Comments

It does not appear that the pre-submission consultation responses have had any impact on the selection of the preferred site options for new housing. This is despite a large number of respondents highlighting that the Smitham Bridge Road site has a significant number of drawbacks including an awkward access route along Church Street / Smitham Bridge Road, and known flooding/drainage issues and concerns. This site is also further from some key amenities than the alternative site east of Salisbury Road e.g. Schools and Leisure Facilities.

A number of commentators (including myself) against the original draft plan had specific concerns regarding the way individual sites had been scored and assessed and that each site should have been scored on its own merits rather than combining certain sites. It was and is still felt that this has skewed the scoring to down score Salisbury Road, which has had previous town objections (when Lancaster Gate was developed).

A significant number of the comments against Smitham Bridge relate to traffic and these appear to have been brushed aside by HTC with a comment that WBC Highways didn't object. I think the Highways team should be specifically asked to look at this again and explain why the additional traffic from a further 44 houses is not a problem given that there is on-street parking on Church Street and the junction of Church Street, Church Way, Smitham Bridge Road and Church Lane is a bottleneck.

Section 2 of the Consultation Statement doesn't appear to reference the Pre-Submission Consultation at all. Given that there were 112 detailed written responses, with a number of common themes throughout I think it would be useful to show a summary of those themes. A good number specifically relate to the Smitham Bridge Road site concerns.
