</p> <p>Michael Gove's written Ministerial Statement suggested that the planning inspectorate should no longer override serious concerns sensitive to and reflects local constraints and concerns. You appear to be ignoring that and, unlike other local authorities, making processes until the outcome of the NPPF consultation process is completed and is expected to provide guidance in advance ahead regardless and ignoring local constraints and concerns. As it stands, your plan is woefully lacking in detail in its impact badly on both potential new householders and the established community in several areas.</p> <p>Healthcare</p> <p>Your plan proposes a primary healthcare facility but your document is lacking detail or insight to strategic healthcare. It should have an accompanying Health Impact Assessment (HIA) in accordance with current guidance with Public Health England. The proposed development appears to have been arranged or approved. GP practices in the area are oversubscribed and short staffed. Trying to get a GP appointment is hard enough at the present time and monitoring of existing health issues. Monitoring of my husband's diabetes is no where near as regular as it once was. How will overstretched GP surgeries cope before any alternatives are established or built?</p> <p>Dental Practices</p> <p>When we moved into the area in 2004 we were unable to register with a dental practice in Thatcham. We have to travel to a practice which is not particularly convenient and will become more of an issue as we get older.</p> <p>The local NHS is already struggling to cope. As the community ages more support is needed, not less. You have not provided access to healthcare because you have not provided evidence for the provisions of a viable primary care facility.</p> <p>Schools</p> <p>The provision for secondary schools is not consistent with the council's guidelines for the minimum viable size. The plan has omitted any costs for a new secondary school in NE Thatcham over the plan period. Traffic plans and models for increased traffic built are not considered in the LPR. Local schools are oversubscribed. At present many Bucklebury children go to Kennet while those from development would be given precedence to Kennet while those from Bucklebury would be limited to The Downs rather than result in siblings going to different schools and may impact their mental health.</p> <p>The LPR is inconsistent, incomplete and contradictory on the provisions of secondary schooling and, therefore, unable to make arrangements for suitable school provisions.</p> <p>Transport</p> <p>You predict "some displacement of A4 traffic onto wider rural routes such as Upper Bucklebury". Harts Hill Road is a narrow road with no pavements or lighting which is favoured by cyclists. Increasing the volume of traffic on this road is dangerous. There is no proposal for proposing a new priority junction to access Floral Way and Harts Hill Road. It is stated that results from the modelling of traffic problems. The document has no modelling results for this and, more worrying, there are no drawings for the proposed junction drawings for all other proposed junctions so why not for Harts Hill which is the narrower, more winding road? The Statement suggests your assessment is that the policy is likely to have a positive impact on road safety as safe travel will be critical. A car park on Harts Hill Road and planning an exit at the north of the site onto Harts Hill is contradictory to your assessment of impact on road safety. It was also suggested the policy is likely to have a significant impact on walking, cycling and public transport should be designed with these in mind. Your plan, as it stands, will put more traffic on inadequate roads and have the potential for accidents resulting from increased traffic.</p> <p>Parking is limited at the train station and there are often already a build up of lengthy traffic queues and time delays at the development site was discounted despite it offering to build a road bridge over the train tracks. How does your proposal for vehicles positively impact on public transport? I would suggest it will do the opposite.</p> <p>Environment</p> <p>The proposed development will have a significantly negative impact on the environment.</p> <p>Thames Water suggest the council has not properly consulted with them over the time needed for water provision and how the community just accept drops in water pressure when demands are too high and accept there will probably be fewer rivers? I think not.</p> <p>Proposals for country parks have been downgraded to undefined community parks. How is this going to protect the environment and enjoyment of it?</p> <p>The LPR states its intent for SP17 is to drive additional traffic (cars and people) into the AONB. This is completely in contradiction to the vision for Bucklebury Common which is focused on not increasing human pressure on the fragile ecosystems they are. Lockdowns highlighted the detrimental impact of increased footfall and the lack of awareness to protect the area. There are people left on paths, dogs chasing wildlife and people walking off defined tracks causing damage. The effects are still being felt.</p> <p>Your own Sustainability Appraisal accepts that SP17 will have a negative impact on environmental sustainability. It states that this would need to be mitigated. Where is the detail of any such mitigating measures? Environmental issues are very important and should not be treated in such a disrespectful manner</p>

	<p>The SP17 policy is clearly intending to build as many houses as possible in a small area of environmentally important promises about how the environment will be improved or, if not, mitigated. You have spent a lot of money on consultation is no evidence of any substantial attempt to investigate, analyse and systematically address the consequences of ignoring local concerns and constraints and carrying on regardless.</p> <p>In summary, your LPR has fatal flaws and is unsound.</p>

<p>1. Do you consider the Local Plan Review is legally compliant?</p>	

* Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	I am objecting to the above plan as I find it unsound. Transport Harts Hill is a very busy road with traffic backing up the hill at peak time's causing us problems trying to get out of Fa pedestrian pavement making it a very dangerous road for young mothers with prams needing to go to the local shop The proposed houses would have an impact on traffic going to Newbury and surrounding areas. What benefits would the proposed car park at Harts Hill have? Education The schools in Thatcham are oversubscribed with no facilities for expansion and so the proposed planning of the ad have a huge impact on children's needs. Healthcare We already have long waiting times to see our GP so building the extra houses would increase this waiting time. I moved to this area 20 months ago and still I am unable to get an NHS dentist so have to travel 35 miles to my old dent How would our doctors and dentists cope with extra houses?

	I hope that you take into consideration of all the local people and reject this planning application.

<p>Please give reasons for your answer</p>	<p>I am objecting to the WBC LPR 2023-2039 for the following reasons:</p> <p>TRANSPORT</p> <p>The increase in traffic movements with 1,500 minimum new houses (with something like over 3,000 + extra movements) in Thatcham North a huge traffic problem. There are already substantial delays during peak commuting hours causing congestion at the roundabout (Floral Way/A4) and Harts Hill Roundabout (Floral Way/Harts Hill) with cars travelling primarily towards Reading. The increase in time spent at these bottlenecks, inevitably drivers will seek other routes through Upper Bucklebury, Chapel Row, and Reading in the mornings and the reverse in the evenings. It is already apparent that traffic avoids the "Chicanes" in the village and takes alternative small lanes around the village or even into the Pang Valley to reach their destinations. These vehicles (cars) are travelling unsuitably fast causing damage to road surfaces not designed to take such volumes of traffic, and additional damage to other vehicles on these single track roads. Drivers have scant regard for local people (pedestrians, horse riders, cyclists) and their routine neither slowing down nor thanking them for letting them pass safely. I live on <address redacted> (I am also a parent) and I am having to watch out for cars travelling too fast without due care and caution, often having to take to the verge quickly.</p> <p>With regard to Thatcham North residents being encouraged to walk, cycle or use public transport, this seems ill thought out. The Town Centre, which has little to offer apart from 2 supermarkets, seems highly unlikely for all but a few very fit residents with heavy, bulky shopping. Walking to the station for commuting purposes, in office attire, is also unlikely. Inevitably additional traffic to enable people to catch their commuter trains, for children to reach their schools or to shop in the Town Centre, will increase air pollution. To reduce this, I assume that the council will be providing regular (4-5 per hour) circular route buses (from the town centre and other important locations such as schools, dentists and doctors) at peak times at the least?</p> <p>I also note that a new car park has been designated for one of the most dangerous parts of Harts Hill Road. Why this is so unimaginable. Harts Hill road from Floral Way to Upper Bucklebury is one of the most dangerous local roads with no pavements and at places it is almost impossible for a car and lorry to pass safely.</p> <p>HEALTHCARE</p> <p>There doesn't seem to be a Health Impact Assessment for the provision of health services for the residents of 1,500 new houses (and 1,500 people). Surely, the local services are already stretched with only 3 doctors' surgeries covering an area from Bradfield to Thatcham in between. If there aren't the doctors available it will be difficult to man a 'new' GP surgery on the North Thatcham side. If no more can be provided, there will be a high demand for young and expanding families who regularly need the services of doctors.</p> <p>ENVIRONMENT</p>

	<p>There are already pollution problems on Bucklebury Common from both traffic and those dropping/dumping their litter on the road from Upper Bucklebury to Bradfield. The introduction of a large number of people wishing to use the common for their local 'park' is not substantial enough to support the community, will bring with it more associated problems of pollution, biodiversity and impacting on plants, animals (deer, badgers and smaller mammals including snakes) and birds (partridges). I have recently seen the impact of irresponsible use of the common where heath fires have been started, destroying the area and causing danger to local residents (Upper Bucklebury, August 2022). We have been lucky that we did not see instances in the London area last summer which destroyed residential homes as well as the environment.</p> <p>EDUCATION</p> <p>Being an area of residential growth, Thatcham is inevitably needing to provide the necessary schooling required from primary school places are particularly important – I cannot understand how these new residents are going to be offered places at a school which is oversubscribed. The Supporting Documentation with regard to schools appears to state that £15m will be spent on a secondary school but I cannot see where it is to be located or when it is to be built, so it is difficult to assess the viability of this. It is odd that the study on pupil numbers is dated 2011 – surely things have moved on since then with the increase in local housing. And what about Sports Fields, where will they go on this undulating site.</p> <p>I believe this local plan has not been given enough thought in connection with the placing of housing and the facilities at these sites, particularly NE Thatcham.</p>

Please give reasons for your answer	<p>I wish to strongly object to the Thatcham NE Development as there are many areas of the plan which are unsound.</p> <p>I have lived in the area since 1974 and have witnessed a complete transformation of what was once a beautiful rural area. As change happens but I will hopefully not be around too long (I'm 71) to witness this monstrous plan come, if it does, to the village of Bucklebury, a place I have loved for nearly 50 years.</p> <p>Top of the list of countless objections is increased traffic through the village. Harts Hill is already a very dangerous road with the lorries that thunder along it at speed and peak time traffic along The Avenue in Bucklebury has turned a once quiet residential motorway.</p> <p>I believe there is a plan for an exit at the north of the site onto Harts Hill which only became apparent last month. When it seems, only head in one direction towards Upper Bucklebury where it will split sending traffic through Cold Ash, Upper Bucklebury and the village. And the council thinks this will improve road safety on our pavementless small county roads!!! I'm glad I'm no longer able to enjoy long country walks. I do not believe for one second there will be a positive impact on road safety.</p>

	<p>My second main objection is the impact of so many houses on the environment. A major greenfield development in a Beauty? When there are other more suitable sites? It's beyond belief that some vague proposal for two "community environment.</p> <p>Bucklebury Common, its ancient woodlands and heaths will, without question, be impacted negatively. I believe a pro as much. Hardly rocket science!</p> <p>Bucklebury Common management have been focusing on not increasing human pressure on eco systems they have and protect. Nightjars to name but one increasingly rare bird to visit the heathlands.</p> <p>The ever growing number of dogs let loose on the common at nesting time has an effect on that.</p> <p>Finally, I read that the council has not consulted properly with Thames Water over the time needed for water and sewer of a major flaw! One of many.</p> <p>I sincerely hope the plan is dismissed on the basis of a defective Regulation19 consultation.</p>

Please give reasons for your answer	<p>I feel compelled to write concerning the development of 1500 proposed houses to be built in the A4 Thatcham/ Bucklebury area. I feel the proposal inappropriate.</p> <ol style="list-style-type: none"> 1. Traffic in the lanes of Bucklebury has increased dramatically over past years and where no speed restrictions have been implemented at blind corners the lanes have become quite dangerous. Any large development would certainly add more traffic and noise. 2. I understand no proposal has been made to extend or build new premises at Thatcham School. The school is already at capacity and the addition of homes would most certainly need places for more pupils. 3. Some newcomers would no doubt be expected to join Bucklebury Surgery. This could be critical. The surgery already has a long waiting list for the patients they have. The one chemist at Thatcham, which is completely inadequate does not fulfil the public's needs. 4. The loss of open green spaces for people to enjoy and releases some of life's pressures can never be regained and the benefits of such plans are minimal. <p>Therefore there is no doubt these houses should not be built on the proposed site.</p>

<p>Please give reasons for your answer</p>	<p>1 Representation on general justification of this LPR</p> <p>The current proposed NE Thatcham development is contradictory to all the reasons employed by WBC to oppose an original WBC objections cited the detrimental effects on the enjoyment of the AONB, long views across the Kennet Valley, separation of Thatcham from surrounding rural settlements. I agree with this original view of WBC as local walking groups participate, regularly enjoy the patchwork of footpaths crossing into the AONB from the development area.</p> <p>This contradiction is not addressed in the LPR. The traffic and environmental studies are deficient and reflect the lack of consultation with rural communities at a time of crisis with respect to Covid restrictions. Many of us in the rural community were astonished that the LPR would support such development.</p> <p>2 Representation on traffic implications</p> <p>The traffic studies have largely ignored the fact that there is an Eastward route parallel to the A4 which traverses the edge of Oak Trees (local beauty spot), then passes through Southend Bradfield and Bradfield College before joining the A340. This route has become increasingly busy after other developments in Thatcham, as an access to West Reading. The displacement of traffic onto this route without quantifying the effects on: -</p> <ul style="list-style-type: none"> • Wildlife (deer and badgers often killed on these unfenced roads). • Pedestrian safety in Bradfield College as the road passes through the heart of the College. • Road safety at the junction where the fast-moving traffic on the A340 is intercepted. • Its enjoyment as a recreational cycling route for nearby urban communities. <p>3 Representation on Environment Matters</p> <p>The destruction of this large agricultural escarpment will have a large visual impact on the Kennet Valley and the surrounding landscape. The developments are constrained. The studies and amelioration proposals contained in the LPR are unaudited, simplistic and do not take account of the importance of this important heathland area which is a rare environmental home for many species.</p> <p>Local community associations such as The Bucklebury Heathlands Group and the West Berkshire Countryside Society are committed to the maintenance of this environment, which is now at risk of degradation.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	I am very concerned about the lack of attention to AONB issues as well as the reluctance to discuss the development of Brownfield sites in the area. Many residents of Bucklebury can attest to existing problems with off-roading, littering and noise which will only worsen as the number of vehicles increases. Bucklebury has an ecosystem of national importance. I understand little relevant environmental research has yet taken place notwithstanding there is a statutory requirement to do so.
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a	No

<p>minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>As an overview I think the plan has been badly thought through and should be delayed until the various local interest groups Parish Council and Bucklebury says No are satisfied the Plan is in the interests of all, which is not remotely the case. The proposal to build 1250, 1500 or 2500 new homes is understandably causing considerable concern among residents especially Bucklebury. The NPPF consultation process has not yet been completed and I suggest WBC should take this into account, to pause the planning process and to bring forward an updated Plan when the details become known in 2023.</p> <p>I am very concerned about the lack of attention to AONB issues as well as the reluctance to discuss the development of Brownfield sites in the area. Many residents of Bucklebury can attest to existing problems with off-roading, littering and noise. This is a Common which will only worsen as the number of vehicles increases. Bucklebury has an ecosystem of national importance.</p> <p>I understand little relevant environmental research has yet taken place notwithstanding there is a statutory requirement to do so.</p> <p>I further understand there has been very little traffic modelling to take account of the significant increase in vehicles from the new homes. This is evidenced by the comments in a recent edition of the Newbury Weekly News from Mr Brian Little, the Editor. that there is no provision for any increased parking facilities at Thatcham Station and, moreover, there is no provision for parking facilities in the infrastructure plan. Objective 4 of the Sustainability Appraisal- to promote and maximise opportunities for walking cannot possibly be achieved if there is no significant increase in parking facilities. Moreover, it has come to light that the proposed exit onto Harts Hill Road (HHR). This is not a sensible proposal. The road is steep, narrow and winding, is without pavement. Increasing traffic on HHR would not have a positive impact on road safety and would reduce opportunities for walking. A new car park on HHR which would add yet more traffic and may result in an increase in anti social behaviour which is a problem of the area. In short, there does not appear to be a credible infrastructure plan or a willingness to discuss these issues.</p> <p>No clear and important infrastructure plans have been prepared about schools and medical services in the area which are already oversubscribed.</p> <p>There are many other issues which concern me and I may follow up this e.mail before the Public Consultation ends. In the meantime responses to the points raised bearing in mind the Local Plan is intended to take us through to 2038.</p>

Please give reasons for your answer	<p>I am writing to state my objections to the Thatcham NE Development which I believe is fundamentally unsound. Should the development proceed it will be disastrous for our community. I live in Upper Bucklebury and am concerned that the proposed development will have a number of reasons which I will elucidate.</p> <ul style="list-style-type: none"> • Thames Water is already discharging sewage into the River Kennet, causing pollution, so imagine the increased amount of houses. • There would be increased traffic and congestion on the A4 so drivers would use Upper Bucklebury as a rat-run leading to the destruction of our village. • There would be increased pressure on secondary schools. Kennet School is already over-subscribed ; how will the additional children be accommodated? • There would be pressure on medical and complementary services. The NE Thatcham development plan (SP17) proposes a new healthcare facility with the suggestion that a GP Surgery be offered to the Buckinghamshire, Oxfordshire and Berkshire borders. However, the document is bereft of detail or insight into strategic healthcare planning. Proposals for a major development of this scale and significant impact in relation to its size and location should be accompanied by a fit for purpose Health Impact Assessment in line with current guidance from Public Health England. The HIA should include reference to how the proposals for development will be supported by service providers regarding impact on primary health care services. The development proposals should demonstrate that they have been considered in the design of the scheme because an unacceptable impact on the health and wellbeing of the community would not be permitted. It is of concern that neither WBC nor the developers, as public and private stakeholders respectively, have published a prospective HIA specific to the proposed North-East Thatcham development. • It is also of concern that there appears to have been no direct engagement between the North-East Development Plan and local GP practices. Few new GP practices are commissioned by NHS England, even where they consider there to be patient need. NHS Digital figures of patients registered in the NHS Berkshire West Clinical Commissioning Group confirm there is a shortage of GPs in other areas of the country. There is therefore no realistic prospect of a new GP practice being established in Thatcham in the foreseeable future. • There would be consequential damage to the Common – increased footfall by design, increasing damage to an ecologically sensitive area. • Environment impact – greenfield development abutting an AONB with no up-to-date evidence or strategy for positive environmental gain. • Poor excuse of a country park – now reduced to three small, isolated areas inside the proposed settlement boundaries, with no value or commitment to exclude subsequent development. • There is a lack of a strategic gap between Thatcham and Bucklebury – Thatcham and Upper Bucklebury will effectively merge and Bucklebury will lose its identity. • The number of houses now “at least 1500” – from an initial site assessment of 2500 of which 1250 were to be built, the number has now increased to 1500. Who is to say that this will not increase to 2500 just to satisfy a developer’s profit? <p>For all these valid objections I urge you to refuse this development.</p>

<p>the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to you to object to the WBC LPR Regulation 19, I have laid out my reasons for my objections below.</p> <p>WRT Transport;</p> <p>There are plans for the traffic from the proposed housing estate to exit to Floral Way and the A4. These roads are busy times with regular tailbacks for several hundred metres from the roundabout at SSE going towards Reading in the morning and evening. This is already an everyday occurrence.</p> <p>There is no provision in the plan for how to make alternative forms of transport (ie. not cars) safe or even provision for them.</p> <p>The plan predicts that some traffic would go to wider rural routes which are not adequately provisioned for this (no parking).</p> <p>It is unclear how if a secondary school were provided adequate transport links would be provided. I would encourage the council to visit Kennet school in the morning and at closing time to get an idea of the impact which is currently what local residents experience.</p> <p>Paragraph 3.26 proposes new junctions on to Floral Way and Harts Hill Road. These roads being steep and already busy, this is not either a safe or a practical proposal. I also noted that there are no modelling results to back up the statement in the plan that this will not cause problems.</p> <p>The Sustainability Appraisal (SA) / Strategic Environmental Assessment (SEA) which accompanies the Local Plan for the North East Thatcham area against key Sustainability Objectives. Objective 4 is – To promote and maximise opportunities for sustainable transport. The SEA makes the following assessments:</p> <p>‘To Reduce Accidents and Improve Safety’</p> <p>Council Assessment - The policy is likely to have a Positive Impact on road safety as safe travel will be critical to the success of the development.</p> <p>I question this conclusion and suggest to the council to reconsider how the LPR is likely to have a positive impact on road safety.</p> <p>There is also the following assessment:</p> <p>‘To increase opportunities for walking, cycling and use of public transport’</p> <p>Council Assessment – Significant Positive Impact</p> <p>Council Commentary - The policy is likely to have a significant impact on walking, cycling and public transport as the development will be served by these modes of transport.</p> <p>The LPR does not provide sufficient evidence to come to this conclusion. Again I would ask for more concrete data on how this is to be achieved.</p> <p>WRT Healthcare;</p> <p>Though the NE Thatcham plan (SP17) proposes a primary healthcare facility suggesting a GP surgery be offered the development in the background to strategic healthcare planning. A Health Impact Assessment should be provided for a development of this scale.</p> <p>Such an assessment should include reference to how the proposals for impact of the development have been discussed with the providers. This omission implies there has been no engagement between the NE Thatcham Development Consortium and the providers.</p> <p>The general shortage of GP's is a well reported fact, and it is currently going in the wrong direction. Though the plan suggests there is nothing to suggest that there will be GP's to staff it or that it would make financial or organisational sense to do so.</p> <p>As a general comment the practises in the area are already overstretched. With the closure of local pharmacies (and the loss of pharmacy workers as GP's (https://pharmaceutical-journal.com/article/news/nearly-three-quarters-of-pharmacists-considered-leaving-profession-in-the-past-year-finds-rps-survey))</p> <p>I don't have faith in the LPR addressing provision of local health care.</p> <p>My concerns for dental services in the area are similar to the above and are not addressed by the LPR.</p> <p>WRT Environment;</p> <p>There is not sufficient evidence to support the council's claims that SP17 will have a positive impact on the environment. It should only be considered to have a negative impact.</p> <p>I do not consider the mitigation of the environmental impact of the NE Thatcham development to be met by the provisions described in the LPR.</p> <p>The LPR states that a sustainability charter is required to establish how policy requirements will be achieved and that this will be done through various strategy documents (including one specifically on ecology). These strategy documents have not been made available for consultation.</p> <p>The claimed provisions for green space via the proposed country parks will be sufficient for the number of people intended to live in the area.</p> <p>I noted how the original Thatcham Growth Plan referenced country parks. The proposal for these were vague initially and referred to community parks, the difference between the reference is not clear. The commitment from WBC to protecting the natural environment is not clear in the plan.</p> <p>The sustainability appraisal in the plan is contradictory in saying on the one hand that since the development is being built the impact on environmental sustainability would be negative and on the other hand that it would have an overall positive impact.</p> <p>The overall impression of the plan with respect to the environment is that there is not a convincing attempt address the environmental issues.</p> <p>WRT Education;</p>

	<p>The LPR does not provide detail on the provision for Nursery or early years education.</p> <p>With regard to Primary education there is no data on the planned number of schools or form entry requirements.</p> <p>The sum quoted of £12 million to be contributed by the developers is based on 2011 data. It is now 2023 and it is not clear. The timing of the school provision is not clear. Feasibly this could be towards the end of the duration of the LPR.</p> <p>With regard to Secondary education there are no details of the land to be provided for this provision.</p> <p>The statement that the study has not engaged in a detailed demographic prediction and modelling exercise, has not assessed the capacities of existing schools and intends to address this in more detail as the development progresses implies a lack of contingency in place.</p> <p>I would suggest this section is revisited with more up to date data and at least an effort at more detail.</p> <p>The LPR mentions provision of sports fields. Where these are to be situated is not clear. Additionally there is no mention of...</p>

Please give reasons for your answer	<p>Representation on Healthcare</p> <p>The development plan (SP17) proposes a 450sq m primary healthcare facility on site. However, no evidence exists to have been in direct contact with the three general medical practices affected by the impact of the development. Nor indeed if NHS England would commission a new practice. So, there will be a significant negative impact for the existing community onto the new development.</p> <p>The local GP surgeries are already overstretched. It is taking 3 weeks to see a GP at Chapel Row Surgery.</p> <p>Similar concerns exist regarding Dental Services. There are no dental practices in Bucklebury or other local villages of Chapel Row and Southend Bradfield. Already residents must drive to Reading, Pangbourne and Newbury for dental assistance and unsuitable country roads. There is no evidence that the need for dental provision has been considered in the development.</p> <p>Conclusion, as a <address redacted> resident I object strongly to the new proposals on the grounds that provision for primary care has not been met when existing services are already overstretched and thus the proposals are UNSOUND.</p> <p>Representation on Environment</p> <p>This plan which proposes a major greenfield development entirely on existing agricultural land will permanently damage the landscape. It totally ignores its impact on the adjoining North Wessex Downs AONB and Bucklebury Common; the landscape.</p>

	<p>from medieval times both in Upper Bucklebury, virtually abutting the northern boundary of the proposed development t Row. Here, traffic from the new development will travel through the mile long ancient Avenue of oaks, first planted to As a resident of <address redacted>, I have witnessed the already detrimental effect on the Oaks and the Lower Comm and conflicts with horses, walkers, cyclists and illegal off road vehicles. The development will lead to huge increases through Bucklebury and Chapel Row further exacerbating the existing tensions.</p> <p>As such I strongly oppose the proposals which will detrimentally destroy the wildlife, flora and fauna and consider the su unproven and unsound.</p> <p>Traffic Representation</p> <p>I query how many representatives from WBC have made a study of the rural roads from the proposed development t Bucklebury, Chapel Row, where I live and onto Southend Bradfield and beyond. No formal, accredited travel survey h are narrow country, bendy roads and where a straight section exists is used as a race track.</p> <p>Yet the plan provides for an exit onto Harts Hill, steep and narrow which WBC admits will displace traffic from the A4 Upper Bucklebury and beyond. These Country roads are already significantly used by local cycling clubs as well as t increasing levels of motor vehicles. They were never conceived to cope with modern traffic volumes and the proposed not positive impact on road safety.</p> <p>I reject totally WBC who state that the proposals maximise opportunities for safe and sustainable transport. The prop</p>

Please give reasons for your answer	<p>I am writing to object to proposed plans to build 1500-2500 houses in NE Thatcham.</p> <p>I have lived in Thatcham for 43 years and before that in Midgham from birth.</p> <p>To build on the land linking Thatcham, Bucklebury and Midgham would be without doubt a terrible decision.</p> <p>The beautiful countryside that I have loved for 65 years does not deserve to essentially be destroyed.</p> <p>I have the usual concerns over infrastructure. Floral Way is already used as a bypass to the A4 with no traffic calming on an already inadequate road.</p> <p>A lack of schools, GPS, police station, rail crossing (that is fit for purpose) is of course a concern but my biggest concern</p>

	<p>In 1970 I attended Kennet school and remember water flowing down Station road.</p> <p>Fast forward to 2007 when Thatcham was flooded. I was working in the Burwood centre and those devastating scenes down the road, houses and gardens flooded.</p> <p>The cottage I grew up in, in Midgham was totally flooded, the sluices were opened to save Thatcham and my family was living there at the time <personal details removed>. His family came to live with me in Thatcham for a time but I could return. The cottage still has damp problems that have never been resolved.</p> <p>Many friends and colleagues lived in caravans and rented while their homes were drying out. It was a devastating time. I walk a lot and I see just how desperately the water wants to flow downwards from Bucklebury towards the canal. It is a disaster.</p> <p>Even with the millions spent on flood alleviation in Thatcham it will never be adequate.</p> <p>Only a couple of weeks ago after heavy rain, the water running at the side of Dunstan park and under Station road was a sight to behold.</p> <p>Building more houses with drives, patios and roads that will take away the natural absorption we currently have is madness.</p> <p>We are barely coping in Thatcham now and this is not a sensible place to build.</p> <p>There must be better options that will not impact our town and countryside.</p> <p>I hope you take on board my concerns and would be happy to attend any meetings.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>

Please give reasons for your answer	<p><i>Extract of response relevant to consultation point:</i></p> <p>Environment</p> <ul style="list-style-type: none"> Lack of strategic gap between Thatcham and Bucklebury – Thatcham and Upper Bucklebury will effectively lose its identity Consequential damage to Bucklebury Common – increased footfall; increasing damage to an ecosystem of national importance Greenfield development abutting an AONB with no up-to-date evidence nor strategy for positive impact and overall benefit A 'Country park' – this has a specific accepted definition which is not met in this Plan. The three small, isolated areas of land within the boundary have no meaningful environmental value or commitment to exclude subsequent development <p>Education</p> <ul style="list-style-type: none"> Unacceptable pressure on secondary schools – Kennet is already over-subscribed; accommodation for additional pupils not been specifically stated <p>Transport</p>

- A severe increase in traffic through Upper Bucklebury and other villages will be dangerous; WBC propose a new traffic in and out of the northern end of the development, and a car park, also on Harts Hill, both highly inappropriate
- Severe additional congestion on the A4 will be bad for citizens and business

Healthcare

- Unacceptable pressure on medical & complementary services – additional GP surgeries are not part of NHS strategy

Healthcare provision

The North-East Thatcham development plan (SP17) proposes a 450 sq m primary healthcare facility with the suggestion to the Buckinghamshire, Oxfordshire and Berkshire West Integrated Care Board or other such appropriate body. However, there is **no detail or insight** into strategic healthcare planning.

Proposals for a major development that is likely to have a significant health impact in relation to its size and location, require a **Health Impact Assessment (HIA)** in accordance with the current guidance from Public Health England. It is of concern that to how the proposals for development have been discussed with health service providers regarding impacts on primary care. Development proposals should demonstrate how the conclusions of the HIA have been considered in the design of the development and impact on the health and wellbeing of existing or new communities will not be permitted. It is of concern that **neither** public and private stakeholders respectively, **appear to have arranged or published a prospective HIA specific to the Thatcham development.**

Tackling health and wellbeing requires a **multi-agency approach**. The Berkshire West Health and Wellbeing Strategy has been developed by the Reading, West Berkshire and Wokingham Health and Wellbeing Boards together with the Berkshire Partnership. Developers are encouraged to engage with the healthcare providers at the earliest opportunity in order to meet the requirements associated with new development. It is of concern that **there appears to have been no direct engagement with the Thatcham Development Consortium and local general practices.**

Few new GP practices are commissioned by NHS England, even where they consider there to be patient demand. Digital figures of patients registered in the NHS Berkshire West Clinical Commissioning Group (CCG) confirm there is no increase in other areas of the country. There is therefore **no realistic prospect of a new GP practice being established** in the foreseeable future.

GP practices look to create efficiencies and economies of scale to make general practice more financially sustainable. It would extend the range of services and primary healthcare professionals available on a single site. It would make no financial sense for an existing local GP practice to set up a branch surgery on the proposed new development because of the high computing and staffing costs and encumbrance working across two sites.

There has been **no approach by WBC or the developers to any local GP practice to discuss an appropriate site** which one or more practices could relocate. An enlarged primary healthcare site is required and might be better located to improve access and minimise traffic as the proposed NE Thatcham development is peripheral to the centre of the village. It is to be supported by Thatcham Town Council but has not been suggested in the sustainability appraisal of site options. The proposal with the inadequate 450 sq m floor size proposal which they only discovered with the SP17 Policy of December 2021.

The proposed North-East Thatcham development site is covered by the existing practice boundaries of Thatcham Medical Centre (Harts Hill Road), Burdwood Surgery (east of Harts Hill Road) and Chapel Row surgery (the whole area). **All three practices are run by two Thatcham doctors' surgeries** run independently of each other, and their combined lists include approximately 2700 patients under 2,000 patients per GP. Newly registered patients moving into housing developments tend to make a greater demand on services. There are more young children, a higher maternity workload, less local extended family support and there is initially a high demand for permanent and repeated temporary pharmacy closures in Thatcham have further exacerbated pressure on primary care.

Thatcham dental practices are unable to provide dental care for the whole population with a significant minority of patients referred for NHS and private dental care. Thatcham Vision, endorsed by WBC in 2016, confirmed only 60% of resident dentists (with 17.5% registered with a doctor outside Thatcham). There is no evidence provided that either WBC or the developers have consulted any local dental practices regarding the potential impact of increased workload resulting from additional housing.

Reviewing the scanty healthcare recommendations within the Thatcham Strategic Growth Study (David Lock and Associates, 2016). Present, paragraph 4.10 states: 'A dialogue with the relevant healthcare and education agencies should be established as part of the process to address concerns that social infrastructure may not be provided.' The Stage 3: Thatcham Future report published in 2016 provides no further detail except the outcome of a community representatives' workshop, that the existing GP facilities are at the heart of the health centre.

Conclusion:

WBC and the developers appear to have neither arranged a relevant HIA nor provided evidence of having approached any health care agencies or providers. They are proposing a healthcare site that is unsuitable for NHS primary care and will not mitigate the burden that 1,500 or more new houses will make on a local NHS struggling to cope. The objective of WBC and the Thatcham Development Consortium to improve access to the health service component of community infrastructure has not been met. **There is no evidence for the provision of a viable primary care medical facility.**

Transport

1. Increased Traffic

Reviewing the comments by Bucklebury residents submitted at Regulation 18 about North East Thatcham, a recurring theme is the impact on the villages. We sought assurances and were led to understand by WBC planners that traffic from the development would be directed onto the A4. This is true but what they 'forgot' to mention was **a plan for an exit at the north of the site onto Harts Hill**. This was mentioned on 6th January when the Transport assessment was published:

Phase_2_Transport_Assessment_Report_July_2021.pdf(westberks.gov.uk).

This is serious for us because traffic from, or to, the site is only going to go in one direction from this exit – **towards the villages**. It is split between the traffic going through Cold Ash and the traffic through Upper Bucklebury and Chapel Row.

The proposed development will funnel traffic from the development and, **WBC predicts, - 'some displacement of traffic from the villages such as Upper Bucklebury'**. This would be where the roads are inadequate, without pavements and have the potential to be dangerous. It also points to the loss of opportunities for walking and cycling – under 'Safe' Transport.

2. Access and junctions

The Transport Assessment says at paragraph 3.26: 'The access arrangements for the northern end of the NET site (with right turn lanes where appropriate) on both Floral Way and **Harts Hill Road**. Results from the modelling suggest that

However, the document has **no** modelling results for this. There are drawings for all the other proposed junctions but not?

3. Car Parks

We have also seen drawings showing **a new car park on Harts Hill**. The purpose is a mystery but will surely add more to an already a dangerous road and may also promote the night-time antisocial behaviour all too apparent in the car park.

4. Safe and Sustainable Transport

The Sustainability Appraisal (SA) / Strategic Environmental Assessment (SEA) which accompanies the Local Plan covers the North East Thatcham against key Sustainability Objectives.

Objective 4 is – To promote and maximise opportunities for all forms of safe and sustainable transport. The SEA makes the following points:

- ‘To Reduce Accidents and Improve Safety’

Council Assessment - The policy is likely to have a Positive Impact on road safety as safe travel will be critical to the development.

- ‘To increase opportunities for walking, cycling and use of public transport’

Council Assessment – Significant **Positive Impact**

Council Commentary - The policy is likely to have a significant impact on walking, cycling and public transport as the development will be in an area with these in mind.

Specific Objection: Education - Schools and Sports Field Provision

1 Schools Provision

The provision for education from Nursery, Early Years, through Infant to Secondary education is not clearly defined within the Plan. There is no coherent end-to-end plan: this therefore breaches the Council's obligations to provide education facilities for the Plan for a large new housing development is untenable.

The lack of a coherent Plan on Schools Provision across the various proposed developments also means that it is impossible to assess the impact on traffic. The siting of a secondary school to the NE of Thatcham would result in a significant increase in traffic in the area, not considered in the traffic plans and models in the LPR.

Pre-secondary School Provision:

There are **no details** in the LPR of the provision for **Nursery or Early Years** education. Policy SP17 NE Thatcham S17 states that ‘the site will provide Early Years provision’.

The provision for **Primary** school education is **unclear and contradictory**. There is no data or evidence on the plan for the number of Form Entries requirements. The LPR proposes that the sum of £12 million be contributed by the developers to primary education. As the data available (the only data referenced is from 2011), it is impossible to assess if this is sufficient. It also does not state how many school place provision. Clearly, schools need to be available before houses are built.

Secondary Education Provision:

The **current situation** for secondary school students from Bucklebury is that they have a choice of either The Downs or Bucklebury are in the catchment area for both.

Where schools are **oversubscribed** those children who live nearer to the school are given precedence. This means that those from NE Thatcham development would be able to opt for Kennet and those from Bucklebury would then be limited to The Downs.

The LPR is **inconsistent, incomplete and contradictory** on the provision of **secondary schooling** in and around Thatcham. This is a contradiction to the *Supporting documentation. It proposes that the sum of £15 million be contributed by the developers to secondary education. There are **no details of the location of the land** to be provided and hence no possibility of assessing its suitability.

Please see the link below to **The Thatcham NE Development Plan 2020** (part of the LPR *Supporting documentation) https://www.westberks.gov.uk/media/49799/Thatcham-Strategic-Growth-Study-Stage-3-Thatcham-Future/pdf/Thatcham_Strategic_Growth_Study_Stage_3.pdf?m=637910502456970000

49799/Thatcham-Strategic-Growth-Study-Stage-3-Thatcham-Future/pdf/

Thatcham_Strategic_Growth_Study_Stage_3.pdf?m=637910502456970000

The Thatcham NE development plan 2020, produced by David Locke Associates and Stantec on behalf of WBC, proposes a new (6-8 Form Entries) secondary school, half-funded by developer contribution.

Government guidelines are that Secondary Schools with less than a 6FE are not sustainable.

However, the Development Plan states that the **NE Thatcham development** (which proposed 2,500 houses), **is not sustainable**. Specifically :-

5.18 Provision of a new secondary school in North East Thatcham is an essential part of enabling growth in the town. The **proposed is not sufficient** on its own to fill a 6-8FE secondary school.

5.19 Secondary schools need to be of sufficient scale to make them sustainable and able to provide suitable facilities. The **proposed is not sufficient** on its own to fill a 6-8FE secondary school. **considered feasible for a new school to be smaller than 6FE.**

With an apparent 40% reduction in the housing allocation in the 2023 LPR (2022 to 2039) to 1500 houses, a secondary school is not sustainable in this location.

Earlier in this same Thatcham NE Development Plan it was noted that the education provision exercise was based on **a study in 2011**. Clearly the use of 11 year old data is inadequate. The Development Plan states:

4.83 This study has not engaged in a detailed demographic prediction and modelling exercise to determine future primary school demand across the town, and has not attempted to predict the long-term capacities of existing schools. Inevitably education provision will need to be considered in more detail as any development comes forward.

The LPR Review to 2039, Policy SP17, now states that land (but not the Secondary school itself) will be provided for a new secondary school.

In summary, it is therefore clear that the plan for secondary school provision is ‘unsound’:

- there is no satisfactory evidence of the number of pupils the school is to cater for;
- the location of a school is not clear;
- the number of Form Entries is not defined, but it is noted that anything less than a 6FE school is unsustainable;
- the timing of the funding is not clear; and
- there is no evidence that the proposed funding is sufficient to meet the Council's obligations to provide education facilities.

Conclusion on Schooling:

West Berkshire Council, as an education authority, has a duty to make arrangements for **suitable school provision** across all school years is **not defined or evidenced in the LPR**.

2. Sports Fields Provision

The LPR talks of the provision of sports fields. This raises two issues not answered in the LPR:

- Sports fields require flat ground. The only flat area of ground in the proposed site is that which is closest to the most traffic fumes.
- There is no funding earmarked for these facilities.

Although unclear, the LPR appears to assume that the school playing fields would also be available as Sports Fields then the playing fields will not materialise. Additionally, many schools are reluctant to open their playing fields to the other concerns.

The objective of WBC and the North-East Thatcham Development Consortium to provide **sports fields has not been evidenced for funding or for a suitable location**.

Specific Objections: Environmental Issues

There are a number of **serious environmental threats** posed by the proposed Thatcham North-East strategic development:

- 1 **Collateral damage** to the **Bucklebury Plateau Biodiversity Opportunity Area** (*see map at end) [in attachment] and heaths, **in particular the Common**;
- 2 Siting a **major greenfield development** in the broader landscape setting of the **North Wessex Downs AONB** of the open countryside by local communities;
- 3 Causing **detrimental impacts to legally protected wildlife** known to be present on the site, whilst erroneously measures can be taken after development e.g. through the vague promise of a 'community park'.

Taken together, and after a thorough professional review of the background documentation provided by WBC in support, **there is no evidence to support claims that SP17 will have a positive impact on the environment. By contrast, it will have a significantly negative impact.**

For example, the WBC states in the LPR that a **Sustainability Charter is required** to establish how 'policy requirements, the legally required biodiversity net gains and the anticipated overall positive impact on environmental sustainability) be informed by' various strategy documents (including one on ecology). **Yet, the strategy documents either do not exist or are not publicly available for the Regulation 19 consultation.**

At least **4,000 people will be concentrated in the development site**. They of course must have access to green space for their wellbeing. The claimed provisions for green space cannot satisfy this demand on site. The original Thatcham Growth Strategy proposed **two 'country parks'** spaced across the top of the slope, inside the Biodiversity Opportunity Area, claiming the potential for biodiversity enhancement over its current land use. No details were provided about how they would be formed. The feasibility study showed the complete lack of preparation for such country parks, not least that they should be merged, and properly named, to deliver the biodiversity enhancement. Now, in the updated SP17 text, the country parks have been **downgraded to green spaces** which only proves how little commitment WBC has given to protecting the natural environment and public enjoyment.

Since SP17 has no proven plans for providing adequate green space and protecting biodiversity, there will be a negative impact on visiting adjacent areas.

Indeed, the LPR states its intent for SP17 to drive additional traffic (people and cars) into the AONB. It provides a green space which will 'take advantage of the landscape' to '*facilitate connection to the AONB, and include leisure routes accessible to all*'.

Meanwhile, the management vision for Bucklebury Common is explicitly focused on not increasing human pressure on the site, working to restore and nurture.

In fact, **the LPR's own Sustainability Appraisal accepts that SP17 will have a negative impact on environmental sustainability** on a greenfield site and therefore, would result in a negative impact on environmental sustainability which would need to be mitigated by whatever whatsoever on any such mitigation measures: the assumption is simply that they will somehow be found during the project.

However, **the very same Sustainability Appraisal suggests that the SP17 policy is likely to have an overall positive impact** – largely by absurdly ignoring the environmental consequences in favour of social and economic benefits that are outlined in other articles herein).

The overall thrust of **the SP17 policy** is clearly to build as many houses as possible in a small area of countryside, without regard to how the environment – human and natural – will be improved or, if not, mitigated. Despite all the money spent on consultation plans and justify the 'growth' requirement, **there is no evidence of any serious attempt to investigate, analyse and mitigate the consequences. Everything will be all right because their own unsubstantiated policies say it will be.**

For full response see attachment David Copas Full Consultation Response. For map referenced see last page of attachment.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	<p>The 2021 Environment Act states that by the end of 2023, all new developments in England are meant to be providing net zero biodiversity net gain. This means that, before any development begins, there is a legal requirement for WBC to submit a biodiversity net gain plan and proposed biodiversity values of the sites.</p> <p>The SP17 Northeast Thatcham site has a much higher biodiversity range than the WBC might appreciate. There are many habitats on the site but there no firm plans within the LPR to retain or protect these (the ponds are natural habitats to dragonflies, beetles, snails, coots, and moorhens etc) and woodlands (which are homes to muntjac deer, badgers, hedgehogs, nesting reedbeds etc).</p> <p>Furthermore, there is no plan to offset the carbon and methane produced during construction (through tree-planting) or the carbon offset price (Southwark Council use an offset price of £1,800 per tonne). Also, massive carbon sinks will be lost from the soils and woods with over two square kilometres of concrete and tarmac.</p>
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is	No

<p>consistent with achieving sustainable development.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	Yes
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>The LPR is unsound because:</p> <p>1 Inconsistent with national policy. The National Planning Policy Framework (page 50), ‘Section 15: Conserve and enhance the natural environment’) states clearly that ‘<i>Planning policies and decisions should contribute to and enhance the natural and enhancing landscapes, biodiversity and soils; recognising the intrinsic character and beauty of the countryside; providing net gains for biodiversity and establishing resilient ecological networks; improving local environmental quality; and remediating and mitigating degraded and contaminated land. Policy SP17 contravenes all of the</i></p> <p>This LPR is unsound because, with regard to the SP17 Northeast Thatcham Strategic Site, it is inconsistent with A NPPF.</p> <p>The rationale for declaring the LPR unsound is:</p> <ul style="list-style-type: none"> • Rather than protecting and enhancing landscapes, the LPR aims to destroy valued scenic landscape and biodiversity (carbon sinks) with buildings, concrete, and tarmac. • The LPR bypasses the intrinsic character and beauty of the countryside and overrides the economic benefits of agriculture and woodland. • The LPR prevents net gains for biodiversity by eliminating large areas of meadow and smaller areas of woodland. • The SP17 development will degrade local environmental conditions such as air and water quality and drainage and possible flooding. • The LPR does nothing to remediate and mitigate degraded, derelict or contaminated land and instead it destroys wetland habitats. • There is no reference to an Ecological/Biodiversity plan within the LPR to include wildlife corridors and ponds a legal requirement. There are no firm plans to retain local ponds (which are within the site periphery and are natural habitats for bullrushes, pond weed, freshwater snails, coots, and moorhens) and woodlands (which are homes to muntjac deer, red kites and woodpeckers). These will be impacted or destroyed when construction starts because the SP17 development and there is no buffer zone and no plan to prevent their loss or to provide for future monitoring. • There is no reference within the LPR to compile a ‘Net Zero Carbon’ report detailing carbon and methane emissions from brick, concrete, steel, and tarmac manufacture, and construction vehicle emissions). This should include a detailed plan for how emissions will be offset so that the site becomes carbon neutral. (The offset would need to cater hundreds of thousands of tonnes of emissions). <p>Given the UK is one of the least biodiverse countries in Europe, there is no mention in the LPR how legally-required biodiversity net gains. The Sustainability Charter establishing how ‘policy requirements will be achieved’ has not been compiled.</p> <p>2). Inconsistent with achieving sustainable development. The LPR is inconsistent with WBC’s own Core Strategy Berkshire Core Strategy (2006 - 2026) Development Plan (page 99) states that the Housing Growth Plan will: ‘deliver the West Berkshire between 2006 – 2026 in a manner which will maximise the use of brownfield land and access to brownfield sites’.</p> <p>The SP17 Thatcham NE development is planned for a greenfield, not brownfield site. There are no cost or impact assessment which brownfield sites were selected and why they were eliminated.</p> <p>Decisions to build on any greenfield land should be subject to stringent safeguards because the UK has the lowest land use proportion of greenfield land per square kilometre of anywhere in Europe. Building on open countryside adjacent to built-up areas is detrimental for existing and future communities, animals, and plants in the county.</p>

3). Lord Deben (Chairman of the UK Independent Committee on Climate Change) stated in January 2023 that '*planning decision should be made with climate and sustainability in mind*' (BBC 'Rethinking Climate').

I would assert that West Berks Council in its SP17 Thatcham NE development proposal is not aligned with Lord Deben given **no thought** to climate and/or sustainability.

WBC needs to produce a 'Net Zero Carbon' report detailing all CO2 equivalent emissions expected to be generated (materials - brick, concrete, steel, and equipment) with a detailed account of how these emissions will be offset.

WBC needs to produce an Ecological/Biodiversity plan within the LPR outlining plans for 500 metre-wide buffer zone corridors, and firm plans for retaining and monitoring ponds and woodland immediately adjacent to the site so they are resilient and how a providing net gains for biodiversity will be achieved. Monitoring and mitigation plans need to be 'SMART'.

4). The Thatcham NE development takes absolutely **no account** of the following:

- 1 Carbon-Offset. GHG emissions from construction and building materials including houses, roads and driveway offset of 200,000 to 500,000 thousand tonnes of CO2-equivalent emissions. This could be mitigated by planting trees. There is no mention of a plan to carry out this level of carbon offset. Furthermore, there is no plan for the developer for the carbon generated by their material and equipment during construction (Southwark Council use an offset for the carbon generated by their material and equipment during construction).
- 2 Significant biodiversity loss and habitat fragmentation in an area already under threat.
- 3 Scenic landscape destruction impinging on an Area of Outstanding Natural Beauty.
- 4 Bucklebury Common is a fragile woodland and heath infrastructure. Siting 1,500 to 2,500 homes immediately adjacent to and allowing it to be part of a 'community park' would cause significant degradation to the wildlife pollution and during the hot summers (as there were in 2022).
- 5 Likely subsequent further residential and industrial sprawl along the A4 towards Reading (as has happened on the construction of the Vodafone HQ on a greenfield site).
- 6 Massive loss of local carbon sinks through the destruction of the soils, meadows, wetlands, and woodlands;
- 7 Increased surface runoff into the Kennet River valley and flooding risk to parts of Thatcham caused by the plan removal of soils and replacement with houses and tarmac;
- 8 Increased traffic and vehicle pollution on the A4 to Reading and Harts Hill Road;
- 9 A biodiversity and wildlife 'buffer' zone (of at least 500 metres) between the Thatcham NE development and the site for wildlife to thrive and provide at least an element of local carbon-sink.

5). **The SP 17 is not justified in that it has not demonstrated that it has taken into account reasonable alternatives** that WBC considered any alternative uses for the SP17 land which were ecologically and environmentally beneficial to the area. Alternative examples might have been using the land as a country park or site for a modest-sized wind farm or solar farm essentially looked at a map to say where can we fit a couple of thousand houses? Rather than considering sustainability and destroying the landscape.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?
 * Yes
 * No

Please give reasons for your answer

Given the Duty to Cooperate places a legal duty on WBC to engage actively and regularly with the community with regard to the plan. It can be seen how, going forward, the WBC considers the views and acts on the recommendations of those who oppose the plan. So far the LPR complies with the Duty to Cooperate in that it is available for consultation. But the plan is missing a good number of recommendations will be acted upon and there will be opportunities for continued engagement with the Bucklebury community not being steamrollered by local council or government.

4. Proposed Changes

- 1 The LPR is not legally complaint because the 2021 Environment Act states that by the end of 2023, all new developments must be providing a **biodiversity net gain plan** to measure the existing and proposed biodiversity values of the site. The 'Biodiversity Net Gain Charter' has not been issued. There is no record of the number of species on and adjacent to, the site nor any plan to ensure construction to ensure they are not damaged. **A Biodiversity Net Gain Plan, a Sustainability Charter, and a Biodiversity Assessment for SP17 need to be issued by WBC ahead of the LPR.**
- 2 There is no probability of a biodiversity net gain because SP17 is a **greenfield** site. Building on open countryside is severely detrimental for existing and future communities, animals, and plants in the county. More likely there will be a net loss in an area already under threat. The **Biodiversity Net Gain Plan** needs to explain how this will be mitigated and how it will be SMART - Specific, Measurable, Achievable, Realistic and Time-bound objectives).
- 3 There is no reference within the LPR to the generation of a 'Net Zero Carbon' report detailing carbon and methane emissions (from steel, and tarmac manufacture, and construction vehicles) during construction. Furthermore, there is no plan to offset the carbon produced (through tree-planting) or proposal for the developers or WBC to pay a carbon offset price (Southwark Council use an offset price of £1,800 per tonne). **WBC needs to issue a 'Net Zero Carbon'** report detailing emissions, mitigation and offset.
- 4 **This LPR is unsound** because, with regard to the SP17 Northeast Thatcham Strategic Site, **it fails on all the requirements of the Policy Framework** (page 50), 'Section 15: Conserving and enhancing the natural environment'. It is *inconsistent* with the Policy Framework in that it does not recognise the intrinsic character and beauty of the countryside; providing net gains for resilient ecological networks; improving air and water quality; and mitigating degraded land.
- 5 There needs to be an Ecological/Biodiversity plan within the LPR to include **500 metre wildlife corridors** and a buffer zone around the site (between the site and the development and through the site).
- 6 During 2022 there were several heathland fires on Bucklebury Common (a fragile heathland ecology) and the fires are continuing. Locating 4,000 residents immediately adjacent to the Common would increase the risk of woodland fires. WBC has not referenced this in its LPR. WBC needs to generate a report, **in conjunction with Royal Berkshire Council** assessing the fire risk, and how this will be mitigated.
- 7 The West Berkshire Core Strategy (2006 - 2026) Development Plan (page 99) states that the Housing Growth Strategy will be 'delivered through homes across West Berkshire between 2006 – 2026 in a manner which will maximise the use of brownfield land and brownfield services'. The SP17 Thatcham NE development is planned for a greenfield, not brownfield site. Therefore, **the development is not in line with the West Berkshire Core Strategy (2006 - 2026).**
- 8 Lord Deben (Chairman of the UK Independent Committee on Climate Change) has stated that 'planning laws should be made with climate and sustainability in mind'. West Berks Council in its SP17 Thatcham NE development proposal gives **no thought** to climate and sustainability. **This needs to be addressed.**

	<p>9 No account has been taken of the loss of local carbon sinks through the destruction of the soils, meadows, wetlands and trees in the SP 17 area. This need to be addressed in the EIA.</p> <p>0 The WBC needs to generate a report detailing how it would plan to limit further residential and industrial sprawl (as has happened on the A34 north of Newbury following construction of the Vodafone HQ on a greenfield site) of the plan?</p> <p>1 WBC needs to demonstrate that it has considered alternative uses for the SP17 land which are more ecologically beneficial to the community and biodiversity. For example, did they consider a country park or modest-sized woodland to be generated detailing the alternatives considered for the land.</p> <p>2 To counteract the increased traffic and vehicle pollution on the A4 and Harts Hill Road, and in line with the Government's strategy, WBC needs to issue a plan for the use of Zero Emission Vehicles on the site.</p> <p>I personally think that it is a terrible shame that WBC would even consider the SP17 greenfield area for development in the decision-making process. These meadow, woodland, and pond landscapes are becoming scarcer and scarcer in a rural area and biodiversity and scenic landscape. Future generations would not thank WBC for sanctioning such a degradation of the landscape.</p>

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I refer to the North East Thatcham Development scheme Transport Assessment where it includes an access to and from this proposal is bordering on the suicidal, Harts Hill Road is dare I say it a 'Challenging' drive to say the least, it is a road with several sharp bends along its length it has a speed restriction of 40 mph until it reaches the boundary with the Village where it reduces to 30 mph, the road itself is subjected to frequent water encroachment from the surrounding fields and as with the snow and early February this year when the temperature drops to below freezing the road surface ices over and several vehicles were frequent with the road having to be closed all be it temporarily many times, there is a likelihood of serious Road Traffic Collisions I myself can recall at least one Fatal Traffic Collision and also several injury Road Traffic Collisions occurring upon this road.</p> <p>The Policies of previous Governments in the reduction of Police Road Traffic Patrols has resulted in a free for all approach to driving standards falling at an alarming rate thereby Road Traffic Collisions from minor right through to fatalities and injuries occurring year as a result.</p> <p>This proposal would also increase the traffic flow through Upper Bucklebury for vehicles heading East towards Reading and part some of these roads do not have pedestrian walkways or footpath increasing the danger to residents on foot, bearing in mind that the footpath serving the residents was removed by West Berkshire Council some years ago.</p> <p>This proposal makes a mockery of the Sustainability Appraisal in the Strategic Environmental Assessment which states that Objective 4 is to promote and maximise opportunities for all forms of safe and sustainable transport with an assessment to improve Safety whatever is the point of seeking professional advice in such matters if it is to be ignored by the Planning Committee's Assessment that this proposal is likely to have a positive impact on Road Safety as safe travel will be critical.</p>

<p>Please give reasons for your answer</p>	<p>I was very disappointed to see WBC has re-submitted virtually the same plan after regulation 18 consultation taking residents observations, and objections. This is not how local plans for much needed local housing should be created. Council officers to discuss topics and raise questions for well informed and evidenced answers at public exhibitions has not been used to hide behind 10,000 impenetrable heavy-weight planning pages and on-line only processes. On-line should have been used for communication - not the only channel. The few physical town hall sessions attended by council officers had to be driven through and even then answers were rarely straight and were lacking evidence to substantiate them.</p> <p>I write this email to you in objection to WBC LPR Regulation 19 as being unsound and out of character for West Berkshire.</p> <p>1. < For full document see attachment></p> <p>2. Education. There is no clear definition in the plan of nursery / early years provision. Any new development will have to provide needed young families to revitalize our aging communities. If this is not WBC's intent then please add that you wish SP10s with over 55s only allowed as residents.</p> <p>The plan has no modelling where pupils will have to go for their education and the subsequent impact on traffic. The walking or cycling will avoid high pollution areas like A4. Also segregated cycleways purely on safety to encourage increase in detailed plans. Currently children in the area have to rely on white lines painted a major national trunk road to protect them from like speeding cars and articulated heavy good vehicles.</p> <p>There is no evidence that the provision of money to be set aside for local primary educations will be enough or that it will help people moving in and starting much needed and loved young families.</p> <p>Kennet secondary school is massively over-subscribed due to great governance, leadership and teachers. However the school (which was built in 1957) and its facilities are over stretched further. Good teachers are in short supply and will naturally leave if they do not have sufficient good quality facilities and teach children in a modern, safe and well provisioned school. Kennet will not be stretched to bursting point. The Kennet campus is not suitable for further development. The area needs a new campus if a significant increase in local population occurs.</p> <p>Further the plan on secondary education is unsound as it has:</p> <ul style="list-style-type: none"> - no model of pupil increase and capacity for surrounding existing schools and guaranteed when new schools will be built - the location of any new school and its suitability (flat site for planning fields and disabled pupils and teachers) - removal of natural escarpment - number of form entries is not clear

- impact to local taxes for additional funding for capital projects required is not clear

3, Environment. The additional footfall in the very nearby Bucklebury Common has not been modelled. This is a frag damage to the Sulham Woods SSSI by the over development in Tilehurst region is a good example of what will happen become a massive muddy track lacking undergrowth and any interesting fauna or flora that it currently supports.

West Berkshire has the character of a rural county that is composed of small communities (25-150 dwellings) that ha surrounded by woodland and pasture. This plan does not support that character, its a massive strip development with to the town of Hungerford. Massive strip developments are not in character of West Berkshire. There needs to be su wooded areas within the development curtilage to compensate for the areas going under the bulldozer. This will help way up the escarpment. All the natural gullies should become permanently protected, with sufficient barriers against un - this will produce natural corridors to wildlife to cross the Kennet Valley floor (again there is no provision for wildlife o plan in natural protected corridors)

The "country / community parks" mentioned are nothing but a couple of very small pastures for people to let their do building will take place on areas of recognised significant biodiversity and put significant footfall pressure on areas o Yet there is no mention of how this with be compensated for. There is no benefit in this plan for environment or biodiv entirely on greenfield site.

The claim in the plan that SP17 will have an overall positive impact on sustainability has no evidence to support it. It of 1500 dwellings with an intention to grow to 2500 dwellings as initially stated (based on exactly the same cartilage, to maximise their returns and ignore the well-being of existing residents and new residents in the development.

4. Proximity to Aldermaston Weapons Establishment. I am somewhat confused that development that is only just ov AWE (bottom of Cox's Lane) should be allowed when Gazeley development was refused as it was about 4 miles from comes to radiation which travels in a straight line or fallout that follows the wind or water movement then surely most o due to AWE proximity.

5. The Process. There has also been no public exhibition for people to locally inspect large scale plans and visual rep types of housing to be built and the social areas to be created. No traffic modelling visualisations with the consequer fumes) on all local roads within a 10 mile radius.

No large scale visualisations of increased flooding risk down Harts Hill that was a "river" of flood water in the 2007 fl

There are no large scale visualisations of the impact to local people on secondary education due to increase in popul have to go in an already over-subscribed Kennet school in a 10 mile radius.

In summary it is my own personal observations that this plan is unsound and out of character of West Berkshire and Ignoring previous very valid objections and observations and taking no evidenced mitigation or change to ameliorate th tax payers and residents well being and good faith in local government democracy and fair treatment.

<p>Please give reasons for your answer</p>	<p>Regarding the proposed and reduced plan to develop an area of North East Thatcham with 1,500 houses up to the year 2039, there have been many developments over the years (from 1972 when we moved here); in all these developments infrastructure has been built. Tull Way and Floral Way can hardly be called infrastructure, yet they are there to ease the movements from the most part of the site. SP17 it is stated that the mitigation of the development impact on the highways network - this is not shown and at the time it was going to be no improvement to Harts Hill Road, which already carries a heavy amount of traffic.</p> <p>Your policy also states that priority habitats and ecological features will be protected, and yet you also state that all people who live on the land, very hard to achieve both.</p> <p>Policy SP6 states that flood risk for the site will not be increased, but does not state that flood risk to surrounding areas will be almost impossible to achieve with such a huge number of hard standings with houses on. It is also stated that the benefit of the plan is to reduce the risk of flooding. That is hardly something that will endear you to all the people whose houses flooded in previous years and are no longer insure or pay increased premiums.</p> <p>Floral Way was supposed to be the boundary of North East Thatcham. It would be preferable to build a new secondary school centre on part of the proposed site and develop the current Francis Bailey Primary School, Kennet Secondary School and move them on what is a brownfield site that is much closer to the heart of Thatcham.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>

Please give reasons for your answer

In summary, I find the plan unsound.

Traffic Problems: Without the council stating the potential locations of any additional primary healthcare and dental secondary schools, it is impossible for them to evidence the likely flow of additional traffic from this development in any and improvements to the existing road infrastructure assessed as necessary to accommodate it before this development.

I live in <address redacted>, Midgham, which <address redacted> via Cox's Lane or Church Hill. Both roads are barely the former is single track for most of its length, and the latter single track at certain points with passing places. These traffic is congested on the A4: Last year due to an accident on the A4 the entire length of Cox's Lane, Birds Lane and traffic tried to find alternatives routes around the road blockage. I was stuck in the middle of this for over an hour on my I missed as a result).

These roads are already experiencing more traffic from new builds along the A4 and more locals new to the area ex cars, on their bikes and walking dogs. <Address redacted>, it's more efficient for me fuel-wise (& to avoid risk – turning to use Coxs Lane when travelling to Thatcham and Newbury but it's becoming increasingly dangerous to do so as m single track lanes. Last week, I barely avoided a collision as a vehicle rounded a blind bend at speed here 51.406291, a 4x4 and been able to drive off the track, we would have collided! This was a new driver to the area. It's almost impo along Coxs Lane without encountering two or three vehicles and one driver or another having to reverse back to one. This makes every journey take longer, raises the risk of a collision for every journey, and increases the risk of driver with these roads don't know the passing places, and get aggressive when you try to point out that the nearest passing than for you!

These roads are heavily used by cyclists, horse riders, people and dog walkers accessing public byways and footpa these roads. It is unconscionable for any increase in traffic along Coxs Lane, Birds Lane or Church Hill without an unac of injury to me, other humans and animals. I'd like to see modelling that shows there will be no increase in traffic along impacting on their current use for recreation, leisure and sustainable commuting by bike by the local community.

I also use the A4 to commute to Bracknell for work, travelling through Theale and onto the M4 to do so. The load of t heavy, particularly between 7am – 9am and 4.30pm – 6pm. As commuters, we come to a standstill in Woolhampton locals use the pedestrian crossing to cross the road, and we are regularly stuck in stationary traffic at Pips Way and traffic pumps out exhaust fumes making it hazardous for me as a driver sitting in it, not to mention local residents, pe Midgham train station or along the footpaths along the Bath Road. The commute now takes me 20 minutes longer th in traffic over the past 6 years since I've moved to the area. More traffic using the Bath Road will only increase travel area with emissions.

When I try to exit either Coxs Lane, or Church Hill to turn right to travel towards Thatcham, I have to wait for up to 5 find a safe gap in the traffic. And the risk of a collision is high because there is a constant stream of drivers using the Newbury and beyond. The speed limit has been reduced from 60 mph to 50 mph for safety reasons. But unexpected up make up time makes traffic speed irregular & unpredictable on this road. This makes it very dangerous for anyone traffic! This road simply can't safely accommodate any increase in traffic.

Broad Lane, The Common and The Avenue are already being used as rat runs for people as an alternative to using unsafe driving along these roads as impatient drivers overtake at speed during rush hour. These roads are also regu with our dogs, horses and bikes. We criss cross these roads to find different tracks through the common for walks. In potentially?) will bleed from this NE Development onto these roads making it unsafe for us to use for recreation and pe wooded environment with fuel emissions. This AONB is so revered that it regularly attracts people from outside of the flow of traffic in the middle of this rare and beautiful place will make it less friendly and safe for everyone wanting to

When travelling to Thatcham, I use Hart Hill and Floral Way. Harts Hill has several dangerous blind bends and a steep d in icy conditions. Floral Way is heavily congested during rush hour traffic. May I see the traffic modelling for any junct particular any safety assessment done on the risk to other road users of having junctions on these roads? I can't see encourage safe and sustainable commuting: riding a bike down Harts Hills will be even more perilous?

How will this development have a positive impact on walking, cycling and public transport?

I note the proposal for a car park on Harts Hill. For what purpose?

I'd like to see the council's traffic modelling at the various bottle necks in the area during peak traffic to see what the time (all modes), safety & emissions from this development?

Environment: There are adders where the proposed development is. We know this because our dog ran off on a wa Manor. We found him eventually on private land where the development is intended to be sited. He disturbed an add prevented him being bitten (he was poised to bite it as it reared up at him).

Our friend, a reptile expert, was unwilling to visit the location because this is private land and we didn't want to be fo owner to know what we'd found. In her experience, landowners of development sites have been known to make the

we have kept this a secret. We will reveal the location for an independent assessment to take place once we are sure before that happens.

I note the plan makes reference to providing green space and playing fields for the new households, but again no schools will open their playing fields to the general public is not feasible due to H&S, safeguarding, maintenance issues. If these are not provided, new households will gravitate to other green spaces in the area, increasing traffic in areas around the flora and fauna. There are already a high number of deer, badger and kites struck by traffic on the roads around the area. I fear this will increase with more traffic flowing through our local roads.

I am also a mushroom hunter. Many mushrooms in the Common and surrounding woods only grow in undisturbed soil. The Common is trafficked by locals and daytime visitors. Last autumn we noticed a near total absence of mushrooms during October and November, yet in other woods in the Chilterns and New Forest, they were plenty. It might be because the Common is now a favorite for everything, or because the woods are so heavily used for recreation since covid, that the soil is too widely disturbed? If these woods, the soil will be even more disturbed and the fungi won't have enough time for their hyphae to develop and become devoid of mushrooms & other edibles.

We need a thorough impact assessment to be done on the impact the NE Development plan will have on local flora and fauna.

I and other walkers will also lose access to the popular footpaths from Coxs Lane leading to Colthrop and Upper Buxton. How can we be able to access these areas safely on foot with our animals without these footpaths? This development will limit my access to the countryside I currently enjoy and will impair my ability to enjoy it as a local citizen. I'd like to better understand how the council will compensate the local community for what it will lose in footpath access to areas we currently enjoy?

Flood defence & pollution of river Kennet: Can the council also show local residents how the recent flood alleviation works on a vast paved area (the housing estate & associated roads), and evidence how the consequential run off of water will affect the river further.

Primary & dental care: I am registered at Chapel Row surgery. The medical facility is stretched to capacity with long waiting times. The dispensary regularly operates reduced hours due to demand and recruitment problems. The hours of opening are limited. I struggle to find appointments I can make as a fulltime working person. If more households try to access this facility, the waiting times for professionals are able to give to the current local population. I fear getting a face-to-face appointment will become impossible, my wellbeing at risk.

I am also registered with a dental practice in Tilehurst, some 13 miles away!

As a local resident, I'd like to understand what plans have been created for additional primary and dental care to meet the needs of new households? Not a generic statement that the needs will be met, but something more substantive showing where the council will resource the feasibility of resourcing them and so on. For example, if local facilities struggle to resource their practices, how will the council resource new practices?

House price devaluation/ other options: Many home owners here have paid a premium to live on the doorstep of a quiet & quiet, less congested roads and access to open countryside. What consideration has the council given to changing the road layout and the impact this will have on the value of our properties?

There are thousands of individual building plots sites which could spread the load of this proposed housing development across the county for new housing development within the country without degrading the rural landscape.

The council must surely have access to a register of potential individual building plot sites within the county that it reviews for developments in greenbelt areas as part of its due diligence?

Will the council share this due diligence work and all rejected planning applications for new builds for the past 5 years? Is it the imperative to use this greenbelt land as opposed to developing other options?

This should form part of the consultation documentation.

Consultation: I am an intelligent, educated and interested local resident, yet I have found accessing documentation for the consultation difficult. I work long hours full time and cannot get to the offices to view documents in person. When the council's website goes down, that hardly helps us review documentation when we're not at work either.

I am neurologically divergent and struggle to read the documents on line which are not written with the needs of people who are dyslexic, and equally intelligent and interested. He wants to object but will struggle putting anything into writing. Many people are dyslexic and computer illiterate. They cannot get to your offices nor access online content.

I find this entire "consultation" to have been discriminatory. I'd like the council to evidence that fact that they have done their best to get local residents like us informed, engaged and able to contribute before this plan goes any further. I thank the council members who've gone over and beyond to explain things to us in a way we can understand as best they can. Something our local council has not.

	<p>May I also ask why the exit onto Hart Road at the proposed North of the site was only revealed to the local community late disclosure is disingenuous. This fact, and the impact this will have displacing traffic through Cold Ash, Bucklebury would have encouraged more local residents to get involved.... had they known.</p> <p>I believe the council has paid lip service to policies it must comply with, and to an extent, outsourced its responsibilities to vested and commercial interest in this proposed development - to the detriment of the local community.</p> <p>This fact, the inaccessibility of the planning documents and the late disclosure of key facts makes this application un-</p>

Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>I am contacting you to express my objection to the proposed Thatcham NE Development which I believe to be unsound.</p> <p>My main areas of concern are as follows:</p> <p>Transport: there will be a significant addition to the amount of traffic in the locality in an area which cannot be developed particularly along Harts Hill which is difficult to negotiate at the current rate of traffic flow.</p> <p>Healthcare: the plan contains no detail relating to the enhancement of current healthcare provision across all relevant areas and no liaison has taken place to develop a plan to address this significant issue.</p> <p>Environment: the enjoyment of the local open spaces and wildlife is an important factor for residents in the area. The local environment and this can only be affected negatively by such a large development. There is no evidence that these factors have been protected.</p> <p>Education: the current situation in the area regarding educational provision is already stretched and the proposal to build new schools is not in enough detail to make a sound decision as to whether or not to support this element of the plan.</p>

	In conclusion I am opposed to the plan over a range of very important factors

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>On behalf of our family, we are objecting to the WBC Local Plan Review (LPR) 2022-2039 as we find it unsound.</p> <p>Increased traffic</p> <p>The traffic on Broad Lane is already too busy.</p> <p>During mornings and afternoons as people commute through the area, there is a lot of traffic. Outside our own house as people have disagreements outside the speed calming chicane.</p> <p>Having stood and watched the traffic at different times of the day, you generally find that people appear to be driving cars coming from the lower priority side. Traffic is too high in volume to just be local traffic, many local friends and family as a "rat run" to avoid the A4 when trying to get to Reading, Pangbourne, Newbury, Thatcham etc.</p> <p>With the plan for an exit to the north of Harts Hill Road, and broadly more traffic in the area from the proposed housing, it will get worse which will further reduce quality of life and pollution for local residents.</p> <p>Furthermore, the pavements are not wide on the opposite side of the road, and as previously noted, the chicane traffic lead to accidents and discourages further walking and cycling which are better for the environment.</p> <p>Access, junctions and car park</p>

We are concerned to see that at the northern end of the NET site, there are new priority junctions proposed. As noted, these could lead to more traffic problems, pollution and potentially safety issues.

Safe and sustainable transport

We do not see how the proposed development in the plan will reduce accidents and improve safety, nor increase opportunities for use of public transport. The assessment appears completely flawed to us as local residents, and frankly, a “box-ticking exercise” is an after-thought, not a properly considered part of the LPR.

Healthcare

Healthcare does not appear to have been considered properly at all. There has not been a multi-agency approach or a proper Impact Assessment.

All GP practices in the area are already overstretched and based on what has been put forward in the plan, there are no plans from developers to engage with healthcare providers.

It would not seem to make financial sense for a new practice to open based on what is currently detailed in the LPR. The proposed primary care site appears to be unrealistic and unsuitable, and there is no reasonable mitigation for 1,500 or more new residents.

We are also concerned about the provision of dental practices, as it is a very difficult situation already locally. This does not appear to be considered at all.

Environment

We are absolutely devastated and stunned that a major greenfield development is being considered in the setting of the local countryside. Surely as we discover more about the damage humans are doing to the planet, it does not make sense to further erode the local countryside.

The plan does not consider the current enjoyment and health benefits to the local community of the open countryside and the benefits for local wildlife.

One of the reasons my family and I moved to the area in 2013 was to enjoy the local countryside more and improve our quality of life. We have already created many happy memories, and have been very grateful for what we have, as we have local family and friends nearby, walks and to enjoy the treasure trove of footpaths.

My family and I feel extremely strongly about this point and feel much more must be done to investigate alternative locations to avoid damage the local countryside beyond repair.

It appears completely absurd to me that the SP17 policy can state that there will be an overall positive impact on sustainability. This is a complete misunderstanding and ignorance of how beautiful and impactful the local area we already have is.

Education

There is no coherent plan for education, and this very simply put makes the plan untenable. As a local resident, I am already concerned that the school has already been expanded into a very large school, and I am broadly concerned too that without understanding what is going on and making traffic predictions.

West Berkshire Council, as an education authority, has a duty to plan for suitable school provision. How this obligation will be met across all school years is not defined or evidenced in the LPR.

Whilst we both have experience of education in the area through virtue of using the education services for our children, we are concerned in the management of schools due to being a Local Authority Governor. The current state of school premises and facilities are poor and poorly managed. Policies around Academies and Multi-Academy Trusts have eroded WBC's ability to provide a range of services to schools left as Local Authority schools. This further expansion will only make the situation worse, and we need to see further resources planned.

Sports fields

The objectives of WBC and the North-East Thatcham Development Consortium to provide sports fields have simply not been met as they have not provided evidence for funding or for a suitable location.

Timing on the LPR

	<p>On 6th December, Michael Gove (Secretary of State for Levelling Up, Housing and Communities) released a Written Ministerial Statement (https://questions-statements.parliament.uk/writtenstatements/detail/2022-12-06-1) stating that the housing number should now be an advisory starting point and not mandatory.</p> <p>The statement went on to say that the Planning Inspectorate should no longer override sensible local decision making local constraints and concerns.</p> <p>There is no evidence that this change of direction has been considered in the LPR in its current form.</p>

Please give reasons for your answer	I wish to object to the development of the land surrounding Thatcham as shown in the LPR. Specifically the land north of the A4 and along Floral Way. The local infrastructure simply can not support this development. Doctors, Schools, Roads etc are not capable of taking current legal objections by WBC to the development of land adjacent to this plot - and the reasons for the objection a

<p>Please give reasons for your answer</p>	<p>I am against the development because of the detrimental environmental impact it will have on Bucklebury Common as a site. Bucklebury Common has many legally protected species including ground nesting birds. Even a proportion of the trees and their dogs who will come onto the common will cause significant disturbance and damage as happened during the previous development.</p> <p>The green sites on the proposed development will not satisfy the demand for green space by all the inhabitants of the parish by yourselves with the complete lack of strategy documents.</p> <p>The flagrant carelessness displayed in the consultation document for the environment are at best vague and at worst misleading. A Council supposedly working for the people are prepared to accept this destruction of their local environment.</p> <p>Leading on from this there is the dramatic increase in traffic which will inevitably pass up Harts Hill, onto Broad Lane and the surrounding small 'quiet' lanes. Cycling or walking is already hazardous in these lanes and will become impossible as traffic increases. Another environmental issue which surely cannot be ignored. The consultation document actually admits this is inevitable.</p> <p>From reading the local newspapers there is already sewage being dumped into the Kennet and Avon canal suggesting that the water and sewage systems are overloaded. Unless there is a huge investment by Thames Water to address this the issue which must be given urgent consideration. It is beyond belief that this hasn't already been done.</p> <p>I worked for <Personal details removed> for 20 years and know they are already stretched to capacity as are the Burtons. They haven't the capacity to take on another 4000 patients and would not want to open a branch surgery with all the staff and skilled professionals required. The NHS is so short of doctors, midwives, health visitors, nurses, social service professionals. How will the inhabitants get medical and mental health cover? How will current population numbers be served by the increase on the number of resources? This issue has not been addressed at all. How uncaring is that?</p> <p>Kennet School is at capacity. How do you propose to meet your obligations in providing an education for all the children in the development? Again, a definite promise of educational facilities for all ages is a failure by the Council.</p> <p>The whole plan is unsound and based on something paid for by developers who have nothing but financial gain in mind. The Levelling Up Housing and Communities has had the sense to back down on the number of houses needing to be built.</p> <p>I am deeply disappointed that a Council whose job it is to care for their electors whom they are supposed to represent show such callousness and disdain.</p>

Please give reasons for your answer	I totally object to the proposed development at Bucklebury on the following grounds :- * This is a proposed development on a Greenfield site adjacent to an AONB *The increased traffic through Upper Bucklebury will be totally un- acceptable *Damage to the Common - the increased footfall will be severley damaging to a delicate Ecosystem of National impo This development must not go ahead !

<p>Please give reasons for your answer</p>	<p>I have lived in Upper Bucklebury for the last 26 years. During that time I have seen house numbers increase, placing existing inadequate education and health care facilities, but nothing like that proposed by the NE Thatcham development ill thought through and is totally unsound.</p> <p>I strongly oppose the NE Thatcham development on the following grounds:</p> <p>1 Traffic</p> <p>In the years that I have lived on Burdens Heath the traffic volumes have increased significantly. It travels at speed, on a stretch of road where there is no pavement or street lighting, making it unsafe for pedestrians and cyclists. This development increases the volume of traffic including along Harts Hill Road, which is a particularly unsafe and windy stretch of road where the increased traffic volumes will pose yet further threat to the safety of pedestrians, cyclists and motorists.</p> <p>I understand that there has been no modelling for the proposed junction on Harts Hill Road. I can only imagine because it is inherently dangerous. You don't really need a traffic assessment to work that out.</p> <p>I also gather that a car park is proposed on Harts Hill. It is unclear why one would be needed and this will simply be an encouragement of social behaviour that already goes on in the car parks on Bucklebury Common.</p> <p>The Council's assessment that the development will reduce accidents and improve safety as well as increase opportunities for public transport (which is pretty much non-existent in Upper Bucklebury) is totally ludicrous and without any basis or evidence. The opposite is likely to be true given the current problems with traffic volumes, which would be dramatically worsened.</p> <p>1 Healthcare</p> <p>The NHS is in crisis and unable to provide adequate primary care to those already living in the area. The development will increase the number of people and there is no coherent plan as to how and where the health care needs of those living on the proposed development will have their primary care needs met. In turn there will be increased pressures on hospital services which are similarly overstretched. A realistic prospect of a new GP practice being established and no financially viable prospect of one of the existing GP practices being able to take on surgery. Dental practices will be similarly unable to provide for the needs of those on the development. There is no evidence that any have been considered with local health care agencies or providers.</p> <p>1 Environment</p> <p>The site is a greenfield site and would therefore have an extremely detrimental impact on environmental sustainability. This negative impact on the environment will be managed and mitigated, if indeed that is remotely possible. There is no space on the development site. This development will simply increase traffic (people and vehicles) to Bucklebury Common and the fragile ecosystem of the Common requires. It presents a threat to legally protected wildlife on the site and in the surrounding area.</p> <p>1 Education</p> <p>How the children that the development will attract are to be educated is totally unclear. How will the Council fulfil its duty to provide education facilities for these children? The current schools in the area are mostly poorly funded with the buildings in poor condition and facilities lacking. How will creating further schools, if indeed that is what is planned, make a difference? It is clear that there is no secondary school provision. The number of pupils to be catered for is unclear making the financial viability of a school uncertain. Where the school would be located or indeed when it would be built, especially as it seems there isn't adequate funding to do so. It is clear to me that there has been no consideration given to the infrastructure necessary to support such a development and the extremely detrimental impact that the development will have not only on the lives of those living locally but also on the wider community. I would like to be notified of the progress of this matter.</p>

Please give reasons for your answer	<p>I have lived in Thatcham for over 30 years and have seen many changes and i'm afraid not for the positive. I moved from a village where I had everything that someone would need for a much smaller community and wildlife and the ability to walk in the countryside. The population and we still have only one secondary school, No extra doctor surgery's or dentists and extra shops . The trains have been cancelled in Thatcham, if the level crossing is down you can sit for at least 45 mins ! (no bridge and no bus) .</p> <p>So far the infrastructure hasn't grown with the population , and the roads currently struggle with the traffic and I don't like sitting in the traffic to get anywhere in the mornings !</p> <p>My home will be opposite this new development and currently sitting in the garden is not a pleasure due to the noise from the road .</p> <p>Building more homes is not the way to go as I'm sure they will not be affordable for the younger generations either as they could support a mortgage .</p>

Please give reasons for your answer	<p>I am writing to object to the LPR Regulation 19 as I find it unsound due to the following reasons:</p> <p>Increased traffic</p> <ul style="list-style-type: none"> If this site goes ahead with a minimum of 1500 new homes being built, it will result in increased traffic flow in Thatcham and Cold Ash. Traffic flow is believed to exit onto Floral Way and the A4. I live <personal details removed>. At b

5 minutes to turn right to head towards Harts Hill Road. We believe that this development will negatively impact Floral Way, and traffic backing up in Foxglove Way waiting to turn onto Floral Way.

- Alternatively, cars will divert through the estate rather to exit onto Floral Way at the other end of Foxglove Way causing Foxglove Way to become a “rat run” and potentially dangerous for children and pedestrians in a residential area.
- At busy times, queues form on Floral Way for cars joining the A4 towards Reading. Queues can be backed up and only get worse if these homes are built on this land.
- If traffic leaves the site onto Harts Hill Road, it will head through the local villages on Chapel Row and Bucklebury, which will have to withstand the volume of traffic that will end up using them, and could lead to a serious accident.
- As there are no new jobs to be created in the area, a large number of people living on the estate will need to commute to work, which will increase traffic flow on already congested roads. For example, cars travelling towards Basingstoke or Greenham will have to can already face long waits with traffic queuing up Pipers Way and along Station Road.
- From a personal perspective, I commute into Reading by train. At times, it can be tricky to get parked unless you have a permit. What provision is being made to increase parking at the station? The station is not served by local buses from the area and therefore commuters either need to walk (from the Harts Hill Road junction this would be a 25 minute walk which is not feasible for all commuters) or drive, but without extra provision of car parking, this will mean existing commuters will have to We note that the Council's assessment is that there will be increased opportunities for walking, cycling and using public transport and Dunstan Park are not currently served with public transport; I'd like to question how the Council will ensure there are opportunities for walking, cycling and public transport.

Pollution / environment

- With the increased volume of traffic on the roads, this will lead to more air pollution. Living close to Floral Way, I expect air quality levels will rise in my area, and this will have a negative impact on me.
- The additional traffic going up and down Floral Way to access the new site will cause additional noise pollution both during the day and at night.
- Loss of open space used by walkers and the habitats of many wildlife being lost.
- With the loss of so much open space, the risk of flooding once again is increased. I understood from the Project's flood defence that the flood defence was built to protect the existing developments in Thatcham against a 1 in a 100 year flood. At the same time, that if new developments were built on this site that they would need their own flood defences. What are the Council expecting the current flood defences to be sufficient? A stream that flows into the flood defence and goes under the road in my garden. I am naturally concerned that if no plans are made for further flood defences, my property will at a high risk of flooding.

Healthcare

- The development plan proposes a primary healthcare facility for a GP surgery. Existing GPs in this area are unable to take on existing patient lists, so I would question how the planners expect to be able to open a new GP surgery. Getting a new GP is impossible at the current time; having 1500 more homes means this will become even more difficult, and puts a lot of extra pressure on the existing GPs.

Schools

- With the additional homes, the school provision in the area will need to be increased. There are no details in the plan for primary provision. Nurseries are already full and with waiting lists so provision has to be made before the houses are built.
- Secondary provision in the area is already limited with many children in Thatcham having their catchment schools in other areas. If homes on this site, unless more secondary places are made available, more Thatcham children will need to go to other schools. Children will need to go to The Downs, creating more traffic and pollution with children having to travel further to school.

Due to the many reasons listed above, I wish to object to the LPR Regulation 19.

Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on	No

<p>cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p><i>Extract of response relevant to consultation point:</i></p> <p>Environment</p> <ul style="list-style-type: none"> • Lack of strategic gap between Thatcham and Bucklebury – Thatcham and Upper Bucklebury will effectively merge and lose its identity • Consequential damage to Bucklebury Common – increased footfall; increasing damage to an ecosystem of national importance • Greenfield development abutting an AONB with no up-to-date evidence nor strategy for positive impact and avoidance of harm • A 'Country park' – this has a specific accepted definition which is not met in this Plan. The three small, isolated areas of land on the boundary have no meaningful environmental value or commitment to exclude subsequent development <p>Education</p> <ul style="list-style-type: none"> • Unacceptable pressure on secondary schools – Kennet is already over-subscribed; accommodation for additional pupils has not been specifically stated <p>Transport</p> <ul style="list-style-type: none"> • A severe increase in traffic through Upper Bucklebury and other villages will be dangerous; WBC propose a new road to reduce traffic in and out of the northern end of the development, and a car park, also on Harts Hill, both highly inappropriate • Severe additional congestion on the A4 will be bad for citizens and business <p>Healthcare</p> <ul style="list-style-type: none"> • Unacceptable pressure on medical & complementary services – additional GP surgeries are not part of NHS strategy <p>Healthcare provision</p> <p>The North-East Thatcham development plan (SP17) proposes a 450 sq m primary healthcare facility with the suggestion to refer the proposal to the Buckinghamshire, Oxfordshire and Berkshire West Integrated Care Board or other such appropriate body. However, there is no detail or insight into strategic healthcare planning.</p> <p>Proposals for a major development that is likely to have a significant health impact in relation to its size and location, require a Health Impact Assessment (HIA) for purpose Health Impact Assessment (HIA) in accordance with the current guidance from Public Health England. The proposals to how the proposals for development have been discussed with health service providers regarding impacts on primary care. All development proposals should demonstrate how the conclusions of the HIA have been considered in the design of the development. The impact on the health and wellbeing of existing or new communities will not be permitted. It is of concern that neither the public and private stakeholders respectively, appear to have arranged or published a prospective HIA specific to the Thatcham development.</p> <p>Tackling health and wellbeing requires a multi-agency approach. The Berkshire West Health and Wellbeing Strategy has been developed by the Reading, West Berkshire and Wokingham Health and Wellbeing Boards together with the Berkshire Partnership. Developers are encouraged to engage with the healthcare providers at the earliest opportunity in order to address the requirements associated with new development. It is of concern that there appears to have been no direct engagement with the Thatcham Development Consortium and local general practices.</p> <p>Few new GP practices are commissioned by NHS England, even where they consider there to be patient demand. Digital figures of patients registered in the NHS Berkshire West Clinical Commissioning Group (CCG) confirm there is a shortage in other areas of the country. There is therefore no realistic prospect of a new GP practice being established in the foreseeable future.</p> <p>GP practices look to create efficiencies and economies of scale to make general practice more financially sustainable and to extend the range of services and primary healthcare professionals available on a single site. It would make no financial, clinical or staffing sense for an existing local GP practice to set up a branch surgery on the proposed new development because of the additional costs and encumbrance working across two sites.</p> <p>There has been no approach by WBC or the developers to any local GP practice to discuss an appropriate site which one or more practices could relocate. An enlarged primary healthcare site is required and might be better located to improve access and minimise traffic as the proposed NE Thatcham development is peripheral to the centre of the village to be supported by Thatcham Town Council but has not been suggested in the sustainability appraisal of site options. The proposal, with the inadequate 450 sq m floor size proposal which they only discovered with the SP17 Policy of December 2021.</p> <p>The proposed North-East Thatcham development site is covered by the existing practice boundaries of Thatcham Moor (Harts Hill Road), Burdwood Surgery (east of Harts Hill Road) and Chapel Row surgery (the whole area). All three practices are currently run by two Thatcham doctors' surgeries run independently of each other, and their combined lists include approximately 2700 patients under 2,000 patients per GP. Newly registered patients moving into housing developments tend to make a greater demand on services as there are more young children, a higher maternity workload, less local extended family support and there is initially a higher demand. Permanent and repeated temporary pharmacy closures in Thatcham have further exacerbated pressure on primary care services.</p> <p>Thatcham dental practices are unable to provide dental care for the whole population with a significant minority of residents currently attending for NHS and private dental care. Thatcham Vision, endorsed by WBC in 2016, confirmed only 60% of residents</p>

dentist (with 17.5% registered with a doctor outside Thatcham). There is no evidence provided that either WBC or the any local dental practices regarding the potential impact of increased workload resulting from additional housing.

Reviewing the scanty healthcare recommendations within the Thatcham Strategic Growth Study (David Lock and Associates Present, paragraph 4.10 states: 'A dialogue with the relevant healthcare and education agencies should be established process to address concerns that social infrastructure may not be provided.' The Stage 3: Thatcham Future report published no further detail except the outcome of a community representatives' workshop, that the existing GP facilities are at the health centre.

Conclusion:

WBC and the developers appear to have neither arranged a relevant HIA nor provided evidence of having approached health care agencies or providers. They are proposing a healthcare site that is unsuitable for NHS primary care and to mitigate the burden that 1,500 or more new houses will make on a local NHS struggling to cope. The objective of WBC Development Consortium to improve access to the health service component of community infrastructure has not been met. **evidence for the provision of a viable primary care medical facility.**

Transport

1. Increased Traffic

Reviewing the comments by Bucklebury residents submitted at Regulation 18 about North East Thatcham, a recurring theme is the villages. We sought assurances and were led to understand by WBC planners that traffic from the development would be managed. A4. This is true but what they 'forgot' to mention was **a plan for an exit at the north of the site onto Harts Hill**. This was mentioned on 6th January when the Transport assessment was published: Phase_2_Transport_Assessment_Report_July_2021.pdf

This is serious for us because traffic from, or to, the site is only going to go in one direction from this exit – **towards the villages** split between the traffic going through Cold Ash and the traffic through Upper Bucklebury and Chapel Row.

The proposed development will funnel traffic from the development and, **WBC predicts, - 'some displacement of traffic such as Upper Bucklebury'**. This would be where the roads are inadequate, without pavements and have the potential for accidents. Also point 4 below on increasing opportunities for walking and cycling – under 'Safe' Transport.

2. Access and junctions

The Transport Assessment says at paragraph 3.26: 'The access arrangements for the northern end of the NET site proposed (including right turn lanes where appropriate) on both Floral Way and **Harts Hill Road**. Results from the modelling suggest that the access is not safe. However, the document has **no** modelling results for this. There are drawings for all the other proposed junctions but not for Harts Hill Road?'

3. Car Parks

We have also seen drawings showing **a new car park on Harts Hill**. The purpose is a mystery but will surely add more cars to an already a dangerous road and may also promote the night-time antisocial behaviour all too apparent in the car park.

4. Safe and Sustainable Transport

The Sustainability Appraisal (SA) / Strategic Environmental Assessment (SEA) which accompanies the Local Plan for North East Thatcham against key Sustainability Objectives.

Objective 4 is – To promote and maximise opportunities for all forms of safe and sustainable transport. The SEA makes the following points:

- 'To Reduce Accidents and Improve Safety'

Council Assessment - The policy is likely to have a Positive Impact on road safety as safe travel will be critical to the success of the plan.

- 'To increase opportunities for walking, cycling and use of public transport'

Council Assessment – Significant **Positive Impact**

Council Commentary - The policy is likely to have a significant impact on walking, cycling and public transport as the plan aims to improve these with these in mind.

Specific Objection: Education - Schools and Sports Field Provision

1 Schools Provision

The provision for education from Nursery, Early Years, through Infant to Secondary education is not clearly defined within the Plan. There is no coherent end-to-end plan: this therefore breaches the Council's obligations to provide education facilities for the Plan for a large new housing development is untenable.

The lack of a coherent Plan on Schools Provision across the various proposed developments also means that it is impossible to assess the impact on traffic. The siting of a secondary school to the NE of Thatcham would result in a significant increase in traffic in the area, not considered in the traffic plans and models in the LPR.

Pre-secondary School Provision:

There are **no details** in the LPR of the provision for **Nursery or Early Years** education. Policy SP17 NE Thatcham Strategic Growth Study states that 'the site will provide Early Years provision'.

The provision for **Primary** school education is **unclear and contradictory**. There is no data or evidence on the plan for primary school entry requirements. The LPR proposes that the sum of £12 million be contributed by the developers to primary education. As no data available (the only data referenced is from 2011), it is impossible to assess if this is sufficient. It also does not state how many school place provision. Clearly, schools need to be available before houses are built.

Secondary Education Provision:

The **current situation** for secondary school students from Bucklebury is that they have a choice of either The Downs or Bucklebury are in the catchment area for both.

Where schools are **oversubscribed** those children who live nearer to the school are given precedence. This means that those from NE Thatcham development would be able to opt for Kennet and those from Bucklebury would then be limited to The Downs.

The LPR is **inconsistent, incomplete and contradictory** on the provision of **secondary schooling** in and around Thatcham. This is a contradiction to the *Supporting documentation. It proposes that the sum of £15 million be contributed by the developers to secondary education. There are **no details of the location of the land** to be provided and hence no possibility of assessing its suitability.

Please see the link below to **The Thatcham NE Development Plan 2020** (part of the LPR *Supporting documentation).

<https://www.westberks.gov.uk/media/49799/Thatcham-Strategic-Growth-Study-Stage-3-Thatcham-Future/pdf/>

The Thatcham NE development plan 2020, produced by David Locke Associates and Stantec on behalf of WBC, proposed a 6FE (Form Entry) secondary school, half-funded by developer contribution.

Government guidelines are that Secondary Schools with less than a 6FE are not sustainable.

However, the Development Plan states that the **NE Thatcham development** (which proposed 2,500 houses), **is not sustainable**. Specifically :-

5.18 Provision of a new secondary school in North East Thatcham is an essential part of enabling growth in the town. The provision proposed is **not sufficient** on its own to fill a 6-8FE secondary school.

5.19 Secondary schools need to be of sufficient scale to make them sustainable and able to provide suitable facilities. **Smaller schools are not considered feasible for a new school to be smaller than 6FE.**

With an apparent 40% reduction in the housing allocation in the 2023 LPR (2022 to 2039) to 1500 houses, a secondary school is **not sustainable** in this location.

Earlier in this same Thatcham NE Development Plan it was noted that the education provision exercise was based on a **study in 2011**. Clearly the use of 11 year old data is inadequate. The Development Plan states:

4.83 This study has not engaged in a detailed demographic prediction and modelling exercise to determine future primary school demand across the town, and has not attempted to predict the long-term capacities of existing schools. Inevitably education provision will be considered in more detail as any development comes forward.

The LPR Review to 2039, Policy SP17, now states that land (but not the Secondary school itself) will be provided for a secondary school.

In summary, it is therefore clear that the plan for secondary school provision is 'unsound':

- there is no satisfactory evidence of the number of pupils the school is to cater for;
- the location of a school is not clear;
- the number of Form Entries is not defined, but it is noted that anything less than a 6FE school is unsustainable;
- the timing of the funding is not clear; and
- there is no evidence that the proposed funding is sufficient to meet the Council's obligations to provide education.

Conclusion on Schooling:

West Berkshire Council, as an education authority, has a duty to make arrangements for **suitable school provision** across all school years is **not defined or evidenced in the LPR**.

2. Sports Fields Provision

The LPR talks of the provision of sports fields. This raises two issues not answered in the LPR:

- Sports fields require flat ground. The only flat area of ground in the proposed site is that which is closest to the road, and is the most traffic fumes.
- There is no funding earmarked for these facilities.

Although unclear, the LPR appears to assume that the school playing fields would also be available as Sports Fields. If not, then the playing fields will not materialise. Additionally, many schools are reluctant to open their playing fields to the public for other concerns.

The objective of WBC and the North-East Thatcham Development Consortium to provide **sports fields has not been evidenced in the LPR**.

Specific Objections: Environmental Issues

There are a number of **serious environmental threats** posed by the proposed Thatcham North-East strategic development:

- 1 **Collateral damage** to the **Bucklebury Plateau Biodiversity Opportunity Area** (*see map at end) [in attachment] and heaths, **in particular the Common**;
- 2 Siting a **major greenfield development** in the broader landscape setting of the **North Wessex Downs AONB**, which will impact on the **character** of the open countryside by local communities;
- 3 Causing **detrimental impacts to legally protected wildlife** known to be present on the site, whilst erroneously claiming that measures can be taken after development e.g. through the vague promise of a 'community park'.

Taken together, and after a thorough professional review of the background documentation provided by WBC in support of the development, **there is no evidence to support claims that SP17 will have a positive impact on the environment. By contrast, there will be a significantly negative impact.**

For example, the WBC states in the LPR that a **Sustainability Charter is required** to establish how 'policy requirements for the development will be met, including the legally required biodiversity net gains and the anticipated overall positive impact on environmental sustainability) will be informed by' various strategy documents (including one on ecology). **Yet, the strategy documents either do not exist or are not publicly available for the Regulation 19 consultation.**

At least **4,000 people will be concentrated in the development site**. They of course must have access to green space for their wellbeing. The claimed provisions for green space cannot satisfy this demand on site. The original Thatcham Growth Strategy proposed **two 'country parks'** spaced across the top of the slope, inside the Biodiversity Opportunity Area, claiming the potential for biodiversity enhancement over its current land use. No details were provided about how they would be formed. The feasibility study showed the complete lack of preparation for such country parks, not least that they should be merged, and properly managed to provide that stated biodiversity enhancement. Now, in the updated SP17 text, the country parks have been **downgraded to uncultivated grassland**, which only proves how little commitment WBC has given to protecting the natural environment and public enjoyment of it.

Since SP17 has no proven plans for providing adequate green space and protecting biodiversity, there will be a negative impact on visiting adjacent areas.

Indeed, the LPR states its intent for SP17 to drive additional traffic (people and cars) into the AONB. It provides a green space which will 'take advantage of the landscape' to '*facilitate connection to the AONB, and include leisure routes accessible to the public*'.

Meanwhile, the management vision for Bucklebury Common is explicitly focused on **not** increasing human pressure on the site, but working to restore and nurture.

In fact, **the LPR's own Sustainability Appraisal accepts that SP17 will have a negative impact on environmental sustainability** on a greenfield site and therefore, would result in a negative impact on environmental sustainability which would need to be mitigated by whatever whatsoever on any such mitigation measures: the assumption is simply that they will somehow be found during the p

	<p>However, the very same Sustainability Appraisal suggests that the SP17 policy is likely to have an overall positive impact (largely by absurdly ignoring the environmental consequences in favour of social and economic benefits that are any number of the articles herein).</p> <p>The overall thrust of the SP17 policy is clearly to build as many houses as possible in a small area of countryside, with little regard for how the environment – human and natural – will be improved or, if not, mitigated. Despite all the money spent on consultation plans and justify the ‘growth’ requirement, there is no evidence of any serious attempt to investigate, analyse and report on the consequences. Everything will be all right because their own unsubstantiated policies say it will be.</p> <p><i>For full response see attachment Deborah Reynolds Full Consultation Response. <p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I wish to complain in the strongest terms possible about the proposed housing development along the A4 east of Thatcham and along the A4 to coxs lane. This development will concrete over acres and acres of prime farmland at all the farmland it can get to feed a population that is growing faster and faster. All new homes should be built on brownfield sites. Berkshire has had more than its fair share of housing development in the last 40years since I moved to the area Thatcham a lovely place in the 1970s when I often came out this way for a day out but has been turned into one gigantic housing development. If it was allowed it will leave virtually no green land between Thatcham and midgham just as all the green land between Newbury and Reading has been built upon. More houses means more people meaning more pollution and congestion, most of these houses will exacerbate an already overloaded road system 2500 houses equal at least 5000 more vehicles plus more home deliveries. Many of the council are already incapable of keeping in good repair. Country lanes will be used as rat runs to try and avoid the main roads. I get onto even at non peak times, sometimes it can take an eternity to turn right out of local country lanes which inevitably will eventually cause accidents.</p> <p>There is an abundance of wildlife that will be affected by this development you can often see hares and roe deer on the roads and in the last few years we have noticed lapwings which we had never seen before in this area there are also badgers and smaller birds which will be driven out plus of course many species of butterfly some of which will be native to just this area and country lanes are all used by horse riders and dog walkers and those just out for a country stroll all will be inconvenienced by an increase in traffic. Where are all these new residents going to go when they need to see a doctor or dentist where are their children going to school no doubt they will just be loaded onto already hard pushed schools and surgery's.</p> <p>On a more personal note it surely cannot have escaped your attention that the majority of people in this county are leaving and the question is for how much longer can you count on their support???</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	No
<p>Please give reasons for your answer</p>	<p>Timing of the Local Plan Review Consultation</p> <p>On 6 December 2022, Michael Gove (Secretary of State for Levelling Up, Housing and Communities) released a Written Statement (https://questions-statements.parliament.uk/writtenstatements/detail/2022-12-06/hcws415) detailing that the housing requirement in the Local Plan is a starting point and not mandatory. The statement went on to say that the Planning Inspectorate should no longer overrule local plans which is sensitive to and reflects local constraints and concerns.</p> <p>The NPPF consultation was launched just prior to Christmas 2022 and will run until 2nd March, 2023. The Consultation states that the Standard Method for calculating the housing requirement (as used by West Berkshire for the regulation 19 version of the Local Plan) is not mandatory and should only be the starting point for local plan. There is a particular focus within the consultation on the character of an area when assessing how much housing can be accommodated. On the back of this announcement, the council has paused their plan making process whilst they await the outcome of the consultation on the basis that a lower housing requirement would be in the interests of the plans than the one currently being planned for. I believe that the council should take the opportunity, as others have done, and to bring forward a revised plan in line with updated planning guidance when this comes in later in 2023.</p> <p>Transport</p> <p>I am concerned as to the increased traffic through the villages of Upper Bucklebury, Chapel Row and Bradfield South that would result from the proposed significant development. I understand that there is a plan for an exit at the end of the road. This would be where the roads are inadequate, without pavements and have the potential for serious accidents.</p> <p>The Sustainability Appraisal (SA) / Strategic Environmental Assessment (SEA) which accompanies the Local Plan consultation is in breach of North East Thatcham against key Sustainability Objectives:</p> <p>Objective 4 is – To promote and maximise opportunities for all forms of safe and sustainable transport. The SEA makes a recommendation 'To Reduce Accidents and Improve Safety' Council Assessment - The policy is likely to have a Positive Impact on road safety. 'To increase opportunities for walking, cycling and use of public transport' Council Assessment - The policy is likely to have a significant impact on walking, cycling and public transport. The Local Plan is designed with these in mind.</p> <p>I question both of these council assessments, which seem to me to be self-evidently incorrect with regard to this proposal and the surrounding road infrastructure.</p> <p>Healthcare</p> <p>The North-East Thatcham development plan (SP17) proposes a 450 square metre primary healthcare facility with the intention that it will be offered to the Buckinghamshire, Oxfordshire and Berkshire West Integrated Care Board or other such appropriate body. There is a bereft of detail or insight into strategic healthcare planning.</p>

Proposals for a major development that is likely to have a significant health impact in relation to its size and location, for purpose Health Impact Assessment (HIA) in accordance with the current guidance from Public Health England. To how the proposals for development have been discussed with health service providers regarding impacts on primary care.

West Berkshire Council Local Plan Review Regulation 19 Objection
Representations relating to the proposed significant development in North East Thatcham

The development proposals should demonstrate how the conclusions of the HIA have been considered in the design. An unacceptable impact on the health and wellbeing of existing or new communities will not be permitted. It is of concern that neither WBC nor the developers, as public and private stakeholders respectively, appear to have an HIA specific to the proposed North-East Thatcham development. Tackling health and wellbeing requires a multi-agency approach. The Health and Wellbeing Strategy 2017-2020 2021-2030, has been developed by the Reading, West Berkshire and Wokingham Health Boards together with the Berkshire West Integrated Care Partnership. Developers are encouraged to engage with the Health Board at the earliest opportunity in order to determine the health care requirements associated with new development. It is of concern that there appears to have been no direct engagement between the North-East Thatcham Development Consortium and local GP practices. Few new GP practices are commissioned by NHS England, even where they consider there to be patient need. NHS Digital figures of patients registered in the NHS Berkshire West Clinical Commissioning Group (CCG) confirm a shortage of GPs in other areas of the country. There is therefore no realistic prospect of a new GP practice being established in Thatcham or West Berkshire in the future. The aim is to look to create efficiencies and economies of scale to make general practice more financially sustainable and to increase the number of services and primary healthcare professionals available on a single site. It would make no financial, organisational or clinical sense for a local GP practice to set up a branch surgery on the proposed new development because of the additional administration and encumbrance working across two sites. There has been no approach by WBC or the developers to any local GP practice to discuss an appropriate site, floor space or more practices could relocate. An enlarged primary healthcare site is required and might be better located close to the centre of the town to access and minimise traffic as the proposed North East Thatcham development is peripheral to the centre of the population. The site is supported by Thatcham Town Council but has not been suggested in the sustainability appraisal of site options. Local practices did not have input with the inadequate 450 square metre floor size proposal which they only discovered in the Sustainability Appraisal 2022, Appendix D. The proposed North-East Thatcham development site is covered by the existing practice boundaries of Thatcham Mill (East of Harts Hill Road), Burdwood Surgery (East of Harts Hill Road) and Chapel Row surgery (the whole area). All three practices are currently run by Thatcham doctors' surgeries run independently of each other, and their combined lists include approximately 27,800 patients per GP. Newly registered patients moving into housing developments tend to make a greater demand on GP services because of a higher maternity workload, less local extended family support and there is initially a higher housing turnover. One permanent and repeated temporary pharmacy closures in Thatcham have further exacerbated pressure on primary care. Private dental practices are unable to provide dental care for the whole population with a significant minority of patients needing to travel to private dental care. Thatcham Vision, endorsed by WBC in 2016, confirmed only 60% of residents were registered with a doctor outside Thatcham). There is no evidence provided that either WBC or the developers have approached any local dental practices regarding the potential workload resulting from additional housing. Reviewing the scant healthcare recommendations within the Thatcham Sustainability Appraisal 2022, Appendix D.

West Berkshire Council Local Plan Review Regulation 19 Objection
Representations relating to the proposed significant development in North East Thatcham

(David Lock and Associates) - Stage 2: Thatcham Present, paragraph 4.10 states: 'A dialogue with the relevant health care agencies should be established early in the master planning process to address concerns that social infrastructure may not be able to cope with the future report published in September 2020 includes no further detail except the outcome of a community representation that GP facilities are at capacity and suggesting a new health centre. In summary, WBC and the developers appear to have neither arranged a relevant HIA nor provided evidence of having consulted with health care agencies or providers. They are proposing a healthcare site that is unsuitable for NHS primary care and will not mitigate the burden that 1,500 or more new houses will make on a local NHS struggling to cope. The objective of the Development Consortium to improve access to the health service component of community infrastructure has not been met. There is no evidence for the provision of a viable primary care medical facility.

Environment
This is summarised into three main areas:

1. Collateral damage to the Bucklebury Plateau Biodiversity Opportunity Area and its ancient woodlands and heaths
2. Siting a major greenfield development in the broader landscape setting of the North Wessex Downs AONB that will impact on the open countryside by local communities;
3. Causing detrimental impacts to legally protected wildlife known to be present on the site but assuming that sufficient mitigation can be taken after development e.g. through the vague promise of a 'community park'.

A professional review on behalf of Bucklebury Parish Council of the background documentation provided by WBC in support of the development shows that there is no evidence to support claims that SP17 will have a positive impact on the environment. By contrast, there is every reason to believe it will have a significantly negative impact. For example, the WBC Sustainability Appraisal Charter is required to establish how 'policy requirements will be achieved' (including the legally required biodiversity objectives and overall positive impact on environmental sustainability). It maintains that the Charter 'will be informed by' various strategies (including on ecology). Yet, the strategy documents either do not exist or have not been made publicly available for the Regulation 19 process. Bucklebury Parish Council estimates that at least 4,000 people will be concentrated in the development site. They are proposing a space for recreation and general wellbeing. I do not believe that the claimed provisions for green space will satisfy the requirements. The original Thatcham Growth Plan had a vague proposal for two 'country parks' spaced across the top of the slope, in the Bucklebury Plateau Area, claiming the potential for significant biodiversity enhancement over its current land use. No details were provided. Bucklebury Parish Council's own feasibility study showed the complete lack of preparation for such country parks, not only in terms of and properly managed and funded to deliver that stated biodiversity enhancement. Now, in the updated SP17 text, the proposals have been downgraded to undefined 'community parks' which only proves how little commitment WBC has given to protecting the environment and the enjoyment of it. Since SP17 has no proven plans for providing adequate green space and protecting biodiversity, there will inevitably be a negative impact on adjacent areas. Indeed, the LPR states its intent to provide a high quality environment.

West Berkshire Council Local Plan Review Regulation 19 Objection
Representations relating to the proposed significant development in North East Thatcham

for SP17 to drive additional traffic (people and cars) into the AONB. It provides a green infrastructure network which will to 'facilitate connection to the AONB, and include leisure routes accessible to all users.'

Meanwhile, the management vision for Bucklebury Common is explicitly focused on not increasing human pressure on the site, working to restore and nurture. In fact, the LPR's own Sustainability Appraisal accepts that SP17 will have a negative impact on sustainability: 'The site is a greenfield site and therefore, would result in a negative impact on environmental sustainability, which will be mitigated.' But there is no detail whatsoever on any such mitigation measures: the assumption is simply that they will be considered in the planning application process.

However, the very same Sustainability Appraisal suggests that the SP17 policy is likely to have an overall positive impact on the environment, absurdly ignoring the environmental consequences in favour of social and economic benefits that are anyway highly likely to be realized. The overall thrust of the SP17 policy is clearly to build as many houses as possible in a small area of countryside, without regard to how the environment – human and natural – will be improved or, if not, mitigated. Despite all the money spent on commissioning plans and justify the 'growth' requirement, there is no evidence of any serious attempt to investigate, analyse and systemically test the assumptions. Everything will be all right because their own unsubstantiated policies say it will be.

Education - Schools Provision

The provision for education from Nursery, Early Years, through Infant to Secondary education is not clearly defined within the LPR. There is no coherent end-to-end plan: this therefore breaches the Council's obligations to provide education facilities for all children. Without this provision, the Plan for a large new housing development is untenable. The lack of a coherent Plan on Schools for the proposed developments also means that it is impossible to estimate the subsequent impact on traffic. The siting of a secondary school East of Thatcham would result in a significant increase in traffic across the whole Thatcham area, not considered in the LPR.

There are no details in the LPR of the provision for Nursery or Early Years education. Policy SP17 North East Thatcham merely states that 'the site will provide Early Years provision'. The provision for Primary school education is unclear and there is no evidence on the planned numbers of schools or Form Entry requirements. The LPR proposes that the sum of £12 million be made available to developers to primary education. However, with no recent data available (the only data referenced is from 2011), it is unclear if this is sufficient.

It also does not state the timing of this funding or school place provision. Clearly, schools need to be available before the start of the school year. The current situation for secondary school students from Bucklebury is that they have a choice of either The Downs or Kennet are in the catchment area for both. Where schools are oversubscribed those children who live nearer to the school are given priority so that children from the proposed North East Thatcham development would be able to opt for Kennet and those from Bucklebury to The Downs. The LPR is inconsistent, incomplete and contradictory on the provision of secondary schooling in and around Thatcham, which is in contradiction to the *Supporting documentation. It proposes that the sum of £15 million be contributed by the developer to fund a new West Berkshire Council Local Plan Review Regulation 19 Objection

Representations relating to the proposed significant development in North East Thatcham

The Thatcham North East development plan 2020, produced by David Locke Associates and Stantec on behalf of West Berkshire Council (Form Entry) secondary school, half-funded by developer contribution. Government guidelines are that Secondary Schools should be not sustainable. However, the Development Plan states that the North East Thatcham development (which proposed to fill a 6–8 FE school: Specifically :- 5.18 Provision of a new secondary school in North East Thatcham is an essential part of the town. However, the scale of growth proposed is not sufficient on its own to fill a 6-8FE secondary school. Secondary schools need to be of sufficient scale to make them sustainable and able to provide suitable facilities for the growing population. It is not feasible for a new school to be smaller than 6FE. With an apparent 40% reduction in the housing allocation in the 2020-2039 period, houses, a secondary school simply cannot be sustainable in this location. Earlier in this same Thatcham North East Development Plan that the education provision exercise was based on WBDC data on pupil yield from a study in 2011. Clearly, the use of eleven year old data is inadequate.

The Development Plan states: 4.83 This study has not engaged in a detailed demographic prediction and modelling exercise to assess the long-term educational demand across the town, and has not attempted to predict the long-term capacities of existing schools. The provision will be examined in more detail as any development comes forward. The LPR Review to 2039, Policy SP17 (Secondary school itself) will be provided for the development.

In summary, it is therefore clear that the plan for secondary school provision is 'unsound' :

- there is no satisfactory evidence of the number of pupils the school is to cater for;
- the location of a school is not clear;
- the number of Form Entries is not defined, but it is noted that anything less than a 6FE school is unsustainable;
- the timing of the funding is not clear; and
- there is no evidence that the proposed funding is sufficient to meet the Council's obligations to provide education.

West Berkshire Council, as an education authority, has a duty to make arrangements for suitable school provision. Funding for a school across all school years is not defined or evidenced in the LPR.

Sports Fields Provision

The LPR talks of the provision of sports fields. This raises two issues not answered in the LPR:

- Sports fields require flat ground. The only flat area of ground in the proposed site is that which is closest to the A4 road, most traffic fumes.
- There is no funding earmarked for these facilities.

Although unclear, the LPR appears to assume that the school playing fields would also be available as Sports Fields. If not, then the playing fields will not materialise. Additionally, many schools are reluctant to open their playing fields to the public for other concerns.

The objective of WBC and the North-East Thatcham Development Consortium to provide sports fields has not been met. There is no evidence for funding or for a suitable location.

3. Do you consider the Local Plan Review complies with the Duty to Co-operate?

- * Yes
- * No

Please give reasons for your answer

4. Proposed Changes

5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	
5. Independent Examination

<p>Please give reasons for your answer</p>	<p>I am writing to record my objections to the WBC LPR Regulation. I believe the plan to be unsound for the following reasons.</p> <ol style="list-style-type: none"> 1. The number of houses planned is too great for the existing and planned infrastructure. 2. The level of increased traffic will be very substantial and in particular will impact Upper Bucklebury. I live on Carbin and the level of hour traffic has increased considerably in recent years. Extra traffic will increase the danger particularly to cyclists and children on this country lane. 3. The evidence for adequate provision of increased GP and Dentistry services has not been demonstrated. 4. The proposed development will have a negative impact on the environment. In particular the fragile ecosystem of the area will not support the likely increase of footfall. 5. The plan for schooling is vague and lacking in detail and thus unsound.

<p>that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>I object to the plan as I find it unsound in relation to the Thatcham NE Development</p> <p>I do not believe Thatcham has the capacity to absorb a further 1500 houses (minimum). 2021 Census show population compared to Newbury's 33,841.</p> <p>Large scale developments are more difficult to deliver as illustrated by the delays at Sandford Park.</p> <p>Education</p> <p>I believe Newbury has three secondary schools to Thatcham's one, Newbury has ten primary schools to Thatcham's not just bricks and mortar they have to be staffed and established, more pressure on budgets and teacher shortages for the children of Thatcham</p> <p>Healthcare</p> <p>Thatcham has two doctors' surgeries to Newbury's three and there is no realistic prospect of a new GP practice being opened in Berkshire.</p> <p>Kennet Primary Care confirms that there is no plan in place to manage structural changes that would need to occur for this development. This development will not help struggling Primary Care provision in Thatcham.</p> <p>You would have to conclude that Newbury is far better placed to absorb large scale developments than Thatcham with the site at Donnington adjacent to Vodafone HQ, or even Grazeley Reading.</p> <p>In relation to topography of the proposed NE Development, it will not easily reduce car use and aid use of public transport. Impacts on the environment and green spaces between Thatcham and Upper Bucklebury.</p> <p>My fear is if it does go ahead we will see unrealistic promises from developers with underfunding by the authorities, and we will have to live with the consequences.</p>

Please give reasons for your answer	<p>I wish to strongly OBJECT to the building of an unnecessarily large number of houses on what is currently open space Upper Bucklebury and Thatcham.</p> <ul style="list-style-type: none"> • Thatcham has already grown beyond its sustainable limits, the open ended “at least 1500” new homes will leave the area in houses as developers wish to add. The more housing is crammed in, the more neighbourhood arguments will happen somewhere people want to live for along time, not tolerate until they can get something better, which this appears it will be. • Traffic in the area is already at a standstill around school times, with no senior school proposed for the site more children from outlying areas. More people will be trying to get to Newbury for work. Despite what the council want, public transport is not working for workers. • The dark skies of Upper Bucklebury are a treasure that should not be lost. The “Aurora Thatcham” is already a sulphur sky which thousands more street lights, even the less light polluting ones will just add to. • A small collection of trees is not a “country park” no matter how much marketing speak is applied to said trees, they will be lost from the open landscape. • If a roundabout onto Harts Hill road from the oversized development goes ahead. The road from Upper Bucklebury will become into a council made rat run to the M4. • Did the models for traffic, flooding and ecological impact account for homeowners adding in such things as plastic grass where their front garden used to be? Or using their cars for quick runs into Thatcham to get the shopping or takeaway? What percentage of housing extending with glass roofed buildings to add to the light pollution and again adding more solid roofs to the fields. <p>I see no benefit to the area for this mess of “shove them in and pack them tight” housing.</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need	

<p>and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I wish to object in the strongest terms to the proposed plan above as I find it unsound. Some of my objections are de</p> <p>1. The proposed development is situated on the side of a valley in the broader landscape setting of the North Wessex settlement boundary in an area of greenbelt land consisting of rolling hills and farmland. The development would be of viewpoints, most notably from the southern side of the valley and would change the overall vision of the area to a small town contained within a wider countryside context. Contrary to claims within SP17 that this will have a positive believe that it will have a significant and irreversible negative impact.</p> <p>2. If the proposed development were to proceed the gap between it and the village of Upper Bucklebury and the bou negligible and insufficient. Upper Bucklebury would effectively join Thatcham thereby losing its identity and seriously compromising the rural as At the time of the AONB boundary being set it had to meet several criteria set by Government. Several of these, inc and wildness would be completely compromised if the existing 'buffer zone' was eroded.</p> <p>3. It is of particular concern that SP17 has no proven plans for providing adequate green space and protecting biodi intent for SP17 to drive additional traffic (people and cars) into the AONB. This is the absolute opposite of the manag Common which is explicitly focused on not increasing human pressure on the fragile ecosystems they are working to The LPR's own sustainability appraisal accepts that SP17 will have a negative impact on environmental sustainability b measures which would be taken. Ironically the same sustainability appraisal suggests that the SP 17 policy is likely to have an overall positive impact on all the environmental consequences in favour of some highly questionable social and economic benefits. Given the i sustainability appraisal one has to question whether it has any credibility whatsoever and ask whether the whole app more competent body.</p> <p>4. Bucklebury Vision and the Bucklebury Plan are documents approved and agreed with West Berks Council. Despite th 'supplementary planning consideration' they do not appear to have been taken into consideration. The section within Bucklebury Vision, Highways, Communication and Traffic is particularly relevant. <i>The parish roads have been established over the years for access, service and communication between the numerous l consist entirely of unclassified roads (rural roads), mostly without pavements or kerbstones, upgraded from gravel tra structure. The 14 miles of tarmac lanes - all single carriageway or single track, with few passing places, are generall with hedgerows or soft verge edges, many subject to flooding and only really suitable for local traffic.</i></p>

	<p>1500 - 2500 extra properties would result in a large volume of extra traffic not just on all of the main roads but also the surrounding villages. WBC documentation does not address this. Country lanes are known to be the most dangerous roads that any increase in traffic is going to make them even more hazardous for motorists and non-motorists alike. This is addressed in the Transport Plan 2011 - 2026 'Active Travel Strategy' and more especially with the Bucklebury Quiet Lane Scheme which is supported by local residents.</p> <p>The issue of the inevitable increase of traffic on the wider network of country roads and the need to look at road safety is addressed in SP17.</p> <p>5. I have a particular concern with the traffic that will travel up Harts Hill and into Upper Bucklebury. Since the introduction of the chicanes in Broad Lane, Upper Bucklebury there has been a significant increase in traffic on the single carriageway country lane with no pavement and with a dangerous 90 degree bend, as a means of avoiding the chicanes in Broad Lane at busy times of the day. Residents have tried to protect verges from being driven over by using markers in an attempt to keep vehicles on the actual road. Any further increase in road movements in the area would have a serious impact both for motorists and for pedestrians. Ironically Byles Green is part of the WBC Quiet Lane Scheme.</p> <p>SP17 does not address this nor am I aware of any assessment having been carried out.</p> <p>6. The proposed site for Thatcham NE Development and Bucklebury Common is home to many species of wildlife and some are increasingly rare. I find it abhorrent that there is no plan to protect our rapidly decreasing and increasingly precious wildlife to mitigation measures that would be taken after the development has been completed. It is environmentally irresponsible far as I am aware there have been no strategy documents relating to the ecology of the site published by WBC. If there is any attach to ecology I can take no reassurance from promises of mitigation!</p> <p>In addition there is already a problem with off-roading, litter and fly tipping and any increase in motor vehicles on the site is a 'playground' rather than a place for quiet enjoyment and appreciation will be to the detriment of its fragile ecosystem.</p> <p>7. I have limited my comments to some of the impacts of the proposed development on Upper Bucklebury where I live. The impacts are also huge and damaging for that community. The proposal is over development of Thatcham which currently struggles. There is insufficient parking for the town and schools and doctors surgeries are over stretched. The railway station area with limited parking and almost full train services at peak times. Flooding is an on-going issue and building on the site will massively increase the risk of heavy rain overwhelming the drainage system to an even greater degree than occurred in Thatcham' report written by Sue Everett, an independent consultant ecologist, said that it would be "utter madness" to build in a climate change means that once 1 in 100 years events are happening far more frequently and it would be irresponsible to take a known risk.</p>

Please give reasons for your answer

I am writing further with regard to the Local Plan Review as above on account of the apparent failure of the Council Government (re- think) planning guidance to avoid the provision of housing development on areas of greenfield/AONB required/earmarked by the Local Plan to be built over the plan period.

As a resident of Upper Bucklebury, I find it incomprehensible and deeply disturbing that a proposal such as above is to dump such a large provision of housing in this in-appropriate green-field location with the consequential and obvious not only on the residents of Thatcham itself but also on the neighbouring villages in the near and wider surrounding rural Natural Beauty

- Over the years, Thatcham has suffered from an ongoing and exponential expansion in housing development so indistinct suburb of Greater Reading with individual villages vanishing in a swamp of continuous ribbon development and Thatcham Relief Road (Floral Way) developments were granted planning consent, it was argued and understood that this road would become the boundary for any future Green Belt development northwards (once and for all). but this requirement(?) has been conveniently put aside.
- So much for previous promises!
- Now we are confronted with the development of 1500 houses just a few years later, thus setting a further precedent for 2,500 and exponentially who knows - another 1000 or more, as time moves on, as a convenient dumping ground.
- An Overwhelming Majority of residents do not wish to see **any** housing allocated to this site, which will destroy the character of this very special AONB area, being situated right next to Bucklebury Common.
- They are concerned at the wider adverse implications likely to result from an apparent planned over provision in the Local Plan, which puts pressure on the Council to unreasonably allocate development to greenfield land (not by Government) in a very sensitive area such as this.
- An escarpment of urban housing sprawl will emerge like a fan over this quiet rural part of AONB countryside – overdevelopment in any one location, let alone this one, planned over quiet farming land which neither warrants nor justifies housing development what-so-ever– pure vandalism, and which if proceeded with, on account of the steep gradient visible from the A4/Thatcham/Kennet valley area below and a permanent eye sore to perpetuity on this landscape – an unnecessary desecration of this beautiful part of rural West Berkshire.
- The Government has stated that it does not wish to see over-development in the south east, or on Green Field Land.
- The requirement for additional housing numbers contained within the West Berks Plan should be based on local based numbers game arbitrarily mandated allocation from central government, apparently now signalled.
- The Local Authority has a duty of care to concentrate the location of housing need on brown/ semi brown field less controversially sensitive **non** AONB locations. It would be arrogant, undemocratic and political suicide in the Local Authority to plough on with the current proposals, regardless, in the face of virtual 100% local opposition as currently the result of the Governments current dithering and changing/emerging policy advice on residential planning and a decision to allocate housing to this site in the first place.
- In view of the above, it is reported that many other Local Authorities are staying, amending or scrapping their plans from the Government on extending the plan period. In view of the re-think required in regard to the NE Thatcham the same and establish alternative locations for the perceived NE Thatcham allocation of their draft Plan. That is

Apart from this, Thatcham and its surrounding areas are unable to take any further such sized development in the context of its amenities.

The argument made for the construction of the Floral Way relief road was to take pressure off the A4 and Central Thatcham up-grading of this infrastructure likely to be required to provide for the increased traffic emanating from the proposed roundabout and Harts Hill Road round-about will be constantly grid locked.

Notwithstanding, as currently planned, that provision for access directly on to Floral Way from the proposed development on Harts Hill Road from the planned NE entrance to the development at the top of the hill will exacerbate the traffic congestion on this steep and windy road.

Any traffic survey undertaken must take account of the fact that Harts Hill Road has become an overflow shortcut for traffic from Upper Bucklebury/Southend Bradfield as well as to the A34/M4 via Cold Ash/Hermitage in order to avoid using the old

The build up of traffic using Broad Lane and the Avenue of Oaks has increasingly become a rat run, with vehicles travelling the edge of Bucklebury Common, creating serious danger to walkers and their dogs as well as cyclists, adjacent to the danger will be substantially increased by the vastly increased volume of vehicles emanating from the development s

Traffic build up and lack of parking facilities within the town centre are a major concern as existing, without the addition of additional vehicles from the proposed development.

The A4 can hardly handle the existing traffic flow around Thatcham as now, let alone being able to cope with this increased location.

The main Station carpark for Commuters is usually full at normal working times without any further parking provision entrance thereto squeezed alongside the Level Crossing making it almost impossible to manoeuvre around in the full stationary with the main road continually blocked when the gates are down to accommodate passing trains, This area can cope, thus creating a no go area in peak times. That is the current position. With the addition of a further 2,500 vehicles from the development as planned, the added pressure will render this area simply unable to cope.

At the same time, the build up of traffic at the Level Crossing (Bridge proposal seemingly now abandoned), gets worse and un-acceptable. With further trains and further traffic build up, it will be virtually impossible to cross from the north to the south in a reasonably timely manner on what is a crucial route south (despite what Town Planner David Lock has previously said is a time bomb, requiring serious resolution now.

All this is in addition to the adverse impact that the additional traffic generated from the proposal will have on wider local roads referred to above.

Regardless of the extraordinary decision to allocate housing as above to this location in the first place, neither the current nor their likely increase, seem to have been addressed in any comprehensible way in the proposed Plan – (? on the basis of the day!')

Unfortunately, it won't, on account of the many obvious unsolvable difficulties requiring resolution.

Before any further abortive and wasteful work is undertaken on the current Plan, a full detailed **third party** Infrastructure (transport, movement, healthcare, schools and environment)) across the relevant and outlying area affected, covering Thatcham and the A4 should be undertaken to assess the practical viability of the Plan proposals within the context of the current additional pressure resulting from the Plan proposals.

The proposals for NE Thatcham as set out in the local draft Plan should be scrapped.

Please register my personal objections to these proposals as contained in the West Berkshire Plan.

<p>Please give reasons for your answer</p>	<p>I am writing to object to the planned development in northeast Thatcham as I found this unsound. As a long term resident of Thatcham, I am concerned about this development for a variety of reasons:</p> <p>Local infrastructure</p> <p>My concern is that the local Thatcham infrastructure will be unable to cope with this development. The sewerage works will not cope with another 1500-2500 properties, so potentially another 4,000 people's waste! The local drainage system is already at capacity and our local park floods constantly in periods of heavy rain, despite the flood alleviation works which have been undertaken.</p> <p>The impact on the local roads will be horrendous. There are already queues, not just at peak times, which will only get worse and create jams, not only on the A4 but on other, smaller local roads, such as Coxs Lane and Harts Hill road.</p> <p>As a local resident, I spend a lot of time walking my dog through the area which is suggested for development. This is an AONB and also several SSSIs. How can this development possibly be good for the local environment? Could you please confirm what works have been undertaken with, for example the Environment Agency and CPRE?</p> <p>I see that WBC have recently rejected a development between Thatcham and Cold Ash stating that 'building in a green belt area between Cold Ash should not be permitted'. Keeping this area free of development is vital so as to maintain the green belt between them and Thatcham. This development not permitted but you are supporting a massive development which will virtually link Thatcham to Basingstoke about the green belt between them and Thatcham?</p> <p>Flooding</p> <p>We were seriously impacted by the floods in 2007 and I am deeply concerned about the impact this new development will have. Please can you confirm what Thames Water's view of this development is? During periods of heavy rain there is concern about flooding despite the apparent 'flood alleviation' works which have been completed. I think the impact on both the local houses and the Kennet and Avon canal, and the river Kennet will be highly detrimental. Have studies been completed into the environmental impact of the courses?</p> <p>I hope my concerns will be taken into account when considering this proposal and that common sense prevails and the development will be declined.</p>

Please give reasons for your answer	<p>I have studied the proposed development in North East Thatcham and strongly feel that this has been badly thought out for the parishes around the proposed development and as such should not be given the approval, and that the plan should be rejected.</p> <p>Specifically, there is no adequate transport plan which would not seriously impact the local area. Floral Way and the proposed development would doubtless funnel traffic towards Harts Hill Road and the proposed exit from the development would doubtless funnel traffic towards Harts Hill Road and subside. Not only will this negatively impact the residents of this village, but the roads up the hill and through the Cold Ash are not suitable for any increased traffic. They are already unsafe and any additional vehicles would only exacerbate this situation. This is in addition to the negative impact on the residents of the village through noise pollution and air quality deterioration.</p> <p>Furthermore the plan does not seem to adequately address the educational and health issue which would arise. Many practices in Berkshire already have problems recruiting GPs and many rely on locums. Furthermore some of the practices which have closed these down recently as they were not financially viable. Also I don't believe a Health Impact Assessment (HIA) undertaken with multi agency input.</p> <p>Finally as regards schooling the two existing secondary facilities (Kennet and Downs) are very busy and it will be hard to accommodate more of students without severely impacting class sizes. The provision of a new school, on the proposed development does not follow the guidelines. There is no satisfactory evidence of the number of pupils the school is to cater for; the number of Form Entries is not defined, but it is noted that anything less than a 6FE school is unsustainable;</p> <p>I have not mentioned the extremely negative environmental impact which this development will have.</p> <p>I strongly urge you to reject the proposal to build these houses and also would ask you to immediately pause the plan until an alternative which has been properly thought out and which addresses the above-mentioned issues.</p>

<p>Please give reasons for your answer</p>	<p>I would like to register my objection to this proposal on the following grounds:- The local roads around Thatcham barely cope with the existing traffic at peak flow times. The level crossing at Thatcham is regularly heavily congested and there is no suggestion of a bridge to mitigate this. Bucklebury Common is an important site for conservation, its ancient woodlands and heathlands must be protected. addition of at least 1500 houses at the bottom of Harts Hill will inevitably mean very many more people on the Common motorcycling which will erode the landscape and harm protected wildlife. The existing schools will not be able to cope with the increase in population and there is not a clear provision for new plan review. There is no evident provision for a sufficient medical facility for the extra adults and children. This development will destroy a valuable part of the local countryside and alternative sites should be found to build t</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? -	

<p>Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>There will be increased traffic through Upper Bucklebury and Chapel Row and a problem at the junction on the Pangbourn road. The developer proposed a new roundabout on the narrow Harts Hill road to allow traffic in and out of the northern end of the development. This is a narrow road; Harts Hill; this will cause additional congestion on the A4. Cold Ash will see a large flow of traffic going towards Chiseldon. The road is narrow and many do not have pavements; cycling would not be safe.</p> <p>There is insufficient capacity at Kennet school (oversubscribed) and no other plan has been made. School provision for the development and facilities on such a gradient have not been costed.</p> <p>On Wildlife: Bucklebury common would be subjected to an increased number of visitors and the delicate ecosystem would be damaged. There is no evidence of or any strategy for increased biodiversity. A "country park" mentioned in the plan does not meet the criteria. The three small areas inside the settlement boundary are not of any proper environmental value, some "wildflower meadows", nightjars or great crested newts.</p> <p>The strategic gap between Thatcham and Bucklebury; Upper Bucklebury will lose its identity when Thatcham and Bucklebury are developed. The developer in Cold Ash has just been refused permission for this reason.</p> <p>Medical provision: additional GP surgeries are not part of the NHS strategy for the future. No local surgeries have been identified. A surgery of 450 square metres as suggested.</p> <p>Number of houses: Initially 2500 houses were to be built in total, 1250 in the plan period. This has now been increased to 3000. Any mitigation of the impact of the development should be largely completed before sales however what normally happens is that due to poverty and delays this work until the site is largely complete. The developer will wish to utilise the area originally designated for 1000 after this LPR plan period finishes.</p> <p>This LPR is unsound for the reasons stated above.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	

<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am objecting to the plan as I find it unsound. The following reasons apply:</p> <p>Healthcare Provision Proposals for a major development that is likely to have a significant impact in relation to its size and location, should purpose Health Impact Assessment (HIA) in accordance with the current guidance from Public Health England. It is Berkshire Council nor the developers, as public and private stakeholders respectively, appear to have arranged or put to the proposed North-East Thatcham development.</p> <p>Schools Provision The provision for education from Nursery / Early Years , through Infant and Primary to Secondary education is not clear in the Local Plan Review (LPR). There is no coherent end-to-end plan: this therefore breaches the Council's obligations to provide education. Without this provision, the Plan for a large housing development is untenable. West Berkshire Council, as an education authority, has a duty to make arrangements for suitable school provision. How this provision across all school years is not defined or evidenced in the LPR.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>

<p>development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>Traffic - the development will probably attract in the region of 2,000 or more cars to the area. If they travel west towards Heath Lane and Bowling Green Road at the junctions with Cold ash Hill and Northfield Road there will be congestion on both Heath Lane and Bowling Green Road at the junctions. The proposed development to be developed into a dual carriageway and the addition of traffic lights will only cause further congestion. Current parking provision at Thatcham could not accommodate such an increase in parking needs.</p> <p>Primary Health Care - As there are fewer GP's in the UK than in 2015 the possibility of a viable primary care medical centre is limited.</p> <p>Schools - Currently local schools and nurseries are not in a position to absorb additional children. There is also a number of proposed develop plans are unclear as to provision of both primary and secondary.</p> <p>Sports facilities - There is no evidence of funding or a suitable location in the planning application.</p> <p>I therefore consider the planning application unsound.</p>

Please give reasons for your answer	I have lived in Bucklebury for the last <redacted> years and have been a <redacted> for the last <redacted> years. I impact this proposal will have on the local area. My objections are as follows: It was made plain when we did our parish plan that Bucklebury residents very much appreciate the rural feeling of the neighbourhood. This proposal will destroy that feeling. It has always been important to have a strategic gap between the more rural settlement of Bucklebury and the more urban settlement of Thatcham, and building 1500 houses between them will mean that that separator

	<p>The proposed housing is on the edge of the North Wessex Downs AONB and very close to the fragile ecology of the area with its ancient trees, rare heathland habitats and the flora and fauna which flourish there. The increase in traffic and households will put all this under threat.</p> <p>I am concerned about the impact of traffic on our roads, as cars drivers try to avoid traffic jams on the A4 and use the A33 and beyond to get to their destination. Harts Hill is a dangerous hilly road with many bends, and a new roundabout will make it more dangerous. There is no plan to build a bridge over the railway at Thatcham where currently there can be a bridge which will only get worse with all these extra houses. I understand there have been other housing proposals south of Thatcham building this bridge, and yet these have not been properly considered by WBC. Why?</p> <p>The original plan was to build 2500 houses, this has now been reduced to 1500 but in a shorter time scale, and yet the plan is still the same, so the assumption must be that further housing will be proposed at a later date.</p> <p>I am very concerned about the impact on our medical facilities and dental surgeries, all of which are at full capacity before the Impact Assessment does not seem to have been undertaken by the council or the developers, nor does there seem to be any local GP practices. There is a great shortage of GPs, particularly in the south east and it is a mystery how any new ones are staffed. The same is true of dental surgeries.</p> <p>Schooling is another concern. The LPR is unclear on how and where primary and secondary education will be provided for housing development.</p> <p>Finally, why has WBC gone straight ahead with this proposal whilst government guidelines on the need to provide nurseries? Surely the council should have delayed their proposal until the government position is clearer.</p> <p>For all these reasons, I believe that this concentration of housing in this area is wrong and the plan is unsound in view of the rural nature of Bucklebury will be lost forever by this mistaken and poorly researched proposal. I would also like to know if the developers have not been considered in more depth.</p>

<p>Please give reasons for your answer</p>	<p><u>I write to register my objection under the Regulation 19 Consultation Option for the proposed development Buckleberry, Berkshire.</u></p> <p>I have outlined my objections below for your attention:</p> <p>Over development</p> <ul style="list-style-type: none"> The area is already heavily developed, and CRoW applications from landowners further prevent the enjoyment of the site south of the A4 bordering Midgham is already a site of considerable noise, traffic, pollution and litter. Increased development will contribute further to this. <p>Traffic</p> <ul style="list-style-type: none"> The A4 itself between Thatcham and Pangbourne is already prone to flooding during small bouts of rain. Congestion would clearly lead to standstill traffic, increase risk of accidents and an impassable area for pedestrians and cyclists. The road is increasingly busy with antisocial driving: https://blog.passmefast.co.uk/on-the-road/top-10-britains-most-dangerous-roads/ A4 rated as the 3rd most dangerous road in the UK. Regular decibel levels over 100db experienced in nearby housing from performance exhausts and harsh acceleration to reduce speed limits https://www.newburytoday.co.uk/news/bid-to-lower-a4-speed-limit-between-newbury-and-thatcham-passes-first-time/ Cut through via Harts Hill to Buckleberry/Pangbourne – the road cannot sustain the traffic levels, this is seen by the road surface. Train track access/ heavily industrialised area – the single carriage rail bridge at Midgham is a frequent sticking point. A large number without additional development would see increased blockages <p>Lack of private space</p> <ul style="list-style-type: none"> The increased density of population would directly impact the private spaces enjoyed by existing residents. <p>Disturbance of the landscape</p> <ul style="list-style-type: none"> The green space surrounding upper Buckleberry deserves conservation. Out with the Thatcham attenuation ponds, the flood relief scheme ensures the area retains its identity and charm. The contours of the land contribute to this, significant development would ensure a scheme such that flood risk is now effectively managed. Large scale manipulation of this landscape would certainly be detrimental by the flood relief scheme, once again putting the town at risk. <p>Biodiversity</p> <ul style="list-style-type: none"> Loss of important trees and vegetation - massive carbon footprint, loss of habitat for the Hazel Dormouse (endangered) and several red listed bird species https://www.gov.uk/government/publications/wild-birds-licence-to-kill-or-take-for-conservation-purposes-gl40/lis There has been deliberate misrepresentation of claims that development will somehow enhance biodiversity; a large carbon footprint will directly impact hedgehogs, foxes, rabbits, deer including the huge carbon footprint of the building work itself. This will remove Thatcham the opportunity to experience natural greenspace in both their education and upbringing. <p>Loss Of village Identity</p> <ul style="list-style-type: none"> Despite efforts to the contrary, crime rates in Thatcham are on the rise and effective prosecutions have decreased. Thatcham exceeds its neighbour, Newbury. Extending and connecting the town of Thatcham to Upper Buckleberry would increase the crime rate into a rural areas, creating increased incidents of opportunistic crime as well as adding camouflage to those areas. Offences, trafficking and the handling of stolen goods through broad lane and Bradfield South End as reflected in the statistics and exit points of this route. <p>Social Infrastructure</p> <ul style="list-style-type: none"> Number of GPs – no of people 3:26500 with number already exceeding the 1:1000 GP/patient ratio recommended Number of schools- there are 5 schools in Thatcham, Kennet School has 1850 pupils already causing difficult access and considerable traffic buildup in peak times and limiting the prospects of children raised locally. Veterinary practices – not taking on additional clients, only 2 in Thatcham, already have to travel out for treatment Insurance valuations will increase, disturbance to the existing landscape will likely affect the stability of current valuations Property valuations will decrease Shops – already shortages, local shops couldn't sustain the increased population leading to more traffic in and out of the town <p>Please ensure these aspects are considered along with the general public's numerous other objections to the proposed development.</p>

Please give reasons for your answer	Please see accompanying statement for our full representations. In summary, it is considered that the housing delivery of 1,500 dwellings at NE Thatcham during the plan period is required to justify the allocation, particularly given the reduction to 1,500 new homes and the potential lack of deliverability. The market evidence demonstrates that for schemes of 1,500 dwellings, the lead-in time from validation of an application is approximately 7 years and a realistic average annual build out rate is c.100-120 dpa. Extract from full representation relevant to consultation point: <u>The justification for NE Thatcham</u> The supporting evidence base for NE Thatcham - including the Thatcham Strategic Growth Study (which includes a site allocation for the delivery of 2,500 homes and has not been updated to reflect the position in the current version of the LPR. This work which tested 2,300-2,500 new homes. This work would need to be updated for any Plan to be found sound. There is also some uncertainty whether the Council is actually proposing additional housing at NE Thatcham beyond the current base still refers to 2,500 new homes and the site allocation boundary remains the same. Furthermore, the evidence in the 'Strategic Vision 2050' in accordance with paragraph 22 of the Framework (requiring local plans to look beyond the plan period for larger scale developments). However, the LPR includes no reference to this strategic vision. The site allocation policy also still refers to the delivery of the secondary school. However, there is no updated viability evidence deliverable for a site of 1,500 new homes in total. This raises the following concerns: <ul style="list-style-type: none"> • The Thatcham Growth Study (Stage 3) acknowledges that strategic development at this scale (i.e. 2,500 new homes) is likely to deliver an additional secondary school for the town, without which any growth would cause issues in terms of school development on its own and, therefore, is only half-funded by developer contribution. A reduction to 1,500 new homes to increase this funding gap further, with no indication of how this will be resolved. • A secondary school would internalise a significant number of trips from the proposed development. Indeed, the evidence for NE Thatcham in the Thatcham Growth Study (Stage 3) assumes that the secondary school will have 50% internal trips marks over the potential delivery of a secondary school for a site of 1,500 new homes, the sustainability credentials are poor. As a result, the identification of NE Thatcham is not potentially justified as there is a distinct lack of evidence to support the delivery of 1,500 new homes and consideration of other reasonable alternatives. In particular, the lack of delivery of a secondary school and housing numbers would take away the key justification for growth at this location to help deliver new education provision and infrastructure. The SA/SEA, at Appendix 4, acknowledges this but the Council still proceed on this basis as it is considered that Thatcham is too many.
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	
Please give reasons for your answer	
4. Proposed Changes	Please see accompanying statement for our full representations. The justification for the allocation of NE Thatcham is questioned. Notwithstanding this, the timescales and annual rate of completions appears overly optimistic. As a result, it is considered that the delivering completions from 2031/32 at 120 dpa will not meet the need for dwellings over the plan period from NE Thatcham. <Full response attached>
5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)? * Yes * No	Yes
5. Independent Examination	We wish to appear at the examination to present our evidence and technical information to support these representations
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	Yes
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	Yes

6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No	Yes

2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by	

<p>the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>I wish to make a formal objection to the above proposed development on the basis that there are components of the</p> <p>Transport: Only at a unacceptably late stage was it announced that there would be an exit from the proposed development giving adequate details of design. This will cause a significant proportion of traffic (not least that proceeding to an exit to proceed along the B class road from Burdens Heath to the Ridge, Cold Ash. This road does not have pavement with potential for serious accidents, contrary to the SEA Objective 4 and WBC assessment "The policy is likely to have The Ridge is the site of St Finians School a major bottleneck with parents' vehicles in the mornings and afternoons at St Marks school parking close to the Ridge/ Hermitage Road cross roads. Any additional traffic will create even greater at these sites. In addition, a proportion of traffic to and from all proposed exits to the development is bound to use Cold Ash to Hermitage Road past St Marks and Downe House schools which is already used as a rat run to and from attempting to avoid going through Thatcham and Newbury. There are already serious problems at these sites which proposed development and no mention is made of how these will be alleviated, far less acknowledged or included in I personally will be detrimentally affected by the increased traffic on <readacted> on which I am dependent for access further extended delays at busy periods with traffic stationary at calming shikanes.</p> <p>Healthcare</p> <p>The document is singularly lacking in how additional healthcare is to be provided and there is no evidence of a competence required by Public Health England. I question why this is the case and gives me concern that this and other related in a proper and professional manner. I am already directly, detrimentally affected as a senior old age pensioner having appointments for medical and dental care and the reducing pharmacy facilities in the area. A partner of one of the exist is on record citing the difficulties in filling existing GP vacancies far less manning additional surgeries in the area. The the developers have liaised with local medical providers to assess how the increased demands for healthcare will be met</p> <p>Environment</p> <p>The proposed site is on a hillside which is the prominent natural feature leading from the A4 to the AONB and Bucklebury protected areas, and is proposed to be converted into a massive built up area. As a green field site WBC have recognised that the proposed development" will have a negative impact on environmental sustainability which will have to be mitigated. Evidence given as to how this mitigation will be achieved eg where is the detail of the Sustainability Charter that WBC again question the competence of WBC who appear to be driven by the requirement for development and have prescriptive investigative analysis to address the resulting environmental impact. While lip service has been paid to what has been "community parks" no professional judgement has been given of their nature or how they will increase environmental sustainability. As a volunteer on a number of environmental conservation projects for organisations such as the Environment Councils I am well aware of the factors necessary to maintain and create such factors and the proposed plans for development their omission. It should be noted that the proposal is to build a large housing estate around an operating crematorium. WBC would be so favourably disposed to an application to build a crematorium in the midst of a large housing estate</p>

<p>Please give reasons for your answer</p>	<p>I would like to register a number of concerns I have about WBC's plans for the development of 2,500 houses (or is it number does make a significant difference to the extra healthcare and education requirements of the area.) My prime concern is about the extra traffic that will be using Harts Hill Road. This is already one of the most dangerous, twisty and insufficiently wide to accommodate the heavy lorries, vans and school buses, not to mention the toiling cyclists that frequent it. On top of which, it is on occasions quite icy. Encouraging extra traffic to use this route is, quite simply, a bad idea. Then there is the long straight stretch between Upper Bucklebury and Chapel Row. This is already used as a speed trap day and (especially) by night. Since many of the new houses will be relying on the Chapel Row surgery for their GP, speed restrictions to be installed on this stretch of road.</p> <p>And then there is the environmental issue. Already it is clear that WBC cannot cope with the waste that is casually dumped on these routes (or, indeed, along all routes in the county, as far as I can see). This is not only a risk to the wildlife that frequents these routes and other parts of the nearby AONB, it is also an eyesore that is a disgrace to the community that allows it. What happens to the Community Sentences who used to pick up litter? The NE Thatcham development can only increase the roadside gull problem, especially if buses will be shipping the development's secondary school students to the Downs School in Compton in their capacity.</p> <p>Please feel free to contact me about any of these issues if it would be useful.</p>

<p>* No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing in relation to the West Berkshire Local Plan Review 2022 – 2039 and the plan to decimate our natural / built environment with 1,500 and 2,500 houses in North East Thatcham. I pay my taxes and I am registered voter. I believe the plan will directly affect my address due to the proximity of the proposed development to my home – less than 1 mile. I believe that as a small town, that Thatcham does not have the necessary infrastructure to support this many houses including care medical facilities, a nearby acute hospital, education facilities – both primary and secondary schools, roads and public transport to my current address due to its quietness and because it is a good place to bring up my child/raise a family. With an additional 2,000 houses in Hungerford Town bolted onto the side of Thatcham, I believe this will have a hugely detrimental effect on the quality of life for those who live nearby. I also think it's odd how the Council often refuse trivial planning permission requests, as reported in Newbury Today refuse to seek to approve plans that will have a devastating impact on the local Countryside. Part of the attraction of Thatcham is its countryside, with a relatively low crime rate compared to more urbanised areas, yet the Council seeks to create a massive crime that an influx of people will cause. Health Impact Assessment – I do not believe that West Berkshire Council or developers appear to have arranged or commissioned an impact assessment specific to the proposed North-East Thatcham development. What is the plan for primary care (GP surgery, hospital), nursing homes and palliative care? Schools provision – Pre-secondary School Provision The provision for education from Nursery /Early Years through infant and primary to secondary education not clearly outlined in the Review. There is no coherent end-to-end plan: this therefore breaches the Council's obligations and duty of care to provide for children. There are no details in the plan of the provision for nursery / early years education. The provision of primary education is contradictory. Secondary Education Provision It is clear that the plan for the secondary school provision is unsound. • There is no satisfactory evidence of the number of pupils the school is to cater for • The location of the school is not clear • The number of form entries is not clear • The timing of funding is not clear • No evidence of that the proposed funding is sufficient West Berkshire Council, as an education authority has a duty to make arrangements for suitable schools provision both in the LPR. Sports field provision West Berkshire Council and your development consortium have not met objective to provide sports fields and you have not provided funding or a suitable location. Supermarkets – Town Centre Redevelopment / Road infrastructure Where is the infrastructure to support this development in terms of Supermarkets and Shops? Thatcham Town Centre is significantly overburdened by an additional 2500 houses. I'd also like to understand what the Council's plan is for the roads as this is clogged with Traffic all the time and through the winter there are always giant potholes. This might seem like a small issue but you it's not for many people who have to pay for vehicle repairs. I can therefore envisage that an increased volume of traffic will cause issues. I'd like to formally lodge this objection to the Proposed NE Thatcham Development under Regulation 19.</p>

<p>Please give reasons for your answer</p>	<p>Please see accompanying statement for our full representations.</p> <p>In summary, it is considered that the housing delivery of 1,500 dwellings at NE Thatcham during the plan period is questionable. It is not clear what evidence is required to justify the allocation, particularly given the reduction to 1,500 new homes and the potential lack of delivery. The market evidence demonstrates that for schemes of 1,500 dwellings, the lead-in time from validation of an application to completion is approximately 7 years and a realistic average annual build out rate is c.100-120 dpa.</p> <p><i>Extract of full response relevant to consultation point</i></p> <p><u>North East Thatcham (as allocated at Policies SP13 and SP17)</u></p> <p>The Council has reduced the delivery of NE Thatcham from a total of 2,500 dwellings to 1,500 dwellings. Notwithstanding this, the Council states that NE Thatcham will deliver 1,500 homes over the plan period (compared to 1,250 dwellings expected at the Regulated period). As discussed below, this appears to be unjustified.</p> <p><u>The justification for NE Thatcham</u></p> <p>The supporting evidence base for NE Thatcham - including the Thatcham Strategic Growth Study (which includes a reference to the delivery of 2,500 homes and has not been updated to reflect the position in the current version of the Local Plan Review Testing which tested 2,300-2,500 new homes. This work would need to be updated for any Plan to be found sound.</p> <p>There is also some uncertainty whether the Council is actually proposing additional housing at NE Thatcham beyond the current allocation. The evidence base still refers to 2,500 new homes and the site allocation boundary remains the same. Furthermore, the evidence base does not refer to the Strategic Vision 2050 in accordance with paragraph 22 of the Framework (requiring local plans to look beyond the plan period for larger scale developments). However, the LPR includes no reference to this strategic vision.</p> <p>The site allocation policy also still refers to the delivery of the secondary school. However, there is no updated viability assessment for a site of 1,500 new homes in total. This raises the following concerns:</p> <ul style="list-style-type: none"> • The Thatcham Growth Study (Stage 3) acknowledges that strategic development at this scale (i.e. 2,500 new homes) is likely to deliver an additional secondary school for the town, without which any growth would cause issues in terms of school provision. • Again, the Thatcham Growth Study (Stage 3) notes that the scale of development (i.e. 2,500 new homes) would necessitate a secondary school development on its own and, therefore, is only half-funded by developer contribution. A reduction to 1,500 homes would increase this funding gap further, with no indication of how this additional funding will be resolved. • A secondary school would internalise a significant number of trips from the proposed development. Indeed, the evidence base for NE Thatcham in the Thatcham Growth Study (Stage 3) assumes that the secondary school will have 50% internal trips. This marks over the potential delivery of a secondary school for a site of 1,500 new homes, the sustainability credentials of the site. <p>As a result, the identification of NE Thatcham is not potentially justified as there is a distinct lack of evidence to support the allocation for 1,500 new homes and consideration of other reasonable alternatives. In particular, the lack of delivery of a secondary school over the plan period and the reduction in housing numbers would take away the key justification for growth at this location to help deliver new education provision and infrastructure. The SA/SEA, at Appendix 4, acknowledges this but the Council still proceed on this basis as it is considered that the number of NE Thatcham is too many.</p> <p><Accompanying statement attached></p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	<p>The justification for the allocation of NE Thatcham is questioned.</p> <p>Notwithstanding this, the timescales and annual rate of completions is not supported and appears overly optimistic. The delivery of completions from 2031/32 at 120 dpa would equate to, at best, 960 dwellings over the plan period from 2031/32.</p> <p><accompanying statement attached></p>

Please give reasons for your answer	<p>I object to the West Berkshire Local Plan Review 2022-2039 proposed submission as it is unsound, due to the following reasons:</p> <p>West Berkshire Council needs to understand that this is a rural county, not a built up conurbation. This is how the A4 north of A4 Bath Road, Woolhampton (Site Ref MID4); Policy SP17 HSA17 RSA13 North East Thatcham Strategic Site Allocation and Land between A340 and The Green, Theale (Site Ref: HSA 14) are allowed to go ahead. Being a rural council, and due to the nature of the county, we is never going to be a rich council due to the number of inhabitants. But it must remember that each and every one of us has a right to a decent quality of life, easy and acceptable access to work; home; food provision; activities in the open air; decent health care; and dentistry; and schooling for all ages, and in my view this plan does not support that.</p> <p>Why is West Berkshire Council not insisting on all the new properties being built with solar and wind power as from now on, and eco building practices. You do not need to wait for the Government's target date before taking action. Brownfield sites should be built to make up government target numbers. Woolhampton is a rural village and not part of a town, and should never be built on the A4 from Bristol to London, so there are no green fields visible.</p> <p><u>Policy SP17 HSA17 RSA13 North East Thatcham Strategic Site Allocation</u> will add a small town onto the north east of the county, a difference in size to the previous plan that was for 2,500 homes. Yes, the plan has been put back in timescales but if it goes ahead in the next plan the extra 1,000 houses will be added. The diagram needs to be amended as to what will be built up to the A4, as the provision of schools etc are dependent on the full number of houses being built, this is no longer clear that can be made.</p> <p>Transport:</p> <p>The current roads in West Berkshire are no longer fit for current capacity and purpose. Adding all these homes in both Woolhampton, Bath Road, Woolhampton (Site Ref MID4) and Policy SP17 HSA17 RSA13 North East Thatcham Strategic Site Allocation will have a significant and detrimental impact to Woolhampton and other villages along the A4. As it is, it takes long enough to get onto the A4, and the traffic is clear (taken over 20 minutes before), and not just at peak times, when you can wait much longer.</p> <p>We all know the car is and will remain king as this is a rural place and all transport options are not going to be available. I do not think this has been achieved in this plan. I believe that any traffic trip rates used by West Berkshire Council are unrealistic. I call at 09.30 on a school day and calls it peak time? What proper assessments have been made of the routes that are not going to increase in traffic?</p> <p><u>Policy SP17 HSA17 RSA13 North East Thatcham Strategic Site Allocation</u> would increase traffic by at least 3,000 cars per day, each house having 2 cars. We know the number of houses is still not confirmed but in the overall life of the project (at least 2,500 homes, so 5,000 cars. Adding this number of vehicles getting onto the A4 and going through our villages and towns is not fit for access now let alone when you add a further 3,000 cars going over it. In 1998 when moving to Thatcham, the Thatcham bypass - Tull Way to Floral Way - well it is no longer a bypass but an essential road and quite often congested. At peak time roads are closed, people find other cut throughs, causing large amounts of traffic to use unsuitable roads and byways. Roads are not built for this amount of traffic. 3 way traffic lights at Woolhampton's BP Garage last week caused endless queues. We were unable to exit from Woolhampton's side roads, yet again, meaning people turning around in unsafe places and causing accidents.</p> <p>As I have several years before I retire, I do not want to spend my time getting to and from work caught in tailbacks on the A4. I wanted that I would have chosen to live in a town. Mine and my family's quality of life will be severely impacted by this plan.</p> <p>Water, Waste Water and Sewage:</p> <p><u>Policy SP17 HSA17 RSA13 North East Thatcham Strategic Site Allocation</u> would impact the local reservoirs and into the Thames and treatment areas. Harts Hill Road was closed for months recently when Thames Water needed to update the pipes up to the A4, an enormous disruption and impacts on business and homes alike, within the Bucklebury parish and surrounding parishes. Homes bordering the way up to Upper Bucklebury, this will again have a detrimental impact on the village.</p> <p>Environmental Impacts:</p> <p>All the proposed plans will have an environmental impact on wildlife, flora, fauna and habitats. There is no evidence that they will have a positive impact on the environment. But there is every reason to believe it will have a significantly negative impact. There is no evidence of any serious attempt to investigate, analyse or systematically address the environmental consequences of the plan in West Berkshire.</p>

	<p><u>Policy SP17 HSA17 RSA13 North East Thatcham Strategic Site Allocation</u> will have a huge detrimental impact on wildlife in much needed farmland in the area. We do not produce enough food to feed our nation, so we should be encourage possible use and encouraging the diversity of habitats, for insects, flora, and fauna. The change of use of this land will affect the balance between species, plants, trees, and fungi and mean protected and unprotected species could be lost forever.</p> <p>My objection to Policy SP17 HSA17 RSA13 North East Thatcham Strategic Site Allocation is also about the proposal being far from clear, the inclusion of GP practices and no view of any form of discussion with healthcare providers over the</p>

<p>1. Do you consider the Local Plan Review is legally compliant? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am objecting to the NE Thatcham development on the basis that the plan is unsound in the following areas:</p> <ol style="list-style-type: none"> 1 Transport: There will be increased traffic both in Thatcham and in Upper Bucklebury where I live. I think this has been increased. The plan for an exit site on Harts Hill will increase traffic congestion. This impacts me negatively as I now drive to the council school bus has been cancelled. I regularly pass pedestrians on Harts Hill and the junction where the bus crosses the road. In addition to safety concerns on this road. There is no modelling results for this junction. Why is this? The council assesses an increase in walking, cycling and public transport use but our bus route in Upper Bucklebury has been cut and the impact on safety and safety concerns so I would be even less likely to use this road walking or cycling. 2 There is no detail of healthcare provision for those living in the new houses. The local surgeries in the area are being closed. This impacts me negatively as further pressure will mean appointments at Chapel Row surgery will be even less available. 3 It will have a significant negative impact from an environmental point of view. Damaging heathland and woodland. This is a major greenfield development in the broader area of the North Wessex Downs ANOB and it will have detrimental impacts on wildlife. The original country park has now been downgraded to a community park and there is no evidence that the environment as claimed and no significant analyses of the consequences to the environment of the plan. The development and additional footfall will damage plants, threaten ground nesting birds such as nightjars and fragmented habitats. I have walked these fields regularly and it is beautiful countryside that will be destroyed forever. 4 There is no coherent plan for school provision. My children currently attend Kennet school which is full! Where are these houses going to go to school. Or will the proposed secondary school be built before the houses. Unlikely as the school has not been established. To this end I cannot see how the impact on traffic can be assessed accurately. Traffic at the beginning and end of the school day is already very congested another school will significantly add to traffic at the junction. This is not defined so an additional secondary school may not be feasible but where else would these children go? The bus route will be young people living in Upper Bucklebury will no longer be in catchment for Kennet school which is just outside the village to go to The Downs on a long bus route away and have friends living far away. This plan would have a negative impact on school runs, more strain on my children's school and less connection with Thatcham if children in our village catch the bus to school.

	Several Local Authorities have put their plan making on hold given changes so that planning inspectorate will no longer make decisions so why are West Berkshire not taking this approach given the strong objections to such a large development on health provision, school provision, traffic numbers and environmental impact?

Please give reasons for your answer	REF: THATCHAM NE HOUSING DEVELOPMENT PROPOSAL As a resident of Upper Bucklebury, I feel most strongly that the above application to build 1500+ houses in north east of Thatcham is unacceptable. My reasons are: 1 The increase in traffic would be unacceptable. Already there is a constant stream of traffic past my house during the day and evening hours. Apart from the resulting constant noise and pollution, one particular result of this is a depression in my front garden caused by up in waves by vehicles speeding past in wet weather. 2 Upper Bucklebury is a village which is rural in character and should be allowed to stay that way. This development would reduce the distance between the continuously built-up areas of Thatcham and Upper Bucklebury to less than 600 metres, making it difficult to distinguish Thatcham.

<p>Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to object to the proposed development to the proposal to build 1500-2500 Houses in NE Thatcham because it will have a negative impact on Upper Bucklebury and the surrounding area.</p> <p>1 Transport</p> <p>I am concerned about the extra traffic this will generate through Upper Bucklebury and the additional congestion on the road. I understand that despite assurances that this will have a 'positive impact on road safety' I understand that there is a risk of traffic from the site onto Harts Hill. This is of great concern because traffic to and from the site is only going to go in one direction through Upper Bucklebury. In addition WBC predicts 'some displacement of A4 traffic into wider rural routes such as Upper Bucklebury'. Upper Bucklebury are narrow and already busy and it is my genuine concern that extra traffic will result a serious accident. Upper Bucklebury to Chapel Row is a long straight road encouraging people to drive legally up to 60 miles per hour, speed, making it dangerous to cross at the junction of Carbinswood Lane and Pease Hill.</p> <p>1 Healthcare</p> <p>The proposed development will put enormous strain on our existing GP practices. There appears to have been no discussion with the North East Thatcham Development Consortium and general practices. In the present climate of GP shortages and the fact that GP practices are commissioned by NHS England, and I think it is fair to say there is therefore no realistic prospect of a new GP practice in Thatcham or West Berkshire in the foreseeable future. As far as I am aware, there has been no approach by WBC to discuss opening a new practice. The existing practices are already overstretched and I fear that the arrival of new patients will make a huge demand on our already stretched local GP services.</p> <p>Environment</p> <p>I understand that approximately 4000 people will be living on the development site. These people will need access to the countryside that since SP17 has no proven plans for providing adequate green space and protecting biodiversity and this will include visiting adjacent green areas. You are no doubt aware that management of Bucklebury Common is explicitly focused on protecting the fragile ecosystems. In addition, despite the Sustainability Appraisal accepting that SP17 will have a negative impact on the environment, there is no detail whatsoever of any mitigation measures.</p> <p>In light of the above I feel that the council should take the opportunity to stop this planned development as it is both unsound and has a negative impact on the local area. I am prepared to appear at the public enquiry if invited.</p>

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>Please find below my objections to the Local Plan as above – specifically re the proposal for setting aside land at Thatcham as I believe this proposal is unsound.</p> <p>As a resident of Ashmore Green of nearly <redacted> years I believe if this land is developed it will have a detrimental effect on the villages, Bucklebury and Cold Ash, and would remove the gap between them and the town of Thatcham. This would reduce the green space in the villages, and where areas of “dark skies” are in place, this would reduce this. Covering more land in concrete etc., will increase the heat island effect in Thatcham. Flood alleviation schemes are being built currently, but this would negate some of that effect.</p> <p>This will also cause damage to the Bucklebury Plateau Biodiversity Opportunity Area, in particular the Common, and the surrounding area. In addition wildlife, some of which is legally protected, would lose a large areas of habitat – which would never be regained and cannot replace this.</p> <p>The villages and towns of West Berkshire lack sufficient infrastructure, in the form of schools (from pre-schools to post primary) and recreation facilities. These additional houses would only exacerbate this. Water and electricity supply is also under strain.</p> <p>The site will cause a huge amount more traffic, Bucklebury and Cold Ash will suffer under the additional traffic using the A4 and M4 to the M4. The roads in these villages are inadequate for the number of vehicle movements currently. The A4 and M4 will be queuing during peak times, again, this proposal will only make things worse.</p> <p>I am also concerned about the number of houses proposed, and that 1500 will not be the limit, and more will be built, and more will have to be even greater.</p>

2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable	

<p>alternatives, and based on proportionate evidence.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	
<p>Please give reasons for your answer</p>	<p>This is my objection to this plan which I deem to be unsound</p> <p>There are various reasons for my objections as set out below.</p> <p>1. I live in Upper Bucklebury. <Redacted>. To protect the Copse, Lady Hoare has give local villages the right to roam goes ahead, potentially hundreds of people will use the copse for leisure walking thus either spoiling it for all current would block all public use of the area for leisure. Either way, Upper Bucklebury residents lose our hugely.</p> <p>2. If the proposed development goes ahead, it is obvious that at some time in the future, the small Blacklands Copse thus joining Upper Bucklebury to Thatcham with all the loss of house value and village status that would mean for U current residents who have chosen the village for its peace, beauty and tranquility as a village, would be destroyed.</p> <p>3. Kennet School is already over subscribed and local NHS doctor and dentist provision already past capacity. Unless provision, a Primary School and Dr and Dentist provision is built BEFORE the houses go up, the local provision of a</p> <p>4. Concern of increased traffic on Harts Hill Road. I travel to Winchester regularly and its increasingly difficult to get o that more cars are using Dunston Park south as a 'rat run' to avoid the snarl up at the Sony roundabout. This is potenti as children living in Dunston Park walk to attend the Kennet School. With cars parked on verges and dark winter mo One only needs to look at Cold Ash Hill which is now more or less joined to Thatcham and more houses are being The Regency Hotel. Traffic taking children to St. Mary's and/or to St. Finian's, the Pre-school in the Ackland Hall, plu to get onto the motorway by avoiding Newbury, make this a strong reason NOT to put more pressure on Harts Hill as straight, Harts Hill is very windy and often I meet oil delivery lorries, refuse lorries and cars going too fast causing da</p> <p>5. With access to the proposed new estate on Harts Hill, more and more traffic will use the back road through Upper thus the M4 with all the potential extra traffic and risks that entails.</p> <p>6. I'm surprised that this application has got this far on what I understand to be mainly agriculture land. We are cons shortages by the media, especially now with the cost of living crisis and the war in Ukraine. We cannot and must no gone it's gone for ever! Especially as a lot of Brown Field land in available just opposite this proposed development i</p> <p>7. Housing expansion in the Colthrop complex could potentially also solve the age old problem of the Thatcham railw obliged to provide a bridge over the railway crossing in Colthrop with a road access to the road norrth of Thatcham. W and businesses in the local area this would be.</p> <p>8. Over the past fifty years I have lived on <redacted> and now reside in Upper Bucklebury. It saddens me to see the usually with large houses with multiple cars which only encourages more people into the area not solving any traffic villages. I love this area and enjoy the freedom of fresh air, walking and observing wild life, all of which we are told is being. There must come a time when planners think more broadly and more into the future as every concrete buildin 'pleasant land' can only be detrimental by steadily urbanising our villages.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	No
Please give reasons for your answer	<p>There are no strategy documents to show how environmental policy requirements will be achieved or how the negative sustainability will be addressed by the proposed North East Thatcham development.</p> <p>The education need for the proposed North East Thatcham development is unsupported by appropriate recent pupil the council would not appear to be addressing its obligation to provide educational facilities for children.</p> <p>There is no full Health Impact Assessment for the proposed North East Thatcham development</p>
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes	No

<p>* No</p> <p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes</p> <p>* No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>No Health Impact Assessment for the North East Thattham development.</p> <p>No evidence to support pupil numbers to be catered for in the school provision for North East Thattham development, no details of timing or sufficiency of funding, no details of flat land allocated for school sports fields</p> <p>The Bucklebury Plateau Biodiversity Opportunity Area requires protection from increased footfall to protect and maintain its habitat. The North East Thattham development details its open areas as laid out to encourage engagement and focus on meeting the environmental needs of the wider area or providing protection to the precious nearby habitats. Increased development on Bucklebury Common would have a negative effect on this ecosystem and would encourage more visitors to the common</p> <p>WBC itself predicts some displacement of A4 traffic onto rural routes in its plan but does not consider that these roads are subject to resultant dangers, or separate impact that this will have on the current nearby local village residents' quiet enjoyment of their surroundings. It is now a suggestion of a roundabout on the steep and twisty Harts Hill road to connect to the north of the North East Thattham development further increase traffic onto the rural routes and the siting of a roundabout on this hill would introduce a significant traffic impact at this junction to indicate any thought as to how this might work.</p> <p>Thattham rail station with its crossing in its current form is not suitable to provide a public transport hub for the Thattham area. There currently appears no strategy to deal with this. The proposed North East Thattham development site is not flat and is close to Thattham town centre. Accordingly, the uptake of walking and cycling routes to any large extent is unrealistic, and footpaths do not represent the only viable means of transport, either to the station, where parking will be inadequate or to the final destination.</p> <p>Alternatives to the proposed North East Thattham development do appear to have been fully considered.</p> <p>Changes in Government thinking on housing targets and the nature of future housing developments does not appear to have been reflected in the documentation now under review.</p> <p>The present strategy takes insufficient consideration of the needs of current residents living in Thattham and the surrounding area, and the impact of the proposed North East Thattham development on them, i.e. the education of their children, their transport needs, their quiet enjoyment of their surroundings. Local services are already at capacity.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate?</p> <p>* Yes</p> <p>* No</p>	No
<p>Please give reasons for your answer</p>	<p>Co-operation with the local health authority to consider the most advantageous delivery of medical provision to the people of the area? Who exactly is going to operate the suggested surgery?</p> <p>Co-operation with the environmental groups for the surrounding areas of Outstanding Natural Beauty? There seems to be many positives in the impact of the North East Thattham development and much reason to fear permanent and irreversible damage to the area.</p> <p>Co-operation with the Education department? The education plans seem inconsistent and incomplete. Further, such education provision will follow after the house building program leaving many years of inadequate provision while development is ongoing.</p> <p>Co-operation with Thattham and surrounding village councils? How many of these support this plan?</p> <p>Co-operation with service providers? Thattham sewage works overflows into the local waterways when overloaded. Have alternative ways of dealing with this been considered?</p>
<p>4. Proposed Changes</p>	<p>Further studies to look more fully consider the environmental, transportation, health and educational impact for the people of the area before proceeding any further with this part of the current plan.</p> <p>The world has greatly changed of the last few years. Taking this into account, pausing the local plan in its entirety for a period of time would be actually now needed, recent changes in Government policy and the better alternative ways there might be providing for the future.</p>
<p>5. Independent Examination - If your representation is seeking a change, do you consider it necessary to participate at the examination hearing session(s)?</p> <p>* Yes</p>	No

* No	
5. Independent Examination	
6. Notification of Progress of the Local Plan Review - The submission of the Local Plan Review for Independent Examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The publication of the report of the Inspector appointed to carry out the examination * Yes * No	
6. Notification of Progress of the Local Plan Review - The adoption of the Local Plan Review * Yes * No

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	
2. Do you consider the Local Plan Review is sound? -	No

<p>Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<ol style="list-style-type: none"> 1 Collateral damage to the Bucklebury Plateau Biodiversity Opportunity Area and its ancient woodlands and heathland. 2 Causing detrimental impacts to legally protected wildlife. 3 An estimated 4,000 people will be concentrated in the development site. They must have access to green space for their wellbeing. 4 The impact on traffic in the area particular Harts Hill Road with traffic being funnelled upwards towards Upper Bucklebury causing congestion but will also be dangerous. Harts Hill is very narrow and already dangerous with buses, lorries and cars. 5 Kennet School is already oversubscribed and local NHS doctor and dentist provision already past capacity. Unless additional provision, a Primary School and Dr and Dentist provision is built before the development begins, the local provision will collapse. 6 There must come a time when planners think more broadly and more into the future as every development allocated to 'brown land' can only be detrimental by steadily isolating our villages. No mobile signal, limited public transport and a lack of green space through. <p>I am a concerned resident asking you to reconsider this plan.</p>

Please give reasons for your answer	<p>This letter is an OBJECTION to the LPR, particularly those aspects related to SP17. The writer finds the LP proposed set out below. I am prepared to appear and make addition submissions to the Planning Inspectorate is asked.</p> <p>Legal Issues</p> <ol style="list-style-type: none"> 1. The Reg 19 consultation period is 6 weeks starting on Friday 20th January. However, WBC's website was partially maintenance took place on 21st and 22nd January. Hence the 6-week consultation was short by 2 days. In addition, on those days making any review of evidence impossible. The consultation is flawed. 2. The local authority has a duty to consult and cooperate in the preparation of its LPR. WBC has failed to do so in s consulted has done so begrudgingly. WBC failed to consult Bucklebury Parish Council on boundary changes and has ignored. There is nothing in the evidence to suggest that WBC has consulted the relevant authorities on medical provision or 3. The site has two pipelines crossing it; one for oil and the second gas. There is a need to consult the pipeline authority. WBC has done so. Land surrounding these pipes is a sterile zone to protect the pipes from damage. This area is not s on the access points on Floral Way and the A4 is not considered. 4. The provision of secondary education is inconsistent with WBC's own guidelines, being too small to be viable. 5. WBC has a duty to consult and prepare a Health Impact Assessment. This has not been done and the plans for h not properly described or viable. 6. The choice of Thatcham Northeast was driven by a HELLA study the cost of which was paid by the Thatcham Nor document is missing from the evidence. The new HELLA in the evidence pack post-dates the plan approval by WBC considered it in reaching their decision to approve and delegate authority to submit the LPR to public inspection. 7. A vision for Thatcham was belated prepared but this was contingent on THA20 being the selected site and is woel for the town. It too is missing from the evidence. It is notable that the vision should have been to starting point follow inescapable that WBC reversed this process thereby frustrating logic and hence is not positively prepared. <p>Traffic</p> <ol style="list-style-type: none"> 1. Throughout the Reg 18 period and in public meetings between Bucklebury Parish Council and WBC planners' ass ingress and egress would be to and from the A4 and Floral Way. Hidden within the evidence pack offered at Reg 19 a ju There are no drawings of its position or topography. This late addition, lacking any analysis demonstrates a lack of pos with the communities affected. The addition of this junction is both a danger and will have a significant detrimental effe because Harts Hill is narrow, winding and the junction's necessary position is shielded by a blind bend in the downhi 2. The addition of 1500 or more houses will result in more car movements. There are no identified employment oppo and few within walking distance. Additional traffic is inevitable. 3. The A4 is already gridlocked at peak times and residents will seek to avoid jams. The junction with Harts Hill provi satnavs tested show that traffic for the A34 and M4 west will route via Cold Ash and that for Theale, Reading and the M Chapel Row and Bradfield South End. This will be detrimental to village life and dangerous for residents. 4. Traffic through the villages, Upper Bucklebury and Cold Ash will increase – this is acknowledged by WBC – but no shown. The roads are quiet lanes without pavements, narrow and used by children to walk to school or to the school access the Common and to bridleways. Cyclists use the lanes for recreation. 5. No credible account of traffic is included in the evidence this being a demonstration unsoundness. <p>Site Selection</p> <ol style="list-style-type: none"> 1. It is the writer's understanding that all possible sites be considered on their merits, that preference be given to bro benefits be properly assessed. WBC failed in this task. The abandonment of Grazeley as the preferred site prompted which was exploited by the THA20 promoters. They provided WBC with funds to prepare a HEELA. However, that wo promoted the benefits of the funder's site, THA20 and seriously underrepresented the competitors. Since then, each from confirmatory bias. Critical thinking is absent and demonstrated throughout the evidence with the sustainability a assumptions lacking any supporting evidence. 2. A key feature of a competing site, that at Colthorp Mill, was the provision of a bridge over the railway to replace a HEELA failed to mention this even though the bridge is sorely needed and high on the wish list for residents. This erro many times but was not addressed. This failure to consider alternatives makes the LPR unsound. <p>The Environment</p> <ol style="list-style-type: none"> 1. The proposed development is 'in the setting of the AONB'. This is accepted by WBC yet there is no evidence that t environment. WBC has an obligation to enhance environmental sustainability and biodiversity, but no evidence is pre achieved. This subject must be in WBC's mind because it was so vocal on these subjects when it opposed developm scheme, much larger and containing the Siege Cross site is said, without support, to have a positive impact. This is s

	<p>2. The long-term plan for the maintenance and enhancement of Bucklebury Common relies on modest numbers of v fragile infrastructure. WBC plans to increase the vehicle traffic – by providing an additional carpark – and ‘facilitating users’. This is the antithesis of what is needed and demonstrates that WBC has not consulted with or cooperated with</p> <p>Conclusion</p> <p>The choice of Thatcham Northeast for development of 1500 or 2500 homes is a poor choice. The process used for s because of the involvement and funding of the work by those who financially benefit. This fails any test of propriety. It itself from this by failing to include the flawed HELLA and vision documents even though these were the core decision</p> <p>The LPR is unsound, undeliverable and was not prepared in a cooperative way. It fails to reflect the needs of the community</p>

Please give reasons for your answer	I am writing to object to the above plans as I feel that the plan is unsound. Negative implications: Loss of countryside Pressure on infra structure (the roads are already busy, the state of the roads with pot holes are already causing problems, all these extra cars/lorries) Effects on local services eg schools, doctors, dentists (schools currently have waiting lists - doctors currently around 10 weeks - dentists - even longer to get appointments) Facilities - we usually have problems with water and that is with the numbers living in the area at the moment, putting extra pressures on resources

<p>Please give reasons for your answer</p>	<p>Please find below my objections to the Local Plan & North East Thatcham SP17 development (Reg 19consultation) and lacking in sufficient evidence to prove that it will not create a negative impact to the existing communities including:</p> <ol style="list-style-type: none"> 1 Transport The LP & SP17 (eg. Harts Hill Road, exit & car parks proposed, sheer volume of new dwellings) will increase traffic on Upper Bucklebury & Cold Ash and therefore will have a direct negative impact on those currently living there – safety on the roads, wildlife impacts. There is no sound modelling to show the WBC statements that this will be mitigated. Problems caused by the traffic related to the new development. The air quality assessment is invalid due to it not taking into account this traffic & pollution levels. 2 Safety There is no evidence presented that the proposal increases the safety of pedestrians, cyclists and wildlife and noise. This can be mitigated on roads such as Harts Hill Road. In fact the proposed exit on Harts Hill Road is likely to be already a dangerously bending road, with no footpaths or cycle ways. Further reduction of hedgerows or trees for sustainability even further is not a sound mitigation for building footpaths. There is also no modelling to identify the impact of motor or moped traffic & the economic, social and safety negative impacts of this on the residents of Long Grove (who are already impacted). 3 Healthcare There is no evidence of the required level of consultation, multi party discussions and detail of any acceptance criteria relating to healthcare facilities, notably GP surgery / dental care – lack of detail on adequacy of the size, location, and how the existing users such as myself will be positively impacted and not negatively in the short and long term. Assessment or modelling of the thousands of increased patient numbers on GP and dental practices and how this will impact dental care is already out of reach for myself and I have to fund private medical insurance due to the current state of NHS facilities which will only get worse with the influx of more patients 4 Environment The council accept that there is a negative impact on environmental sustainability but overall believe this is outweighed by the gains. This is not backed up with sound studies, detailed assessments or mitigation plans and has unsubstantiated the sufficiency of proposed funding by the Developers, no commitments as to timing and how this can apply to any reduction from 2500 to 1500. There are no impact reports or strategy documents setting out how the biodiversity net gains are to be achieved only an 'expectation that the future design will cater for it'. No sound evidence is presented on how the council can deliver this without negative impact to protected and non-protected wildlife, AONB or local existing communities & meadows. The lack of evidence of consultation on biodiversity, ecosystem impacts, and years and years of building works on the site. The lack of evidence of consultation on biodiversity, ecosystem impacts and the outweighing social/economic benefits of water and waste drainage can be provisioned for the volume of dwellings proposed is a major flaw. 5 Housing volumes The LP tries to position this as a reduction in dwellings over the period to 1500 (incorrect as reg 18 consultation never had the door open to the overall volume being more like the 2500 originally proposed (settlement boundary remains the same). There is no evidence that the Secretary of State's written statements have been considered and meet his statements on local housing need reflected in plans. Other local authorities have taken this opportunity to delay their plans to gather more evidence.

	<p>balanced and sensitive outcome which WBC is not doing. WBC have also seemingly added in other sites into the plan without due process, timing & evidential justification.</p> <p>6 Schooling No detailed modelling has been provided to evidence the demographics and potential future demand for schooling. The proposed primary and secondary schooling in the LP cannot be accurately assessed, nor rule out negative impacts on surrounding communities especially if their choice is reduced to one secondary school only due to proximity rulings favouring the development area. It conflicts between the volume of places at primary (2.5 forms) to those at secondary level for 4 forms of entry to be considered viable economically and socially and contravenes WBC's own policies. It is also not clear if relevant commitments for joint use with sports fields, location on flat ground, and funding required to deliver the plan are realistic. I conclude that the LPR & SP17 are unsound and will have a detriment negative impact on myself and the local community.</p>

Please give reasons for your answer	<p>I find the LPR unsound for a number of reasons with particular reference to SP17, the proposed North East Thatcham are listed below.</p> <p>1. Traffic Impact: I'm very concerned about the amount of increased traffic that the development will bring to Upper Bucklebury. A significant number of homeowners in the proposed development will use the village roads as alternatives to the A4. I am extremely concerned about the plan for an exit at the north of the proposed development onto Harts Hill Road as this is one of the village routes. There are no modelling results for this junction in the Transport Assessment and no drawings either. For all the other proposed junctions, I find it very worrying that the proposed junction on Harts Hill Road does not appear to be suitable. This road is completely inadequate for larger amounts of traffic, has no pavements in some areas and has a high proportion of potholes. I have a village school with many children walking to school along these routes so this needs to be given serious attention. I believe the increased traffic through Upper Bucklebury will have an impact on the standard of life to those that currently live there.</p> <p>2. Environmental Impact: It is clear that the proposed development on a greenfield site and so close to the AONB and other legally protected wildlife will have a huge detrimental effect to the local environment and public enjoyment of it. This is of such an asset to our community that I'm passionate that we do all to protect it for future generations. There is no evidence to indicate that there is a strategy to protect the AONB and the biodiversity within. We should look to develop brownfield sites rather than build this overbearing development. This should be a very important consideration within West Berks Council's sustainability strategy.</p> <p>3. Schooling Impact: There are no details in the LPR for the provision of nursery, early years and primary education. I am concerned about the planned number of schools or form entry requirement, with referenced data being 12 years old, I fail to see how this can be used to secondary education, many children from Bucklebury attend Kennet School (nearest catchment school), which is a long journey. As children who live nearer to the school are given precedence, this would mean that children from the proposed NE Thatcham would take priority. Children from Bucklebury would have to go to The Downs, which firstly they are only in a secondary catchment area.</p>

	<p>minute bus ride away compared to the very short journey to Kennet. The LPR is incomplete and contradictory on the in the area. The latest LPR is in contradiction to the *Supporting documentation. It proposes that the sum of £15 million to Secondary Education. There are no details of the location of the land to be provided and hence no possibility of as that a more detailed planning approach needs to be taken to the overall provision of education for the Thatcham area can be fully assessed.</p> <p>4. Adequate Consideration of Alternative Sites: I'm not comfortable that enough consideration has been given to the accommodate housing options across West Berkshire. Since this consultation was initiated there has been a dramatic acceleration in the demise of Town Centre use. I believe that there will be a vast number of brown field sites that could meet Berkshire requirements as a result. The re-development of these sites for housing should be given priority ahead of development on greenfield land.</p> <p>5. Timing: Michael Gove announced in Dec 22 the launch of an NPPF consultation running until 2nd Mar 2023. Whilst all councils have decided to pause their plan making. I don't understand why West Berks isn't applying similar prudence to this consultation could change the calculated housing requirement for West Berkshire, which is currently a stretching ANOB and land. This outcome could dramatically reduce the requirement for housing and the need for this overbearing community.</p>

Please give reasons for your answer	<p>Regarding the following criteria:</p> <ul style="list-style-type: none"> - Sustainable transport through routes; - Mitigation of the development's impacts on the highways network with improvements to existing junctions where the access points for all forms of movement and transport to the site at locations to be agreed with the planning authority; - How adverse impacts on air quality will be minimised. <p>The Strategic Study acknowledges that Thatcham has developed over many centuries overwhelmingly on an east-west axis and that the large majority of movement for Thatcham's population is by motor transport due to poor public transport. At peak times congestion and the A4 is busy for other parts of the day. It notes that access to and from the north (mainly for the M4) avoiding already congested and busy Newbury, is via Cold Ash. It acknowledges that access to and from the south (mainly for the M4) crossing adjacent to Thatcham Station, the barriers being closed to road traffic for the majority of an hour during day</p>

	<p>Yet in the development of Thatcham strategy there are no proposals at all to address these two issues to the extent of a "difficult pile". Additionally the strategy for NE Thatcham actually proposes limiting access to and from north. Nor does it accommodate increased traffic on already busy roads, instead only focussing on details of road junctions. To which quality along the A4 and Floral Way for which no mitigation is proposed. Add to which given that Thatcham is a hub and massive error.</p> <p>There is no public transport north out of Thatcham save for a very infrequent minibus service to local villages. There is no direct bus service to Thatcham and requires a change of bus in Newbury, making such journeys unviable unless you can spare a large portion of your day for the development of Thatcham strategy there are no proposals at all to address this.</p> <p>If Thatcham is to be expanded by a third of its current size there is no guarantee there will be sufficient local employment opportunities and south make employment opportunities in these directions, i.e. Basingstoke, Andover, Chilton, Abingdon, Wallingford, making it difficult for travelling.</p> <p>Additionally, aside from traveling to and from work, for a whole host of reasons on occasions the population of Thatcham is isolated and this also suffers from impairment north and south.</p> <p>The healthy development of Thatcham will be impaired, and will adversely impact Newbury and local villages, without the necessary infrastructure and south. Thus I do not think the plan is sound, or competent in this respect.</p>
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	Yes
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>	Major regional investment is required to give Thatcham independent and unimpaired transport corridors north and south and provision.

2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	I am writing to the Local Plan as I find it unsound in a number of ways. It appears to have been rushed, not coherent responsibilities, contradictory in places and lacking a great deal of the detail required to be judged sound. Specifically Thatcham NE Development it seems a particularly ill thought through plan and no longer completely necessary given the approach to development and the recognition that local circumstances need to have greater impact of the level of development in Berkshire with large areas of land not able to be developed on and large areas of natural beauty fall squarely in that category. To build such a large development on green belt land is deeply questionable and appears to be being led by developers

investigate the potential development of brownfield sites rather than greenfield has been inadequate and again appear rushing through this proposal.

Having lived in Thattham for 21 years one of my most personal concerns is the potential impact on flooding. My family for 8 months back in 2007 and the prospect of a large amount of fields being concreted over from the very direction from fills me with dread. I realise that a lot of work to improve the flood defence system has been undertaken but that yet with extreme weather. To build in this location seems to me to be reckless and there is nothing in the local plan of the impact of this development on potential flooding of the wider area and as such I do not see how the plan can be being done upfront. I find this irresponsible.

In terms of the plan itself in relation to the development I believe there are a number of areas that make it unsound. To be to have a very large development in Thattham to help improve the infrastructure. Yet the document itself has very little commitment on how the infrastructure is actually going to be improved. And it appears therefore that the development will place a strain on a number of areas that are already over stretched. Specifically:

Provision of education. The existing schools in the area particularly Kennet school have no ability to expand further. This is contradictory with the solution to provide secondary education for these existing houses and is therefore unsound. It has no details on the location of the land. It references £15m being contributed by developers, but nothing on what this is for or of what this sum could deliver. It is recognised that schools need to be a certain size to be viable, but the land, promised for the development itself isn't big enough to support a new secondary school. It clearly doesn't have a proper plan to deliver the additional houses and therefore is unsound.

Healthcare: My family are patients at the burdwood surgery and this surgery is currently very stretched. Ability to get a GP has deteriorated. In addition we are nhs dental patients and again these services are overstretched. The plan proposes to provide dental services within the development. However there is no associated health impact assessment with the plan or any details of what will be set up with the proposed development. There has been no investigation of this and therefore no assessment of the provision of dental services. Therefore it is impossible to say that this plan is sound. It again speaks of a poorly thought out plan with little detail to enable it to be properly assessed.

Environment: The statement that that the overall plan will have a positive impact on the environment I find laughable. The development on green belt land. The sustainability appraisal itself states it would have a negative impact on environment that need to be mitigated. But as in the rest of the plan there is obviously no detail on what would be done to mitigate this impact that so little has been done to try to promote the development of smaller brownfield sites which is actually now the green environmental ground this plan is unsound.

Traffic and safety: the development is going to undoubtedly bring increased traffic to already busy roads. I drive every day and there are significant traffic jams along that road to the extent that the road up to bucklebury is used by some drivers in places is not designed for lots of cars. This development at the base of and straddling harts hill road is going to significantly increase traffic along the a4 and up through bucklebury and chapel row. There seems to have been no assessment of the impact on road safety. So how the council can say the policy will have a positive impact on road safety is beyond me. Particular concern seems to have been undertaken.

Given all the inconsistencies and the amount of detail missing the obvious thing would be to revisit the plan, particularly in line with governmental guidance on development. To properly assess the alternative of developing smaller brownfield sites or to detail how this development and actually detail how the infrastructure and services will be delivered to support this development.

* Yes * No	
2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No	
Please give reasons for your answer	<p>I am objecting to the Thatcham NE Development plan as I believe it to be unsound, for the following reasons.</p> <ul style="list-style-type: none"> - Healthcare provision - current GP and Dental surgeries already full. No provision for expansion of current facilities and will manifestly increase demand. As older residents, we are concerned we would experience even more difficulty access in years. - Environment - hugely important. This is a rural, farming community. Crops grown here feed the people; the land should be protected for that very reason alone. More housing built on these nutrition-producing fields will intrinsically decrease yields and threaten the ability to feed the nation. - Transport - because of the very significant increase in volumes of cars etc., any development must not allow vehicle access onto the roads in our part of the village, our lane in Upper Bucklebury is narrow, rural and has no pavement or lighting. It could only be funnelled through via access from Harts Hill. Any upgrading of the roads/lanes would downgrade the rurality of this area and can only be achieved by destroying the countryside around. - Education - more housing equals more school places needed. However, numbers of Pupils are crucial. Exactly what is needed it's not clear. Funding - is this sufficient to provide the legally obliged level of education the government demands. - Sports fields provision - this stated provision is neither clearly funded nor a location given. A level piece of land would be needed in the current plan? - Leisure activities in a rural area - walking, running, riding, bird watching, flora & fauna observation and immersion. The inevitable creep of urbanisation progresses up the hill to Upper Bucklebury and the other villages. - I therefore ask that the council allows opportunity to consider the government's updated planning guidance, to pause and consider the implications of the proposed development.

1. Do you consider the Local Plan Review is legally compliant? * Yes * No	
Please give reasons for your answer	<p>My general concern is that this process of developing a Local Plan is required by law to be consultative. WBC have had to consult with all Town Councils and Parishes and residents. Reg 18 was released over Christmas in 2020/2021 with very little comment. Regulation 19 has been delayed multiple times and is extremely complex and exhaustive in the volume of documentation. The consultation period is only 6 weeks which is totally unreasonable for any layman to be able to make a thorough review of the WBC documentation. Finally Reg19 was launched on the 20th Jan 2023, for their website to be taken down that weekend. As many people have to travel to the council offices for documentation over the weekend is the only option. In which case their timescales for review should have been extended to ensure the information to be available for the published duration.</p> <p>Throughout the various websites and documentation supplied by WBC there are references in the form of website URLs. It is impossible to make informed comments on the Reg 19 Submission.</p> <p>Throughout the whole Reg19 submission there is a cavernous gap of evidence to support the plan, constant use of the phrase 'to be provided' will be provided at a later date which makes the whole process and ability to analyse and subjectively review the Reg 19 submission the whole process is unsound.</p> <p>I would also like to say that the significant material changes between Reg18 and Reg19 must indicate that due process has not been followed. The public have not been given the opportunity to consult again before Reg19 which is unacceptable.</p>
2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No	No
2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on	No

<p>cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p> <p>* Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	<p>No</p>
<p>Please give reasons for your answer</p>	<p>Section 1.19 In February 2020, we published our assessments of sites that were submitted to us as part of the Housing Assessment (HELAA). We also undertook focused consultation with parish and town councils, and NDP groups seen in the HELAA.</p> <p>Comment : it is a fact that WBC republished the HELA as part of this consultation on the 20th Jan 2023. In which case this document refers to.</p> <p>Comment : WBC did not engage with Local Parish Councils and there is no evidence presented of this consultation. As part of the https://www.westberks.gov.uk/local-plan-evidence document</p> <p>Site Selection Criteria <weblink to site selection criteria></p> <p>This document includes the following statement:-</p> <p>2.11 The assessment is a key part of the evidence base to inform the site selection process. However, it is important whether a site should be allocated for development. Rather it assesses and identifies a catalogue of sites that are for consideration. In West Berkshire this document is the Housing and Economic Land Availability Assessment (HELAA)</p> <p>2.12. This site selection methodology uses the HELAA as the starting point to identify which new sites should be allocated.</p> <p>The latest version of the HELAA document was re-released on the 20th Jan 2023. Clearly this is the day Reg19 started as being at the start of the process for the LPR and site allocation. Additionally the revision of the HELAA as part of the process completed thus far.</p> <p>Within the Local Plan Evidence document the following documents are referenced.</p> <p><i>Thatcham Strategic Growth Study</i></p> <p>A three-stage process that assesses planning for the future of the settlement.</p> <ul style="list-style-type: none"> • Stage 1: Thatcham Past (May 2019) [2MB] • Stage 2: Thatcham Present (April 2020) [1MB] • Stage 3: Thatcham Future (September 2020) [12MB] <p>This strategy which forms the significant basis for the LDP is based on the HELAA (Feb and Dec 2020 publications) Indeed in the above documents the whole strategy is based on the HELAA at that time, obviously with the HELAA updated subsequently out of date and should be removed from consideration as part of the evidence for the LDP.</p> <p>These documents clearly have housing numbers that differ from the latest plan of 1500 houses. However these documents reflect this, in particular in the areas of traffic, schooling, the viability of amenities such as doctors, water supply and waste they contain detailed information on the viability of the site based on</p> <p>Indeed in the Stage 3 document noted above the following section can be seen.</p> <p>We have also considered a lower density option, whereby only 2,300 units can be delivered. This effectively reduces development, and enables the costs for healthcare contributions and for utilities to be marginally reduced, as these are 2,300 units. This reduces the outturn Residual land value as follows: Option 1 £27,618,800 a reduction of 12.3% for an 8% drop in unit numbers £26,696,800 a reduction of 12.65% for an 8% drop in unit numbers</p> <p>This indicates the disproportionate effect that this would have on overall viability.</p> <p>However, the latest proposal from the developers is for 1500 houses which must therefore SIGNIFICANTLY reduce the viability this is evident in the Reg 19 Consultation and submission, which must surely mean that the Reg 19 Submission is unviable. Collusion with regards to the Thatcham NE Documents as part of the plan Submission.</p> <p>With regards to the above 3 documents, these documents were TOTALLY funded to the sum of £100,000 for by the developer in the three documents. This must surely call into question the viability, ethicality and fairness of having the main developer markets their site.</p> <p>No other developers, even those identified as potential sites in the HELAA, were offered a chance to contribute to the plan were any other developers provided direct access to the authors unlike the Thatcham NE developers who were obviously not.</p> <p>No other developers have their marketing material or any other documentation submitted as part of the Reg 19 submission. No other developer been granted this privilege if it not in collusion with WBC.</p> <p>The fact that WBC were not forthcoming on who funded this report also raises suspicion, the fact on funding was not disclosed in the information request. WBC deny collusion with the developers but it is obvious why they would do this.</p> <p>WBC initially published the FoI request and subsequent response on their website but this has since been removed from their consultation submission.</p> <p>The Thatcham NE Growth Study section 2.44 talks about the GPSS oil pipeline across the South of the site and the need to talk to the owners of these as part of the planning process and WBC have not done this.</p>

I would say this further calls into question the soundness of this process and supporting documentation and even its to one preferred developer in all fairness and not others.

The fact that WBC did not put the funding of this report out to tender is also against their own legally binding policies

Under section 6A of the Education and Inspections Act 2006 (the 'free school presumption') where a local authority new school it must, in the first instance, seek proposals to establish an academy

It is not clear if WBC have sought proposals for the three proposed schools in the LDP. This is in contravention to the

The provision for education from Nursery, Early years, through Infant to Secondary education is not clearly defined v coherent end to end plan which therefore breaches the Councils obligations to provide education facilities for children this provision ?

Because of a lack of a coherent Plan on Education Provision across the various proposed developments it is impossible to knock on effect on traffic. The siting of a secondary school to the NE of Thatcham could result in a significant increase considered in the traffic plans and models in the Local Plan.

Pre-secondary School provision:

There is no provision in any of the LPR for Nursery or Early years provision.

The provision of Primary school education is unclear, disjointed and contradictory. There is no data or evidence on the Form Entry requirements. The LPR proposes that the sum of £12 million be contributed by the developers to primary available, the only data provided in from 2011, it is impossible to assess if this is sufficient. It also doesn't demonstrate school place provision, clearly schools need to be available before houses are built.

Secondary Education provision:

The Plan is inconsistent and incomplete on the provision of secondary schooling in and around Thatcham. It is also the latest Local Plan is in contradiction to the Supporting documentation. The latest plan proposes that the sum of £15 million be contributed by developers to Secondary Education. There are not details of the location of the Land to be provided and hence the a

Please see the link below to The Thatcham NE Development Plan 2020 (part of the Local Plan supporting documents) <weblink to Thatcham growth study>

The Thatcham NE development plan 2020, produced by David Locke Associates and Stantec on behalf of WBC , proposes a (Form Entry) secondary school, half-funded by developer contribution

Government guidelines are that less than a 6FE Secondary School are not sustainable.

The Development plan states that the NE Thatcham development, when at 2500 houses, is not sufficient to fill a 6–8FE

5.18 Provision of a new secondary school in North East Thatcham is an essential part of enabling growth in the town. The development proposed is not sufficient on its own to fill a 6-8FE secondary school.

5.19 Secondary schools need to be of sufficient scale to make them sustainable and able to provide suitable facilities. It is not considered feasible for a new school to be smaller than 6FE.

With an apparent 40% reduction in the housing allocation in the 2023 LPR (2022 to 2039) to 1500 houses, a secondary school is not sustainable in this location.

Earlier in this same Thatcham NE development plan it was noted that the education provision exercise was based on data from 2011. Clearly the use of 12 year old data is unsound.

The Local Plan Review to 2039, Policy SP17, now states that land (not the Secondary school itself) will be provided for a

On the basis of the above it is clear the plan for secondary school provision is 'unsound' on the basis there is no evidence of school children the school is to cater for; the location of a school is not clear; the number of form entries is not clear; a 6FE school is unsustainable; that the timing of the funding is not clear; that there is no evidence the proposal meets the Councils obligations to provide education.

Conclusion on Schooling :

Based on this and considering the Council as an education authority has a duty to make arrangements for the provision of education clearly how this obligation will be met for all school years is not defined in the Local Plan, and as such the Local Plan is

Sports Fields:

The plan talks of the provision of sports fields. This raises two issues not answered in the Local Plan:

Sports fields require flat ground. The only flat area of ground in the proposed site is that which is closest to the A4 road and is most traffic fumes.

There is no funding earmarked for these facilities.

If WBC are assuming that the school playing fields would be available as Sports Fields then this assumption is unsound. If not viable, then the playing fields will not materialise.

Additionally, many schools do not want to open their playing fields to the public for safeguarding and other concerns. **on the Provision of Playing Fields.**

The plan does not provide sufficient evidence to enable a decision to be made on traffic Impact to be assessed.

This LP does not provide any sufficient infrastructure gains, the Colthrop plans provides a bridge over the railway which will reduce congestion and subsequent pollution.

Additional Comments:-

The information available to support the current consultation being undertaken on the Local Plan has several major issues. These include:

- The housing numbers for northeast Thatcham – positioned in Reg 19 as a reduction from 2500 dwellings to 1500. The 2018 Consultation envisaged that only 1250 dwellings would be built in the plan period, and this has increased to 1500 as both a minimum and an approximate number and the supporting studies are still based on an eventual size of 1500 homes proposed for this site could therefore be increased to the original 2,500 when the Plan is reviewed after 2039.
- The update of the HELAA, which was published only on 20th January 2023, includes a large number of sites that were not in the update, and which have been rejected, yet the WBC process is that the HELAA is at the start of the process not

	<ul style="list-style-type: none"> The Air Quality Assessment that is part of the consultation documents is based on the LPR running to 2037, n This affects the traffic levels forecast for the end of the LPR period and the resultant traffic pollution. There is no evidence WBC has complied with its legal duty to cooperate with Berkshire West Clinical Commiss of the GP surgery promised for north east Thatcham. There is no evidence that WBC has consulted properly with Thames Water over the time needed for provision therefore does not know if the houses for north east Thatcham are deliverable in SP17 in the plan period. The Settlement Boundary background paper shows the Thatcham settlement boundary already extended to the houses, yet the plan now refers to a minimum of 1500 houses – this could be read that 2500 dwellings is still sui the extended boundary. The new provision for secondary schools in north east Thatcham is not consistent with WBC guidelines for the m school. If the primary provision is 2.5 Forms of Entry, then so presumably is the secondary provision to meet th Council policy 2013 states that the minimum viable size for a secondary school is 4 Forms of Entry. The Secretary of State's Written Statement of 6th December 2022, which removed the need to maintain a 5-ye Authorities with up-to-date Local Plans, removed top-down housing targets (particularly for Local Authorities w and gave a two-year transition period for LAs in the final stages of preparing Local Plans and this statement sh WBC. <p>Because of these points, and many more, the Reg 19 Submission in its entirety should be considered as unsound. I would very much welcome the opportunity attend and speak at the Reg19 review.</p>
3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No	No
Please give reasons for your answer	<i>WBC have conducted the bare minimum of consultation as required by law where they deem fit. The revised HELAA w NE growth study should legally have been consulted on. On that same document other developers were not given th funding and so on.</i>
4. Proposed Changes	<i>That is surely WBC's job ?</i>

Please give reasons for your answer

WBC LPR Regulation 19 Objection

I wish to strongly object to the SP17 proposed development of 1500 houses in NE Thatcham on the following grounds:

Traffic

There is already substantial traffic passing through Thatcham in the rush hour, along both the A4 and Floral Way. This proposed development will increase the number of car journeys as people travel to and from work, as it is unlikely that there will any new employment opportunities created locally as a result of this proposal.

For traffic that wishes to join the M4 at Junction 13 (Chieveley), or head north on the A34, people will not follow the A4 to Newbury, and it is likely that these traffic flows will instead be up Harts Hill, into Upper Bucklebury and through the surrounding villages ie Cold Ash and Hermitage. It is likely that there will also be increased traffic through Chapel Row and Southend Bradfield, as cars look to avoid the A4 going eastbound to the M4 at Junction 12. These roads are generally winding country roads with no footpaths and are not designed, or have the capacity, to handle the additional traffic, leading to the potential of serious accidents particularly with walkers and cyclists. The inclusion of an access road and car park from the development directly onto Harts Hill will only encourage traffic to avoid the A4, and create more rat runs through the villages to the north of Thatcham.

For traffic that wishes to go south towards Basingstoke and Winchester (greater employment opportunities), then this will flow over the already congested Thatcham level crossing, where traffic regularly queues for 10 mins or more today when the gates are closed. The result will be that the queues will only get worse with more traffic, which will have a significant impact on air quality as engines are left running whilst stationary and queuing.

There has been no (or limited) modelling of what the traffic impact on surrounding villages will be as a result of this development, nor will it improve safety or encourage people to walk or cycle. Neither is there anything in the plan to encourage the use of public transport or use of Thatcham railway station, which is probably too far for people to walk to. Also, there is very limited car parking available, particularly on the north side of the railway line.

Environment

This development is on a greenfield site and will result in the loss of agricultural land. Brownfield sites should be developed first, before destroying agricultural land and a valuable wildlife habitat. There is nothing in the proposals that will enhance the ecology and biodiversity of either the actual site or the surrounding countryside and will actually have a negative impact. The proposed site is adjacent to AONB land, and Bucklebury Common is already suffering from damage caused by 4x4's and off-road motor bikes. With an estimated 4000 residents that will need access to green space for exercise and recreation, there is the strong possibility that Bucklebury Common will become a 'playground' and the fragile eco-system will be permanently destroyed.

There is no detailed information on how the proposed 'community parks' will either enhance or protect the biodiversity of the surrounding countryside, and will probably be just a grassed area with a few trees, and will not replace the natural habitat that will be destroyed.

There should be a strategic/defined gap between Thatcham and Bucklebury to protect the rural identity of Bucklebury, as WBC have put in the plan for elsewhere. Should this development go ahead then the remaining gap will become so small that Upper Bucklebury will eventually become a suburb of Thatcham.

There has been little work done to identify the impact on wildlife and species that will be affected by the development, and so it is difficult to see how WBC can state that there will be a positive impact to the environment. As they haven't identified what is there today, how can they mitigate against it and say that there will be a positive environmental outcome?

Infrastructure

One of the claims of WBC is that there needs to be a large single development to be able to provide and fund the supporting infrastructure that will be needed to cater for an increase in population of 4000 inhabitants. Primarily this should fall into the following 3 areas of infrastructure provision:

a) Public Transport – there is nothing in the proposal that will increase the provision, or improve the use of public transport, and it is likely to just increase the use of private cars and all the issues that this brings regarding safety, congestion and pollution.

b) Healthcare – existing GP practises are already at capacity, and there is already insufficient dental care available within Thatcham to support the current population. There is nothing in the proposal that will address dental care provisioning, nor GP services, apart from offering a small site to the local health authority in the hope that they will do something with it. There has been no discussion or consultation with the local health authority to see if this will be a viable option, both from a practical and economic point of view for delivering health care services within Thatcham.

c) Education – there is no coherent strategy in the document on how education is going to be provided from early years through to 6th form. There are vague statements such as 'the site will provide Early Years provision' but no detail as to when it will be provided, and in what form it will take, so it is impossible to understand if the provision will be adequate or sustainable. For secondary education there is just the statement that a sum of £15M will be provided by the developers towards secondary education. There are no details provided as to whether this is going to be a new facility, where it would be located, or if the money will be spent improving the existing secondary schools in Thatcham, where there is little space for additional capacity at Kennet School. Without a clearly defined plan for education facilities there is a high probability that houses will be built long before there are any new educational facilities to support the increased population.

Alternative sites

There are many brownfield sites within West Berkshire that could be developed, and the cumulative sum of all these smaller developments would meet a significant proportion of the new housing requirements for WBC. In particular there is the Colthrop proposal which would develop an existing brownfield site, and would also have the benefit of providing a bridge over the railway line at Thatcham, which will bring a significant improvement to the congestion and pollution that exists

	<p>today at the level crossing. For reasons unknown, WBC have ignored any requests to look at alternative housing provisions and seem intent on dumping a minimum of 1500 houses on the edge Thatcham on a greenfield site.</p> <p>In summary there is very little supporting documented evidence to demonstrate that WBC have considered the detrimental impact the SP17 Thatcham NE development will have on both Thatcham and the surrounding villages and countryside.</p>

<p>2. Do you consider the Local Plan Review is sound? - Positively Prepared: The plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed need and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Justified: the plan is an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence. * Yes * No</p>	No
<p>2. Do you consider the Local Plan Review is sound? - Effective: the plan is deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground. * Yes * No</p>	
<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF. * Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing to lodge my objection to the above proposal given the size of the development and its impact on the village surrounding area.</p> <p>Of particular concern is the impact this proposed development will have on the environment. The northern boundary AONB which includes areas of ancient woodland and common land that would be adversely affected by the increase in traffic. During the recent pandemic and lockdown, the village was subjected to significant evidence of trespassing and problems and I fear that this would increase if this development goes ahead. The spectacular views across The Kennet Valley will be lost forever by this development.</p> <p>A second, but equally important, problem will be that of the increase in traffic. The road through Upper Bucklebury and the villages are already subjected to motorists using them as a means of avoiding the A4 and accessing the A34 and M4. If this development is approved particularly the plan for an exit at the north of the site onto Harts Hill Road. Traffic leaving the site is going to go in the direction of Upper Bucklebury where it will split between traffic going through Cold Ash and traffic going through Chapel Row. The roads through these villages are ill suited to additional traffic: they are rural, single carriageway roads with narrow footpaths, which would constitute a serious safety hazard given the anticipated increase in traffic. The impact of noise and increased traffic will be significant.</p> <p>When Floral Way was constructed it was meant to constitute an important boundary between Thatcham and Upper Bucklebury to break that strategic gap and result in the loss of the village's identity as a rural community. Bucklebury Vision set out a plan to protect the landscape and the visual quality of the area should be maintained. This proposed development seriously undermines that vision.</p> <p>What will future generations think of us if we desecrate this greenfield site with all the ramifications that it will have on the landscape? The system is meant to protect rural environments and the increasing awareness of the importance of such areas in the landscape is even more important that these valuable sites are not destroyed. Once under bricks and concrete they will be lost forever.</p>

<p>Please give reasons for your answer</p>	<p><u>Thatcham Northeast Development</u></p> <p>-</p> <p>There is nothing that recommends this development to me. Any decision on the WBC local plan should be delayed until so that the people of West Berkshire can decide who is best placed to deliver what they want. If you state that this is the people of Thatcham should have a referendum on the major changes proposed for our town. I have lived in Thatcham more than 35 years, and have seen very little improvement but never-ending housing development.</p> <ul style="list-style-type: none"> • Thames Water continues to discharge huge amounts of untreated sewage into local waters and fails to adequately maintain infrastructure, resulting in record fines and hose pipe bans. Why is this not a stopper for the Thatcham NE development? • The Thatcham NE (TNE) estate houses will likely be built with few concessions to progress, the local population will have gas boilers, no solar panels, tiny gardens (if any), poor drainage, awful roads, inadequate parking, poor street landscape. Will there be additional maintenance charges to residents to support complex drainage and water services with another local development (18/00964/FULEXT)? • Look at the Kennet Heath estate to see the end product of 21st century housing development, i.e. no front gardens, traffic issues and anti-social behaviour as a recent bonus. • One should argue that the proposed TNE site is an AONB even if not so designated. It is a beautiful area (unlike the town centre). • Getting in and out of Thatcham at peak hours is already a time-consuming exercise. I think that the A4 should be widened and by-pass with some significant improvements. This would help through traffic. • The town centre needs a revamp, businesses are closing (chemists, banks, pubs, restaurants and more) and footfall is low. Land that could have been used to enhance the town centre's environmental facilities has been taken up by large residential apartments. These should have been built in AONB areas and not noisy town centres. • Medical provision is poor with residents having to travel to Basingstoke or Reading hospitals to obtain treatment (even though GPs claim is necessary). Newbury has a hospital, but this fails to serve the needs of the local population. Why not use the North Hampshire Hospital in Basingstoke rather than the Royal Berkshire Hospital (n.b. not a difficult option)? • Crime appears to be getting worse, or at least social media seems to suggest this even if the statistics are mixed. There are a lot of daily reports recording stolen cars, stolen bikes and burglaries. • Thatcham requires a bridge over the railway. It has done for many years. I worked in Basingstoke until recently and I know whether you could use the crossing. Most days I would travel through Brimpton, Baughurst and Ramsdell but not through Silchester and Bramley. There is no public transport from Thatcham to Basingstoke.

<p>2. Do you consider the Local Plan Review is sound? - Consistent with national policy: the plan should enable the delivery of sustainable development in accordance with the policies of the NPPF.</p> <p>* Yes * No</p>	
<p>Please give reasons for your answer</p>	<p>I am writing re your WBC Local Plan review 2022-2039.</p> <p>I object to your plans for 1500-2500 new houses, to be built on green fields, adjacent to the North Wessex Downs AONB.</p> <p>I am prepared to appear at the public inquiry if invited.</p> <p>I object to your plan. The plan will all but join Thatcham to Bucklebury, thereby connecting a village within the AONB, which will damage the character of Bucklebury, result in increased damage to Bucklebury Common, increase usage of Bucklebury Common and damage to the River Pang. The development will not support your own vision and strategy to protect the AONB, and damage to the River Pang. The development will not support your own vision and strategy to protect the AONB, and damage to the River Pang. It will degrade the AONB, so that it becomes an Area of not quite such Outstanding Natural Beauty.</p> <p>I wish in particular to object on the themes of the Environment and Traffic.</p> <p>All page numbers of reference numbers that I have used in this objection, relate to your document "West Berkshire Local Plan 2022-2039 Proposed Submission".</p> <p>THE NUMBER OF HOUSES REQUIRED IN THE OVERALL PLAN</p> <p>You have established your housing requirement that has been:</p> <p>-“informed by the local housing need (LHN) conducted using the standard method in national planning guidance” (1.4.5)</p> <p>-“The local housing need (LHN) conducted using the standard method in national planning guidance. The LHN for West Berkshire for the year 2022, using a 2022 base date.” (4.5)</p> <p>But as you also point out</p> <p>-“West Berkshire contains a number of physical and environmental constraints which influence the location of development” (1.4.5)</p>

However WBC has not used the physical and environmental constraints to challenge the standard method used in national planning, instead to recommend to central Government that 2 WBC should use have a smaller housing requirement that does not take into account environmental constraints.

Instead you have chosen to press ahead with the standard method used in national planning, with the impact on the result.

I object to the fact that the Council has not proposed to use a non-standard method for planning the number of houses in the Local Plan, that might take into account the physical and environmental constraints within West Berkshire.

IMPACT TO THE ENVIRONMENT, IN PARTICULAR TO THE NORTH WESSEX DOWNS AONB

1. AONB protection

WBC wishes "Together with partners, to continue to conserve and enhance the North Wessex Downs AONB" (3.5, b)

You point out that "The primary purpose of AONB designation, 'to conserve and enhance the natural beauty of the area and Rights of Way Act 2000". (4.24) and that "Under Section 85 of the Countryside and Rights of Way Act 2000, the primary purpose of designation" (4.24)

You state that "As a nationally valued and designated landscape, the North Wessex Downs AONB will be conserved and its national status and this is set out in Policy SP2." (5.38)

Any development of 1500-2500 houses, within a few hundred metres of the AONB, will clearly not enhance the AONB's duty (under Section 85 of the Countryside and Rights of Way Act 2000) to support the AONB's designation to conserve and enhance the area.

By planning for a new development of 2500 homes, up to the very boundary of the AONB, you introduce the high risk of noise, air pollution and strategic objectives. The population of the extended Thatcham will overspill into the Bucklebury area of the AONB, damaging 4x4 traffic on Bucklebury Common, put more cars into the narrow single track lanes that wind down from the ridge into the Pang Valley, send more people down to the recreation ground and playground in Bucklebury Village, and 'play' around Bucklebury Ford and who litter the River Pang.

Within your section on development INSIDE the AONB (Policy SP2), you write:

"If the proposal is considered to be major development, then the second part of the policy will apply and the following factors will be taken into account:

-Detrimental effects on the environment, including wildlife and cultural heritage..." (4.28)

Your Policy SP2 applies to development within the AONB. It should equally apply to development almost adjacent to the AONB, as residents will overspill into the AONB. Whilst the houses can't move, the people will.

Your plan for 1500-2500 homes almost adjacent to the AONB will not conserve or enhance the AONB. It will clearly damage the AONB and will probably produce some environmental 3 assessment that suggests otherwise – but such an assessment will clearly show that no houses in the area that you propose for North East Thatcham will clearly be better for the AONB than building 1500-2500 houses to the AONB.

2. Protection of Rivers in the AONB

In "Our Vision", the Council stated that "Development will no longer contribute to the pollution of our air and water sources and aquifers" (3.3).

In your "Habitat Regulations Assessment for the Proposed Submission (Regulation 19) Local Plan Review (November 2019) you state that "treatment works" (4.26) and state that "There are no Habitats Sites within the Upper Kennet and River Enborne catchment areas, so there is likely to be no impact from the proposed development." (4.26).

You state that "Special consideration needs to be given the Rivers Pang and Lambourn which are groundwater-fed catchments and hydrological systems, supporting diverse, rare habitats." (5.65)

And then claim that "The Council will work in partnership with the local community, statutory advisors, developers, landowners and others to identify and prioritise areas which will provide the best opportunities to protect, maintain and enhance the District's 'multi-functional' green and blue spaces and other natural features." (5.66)

But you have provide no plan or evidence on how you will stop the residents of the 1500-2500 new houses, on the development from damaging the river.

Again, your plan will be detrimental to the AONB.

Only a few weeks ago, I had to report an Environmental Incident to the Environment Agency, when a car leaked its oil into the River Pang Ford. If there are 5000 more people, living within 2 miles of the River Pang and Bucklebury Ford, there will inevitably be more incidents.

3. Protecting Dark Skies in the AONB

You state that "The strong sense of remoteness, tranquillity and dark night skies, particularly on the open downland, is a key feature of the AONB (Policy SP2).

You state that the North East Thatcham Strategic Site will have "A Lighting Strategy which will include consideration of the impact on the nearby North Wessex Downs AONB, and measures to mitigate the impact on biodiversity" (Policy SP17).

Through sections 10.45 – 10.48 you lay out requirements for lighting controls that should be applied by any development to produce more light pollution at night, no matter what controls you endeavour to put in place.

Thus this development will not preserve the dark night skies, within the neighbouring AONB. It will degrade those dark night skies.

Again, your plan will be detrimental to the AONB.

I object to the fact that the Council is proposing to allow the building of 1500-2500 houses, on a greenfield sites almost adjacent to the North Wessex Downs AONB.

IMPACT ON TRAFFIC

	<p>If you build 1500-2500 houses between Thatcham and Upper Bucklebury, it will increase traffic on the road that runs through Row, Bradfield Southend and to the dangerous junction of Common Lane and the A340 (on the corner of Englefield Road). You cannot control where people drive. There will be 2000 or so more cars on the road and some will head north out of Thatcham. This will push more traffic into the North West Downs AONB, onto rural roads that are inadequate and have no pavement. We will mitigate the obvious increase in traffic with larger roads as that would be detrimental to the AONB.</p> <p>You have produced no modelling to suggest that this increase in traffic will not occur. If you had such modelling, it would show that houses, will cause more traffic.</p> <p>I hope that instead of your proposed plan, that you will:</p> <ul style="list-style-type: none"> - Develop a plan that requires fewer houses, taking instead into account the physical and environmental constraints - Not build on green fields, but instead have a plan that has multiple brown field developments; - Not build almost adjacent to the AONB.
<p>3. Do you consider the Local Plan Review complies with the Duty to Co-operate? * Yes * No</p>	
<p>Please give reasons for your answer</p>	
<p>4. Proposed Changes</p>
