Dear Sirs

I wish to object to the scale of this oversized development plan on environmental grounds.

I walk daily in Blacklands Copse with its marked improvement in biodiversity, since the recent woodland regeneration and the local environs of Upper Bucklebury across the Common, where I regularly encounter a variety of wildlife, including deer (Roe and Muntjac), badgers (live setts) and birds, which would be severely impacted by inevitable increase in traffic and as a consequence, air pollution. Obviously, this pollution would affect also the local village population and could cause severe health problems.

I, particularly find the lack of infrastructure planning and vague proposals (country parks) in these key areas very unsound.

Yours faithfully
