Five Year Housing Land Supply at April 2017

1 Background

- 1.1** The National Planning Policy Framework (NPPF), published in March 2012, requires local planning authorities to demonstrate a five year land supply for housing.
- 1.2** The Local Plan requirement for West Berkshire is set out in the Council's adopted Core Strategy: an average requirement of 525 dwellings per annum over the period 2006 - 2026. The Council has also taken account of recent conclusions on the objectively assessed need (OAN) for housing assessed through the [Berkshire \(including South Bucks\) Strategic Housing Market Assessment \(SHMA\)](#).
- 1.3** The assessment of the five year supply has taken account of the policy set out in paragraphs 47 and 48 of the NPPF and guidance set out in the Planning Practice Guidance (PPG). The Council has also followed previous best practice advice set out in the CLG publication "Land Supply Assessment Checks" ⁽¹⁾.
- 1.4** This document sets out the specific sites which are likely to deliver the housing requirement. These include sites with planning permission, allocated sites, sites with permitted development for housing established through the prior approval process and other identified sites that are considered deliverable in the five year period. A windfall allowance is also included as evidence shows windfalls provide a reliable source of supply.
- 1.5** Local planning authorities should have an identified five year supply at all points during the plan period. The Council has therefore sought to identify a supply up to March 2022. As the latest monitoring data for which completion figures are available is for completions to 31 March 2016, the supply is shown for both the five year period from April 2016 up to March 2021 as well as the period to March 2022. When data is available for completions in 2016/17 the requirement will be re-calculated at the March 2017 base date.

2 NPPF Requirements

- 2.1** The NPPF (paragraph 47) requires local planning authorities to identify and update annually a supply of specific deliverable sites sufficient to provide five years worth of housing against their housing requirements with an additional buffer of 5% (moved forward from later in the plan period) to ensure choice and competition in the market for land. Where there has been a record of persistent under delivery of housing, local planning authorities should increase the buffer to 20% (moved forward from later in the plan period) to provide a realistic prospect of achieving the planned supply and to ensure choice and competition in the market for land.
- 2.2** Paragraph 48 of the NPPF states that local planning authorities may make an allowance for windfall sites in the five-year supply if they have compelling evidence that such sites have consistently become available in the local area and will continue to provide a reliable source of supply. Any allowance should be realistic having regard to the Strategic Housing Land Availability Assessment (SHLAA), historic windfall delivery rates and expected future trends, and should not include residential gardens.
- 2.3** Paragraph 49 states that housing applications should be considered in the context of the presumption in favour of sustainable development. Relevant policies for the supply of housing should not be considered up-to-date if the local planning authority cannot demonstrate a five-year supply of deliverable housing sites.
- 2.4** For sites to be considered deliverable, footnote 11 of the NPPF states they should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years and in particular that development of the site is viable. Sites with planning permission should be considered deliverable until permission expires, unless there is clear evidence that schemes will not be implemented within five years, for example they will not be viable, there is no longer a demand for the type of units or sites have long term phasing plans. The Planning Practice Guidance (PPG) (ID 3-031-20140306) is clear that planning permission or allocation in a development plan is not a prerequisite for a site being deliverable in terms of the five-year supply. If there are no significant constraints (e.g. infrastructure) to overcome, sites not allocated within a development plan or without planning permission can be considered capable of being delivered within a five-year timeframe.

¹ Land Supply Assessment Checks published by CLG in May 2009 highlighted best practice in establishing a 5 year supply of deliverable sites for housing as part of a Strategic Housing Land Availability Assessment

Five Year Housing Land Supply at April 2017

3 Five Year Housing Requirement

The Housing Requirement

3.1 The first stage in the assessment is the identification of the level of housing provision to be delivered. The PPG (paragraph ID3-030-20140306) states that housing requirement figures in up-to-date adopted Local Plans should be used as the starting point for calculating the five year supply. Considerable weight should be given to the housing requirement figures in adopted Local Plans, which have successfully passed through the examination process, unless significant new evidence comes to light.

3.2 The adopted West Berkshire Core Strategy states that provision will be made for the delivery of at least 10,500 net additional dwellings over the plan period 2006 - 2026, an average of 525 net dwellings per annum. Though the Core Strategy was found sound and adopted after publication of the NPPF, the requirement was based on the now revoked South East Plan. At the time of adoption the Core Strategy needed to be in general conformity with the policies of the regional strategy.

3.3 The PPG goes on to state that "where evidence in Local Plans has become outdated and policies in emerging plans are not yet capable of carrying sufficient weight, information provided in the latest full assessment of housing needs should be considered. But the weight given to these should take account of the fact that they have not been tested or moderated against relevant constraints".

3.4 The six Berkshire unitary authorities, together with the Thames Valley Berkshire Local Enterprise Partnership (LEP), commissioned consultants GL Hearn to prepare a Strategic Housing Market Assessment (SHMA) for the relevant housing market areas. The purpose of the SHMA is to develop a robust understanding of housing market dynamics and to provide an assessment of the future needs for both market and affordable housing, together with the housing needs of different groups within the population. It identifies the "objectively assessed need" (OAN) for housing and provides part of the evidence for establishing a new housing requirement for a new Local Plan, which will be prepared following adoption of the Housing Site Allocations DPD.

3.5 The SHMA conclusions were made public at a stakeholder event in October 2015 and the final report was published in February 2016. The conclusions show West Berkshire to be located within a housing market area (HMA) that also includes Reading, Wokingham and Bracknell Forest.

3.6 The OAN for the District is derived in stages. The 2012-based household projections published by the Department of Communities and Local Government (DCLG) provided the starting point ⁽²⁾; with adjustments to take account of more recent mid-year population estimates and an adjustment to meet an assumed increase in net migration from London, the demographic-led need was assessed as 551 dwellings per annum over the period 2013 to 2036. An upward adjustment of 35 dwellings per annum was applied to meet the economic-led need in the HMA and 79 dwellings per annum to help improve affordability (by assuming a reversal in the suppression in household formation, experienced since 2001, for the population aged under 45.)

3.7 The SHMA itself does not set a new housing target. That will be set through the new Local Plan following additional work on constraints and opportunities for development, carried out in cooperation with the other authorities within the HMA. There will also be a process of consultation and ultimately any new housing target will be tested through the examination of the new Local Plan.

3.8 The guidance is clear that the weight given to assessments should take account of the fact that they have not been tested or moderated; they are "policy off" figures that take no consideration of constraints. The Government has made clear in a letter from Brandon Lewis (Minister of State for Housing and Planning ⁽³⁾) that the outcome of a SHMA does not immediately or in itself invalidate housing numbers in existing Local Plans.

3.9 Despite this, it is apparent that the Core Strategy requirement, which was based on the requirement in the now revoked South East Plan, is seen as out-of-date. Though Core Strategy Policy CS1 allowed a period of 3 years for an update of the SHMA followed by a review of the scale of provision, the Council recognises that it can no longer rely on the Core Strategy figure to demonstrate the five year supply position.

2 The 2014-based household projections were published by the Department for Communities and Local Government on 12 July 2016. These project a lower rate of household growth than the earlier 2012-based projections: some 3,250 households less over the period to 2036 covered by the SHMA, and a lower annual average projected rate of growth in households over the current plan period from 2006 to 2026 of 438 households per annum.

3 Letter from Brandon Lewis, Minister of State for Housing and Planning to the Chief Executive of the Planning Inspectorate: 18 December 2014 at https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/390029/141219_Simon_Ridley_-_FINAL_SIGNED.pdf

Five Year Housing Land Supply at April 2017

3.10 It is difficult to assess the weight that should be attached to the OAN while the assessment of constraints and opportunities is ongoing at the level of the HMA. The objective is to meet the full OAN in the HMA, as far as is consistent with national policy. All options for doing this will be considered, including strategic cross boundary opportunities.

3.11 West Berkshire does, however, have considerable constraints. Three quarters of the District lies in the North Wessex Downs AONB and the Core Strategy has already set limits to growth in this part of the District in the period to 2026. The Eastern area is constrained by the immediately adjacent AONB boundary and by extensive areas subject to flooding. These constraints have impacted on the potential to meet the approximate Core Strategy requirement in the Eastern Area in the HSA DPD. In the East Kennet Valley, the rural service centres of Mortimer and Burghfield Common have relatively poor transport connections and there are constraints associated with the presence of two AWE bases at Aldermaston and Burghfield. The Newbury and Thatcham area has perhaps the greatest potential for growth, but there are constraints associated with infrastructure provision, areas subject to flooding and the need to respect the historic environment. To the west of Newbury is a designated Historic Battlefield which is on the Historic England Battlefields at Risk Register and the area includes a number of Historic Parks and Gardens. Newbury already has two allocated strategic urban extensions to the south and east of the town.

3.12 The requirement is calculated on the basis of both the Core Strategy requirement and the OAN. The weight to be attached to the OAN will need to be take account of the fact that it is a policy off figure.

The Five Year Period

3.13 The PPG (paragraph ID 3-030-20140306) says that local planning authorities should have an identified five-year supply at all points during the plan period. This seems to support use of a forward looking requirement, in the same manner as required by previous government guidance, and the Council has therefore sought to identify a supply from April 2016 (the latest date for which monitoring information on completions is available) to March 2022. Information is presented for the first 5 years of supply from April 2016 to March 2021 as well as for the period to March 2022.

Calculating the Five Year Requirement

3.14 There are alternative methods of calculating the five year requirement, both of which take account of previous completions. The residual, or "Liverpool", approach looks at the remaining requirement over the whole plan period and calculates the average annual completions needed to meet this. The second method, often referred to as the "Sedgefield" method, calculates the requirement when any previous under or over supply is made up by the end of the five year period.

3.15 The Council has previously favoured the residual method as the adopted Core Strategy target is to maintain residual annual average rates of completions. However, Inspectors currently tend to favour the Sedgefield method, based on the PPG guidance (paragrah ID 3-035-20140306) that local authorities should aim to deal with any undersupply within the first 5 years of the plan period where possible. This method is therefore used in the calculations below which demonstrate the requirement to meet both the Core Strategy target of 525 dwellings per annum and the OAN of 665 dwellings per annum. The shortfall is added to the first 5 years supply i.e to the period April 2016 to March 2021.

3.16 When moving from the Core Strategy requirement to one based on the OAN, the base date for the new requirement is 2013. The SHMA is an integrated assessment which captures the impacts of past under-provision of housing where relevant, therefore there is no need to include any backlog or under-provision prior to 2013.

Five Year Housing Land Supply at April 2017

Table 3.1 Housing Requirement to 2022 to meet 665 dwellings per annum (excluding buffer).

	Net requirement to meet 665 dpa
A. Requirement April 2016 - March 2021 (5 years at 665dpa)	3,325
B. Shortfall 2013 - 2016 (3 year requirement minus completions of 1,578)	417
C. Requirement 2016 - 2021 (A+B)	3,742
D. Requirement 2021/22	665
E. Total Requirement April 2016 - March 2022 (C+E)	4,407

Table 3.2 Housing Requirement to 2022 based on Core Strategy Requirement (excluding buffer).

	Net dwelling requirement to meet 525 dp
A. Requirement April 2016 - March 2021 (5 years at 525 dpa)	2,625
B. Shortfall 2006 - 2016 (10 year requirement minus completions of 5,012)	238
C. Requirement 2016 - 2021 (A+B)	2,863
D. Requirement 2021/22	525
E. Total Requirement April 2016 - March 2022 (C+E)	3,388

NPPF Requirement for Buffer

3.17 NPPF paragraph 47 requires that the five year supply of housing be supplemented by an additional buffer of either 5% (moved forward from later in the plan period) or 20% where there has been a record of persistent under delivery of housing. The PPG (paragraph ID 3-035-20140306) states that the approach to identifying a record of persistent under delivery of housing involves questions of judgement and that there can be no universally applicable test of definition of the term. It goes on to state that a local delivery record is likely to be more robust if a longer term view is taken, since this is likely to take account of the peaks and troughs of the housing market cycle.

3.18 The Council does not have a record of persistent under delivery. This issue was debated at the Core Strategy Hearings in June 2012 and the Inspector's Report,⁽⁴⁾ in paragraph 46 concludes that only a 5% buffer is required.

3.19 Since the Inspector's Report was published the Council has recorded housing delivery for an additional five years. The Council believes delivery should be measured against the Development Plan requirement. Though delivery was low in 2011/12 this was partly due to slower than anticipated delivery on a number of sites that were already under construction and demolition taking place in advance of redevelopment. Delivery in 2012/13, at 552 net additional dwellings, was above the annual requirement of 525. Though delivery in 2013/14, at 457 net additional dwellings, and in 2014/15 at 496 net additional dwellings was below the requirement, delivery is recovering following the downturn in the recession and completions in 2015/16 were above the Core Strategy target at 625 net dwellings. In 2014/15 there were over 100 demolitions (largely on one site, now redeveloped), which reduced the annual net completion figure. Appeal decisions in 2015 have supported the requirement for a 5% rather than 20% buffer and it is not considered that the 2014/15 or 2015/16 figures merit a different conclusion. An appeal decision in January 2017⁽⁵⁾ concluded that a buffer of 5% should be applied. Table 3.3 'Housing Delivery April 2006 to March 2016' shows delivery over the last 10 years. Over the plan period from 2006/07, delivery was above the annual average requirement in five of the ten years and below in five, which the Council does not consider as persistent under-delivery.

Five Year Housing Land Supply at April 2017

Table 3.3 Housing Delivery April 2006 to March 2016

Year	Net housing completions
2006/07	1064
2007/08	683
2008/09	528
2009/10	246
2010/11	199
2011/12	162
2012/13	552
2013/14	457
2014/15	496
2015/16	625
Annual Average 2006 - 2016	501

3.20 The Racecourse site allocated in the Core Strategy is anticipated to deliver significant numbers of dwellings within the five year period. Construction is well advanced. The first phase of 421 houses and apartments has been completed. The second phase of 366 apartments is partly complete, with all remaining units under construction. Construction of the homes on the third, eastern phase commenced during 2016/17 and at the end of March 2017 43 houses were under construction with the first completion due in late May/early June 2017.

3.21 The Sandelford Park site is allocated for up to 2,000 homes but has not yet received planning permission. The Council is working with the landowners and agents to progress the site and anticipates that delivery will commence towards the end of the five year period. Given the significant objections to the applications currently pending determination, the site has been removed from the supply until deliverability within the time frame can be more firmly evidenced.

3.22 It is not considered that delivery on the strategic sites can therefore be brought forward to meet the 5% buffer and this would not achieve the NPPF objective of increasing choice and competition in the market for land. The Housing Site Allocations (HSA) DPD is now at an advanced stage. The examination hearing sessions took place in June and July 2016, the Inspector's Report was received on 6 April 2017 and the DPD is due to be adopted by the Council on 9 May 2017. The objective of this DPD is to allocate sites to boost supply in the short to medium term and the majority of these are expected to deliver within the next five years. Those sites proposed in the DPD that can be brought forward early are therefore included in the supply figures, in order to boost the supply in a plan-led manner, as intended in the NPPF.

3.23 The housing requirement with a 5% buffer, to meet both the Core Strategy and the OAN, is set out below. This buffer is applied to the first 5 years (i.e April 2016 - March 2021) after inclusion of the shortfall. The table shows the requirement for the five year period April 2016 to March 2021 and for the period April 2016 to March 2022.

Five Year Housing Land Supply at April 2017

Table 3.4 2016 - 2022 Housing Requirement with 5% Buffer

	525 dpa	665 dpa
C. Requirement 2016 - 2021	2,863	3,742
F. 5% buffer (C x 0.05)	143	187
G. Total Requirement including 5% buffer for 2016-21 (C+F)	3,006	3,929
D. Requirement 2021/22	525	665
H. Total Requirement 2016 - 2022 including 5% buffer (G+D)	3,531	4,594

4 Five Year Housing Land Supply

4.1 The second stage in the assessment is to identify sites that have the potential to deliver housing during the period to March 2022. Sites include those that are allocated for housing in the Development Plan, sites that have planning permission and specific, unallocated sites that have the potential to make a contribution to delivery during the 5 year period. A windfall allowance can also be included where there is evidence that windfalls are likely to continue to provide a reliable source of supply.

4.2 The Council carries out annual monitoring of planning commitments and the housing commitments schedules form the basis of the five year supply. The NPPF states in footnote 11 that sites with planning permission should be considered deliverable until permission expires, unless there is clear evidence that schemes will not be implemented within 5 years. The Council has therefore only excluded sites with planning permission where there are indications that the scheme may not be achievable within the time frame. Sites excluded may deliver some units within the five year period and further boost supply. No discount has been applied to the remaining permissions for large and medium sites of 10 units or more, as the NPPF is clear that permissions should be considered as deliverable.

4.3 The schedules listing the sites of over 10 units make some assessment of the availability, suitability and achievability of sites. This is based on visits to sites and dialogue with developers and applicants. The sites have been phased over the 5 year period but the phasing can only be regarded as approximate. Many developers are uncertain over the timing of their planned developments, which will be influenced by market conditions.

4.4 Most of the sites that will be allocated in the Housing Site Allocations DPD are also included in the five year housing supply. The DPD is due to be adopted on 9 May 2017 and will then carry full weight in decision making.

4.5 Also included in the schedules are sites identified through the prior approval process which do not require planning permission for changes of use to residential development. Most of these are changes from office use. A 10% non-implementation allowance has been applied to those sites that were not under construction at March 2016, to allow for an element of non-completion.

4.6 The smaller sites of under 10 units are also listed in the schedules and are divided into those that were under construction at March 2016 and those where development had not started at that time. These smaller sites have not been assessed for deliverability in the same manner as the larger sites. A 10% non-implementation rate has been applied to the sites that are not yet under construction.

Windfall Allowance

4.7 The Council has included an allowance for windfall in the calculation of the five year supply. The Strategic Housing Land Availability Assessment (SHLAA) has not attempted to include smaller sites of under 10 units as they are generally very difficult to identify in advance. They nevertheless make up a significant proportion of completions every year and are expected to continue to provide a reliable source of supply. In addition some larger sites which have not previously been identified through the SHLAA do continue to come forward as windfalls.

4.8 The Council has examined past records of permissions and completions in order to derive a realistic windfall allowance. The first SHLAA was produced in 2009 and from then onwards the Council has classified sites that were not identified in the SHLAA as windfall sites. Prior to 2009/10 windfalls, for this purpose, are taken to be equivalent

Five Year Housing Land Supply at April 2017

to small site permissions. Taking a nine year period from 2007/08 to 2015/16 the average number of permissions granted on windfall sites was 136 net units per annum. The windfall allowance will be recalculated following the monitoring of permissions and completions for 2016/17.

Table 4.1 Net New Windfall Permissions 2007/08 to 2015/16

Monitoring year	Net windfall permissions
2007/08	163
2008/09	143
2009/10	130
2010/11	126
2011/12	112
2012/13	152
2013/14	111
2014/15	176
2015/16	115
Average 2007/08 to 2015/16	136

4.9 The NPPF states that a windfall allowance should not include residential gardens. Prior to June 2010 sites involving the curtilage of private residential gardens were classified as previously developed land. Permissions granted since June 2010 have been classified by the Council as greenfield if less than 50% of the proposed footprint is on the footprint of a former property and have been identified as residential garden (RG) in the monitoring schedules. In order to estimate the proportion of windfall sites that are on private gardens the Council has gone back to 2009/10 records and re-classified sites (excluding those that are for replacement dwellings) involving private gardens. Over the period 2009/10 to 2015/16 units permitted on private gardens were equivalent to 15% of total gross windfall permissions.

Table 4.2 Windfall Permissions on Residential Gardens

Monitoring year	Gross windfall permissions	Gross permissions on residential garden sites	Percentage permissions on residential gardens
2009/10	142	34	23.9
2010/11	151	27	17.9
2011/12	139	28	20.1
2012/13	171	27	15.8
2013/14	142	10	7.0
2014/15	203	18	8.9
2015/16	150	21	14.0
Total	1098	165	15.0

4.10 The Council has therefore calculated its windfall allowance based on a net figure of 136 units per annum, assuming 15.% of these are on residential gardens to give a windfall allowance of 116 net permissions per annum ($136 \times 0.85 = 115.6$).

Five Year Housing Land Supply at April 2017

4.11 The Council has looked at the pattern of delivery from windfall sites from 2008/09 to 2015/16. Of the windfall dwellings permitted over this period, 7% were completed in the year of permission, 27%, 22%, 13%, 10% and 1% completed in the subsequent five years. This pattern has been applied to the windfall allowance of 116 dpa to phase the delivery of the windfall allowance in the housing trajectory. This allowance has a built in non-implementation allowance of 20% for sites that may lapse or deliver after the five year period. By calculating the allowance based on new permissions there is no double-counting of sites already in the supply. The total windfall allowance for the period 2017 - 2022 is 284 units.

Table 4.3 Phasing the windfall allowance: Projected completions (based on windfall allowance of 118 dpa)

Year of Permission	Projected net windfall completions					
	17/18	18/19	19/20	20/21	21/22	Total
2017/18	8	31	26	15	12	92
2018/19		8	31	26	15	80
2019/20			8	31	26	65
2020/21				8	31	39
2021/22					8	8
Total allowance to 21/22	8	39	65	80	92	284

Schedules of Sites

4.12 The schedules of housing sites are set out in Section 5 and demonstrate that there is sufficient supply of housing land to meet the requirement.

4.13 The schedules are summarised below. The total supply is 4,817 for the period April 2016 to March 2022 with a supply of 4,299 net dwellings for the five year period April 2016 to March 2021.

4.14 In addition to the sites listed in the schedules there will be further supply from identified sites, including those currently under consideration, and from new applications.

Five Year Housing Land Supply at April 2017

Table 4.4 Summary Deliverable Supply

Deliverable Sites	16/17	17/18	18/19	19/20	20/21	21/22	Total 16/17 -21/22	Total 16/17 -20/21
Core Strategy allocated sites	83	234	198	175	183	163	1,036	873
Permitted non-allocated sites of 10 or more units	272	50	268	351	234	100	1,275	1,175
Permitted small sites under 10 units	108	120	102	74	39	7	450	443
Housing Site Allocations DPD sites			148	386	542	156	1,232	1,076
Identified sites without permission at March 2016			20	87	172	0	279	279
Sites through prior approval process	57	110	94				261	261
Windfall allowance		8	39	65	80	92	284	192
Total Deliverable Supply	520	522	869	1,138	1,250	518	4,817	4,299

4.15 The housing land supply is compared to the requirement in the tables below. It is equivalent to between 5.3 years to meet the OAN and 7.4 years to meet the development plan requirement for the next five years to 2022. For the five year period April 2016 to March 2021 the supply is equivalent to 7.4 years to meet the development plan requirement and 5.5 to meet the OAN. These figures include the buffer of 5%.

Table 4.5

	2016 - 2022		2016 - 2021	
	Core Strategy 525 dpa	OAN 665dpa	Core Strategy 525 dpa	OAN 665dpa
5 Year Housing Requirement	3,531	4,594	3,006	3,929
Deliverable Housing Supply	4,817	4,817	4,299	4,299
Surplus supply over requirement	1,286	223	1,293	370
Supply in years for 5 year period	7.4	5.3	7.4	5.5

5 Schedules of Housing Sites

5.1 The housing sites which make up the five year supply are set out in the following schedules. They have been phased over the five year period based on site visits, contact with the developer or agent and past delivery rates. The projected annual delivery rates can, however, only be taken as approximate. In many cases developers are uncertain over the phasing of developments and there are a number of factors which may influence delivery. The important point is that the sites that are included within the supply are all ones with a realistic prospect of delivery within the period to March 2022.
