Dear Planning,

I am writing to object to the proposed housing development of 12 new homes in Cottrell Close, Hungerford.

I have listed the following reasons below -

- Noise pollution from construction traffic for the period of building.
- Traffic disruption during the period of building. To include road surface damage, on a one way in / one way out road.
- Access to A4 delays with increased number of residents coming to/from the close.
- The increased traffic flow, in a currently quiet and child friendly close, during the build phase and in the future with subsequent vehicles within the close.
- Safety of residents, particularly young children that currently play in the close, with no foot path to the suggested new development.

We have a young family, and live here because of access to the green spaces and safe area within Cottrell Close. With added houses & construction traffic, brings added vehicles and unsafe roads.

I would plead you to reconsider your suggested location.

Many thanks,
Charlotte Stephens
