Hello, I am writing to reject the Pincents Hill Development.

This space is beautiful and green and enjoyed by the local community and bridges us to the natural world. The natural world is essential for feeling good, and having a connection with life itself in it's true form beyond brick and concrete. There is plenty of that around and this area is not fit for more development. Tearing open to Earth here to fill it will more construction and pollution, concrete, litter, unwanted neighbors; removes the peace, fresh air, dog walks, picnics, wild cloud gazing. When nature can't defend itself, we are here to be a voice for it, and to defend it with our own hands. This site isn't viable for making quick money from. If somebody came along and decided to dig up your garden because they'd make money from it would you enjoy that?

Some thoughts left from the top of my head, but it is a no from Calcot and Tilehurst. We'll make use of the green and the beautiful and protected natural species of this area.

Thank you,
Liam
