Hi there

I just wanted to express my dismay at the amount of housing planned for Thatcham without any consideration of the necessary infrastructure to support this.

When oh when will you realise that a bridge over the railway line is needed, another secondary school and doctors surgeries.

Without this - you will just be adding to the already existing problems of overcrowding and reduced quality of services- surely this is already apparent to the council and their experts.

Please rethink this - the country is already on its knees!!

Please don't expect to pay anymore than a 5% increase on council taxes if these poor plans go ahead.

Thanks
