OBJECTING to plan SP17 as it is unsound due to the following reasons and negative impacts:

- I enjoy walking in the countryside and woodland in our local area. This countryside supports several fragile ecosystems, such as ancient woodland and heathlands. I am also concerned about losing more of the natural habitat for our local wildlife.
- With more residents and therefore cars, we will experience higher levels of pollution which affects the health of people who live nearby. There is also a higher chance of more accidents.
- I currently use the Chapel Row GP surgery, which is already at capacity. The addition of these houses in the immediate area will directly impact my first line of health care for doctor appointments.

Sincerely,
Hannah Cooper
